UES documented testing results and observations and communicated findings to the project team to support construction decision-making and verification of material performance. When site access or specialty inspection needs arose, coordination occurred with the contractor to facilitate safe and efficient execution of services. Overall, the work supported adherence to applicable standards, project requirements, and established construction practices throughout the construction phase.

Construction Materials Testing

Project Description

UES is currently providing construction materials testing services to support quality assurance and verification of construction materials and workmanship throughout the project.

Services include field sampling and testing of concrete, soils, aggregates, and other construction materials; preparation and handling of laboratory specimens; observation of construction activities; and documentation of test results. Concrete sampling and strength verification testing were conducted, with initial curing provisions coordinated with the contractor in accordance with project requirements.

UES technicians performed requested testing and inspections in alignment with construction activities. Results were documented and communicated to the project team to support timely decision-making and quality control. These services assisted the owner and contractor in maintaining compliance with project specifications and recognized construction standards throughout the construction phase.

Geotechnical Engineering **//**
Construction Materials Testing

Project Description

UES provided a subsurface exploration which included evaluating the soil and groundwater conditions at the site and to provide geotechnical recommendations suitable for this project. The project included the construction of one (1) new building with a footprint of approximately 7,500 sf. Approximately one half of the building will consist of two (2) apparatus bays and the other half will consist of office spaces, restrooms, a kitchen, two classrooms, a utility closet, and a storage area. Additionally, drive lanes and parking areas were part of this project.

The scope of the exploration and analysis included the subsurface exploration, field and laboratory testing, engineering analysis and evaluation of the subsurface conditions, provision of foundation recommendations, and preparation of this report. A total of four (4) borings were drilled at the site, ranging from depths of 10 ft to 35 ft. Field observations included standard penetration tests, water level observations, and ground surface elevations.

One challenge was that the firefighters had recently dug trenches for trench training (trenches drawn in picture below as reference), so we had to find solutions to remediate potential settlements that could be contributed by undocumented backfill. Our solution included identifying areas of depression that were not originally in our scope of work. Upon further investigation, we discovered the trench safety pits previously performed by the fire staff as directed by the fire chief. Due to the discovery and our geotechnical recommendations, we avoided potential failures in the proposed flatwork areas that could've posed safety and financial issues for the City of Corpus Christi Fire Department.

Geotechnical Engineering **//**
Construction Materials Testing

Project Description

UES provided geotechnical engineering and construction materials testing services for the new Corpus Christi Police Training Academy, located off Yorktown Boulevard in Corpus Christi, TX. The project included the construction of a two-story building with an approximate footprint of 30,000 sf, a new running track, and associated pavement parking and driveway areas.

The scope of the exploration and analysis included the subsurface exploration, field and laboratory testing, engineering analysis and evaluation of the subsurface soils, provision of geotechnical recommendations. The field exploration, to evaluate the engineering characteristics of the subsurface soil materials, included reconnaissance of the project site, performing the test boring operations and obtaining disturbed split spoon soil samples and relatively undisturbed Shelby tube samples. Thirteen (13)borings were performed for the purpose of providing geotechnical recommendations.

For the construction materials testing scope, UES provided soil density and concrete testing for the facility. We provided concrete testing for the columns and identified that the concrete was too weak to support the structure. We also inspected the reinforcement in the columns and provided concrete testing for the new concrete. We were able to work with the contractor to meet the accelerated construction timeline.

Geotechnical Engineering

Project Description

UES performed a field exploration to acquire soil samples from the project site and test them in our accredited labs. This endeavor encompassed subsurface investigation, soil description, preparation of boring logs, report delivery, and recommendations based on findings.

The fieldwork involved site reconnaissance, and drilling eight (8) test borings for soil extraction. The drilling process utilized a rig equipped with a rotary head and solid stem augers, employing mud rotary techniques for advancement.

Field tests and observations included standard penetration tests, water level observations, and ground surface elevations. The samples obtained by this procedure were extruded by a hydraulic ram in the field.

During the project, we experienced some challenges regarding the unique terrain of Brownsville. The project site contained soft soil and matter that made it non-conducive for large loads. To overcome this challenge, we were able to provide recommendations to mitigate the settlement of the tank.

ADDITIONAL COASTAL BEND PROJECTS

UES has provided similar geotechnical engineering, construction materials testing, and environmental services for numerous municipalities and other similar entities throughout South Texas. Some of our projects include:

- Vanguard Academy, Van Gogh Campus Improvements - Edinburg, TX
- Vanguard Beethoven Campus Sports Field Lighting - Edinburg, TX
- City of Combes, Economic Development Community (EDC) Subdvision - Combes, TX
- Villa De Las Flores, Street Improvements - Floresville, TX
- City of Port Isabel, Laguna Madre Park - Port Isabel, TX
- TSTC Harlingen, Pavilion Renovations - Harlingen, TX
- Las Cruces Subdivision Phases 1-3 - Alamo TX
- Rabb Ranch Phases 1-2 Subdivision - La Feria, TX
- Metronet - Weslaco, TX
- Monopole-Hidalgo 2 - Edinburg, TX
- FHR Rufugio Tank - Refugio, TX
- Port Isabel Baseball Fields - Port Isabel, TX
- Texas Workforce Commission (TWC) McAllen Parking Lot Repair - McAllen, TX
- Valley Baptists Cone Oasis Camp Levee & Pump Station - La Feria, TX
- Valley Baptists Country Borrow Site - La Feria, TX
- Veterans Crossing Subdivision - San Benito, TX
- Port Isabel San Benito Navigation District Pilot Laydown Area - Port Isabel, TX
- Aquarium at Rockport - Rockport, TX
- Port of Brownsville, Cargo Dock 3 Reconstruction- Brownsville, TX
- Port of Brownsville, Business Park - Brownsville, TX
- Port of Corpus Christi, Pelican Island Breakwater Improvements- Corpus Christi, TX
- Port of Corpus Christi, Coast Guard Station Pier Reconstruction - Corpus Christi, TX
- Port of Corpus Christi, Heavy-Duty Dock - Corpus Christi, TX
- Refugio County Courthouse Remediation - Refugio, TX
- Sherrill Park Restroom - Corpus Christi, TX
- Calallen Police Substation - Corpus Christi, TX
- Southside Police Substation - Corpus Christi, TX
- City of Corpus Christi, Public Health Bldg Site Improvements - Corpus Christi, TX
- Cole Park Splash Pad - Corpus Christi, TX
- Corpus Christi Bay Bluff Shoreline Protection - Corpus Christi, TX
- Holly Road Project - Corpus Christi, TX
- Laguna Shores Road, Segments 1-3 - Corpus Christi, TX
- Slough Road - Corpus Christi, TX
- New Hamlin Middle School - Corpus Christi, TX
- Port of Corpus Christi, New Maintenance Building - Corpus Christi, TX
- London ISD Early Childhood Center - Corpus Christi, TX
- New Goliad ISD Middle School - Goliad, TX
- GPISD Maintenance Facility - Gregory, TX
- Calallen ISD Transportation Facility - Corpus Christi, TX
- Goliad Elementary School - Goliad, TX
- Huntwick Avenue Pavement Improvements - Corpus Christi, TX
- Texas A&M University Kingsville Cooling Tower - Kingsville, TX
- Three Rivers High School Turf Field - Three Rivers, TX
- City of Corpus Christi, Museum of Science & History Improvements - Corpus Christi, TX
- Oso WWTP Storage Shop - Corpus Christi, TX
- St. Paul Elevated Storage Tank & Generators - Sinton, TX

FIRM'S UNIQUENESS AND RELEVANT CHARACTERISTICS

Commitment and Capacity to Perform and In-House Resources

UES owns **23 different drill rigs** combined in Texas, with more support from our national team if required. These track, ATV, and truck-mounted rigs allow us to dispatch any combination of the rigs needed to meet any schedule. UES also maintains **in-house, full-service laboratories** in our office locations. Our laboratories are certified and accredited by third party agencies, like AASHTO, validated through USACE, and some labs are certified through TxDOT.

UES maintains an adequate backlog to employ staff from our 12 offices across Texas. All staff proposed in this document are currently assigned to multiple projects but will be made available to the City as needed. If the City tasks UES with serving multiple/concurrent projects, we will be able to service them reliably and effectively due to the points made, below.

- UES has the ability to utilize up to **23 additional rigs** in Texas. This allows us to mobilize multiple rigs for simultaneous projects, if needed.
- Technicians can provide multiple field services. For example, UES technicians can provide asphalt, earthwork, concrete, reinforcing steel placement, drilled pier inspection, etc.
- UES has additional staff that can be assigned to non-City of Edinburg projects, or to assist in periods of high activity, so that the designated team is available for new requests.
- Projects are assigned unique project numbers and all reporting is tracked by that number.
- Over 50 environmental-specific personnel located statewide to assist with all environmental-related requests.

Due to the nature of our business, our **UES project team and staff will be able to serve any volume of work under the proposed contract**.

Technical Experience and Advantages

Steel Inspections and Special Inspections: UES provides **comprehensive, in-house, steel inspection services**, including verification of material certifications, dimensional checks, welding observation, and structural steel placement inspections. These services help ensure that steel components meet project specifications and industry standards, supporting the structural integrity and safety of the City's projects. By delivering thorough and timely steel inspections, we help keep construction on schedule while minimizing potential rework and ensuring compliance with design requirements. **Amanda Richards, CWI**, Steel Inspector, will be the City's main point-of- contact for all steel inspection requests.

Triaxial Testing Equipment: UES owns triaxial testing equipment including test cells, load frames, pressure control panels, and requisite software. Triaxial testing of soils provides valuable soil strength and shear information for safe and effective design and construction of embankments and foundation systems. More accurate measurements of soil strength and permeability are critical for analysis of global/slope stability. Typical tests include CD (consolidated drained), CU (consolidated undrained), and UU (unconsolidated undrained).

Ground Penetrating Radar (GPR): UES can provide GPR services if necessary. UES most often uses GPR during construction to identify rebar placement and map concrete floors and walls.

Virtual Design Consulting (VDC): Our virtual design consulting team works closely with architects, engineers, and contractors to help integrate and manage subsurface and building information models (SIM/BIM) for design-construction projects.

Team Collaboration and Quality Work

The project team is fully capable of performing all required testing and inspection services and has experience providing **geotechnical engineering and construction materials testing services for numerous IDIQ/On-Call contracts for municipal clients**. **The team will be made available to the City of Edinburg as needed.**

The team will review plans and specifications prior to construction, prepare daily construction progress reports, and observe work in progress and upon completion. They will obtain material samples for laboratory analysis conducted in our **in-house laboratories**, schedule and perform routine materials and field density testing to confirm material quality and workmanship, coordinate and document all test results, and carry out preliminary and final testing and inspections for routine construction projects. The team will also provide input regarding acceptance and prepare all required testing and inspection reports while maintaining complete and accurate records of testing, inspections, plan reviews, and related findings.

Communication with the City of Edinburg and Working Closely with the City

UES' vision is to promote sustainable growth, development, stewardship and community to our employees and clients. UES strives to build lasting relationships with our clients that are mutually beneficial and generate success. All members of the UES team are dedicated to your needs and will work to find a solution in any situation. UES will solve your challenges from start to finish during land acquisition, design and construction. In response to client feedback, there are three (3) main areas in which UES has improved our communication to better facilitate project delivery.

Proactive Communication: Opening up proactive communication from UES' project manager to the contractor, thus supplementing the contractor requests to our dispatch office, reduces late service requests and missed events. This serves to reduce or prevent work proceeding prior to acceptance testing, which can lead to delays in construction and possible removal of some construction elements.

Keeping Up with Project Team: Greater efforts to keep up with the project team as it can evolve over the life of a project. This can address changing contractor personnel or City of Edinburg staff, as well as UES internally sharing this evolution with our team of differently skilled staff at appropriate times. This reduces delays with invoice delivery questions, delays to reports, and delays to RFI or other project type decisions.

Balance: Continuing to balance the need to be in touch, versus waiting for the City of Edinburg to call. UES has established Principal level accountability, as well as assigning a senior technical program manager. Together, Principal in Charge and Program Manager will maintain appropriate contact so that the City of Edinburg is not waiting on UES. While this may impact large construction issues, it can also be as simple as our team making periodic contact for construction document availability, so that a requested estimate may be prepared, again avoiding delays.

Following Codes and Regulations

UES will follow all relevant and necessary codes and regulations for geotechnical and materials testing work performed for the City. This will include any ASTM testing procedures necessary as specified in the project specifications. UES is familiar with and follows all City, County, State, and Federal codes, policies, and regulations applicable to our projects and routinely incorporates design and construction requirements of individual entities into our services. We maintain an in-house electronic library of these requirements and will reference these requirements when preparing cost estimates for services. These requirements will be available to the project team before the commencement of work.

Environmental Reporting - Regulatory Compliance & Agency Coordination

UES will identify applicable federal, state, and local requirements early in the process and maintain communication with the City regarding potential compliance pathways. Our team has experience coordinating with TCEQ and other agencies on PST/LPST sites, Voluntary Cleanup Program sites, Texas Risk Reduction Program documentation, SPCC compliance, stormwater issues, and corrective action planning. UES will support the City by preparing regulatory submittals, responding to agency comments, participating in meetings, and developing technically defensible strategies that move projects toward closure while limiting unnecessary cost and schedule impacts.

OFFICE LOCATIONS AND OFFICE SERVING THE CITY OF EDINBURG

UES will serve the City of Edinburg through our **Rio Grande Valley office**, with our **Corpus Christi office serving as support**. We have an additional 10 offices, with a statewide team of 802 and a national team of more than 4,200 ready to assist if needed. Please see our office locations below.

APPROACH TO HANDLING PART-TIME STAFFING NEEDS FOR SMALLER ASSIGNMENTS

Availability of Personnel

We maintain adequate backlog to employ over 150 personnel just in Central Texas. We are also supported by a statewide team of 802, and a national team of 4,200. All staff, both in-office and on-site, are currently assigned to multiple projects but **will be made available to the City as needed**, with key personnel selected based on their educational background, project experience, and availability.

We have the availability, resources, manpower, and knowledge to perform the City's requested geotechnical engineering and construction materials testing services. Our team can mobilize throughout the state and nationwide to access all City of Edinburg sites. If a change of key staff occurs, we will notify the City within ten (10) calendar days. We will provide all applicable information and receive approval before any personnel commence work.

Number of Personnel

UES will serve this contract with our Rio Grande Valley (RGV) and Corpus Christi (CC) team of 44 with additional support from our Houston (HOU) offices, as needed. UES details our Texas personnel by area and discipline, below.

Personnel by Area and Discipline						
	CC/RGV	HOU	SA	AUS/RR	DAL	FW
Licensed Professional Engineers/EITs	**3**	14	3	3	17	7
Licensed Professional Geoscientists/GITs	**0**	9	2	1	4	3
Certified Welding Inspectors/ICC Steel Inspectors	**0**	6	2	0	4	4
Engineering Technicians - Field	**13**	89	39	24	98	53
Engineering Technicians - Laboratory	**8**	19	23	9	38	28
Project Managers - Geo/CMT/Env	**6**	33	8	7	26	12
Field Exploration Support	**3**	11	9	1	18	2
CMT Estimators	**1**	3	2	1	6	4
CMT Dispatchers	**1**	3	2	1	3	2
Administrative/Support Staff	**9**	30	13	1	51	10
Total Staff Per Office	**44**	217	103	48	265	125
Total Staff - UES Texas Region	**802**					

Current Workload

Geotechnical engineering and environmental consulting projects have a duration of two (2) weeks to two (2) months, and our team services multiple projects at a time. Construction materials testing projects vary in duration from six (6) months to two (2) years depending on the size and complexity of each project. UES has the staff and equipment to service multiple construction materials testing projects concurrently. Construction materials testing scheduling is closely tied to the contractor's schedule. We arrange our schedules in a pattern that changes through the life cycle of construction and follow the direction of the contractor's schedule.

Please see a list of our current workload for the Rio Grande Valley and Corpus Christi offices, provided below. **This list will not impact our ability to provide efficient and quality service to the City of Edinburg.**

- 701 Crown Harbor Residential Structure
- Benny's Shack Island Restoration
- Duplex Structures and New Pier
- Rabb Ranch 1&2 Subdivision
- City of Corpus Christi Detention Center
- Ben Garza Elementary Generator Pad
- Petronilla Creek
- Little Bird Island North
- Matagorda Harbor Boat Ramp 2
- London Towne 9A and 9B
- Salem Crossing Phase 1
- Animal Shelter Building Pavement
- Rockport Marina Village
- Ayers Point Oyster Reef Restoration
- Harbor Playhouse Front Entrance Walkway
- Wheeler Ave & Huff Street Pump Station Improvement
- Masten Ranch Barndominium
- Three Rivers High School Turf Field
- Ingleside Main Street
- Beach Break Development
- Edinburg Business Park
- Los Fresnos TX-1904 Proposed Monopole
- Attx3361 La Feria Morales

3. TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

CITY OF EDINBURG'S MAIN POINT-OF-CONTACT

James Bauer, PE, Gulf Coast/South Texas Area Manager oversees our Corpus Christi and RGV offices and is in charge of several municipalities across South Texas. He will serve as the **City's main point-of-contact for this contract**. He has contractual responsibility for the City's projects, and will continue to hold responsibility for this contract. James will also be overseeing all CMT services for this contract.

jbauer@teamues.com // 956.201.4797 // 11818 West Business Hwy 83, Unit 1, La Feria, TX 78559

James has over **22 years of experience** providing services to South Texas clients. He will interface with the project team and will coordinate each request with the service line Project Manager (PM) to provide a project-specific budget or initiate services. James will use his extensive field experience to analyze problems and situations to develop practical, cost-effective solutions.

PROJECT TEAM QUALIFICATIONS AND EXPERIENCE

Project Team Assigned to the City of Edinburg

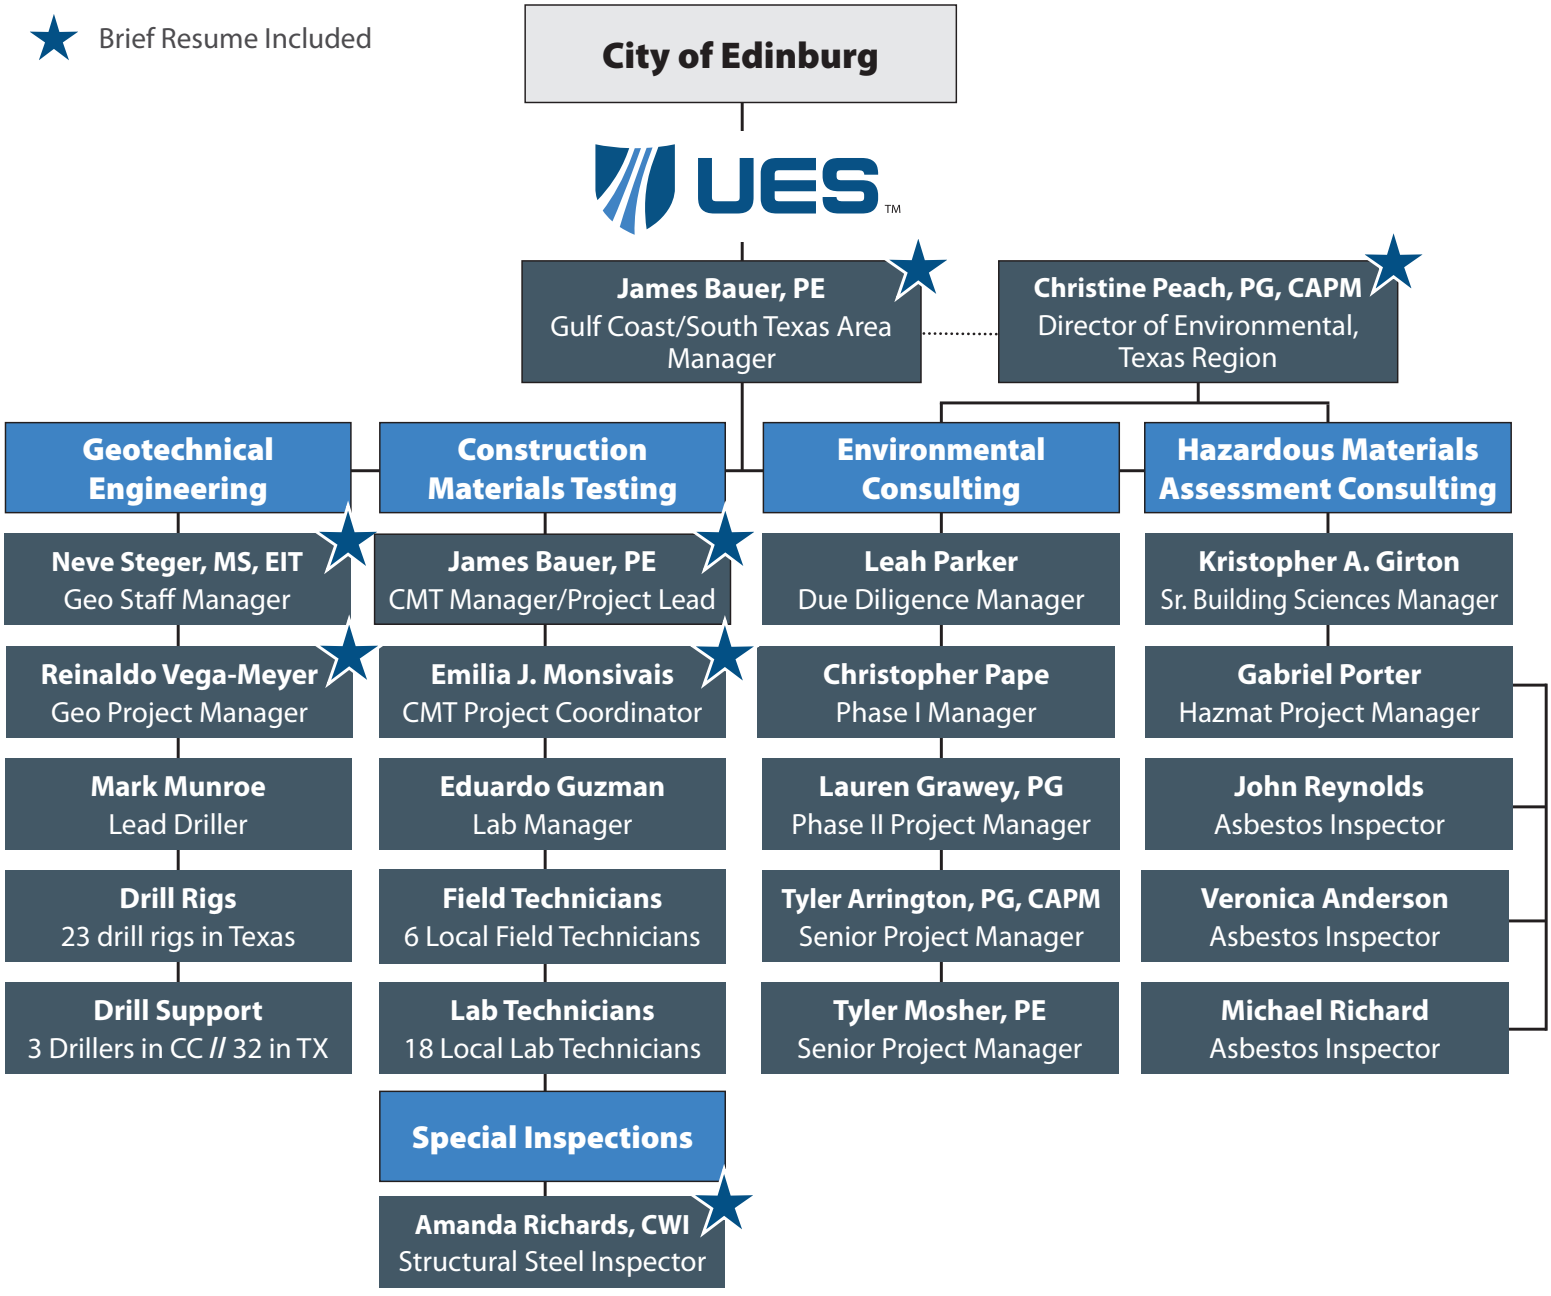
In addition to James Bauer, PE, the following team members will be assigned to the City of Edinburg and will be available for any requests. Resumes for these key personnel can be found starting on page 23 of this response.

Neve Steger, MS, EIT, Geotechnical Staff Engineer, will serve as the **City's contact for geotechnical needs** Neve has **over three (3) years of experience** providing geotechnical engineering services. Neve is based in the Rio Grande Valley and manages geotechnical operations for the local office. She serves as project manager for geotechnical projects from initiation through completion, including drilling coordination and logistics, field investigations, laboratory testing assignments, engineering analysis, and preparation of geotechnical engineering reports.

Reinaldo Vega-Meyer, Geotechnical Project Manager, will serve as **an additional contact for geotechnical engineering** needs. Reinaldo has **over 32 years of experience** providing geotechnical engineering services. He has a background in civil/geotechnical engineering, geosynthetics-engineered structures, and aerial image and data acquisition.

Emilia J. Monsivais, CMT Project Coordinator, will serve as **an additional contact for construction materials testing** needs. Emilia has **over six (6) years of experience** and specializes in preparing and submitting CMT testing proposals, coordinating with clients to discuss project requirements and fees, and ensuring compliance with safety protocols.

Amanda Richards, CWI, Structural Steel Inspector, will serve as the **City's main contact for all steel-related services** requested by the City. Amanda has **over 16 years of experience** within the steel industry, where she has served as structural welder and inspector. She has experience with field construction inspection of bolted and welded connections on large to small scale construction projects, while also employing visual and non-destructive testing methods.



Christine Peach, PG, CAPM, Director of Environmental Services, Texas Region, will serve as the **main point-of-contact for all environmental consulting and hazardous materials consulting services**, if needed. Christine has **over 23 years of experience** in the environmental consulting industry. She has conducted a number of Phase I Environmental Site Assessments (ESAs) and environmental site investigations across various market sectors, such as municipal, higher-education, commercial and industrial facilities.

ORGANIZATION CHART

UES provides an organizational chart that demonstrates the line of authority and responsibilities of the key personnel who will be assigned to the City of Edinburg, below. Resumes for the proposed key personnel to be committed and assigned to this project can be found on the following pages.

★ Brief Resume Included

KEY PERSONNEL RESUMES

UES provides resumes of the team assigned to the City of Edinburg below and on the following pages.

EDUCATION

B.S. Civil Engineering,
University of Missouri

YEARS OF EXPERIENCE

22 years

LICENSES & CERTIFICATIONS

Professional Engineer, Texas,
No. 129201

JAMES BAUER, PE

GULF COAST/SOUTH TEXAS AREA MANAGER

James is the Area Manager for UES Gulf Coast/South Texas Region. He has over 22 years of experience in geotechnical engineering and materials testing. He is responsible for quality assurance and quality control on each project and has been the Project Engineer/Project Manager, and Geotechnical Liaison on numerous geotechnical engineering studies across the Midwest and State of Texas throughout his career. James' project experience includes municipal, transportation, federal, healthcare, commercial, residential, higher education, K-12, and industrial projects. His design experience includes levees, water impoundments, earthen dams, stream river bank stabilization, slope and retaining wall global stability, clay/coal mine mitigation, karst exploration and mitigation, expansive clay soil mitigation, settlement analyses, ground improvement/modification, shallow and deep foundations, and pavements. He is also skilled at advanced field testing, including: inclinometer installation and monitoring, and non-destructive testing methods including; impact echo, audible sounding, ground penetrating radar, electrical resistivity tomography, cross-hole sonic logging.

PROJECT EXPERIENCE

CITY OF CORPUS CHRISTI GEO AND CMT MSA

CORPUS CHRISTI, TX

James is the point of contact for this contract and leads the geotechnical engineering and construction materials testing scope of work for the awarded task orders. Most of these projects are capital improvements projects.

CITY OF PRIMERA, STREET IMPROVEMENTS

PRIMERA, TX

UES completed construction materials testing and inspection services for the City of Primera Street Improvements project, including field compaction testing, concrete sampling, strength verification, and coordination of specialty inspections as requested. Testing was performed using standardized procedures and scheduled to align with construction activities.

CAMERON COUNTY, SH 100 & 2ND IMPROVEMENTS

PORT ISABEL, TX

UES is currently providing construction materials testing services, including field sampling and testing, laboratory specimen preparation, construction observation, and reporting.

CITY OF PORTLAND, PHASE 11 IMPROVEMENTS

PORTLAND, TX

UES provided construction materials testing services for multiple phases of the City of Portland Improvements contract. This street improvement project is one of the series of maintenance projects necessary to keep the streets in proper condition.

EDUCATION

B.S. Marine Science and Environmental Engineering, University of South Carolina

YEARS OF EXPERIENCE

3 years

LICENSES & CERTIFICATIONS

Engineer in Training #84860

NEVE STEGER, MS, EIT

GEOTECHNICAL STAFF ENGINEER

Neve is based in the Rio Grande Valley and manages geotechnical operations for the local office. She serves as Project Manager for geotechnical projects from initiation through completion, including drilling coordination and logistics, field investigations, laboratory testing assignments, engineering analysis, and preparation of geotechnical engineering reports. Neve also provides project management support for Corpus Christi.

PROJECT EXPERIENCE

VANGUARD ACADEMY, MONET MISSION CAMPUS

MISSION, TX

UES provided geotechnical engineering and construction materials testing services for this project in Mission, TX, which involved construction of a 55,000 sf, single-story school building, two lighted sports fields, and surrounding pavements. The geotechnical scope included subsurface exploration consisting of 21 borings across building, pavement, and lighting areas; development of stiffened slab-on-grade foundation recommendations using WRI criteria; drilled pier design parameters for site lighting; and pavement design guidance to support anticipated loads. Field sampling and groundwater observations informed foundation and pavement recommendations. Construction materials testing services included concrete testing for strength verification to support construction quality control.

VANGUARD ACADEMY, VAN GOUGH CAMPUS IMPROVEMENTS

EDINBURG, TX

UES provided geotechnical engineering services for this project with Vanguard Academy. The project included the construction of a new school building, gymnasium, parking lot, along with a detention pond expansion. The geotechnical engineering scope included drilling a total of 15 borings. Five (5) borings were drilled at the building site at depths of 30 ft and ten (10) borings were drilled at the pavement site at depths of 5 ft to 10 ft.

VANGUARD ACADEMY, BEETHOVEN CAMPUS SPORTS FIELD LIGHTING

EDINBURG, TX

UES provided geotechnical engineering services for this project with Vanguard Academy. The project included the construction of field lighting for an existing athletic field. The site was an open lot consisting of two (2) existing soccer fields. The two (2) proposed field lights were located at opposite corners outside the south playing field. A total of two (2) borings were drilled at the site, each at a depth of 30 ft. Relatively undisturbed soil sampling and groundwater observations were conducted.

ADDITIONAL RGV AREA EXPERIENCE

- Valley Baptists Cone Oasis Camp Levee & Pump Station - La Feria, TX
- Valley Baptists Country Borrow Site - La Feria, TX
- Veterans Crossing Subdivision - San Benito, TX
- Port Isabel San Benito Navigation District Pilot Laydown Area - Port Isabel, TX

REINALDO VEGA-MEYER

GEOTECHNICAL PROJECT MANAGER

Reinaldo Vega-Meyer has a background in civil/geotechnical engineering, geosynthetics-engineered structures, and aerial image and data acquisition. Reinaldo provides recommendations that ensure products, systems, and designs are tailored to exact requirements and achieve objectives, including being on time and on budget. Reinaldo is effective in analysis, and utilizing tools and combinations of applications to devise solutions that are technically sound, practical, and best value advice. Expertise, thorough training, and dedication to civil engineering accumulated over more than sixteen years of successful collaboration in several projects, including international construction and geosynthetic-related structures. Continuing in-depth education has ensured high-quality, state-of-the-practice professional development, as well as the latest innovations and information in the specialty area of geotechnical engineering.

PROJECT EXPERIENCE

CITY OF CORPUS CHRISTI, MUSEUM OF SCIENCE AND HISTORY IMPROVEMENTS

CORPUS CHRISTI, TX

UES provided geotechnical engineering services for the City of Corpus Christi's Museum of Science and History Improvements project. The improvements included a new stoop and flatwork on the south side of the building, a covered canopy on the east side of the building and replacing flatwork on the north side of the building. The geotechnical scope included drilling a total of three (3) borings at depths ranging from 10 ft to 30 ft at the site. Pavement recommendations were made based on findings.

TSTC HARLINGEN, PAVILION RENOVATIONS

HARLINGEN, TX

UES provided geotechnical engineering services for the restroom, storage, and west wing of the existing pavilion. The west wing was to be walled with concrete masonry units (CMU) and both the restroom, storage and west wing room are to be air conditioned spaces. This renovation project included field exploration (to evaluate the engineering characteristics of the subsurface materials), a reconnaissance of the project site, performing the boring operations and obtaining disturbed split spoon samples.

ACI Concrete Field-Testing Technician – Level 1

APNGA Portable Nuclear Gauge Safety & US DOT Hazmat Certification

EMILIA J. MONSIVAIS

CMT PROJECT COORDINATOR

Emilia is a highly skilled and detail-oriented construction materials testing (CMT) professional with extensive experience in both field and laboratory environments. Emilia specializes in preparing and submitting CMT testing proposals, coordinating with clients to discuss project requirements and fees, and ensuring compliance with safety protocols. She has a proven track record of conducting laboratory soil and aggregate testing, field testing including soil compactions and concrete sampling, and inspections. A dedicated communicator, she regularly updates project supervisors and the team on testing progress and results. Emilia also enjoys mentorship, having successfully trained and guided new technicians to enhance their skills and contribute effectively to project goals.

PROJECT EXPERIENCE

CITY OF PRIMERA, STREET IMPROVEMENTS

PRIMERA, TX

UES completed construction materials testing and inspection services for the City of Primera Street Improvements project, including field compaction testing, concrete sampling, strength verification, and coordination of specialty inspections as requested. Testing was performed using standardized procedures and scheduled to align with construction activities.

CITY OF COMBES, EDC SUBDIVISION

COMBES, TX

UES is currently providing construction materials testing services for this EDC Subdivision project with the City of Combes. Concrete testing is being conducted to test strength and compaction. Emilia serves as CMT Project Coordinator for this project.

CAMERON COUNTY, SH 100 & 2ND IMPROVEMENTS

PORT ISABEL, TX

UES is currently providing construction materials testing services, including field sampling and testing, laboratory specimen preparation, construction observation, and reporting.

VANGUARD MONET MISSION CAMPUS

MISSION, TX

UES provided geotechnical engineering and construction materials testing services for this project in Mission, TX, which involved construction of a 55,000 sf, single-story school building, two lighted sports fields, and surrounding pavements. The geotechnical scope included subsurface exploration consisting of 21 borings across building, pavement, and lighting areas; development of stiffened slab-on-grade foundation recommendations using WRI criteria; drilled pier design parameters for site lighting; and pavement design guidance to support anticipated loads. Field sampling and groundwater observations informed foundation and pavement recommendations. Construction materials testing services included concrete testing for strength verification to support construction quality control.

EDUCATION

LICENSES & CERTIFICATIONS

CWI, AWS D1. 1 (No. 13040971)

AWS D1 .5 Bridge Certification

Level II MT/UT (No. SNT-TC-1A)

ICC Special Inspector S1 & S2
No. 9181508

AMANDA RICHARDS, CWI

STRUCTURAL STEEL INSPECTOR

Amanda has more than 16 years of experience within the steel industry, where she has served as structural welder and inspector. She has experience with field construction inspection of bolted and welded connections on large to small scale construction projects, while also employing visual and non-destructive testing methods. These non-destructive testing inspections include field erection and shop fabrication of structural steel. Amanda is an AWS Certified Welding Inspector and has extensive experience performing shop and field inspections of high strength bolting and general fabrication inspections. She is also experienced in working with fabricators and erection crews to review and verify welding joint designs and fit up, welding procedures and welder's certifications. She is proficient with intricate blueprint interpretations and can understand the job scope in order to perform accurate reporting of items inspected. In addition, Amanda has six (6) years of heavy plate and large weldment structural welding experience in the field.

PROJECT EXPERIENCE

CITY OF ROUND ROCK, PUBLIC LIBRARY AND PARKING GARAGE

ROUND ROCK, TX

This massive project included a three-story, 66,000 sf building with a 300-space parking garage. It also has outdoor garden space, a conference room, and play areas for children.

CITY OF ROUND ROCK, FIRE STATION NO. 4, NO. 8, NO.3, & NO. 9

ROUND ROCK, TX

UES provided various services for these projects for the City of Round Rock. Amanda conducted steel inspections for these projects.

CYRUSONE SAT VI-TRP2

SAN ANTONIO, TX

Project consists of a concrete tilt walled two story data center and office building with a combined building area of 132,070 sf supported by a drill pier foundation system. Performed steel inspections on-site for Structural Joints Using High-Strength Bolts, observed exposed portions of the inspected anchor bolts were in general compliance with the project drawings provided, with nuts fully threaded and visually in snug tight conditions. As well as the inspection of welds to meet visual compliance with the designed size, and length specified in project drawings, and in general accordance with workmanship requirements described in AWS.

WESTOVER HILLS MEDICAL OFFICE BUILDING

SAN ANTONIO, TX

Provided visual inspections for this two-story building with a footprint of approximately 30,995 sf with concrete tilt wall panels on a shallow footing/grade beam foundation system. The visual inspection consisted of Roof Framing Glass Ceiling Support Steel welded connections, HSS to existing Roof Framing beam welded connections, HSS to HSS welded connections, HSS to angle welded connections, and angle to angle welded connections.

CHRISTINE PEACH, PG, CAPM

DIRECTOR OF ENVIRONMENTAL, TEXAS REGION

Christine Peach, PG, CAPM serves as UES' Director of Environmental Services, Texas with over 23 years of professional experience in the environmental consulting industry. Christine has conducted a number of Phase I Environmental Site Assessments (ESAs) and environmental site investigations across various market sectors, such as commercial and industrial facilities. She has provided technical assistance to clients and facilities engaged in soil and groundwater contamination investigations and remedial actions. Christine's responsibilities encompass all aspects of investigation and clean-up of groundwater and soil on contaminated sites. This includes (but is not limited to) drilling, installation of wells, soil and groundwater sampling. Other responsibilities include the interpretation of collected data and its organization into technical reports. Christine has been involved in several in-situ remediation programs for chlorinated solvent sites (mostly dry cleaner sites). Christine also assists in the design and implementation of various remediation technologies including insitu chemical oxidation, bioremediation, and high vacuum extraction systems.

PROJECT EXPERIENCE

VANGUARD ACADEMY, VETERANS SITE

EDINBURG, TX

UES completed a bulk asbestos survey for the proposed Vanguard Academy site located at 2514 S. Veterans Boulevard in Edinburg, TX. This project involved performing a limited interior asbestos inspection of the existing 10,883 sf commercial building, originally constructed in 1988 and occupied by three tenants. Approximately 70 samples were collected from suspect materials including flooring, sheet-rock systems, ceiling tiles, mastics, caulking, and insulation.

CITY OF HOUSTON, MSD PROJECTS

HOUSTON, TX

Christine is the lead technical advisor for our MSD projects. She has completed multiple Municipal Setting Designation (MSD) applications within the City of Houston and City of Dallas at various commercial and industrial properties and has multiple applications in progress. She completed negotiations with municipalities and retail public utilities to satisfy requirements of the program under the Texas Health and Safety Code. Using the MSD certificate from the TCEQ, many of the sites have been successfully issued a Final Certificate of Completion by the TCEQ.

WATER PLANT NO. 2 PROJECT

HOUSTON, TX

UES performed a Phase II Environmental Site Assessment (ESA) for the proposed Water Plant No. 2 Project in Houston, Texas. Services included a site reconnaissance, historical and regulatory records review, and evaluation of potential environmental concerns. Based on the findings, UES recommended a limited subsurface investigation to further assess site conditions and groundwater impacts.

BRIEF DESCRIPTION

UES provided geotechnical engineering and construction materials testing services for this project. The project included the construction of a two-story building with an approximate footprint of 30,000 sf, a new running track, and associated pavement parking and driveway areas.

Start/Completion Dates: August 2021 - September 2021 (Geo) // March 2023 - July 2024 (CMT)

PAST PROJECTS WITH THE CITY OF EDINBURG

Local City of Edinburg Projects

Even though UES has not worked directly with the City of Edinburg, we have provided services for projects located within the City of Edinburg. We have provided geotechnical engineering and construction materials testing services for the following projects- all located in Edinburg, TX. Please see the sample list, below.

- Vanguard Academy, Van Gogh Campus Improvements - Edinburg, TX
- Vanguard Beethoven Campus Sports Field Lighting - Edinburg, TX
- Monopole-Hidalgo 2 - Edinburg, TX
- 7-Eleven - Edinburg, TX
- AutoZone - Edinburg, TX
- Freddy's Frozen Custard & Steakburgers - Edinburg, TX
- HEB Parking Lot 1 - Edinburg, TX
- HEB Parking Lot 2 - Edinburg, TX
- NuStar Energy Trench Backfill Hwy 83 - Edinburg, TX
- Little Ceaser's Pizza - Edinburg, TX

Additional RGV Area Projects

UES has provided similar geotechnical engineering, construction materials testing, and environmental services for numerous municipalities and other similar entities throughout the Rio Grande Valley area. Some of our projects include:

- City of Combes, Economic Development Community (EDC) Subdivision - Combes, TX
- Villa De Las Flores, Street Improvements - Floresville, TX
- City of Port Isabel, Laguna Madre Park - Port Isabel, TX
- Quick Quack Car Wash Hwy 77 - San Benito, TX
- Refugio WWTP Improvements - Refugio, TX
- Quick Quack Car Wash - Port Isabel, TX
- Quick Quack Car Wash - Laredo, TX
- Las Cruces Subdivision Phases 1-3 - Alamo TX
- Rabb Ranch Phases 1-2 Subdivision - La Feria, TX
- Metronet - Weslaco, TX
- Port Isabel Baseball Fields - Port Isabel, TX
- Texas Workforce Commission (TWC) McAllen Parking Lot Repair - McAllen, TX
- TSTC Harlingen, Pavilion Renovations - Harlingen, TX
- Valley Baptists Cone Oasis Camp Levee & Pump Station - La Feria, TX
- Valley Baptists Country Borrow Site - La Feria, TX
- Veterans Crossing Subdivision - San Benito, TX
- Port Isabel San Benito Navigation District Pilot Laydown Area - Port Isabel, TX
- Aquarium at Rockport - Rockport, TX
- Port of Brownsville, Cargo Dock 3 Reconstruction- Brownsville, TX
- Port of Brownsville, Business Park - Brownsville, TX

Due to prior experience and a local footprint, **UES understands the City's permitting processes and how to best communicate with the entire team.** This will enable us to get a jump start on varying project items to help everyone stay on schedule. Much of our work has occurred in the Coastal Bend area. All our key team members assigned to this contract have worked extensively on projects within in and around the City of Edinburg and are highly familiar with the soils here.

UES is familiar with the specifications and sampling frequencies of the Coastal Bend area construction materials. We work closely with the design team during the design phase of each project during the geotechnical investigations and coordinate with the design team and City of Edinburg departments throughout the contract. We understand critical infrastructure, drivers, and relevant policies in completing work for the City.

5. INSURANCE

PROFESSIONAL LIABILITY INSURANCE COVERAGE - LIMITS AND DEDUCTIBLES

Our primary professional liability policy is as follows: UES carries $5,000,000 per claim and in aggregate. In addition, our deductible on that policy is $1,500,000, but it can be lowered if required for a specific project.

In addition to what has been provided, please see the following page for our sample insurance certificate. Pending award, we can request a Certificate of Insurance specifically for the City of Edinburg and will ensure that if we utilize any subconsultants that they will also meet the requirements listed in the RFQ.

PENDING LITIGATION

As part of the general business practice of providing engineering and professional services, UES has had claims made within the last five (5) years. The claims made against UES were resolved and/or currently being resolved either amicably by our professional liability carrier or through UES' dismissal from the claim upon a finding that no errors were the responsibility of UES. **UES has no current, pending, or past claims that will impact our ability to serve the City of Edinburg.**

6. PROFESSIONAL SERVICES AGREEMENT

UES has read and acknowledges the Professional Services Agreement provided by the City of Edinburg. UES will meet the prerequisite insurance requirements and, if selected, agrees to enter into such agreement.

8. PRESENTATION

UES has submitted one complete PDF document which includes everything from Section 4.2 - Submittal Requirements and Section 5.4 - Required Forms electronically to www.secure.procurenow.com/portal/cityofedinburg.

REQUIRED FORMS

REQUIRED FORMS

UES has submitted the required forms on the procurement website under Section 4. Required Forms.

Additionally, UES provides the required forms on the following pages of this response. If awarded, UES will provide the Form 1295 upon request to the City. Please refer to page 45 of this submittal for our official response for Section 4.9 of the Vendor Questionnaire.

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

- 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
- Texas Local Government Code Chapter 171.004
- City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?
Yes____ No_X__

3. Is your Company authorized and/or licensed to do business in Texas? Yes_X__ No____

4. Where is the Company's corporate headquarters located? Corpus Christi, TX

5. a. Does the Company have an office located in Edinburg, Texas? Yes____ No_X__

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office? _____ (years) _____ (months) N/A

c. State the number of full-time employees at the Edinburg office. N/A

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity? Yes____ No_X__

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. N/A

7. Indicate person whom The CITY may contact concerning your submittal.

Name: James Bauer, PE
Address: 11818 West Business Hwy 83, Unit 1, La Feria, TX 78559
Telephone: 956-201-4797
Fax: N/A
Email: jbauer@teamues.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (x).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture. N/A

9. Bankruptcy Information

Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (x)
If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets.
N/A

10. Provide any other names under which your business has operated within the last 10 years.
Rock Engineering and Testing, LLC (2022-2024) // Rock Engineering and Testing, Inc. (1998-2022)

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES (NO)

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES (NO)

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, James Bauer, PE, the undersigned representative of

UES Professional Solutions 45, LLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, James Bauer, PE, the undersigned representative of

UES Professional Solutions 45, LLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

FORM 1295

4.9. If awarded the 1295 form will need to be provided.*

CERTIFICATE OF INTERESTED PARTIES (Form 1295)

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016. For more information go to the Texas Ethics Commission web page at

https://www.ethics.state.tx.us/filinginfo/1295/

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 18, 2026
AWARDING OF BIDS
Agenda Item No: 13.D.
2026-2028 Architectural Services Rotation

1. **Agenda Item:**
Consider Awarding RFQ No. 2026-5, Architectural Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise. [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

2. **Description:**
On occasion, the City of Edinburg requires Architectural Services on City projects which do require an Architect. The qualified firm(s) selected should be experienced in the field of architectural services, experience in planning research, site analysis and consultation, land use entitlement, city planning, architectural and engineering design, code analysis, sustainable design, contracting and sourcing, cost analysis and schedule, construction contract admin, landscaping architecture, and design services for furniture. It is expected that the qualified firm(s) selected will have a sufficient level of innovation and appraisal expertise to carry out the projects without constraints to produce documents in a timely manner. The firm must be prepared to assure the City of Edinburg that key personnel indicated in their qualification statement will maintain their role in each project and that their present workload is such that each project will be completed on or before the due date.

The rotation is for potential projects between October 2026 through September 2028. Projects are to be funded in the upcoming fiscal years, as prioritized by the City Council.

Requests for Qualifications were received on Tuesday, July 14, 2026, at 3:00 p.m. for Architectural Services. A total of twelve (12) Requests for Qualifications were received and reviewed by staff. All the submittals received met the criteria set out in the Request for Qualifications. The following qualified firms listed in alphabetical order have submitted Statements of Qualifications in response to this RFQ:

1. Alvarado Architects & Associates, Inc.*
2. Brown Reynolds Watford Architects
3. ERO Architects, LLC*
4. Gignac & Associates, LLP
5. GMS Architects
6. Heffner Design Team
7. LEVY DYKEMA
8. Milnet Architectural Services, PLLC*
9. Orange Made, LLC
10. Raine Architects
11. RIKE
12. Sam Garcia Architect, LLC*

* On 2024-2026 rotation

Limiting the selection of firms between 3 and 5 will insure each firm will obtain a project as it

arises. The current 2024-2026 rotation has four (4) firms, and they have received approximately (1) project.

3. Staff's Recommendation:

Staff recommends awarding RFQ No. 2026-5 Architectural Services to qualified firm(s) and authorize the City Manager or designated appointee to enter into a Professional Services Contract with such firm(s) as projects arise.

1. Introduction

1.1. Summary

The City of Edinburg's Department of Engineering is currently seeking to retain a rotation list of qualified professional Architectural firms to provide Architectural services. The term of the contract will be two (2) years from 10/01/2026 – 09/30/2028. The services request is of qualified architect firms with expertise in all phases of the design, construction, repairs, or additions of all city public buildings. It is anticipated that architectural firms will lead full teams of engineers and or related consultants as needed for each project.

RFQ No. RFQ 2026-5

If you have any questions or require additional information contained in the RFQ, you may contact Lorena Fuentes, Interim Purchasing Manager. Please be sure to submit your questions via OpenGov Procurement at the website listed above no later than 3:00 pm on Tuesday, July 7, 2026.

The City reserves the right to reject any or all proposals and to waive informalities or technicalities and to accept the Proposal deemed the most advantageous to the City, and hold the proposal for a period of 90 days without taking action.

3. Instructions, Terms and Conditions

3.1. General Instructions

PURPOSE

The purpose of these solicitation documents is to execute a Professional Services Contract for: RFQ 2026-5 Request for Qualifications - Architectural Services

INTENT

The services to be provided under this RFQ shall be in accordance with and shall meet all specifications and/or requirements as shown in this solicitation for RFQ. There is no intention to disqualify any respondent who can meet the requirements.

DEVIATION FROM SPECIFICATION

Please read your requirements thoroughly and be sure that the RFQ offered complies with all requirements/specifications noted. Any variation from the solicitation requirements/specifications must be clearly indicated by letter, on a point by point basis, attached to and made a part of your RFQ. If no exceptions are noted, and you are the successful respondent, it will be required that the service(s) be provided as specified.

SUBMITTAL OF "HARD COPY" RFQ

If submitting a Hard Copy RFQ, it must be submitted in a sealed envelope by the vendor. **Submit two (2) complete sets of the response, one (1) original marked "ORIGINAL," and one (1) Digital Copy in a flash drive**. Each RFQ must be completely filled out and SUBMITTED IN ORIGINAL FORM complete with all supporting documentation. RFQs submitted by facsimile (fax) will not be accepted. Submittal of an RFQ in response to this solicitation constitutes an offer by the respondent. Once submitted, RFQs become the property of the City of Edinburg and as such the City reserves the right to use any ideas contained in any RFQ regardless of whether that respondent/firm is selected. Submission of a RFQ in response to this solicitation, by any respondent, shall indicate that the respondent(s) has/have accepted the conditions contained in the RFQ, unless clearly and specifically noted in the RFQ submitted and confirmed in the contract between the City and the successful respondent otherwise. RFQs which do not comply with these requirements may be rejected at the option of the City. RFQs must be filed with the City of Edinburg before the deadline day and hour. No late RFQs will be accepted. Failure to meet RFQ requirements may be grounds for disqualification.

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

AUTHORIZATION TO BIND RESPONDENT TO RFQ

RFQs MUST give full firm name and address of respondent, and be manually signed. Failure to do so will disqualify your RFQ. Person signing bid must show title or AUTHORITY TO BIND HIS/HER FIRM IN A CONTRACT. Firm name and authorized signature must appear on each page that calls for this information. The legal status of the Respondent whether corporation, partnership, or individual, shall also be stated in the RFQ. A corporation shall execute the RFQ by its duly authorized officers in accordance with its corporate by-laws and shall also list the state in which it is incorporated. A partnership Respondent shall give full names and addresses of all partners. All partners shall execute the RFQ. Partnership and Individual Respondent shall state in the proposal the names and addresses of all persons with a vested interest therein. The place of residence of each Respondent, or the office address in the case of a firm or company, with county and state and telephone number, shall be given after the signature.

ALTERATIONS/AMENDMENTS TO RFQ

RFQ CANNOT be altered or amended after opening time. Alterations made before opening time must be initialed by respondent guaranteeing authenticity. No RFQ may be withdrawn after opening time without acceptable reason in writing and only after approval by the City of Edinburg.

NO RESPONSE TO RFQ

If unable to submit a RFQ, respondent should return inquiry giving reasons.

LIST OF EXCEPTIONS

The respondent shall attach to his/her RFQ a list of any exceptions to the specifications/ requirements.

TIME ALLOWED FOR ACTION TAKEN

The City of Edinburg may hold RFQ's **90 days** after deadline without taking action. Respondents are required to hold their RFQ's firm for same period of time.

RIGHT TO REJECT/AWARD

The City of Edinburg reserves the right to reject any or all RFQs, to waive any or all formalities or technicalities, and to make such awards of contract as may be deemed to be the best and most advantageous to the City of Edinburg.

NUMBER OF CONTRACTS

THE CITY reserves the right to award one, more than one, or no contract(s) in response to this RFQ.

INDEMNIFICATION CLAUSE

The Respondent agrees to indemnify and save harmless the City, from all suits and actions of every nature and description brought against them or any of them, for or on account of the use of patented appliances, products or processes, and he shall pay all royalties and charges which are legal and equitable. Evidence of such payment or satisfaction shall be submitted upon request of the Assistant Purchasing Manager, as a necessary requirement in connection with the final estimate for payment in which such patented appliance, products or processes are used.

ADDENDA AND MODIFICATIONS

Respondent shall carefully examine the RFQ forms, specifications/requirements, and instructions to Respondents. Should the respondent find discrepancies in, or omissions from specifications/requirements, or other documents, or should he/she be in doubt as to their meaning, he/she should request an interpretation via the OpenGov portal:https://procurement.opengov.com/portal/cityofedinburg and obtain clarification by addendum prior to submitting any RFQ. Explanations, interpretations, and supplemental instructions shall be in the form of written Addenda which shall become a part of the Contract documents. Said Addenda shall be available thru the e-procurement portal and e-mailed to all prospective Respondents. All Addenda issued in respect to this project shall be considered official changes to the original RFQ documents. Verbal statements in response to inquiries and/or requests for explanations shall not be authoritative nor binding. It shall be the Respondent(s) responsibility to ensure that they have received all Addenda in respect to this project. Furthermore, Respondents are advised that they must recognize, comply with, and attach a signed copy of each Addendum which shall be made part of their RFQ Submittal. Respondent(s) signature on Addenda shall be interpreted as the respondent’s “recognition and compliance to” official changes as outlined by the City of Edinburg and as such are made part of the original solicitation documents. Failure of any respondent to receive any such addendum or interpretation shall not relieve such Respondent from its terms and requirements. The City may issue a written addendum no later than five calendar days prior to the date bids must be received. Addendums are available online at https://procurement.opengov.com/portal/cityofedinburg

SYNONYM

Where in this solicitation package SERVICES is used, its meaning shall refer to the request for qualifications Request for Qualifications - Architectural Services as specified.

ASSIGNMENT

Respondents are advised that the City of Edinburg shall not allow the successful respondent to sell, assign, transfer, or convey any part of any contract resulting from this RFQ in whole or in part, to a third party without the written approval of the City of Edinburg.

RESPONDENT’S EMPLOYEES

Neither the Respondent nor his/her employees engaged in fulfilling the terms and conditions of this Service Contract shall be considered employees of the City. The method and manner of performance of such undertakings shall be under the exclusive control of the vendor on contract. The City shall have the right of inspection of said undertakings at any time.

INTERPRETATIONS

Any questions concerning the project and/or specifications/requirements with regards to this solicitation for statement(s) of qualifications shall be directed to the designated individuals as outlined in the RFQ. Such interpretations, which may affect the eventual outcome of this request for statements of qualifications, shall be furnished in writing to all prospective Respondents via Addendum. No interpretation shall be considered binding unless provided in writing by the City of Edinburg in accordance with paragraph entitled **"Addenda and Modifications".**

STATUTORY REQUIREMENTS

It shall be the responsibility of the successful respondent to comply with all applicable State & Federal laws, Executive Orders and Municipal Ordinances, and the Rules and Regulations of all authorities having jurisdiction over the work to be performed hereunder and such shall apply to the contract throughout, and that they will be deemed to be included in the contract as though written out in full in the contract documents.

RFQ PREPARATION COSTS

The City of Edinburg shall not be held liable for any costs incurred by any respondent for work performed in the preparation of and production of a RFQ or for any work performed prior to execution of contract.

CONFIDENTIAL INFORMATION

Any information deemed to be confidential by the respondent should be clearly noted on the pages where confidential information is contained; however, the City cannot guarantee that it will not be compelled to disclose all or part of any public record under Texas Public Information Act, since information deemed to be confidential by the respondent may not be considered confidential under Texas Law, or pursuant to a Court order.

VERBAL THREATS

Any threats made to any employee of the City, be it verbal or written, to discontinue the providing of item/material/services for whatever reason and/or reasons shall be considered a breach of contract and the City will immediately sever the contract with the Respondent/Consultant on contract.

RIGHT TO AUDIT

The City of Edinburg reserves the right to audit the vendor's books and records relating to the performance of this contract. The City of Edinburg, at its own expense, shall have the right at all reasonable times during normal business hours and upon at least twenty-four (24) hours' advance notice, to audit, to examine, and to make copies of or extracts from the books of account and records maintained by the vendor(s) with respect to the Supply/Service and/or Purchase Contract. If such audit shall disclose overpayment by City to vendor, written notice of such overpayment shall be provided to the vendor and the amount of overpayment shall be promptly reimbursed by vendor to the City. In the event any such overpayment is not paid within ten (10) business days after receipt of such notice, the unpaid amount of such overpayment shall bear interest at the rate of one percent (1%) per month from the date of such notice until paid.

PAST PERFORMANCE

Respondent's past performance shall be taken into consideration in the evaluation of RFQ submittal.

JURISDICTION

Contract(s) executed as part of this solicitation shall be subject to and governed under the laws of the State of Texas. Any and all obligations and payments are due and performable and payable in Hidalgo County, Texas.

VENUE

The parties agree that venue for purposes of any and all lawsuits, cause of action, arbitration, and/or any other dispute(s) shall be in Hidalgo County, Texas.

CONSIDERATION OF LOCATION OF BIDDER'S PRINCIPAL PLACE OF BUSINESS

The City may give local vendors, whose principal place of business is located within the City of Edinburg, and whose bid is within five percent (5%) of the lowest bid price preference as allowed by Section 271.9051 of the Local Government Code.

AWARD

Respondents are advised that the City of Edinburg is soliciting RFQs and award shall be made to the respondent that in the opinion of the City of Edinburg is the best qualified.

The City of Edinburg reserves the right to award contract(s) based solely on the written proposals. The City also reserves the right to request oral interviews.

FINAL SELECTION AND THE CITY COUNCIL APPROVAL

Selection shall be made of one or more proposers deemed to be fully qualified and best suited among those submitting Proposals on the basis of the evaluation factors included in the Request for Qualifications, if so stated in the Request for Qualifications. Negotiations shall be conducted with the proposers selected. After negotiations have been conducted with each proposer selected, the agency shall select the proposer which, in its opinion, has made the best proposal, and shall award the contract to that proposer. The City may cancel this Request for Qualifications or reject the Qualifications at any time prior to an award, and is not required to furnish a statement of the reasons why a particular proposal was not deemed the most advantageous. Should the City determine in writing and in its sole discretion that only one proposer is fully qualified, or that one proposer is clearly more highly qualified than the others under consideration, a contract may be negotiated and awarded to that proposer. The award document will be a contract incorporating by reference all the requirements, terms and conditions of the solicitation and the contractor's proposal as negotiated. After the selection of the most qualified firm(s), scope of services and billing rates will be negotiated and used as attachments to the City's Professional Services Agreement. This Agreement will then be submitted to the City Council for approval. If the City and the selected firm cannot successfully negotiate an agreement, then the City will enter into negotiations with the next best qualified firm on the evaluation rating list. This procedure may be repeated until one (1) or more firms has been selected and approved by the City Council.

PAYMENT

The City of Edinburg will execute payment by mail in accordance with the State of Texas Pay Law after SERVICES have been completed, introduced to the City, and found to meet City of Edinburg specifications/requirements. No other method of payment will be considered.

CONFIDENTIALITY OF INFORMATION AND SECURITY

Should the successful respondent become the holder of and have access to confidential information in the process of fulfilling its responsibilities in connection with an awarded contract the successful respondent agrees that it shall keep such information confidential and will comply fully with the laws and regulations of the State of Texas, ordinances and regulations of the City, and any applicable federal laws and regulations relating to confidentiality.

EQUAL EMPLOYMENT OPPORTUNITY

Respondent agrees that they will not discriminate in hiring, promotion, treatment, or other terms and conditions of employment based on race, sex, national origin, age, disability, or in any way violate Title VII of 1964 Civil Rights Act and amendments, except as permitted by said laws.

TERMINATION OF CONTRACT

The City of Edinburg reserves the right to terminate the contract if, in the opinion of the City of Edinburg, the successful vendor's performance is not acceptable, no funds are available, or if the City wishes, without cause, to discontinue this contract. Termination will be in written form allowing a 30-day notice.

HISTORICALLY UNDERUTILIZED BUSINESS

Firm(s)/Sub Firm(s) will be required to comply with the President's Executive Order No. 11236 and Order No. 11375 which prohibits discrimination in employment regarding race, creed, color, sex, or national origin. Firm(s)/Sub Firm(s) must comply with the Title VI of the Civil Rights Act of 1964, Minority and Women Owned Business Enterprise standards and affirmative action requirements.

ETHICAL STANDARD

No City official or employee shall have interest in any contract resulting from this bid.

IF YOU HAVE ANY QUESTIONS ABOUT COMPLIANCE, PLEASE CONSULT YOUR OWN LEGAL COUNSEL. COMPLIANCE IS THE INDIVIDUAL RESPONSIBILITY OF EACH PERSON OR AGENT OF A PERSON WHO IS SUBJECT TO THE FILING REQUIREMENT. AN OFFENSE UNDER CHAPTER 176 IS A CLASS "C" MISDEMEANOR.

3.2. INSURANCE REQUIREMENTS

Staff may waive insurance requirements for contracts $0 - $4,999.99, including but not limited to contracts for food, materials, supplies, and construction. Workers' Compensation in amounts which satisfy statutory coverage shall be required for construction projects.

The following insurance requirements will be included in all City contracts of $5,000 - $14,999.99. In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim.

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker’s Compensation Statutory Coverage

Comprehensive General Liability

(City named as additional insured)

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

The following insurance requirements will be included in all **City contracts of $15,000 or more.**

(1) The successful bidder will be required to carry the following insurance coverage and limits of coverage, as well as list the City as an additional insured to liability coverage as requested by the City. In addition, the successful bidder shall provide the City with evidence of coverage and furnish acceptable proof of payment of insurance premiums.

(2) The successful bidder will be required to secure and/or have insurance coverage in force with an admitted property and casualty insurance company licensed by the State of Texas to conduct business in the State of Texas.

(3) In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker’s Compensation Statutory Coverage

Employer’s Liability Bodily Injury by Accident:

$100,000 each accident

Bodily Injury by Disease:

$100,000 each employee/$500,000 policy limit

Comprehensive General Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Comprehensive Auto Liability

Bodily Injury $100,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

City’s Protective Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Policies must name the City of Edinburg as an Additional Insured.

Certificates of insurance naming the CITY as an additional insured shall be submitted to the CITY for approval prior to any services being performed by Contractor. Each policy of insurance required hereunder shall extend for a period equivalent to, or longer than the term of the Contract, and any insurer hereunder shall be required to give at least thirty (30) days written notice to the CITY prior to the cancellation of any such coverage on the termination date, or otherwise. This Contract shall be automatically suspended upon the cancellation, or other termination, of any required policy of insurance hereunder, and such suspension shall continue until evidence that adequate replacement coverage is provided to the CITY. If replacement coverage is not provided within thirty (30) days following suspension of the Contract, the Contract shall automatically terminate.

4. Specifications

4.1. Scope of Services

The selected firm(s) will report to, and operate under, the direction of City of Edinburg's Department of Engineering staff. Must have a Texas Licensed Professionals with superior background, training, and qualifications meeting all requirements of this RFQ, Registered or licensed in the State of Texas. The scope of services required by this RFQ may include some or all of the following services:

A. **Planning research**: Review, synthesize, update and/or supplement as required completed trial court facilities master plans and/or court programs;

B. **Site analysis and consultation:** Perform site analyses, including test fits, parking, traffic, zoning, geotechnical, on- and off-site utility and related utilization studies; participate in and coordinate with AOC staff, legal counsel, consultants and real estate brokers in site selection and acquisition activities (Real Estate brokerage services are not included in scope of services of this RFQ);

C. **Land use entitlement:** Participate in the preparation of environmental studies and reports as required under CEQA and related local and state laws and regulations, and coordinate required mitigations with site and building design (Environmental site surveys and hazard documentation, EIR preparation, and site remediation services are not included in scope of services of this RFQ);

D. **City planning:** Conduct city-wide operations master planning and analysis; conduct functional programming, design definition and space planning for court building functions;

E. **Architectural and engineering design services:** Provide architectural, structural, civil, mechanical, electrical, plumbing, security, acoustical, interior design, lighting, data/telecommunications, graphics, and related services which may be required in connection with planning, design and execution of renovation and or new building projects. Special services may be requested as warranted by specific projects, including but not limited to, campus planning, geotechnical engineering; land surveys; wind engineering; vibration control; life safety/code consulting; audio visual; physical and electronic security design; parking structure design; and parking revenue control;

F. **Code analysis:** Conduct and/or participate in building, planning, access, and historical code analyses and reviews for new and existing facilities;

G. **Entitlements and approvals:** Identify, coordinate, and support the acquisition of any required entitlements or approvals by local, state, federal agencies;

H. **Sustainable Design:** Develop, analyze, and implement programs for sustainable site and building design, including LEED goals and documentation;

I. **Contracting and sourcing:** Provide consultation on and analysis of methods of project delivery methods, such as design/bid/build, design/build, and CM @ Risk; participate in preparation of associated conventional or unique contract documents required for procurement; (Legal services, construction management, and construction services are not included in the scope of services in this RFQ);

J. **Cost analysis and schedule planning:** Provide and/or participate in all aspects of project cost estimating and schedule planning, including construction estimating, life cycle costing, value engineering, critical path and special scheduling;

K. **Design services for furniture, fixtures and equipment:** Provide all services required to properly plan, design, specify and coordinate furniture, fixtures, special finishes and equipment;

L. **Site planning and landscape architecture:** Provide all services required to, design, specify and coordinate site design, including grading, utilities, parking lots, roads, driveways, hardscape, landscape, lighting, and irrigation;

M. **Construction contract administration:** Provide construction administration services, including field observations, submittal review, testing and inspection bid document preparation (testing laboratory or construction inspection services are not part of this RFQ), requisition and procurement of specialized pricing and consideration/negotiation of changes, and project contract completion, including punch list, warranty review, preparation of record drawings and closeout;

N. **Building Commissioning:** Participation in development of building commissioning documents and procedures; specification of commissioning procedures, and participation in commissioning program. (Specialized Commissioning agent services are not part of this RFQ);

O. **Move and occupancy planning:** Planning, design and execution of temporary relocations, move planning, and start-up assistance;

P. **Public Art:** For projects that include a public art component provide the services of an artist experienced in creation and installation of artworks in and surrounding public buildings;

Q. **Project Reviews:** Participate in peer and constructability reviews of projects.

All qualified firms or persons shall have current licenses as required under the State of Texas for the provisions of services requested for the City of Edinburg.

4.2. Submittal Requirements

The RFQ must be submitted according to the instructions outlined herein. Each response should include, at a minimum, the following items not excluding the selection process criteria:

A. Transmittal letter – Indicate interest and commitment to perform services for the City of Edinburg, include contact information (physical address, telephone, fax, cell phone, and email address) for the primary person responsible for your RFQ who will be the point of contact for the City on all correspondence and communications pertaining to the RFQ. State whether any addendums to this RFQ have been received by your firm and whether consideration of their content has been included in your RFQ. The letter must be signed by an officer of the firm who is authorized to bind the firm to contract and shall contain a statement to this effect;

B. Firm Qualification and Experience – Discuss the firm's experience and history in performing architectural services in a timely manner, particularly for other governmental agencies in the past five (5) years. Discuss the firm's uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

C. Team Member Qualifications and Experience – Submit resumes summarizing qualifications and experience of project manager, key staff and any support staff likely to be assigned to the work.

D. References – Provide at least three references (names and current phone numbers) from recent work and List all past projects with the City of Edinburg for each proposed team member. Include a brief description of the projects associated with the reference, and the role of the individual.

E. Insurance - Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. A list of any insurance claims against the firm within the past 5 years.

F. Professional Services Agreement – Provide a statement that the Professional Services Agreement has been read, that the firm will meet the prerequisite insurance requirements, and the firm, if selected, agrees to enter in to such agreement.

G. Contact Information – Each firm must submit the firms two (2) different contact information (Name, Title, Address, Phone Number, Mobile Number, and Email Address).

H. Presentation – Electronic submittal only.

CONFLICT OF INTEREST

CHAPTER 176 OF THE TEXAS LOCAL GOVERNMENT CODE

Effective January 1, 2006, Chapter 176 of the Texas Local Government Code requires that any vendor or person considering doing business with a local government entity disclose in the Questionnaire Form CIQ, the vendor or person's affiliation or business relationship that might cause a conflict of interest with a local government entity. By law, this questionnaire must be filed with the records administrator of the City of Edinburg not later than the 7th business day after the date the person becomes aware of facts that require the statement be filed. See Section 176.006, Local Government Code. A person commits an offense if the person violates Section 176.006, Local Government Code. An offense under this section is a Class C misdemeanor.

For more information or to obtain Questionnaire CIQ go to the Texas Ethics Commission web page at https://www.ethics.state.tx.us/data/forms/conflict/CIQ.pdf

*Response required

4.9. If awarded the 1295 form will need to be provided.*

CERTIFICATE OF INTERESTED PARTIES (Form 1295)

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016. For more information go to the Texas Ethics Commission web page at

STATE OF TEXAS §

COUNTY OF HIDALGO §

CITY OF EDINBURG §

AGREEMENT BETWEEN THE CITY OF EDINBURG AND CONSULTANT FOR PROFESSIONAL ARCHITECTURAL SERVICES PURSUANT RFQ NO. XXXX-XXX

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit “B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

SECTION XXI
NOTICE OF GOVERNING LAW FOR STATE AND FEDERAL GRANT PROJECTS

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

RE: RFQ# 2026-5 Architectural Services

Dear Ms. Balderas:

Alvarado Architects & Associates, Inc. is pleased to submit our qualifications for Architectural Services to the City of Edinburg. After carefully evaluating your request, we have assembled this enclosed response.

With over 30 years of experience in serving the Rio Grande Valley, Alvarado Architects & Associates, Inc. is thoroughly familiar with renovations and new construction of public/municipal facilities. Our experienced team is committed to provide you with the most creative and innovative designs required to facilitate your needs. Our commitment to you will be to take the utmost care of detail in design while being fiscally responsible and our service will be unparalleled to anyone else. Alvarado Architects & Associates, Inc. is ready and willing to assist your needs in any way possible.

The team for the City of Edinburg project will be as follows: Mr. Erasmo “Ed” Alvarado Jr., AIA, President will be leading the design team; Mr. Eli Alvarado, Vice President will be responsible for contract administration, client relations and the point of contact for the city; Mr. Mario Garza Jr., RA will be project manager.

*We acknowledge that no addenda have been issued.

Again, Alvarado Architects & Associates, Inc. appreciates the opportunity in allowing us to submit our qualifications to you. Thank you for your consideration. We look forward to further presenting our qualifications and experiencing a successful working relationship together. Should you have any further questions, please do not hesitate to contact us at 956-464-8258.

Sincerely,
Alvarado Architects & Associates, Inc.

Erasmo 'Ed' Alvarado, Jr. AIA
President

Erasmo 'Eli' Alvarado, III
Vice President

TEXAS REGISTRATION: Erasmo Alvarado Jr., No. 11954 - Renewal Dec. 31, 2026

Mario Garza Jr., No. 32452 - Renewal Oct. 31, 2026

HUB CERTIFIED: #1742613525100

PROFESSIONAL SERVICES:
Full Architectural Services, Planning, Design, District Facility Master Planning, Specifications, Project Coordinator, Facilitator, Facility Plans, Facility Assessments, Building Code Reviews, Engineering, Energy Audits, Indoor Air Quality Consulting, Technology, Communications Design, Life Safety, Security Design, Interior Design, Landscaping, Site Analysis, Site Planning, Site Selection.

H. HISTORY:
Alvarado Architects & Associates, Inc. was founded in 1991 by Erasmo "Ed" Alvarado, Jr. , President, AIA. After graduating from Texas A&M University Mr. Alvarado, a Rio Grande Valley native, returned home where he served as the lead designer for several local architectural firms. After persevering through the Architectural Depressions of the 1980's, Erasmo Alvarado, Jr. decided it was time to open up his own firm. Mr. Alvarado set up shop in his hometown of Donna, Texas.

Now, with over 30+ years experience dedicated to educational facility planning and design, Alvarado Architects & Associates, Inc. continues to deliver quality projects with an emphasis on customer service. In 2016 Erasmo Eli Alvarado, III joined Alvarado Architects & Associates, Inc., and as Vice-President he is dedicated to maintaining the customer service culture and work ethic established by his father. Erasmo "Ed" Alvarado, Jr. and Erasmo Eli Alvarado, III are committed to their involvement on each and every project undertaken by the firm.

I. ABILITY TO PERFORM SERVICES:

Alvarado Architects & Associates, Inc. team is uniquely qualified to serve as the architect on your next project. We are commited to establishing a long term partnership. The team we have proposed was carefully assembled in order to not only bring you the best professional talent and a team that is deeply rooted in the Rio Grande Valley community, but also and even more importantly, has the relevant knowledge to deliver a successful project. Our team members have prior experience working in South Texas and know all the opportunities and challenges of designing and building a project in this region. Alvarado Architects & Associates, Inc. selected each of the design consultants based on their relevant experience, local offices in South Texas. Our team is well-suited to provide the best design possible in meeting the needs and requirements of the renovated buildings.

Alvarado Architects & Associates, Inc. strives to deliver the most efficient, functional and well-designed facilities that are within budget and on schedule. Our firm offers a design team that brings together multiple services within a single source. This allows an increased flexibility to react quickly to a variety of options and considerations. The following are services offered by our team, but are not limited to:

- Code Compliance
- Architectural Planning & Design
- Design/Build Delivery Method
- Construction Management
- Fast Track Construction
- Construction Administration
- Master Planning
- Computer Aided Design (CAD)
- Interior Design

No matter whether the design requires a new facility, a renovation, or an addition to an existing facility, our firm ensures that the highest level quality of service to its clients remains the same. Our goal is not only to meet your expectations but to exceed them.

FIRM HIGHLIGHTS

HUB Certified
Alvarado Architects & Associates, Inc. is a minority-owned business and has obtained HUB certification.

Commitment of Principals and Senior Level Personnel
Our Team is committing senior level, highly experienced personnel to the client's project. Alvarado Architects & Associates, Inc. is a hands-on firm and one of our Principals will be involved in all phases of the projects.

Local Construction Industry Experience
Our team has worked extensively in the South Texas region. With over 30+ years serving the Rio Grande Valley we are familiar and have knowledge of the local construction practices, procedures, regulations, soil and environmental conditions.

Local Office

Alvarado Architects & Associates, Inc. has a dedicated office located in Donna, Texas which is only 20 minutes from Edinburg. We can meet on a moments notice.

J. FIRM'S PHILOSOPHY:

Alvarado Architects & Associates, Inc., feel that the sole reason for our continued growth and success, can be summed up in three words: unparalleled customer service. Every aspect of our firm, from selection of personnel to design methods to construction services, has been strategically planned to respond to the specific needs of our clients. Our Firm will assist our clients in having the most efficient, functional and well-designed facilities within budget and time. No matter whether a design requires a new facility, a renovation, or an addition to an existing facility, our firm ensures that the high level of quality service to its clients remains the same. Our Firm provides multiple services with a single source of project leadership to ensure that responsibility is firmly established. This allows increased flexibility in react efficiently to a variety of options and considerations. Our goal is not only to meet your expectations, but to exceed them.

K. AVAILABILITY AND COMMITMENT

The Alvarado Architects & Assoicates, Inc. team is ready to begin work on your project immediately and ready to provide the proposed staff within this submittal and any other resources necessary to perform architectural services for this project. If awarded this assignment, the Alvarado Architects & Associates Inc. team commits to providing you with all the assistance you require. We have the capacity to provide you dedicated resources and the capability to provide additional specialty services if needed. We have the full range of experts that can help solve any challenge you may have.

WHAT SETS US APART

Alvarado Architects & Associates, Inc. has over 30 years of experience working on publicly funded institutions. We understand that we must perform well in order for our client to maintain its good standing in the community – to be able to return to the public for a positive vote in the future. This can only be accomplished when the voting public realizes that the value of their tax dollar has been respected. Having extensive experience in this environment, we know and understand, and can properly plan and schedule for City Staff Meetings, Council, Zoning, and other official meetings requiring prior public notice. We have ample respect and appreciation for the contribution of public servants wherein their available time is limited. Consequently, we must be prepared to fully illustrate with graphics, documents, schedules, and any other information that might enable our client to confidently make informed decisions without delay.

TEAM'S WORKING RELATIONSHIP

Alvarado Architects & Associates, Inc. is proud to propose the enclosed architectural team and engineering consultants. The consultants were selected based on previous projects, coordination proceedures and proximity to our office. Having a past working relationship allows us to listen and follow through in a quick and efficient manner with the Owners' questions and concerns.

The team we have assembled for your project provides all management, architectural planning, design and documentation to be delivered directly by Alvarado Architects & Associates, Inc.

PROJECT BUDGET CONSIDERATIONS

With over 30+ years in serving the Rio Grande Valley, Alvarado Architects & Associates, Inc. has created a database of construction costs for all of our projects. We begin in assisting the Owner at the beginning of each project in establishing a preliminary construction cost estimate for each project. During Design, we remain fiscally responsible in designing efficient building facilities while using low maintenance cost materials throughout the project. By incorporating Alternates, Allowances, and/or Contingencies, the Owner has the authority to pick and choose which items are to be included in the project. Once the project goes out for proposals, Alvarado Architects & Associates, Inc. will assist the General Contractor and ensure the project is within budget. During Construction, all contingencies will be carefully reviewed by Alvarado Architects & Associates, Inc. and no authorizations will be made unless approved in writing by the Owner.

DESIGN STANDARDS

Our team will first review and analyze the current City of Edinburg standards and will hold a focus meeting with Weslaco leadership to confirm the intent and direction of the standards. We will then identify any and all aspects of the standards that may have impact or influence on the scope of the project at hand. The project will develop within the design phases which will confirm Alvarado Architects & Associates, Inc.'s compliance with City's facility standards. A process of checks and balances in the design process will ensure the City's satisfaction with the project's relationship to established standards.

VALUE ENGINEERING

Alvarado Architects & Associates, Inc. works aggressively early on in the project to collaborate with the client's representative to provide pre-construction services such as scheduling, budget and constructability reviews. When the bids are over budget it is our utmost priority to make the project a reality. Once the contractor is under contract our team will work hand-in-hand to review project systems, material selections and site work to ensure the Owner is getting the best possible value.

QUALITY ASSURANCE/QUALITY CONTROL

From the very beginning of a project, our team strives to maintain design integrity and quality by working with the Owner to explore, define and document a concrete set of project goals that will be incorporated into the final solution. Our quality control program offers a comprehensive, multi-level system of checks and balances.

First and foremost, we understand the importance of assigning one single source of accountability that the Owner can depend on every time they pick up the phone and then having that representative act as the

daily liaison between all levels of project management - from project designers to construction phase field representatives.

In order to strive for error-free plans and specifications during the construction document phase, we initiate multilevel quality control program from the very beginning. Weekly coordination meetings with the architectural, mechanical, electrical, plumbing, structural and civil engineering teams will be held to discuss existing and potential problems and to find an immediate resolution for each. The bottom line is that quality assurance starts on the first day of work and is a continuous process through project completion.

QUALITY CONTROL DEPARTMENT

Alvarado Architects & Associates, Inc. is committed to providing quality support and training to our Staff through a responsive, systematic and consistent approach of compiling data, delivering valuable relevant information and providing timely quality project control reviews. We maintain a checklist of items to review, keep up with the latest construction methodologies and products and ensures our drawings meet the highest standards of quality. Alvarado Architects & Associates, Inc. have established a protocol for project quality review by senior staff at pertinent points during the project design and production phases in order to assess, direct and support project management of the project.

QUALITY CONTROL MAINTENANCE

Alvarado Architects & Associates, Inc. has also developed a comprehensive internal "checklist" that is addressed throughout the entire project to ensure items are not left off the drawings. Our architects will constantly review this checklist and cross-reference the construction documents for accuracy. In addition, every set of drawings generated at Alvarado Architects & Associates, Inc. is checked for final approval. The project schedule is also arranged so that a 10-day "proofing" period is allotted prior to releasing for bidding to allow for further coordination and evaluation of the drawings and specifications to ensure correctness.

TECHNICAL COMPETENCE

The team we've assembled is very qualified to address projects much like the one proposed. Alvarado Architects & Associates, Inc., especially, has specialized in this type of work for more than 30 years. Our proposed team is dedicated exclusively to pre-planning, programming, design and construction administration of similar event and institutional facilities. We pride ourselves on being leaders in our field and it is due to our experience that clients continue to come back to us time and time again to complete their projects.

COST ESTIMATING

Our team utilizes innovative methodologies when it comes to cost estimating. We maintain a comprehensive database of construction costs in the South Texas area. This allows us to better understand the "current state of the market" for southern Texas. With the aid of the latest computer software and up-to-date cost factors, our staff of professionals can deliver the detailed estimates required for building projects.

Together, our team will consistently meet client cost estimating objectives by:

- Joining with our clients to define and coordinate the project specifications, budget and schedule. Each must work in terms of the other and everyone involved must have a common understanding of the objectives.
- Designing an efficient plan – the ratio of gross to floor area must be low. Dollars spent on inefficient spaces and circulation do not contribute to the functional program.
- Selecting cost-effective materials and details – materials and details impact both initial and longer maintenance costs. These must be balanced against the funds available and conditions in the current construction market.
- Selecting cost-effective building systems (structural, MEP) – the most effective systems for a building may vary from year to year and region to region depending on conditions in the local market. The client and design team should explore a host of potential system options before fixing these important elements of the project.

- Writing specifications – having defined precisely the requirements to be met, specifications should afford bidders as much flexibility as practicability to offer high quality at the lowest cost.
- Bidding procedures – to provide flexibility, we often include a number of alternates in bid documents which affords clients the opportunity to adjust both scope and cost after bids are received.

DELOPING AND MAINTAINING WORK SCHEDULES

Our proposed team's standard procedures require all project managers to develop a work schedule at the startup of every project to match or beat the Owner's schedule. This schedule is regularly reviewed by both the Production Staff Manager and Design Studio Manager to ensure project staff will be appropriately sized and scheduled as work commences. Earmarking staff and assigning them as early as possible in the process ensures the controlled and reliable production of the quality work.

TIMELY COMPLETION

Alvarado Architects & Associates, Inc. has implemented step-by-step procedures to ensure a project stays on schedule. At the beginning of every project a Schedule of Services is generated to ensure all phases of the project are being met according to the contract. The Schedule of Services is generated directly with the Owner to ensure responsibilities of each party are also implemented in the schedule. Dates such as Facilities Meetings, Board Meetings, or any required presentations are incorporated for all necessary approvals.

Alvarado Architects & Associates, Inc. will work closely with the Owner to ensure project meeting timelines are met. We would recommend meeting on a weekly basis until the Program, Budget, and Schedule are satisfactory to the Owner. Then we will work towards the design of the project by implementing any of the Owner's Standards or Design Criteria. Once in the Construction Documents Phase, we will schedule meetings with the Owner until we receive a 100% review of the plans. During Construction, we will meet on site with the General Contractor on a weekly basis for the duration of the construction of the project.

Alvarado Architects & Associates, Inc. will supplement production capability to meet schedule demands, if and when necessary.

RESUMES

Please see key personnel's resumes on the following pages. Alvarado Architects and Associates, Inc. will work with consultants preferred by the Client.

CONSULTANT NAME	COMPANY NAME	FIRM SIZE	TYPE OF SERVICE	# OF YEARS IN BUSINESS	% OF TIME INVOLVEMENT
Simon G. Solorio, PE State of Texas - Lic. #83066	Solorio, Inc.	5 Employees	Structural Engineering Design	30+ Years	100%
Luis Madrigal, PE State of Texas - Lic. #114403	A&G Engineering, LLC (HUB CERTIFIED)	6 Employees	MEP Engineering Design	10+ Years	100%
Craig Gonzalez, PE State of Texas - Lic. #99628	Urban Infrastructure Group, Inc. (HUB CERTIFIED)	6 Employees	Civil Engineering Design	15+ Years	100%

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Section 03 - Resumes

Alvarado Architects & Associates, Inc. are committed to the City of Edinburg. Our team has sufficient staff and resources to meet the needs of the city and deliver projects on your schedule. We are committed to providing exemplary service throughout the duration of any project that may result. The percent of time that individuals will be involved with the project will of course depend on what the project turns out to be, and what the City's scheduling needs turn out to be.

The Alvarado Architects & Associates, Inc. team, led by the following qualified professionals, have all made a commitment to the City:

Erasmo 'Ed' Alvarado, Jr., AIA - President/C.E.O., responsible for contract negotiations and will oversee entire project. Erasmo is an experienced architect, who also has a lengthy track record working in the Rio Grande Valley area. Erasmo's involvement with the project might be 100% depending on project size, and will be throughout all project phases.

Eli Alvarado - Vice President, immediate availability and on-site decision making. Eli has run an architectural office for many years in the Rio Grande Valley, and is familiar with local conditions, consultants and contractors. Eli's involvement will be 100% and consist of day-to-day operations from design through construction & warranty phase.

Mario Garza Jr., RA - Construction Administration, responsible for site observation. Mario has experience working on projects from small scale single buildings to large campuses. Mario's involvement will begin in the early stages of design to 100% during construction.

Please see key personnel's resumes on the following pages.

CONSULTANT #1:

Consultant Name: Simon Solorio, PE, Solorio Inc.

Brief History: Solorio, Inc., is a small firm established in 1997 and ideally suited to provide structural engineering services in a prompt and courteous manner for small, large and challenging projects. The key Principal will be directly involved with each project, and will be responsible for production management in all phases of design, contract documents, and construction administration.

Proposed Role: Structural Engineering Design

List a project(s) that the prime firm & consultant have worked together on during past 5 years:
Roma ISD - Gladiator Stadium Renovations
San Perlita ISD - New Sports Complex, Site Drainage Improvements, Transportation Building and Classrooms
City of Edinburg - New Animal Shelter
City of Los Fresnos - New Concessions Building
CACOST - Main Administration Building Balcony Repair

Provide a statement of the consultant's availability for the project(s): Simon Solorio will be immediately available for any work assigned to them by Alvarado Architects & Associates, Inc.

Provide resumes giving the experience and expertise of principals and key professional members for the consultant who will be assigned to the project: See resume on following pages.

CONSULTANT #2:

Consultant Name: Luis Madrigal, PE, A&G Engineering

Brief History: A&G Engineering is both HUB certified and a Service-Disabled Veteran Owned Small Business with expertise in Mechanical (HVAC), Electrical, and Plumbing (MEP) Design. We are a privately owned company that has faithfully served the Rio Grande Valley since 2012. A&G Engineering has primarily served private investors in light commercial construction including retail shopping plazas shell and finish-out, places for religious worship, and office Spaces. A&G Engineering has recently opened their focus to include public projects including work for cities, municipalities, and local school districts.

Proposed Role: Mechanical, Electrical & Plumbing Design / Technology

List a project(s) that the prime firm & consultant have worked together on during past 5 years:
Roma ISD - Gladiator Stadium Renovations
STC Pecan Plaza Kinesiology Renovation Phase I
Cayetano Office Building Addition
D BAT Baseball Academy

Provide a statement of the consultant's availability for the project(s): Luis Madrigal will be immediately available for any work assigned to Alvarado Architects & Associates, Inc.

CONSULTANT #3:

Consultant Name: Craig Gonzalez, PE, UIG Engineering

Brief History: Urban Infrastructure Group, Inc. (UIG) is a Texas based engineering and environmental consulting firm established in 2010 in Austin, Texas. Mr. Gonzalez moved the firm to Weslaco, Texas in 2012. As a Weslaco engineering firm UIG has established itself locally in the Rio Grande Valley and throughout the State of Texas. UIG has projects as far north as Dalhart in the Texas panhandle. UIG also has projects in Austin, Killeen, New Braunfels, Seguin and Conroe.

Proposed Role: Civil Engineering

List a project(s) that the prime firm & consultant have worked together on during past 5 years:
City of Edinburg - Animal Care Facility
WellMED Parking Lot Expansion
Optometry Office - Edinburg

Provide a statement of the consultant's availability for the project(s): Craig Gonzalez will be immediately available for any work assigned to Alvarado Architects & Associates, Inc.

Provide resumes giving the experience and expertise of principals and key professional members for the consultant who will be assigned to the project: See resume on following pages.

ERASMO D. ALVARADO, JR., AIA

President/Architect

Mr. Alvarado offers extensive experience in educational, institutional and public facilities as well as medical, office, commercial and golf course design. His 38-year career has taken him to work for the ruler of dubai, united arab emerits, to operating his own office in the rio grande valley. As architect of record for Alvarado Architects & Associates, Inc., Mr. Alvarado is involved in design development, construction documents, quality control and quality assurance, contract management and negotiations, as well as the day-to-day operations of the company.

BIOGRAPHY

Born and raised in the Rio Grande Valley (RGV), Luis always had a curiosity to learn how things operated. After severing six years with the United States Air Force, and receiving an honorable discharge, Luis returned to the RGV to finish his Engineering Degree. Immediately after graduation, he started work for General Electric under their Aero-Derivative Power Generation Business. During the design of industrial gas turbines, Luis learned the principles behind Fluid Flow Dynamics, Cooling Load/Transfer Analysis, and High Voltage Electrical Load Calculations. Upon qualifying as a Licensed Professional Engineer, Luis started A&G Engineering. Luis has sealed MEP Design projects from small 800 SqFt remodels to medium 40,000 SqFt shopping plazas, upto large 400,000 SqFt Aerospace Production Facilities. Luis has also been intimately involved with the projects after the design stage which has cemented his relationship with previous clients. Luis is one of forty engineers in the nation to be a part of the NCEES ME Committee tasked with creating FE Exam questions required for PE licensing and one of sixteen engineers in the nation to be part of the NCEES Architectural Engineering Committee tasked with creating the PE Exam.

Craig A. Gonzalez, P.E.

Position: Principal
Experience: 24 years
Education: Bachelor of Science - Civil Engineering, University of Texas at Austin, 2001
Licenses: Licensed Professional Engineer, Texas License No. 99628
Certified Floodplain Manager Certification No. 3277-17N
Certified TDI Windstorm Inspector
Professional Affiliations:
Guest Lecturer at The University of Texas-Rio Grande Valley ('18-'19)
American Society of Civil Engineers (ASCE)
Haestad HEC-RAS Floodplain Modeling & Navigating FEMA Approval ('03)

Areas of Expertise

- Project Management
- Land Development
- Wastewater Engineering
- Drainage Systems
- Municipal Infrastructure

Experience Summary

Mr. Gonzalez is the principal of Urban Infrastructure Group, Inc. in Weslaco, Texas. He has been leading UIG in the Rio Grande Valley since January 2012. Prior to starting UIG Mr. Gonzalez was a Project Manager and Design Engineer at CMA Engineering, Inc. in Austin, Texas.

Mr. Gonzalez has 24 years of experience in the design and project management of civil engineering projects. His diverse project experience includes feasibility studies, residential and commercial subdivisions, commercial site plans, project scheduling, cost estimates, construction plans and technical specifications, permitting, Low Impact Development (LID) design, construction administration and inspections.

Mr. Gonzalez has worked on a variety of projects including residential and commercial land development, master drainage studies, FEMA Letters of Map Change, floodplain modeling, and water and wastewater systems, structural/windstorm design and TDI certification. He has served as a guest lecturer for Water Resources Engineering at UTRGV. He has been involved in all phases of projects from planning through construction.

Mr. Gonzalez has managed staff and other sub-consulting engineers to produce technical specifications, construction plans and contract documents that meet the client's goals and government regulations. He is a proven construction administrator experienced in cost analysis, contractor scheduling, reviewing contractor submittals, shop drawings, pay requests, and negotiating change orders between client and contractor.

PROJECT TERMINATION

Alvarado Architects & Associates, Inc. has completed all awarded work.

LITIGATION SUMMARY

Alvarado Architects and Associates, Inc. has no claims or litigation including arbitration involving the firm in the last five (5) years. Our organization has completed all awarded work.

REQUIRED FORMS

Section 08

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

SENATE BILL 19 VERIFICATION

I, Erasmo Eli Alvarado III, the undersigned representative of

Alvarado Architects & Associates, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

JULY 14, 2026

Mardoqueo Hinojosa, City Engineer
415 W. University Drive
Edinburg, TX 78539

RE: REQUEST FOR QUALIFICATIONS FOR ARCHITECTURAL SERVICES ROTATION; RFQ NO. 2026-5

BRW Architects is pleased to submit our qualifications for RFQ 2026-5, Continuing Architectural Services. We appreciate the opportunity to be considered as the City's on-call architectural partner and are committed to providing responsive, high-quality design services that support the City of Edinburg's operational needs and long-term vision.

Committed to the City of Edinburg

As one of the fastest-growing communities in South Texas, Edinburg continues to invest in facilities that enhance municipal services and improve quality of life for its residents. Maintaining and improving these assets requires an architectural partner that is responsive, adaptable, and prepared to assist with projects ranging from small renovations and facility assessments to complex civic improvements. We are excited about the opportunity to support the City through this continuing services contract and to build a long-term relationship founded on trust, communication, and dependable service.

Experience That Delivers Value

For more than 40 years, BRW Architects has partnered with communities throughout Texas to plan, design, renovate, and expand civic facilities that serve the public for generations. We have completed hundreds of municipal projects and more than 100 facilities assessments and master plans for cities, counties, school districts, and universities, many of which have progressed into successful implementation. This experience has given our team a practical understanding of municipal operations, capital planning, and the importance of delivering projects that are functional, durable, and fiscally responsible.

Responsive On-Call Service

Successful on-call relationships are built on responsiveness, consistency, and accountability. We understand that assignments often arise unexpectedly, require accelerated schedules, and demand thoughtful solutions regardless of project size. Our team is structured to respond quickly, communicate proactively, and provide the technical expertise needed to move projects efficiently from initial evaluation through construction. Whether the assignment involves facility improvements, planning studies, renovations, or new construction, our focus remains on delivering quality work that aligns with the City's priorities, schedule, and budget.

A Dedicated Long-Term Partner

The professionals identified in our proposal will remain actively involved throughout each assignment, providing continuity, efficient decision-making, and clear communication from project initiation through completion. Supported by trusted engineering and specialty consultants with whom we have collaborated for many years, our team is committed to becoming a reliable extension of City staff. We believe successful projects begin with listening, understanding each client's goals, and developing solutions that reflect the character of the community while serving its long-term needs.

Thank you for your consideration of our qualifications. We acknowledge that no addenda were issued for RFQ 2026-5 and confirm that no addenda have been incorporated into this submission. We look forward to the opportunity to serve the City of Edinburg and contribute to its continued growth and success.

The undersigned is an officer of BRW Architects and is authorized to bind the firm contractually.

4.2.2

FIRM QUALIFICATION AND EXPERIENCE

WINKLER COUNTY EMS

WHY BRW

Established in 1984, Brown Reynolds Watford Architects, Inc (BRW) is a 160+ person architectural and planning firm with offices in Texas (Dallas, McAllen, Houston, and College Station) and San Francisco, California.

At BRW, we design with purpose. Our work is driven by a commitment to creating spaces that reflect the values and vision of our clients—places that foster ownership, pride, and lasting impact. We believe exceptional design begins with strong relationships, which is why we prioritize clear communication, close collaboration, and creative problem-solving at every stage of a project.

Our strength lies in our process. We build consensus among stakeholders, lead master planning efforts that guide long-term decision-making, and deliver thoughtful, budget-conscious solutions. The result is architecture with clarity, character, and care.

Whether we're developing a public safety facility, a healthcare clinic, or a vibrant community center, we aim to design buildings that function well, stand the test of time, and make a positive impact on both users and neighborhoods.

BRW offers several advantages that make the firm uniquely qualified to serve the City of Edinburg.

- **Extensive On-Call Experience.** Over the past ten years, BRW has completed more than 700 projects through On-Call, IDIQ, and Job Order Contract (JOC) programs and currently serves under continuing services contracts for numerous municipalities, federal agencies, and universities throughout Texas. This experience has refined our ability to mobilize quickly, manage multiple concurrent assignments, and deliver projects ranging from minor renovations to complex civic facilities with equal attention and responsiveness.
- **Award-Winning Civic Expertise.** BRW is nationally recognized for civic and public safety design, combining operational functionality, durability, and thoughtful architecture that reflects each community it serves.
- **Tailored Design Approach**. Rather than applying a signature style, BRW develops solutions that respond to each client's goals, operational needs, budget, and community character. Every project is approached with careful planning, efficient circulation, durable materials, and long-term maintainability as guiding principles.
- **Experienced, Consistent Teams.** The City will work with a stable project team throughout each assignment. Senior leadership remains actively involved while project managers provide day-to-day communication and coordination, resulting in continuity, efficient decision-making, and responsive service.
- **Depth of Resources.** BRW's statewide practice provides immediate access to specialists in civic architecture, public safety, planning, sustainability, construction administration, and quality control whenever a project's needs expand beyond the core team.

GOVERNMENT AGENCY EXPERIENCE

Since 1984, Brown Reynolds Watford Architects (BRW) has provided architectural services to municipalities, counties, state agencies, and special districts throughout Texas. During the past five years alone, BRW has successfully completed projects for dozens of governmental agencies, delivering planning studies, renovations, additions, and new civic facilities on schedule while meeting budget and operational goals.

BRW has partnered with more than 160 Texas communities and understands the pace, accountability, and coordination required for public-sector work and on-call architectural services. Our experience includes:

- City / Town Hall
- Courts
- Dispatch / 911 Call Centers
- Government Center / Tax Office
- Emergency Operations Centers
- Fire Administration
- Fire Stations
- Firing Range
- Fleet Maintenance
- Libraries
- Maintenance Facilities
- Memorial Gardens
- Municipal Centers
- Nature Centers
- Parks Facilities
- Performing Arts
- Police Stations
- Police Property and Evidence
- Public Works
- Recreation and Aquatics
- Senior / Active Adult Centers
- Sports Facilities
- Training Facilities
- Visitor Centers
- Other Unique projects

BRW Architects has had the honor of working with over 160 communities across the State of Texas. Some of our clients include:

- City of Baytown
- City of Beaumont
- City of Brazoria
- City of Bridge City
- City of Brownsville
- City of Corpus Christi
- City of Clute
- City of Dallas

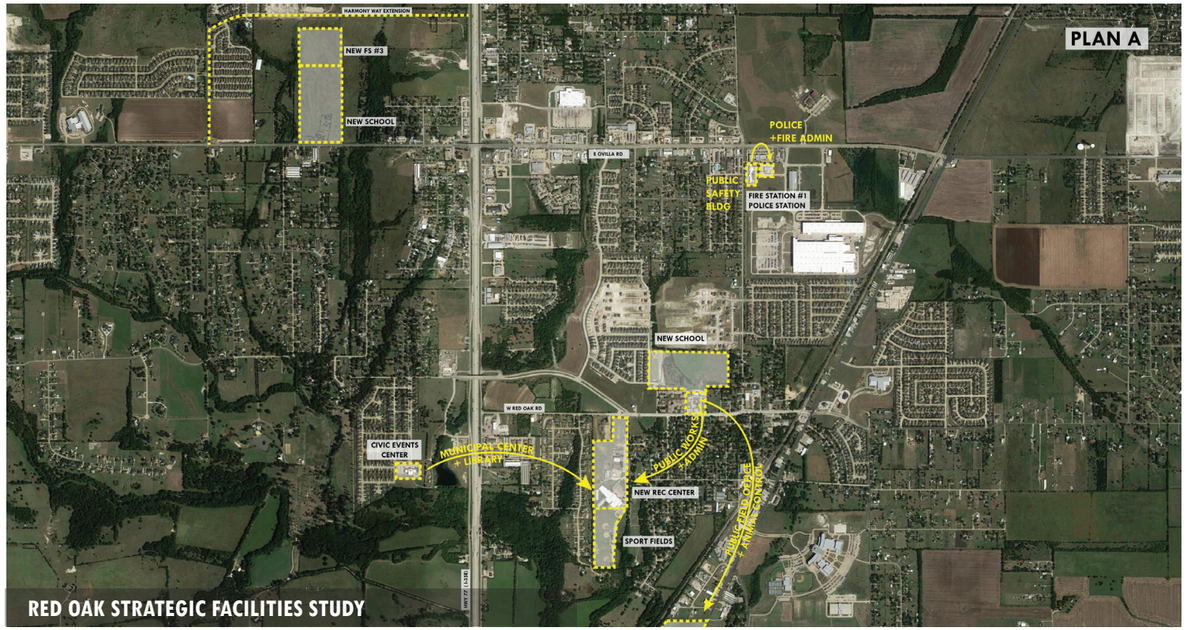
- City of Sugar Land
- City of Victoria
- City of Weatherford

OFFICE PROVIDING SERVICES

Architectural services for the City of Edinburg will be provided through BRW's McAllen office, located at 701 E. Expressway 83, Suite 150, McAllen, Texas 78501. This office serves as BRW's dedicated Rio Grande Valley location, allowing rapid response for meetings, site visits, field observations, and coordination throughout the duration of the contract.

The McAllen office is led by BRW's Senior Associate Andres Vela, AIA, whose professional experience and longstanding ties to the Rio Grande Valley provide valuable local knowledge and immediate accessibility. The office is fully supported by BRW's Dallas, Houston, and College Station offices, providing additional personnel and specialized expertise whenever required without sacrificing local responsiveness.

STAFFING APPROACH FOR SMALLER ASSIGNMENTS



BRW understands that continuing services contracts require flexibility. Assignments may range from small maintenance projects to major facility improvements, each requiring an appropriate level of staffing.

For smaller projects, BRW uses a streamlined team consisting of the McAllen-based Project Architect supported by a Principal-in-Charge. This approach provides direct communication, efficient decision-making, and cost-effective delivery while maintaining senior oversight throughout the project.

As assignment complexity increases, BRW supplements the local team with experienced specialists from across the firm, including civic design leaders, technical architects, construction administrators, and discipline-specific experts. Because these professionals routinely work together under BRW's integrated project delivery model, additional resources can be added seamlessly without disrupting schedules or communication.

This scalable staffing approach allows BRW to right-size every assignment while providing the City continuous access to senior leadership, specialized expertise, and the full resources of a statewide practice. Regardless of project size, the City can expect responsive service, consistent staffing, and timely delivery.

> **"One of BRW's greatest strengths is their focus on customer service. They listened closely, adapted to evolving needs, and ensured that the end result met or exceeded expectations.**
>
> **Chad Hester, Facility Manager**
> **City of Grapevine**

STRATEGIC PLANNING & FACILITY ANALYSIS

Every successful civic project begins with a clear understanding of needs, priorities, and long-term goals. BRW helps municipalities make informed decisions before design begins through strategic planning, facility assessments, feasibility studies, and master planning.

Our process combines stakeholder engagement, operational evaluations, facility condition assessments, and growth projections to create a comprehensive picture of current and future needs. We analyze existing facilities, identify deficiencies, evaluate alternatives, and develop practical implementation strategies that align with budgets and community priorities.

Rather than simply identifying problems, we provide actionable roadmaps that help cities prioritize investments, reduce risk, build consensus, and confidently plan for the next generation of public facilities. BRW provides superior studies for these types of projects:

- Adaptive Reuse
- Handicap Accessibility
- Renovations / Expansions
- City Halls
- Public Safety Facilities
- Historic Preservation / Adaptation
- City-Wide Strategic Facilities Plans
- Facilities Conditions Assessments
- Municipal / Campus Master Plans
- Public Works and Maintenance Facilities
- Feasibility Studies
- Recreation / Senior Activities
- Training Facilities
- Unique Projects
- and more!

FEATURED PROJECT

Flower Mound Strategic Facilities Study

BRW's study addressed the future facilities needs of the growing community across a wide range of municipal departments. The study documented the current facilities and infrastructure and provided recommendations of anticipated needs of the fast-approaching build-out of the Town. This information is being utilized by the Town to inform priorities for future projects as well as budgets for funding mechanisms and bond elections.

The study was far-reaching, including nearly all facilities envisioned for future expansion until build-out to the Town's limits. The study provided recommendations regarding the suitability of existing city-owned land or new site requirements, and forecast facilities needs with prioritization for immediate, near-term, and long-range planning initiatives. This project demonstrates BRW's expertise in similar municipal studies spanning multiple project types.

The study covered nine facility types: an Animal Shelter, Branch Library, Town Hall/Administrative Services Expansion, three Fire Stations (Stations 3, 6, and 8), Municipal Center/Annex Building, Police Station (including an existing facility assessment and Options 1A, 1B, and 2), Public Works Facility (West Service Center, Fleet Maintenance, and an expansion after relocation of Fleet Maintenance), and Recreation Center (West Recreation Center and Outdoor Sports Complex).

SAGINAW FIRE ADMINISTRATION

CIVIC ARCHITECTURE

Civic architecture should reflect the community it serves while providing safe, functional, and enduring public spaces. BRW designs municipal buildings that balance operational performance with civic identity, creating facilities that are both practical workplaces and lasting community assets.

Our designs respond to each client's goals, local context, and budget rather than following a predetermined style. We emphasize clear organization, durable materials, efficient building systems, and timeless architecture that supports long-term performance while minimizing lifecycle costs.

Whether designing a city hall, public safety facility, library, or community center, our goal is to create buildings that strengthen public trust, enhance daily operations, and contribute positively to the community for decades.

FEATURED PROJECT

Bedford Performing Arts & Community Park

The Bedford Performing Arts Center and Park Master Plan demonstrates how civic architecture can shape both a destination and a stronger sense of community. Designed as the centerpiece of a new cultural hub, the project transforms the historic Old Bedford School site into a welcoming civic campus that connects arts, recreation, and public gathering. Rather than treating the performing arts center as a standalone building, the design establishes a long-term vision for a five-acre site that invites residents and visitors to experience the community in new ways.

The 12,000-square-foot Community Arts Building is organized around a 200-seat multipurpose performance venue that supports local theater, music, community events, and touring productions. Supporting spaces, including dressing rooms, makeup areas, and a catering kitchen, provide the flexibility needed for a wide range of civic and cultural activities. Architecturally, expansive glass, a dramatic cantilevered roof, and carefully integrated landscaping create a transparent, welcoming civic presence that reflects the City's investment in arts and culture.

The surrounding park reinforces the project's civic purpose through event lawns, pavilions, picnic groves, outdoor performance spaces, pedestrian pathways, and preserved mature trees that encourage year-round public use. Future phases include a Black Box Theatre and Conference Center, extending the site's role as a regional destination. Together, the architecture and landscape create a civic environment that supports community identity, economic vitality, and lasting public value.

BEDFORD PERFORMING ARTS AND COMMUNITY PARK

SITE PLANNING & LANDSCAPE DESIGN

Successful civic sites do more than accommodate a building. They organize movement, strengthen connections, and create welcoming public spaces.

Our site planning process carefully considers circulation, accessibility, emergency response, parking, utilities, drainage, and future expansion to create sites that function efficiently from day one. Landscape design complements these goals by providing durable, attractive outdoor environments that support everyday use while reinforcing community identity.

From civic plazas and gathering spaces to streetscapes and public safety campuses, we design landscapes that improve the user experience, enhance resilience, and create lasting value for the community.

FEATURED PROJECT

Anna Community Library

BRW Architects, is bringing the City of Anna's first municipal library to life as a cornerstone of the community's evolving downtown. As part of a larger municipal master plan, the project demonstrates how thoughtful site planning and community placemaking can shape a vibrant civic destination rather than a single building.

The library is strategically positioned within a coordinated municipal campus that includes City Hall, the Central Fire Station, and surrounding streetscape improvements. A central public plaza ties these destinations together, creating a walkable environment that encourages residents to move easily between public services while strengthening downtown Anna's identity. Careful attention to pedestrian circulation, building orientation, and gathering spaces creates a welcoming civic experience.

Community placemaking continues throughout the building with flexible event spaces, arts and crafts rooms, a maker space, and collaborative learning areas that invite residents of all ages to gather, create, and learn together. A rooftop patio overlooking the plaza further strengthens the connection between the library and the public realm. Together, the site strategy and programming establish the library as both a community resource and a catalyst for downtown revitalization, creating a lasting civic destination that reflects Anna's vision for a connected and welcoming community.

HORSESHOE BAY CITY HALL

SAN PATRICIO COUNTY JUSTICE CENTER

MONT BELVIEU COUNCIL CHAMBERS & COURTS

MUNICIPAL CAMPUS & COURT PLANNING

Municipal campuses require thoughtful organization to support multiple departments, public access, and future growth. BRW specializes in planning civic campuses that improve operational efficiency while presenting a unified civic presence.

Our work includes programming, campus master planning, court planning, phased implementation strategies, and facility adjacencies that strengthen relationships between municipal departments. We carefully balance security, public accessibility, circulation, and long-term flexibility to create campuses that function effectively today while accommodating tomorrow's needs.

The result is an organized, efficient civic campus that supports government operations, enhances the public experience, and provides a framework for future investment.

- City of Horseshoe Bay
- City of College Station
- City of La Porte
- City of Leander
- City of Port Neches

FEATURED PROJECT

Los Fresnos City Hall

The City of Los Fresnos was seeking guidance for the future of their city facilities, including their City Hall, Police Station, Municipal Court, and Volunteer Fire/EMS Station. Currently, City Hall, Police, and Municipal Court share a facility that was outdated, spatially inadequate for all personnel, and fails to meet current building codes and accessibility standards. The Fire/EMS department was located in an adjacent facility which was also deficient in providing the necessary space requirements for the Fire and EMS crew and apparatus. In 2015, BRW performed a Feasibility Study evaluating the City's existing municipal facilities as well as current and projected space needs.

Through several meetings with each city department, BRW architects created a detailed program outlining the current and future facility requirements necessary to meet building codes and provide adequate services for the citizens of Los Fresnos. With a landlocked site, expanding the existing municipal facility was not an option, therefore, the City requested that BRW design a new municipal complex on city owned property near the rodeo fairgrounds.

PROSPER CENTRAL FIRE STATION

RICHARDSON POLICE DEPARTMENT

RICHARDSON FIRE ADMINISTRATION

INTERIOR ENVIRONMENTS & FF&E

Interior environments play a critical role in how civic facilities function every day. BRW integrates interior design and furniture, fixtures, and equipment planning throughout the design process to create spaces that support operations, durability, and occupant well-being.

Our team coordinates furnishings, finishes, equipment, and specialty systems alongside the architecture to ensure every space functions as a cohesive whole. From fire station living quarters and police evidence storage to council chambers, public service counters, and administrative offices, every interior is tailored to the unique operational needs of the facility. By coordinating interiors early in design, we improve functionality, simplify procurement, and create environments that remain flexible and durable throughout the life of the building.

Interior & FF&E Capabilities

- Furniture Selection
- Custom Furniture
- Interior Design
- Visitor Centers
- Recreation and Senior Centers
- City Hall and Administrative Offices
- Maintenance Facilities
- Commercial Exhaust Systems
- Industrial Shelving
- Locker Rooms
- High-Density Storage Systems

FEATURED PROJECT

Brownwood Event Center

The Brownwood Event Center Complex demonstrates how thoughtful interior environments and carefully coordinated furnishings can transform historic structures into vibrant civic destinations. Following a feasibility study that identified the historic J.M. Radford Grocery building and adjacent Ice House as the preferred site, the project combined adaptive reuse, strategic additions, and new construction to create a flexible event venue that supports community gatherings, conferences, celebrations, and cultural events.

Interior design balanced preservation with contemporary function by celebrating the buildings' industrial character while creating warm, inviting spaces. Exposed brick walls, expansive industrial windows, and generous ceiling heights establish a distinct sense of place, while carefully designed transitions between historic and new construction create a seamless visitor experience. Meeting rooms feature integrated audiovisual technology, communal tables, and flexible layouts that accommodate a variety of event formats while maintaining a cohesive design language.

BRW provided comprehensive FF&E services, coordinating furnishings, fixtures, and equipment as an integral part of the design process. Furniture selections emphasize durability, comfort, and flexibility while complementing the building's industrial aesthetic. Outdoor seating, modular furnishings, and event amenities extend activity beyond the interior, creating cohesive indoor and outdoor environments. The result is a welcoming, adaptable venue that supports Brownwood's growing event programming while reinforcing the city's ongoing downtown revitalization.

SUSTAINABLE STRATEGIES & SITE STUDIES

Sustainability begins long before building systems are selected. It starts with understanding the site and making informed decisions about how a facility fits within its natural and built environment.

BRW evaluates site opportunities and constraints to guide responsible land use, environmental stewardship, and long-term operational performance. Our approach includes site analysis, grading strategies, stormwater management, native landscaping, tree preservation, and careful building placement that minimizes environmental impacts while improving project performance.

Whether pursuing LEED certification or simply creating more resilient civic facilities, our sustainable strategies focus on practical solutions that reduce operating costs, conserve resources, and strengthen communities over the long term.

FEATURED PROJECT

Trinity River Authority General Office Complex Expansion

The Trinity River Authority General Office Complex Expansion demonstrates how thoughtful site planning can strengthen both organizational operations and environmental stewardship. Located on a 16.5-acre parcel adjacent to the Authority's existing headquarters, the project transforms underutilized land into a unified campus that supports future growth while respecting the natural character of the Trinity River Basin.

Rather than expanding into multiple locations, the design consolidates administrative offices, public meeting spaces, and field operations into a single campus. This approach eliminates the need for an off-site leased facility, bringing environmental field staff, boats, specialized equipment, and support functions together in one location. Consolidating these operations improves efficiency, reduces travel between facilities, and minimizes the long-term environmental impacts associated with dispersed development.

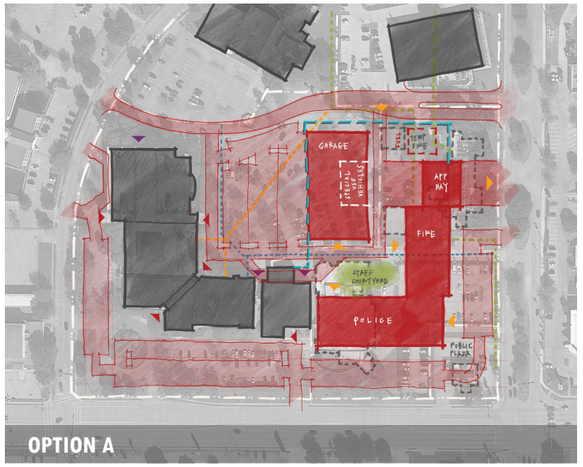
The site plan carefully organizes new buildings and support facilities to maximize land efficiency while preserving open space and limiting unnecessary site disturbance. Landscape design reinforces the Authority's mission by responding to the surrounding environment and creating a campus that reflects its role as a steward of Texas waterways. Enhanced public meeting facilities also establish the campus as a welcoming civic destination, reducing reliance on external venues while strengthening community engagement.

CONSTRUCTION ADMINISTRATION & OCCUPANCY

Delivering a successful civic project requires active involvement through construction and beyond. BRW provides comprehensive construction administration services that help protect design quality, support informed decision-making, and keep projects moving toward successful completion.

Throughout construction, we review submittals, respond to contractor questions, observe progress, coordinate with project teams, and help resolve field conditions quickly and collaboratively. For occupied facilities, we also develop phasing, relocation, and transition plans that allow public services to continue with minimal disruption. Our involvement extends through final occupancy, helping owners navigate move-in, commissioning, closeout, and project completion so new facilities are ready to serve their communities from the first day of operation.

Construction Administration Capabilities



- Attendance at Monthly OAC Meetings
- Field Observations
- Field Reports
- On-Site Photo Documentation
- Shop Drawing Review
- Submittal Review

OPTION C

ALL PHASES COMPLETE

FEATURED PROJECT

Lewisville Tittle McFadden Public Safety Campus

The Lewisville Tittle McFadden Public Safety Center demonstrates how we manage complexity through investigative planning, concept design, and effective phasing. This $100 million project replaced outdated facilities and consolidated core public safety services (police, fire administration, central fire station, quartermaster, data center, and 911 Dispatch) on a unified campus with an Emergency Operations Center and a five-level parking garage.

Keeping departments operational during construction was the central challenge. BRW worked with city leaders to map phasing options, identify essential operational areas, and sequence construction to minimize service interruptions and delays. Because maintaining operations in existing buildings wasn't feasible, we recommended temporary swing space for the Police Station, Fire Administration, and Firehouse #1, balancing upfront costs against long-term savings. The broader campus, home to the Jail, Courts, Library, Municipal Annex, and Recreation Center, remained occupied throughout. When adjacent projects fell behind schedule, our phasing plan proved resilient. Construction phasing information boards kept the public and staff informed, resulting in zero citizen complaints.

Over the two-and-a-half-year schedule, departments moved into temporary facilities at key milestones, keeping every function fully operational. Proactive communication, disciplined phasing, and a willingness to pursue enabling projects allowed us to deliver a cohesive, community-oriented public safety campus that honors city values and demonstrates clear value in execution.

PROSPER FIRE ADMINISTRATION 911 MEMORIAL

DALLAS FIRE STATION 33 PUBLIC ART

CLEBURNE HONOR MONUMENT

PUBLIC ART INTEGRATION

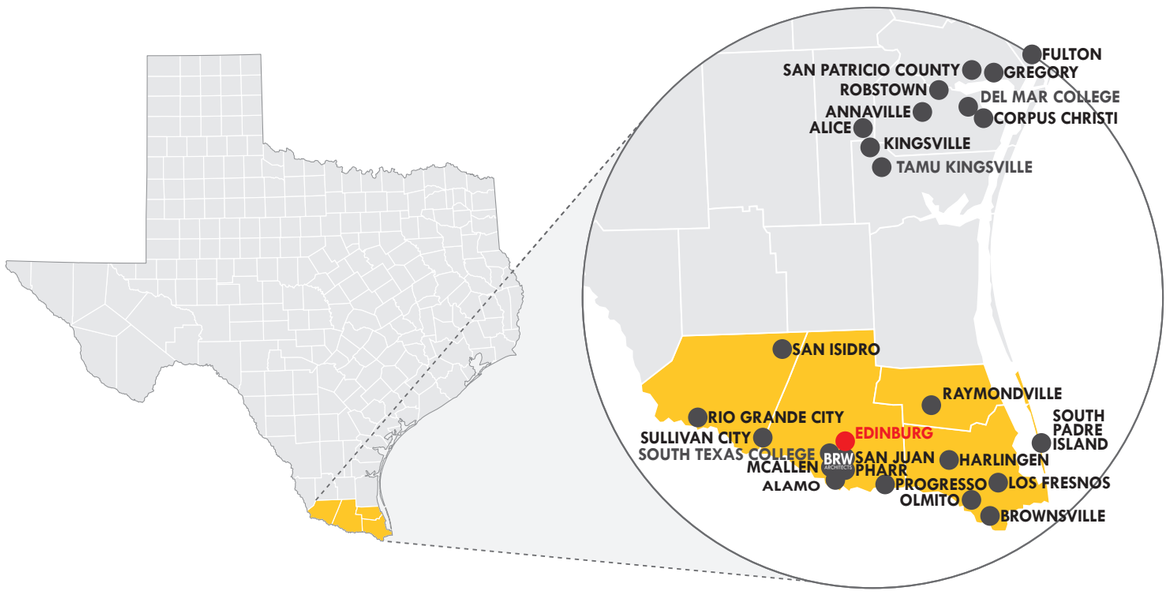
Artwork integration is a specialized service we offer across multiple project types, not just an afterthought.

We offer public artwork selection and coordination as a formal specialized design service. This means we manage the full process of identifying, selecting, and placing artwork within a project, working alongside clients to make sure pieces align with the building's purpose and the community it serves. On projects like the City of Lewisville Public Safety Facility, artwork coordination was delivered alongside furniture selection, move management, and environmental graphics. In short, we treat artwork as part of the design, not a separate add-on. Whether it's a mural, a memorial, environmental graphics, or curated pieces, we coordinate the selection, placement, and lighting to make sure it fits the building and means something to the people who use it.

BRW also offers in-house graphics capabilities which is a key part of how we bring art into buildings. Our services include environmental graphics, branding, signage, and wayfinding. We treat graphics as a storytelling opportunity. Our designers listen to a client's history, culture, and values, then translate that narrative into the built environment through murals, infographics, imagery, and branded elements. This approach connects occupants to the space and to each other.

PUBLIC ART INTEGRATION CAPABILITIES

- Artist Selection
- Artist Interviews
- Sculpture
- Murals
- Memorials
- Monuments
- Exterior & Interior Graphics
- Signage & Wayfinding
- Storytelling



FEATURED PROJECT

Richardson Public Safety Campus

The Richardson Public Safety Campus demonstrates how integrated branding, public art, and wayfinding can strengthen civic identity while creating a welcoming and intuitive public experience. Serving the Police Headquarters, 911 Dispatch Center, Fire Station, and Support Building, the 10-acre campus establishes a cohesive identity through a consistent architectural palette, coordinated environmental graphics, and site elements that reflect the values and professionalism of the Richardson Police and Fire Departments.

Public art is thoughtfully incorporated as part of the visitor experience, with a signature sculpture serving as a landmark at the Police Headquarters and reinforcing the campus's civic presence. Rather than functioning as a standalone feature, the artwork is integrated with the site's landscape and entry sequence, creating a memorable first impression and strengthening the connection between the community and its public safety facilities.

Wayfinding is seamlessly integrated into the campus through intuitive site planning, prominent public entrances, coordinated signage, architectural cues, and landscape features that guide visitors from arrival to destination while maintaining secure operational zones. Consistent branding elements throughout the campus reinforce departmental identity and create a unified experience across multiple buildings. Together, these strategies improve navigation, enhance the visitor experience, and establish a recognizable civic destination that reflects the City's commitment to service, transparency, and community engagement.

SOUTH TEXAS COLLEGE

SOUTH PADRE ISLAND FIRE STATION NO. 1

LOWER RIO GRANDE VALLEY EXPERIENCE

Understanding the local culture, community needs, and design professional and contracting community is vital to the project's success. BRW's local presence in the Lower Rio Grande Valley gives us valuable insight into these aspects, allowing us to address the expectations of building users.

Our team includes Andres Vela, who currently serves as AIA LRGV President Elect as well as a committee member at both South Texas College and Texas A&M University. Andres is proud to call McAllen home and brings a deep connection to the community through both his personal roots and professional experience.

BRW has been actively designing and delivering projects in the Lower Rio Grande Valley for over three decades partnering with municipalities, universities and colleges, and the United State Postal Service. Our newest office in McAllen cements our local presence and allows for on-the-ground responsiveness, immediate engagement with city stakeholders, and is building strong ties with city and community leaders.

FEATURED PROJECT

Rio Bank Edinburg Banking Center

The Rio Bank Edinburg project reflects the Rio Bank's continued commitment to serving the growing communities of Edinburg and the surrounding Rio Grande Valley. Strategically located along a major highway corridor, the new facility is designed to establish a strong and recognizable presence while providing convenient access for both pedestrian and vehicular banking services.

The building features a contemporary architectural design that emphasizes quality, visibility, and a welcoming customer experience. Thoughtful site planning, attractive landscaping, and efficient circulation create a functional and visually appealing development that complements the area's continued growth.

In addition to the bank, the project includes flexible lease space for businesses seeking a highly visible location in one of Edinburg's expanding commercial districts. Together, the bank and future tenants will contribute to a vibrant mixed-use development that enhances the surrounding area, supports local economic activity, and provides lasting value to the community.

The Edinburg location is an important step in Rio Bank's long-term growth strategy, with additional projects planned for Brownsville and McAllen. These future developments will continue to expand the bank's reach across the Rio Grande Valley while reinforcing its commitment to providing accessible, high-quality banking facilities that serve the region's evolving needs.

REFERENCES

CITY OF LEWISVILLE

Mark McNeal, Fire Chief
T: 972.219.3563
E: mmcneal@cityoflewisville.com

The Lewisville Tittle McFadden Public Safety Center, located in Lewisville, Texas, is a completed BRW Architects project for the City of Lewisville. The campus replaced outdated facilities and consolidated a wide range of public safety functions onto a centralized site, including a new Police Station, Fire Administration, Central Fire Station, Quartermaster, Data Center, 911 Dispatch, and an Emergency Operations Center (EOC). The EOC is integrated with training and multi-use space, and the campus also features a five-level parking garage built around a police property and evidence building. The design reflects a modern civic aesthetic, combining stone and glass facades with thoughtful landscaping, and the facility serves as a landmark for community safety in Lewisville.

DALLAS WATER UTILITIES DISTRIBUTION DEPARTMENT

Jeff Hadaway, Superintendent
T: 214.670.8005
E: jeffrey.hadaway@dallas.gov

The Wastewater & Stormwater Emergency Response Service Center is a project for Dallas Water Utilities located in Dallas, Texas. The project consolidates operations from multiple leased facilities into a single new owned facility, featuring approximately 25,000 SF of new construction. The facility includes administration space, a command center, crew space, a workshop, and parking and maintenance bays. The site is master planned for roughly 4 acres of additional future use and is designed to achieve LEED Silver certification for new construction. BRW Architects served as Designer and Planner on the project.

CITY OF SAGINAW

Doug Spears, Fire Chief
T: 817.230.0403
E: dougspears@saginawfire.us

The Saginaw Central Fire Station is a new 25,000 SF fire station and fire administration facility located in Saginaw, Texas, completed for the City of Saginaw. It serves as a replacement for the existing 6,000 SF facility and also houses a main Emergency Operations Center (EOC). The project was designed to strengthen public safety services in the community, and its location across from the Saginaw Recreation Center and the Weldon Hafley Development Center supports opportunities for community engagement.

SOUTH TEXAS COLLEGE

Martin Villarreal, Project Manager, Facilities Planning & Construction
T: 956.872.3739
E: mvillareal_2405@southtexascollege.edu

The South Texas College Cooper Center for Performing Arts is an $8.6 million expansion and renovation project located in McAllen, Texas. The project co-locates the Arts with the school's Theatre Department, enhancing facilities for both the Dance and Music Programs to help recruit and retain students and faculty.

The new facility totals approximately 10,200 SF, including a 4,600 SF addition, and features technology-rich spaces for the Music Program, rehearsal rooms, faculty studio offices, practice rooms, and a renovated studio for Dance. It also serves as the main rehearsal space for the Valley Symphony Orchestra.

RIO BANK - EDINBURG

Omar Rodriguez, Senior Excutive Vice President, COO
T: 956.878.1428
E: o.rodriguez@rio.bank

The Rio Bank project in Edinburg, TX is a completed new branch construction in East Edinburg. Rio Bank invested approximately $3,700,000 to build the 7,800-square-foot facility, which includes full banking operations with three drive-through lanes, along with adjacent lease spaces for complementary commercial tenants. BRW Architects served as Prime Architect on the project.

PAST PROJECTS WITH THE CITY OF EDINBURG

BRW Architects has worked in the City of Edinburg for the United States Postal Service, and other commercial entities, as well as many projects in the valley. BRW has a growing office in McAllen, and we look forward to creating a successful relationship with the City of Edinburg.

4.2.5
INSURANCE

INSURANCE

Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. A list of any insurance claims against the firm within the past 5 years.

TYPES AND AMOUNTS

Professional liability and worker's compensation insurance information can be found on the following pages.

CLAIMS AGAINST THE FIRM IN THE PAST 5 YEARS

In the last five years, BRW has had a small number of claims; most were resolved through negotiation and / or mediation as follows: BRW was a third party to a lawsuit between the contractor and the City of Cedar Park regarding resolution of construction-related issues involving a fire station for the City (approx. $25,000). BRW Architects worked closely with our liability insurance carrier and the Architect of Record to resolve construction-related issues involving acoustical issues of a public safety training facility for City of Carlsbad, CA that was resolved through mediation, prior to litigation being fully developed (approx. $85,000).

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

Date: 07.14.26

Company/Vendor Name: Brown Reynolds Watford Architects, Inc.

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

Brown Reynolds Watford Architects, Inc.

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE

For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

STATEMENT OF QUALIFICATIONS

ERO ARCHITECTS

City of Edinburg RFQ #2026-5 for

ARCHITECTURAL SERVICES

Due: Tuesday, July 14, 2026 at 3PM

135 Paseo Del Prado, Suite 58 | Edinburg, TX 78539 | goERO.com

1. TRANSMITTAL LETTER

Indicate interest and commitment to perform services for the City of Edinburg, include contact information (physical address, telephone, fax, cell phone, and email address) for the primary person responsible for your RFQ who will be the point of contact for the City on all correspondence and communications pertaining to the RFQ. State whether any addendums to this RFQ have been received by your firm and whether consideration of their content has been included in your RFQ. The letter must be signed by an officer of the firm who is authorized to bind the firm to contract and shall contain a statement to this effect.

July 14, 2026

Ms. Lorena Fuentes
Finance Manager
City of Edinburg
415 W. University Drive
Edinburg, Texas 78541

RE: RFQ 2026-5 – Request for Qualifications for Architectural Services

Dear Ms. Fuentes,

As one of the fastest-growing communities in South Texas, the City of Edinburg continues to invest in facilities and public spaces that support its residents, strengthen essential services, and create opportunities for future growth. Every public project, whether a renovation, expansion, or new facility, contributes to the quality of life of the community and helps advance the City's long-term vision.

ERO Architects is honored to submit our qualifications for RFQ 2026-5 for Architectural Services. As a firm headquartered in Edinburg and serving Texas communities for more than 25 years, we have been fortunate to contribute to several projects that support the City's continued growth and investment in public facilities, including the Arts, Culture and Events Center, Downtown Parking Garage and Retail Center, Police Department Training Facility, and Police Department Building Expansion. Through these efforts, we have developed a strong understanding of the City's goals, processes, and expectations for delivering successful public projects.

Public-sector work has been the foundation of ERO's practice since the firm's inception. Over the years, we have partnered with cities, counties, school districts, and public agencies throughout Texas on projects ranging from facility improvements and renovations to large civic and community developments. ERO has built its reputation on responsive service, thoughtful planning, and the ability to coordinate the multidisciplinary teams necessary to successfully deliver projects of varying size and complexity.

As a firm headquartered in Edinburg, we remain closely connected to the community and readily available to City staff. Supported by our architects, planners, designers, and consultant partners, our team has the resources and flexibility to assist with assignments ranging from small task orders and facility improvements to larger capital projects as the City's needs evolve.

We value the relationship we have built with the City of Edinburg and appreciate the opportunity to be considered for this architectural services rotation. Our commitment to communication, accountability, and client service has allowed us to build long-standing relationships with public-sector clients throughout Texas, and we look forward to continuing to support the City through projects that serve residents today and for years to come.

ERO Architects acknowledges receipt of all addenda issued for this RFQ and confirms that their contents have been incorporated into this Statement of Qualifications.

Brian A. Godinez will serve as ERO Architects' primary point of contact for all correspondence and communications pertaining to this RFQ. I certify that I am authorized to bind ERO Architects contractually and to execute agreements on behalf of the firm.

Thank you for your consideration.

Respectfully submitted,

Brian Godinez, CEO
135 Paseo Del Prado, Suite 58, Edinburg, TX 78539
956.655.4655 / 956.382.6256 / bgodinez@goERO.com

2. FIRM QUALIFICATION & EXPERIENCE

Discuss the firm's experience and history in performing architectural services in a timely manner, particularly for other governmental agencies in the past five (5) years. Discuss the firm's uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

2. FIRM QUALIFICATION AND EXPERIENCE

Established in 2001, ERO Architects is a Texas-based, architecture-led firm with a long-standing focus on public-sector work. Over the past several years, ERO has provided architectural services for municipalities, counties, school districts, higher education institutions, utility districts, and other governmental entities throughout the Rio Grande Valley. Representative clients include the regional cities of Edinburg, McAllen, Pharr, San Juan, Donna, Alamo, Weslaco, Mercedes, Brownsville, and Port Isabel, as well as Hidalgo County, Hidalgo County Appraisal District and the Brownsville Public Utilities Board.

During this period, ERO has delivered a wide variety of public-sector projects, including city halls, public safety facilities, community and recreation centers, cultural facilities, administrative buildings, courthouse and county support facilities, and utility-related infrastructure projects. These assignments have ranged from facility assessments and renovations to new construction, requiring coordination with public officials, user groups, consultants, contractors, and regulatory agencies.

ERO understands the importance of timely project delivery in the public sector, where schedules are often driven by funding cycles, procurement requirements, operational needs, and public accountability. The firm maintains a proactive project management approach that emphasizes early coordination, clearly defined milestones, consultant accountability, and regular communication with clients throughout the duration of a project. This approach has allowed ERO to successfully manage multiple concurrent assignments while maintaining continuity of service, responsiveness, and adherence to project schedules.

With more than 310 public-sector projects completed, ERO has developed a strong history of providing dependable architectural services for governmental agencies while consistently supporting clients through planning, design, bidding, and construction administration in a timely and organized manner.

WHAT MAKES ERO UNIQUELY QUALIFIED FOR THE CITY OF EDINBURG

ERO's long-standing presence in Edinburg and extensive public-sector experience position the firm well to support the City's architectural services needs. Over the years, ERO has partnered with the City on projects such as the Arts, Culture and Events Center, Downtown Parking Garage and Retail Center, Police Department Training Facility, and Police Department Building Expansion. The firm has also completed numerous projects throughout the greater Edinburg area, including the Hidalgo County Courthouse, Bio-Safety Testing Laboratory, Precinct 4 Mechanics Shop, Hidalgo County Appraisal District facilities, multiple Edinburg CISD projects, and projects on the UTRGV Edinburg campus. This experience has allowed our team to develop a strong understanding of the region, its environmental conditions, local stakeholder expectations, and the City's permitting and project development processes.

Our firm regularly serves as the prime consultant, bringing together architects, engineers, and specialty consultants into a coordinated project team tailored to each assignment. This approach provides clients with a single point of responsibility while ensuring the right expertise is available throughout planning, design, bidding, construction, and close-out. ERO's experience includes both large capital projects and smaller task-based assignments delivered through on-call and continuing services contracts. This flexibility allows the firm to respond effectively to a wide range of project needs while maintaining continuity, responsiveness, and clear communication. ERO also places a strong emphasis on cost control, documentation, project administration, and collaboration, helping clients make informed decisions and keep projects moving forward. At its core, ERO is committed to creating durable, cost-effective, and community-focused public facilities. For the City of Edinburg, that commitment means providing a responsive local partner that understands the community, values strong relationships, and is dedicated to helping the City successfully deliver projects of varying size and complexity.

2. FIRM QUALIFICATION AND EXPERIENCE

OFFICE LOCATION PROVIDING SERVICES

Services for the City of Edinburg will be provided primarily through ERO Architects' headquarters:

135 Paseo del Prado, Suite 58, Edinburg, Texas 78539

This location provides direct access to the City for meetings, site visits, facility reviews, coordination, and project communication. Additional staff and resources are available through ERO's other Texas offices as needed to support production, technical review, consultant coordination, and specialized project needs.

APPROACH TO SMALLER ASSIGNMENTS AND PART-TIME STAFFING NEEDS

ERO understands that a rotation contract requires flexibility. Some assignments may call for a full design team and consultant coordination, while others may require a smaller group to respond quickly to a focused scope. ERO's approach is to match the team to the assignment rather than overstaffing every task the same way.

For smaller assignments, ERO uses a streamlined team structure led by primary project leadership with support from the specific staff or consultants needed for the task. This allows the City to receive timely attention, clear communication, and practical service without unnecessary layers of coordination. As the scope expands, ERO can add support from architects, designers, production staff, construction administration personnel, or specialty consultants while maintaining continuity of leadership.

ERO's staffing approach emphasizes continuity of leadership and personnel, scaling resources as workload demands fluctuate, and keeping key personnel accessible to clients. This is especially important for on-call work because assignments may move quickly, require immediate coordination, or involve existing facilities where timely decisions are needed.

Whether an assignment involves a facility assessment, minor renovation, feasibility study, or larger capital improvement project, ERO applies the same emphasis on communication, coordination, documentation, and responsiveness to ensure successful delivery.

NEW COUNTY COURTHOUSE
Hidalgo County

3. TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Submit resumes summarizing qualifications and experience of project manager, key staff and any support staff likely to be assigned to the work.

"I ensure ERO designs satisfy budget, owner's program requirements, end user needs and aesthetically enhance the community."

OCTAVIO CANTÚ, JR.

CSI, CDT, AIA, NCARB

PRINCIPAL-IN-CHARGE

Years of Relevant Experience: 30
Professional Licensure: TBAE #20909, NCARB #98154, CSI

Octavio is a foremost expert in design and project management who adds elements of community into his work. He is both a principal and the chief operating officer for ERO. With more than 20 years of experience, his projects reveal his versatility. Octavio is adept at working within owners' budget and program requirements while incorporating cultural references into a building's design. He has led complex commercial and apartment home projects, along with an extensive list of city and government projects. Octavio enjoys overcoming project challenges while working with clients during the construction and facility improvement process.

CALEB GOINS

AIA, NCARB

PROJECT MANAGER

Years of Relevant Experience: 12
Professional Licensure: TBAE #26930, 8 years; AIA# 38377266; NCARB Certificate #90699

Caleb's work focuses on managing and overseeing projects in ensuring they align with the client's vision while meeting the technical standards of the architectural field. He collaborates with ERO's engineering, design and construction teams in guiding projects from conception to completion. Caleb leads design efforts in coordinating projects with consultants in preparing construction documents and addressing challenges that may arise. Caleb believes in creating meaningful spaces that go beyond mere structures. He focuses on what he calls "placemaking." They are projects which create environments that resonate with the people who use them and serve the community at-large. Caleb's goal is to be part of teams that are both functional and inspiring. A holistic approach, he says, satisfies the wishes of clients while also elevating the work ERO produces as a firm. Joining ERO in mid-2024, Caleb says the people and culture of the firm make it an exceptional place to work. He appreciates ERO's close-knit and supportive environment. He has seen how the firm's emphasis on collaboration and professional development fosters personal growth and a collective commitment to deliver outstanding results for ERO's clients.

To Whom It May Concern:

It is with great pleasure that I provide this letter of reference regarding ERO Architects' recent involvement with the Boys and Girls Club expansion project in Weslaco. The project included the addition of new program space and building designed to support student activities, community use, and future growth.

ERO demonstrated a strong commitment to understanding the needs of the students and families that would ultimately benefit from the facility's recreation spaces. They worked closely with stakeholders to ensure the design aligned with the intended use of the expansion while remaining within the project's budget.

ERO assisted in developing design solutions, preparing construction documents, and coordinating with the project team to keep the project on track. Their communication was consistent throughout the process, and they were responsive to requests and questions as they arose.

They worked closely with us on the final selection of a qualified general contractor. Their experience was valuable during this process.

Their team approached the project in a professional and collaborative manner, providing practical solutions while maintaining the overall vision of the project. Their experience with similar work and understanding of public projects contributed to a smooth process.

We are pleased with the outcome of the project and the working relationship we established with ERO - and the several other projects they have completed for the city. I would recommend them for future work.

Sincerely,

Omar Rodriguez
Assistant City Manager

LETTER OF RECOMMENDATION
ERO Architects – Brownsville Recreation Facilities
Sean G. De Palma, CPRE
Director of Parks & Recreation Department

June 29, 2026

To Whom It May Concern:

I am pleased to provide this letter of recommendation for ERO Architects based on our experience working together on multiple recreation facility improvements in Brownsville, Texas.

ERO served as the design team for a coordinated set of improvements across several key park facilities, including Cabler Park, Oliveira Park, Monte Bella Park, Dean Porter Park, and Brownsville Sports Park. These projects involved the thoughtful integration of new amenities such as interactive splash pads, as well as essential upgrades including canopy repairs, irrigation enhancements, regrading of fields, fencing, and restroom improvements.

Throughout the duration of these projects, ERO consistently demonstrated a strong understanding of how public parks serve diverse, multi-generational communities. Their designs prioritized usability, safety, and long-term durability while remaining responsive to local climate conditions and operational needs.

What sets ERO apart is their commitment to collaboration and responsiveness. Their team maintained open communication with stakeholders, provided timely solutions to challenges, and ensured that each phase of work aligned with project goals, schedule expectations, and available funding. Their ability to coordinate improvements across multiple sites under a unified vision resulted in a cohesive and impactful enhancement to Brownsville's park system.

ERO also demonstrated a high level of technical competence and attention to detail, addressing both visible community amenities and underlying infrastructure needs. Their work at Brownsville Sports Park, in particular, helped extend the useful life of existing facilities while improving overall functionality and user experience.

Based on our experience, I can confidently say that ERO Architects is a reliable and capable partner for public recreation and community facility projects. Their dedication to quality design, cost control, and

(cont.)

client service makes them an asset to any project team. I would recommend ERO for municipal parks and recreation center projects.

Please feel free to contact me if additional information is needed.

Sincerely,

Sean De Palma, CPRE
Director, Parks and Recreation Department
City of Brownsville

April 8, 2025

Robert L. Salinas
City Manager
City of Alamo
420 N. Tower Road
Alamo, TX 78516

Dear Mr. Salinas:

Please accept this letter of reference regarding ERO Architect's project experience with the City of San Juan. While I served as the City Manager, they designed the new 30,000 SF downtown city hall and transit center facility. ERO did an exemplary job on the building. We asked for them to design a public space that met our program of requirements and budget, and they exceeded everyone's expectations.

I like how they created an interior receiving exterior façade with a courtyard that naturally achieves passive heating and cooling design strategies. The aesthetic of the architecture weaves the community's history, culture, and land into the fabric of the building's design. The building houses multiple city departments along with a coffee shop for employee and community service. The east side of the building is the bus transit center and connects the region to the downtown area.

ERO approached our project with professionalism and a cooperative manner, working well with our staff. I was involved with ERO during the planning, design and construction of the project. Their strengths are in planning and design, but I can't discount their attention to the construction process while staying on schedule and budget. They did a great job highlighting options for the city during the project and especially how they successfully linked the new city hall to the rest of the downtown area.

They have a knowledgeable team of professionals and the communications between the city and their team helped move our project to success. I would be comfortable with ERO for any architectural project. I am pleased how ERO's buildings add so much to a community's quality of life. If you have any questions, feel free to contact me any time at 956-457-1806 and at benarjona@yahoo.com.

Regards,

Ben Arjona
Former City Manager
City of San Juan

4. REFERENCES

Reference #1:

Omar Rodriguez, Assistant City Manager; 956.968.3181
Project: City of Weslaco - Boys and Girls Club Expansion
Project Description: The Weslaco Boys & Girls Club Expansion demonstrates ERO Architects' ability to lead a youth-focused public facility addition through planning, design, consultant coordination, cost control, bidding support, and construction administration. Developed for the City of Weslaco, the project expanded the existing Boys & Girls Club campus with a new stand-alone building that supports recreation, learning, administrative operations, teen programming, social support, family programs, and related site development. The facility combines high-use community spaces such as a gymnasium, activity/program rooms, offices, support areas, and building systems designed for durability, accessibility, and long-term public use.

ERO handled the project through a collaborative, stakeholder-centered delivery process. The team began with review of existing site and building conditions, program verification, design and expansion-planning alternatives, cost estimating, renderings, and construction-document development for competitive bidding. Working with the City of Weslaco and Boys & Girls Club leadership, ERO translated operational needs into a buildable design, evaluated existing infrastructure, assessed parking and ingress/egress, and coordinated the addition so it remained compatible with the existing facility while responding to budget and program requirements.

The project required disciplined coordination across architecture, interiors, structural, civil, MEP, IT/security/fire, A/V/media, bidding/negotiation, construction administration, and warranty/closeout services. ERO served as the lead/prime firm, coordinating consultants and internal staff while using regular progress reviews, value engineering, and problem-solving workshops to protect scope, cost, schedule, and quality. Construction was phased and coordinated with club leadership and stakeholders so existing youth and family programs could continue operating on site, demonstrating ERO's ability to manage active-facility logistics, maintain stakeholder communication, and deliver municipal community facilities with practical, cost-conscious design solutions.

Nicole Reyman - Design Support Staff
Monica Rodriguez - Construction Administrator (CA)

Reference #2:

Sean De Palma, Assistant City Manager; 956.968.3181
Project: City of Brownsville - Multiple Recreational Facility Improvements
Project Description: The Brownsville Community Improvement Corporation (BCIC) Parks Project is a multi-site initiative developed in partnership with the City of Brownsville to enhance neighborhood parks as a cohesive system of public spaces. The project included improvements across multiple park locations, such as sports field upgrades, splash pads, playground replacements, accessibility enhancements, restroom renovations, lighting, irrigation, shade structures, and general site amenities. Designed to support a wide range of users—from youth athletics to family recreation—the program emphasizes safety, accessibility, and long-term durability. ERO Architects served as the prime consultant, leading planning, design, construction documentation, bidding, and construction administration while coordinating a multidisciplinary team of structural, civil, MEP, and landscape professionals.

ERO approached the project with a strong emphasis on collaborative delivery and phased implementation. The process began with site assessments and stakeholder coordination to define scope and align improvements with BCIC funding priorities. Work was organized into multiple bid packages, allowing the City to efficiently phase construction and prioritize key improvements across different parks. Throughout design, ERO maintained close communication with City staff and stakeholders, incorporating feedback into decision-making while managing scope, cost, and schedule. Cost control was reinforced through iterative estimating, value engineering, and coordination on strategic cost-saving measures to ensure the project remained aligned with available funding without compromising overall goals.

From a technical standpoint, the project reflects ERO's ability to deliver resilient, climate-responsive park design suited to South Texas conditions. Design solutions address high heat, intense sun exposure, and heavy rainfall using shade structures, durable materials, and effective drainage strategies. Improvements to existing structures, along with new amenities such as splash pads and upgraded fields, required careful coordination across disciplines and detailed documentation to support permitting and construction. During construction, ERO provided full administration services—including contractor coordination, submittal and RFI review, site observations, and closeout—ensuring quality control and schedule adherence. The project demonstrates ERO's ability to successfully manage complex, multi-site municipal work through disciplined coordination, cost awareness, and a team-driven approach that delivers functional, community-focused public spaces.

Octavio Cantú, Jr. - Senior Project Manager / Senior Leadership
City of Edinburg Projects: Arts, Cultural and Events Center; Parking Garage and Retail Center; Police Department Training Facility; and Police Department Building Expansion
Albert Chronis - Project Manager
Gabby Cantu - Design Support Staff
Joey Yzaguirre - Design Support Staff

Reference #3:

Ben Arjona, Former City Manager; 956.457.1806
Project: City of San Juan - City Hall & Transit Center
Project Description: The San Juan City Hall Project is a new municipal civic facility developed for the City of San Juan to support a growing community and consolidate key public-facing departments in a prominent downtown location. The project was planned as a new City Hall building housing multiple city departments, including city management, finance, planning, utilities, human resources, information technology, economic development, public service functions, conference/EOC space, and visitor-oriented amenities. The building was designed to serve both City staff and the public, creating a civic destination that improves access to services while reinforcing the City's downtown identity.

ERO handled the project through a collaborative planning and delivery process focused on program validation, budget alignment, civic identity, and constructability. Working with City leadership and staff, ERO helped define departmental programming needs, develop cost estimates, evaluate design intent, and translate the City's operational requirements into a coordinated building plan. The architectural approach used a U-shaped organization, public-facing entries, an interior courtyard, and passive design strategies to strengthen the building's connection to public space. The design drew from San Juan's civic and cultural context, including Mission-style forms, Valley culture, and surrounding heritage buildings, resulting in a public building that feels rooted in place while supporting modern municipal operations.

From a delivery standpoint, the project demonstrates ERO's ability to lead complex municipal architecture through design, construction documents, bidding, construction administration, and closeout coordination. ERO coordinated architectural, structural, MEP, civil, landscape, interior, and specialty systems documentation while advancing the project through construction documents, procurement support, addenda, and construction-phase coordination. The team maintained close communication with City stakeholders, addressed program and budget priorities, and supported the City through design and construction decisions. This project directly aligns with the City of Edinburg RFQ 2026-5 because it demonstrates ERO's capacity to manage planning, programming, architectural/engineering coordination, cost estimating, schedule and budget discipline, construction documents, bidding support, and construction administration for civic facilities.

Octavio Cantú, Jr. - Project Architect / Senior Project Manager
City of Edinburg Projects: Arts, Cultural and Events Center; Parking Garage and Retail Center; Police Department Training Facility; and Police Department Building Expansion
Yesenia Tijerina - Project Manager

GIGNAC ARCHITECTS

July 14, 2026

City of Edinburg
ATTN: Mardoqueo Hinojosa, City Engineer
415 W. University Drive
Edinburg, Texas 78539

Dear Selection Committee,

Gignac Architects is pleased to submit our Statement of Qualifications in response to RFQ No. 2026-5 for the City of Edinburg's Architectural Services Rotation List. We appreciate the opportunity to be considered as a trusted architectural partner and look forward to supporting the City's continued investment in facilities and infrastructure that enhance the quality of life for its residents.

For more than 35 years, Gignac Architects has provided comprehensive architectural, planning, interior design, and construction administration services to public-sector clients throughout Texas. Our firm has built a reputation for delivering thoughtful, cost-effective, and enduring design solutions through a collaborative process founded on responsive client service, technical excellence, and careful stewardship of public resources.

We recognize that serving on the City's rotation list requires more than design expertise. It requires a team that can respond quickly to varying project needs, communicate effectively with City staff, manage multiple assignments simultaneously, and consistently deliver high-quality work regardless of project size or complexity. Whether assisting with facility assessments, renovations, additions, adaptive reuse, or new construction, Gignac Architects is committed to providing the same level of attention, responsiveness, and professional service to every assignment.

Our multidisciplinary team has extensive experience delivering projects for municipalities, educational institutions, and other public entities throughout Texas. We understand the unique requirements of publicly funded projects, including stakeholder engagement, regulatory compliance, budget management, scheduling, procurement requirements, and coordination with consultants and contractors. Our approach emphasizes early collaboration, thorough planning, proactive communication, and practical solutions that balance functionality, aesthetics, maintainability, and long-term value.

At Gignac Architects, we believe successful partnerships are built on trust, accessibility, and accountability. We strive to become an extension of our clients' staff by providing responsive service, thoughtful guidance, and innovative solutions tailored to each project's unique goals. Our commitment to quality and client satisfaction has resulted in long-standing relationships with many public-sector clients across Texas, and we would welcome the opportunity to establish the same trusted partnership with the City of Edinburg.

Thank you for your consideration of our qualifications. We appreciate the opportunity to submit our Statement of Qualifications and look forward to the possibility of serving the City of Edinburg as a member of its Architectural Services Rotation List. We would be honored to contribute our experience, creativity, and commitment to excellence in support of the City's current and future capital improvement initiatives.

I attest that all of the information included in this Statement of Qualifications is true and correct. We look forward to the opportunity to further demonstrate our approach and commitment, along with discussing the project in further detail with the City of Edinburg.

Sincerely,

GIGNAC ARCHITECTS

GIGNAC & ASSOCIATES, LLP (dba Gignac Architects) has been serving Texas with Architectural, Interior Design, Landscape Design, and Construction Administration Services since 1988 when it was established by firm Principal, Raymond Gignac. The company is classified as a Limited Liability Partnership. Gignac Architects is a full service design firm, providing planning expertise in educational, institutional, municipal, and commercial work with an emphasis on quality design. We provide four office locations, in Corpus Christi, Harlingen, McAllen and Dallas to better serve our clients with quick, responsive expertise.

RAYMOND GIGNAC, AIA, Principal-in-Charge, has nearly 40 years of experience in Texas, Louisiana, New Mexico, California, Washington D.C., Virginia, and Maryland in all aspects of Architectural practice. As leader of the Gignac project team, Raymond personally oversees quality, cost control, staff and resource allocation, and commitment to project deadlines. With this leadership, Gignac Architects has successfully completed projects of all sizes—on time and in budget.

THE GIGNAC TEAM employs a full staff of design and construction professionals to promote quality in overall project management from project inception to completion. Since 1988, Gignac Architects has taken pride in providing a full range of services to meet the needs of our clients and to communicate both graphically and personally. We will commit the work force and resources necessary to complete your projects within the designated schedule. Each project team is tailored to address the unique challenges and opportunities to ensure a successful project.

Gignac Architects has successful experience with a wide-range of construction projects. We have extensive experience designing new construction projects, and an estimated 75% of our workload involves complex additions and renovations, and we are highly proficient in transforming existing structures into modernized, high-performance buildings with new purposes.

The Gignac team is a small business, a Minority Business Enterprise, and a previously certified Historically Underutilized Business (HUB) in the State of Texas.

Isla Blanca Park Improvements, Sand Piper Pavillion, & Public Works Facility

South Padre Island, Texas

DESCRIPTION OF SERVICES

The project included design improvements to the existing pavilion and canopy at Isla Blanca Park in South Padre Island, Texas, which coincided with the existing Master Plan. Improvements include a multipurpose building, public works facility, outdoor amphitheater, restrooms and rinse stations, concessions areas and BBQ areas, RV area improvements, events and attractions spaces, parking, and pavilions.

Sand Piper pavilion included lighted beachfront boardwalks with shade structure. The pavilion was constructed 200 feet landward from the original site, with a conservation system of dunes to protect the structure.

One of the most important elements of the design of Sand Piper Pavillion is the historical relationship with the park. In the 1960's, a curved shaded structure existed on the site, which was a popular hang-out spot and reprieve for locals and tourists during the hot coastal summers. The new design of the structure reimagined the old, with updated amenities and utilities.

CITY OF CORPUS CHRISTI

North Bayfront Park

Corpus Christi, Texas

DESCRIPTION OF SERVICES

Following a devastating Category Four hurricane in 1919, Corpus Christi filled a block into the Corpus Christi Bay to construct a seawall that would protect the community from future disasters. Since that time, the bayfront has been defined by Shoreline Drive—a wide boulevard designed primarily for automobiles—and provided limited spaces for pedestrians in the hot South Texas sun.

In 2004, Gignac Architects and a teaming firm prepared the overall master plan for the Corpus Christi bayfront—spanning from McGee Beach in the south to the ship channel in the north. The approved master plan called for the relocation of Shoreline Boulevard in order to accommodate green spaces along the water's edge, thus creating the vision for the North Bayfront Park. Situated next to the American Bank Center Arena, North Bayfront Park is the first of a series of parks to be constructed from the master plan.

A key feature of the park includes an interactive fountain to attract children and families. Parents can sit at the adjacent café in the park, protected from the wind with glass windscreens, while watching their children play in the fountain. The café is shaded by fabric stretched between posts while groves of palms and mesquite trees will grow over time to provide shady spots in the park. An arbor is designed to support colorful Bougainvillea planting that shade a walkway leading to the fountain. The arbor fronts a parcel identified for a future restaurant included in the design to activate and program the park.

CITY OF MERCEDES

Multipurpose Facility & FEMA Community Safe Room

Mercedes, Texas

DESCRIPTION OF SERVICES

The City of Mercedes was chosen by the State of Texas as a location to construct a 20,000 sf community safe room shelter to serve the region in severe weather events. Our firm was selected to perform complete architectural services for the new facility. The building will also serve as a new multipurpose center for the municipality and includes new parking, covered drop-off area, basketball court, restrooms and office spaces.

CITY OF EAGLE PASS

Public Safety Headquarters Complex: Police & Fire

Eagle Pass, Texas

DESCRIPTION OF SERVICES

After completing a facilities assessment and master plan, Gignac & Associates has been asked to design a brand new fire station for the City of Eagle Pass as part of a Public Safety Complex. The new facilities house administrative offices, training facilities, vehicle bays, sleeping quarters, lounge areas, kitchen, showers, and restrooms. This concrete panel structures will serve as the city government's emergency shelter for hurricanes.

Claudio is a successful and motivated project architect, with over (18) years of experience, and who recently joined our McAllen team. Claudio Leon graduated in 2004 with a B. Architecture. from the University of Houston. He worked as an architectural project manager for several years in the Rio Grande Valley, from 2005 to 2012, where he gained a wealth of design and project management experience in various building typologies, including Airport, Industrial and Healthcare type facilities. During this time, he also provided international project management support for Industrial projects located along the US-Mexico border. Later, in 2014, he successfully completed his MSc. degree at the Cologne University of Applied Sciences in Germany in the field of environmental sciences with a focus on renewable energy systems. Since then, he has gained experience in the field of **Sustainable Building Design**, particularly in the area of Whole Building Energy Simulation. In 2022 Mr. Leon came back to the United States Leon after being the Sustainability lead for AECOM in Germany. He is regularly actively involved in all areas of a project, from Schematic Design to performing Project Management and Construction Administration duties.

Re: Request for Qualifications – Architectural Services
RFQ 2026-5

Architectural Selection Committee:

We appreciate the opportunity to submit our firm's qualifications for the City of Edinburg's upcoming project. Gomez Mendez Saenz Inc. has a strong understanding of the City's mission, values, and commitment to serving the community. We also recognize the importance of incorporating safety, functionality, and quality into every aspect of the design process.

With many years of experience providing comprehensive architectural services, Gomez Mendez Saenz Inc. is committed to delivering thoughtful, innovative, and practical design solutions. We believe that open communication and collaboration are fundamental to a successful project. By understanding our clients' goals and working closely with them throughout the design process, we consistently deliver projects that meet their expectations. Our reputation throughout the Rio Grande Valley is reflected in the many repeat clients who have continued to place their trust in our firm over the years.

Our team consists of eleven professionals, including three registered architects. The project will be led by Architect Roan G. Gomez, AIA, who will serve as the primary point of contact throughout the design process. Mr. Gomez will oversee project coordination, address any design-related questions, and conduct final contract negotiations on behalf of the firm. He may be reached at (956) 546-0110 or by email at rgg@gmsarchitects.com.

No addenda were issued for this solicitation.

We appreciate your consideration of our qualifications and welcome the opportunity to work with the City of Edinburg. We look forward to contributing our experience, expertise, and commitment to excellence in support of the City's vision for this project.

Sincerely,

Roan G. Gomez, AIA
President

GMS Architects provides our clients with attractive and efficient projects.

About our Firm

Gomez Mendez Saenz, Inc.

Founded in 1998 and continuing an architectural practice established in 1976, Gomez Mendez Saenz, Inc. has provided planning, architectural design, and construction administration services to public agencies throughout South Texas for nearly five decades.

Our portfolio includes municipal facilities, county buildings, public safety facilities, educational campuses, housing authorities, and federal projects. We have successfully delivered projects ranging from renovations and facility expansions to complex new construction, always with a commitment to quality, responsiveness, and fiscal responsibility.

Located in Brownsville, Texas, our firm provides clients throughout the Rio Grande Valley with immediate access to experienced architects and project managers. Our local presence enables us to respond quickly during design and construction, providing timely decisions, regular site visits, and hands-on project management throughout every phase of a project.

Why Gomez Mendez Saenz?

Local Experience

For nearly fifty years, our team has designed facilities specifically for the Rio Grande Valley. We understand the region's climate, soil conditions, permitting requirements, construction practices, and available labor force, allowing us to develop practical and cost-effective design solutions.

Public Sector Expertise

Our firm has extensive experience serving municipalities, counties, school districts, state agencies, and federal clients. We understand public procurement requirements, stakeholder coordination, budget accountability, and the documentation necessary for publicly funded projects.

Responsive Service

Because our office is located within the region we serve, our architects remain readily available throughout construction. Quick response times reduce delays, improve communication, and help resolve field issues before they affect project schedules.

Integrated Design Team

Our long-standing relationships with trusted structural, civil, mechanical, electrical, plumbing, roofing, and landscape consultants create a seamless design process that minimizes conflicts and improves project coordination.

Budget-Conscious Design

Every design decision is evaluated for constructability, long-term maintenance, energy efficiency, and overall value. Our goal is to deliver facilities that are functional, durable, and economical to build and operate.

Clear communication is essential with our clients.

Our Project Approach

Every successful project begins with listening.

We work closely with each client to understand operational goals, functional requirements, budget expectations, and long-term needs before design begins. Through collaborative programming sessions, we identify project priorities and establish a clear roadmap for design.

During site evaluation, we assess existing conditions, utilities, drainage, circulation, infrastructure, and constructability to ensure the proposed improvements are practical and cost-effective.

Our multidisciplinary team remains engaged throughout schematic design, design development, and construction documents, ensuring continuous coordination among all engineering disciplines while maintaining strict budget control through ongoing cost evaluations.

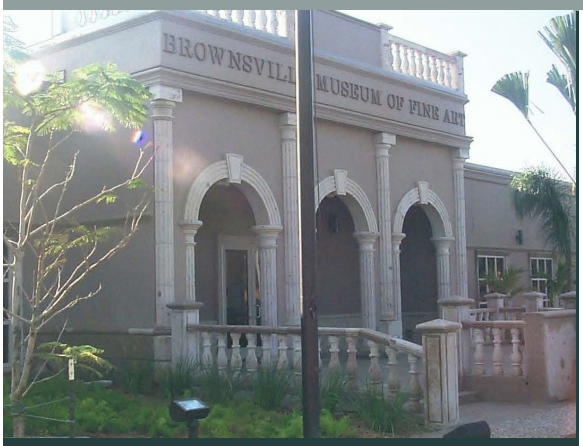
This collaborative process minimizes redesign, reduces change orders, and results in construction documents that are accurate, coordinated, and ready for bidding.

Construction Phase Services

Our commitment extends beyond design.

During construction, our architects and consultants remain actively involved through regular site visits, review of contractor submittals, responses to Requests for Information, evaluation of pay applications, and observation of critical construction milestones.

Our resident inspector performs routine site observations while our project architects remain available to resolve field issues promptly.



At project completion, we perform comprehensive punch list inspections, oversee system commissioning, and verify that the completed facility meets the requirements of the construction documents before final acceptance.

Capacity and Resources

Gomez Mendez Saenz has the personnel and resources necessary to begin work immediately.

Our professional staff includes three registered architects supported by experienced CADD technicians and a well-established team of consulting engineers. This structure enables us to manage multiple projects simultaneously while maintaining the personalized service our clients have come to expect.

Our collaborative approach, experienced project team, and local presence allow us to consistently deliver projects on schedule, within budget, and to the highest professional standards.

Commitment to Our Clients

At Gomez Mendez Saenz, we believe successful projects are built on communication, accountability, and trust. Our goal is not simply to deliver construction documents, but to become a valued partner throughout planning, design, construction, and project closeout.

We are committed to providing innovative, practical, and sustainable design solutions that meet our clients' immediate needs while supporting their long-term goals. Every project receives the personal attention of our principals, ensuring responsive service, thoughtful leadership, and a continued commitment to excellence from concept through completion.

50 Years of Service

Relevant Experience

Gomez Mendez Saenz has successfully completed projects involving:

- ◊ Municipal Buildings
- ◊ Public Safety Facilities
- ◊ County Buildings
- ◊ Educational Facilities
- ◊ Administrative Offices
- ◊ Renovations and Facility Expansions
- ◊ New Construction
- ◊ Roofing Replacement Programs
- ◊ Site Development
- ◊ Parking and Paving Improvements
- ◊ Drainage Improvements
- ◊ Landscape and Irrigation Design
- ◊ ADA Accessibility Upgrades

Our team is experienced in applying:

- ◊ International Building Code (IBC)
- ◊ International Fire Code (IFC)
- ◊ Texas Accessibility Standards (TAS)
- ◊ Americans with Disabilities Act (ADA)
- ◊ Local Building Codes
- ◊ Municipal Life Safety Requirements
- ◊ Stormwater and Drainage Design Standards
- ◊ HUD, GSA, and other federal funding requirements

GMS ARCHITECTS

COMMITMENT

Our architects will be actively involved in every phase of the project, from the initial planning meeting through final completion. Roan Gomez will lead the design team in evaluating the project's requirements, developing schematic design concepts, and preparing design development documents. Both Principals will be available to participate in presentations to the Board. Throughout the project, Mr. Gomez will be supported by our experienced CAD staff to ensure efficient and accurate production of all project documents.

Our multidisciplinary design team also includes Sigma Engineering (MEP Engineering), Melden & Hunt, Inc. (Civil Engineering), Chanin Engineering (Structural Engineering), Amtech Solutions (Building Envelope Consulting), and SSP Design, LLC (Landscape Architecture). Having successfully collaborated on numerous projects, our team has established strong working relationships that promote seamless coordination and efficient project delivery.

Our team will be readily available to meet with you as needed, and our extensive experience will help streamline the design and construction process. Ramon Sanchez, our resident inspector, is available to provide daily construction observation services, if required, supplementing our regularly scheduled site visits. In addition, Gomez Mendez Saenz will be available to respond promptly to contractor questions and resolve construction-related issues as they arise.

An important advantage of our team is that all consultants have extensive local experience. Their familiarity with regional codes, permitting agencies, construction practices, and project conditions provides an added level of confidence that every critical aspect of the project will receive the attention of seasoned professionals. Our firm has the professional staff, technical expertise, and resources necessary to meet your project schedule. We understand the importance of maintaining aggressive timelines and have consistently demonstrated our ability to deliver projects on schedule while meeting the highest standards of quality.

ROAN G. GOMEZ, AIA— PRESIDENT

Roan Gomez brings more than 46 years of comprehensive architectural experience to Gomez Mendez Saenz, Inc. His extensive background encompasses every phase of project delivery, including programming, master planning, design, construction documentation, and construction administration. Throughout his career, he has successfully led the development of large, complex projects, with a strong emphasis on educational facilities across South Texas.

Mr. Gomez's expertise includes the programming, planning, design, and construction management of municipal, educational, and housing authority projects. He has extensive experience establishing and implementing design standards, coordinating multidisciplinary consultant teams, managing project budgets and schedules, and ensuring compliance with all applicable federal, state, and local codes, regulations, and funding requirements. His leadership and technical expertise have consistently contributed to the successful delivery of high-quality, client-focused projects.

DAVID A. MONREAL, AIA— VICE PRESIDENT

David Monreal brings more than 30 years of architectural experience to Gomez Mendez Saenz, with a distinguished career focused primarily on the planning, design, and delivery of educational facilities. His professional experience also encompasses municipal and private-sector projects, providing a well-rounded perspective on a variety of project types and client needs.

Mr. Monreal began his architectural career in San Antonio before expanding his expertise in St. Louis, where he served as Project Architect and Project Manager for numerous higher education residence halls and student centers. Upon returning to his hometown of Harlingen, he has partnered with school districts throughout South Texas to deliver K–12 campuses, support service facilities, and athletic complexes that respond to the evolving needs of students, educators, and communities.

Throughout his career, Mr. Monreal has demonstrated exceptional leadership, organizational, and project management skills. He provides oversight through all phases of design and construction, ensuring effective coordination among project stakeholders, adherence to project schedules, and disciplined cost control while maintaining a commitment to quality, functionality, and client objectives.

CHRISTOPHER GARZA, AIA, NCARB, CBECxP

Christopher Garza brings over 20 years of architectural experience to GMS, with a background spanning private practice, international design leadership, and institutional project delivery. A graduate of The University of Texas School of Architecture, he founded an award-winning private architecture practice in McAllen prior to joining GMS. Earlier in his career, he served as Senior Designer at 5+design in Los Angeles, where he led design for high-profile mixed-use and commercial international projects. As one of a limited number of architects in the United States certified in Building Enclosure Commissioning (CBECx), he brings specialized expertise in building performance and envelope integrity. Currently serving as a Project Architect at GMS, he contributes innovative design strategies and technical leadership to K-12 and community-focused projects across the region.

SIGMA HN ENGINEERS, PLLC

JOSE ANTONIO NICANOR, PE, RCDD, LEED AP

Prior to founding SIGMA HN Engineers in 2012, Tony accumulated more than six years of experience as a lead electrical and telecommunications engineer, providing engineering services for new construction and renovation projects across the commercial, institutional, industrial, educational, municipal, and federal sectors. Tony is a licensed Professional Engineer (PE), a Registered Communications Distribution Designer (RCDD), and a Leadership in Energy and Environmental Design Accredited Professional (LEED AP). He is currently pursuing the Commissioning Authority (CxA) credential through the Associated Commissioning Group (ACG), reflecting his commitment to expanding Sigma HN Engineers' expertise in building commissioning, systems integration, and high-performance facility delivery.

Throughout his career, Tony has successfully led multidisciplinary engineering projects for cities, municipalities, school districts, higher education institutions, state agencies, and federal clients. His experience includes the design and integration of electrical power distribution, mechanical and plumbing systems coordination, structured cabling and fiber optic backbone infrastructure, information and communications technology (ICT) systems, electronic safety and security systems, emergency power systems, building automation systems, thermal energy plant expansions, audio/visual systems, and media infrastructure. His portfolio includes municipal buildings, public safety facilities, parks, educational campuses, administrative offices, operations centers, and other public infrastructure projects requiring reliable, secure, and maintainable building systems.

Tony's multidisciplinary background enables him to deliver fully coordinated engineering solutions that integrate building systems with modern communications and security technologies while emphasizing sustainability, maintainability, operational reliability, and lifecycle performance. His expertise in engineering design, telecommunications infrastructure, and sustainable building practices allows him to develop practical, innovative solutions that meet the Owner's Project Requirements and support long-term facility operations. This experience includes successfully delivering projects for cities and municipalities throughout South Texas, including the City of Edinburg, where SIGMA HN Engineers has provided professional engineering services across multiple municipal facilities and infrastructure improvements.

AMTECH INFORMATION

Cesar has 19 years of experience in the Engineering Design of Mechanical, Electrical and Plumbing Systems serving educational facilities such as Community Colleges, Universities and K-12 Schools. Among other skills, he specializes in engineering construction coordination and commissioning. Cesar is experienced in the simulation and modeling of system energy performance, thermodynamic and mechanical load analysis, and calculation.

At Ethos he is responsible for MEP engineering design, planning, coordination, and management. He oversees mechanical and plumbing design production, including BIM coordination. He ensures that engineering design is applied in compliance with construction codes, in a sustainable and cost-effective manner.
Cesar is committed to his profession. He has grown in the MEP Engineering industry, starting at the very basics, followed by assisting Projects' Engineers of Record, then practicing Licensed Engineering, and to finally becoming part of the Ethos Engineering Management team. His professional affiliations include ASHRAE and volunteering as an engineering mentor in STEM clubs at local schools.

ACR Engineering, Harlingen, TX 2006 – 2014
Starting as Graduate Engineer, he functioned as CAD operator performing drafting tasks and basic calculation activities. With time and experience gained, he became a Mechanical Designer, in charge of generating HVAC and Plumbing plans and documents suitable for cost estimation and constructability coordination activities. Rapidly he became qualified to perform building heat load analysis, design of HVAC systems and design of thermal plants. He also functioned as lead design engineer, engineer of record, and supervisor of the production of mechanical design.

MARIO REYNA, P.E.

Mr. Reyna has 17 years of experience in the field of civil engineering. He has completed a wide range of projects for both public agencies and private developers. He has participated in a variety of development types, including healthcare facilities, municipal utilities mixed-use developments; schools and universities; shopping centers; offices; industrial facilities; residential and multi-family developments; and state and local governmental agencies.

He has extensive experience in site civil design, including building, facility, and utility layout; site grading and earthwork; and design of paving, drainage, and utility improvements. Other areas of expertise include hydraulic and hydrologic analysis for open and closed storm drainage systems and floodplain reclamation studies; water distribution and wastewater collection systems.

Mr. Reyna's engineering experience has been with the City of Mission where he was part of a design team preparing plans and specifications for the expansion of Mission's North Water Treatment Plant and McAllen Public Utilities Boeye Reservoir Relocation Project. In addition to Mission and McAllen, Mr. Reyna was part of a second design team that prepared plans and specifications for the construction of the new Cimemark Theater, Main Event Center, Lubys, Clark Knapp Honda within the City of Pharr, Texas. Currently, Mr. Reyna is finalizing construction plans and specifications for La Joya ISD and South Texas College. These projects include site development project for a new FEMA Shelter Dome within the La Joya ISD property and infrastructure utilities for portable buildings at the Pecan Campus.

As an engineer and inspector, Mr. Reyna has always responded to the needs of every client and has function as an extension of their staff to exceed their performance objectives and respond to their needs on short notices.

SSP Design

Title:
Director

Education:
-Texas A&M University,

-Italart Design Program, Florence, Italy

S. SCOTT PAJESKI, ASLA—DIRECTOR

During the past thirty-five years, Scott has worked professionally as a resident in more than seven countries and has participated in projects in more than twenty countries worldwide. Projects have included some of the world's largest infrastructure developments as well as exclusive resort, residential, commercial, open space and parks master plans. Design, documentation, and administration have been accomplished working with both local and international multi-disciplinary teams. Scott has worked with several internationally renown design firms including Belt Collins & Associates in Hawaii, M&SF in Finland, and EDAW Inc. in Australia. He has been consulting privately as SSP for over twenty years in the US and has designed and implemented projects in Texas, Louisiana, Florida, Hawaii, New York, and Massachusetts.

Scott has extensive experience in master planning and landscape design including two years in Australia participating in the master planning and design documentation of Millennium Park for the 2000 Olympic Games in Sydney. Other significant international projects include; design and documentation of the Robina Town Center, an exclusive retail development including extensive landscape and water features; Mango Hill New Town, a 4,000 acre master planned community including a town center, residential, commercial and a business park; and the master planning of the Taiwan National Botanical Gardens, a 500 acre botanical garden project for the Federal Government of Taiwan.

Scott has been consulting in South Texas for more than twenty-five years and has worked on several large-scale commercial, municipal and residential projects as well as the University of Texas, the City of Brownsville, the City of McAllen, Texas A&M Various School Districts across the Valley and several national and local architects, engineers and developers.

PROJECT

City of Primera
City Hall

CLIENT INFORMATION

Celina Gonzales, City Manager
22893 Stuart Place Rd.
Harlingen, TX 78552
(956) 423-9654

CONSTRUCTION COST

$10,473,662.00

DESCRIPTION

The City of Primera Municipal Complex Project consists of a site development of approximately 5 Acres out of a 20 Acre tract at the intersection of Primera Rd and Cragon Rd. The remaining site was master planned for a future Fire Station Building, Library, Community Building and a park development for future pool, shade structures, pavilions, basketball court and sports fields.

The current phase of the project includes two building structures, the City Hall/ Police Station Building and the Public Works Building.

The City Hall/Police Station Building is approximately 13,600 SF. You enter the building into a large lobby area that fronts the main Court Room which is in the center of the building. On one half of the building, you can approach the city offices of the Court Clerk, Accounts Payable, Community Health Worker, Building Inspector, City Attorney, City Secretary and City Manager. There are also spaces for Emergency Management and the Fire Chief with associated storage areas, IT support and staff breakroom and restrooms. The other half of the building consists of the City Police Department. Offices included are Dispatch, large open squad room, Code Enforcement, Sargent and Chief of Police Office. The space also includes Evidence and an Armory Rooms. There are two hold cells that front a Booking Area and an associated Interview Room. The building also includes an exterior covered secure porte chochere at the police station booking area and an exterior covered drive thru canopy at a cashier window with pneumatic tube system.

PROJECT

Cameron County
Parks & Recreation Office Building

CLIENT INFORMATION

Joe E. Vega, Parks Director
Cameron County
Parks & Recreation Department
33174 State Park Road 100
South Padre Island, TX 78597
(956) 761-3700

CONSTRUCTION COST

$4,524,792.62

DESCRIPTION

The project houses the Cameron County Parks Department administration personnel and staff servicing the Isla Blanca Park. The building will also serve as the Emergency Command Center and Training Center for Cameron County on South Padre Island.

The building is an 8,700 square foot two story structure with greeting center, administrative offices and bookkeeping on the first floor. The second floor houses the training room, conference room and future offices as the departments expand.

Site improvements include 30 parking spaces, mobile trailer parking and led marquee sign for visitors.

The Public Works Building is approximately 13,440 SF. The office space area includes a receptionist area and offices for a Supervisor, Director and Operator. There's a Lab space, Break Room, two Training Rooms, and a Chemical Storage Room. Adjacent to the office area is an enclosed vehicle storage area with overhead doors on two sides of the building. The building also has exterior covered areas and a wash bay area to clean off city vehicles.

The overall site includes public and staff concrete parking areas, asphalt drives with complete landscaping and a full irrigation system.

CONSTRUCTION COST

$26,000,000.00

DESCRIPTION

The UTRGV Edinburg Collegiate High is a unique partnership between Edinburg Consolidated Independent School District and the University of Texas Rio Grande Valley. GMS collaborated with both entities to program a building that could be utilized during the day as a High School Campus for a (700) student capacity and then transition in the evenings to a College campus. The building has a total of 76,329 sf and includes specialty classrooms for teaching tracts in Engineering, Computer Science, and an Aspiring Teacher Academy. These specialty classrooms are rich in equipment, technology, and A/V infrastructure. The campus also includes a tiered seating large group instruction space that accommodates 175 occupants and a full serving kitchen with a cooler/freezer, dry storage area and a secure designated delivery area at the back of the building. Both the large group instruction and kitchen serving lines open to the 6,000 sf two story volume Commons Area. This space is the hub of the building and will be utilized by students as a collaboration space and dining area. The Commons Area is also anchored by the Information Literacy Center and a set of Learning Stairs. These areas provide unique opportunities for delivering instruction to students and provide flexibility for presentations to small or large groups. Moving away from the main Commons Area the building is a two-story structure that has (23) General Classrooms, (2) Physics Labs, Chemistry Lab, Biology Lab, and Health Science Lab Classrooms. Adjacent to the Engineering Lab there is a Computer Aided Drafting Lab and an Instructional Tech Lab Classroom. Flanking the Main Entry are the one-story Administration Areas for both ECISD and UTRGV personnel, including offices, conference rooms, work rooms, and support spaces. The structure is Steel Column and Beam Structure with joist and metal deck roof, Exterior metal studs clad with brick veneer.

Mr. Joe Vega, Park Director
Office (956) 761-3700
jevega@co.cameron.tx.us

CONSTRUCTION COST

$4,708,668.00

CAMERON COUNTY
PARKS & RECREATION

DESCRIPTION

This project consists of the development of a new community park on 11 acres in Santa Maria, Texas. Park features include athletic fields for soccer and softball. Additional activities at the park include a splashpad, playground structure and beach volleyball court. Building structures include a covered basketball pavilion, picnic pavilion, shade structures at the bleachers and splashpad, as well as a concession and restroom building at the center of the park. A future community building is planned for 2026. Site improvements include permeable parking lots, crushed granite walking trail with solar lighting.

PROJECT

DUSTIN SEKULA MEMORIAL LIBRARY
ROOF CONSULTING
Edinburg, Texas

CLIENT INFORMATION

Mardoqueo Hinojosa, Project Engineer p: (956) 388-8955 ||
e: mhinojosa@cityofedinburg.com

CONSTRUCTION COST

$614,293.78

DESCRIPTION

Amtech provided full building envelope consulting services for the City of Edinburg's Dustin Sekula Memorial Library. The scope of work consisted of a total roof replacement of the 36,433 SF standing seam metal roof, and replacing with a PVC single ply fully adhered roof membrane. All mechanical curbs were either replaced, resized or raised as well. Amtech was the lead coordinator between the multiple consultants for MEP/T, Fire & Life Safety and Cost Forecasting.

Services Provided: Roof assessments, condition analysis, design, construction documentation, bid services, contract administration, and construction monitoring services.

ADDITIONAL CITY OF EDINBURG EXPERIENCE:
Police Department Envelope Assessment | SERVICE DATES: June 2019 - November 2019
Amtech provided a roof and envelope assessment at the building including water infiltration testing, structural analysis, cost development, and a recommended repair scope of work.

City Hall ELD Testing | SERVICE DATES: December 2019 - February 2020
Amtech completed electronic leak detection services for the City Hall Building and completed a full report which included recommendation for repairs/replacement.

Transmittal Letter

HEFFNER DESIGN TEAM, PLLC

Date: July 13, 2026

From: Heffner Design Team
Andrew T. Heffner
4100 N. 22nd Street
McAllen, Texas 78504

Attention: City of Edinburg- Purchasing Department

To whom it may concern,

Thank you for the opportunity to submit our response to RFQ 2026-5, **Request for Qualifications – Architectural Services**. Heffner Design Team is excited to be considered for this opportunity and is confident in our ability to deliver innovative, functional, and enduring design solutions that enhance the City of Edinburg's facilities and public spaces.

Our team offers a distinct advantage through the combined expertise of both **a licensed architect and a licensed landscape architect**, allowing us to provide a fully integrated design approach from concept through construction. We pride ourselves on our knowledge of design principles, construction methods, and best practices, ensuring that every project is thoughtfully planned, practical to maintain, and responsive to the needs of the community.

Our staff has successfully designed more than 100 outdoor spaces throughout our professional careers, creating environments that balance aesthetics, functionality, sustainability, and long-term value. Each project is tailored to meet our clients' goals while incorporating efficient maintenance practices, resource conservation, and engaging, user-centered design elements. If selected, the City of Edinburg's projects will receive priority attention from our entire team. We are committed to delivering exceptional service and providing designs that meet the City's vision while remaining on schedule and within budget.

Enclosed is our Statement of Qualifications, which provides additional information about our firm, our team's experience, and representative projects. We appreciate your consideration and look forward to the opportunity to partner with the City of Edinburg to create projects that serve the community for years to come.

At your convenience, our team is available to meet with you to further discuss the project. My email address is aheffner@heffnerdesignteam.com and my cell phone number is 956-212-3385. I look forward to your response.

Sincerely,

Andrew T. Heffner, PLA, ASLA, Assoc. AIA, CLARB

2. FIRM QUALIFICATIONS AND EXPERIENCE

Firm Qualifications & Experience

A well-designed exterior environment can rejuvenate the soul, refresh the mind, and strengthen the body.

Welcome to the Team! The Heffner Design Team is a talented group of licensed professionals that are passionate about creating exceptional architectural building and outdoor spaces. We are here to provide you the highest functioning design along with extraordinary customer service. We are honored to have the opportunity to provide to you our firm profile. You will find in this document a range of information that will illustrate our aptitude, experience, and knowledge.

Experience We have a combined 50+ years of experience in all areas of exterior space design, architectural design, project management and construction. Key staff members and partners are fluent in design practices for governmental agencies, public spaces, private residences, and commercial properties. They understand the nuances and opportunities of each type of development. We excel at developing complete design solutions from the largest school campus to the smallest garden bench. Experience in the governmental and private sector is a unique feature of our team, and provides added value and benefits to the project by being inclusive of considerations and perspectives of a wide variety of organizational owners and staff.

Integration The vision for the project is blended with a thorough knowledge of design and construction practices. We are experts at placement of design elements to maximize efficiency, maintenance, and beauty. Our designs are the result of a detailed comprehensive process that strives to gain as much knowledge as possible about the client's wishes and combine them with a site's opportunities and restraints. We strive to delight, inspire and make everyone's world a little more beautiful.

Details We have worked with the City of Edinburg on the Freddy Gonzalez Boulevard Upgrades project. Additionally, we have been The University of Texas Rio Grande Valley landscape architect for the past four years and have work on UTRGV Vaquero Stadium, UTRGV Practice Center, UTRGV Performance Center, UTRGV Golf and Soccer Fields, UTRGV Student Services and Green Spaces, UTRGV Track and Soccer Fields, and UTRGV Fieldhouse. Our design firm is headquartered in McAllen, Texas. We are open to hiring part-time employees if needed to work on smaller scale project. At this moment, we don't forsee hiring anyone new but if we do, we will formally notify the city of those changes. We are a professional limited liability company that is registered with the Texas Board of Architectural Examiners. We are licensed to practice landscape architecture in the States of Texas and Michigan and licensed to practice irrigation design in the State of Texas. Our registrations are in good standing. Our DUNS number is 019022505. We hope that you consider our expertise as exterior space designers and let us become an integral part in making your projects dreams come true. Thank you for your time and consideration.

Approach

Our approach to a successful completion of the project is simple; WE LISTEN TO THE CLIENT! We strive to understand the wishes and needs of the client and relate this understanding in the work products. Our process begins with a project kick-off meeting that will include all project participants. The city's design program, schedule, and budget will be discussed. Funding sources and any requirements attached to said funding will be identified. Agency representatives, flow of information, contact numbers and email addresses, etc. will all be identified and recorded.

We use a phased approach in the development of construction documents, bidding, and construction administration. At the conclusion of each phase we will request a review and approval of the current phase documents before we procced to the next phase. This is a project management tool to assure budgets are not exceeded and the client agrees with the design solution.

Our detailed custom design project approach includes the following phases and tasks –

Site Analysis Phase: To accurately identify the physical attributes and limitations of the site relative the project program we will:

1. identify existing site conditions and features such as topography, drainage patterns, vegetation, including significant specimen plants, water elements, structures, views, and known off-site considerations relevant to the project program
2. confirm general location of available utilities
3. analyze existing site conditions to identify physical attributes and limitations of the project site
4. review applicable governmental requirements, including zoning, ordinances and permit requirements, known special restrictions, and zoning conditions
5. advise the client of tests and surveys, such as soils analysis, topographic survey, utility survey, and/or property boundary survey, that may be required
6. submit findings in a detailed report

Schematic Design Phase: Based on the Site Analysis Phase findings, we shall explore design options and develop a schematic design through the following:

1. prepare studies and relational diagrams for the organization and placement of proposed program elements taking in consideration the existing site features and the requirements of other program elements
2. prepare drawings illustrating alternative design concepts for the form and configuration of the program elements on the site
3. evaluate alternative design concepts and, in conjunction with the client, identify a preferred design concept
4. based on the preferred design concept, prepare a scaled schematic design plan illustrating the form and configuration of the proposed improvements on the site
5. preliminarily select key materials or material systems and prepare preliminary designs for key construction details
6. prepare an opinion of probable costs to construct the proposed improvements, including a recommended contingency
7. submit the plan, details, cost opinion, and other deliverables as appropriate comprising the Schematic Design submittal to the client for review and approval.

Design Development Phase: Based on the Schematic Design approved by the client, we shall refine and sufficiently detail the proposed form of the improvements to fully convey the design intent through the following:

1. revise and refine the Schematic Design plan to spatially define the location of the proposed improvements in relation to both the existing site features and the other proposed improvements
2. prepare the design detail sketches illustrating the proposed form, materials, color, and textures of the proposed improvements
3. prepare supplemental drawings as required to illustrate the deign intent
4. prepare outline specifications for applicable areas of work
5. update the opinion of probable cost to construct the proposed improvements, indicating when appropriate the assumptions on which the opinion is based
6. submit the plans, details, cost opinion, and other deliverables as appropriate compromising the Design Development submittal to the client for review and approval

Construction Document Phase: Based on the client-approved Design Development phase submission, we shall prepare Construction Documents suitable for bidding or contract negotiations and for construction of the project. We shall:

1. prepare construction plans
2. prepare construction details to describe the materials, spatial relationships, connections, and finished suitable for constructing the proposed improvements
3. prepare construction specifications for the proposed improvements
4. coordinate the drawings and specifications prepared by our consultants, and when appropriate, the client's other consultants
5. update the opinion of probable cost to construct the proposed improvements
6. prepare documents suitable for review for compliance with applicable governmental requirements and assist the client in the submission process to governmental agencies

7. address timely and applicable review comments received from agencies and revise the Construction Documents for compliance when required
8. submit final opinion of probable construction costs

Bidding Phase: When contracts are bid, we shall assist the client during the bidding process to identify the contractor to construct the project and establish the firm price to accomplish the work. We shall:

1. coordinate the schedule for bid advertising, pre-bid qualification process pre-bid conference, addenda, and bid opening
2. prepare and organize bid solicitation and proposal forms consistent with the client's requirements
3. arrange for printing and distribution of the bid documents
4. evaluate pre-bid qualification submissions and formulate recommendations
5. conduct the pre-bid conference and document the proceedings
6. clarify the Construction Documents as required through the preparation and issuance of addenda
7. attend the bid opening
8. review bids including alternates and formulate a recommendation on the award of the contract

Contract Negotiation Phase: When contracts are negotiated, we shall assist the client during the contract negotiation process to establish contract terms for the construction of the project. We shall:

1. arrange for transmittal of Construction Documents to the selected contractor
2. meet with the selected contractor to review the Construction Documents and the proposed improvements.
3. provide clarification to the Construction Documents as required
4. review the selected contractor's proposal and formulate a recommendation on the award of the contract

Construction Contract Administration Services: We shall provide the following administration services associated with the construction of the project.

1. take part in the pre-construction conference
2. undertake periodic observation of the work in progress for conformance with Construction Documents
3. evaluate the completed work to determine acceptance or non-acceptance based on conformity with the design intent expressed in the Construction Documents
4. review and approve contractor progress payment requests
5. review and approve a final application for payment and recommend acceptance of the project by the client

- Harlingen Multimodel
- Metro Tiger Station

ROBERT DURAN

Licensed
Irrigation Designer

EDUCATION

South Texas College, Associate of Applied Science Network Specialist, 2005
South Texas College, Associate of Applied Computer Specialist, 2006
South Texas College, Bachelors of Applied Technology Computer Information Technology, 2012

EXPERIENCE

Irrigation Designer, Heffner Design Team, PLLC, May 2012 - present

Robert manages all aspects of our project irrigation components. He routinely develops innovative design solutions that efficiently reuses water and minimizes potable water use. He routinely develops sophisticated designs to meet complex project requirements. He has successfully produced designs for parks, residences, and commercial properties alike. Robert's tenure at local park and recreation departments has equipped him with the tools to incorporate efficient maintenance and remote management features.

Irrigation Water Manager, City of McAllen, July 1996 – September 2015

As water manager for the entire City of McAllen irrigation system, Robert was responsible for management of the sophisticated remotely operated irrigation controller system. The system utilizes satellites, and desktop and telephone applications to maximize the efficient use of water. He also supervised a crew of seven irrigators that were tasked with the maintenance, repair, troubleshooting, and installation irrigation systems. The entire irrigation system has a total in excess of 3000 valves, 35 pumps, 200 backflow prevention devices and 100 irrigation controllers. Robert also was charged with the development of irrigation designs and specifications for a multitude of City capital improvement projects in excess of $2 million.

PROFESSIONAL CERTIFICATIONS AND LICENSES

Licensed Irrigator, State of Texas, license no. 16516
Licensed Backflow Inspector, State of Texas, license no. 15306
Certificate of Completion for Front-Line Leadership Training
Certificate of Completion for Texas A&M Eng., Utilities and Public Works Training
Certificate of Completion Motorola Irrigation Control Center Training

Robert had a significant role in the following projects -

- Tres Lagos Development
- Southside Park
- Villa Garza Flores Park
- Jones Box Park
- Northside Park Master Plan
- South Texas College Regional Center for Public Safety Excellence
- Mercedes Sports Complex
- Port of Brownsville
- Harlingen Convention Center and Hotel
- PSJA ISD Kennedy Middle School
- PSJA North Early College High School
- Elsa Gateway Signage
- Elsa Forth Street Linear Park
- City of Brownsville Metro Transfer Station
- Numerous other residential and commercial projects.

MARIBEL LOPEZ

AIA-LRGV Affiliate

Senior Designer

EDUCATION

South Texas College, Associates Degree of Architectural Drafting, 2017

University of Texas Pan America, Dual-Enrollment, 2010

EXPERIENCE

Senior Designer, Heffner Design Team, PLLC, Feb 2018 - present

Maribel's utilizes her wide range of skills to effectively manage the develop of all plans, specifications, and opinions of probable cost for each project that the Heffner Design Team completes. She effectively manages a team of computer aided design technicians and administrative assistants to efficiently create complete, beautiful, and well organized packages of construction documents. Maribel's attention to detail and leadership skills contribute to the completeness and efficacy of all design solutions. Additional duties include creating computer-aided designs, uses software to create design plans for buildings and landscape areas. Creates 2D designs called surface modelling, and 3D designs called solid modelling. Prepares cost estimates on projects, field measuring and base plan creation.

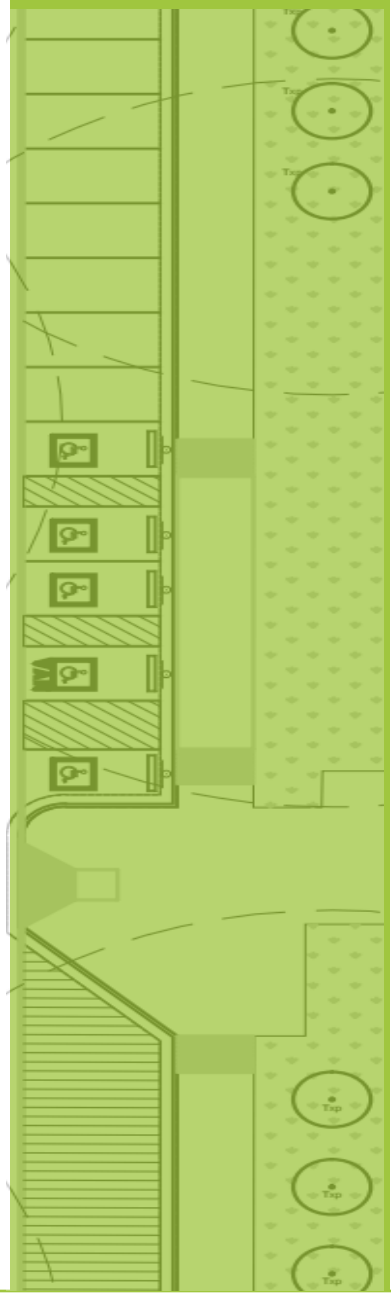
Office Assistant, American Value Construction, LLC, September 2017 – November 2017

Ensures the company is on track to meet its financial goals. In addition, developed invoices, budgets, bids, prepared reports, and managed payroll. Acquired plan sets and extracted data using software to formulate a bid with material and labor.

PROFESSIONAL SOFTWARE SKILLS

Microsoft Excel, Microsoft Word, Microsoft PowerPoint, AutoCAD 2018, Revit, MS Publisher, Adobe Photoshop, MicroStation V8i, 3ds Max, PlanSwift, Sketchup

Maribel had a significant role in the following projects -



- Villa Garza Flores Park
- The Kanuba Ranch
- Synergis Pharr
- San Benito Southside Park
- Trufit Potranco San Antonio
- Diaz Plaza in San Antonio
- McCaleb Funeral Home
- Sazon Mexican Café
- City of Brownsville Metro Transfer Station
- H. Guerra Residence
- Sazon Mexican Café
- Culebra Square
- Elsa Gateway Signage
- PSJA North Early College High School
- PSJA New Swimming Facilities
- Elsa Forth Street Linear Park
- St. Joseph Catholic Church

AURORA BARRERA,

ASLA

Development Coordinator

EDUCATION

Sam Houston State University, Bachelor of Business Administration, 2024

South Texas College, Associates of Criminal Justice, 2018

Member of the Criminal Justice Delta Sigma Phi Honors Association

EXPERIENCE

Development Coordinator, Heffner Design Team, PLLC,

September 2016 – Present

Responsible for planning, development and implementation in all the levels of the Organization. Ensures the company is on track to meeting its financial goals. In addition, leads and follows billing procedures. Experience in developing and managing budgets, hiring, training, supervising and appraising personnel.

SPECIALIZED SKILLS

- Directs the efforts of the marketing, communications, public relations and coordinates at the strategic and tactical levels with the other functions of the Organization.
- Effectively manages the placement of CAD files, specifications, and opinions of probable cost for each project and manages all projects that go out to bid.

Hector A. Guevara, RA, AIA	**Heffner Design Team - Architect**
Hector Guevara will be architect working under the direction of Andrew Heffner, RLA. His estimated involment is 15%, but varies per project. He utilizes his extensive years of experience to assist in the construction design and is responsible for the visual appearance o the buildings and structures. He will abide by all building laws and regulations of the state. Hector is a licensed architect and specializes in architectural planning and design. ***Project Work Experience:*** ***Region One- Education Service Center (Gignac Architects), Edinburg Service Center (Gignac Architects). McAllen Youth Baseball Complex (ROFA), South Texas ISD Admin Building, (Gignac Architects).***	
Robert Duran	**Heffner Design Team - Irrigation Designer**
Mr. Duran will is the irrigation designer assigned to this project and will work under the direction of the lead designer, Andrew Heffner, RLA. Mr. Duran manages all aspects of our project irrigation components. He routinely develops innovative design solutions that efficiently reuses water and minimizes potable water use. He routinely develops sophisticated designs to meet complex project requirements. He has successfully produced designs for parks, residences, and commercial properties alike. Mr. Duran tenure at loca park and recreation departments has equipped him with the tools to incorporate efficient maintenance and remote management features. ***Project Work Experience:*** ***Freddy Gonzalez Boulevard Improvements, UTRGV Vaquero Stadium, UTRGV Practice Center, UTRGV Performance Center, UTRGV Golf and Soccer Fields, UTRGV Student Services and Green Spaces, UTRGV Track and Soccer Fields, and UTRGV Fieldhouse.***	
Maribel Lopez , AIA-LRGV Affiliate	**Heffner Design Team - Senior Designer**
Ms. Lopez utilizes her wide range of skills to effectively manage the develop of all plans, specifications, and opinions of probable cost for each project that the Heffner Design Team completes. She effectively manages a team of computer aided design technicians and administrative assistants to efficiently create complete, beautiful, and well organized packages of construction documents. Maribel's attention to detail and leadership skills contribute to the completeness and efficacy of all design solutions. Additional duties include creating computer-aided designs, uses software to create design plans for buildings and landscape areas. Ms.Lopez is responsible for cost estimating, field measuring, design, and base plan creation for this project. ***Project Work Experience:*** ***Freddy Gonzalez Boulevard Improvements, UTRGV Vaquero Stadium, UTRGV Practice Center, UTRGV Performance Center, UTRGV Golf and Soccer Fields, UTRGV Student Services and Green Spaces, UTRGV Track and Soccer Fields, and UTRGV Fieldhouse.***	
Aurora Barrera , ASLA	**Heffner Design Team - Development Coordinator**
Ms. Barrera is responsible for planning, development and implementation in all the levels of the Organization. Ensures the company is on track to meeting its financial goals. In addition, leads and follows billing procedures. Ms. Barrera has more than 8 years or experiance in developing and managing budgets, hiring, training, supervising and appraising personnel. She will be managing all accounting and bidding coordinatior for this project. ***Project Work Experience:*** ***Freddy Gonzalez Boulevard Improvements, UTRGV Vaquero Stadium, UTRGV Practice Center, UTRGV Performance Center, UTRGV Golf and Soccer Fields, UTRGV Student Services and Green Spaces, UTRGV Track and Soccer Fields, and UTRGV Fieldhouse.***

7. WORK EXAMPLES

FREDDY GONZALEZ BLVD IMPROVEMENTS

Client: City of Edinburg
Cost: $750,000.00
Funding: City Funds
Date Completed: Project is under the Construction Document Phase.
Role: Andrew Heffner,
Landscape Architect

These captivating images showcase a schematic design of the proposed boulevard accentuated by an exceptional landscape. Upgrades consist of concrete trails, decomposed granite trails, landscape, irrigation, parking lot, water, sewer, and electrical lines, a restroom, a splash pad site, solar panel lights, site furniture and erosion control. These new upgrades will enhance the boulevard, create cohesiveness, and connect nearby parks and schools.

FREDDY GONZALEZ BLVD IMPROVEMENTS

Gateway and Monument Signage

Client: City of Elsa EDC
Cost: $50,000.00
Funding: City Funds
Date Completed: 2019

The City of Elsa Economic Development Corporation has tasked our team with developing a comprehensive signage program at major entrance points to the city. Our design incorporates modern materials like cor-ten steel and aluminum lettering with traditional cast stone trim and natural stone. Color changing lights add interest in the evening and make this a true landmark. Drought tolerant muhly grasses, agave, and succulents add the finishing touch. Welcome!

Client: City of McAllen
Cost: $250,000.00
Funding: City Funds
Date Completed: 2012
Role: Andrew Heffner, Principal

This small community park is a picture-perfect partnership between the city and county governments. Aluminum fencing and limestone columns provide a comfortable buffer from adjacent traffic. Modern playground equipment, swings, and winding walkways offer an escape from our technology centered world. Picnic tables, benches, and grills complete the park user experience. Landmark limestone park signage is surrounded by large moss rock boulders and crushed granite.

Client: Pharr– San Juan-Alamo ISD
Cost: $1,700,000.00
Funding: ISD Funds
Date Completed: 2020
Role: Andrew Heffner, Principal

A premier South Texas school district requested a complete renovation of one of their early college high school campus. Our design concept is to integrate as many natural elements as possible. Stone patios with cell phone charging stations, a cor-ten steel clock tower, a hanging garden landmark sign, rain gardens, ephemeral streams, umbrella shades, tree groves, meadows, and pollinator gardens will be added. New entrance-way experiences will greet students, staff, and visitors. Lighting will add interest and expand the use of outdoor spaces at night.

REGION ONE - EDUCATION SERVICE CENTER

This renovation and expansion project involved upgrading the existing training rooms, adding a new cafeteria/lounge, and constructing a 25,700-square-foot training facility. The new facility offers flexible design, allowing it to be reconfigured into five smaller, independent training rooms or a single large training space. Additionally, support spaces were incorporated to complement the new and upgraded areas.

Hector A. Guevara was the Project Manager under

Gignac Architects.

Project estimated cost $12.4 million. Project located in Edinburg, Texas. Construction was completed in September 2019.

GIGNAC ARCHITECTS
2020

EDINBURG SERVICE CENTER

This project consists of a new office building and warehouses. This building is approx. 14,200 sf

Hector A. Guevara was the Project Manager under Gignac Architects.

Project estimated cost was $5 million. Construction was completed in 2025. Funds were partially city funds and American Rescue Plan ACT funds. Project Located in Edinburg, Texas.

GIGNAC ARCHITECTS
2023
PROJECT MANAGER

LDS McAllen Temple

Client:	Latter Day-saints Temple
Cost:	$3,500,000.00
Funding:	Private Funds
Date Completed:	2023
Role:	Andrew Heffner,

These captivating images showcase a grand building accentuated by an exceptional landscape. The architectural marvel exudes a sense of timeless elegance, while creating a sacred space for The Church of Jesus Christ of Latter-day Saints' community. The surrounding landscape design is meticulously crafted, featuring an array of 20,000 shrubs and 400 trees that create a harmonious blend of nature and architecture. With its unique and unparalleled charm, this one-of-a-kind space offers endless possibilities for both aesthetic enjoyment and functional use.

Tres Lagos Trails and Neighborhood Parks

Client: Tres Lagos Public Improvement District
Mike Rhodes
Telephone:(956) 287-2800
E-Mail: mike@mlrhodes.com

Cost: $2,000,000.00
(owner provided grading and infrastructure excluded)

Funding: Texas Parks and Wildlife Grant and Private Funds

Date Completed: November 2017, 2020

Role: Andrew Heffner, Principal Landscape Architect

There are currently three neighborhoods at the Tres Lagos planned unit development. Inside each of the three neighborhoods there are a series of public spaces that include walking trails, benches, playground grounds, postal mail centers, and entranceway monuments. The plant material palette that was established at the Community Park project was extended to the neighborhood parks. The playgrounds were also similar to the larger park project but reduced in scale to serve the individual neighborhood needs. There is a series of interconnected trails that weave throughout the neighborhood that are lined with native shade and flowering trees. The selective placement of plant material will screen activity areas from adjacent residences. These neighborhood trails and parks have become a highlight of the neighborhood and a great feature when home buyers are shopping for their new home.

Project elements include:

- Native shade and flowering trees
- Irrigation system
- LED lighting
- Amphitheater
- Playgrounds with swings
- Parking lots
- Mailbox centers
- Walking trails

LEVY
DYKEMA

July 14, 2026

City Secretary Department
City of Edinburg
415 W. University Drive
Edinburg, TX 78541

Dear City Secretary Balderas,

On behalf of the Principals and Staff of LEVY DYKEMA, I wish to thank you for the opportunity to submit our qualifications to the City of Edinburg for the RFQ for Architectural Services.

Public projects are the core of our practice. This year marks our 70th year of providing architectural services to public institutions throughout Texas.. Our longevity and success are built on the trust of our clients, and we know that trust must be earned every day on every project. We welcome the opportunity to work with the City of Edinburg and earn your trust as well.

We currently maintain indefinite quantity and on-call contracts with municipalities, counties, state agencies, and higher education institutions throughout Texas. Our current work represents the full range of projects typically delivered under these contracts, including service vehicle storage facilities and offices for Austin Energy; the renovation of a former TxDOT building into a Municipal Services Center, Public Safety, and Court Building for Williamson County; and exterior improvements for the City of Corpus Christi, including Police Station lighting upgrades and City Hall window replacement.

In addition, we are currently providing architectural services on multiple projects throughout the Rio Grande Valley, giving our team current experience with the region, its communities, local contractors, and project delivery environment. This ongoing presence allows us to respond quickly and efficiently while bringing valuable regional knowledge to projects for the City of Edinburg.

We understand that the successful delivery of every project is important not only to the City, but also to the employees, residents, and visitors who rely on these facilities. Equally important is maintaining clear communication and responsiveness throughout design and construction to ensure projects are completed on schedule, within budget, and to the City's expectations.

If selected, this contract and all associated projects will be managed by our Corpus Christi office, providing the City with a nearby team that is readily available. LEVY DYKEMA President Stephen Levy and Architectural Principals Phillip Reed and Matt Catterall are committed to providing responsive, hands-on leadership and affirm that our staff can be on-site for City of Edinburg projects with as little as two hours' notice when needed.

Enclosed please find a detailed summary of our proposed services and supporting documentation. Please contact Matt Catterall at extension 113, MCatterall@LEVYDYKEMA.com if you have any questions regarding this RFQ submission.

Firm Qualifications & Experience

Firm Qualifications & Experience

LEVY DYKEMA is an award-winning architecture, interiors, and purchasing firm based in Corpus Christi and Austin, Texas. We are a team of creative problem-solvers who collaborate with our clients to bring timeless, functional designs to life. Never shying away from a challenge, we provide innovative solutions that align with our clients' needs, intentions, and budget — without compromising design.

With a storied history spanning more than 70 years, LEVY DYKEMA provides personalized services to every client. In addition to architecture, interiors and purchasing, we offer a wide range of support services including project management, permitting, master planning, and consulting.

Under the leadership of President Stephen Levy, LEVY DYKEMA's Corpus Christi office is managed by Senior Associate/ Studio Director Robert Garcia, while Principals Phillip Reed and Matt Catterall lead the firm's Austin office.

The Corpus Christi Office will lead the Team. Both offices will participate on this project as necessary, if awarded.

Professional Services Agreement
The professional services agreement provided in this RFQ has been read and if selected, our firm will meet the prerequisite insurance requirements, and agrees to enter into such agreement.

Methodology & Management Approach

Our Approach

LEVY DYKEMA has become one of Texas' most experienced architectural firms for municipal on-call, rotation list, and IDIQ contracts because we understand that success is measured not by the size of individual projects, but by responsiveness, consistency, and the ability to deliver dependable service across dozens of assignments over many years. Our current portfolio includes architectural service contracts with cities, counties, universities, school districts, and state agencies throughout Texas, including multiple municipal on-call contracts in South Texas and the Rio Grande Valley region. This experience has given us a thorough understanding of municipal procurement, budgeting, stakeholder coordination, and the need to efficiently deliver projects ranging from small renovations and facility assessments to major capital improvements.

The City of Edinburg can expect the same responsive service regardless of project size. Rather than dedicating individuals to only one project at a time, we employ a collaborative team structure that allows experienced principals, project managers, architects, and consultants to work concurrently across multiple assignments while maintaining clear responsibility for every project. Each assignment is led by a designated Project Manager who serves as the City's single point of contact and is supported by principals who provide executive oversight, quality assurance, and immediate access to additional staff whenever workload demands change. Weekly schedule reviews, milestone-based QA/QC, standardized project management procedures, and continuous communication allow our team to efficiently balance numerous concurrent projects without compromising responsiveness, quality, or schedule. This approach enables us to provide the personalized attention of a local firm while offering the depth of resources typically associated with much larger practices.

Our process is founded on collaboration with City staff from project initiation through warranty review, ensuring that each assignment begins with a thorough understanding of the City's goals, budget, schedule, and operational needs. We combine disciplined project management, rigorous quality control, and proactive communication with practical, cost-conscious design solutions that reflect the South Texas climate, local context, and long-term value for taxpayers. Whether the assignment is a $20,000 facility repair or a multi-million-dollar civic project, our commitment remains the same: provide timely service, thoughtful design, and a trusted partnership that allows the City of Edinburg to confidently advance its capital improvement program.

LEVY DYKEMA is focused on making Texas Contemporary architecture: a process dedicated to producing high-performing buildings designed for the diverse people who use them, harmonious with the architectural history, cultures, and materiality of our region and each site, and which are responsive to each project's specific place, climate, and geography. We design measurable sustainability into projects based on high-level, material impact and return on investment, knowing that the most sustainable buildings are ones that will be used, loved, and adapted for generations.

Our approach begins with a highly collaborative process that prioritizes alignment with the client, stakeholders, and broader community from the outset. We view each project as a partnership — engaging ownership, user groups, and decision-makers early to understand operational needs, long-term goals, and the cultural significance of the existing building. Through workshops, visioning sessions, and iterative feedback loops, we translate stakeholder input into clear design drivers, ensuring the project reflects both the legacy of the building and the aspirations of those who will use it. This inclusive process builds consensus, reduces risk, and establishes a strong foundation for decision-making throughout the project.

As the design evolves, we continue to integrate stakeholder feedback into a flexible and responsive planning framework. Rather than a fixed solution, we develop adaptable strategies that can respond to changing needs, phasing considerations, and future growth. This includes evaluating multiple scenarios for renovation and potential addition, testing how each approach impacts program, circulation, building performance, and user experience. By maintaining continuous dialogue with the client and project team, we ensure that design decisions remain aligned with budget, schedule, and long-term operational goals, while also preserving the integrity of the existing structure.

Methodology & Management Approach

Ultimately, our goal is to position the building for long-term relevance and performance. The renovation and potential addition are approached not only as immediate improvements, but as strategic investments in the future — supporting evolving workplace models, advancing sustainability goals, and enhancing the building's role within its context. By balancing preservation with forward-thinking design, and grounding each decision in collaboration and shared vision, we deliver a solution that is resilient, adaptable, and meaningful for both current users and future generations.

Work Plan Strategy

This work plan strategy is based on LEVY DYKEMA's experience on MSA / IDIQ projects for Texas institutional and municipal clients. Specific work plans are developed for each contract and if we are selected to work with Williamson County it will be based on the County's protocols and contract requirements.

Pre-Design / Proposal Phase:

- LEVY DYKEMA (LD) and the Architect and Engineer (AE) team will work with Client's staff and/or users to identify and develop the project scope and definition and to develop an approved budget for the project.
- LD will engage a team of consultants that are appropriate to the scope of work.
- Conduct a site visit by all team members to understand the existing conditions and scope for their proposals.
- Work with a RAS to review the site and project for TAS scope. This scope and issued preliminary report are to determine whether there are existing conditions that need to be addressed, or which will be triggered by the Client's scope of work.
- Work with the Client to research availability of existing drawings, cad files, REVIT models, surveys, and geotechnical information, as required for the project.
- Conduct preliminary code analysis for scope understanding.
- Deliver an AE team proposed scope of work, deliverables and methodology for Client's review and approval.
- Review the Client's budget and evaluate internally and with the Client whether the scope for budget is appropriate.
- Based on approved scope and budget, deliver an AE fee proposal to the Client with specific work in conformance with the scope, budget and schedule which includes deliverables, deliverable milestones, owner meetings and record document deliverables.
- Receive NTP or Work Order from Client.

Concept Design Phase / Schematic Design:

Phase Work:

- Review Schedule including deliverables, internal team meetings and Owner meetings.
- Meet with the Client, in person or remotely, according to the project schedule and as required to keep the Client updated on AE team progress.
- Implement for the AE team, all of the Client's and building standards for documents, CAD and BIM as well as design and product standards.
- Implement QA/QC protocols to the team with milestone deliverables for internal submissions and reviews and reports.
- Perform site survey with verification and update (if required) of existing documents, CAD and BIM information.
- Update schematic design code analysis for all disciplines to include NFPA, ICC and TAS requirements.
- Develop initial architectural design with architectural and consultant narratives, updated project opinion of probable costs and updated schedule, and submit to the Client for review and comment.
- Phase Deliverables: the deliverables for this phase are dependent on the project type and complexity. The specific deliverables will be based on the Client's contractual and project standards or can be based on the AIA's project phase standards. Less involved work may be delivered in all two-dimensional plans and elevations while more involved work could involve three-dimensional views and renderings.
- Provide an SD level estimate of probable construction costs.
- Submit QA/QC report and drawing markups to the Client, or meet with the Client for QA/QC submission standards.

Methodology & Management Approach

Design Development Phase:

Phase Work

- Incorporate all feedback from the Client's Schematic Design review.
- Complete development of Design Development work by AE team in conformance with the Client's deliverable standards for phases and incorporating all design and product standards.
- Conduct internal and Owner meetings on scheduled timetables.
- Update project schedule.
- Provide a DD level estimate of probable construction costs.
- Perform AE team QA/QC protocols including REVIT model clash detection.
- Update code compliance and life safety plan documents.
- Submit all DD phase documents, a project manual including outline or draft specifications, schedule update and budget update.

Construction Documents:

Phase Work

- Incorporate all feedback from the Client on the Schematic Design review.
- Complete development of Construction Documents by AE team in conformance with the Client's deliverable standards for phases and incorporating all design and product standards. The documents will be utilized for project bidding and for submission of any documents required to AHJ for review and approval.
- Conduct internal and Owner meetings on scheduled timetables.
- Update project schedule.
- Provide a CD level estimate of probable construction costs.
- Perform AE team QA/QC protocols including REVIT model clash detection.
- Update code compliance and life safety plan documents.
- Perform CD level estimate of probable construction cost.
- Submit all CD phase documents, including a project manual with the Client's front-end specifications, special specifications and technical specifications, schedule update and budget update for the Client's review and approval.
- Make revisions as required for completion of 100% CD documents for bid and construction.
- Submit the project to TDLR and have RAS conduct an ABA plan review.

Bid Phase:

Phase Work

- Assist the Client with bidding on the project. The construction delivery method may determine the task involved and may include the following:
- Conduct or assist with the pre-bid meeting in person or online.
- Compile bidder questions and issue an addendum as required with questions and responses.
- Assist the Client with any other Bid Phase requirements.

Methodology & Management Approach

Construction Phase:

Perform all services indicated in the Client's contract documents for the AE team. Typically, these services include:

- Review of Contractor's schedule and Schedule of Values, ensuring suitable levels of detail.
- Review Contractor's submittal schedule and schedule of required special inspections.
- Review of RFI's submittals.
- Use the Client's preferred construction PM software / website for document management and tracking RFI's and Submittals.
- Confirm at regular intervals that all special inspections and submittals required in the CD's are being delivered and performed.
- Conduct periodic site visits with issued site reports in conformance with the Client's requirements or AE standards.
- Attend OAC meetings, reviewing Contractor updates to project progress, schedule and the budget.
- Review meeting minutes.
- Attend meetings with the Contractor as needed to assist project progress.
- Review project for Substantial Completion and conformance to Contract Documents, review Contractor's punch lists.
- Assist the Client with Substantial Completion documents.
- Request TAS inspection, review any deficiencies and engage the Contractor to take actions needed for corrections.
- Confirm that all Special Inspections have been performed, that all required submittals have been completed and all warranties have been delivered and approved.
- Review Pay Applications throughout phase and Final Pay Application and completion of project including deficiency corrections for project close-out.
- Request and receive Contractor's As-Built Documents and redlines of Contract Documents.

Post Construction:

- Deliver Record Documents including all required drawings, Project Manual and models to Client.
- At the 11th month, after Substantial Completion, the AE team, with the Client and the Contractor, will visit the building to review the project conformance with warranties and Contract Documents, and ensure corrective action by the Contractor.

Coordination of Work with Consultants

Great relationships are the foundation of great buildings. From the collaboration that takes place during the design phase to the client's experience within a finished space, LEVY DYKEMA believes that people define the success of a project. For this contract, we have selected a talented group of consultants who have proven track records of providing a unique balance of design, constructability, and project management. LEVY DYKEMA has a strong working relationship with every member of our team.

LEVY DYKEMA utilizes a collaborative team approach ensuring that the Client and all consultants become an integral part of the project. We hold regularly scheduled meetings that involve all team members, allowing the Client, LEVY DYKEMA, and each consultant to collaborate and coordinate during all aspects of the project. Each meeting will be documented with meeting minutes. We have found this documentation to be crucial in the success of any project.

As Project Principal, Phil Reed, FAIA, will be involved throughout the project providing executive oversight and ensuring the appropriate resources are allocated to complete it on time and on-budget. As Project Principal, Stephen Levy, RA, has overseen a wide range of projects for both public and private entities, and has expertise in Programming, Cost Analysis, Systems Integration, and Site Planning. Mauricio Feldsberg, RA, LEED AP, will be the primary point of contact for the design team. He will be responsible for managing the development of the design, production of construction documents and specifications. He will coordinate with the consultant team and the Client's Project Manager. As a LEED Accredited Professional, Mauricio will bring a sustainable focus to the project.

Methodology & Management Approach

Project Management

It is in our fastidious Project Management that the LEVY DYKEMA team really shines. We are experienced with completing projects on time and within budget. The Project Manager monitors the schedule and budget weekly. The Project Manager will be responsible for notifying the Client and Design Team of any scheduling deficiencies or conflicts. An agenda will be set forth at each regularly scheduled project meeting. There, the Team will discuss the project schedule, immediately identify any impediments, and provide a proactive approach for solutions.

Our 'ability to perform' within the prescribed project schedule is directly related to our understanding of the Client's programmatic requirements for the project, the experience of our TEAM, and LEVY DYKEMA's ability to act as lead designer. The programming stage is the first step in the design process, and the success of the project (including schedule adherence) hinges on the completeness and accuracy of the programming, and the design team's understanding of the project requirements.

The first and most critical step for the success of the Client's project is for the design team to fully understand the project needs and its building site. We must understand not just the functional needs of the building, but also the role of the building in its neighborhood, how it must fit contextually, and meet the Client's budget and scheduling needs.

The process begins with extensive meetings with the Client's team. With our own civic, housing, office, manufacturing, and industrial experience, our team knows which important questions need to be asked.

Schedule Conformance

LEVY DYKEMA has a proven track record of meeting and exceeding the schedules of demanding projects. We generate a comprehensive Project Development Schedule at the beginning of the project based on the contract scope, phases, and Client needs. Within this context, benchmark dates are established for the Client's input, review and approvals to effect and order sequential project development. The key internal submission/review points are established for the A/E team to exchange and evaluate information. Updates are made periodically; The Client will be informed throughout the entire project.

Schedule Management Utilizes:

- The establishment of an overall project schedule highlighting critical decision-making milestones.
- The recognition of decision-making accountability and its impact on cost and schedule.
- The early identification of specific Owner and A/E Team members with decision-making authority.
- The compilation of "Decision Information Packages" that includes cost, schedule, and design implications.
- Strong leadership by the "single point of contact" to facilitate the decision-making process.
- Regularly scheduled monitoring of the Project Schedule by all team members.
- Weekly email updates are sent to the entire team with action items to follow.

Project Communications with the Team

Communication method technologies and platform preferences are always changing but following our communication protocol standards and premises keep projects on track and the team and owner informed and organized.

Establish Communication Protocol: At the beginning of the contract, we issue project guides to the team with AE and Client team contact information and points of contact for each group and discipline. The goal of the protocols is to facilitate information flow in all directions but in a process that filters information through Project Managers for each group so that information between the team is prescient, vetted, and documented. Misplaced information leads to errors. Too much information creates confusion.

Meetings: Meetings are the ideal format for information flow and efficient communication. Meeting agenda information is gathered from all stakeholders, the agenda format is followed for efficiency, and meeting minutes are distributed after for review, edits, and follow-up.

Methodology & Management Approach

AE Internal Team Meetings: Records of meeting minutes are available for distribution to the Client.

Email: Email is the standard for day-to-day communication between team members and with the Client. Standards for emails include the Client's project name and number as well as the email issue in the subject line to facilitate information tracking. Emails between non-Project Manager staff must include Project Managers in the communications. The Client is included in communication on all matters related to their interests and responsibilities.

Phone: All phone calls which discuss an issue or a resolution must be documented through a memo or email between project managers.

Construction Phase Communications

Project Management Software: We encourage the use of project management software for maintaining documents for all phases of the project from design to bidding to construction. This becomes particularly important when a third party, the general contractor, is added to the information flow. We have experience with all of the major platforms for construction phase information management.

OAC Meetings: Weekly or bi-weekly meetings with the owner, architect, and contractor are ideal formats for regular formal checks and updates.

Open Communication Lines: The Owner, AE team and the Contractor should be in regular communication with each other – through regular site visits, emails and phone calls. It is important that these communication lines be open to understanding progress, resolving issues, and to ensure project goals are being met. All decisions or questions that come through these communications must be documented, preferably as an RFI or as an observation report, for final vetting and proper contract documentation.

Quality Assurance / Quality Control

As a client-centric company, our goal is to make sure that we meet or exceed the programmatic and aesthetic requirements of the project. We incorporate regular stakeholder feedback into our design and documentation processes. Everyone on our team takes ownership of the quality of our documentation. We have developed tools that help set expectations and then give each team member the ability to identify and escalate potential issues. We ask our team to check their own work daily and to monitor overall progress so that, collectively, we are putting our best effort out. We also rely on internal third-party checks; we ask a senior member of the staff to review our documentation for quality and adherence to budget at project milestones since we know that it easy to get too close to a project.

Beginning with a project's kickoff meeting with the client through the design & construction phases and up to a one-year check-in with the client after a project's completion, LEVY DYKEMA is constant in its goal to evaluate the performance of the project toward meeting the design intent and the client's goals and expectations with respect to quality assurance.

We use an internal Document Management Manual, customizable for every project, to control process and procedures. It includes templates and checklist for each phase of the project. These allow us to focus our review efforts, improve communication across the broader design team, and capture institutional knowledge. By incorporating these tools onto every project, we help reduce errors and omissions and increase the accuracy of pricing once a contractor is brought in.

To: 1) control quality, 2) confirm our documents align with the client's requirements and expectations, and 3) remedy potential errors and omissions by the Architectural/Engineering design team, every project goes through a regular review process. While the milestones are project-dependent, they typically include Schematic Design, 50% and 100% Design Development, and 50%, 75%, and 90% Contract Documents. Prior to submitting each milestone to the client, we review our documents against our phase-specific checklists and against the client goals (budget, schedule, program, etc. established during project initiation and the information gathering process. In addition, we perform coordination checks with our consultants:

Methodology & Management Approach

- Coordination and review for high-quality design.
- Coordination and review between the drawings and specifications for the entire Project between all disciplines, as the two are developed concurrently.
- Coordination and review between the cost estimator and overall design, to keep the project on budget.
- Coordination and review between the overall schedule and efforts of the Design Team.

LEVY DYKEMA has a similar checklist to control efforts during the Permitting and Bidding/Negotiation (PBN) Phases. As the jurisdiction Plan Review take place, the cost of the project takes shape, and contracts for construction are entered into agreement, our on-going coordination and review identifies and addresses potential risks for construction. These are mitigated through Addenda, which are issued to the jurisdiction and potential contractors.

As the project enters the Construction Administration (CA) Phase, LEVY DYKEMA follows the CSI Division 01 – General Requirements sections to control the quality of the project throughout the entire construction process, including its commissioning and closeout. Approximately one month prior to the one-year warranty date of the project, LEVY DYKEMA will meet with the client and contractor to identify any issues that have arisen during the building's occupation. These issues are collated and distributed to the contractor for warranty work and any final inspection items.

LEVY DYKEMA's primary quality requirement is that every project both meets the functional, aesthetic, and sustainability goals for the users and the owner and also meets the owner's budget and schedule requirements. We measure project performance in several ways:

Budget: We ensure conformance with the budget both through internal reviews and 3rd-party cost estimates. We evaluate our performance by comparing final costs to both the budget and the initial cost estimates. We also track change orders to determine the root cause of the change and evaluate the performance of the design team and our cost estimating procedures. This both helps us identify process issues to resolve and also helps us track construction cost trends.

Schedule: We compare our internal staffing and time projections to actual effort and make real time adjustments to keep the project on schedule. We require our consultants to make similar comparisons and maintain their output as well. At the end of the project, we review this information and use it to improve our staffing, scheduling, and budgeting efforts.

Documentation and production work: We track and document all revisions identified during internal, 3rd-part, and owner reviews. We make note of the frequency of comments by issue and use this to assess and improve our process. We adjust mid-project as well as during post-project analysis.

At the completion of a project, we also measure our documentation quality by evaluating the number and type of RFIs generated by the contractor during the bid and construction phases. By understanding the types of questions we are consistently asked, we can identify opportunities to limit error recurrence, help develop staff, inform consultants, and build better teams for future projects.

Firm Qualifications & Experience

Project Name:	Seaholm Intake Structure Adaptive Reuse
Location:	707 W. Cesar Chavez St., Austin, TX 78701
Client Name:	City of Austin
Contact Person:	Christina Bies, Project Manager - 512-974-7251
Project Delivery Method:	Competitive Sealed Proposal (CSP)
Firm's Role and Key Staff:	Design Architect - Phil Reed, FAIA
Size:	7,250 SF
Construction Cost:	$3,300,000
Scheduled Completion Date:	August 2021
Actual Completion Date:	September 30, 2022
Explanation:	The project schedule was extended for added scope and complications with construction below lake level enclosures to open cooling systems.

Rehabilitation of an existing concrete building on the shore of Lady Bird Lake that originally functioned as a pump house for Austin's downtown water treatment plant. Constructed in 1950 the plant was decommissioned in the 1990's due to the need for greater capacity as the city grew. Our office developed plans based on a masterplan created by StudioGang that would bring the building up to current codes and allow it to be used for municipal and public functions. Restrooms were developed in an existing building outside the original footprint.

A new roof, new electrical system, new sprinkler system and floors were all installed. Existing sluice gates were sealed and lake water removed from the basement level. Acoustical treatments and new lighting were added throughout.

Firm Qualifications & Experience

Project Name:	District Cooling Plant No. 3
Location:	1910 San Jacinto Blvd., Austin, TX 78712
Client Name:	City of Austin
Contact Person:	Richard Duane, PE, PMP - Power Systems Engineer Sr. Power Project Management - Austin Energy - 512-482-5435
Project Delivery Method:	Competitive Sealed Proposal (CSP)
Firm's Role and Key Staff:	Design Architect - Phil Reed, FAIA
Size:	20,000 SF
Construction Cost:	$40,000,000
Scheduled Completion Date:	April 2020
Actual Completion Date:	November 2021
Explanation:	Covid workforce disruptions, international supply chain disruptions.

District Cooling Plant No.3 is a chiller plant in downtown Austin providing 10,000 tons of cooling for a chilled water loop installed below city streets and made available to private development at competitive rates. Over sixty buildings currently utilize the chilled water grid to provide air conditioning through the use of heat exchangers, eliminating the expense of installing AC systems in the buildings. This cooling plant added capacity to the system and balanced the need created by significant development in Austin's Eco District along Lady Bird Lake.

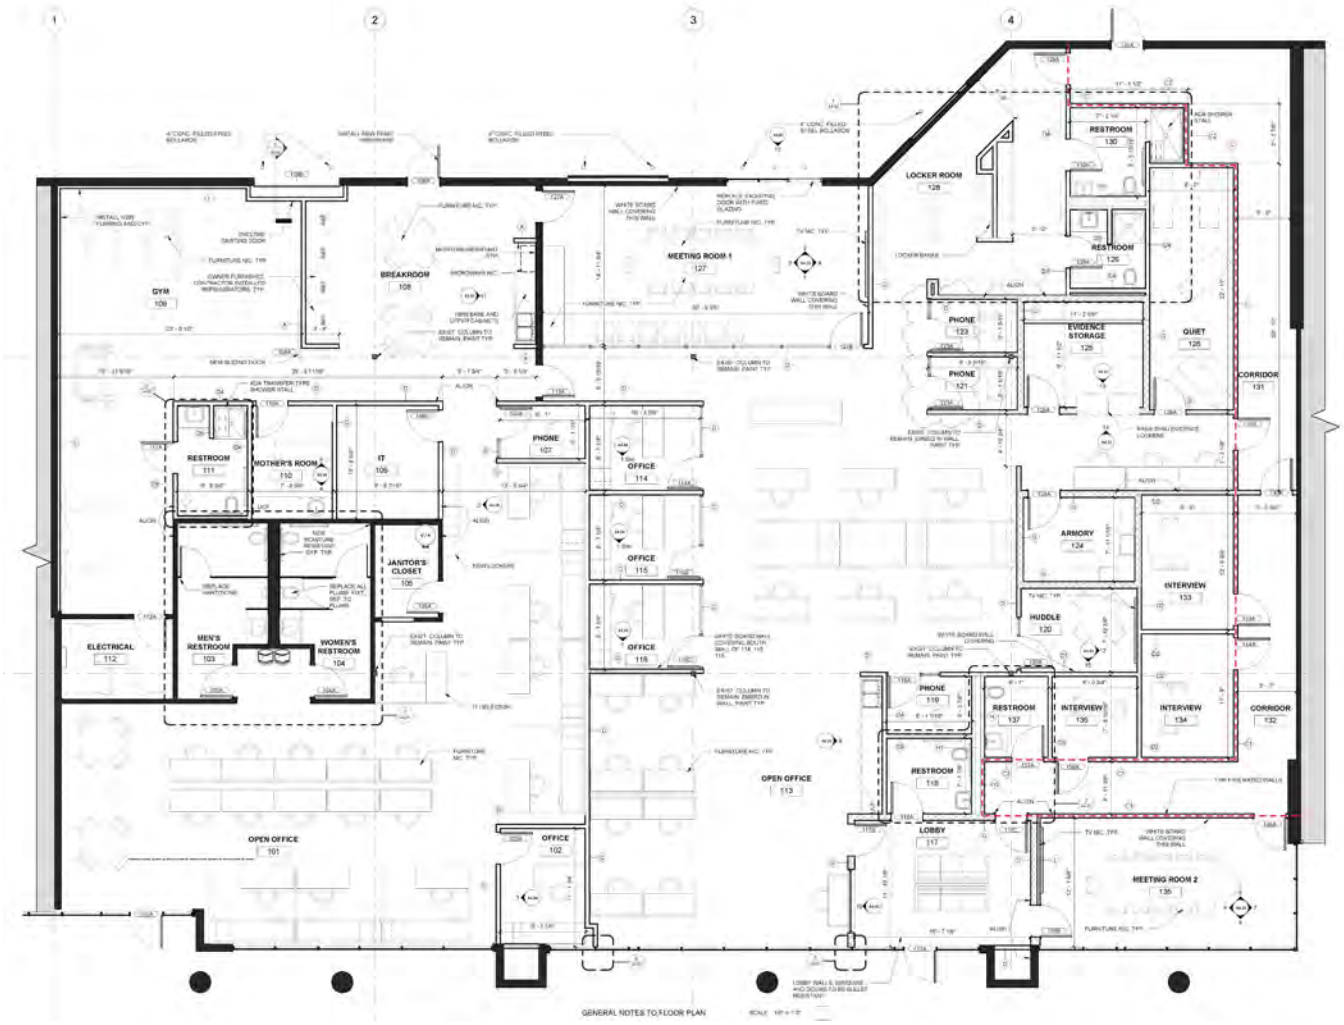
Firm Qualifications & Experience

Project Name:	Texas A&M University Satellite Utility Plant No. 3
Location:	477 Joe Routt Blvd., College Station, TX 77843
Client Name:	Texas A&M University / TAMU Systems Facilities, Planning & Construction
Contact Person:	Justin Lorance, Project Manager - 979-458-7059
Project Delivery Method:	Competitive Sealed Proposal (CSP)
Firm's Role and Key Staff:	Design Architect - Phil Reed, FAIA
Size:	10,631 SF
Construction Cost:	$18,022,938
Scheduled Completion Date:	July 2023
Actual Completion Date:	July 2023

This project required the design of a 10,000 SF expansion to the existing SUP3 facility on campus. The expansion space was designed to provide 6,000 tons of additional chilled water capacity for the campus and included addition of two water cooled chillers, two field erected cooling towers, condenser water pumps, and chilled water pumps. A medium voltage electrical room and plant PLC controls were included. EEA also provided commissioning services on the project. EEA was the Prime Consultant for this TAMU System project.

Firm Qualifications & Experience

Project Name:	City of Ingleside - Facilities Master Plan
Location:	Hwy 361, Ingleside, Texas
Client Name:	City of Ingleside
Contact Person:	Brenton B. Lewis, City Manager
Project Delivery Method:	N/A
Firm's Role and Key Staff:	Principal Designer - Matt Catterall, Designer - Drew Verkler
Size:	N/A
Construction Cost:	N/A
Scheduled Completion Date:	December 2025
Actual Completion Date:	April 2025
Explanation:	We conducted additional community outreach and two additional presentations to the City Council at their request.



LEVY DYKEMA has recently completed a municipal facilities assessment, and a 30-year phased master plan for the City of Ingleside, Texas. Each city department and their facilities were evaluated to understand current workspace functionality and deficiencies and how spaces and facility needs were anticipated to change through growth and technology changes. Facilities and equipment were assessed to understand current and future maintenance and replacement requirements and the cost and timeframe impact of these expenses on operational and capital planning.

Firm Qualifications & Experience

Project Name:	Capital Metro Transit Police Station
Location:	8200 Cameron Rd., Austin, TX78754
Client Name:	Capital Metro Transportation Authority
Contact Person:	Marcus A. Guerrero - 512-534-5754
Project Delivery Method:	Competitive Sealed Proposal (CSP)
Firm's Role and Key Staff:	Design Architect - Mauricio Feldsberg, RA, RID, LEED AP
Size:	8,750 SF
Construction Cost:	$1,214,000
Scheduled Completion Date:	April 2024
Actual Completion Date:	April 2024

LEVY DYKEMA Principal Matt Catterall led the architectural design team's design of the interior finish-out of an existing building to make the first police facility for Austin's transit authority. The 8,750 SF project includes police supervisor's offices, staff workstations, an armory, shower and changing rooms, locker room, interview rooms and a public meeting room. The evidence storage room includes pass-through evidence lockers that conform with all evidence handling protocols and the room is direct vented to the exterior for officer and staff health safety due to noxious evidence smell. The project was designed to conform with all facility requirements for the Police Department to receive Texas Police Chiefs Association Accreditation. The public entrance lobby is separated from the security police department with ballistic protected walls and glass.

Firm Qualifications & Experience

Project Name:	City of Corpus Christi - Hilliard Center Arena Terrace
Location:	1901 N Shoreline Blvd., Corpus Christi, TX 78401
Client Name:	City of Corpus Christi
Contact Person:	Isaac Perez, Business Manager
Project Delivery Method:	Design, Bid, Build (DBB)
Firm's Role and Key Staff:	Project Architect/Project Manager - Robert J. Garcia, AIA
Size:	10,960 SF
Construction Cost:	$1,500,000
Scheduled Completion Date:	October 15, 2024
Actual Completion Date:	October 15, 2024

The newly enclosed Hilliard Center Terrace is a food with bar service lounge outside the executive suites and club seating area. This 10,960 square foot renovated space is used as an independent meeting space, as well as a lounge that is used before, during and after arena events. The space was designed to accommodate small musical performances. The improvements include the existing East-Side common area, the restrooms and the newly enclosed outdoor terrace.

Firm Qualifications & Experience

Project Name:	City of Corpus Christi - Hilliard Center Arena Exterior Improvements
Location:	1901 N Shoreline Blvd., Corpus Christi, TX 78401
Client Name:	City of Corpus Christi
Contact Person:	Isaac Perez, Business Manager
Project Delivery Method:	Competitive Sealed Proposal (CSP)
Firm's Role and Key Staff:	Project Architect/Project Manager - Robert J. Garcia, AIA
Size:	50,000 SF
Construction Cost:	$2,500,000
Scheduled Completion Date:	September 2025
Actual Completion Date:	October 2025
Explanation:	Separation of water meter along with exploratory work by the contractor (because there were no record drawings of the main water lines location for tapping into), unforeseen conditions such as irrigation lines initially thought to be existing had been unknowingly removed all caused delays.

The project focused on enhancing the exterior landscaping around the building's perimeter to elevate the overall user experience. Key upgrades included multi-tiered plantings supported by concrete retaining walls, integrated landscape lighting, and strategically placed public benches to encourage relaxation and gathering. Additionally, the scope addressed existing challenges with concrete leveling and erosion, implementing practical solutions to improve safety and durability.

Firm Qualifications & Experience

Project Name:	City of Corpus Christi - Cole Park Shade Structure
Location:	1906 Ocean Dr. Corpus Christi, TX 78404
Client Name:	City of Corpus Christi
Contact Person:	Priscilla Ramirez, Sr. Project Manager
Project Delivery Method:	Design, Bid, Build (DBB)
Firm's Role and Key Staff:	Project Architect/Project Manager - Robert J. Garcia, AIA
Size:	4,274 SF
Construction Cost:	$751,137
Scheduled Completion Date:	September 9, 2025
Actual Completion Date:	September 9, 2025

Levy Dykema provided architectural, structural, MEP, and accessibility design services for a new signature shade structure at Cole Park Plaza. The project included a four-panel shade canopy supported by 12 columns with concrete foundations, integrated site lighting, electrical infrastructure for future event capabilities, and accessibility improvements.

Team Member Qualifications & Experience

Phillip Reed, FAIA

Principal, Lead Designer

Phillip Reed, FAIA founded COTERA+REED ARCHITECTS with Juan Cotera in 2003 and joined LEVY DYKEMA in 2024. Phil's role will be Principal in Charge, setting the goals and design philosophy for the project to ensure they align with the client's mission and meet with project managers periodically to ensure milestones are being met. Phil brings over 40 years of experience in his field working on both public and private projects most recently with the City of Austin, University of Texas and Texas Facilities Commission.

SELECTED WORK EXPERIENCE

City of Austin - Nash Hernandez Building Renovation - Austin, TX
Building Type: Civic Building - Administration Building
Size: 9,000 SF | $3,700,000
LEVY DYKEMA is providing comprehensive services for the Nash Hernandez Building Renovation that involves reviewing and updating the previous programming and design iterations of the building. The updated program and renovation design will align with current needs, incorporating PARD administrative spaces as well as community-serving spaces outlined in the Holly Shores / Edward Rendon Sr. Metropolitan Park at Festival Beach Vision Plan. LEVY DYKEMA will design and oversee the full renovation of the interior and exterior components of the Nash Hernandez building, along with limited site improvements.

Guadalupe - Blanco River Authority - Admin. Building - New Braunfels, TX
Building Type: Civic Building - Administration Building
Size: SF | $50,000,000
LEVY DYKEMA is serving as the lead architect, providing full architectural services, including project consultation, facilities planning, design and construction document preparation with cost estimating, bidding assistance, and construction administration. The firm is collaborating closely with GBRA to evaluate options that maximize use of the available site while achieving the most functional facility permitted under the City of New Braunfels development code.

City of Austin - Seaholm Intake Building Adaptive Reuse - Austin, TX
Building Type: Civic Building - Event Space
Size: 7,250 SF | $3,300,000
Rehabilitation of an existing concrete building on the shore of Lady Bird Lake that originally functioned as a pump house for Austin's downtown water treatment plant. Constructed in 1950 the plant was decommissioned in the 1990's due to the need for greater capacity as the city grew. We developed plans based on a masterplan created by StudioGang that would bring the building up to current codes and allow it to be used for municipal and public functions. Restrooms were developed in an existing building outside the original footprint.

Robert Garcia

Senior Associate, Studio Director - Architecture

Robert Garcia has practiced architecture on many public and private projects throughout the South Texas region for 20 years. His responsibilities include programming, schematic design, design development, construction documents as well as construction administration. He is directly responsible for project management and is currently the Studio Director for LEVY DYKEMA in Corpus Christi. In the past, Mr. Garcia has held several positions on the AIA Corpus Christi Board of Directors and is currently the President-Elect. He serves on the Del Mar College Advisory Committee, is a member of the Boys and Girls Club of the Coastal Bend Board of Directors, and Chairs the Boys and Girls Club Building & Safety Committee. Robert received several design awards for completed projects. Within the Corpus Christi community, Mr. Garcia has been involved with Habitat for Humanity and a past board member of the Mission of Mercy.

SELECTED WORK EXPERIENCE

City of Corpus Christi - Hilliard Center Arena Suites Renovations & Terrace
Building Type: Event & Assembly
Size: 10,960 SF | $1,500,000
The newly enclosed Hilliard Center Terrace is a food with bar service lounge outside the executive suites and club seating area. This 10,960 square foot renovated space is used as an independent meeting space, as well as a lounge that is used before, during and after arena events. The space was designed to accommodate small musical performances. The improvements include the existing East-Side common area, the restrooms and the newly enclosed outdoor terrace.

City of Corpus Christi - Cole Park Shade Structure - Corpus Christi, TX
Building Type: Parks
Size: 4,274 SF | $ 751,136
This 825-bed project, delivered as a public-private partnership, was critical to provide on-campus living for students after their first year. The complex revitalizes an underutilized area of campus by introducing student activity spaces and retail amenities while enhancing connectivity to the broader campus.

City of Corpus Christi - Public Health Building & Site Improvements
Building Type: Municipal
Size: 47,000 SF | $15,500,000
Interior renovations to the 47,000 SF building including administrative and clinical spaces. The new design brings the building up to current code, updates to the interior finishes, fixtures, furnishing, windows, doors, and equipment. Site improvements include updating landscaping and site parking. Construction is scheduled to be multi-phased to allow the building to stay operational during the construction phase.

Mauricio Feldsberg, NCARB, RID, LEED AP

Project Manager /Associate/Studio Director - Architecture

Mauricio Feldsberg is the Austin office Studio Director and will serve as Project Manager for these projects. He will act as the primary point of contact and will be responsible for overall project coordination, schedule control, and budget management. Mauricio has over 13 years of industry experience, including 6 years managing projects of similar type and scale. During his 7 years with our firm, he has managed more than $78 million in public-sector projects for clients such as Burnet County, Williamson County, the City of Austin, and the Guadalupe - Blanco River Authority. His experience includes civic, administrative, and public safety facilities.

Mauricio is familiar with Williamson County standards, procedures, and design guidelines through his work on the Lake Creek Annex project. He applies a collaborative leadership approach and is proactive in identifying and resolving issues. Clear communication, responsiveness, and thorough documentation are integral to his project management style. Mauricio will be assigned as Project Manager for the duration of the project and will be fully accountable for successful delivery of the project scope, schedule, budget, and quality. He will make day-to-day decisions, coordinate the consultant team, and address issues promptly to ensure project objectives are met.

SELECTED WORK EXPERIENCE

Williamson County Facilities Management - Lake Creek Annex - Austin, TX
Building Type: Civic Building - County Administration Building
Size: 78,850 SF (Re-Roof/Env.), 13,695 SF (Interior) | Est. $10,000,000
Complete envelope renovation/phased interior space and MEP renovations including facility and equipment assessment. We are currently master planning the site with the existing building becoming a multi-purpose county facility with Sheriff, Court Space, Public Services Department, EOC, and more. The site is being accessed for future building development based on the needs of the county.

Burnet County - Annex on the Square - Burnet, TX
Building Type: Civic Building - County Auditor and Development Office
Size: 4,500 SF | $1,029,126.50
Renovation to an existing two-story vacant office building. The project includes new office space, conference room, break room and bathrooms for the development office on the ground floor, with the same spaces on the second floor for the county's IT Department. An elevator, generator and server room also serve the IT Department.

San Patricio County - Juvenile Detention - Sinton, TX
Building Type: Public Safety Facility - County Detention Center
Size: 3,200 SF | $3,000,000
Designed and constructed an addition to the existing Juvenile Detention Center, expanding its administrative capacity. The new, purpose-built space includes confidential meeting areas and offices that facilitate a more effective parole supervision process for staff and improve the experience for clients.

Matt Catterall
Principal

Matt Catterall has worked with Phillip Reed since 1999 and became a partner in COTERA+REED in 2012. He joined LEVY DYKEMA in 2024. Matt has spent much of his recent time on university projects at The University of Texas at Dallas and Tarleton State University. He has performed as the lead designer on several signature projects, including the new TSU Library Learning Commons and new TSU Welcome Center. He was the project manager on College Houses Co-op (an eight-story student residence and dining facility). He managed construction administration of the Austin City Hall underground parking garage and tunnel system, was a design and production team member on the Austin Convention Center Hilton, and was on the COTERA+REED team for the Austin Convention Center Phase II with Page Southerland Page.

SELECTED WORK EXPERIENCE

City of Austin - St. Elmo Vehicle Bays - Austin, TX
Building Type: Civic Building - Fleet Maintenance Buildings (3)
Size: 34,000 SF | $6,725,000
The project is currently in the bidding stage. We have designed 3 vehicle storage bays for Austin Energy's fleet of heavy service vehicles. The project also includes restrooms, warehouse spaces, and offices for meter distribution staff. The buildings are designed as modified standard pre-engineered metals buildings as a balance between functionality, architectural aesthetics and cost efficiency.

Capital Metropolitan Transportation Authority - Police Transit - Austin, TX
Building Type: Civic Building - Public Safety Building
Size: 8,750 SF | $1,214,000
Interior finish-out of an existing building to make the first police facility for Austin's transit authority. This included police supervisor's offices, staff workstations, an armory, shower and changing rooms, locker room, interview rooms and a public meeting room. The evidence storage room includes pass-through evidence lockers that conform with all evidence handling protocols and the room is direct vented to the exterior for officer and staff health safety due to noxious evidence smell.

Texas A&M University Systems - Tarleton State University Police Station - Stephenville, TX
Building Type: Institutional Building - Public Safety Building
Size: 4,200 SF | $1,500,000
The building was renovated and added onto an existing single-story building that was originally constructed in the 1970's as a fire station. The design team evaluated the existing envelope and structural systems to improve their performance. Insulation, roofing and window improvements were made throughout the building to bring the new facility up to code and improve energy efficiency. Unique aspects of the existing Fire Station were used to enhance the new police station.

Paul Thompson

Associate, Studio Director - Interiors

Paul serves as Studio Director for LEVY DYKEMA's Interior Design team, bringing more than 20 years of industry experience to the firm. A Texas native and longtime Austin resident, he joined the LEVY DYKEMA team in 2021. Paul oversees studio operations while remaining actively involved in project work, collaborating closely with designers, clients, and specialized consultants to ensure projects are delivered on time and within budget. His career spans a wide range of project types, including developer-driven commercial office buildings, student housing, multifamily developments, and meaningful work for public universities and K–12 schools. Known for his precision and leadership, Paul consistently delivers spaces that are both aesthetically compelling and highly functional, upholding the highest standards of design excellence.

SELECTED WORK EXPERIENCE

The University of Texas at Austin - Whitis Court Residence Hall - Austin, TX
Building Type: Institutional Building - Residence Hall / Dormitory
Size: 214,832 SF | $116,940,828
Whitis Court is a new 500 room, seven story dormitory on the original 40 acres at the University of Texas at Austin. Developed through a competitive proposal for public – private partnership through Balfour Beatty Campus Solutions, the team included Clark Nexsen, LEVY DYKEMA, and Andres Construction. The site is bound by city streets and features numerous protected live oak trees making any type of construction difficult. Our selected solution was a courtyard building surrounding the central oaks constructed entirely of precast concrete walls and floor with precast brick exteriors, eliminating the need for extensive scaffolding and shrinking the construction duration significantly.

The University of Massachusetts - Student Housing - Amherst, MA
Building Type: Institutional Building - Residence Hall / Dormitory
Size: 437,992 SF | $250,000,000
This 825-bed project, delivered as a public-private partnership, was critical to provide on-campus living for students after their first year. The complex revitalizes an underutilized area of campus by introducing student activity spaces and retail amenities while enhancing connectivity to the broader campus.

Fannin Flats - Round Rock, TX
Building Type: Private Building - Office Headquarters
Size: 14,000 SF | $4,442,842
Fannin Flats is a two-story, 14,000-square-foot office building designed to serve as the corporate headquarters for JL Gray Construction. The first level features a welcoming lobby, large conference room, open office space, and a breakroom to support daily operations. The second level includes executive offices, a multi-purpose room, and an outdoor patio, providing flexible space for meetings, collaboration, and employee gatherings.

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

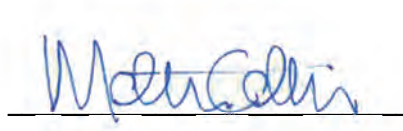
Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Matt Catterall, the undersigned representative of

LEVY DYKEMA, (Company or Business name) (hereafter referred to as company) being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:

1. Does not boycott Israel currently; and



2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, Matt Catterall, the undersigned representative of

LEVY DYKEMA, (Company or Business name) (hereafter referred to as company) being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

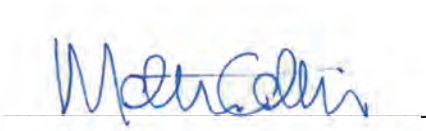
Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.



4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

LEVY DYKEMA

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☒ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☒ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

N/A

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

Thank **You**

RE: Request for Qualifications RFQ 2026-5

Dear Evaluation Committee,

Milnet Architectural Services is pleased to submit this transmittal letter to formally express our interest and commitment to perform professional architectural services for the City of Edinburg. As a local, HUB-certified firm with extensive experience in municipal facilities, Milnet is uniquely positioned to deliver exceptional service tailored to the City's needs.

Our firm provides comprehensive architectural and project management services across all phases of design and construction, including programming, schematic design, design development, construction documents, bidding, permitting, and construction administration. As specialists in architectural services, we bring a distinguished level of technical expertise to the design and execution of construction projects. Our team possesses the resources and expertise to deliver superior quality, maintain strict adherence to project schedules, control costs, and, most importantly, facilitate effective communication and meticulous project documentation, ensuring seamless project completion.

With more than twenty-five (25) years of industry experience, we are eager to contribute our extensive expertise and knowledge to the City of Edinburg. Our portfolio includes projects funded through federal and state grants, and we possess in-depth familiarity with the program requirements set forth by governmental agencies.

The Milnet Team has an established track record of delivering projects on time and within budget, including substantial experience with fast-tracked projects. We consistently achieve high success rates in meeting budgetary constraints and collaborate closely with owners and contractors to implement value-engineering solutions without compromising quality.

We are committed to delivering attentive, client-focused services and look forward to facilitating the development of a project plan that ensures the successful completion of future initiatives. We regard our obligation to act in the best interests of our clients with the utmost seriousness and pledge to support the City in achieving its objectives.

At this time, we acknowledge that no addendums have been issued in connection with this solicitation. The enclosed Statement of Qualifications provides further detail regarding our proposed team, relevant experience, and qualifications. As President of Milnet Architectural Services, I serve as the primary point of contact and am authorized to bind the firm to contractual agreements. I may be reached by phone at (956) 688-5656, by email at rudym@milnet-archservices.com, or in person at the address provided above. Thank you for your consideration and the opportunity to serve the City of Edinburg.

Sincerely,

Rodolfo R. Molina Jr., AIA, President

Milnet Architectural Services (MAS) is a McAllen, Texas-based architectural firm that has provided professional architectural design and project management services since its founding on January 1, 2000. Established by Registered Architect Rodolfo R. Molina, Jr., AIA, the firm has built a strong reputation for delivering responsive, client-focused architectural services throughout South Texas. In March 2011, the company transitioned to a Professional Limited Liability Company (PLLC) and continues to be led by Mr. Molina as President and Project Architect. With more than 40 years of professional experience, Mr. Molina remains personally involved in every project, ensuring continuity, quality control, and timely project delivery from initial planning through final construction.

Over the past twenty-five years, MAS has successfully provided architectural and project management services for numerous municipal and governmental clients throughout the Rio Grande Valley and South Texas including the City of Edinburg. The firm has also worked with the Cities of **Donna, Elsa, Escobares, Granjeno, La Joya, Lyford, McAllen, Mercedes, Mission, Palmview, Pharr, Raymondville, Rio Grande City, and Roma**, delivering projects ranging from facility renovations and building additions to new municipal facilities. This extensive experience has provided MAS with a thorough understanding of the unique requirements associated with public-sector projects, including procurement procedures, regulatory compliance, stakeholder coordination, budgeting, and schedule management.

Milnet Architectural Services offers comprehensive architectural and project management services through all phases of project development, including programming, schematic design, design development, construction documents, bidding assistance, permitting, and construction administration. By managing and coordinating every stage of a project, the firm maintains clear communication among project stakeholders, streamlines decision-making, and proactively addresses challenges before they affect project schedules or budgets. This integrated approach allows MAS to consistently deliver projects in a timely manner while maintaining a high standard of design quality and fiscal responsibility.

Dustin Michael Sekula Memorial Library—
Edinburg, TX

A key factor in the firm's success is its longstanding philosophy of providing attentive, responsive service to every client. MAS was founded on the principle of delivering thoughtful solutions while maintaining a high level of personal involvement and accountability. The firm's commitment to "more attentive service" means taking ownership of each project and working diligently to meet or exceed client expectations. As a result, a significant percentage of the firm's work comes from repeat clients who continue to rely on MAS for their architectural and project management needs.

The effectiveness of Milnet's project management approach is reflected in several measurable indicators of success, including repeat client engagements, positive post-occupancy evaluations, minimal construction change orders, adherence to established budgets, and the development of long-term professional relationships. These outcomes demonstrate the firm's ability to effectively plan, coordinate, and execute projects while maintaining schedules and controlling costs—qualities that are especially important to governmental agencies entrusted with public resources.

Through decades of successful municipal project experience, MAS has demonstrated its ability to manage multiple projects of varying size and complexity while consistently meeting project milestones and client expectations. The firm's extensive work with local governments has fostered a deep understanding of municipal operations, funding constraints, public bidding requirements, and the importance of transparency and accountability throughout the project delivery process.

As a locally based firm, all architectural and project management services are performed from MAS's McAllen office. This local presence allows the firm to respond quickly to client needs, attend meetings promptly, conduct site visits efficiently, and maintain close oversight throughout design and construction. The firm's team of qualified professionals is experienced in managing projects similar to those commonly undertaken by municipalities and other governmental entities and remains readily available to provide responsive support throughout the life of a project.

Our staffing approach is built around maintaining adequate technical and administrative support to meet fluctuating project demands. With experienced personnel available across multiple disciplines—including design development, construction documentation, drafting, and project administration—Milnet can readily allocate resources to small-scale projects, studies, tenant improvements, renovations, and other fast-track assignments as they arise.

Through more than two decades of service to public-sector clients, Milnet Architectural Services has established a proven history of delivering architectural services efficiently, responsibly, and on schedule. Combining technical expertise, strong project management capabilities, extensive municipal experience, and an unwavering commitment to client service, MAS is well-positioned to continue providing exceptional architectural services to governmental agencies throughout the region.

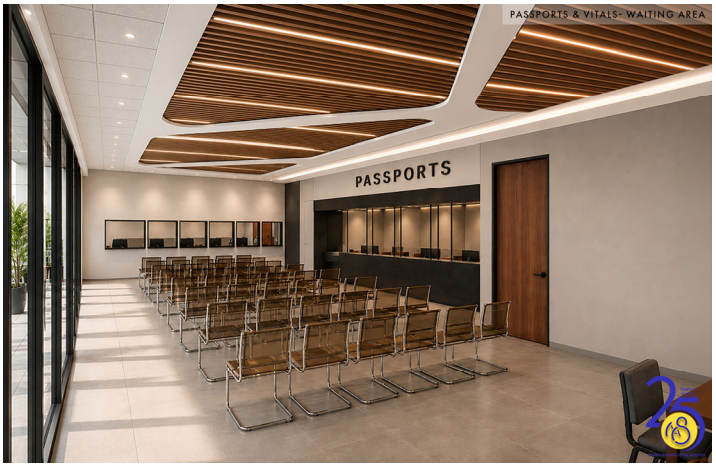
—Edinburg, TX

McAllen New City Hall Project

Location: McAllen, TX
Owner: City of McAllen
Owner Rep.: Zeferino Mendoza
(956) 867-7599

Current Budget: $ 40,000,000.00+
Project Size: 106,000 Sq. Ft.



Services Provided: Full Architectural
Project Manager: Neftali Cruz
Project Architect: Rodolfo Molina

Projected Start Date: August 2027

Project Description:
The New McAllen City Hall is a proposed 106,000-square-foot, five-story municipal facility located at the southeast corner of Houston Avenue and Broadway Street in downtown McAllen, Texas. The project is designed to provide a modern, efficient, and secure civic building that consolidates key municipal departments, enhances public access to City services, and accommodates future operational needs. The facility includes administrative offices, public service areas, City Commission Chambers, and supporting spaces equipped with contemporary building systems. As a cornerstone of downtown McAllen, the project is intended to strengthen civic engagement while supporting the City's long-term growth and development.

El Tule Recreation Center

Location: Edinburg, TX
Owner: City of Edinburg
Owner Rep.: Mardoqueo Hinojosa
(956) 388-8955

Const. Cost: $ 4,997,600.00
Project Size: 28,445 Sq. Ft.

Services Provided: Full Architectural
Project Manager: Ramon Villalobos
Project Architect: Rodolfo Molina

Substantial Completion: August 28, 2023

Project Description:
This project consists of the construction of a new 28,445 sq. ft. indoor recreation center facility for the Edinburg Economic Development Corporation. The interior of the facility includes three full size basketball courts with dividing folding partitions and wood flooring. The lobby area consists of a large gathering area, a conference room, concession stand and restrooms.

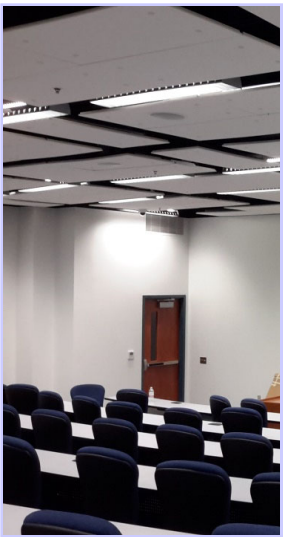
The project is located at 702 S. 18th Ave., Edinburg, Texas 78539.

Dr. Diaz Park - Restroom Bldg. Additions

Location: Edinburg, TX
Owner: City of Edinburg
Owner Rep.: Javier Garza
(956) 381-5631

Const. Cost: $ 447,447.68
Project Size: 1,822 Sq. Ft.

Services Provided: Full Architectural
Project Manager: Ramon Villalobos
Project Architect: Rodolfo Molina



Substantial Completion: March 15, 2020

Project Description:
Two (2) new restroom building additions to the parks. These included a family restroom for special needs children. Also within the building is a mechanical room to house all the splash pad equipment. The facilities are fully ADA Compliant and will serve the community for years to come. These buildings were built to serve the nearby splash pad equipment. This project was completed within budget.

Public Safety Building - Addition & Renovations

Location: McAllen, TX
Owner: City of McAllen
Owner Rep.: Zef Mendoza
(956) 867-7599

Const. Cost: $ 3,550,000.00
Project Size: 15,823 Sq. Ft.

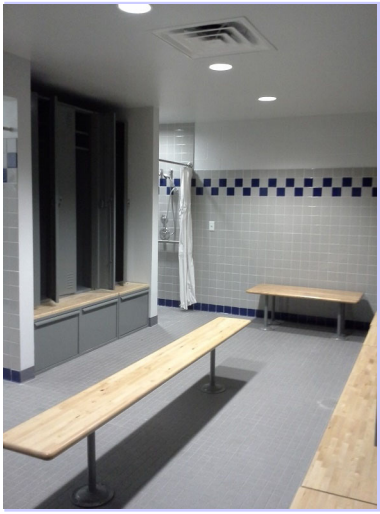
Services Provided: Full Architectural
Project Manager: Ramon Villalobos
Project Architect: Rodolfo Molina

Project Description:
A new two story addition & renovation project to the existing Public Safety Building for the City of McAllen. Project consists of a fully functional 24/7 facility that can not be shut down or temporarily closed. Interior renovations were carefully coordinated with the Owner in order to avoid any interruptions to the daily operations. New addition houses specific law enforcement departments, large assembly room, crime scene investigation units as well as a forensic lab.

La Joya Public Safety Building & City Hall Renovations

Location: La Joya, TX
Owner: City of La Joya
Owner Rep.: Julianita R. Sabala
(956) 581-7002

Const. Cost: $ 2,292,246.00
Project Size: 15,260 Sq. Ft.
Services Provided: Full Architectural
Project Manager: Ramon Villalobos
Project Architect: Rodolfo Molina



Project Description:
An existing 8,906 Sq. Ft. facility that was converted into the new city hall for the city of La Joya. The scope of work also included a new 6,354 Sq. Ft. public safety building addition that was built adjacent to this facility. These facilities meet the current needs of the City and will accommodate the City's future growth for years to follow. This project was completed in August 2018.

Raymondville Public Safety Building

Location: Raymondville, TX
Owner: City of Raymondville
Owner Rep.: Uvaldo Zamora
(956) 689-2441

Const. Cost: $ 1,200,000.00
Project Size: 9,033 Sq. Ft.

Services Provided: Full Architectural
Project Manager: Ramon Villalobos
Project Architect: Rodolfo Molina

Project Description:
A new 9,033 Sq. Ft. facility for the Raymondville Police Department. This project was in collaboration with Guzman & Munoz Engineering (Milnet served as the Architectural Consultant). Project was completed on time and within budget.

Raymondville City Hall Renovations

Location: Raymondville, TX
Owner: City of Raymondville
Owner Rep.: Eleazar Garcia
(956) 689-2443
Const. Cost: $ 322,132.00
Project Size: 10,800 Sq. Ft.
Services Provided: Full Architectural
Project Manager: Ramon Villalobos
Project Architect: Rodolfo Molina

Project Description:
Renovations to the existing city hall for the City of Raymondville. These included removing existing flooring and installing new V.C.T and tile floors, repainting of existing interior walls, removal of exterior façade including existing wood roof shingles and installing new stucco finish with architectural stone veneer and EIFS. The project was completed on time and within budget. The existing city hall was kept open for business during construction with careful planning and relocation of staff.

The team we select for a project is chosen based on experience with project type, scope of the project and technical ability. This specialized team will remain associated with the project throughout its life, we do not "hand off" a project to a different team or personnel. The personnel assigned to the City of Edinburg project will be as follows:

Rodolfo Molina, AIA | PRINCIPAL IN CHARGE

As President and Architect in Charge of the project, Mr. Molina will be responsible for maintaining adequate staffing levels and setting the expectations for the project. Mr. Molina will be responsible for ensuring quality levels meet or exceed the Milnet Architectural Services high standards. He will be in charge of attending meetings, developing short range work plans and budget studies. Mr. Molina will spend 20% to 85% of his time on the project, depending on project phase and immediate requirements. Mr. Molina has more than 40 years of experience within the architectural field and 25 years of leading the team at Milnet Architectural Services.

Neftali Cruz | PROJECT MANAGER

As Project Manager, he will be responsible for overseeing the planning, design, and construction phase of the project on a day to day basis. Neftali reports directly to Rudy Molina and manage the flow and distribution of information to the project team. He chairs the project meetings, takes the minutes, documents them and distributes them among the team members. He attends meetings, working closely with the Project Architect to maintain communications and work schedules among all team members. Neftali will spend 30% to 70% of his time on the project, depending on project phase and immediate requirements. Neftali has more than seven (7) years of experience within the architectural field and has been with Milnet his entire career.

Ruben Hernandez | PROJECT MANAGER

As Project Manager, he will be responsible for overseeing the planning, design, and construction phase of the project on a day to day basis. Ruben reports directly to Rudy Molina and manage the flow and distribution of information to the project team. He chairs the project meetings, takes the minutes, documents them and distributes them among the team members. He attends meetings, working closely with the Project Architect to maintain communications and work schedules among all team members. Ruben will spend 50% to 100% of his time on the project, depending on project phase and immediate requirements. Ruben has more than sixteen (16) years of experience within the architectural field and has been with Milnet for approximately 4 years.

Mirtha Uranga | PROJECT MANAGER & INTERIORS SPECIALIST

As Project Manager, she will be responsible for overseeing the planning, design, and construction phase of the project on a day to day basis. Mirtha reports directly to Rudy Molina and manages the flow and distribution of information to the project team. She chairs the project meetings, takes the minutes, documents them and distributes them among the team members. As the Interiors Specialist, she will also be responsible for coordinating any and all color selections with the City and selecting interior finishes. She will remain on the project from inception through completion. Mirtha has twenty (20) years of experience within the architectural field. Mirtha will spend 10% to 100% of her time on the project, depending on project phase and immediate requirements.

Miguel Garcia | ARCHITECTURAL INTERN

As an Architectural Intern, Miguel supports the architect and project managers throughout the planning, design, and construction process by assisting with architectural drawings, BIM models, renderings, presentations, and construction documents using software such as Revit, AutoCAD, SketchUp, and Adobe Creative Suite. Responsibilities include supporting design development, conducting building code and zoning research, performing site visits and field verification, preparing permit documentation, coordinating updates with consultants, and creating visual presentation materials. Working under the supervision of our licensed architect, Miguel helps ensure project documents are accurate, organized, and consistent with firm standards while participating in project meetings, client presentations, and construction administration activities.

Paola Morales, Gerardo Zuniga, Daniel Soliz, Daniel Cepeda, Marcela Rage | PRODUCTION STAFF

Our production Staff is responsible for transforming design concepts into accurate, coordinated, and buildable construction documents that support project delivery. Working closely with the architect, project managers, engineers, and consultants, they prepare and revise architectural drawings, BIM models, details, schedules, and technical documentation using software including Revit, AutoCAD, and related design tools. Their responsibilities include developing floor plans, elevations, sections, and construction details; incorporating design changes; coordinating consultant information; ensuring compliance with building codes and firm standards; and maintaining document quality and accuracy throughout all project phases.

Telephone: 956-969-5866

Name of Project: Northside Apartments Exterior Improvements
Scope of Work: The project consists of exterior improvements for five (5) existing two-story apartment buildings, located at 1800 N. Texas Blvd. Weslaco, TX. 78599
Cost: $213,463.62

REFERENCE FOUR

Client's Name: Starr County
Type of Organization: Government
Address: 401 Britton Ave, Rio Grande City, TX

Contact Person: Judge Eloy Vera
Title: County Judge
Telephone: 956-716-4800
E-Mail: eloy.vera@co.starr.tx.us

Name of Project: Starr County Courthouse Rehabilitation, Phase I
Scope of Work: Re-roofing, mechanical, electrical, life safety and security system upgrades. Parking lot restriping and lighting improvements.
Contract Period: Ongoing

Insurance Coverages | All of Milnet's consultants carry professional liability, general liability, auto liability and umbrella liability, and worker's compensation/ employer's liability insurance coverage. Professional liability insurance will remain in force during the term of contract and for one year following substantial completion of a project.

Milnet Architectural Services carries all the necessary insurances as required by the State of Texas. They are as follows:

Professional Liability Insurance

Limits	$1,000,000.00
Aggregate	$2,000,000.00
Carrier	Higginbotham Insurance Agency, Inc.
Agent	Beverly Damon, ACSR, CISR

General Liability Insurance

Limits	$1,000,000.00
Aggregate	$2,000,000.00

Auto Coverage

Limits	$1,000,000.00

Worker's Compensation

Limits	$1,000,000.00

Umbrella Policy

Limits	$1,000,000.00
Aggregate	$1,000,000.00
Carrier	State Farm Insurance Co.
Agent	Christina Lopez

Litigation | Milnet Architectural Services, PLLC nor it's principals or employees are involved in any unresolved or ongoing claims, disputes or litigation. We pride ourselves in having a team who takes ownership of their work, has a professional approach to client services and most importantly maintains a highly ethical code of conduct. Past client relationships have afforded us the opportunity to practice as professionals in the industry and gain the experience necessary to provide the services required in this proposal. Milnet has not had any insurance claims within the past 5 years.

Equal Opportunity Employer | Milnet is Certified as a Historically Underutilized Business and an equal opportunity employer that strives to utilize Historically Underutilized Businesses as well as small, minority and women owned businesses as much as possible in its projects. These include M.E.P., Civil, and Structural Design Firms as its consultants.

Non Discrimination | Our firm is an equal opportunity employer. All employment decisions including recruitment, placement and promotion of individuals within the Firm shall be made without regard to sex, age, race, color, creed, national origin, religion, or non-disqualifying physical handicap and in conformity with all applicable federal, state and local laws and regulations.

Policy Against Harassment | The Firm encourages all employees to treat one another with dignity and respect. It is illegal and a violation of the Firm's policy for any employee, male or female, to harass another employee. The purpose of this policy is not to regulate our employee's personal morality. Rather it is to assure that in the workplace no employee harasses another on the basis of sex or other conduct. Any employee who engages in such conduct is subject to appropriate disciplinary action, including immediate termination.

Milnet Architectural Services PLLC acknowledges that the Professional Services Agreement has been read, we will meet the prerequisite insurance requirements and, if selected, agree to enter into such agreement for services with the City of Edinburg.

Our past years of services to municipalities has provided Milnet the opportunity for experience that will prove beneficial to the City of Edinburg. Milnet's approach to project implementation has a proven record of delivering projects successfully within budget and on schedule. We look forward to providing the City of Edinburg with the quality of service to meet and exceed expectations.

As a firm having done business in this region for over twenty-two years, we pride ourselves in the reputation we've established, the longevity of client relationships and stability of the team we have ready to work with the City of Edinburg.

We appreciate your consideration and look forward to the opportunity to serve the City.

Re: RFQ 2026-5 Request for Qualifications - ARCHITECTURAL SERVICES w/City of Edinburg

Dear Mardoqueo Hinojosa,

ORANGE MADE is proud to submit this response to be on the architectural services rotation for the City of Edinburg RFQ# 2026-5. We are humbled to have the chance to share who we are and how we can contribute to your mission. Established in 2013, ORANGE MADE is a locally owned architecture firm based in McAllen, Texas. Our office includes nine full-time and one part-time team members, including three Texas-registered architects. Since our previous submission, we have strengthened our leadership and project-delivery capacity through the addition of Ryan Duncan, AIA, as Studio Director and Project Architect. Ryan will serve as the day-to-day Project Architect for assignments under this rotation, with Erick Darbo Diaz, AIA, serving as Principal-in-Charge.

Our team brings experience in public, institutional, commercial, adaptive-reuse and community-focused projects throughout the Rio Grande Valley. Recent work includes the successful completion of the Greater State Bank Edinburg Branch and the Texas National Bank Corporate Headquarters, both completed in spring 2026; a compressed-schedule project for the Boys & Girls Club of McAllen completed in time for its summer camp program; and a current solar panel training structure project at Texas Southmost College's Starr County Campus.

Our proximity to Edinburg allows us to respond quickly to assignments, attend meetings and site visits with minimal notice, and maintain close coordination with City staff, consultants and contractors. We are prepared to acknowledge City requests the same business day and coordinate the appropriate project lead and initial response within one business day.

ORANGE MADE has reviewed the requirements of RFQ 2026-5 and the accompanying Professional Services Agreement. No addenda have been issued. We have no exceptions to the solicitation requirements and, if selected, agree to enter into the City's Professional Services Agreement and maintain the required insurance coverage. Carolina Civarolo, AIA, LEED AP, is authorized to bind ORANGE MADE LLC and will serve as the primary contact for this submission.

Thank you for your consideration. We would value the opportunity to bring our local knowledge, strengthened leadership team and responsive approach to the City of Edinburg.

With gratitude,

Carolina Civarolo, AIA
Owner & Chief Operating Officer
ORANGE MADE LLC

Erick Darbo Diaz, AIA
Owner & Chief Executive Officer
ORANGE MADE LLC

Main Contact is Carolina Civarolo | carolina@orange-made.com | 956.800.4384 or 956.566.6995
We acknowledge no addendum for this RFQ was issued.

why ORANGE MADE?

LOCAL + RESPONSIVE

McAllen office minutes from Edinburg
Same-day acknowledgment of requests
Initial assignment response within one business day
Available for meetings, site visits and construction issues

STRONGER LEADERSHIP

Three Texas-registered architects
Erick Diaz, AIA — Principal-in-Charge
Ryan Duncan, AIA — Day-to-Day Project Architect
Carolina Civarolo, AIA, LEED AP — Client and Executive Oversight
Eliazar Rodriguez — Production Leadership

PROVEN DELIVERY

13 years in business
Nine full-time and one part-time team members
Established consultant network
Experience with public, institutional and complex private projects
Current on-call and institutional work

BUILT FOR DIFFERENT-SIZED ASSIGNMENTS

Small studies and renovations
Programming and feasibility
Full architectural and engineering services
Construction administration
Larger, multi-consultant projects

FIRM PROFILE

ORANGE MADE is a locally owned architecture firm established in 2013 by Erick Darbo Diaz and Carolina Civarolo. From our McAllen studio, we provide architectural design, programming, feasibility, planning, renovation, adaptive reuse and construction administration services throughout the Rio Grande Valley.

Our firm has grown into a ten-person team supported by three Texas-registered architects, experienced production leadership and an established network of regional engineering and specialty consultants. This structure allows us to respond to small assignments without losing the capacity to manage larger, multi-disciplinary projects. ORANGE MADE has operated continuously for 13 years and maintains long-standing relationships with repeat clients, consultants and contractors. Our current project systems, leadership structure and staffing capacity position us to support the City of Edinburg throughout the full two-year rotation term.

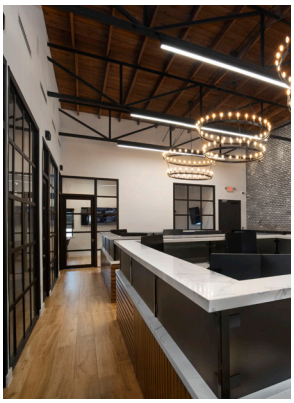
ORANGE MADE IS AVAILABLE AND CAPABLE.

The studio realizes that every project is unique in relation to its program, context, budget, and schedule. This challenge provides an opportunity to question, understand, and evolve the design and construction processes to ultimately arrive at an innovative solution. We have worked with a diversity of clients in multiple settings, each with unique design and construction standards. Through this we have gained the experience in working with and adapting to every client. We are flexible and can easily conform to very specific client requirements.

Each project is unique, so depending on the scope of work, the Partners tailor who will be the project manager and main point of contact. Carolina and Erick have over 40 years of combined experience on all types of work and are very hands-on with every project that comes through the office. They will be involved in a project from start to finish and can always be counted on to resolve any issues at hand. Client support is extremely important to us here at Orange Made. We know how important our clients are to our future growth, thus meeting and exceeding our clients needs will ensure our survival. Architecture has the ability to influence many generations and we do not take that lightly.

ORANGE MADE IS WILLING TO PROVE ITSELF, GIVEN THE OPPORTUNITY.

HOUSE ON ORANGE McAllen, Texas



You may be wondering . . .
"why the name ORANGE MADE?"

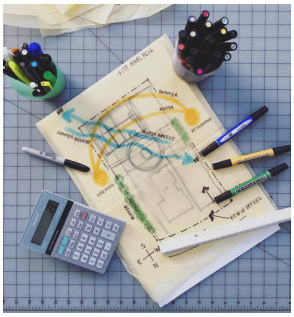
In 2005, fresh out of architecture school, Erick + Carolina took it upon themselves to create a residence in central McAllen to better understand fundamental design + construction and to bring something different to the area. This project is located on the corner of ORANGE avenue and stands as a billboard of their first project together and their purpose of elevating architecture in the RGV. So naturally the name MADE sense.

ORANGE MADE
architecture

FIRM DETAILS & PROJECT EXPERIENCE

ORANGE MADE is an architectural firm that has provided services for over 200 projects across the Rio Grande Valley. We have worked with various private and public entities and have a proven track record of success. We believe that communication is key to achieving successful outcomes, and we strive to listen to each specific entity's needs. As a part of our process, we always seek to find innovative ways to achieve our clients' goals. We are always available to meet with public entities as requested, and we make presentations to all key players to ensure that everyone is a stakeholder and invested in the project's success.
We believe civic architecture should prioritize people with public spaces that function well and engage the community. This requires thoughtful design that leverages public funding to provide efficient, sustainable, inclusive, and durable developments. Successful civic architecture withstands high use and modest maintenance budgets.

ORANGE MADE is always aware of the client's schedule and budget restraints, and has always delivered on the projects we are involved in. Being located minutes from the city of Edinburg projects' sites and from the City planning offices is key to servicing our client and getting things worked out quickly, especially during construction. Successful project delivery occurs because of a tried and proven process. Strong design solutions are the result of a collaborative, interactive process led by the design team that involves all stakeholders, including users, community residents, and specialty consultants. Careful attention is given to achieving a balance between building, surroundings, landscape, and site/s specific issues.



Commercial/ Municipal / Civic / Master Planning and Urban Projects
Our portfolio includes an variety of projects for public entities.
The following is a selected list of these projects:

- Texas Southmost College - On-Call Architectural Services Rotation 2024
- Weslaco ISD - On-Call Architectural Services Rotation 2023-2024
- UT System Brownsville - UT Health: School of Public Health
- City of Mission – Leo Pena Placita Park Renovation
- City of Pharr – Jose Pepe Salinas Memorial Civic Center Renovation
- City of Pharr – New Parks + Recreation Offices
- City of McAllen - Quinta Mazatlán Master Plan
- City of McAllen - Technology Park Master Plan

Two most recent projects in the City of Edinburg are the Renovation of Terry Canales Law Offices in Downtown Ediburg and a new branch for Greater State Bank that will start construction this coming month.

Orange Made is familiar with the building codes adopted by the city of Edinburg and is familiar with more recent building codes should the city adopt new codes. Specifically, we have successfully permitted numerous projects, ranging from new construction to renovation projects following the International Building, Fire, Mechanical, Electrical, Plumbing, and Energy Conservation Codes. In addition, we are familiar with accessibility codes and standards including ICC a117.1, ADA 2010, UFAS, Fair Housing, and TAS 2012.

ORANGE MADE architecture

PROJECT SCHEDULING, QUALITY & COST CONTROL

PROJECT SCHEDULING

Ensuring projects meet client goals for schedule depends on three critical factors:

- The project schedule must be complete, well thought out, based on real project experience and inherently achievable.
- The entire project team, including all consultants and the owner, must understand and be committed to meeting the schedule.
- The project's process must be regularly tracked and monitored.

We meet our milestones through continuous monitoring, strong consultant management, streamlined decision-making processes and fast-track project delivery methods. When schedules are compressed, we will streamline the decision-making process by facilitating work sessions with project stakeholders. Once a schedule is established, we are committed to meeting the schedule and use a variety of tools to do so.

We maintain schedule by:

- Developing a detailed schedule based on historical and institutional knowledge with the Owner.
- Fostering a team approach that engages the Owner, Users, CMAR/Contractor and Design Team.
- Aggressively monitoring the schedule throughout the project and making adjustments without impacting client move-in dates.
- Clearly communicating expectations to the entire project team.
- Maintaining an issue tracking system that lists issues, critical resolution dates, and documents their resolutions.
- Facilitating design workshops that build consensus and thus reduce approval times.
- Working with facility departments and end users to streamline decision making.

On our past projects with public and private entities, we have always upheld our end of the work. We have been true to the budgets and schedules of the projects. If the points above are met, and communication and expectations are clear, the project will most typically succeed. An important factor is also having a contractor that is capable of performing the services. All three parties, Owner, Architect and Contractor, are key to a successful project

THE CONSULTANT TEAM

Communication is the most important part of collaboration. At the onset of a project our team will establish protocols for communication to ensure everyone on the team is included on all pertinent information and that the owner is never excluded from important discussions.

We select sub-consultants primarily by their qualifications and ability to execute the project at a high level. We believe all successful projects are the result of true collaboration of the team of experts we put together. It is our responsibility to provide the consultants with the information and tools they need and to provide a platform for this collaboration to work.

Beyond communication it is important to set expectations for the sub-consultants. Our team provides our sub-consultants with detailed deliverable lists for each project milestone. This ensures that we receive what we need to progress that project and provides an outline for our subconsultant to work from.

PROJECT DELIVERY BY PHASES

The following design phases and tasks can be modified for specific project needs such as expedited projects, long-term phased projects, or other types of projects. Our team would work with the appropriate decision makers to fine tune those specifics and adjust the implementation timeline accordingly.

DISCOVERY AND UNDERSTANDING

Our strategy encompasses in-depth analysis of current conditions and understanding of the needs and inspiration of the City of Edinburg and its stakeholders. It requires a structured process that drives engagement and working closely with the city staff and defining the requirements related to function, cost and schedule for any specific project. Realistic expectations from the onset of the project are the key to success.

SITE ANALYSIS

Our team will conduct on-site analysis at the city's existing structures and new potential development locations. Our analysis would consider but is not limited to issues such as: location, as-built conditions, existing utilities and infrastructure, movement, site accessibility, pedestrian and or vehicle-circulation, parking, and historical or any other factors that might impact the design.

SCHEMATIC DESIGN

At this phase, or design team will provide design reviews and refine the design requirements with input from city's team and consultants, while engaged in the regular meetings with the city representatives to assert approval of the design requirements and developing a preliminary opinion of probable cost.

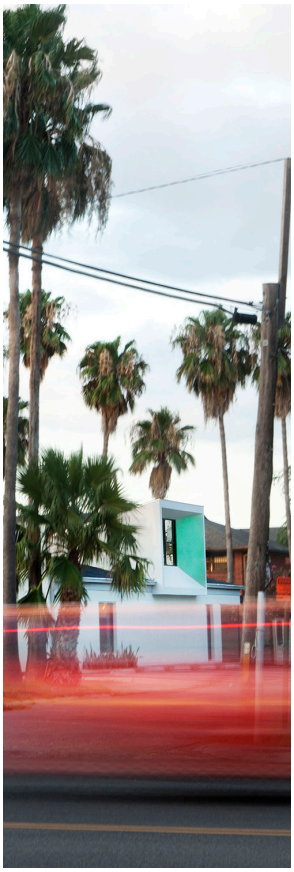
DESIGN DEVELOPMENT

Through the design development process, our team will collaborate with city's engineering staff and representatives of the stakeholders and consultants to review and discuss design concepts and preliminary plans and studies before deciding on the best alternatives for the project.

CONSTRUCTION DOCUMENTS

Our team will work on the construction documents and specifications. During this phase, working closely with the client to ensure all project needs are being met. Coordination with the consultants is of utmost importance during this phase to make sure plans are coordinated and schedules are met.

BIDDING AND NEGOTIATION



Our team will assist the City in answering bidder's questions and reviewing contractor selection. We will aid the City in any negotiations with the Contractors as needed.

CONSTRUCTION ADMINISTRATION

Our team we will be working closely with contractors in utilizing the contract documents to ensure smooth implementation of the contract in accordance with the construction specifications and standards. Our team will complete all necessary tasks and tackle unanticipated conditions or problems encountered during construction to achieve our shared goal, and ensure full client satisfaction at the end of the project.

ORANGE MADE architecture

PROJECT APPROACH

GENERAL UNDERSTANDING

ORANGE MADE acknowledges the ongoing efforts of City of Edinburg to improve quality of life experiences, provide excellent services, prompt opportunities for growth, strengthen the sense of community and engagement, and create vibrant, safe and entertaining environments for all. At ORANGE MADE, we strive to involve stakeholders and city leadership in project planning. We have extensive experience with various funding sources and projects. We begin each project by summarizing goals and objectives and assessing all needs for the project to be successful.

STRATEGY

Communication is the most important part of collaboration. At the onset of a project our team will establish protocols for communication to ensure everyone on the team is included on all pertinent information and that the owner is never excluded from important discussions. Beyond communication it is important to set expectations for the sub-consultants. Our team provides our sub-consultants with detailed deliverable lists for each project milestone. This ensures that we receive what we need to progress that project and provides an outline for our sub-consultant to work from.

Our deliverable lists are tied to our project schedules. In order, to make sure our team stays on schedule, we have minor milestones within the schedule for interim project reviews with our sub-consultants. These reviews allow for project information to flow in both directions. It can show us what information our sub-consultant still needs from us and what information we need from them. It allows space for our team to provide their expertise so that other team members can understand important project drivers for our sub-consultant. Beyond interim team meetings, we have dates set up for internal project quality control.

We regularly use technology tools to aid in team coordination. We use 3D modeling software REVIT and cloud-based BIM 360 whenever possible. These technologies provide real-time data to all team members communicating evolving designs. The software also detects system "clashes" and helps to identify conflicts between disciplines.

OVERALL APPROACH

Our strategy for meeting schedules, budgets, and deadlines is based on a thorough understanding of the necessary actions to achieve quality results effectively and efficiently. For each project, ORANGE MADE follows a structured approach to complete each phase. We meticulously plan each phase by scheduling specific tasks and milestones, identifying review and approval points, and defining the roles and responsibilities of all team members. This structured approach enhances management efficiency, reduces unexpected project complications, and ensures that the client is consistently informed about the project's status.

We believe in quality control and proactive construction management as the key to maintaining quality in construction. We believe establishing quality control principles, procedures and clear expectations, is essential in the early phases of construction. We look for and anticipate discrepancies that might otherwise lead to undesirable results and take immediate corrective action to minimize cost and schedule implications. Managing communications and directives is critical to this effort. The flow of information between ourselves and consultants, contractors or owners is logged and tracked so we are able to precisely know when any project information or document was delivered to any individual.

CAROLINA CIVAROLO, AIA + LEED AP

With over two decades of experience, Carolina Civarolo is a Registered Architect and LEED Accredited Professional who has built a diverse career through various design firms and project types. She began her professional journey at the University of Houston's Gerald D. Hines College of Architecture, and in 2003, gained international experience working in Barcelona, Spain, at Enric Miralles + Benedetta Tagliabue (EMBT). There, she developed a passion for graphics, presentations, and the early phases of design. For seven years, Carolina was a key member of Boultinghouse Simpson Gates Architects (BSG), where she worked on a range of projects, developing expertise as a project manager overseeing all phases of architectural design. Her experience at BSG included institutional projects, reinforcing her ability to handle complex programs, budgets, and schedules.

As co-founder of ORANGE MADE, Carolina leads a studio dedicated to thoughtful design, exploring the impact of architecture across various building types, including master planning and adaptive reuse. She believes that client collaboration fuels the best design solutions, ensuring that each project is both meaningful and functional. Originally from Córdoba, Argentina, Carolina grew up in Houston, Texas, and has called McAllen home for over a decade. She is passionate about giving back to the Rio Grande Valley through design and community engagement.

Carolina actively serves as Secretary of the LRGV-AIA Executive Committee, a member of the City of McAllen Historic Preservation Council, and an advisor for the Architecture Program at Texas Southmost College and the South Texas College Architectural & Engineering Design Technology Program. Her past leadership roles include serving as Secretary/Treasurer and Vice President of the LRGV AIA Chapter, as well as positions on the City of McAllen's Building Board of Adjustments and Appeals and the CDBG Advisory Board.

A native of the Rio Grande Valley, Erick attended the University of Houston, Gerald D. Hines College of Architecture, and received a Bachelor of Architecture in 2003. Upon his graduation, Erick was awarded the Hines Internship and worked alongside internationally recognized architect Oscar Tusquests Blanca in Barcelona, Spain.

Upon his return to the Rio Grande Valley in 2004, Erick practiced with a local architecture firm, Diseño Inc., where he collaborated for several years on residential and commercial projects throughout Texas and Mexico.

In 2009, Erick joined the University of Texas at Brownsville and Texas Southmost College as a faculty member, where he served the university in many capacities. During his tenure, along with his teaching duties, he assisted in developing the architecture program, served on several university committees and integrated service learning into his course work.

In 2012, Erick returned to the University of Houston, where he completed a Master of Science in Architecture from the Gerald D. Hines College of Architecture with a concentration in Urban and Suburban Design. During his master's, Erick participated in two study abroad programs that led him to Spain, Italy, Germany and Austria. He was awarded with the best Master's Project for his research.

He serves as an advisory board member for the Architecture Program at Texas Southmost College. in the past he has served as a community board member for the Rio Grande Valley Multibank Corporation, and an advisory board member for City of McAllen Community Development Council and Zoning Board of Adjustments and Appeals. Erick is also an active member of the Lower Rio Grande Valley Chapter of the American Institute of Architects, serving as President in 2022.

Ryan brings over 12 years of diverse architectural experience to the ORANGE MADE team, with a strong background in mixed-use, office, and residential projects. He is a Registered Architect in both Texas and Ohio and has contributed to projects in several major cities, including Seattle and San Francisco. A graduate of architecture school in Cincinnati, Ryan's professional path has given him a broad perspective on design, technical coordination, and project delivery across different regions, building types, and scales.

Before joining ORANGE MADE, Ryan founded and led his own practice, Duncan Architects, where he developed a strong reputation for thoughtful design, precise documentation, and a highly detailed approach to architectural production. His experience running a firm gives him a deep understanding of both the creative and practical sides of architecture, from early concept development to consultant coordination, construction documentation, and execution in the field.

Ryan advocates for a holistic and collaborative approach throughout the architectural process, working closely with clients, consultants, contractors, and project teams to achieve thoughtful and effective outcomes. Known for his sophisticated, efficient, and precise production methods, he leverages his deep knowledge of building systems and proficiency in building information modeling to enhance project delivery, coordination, and execution.

Beyond his professional experience, Ryan is proud to call the Rio Grande Valley home. His wife is from the RGV, and together they made the intentional decision to move here, raise their two young boys, and build a life rooted in family, community, and meaningful work. By choosing to join ORANGE MADE, Ryan brings not only his technical expertise and leadership experience, but also a genuine commitment to contributing to the growth, design culture, and future of the RGV.

ANTONIO CHAMPION

PROJECT MANAGER

DESIGNER

EDUCATION
Bachelor of Architecture
UT San Antonio, 2019
Architecture Program

ROLE
Project Manager
Design Leader

PROFESSIONAL AFFILIATIONS
AIA - American Institute of Architects

TxA - Texas Society of Architects

Joining ORANGE MADE as an architectural associate, Antonio brings a thoughtful and research-driven approach to design, with a strong interest in environmentally responsive architecture, adaptive reuse, and landscape-integrated user experiences. He is excited by complex design challenges and views them as opportunities for innovative, context-driven solutions that strengthen communities and revitalize urban environments.

Antonio has developed strong technical and coordination skills through his work on multidisciplinary project teams, including consultant coordination with MEP and structural engineers, construction document review, redlining, and technical detailing under the direction of licensed architects. He has contributed to conceptual design, renderings, and stakeholder presentations for a range of public and private entities, including the City of Brownsville, UTRGV, SpaceX, and private investors, supporting efforts to secure and advance new development projects.

Committed to continuous learning, Antonio is focused on gaining a deeper understanding of conventional building practices and project delivery methods as he prepares for future graduate studies. He believes adaptive reuse will play a critical role in the future of downtown revitalization and sustainable growth across the Rio Grande Valley.

Antonio is actively engaged in the profession and currently serves as the LRGV AIA Intern Director, where he supports emerging professionals and promotes architectural education and mentorship within the region.

ELIAZAR RODRIGUEZ

PRODUCTION LEADER

EDUCATION
Texas State Technical Institute-Harlingen
Associate Degree of Applied Science in Architecture
1986

ROLE
Production Team Leader
Technical Director

In practice for almost four decades, Eliazar Rodriguez is a career professional with a wealth of knowledge and expertise in architectural production and construction documentation. Over the course of his career, he has contributed to a diverse range of projects, with a strong focus on financial institutions and educational facilities in recent years.

His expertise in building codes, materials, and construction methodologies makes him a valuable asset, particularly in projects like the Health Professions and Science Building at South Texas College's Mid-Valley Campus. Beyond his technical skills, Eliazar is a dedicated mentor, fostering a collaborative studio environment where emerging professionals learn from his experience.

Outside of work, Eli enjoys spending time with his wife and visiting his children. His commitment to both family and profession reflects his dedication to long-term impact—both in architecture and in the lives of those around him.

The client was looking for a new look that meshed well with their other branches but could also relate to the Rio Grande Valley. The new branch design focuses on an entry tower that allows greater visibility, and the use of metal awnings, decorative ironwork, terracotta brick, and painted tile designs. A welcoming entry lobby, open teller areas, boardroom, restrooms, lounge areas and a motor bank are all part of the spaces.

Located in downtown Edinburg, Terry Canales Law sits in a completely renovated space. A welcoming Lobby space leads you to several conference rooms on one half of the building. The other half consists of an open bull pen and copy station surrounded by offices and a large employee lounge. one highlight of the space is a library holding hundreds of law books with a small loft area. The exterior of the building was changed to add windows and canopies along with a brick wall that shields the entry steps and ramp leading to the main entry.

The project was a complete renovation of the existing 16,000 SF Jose "Pepe" Salinas Memorial Civic Center to be re-purposed into a Youth Recreation Center. Facility will have multi-purpose area and individual classroom areas, new restrooms, grad lobby, concession, organized storage facility for Pharr Parks and Recreation, a large meeting/voting hall, a theatrical stage facility along with an indoor rock climbing structure. Adjacent, but disconnected, will be a new 6,200 SF facility for the Parks and Recreation Department that will house largely office space and Recreation Department that will house largely office space to administer the City programs for Pharr's Parks and Recreation Department. The Youth Recreation Center will receive updated infrastructure, a new updated exterior and new windows allowing natural light to filter into the space. An updated palette of finishes and new floor plan layout gives the building a fresh new feel. Thoughtfully incorporated existing trusses, LED lighting, metal ductwork and playful details contribute to a unique project.

This project was a design collaboration between Diseno, Inc + ORANGE MADE.

2.5 acres

COST
$1,200,000

SCOPE
Architectural / Engineering

This parks serves as one of the main venues for outdoor events in the City of Mission. Located in downtown, the existing 2.5 acre city park had fallen into a state of disrepair. Renovations, being funded in part by a federal grant, required the new design to address accessibility within the park and at the same time provide a safer and more inviting atmosphere for residents.

The proposed design focuses around the large, existing oak trees which surround the new amphitheater to provide much needed shade. A large steel shade structure is set in the center of the amphitheater to create a focal attraction to the park and also provide additional shade. The new design incorporates more lawn seating, new hardscape, vegetation and designated areas for vendors to set-up during events.

Orange Made collaborated with various consultants and the City of Mission to integrate a new vision for the park and amphitheater in the existing environment.

This project was a design collaboration between ORANGE MADE, NOMA + CHANIN Engineering.

The Boys & Girls Club of McAllen acquired the former MISD Bonham Elementary campus with a vision to transform it into a comprehensive Center for Wellness & Opportunity. ORANGE MADE developed a master plan that reimagines the site as an integrated community destination, bringing together a renovated Boys & Girls Club facility, community resource center, gymnasium and commons building, outdoor recreation areas, and a future sports complex.

The plan establishes a clear framework for phased implementation, allowing the organization to prioritize immediate needs while preparing for long-term growth. Improvements to circulation, parking, pedestrian access and emergency access are coordinated with new program areas to create a safer, more connected and functional campus. Through thoughtful sequencing, the master plan supports future expansion while ensuring that each phase delivers meaningful value to the children, families and community the Club serves.

ORANGE MADE

Phase 1 of the Boys & Girls Club of McAllen Center for Wellness & Opportunity renovates the existing cafeteria and gymnasium into a unified, flexible facility for after-school programs, recreation, meals, homework support and community gatherings. A new connecting vestibule, lobby and restroom core links the two buildings, allowing them to function together as one cohesive space.

The renovated commons is designed as a lively, adaptable hub with flexible seating, dedicated activity zones, bright finishes and improved natural light. The gymnasium supports recreation and group events, while the shared circulation and support spaces improve accessibility, supervision and daily operations. Delivered through a CMAR process, the project required close coordination among the Owner, design team and contractor to meet the Club's program, schedule and budget goals.

Also, a second part of this phase is an all new front parking lot and bus drop-off area.

Texas National Bank reached out to our firms ten years ago to design a new banking center on this prominent site along 10th St in McAllen, Texas. The project has evolved from a single-story banking facility to a four-story, state of the art, headquarters for the community bank. The new 65,000 SF facility will continue to house a banking facility on the ground floor. In addition to banking facility, the bank wanted to expand and consolidate their operations departments into one site, therefore, operations were incorporated on levels two and three, with executives accommodated on the fourth floor. The Annex Building was integrated into the project to take advantage of our talented local chefs and restaurateurs in the region. Additional office space for bank operations was added on the second floor. Adjacent to the building is a public plaza with native plant material and a water feature thoughtfully designed to attract birds and butterflies as they migrate through our region. The plaza is also designed to be used as a public space for events and activities for the community.

This project was a design collaboration between Diseno, Inc + ORANGE MADE.

The architects were given the task of developing an architecture style that would serve as a prototype for a local financial institution and to represent the "feel" of deep South Texas. The architectural product developed around transparency, high volumes, exposed structure, natural finishes and a natural color scheme. All strong characteristics of the "feel" of our South Texas. The client also sought to create a more modern aesthetic for their new branch. As the banking world and technology evolve, they wanted flexibility within their facility. The high volumes, open space and natural light create an inviting atmosphere for both the client and their customers.

This project was a design collaboration between Diseno, Inc + ORANGE MADE.

Conceptualization

PROJECT ARCHITECT
Carolina Civarolo, AIA
Erick Diaz, AIA
ORANGE MADE

Orange Made was hired by the City of McAllen to come up with a vision for the new Quinta Mazatlán Palm House. As we began to create the concept for the building, we quickly realized this project was much larger than the building itself. Therefore, we proposed a conceptual master plan that was translated into a physical model which was utilized for fundraising and marketing purposes. The model helped show a vision for the many program elements that complement each other on the site and create various points of interest for visitors. These elements included the Palm House, a restaurant, an amphibian and aviary center, skywalks, boardwalks, tree houses, and a gateway entry, all set within a native landscape.

Quinta Mazatlán has a unique opportunity to create a destination where people from our region and Mexico can discover and interact with nature, animals, native habitat, parkland, local artwork/ sculpture, historic and new architecture. We based the Palm House design on the plan concept of the traditional hacienda, paying homage to the existing building. Orange Made worked with the key members of the QM Advisory Board, and the City of McAllen to bring out that vision, which in the end, secured state funds that allowed the project to move forward.

The Mitte Foundation requested a conceptual study on how to bring the Arts to Downtown Brownsville. How could we save the Majestic Theatre building, and adjust it to suit the needs of a fine arts school? Along with the Majestic Theatre, the adjoining JC Penney building and other adjacent properties, programming studies and exterior conceptual renderings were created to determine the feasability of the request. Spanning four stories and different existing buildings, the program needs were to create a once again functional theatre for teaching students and also giving back a performance space to the community. Other programs needs were administrative offices, music rooms, performance dance rooms, general classrooms, an art gallery, as well as an entire school of art + design.

The first center of this type to be licensed in the State of Texas, can most easily be described as a medical daycare for children under the age of 18. We helped the client create a master plan for the property that includes a second phase that houses the client's home hospice headquarters. The PPECC project has a central lobby that divides the building into two wings, one for office areas and the larger wing for the children's classrooms, nursing station, restrooms, and therapy rooms. On the exterior is the use of siding, to give a smaller scale residential feel along with an interior palette of colorful pastels to make the space welcoming, yet playful and allow the children to feel comfortable.

COVER LETTER

City of Edinburg — Department of Engineering / Purchasing
Attention: Lorena Fuentes, Finance Manager
415 W. University Drive
Edinburg, Texas 78539

July 14th, 2026

Re: RFQ 2026-5 — Request for Qualifications, Architectural Services

Dear Mr. Hinojosa, Ms. Fuentes and Members of the Selection Committee:

Raine Architects respectfully submits the enclosed Statement of Qualifications in response to RFQ 2026-5 for architectural services for the City of Edinburg. We are honored to be considered for a place on the City's rotation list of architectural firms for the term of October 1, 2026 through September 30, 2028, and we welcome the opportunity to support the Department of Engineering across the full range of the City's public building needs from planning and feasibility through design, construction administration, repairs, and additions.

We have reviewed RFQ 2026-5 in its entirety, including the scope of services, submittal requirements, and evaluation criteria, and we understand the City's expectation that the selected architect will lead full multidisciplinary teams of engineers and consultants as each assignment requires. Our firm is organized and staffed to do exactly that, and to respond to assignments both large and small with the same level of accountability and responsiveness.

Three attributes distinguish our submission:
Local presence and direct City of Edinburg experience. Raine Architects serves municipal and public-sector clients throughout the Rio Grande Valley from our office in McAllen, minutes from Edinburg. Our professional experience is in civic and public-safety projects across Hidalgo and Cameron County — including the Edinburg ACE Building and the Edinburg Economic Development Corporation Workforce Resource Center, a $5.3 million facility currently in construction documents. We understand the City's procurement environment, its review and permitting process, and the regional construction market.

Principal-led delivery. Edgar Villanueva, AIA, Managing Principal, will serve as Principal-in-Charge and the City's primary point of contact for the full duration of the contract. The City will work directly with the person accountable for each assignment — from notice to proceed through closeout — supported by our retained consultant team across structural, civil, mechanical/electrical/plumbing, and specialty disciplines. We integrate photorealistic renders as a decision-support tool, giving City staff and leadership the ability to evaluate options clearly before committing — a practical measure that reduces design changes and construction change orders.

Proven range across public building types. Our principal's experience spans city halls, police and public-safety facilities, a courthouse, parks and recreation buildings, city-wide master planning, workforce and economic-development facilities, and public-utility buildings. That breadth allows us to serve a rotation list across whatever building types the City routes to us, and to scale our staffing to the size of each assignment — including part-time and on-call support for smaller projects.

As of the date of this submittal, City of Edinburg has not issued any addenda to RFQ 2026-5.

This Statement of Qualifications is submitted on behalf of Raine Design Labs LLC d/b/a Raine Architects, a Texas limited liability company. The undersigned is an officer of the firm duly authorized to bind the firm to a contract, and by his signature affirms the accuracy of the information contained in this submittal. Should Raine Architects be selected for negotiation, we are prepared to begin work promptly upon notice to proceed. We thank the Selection Committee for its consideration and welcome the opportunity to present our team in person should the City choose to interview shortlisted firms.

Respectfully submitted,
Edgar Villanueva, AIA
Managing Principal

HUB Certification: Texas Comptroller of Public Accounts Historically Underutilized Business — Certified

Location: Main Office: 1001 Jackson Ave. Suite A McAllen, TX

Years in Business: Raine Architects was established and registered since 2022. The firm's leadership brings more than 20 years of combined architectural practice experience prior to forming Raine Architects.

Staff Composition: 5 across architectural design, visualization, project administration, and technology operations. Sub consultant disciplines are engaged on a project-by-project basis through established teaming relationships.

Services Offered by the Firm

Raine Architects provides full-spectrum architectural and pre-construction services for civic, educational, affordable housing, and commercial clients across the Rio Grande Valley. Our services include:

- Architectural design (schematic design, design development, construction documents, Bidding & Construction Admin)
- Interior Design, FFE, Immersive Renders & Animations
- Design-build delivery (DBIA members)
- BIM-based project delivery and Autodesk Construction Cloud integration
- Photorealistic architectural visualization and stakeholder engagement support
- Programming, feasibility studies, and master planning
- Code analysis, accessibility review, and permit coordination
- Cost estimating coordination and value engineering

Capability to Design the Project

Raine Architects has the personnel, technology infrastructure, and subconsultant network necessary to design any project within the City's stated schedule and budget. Our most directly comparable active project — the Edinburg Economic Development Corporation Workforce Resource Center — is a $5.3 million civic design-build facility of comparable scale currently in construction, demonstrating real-time delivery capability for a project of this scope. Our team's combined experience includes the design of public assembly buildings, civic facilities, educational facilities, and large-volume program spaces.

ACCOMPLISHMENTS & CAPABILITY SUMMARY

Recent Accomplishments and Awards

Raine Architects has rapidly established a portfolio of civic and public-sector work across the Rio Grande Valley. Recent firm accomplishments relevant to this submission include:

- Awarded the Edinburg Economic Development Corporation Workforce Resource Center, a $5.3M civic design-build project with Gerlach Builders — currently in Construction.
- Awarded position on the South Texas College on-call architectural services pool (RFQ 25-26-1040).
- Shortlist finalist for the South Texas ISD Performing Arts Center (RFQ 27-007), a public assembly facility pursuit.
- Awarded City of Harlingen Multipurpose Rec Center, currently in Schematic Design.

PROJECT UNDERSTANDING

The City of Edinburg is seeking architects for rotation list prepared to respond, over a two-year term, to whatever the City's facilities require: a new civic building, a public-safety facility, a feasibility study, a repair, an addition. Each assignment will arrive with its own program, budget, schedule, and constituency. That reality shapes how we have organized this submission. Raine serving the rotation list will be able to scale and bring a full multidisciplinary team to a major facility, and to handle a small study or renovation with the same responsiveness and without unnecessary overhead. We know the City's review, permitting, and procurement environment well enough to move quickly from notice to proceed. And we offer the City a single, consistent point of accountability across every assignment, regardless of size. Raine Architects is built for this. Our principal is directly involved in every project. Our consultant team is retained and available, not assembled after award. Our office is in McAllen, minutes from Edinburg City Hall. And our team has already delivered civic, public-safety, workforce, and planning projects for this City.

METHOD OF APPROACH

Raine Architects will serve as the prime architectural consultant, leading a fully integrated team of structural, mechanical/electrical/plumbing, civil, landscape, and specialty consultants for each assignment issued under this contract. Our method follows a disciplined five-phase structure, with each phase concluding in a formal deliverable and City review and sign-off before the next phase begins. Because this is a rotation-list contract covering the full range of the City's public buildings, the same process applies whether an assignment is a small study, a repair, or a full new building — we scale the team, schedule, and level of effort to the specific scope while holding the quality and accountability standards constant.

PROJECT DELIVERY METHODOLOGY

Programming & Schematic Design. Confirm program, goals, and budget through engagement with City Engineering staff and end users. Site analysis, code analysis, and preliminary structural and MEP system selection establish the project framework. The phase concludes with a schematic deliverable and City review.

Design Development. Refine the approved concept and integrate all disciplines through regular coordination meetings, advancing drawings and outline specifications. An independent third-party cost estimate is prepared at a defined DD milestone, and material and system selections are made in workshops with the City.

Construction Documents. Prepare a fully coordinated CD set for permit submission and competitive public bid — structural and MEP calculations, civil drainage and grading, CSI-format specifications, and a final accessibility and code-compliance review — coordinated with the City's permitting and inspection processes.

Bidding & Procurement. Support competitive public procurement: pre-bid conference, addenda issuance, RFI responses, bid evaluation, and recommendation to award. We advise on the appropriate delivery method (design-bid-build, CM-at-Risk, or design-build) for each project.

Construction Administration. Provide submittal and shop-drawing review, periodic site observation, RFI responses, pay-application certification, change-order review, substantial completion, punch list, project closeout, record drawings, and warranty walkthrough.

PROJECT MANAGEMENT PLAN

Single point of accountability. Edgar Villanueva, AIA, Managing Principal, serves as Principal-in-Charge and the City's primary point of contact for the duration of the contract. This responsibility is not delegated — the City works directly with the person accountable for each assignment.

Communication cadence. Regular progress meetings with City Engineering staff, milestone stakeholder reviews, prompt RFI turnaround (typically within 48 hours), and meeting minutes circulated within one business day keep every assignment

transparent and on track.

Document control. Project files are maintained in a cloud-based project platform (Autodesk FORMA) with City access available for review at any phase, and drawing version control is managed through BIM coordination workflows.

Cost control. Independent third-party estimating at defined milestones and a value-engineering log opened early and maintained continuously through bid issuance — not assembled reactively at the end — keep projects aligned to budget, with budget deltas tracked transparently with the City at each phase gate.

Quality control. Senior in-house QC review at each milestone deliverable, discipline coordination and clash detection through BIM, and pre-submission code review against IBC 2021 with Texas amendments, the ADA Standards for Accessible Design, and applicable City of Edinburg codes.

SCHEDULE RELIABILITY & RESPONSIVENESS

Meeting schedules and deadlines is a function of how a firm is organized, not a promise made at award. Raine's structure is built for reliable, responsive delivery on an on-call contract:

Immediate mobilization. Our retained consultant team — OIM Engineering (structural), Trinity Engineering (MEP), and Benavides Engineering (civil) — has confirmed availability, so a complete design team mobilizes on notice to proceed rather than being assembled after award.

Principal-led, no handoffs. Direct principal involvement removes the handoffs and rework between rotating staff that cause delays; schedule decisions are made by the person accountable for meeting them.

Right-sized teams. Smaller or part-time assignments are handled by a lean, principal-directed team; larger projects mobilize the full staff and consultant bench — in both cases under the same process and the same point of contact, which lets us respond quickly to assignments of any size.

Local presence. Our McAllen office, minutes from Edinburg, supports same-day site visits and in-person coordination with City staff, compressing decision cycles and shortening turnaround.

VISUALIZATION AS DECISION SUPPORT

Raine integrates photorealistic design visualization into the design process as a decision-support tool rather than a marketing exercise. Allowing City staff, leadership, and the public to experience a proposed design before commitment strengthens design review, improves stakeholder and Council engagement, and reduces the risk of costly late-stage revisions and construction-phase change orders — a practical contributor to both schedule reliability and cost control.

Technology and Delivery Infrastructure

Raine Architects has invested in delivery infrastructure that directly supports the City's project goals of efficient design delivery, transparent communication, and decision-quality stakeholder engagement:

- Autodesk Forma for centralized BIM coordination, document control, and City access throughout the project lifecycle.
- Revit-based BIM workflow with multi-discipline coordination and clash detection.
- Photorealistic visualization pipeline supporting walk-through stakeholder review prior to construction documents
- Raine Ops — a custom firm operations platform integrating project management, communications, and design support workflows, enabling rapid response to City and stakeholder requests.

Firm Capability to Deliver This Project

Raine Architects has the staffing, technical capability, and committed subconsultant team to deliver any City project within the City's stated schedule and budget. Our active workload is balanced to accommodate this project at the staffing levels described in this submission, and the personnel identified here will be allocated to this project upon notice to proceed.

The firm carries professional liability, general liability, automobile, and workers' compensation insurance at the limits required by the City's RFQ. Coverage documentation is included in Tab 05 of this submission.

Up-to-date firm registration certificates from the Texas Board of Architectural Examiners, HUB certification documentation from the Texas Comptroller of Public Accounts, and individual licenses for the project team's licensed professionals are attached to this Tab.

PROJECT DESCRIPTION

Located in Edinburg, Texas, the Workforce Resource Center is a new civic facility designed to serve as a regional hub for workforce training, economic development services, and community programming. The project is being delivered as a design-build collaboration between Raine Architects and Gerlach Builders for the Edinburg Economic Development Corporation.

PROJECT HIGHLIGHTS

Raine Architects serves as Principal-in-Charge and design lead, managing the full architectural scope from schematic design through construction administration. The design build delivery allowed us to compress the design schedule from schematic to construction documents in 3 months. Proactively coordinating with the contractor and getting updated cost estimates allowed us to make pivotal design decisions.

PROJECT DESCRIPTION

Located in Edinburg, Texas, KVM Montessori is an active educational facility project for which Raine Architects is providing comprehensive architectural design services. The project supports the Montessori educational methodology through age-appropriate learning environments, integrated indoor and outdoor spaces, and a layout designed to promote independent learning, collaboration, and movement between activity areas.

PROJECT HIGHLIGHTS & RELEVANCE

Raine Architects serves as Architect of Record. The project illustrates Raine's commitment to visualization-driven client engagement: a fully deployed 3D virtual tour of the design was developed and published to a custom subdomain via the firm's established Immersive Render deployment pipeline, allowing the client, faculty, and prospective families to walk through the design environment online prior to construction completion.

PROJECT TEAM QUALIFICATIONS & EXPERIENCE

Profile of Firm and Team Project Experience

Municipal, Civic and Public-Safety Projects | Last 5 Years (2021–2026)

New construction, renovations, and additions | Raine Architects firm experience and project-team principal experience

The following table lists municipal, civic, and public-safety facility projects delivered by Raine Architects and by the firm's project team, demonstrating direct relevance to the full range of public buildings covered by this rotation-list contract for the City of Edinburg. Firm projects (Raine Architects as Architect of Record) are shown separately from projects delivered by team members in principal roles while at ERO Architects.

#	PROJECT NAME	TYPE OF PROJECT	OWNER / CLIENT	ROLE / ARCHITECT OF RECORD	CONSTRUCTION VALU

The proposed project team brings extensive Rio Grande Valley civic experience. The projects below reflect the professional experience of the firm's principal, Edgar Villanueva, AIA, and Robert Pruneda, in the roles each held on the respective projects. Together they represent hands-on leadership across the full range of public building types the City of Edinburg would route through this rotation list — city halls, public safety facilities, justice/courthouse facilities, recreation, and city-wide master planning. Photography of the completed buildings has been independently commissioned for this submittal.

In-House Team — Raine Architects

NAME	ROLE	REGISTRATIONS	EXPERIENCE
Edgar Villanueva, AIA	Managing Principal & Princlpal-inCharge	TX Architect; AIA; DBIA Member	12+years Civic/Municipal, K-12, Institutional
Robert Pruneda, RID, NCIDQ	Design Principal	TX Registered Interior Designer NCIDQ Certificate	14+ years K-12, Gymnasiums, Civic, Higher Ed
Martin Gonzalez, AIA	Building Enclosure Specialist	TX Architect; AIA	12+years Civic/Municipal, K-12, Institutional
Jorge Ollervides, AIA	Project Architect	TX Architect; AIA	20+ years — Civic, K-12, Municipal
Kenneth Gadea	Visualization Specialist	3D Rendering; BIM Visualization	10+ years — Architectural Visualization

Supervisory Responsibilities & Line of Authority

Raine Architects organizes every engagement around a single, unbroken line of accountability. Authority originates with the Managing Principal and extends through the Design Principal and Project Architects to each supporting discipline and consultant, so that at every stage one person is answerable to the City for the work. This structure is deliberate: clear lines of authority prevent the handoffs, gaps, and conflicting direction that cause schedule slippage and rework on public projects, and they give the City a consistent chain of command from the first planning meeting through project closeout.

Edgar Villanueva, AIA — Managing Principal / Principal-in-Charge. As the firm's principal and a licensed Texas architect, Edgar Villanueva serves as the single point of accountability to the City of Edinburg. He holds direct supervisory authority over all project team members and consultant firms, sets project priorities and schedules, and is personally involved in each assignment rather than delegating oversight to rotating staff. All contractual correspondence, major design decisions, and final deliverables pass through the Managing Principal, ensuring consistency, quality, and alignment with the City's goals. He remains the City's continuous point of contact across every assignment on the rotation list, regardless of size.

Robert Pruneda, RID, NCIDQ, leads the firm's design direction and production quality, establishing and maintaining design intent from initial concept through construction administration. He directs interior architecture, space planning, and material and finish standards, and manages the firm's internal quality-assurance processes for design coordination and production consistency, reviewing deliverables at each milestone to ensure design intent carries through to the final product.

Martin Gonzalez, AIA ,Project Architect / Building Enclosure Specialist. A licensed Texas architect, Martin Gonzalez leads day-to-day production and technical documentation while serving as the firm's building enclosure specialist and liaison. He translates approved design into coordinated, code-compliant construction documents and directs the design and detailing of the building envelope — wall assemblies, roofing, fenestration, and air- and moisture-control systems — coordinating enclosure performance across the architectural, structural, and MEP disciplines. His focus on the envelope is particularly valuable for public buildings in the Rio Grande Valley's hot-humid, high-wind climate, where enclosure detailing directly affects energy performance, durability, and long-term maintenance cost. He manages document-level quality control under the direction of the Managing Principal and supports construction-phase services including submittal review and field observation of enclosure conditions.

Jorge Ollervides, AIA, as Project Architect, Jorge Ollervides supports production, coordination, and technical quality control alongside Martin Gonzalez. Two licensed project architects on staff give the firm both production capacity and built-in redundancy, so assignments continue without interruption regardless of concurrent workload — essential for reliable turnaround on an on-call contract.

Kenneth Gadea, as Visualization Specialist, Kenneth Gadea leads photorealistic architectural visualization and 3DVista virtual-tour production throughout the project lifecycle. His work allows City staff, leadership, and the public to experience proposed designs before construction, supporting design review, stakeholder engagement, and informed decision-making at each milestone — reducing the risk of costly late-stage changes and change orders.

11+ Years Experience

Founder, 2022

PROFESSIONAL SUMMARY

Edgar Villanueva, AIA, is the Founder and Principal Architect of Raine Architects, bringing over a decade of experience in the planning, design, and delivery of public-sector projects across South Texas. A licensed architect in the State of Texas, Edgar has led the design of numerous municipal, educational, and community facilities, including city halls, public safety complexes, and cultural centers. His approach blends technical precision with a deep understanding of civic purpose — ensuring each project balances functionality, aesthetics, and long-term value for the communities it serves.

Prior to founding Raine Architects in 2022, Edgar spent more than ten years with other firms in the Rio Grande Valley, where he advanced from designer to project architect, overseeing major projects for cities and school districts throughout the region. His leadership at Raine emphasizes collaboration, efficiency, and the integration of modern design technology to deliver projects on time, on budget, and with enduring architectural integrity.

PROFESSIONAL SUMMARY

Robert Pruneda, RID, NCIDQ, is the Design Principal of Raine Architects, leading all design direction, production quality, and QA/QC processes. With 14 years of industry experience and dual degrees in architecture from the University of Idaho, Robert blends artistry with technical expertise to create modern scholastic environments that empower students to innovate and problem solve. He excels in 3D visualization, interior design, furniture, fixture, and equipment design, striving to create innovative and accessible spaces that use space efficiencies and reduce footprint costs. A thorough researcher, Robert's designs reach high aesthetic standards while reflecting the culture and values of local communities.

- Revit / BIM 360 production
- Bluebeam technical reviews
- Building-envelope and wall-section detailing
- IBC and Texas Accessibility / ADA
- Large-scale commercial and institutional
- Multi-discipline BIM coordination
- Bilingual — English / Spanish

11+ Years Experience

PROFESSIONAL SUMMARY

Martin Gonzalez, AIA, is a licensed Texas architect with more than eleven years of experience in technical production, construction documentation, and construction administration on large-scale commercial and institutional projects. He translates design intent into coordinated, code-compliant construction documents and excels in Revit / BIM-based delivery, technical detailing, and multi-discipline coordination. His portfolio includes high-profile arena, workplace, and life-science facilities, where he has managed construction-document and construction-administration phases. At Raine Architects he leads day-to-day production and technical documentation and supports construction-phase services.

PROFESSIONAL SUMMARY

Jorge A. Ollervides Monterde, AIA, NCARB, brings extensive architectural experience across K-12 education, higher education, healthcare, municipal, and commercial projects throughout Texas and nationally. His NCARB certification demonstrates compliance with the highest national standards for architectural practice and enables licensure reciprocity across all U.S. jurisdictions. Jorge's portfolio includes new construction, major renovations, and master planning for multiple school districts, with particular depth in Corpus Christi ISD and the Rio Grande Valley. His experience spans the full project lifecycle from programming and design through construction documents and construction administration.

6+ Years Experience

With Firm: 2024

PROFESSIONAL SUMMARY

Architectural 3D Visualization Specialist with over six years of experience creating high-quality visual solutions for architects, designers, and real estate professionals. Skilled in transforming design concepts into clear, realistic, and engaging visual experiences through advanced 3D modeling, rendering, and visualization workflows. Experienced in collaborating with international teams, adapting to different project requirements, and delivering accurate visuals that support design communication and decision-making.

PROFESSIONAL EXPERIENCE

Architect & 3D Visualization Specialist | Freelance (2023 - Present)

- Delivered photorealistic 3D renderings for architectural interiors and exteriors, producing visuals that help clients secure approvals
- Developed AR/VR experiences using Unreal Engine, including virtual tours and real-time interactions
- Created interactive 360° virtual tours and high-quality walkthrough animations
- Designed and prepared precise CAD models, blueprints, and technical construction plans
- Created detailed interior designs including space planning and material selection

Unreal Engine 3D Generalist | Jump into Reality, Spain (2022 - 2023)

- Created and optimized high-quality 3D assets for architectural visualizations in Unreal Engine
- Developed realistic textures and materials using UV unwrapping and PBR techniques
- Optimized 3D assets for real-time applications while maintaining visual quality

Architectural Visualization Specialist | NICAES, Nicaragua (2020 - 2022)

- Collaborated within multidisciplinary team of 15+ professionals on walkthrough animations and 360° experiences
- Produced drawings and graphic presentations for over 200 projects
- Applied design expertise to develop customized architectural elements

CAD & 3D Visualization | ADiseño de Interiores, Nicaragua (2017 - 2019)

- Produced accurate construction drawings and visual documentation
- Developed and maintained architectural plans and technical documents
- Created detailed 3D models and renderings for design presentations

Rio Grande Valley Based

FIRM PROFILE

Benavides Engineering is a Rio Grande Valley civil engineering firm based in Alamo, Texas, led by principal engineer Jerry Benavides, P.E. The firm provides civil, site, and land-development engineering across multiple jurisdictions, guiding projects from feasibility and due diligence through design, entitlement, and permit issuance. Its practice is built on translating terrain, code, and municipal process into permits that issue — with direct working experience across Hidalgo County and City of McAllen review processes.

✓ Local Jurisdictional Experience

Active practice across Hidalgo County and Rio Grande Valley municipal review processes — platting, drainage review, utility coordination, and permitting.

DISCIPLINES

- **Civil** — Master grading, drainage, utility coordination, stormwater, infrastructure
- **Site**— Site layout, geometric design, paving plans, accessibility
- **Residential**— Subdivisions from concept plat to recorded final plat, drainage studies
- **Commercial** Retail, office, mixed-use, and industrial site development

PROJECT DELIVERY PROCESS

Phase 01 — Feasibility

Site reconnaissance, due diligence, zoning review, and an early read on site constraints.

Phase 02 — Design

Concept layouts, grading, drainage, and utility plans tuned to topography, code, and budget.

Phase 03 — Entitlement

Submittal, redline cycles, and public meetings — running the municipal review process.

Phase 04 — Recording

Final plat recording, permit issuance, and construction-phase support through C.O.

KEY PERSONNEL

Jerry Benavides, P.E.

Principal-in-Charge / Lead Civil Engineer | P.E. No. [add]

Principal engineer and founder. Leads all aspects of civil practice from feasibility through construction-phase support, with direct experience navigating Rio Grande Valley municipal and county review processes.

13+ Years | **Founder, 2019**

PROFESSIONAL SUMMARY

Oved Ivan Mata, P.E., is the Principal and founder of OIM Engineering PLLC. He began his engineering career in 2012 after graduating from The University of Texas at San Antonio. While working as an EIT for four years, he obtained his Master's degree with a Structural Concentration from Texas AandM University — Kingsville.

In 2019 Ivan became a registered licensed engineer in the State of Texas and formed OIM Engineering PLLC. As principal-in-charge, he oversees all aspects of every project — from schematic design through construction administration. His hands-on experience as a concrete subcontractor prior to his engineering education provides practical insight into constructability and cost-effective design solutions.

✓ Municipal and Public-Safety Experience
Weslaco Police Station | $3M | 25,000 SF — full structural design and construction administration. Weslaco Fire Station — design and CA collaboration.

MUNICIPAL and CIVIC EXPERIENCE

- **Weslaco Police Station** — City of Weslaco | $3M | 25,000 SF
- **Weslaco Fire Station** — Design and CA collaboration

15+ Years | **Trinity since 2009**

PROFESSIONAL SUMMARY

Wilford L. McGee III, P.E., is the Principal Mechanical Engineer for Trinity MEP Engineering. His professional duties include designing mechanical systems, managing projects from inception to completion, assigning duties to subordinates, reviewing all work during design, and following through with construction administration.

Throughout his professional career, Wilford manages to perform his duties while always striving to educate himself and office staff on new product lines, and seeks continuing education on all aspects of engineering design systems.

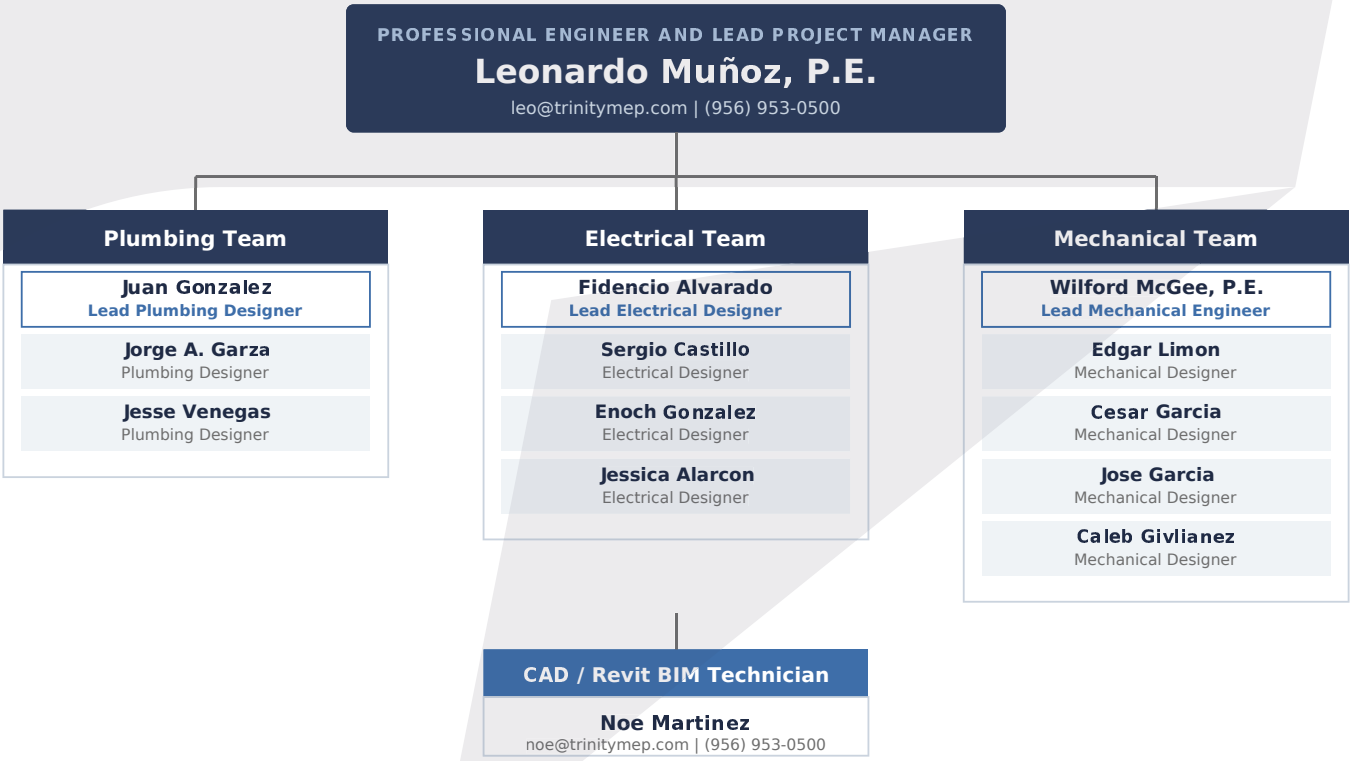
Wilford is determined to educate owners on the best types of mechanical designs and systems based on the owner's needs, occupant classifications, and resources available to the end user. These factors are considered to evaluate what type of HVAC system best meets the intended application.

NOTABLE PROJECT EXPERIENCE

Harlingen Border Patrol Station — GSA Renovation Project

Challenge: remodel an existing facility while maintaining building functionality.
Solution: strategic planning for mechanical system layout to meet objectives.

PROJECT APPROACH



Wilford has been with Trinity MEP Engineering since 2009 and has worked on numerous GSA, municipal, and institutional projects. His approach focuses on understanding owner needs, evaluating occupant requirements, and designing systems that are efficient, maintainable, and cost-effective for the life of the building.

TRINITY MEP ENGINEERING — ORGANIZATIONAL CHART

MEP Consultant Team | RFQ 2026-5 — City of Edinburg Architectural Services

If awarded the Services Contract for this RFQ, Trinity MEP Engineering will be working as a consultant to provide mechanical, electrical, and plumbing design for projects. Trinity Engineering is committed to provide 100% of our time and attention to this project to meet the scheduled milestones. As engineers, we do not issue the same prescription for every project. We focus on our customer's needs and on giving the owner an affordable, operable, and maintainable product.

The individuals assigned to the project will be committed for the entire duration of the project.

Previous Experience with the City of Edinburg

Past projects with the City of Edinburg, by proposed team member | RFQ 2026-5

Per Submittal Requirement #4, the following lists past projects with the City of Edinburg for each proposed team member. Roles performed while at a previous firm are noted as such. Projects for Edinburg CISD, the Edinburg Housing Authority, and Hidalgo County are separately identified, as these are public entities distinct from the City of Edinburg.

TEAM MEMBER	CITY OF EDINBURG PROJECTS	ROLE / FIRM
RAINE ARCHITECTS — PROPOSED PROJECT TEAM		
Edgar Villanueva, AIA Managing Principal / PIC	▸ Edinburg ACE Center ▸ Edinburg PD Feasibility Study ▸ Edinburg Parking Garage — design (not constructed) ▸ Edinburg Parking Assessment — planning study ▸ EEDC Workforce Resource Center	*Project Manager at ERO Architects (1–4); Principal-in-Charge at Raine Architects (5)*
Robert Pruneda, RID Design Principal	▸ Edinburg ACE Center ▸ Edinburg PD Feasibility Study ▸ Edinburg Parking Garage — design (not constructed) ▸ EEDC Workforce Resource Center	*Designer at ERO Architects (1–3); Raine Architects (4)*
Martin Gonzalez, AIA Project Architect	▸ EEDC Workforce Resource Center ▸ Edinburg Training Facility	*Raine Architects*
Jorge Ollervides, AIA Project Architect	▸ EEDC Workforce Resource Center	*Raine Architects*
Kenneth Gadea Visualization Specialist	▸ EEDC Workforce Resource Center	*Raine Architects*
CONSULTANT TEAM — STRUCTURAL and CIVIL		
Oved Ivan Mata, P.E. OIM Engineering — Structural	▸ EEDC Workforce Resource Center	*Structural engineer*
Jerry Benavides, P.E. Benavides Eng. — Civil	▸ EEDC Workforce Resource Center	*Civil engineer*

Trinity MEP Engineering — City of Edinburg Project History

Leonardo Muñoz, P.E., RME · Wilford L. McGee III, P.E. · Fidencio Alvarado — mechanical, electrical, and plumbing engineering

- ▸ **Edinburg City Hall** — Plumbing system retrofit
- ▸ **Edinburg Fire Station** — HVAC / electrical
- ▸ **Edinburg ACE Building** — MEP engineering
- ▸ **Edinburg EDC** — Parking-lot lighting and EV chargers
- ▸ **De Zavala Skate Park** — Restroom facilities
- ▸ **Edinburg Recreation Center — El Tule** — MEP engineering
- ▸ **North Park Sports Complex** — MEP engineering
- ▸ **Bicentennial Park** — MEP engineering
- ▸ **Municipal Park** — MEP engineering
- ▸ **Memorial Park** — MEP engineering
- ▸ **Apollo Park** — MEP engineering
- ▸ **Fountain Park** — MEP engineering
- ▸ **City of Edinburg Volleyball Courts** — MEP engineering

Roles noted as "at ERO Architects" were performed by the individual while employed at a previous firm; ERO Architects was Architect of Record on those projects.

SAN JUAN POLICE DEPARTMENT

301 E. RIDGE RD. SAN JUAN, TEXAS 78589
(956)223-2400
www.sanjuanpolice.com

Leandro Sifuentes
CHIEF OF POLICE

To Whom It May Concern,

I am pleased to provide this letter of recommendation for Mr. Edgar Villanueva, whom the City of San Juan Police Department has had the privilege of working with on several major initiatives, including the most recent San Juan Police Department Expansion Project. Based on our experience, I can confidently recommend Edgar to any client seeking a architecture work who brings professionalism, expertise, and exceptional communication to every phase of a project. Edgar distinguishes himself through his strong architectural leadership, clear project vision, and meticulous attention to detail. From early planning to final execution, he demonstrates an ability to translate complex requirements into practical, high quality design solutions. His understanding of operational needs particularly for public safety facilities has been invaluable and reflects a deep knowledge of how to design spaces that support both functionality and long term growth. One of Edgar's greatest strengths is his people skills. He communicates all aspects of the project with clarity, transparency, and consistency, ensuring that all stakeholders remain informed and confident throughout the process. Edgar stays in constant communication, proactively addressing questions, clarifying details, and keeping everyone aligned on timelines and expectations. This level of responsiveness has proven essential in maintaining momentum and avoiding delays.

Additionally, Edgar brings a solution-oriented mindset, identifying challenges early and presenting practical, well-reasoned options that keep the project on track. His professionalism, reliability, and collaborative approach make him an asset to any organization or client seeking a highly competent architect who takes true ownership of his work.
Based on the outstanding performance we have seen, I fully and without reservation recommend Edgar Villanueva as a Principal Architect for any client seeking a knowledgeable, communicative, and dependable professional. He has earned the trust and respect of our department, and we are confident he will bring the same level of excellence to future projects. Should you need additional information, please feel free to contact me.

Respectfully,

Leandro Sifuentes

Chief of Police

Tirso Garza, Fire Chief
Carlos Alaniz, Assistant Chief
Sandra Guajardo, Administrative Assistant III

January 8, 2026

To Whom It May Concern,

I am writing to express my strong recommendation for Mr. Edgar Villanueva, of Raine Architects, for his architectural projects. Mr. Villanueva has demonstrated exceptional innovation, creativity and expertise in architecture throughout his career.

Having worked closely with Mr. Villanueva on several architectural endeavors, I have witnessed firsthand his proficiency in both residential and commercial design. He leads a talented team of architects and designers who approach each project with a vision and purpose, seamlessly integrating functionality, sustainability, and aesthetic appeal. Mr. Villanueva has a keen eye for detail and a remarkable ability to transform conceptual ideas into visually striking and structurally sound realities.

Moreover, Mr. Villanueva's collaborative spirit ensures successful partnerships with clients, contractors, and other key stakeholders. His open communication and adaptable nature make him an invaluable asset in navigating the complexities of any architectural project. He consistently delivers results that exceed expectations, both in terms of quality and timelines.

If you are seeking an architecture firm committed to excellence and innovation, I highly recommend Mr. Edgar Villanueva and Raine Architects.

Sincerely,

Tirso Garza, Fire Chief

THE CITY OF Edinburg Engineering

October 13, 2025

Letter of Recommendation

To Whom It May Concern:

It is my pleasure to recommend Edgar Villanueva, AIA, for his professionalism, dedication, and commitment to design excellence. I had the opportunity to work with Edgar during the Edinburg Arts, Culture and Event (ACE) project, where he served as the Project Manager / Architect while employed with ERO Architects.

Throughout the project, Edgar was a key point of contact between the City, consultants, and the contractor. He consistently demonstrated a strong understanding of public project delivery — from design coordination and documentation to construction administration. His responsiveness and attention to detail ensured that the project progressed smoothly and aligned with the City's goals for function, quality, and budget.

Although the work was completed under his previous firm, Edgar's leadership and direct involvement were instrumental to the project's success. His professionalism, communication, and problem-solving abilities set a high standard for collaboration.

I would highly recommend Edgar Villanueva, AIA, and his firm, Raine Architects, for future City projects. He has proven himself to be a capable and trusted professional who delivers both high-quality design and reliable service.

Sincerely,

Digitally signed by Mardoqueo Hinojosa

RIKE

TRANSMITTAL LETTER

We appreciate the work the City of Edinburg has entrusted our firm throughout our history and transformation. **RIKE**, formerly ROFA Architects, Inc., now named after Zeb Rike, the founder of the firm, circa 1947, brings the experience of Senior Principals Luis A. Figueroa AIA, Andres Palma P.E., Jose Carlos “Charlie” Garcia III, AIA, David I. Iglesias AA and Associate Principals, Servando N. Miranda, AIA, NCARB, LEED AP® ND, WELL™ AP, SITES® AP, CSI, CDT®, and Nestor E. Camacho AIA, NCARB.

The firm leadership and dedicated staff are interested and fully committed to providing architectural and engineering professional services to the City of Edinburg. **RIKE** has also provided professional architectural/ engineering services to numerous municipal clients from across the Rio Grande Valley from Brownsville to Zapata. Projects include city halls, public safety, one stop development centers, parks, fire department stations, training facilities, and administration buildings.

We are a local firm, our leadership and staff are life-long residents of the Rio Grande Valley. Our experience has been extensive in working with State, County and Municipal Governments in addition to School District and nonprofit organizations Valley wide.

We thank you for this opportunity to submit our qualifications and enthusiastically express our sincere interest and commitment to partner level participation on your new proposed projects. Our team is prepared to bring that same local knowledge, licensed leadership, and on-time delivery record to your two-year architectural services rotation, and we confirm no addenda have been issued as of this submission.

Mr. Luis A. Figueroa, AIA, Managing Principal, will serve as primary contact authorized to represent **RIKE**.

Our current office location since 1975:

1007 Walnut Avenue
McAllen , Tx 78501
956-686-7771
luis@rike.pro

We look forward to your consideration, please know our team is available to address any further inquiry.

Sincerely,
RIKE

Luis A. Figueroa, AIA
Senior Principal

02 FIRM QUALIFICATIONS AND EXPERIENCE

RIKE

QUALIFICATIONS AND EXPERIENCE

FIRMS CAPABILITY

RIKE, formerly ROFA Architects and CG5 Architect, brings extensive experience collaborating with all stakeholders. Our combined portfolio includes projects ranging from master planning, building renovations, additions, and new construction.

Our team has successfully partnered with numerous federal, state, and local entities by:

- Engaging with local leadership, stakeholders, and facilities staff to understand goals, operational needs, and long-term planning priorities.
- Coordinating with multiple stakeholders, administration, maintenance departments, and community committees and leadership members.
- Designing within existing and active buildings, ensuring user safety, minimizing disruptions, and maintaining operations throughout construction.
- Navigating state, federal and municipal requirements, including TAS/ADA, security standards, and applicable life-safety codes.
- Providing clear communication and transparent budgeting that cities rely on for leadership and community updates.

Through our legacy firms, we have completed work throughout the Rio Grande Valley and South Texas, demonstrating our strong understanding of a range of environments, city processes, and the expectations tied to publicly funded projects.

Our design and engineering teams have substantial experience working on new and renovation projects with years of collaboration meeting strict deadlines. This experience allows us to maintain predictable scheduling and deliverables. This structured, proactive approach has allowed the RIKE team to consistently deliver projects on time and in accordance with Owner expectations. We are committed to maintaining this level of reliability for every project we undertake.

PAST EXPERIENCE

Our portfolio includes more than 2,500 public and private facilities. Our clients are diverse: local city, county, state and federal agencies.

Our experience ranges from single story, single use facilities to multi-story, multi-use complexes. Each project and its solutions have been unique; however, the common characteristics are the constant attention to the quality of our services and the character and value of the environments we create. Through our collective innovative approaches to design, construction and cost estimating, we have consistently delivered projects that align with our clients' needs and expectations. Having worked with a multitude of clients in the Rio Grande Valley, RIKE has acquired a deep understanding of the Valley's unique design landscape.

Recent clients include:

- City of Palmview
- City of Donna
- City of Edinburg
- City of La Feria
- Hidalgo County
- City of Mission
- City of Harlingen

With over seven decades of experience, **RIKE** has worked with multiple entities such as municipalities, counties and state agencies. We are staffed with experienced architects and accomplished employees that can quickly and efficiently meet the needs of the City of Edinburg, as we have successfully done for other Valley clients.

Through that experience we have worked with the following municipalities: McAllen, South Padre Island, La Feria, Edinburg, Pharr, Palmview, Mission and City of Donna, Palmview, Harlingen, Weslaco, Alamo, and Elsa, to name a few. At the county level, we have worked for Hidalgo and Cameron. At the state level, we have worked for The Texas National Guard Armory, Texas Department of Public Safety, Texas Facilities Commission, The Army Corps of Engineers, and the Texas Historical Commission.

We pride ourselves for being a firm locally rooted in the Rio Grande Valley and being an integral part of the communities we serve. The **RIKE** office headquartered in McAllen is central to clients from Roma to Brownsville TX. Our collective portfolio covers numerous public sector projects throughout the region, including our work with the City of Edingburg, Hidalgo County and Edinburg CISD, that demonstrate RIKE's team firsthand knowledge of the City's facilities, staff, and expectations. Below is an abbreviated list of completed and ongoing projects of our experience with governmental agencies includes several county, state, local and federal agencies.

- Cameron County Court House Addition and Renovations
- Cameron County Justice of the Peace Renovation and Expansion
- Cameron County Veterans Building and Elections Building Office Renovations
- Hidalgo County Adult Boot Camp - Edinburg
- Hidalgo County Adult Probation Facility – Edinburg
- Hidalgo County Courthouse Security System - Edinburg

RANGE OF SERVICES AND CAPABILITIES

RIKE's firm philosophy revolves around client satisfaction and meeting client expectations. Our office personnel and staff are professional and knowledgeable in providing professional architectural services. We are innovative and flexible, and we are experienced with challenging sites, budgets, programs, timelines and schedules. We design buildings that respond to your site and the surrounding community.

RIKE offers the following services and capabilities to meet your needs:

Architecture:

- Feasibility / Building Assessments
- Contractor Qualifications
- Programming
- Contract Administration
- Design Documentation
- Construction Administration
- ADA/Accessibility Services
- Building Evaluation Surveys
- Bidding Negotiation

Planning:

- Post Contract Services
- Master Planning
- Zoning
- Space Planning
- Land Use Planning

NARRATIVE

PROJECT TEAM AND PHASES

The project starts with understanding the city's needs and expectations. The project team will be extensive and include city personnel, engineers, landscape professionals and architects. Each team member will be engaged in respective phases as follows:

SPACE UTILIZATION STUDY

Our Space Utilization Study involves the layout of a series of established program elements, which may include pedestrian and vehicular circulation, parking, entries and exits, service areas and other site amenities such as environmental features. Our plans are designed to fit budgets and the physical constraints of the building and land. Our solutions are developed from both practical and aesthetic points of view.

PROGRAMMING

Programming involves a minimum of six basic steps: data collection, data analysis, data organization, and development of concepts, communication of data and concepts, and evaluation of the resulting program. RIKE will assist clients in the programming process and help them to develop project goals, values and aspirations.

SCHEMATIC DESIGN

Based on an approved Program, the Schematic Design synthesizes the program into a defined, feasible design. The design will be shown in the form of Schematic Drawings, and in some cases a study model. The Schematic Design will address all significant areas of design and will be reviewed with the client before proceeding with more detailed drawings. A preliminary cost estimate is also usually provided at this stage.

NARRATIVE

DESIGN DEVELOPMENT

Based on an approved Schematic Design, Design Development is the process of refining and fixing the design, and working out all the details, including the selection of materials and the engineering systems. The aim is to finalize all design decisions before proceeding with Construction Documents, the more detailed and expensive documents that the contractor will need to complete the project. A more detailed cost estimate may also be provided at this phase. In smaller projects, Design Development may become part of the Schematic and Construction Document phases, rather than being a distinct phase of its own. The Design Development package will be reviewed with the client before proceeding further with the project.

CONSTRUCTION DOCUMENTS

Based on approved Design Development documents, construction drawings and written specifications are put together which describe in detail all of the construction work to be performed. These are the documents upon which the construction contract will be based, and which the contractor will use to build the project. If a building permit is required, the application is usually made at the end of Construction Documentation.

BIDDING/NEGOTIATIONS

The project is put out to bid, a contractor is selected, and a construction contract is drawn up between the contractor and the client. **RIKE** will assist the client throughout this process.

CONSTRUCTION ADMINISTRATION

On-site observation and conscientious administration of paperwork throughout construction is necessary to ensure that communication flows smoothly, that high standards are maintained, and that the client is satisfied with final completed project.

STATEMENT OF AVAILABILITY

RIKE's team counts on several industry professionals that are ready to respond. Our teams remain involved from start to finish, with direct oversight from a senior principal and project manager. Additionally, we have the resources to call in other team members for assistance at any time it is deemed necessary. **RIKE** has the flexibility and resources necessary to adjust to its current workload and backlog. We anticipate we are well equipped to respond to the immediate future workloads to devote the required time to any on-call request by the City of Edinburg by closely coordinating with our in-house production directors to balance and streamline the distribution of the workloads to dedicate every client and project the time it deserves.

RIKE approaches new construction and renovation projects with a proven processes tailored to the unique requirements of each project. While both project categories follow the standard AIA phases, our strategies differ to address the specific challenges and opportunities of new builds versus renovations. Maintaining productive communication and involving consultants early to facilitate coordination are essential parts of the process regardless of project.

APPROACH TO NEW CONSTRUCTION PROJECTS

For new construction, RIKE emphasizes thorough planning, comprehensive coordination, and clear communication from concept to completion:

- Programming & Site Evaluation: We begin by meeting with the Owner to review programming needs, operational requirements, and long-term goals. Site assessments are conducted to understand utilities, topography, access, environmental considerations, and jurisdictional requirements.
- Concept Development & Master Planning: Our team develops multiple conceptual layouts and massing options, ensuring the new facility is functional, cost-efficient, and aligned with the Owner's vision.
- Full Consultant Integration: Structural, MEP, civil, and specialty consultants are involved early to produce coordinated documents that minimize change orders and cost impacts during construction.
- Cost Control Measures: We incorporate value-based design, early cost estimates, and continuous budget alignment throughout the design phases.
- Clear Documentation & Contractor Readiness: Construction documents are detailed, precise, and crafted to reduce ambiguity during bidding and construction.
- Active Construction Administration: RIKE maintains consistent oversight, responding quickly to RFIs, reviewing submittals, and participating in site visits to ensure the project is built according to design intent.

APPROACH TO SCHEDULE MANAGEMENT AND COORDINATION

RIKE places a high priority on meeting all schedules and deadlines established with our clients. We have a series of initial design meetings to understand scope and program and continue the exchange of communication throughout the design process. RIKE ensures this through collaborative schedule development, an integrated project tracking system, principal oversight, proactive communication, and an experienced staff and consultant team.

RIKE's team is well equipped with the necessary resources and experience to meet staffing and schedule requirements. Our constant communication with clients and consultants, along with recurring meetings, allows us to review progress, discuss important matters, and move forward with confidence. To ensure all teams are on the same page and able to deliver on time, early in the process a scheduling session with all major parties is held to meticulously coordinate the schedule, checkpoints and overall expectations.

APPROACH TO RENOVATION PROJECTS

Renovation projects - especially those within occupied facilities - require a more surgical, strategic, and adaptive approach. **RIKE** has extensive experience coordinating renovations for schools, municipalities, and public facilities. Our approach includes:

- Existing Conditions Assessment: We conduct detailed field verification, documentation of existing systems, and evaluation of structural, MEP, and code compliance conditions to establish a clear renovation baseline.
- Phasing & Occupied-Campus Coordination: For K–12 and municipal projects that remain operational, we develop phased construction plans that prioritize safety, continuity of operations, and minimal disruption.
- Code Compliance & Modernization: Renovations often require updates to life-safety, accessibility, energy efficiency, and technology standards. Our team ensures all improvements meet current codes and regulatory requirements.
- Targeted Design Solutions: We focus on integrating new elements seamlessly with existing structure balancing modernization with campus identity and operational functionality.
- Cost-Effective Upgrades: Renovation projects can uncover unforeseen conditions. We mitigate risk by coordinating closely with consultants and contractors to maintain cost control and schedule accuracy.
- Responsive Construction Administration: Renovations demand heightened responsiveness. Our team remains actively engaged throughout construction to handle hidden conditions, contractor questions, and schedule adjustments promptly.

QUALITY ASSURANCE AND QUALITY CONTROL

- At **RIKE** we remain closely engaged throughout the construction administration phase to ensure that the work is executed as intended and that outcomes align with owner expectations. For every project, regardless of size and scope, we show up ready and committed to perform to the best of our abilities.
- We have a set of internal office standards, QA/QC protocols that are implemented during all phases of the design process. We work with checklists, BIM technology tools, and various Project Management, scheduling and visualization tools to help us track potential issues needing resolution.
- Each member of our firm has received prior verifies credentials, ensuring compliant background checks.

APPROACH TO SUSTAINABILITY

In our portfolio of completed projects, we have experience in adaptive reuse and rehabilitation projects as well as in utilizing sustainable materials and technologies. We always encourage our clients to consider the options available by providing our own knowledge and seeking additional professional advice where needed.

EXPERIENCE WITH SUSTAINABLE DESIGN

We recently completed the rehabilitation of an existing 98,000 square foot warehouse complex for Edinburg CISD's largest and newest CTE building, re-utilizing the building structure components, thereby dramatically reducing the need for new virgin raw materials. Additionally, we specified materials low-in indoor air quality pollutants and worked with the landscape architect to specify drought tolerant landscape plants to further reduce the project's water demand when compared to the benchmark for a similar building serving a similar purpose.

At the Benedictine Monastery of the Good Shepard in the Rio Grande City we took the approach for onsite renewable energy sources, incorporating photo voltaic panels, wind turbines and alternative sources of energy for a building that is more resilient and better prepared to curtail its energy needs and lessen its dependence on traditional sources of fossil fuel energy.

Additionally, at the Monastery, we specified, Hebel block, an eco-friendly concrete alternative known for its low-embodied energy and cleaner manufacturing process that according to its environment-product declaration has less impact when it comes to its global warming potential and use of embodied energy. The facilities are supported with 2 - 10,000 gallon and 11 - 2,500 gallon water storage tanks.

For our two Tropical Texas Behavioral centers in Harlingen and Weslaco Texas we provided water collection court yards to deflect water away from the building and to collect water for irrigation and beautify landscape features.

Operations Manager

ORGANIZATIONAL DESCRIPTION

At **RIKE** our team is our most important asset. Our office is staffed with 13 full-time employees, out of which four are Registered Architects in the State of Texas. Our team includes the following:

- Senior Principals: Luis A. Figueroa, Andres Palma, Jose C. Garcia III, David I. Iglesias
- Associate Principals: Servando N. Miranda, Nestor E. Camacho
- Project Team: Fernando Perez, David A. Mejia, Carlos Angulo, Nayeli Moreno, Emily Cavazos, Gabriela Gonzalez
- Administration: Grecia Bosada

The combined experience of our four registered architects will be supported by a team of experienced professionals, each qualified and capable of fulfilling the requirements of the project at any time it is deemed necessary. The roles of our staff are as follows:

PROJECT LEADERSHIP

- Luis A. Figueroa will serve as the Principal-in-Charge and will oversee the entire design process. He will be the point of contact for any major items that may come up during the process of the contract.
- David I. Iglesias and/or Jose C. Garcia III will serve as Senior Project Manager and your everyday point of contact.

PROJECT MANAGEMENT

- Servando Miranda and Nestor E. Camacho will serve as the production leads as well as production and construction project administrators. They will work directly with the production team to complete project deliverables.

PROJECT TEAM

- Fernando Perez will serve as Production Manager and will directly oversee the in-house production team through the Construction Document phase
- David Mejia, Carlos Angulo, Nayeli Moreno, Emily Cavazos, and Gabriela Gonzalez operate as the in-house production team responsible for producing construction documents and providing coordinated assistance as required for each project.

ADMINISTRATION

- Grecia Bosada is the Operations Manager and oversees all office operations, including administrative management, AR/AP, bookkeeping, and general accounting support.

LUIS A. FIGUEROA, AIA

SENIOR PRINCIPAL

Mr. Figueroa, brings extensive expertise in the management of public and private sector projects, with a proven record of delivering successful outcomes. He provides overall project leadership, ensuring that each phase from initial client programming to final closeout is executed with precision and efficiency. His hands-on approach guarantees consistent communication, alignment with client goals, and adherence to project requirements throughout the entire process.

EXPERIENCE WITH THE CITY OF EDINBURG

- Edingburg, Texas, Hidalgo County Adult Probation Facility
- Edingburg, Texas, Hidalgo County Offices
- Edinburg, Texas, Hidalgo County Emergency Management Center Annex IV

OTHER NOTABLE EXPERIENCE:

- Brownsville, Community Center
- City of McAllen, McAllen City Hall
- City of McAllen, McAllen Public Safety Facility
- Del Rio, Texas, Public Safety Facility
- Edinburg ISD, Barrientes Middle School Renovations
- Edinburg CISD, Edingburg CTE Kolder Building
- Hidalgo County, Adult Boot Camp, Adult Probation Department
- Hidalgo County Parks Precinct 3, Veterans' Memorial Pavillion and Smokehouse
- Laredo, Community Center
- Lasara ISD, New Lasara Elementary and Upper Level School
- Progreso, Community Center
- Weslaco, TX, Texas National Guard Armory & Organizational Maintenance Shop

EDUCATION

DAVID I. IGLESIAS, AA

SENIOR PRINCIPAL

David Iglesias is an accomplished architectural leader with more than 21 years of experience delivering municipal, educational, athletic, and public-sector facilities across South Texas and the Rio Grande Valley. As a Senior Principal he leads planning, design, and construction administration for complex new builds and major renovations. David strengths include client communication, team coordination, owner collaboration, and delivering projects from concept through completion.

EXPERIENCE WITH THE CITY OF EDINBURG:

- City of Edinburg, Police Training Facility
- City of Edinburg, New Wastewater Treatment Plant Office Building
- City of Edinburg, Central Fire Station Renovation

NOTABLE EXPERIENCE:

- City of McAllen, McAllen Performing Arts Center
- City of Progreso, New Police Station
- City of Progreso, New Fire Station
- City of San Juan, Public Safety Building
- City of San Juan, New Public Safety Building
- Elgin ISD, Indoor Practice Facility
- Fort Bend County, Fort Bend Epicenter
- Hidalgo County, Hidalgo County Courthouse
- Hidalgo County, Precinct 4 – Eastside Soccer Park
- Hidalgo County, Precinct 1 – Sunrise Park Additions & Renovations
- Hidalgo County, Precinct 2 – Maintenance Building
- San Benito CISD, Multi-Purpose Facility
- University of Texas Rio Grande Valley, Fieldhouse Complex
- University of Texas Rio Grande Valley, HEB Park Stadium
- University of Texas Rio Grande Valley, Intercollegiate Athletics Expansion

EDUCATION

- Bachelor of Science in Architecture The University of Texas at San Antonio

YEARS OF EXPERIENCE

- 5 Years with SLAY Architecture
- 5 Years with ERO
- 11 Years with PBK

JOSE CARLOS "CHARLIE" GARCIA III, RA, AIA

SENIOR PRINCIPAL

Charlie has a record of community service that includes serving as a Trustee for Mission Consolidated Independent School District. Elected in 2016 and served thru 2020. Charlie's experience as a community leader provides for a unique perspective in all levels of Local Government Architecture + Design. Charlie's professional experience as an Architect allows for a diverse approach to projects that sets RIKE apart for A/E services.

NOTABLE EXPERIENCE:

- City of Alamo, Alaniz Park Improvements
- City of Alamo, Fire Station No 1 Renovation
- City of Alamo, Police Station
- City of Donna, City Hall Renovations and Additions
- City of Elsa, Pacific Trails Park
- City of Mission, Mission Lions Park
- City of Palmview - Fire Station and EOC

SERVANDO N. MIRANDA, AIA, NCARB, LEED AP® ND, WELL™ AP, SITES® AP, CSI, CDT®

ASSOCIATE PRINCIPAL

Servando has worked across several building types on projects with existing conditions, tight budgets, and often very aggressive schedules using Building Information Modeling (BIM) technologies. Servando oversees the process of design documents and coordinates RIKE's team of consultants and engineers during all phases. Mr. Miranda places major importance on being detail-oriented in his work and aims for a balanced approach that incorporates technical rigor, functionality, and aesthetics.

NOTABLE EXPERIENCE:

- Hidalgo County Parks Precinct 3, Veterans' Memorial Pavillion and Smokehouse
- Donna ISD, Classroom Wing Additions at Three Elementary Schools Singleterry, Garza, Salazar
- Donna ISD, New Welding and Manufacturing Technology CTE Building for Donna North High School
- Kewa Pueblo, NM, Wadi Multi-Family Housing Development
- La Joya ISD, La Joya ISD Storm Damage Re-Roofing and Interior Build-Back Scope at Multiple Campuses.
- La Joya ISD, Lorenzo de Zavala Middle School – Re-Roofing, HVAC and Interior Build-Back
- La Joya ISD, Irene Garcia Middle School – Re-Roofing, HVAC and Interior Build-Back

ACORD 25 (2016/03) **The ACORD name and logo are registered marks of ACORD**

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

Rike Figueroa Palma Garcia Iglesias A/E, LLC (dba RIKE)

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☑ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☑ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

Form provided by Texas Ethics Commission www.ethics.state.tx.us Revised 8/14/2024

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

LETTER

SAM GARCIA ARCHITECT
EST. 2013

July 6, 2026

THE CITY OF EDINBURG
Mr. Mardoqueo Hinojosa, Engineering Director

RE: RFQ No. 2026-5 – Architectural Services

Dear Mr. Mardoqueo Hinojosa:

Sam Garcia Architect, LLC (SGA) is pleased to submit our qualifications in response to RFQ No. 2026-5 for Architectural Services for the City of Edinburg. Since our establishment in 2013, SGA has provided comprehensive architectural, planning, and construction administration services throughout South Texas for municipal, governmental, educational, healthcare, commercial, and public-sector clients. As a McAllen-based firm, we understand the unique needs, priorities, and growth of the Rio Grande Valley and are committed to providing responsive, high-quality professional services to the City of Edinburg.

SGA recognizes that the City requires an architectural partner capable of providing timely, cost-effective, and technically sound design services for a variety of municipal projects. Our team has extensive experience delivering projects from initial planning and programming through design, permitting, bidding, construction administration, and project closeout while maintaining close coordination with owners, consultants, contractors, and regulatory agencies.

Our experience includes numerous public-sector projects requiring careful planning, phased implementation, and coordination with multiple stakeholders. Notably, SGA provided architectural services for the Hidalgo County Adult Detention Center and Law Enforcement Building Re-Roofing Project in Edinburg, Texas, involving more than 200,000 square feet of occupied facilities. This project required detailed investigation, construction phasing, coordination with County personnel, and continuous operations throughout construction. Our familiarity with local permitting processes, codes, and project coordination within the City of Edinburg positions us to efficiently support future City projects.

In addition to municipal work, SGA has successfully completed projects for local governments, educational institutions, and public agencies throughout South Texas, including the Texas Department of Public Safety License Mega Center, Camp Rio Master Plan for IDEA Public Schools, Rising Scholars Academy for South Texas ISD, South Texas College campus renovations, Mission CISD District-Wide Security and Infrastructure Improvements, Weslaco ISD Security Vestibule Improvements, and numerous commercial and community facilities throughout the Rio Grande Valley.

SGA is also currently providing professional architectural services for the Anzalduas International

1200 Auburn Ave., Suite 280 | McAllen, Texas 78501 | O (956) 631-8327 | info@samgarciaarchitect.com | www.samgarciaarchitect.com

SAM GARCIA ARCHITECT

EST. 2013

Land Port of Entry Expansion in Mission, Texas, and the Donna-Rio Bravo International Land Port of Entry Commercial Inspection Improvements in Donna, Texas. These complex governmental projects demonstrate our ability to successfully coordinate multidisciplinary consultant teams, navigate regulatory requirements, manage project schedules and budgets, and deliver quality solutions for public-sector clients.

Our multidisciplinary consultant team includes experienced civil, structural, mechanical, electrical, plumbing, landscape architecture, fire protection, surveying, and technology professionals, allowing us to provide comprehensive architectural and engineering services for projects of varying size and complexity. Principal Architect Sam R. Garcia, AIA, will remain actively involved throughout each assignment, ensuring responsive communication, sound technical oversight, and timely decision-making.

SGA has built its reputation on providing personalized service, practical design solutions, and a commitment to meeting our clients' schedules and budgets. We understand that on-call architectural services require flexibility, responsiveness, and the ability to quickly mobilize resources for projects ranging from minor renovations to major capital improvements. Our organizational structure, experienced staff, and established consultant relationships allow us to efficiently respond to the City's needs while maintaining the highest standards of professional service.

We appreciate the opportunity to submit our qualifications for consideration and look forward to the opportunity to continue serving public agencies throughout the Rio Grande Valley. SGA would be honored to partner with the City of Edinburg and provide the professional architectural services necessary to support the City's continued growth and development.

Thank you for your consideration.

FIRM PROFILE

Sam Garcia Architect, LLC (SGA), based in McAllen, Texas, is a dedicated and experienced architectural firm offering a wide range of professional services tailored to meet the diverse needs of our clients. Our firm specialized in the design and development of commercial, medical, and public sector projects, with a focus on delivering innovative, functional, and sustainable solutions. We take pride in creating thoughtful, responsive environments that enhance the built landscape and provide lasting value to our clients and their communities.

APPROACH

At SGA, we believe that successful projects are built on strong relationships. We are a client-centered firm, committed to understanding and meeting the unique needs and aspirations of each client. Our collaborative approach ensures that every stakeholder's voice is heard, fostering a design process that is not only efficient but also highly responsive to client feedback. From conceptual design to project completion, our focus remains on providing exceptional service, aligning our architectural vision with our client's goals.

IMPLEMENTATION:

Communication is the key to our success at SGA. We pride ourselves on being great communicators, ensuring clarity, transparency, and a shared vision throughout every phase of the project. Our team of skilled professionals remains engaged, accessible, and proactive, guiding clients through the complexities of the architectural process while delivering results that exceed expectations. At SGA, we are more than architects – we are partners in creating space that inspire and transform.

CLAIMS HISTORY UNDER PROFESSIONAL MALPRACTICE INSURANCE:

ARCHITECT | PRINCIPAL IN CHARGE

Bachelor of Architecture, The University of Texas at Austin
School of Architecture (2004)
Registered Architect, State of Texas no. 2133 (2009)

ABILITY TO COMMENCE SERVICES:

Sam Garcia Architect, LLC can begin work immediately.

TECHNOLOGICAL CAPABILITIES:

At SGA we utilize the latest industry leading 3D modeling design tools (Autodesk Revit, Sketchup, AutoCAD). Real time coordination is achieved through cloud collaboration services (Autodesk BIM360) allowing us to cross examine consultants' design model and generate accurate drawings avoiding construction delays.

Realistic renderings are created using a combination of our 3D modeling tools and exported through ENSCAPE, Architectural Visualization. For digital presentations we use several Adobe Acrobat tools (InDesign, Photoshop).

Consultant/client coordination is achieved through virtual meetings such as Google Meets, Zoom, Microsoft Teams to name a few. Our staff is trained in hosting and presenting and/or coordinating design aspects over the Web.

AVAILABILITY / COMMITMENT:

SGA is fully committed to providing professional services. Sam R. Garcia, RA, AIA, Principal, along with Project Manager, Jose L. Rios Jr, RA, AIA, and Sergio Castillo, Associate Architect, are fully committed from the beginning of the project until completion. Zuri Rivera, BA, assists the project managers with Interior Design Concepts.

ZURI RIVERA
NCIDQ, RID, ASID

PROFESSIONAL SUMMARY

Registered Interior Designer with experience leading interior planning and finish-out for educational, healthcare, municipal, and commercial facilities across South Texas. Specializes in renovation and occupied-facility projects requiring phased construction, code compliance, and stakeholder coordination. Provides rapid support for on-call assignments from programming through construction administration.

ROLE
LEAD DESIGNER / INTERIOR PLANNING

- Interior space planning and programming
- Finish-out design and material selection
- ADA, accessibility, and life-safety compliance coordination
- Furniture, fixtures, and equipment (FF&E) planning
- Construction documentation and detailing
- Stakeholder workshops and user coordination
- Submittal review and construction administration support

FIRM EXPERIENCE
SAM GARCIA ARCHITECT

- Lead interior design for educational, healthcare, and commercial renovations
- Coordinate directly with architects, engineers, and campus stakeholders
- Develop construction documents, finish schedules, and specifications
- Support fast-track and occupied-facility projects with phased implementation
- Maintain design continuity from concept through construction
- Submittal review and construction administration support

REPRESENTATIVE PROJECT EXPERIENCE

- South Texas College - Building G Engineering Labs Renovation
- South Texas College - Building K Cashiers Renovation

EXPERIENCE WORKING WITH GOVERNMENT AGENCIES

SGA has worked with numerous governmental agencies over the years while designing projects. We are knowledgeable of required codes and are accustomed to working with municipalities and counties on behalf of our clients. We have also had to liaise with federal and state agencies on behalf of our clients and have become quite knowledgeable of the process and what is expected of a design team.

a.	***(1) TITLE AND LOCATION (City and State)*** **ANZALDUAS INTERNATIONAL LAND PORT OF ENTRY-COMMERCIALINSPECTION IMPROVEMENTS (MISSION, TEXAS)**	PROFESSIONAL SERVICES 2020	CONSTRUCTION *(If applicable)* ONGOING
	(2) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE ARCHITECT: US Customs and Border Protection is expanding the existing Port of Entry to accommodate commercial (18-wheeler) traffic. Designed over 20,000 sq. ft. of new facilities including Inspection Dock, Administrative Facilities, Inspection Booths, and other support spaces. Project seeks LEED Certification and will be approximately $85 M Construction Project.		
b.	***(1) TITLE AND LOCATION (City and State)*** **DONNA-RIO BRAVO INTERNATIONAL LAND PORT OF ENTRY-COMMERCIAL INSPECTION IMPROVEMENTS (DONNA, TEXAS)**	PROFESSIONAL SERVICES 2019	CONSTRUCTION *(If applicable)* PENDING
	(2) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE **ARCHITECT:** US Customs and Border Protection is expanding the existing Port of Entry to accommodate commercial (18-wheeler) traffic. Designed over 15,000 sq. ft. of new facilities, includes Administrative Facilities, Loading Dock, Covered Canapes, and Inspection Booths. Construction expected to be approximately $34 M.		
c.	***(1) TITLE AND LOCATION (City and State)*** **IDEA PUBLIC SCHOOLS CAMP RIO PHASE I (BROWNSVILLE, TEXAS)**	PROFESSIONAL SERVICES 2019	CONSTRUCTION *(If applicable)* 2019
	(2) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE **ARCHITECT:** SGA provided all architectural design work from the master planning phase through construction administration. A multi-faceted educational facility was designed on an 85-acre, ecologically sensitive piece of land. This project included a classroom building, large outdoor sports pavilion, maintenance building and cabins.		
d.	***(1) TITLE AND LOCATION (City and State)*** **LA FERIA PUBLIC WORKS ADMINISTRATIVE OFFICE (LA FERIA, TEXAS)**	PROFESSIONAL SERVICES 2023	CONSTRUCTION *(If applicable)* ONGOING
	(3) BRIEF DESCRIPTION *(Brief scope, size, cost, etc.)* AND SPECIFIC ROLE **ARCHITECT:** Design for major renovations at an existing public works warehouse. Designed 4,200 SF offices for the City Public Works Department. Includes offices, employee breakroom, restrooms, and storage.		
e.	***(1) TITLE AND LOCATION (City and State)*** **LA JOYA FIRE STATION (LA JOYA, TEXAS)**	PROFESSIONAL SERVICES 2023	CONSTRUCTION *(If applicable)* ONGOING
	(2) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE **ARCHITECT:** The 7,041 square foot building consist of an apparatus bay for a total of 4 EMS & fire engine trucks, bunker gear room, chief's office & quarters, sleeping quarters, full-kitchen and dining area, day room, laundry room, men & women's restroom and showers for each, room to host special trainings and more.		

E.K. ATWOOD PARK IMPROVEMENTS ("BEACH ACCESS #5")

LOCATION: South Padre Island, Texas
DURATION: Current

SGA is currently providing full architectural and engineering services for the E.K. Atwood Park Improvements Project, focused on enhancing public access and amenities within a coastal park environment. The project includes a new restroom facility, changing stations, parking lot improvements, rinse stations, toll booth enhancements, and upgraded picnic and pavilion areas. Design solutions emphasize coastal resilience, durability, and ADA accessibility, utilizing materials and systems suited for saltwater exposure and high-wind conditions. This project highlights SGA's ability to deliver sustainable, user-focused park improvements while coordinating within environmentally sensitive coastal settings.

PROFESSIONAL WORK DISCIPLINE

Sam Garcia Architect, LLC (SGA) is submitting its qualifications as the Prime Architectural Consultant to provide comprehensive architectural services for the City of Edinburg under RFQ No. 2026-5.

SGA offers complete architectural services for municipal, governmental, educational, healthcare, commercial, and community projects, including planning, programming, feasibility studies, facility assessments, architectural design, construction documents, bidding assistance, construction administration, and project closeout. Our experienced consultant team provides fully integrated engineering and specialty services, including:

- Civil Engineering
- Structural Engineering
- Mechanical, Electrical, and Plumbing (MEP) Engineering
- Landscape Architecture
- Surveying
- Fire Protection Engineering
- Technology and Low Voltage Systems
- Environmental and Specialty Consulting Services

Our multidisciplinary team is organized to efficiently respond to a wide range of municipal projects while maintaining consistent communication, quality control, and responsive client service.

GENERAL STATEMENT OF FIRM QUALIFICATIONS

Sam Garcia Architect, LLC (SGA) is a full-service architectural firm headquartered in McAllen, Texas, providing professional architectural, planning, interior design, and construction administration services throughout South Texas since 2013. The firm has established a reputation for delivering practical, innovative, and cost-effective design solutions for public agencies, municipalities, educational institutions, healthcare providers, and private-sector clients.

SGA provides a comprehensive range of professional services, including:

- Architectural Design
- Master Planning and Programming
- Facility Assessments
- Feasibility Studies
- Interior Design
- Construction Documents and Specifications
- Construction Administration
- ADA Accessibility Compliance
- Building Code Analysis
- Cost Estimating and Value Engineering

Our principal office in McAllen, Texas, will serve as the primary location for project management, consultant coordination, quality assurance, and production services for the City of Edinburg.

SGA maintains an experienced staff of licensed architects, project managers, interior designers, architectural designers, and construction administration personnel supported by a long-standing team of licensed engineering consultants registered in the State of Texas.

Professional licenses, registrations, and certifications for SGA and its consultants are included within this Statement of Qualifications.

LOCATION OF OFFICE PERFORMING THE WORK

All services will be performed from SGA's principal office located in McAllen, Texas.

As a Rio Grande Valley firm, SGA is uniquely positioned to provide the City of Edinburg with immediate responsiveness, frequent site visits, timely meetings, and direct coordination

throughout every phase of a project. Our close proximity allows our team to quickly respond to project needs while maintaining active communication with City staff and stakeholders.

AWARDS, ACCOMPLISHMENTS, AND RELEVANT EXPERIENCE

Since 2013, SGA has successfully completed numerous governmental, educational, healthcare, commercial, and community projects throughout South Texas. Our experience demonstrates the firm's ability to manage projects of varying size and complexity while maintaining schedule, budget, and quality objectives.

Representative projects include:

- **Hidalgo County Adult Detention Center and Law Enforcement Building Re-Roofing – Edinburg, Texas**

Architectural services for the replacement of roofing systems on more than 200,000 square feet of occupied County facilities requiring phased construction and continuous operations.

- **Anzalduas International Land Port of Entry Expansion – Mission, Texas**
  Comprehensive architectural services for a complex governmental infrastructure project requiring multidisciplinary coordination and regulatory compliance.

- **Donna-Rio Bravo International Land Port of Entry Commercial Inspection Improvements – Donna, Texas**
  Architectural services involving coordination among multiple governmental agencies, engineering disciplines, and regulatory authorities.

- **Mission CISD District-Wide Security and Infrastructure Improvements**
  District-wide improvements requiring careful planning, phased implementation, and coordination across multiple campuses.

- ***South Texas College Campus Renovations***
  Multiple renovation projects including engineering laboratories, instructional spaces, and administrative facilities.

Throughout these projects, SGA has consistently demonstrated:

- Effective project management
- Successful consultant coordination
- Strong communication with public agencies
- Quality construction documentation
- Budget-conscious design solutions
- Comprehensive construction administration

FIRM CAPABILITY TO PROVIDE ARCHITECTURAL SERVICES

SGA possesses the experience, staffing resources, and technical expertise necessary to provide comprehensive architectural services for the City of Edinburg.

Our firm understands that municipal projects vary significantly in scope and complexity, requiring an architectural partner capable of responding quickly while maintaining consistent quality and professional service. Whether assigned facility renovations, departmental improvements, new municipal facilities, space planning, feasibility studies, or capital improvement projects, SGA provides responsive project management supported by experienced technical staff and consultants.

Our design philosophy emphasizes:

- Functional and efficient facilities
- Practical and sustainable design solutions
- Code compliance and ADA accessibility
- Energy-efficient building systems
- Cost-effective construction solutions

- Long-term operational value
- Collaborative decision-making

Using Building Information Modeling (BIM) and advanced coordination technologies, SGA improves design accuracy, minimizes conflicts during construction, and enhances communication among all project participants.

Most importantly, SGA approaches every assignment as a long-term partnership. We understand that successful on-call architectural services require responsiveness, accountability, flexibility, and consistent communication. Our team is committed to providing the City of Edinburg with dependable professional services that support the City's continued growth, infrastructure improvements, and long-term capital investment goals.

APPROACH TO ACCOMPLISHING THE SCOPE OF WORK

Sam Garcia Architect, LLC (SGA) is committed to providing the City of Edinburg with responsive, professional, and cost-effective architectural services that support the City's ongoing capital improvement program and operational needs. Our approach is founded on collaboration, technical excellence, proactive communication, and disciplined project management to ensure every assignment is delivered efficiently and in accordance with the City's objectives.

SGA understands that the City requires an architectural partner capable of responding quickly to a diverse range of projects, including new construction, facility renovations, building assessments, space planning, feasibility studies, and other architectural services as needed. Regardless of project size or complexity, our team applies the same level of attention, quality control, and client service to every assignment.

Each project begins with a thorough evaluation of the City's goals, operational requirements, budget, schedule, and existing conditions. Working closely with City staff, SGA develops practical design solutions that maximize functionality, sustainability, long-term value, and ease of maintenance while maintaining compliance with all applicable codes and regulatory requirements.

Throughout every phase of the project, SGA emphasizes continuous communication, disciplined coordination among all consultants, proactive schedule management, and ongoing cost monitoring to ensure projects are completed on time, within budget, and in accordance with the City's expectations.

PROJECT MANAGEMENT PLAN, INTERPRETATION OF SCOPE, AND METHOD OF APPROACH

Interpretation of Scope:
SGA understands the City of Edinburg is seeking a qualified architectural firm to provide continuing architectural services for municipal projects of varying size and complexity. Assignments may include facility assessments, renovations, expansions, new construction, programming, planning studies, ADA improvements, construction administration, and other professional services necessary to support the City's facilities and infrastructure.

Our team is prepared to provide complete architectural and engineering services from project initiation through construction completion while maintaining flexibility to accommodate multiple assignments under the City's delivery schedule

Proposed Services:
SGA will provide comprehensive architectural services including:

- Programming and facility assessments
- Master planning and feasibility studies
- Architectural design
- Construction documents and specifications
- Building code and ADA compliance review
- Cost estimating and value engineering
- Permitting and regulatory coordination
- Bid and procurement assistance
- Construction administration
- Project closeout and warranty support

Project Management Plan:
SGA's project management process is structured to provide accountability, responsiveness, and consistent communication throughout every assignment.

Our approach includes:
- A dedicated Project Manager serving as the City's primary point of contact.
- Direct involvement by Principal Architect Sam R. Garcia throughout each project.
- Clearly defined project schedules and milestone reviews.
- Regular coordination meetings with City staff and consultants.
- Continuous monitoring of project budgets and schedules.
- Internal quality assurance reviews before each project deliverable.
- Prompt response to City requests, questions, and unforeseen project issues.

This management structure allows SGA to efficiently manage multiple projects simultaneously while maintaining the personalized service expected from a local architectural firm.

Method of Approach:
SGA approaches every municipal project through a systematic process that emphasizes collaboration, technical accuracy, and practical design solutions.

Our methodology includes:

- Listening to the City's needs and establishing clear project objectives.
- Evaluating existing facilities and site conditions.
- Developing functional and cost-effective design alternatives.
- Coordinating all architectural and engineering disciplines through Building Information Modeling (BIM).
- Incorporating sustainable, durable, and maintainable building systems.
- Performing quality control reviews throughout the design process.
- Providing responsive construction administration to protect the City's interests during construction.

This proven approach minimizes project risks, improves coordination, reduces construction conflicts, and provides the City with well-designed facilities that deliver long-term value.

PERSONNEL, CONSULTANTS, AND RESOURCES

SGA will assign a highly experienced, multidisciplinary team with a proven track record in delivering public and recreational facilities. Our team is structured to provide both design excellence and execution reliability.

Core Team:

- Sam R. Garcia, RA, AIA - Principal-in-Charge – Executive oversight and quality assurance
- Sergio Castillo - Project Manager – Responsible for schedule, budget, and client coordination
- Jose Luis Rios, RA, AIA - Project Architect – Leads design development and technical documentation
- Zuri Rivera, NCIDQ, RID, ASID - Interior Designer – Enhances functionality, durability, and user experience

Consultant Team:

- Rioplex Engineering - Civil Engineering – Site planning, drainage, and infrastructure
- Green Rubiano & Associates - Structural Engineering – Long-span gymnasium systems and structural integrity
- ETHOS Engineering - MEP Engineering – High-efficiency building systems
- Heffner Design Team - Landscape Architecture – Site aesthetics and usability
- Technology/Low Voltage – Security, communications, and access control

Our consultant team has successfully collaborated with SGA on numerous governmental, educational, healthcare, and municipal projects throughout South Texas, allowing us to efficiently deliver coordinated architectural and engineering services.

SGA utilizes Building Information Modeling (BIM), digital project coordination, and established quality management procedures to improve communication, reduce design conflicts, and ensure accurate construction documentation.

INNOVATIVE CONCEPTS AND COST CONTAINMENT STRATEGIES

SGA believes successful municipal projects balance functionality, durability, sustainability, and fiscal responsibility.

Our approach includes:

- Early budget verification throughout design. Value engineering that preserves project quality while controlling costs.
- Durable, low-maintenance materials that reduce lifecycle expenses.
- Energy-efficient building systems that lower long-term operating costs.
- Flexible design solutions that accommodate future growth and changing operational needs.
- Comprehensive coordination among consultants to reduce construction change orders.

Our objective is to maximize the City's investment while providing facilities that remain functional, maintainable, and efficient for decades.

EXPERIENCE WITH SIMILAR PROJECTS

SGA has successfully completed projects for municipalities, counties, educational institutions, healthcare organizations, and governmental

agencies throughout South Texas.

Representative projects include:

- Hidalgo County Adult Detention Center & Law Enforcement Building Re-Roofing – Edinburg
- Anzalduas International Land Port of Entry Expansion
- Donna-Rio Bravo International Land Port of Entry Commercial Inspection Improvements South Texas College Campus Renovations
- Mission CISD District-Wide Security Improvements
- Weslaco ISD Security Vestibule Improvements
- Texas Department of Public Safety License Mega Center
- Camp Rio Master Plan
- Cavazos Sports Institute

These projects demonstrate SGA's ability to successfully manage public projects requiring multidisciplinary coordination, budget management, phased construction, regulatory compliance, and responsive client service.

PROJECT UNDERSTANDING

SGA understands that the City of Edinburg requires a dependable architectural partner capable of providing timely, high-quality professional services across a broad range of municipal projects. Success under this contract depends upon responsiveness, technical expertise, effective communication, and the ability to deliver projects that meet operational needs while respecting public budgets and schedules.

Our team recognizes that every assignment presents unique challenges requiring thoughtful planning, collaboration with City staff, and practical design solutions. Whether providing renovations to existing facilities, evaluating City-owned buildings, developing new municipal facilities, or supporting future capital improvement projects, SGA is committed to delivering architectural services that are innovative, sustainable, functional, and responsive to the City's goals.

By combining experienced leadership, comprehensive consultant resources, disciplined project management, and a commitment to exceptional client service, SGA is prepared to serve as a trusted architectural partner for the City of Edinburg throughout the duration of this contract.

PRELIMINARY PROJECT SCHEDULE

SGA proposes the following realistic and efficient project timeline, based on similar facility types and delivery methods:

Phase	Duration	Key Activities
Programming & Needs Assessment	3-4 weeks	Stakeholder meetings, space requirements, budget alignment
Schematic Design	5-6 weeks	Concept layouts, court configurations, preliminary cost estimates
Design Development	6-8 weeks	Refined plans, systems coordination, updated cost estimates
Construction Documents	8-10 weeks	Detailed drawings, specifications, permitting coordination
Bidding & Procurement	4-6 weeks	Contractor selection, bid review, contract award
Construction	10-14 months	Facility Construction, inspections, and progress monitoring

Closeout & Occupancy	3-4 weeks	Final inspections, punch list, turn-over

Total Estimated Project Duration: Approximately **16–20 months**

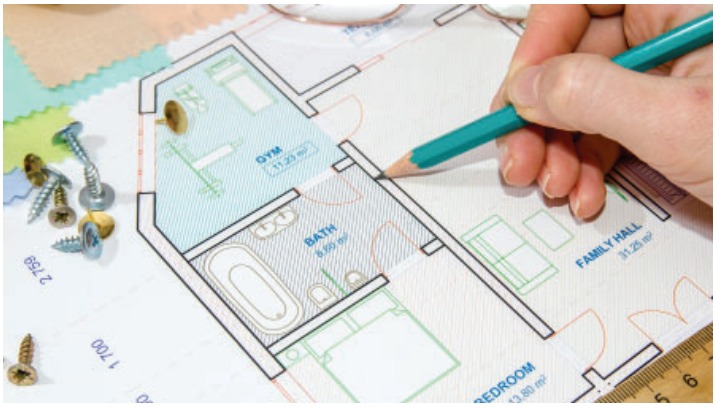
This schedule reflects SGA's commitment to **efficient delivery without compromising quality**, with flexibility to adjust based on City priorities, funding, or phasing considerations.

SGA will actively manage the schedule through:
- Clearly defined milestones and deliverables
- Regular progress tracking and reporting
- Early identification of potential delays and proactive mitigation
- Close coordination with consultants, contractors, and City staff

EVIDENCE OF EXPERIENCE WITH SIMILAR FACILITY TYPES

SGA brings proven experience in designing multi-use, high-occupancy, and community-centered facilities that align closely with the City of Edinburg's project goals.

Cavazos Sports Institute – McAllen, Texas
A specialized athletic performance and training facility designed for flexibility, durability, and high-frequency use. The project required careful coordination of open-span space planning, sport-specific functionality, and efficient circulation



Camp Rio – IDEA Public Schools
A large-scale recreational and educational campus designed to support diverse programming, large user groups, and community engagement. The project emphasized adaptability, outdoor/indoor integration, and long-term usability.

Rising Scholars Academy – South Texas ISD
A 140,000 SF facility incorporating multi-purpose spaces designed to serve both institutional and community functions. The project demonstrates SGA's ability to deliver complex, large-scale facilities with flexible programming requirements.

RELEVANCE TO THIS PROJECT

Across these projects, SGA has consistently demonstrated:
- Expertise in large-span and multi-use facility design
- Ability to create flexible environments that support diverse programming
- Strong track record of budget and schedule control
- Integration of durable, low-maintenance materials
- Delivery of facilities that serve as long-term community assets

SGA's deep understanding of the project, combined with our proven experience and disciplined project delivery approach, positions our team to successfully deliver a high-performing, cost-effective, and community-focused facility for the City of Edinburg.

Governor's Commission for Disaster Recovery and Renewal - Hurricane Preparedness 2008
City of Harlingen Valley International Airport Board Member
2016 – 2022
Chairman
03/2020 – 03/2021

Professional Resume

Rolando R. Rubiano, P.E.

Rolando has 33 years of experience in engineering design, contract administration, structural and forensic evaluation, and engineering consulting. A 1993 graduate of the University of Texas at Austin with a Bachelor of Science in Civil Engineering, Rolando began his career in 1993 with Celanese Chemicals before joining Green & Associates in 1999. He became the principal and owner of Green, Rubiano & Associates (GRA) in 2000. As a Senior Partner of the firm, Rolando provides design, facility evaluation, and project management expertise for GRA projects. Committed to both his profession and his community, Rolando has served on many state and local technical and civic boards. He was appointed by Governor Greg Abbott to serve on the Texas Board of Professional Engineers and Land Surveyors from 2018 to 2023 and served on the State of Texas Industrialized Building Code Council from 2008 to 2019. In addition, he served on the Governor's Commission for Disaster Recovery and Renewal – Hurricane Preparedness in 2008. While appointed to the TDI Forensic Working Group, he assisted with the development of guidelines and procedures in the Texas Department of Insurance (TDI) Qualified Inspector Program. Rolando was recently appointed to the Board of Directors for the Texas Windstorm Insurance Association (TWIA). Rolando is a registered TDI Appointed Qualified Inspector and has received multiple recognitions including the UTRGV Outstanding Engineer Award and the TSPE/ASCE RGV Professional Advancement Award in Engineering.

Projects of Interest Include:

- **Port Aransas Recreation Center**
  This $24 million, 35,000 sq. ft. facility currently under construction includes an elevated 2nd floor running track above the central basketball courts, yoga and dance studios, weight rooms and spaces for community gatherings,

- **Harlingen CISD Aquatics Center**
  Harlingen CISD's $8 million aquatics center is a 40,000 sq. ft. natatorium which includes a lap pool, diving pool, and therapeutic pool.

- **Harlingen HEB Tennis Center**
  Harlingen's HEB Tennis Center includes a 2,000 sq. ft. tennis center housing a pro shop, concessions and restrooms and a 1,500 sq. ft. outdoor patio area.

Professional Resume

Heriberto Cavazos, P.E.

Heriberto has over 20 years of experience in civil and structural engineering design. Heriberto is a 2003 graduate of the University of Texas at Austin with a Bachelor of Science in Architectural Engineering and a 2005 graduate of the University of Washington with a Master of Science in Structural Engineering. Heriberto began his career with Wiss, Janey, Elstner, Inc (WJE) in 2006 before joining Green, Rubiano & Associates (GRA) in 2008 and eventually became a partner with the firm in 2018. In addition to designing new construction, Heriberto has extensive experience in forensic evaluation and repair design. He has investigated construction and design defects, materials problems, and structural deterioration with experience in the evaluation and repair design of concrete, steel, masonry, and wood framed structures. Heriberto is familiar with exterior envelope evaluations and repair for a variety of exterior wall cladding and roofing systems. Additionally, he is knowledgeable in a variety of professional services including historic preservation, design peer review, non-destructive testing, and water penetration testing. Heriberto is a registered TDI Windstorm Appointed Qualified Inspector well versed with coastal wind design criteria and building requirements.

Projects of Interest:

- **Brownsville Sports Park Community Safe Room**
  This $5.3 million, 23,400 sq. ft. dual-purpose facility serves as a City of Brownsville Parks and Recreation community gymnasium equipped with a regulation basketball court, retractable bleachers, showers and restroom facilities while intended to provide a facility that can shelter over 800 individuals during a hurricane or tornado storm event.

- **Roma ISD Multi-Purpose Gymnatorium**
  Currently in construction, this $24.5 million, 60,000 sq. ft. new facility includes a multi-purpose gymnatorium and adjacent classroom wing. The gymnatorium can serve as a competition gymnasium or a state-of-the-art 3,000-seat performance center with a main stage and auxiliary spaces including dressing rooms and a separate black box theater.

- **Corpus Christi ISD Mary Carrol High School**
  Mary Carroll High School is a $145 million, 418,000-square-foot campus located in Corpus Christi. The new high school campus includes multiple academic and athletic facilities, including a 3,000-seat gymnatorium, administrative offices, fine arts facilities, a media center/library, ROTC facilities, Career and Technical Education (CTE) spaces, an auxiliary gymnasium, locker rooms, and outdoor athletic complexes featuring baseball and softball fields, tennis courts, practice fields, and a synthetic turf football stadium. The gymnatorium can serve as a competition gymnasium or a state-of-the-art 3,000-seat performance center with a main stage and auxiliary spaces including dressing rooms and a separate black box theater.

E: rajesh@ethoseng.net

PRINCIPAL + QC/QA + SUSTAINABILITY DIRECTOR + BCxP

Highlights of Qualifications

Rajesh has over 30 years of experience managing complex and diverse MEP projects. As a Principal at Ethos, he is responsible for system concepts and quality control for all projects. His main focus is energy efficiency and sustainability design.

With a graduate degree in thermodynamics and thermal fluid systems, Rajesh specialized in design of thermal plants, thermal energy storage (TES), and renewable energy technology, and energy conservation projects. He performs energy analysis, commissioning (CX), and retro-CX. He also has expertise in designing high performance buildings.

Rajesh earned his LEED Accredited Professional certification in 2004; his first LEED project 'The Austin City Hall' was awarded LEED Gold, and several of his projects have been awarded LEED and Energy Star Building certifications. In the Valley market, Rajesh honed his skills, designing comfortable, sustainable facilities that are both cost effective and easy to maintain.

His professional affiliations include **ASHRAE, EPA, and USGBC**. Rajesh volunteers as an engineering mentor in STEM clubs in schools and serves on the Board of Piedmont Environmental Alliance organization, and the **USGBC Leadership Group committee co-chair for Education and Programming**. He enjoys teaching and speaking at professional workshops and seminars and has **presented papers** at more than half a dozen technical conferences.

ACR Engineering–Austin, Harlingen, TX 1995 – 2014

For over 20 years Rajesh served as the Engineer of Record for the South Texas office. He conducted energy audits, developed technical reports, and implemented energy conservation projects. He designed new and retrofit lighting, HVAC, and DDC systems. For the State, he reviewed third party designs for code compliance. He provided training sessions in environmental and energy conservation, renewable technologies, and the use of related software and analysis techniques. He commissioned building MEP, controls, and life safety systems.

Experience as Prime Consultant Engineer of Record

- UTRGV, UT-Pan American, UT Brownsville, Texas Southmost College, TSTC, Texas A&M
- South Texas College
- Colleges and universities in Texas
- Wake Forest University
- Cameron County, Hidalgo County

MEP Renovation Experience in the Rio Grande Valley

- **STC: Several projects**
- UTRGV: **Several projects**
- UT Brownsville/TSC: **Several projects**
- Dozens of schools with thermal plants up to 6,000T
- Valley International Airport: Renovation
- City of McAllen Central Library: Renovation/New construction
- Cameron County: Several projects

Utility Incentives

At the University of Houston, obtained $350,000 in incentives from CenterPoint Energy for a single chiller replacement project. In the past 5 years, applied for and received incentives in the millions from AEP for HVAC and lighting projects.

LEED and High-Performance Building Projects

Recognition and Awards:

- *Consultant of the Year Award, AIA-RGV*
- *LEED Gold – Falcon Dam*
- *Net-Zero*
- *EPA Energy Star Buildings: Several with perfect scores of 100.*
- *EPA Energy Star Buildings: Three campuses of UTRGV.*
- *National Design Award: McAllen Library: 500T, ultra-high efficiency thermal plant with oil-free magnetic bearing chillers, adaptive controls.*
- *LEED Gold: Austin City Hall: Boilers, heat exchangers, connection to district utility plant.*
- *LEED Silver: the City of Austin, 911 Center, Commissioning Agent*
- *LEED Certification (in progress): Valley Nature Center, Weslaco*
- *LEED Silver: Lance Armstrong Foundation, Austin*

CESAR GONZALEZ, PE

YEARS OF EXPERIENCE: 19

PRINCIPAL + MECHANICAL/ELECTRICAL ENGINEER

Highlights of Qualifications

Cesar has 19 years of experience in the Engineering Design of Mechanical, Electrical and Plumbing Systems serving educational facilities such as Community Colleges, Universities and K-12 Schools. Among other skills, he specializes in engineering construction coordination and commissioning.
Cesar is experienced in the simulation and modeling of system energy performance, thermodynamic and mechanical load analysis, and calculation.
At Ethos he is responsible for MEP engineering design, planning, coordination, and management. He oversees mechanical and plumbing design production, including BIM coordination. He ensures that engineering design is applied in compliance with construction codes, in a sustainable and cost-effective manner.
Cesar is committed to his profession. He has grown in the MEP Engineering industry, starting at the very basics, followed by assisting Projects' Engineers of Record, then practicing Licensed Engineering, and to finally becoming part of the Ethos Engineering Management team. His professional affiliations include ASHRAE and volunteering as an engineering mentor in STEM clubs at local schools.

ACR Engineering, Harlingen, TX 2006 – 2014

Starting as Graduate Engineer, he functioned as CAD operator performing drafting tasks and basic calculation activities. With time and experience gained, he became a Mechanical Designer, in charge of generating HVAC and Plumbing plans and documents suitable for cost estimation and constructability coordination activities. Rapidly he became qualified to perform building heat load analysis, design of HVAC systems and design of thermal plants. He also functioned as lead design engineer, engineer of record, and supervisor of the production of mechanical design.

Experience as Prime Consultant Engineer of Record

- South Texas College (STC) – Multiple campus projects
- UTRGV – Academic and support facilities
- K-12 School Districts throughout the Rio Grande Valley
- IDEA Public Schools – Numerous campuses throughout the State of Texas
- Cameron County and Hidalgo County public facilities

MEP Renovation Experience in the Rio Grande Valley

- STC: Several campus renovation and infrastructure upgrades
- UTRGV: HVAC and central plant improvements
- IDEA Public Schools: Multi-campus renovations and system replacements
- Cameron County: Historical building renovations and adaptive reuse projects
- Higher Education Facilities: Classroom, lab, and administrative renovations
- Central Plant & Chilled Water System upgrades
- Thermal plants up to 6,000+ tons
- Phased renovations in occupied facilities

Utility Incentives

- Secured and assisted with utility incentive applications for HVAC retrofits
- Energy efficiency upgrades including high-efficiency chillers, boilers, and VFD systems
- Experience coordinating with local utilities for incentive compliance documentation
- Lifecycle cost analysis for energy-efficient system selections

High-Performance & Sustainable Design

- LEED-influenced design strategies for public institutions
- Energy modeling coordination and envelope/system optimization
- High-efficiency chilled water plants and adaptive control strategies
- Demand reduction and peak load management strategies
- Energy Star–aligned building performance improvements

Recognition & Professional Leadership

- Lead mechanical engineer on award-recognized municipal and higher education projects
- Technical mentor for engineering staff
- Oversight of QA/QC procedures for design and commissioning coordination
- Active involvement in regional engineering and industry organizations

Community Involvement at International Level

- Architectural and MEP courses at ITESM Tecnologico de Monterrey, Monterrey Mx.

Community Involment at Local Level

STEM Programs: La Joya ISD
Harlingen ISD
Brownsville ISD
IDEA Public Schools

MEMBERSHIPS

National Fire Protection Association

American Society of Heating, Refrigerating and Air-Conditioning Engineers

American Society of Mechanical Engineers

Leonardo Munoz, PE, RME, is the CEO and owner of both, TFG Fire Sprinkler Contractors and Trinity MEP Engineering, LLC. Leo has accrued years of professional practice since 2008 in South Texas as a Mechanical Engineer. Not only is he well experienced in the design aspect, he also installs fire protection systems. Due to his experience on a wide range of projects, Leo distinguishes himself from most of the industry's engineers in the breadth of his expertise on all fire protection, mechanical, electrical, and plumbing trades, as well as his thorough understanding on how such systems integrate and function as a whole.

Leo was raised in Sullivan City, Texas. Born into a migrant family, he spent months traveling to northern states to harvest crops with his family, and from a young age served an integral part in his family's economic survival. Leo attributes his past for shaping him into the person he is today: driven, hardworking, and self-assured. It is with the aid of the lessons from his past that he earned a B.S. in Mechanical Engineering from the University of Texas at Austin and ultimately established Trinity MEP Engineering.

Leo sought to create a company with a mission to produce nothing less than excellent work in a timely manner. The dedicated CEO plays an extensive role in overseeing each area of the company – coordinating all aspects of projects, running day- to-day operations, and spending a sizable amount of time meeting with clients to provide the upmost satisfaction.

These individuals are authorized to represent Sam Garcia Architect, LLC regarding this Request for Qualifications and may be contacted concerning all matters related to the firm's qualifications, proposal, negotiations, and contract administration.

2026

ARCHITECTURAL/ENGINEERING

SERVICES

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 18, 2026
AWARDING OF BIDS
Agenda Item No: 13.E.
2026-2028 Land Surveying Services Rotation

1. **Agenda Item:**
Consider Awarding RFQ No. 2026-6, Land Surveying Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise. [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

2. **Description:**
On occasion the City of Edinburg requires Surveying Services on City projects which do require a Registered Professional Land Surveyor. The qualified firm(s) selected should be experienced in the field of surveying and be a Professional Land Surveyor. The experienced firm should have general surveying experience and be able to perform land (boundary) surveys and platting, topographic surveys, land title surveys, and construction surveying among others. It is expected that the qualified firm(s) selected will have a sufficient level of innovation and appraisal expertise to carry out the projects without constraints to produce documents in a timely manner. The firm must be prepared to assure the City of Edinburg that key personnel indicated in their qualification, statement will maintain their role in each project and that their present workload is such that each project will be completed on or before the due date. The rotation is for potential projects between October 2026 through September 2028. Projects to be funded in the upcoming fiscal years, as prioritized by the City Council.

Request for Qualifications were received on Tuesday, July 14, 2026, at 3:00 p.m. for Land Surveying Services. A total of thirteen (13) Request for Qualifications were received and reviewed by staff. All the submittals received met the criteria set out in the Request for Qualifications. The following qualified firms listed in alphabetical order have submitted Statements of Qualifications in response to this RFQ:

1. Bowman Consulting Group, Ltd.
2. Colliers Engineering & Design, Inc.
3. Halff Associates, Inc.*
4. Kane-Lindsey, LLC
5. KCI Technologies, Inc.*
6. Melden and Hunt, Inc.*
7. Quintanilla, Headley & Associates, Inc.*
8. Rio Delta Engineering*
9. ROW Surveying Services, LLC
10. S2 Engineering, PLLC
11. SAMES, Inc.*
12. Scheibe Consulting, LLC
13. Windrose Surveying & Land Services, LLC

* On 2024-2026 rotation

Limiting the selection of firms between 3 and 5 will insure each firm will obtain a project as it arises. The current 2024-2026 rotation has 7 firms and they have received approximately 1 project.

3. Staff's Recommendation:

Staff recommends awarding RFQ No. 2026-6 Land Surveying Services to qualified firm(s) and authorize the City Manager or designated appointee to enter into a Professional Services Contract with such firm(s) as projects arise.

2. Legal Notice

2.1. Notice to Respondents

The City of Edinburg is soliciting sealed proposals from qualified vendors for Request for Qualifications - Land Surveying Services.

Sealed Proposals must be submitted electronically or received by the City Secretary's Office no later than:

3:00 pm, Tuesday, July 14, 2026.

All sealed proposals must be received either electronically or at the designated location by the deadline shown. Proposals received after the deadline will not be considered for the award of the contract and shall be considered void and unacceptable.

All proposals will be opened, and respondent's names publicly read aloud promptly in the City Hall Community Room, at 415 W. University Dr., Edinburg, TX 78539, at 3:00 pm, Tuesday, July 14, 2026.

To obtain a copy of the Request for Qualifications or submit an electronic proposal please visit:

https://procurement.opengov.com/portal/cityofedinburg

If a Respondent chooses to submit a Hard Copy Proposal, it must be delivered in a sealed envelope with a return address and clearly marked "City of Edinburg RFQ No. RFQ 2026-6 to the City Secretary's Office prior to the RFQ opening date and time. The receiving time in the City Secretary's Office will be the governing time for acceptability of the proposals. The respondent's firm name shall appear on the outside of the envelope.

Submit Hard Copy Proposals to:

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

If you have any questions or require additional information contained in the RFQ, you may contact Lorena Fuentes, Interim Purchasing Manager. Please be sure to submit your questions via OpenGov Procurement at the website listed above no later than 3:00 pm on Tuesday, July 7, 2026.

The City reserves the right to reject any or all proposals and to waive informalities or technicalities and to accept the Proposal deemed the most advantageous to the City, and hold the proposal for a period of 90 days without taking action.

3. Instructions, Terms and Conditions

3.1. General Instructions

PURPOSE

The purpose of these solicitation documents is to execute a Professional Services Contract for: RFQ 2026-6 Request for Qualifications - Land Surveying Services

INTENT

The services to be provided under this RFQ shall be in accordance with and shall meet all specifications and/or requirements as shown in this solicitation for RFQ. There is no intention to disqualify any respondent who can meet the requirements.

DEVIATION FROM SPECIFICATION

Please read your requirements thoroughly and be sure that the RFQ offered complies with all requirements/specifications noted. Any variation from the solicitation requirements/specifications must be clearly indicated by letter, on a point by point basis, attached to and made a part of your RFQ. If no exceptions are noted, and you are the successful respondent, it will be required that the service(s) be provided as specified.

SUBMITTAL OF "HARD COPY" RFQ

If submitting a Hard Copy RFQ, it must be submitted in a sealed envelope by the vendor. **Submit two (2) complete sets of the response, one (1) original marked “ORIGINAL,” and one (1) Digital Copy in a flash drive**. Each RFQ must be completely filled out and SUBMITTED IN ORIGINAL FORM complete with all supporting documentation. RFQs submitted by facsimile (fax) will not be accepted. Submittal of an RFQ in response to this solicitation constitutes an offer by the respondent. Once submitted, RFQs become the property of the City of Edinburg and as such the City reserves the right to use any ideas contained in any RFQ regardless of whether that respondent/firm is selected. Submission of a RFQ in response to this solicitation, by any respondent, shall indicate that the respondent(s) has/have accepted the conditions contained in the RFQ, unless clearly and specifically noted in the RFQ submitted and confirmed in the contract between the City and the successful respondent otherwise. RFQs which do not comply with these requirements may be rejected at the option of the City. RFQs must be filed with the City of Edinburg before the deadline day and hour. No late RFQs will be accepted. Failure to meet RFQ requirements may be grounds for disqualification.

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

AUTHORIZATION TO BIND RESPONDENT TO RFQ

RFQs MUST give full firm name and address of respondent, and be manually signed. Failure to do so will disqualify your RFQ. Person signing bid must show title or AUTHORITY TO BIND HIS/HER FIRM IN A CONTRACT. Firm name and authorized signature must appear on each page that calls for this information. The legal status of the Respondent whether corporation, partnership, or individual, shall also be stated in the RFQ. A corporation shall execute the RFQ by its duly authorized officers in accordance with its corporate by-laws and shall also list the state in which it is incorporated. A partnership Respondent shall give full names and addresses of all partners. All partners shall execute the RFQ. Partnership and Individual Respondent shall state in the proposal the names and addresses of all persons with a vested interest therein. The place of residence of each Respondent, or the office address in the case of a firm or company, with county and state and telephone number, shall be given after the signature.

ALTERATIONS/AMENDMENTS TO RFQ

RFQ CANNOT be altered or amended after opening time. Alterations made before opening time must be initialed by respondent guaranteeing authenticity. No RFQ may be withdrawn after opening time without acceptable reason in writing and only after approval by the City of Edinburg.

NO RESPONSE TO RFQ

If unable to submit a RFQ, respondent should return inquiry giving reasons.

LIST OF EXCEPTIONS

The respondent shall attach to his/her RFQ a list of any exceptions to the specifications/ requirements.

TIME ALLOWED FOR ACTION TAKEN

The City of Edinburg may hold RFQ's **90 days** after deadline without taking action. Respondents are required to hold their RFQ's firm for same period of time.

RIGHT TO REJECT/AWARD

The City of Edinburg reserves the right to reject any or all RFQs, to waive any or all formalities or technicalities, and to make such awards of contract as may be deemed to be the best and most advantageous to the City of Edinburg.

NUMBER OF CONTRACTS

THE CITY reserves the right to award one, more than one, or no contract(s) in response to this RFQ.

INDEMNIFICATION CLAUSE

The Respondent agrees to indemnify and save harmless the City, from all suits and actions of every nature and description brought against them or any of them, for or on account of the use of patented appliances, products or processes, and he shall pay all royalties and charges which are legal and equitable. Evidence of such payment or satisfaction shall be submitted upon request of the Assistant Purchasing Manager, as a necessary requirement in connection with the final estimate for payment in which such patented appliance, products or processes are used.

ADDENDA AND MODIFICATIONS

Respondent shall carefully examine the RFQ forms, specifications/requirements, and instructions to Respondents. Should the respondent find discrepancies in, or omissions from specifications/requirements, or other documents, or should he/she be in doubt as to their meaning, he/she should request an interpretation via the OpenGov portal:https://procurement.opengov.com/portal/cityofedinburg and obtain clarification by addendum prior to submitting any RFQ. Explanations, interpretations, and supplemental instructions shall be in the form of written Addenda which shall become a part of the Contract documents. Said Addenda shall be available thru the e-procurement portal and e-mailed to all prospective Respondents. All Addenda issued in respect to this project shall be considered official changes to the original RFQ documents. Verbal statements in response to inquiries and/or requests for explanations shall not be authoritative nor binding. It shall be the Respondent(s) responsibility to ensure that they have received all Addenda in respect to this project. Furthermore, Respondents are advised that they must recognize, comply with, and attach a signed copy of each Addendum which shall be made part of their RFQ Submittal. Respondent(s) signature on Addenda shall be interpreted as the respondent’s “recognition and compliance to” official changes as outlined by the City of Edinburg and as such are made part of the original solicitation documents. Failure of any respondent to receive any such addendum or interpretation shall not relieve such Respondent from its terms and requirements. The City may issue a written addendum no later than five calendar days prior to the date bids must be received. Addendums are available online at https://procurement.opengov.com/portal/cityofedinburg

SYNONYM

Where in this solicitation package SERVICES is used, its meaning shall refer to the request for qualifications Request for Qualifications - Land Surveying Services as specified.

ASSIGNMENT

Respondents are advised that the City of Edinburg shall not allow the successful respondent to sell, assign, transfer, or convey any part of any contract resulting from this RFQ in whole or in part, to a third party without the written approval of the City of Edinburg.

RESPONDENT’S EMPLOYEES

Neither the Respondent nor his/her employees engaged in fulfilling the terms and conditions of this Service Contract shall be considered employees of the City. The method and manner of performance of such undertakings shall be under the exclusive control of the vendor on contract. The City shall have the right of inspection of said undertakings at any time.

INTERPRETATIONS

Any questions concerning the project and/or specifications/requirements with regards to this solicitation for statement(s) of qualifications shall be directed to the designated individuals as outlined in the RFQ. Such interpretations, which may affect the eventual outcome of this request for statements of qualifications, shall be furnished in writing to all prospective Respondents via Addendum. No interpretation shall be considered binding unless provided in writing by the City of Edinburg in accordance with paragraph entitled **"Addenda and Modifications".**

STATUTORY REQUIREMENTS

It shall be the responsibility of the successful respondent to comply with all applicable State & Federal laws, Executive Orders and Municipal Ordinances, and the Rules and Regulations of all authorities having jurisdiction over the work to be performed hereunder and such shall apply to the contract throughout, and that they will be deemed to be included in the contract as though written out in full in the contract documents.

RFQ PREPARATION COSTS

The City of Edinburg shall not be held liable for any costs incurred by any respondent for work performed in the preparation of and production of a RFQ or for any work performed prior to execution of contract.

CONFIDENTIAL INFORMATION

Any information deemed to be confidential by the respondent should be clearly noted on the pages where confidential information is contained; however, the City cannot guarantee that it will not be compelled to disclose all or part of any public record under Texas Public Information Act, since information deemed to be confidential by the respondent may not be considered confidential under Texas Law, or pursuant to a Court order.

VERBAL THREATS

Any threats made to any employee of the City, be it verbal or written, to discontinue the providing of item/material/services for whatever reason and/or reasons shall be considered a breach of contract and the City will immediately sever the contract with the Respondent/Consultant on contract.

RIGHT TO AUDIT

The City of Edinburg reserves the right to audit the vendor's books and records relating to the performance of this contract. The City of Edinburg, at its own expense, shall have the right at all reasonable times during normal business hours and upon at least twenty-four (24) hours' advance notice, to audit, to examine, and to make copies of or extracts from the books of account and records maintained by the vendor(s) with respect to the Supply/Service and/or Purchase Contract. If such audit shall disclose overpayment by City to vendor, written notice of such overpayment shall be provided to the vendor and the amount of overpayment shall be promptly reimbursed by vendor to the City. In the event any such overpayment is not paid within ten (10) business days after receipt of such notice, the unpaid amount of such overpayment shall bear interest at the rate of one percent (1%) per month from the date of such notice until paid.

PAST PERFORMANCE

Respondent's past performance shall be taken into consideration in the evaluation of RFQ submittal.

JURISDICTION

Contract(s) executed as part of this solicitation shall be subject to and governed under the laws of the State of Texas. Any and all obligations and payments are due and performable and payable in Hidalgo County, Texas.

VENUE

The parties agree that venue for purposes of any and all lawsuits, cause of action, arbitration, and/or any other dispute(s) shall be in Hidalgo County, Texas.

CONSIDERATION OF LOCATION OF BIDDER'S PRINCIPAL PLACE OF BUSINESS

The City may give local vendors, whose principal place of business is located within the City of Edinburg, and whose bid is within five percent (5%) of the lowest bid price preference as allowed by Section 271.9051 of the Local Government Code.

AWARD

Respondents are advised that the City of Edinburg is soliciting RFQs and award shall be made to the respondent that in the opinion of the City of Edinburg is the best qualified.

The City of Edinburg reserves the right to award contract(s) based solely on the written proposals. The City also reserves the right to request oral interviews.

FINAL SELECTION AND THE CITY COUNCIL APPROVAL

Selection shall be made of one or more proposers deemed to be fully qualified and best suited among those submitting Proposals on the basis of the evaluation factors included in the Request for Qualifications, if so stated in the Request for Qualifications. Negotiations shall be conducted with the proposers selected. After negotiations have been conducted with each proposer selected, the agency shall select the proposer which, in its opinion, has made the best proposal, and shall award the contract to that proposer. The City may cancel this Request for Qualifications or reject the Qualifications at any time prior to an award, and is not required to furnish a statement of the reasons why a particular proposal was not deemed the most advantageous. Should the City determine in writing and in its sole discretion that only one proposer is fully qualified, or that one proposer is clearly more highly qualified than the others under consideration, a contract may be negotiated and awarded to that proposer. The award document will be a contract incorporating by reference all the requirements, terms and conditions of the solicitation and the contractor's proposal as negotiated. After the selection of the most qualified firm(s), scope of services and billing rates will be negotiated and used as attachments to the City's Professional Services Agreement. This Agreement will then be submitted to the City Council for approval. If the City and the selected firm cannot successfully negotiate an agreement, then the City will enter into negotiations with the next best qualified firm on the evaluation rating list. This procedure may be repeated until one (1) or more firms has been selected and approved by the City Council.

PAYMENT

The City of Edinburg will execute payment by mail in accordance with the State of Texas Pay Law after SERVICES have been completed, introduced to the City, and found to meet City of Edinburg specifications/requirements. No other method of payment will be considered.

CONFIDENTIALITY OF INFORMATION AND SECURITY

Should the successful respondent become the holder of and have access to confidential information in the process of fulfilling its responsibilities in connection with an awarded contract the successful respondent agrees that it shall keep such information confidential and will comply fully with the laws and regulations of the State of Texas, ordinances and regulations of the City, and any applicable federal laws and regulations relating to confidentiality.

EQUAL EMPLOYMENT OPPORTUNITY

Respondent agrees that they will not discriminate in hiring, promotion, treatment, or other terms and conditions of employment based on race, sex, national origin, age, disability, or in any way violate Title VII of 1964 Civil Rights Act and amendments, except as permitted by said laws.

TERMINATION OF CONTRACT

The City of Edinburg reserves the right to terminate the contract if, in the opinion of the City of Edinburg, the successful vendor's performance is not acceptable, no funds are available, or if the City wishes, without cause, to discontinue this contract. Termination will be in written form allowing a 30-day notice.

HISTORICALLY UNDERUTILIZED BUSINESS

Firm(s)/Sub Firm(s) will be required to comply with the President's Executive Order No. 11236 and Order No. 11375 which prohibits discrimination in employment regarding race, creed, color, sex, or national origin. Firm(s)/Sub Firm(s) must comply with the Title VI of the Civil Rights Act of 1964, Minority and Women Owned Business Enterprise standards and affirmative action requirements.

ETHICAL STANDARD

No City official or employee shall have interest in any contract resulting from this bid.

IF YOU HAVE ANY QUESTIONS ABOUT COMPLIANCE, PLEASE CONSULT YOUR OWN LEGAL COUNSEL. COMPLIANCE IS THE INDIVIDUAL RESPONSIBILITY OF EACH PERSON OR AGENT OF A PERSON WHO IS SUBJECT TO THE FILING REQUIREMENT. AN OFFENSE UNDER CHAPTER 176 IS A CLASS "C" MISDEMEANOR.

3.2. INSURANCE REQUIREMENTS

Staff may waive insurance requirements for contracts $0 - $4,999.99, including but not limited to contracts for food, materials, supplies, and construction. Workers' Compensation in amounts which satisfy statutory coverage shall be required for construction projects.

The following insurance requirements will be included in all City contracts of $5,000 - $14,999.99. In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim.

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker’s Compensation Statutory Coverage

Comprehensive General Liability

(City named as additional insured)

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

The following insurance requirements will be included in all **City contracts of $15,000 or more.**

(1) The successful bidder will be required to carry the following insurance coverage and limits of coverage, as well as list the City as an additional insured to liability coverage as requested by the City. In addition, the successful bidder shall provide the City with evidence of coverage and furnish acceptable proof of payment of insurance premiums.

(2) The successful bidder will be required to secure and/or have insurance coverage in force with an admitted property and casualty insurance company licensed by the State of Texas to conduct business in the State of Texas.

(3) In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker’s Compensation Statutory Coverage

Employer’s Liability Bodily Injury by Accident:

$100,000 each accident

Bodily Injury by Disease:

$100,000 each employee/$500,000 policy limit

Comprehensive General Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Comprehensive Auto Liability

Bodily Injury $100,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

City’s Protective Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Policies must name the City of Edinburg as an Additional Insured.

Certificates of insurance naming the CITY as an additional insured shall be submitted to the CITY for approval prior to any services being performed by Contractor. Each policy of insurance required hereunder shall extend for a period equivalent to, or longer than the term of the Contract, and any insurer hereunder shall be required to give at least thirty (30) days written notice to the CITY prior to the cancellation of any such coverage on the termination date, or otherwise. This Contract shall be automatically suspended upon the cancellation, or other termination, of any required policy of insurance hereunder, and such suspension shall continue until evidence that adequate replacement coverage is provided to the CITY. If replacement coverage is not provided within thirty (30) days following suspension of the Contract, the Contract shall automatically terminate.

4. Specifications

4.1. Scope of Services

The City of Edinburg is seeking statements of qualifications from firms interested in providing the City Land Surveying Services on an “as needed” basis. The services to be performed may include topographic, boundary, platting preliminary, and all other necessary land surveying tasks, as specified by the City. AI. All Measurement Tolerances Provided On Such Surveys Must Be Within Readings For Urban Survey As Specified On Accuracy Standards For Alta/Acsm Land Title Surveys.

AJ. When A Significant Discrepancy With The Record Maps And Documents Are Found, Or If Monuments Are Set Or If Otherwise Required By Law, Surveyor Shall Provide A “Record Of Survey Map” Compliant With City And State Standards.

AK. Elevation Certificate For Flood Insurance Purpose (FEMA) Coordination & Documentation Associated With Phase I And Phase II Real Estate.

AL. All Firms May Not Be Capable Of Providing The Above Noted Services. If Your Firm Is Capable And Willing To Provide Any Of The Above Services, A Complete Description Of The Nature Of The Service The Firm Is Qualified To Provide Must Be Provided In Your Qualifications.

AM. All other topographic surveying as assigned.

4.2. Submittal Requirements

The RFQ must be submitted according to the instructions outlined herein. Each response should include, at a minimum, the following items not excluding the selection process criteria:

A. Transmittal letter – Indicate interest and commitment to perform services for the City of Edinburg, include contact information (physical address, telephone, fax, cell phone, and email address) for the primary person responsible for your RFQ who will be the point of contact for the City on all correspondence and communications pertaining to the RFQ. State whether any addendums to this RFQ have been received by your firm and whether consideration of their content has been included in your RFQ. The letter must be signed by an officer of the firm who is authorized to bind the firm to contract and shall contain a statement to this effect;

B. Firm Qualification and Experience – Discuss the firm's experience and history in performing land surveying services in a timely manner, particularly for other governmental agencies in the past five (5) years. Discuss the firm's uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

C. Team Member Qualifications and Experience – Submit resumes summarizing qualifications and experience of project manager, key staff and any support staff likely to be assigned to the work.

D. References – Provide at least three (3) references (names and current phone numbers) from recent work and list all past projects with the City of Edinburg for each proposed team member. Include a brief description of the projects associated with the reference, and the role of the individual.

E. Insurance - Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. A list of any insurance claims against the firm within the past 5 years.

F. Professional Services Agreement – Provide a statement that the Land Surveying Services Agreement has been read, that the firm will meet the prerequisite insurance requirements, and the firm, if selected, agrees to enter in to such agreement.

G. Contact Information – Each firm must submit the firms two (2) different contact information (Name, Title, Address, Phone Number, Mobile Number, and Email Address).

H. Presentation – Electronic submittal only.

HB 89

The 85th Texas Legislature approved new legislation, effective Sept. 1, 2017, which amends Texas Local Government Code Section 1. Subtitle F, Title 10, Government Code by adding Chapter 2270 which states that a governmental entity may not enter into a contract with a company for goods or services unless the contract contains a written verification from the company that it:

1) does not boycott Israel; and

2) will not boycott Israel during the term of the contract

CONFLICT OF INTEREST

CHAPTER 176 OF THE TEXAS LOCAL GOVERNMENT CODE

Effective January 1, 2006, Chapter 176 of the Texas Local Government Code requires that any vendor or person considering doing business with a local government entity disclose in the Questionnaire Form CIQ, the vendor or person's affiliation or business relationship that might cause a conflict of interest with a local government entity. By law, this questionnaire must be filed with the records administrator of the City of Edinburg not later than the 7th business day after the date the person becomes aware of facts that require the statement be filed. See Section 176.006, Local Government Code. A person commits an offense if the person violates Section 176.006, Local Government Code. An offense under this section is a Class C misdemeanor.

For more information or to obtain Questionnaire CIQ go to the Texas Ethics Commission web page at https://www.ethics.state.tx.us/data/forms/conflict/CIQ.pdf

*Response required

4.9. If awarded the 1295 form will need to be provided.*

CERTIFICATE OF INTERESTED PARTIES (Form 1295)

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016. For more information go to the Texas Ethics Commission web page at

STATE OF TEXAS §

COUNTY OF HIDALGO §

CITY OF EDINBURG §

AGREEMENT BETWEEN THE CITY OF EDINBURG AND CONSULTANT FOR PROFESSIONAL LAND SURVEYING SERVICES PURSUANT RFQ NO. XXXX-XXX

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit “B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

SECTION XXI
NOTICE OF GOVERNING LAW FOR STATE AND FEDERAL GRANT PROJECTS

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

RE: Request For Qualifications #2026-6 Land Surveying Services

Dear Selection Committee:

Bowman Consulting Group Ltd. (Bowman) is pleased to submit this Statement of Qualifications in response to RFQ 2026-6 for Land Surveying Services. We are committed to providing the City of Edinburg with responsive, accurate and timely surveying support across the full scope of services outlined in this solicitation, and we welcome the opportunity to serve as a resource on the City's rotation list.

Edinburg's scope spans boundary, right-of-way (ROW), topographic, platting and control work on assignments that may run from a single day to several months. The following points reflect why we believe Bowman is well suited to deliver that range reliably.

A team built around this work.
Our proposed team is led by two Registered Professional Land Surveyors and backed by a QA/QC manager licensed in Texas and 39 other states, additional project surveyors and field crews experienced in boundary resolution, ROW acquisition, topographic data collection and control establishment. Project Manager, Gerardo Balderas, RPLS, EIT, a University of Texas Rio Grande Valley graduate, brings direct familiarity with the region, and every task order runs through him as your single point of contact. The result is a right-sized team that knows the area and has the depth behind it to absorb concurrent assignments without slowing down.

Current experience with the City of Edinburg.
Bowman is currently supporting multiple active development projects within the City of Edinburg requiring civil engineering, landscape design, permitting and ongoing coordination with City staff. This active work has provided our team with current familiarity with the City's development review process and municipal standards, allowing us to immediately support the City's on-call surveying needs.

Proven on rotation-list, on-call work.
The delivery model Edinburg is soliciting is one we already run. To provide one example of this, under our on-call surveying contract with CPS Energy, Bowman has completed a steady flow of individually scoped task orders since December 2024, mobilizing crews, coordinating access with landowners and utilities and certifying deliverables under the same fast-turnaround, unpredictable-volume conditions this contract will demand. Our processes are already built for it.

01 | Transmittal Letter

The two primary points of contact for our firm regarding this RFQ, and for all subsequent correspondence and communications with the City, are:

Gerardo Balderas, RPLS, EIT
Project Manager

111 Tower Dr., Suite 325
San Antonio, TX 78232

Office: 210.390.1558 ext. 9070
Mobile: 956.223.5683
Fax: N/A
Email: Gerardo.Balderas@bowman.com

Trey Neubauer, RPLS
Assistant Project Manager

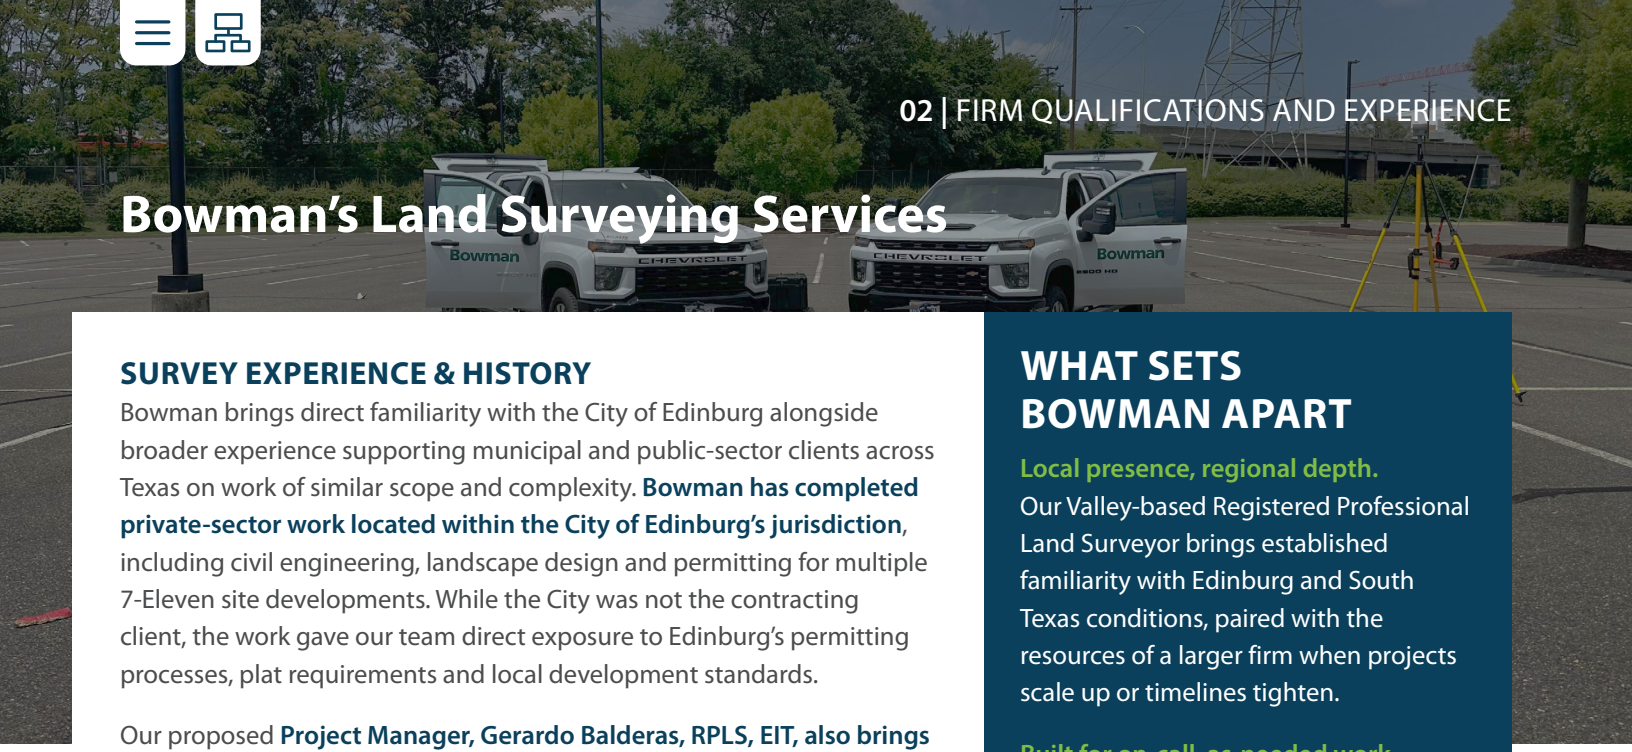
111 Tower Dr, Suite 325
San Antonio, TX 78232

Office: 210.774.5504
Mobile: 210.764.4331
Fax: N/A
Email: Trey.Neubauer@bowman.com

Bowman Consulting Group Ltd. is a corporation organized under the laws of the State of Delaware. Bowman confirms that it has received no addenda issued in connection with this RFQ as of the date of this submittal.

Austin Holland, undersigned, is authorized to bind Bowman to a contract, and by signing below certifies this authority on behalf of the firm.

Sincerely,



Austin Holland
Principal, Geospatial Regional Manager
Bowman Consulting Group Ltd.

San Antonio, TX 78232

SECTION

02

Firm Qualifications & Experience

Bowman's Land Surveying Services

SURVEY EXPERIENCE & HISTORY

Bowman brings direct familiarity with the City of Edinburg alongside broader experience supporting municipal and public-sector clients across Texas on work of similar scope and complexity. **Bowman has completed private-sector work located within the City of Edinburg's jurisdiction**, including civil engineering, landscape design and permitting for multiple 7-Eleven site developments. While the City was not the contracting client, the work gave our team direct exposure to Edinburg's permitting processes, plat requirements and local development standards.

Our proposed **Project Manager, Gerardo Balderas, RPLS, EIT, also brings prior individual experience with the City of Edinburg**, having served as a field crew member on the City's Alberta Road Reconstruction project (2021-2022), a 10-parcel ROW acquisition effort involving boundary recovery and horizontal and vertical control establishment.

Beyond this direct Edinburg exposure, **our team has a strong record supporting public-sector clients across Texas over the past five years**, including boundary and ROW surveys, topographic data collection, subdivision platting and construction staking for capital improvement projects delivered on schedule. Our staff includes a Rio Grande Valley-based Registered Professional Land Surveyor with TxDOT experience, providing familiarity with regional conditions, agency coordination and applicable standards common to South Texas municipalities. Bowman routinely delivers work in accordance with TxDOT requirements and local jurisdictional standards, including coordination with utility providers, irrigation districts and transportation agencies typical of the Rio Grande Valley.

Our team is also **familiar with ongoing development trends within Edinburg and the greater Rio Grande Valley**, including municipal infrastructure expansion and private development activity that drive demand for surveying services. This familiarity allows us to anticipate coordination requirements and deliver efficient, well-coordinated survey support.

SUBCONSULTANT

For tasks requiring **subsurface utility engineering (SUE) services**, Bowman will work with **T2ue Utility Engineers**. T2ue brings 33 years of experience managing SUE projects for cities, counties and municipalities throughout the US. T2ue's early utility identification during design will help avoid conflicts and delays during construction.

WHAT SETS BOWMAN APART

Local presence, regional depth.
Our Valley-based Registered Professional Land Surveyor brings established familiarity with Edinburg and South Texas conditions, paired with the resources of a larger firm when projects scale up or timelines tighten.

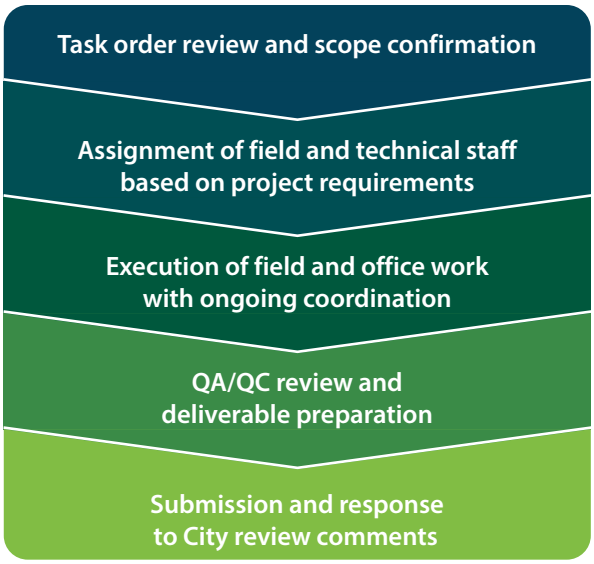
Built for on-call, as-needed work.
Our CPS Energy on-call surveying contract has delivered 18 task orders of varying size and complexity since December 2024, the same rotation-list structure Edinburg is soliciting under, so our processes are already built around fast turnarounds on unpredictable volume.

One team across the full scope.
From boundary and ROW work to topographic surveys, platting and legal descriptions, our surveyors handle Edinburg's full range of requested services in-house, without handing pieces off between subcontractors.

ABILITY TO MEET SCHEDULES & DEADLINES

Bowman has a proven history of delivering land surveying services on schedule for governmental agencies across Texas, having completed all of the projects listed below **within the past five years**, most for **public-sector clients**, and **all completed on schedule**. This track record reflects the same rotation-list, as-needed structure Edinburg is soliciting under, where quick turnaround on unpredictable project volume is essential.

Recent Project Experience
Real Property Surveying – Capital Metropolitan Transportation Authority (Austin, TX)
Boundary and Topographic Survey – Jonah Waterline Route (Hutto, TX)
City of Waco South 12th Street Development (Waco, TX)
Boundary and ROW Survey – Jefferson Avenue North 14th (Waco, TX)
CPS Energy On-Call Surveying (San Antonio Region, TX)
TxDOT FM 88 Widening (Elsa, TX)
TxDOT US 90 Widening (Liberty, TX)
Stripes Wilson Rd & Chester Park Rd (SW Quadrant) Survey Services (Harlingen, TX)
Stripes McAllen #1057317 Survey Services (McAllen, TX)



Our approach to maintaining schedules starts with direct, consistent communication. As Project Manager, Gerardo will coordinate directly with the City's Project Manager throughout each assignment, providing regular updates to track progress, address questions and confirm alignment with schedule and deliverables. This streamlined communication approach minimizes delays and supports efficient project delivery, allowing our team to move quickly from notice to proceed through final deliverable on each task order.

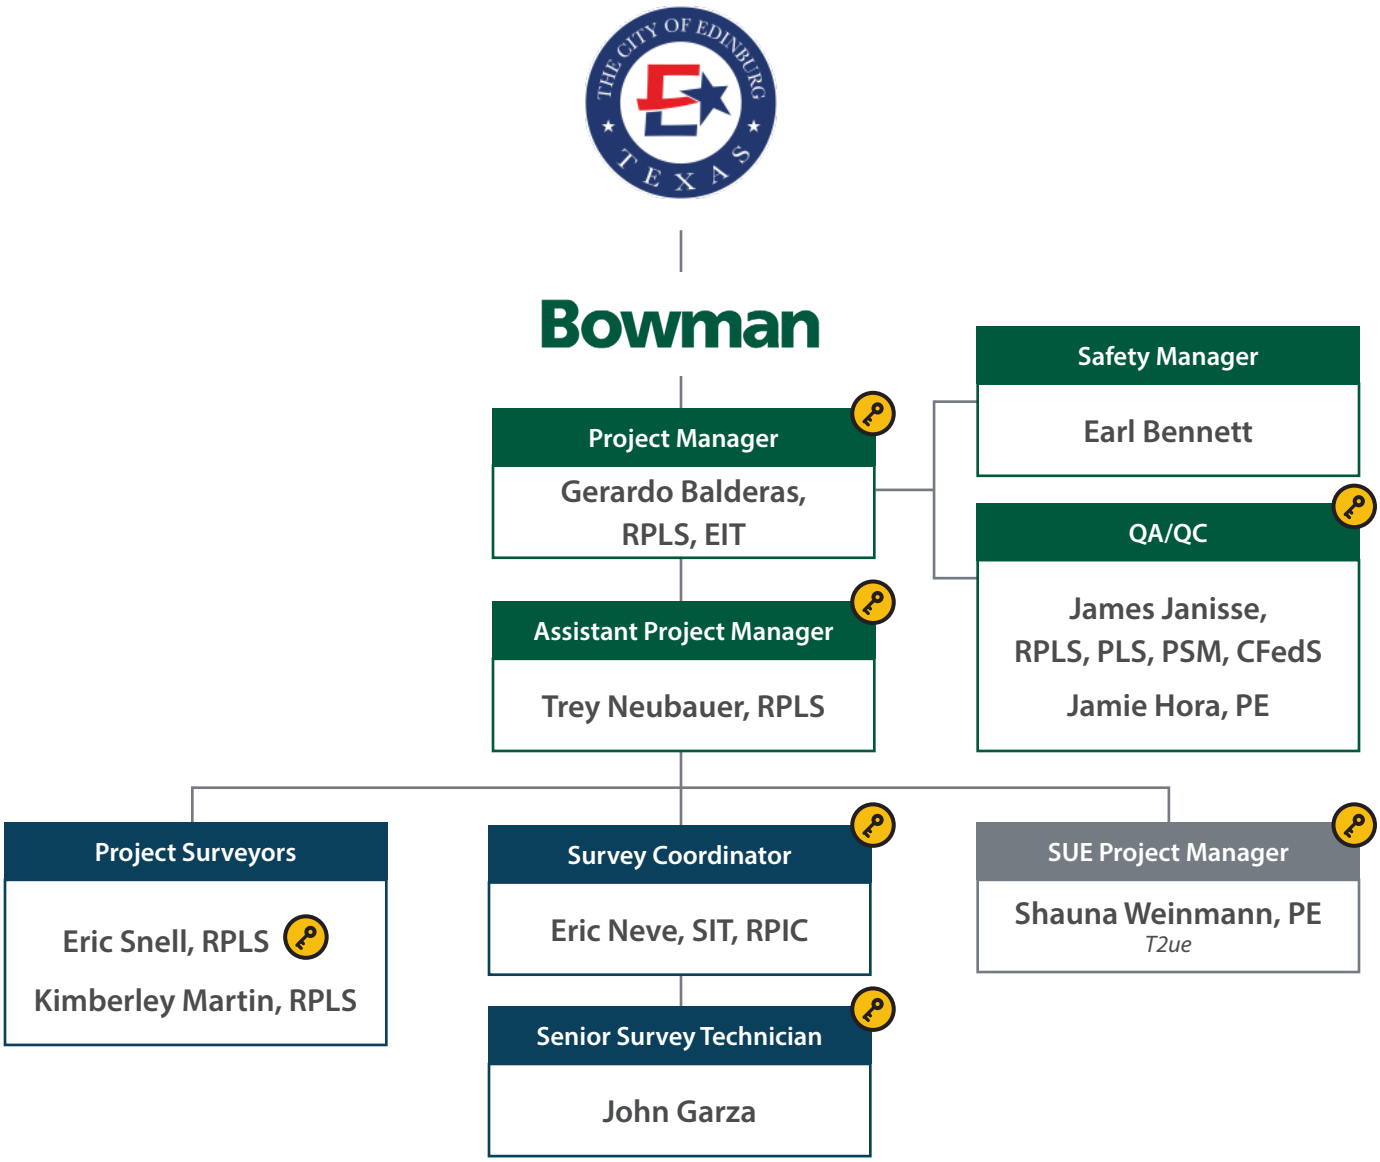
STAFFING NEEDS

Bowman assigns staff based on each task order's scope, complexity and schedule, using a focused team structure that supports direct communication and efficient execution.

Gerardo Balderas serves as the primary point of contact for the City of Edinburg and provides oversight across all task orders. For smaller or part-time assignments, Bowman draws from a pool of licensed surveyors and field crews across our San Antonio office and statewide network, **scaling staff up or down to match the size of each task order without adding unnecessary overhead to smaller projects.**

Each assignment follows a defined, repeatable workflow, providing clear accountability at each stage while maintaining flexibility to adjust staffing as needed:

OFFICE LOCATION



Bowman's San Antonio office, located at 111 Tower Drive, Suite 325, San Antonio, TX 78232, will serve as the primary office supporting this contract. This office is staffed to handle day-to-day project management, field coordination and deliverable turnaround for Edinburg's on-call assignments. In addition, Bowman maintains a statewide network of eight offices across Texas, allowing us to draw on additional staff and resources if project volume or timing requires support beyond our primary team.

Gerardo Balderas, RPLS, EIT

Project Manager

Education

B.S. Mechanical Engineering, The University of Texas Rio Grande Valley, Edinburg, TX

Registrations

RPLS #7176, Granted 4/9/2025

EIT Civil Engineering #79451, Granted 10/17/2023

Gerardo Balderas is a Registered Professional Land Surveyor (RPLS) with a strong focus on boundary surveying, ROW acquisition, and infrastructure survey support across Texas. He has experience supporting TxDOT and private-sector projects, including ROW determination, parcel acquisition plats, and utility coordination, while meeting aggressive schedules and maintaining rigorous QA/QC standards. Gerardo effectively leads field crews, manages survey data workflows, and delivers accurate, compliant results for roadway, drainage, and utility projects. He is skilled in LiDAR, photogrammetry, and advanced survey technologies, with a solid technical foundation and a commitment to precision, efficiency and continued professional growth.

Experience

City of Edinburg Alberta Road Reconstruction* | *Edinburg, TX*
Served as a field crew member supporting a 10-parcel ROW acquisition project, collecting data for design surveys and boundary recovery. Assisted with establishing horizontal and vertical control, processing field data, and developing DTMs. Prepared parcel sketches identifying improvements, utilities, and key property features, contributing to accurate and complete survey and ROW deliverables.

TxDOT FM 2061-FM 3362 (Jackson Rd.) Widening* | *Pharr, TX*
Served as lead survey project manager for a 115-parcel ROW acquisition project, coordinating field crews and directing design survey and boundary recovery efforts. Performed boundary resolution through survey analysis and legal research, and developed a master basemap with ownership data, stationing, offsets and TxDOT-required annotations to support ROW mapping and parcel development. Oversaw preparation of parcel exhibits and legal descriptions, conducting QA/QC reviews to ensure compliance with TxDOT standards. Managed accelerated parcel delivery schedules and conducted field outreach to secure right-of-entry (ROE) forms from non-responsive property owners.

Mid-Valley Airport Drainage* | *City of Weslaco, TX*
Responsible for the setting of a control point network referenced to NAD83 and NAVD88, creating horizontal and vertical control sheets, gathering topographic data, processing topographic data, creating TIN file and preparing a basemap of the project site.

Elm Drainage Improvement* | *City of Mission, TX*
Survey technician responsible for creating horizontal and vertical control sheets, processing topographic data and creating a TIN file.

Anaquitas Ditch Drainage Improvement* | *City of Mercedes, TX*
Set up a control network point network and created horizontal and vertical control sheets, gathered and processed topographic data, and created a TIN file.

*Experience prior to joining the firm

Richard (Trey) Neubauer III, RPLS

Assistant Project Manager

Education

B.S. Geography, Texas State University

Registrations

Registered Professional Land Surveyor: Texas (#6897)

TxDOT precertifications 15.1.1 ROW Surveys, 15.2.1 Design Survey, 15.2.2 Construction Survey, 15.3.5 H/V Control

Trey Neubauer is a Texas Registered Professional Land Surveyor with more than a decade of experience managing public- and private-sector surveying projects across Texas. His expertise includes utility, boundary, and ROW surveys; easement preparation; construction staking; and as-built documentation in support of infrastructure and utility programs. Trey provides licensed oversight, leads multi-disciplinary survey teams, and delivers accurate, defensible survey products using modern surveying technologies to support design, permitting, and construction.

Experience

CPS Energy On-Call Surveying Contract | *San Antonio, TX*
Project Manager/RPLS for utility on-call surveying supporting underground, overhead, and gas engineering. Manages multiple concurrent task orders including boundary and ROW determination, easement preparation, utility/topographic surveys, construction staking, and as-builts. Provides licensed oversight, QA/QC, and rapid task turnaround in coordination with CPS engineering and construction teams.

Levy Dickerson LOMR Support | *San Antonio, TX*
Led topographic and as-built surveying for a bridge crossing within a designated floodplain to support engineering design, drainage analysis, and a Letter of Map Revision (LOMR). Initial services included a Category 6 topographic survey of canal alignments, low-lying areas, and flood-control features, followed by a post-construction resurvey to document as-built conditions and update floodplain limits for FEMA submittal.

San Patricio County Easement and ROW Surveys – CenterPoint Energy | *Sinton, TX*
Provided easement and ROW surveying services supporting utility infrastructure improvements and associated corridor development in South Texas. Services included boundary resolution, easement preparation, utility coordination, and survey support for water utility and lift station improvements requiring coordination with TxDOT and utility stakeholders. Managed preparation of survey deliverables and infrastructure documentation to support project design, permitting, and construction activities while maintaining schedule and QA/QC requirements.

TxDOT SH 20 ROW and Design Surveys | *Hudspeth, TX*
As Survey Project Manager, Trey was responsible for establishing the existing ROW map for State Highway 20 (SH 20), a 23-mile linear alignment, and producing a comprehensive topographic design file produced in MicroStation SS10. The integration of LiDAR (Light Detection and Ranging) data that was collected from helicopter flight allowed LiDAR team to collect roadway elements without having to place surveyors in the road and allowed the team to extract critical features beyond the ROW without obtaining right-of-entry permission.

James (Jay) Janisse, RPLS, PLS, PSM, CFedS

Survey QA/QC

Education

B.A. Business and Marketing, Texas A&M San Antonio

A.S. Land Surveying, College of the Canyons

A.A., General Sciences, Moorpark College

Registrations

Registered Professional Land Surveyor – Texas #6663

Licensed in 39 other states and territories, and is a Certified Federal Surveyor

Jay Janisse has over 25 years of progressive experience in land surveying and geomatics across the United States. His expertise includes survey practice development, strategic planning, business development, operational leadership, digital transformation and technology implementation, supporting public and private sector clients across multiple markets. Jay's experience leading local and national survey organizations has equipped him with the skills to develop growth strategies, build high-performing teams and implement innovative surveying solutions that improve operational efficiency and client service.

Experience

Project Ozark Wind, Steelhead | *Marianna, AR*
Provide all the parcel research, field acquisition of boundary and final drafting of a survey for a 45,000-acre wind farm containing over 400 individual tracts.

Project Heidelberg, Renewables Client | *Heidelberg, PA*
Provided all survey services including but not limited to LiDAR scanning of the entire site, parcel research, all legal descriptions, setting all corners and analyzing the parcel boundary for gaps and gores. This effort culminated with a completed surface file for design use and an ALTA survey.

Guadalupe River Survey | *New Braunfels, Texas*
Survey lead working with the Guadalupe-Blanco River Authority (GBRA) to coordinate access to the river, 13 miles of the Guadalupe River was surveyed in approximately 30 days, to obtain cross-sections, stream velocities and note flow pattern observations. A range of survey methods were used to gather this data, including GPS, bathymetric and other conventional methods.

Superior Silica Sands Quarry 495+ Acre Boundary | *Bexar County, Texas*
Resolved a disputed boundary for a 495-plus acre sand quarry, researching nine original survey tracts and more than 30 adjoining parcels dating to the late 1800s. Field investigation of record monumentation revealed previously unnoticed encroachments. Also resolved a remnant parcel between the new Pleasanton Road ROW and an existing railroad easement.

Tanya Intersection | *McAllen TX*
Performed boundary research and ROW analysis for a four-way intersection, including cross sections and topographic mapping. Delivered complete CAD files supporting intersection design.

Amazon Project WMC1 | *McAllen TX*
Completed research and analysis of the parent and adjoining parcels, delivering ALTA and topographic surveys. Managed easement vacation and replatting to meet regulatory requirements.

Jamie Hora, PE

Engineering QA/QC

Education

B.S. Civil Engineering, Case Western Reserve University

Registrations

Professional Engineer: Arizona (#77170), Arkansas (#22606), Ohio (#91809), Texas (#129806)

Associations

Real Estate Council of Texas San Antonio (RECSA)

Jamie Hora is a licensed civil engineer with eight years of experience in site development, project management and team leadership across a diverse range of commercial projects. He has successfully delivered more than 20 projects through design, permitting and construction for national clients including 7-Eleven, PNC Bank and Discount Tire, with several additional projects currently underway.

He has extensive permitting experience across more than 30 jurisdictions throughout Texas, as well as projects in other states. Jamie is experienced in coordinating with regulatory agencies including the Texas Department of Transportation (TxDOT), the Texas Commission on Environmental Quality (TCEQ) and the Federal Emergency Management Agency (FEMA), helping clients achieve efficient approvals and successful project delivery.

Experience

LASCO Development – 7-Eleven (Stripes) | *Pharr, TX*
Jamie served as both the project engineer and project manager for the approximate 5,400 SF convenience store and gas station sitting on a 6-acre tract in the Texas Rio Grande Valley. This site includes 16 standard vehicle fueling stations and four commercial fueling stations. The site design provided all new utility connections and stormwater design complete with on-site earthen detention. Project management services included client support through entitlements, management of third-party surveyors, coordination with architect, Site Rezoning, Platting and all City Permitting. Additional permitting was required from Hidalgo County Drainage and Irrigation Districts, as well as TxDOT for proposed driveway access & drainage review for the site being developed with TxDOT frontage.

Discount Tire | *Byram, MS*
Jamie functioned as the project engineer and project manager for the three-bay, approximate 7,000 SF Discount Tire development on a 1.5-acre tract in Central Mississippi. The site required full civil design, including all new utility services, site grading and drainage design with an onsite earthen detention pond with controlled outfall. Sanitary sewer design included an on-site grinder pump lift station and forcemain for an offsite connection. Jamie coordinated approvals with City and MDOT, and provided civil construction support.

PNC Bank | *Celina, TX*
Jamie served as the project engineer for the 3,000 SF PNC Bank located in North Texas. This site was developed as a pad lot within a larger development. Jamie operated as the primary point coordinating design to ensure the site was aligned with the utility, road and grading improvements being constructed by others. The project site civil design provided all required utility services, grading and drainage improvements. Jamie also provided support throughout construction, reviewing submittals and responding to field-driven RFIs.

Eric Neve, SIT, RPIC

Survey Coordinator

Education

A.S. Civil/ Environmental Engineering, Northwest Vista College

A.A. Business Management, Northwest Vista College

Registrations

API 1169 Certification (#81197)

OSHA 30 Certified

Certified Remote Pilot-UAS (#4475426)

Eric is a surveyor in training with expertise in project coordination, team leadership and field data collection. His technical capabilities include problem-solving related to boundary surveys, topographic and tree surveys, and construction layout. In addition, he offers more than 20 years of business management experience, including business development, strategic planning and operational improvement. Eric is a surveyor in training (SIT) and a remote pilot in charge (RPIC).

Experience

COSA Bond Program Item No. 304 - Babcock Road Phase 1 | *San Antonio, TX*
Served as survey project manager, leading topographic, utility and boundary surveys to support roadway widening and sidewalk improvements, including establishment of project control and detailed site mapping. The project included coordination of field crews and QA/QC of survey data to support design and construction for municipal infrastructure improvements.

COSA Bond Program Item No. 309 – Vance Jackson Improvement | *San Antonio, TX*
Served as survey project manager, directing topographic, utility and boundary surveys for roadway widening and sidewalk installation, including control establishment and site plan development. The project included oversight of field operations and QA/QC of deliverables to support municipal design, permitting and construction.

Northside Community Park | *Boerne, TX*
Served as survey project manager, overseeing boundary verification and pre-design topographic surveys for a 38.863-acre park development, including establishment of horizontal and vertical control and detailed mapping of site features and utilities. The project included coordination of field data collection and preparation of survey deliverables, including AutoCAD mapping and tree survey documentation to support design and planning.

Cheniere 48-inch CCPL Pipeline | *TX*
Served as survey project manager, supporting pipeline corridor surveys including easement definition, control establishment, topographic design surveys and as-built data collection. The project included coordination of field crews and survey data development to document existing conditions, utilities and infrastructure along the corridor to support design and construction.

John Garza

Senior Survey Technician

Education

Technical Engineering and Surveying Courses, TSPS Land Surveying Seminars

Associations

Texas Society of Professional Surveyors

John Garza brings more than 45 years of surveying and engineering experience, including project management and production supervision across land development, commercial, residential and public-sector work. He has coordinated survey projects for TxDOT, the City of San Antonio Public Works, San Antonio Water System and Bexar County, serving as survey task leader supporting design surveys for multiple bond and roadway programs. He oversees office and field crew personnel, conducts quality control across field procedures and data collection and delivers services including 2D/3D mapping, ROW acquisition support, utility coordination and survey control.

Experience

TxDOT | *Statewide, TX*
More than 15 years managing TxDOT projects ranging from two to over 40 miles across the State of Texas. As survey task lead supporting the RPLS, instructed and supervised four 3-man crews working simultaneously to establish primary horizontal and vertical control for mobile LiDAR, validating against existing TxDOT control through GPS and conventional/digital leveling. Directed record and data research including deeds, plats, easements and ROW maps; design topographic surveys of streets, drainage and cross sections; visible utility recovery; and ROW marker recovery and boundary resolution to support roadway design and reconstruction.

City of San Antonio Capital Improvements | *San Antonio, TX*
Served as project manager on numerous Street and Drainage Bond program projects, including Bulverde Road (Loop 1604 to Evans), Jones Maltsberger (Redland to Thousand Oaks), DeZavala Phase I and Reed Road (Culebra to Military). Work encompassed design topographic surveying, ROW mapping and control establishment to support municipal roadway and drainage improvements.

San Antonio River Authority (SARA) | *San Antonio, TX*
Managed survey services across multiple SARA projects, including San Pedro Creek Culture Park, covering 10,400 LF of San Pedro Creek from the inlet tunnel to Guadalupe Street, the San Antonio River Museum Reach expansion, and the City of Seguin Walnut Hike and Bike trail from FM 78 to US 90.

San Antonio Water System (SAWS) | *San Antonio, TX*
Served as project manager on SAWS surveying assignments including the Leon Creek W-1 project from Highway 151 to Highway 90 and an open-ended surveying services contract. Work included topographic and boundary survey, ROW acquisition, and preparation of parcel plats and metes and bounds descriptions for easement acquisition across an approximately 16-mile pipeline corridor.

Eric Snell, RPLS

Project Surveyor

Education

B.A.A.S. Criminology, Survey Engineering Technology, Texas A&M University

Associations

Alamo Chapter 11, President - Texas Society of Professional Surveyors

Eric Snell brings over 25 years of land surveying experience across private and public-sector projects, with a hands-on management approach supported by extensive field expertise and bilingual capabilities. A second-generation surveyor, his experience spans oil field, construction, ROW and TxDOT surveying, as well as geodetic control and facility design. He earned his Texas RPLS license in 2014 and honorably served in the United States Marine Corps.

Experience

Pharr-Reynosa International Bridge | *Pharr, TX*
Served as project surveyor for the City of Pharr on a proposed twin bridge crossing. Coordinated directly with landowners, local and federal agencies and officials, engineers and surveyors in Mexico. Oversaw field crews conducting surveys of existing structures and topography, ROW determination and easement creation across a binational project requiring compliance with project and international standards.

Klein Road | *New Braunfels, TX*
Served as project surveyor for the City of New Braunfels, overseeing topographic and utility design surveys, ROW determination and preparation of parcel plats and descriptions for ROW and easement acquisition supporting roadway improvements.

Beback Inn Road | *Hays & Guadalupe Counties, TX*
Served as project surveyor, managing and coordinating right-of-entry and directing field crews for boundary surveying and determination, along with the design survey portion using aerial LiDAR to support corridor mapping and design.

Shauna Weinmann, PE

SUE Project Manager

Education

B.S. Civil Engineering

Registrations

Registered Professional Engineer: Texas (#123027)

Shauna is a Texas resident and registered Professional Engineer (PE) with over 16 years of experience designing and managing a variety of utility engineering projects in Texas including the City of Corpus Christi, City of Austin, Dallas TxDOT District and City of Houston. She specializes in SUE, utility coordination and utility relocation for public improvements including gas distribution, domestic water and fiber conduit. Shauna has vast project experience with the ASCE 38-22 Standard (Quality Levels D, C, B and A) for various municipalities.

Shauna collaborates with stakeholders to streamline engineering processes and achieve business objectives, enhancing productivity and implementing advanced technology solutions. She provides professional opinions on utility upgrades and system considerations for improvements for utilities, city improvements and public improvements within TxDOT and public ROW.

Experience

Brazos River Authority Williamson County Regional Raw Water System

TxDOT US 290 Segment Improvements

CenterPoint Energy Grant Road Improvements

MSA On-Calls for SUE and Utility Investigation Services:

- City of Corpus Christi
- Texas A&M University System
- Lower Colorado River Authority (LCRA) in Central TX

Firm Stability

Bowman is a nationally recognized, multidisciplinary engineering, surveying and professional services firm founded in 1995 as a small engineering practice. The firm has since grown to 108 offices nationwide, including eight across Texas, while retaining the responsiveness and local relationships that shaped it from the start. Bowman is fully licensed to practice engineering and surveying in the State of Texas and brings extensive experience supporting municipalities across the state and the broader southern United States.

Bowman's integrated survey, geospatial, engineering, planning and environmental services support public and private infrastructure projects of varying scale, from large developments and master-planned communities to transportation and utility infrastructure, and to on-call, rotation-list contracts like the one the City of Edinburg is soliciting under. Each team member's project experience with the City of Edinburg, or within the City, is described below alongside references.

City of Edinburg Projects

Stripes/7-Eleven Convenience Store Developments (multiple sites) | *Edinburg, TX*

Bowman provided civil engineering, landscape design and permitting services for three Stripes/7-Eleven convenience store and fuel canopy developments within the City of Edinburg, located at the intersections of W. Owassa Road and N. Jackson Road, W. Chapin Street and N. McColl Road, and E. Chapin Street and I-69C (N. Expressway 281). Site sizes ranged from approximately 1.9 to 4.3 acres, and each required a plat or replat through the City of Edinburg's process.

On each site, Bowman prepared site plan and plat submittals through multiple rounds of City review, designed public water, sanitary sewer and storm sewer utilities, and developed grading, paving, SWPPP, and landscape and irrigation plans conforming to City of Edinburg standards. Drainage design included underground detention sized to the City's requirements on the I-69C site, where Bowman also secured a TxDOT driveway permit.

TxDOT FM 2061–FM 3362 (Jackson Rd.) Widening | *Pharr, TX*
As Survey Project Manager, Gerardo Balderas, RPLS, led boundary resolution and ROW mapping, coordinated field crews conducting boundary recovery and directed development of a master basemap incorporating ownership data, stationing and TxDOT-required annotations. He also oversaw preparation and QA/QC of parcel exhibits and legal descriptions, managed an accelerated parcel delivery schedule and coordinated directly with property owners to support ROW acquisition, work totaling $107.2M in project cost.

Jeffrey L. Ratliff

CPS Energy On-Call Surveying | *San Antonio, TX*
Bowman provided on-call surveying services to CPS Energy in support of ROW and transmission engineering projects across the San Antonio region, completing 18 task orders of varying size and complexity since December 2024 under an as-needed contracting structure. The Bowman team included Assistant Project Manager John Garza; QA/QC Manager and Project Surveyor Eric Snell, RPLS; and survey team members Richard (Trey) Neubauer, RPLS; Eric Neve, SIT, RPIC; and Manuel Barelas.

Services included boundary resolution using deed research, record documents and recovered monumentation; preparation of easement plats and metes and bounds descriptions; ROW recovery; and survey control establishment using GNSS and conventional methods, with coordination among right-of-entry agents, landowners, and utility representatives to maintain schedules under constrained access conditions. Representative work included transmission corridor surveys of up to approximately 6.5 miles across 27 parcels, with all deliverables undergoing QA/QC review and final certification by a registered professional land surveyor.

Insurance

Insurance Information

Please see the following page for Bowman's current Evidence of Coverage, which details the types and amounts of insurance carried by the firm, including General Liability, Automobile Liability, Workers' Compensation and Professional Liability coverage. This certificate satisfies the insurance information requirement outlined in Section 4.2, Item 5 of RFQ 2026-6.

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY): 8/25/2025

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

Claims

From time to time, Bowman Consulting Group Ltd. ("Bowman" or "Company") is subject to various legal proceedings that arise in the normal course of our business activities. The following is a list of professional liability claims and proceedings against the Company during the past five (5) years, none of which we deem to be material or have any impact on the performance of the services to be rendered to our clients.

a) Dino Clean Car Wash, LLC v. Bowman Consulting Group Ltd. (2026) filed in the District Court of Collin County, Texas (416-03696-2026) alleging counts of breach of contract and negligence related to alleged design defects for Plaintiff's project. Company is vigorously defending.

b) Lokal Homes, LLC v. Bowman Consulting Group Ltd., et al (2026) filed in the Jefferson County District Court, Colorado (2025cv30710). Primary suit alleges construction defects and negligence against Lokal Homes, LLC and Lokal Homes. LLC filed a third party complaint seeking contractual indemnification and alleging negligence, contribution, and breach of contract against Company and others. Company is vigorously defending.

c) McCrory Construction, LLC v. Bowman Consulting Group Ltd. (2025). Suit filed in the United States District Court for the District of South Carolina-Charleston Division (2:25cv13659) for breach of contract and negligence related to design errors and omissions. Case settled and dismissed with no admission of wrongdoing.

d) Avora at Port Imperial Condominium Association, Inc. v. Bowman Consulting Group Ltd, et al (2025) filed in the Superior Court of New Jersey Law Division: Hudson County (HUC-L-2172-23). Company is one of 29 Defendants, Plaintiff is alleging negligence and construction defects against all defendants. Company is vigorously defending.

e) Katie Nothum v. Bowman Consulting Group Ltd, et al (2025). Suit filed in Superior Court of the state of Arizona in and for the County of Maricopa (CV2025-008982) for negligence. Case was dismissed in Company's favor, no settlement.

f) 888 17th Street Corporation. v. Bowman Consulting Group Ltd (2025). Suit filed in the Superior Court for the District of Columbia(2025-CAB-002219) for alleged breach of contract relative to a commercial lease. Case settled and dismissed with no admission of wrongdoing.

g) Hoefer Welker, LLC v. Bowman Consulting Group Ltd., et al (2025) filed in the Adams County District Court, Colorado (2025cv30049). Primary suit alleges construction defects and negligence against Hoefer Welker, LLC and Hoefer Welker, LLC filed a third party complaint seeking contractual indemnification and alleging negligence and breach of contract against Company and others. Company is vigorously defending.

h) Christian Brothers Automotive Corporation and CBH Properties v. Bowman Consulting Group Ltd, et al (2024). Claim filed with the American Arbitration Association (Case 01-24-0003-3676) alleging design errors. Case settled and dismissed with no admission of wrongdoing.

i) LG APT SC IRMO COLUMBIA. LLC v. Bowman Consulting Group Ltd (2024). Suit filed in Court of Common Pleas of Richland County, South Carolina (2024CP4001092) alleging design errors. Company is vigorously defending. Case settled and dismissed with no admission of wrongdoing.

j) Killkenny, Maureen v. Township of Abington, et al (2023). Suit filed in the Court of Common Pleas of Philadelphia County, Pennsylvania (2023-15351). Company is one of ten defendants in a civil suit alleging construction, design, and maintenance defects which resulted in personal injuries to Plaintiff. Company disputed any involvement in construction, design, and maintenance of property at issue. Voluntary dismissal in Company's favor, no settlement.

Claims

k) Wexminister Limited Inc. v. Bowman (2023). Suit filed in the Court of Common Pleas in Allegheny County, Pennsylvania (AR23-617) for alleged property damage following lease termination. Case was dismissed in Company's favor, no settlement.

l) JBG Smith Properties et al v. Bowman Consulting, et al. (2023). Suit filed in the Circuit Court of Arlington County, Virginia (CL20004392-00). Company is a third-party defendant in a civil suit alleging construction and design defects which resulted in personal injuries to Plaintiff. Voluntary dismissal in Company's favor, no settlement.

m) Walton Global Investments v. Bowman Consulting Group (2023). Suit filed in the United States District Court for the Eastern District of Virginia-Richmond Division (3:23-cv-00087) alleging defects in a due diligence report. Case settled and dismissed with no admission of wrongdoing.

n) JE Dunn Construction Company v. Bowman Consulting Group (2022). Suit filed in District Court, Denver County, Colorado (2022cv33535) alleging design errors and defects. Case settled and dismissed with no admission of wrongdoing.

o) Douglas N. Krening and Hannah J. Krening v. Jonathan Coppin and Elemental Homes (2021). Company is a third-party defendant in a civil suit filed in District Court, Douglas County, Colorado (2020cv030831) alleging construction and design defects. Case settled and dismissed with no admission of wrongdoing.

p) Hancock Builders LLC v. Alpha Geotechnical Materials LLC. Et. al (2021). Company is one of many defendants in a civil suit filed in the Superior Court of Maricopa County, Arizona (cv2020-055186) alleging construction and design defects. Case settled and dismissed with no admission of wrongdoing.

Professional Services Agreement

Professional Services Agreement

Bowman confirms that it has read and reviewed the City of Edinburg's Land Surveying Services Agreement, as provided for reference with RFQ 2026-6. Bowman confirms that it currently meets, or will meet prior to commencement of services, all prerequisite insurance requirements outlined in Section 3.2 of this RFQ, including Worker's Compensation, Comprehensive General Liability, Comprehensive Auto Liability, Employer's Liability and City's Protective Liability coverage at the specified limits.

If selected as a result of this solicitation, Bowman agrees to enter into the City's Land Surveying Services Agreement with the City of Edinburg, incorporating the terms, conditions and requirements set forth in this RFQ and the negotiated scope of services and billing rates.

Re: RFQ# 2026-6 – Land Surveying Services

Dear Mardoqueo Hinojosa and Edinburg Selection Committee,

Colliers Engineering & Design, Inc. ("CED") is pleased to submit this Statement of Qualifications in response to the **City of Edinburg's ("the City's")** Request for Proposals for Professional Land Surveying Services (Bid No. 2026-107). With more than 20 years of demonstrated experience delivering comprehensive land surveying services across Texas and the broader region, we are confident in our ability to provide the City with the technical expertise, responsiveness, and commitment to quality that this engagement demands.

Colliers Engineering & Design, Inc. is a Texas-registered Land Surveying firm fully authorized to practice in the State of Texas. Our comprehensive service capabilities include preparation of metes and bounds legal descriptions, plat reviews, field surveys, closure reports, deed research, property line identification, elevation surveys, rights-of-way determination, and the establishment of monuments and benchmarks. We understand that the City's on-call engagement requires a firm capable of mobilizing quickly and executing across a wide range of surveying disciplines, and our team is precisely structured to meet that need.

Our technical approach is grounded in rigorous quality control and quality assurance protocols at every phase of project delivery. From initial deed research and field data collection through final deliverable review and client acceptance, each project is subject to a formal QA/QC review by a licensed Professional Land Surveyor independent of the project team. This multi-tiered review process ensures accuracy, regulatory compliance, and consistency, minimizing the need for costly corrections and protecting the City's interests.

We recognize that public-sector engagements require more than technical proficiency; they demand **clear communication, transparency, and genuine collaboration** with municipal staff and community stakeholders. CED maintains a proactive stakeholder engagement strategy that includes regular project status updates, prompt response to City inquiries, and close coordination with Edinburg planning and engineering personnel **to ensure alignment with project objectives at every milestone.** We are fully prepared to execute a Land Surveying Services Agreement with Edinburg in a timely manner. Our team is appropriately staffed to support the on-call nature of this contract, with dedicated licensed professionals and field crews available to respond to task order assignments within the timeframes established by Edinburg. We commit to maintaining the availability and capacity necessary to support the City's surveying needs throughout the initial two-year term and any authorized extension.

The city of tomorrow is built on an accurate survey of today, and we welcome the opportunity to be the part of that foundation to the **City of Edinburg**. Should you have any questions regarding this submittal, please do not hesitate to contact me.

Sincerely,

Teresa A. Seidel, RPLS

Firm Qualifications & Experience

Colliers Engineering & Design

About Colliers Engineering & Design, Inc.

Colliers Engineering & Design ("CED") is a trusted provider of multi-discipline engineering, surveying, architecture, consulting and design services delivering customized solutions to public and private clients. Established in 1984 as Maser Consulting, Colliers Engineering & Design provides its same dedicated leadership, systems, and services to clients. We specialize in providing a comprehensive suite of services including survey/geospatial, subsurface utility engineering (SUE), architecture, civil/site, transportation, infrastructure, governmental, geotechnical/environmental, telecommunications, utilities/energy and project management.

Today, we are proud to say that we currently employ more than 3,500 professionals through a network of 80+ offices nationwide and beyond. Over its history, our company has consistently been recognized nationally by Engineering News Record as a Top 500 Design Firm and ranked on the Zweig Group Hot Firm List of fastest growing companies.

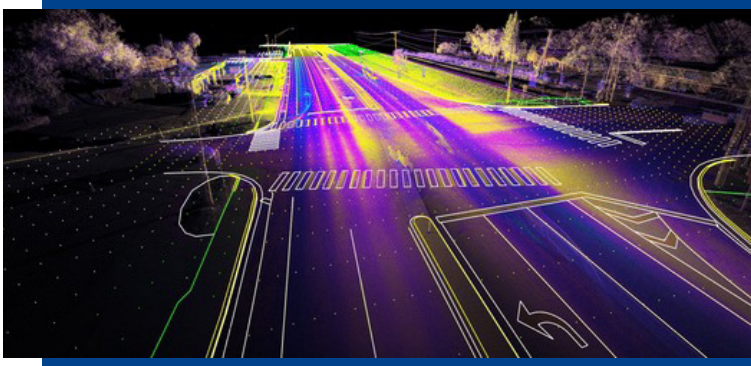
Survey & SUE

ARANSAS PASS | AUSTIN | BRYAN | DALLAS | HOUSTON
NEW BRAUNFELS | SAN ANTONIO | SOUTHLAKE

Colliers Engineering & Design's Texas survey and subsurface utility engineering (SUE) professionals combine conventional and cutting-edge geospatial technologies to deliver precision results. Our licensed surveyors provide topographic and boundary surveys, construction stake-out, as-built surveys, and hi-definition laser scanning. Our SUE experts operate in full accordance with ASCE 38 and ASCE 75, the standard guidelines for investigating and documenting existing utilities, and for recording and exchanging utility infrastructure data. We bring a thorough understanding of both how to investigate and document utilities and how to accurately record and share this information with our clients. This is achieved through our expertise in applying the appropriate quality levels and utilizing advanced survey technologies. We partner with DOTs, airport and transit authorities, developers, and other government agencies to identify and resolve utility conflicts before they affect project schedules or budgets. With a proactive approach to risk management and control, we deliver responsive, accurate, and comprehensive solutions from planning through design and construction.

We're continuing to expand our resources to meet the accelerated growth throughout the state. In addition to our standard services, we also provide:



- Hydrographic, Flood Elevation, Riparian & Wetlands Surveys
- Highway Route Surveys
- Aerial Photo Control Surveys for Mapping
- On-Call Traffic Accident Surveys
- Deformation and Displacement Monitoring Surveys
- Pipeline & Utility ROW Surveying
- Mobile LiDAR Route Mapping
- Drone LiDAR Surveying
- Highway & Rail Corridor Clearance Analysis
- Railway Corridor Mapping
- ADA Compliance Surveys
- Record Research & Compilation
- Utility Adjustment & Coordination Management
- Comprehensive Data Management & 3D Utility Modeling
- Integrated Survey Deliverables with Existing Utilities
- GIS Utility Information & Georeferenced Mapping
- Geophysical Utility Designation & Underground Utility Exposure
- Risk Envelope & Utilities Management
- Electric, Gas, Water, Sewer, Cable, Fiber & Phone Locating
- CCTV Inspection & Video Documentation of Pipelines
- Concrete Scanning, Evaluations & Conduit Mapping
- Excavation & Drilling Clearances

Municipal Survey Experience

Colliers Engineering & Design's professional survey team has an excellent track record for consistent, accurate, and thorough data collection and map preparation. Since 1984, our firm has been providing professional engineering and surveying services to municipal, federal, and local government agencies, as well as both public and private sector clients.

CED is Prequalified to Serve:

- Austin ISD
- City of Belton
- City of Bryan
- City of Corpus Christi
- City of Garland
- City of Seguin

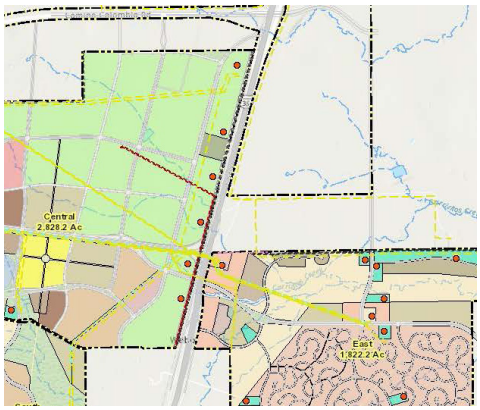
- San Antonio ISD
- TxDOT Austin District
- TxDOT Dallas District

Regional Survey Experience:

Colliers Engineering & Design's surveying footprint spans the entire state Texas, with significant experience in South Texas and the Rio Grande Valley. We are acutely aware of the conditions of this region and are confident in our ability to perform high quality work, no matter the project.

Our team has performed several jobs in the following nearby cities and counties:



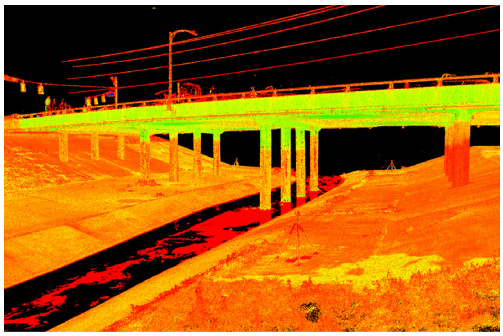
- Edinburg, TX
- Hidalgo County, TX
- Weslaco, TX
- Harlingen, TX
- San Benito, TX
- Brownsville, TX
- Rio Grande City, TX
- Starr County, TX
- South Padre Island, TX
- Concepcion, TX
- Corpus Christi, TX
- Webb County, TX

Key Projects

Intersection of Votech Drive and Pike Boulevard
Weslaco, TX

The intersection of Votech Drive and Pike Boulevard in Weslaco, Texas, has emerged as a critical traffic bottleneck due to the rapid expansion of the Mid Valley Industrial Park, ongoing operations at the Mid Valley Airport, and increased activity from Hidalgo County Precinct offices and other surrounding developments. The current all-way stop configuration is insufficient to manage the growing traffic volumes and associated safety concerns.

To address these challenges, the City of Weslaco has partnered with Colliers Engineering & Design to develop a comprehensive traffic engineering solution. CED will design a modern, roundabout that enhances traffic flow, improves safety, and accommodates both current and future transportation demands of the community. A desktop boundary survey was done to establish the project base map by obtaining high-quality aerial imagery of the intersection, overlaying approximate right-of-way limits from GIS sources, and researching public records to identify all site-adjacent property owners within the project limits.



Talise Development Survey and GIS App
Webb County, TX

Colliers Engineering and Design is performing survey and GIS services for the 13,000-acre Talise Development north of Laredo. Surveying services include boundary verification, ALTA surveys, metes and bounds descriptions, pin setting, staking, and topographic and improvement surveys. Much of the data collected and prepared by survey is then hosted in a GIS project delivery web service created by CED for this project. The Project Delivery web service allows georeferenced data to be displayed on a website that is accessible to all team members. Sharing data in this manner allows a graphical representation of all aspects of the project so that individual team members can see what is going on and plan accordingly. One of the most powerful features of the GIS website is the ability have have attributes assigned to everything. This allows a team member to click on a line and pull additional information about that line. For example, clicking on an easement line to pull up a PDF of the easement documents or clicking on a pipeline to tell if it is an existing or proposed pipeline, the owner of the pipeline, size, and length.

Navigation Waterline Design/Route Survey
Corpus Christi, TX

For the design of a new 12” waterline along Navigation Boulevard and Joe Fulton Corridor, Colliers Engineering & Design conducted a two mile topographic and Right-of-Way survey using Leica RTK-GNSS and Total Station equipment. Our team collected detailed data at specified intervals for all surface features including roads, drainage structures, railroads, above and below ground utilities, and existing infrastructure, while maintaining NAD ‘83 Texas South Zone horizontal datum and NAVD ‘88 vertical datum standards. We coordinated One-Call services for utility marking and documentation, and performed deed and easement research as required. Deliverables included sealed PDF drawings, CAD files with TIN, and ASCII point data.

Westside Creeks Ecosystem Restoration Project for Apache Creek

San Antonio, TX

The San Antonio River Authority initiated the Westside Creeks Project in 2008 as a community-driven effort to restore 11 miles of creekways that had been channelized during the 1954 San Antonio Channel Improvement Project aimed at federal flood control. Through an extensive public consultation process, the project was envisioned to revitalize the creeks in a manner that supports and enhances biodiversity, enhances water quality, creates public spaces for gatherings and recreational activities, raises cultural and historical awareness, and is sustainable with low maintenance costs.

Colliers Engineering & Design provided a field-run boundary survey, office computations, and 3D digital mapping for use in developing plans and specifications for the restoration of Apache Creek as part of this project. We surveyed along Apache Creek, from the confluence of Apache Creek and San Pedro Creek to Elmendorf Lake.

Brownsville Ship Channel Dredge Support Surveys

Corpus Christi, TX

Colliers Engineering & Design is providing hazard surveys, topographic surveys, and multi-beam before dredge surveys of the Brownsville Ship Channel to support an ongoing dredging project that will deepen the entrance channel, as well as develop two ship berths and a turning basin. In accordance with USACE standards, the hazard surveys and before dredge surveys were performed on the proposed dredge area of approximately nine miles. The survey extended 50 feet to the north and south limits of dredging, with an average width of 700 feet, as well as the proposed berth basin. An overhauser magnetometer was utilized to locate any ferrous hazards such as pipelines, debris, or other obstructions along the proposed dredge area. We also performed a sub-bottom survey to locate potential hazards below the seafloor to an estimated depth of 8-12 feet and a side scan sonar survey to create a high-resolution mosaic image of the seafloor and identify any exposed pipelines or potential hazards. A high resolution multi-beam system was utilized for the before dredge volume surveys.

Probandt Street (South Alamo Street to US Highway 90)

San Antonio, TX

CED served as a major subconsultant for this City of San Antonio project, which included corridor improvements for over 2.5 miles of roadway from S. Alamo to Hwy. 90. For Segment 1, CED conducted a topographical and improvement survey from the apparent right of way to the apparent right of way, spanning from Alamo Street to Steves Ave. This survey included detailing the intersections and railroad crossings, providing 50-foot cross-sections, and additional cross-sections at all driveways and intersections. In Segment 2, CED performed a topographical and improvement survey from the apparent right of way to the apparent right of way, covering the area from Steves Ave to Highway 90. This segment also involved detailing the intersections, providing 50-foot cross-sections, and additional cross-sections at all driveways and intersections. For Segment 3, CED conducted a topographical and improvement survey from the apparent right of way to the apparent right of way for the intersection of Alamo Street and Probandt Street.

History of On-Time Delivery

As a firm with a strong local presence in the Rio Grande Valley region, Colliers Engineering & Design offers the City of Edinburg the advantage of nearby personnel, reduced travel times, and direct access to experienced survey professionals familiar with regional conditions, permitting considerations, and project delivery requirements. This local availability enables us to provide responsive service, maintain effective communication, and support Edinburg's project needs with minimal delay.

Our track record of on-schedule and under-budget delivery reflect our commitment to stewarding the time and funding of the Municipalities we serve.

Ahead-Of-Schedule Delivery

West Texas Survey Success

Upon receiving a Notice to Proceed on May 15, 2026, our team immediately mobilized to execute a complex ±3,600-acre ALTA survey across four separate tracts in El Paso, Texas, utilizing advanced aerial photogrammetry and LiDAR. Through proactive daily communication and a seamless game plan, we bypassed typical industry bottlenecks to deliver the final product on June 26, 2026. By wrapping up this massive scope in just 32 business days, we shattered the expected 60-to-75-day schedule through sheer project dedication and prompt coordination.

The CED Advantage

We approach each project with a focus on accuracy, professionalism, and client satisfaction. This ensures that our deliverables meet or exceed client expectations and comply with regulatory standards. Our commitment to quality shows in every phase of our work, from the initial data collection to the final submission.

Accuracy & Technical Precision

- All survey work complies with state and local surveying standards, codes, and regulations
- We collect GPS field data using top equipment, ensuring accuracy and data integrity for every assignment
- Final deliverables, including plats, legal descriptions, topographic maps, and boundary surveys, undergo thorough review and are sealed by our Registered Professional Land Surveyor (RPLS) before submission
- Our surveyors follow strict internal quality control processes, including peer reviews, data checks, and final document verification before any work leaves our office

Past Performance & Client Satisfaction

- Clients, project owners, and contracting agencies consistently give positive feedback about the quality and professionalism of our deliverables
- We have a track record of minimal revisions and rework, reflecting our attention to detail and commitment to getting it right the first time
- Our team communicates actively with clients throughout each project to ensure clarity on scope, schedule, and deliverable expectations at each stage

85%

returning client rate

Range & Complexity of Assignments

- Our experience includes a wide array of survey types, such as boundary surveys, topographic surveys, construction staking, right-of-way surveys, GPS control surveys, and GIS data collection
- Successfully completed projects in challenging environments, including urban areas, heavily wooded terrain, and large tracts of land needing extensive GPS traversing
- Manages multiple concurrent assignments without sacrificing quality or timeliness for any project
- Each assignment, regardless of its size or complexity, receives the same level of attention and professional oversight

Quality Control & Documentation Standards

- We follow a structured quality control workflow for every project, which includes verifying field data, reviewing office processing, and a final check by an RPLS before submission
- We organize, maintain, and archive field notes, data files, and project records systematically to ensure traceability and accessibility throughout and after project completion
- All survey reports, plats, and supporting documentation are prepared to high standards, providing clients with clear and well-organized work products
- We strive for continuous improvement, regularly assessing our processes and integrating new technologies and best practices to further improve the quality of our survey services

Colliers Engineering & Design takes great pride in the quality of our work on every assignment. We understand that accurate and reliable survey data is essential to the success of any project that relies on it, and we hold ourselves to the highest standards in fulfilling this responsibility.

Local Responsiveness & Staffing Capabilities

This contract will primarily be staffed from CED's Aransas Pass office, with six Texas-licensed surveyors,6 Surveyors in Training (SIT), 4 survey technicians/drafters, 14 surveying field crews, 5 SUE field crews, and two Terrestrial LiDAR units. Additional capacity is available from CED's San Antonio, New Braunfels, Austin, Houston, Addison, Southlake offices. For expedited assignments, a rapid kickoff meeting is convened to align the full project team on scope, schedule, safety, and QA/QC before work begins.

Approach to handling part-time staffing needs for smaller assignments

For field services, CED maintains the personnel, equipment, and surveying resources necessary to respond efficiently to projects of varying size and complexity:

- Smaller Assignments (1–2 day field efforts): Survey crews can be mobilized and on-site within one week of receiving authorization to proceed.
- Larger Assignments (1 week+ efforts): For more extensive surveying programs requiring additional staffing, coordination, or specialized resources, survey teams can be mobilized and on-site within one to two weeks.

Section 2.1

Team Member Qualifications & Experience

Colliers Engineering & Design

We start with reliability. You get ***accuracy***.

CED's Texas Surveying Team operates on the core tenant that your projects rely on precision from the start. We provide all the services in-house that you need to protect your timeline, with extra-accurate ROW dedications and plan coordinations. At every step, our team of Texas Registered Professional Land Surveyors, Surveyors-in-Training, GIS analysts, and CAD technicians go further for your surveying needs. CED is equipped with advanced GPS, drone, and sonar technologies, and is proficient in delivering high-quality data products using AutoCAD Civil 3D, ArcGIS, and other industry-standard platforms. This team is well-prepared to meet the technical and operational demands of the City of Edinburg.

We have 14 Surveying Field Crews and 5 SUE Field Crews available to support Edinburg.

Section 2.2

Project Manager

Colliers Engineering & Design

Clayton S. Allen, RPLS

Senior Project Manager | Survey/Geospatial |
Proposed Role: Project Manager

Mr. Allen has experience in private, municipal & coastal engineering projects throughout the United States. He is an analytic self-starter with a commitment to safety, quality, and productivity, and can effectively react to changing conditions in a fast-paced work environment.

Education
BS in Ocean Engineering, Texas A&M University

Trimble Survey Equipment

Key Projects

Balli Park Construction

Corpus Christi, TX | Field Crew and CAD Technician

This project is in support of the expansion and remodel of Balli Park. Project scope included a topographic survey, locating the existing utilities, and above ground features for the design and construction. Deliverables include all above ground constructed materials and below ground utilities with plan and profile drawings with contours. Deliverables include PDF drawings and AutoCAD. For this 1-mile project, Mr. Allen served as the field crew and CAD technician.

Ayers & Alameda Street Construction

Corpus Christi, TX | Project Surveyor

Conducted a topographic survey of 2 miles of city ROW for roadway construction purposes. The survey included existing roadways, sidewalks, drainage and sewer inverts and locations, above and below ground utilities. Survey crews utilized Trimble total stations and RTK-GNSS for the survey to maintain a high level of accuracy. For this $50,000 project, Mr. Allen served as a field crew member and CAD Technician.

Navigation Blvd Construction Survey

Corpus Christi, TX | Project Surveyor

Conducted a topographic survey of city ROWs for roadway construction purposes. The survey included existing roadways, sidewalks, drainage and sewer inverts and locations, above and below ground utilities. Survey was conducted using Trimble total stations and RTK-GNSS for the survey to maintain a high level of accuracy. Mr. Allen served as field crew and CAD technician for this project.

Hughes Street Rail Drainage Project

Corpus Christi, TX | Project Surveyor

Mr. Allen, in his role as a Project Surveyor, created a design survey specifically for the Port of Corpus Christi. This survey was extensive and covered around 70 acres of land, encompassing both Port-owned and privately owned properties. It involved conducting various types of surveys, including topographic, property, and utility surveys. The main goal of this project was to develop a fresh drainage system for a significant commercial area within the Port. The team from Colliers

Engineering & Design effectively identified underground utilities that were not previously identified through one-call services, and they also relocated property boundaries that were initially established 60 years ago.

Lavaca Bay

Calhoun County, TX | Project Surveyor

Project surveyor for a depth of cover survey of a pipeline in Lavaca Bay. Located pipeline and collect depth of cover data. Staked areas where additional cover is needed.

City Waterline Survey, Alameda Waterline Replacement

Corpus Christi, TX | Field Crew and CAD Technician

This survey was conducted for an as-built waterline location. The existing utilities and ROW were located. Survey was conducted using Trimble total stations and RTK-GNSS for the survey to maintain a high level of accuracy. Deliverables included CAD files and an overview map. For this $10,000 project, Mr. Allen served as the field crew and CAD technician.

La Quinta Channel

Ingleside, TX | Site Engineer

Site Engineer for project to dredge Cheniere LNG ship terminal. Conducted multi-beam dredge surveys and topographic surveys of fill site. Performed project quantity surveys. Performed daily QA/QC checks on water quality and turbidity of fill site.

GLO Platform Removal Project at Copano Bay

Aransas County, TX | Project Surveyor

Project surveyor for project to remove a stationary platform in Copano Bay. Conducted pre and post single beam surveys and pre & post scans of the platform area.

Myrtle Beach Renourishment

Myrtle Beach, SC | Site Engineer

Site Engineer for dredging project to rebuild beach. Conducted topographic surveys of beach fill site. Performed project quantity surveys.

Forked River and Barnegat Bay Dredging

Lacey and Barnegat Townships, NJ | Site Engineer

Site Engineer for dredging project to remove material from Forked River channels and Double Creek Channel. Conducted single-beam dredge surveys and monitor upland fill site. Designed dredge and survey plans. Conducted daily QA/QC checks and create reports for NJDOT.

Lake Decatur Dredging Project

Lake Decatur, IL | Project Engineer

Project Engineer for dredging project to remove material from Lake Decatur. Conducted QA/QC single-beam dredge surveys and monitored upland fill site. Performed project quantity QA/QC surveys.

Section 2.3

Key Staff

Colliers Engineering & Design

Teresa A. Seidel, RPLS

Regional Discipline Lead | Survey/Geospatial |
Proposed Role: Principle-in-Charge

Teresa A. Seidel has over 36 years of experience in surveying and management. Mrs. Seidel, as a founding partner, has helped grow Colliers Engineering & Design's surveying team in Texas for over fifteen years. Her experience includes a wide range of surveying services including utilities, boundary, tree, topographical, design, site selection, improvements, route, and construction surveying. Her project background includes schools, municipal, transportation, commercial, industrial, multi-family, residential, military bases, and flood studies.

Key Projects

On-Call City Engineering

Shavano Park, TX | Surveyor

In 2016, CED was awarded an on-call City Engineering contract with the City of Shavano Park and has since been providing a variety of on-call requisite land surveying services, such as a tree and topographical surveys, for projects such as the Shavano Park Master Drainage Plan. Mrs. Seidel served as the Principal in Charge for surveying services provided.

City On-Call Traffic Engineering

San Antonio, TX | Surveyor

Colliers Engineering & Design's surveying department served as the land surveying consultant to a prime engineering firm and was awarded the City of San Antonio's On-Call Traffic Engineering contract. Mrs. Seidel has served as the Principal-in-Charge on each of these projects. Since then, we have provided services for various projects, including: West Commerce Street Pedestrian Crossing Improvements, Culebra Road Pedestrian Crossing Improvements, and Probandt Rails to Trails. Probandt Rails to Trails included corridor improvements for over 2.5 miles of roadway from S. Alamo to Highway 90. The team provided laser scanning and surveying services.

Bexar County On-Call Surveying

Bexar County, TX | Surveyor

Colliers Engineering & Design provided surveying services for various intersections for this COSA On-Call Traffic Engineering contract. We provided one call locates and topographical, tree and improvement surveys for the purpose of adding pedestrian refuge islands at major school crossing intersections.

City of Cibolo On-Call City Engineering

Cibolo, TX | Surveyor

Since 2017, Colliers Engineering & Design's surveying department has

been providing on-call surveying services to the City for projects such as the Venado Lift Station, Haeckerville Rd. Water Main Extension, and the Town Creek Drainage Review. Mrs. Seidel serves as the Principal-in-Charge for these services to the City.

On-Call Utility Locating for TxDOT Austin District

Austin, TX

As Principal in Charge, Ms. Siedel directed TxDOT Austin District's comprehensive utility mapping initiative across eleven counties. She oversaw the deployment of electromagnetic and ground penetrating radar technology to locate and document roadway lighting, communication infrastructure, traffic signals, and ITS components within state right-of-ways. Under her leadership, the team achieved an "A" rating from TxDOT while mapping utilities throughout Bastrop, Blanco, Burnet, Caldwell, Gillespie, Hays, Lee, Llano, Mason, Travis, and Williamson counties.

San Antonio Water System (SAWS) W-6 Upper Segment

San Antonio, TX | Surveyor

Mrs. Seidel led the team providing land surveying services for this sewer main project in San Antonio, Texas. The project consists of replacing approximately 19,000' of existing 54" sanitary sewer main with 29,000' of 60" and 90" gravity sanitary sewer pipelines. The project also includes tie-ins to two other projects, the W-1 Lower Segment, and the W-6 Middle Segment. Additionally, the project will include tie-ins to a number of existing smaller collector lines throughout the proposed alignment.

San Antonio Water System (SAWS) Dos Rios Water Recycling Plant

San Antonio, TX | Surveyor

Mrs. Seidel and her team conducted in-depth site visits in order to determine existing site conditions for five different areas within the Dos Rios Water Recycling Plant in San Antonio, Texas. Topographical and improvement surveys were conducted for all five areas, each being approximately 100' by 100'. As well, her team performed a ground survey using a 25' grid and located above-ground utilities and improvements in the areas.

Wurzbach Pkwy Intersection

San Antonio, TX | Surveyor

Mrs. Seidel and her team performed right-of-way verification at the intersection of Wurzbach Parkway and Lockhill Selma Road 500 FT in each direction and located the curb, concrete wall, and railing along the west side of Lockhill Selma before the bridge.

Westside Creeks Ecosystem Restoration Project for Apache Creek

San Antonio, TX | Surveyor

Mrs. Seidel and her team are providing a field-run boundary survey, office computations, and 3D digital mapping for use in developing plans and specifications for the San Antonio River Authority's Apache Creek Restoration Project. Survey limits include Apache Creek, from the confluence of Apache Creek and San Pedro Creek to Elmendorf Lake.

Additional Municipal Projects:

- COSA - Probandt Rails to Trails, San Antonio, TX
- CRWA Dunlap Plant, Lake Dunlap, TX
- City of Marion WWTP, Marion, TX
- Classen-Steubing Ranch Park Phase 1, San Antonio, TX
- Huebner Creek Enhanced Conveyance NWWC Segment III, San Antonio, TX

Corey Campbell, RPLS

Geographic Disipline Leader | Survey/Geospatial | Proposed Role: Senior Project Surveyor

Mr. Campbell is a Geographic Discipline Leader with almost two-decades of experience in surveying and CADD operations. His expertise includes performing topographic, ALTA, and boundary surveys; adjusting traverse and applying elevations to control; preparing plats and construction stakeout files; and creating surface models. He is also well-versed in GIS and has created an interactive TBM map, exported LiDAR to create surface models, and created aerial maps. Mr. Campbell has been involved in the surveying of transportation projects, commercial developments, TxDOT utility location projects, aerial photogrammetry control surveys, and Harris County Flood Control analysis projects. He utilizes MicroStation, Civil 3D, Carlson, GeoPak, ArcGis, and Trimble GPS software in the preparation of subdivision plats, right-of-way maps, control surveys, boundary surveys, ALTA surveys, topographic surveys, and preparation of metes and bounds descriptions.

Awards

2016 Scholarship Award, Associated General Contractors of America of Texas, Highway, Heavy, Utilities, & Industrial Branch

Key Projects

Fort Bend County LID No. 2 - City of Sugar Land

Fort Bend County, TX

Design improvements to internal and external ditches and levee system within the district. Mr. Campbell provided oversight of the topographic surveys of the ditches and levee system. The topographic surveys included detail of all drainage structures entering the ditches and detail of all bridge crossings. In addition, Mr. Campbell was responsible for the survey and establishment of all drainage channel ROW and adjoining properties. Mr. Campbell was also responsible for the placement of horizontal and vertical project control. The project control was established using GPS static sessions tied to monuments established by the subsidence district and used to map (LIDAR mapping) the entire Fort Bend County area. The project included using the following survey methods: GPS static / fast-static, Real Time Kinematic, and conventional leveling.

Fulbrook on Fulshear Creek - City of Fulshear

Fort Bend County, TX

672-acre master-planned community located in the ETJ of the City of Fulshear. Mr. Campbell's responsibilities include research for deed records, field reduction, boundary analysis, and topographic survey operations related to this project.

Veranda - City of Richmond

Fort Bend County, TX

600-acre master planned community located in the ETJ of the City of

Richmond. Mr. Campbell's responsibilities include research for deed records, field reduction, boundary analysis, and topographic survey operations related to this project.

IH 45 (Gulf Freeway) From Greens Road to Gulf Bank

TxDOT Houston District

This project consisted of horizontal and vertical control surveys for mapping along Interstate Highway 45, form Greens Road to Gulf Bank. The scope of work included obtaining right-of-entry, horizontal control surveys, vertical control surveys, and establishing permanent offsite GPS control points. Mr. Campbell was responsible for field reduction, obtaining horizontal and vertical ties to all buildings, structures, paving, dry and wet utilities. Mr. Campbell was responsible for reducing, all line connectivity, vertical and horizontal labeling, and cell placement.

LTRA - SH 288 – TXDOT - City of Houston

Harris County, TX

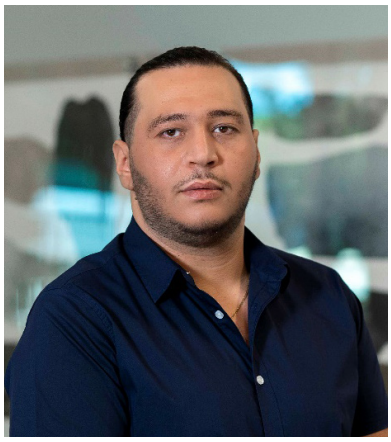
Responsible for field survey for SUE locations which consisted of obtaining horizontal and vertical ties to test holes, structures, dry and wet utilities along with annotation of boring depths. Mr. Campbell was also responsible for the placement of horizontal and vertical project control.

Green Tee to Riverstone Wastewater Diversion - City of Pearland

Brazoria County, TX

Field survey and design surveys for topographic and design survey. Mr. Campbell was responsible for GPS control calibration to existing City of Pearland control monuments reduction of all field crew data, annotation, and 3D modeling. Mr. Campbell was also responsible for the placement of horizontal and vertical project control, providing horizontal and vertical control surveys.

Wharton Academy - City of Houston



Harris County, TX

Obtaining horizontal and vertical ties to all buildings, structures, paving, dry and wet utilities. Mr. Campbell was responsible for reducing, all line connectivity, vertical and horizontal labeling, and cell placement. The scope included establishing the existing property boundaries and easements, and locating all buildings, adjacent street pavement, parking lots, sidewalks, utilities, fences, trees, playgrounds, and track. The survey was performed to support the design and re-construction of the school.

Riverstone - Cities of Sugar Land and Missouri City

Fort Bend County, TX

3,700-acre master-planned community located in the ETJ of the Cities of Sugar Land and Missouri City. Mr. Campbell's responsibilities include research for deed records, field reduction, boundary analysis, and include topographic survey operations related to this project, including design and construction surveys for numerous subdivision sections.

Abanop Henain

Department Manager | SUE Services | Proposed Role: SUE Coordination Lead

As a Senior Project Manager, Mr. Henain is responsible for helping oversee all aspects of Subsurface Utility Engineering (SUE) projects, including setting up, performing, completing, and managing projects pertaining to SUE. He oversees SUE crews and maintains standards for schedules, timeliness, financial performance, deliverables, and project-related correspondence of assigned projects. He focuses a particular emphasis on Quality Control and Quality Assurance while safely bringing in projects on-time and within budget. Mr. Henain has an experience in client management, project estimating, proposal writing, invoicing clients, and scheduling multiple field crews.

Key Projects

TxDOT ON-Call Locates

Austin District, TX |Senior Project Manager

Mr. Henain is responsible for overseeing the locate aboveground and underground utilities for traffic control and traffic management equipment's such as roadway illumination, duct banks, communications, and traffic signal cables in the state right of ways within the entire the Austin District. January 2024- Current.

Panther Junction

Big Bend National Park, Brewster County, TX | Project Manager

Mr. Henain was responsible for overseeing the SUE investigation within 348 acres corridor and coordination with the utility owner provided different records, which needed to be rectified with a field Level B investigation. December 2023- February 2024.

Las Colinas Towers

City of Irving, Dallas County, TX | Assistant Project Manager

Responsible for QC CAD file and coordination with the utility owners provided different records, which needed to be rectified with a field Level B investigation. Directed SUE teams to locate all utilities in the work area in support of the upcoming proposed construction project. The scope included 7 Level A test holes. CAD file and test hole summary sheets were provided. March 2021-April 2021.

New Laredo Hwy Utility Investigation

San Antonio, TX | Project Manager

Mr. Henain was appointed to conduct a thorough Subsurface Utility Engineering Investigation and Surveying. The project requirements encompass QL-D Records Research, QL-C Identification and Survey of visible utility features, QL-B utility designating for all existing utilities

within the proposed installation corridors, and QL-A Test Holes to verify utilities at identified and potential conflict locations. The deliverables for this project will include CAD files drawing that illustrates the utility information discovered along the proposed route for the new water line installation across New Laredo Highway.

Our Lady of the Lake University (OLLU) - St. Martin Hall Utility Investigation

San Antonio, TX | Project Manager

Mr. Henain performed a comprehensive Subsurface Utility Engineering Investigation and Survey. The scope of the project includes QL-D Records Research, QL-C Identification and Survey of visible utility features, and QL-B utility designating for all existing utilities. The deliverables for this project will include CAD files drawing that illustrates the utility information of all existing utilities discovered within OLLU St. Martin Hall property and the adjacent corridor (W Cesar E Chavez Blvd & SW 24th Street).

Naco Retail Utility Investigation

San Antonio, TX | Project Manager

Mr. Henain conducted a thorough Subsurface Utility Engineering Investigation and Surveying. The project requirements encompass QL-D Records Research, QL-C Identification and Survey of visible utility features, QL-B utility designating for all existing utilities within the proposed installation corridors, and QL-A Test Holes to verify utilities at identified and potential conflict locations. The deliverables for this project will include CAD files drawing that illustrates the utility information discovered along the proposed route for the new wastewater line installation across Nacogdoches Rd.

Northlake Phase 1 – Utility Investigation

San Antonio, TX | Project Manager

Mr. Henain performed a comprehensive Subsurface Utility Engineering Investigation and Survey. The project scope includes QL-D Records Research, QL-C Identification and Survey of visible utility features, QL-B utility designating for all existing utilities within the proposed installation and construction corridors, and QL-A Test Holes to confirm utilities at identified and potential conflict locations. The deliverables for this project will consist of CAD files that illustrate the utility information identified along the proposed driveways, as well as the installation of water and sanitary sewer lines within the property limits and along the adjacent streets (Burshard Rd and Garden Rd).

Griffin Street & Pine Street

City of McKinney, Collin County, TX | Assistant Project Manager

Assistant Project Manager - responsible for QC CAD and TH summary, checking QL (A, B, C & D). Coordinated with SUE teams to locate all utilities in the work area in support of the upcoming proposed construction project. Coordination with the utility owners provided different records, which needed to be rectified with a field Level B investigation. CAD file and TH summary sheets were provided. April 2020-November 2020.

NTMWD Wylie to Rockwall

City of Wylie, Collin County, TX | Assistant Project Manager

Responsible for assisting with project management portion of the SUE investigation along this 2-mile corridor and coordination with the utility owners provided different records, which needed to be rectified with a field Level B investigation. The scope included 17 Level A test holes up to 15 feet deep. CAD file and TH summary sheets were provided. January 2020-September 2020.

Section 2.4

Support Staff

Colliers Engineering & Design

Charlie Phipps

Project Manager | SUE Services | Proposed Role: SUE Support

Mr. Phipps is a Subsurface Utility Engineering (SUE) professional who applies the ASCE Standard 38-22 civil engineering practices to provide clients with accurate graphical representation of existing utilities of a given project area. As SUE Manager, Mr. Phipps prepares client proposals and estimates, coordinates SUE staff, and subcontractors for project execution. Reviews and processes SUE field data on assigned projects. Mr. Phipps supplements his office experience with his 15+ years of combined field experience in SUE and Survey industries. Early in his career, he started as a survey Party Chief. Mr. Phipps was then introduced to SUE in 2002 where he began designating utilities and performing vacuum excavation test holes. Mr. Phipps eventually worked his way into the office completing SUE CAD deliverables in AutoCAD and MicroStation. Mr. Phipps's project experience ranges for client such as TxDOT, Municipality water and wastewater, Educational Facilities (State Universities/Local ISD Campuses), Private Development sites, Energy Oil and Gas fields and pipeline mapping, overhead electrical transmission route investigations for ONCOR and LCRA. Rail experience for both UPRR and BNSF railroads for new siding-track design, and high-speed rail route SUE investigation.

Key Projects

Tickey Creek Force Main & Lift Station

City of Princeton, TX | SUE Project Manager

Mr. Phipps oversaw and managed all field crews conducting Quality Level B SUE utility designation, Quality Level A SUE test holes, and CAD deliverable production. The SUE work encompassed utility records research, field investigations, utility designation, and air-vacuum excavation for test holes. Project involved ten (10) QLA test holes on specific existing utilities that crossed the proposed force main alignment. Coordination of traffic control and Hydro-Vac subcontractors, and pipeline representatives. A detailed QLB SUE investigation in the lift station facility, where the two proposed force mains were to connect into existing infrastructure.

WTCPUA Cross Country Transmission Main

Travis County, TX | SUE Project Manager

Mr. Phipps was responsible for complete oversight and management of Quality Level D SUE utility mapping, utility records research and CAD deliverable. Project Investigation was a 6-mile corridor 200ft wide for a proposed water transmission main design and installation to support the population growth in the area.

Hutto Arterial 132 & 134 Extension and Re-Alignment

Williamson County, TX | SUE Project Manager

Mr. Phipps provided complete supervision and coordination of field

crews executing Quality Level D SUE utility CAD deliverable completion. His responsibilities covered utility records research, field investigations, and ensuring all deliverables met TxDOT CAD Standards in MicroStation format. Project is for a QLD SUE investigation 200ft wide for 6.5 miles design re-alignment for existing County Road 132 & 134 in Williamson County Texas.

WTCPUA HWY 290 Transmission Main

Dripping Springs, TX | SUE Project Manager

Mr. Phipps was responsible for complete oversight and management of all field crews Quality Level B SUE utility designating, Quality Level A SUE test holes, and CAD deliverables. SUE efforts include utility records research, field investigations, utility designation and air-vacuum excavation (test holes). Project Investigation is an 8-mile corridor 200ft wide for a proposed water transmission main design and installation to support the population growth in the area.

TxDOT IH-35 Central 7 Improvement Corridor

Austin, TX | SUE Manager

Mr. Phipps was responsible for complete oversight and management of all field crews Quality Level B SUE utility designating, Quality Level A SUE test holes, and CAD deliverables. SUE efforts include utility records research, field investigations, utility designation and air-vacuum excavation (test holes). Deliverables were provided in MicroStation format and in accordance with TxDOT CAD Standards.

LCRA "CREZ" Twin Buttes to Big Hill and Big Hill to Kendall

San Angelo, TX to Comfort, TX | SUE & Survey Manager

Mr. Phipps was responsible for proposed structure location stake out and scanning site for underground utility conflicts. Provided real-time utility conflicts data to client for proposed structure placement assessment and on the fly adjustments. SUE investigation duration of approximately two and half years and spanning distance of 177 miles of the vast remote parts of west Texas.

Austin Bergstrom International Airport Mid-Field Taxi Way

Austin, TX | SUE Project Manager

Organized SUE field crew's efforts. Review QLB field data and CAD deliverables. Mid-Field Taxiway is the most recent effort to continually modernize and expand the air traffic for ABIA (AUS).

Oncor – Sandow to Hutto Overhead Electrical Transmission Route Re-Build

Rockdale, TX | SUE & Survey Crew Chief

Mr. Phipps was responsible for accurate structure stake out of the proposed structure locations and scanning for underground utility conflicts. Provided any utility conflicts found to client for structure placement modification. Project distance of SUE investigation of 31 miles.

Monahans Water Well Field Utility Mapping

Monahans, TX | SUE & Survey Crew Chief

Mr. Phipps was on the team providing SUE field designator for new water pipeline installation across the water well fields though the sand dunes of Monahans, Texas.

TxDOT – SH130

Austin, TX | SUE & Survey Crew Chief

Mr. Phipps is responsible for collecting the designated utility data and preparation of SUE CAD deliverable.

Claudia González-Liendo, PE

SUE Engineer | SUE Services | Proposed Role: SUE Support

Ms. González-Liendo has more than 32 years of transportation industry experience, including 25 years with TxDOT and seven years in the private sector. As a Subsurface Utility Engineer, she provides utility engineering and coordination services for complex transportation projects, including utility investigations, conflict analysis, stakeholder coordination, and utility risk mitigation. Her extensive background in transportation design and construction, combined with her deep knowledge of TxDOT procedures and utility coordination, supports the successful delivery of urban and rural roadways, highways, and on- and off-system bridge projects throughout Texas.

Key Projects

FM 70/SH 286, PCI Roadway, SW3P and Utility Task Lead, TxDOT Corpus Christi District

Nueces County, TX

Served as a sub-consultant to a prime engineering firm on three (3) separate PS&E packages for adjacent roadway limits. As Task Lead for roadway, SW3P, and utility work, Ms. González-Liendo directed the in-house team through the design of several intersections, maintaining consistent coordination with hydrology/hydraulic designers. SW3P design required close review of the proposed TCP. Ms. González-Liendo managed all utility coordination, overseeing the relocation or adjustment of multiple utility types to eliminate conflicts with proposed construction and ensure compliance with TxDOT and Texas Administrative Code requirements. Coordination included review of two Standard Utility Agreements (SUAs). Ms. González-Liendo also prepared multiple scope and fee proposals for additional engineering services as the design evolved. Design, specifications, and estimates for all three PS&E packages were completed and submitted on schedule.

Frio City Road Outfall PH 1

San Antonio, TX

As Project Manager, Ms. González-Liendo managed a multidisciplinary design team of in-house personnel and sub-consultants to deliver drainage improvements for an older section of south downtown San Antonio, including reconstruction of roadway and public utilities (SAWS water and sanitary sewer, and CPS gas). Ms. González-Liendo coordinated with numerous entities (TxDOT [multiple districts], SARA, USACE, and Union Pacific Railroad) as well as private sector stakeholders, most notably in support of CoSA's pursuit of a drainage easement through private property. Ms. González-Liendo oversaw the project from inception through final 100% PS&E, including contract documentation preparation.

Kelly Kephart

Senior Project Manager | Survey/Geospatial
Proposed Role: Survey Support

Ms. Kephart is a Senior Project Manager with over 20 years of professional experience supporting civil engineering, land development, and survey/geospatial operations. She specializes in operations coordination, platting, entitlement support, and project management, providing strong cross-functional leadership across multi-office and multidisciplinary teams. Ms. Kephart is highly effective at driving process efficiencies, ensuring regulatory compliance, and supporting complex development projects, consistently balancing technical requirements with clear stakeholder communication in fast-paced, deadline-driven environments.

Education

AA, Business Administration and Management, American InterContinental University

AAS, Computer-Aided Drafting, ITT Technical Institute – San Antonio

Professional Registrations

Notary Public, State of Texas

Key Projects

Voges Condominiums

New Braunfels, TX

Ms. Kephart served as Senior Project Manager for the Voges Condominiums project, providing oversight of survey support, platting coordination, and land development activities. Her responsibilities included coordinating surveyors, engineers, and consultants; managing plats and entitlement submittals; and supporting alignment between survey deliverables, design intent, and jurisdictional requirements.

Rose Valley Unit 2B Residential Subdivision

San Antonio, TX

Ms. Kephart served as Senior Project Manager for the Rose Valley Unit 2B residential subdivision, comprising 133 single-family lots. She provided project leadership for survey coordination, platting, and agency approval processes, managing schedules and submittals while ensuring regulatory compliance and timely progression of development milestones.

Gibbon Creek Development

College Station, TX

Ms. Kephart served as Senior Project Manager for the Gibbon Creek development in College Station, providing project oversight in support of survey, platting, and land development activities. Her role included managing schedules and deliverables, coordinating across multidisciplinary teams, and facilitating jurisdictional review and approval processes.

Past Experience in Edinburg

While our firm has not worked directly with the City of Edinburg, we have worked within the City of Edinburg conducting a cultural resource investigation for the Hidalgo County Drainage Ditrict No. 1.

Hidalgo County Drainage District No. 1 - Intensive Phase 1 Cultural Resource Investigation

Edinburg, TX

Our team conducted a Phase I cultural resources investigation for the Hidalgo County Drainage District No. 1's proposed Neuhaus Ditch Reroute project. The project entailed filling the existing ditch and excavating a new alignment approximately 2,400 feet long and 150 feet wide. To test for the potential presence of deeply buried archaeological deposits within the project area, four backhoe trenches were excavated to sterile soils under the supervision of our team of geoarchaeologists.

We identified architectural and archaeological resources that could be impacted by the project and offered recommendations for avoidance. Based on the survey results, we determined that the project will not affect the area's intact, significant cultural resources.

In compliance with Section 106 of the National Historic Preservation Act (36 CFR 800) and the guidelines set forth by the Texas Historical Commission, we recommend a finding of "No Historic Properties Affected" [per 36 CFR 800.4(d)(1)] for the project area. This assessment ensures that the proposed development can proceed without adverse effects on cultural resources, aligning with federal and state preservation standards.

Professional Services Agreement

Proposed Exceptions

3.2. INSURANCE REQUIREMENTS

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker's Compensation Statutory Coverage

Comprehensive General Liability

(City ~~named~~ included as additional insured)

City's Protective Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Policies must ~~name~~ include the City of Edinburg as an Additional Insured.

Certificates of insurance ~~naming~~ including the CITY as an additional insured shall be submitted to the CITY for approval prior to any services being performed by Contractor. Each policy of insurance required hereunder shall extend for a period equivalent to, or longer than the term of the Contract, and any insurer hereunder shall be required to give at least thirty (30) days written notice to the CITY prior to the cancellation of any such coverage on the termination date, or otherwise. This Contract shall be automatically suspended upon the cancellation, or other termination, of any required policy of insurance hereunder, and such suspension shall continue until evidence that adequate replacement coverage is provided to the CITY. If replacement coverage is not provided within thirty (30) days following suspension of the Contract, the Contract shall automatically terminate.

Reason for Insurance Exceptions: The revision reflects the Contractor's current insurance policy language. An additional named insured is for subsidiaries and affiliated only. The City will be included as an additional insured via blanket endorsement.

RE: Request for Qualifications for Land Surveying Services Rotation 2026-6

Dear Mr. Hinojosa and Members of the Evaluation Committee:

Halff appreciates the opportunity to submit this statement of qualifications for Land Surveying Services for the City of Edinburg. We are excited about the opportunity to continue working for the City and help improve its residents' quality of life. Halff has assembled an experienced team that will make sure any project assigned will be a success. Our firm's staff of more than 1,300 surveyors, engineers, architects, landscape architects, and scientists all stand ready to assist the City on the projects assigned.

Experience In All Required Fields - Our team is comprised of members with experience that covers every aspect of surveying, mapping, and GIS. They include:

- Land Title/Boundary Surveys
- Legal Descriptions
- Right of Way Surveys
- Survey Alignments
- Benchmark Surveys
- Topographic Surveys
- Tree Surveys
- Utility Surveys
- TSPS Category Surveys
- Aerial Surveys
- As-Built Surveys
- Hydrographic Surveys
- Bathymetric Surveys
- Geodetic Surveys
- Environmental Surveys
- Easement Surveys
- ALTA Surveys

The Halff team has experienced staff available and ready to begin working immediately to meet the city's project execution schedule. Our surveying staff of 62 employees operate as a team out of both our Brownsville and McAllen office and are available at a moment's notice to assist city staff. We work in conjunction with all our Texas offices to support and be supported to expedite large projects. Halff has a proven record of completing projects on time and within budget. We exercise tight project controls so that your projects are delivered as expected.

We are committed to providing immediate response, anticipating the city's needs, and serving as your partner and advocate. I encourage you to contact the references listed in our qualifications about our dedication, responsiveness, and client care. As Halff's VP Operations Manager, I am authorized to bind our firm into a contract with the City. Please contact us at 956.664.0286 if you have any questions or concerns.

Sincerely,

Marcos Diaz, PE
Principal-in-Charge
Vice President, Operations Manager, McAllen

Guadalupe Nuñez, Jr., RPLS
Project Manager
Survey Team Lead

Halff acknowledges receipt of all addenda and includes their content within our Statement of Qualifications.

Firm Qualifications & Experience

Firm Information

Company Profile

Halff is a full-service engineering firm designed, engineered, planned, constructed – and purposed – for people. Since 1950, we've been creating smart solutions that improve lives and communities by turning ideas into reality. The firm provides services throughout the Southeast from 32 offices in Texas, Arkansas, Oklahoma, Louisiana, Arizona, Georgia and Florida. The firm's staff of 1,300 includes engineers, planners, scientists, and surveyors. Halff is ranked #100 in Engineering News-Record magazine's list of the top 500 design firms in the United States. The firm was founded in Dallas in 1950 by Albert H. Halff, PhD-Eng., PE. Today, Halff preserves Dr. Halff's legacy of integrity, dedication to client service, and commitment to quality. Halff develops smarter solutions for a variety of market sectors. No matter the size or scope of the project, every one of our solutions is designed with a single purpose: our client's success.

Halff was founded on a core tenet: Focus on people, treat them well and success will follow. It's no wonder, then, that our employees, and the culture they create, define us. We are members of a company built on integrity, technical knowledge and commitment to client service.

As a firm, we perform numerous surveying and right of way acquisition projects for TxDOT, as well as counties and municipalities throughout the State of Texas. Halff owns the equipment necessary to deliver fast, efficient fieldwork. Our survey equipment includes, but is not limited to, Robotic Stations, Total Stations, Data Collectors, EDMs, Theodolites, Levels, surveying software and GPS Receivers that increase both the speed and accuracy of the fieldwork. Halff has the experience to meet the City of Edinburg's needs on the diversity of assignments required in this contract.

Office Location

The Halff McAllen office will provide surveying services to the City of Edinburg as the base location in the Rio Grande Valley (RGV). Guadalupe Nuñez, Jr., RPLS will serve as project manager and is supported by Marcos Diaz, PE who is authorized to represent the firm in negotiations and to fulfill contractual obligations.

Our survey team office routinely executes projects for the public and private sectors. All work performed under this on-call contract will be completed exclusively by our RGV staff with services delivered 100% locally, and without reliance on our corporate headquarters or other offices.

The McAllen office is located at:
5000 West Military Highway, Suite 100
McAllen, TX 78503
Tel: 956.664.0286; Fax: 956.664.0282

The McAllen office has a staff of 62 that includes 1 RPLS, 3 Survey Technicians, and 4 survey crews. In addition to our McAllen staff, our Brownsville office includes 17 staff and one survey crew who often work collaboratively on projects, augmenting the local resources available for projects in the valley.

The McAllen office can execute any of the City of Edinburg's projects described in the scope of services for the RFQ. It includes support from our many Halff offices as needed. Our survey teams work collaboratively using long-established remote work capabilities allowing us to augment resources whenever needed. This arrangement enables the City of Edinburg to interface directly with local personnel while being confident that they are supported, if required, by the resources and experience of the entire company.

Halff commits to the City of Edinburg that no other firm will work harder than us to perform the highest quality surveying services within the City of Edinburg's project timeframe.

Resources

Halff possesses the capabilities and capacity to deliver a comprehensive range of services to support the City's Surveying Services Contract. At Halff, we foster a culture of teamwork, enabling a workshare process that involves other branch offices as needed to assist with our projects. Our field crews are highly experienced in surveying and mapping for the design of roadways, bridges, channels, pipelines, utilities, right of way, boundary, topographic surveys, geodetic networking, aerial ground controls, pre-construction surveys, and hydrographic surveys. Halff survey teams utilize state-of-the-art equipment and software, and continuously stay updated on emerging technologies to provide innovative solutions that enhance the efficiency and accuracy of our data collection.

Familiarity

Halff values its long-standing partnerships with cities across Hidalgo County and South Texas and looks forward to continuing service to the City of Edinburg. Our survey teams are local community members with a vested interest in the growth and sustainability of the communities we live in for years to come.

- McAllen Economic Development Corp.
- McAllen Public Utility

Ability to Plan and Execute

Halff's planning process is the foundation that leads to the successful execution and completion of our projects. We hold a project kick-off meeting before mobilizing field crews and releasing office staff to begin work.

At the meeting, valuable information is shared with the team including the Traffic Control and Safety Plan, local emergency numbers, site-specific challenges and hazards, scope of work, survey methodology plan, deliverable expectations, applicable standards and specifications to follow, project budget, and schedule. In our experience, proper planning is critical to the successful execution of a project. Our planning methods start the project with clear expectations and roles/responsibilities for all involved with the project.

Benefits to the City of Edinburg

A collaborative team that will be responsive to the needs of City staff. Efficient communication, rapid response, and an integrated team.

A well-resourced team experienced in projects of varying size and complexity, with local personnel and based out of our McAllen office to provide support.

A staff with strong knowledge and technical expertise performing survey services.

We have a pool of surveyors who can be called upon to help keep any project on schedule.

© Halff - 2026

Halff has provided an array of different surveys throughout Hidalgo County, including in the City of Edinburg and municipalities throughout the South Texas. **Below are a few common surveys that Halff has performed:**

Boundary surveys involve correlation of legal records with field information to produce a map locating the property lines, land area, legal description, and conflicts that may affect title.

Improvement surveys involve gathering existing boundary survey information and mapping all improvements. This type of survey is used to verify completed construction projects and to document issues that may affect property title. These surveys are generally requested by title companies for closing on construction loans or land title transactions

Topographic surveys involve gathering horizontal and vertical data necessary to prepare a map showing the surface relief natural features and man-made objects on the site. This type of survey provides information similar to an aerial survey, but typically involves mapping smaller areas in greater detail.

Aerial surveys involve executing horizontal and vertical control work required to develop accurate aerial maps. Aerial mapping is an easy, cost-effective way to generate information about an area for preliminary studies or designs. The survey work is often tied to the boundary or the national geodetic network to strengthen the control.

Hydrographic surveys involve gathering horizontal and vertical data to determine facts about a body of water. The most common tasks associated with hydrographic surveying are the determination of the size, depth, and bottom configuration of a body of water, and the land area subject to flooding from a nearby watercourse.

Geodetic surveys involve precise surveying over large areas, taking into account the size and shape of the earth. This type of work can be horizontal, vertical, or both.

Survey for design involves gathering horizontal and vertical information necessary for the design of engineering plans.

Environmental surveys involve the identification and location of specific natural features. This varies depending on the needs of the client and the characteristics of the site.

Construction surveys include locating building corners, utility lines, and street curbs for construction. The horizontal location of these new features within a project is determined with reference to property lines, in such a manner that facilitates construction. Elevations for the stakes are then established and a “cut” or “fill” depth is calculated to give the proper vertical location of each feature.

Right of Way Acquisition Halff has the resources and experience to provide right of way acquisition services. Our team has experience providing all services needed for ROW Acquisition.

Halff’s surveyors are accustomed to following the federal, state and local standards and specifications that govern our work. We are also familiar with and prepared to provide the city with all of the additional requirements as described in the RFQ Scope of Services for land and topographic surveys.

© Halff - 2026

Halff fully understands the importance of responding on short notice to the City of Edinburg's needs and commits to providing the necessary resources in a timely and cost-effective manner. Throughout this contract's duration, we propose to have a dedicated field crew whose primary assignment is responding to the needs of the City of Edinburg. Our field crew can begin work immediately upon receipt of a notice to proceed from the City of Edinburg.

Scheduling

The team for this project has the staff and equipment resources available to execute the tasks associated with this contract. The availability of key project personnel is as follows:

Project Team Availability

Personnel	Nature/ Role	Availability
Guadalupe Nuñez, Jr.	Project Manager	50%
Raul Garcia, Jr.	Deputy Project Manager	50%
Marcos Diaz	Principal-in-Charge	25%
Andy Shafer	QA/QC Manager	35%
Jody Gafford	Survey Lead	75%

Our staff covers all relevant surveying and support disciplines, and our Project Manager, Guadalupe Nuñez, Jr., has the capability to assign personnel to meet any schedule, with support from Principal-in-Charge, Marcos Diaz, and to allocate any company-wide resources needed to effectively conduct the services associated with this contract.

Communication

In executing this project, we offer a staff that is eager to begin work immediately and will continue to work on an on-call basis for the duration of the contract. Throughout the contract's duration, Project Manager, Guadalupe Nuñez, Jr., will conduct team production meetings. At these meetings, she will discuss the work accomplished to date, work to be accomplished, and resources needed. The meetings will address the status of tasks related to the contract. Based on the discussions at these meetings, Halff can efficiently provide additional resources that may be required. The issues discussed in the production meetings will be included in monthly progress reports to the City of Edinburg. The progress reports are a written backup of activities containing information on the tasks accomplished during the previous month, status of investigations under contract, issues that affect the execution of the contract, and a timely summary of work performed for monthly billing.

Proposed Consultants

Our team offers a one-stop shop for any project the City may assign through this RFQ. We provide Surveying; Civil Engineering; Planning; Right of Way; Environmental Engineering; Mechanical, Electrical and Plumbing (MEP) Engineering and Construction Administration services out of our local Valley office. In addition, we have the support of over 1,300 surveyors, engineers, architects, planners and scientists from our 32 other offices across Texas, Oklahoma, Louisiana, Arkansas and Florida. **For this reason, we do not anticipate needing any subconsultants on our projects with the City of Edinburg.**

Areas of Specialization

Halff's areas of specialization include the following:

- Survey
- Right of Way
- Geospatial
- Geographic Information Systems
- Public Works
- SUE
- Artificial Intelligence
- Broadband
- Construction Services
- Energy
- Environmental
- Federal
- Flood Infrastructure Design
- Funding Resources
- Local Infrastructure
- Structural Engineering
- Intelligent Transportation Systems
- Land Development
- MEP Engineering
- Planning & Landscape Architecture
- Subsurface Utility Engineering
- Utility Coordination
- Transportation
- Transit
- Water Resources
- Water/Wastewater

© Halff - 2026

Public Project Work

The following projects are examples of the firm's experience and history in performing On-Call surveying services in the past five years.

City of Edinburg On-Call Surveying Services, Edinburg, TX

This is a two-year on-call surveying contract with the City of Edinburg. Previous work consisted of the preparation of a Category 1B, Condition IV Property survey of the proposed Fire Station #5 site. The survey was required to begin the subdivision platting process. The site is 5.5 acres. Halff also prepared the subdivision plat and submitted it to the City of Edinburg for staff review. It is currently in the review process with the City and should be completed within the next month. Coordination with Hidalgo County Drainage District #1 was also required to approve the drainage statement. Horizontal and vertical control were established utilizing the Texas State Plane Coordinate System. Property survey and subdivision plat were prepared to meet board rules.

City of Alton On-Call Surveying Services, Alton, TX

Halff has provided on-call surveying services for the City of Alton since 2015. Projects under the current contract include property surveys, as-built surveys, topographic surveys, aerial surveys, hydrographic surveys, geodetic surveys, survey for design, environmental surveys, and construction surveys. Representative projects include the Category 1A Conditions Survey and easement for the existing fire station and water tower site, a subdivision plat for the water site, and a topographic survey for the Josefa Garcia Park.

City of McAllen On-Call Surveying Services, McAllen, TX

This contract began as a one-year contract originally approved in 2009. Since that time, Halff has extended the contract with the City annually. Halff's services under this contract include the preparation of Property Surveys and topographic surveys throughout the City. Property Surveys were prepared to meet board rules. Topographic surveys were prepared to meet board rules and City of McAllen standards. All horizontal and vertical controls were established on McAllen datums. Project assignments have included property surveys for lift stations, metes, and bounds descriptions for multiple tracts of land, topographic surveys, stakeouts of boundary corners, and various additional survey requests.

Other Similar Project Experience

The following projects demonstrate the recent firm experience relative to the performance of similar services for public entities.

Mile 9N and FM 1015, Project Area 24, HCDD1, Hidalgo County, TX

Halff performed a flood assessment and prioritized projects. This ongoing project provides the H&H study, engineering design, bidding assistance and construction administration services for a much-needed drainage project for the Las Brisas and Chapa Drive communities. The improvements consist of widening two miles of drainage ditch, rerouting and extending 0.4 miles of drainage ditch, enlarging culvert and storm sewer crossings, constructing multiple detention ponds (totaling 36 acres) and constructing a pump station with two 70 cf vertical turbine pumps that discharge into the International Boundary and Water Commission (IBWC) Floodway. Halff responded to survey requests within 24 hours and provided reports within a day of fieldwork completion.

Completed: 11/2021

City of Edinburg, Cano and Veterans Blvd Trail, Edinburg, TX

As part of the City of Edinburg On-Call contract, Halff performed a 1.25-mile topographic survey from 13th Street along Cano St. to Veterans Blvd and from Veterans Blvd south to Dawson Dr. The project is for a walking trail designed by the city. Halff survey crews performed the control survey for the project and collected topographic data along the project within the right of way.

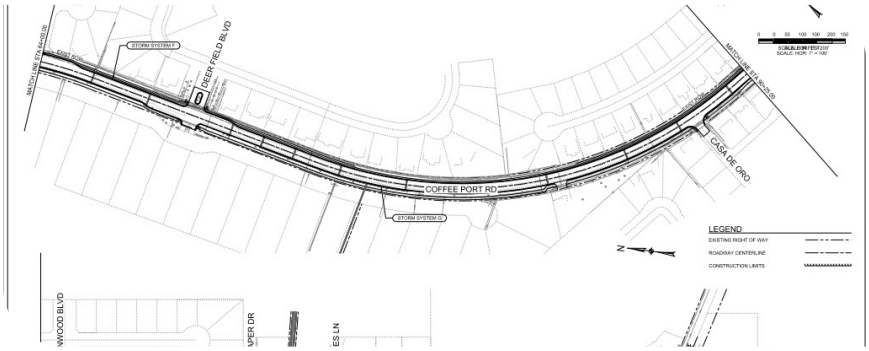
City of McAllen, Edinburg/McAllen Lateral Improvement, McAllen, TX



Halff provided surveying for design services which included conventional topographic survey collection methods as well as supplementary lidar. Sufficient ground elevations were obtained to prepare one-foot interval contour maps throughout the surveyed portions of the project site. All significant trees with a caliper equal to or greater than six inches were located. Property surveys were also provided for ROW acquisition purposes. Survey reports for this project were delivered on time and on budget. Additional survey requests are expected to be received on this project.

City of Brownsville, 2020 CIP Street Improvements, Brownsville, TX

Halff provided surveying services for 1.98 miles of roadway. The project includes the reconstruction of Coffee Port Road from a 2-lane section to a 3-lane section including pedestrian and bicycle accommodations in the form of a shared use path. Halff also led the horizontal and vertical design of the roadway geometry. Halff used a mobile lidar attached to a Ford F250 provided by our geospatial department.

Stantec Consulting Services, IBWC Main Floodway Hydrographic Survey, Mercedes, TX

Halff, as subconsultant to Stantec Consulting Services, Inc., aimed to measure water flowline elevations along waterways, employing GPS for wadable areas, a GPS boat called Hydrone for deeper waters, and a rowboat with GPS in strong currents. The survey covered three legs: from south of Mercedes to east of the north floodway, from Anzalduas Bridge to south of Mercedes, and along the Arroyo Colorado to near the Port of Harlingen. All survey reports were delivered for this project on time and within budget.

Cubic PV, Sharyland Plantation Professional Services, Mission, TX

Halff conducted comprehensive topographic and boundary surveys over a 153-acre field. Utilizing a Polaris equipped with a GPS receiver, our team meticulously navigated the terrain, verifying precise data collection. Every 100 feet, a shot was taken to capture accurate measurements, and the ground was staked accordingly to prepare for subsequent geotechnical services. This methodical approach checked that all necessary data was gathered efficiently and accurately, laying a solid foundation for the geotechnical analysis to follow.

Experience with the City of Edinburg

Halff has worked with and within the City of Edinburg for several years. We have held several recent and ongoing contracts directly with the City and provided services on City projects as a subconsultant. The following is a sample of more recent projects that Halff has completed for the City of Edinburg:

- McIntyre Square Project, Boundary Survey (3.39 acres)
- ROW Exhibit for Sugar Road, Chapin to Monte Cristo
- Land Surveying, Wisconsin Road from I-69C to West City Limits
- Land Surveying and ROW Mapping, Sprague Road from Jackson Road to West City Limits (1.62 mi.)
- Land Surveying and ROW Mapping, Chapin Road from I-69C to West City Limits (3.57 mi.)
- Land Surveying and ROW Mapping, Trenton Road-I-69C to East City Limits (1.3 mi.)
- Survey Fire Station 5 Boundary Survey and ROW Acquisition for Lift Station
- Bicycle and Pedestrian Master Plan-Landscape Architecture services for a Bicycle and Pedestrian Master Plan for the City of Edinburg
- Survey and ROW acquisition for additional property for Lift Station Number 42 at Alberta and I-Road
- Appraisal and ROW services for Chapin Road Bridge Project
- ROW Acquisition Services for 20-foot Easement on Canton Road
- New Auxiliary Generator Replacement at Downtown Water Treatment Plant High Service Pump Station
- Additional Waterline Improvements along U.S. Highway North 281
- Professional Services for U.S. Highway North 281 Water Distribution System Improvements from SH 186 to FM 490
- Downtown Parking and Retail Facility at Closner Boulevard

Guadalupe brings a wealth of expertise in land surveying and civil engineering technology, marked by a diverse array of specialized skills. His professional journey encompasses vast experience with land development projects, utility extension projects, transportation projects, and Subsurface Utility Engineering (SUE) project management for both private and public sector projects. His experience includes but is not limited to conducting boundary and topographic surveys, as well as ALTA/ACSM surveys and preparation of Metes and Bounds descriptions. He is proficient in performing level loops and generating elevation certificates. Guadalupe excels in executing route surveys and creating right of way maps. He effectively leads survey field parties and survey drafting technicians to establish horizontal and vertical control for aerial mapping projects. He has managed surveys for electrical transmission lines and gas pipelines. His capabilities extend to construction staking and securing meticulous as-built surveying.

REPRESENTATIVE PROJECT EXPERIENCE

City of McAllen, 33rd Street Extensions, McAllen, TX.
Project Survey Lead responsible for this project involved the installation of a new, 1-mile local roadway between Auburn Avenue and Oxford Avenue, providing traffic relief in the dense suburban area by offering an additional access route to surrounding collector roads. Surveys were conducted to acquire the necessary ROW. The design included new roadway grading and underground drainage systems for effective water management and road durability. Existing potable and reuse water systems were relocated to accommodate the roadway. A roundabout was also built at 33rd Street and Oxford Avenue, improving traffic flow and enhancing the area's aesthetic appeal through landscaping and lighting. These efforts boosted transportation efficiency, water management, and overall urban aesthetics in Northwest McAllen, supporting the City's development and community improvement initiatives.

City of Brownsville, PUB Cross-Valley Pipeline, Brownsville, TX.
Senior Project Survey Manager responsible for the survey and preliminary design phase of the proposed 50 mile cross-valley gas pipeline from Edinburg, Texas to Brownsville, Texas. The surveying portion of the work included management of Ambiotec's in-house staff as well as staff from three other surveying consulting firms. As the lead Surveying firm, coordinated with the other firms to establish a project secondary horizontal and vertical control network, obtain boundary and topographic data, boundary research, boundary analysis, reconciliation, and establishment of all properties along the project route, produce aerial survey data/planimetrics, preparation of metes and bounds descriptions with surveys for project land acquisition, and coordination with a variety of consulting firms with their various disciplines. Direct Management of six survey crews and 12 survey drafting technicians. Indirect management of 6 survey crews and other firms drafting technician manager.

REPRESENTATIVE PROJECT EXPERIENCE

City of McAllen, Bicentennial Boulevard, McAllen, TX.

Project Manager responsible for leading the 2.75-mile extension to Bicentennial Boulevard from Trenton Road to SH 107. Coordinated with the client, several City departments, McAllen Public Utility, TxDOT, and Hidalgo County Drainage District during the planning and design phase. The planning phase consisted of providing the schematic design with horizontal and vertical alignments, drainage design, noise wall design and project constraints including Right of Way needs. The design phase consisted of finalizing the horizontal and vertical alignment, reviewing cross-sectional views, utility relocations, irrigation canal adjustments, environmental services, and developing grading and drainage design for the proposed road.

Brasfield & Gorrie, San Antonio US Federal Courthouse, San Antonio, TX.

Project Manager responsible for the civil design of the federal courthouse. The design plans included demolition plan, paving plan, dimensional control plan, drainage plan, utility plan, grading plan, erosion control plan, LID bioretention swale, SW3P manual and construction specifications. Halff was involved in a federal courthouse built as a design-build project. This project consisted of the preparation of construction documents for the design of a 6.4-acre site for a U.S. Courthouse. Work included preliminary design concepts through final design review for a 4-story building comprised of courtrooms, offices, detention spaces, and support areas inclusive of an atrium.

City of Eagle Pass, On-Call Engineering Services, Eagle Pass, TX.

Responsible for civil engineering projects throughout the city. Also responsible for performing development and plat reviews as needed and allocating resources to support city staff during construction with an inspector. Representative projects include Calle de los Santos drainage improvements that required special coordination with Maverick County Water Control and Improvement District #1 to cross a major irrigation canal with five 6'X4' boxes under the canal. Katie-Omar Drainage Improvements and Katie-Jenna Drainage Improvements, both of which consisted of designing improvements that prevented backwater to flood a neighborhood with the use of flap gates.

Registered Professional Land Surveyor: TX #5017

REPRESENTATIVE PROJECT EXPERIENCE

City of McKinney, Traffic Engineering Services Parkway Intersections, McKinney, TX.
Project Manager responsible for overseeing all survey tasks related to the design of 20,000 lf of new roadway for Laud Howell Parkway extension, from US 75 to FM 1461 in McKinney, Texas. Survey tasks include boundary analysis of parent tracts, preparation of right of way and easement documents, and full topographic design survey of project alignment.

City of McKinney, Virginia Parkway Expansion, McKinney, TX.
Surveyor responsible for overseeing all survey tasks related to the expansion of 3.2 miles of Virginia Parkway between Ridge Road and US 75, including 1.5 miles of inside widening and 1.7 miles of outside widening that established a continuous 6-lane section. The section of exterior widening requires extensive ROW/easement determination and parcel documents for additional ROW where necessary. Project design was accomplished within 100-foot ROW in some areas to reduce significant impacts to adjacent properties.

Collin County, Open-Ended Surveying Contract, Collin County, TX.
Project Manager responsible for managing all aspects of projects. This project involved an open-ended surveying contract. Projects included topographic surveying for jail expansion at Collin County Justice Center; preparation of easements; boundary surveys for property acquisition, stockpile surveying for quantities, and right of way mapping and parcel takes for four County Road projects and platting of Collin County Justice Center property.

Town of Addison, Sherlock Drive Storm Drainage Improvements, Addison, TX.
Surveyor responsible for QC of survey data. Prepared easement documents. As part of the Town of Addison Detailed Stormwater Master Plan, the storm sewer system along Sherlock Drive was evaluated to help determine causes of frequent flooding that occurred at three residential properties. That study recommended the addition of a parallel system to the existing storm drain system that drains the three flood-prone properties from Winter Park Drive to Belt Line Road. This project involved site reconnaissance and record drawing research, on-the-ground survey for design, and preparation of construction drawings and specifications.

REPRESENTATIVE PROJECT EXPERIENCE

City of Edinburg, Sugar Road Schematic Alignment, Surveying, and ROW Acquisition Services, Edinburg, TX.

Project Manager responsible for the oversight of this project which consisted of the layout for the proposed widening of Sugar Road from Chapin Road to Monte Cristo Road. Halff worked with City staff to create several iterations of schematics to determine the most cost-efficient location for widening. Other services provided included ROW acquisition and surveying.

City of Edinburg, U.S. Highway North 281 Water Distribution System Improvements, Edinburg, TX.

Team Leader responsible for the water distribution system improvements along highway 281, between SH 186 and FM 490. This project was triggered by a TxDOT project along Highway 281 that required the removal of existing water lines conflicting with proposed highway improvements. The distribution system improvements consists of removing existing PVC (approximately 27,000-lf) and AC lines (approximately 9,500-lf), and replacing them with approximately 45,000-lf of 8-inch and approximately 17,500-lf of PVC lines with all its pertaining valves, fire hydrants, service connections, etc. The project also consists of a new pump station design for the City to service the communities in the same vicinity. The pump station consists of a ground storage tank, and a prefabricated building housing the booster pumps that would feed a proposed elevated storage tank to be designed by others.

McAllen Foreign Trade Zone, Warehouse Development, McAllen, TX.

Project Manager for this project consisting of a 6.70-acre site that will be utilized for a warehouse development. The planning phase for this project consisted of coordination with the owner, the City of McAllen, Hidalgo Drainage District, and Hidalgo County to optimize the most efficient warehouse design that will accommodate for the storm runoff provided by the proposed development into the adjacent drainage ditch. Data acquisition and topographic surveying were conducted to identify existing conditions and issues of concern to proceed into design phase. Paving improvements included 13,610 square yards of new concrete pavement and 4,190 square yards of new asphalt pavement.

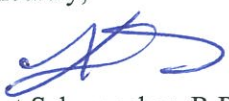
RE: RFQ 2026-6
Request for Qualifications – Land Surveying Services

Dear Mr. Hinojosa and Ms. Fuentes,

Kane Lindsey, LLC (KANE LINDSEY) recognizes that meeting the current and future needs of its residents is important to the City of Edinburg. Equally important are the professional land surveying services required to properly plan, design, and implement projects to successfully meet those needs. The **KANE LINDSEY** team appreciates the opportunity to present our qualifications to the City of Edinburg for Land Surveying Services. As natives to South Texas, we take great pride in providing quality services to our region.



Our approach to projects emphasizes client service, resource commitment, accountability, and coordination. We understand that our survey plan and data are the foundation on which other professionals rely on, and that accurate and quality work will help any upcoming City of Edinburg projects run smoothly.

Our team has over 75 combined years in experience providing professional land surveying services throughout the state of Texas. We have managed multiple surveying and mapping projects and understand the work required for boundary surveys, construction staking, horizontal and vertical control, topography, easements, platting, and more.

Our services shall be provided under the direct supervision of a Texas Registered Professional Land Surveyor and shall be in accordance with the Texas Board of Professional Engineers and Land Surveyors (TBPELS) Acts and Rules, with standards and requirements met for project specific Categories and Levels as outlined in the Texas Society of Professional Land Surveyors (TSPS) Survey Manual, and with reference to the Texas Department of Transportation Survey Manual.

We are eager and committed to collaborating and working with the City, with a goal of providing all services required in a timely manner and within project budget. As the primary contact for this RFQ, I recognize that there have not been any addendums. Please feel free to contact me with any further questions you may have or if you require any additional information. On behalf of **KANE LINDSEY,** I would like to thank you again for this opportunity to submit our Statement of Qualifications, which is valid for ninety (90) days from July 14, 2026.

Sincerely,

Kurt Schumacher, R.P.L.S., President

FIRM QUALIFICATIONS & EXPERIENCE

TAB 2 – FIRM QUALIFICATION & EXPERIENCE

As a minority owned, full-service professional land surveying firm, Kane Lindsey, LLC (KANE LINDSEY) was incorporated in the Rio Grande Valley in October 2020. Although a relatively young firm, our staff has over seventy-five (75) years of combined experience employing the latest surveying technologies and methodologies to complete simultaneous and complex projects for local, state, and private entities throughout the state of Texas.

Our team members are full time residents of Hidalgo County and are familiar with the geography, history, and culture of the Rio Grande Valley basin. What sets KANE LINDSEY apart is our hands-on approach to our work, ensuring your vision of success. We pride ourselves on building collaborative relationships with our clients and providing individualized attention throughout the project, allowing you to meet your targeted goals. We listen and evaluate your specifications, then thoughtfully employ our personalized, comprehensive services to address your requirements.

QUALITY FOUNDATION, APPROACH, AND PARTNERSHIP

KANE LINDSEY understands that our survey plan and data are the foundation on which other professionals rely on and that an accurate, quality, and detailed survey plan will help any upcoming City of Edinburg projects run smoothly. We approach every project with an understanding of our clients needs for timelines, accuracy, and confidentiality.

When you partner with KANE LINDSEY, you can rest assure that you've hired a team of local, qualified professionals who possess an intricate knowledge of the region's unique terrain, as well as the equipment needed for successful project completion.

PROJECT EXPERIENCE INCLUDES, BUT IS NOT LIMITED TO:

- **Horizontal and vertical control networks**
- **Topographic surveys for engineering design**
- **Parcel exhibits with legal descrptions (metes and bounds) for real estate acquisition**
- **Preparing right-of-way maps**
- **Design cross-sections for roadway and drainage improvements**
- **Establishing alignments for roadways, utilities, baselines, easements, and right-of-ways**
- **Utility route and improvement surveys**
- **Tree surveys**
- **Hydro Excavation**
- **Complex record information abstracting**
- **Coordination with other agencies, such as TxDOT, UPRR, Water Districts, Irrigation Districts, USIBWC**
- **Producing 3D digital terrain models for engineering design**
- **Construction and right-of-way staking**

REQUIRED INFORMATION	KANE LINDSEY RESPONSE
Full Firm Name and Address	Kane Lindsey, LLC 2805 Fountain Plaza Blvd., Suite B Edinburg, Texas 78539
Primary Contact	Kurt Schumacher, R.P.L.S., President Cell: (956) 458-8391 Office: (956) 917-4809 Kurt@kanelindsey.com
Legal Status	P = Partnership Kurt Schumacher, R.P.L.S. – 51% 2614 Dove Ave. Mission, TX 78574 Robert Macheska, P.E. – 24.5% 2608 Live Oak St. Mission, TX 78574 Christopher Rodriguez, P.E. – 24.5% 2215 Marble Court Mission, TX 78572

CAPABILITY

KANE LINDSEY understands that the City of Edinburg is seeking to retain a pool of qualified and committed Professional Land Surveying firm to perform topographic, boundary, preliminary platting, and other necessary surveying tasks to support the development of various City projects. We understand that we shall employ the personnel, equipment, and insurance to perform, at minimum the services listed on Page 13-18 of RFQ 2026-6. Additionally, the firm understands that these services shall expire in two (2) years, on September 30, 2028.

KANE LINDSEY has the capability to perform the various surveying tasks requested by the City, and more. For this contract, KANE LINDSEY has selected a sub provider with similar resume, technology, safety programs, and quality control procedures. GDJ Engineering employs the experience, knowledge, and resources to complement KANE LINDSEY's dedication to client satisfaction and provide additional support.

PHILOSOPHY & APPROACH

Our philosophy is simple—we examine all the factors—physical, environmental, political, and market demands to develop innovative solutions that mitigate project constraints and leverage opportunities. KANE LINDSEY strongly believes in a flexible, team-oriented approach to meeting and exceeding the requirements of services requested.

We understand that every project is unique and dynamic with individual design challenges, and we understand that we cannot be successful on our own. That is why we work closely with each client to determine the project goals and expectations to develop a customized plan of services tailored to the specific requirements of each individual project. With this in mind, we are able to adapt planning and design methodologies to each specific project.

ABILITY TO COMMENCE

KANE LINDSEY will commence immediately upon Notice to Proceed from the City of Edinburg. Coordination with the City and its representatives will be the first step to identify and review any project requirements. A thorough understanding is essential before mobilizing and commencing surveying activities.

KANE LINDSEY will coordinate with the City to secure available information beneficial for project development and project approach. Kurt Schumacher, R.P.L.S. (KANE LINDSEY, Project Manager) will review the project layout, schematic, and scope to develop the project approach and schedule. Assignments will be delegated to Task Leaders as required to begin collecting the necessary information for the project.

STAFF BY DISCIPLINE	
Survey Project Manager	Kurt Schumacher, R.P.L.S.
Project Coordinator	Alisha Zapata
Senior CADD Technician	Edgar H. Rodriguez
CADD Technician	Selina Navarro
CADD Technician	Jared M. Paez
Field Crew Party Chief	Billie R. Gilkey
Instrument Man	Jose Luis Galindo, Jr.
Instrument Man	Jaime A. Rivera
UAS Photogrammetry & Data Collection	Miguel A. Rico, Jr.
Utility Coordinator Task Lead	Robert Macheska, P.E.
QA/QC Task Lead	Christopher Rodriguez, P.E.

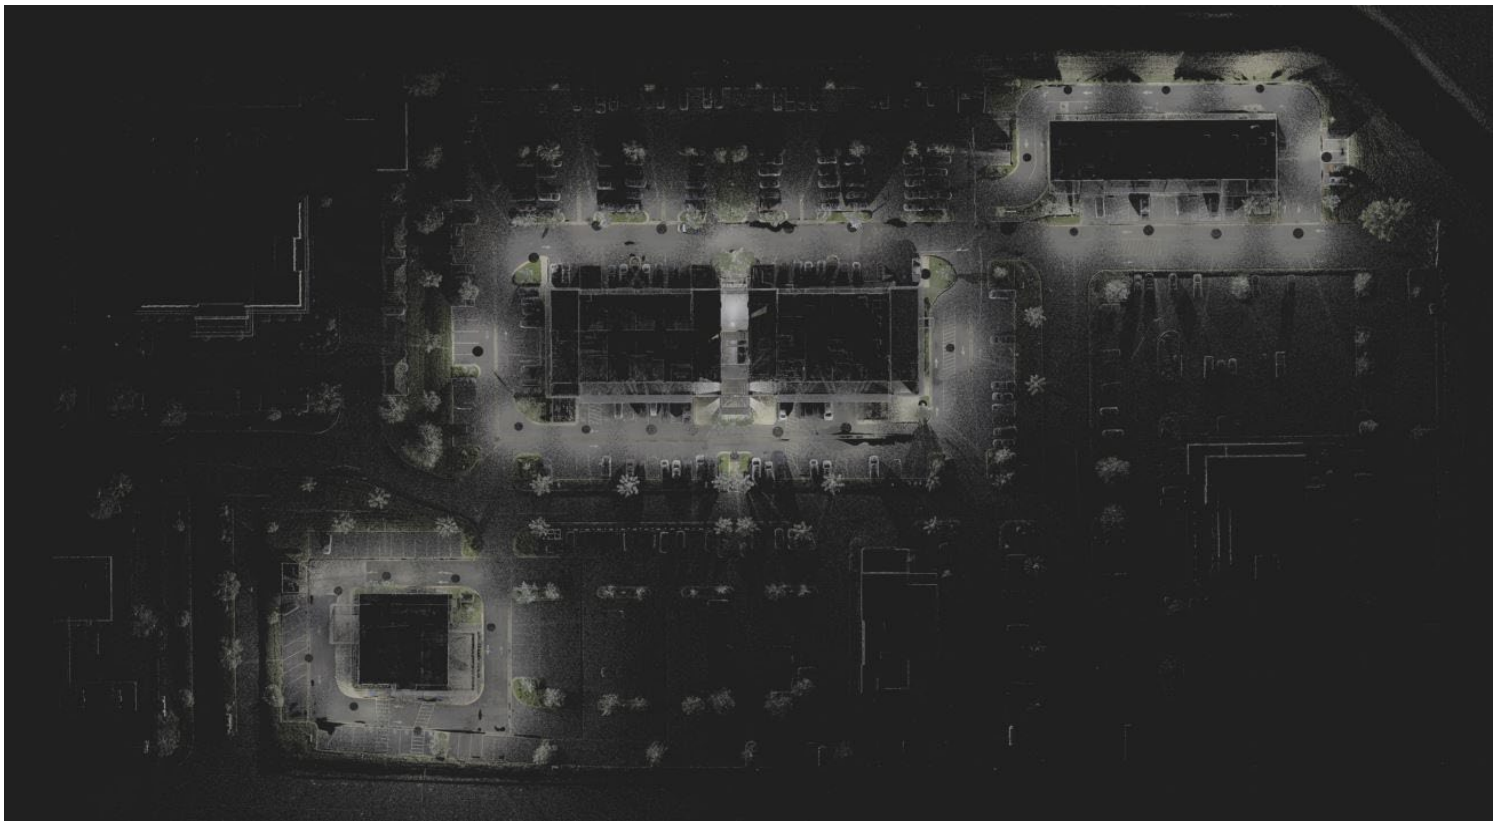
QUALITY ASSURANCE & QUALITY CONTROL

At KANE LINDSEY, QA/QC is never considered an extra step or service; it is an integral component of everything we do. Quality Assurance and Control will be overseen by Kurt Schumacher, R.P.L.S. (KANE LINDSEY, Project Manager) and by QA/QC Task Leader Chris Rodriguez, P.E. (GDJ Engineering).

Kurt will specifically be responsible for ensuring:

- the work performed meets the City of Edinburg's requirements
- the City of Edinburg is informed of the project status
- the public is notified and informed as required
- regulatory requirements are met
- the project stays on schedule and within budget

Chris will be responsible with ensuring all work is double-checked. No deliverable will be submitted without review, which takes not just one set of eyes, but three (Project Manager, Project Coordinator, QA/QC Task Leader). Additionally, Chris will complete and finalize the QA/QC plan checklist. This checklist will help ensure that agreements, survey, drawings and specifications, and contract administrations have been executed properly.



TECHNOLOGY

KANE LINDSEY continues to invest in technology allowing the firm to maintain a high efficiency level.

- Leica RTC360 LiDAR Scanner
    - Highly Portable
    - Highly Automated
    - Maximum Productivity
        - Measuring rate of up to two (2) million points per second
        - Colored 3D point clouds can be completed in under two minutes
- Trimble® and Leica® Data Collectors
- Trimble S5 1’ Robotic Total Station
- Vermeer LP573XDT Hydro Excavator
- DGI Terra Matrice 300 Drone with LiDAR/Photogrammetry
- Leica GS18 Tilt Capable GPS RTK Receiver
- Trimble R12 GPS RTK Receiver
- AutoDesk Civil 3D - 2026 Software
- Bentley OpenRoads Software
- Leica Cyclone 3DR
- Trimble Business Center

Leica RTC360 LiDAR Scanner

CURRENT WORKLOAD & STAFFING NEEDS

KANE LINDSEY currently has multiple ongoing projects within the Rio Grande Valley region and are at 30% production capacity.

Here at KANE LINDSEY, we understand that proper planning is essential to maintaining key staff available so that completion of projects will progress in a timely and organized manner and in accordance with established schedules.

- We closely monitor staff workoad against current and projected commitments and these projections are factored into decisions of who to propose for new assignments.
- Using workload projection calculators, we are able to predict staffing needs for the upcoming weeks and months to ensure that we have adequate manpower available for awarded projects, probable contracts, and work orders.
- We keep in close contact with local temp agencies to help us meet staffing needs quickly and efficiently whenever we project that we will need to scale up for a project.

Our collaboration and partnership with GDJ Engineering adds additional staffing, technology, experience, and resources to accommodate simultanoues projects. KANE LINDSEY's and GDJ's offices are centrally located in Hidalgo County with easy access to major roadway arteries. Our staff members live in the region and are available on short notice. This also enables us to keep our mobilization cost low, have our Task Leaders available to the City of Edinburg for consultation, and quickly resolve challenges which may arise.

MEETING AGGRESSIVE DEADLINES

KANE LINDSEY is committed to providing an exceptional level of project management and scheduling to create value for the City of Edinburg. We can complete simultaneous project issued under contract on-time and within budget, with an additional:

- Two (2) R.P.L.S. in a supporting role
- One (1) Unmanned Aircraft System (UAS) certified Federal Aviation Administration (FAA) pilot
- One (1) TxDOT pre-certified utility coordinator with supporting staff
- Three (3) field crews with ability to mobilize
    - One crew immediately available upon request
    - Additional crews available within 24 hour notice
- One (1) Abstractor with 10 years of experience
- Support data processing and QA/QC staff

FAMILIARITY WITH AREA & LOCAL CONCERNS

KANE LINDSEY has worked on a wide range of projects in the Rio Grande Valley area which have presented complex challenges. Our various partnerships in the industry has allowed us to successfully overcome these challenges with successful project delivery. The following are issues faced on previous projects:

- ***Establishing dedicated road right-of-ways***. This is one challenge in the rural parts of Hidalgo County where these areas have seen minimal development, with land title transfers between family members covering generations with no actual land surveys ever being conducted. Original subdivision plats such as the Los Ejidos de Reynosa Partition in Penitas and La Joya, as well as the West and Adams Tracts situated North of Weslaco, offer poor descriptions as to the dedicated street widths and alignment geometry. KANE LINDSEY will take special care when resolving adjacent property lines and right-of-ways by conducting the necessary title research, exploring paths of occupation and public maintenance, and recovering enough physical evidence to support the final right-of-way and easement resolutions.

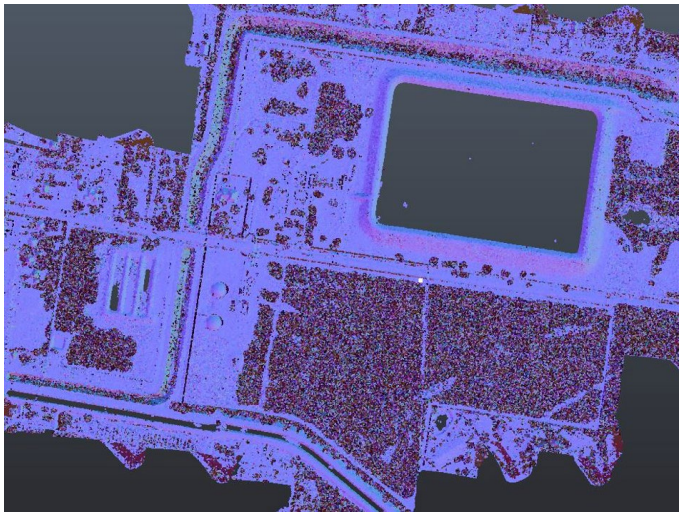
- ***Accurately depicting buried utility lines and easement locations***. Relocating buried utilities can delay project let dates and be costly. Kurt Schumacher, R.P.L.S. (KANE LINDSEY, Project Manager) and Robert Macheska, P.E. (GDJ Engineering, Utility Coordinator Task Lead) will identify the utility providers within the project limits. Robert will conduct a site visit to inventory the visible utilities and identify purveyors. Additionally, Robert will review Texas Railroad Commission's online database to identify gas pipelines within the vicinity of the project, and consult with designated irrigation districts for district laterals, service lines, and canal right-of-ways. Furthermore, a Texas 811 locate request will be submitted to mark buried telephone, fiber optic, electric, and gas lines. Robert will consult with City Engineering and Public Works departments for locations to buried sanitary sewer, storm drain, and waterline locations. Robert will document the utility interest and provide a matrix (to include utility owner names, type of utility, and primary contact information) to Kurt and Alisha Zapata (KANE LINDSEY, Project Coordinator).

  Alisha and the Project Abstractor will research and verify the easement locations within the project limits. The field crews will locate and inventory marked lines in the field along with any associated appurtenances and all visible utility structures. Alisha will compare established easement lines to plotted easement locations. Often times an easement is based on the existing centerline of the buried utility line. Collected field data and marked utility lines are to be examined and referenced in properly delineating utility purveyor easement interest. Once lines are properly depicted and verified, survey technicians will create a 2D CADD file labeling all utilities as to type, condition, size, easement width or permit interest, and owner's name. Christopher Rodriguez, P.E. (GDJ Engineering, Quality Assurance and Quality Control Task Lead) and Robert will review the file and easement locations. Associated documents, correspondence, matrix, and CADD files will be delivered to the City of Edinburg and its representatives once the final QA/QC is complete.

- ***Right-of-entry***. The appraisal district may list incorrect ownership data which complicates locating landowners who may not be informed about the project's scope and layout. Additionally, language can also become a barrier when landowners only speak and understand Spanish. KANE LINDSEY will confront these challenges by: 1) conducting site visits with neighbors for property owner name, location, and immediate family members in the area, and 2) ensuring Right-of-Entry letters are typed out in both English and Spanish and contain an exhibit or map detailing the project limits identifying their property in relation to the project. Any additional questions and concerns by the landowner that may come up throughout the project will be directed to the appropriate channels for clarification. In the event that right-of-entry is not granted for any reason, KANE LINDSEY can also employ stationary LiDAR laser scanning technology or UAV aerial LiDAR technology to attain the necessary information to keep the project on schedule and within budget.

PREVIOUS SURVEYING ASSIGNMENTS

KANE LINDSEY has a proven record as being a responsive firm commited to meeting project schedules and budgets. Our large number of repeat clients is an indication of the trust and confidence placed in KANE LINDSEY. We have had the pleasure of previously being under contract with Hidalgo County from August 2022 to August 2023, and are currently serving under contract with them for the HOME Owner-Occurpied Housing Rehabilitation Program until June 9, 2027. Additionally, we have previously been under contract with the City of McAllen, with our initial contract having begun on March 23, 2023 and our latest extension ending on September 25, 2026.



N 10th St. & Nolana Ave. Right Turn Lane Addition
City of McAllen-Engineering Department (Task Order No. 5)
Improvement survey for a proposed addition of a right turn lane on the East side of Nolana Avenue for the intersection of 10th St. and Nolana Ave. Survey limits: approximately 150ft North/South of intersection, and 300ft West/East of intersection. Project scope: topography survey for engineering design, right-of-way retracement, utility coordination with the City, provide one (1) project Benchmark. Project deliverables: three (3) original sketches, CADD file, ASCII file, and field notes.

El Collado Subdivision Drainage Improvement Project
City of McAllen-Engineering Department (Task Order No. 16)
Improvement survey for the proposed expansion of the existing drainage channel, adding stormwater storage capacity, along with improvement to the existing outfall. Survey limits: Savannah Avenue (from the centerline of S 26th St to S 25th ½ St, then South to dead end), Acapulco Ditch (from S 25th ½ St to S 23rd St), and S 23rd St. Project scope: topography survey for engineering design, right-of-way retracement, utility coordination with the City, provide three (3) project Benchmarks. Project deliverable: three (3) original sketches, CADD file, ASCII file, and field notes.

La Lomita Storm Water Detention Facility
City of McAllen-Engineering Department (Task Order No. 33)
Improvement survey within apparent 25.2 acre tract of land, as well as +/- 2.36 acres along Sprague Road (between Guadalupe Ave. and La Lomita Rd.). Project scope: topography survey, utility location and coordination, provide three (3) project benchmarks. Project deliverables included: CADD file (DWG/DGN) linework, ASCII File, Digital Terrain Model, and copies of all field notes.

Nolana Loop (Ware Road to 23rd Street)
City of McAllen/L&G Engineering
Design and topography survey of approximately 1 mile (including 1,000 feet West of Ware Road and 1,000 feet East of 23rd St) for the future expansion/road widening of Nolana Loop. Project scope: establish existing right-of-way, roadway centerline recovered and re-established, existing storm tied down, utility investigation, SUE Level A, horizontal and vertical control. Project deliverables: 2D and 3D mapping in Microstation DGN format, 3D modeling for limits of project, subsurface utility excavation, and horizontal and vertical control sheets.

McAllen Public Utility
Brackish Groundwater Treatment Facility
City of McAllen/Carollo Engineers
Surveying services for a +/- 100 acre tract of land for water monitoring and detention. Services included aerial mapping by Lidar, as-built and topography survey along floodway to capture detailed surface feautres and elevations, boundary survey, abstracting to create BaseMap with right-of-way delineation along canal, wetlands mapping, 2D/3D mapping, hydro excavation for test holes for enviornmental studies, and project control for future construction.

City of Mission HSIP Traffic Signals Project
City of Mission/TEDSI Infrastructure Group, Inc.
Topography surveys at six (6) intersections throughout the City of Mission (100 feet in each direction at every intersection) for the proposed upgrade to the overhead flashing beacon signals. Project deliverables included: final Microstation DGN files in surface and grid values, and all field book notes.

Isla Blanca Park – Road Realignment, Electrical, & Sewer
Cameron County Parks/GDJ Engineering
As-built and improvement survey that included all sanitary sewer and overhead electric mapping for Isla Blanca Park improvements. Services included sanitary sewer inverts, overhead electric inventory, and CADD mapping.

Moore Road: Jackson Ave. to Veterans Blvd.
City of Pharr/GDJ Engineering
Topography survey for engineering design of approximately 2.30 miles of existing roadway for the expansion/road widening of Moore Road. Project deliverables included: 2D and 3D mapping in Microstation DGN format, 3D modeling for limits of project, horizontal and vertical control sheets, subsurface utility excavation data sheets for thirty-four (34) hydro excavation test holes, thirty (30) parcel exhibits with descriptions for real estate acquisition, surveyor's report, and utility matrix.

Stenger Road TASA
City of San Benito/GDJ Engineering
Topography survey for engineering design of approximately 1.1 miles of existing roadway for a recreational trail. Project deliverables included: 2D and 3D mapping in Microstation DGN format, 3D modeling for limits of project, horizontal and vertical control sheets, subsurface utility excavation data, surveyor's report, and utility matrix.

TIMELINESS OF SCHEDULE - EXAMPLE

The following 20-day schedule example is based on a typical survey inclusive of horizontal and vertical control, boundary & topographical surveying, preparation of survey plat and legal description & survey alignments (roadways, utilities, right-of-ways, easements, baselines). This example is for a typical 1,000' rural stretch of roadway, 50' in width, with a parcel for acquisition, and final design schematic provided:

WEEK 1 DAY 1-5

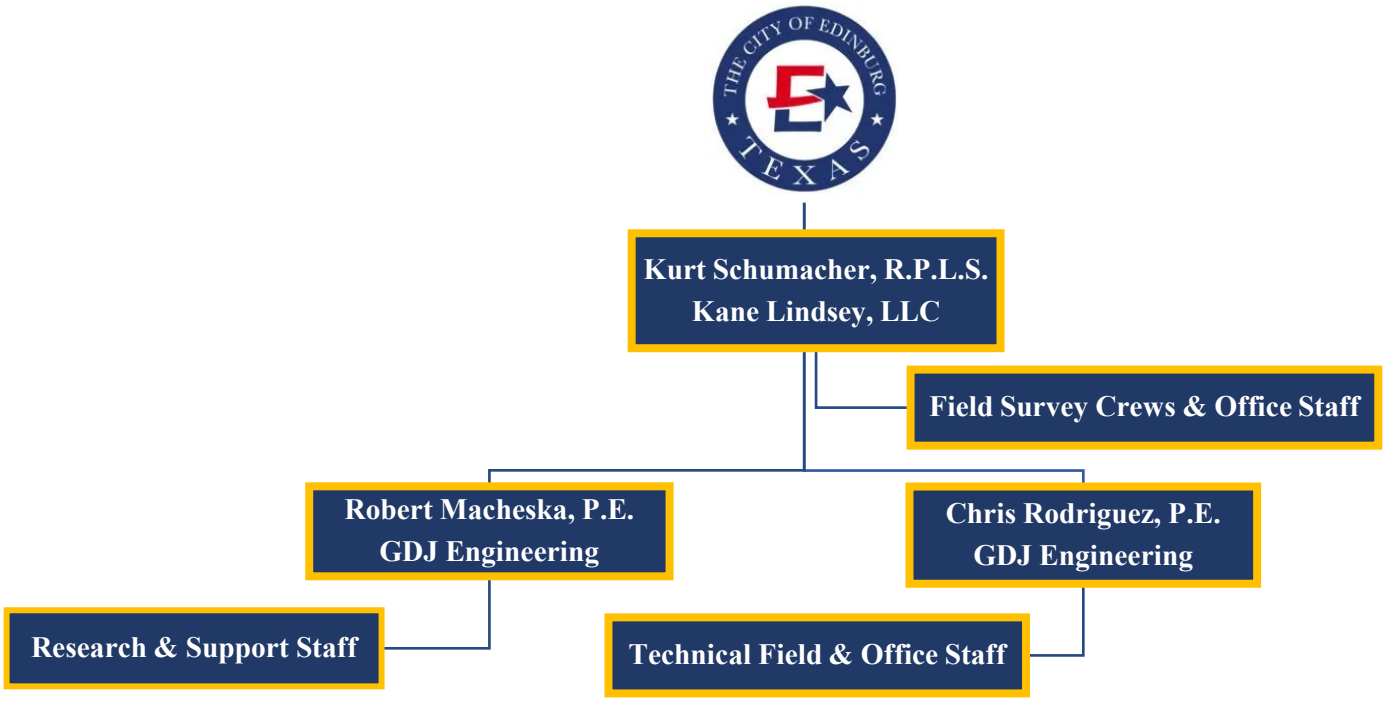
Kurt Schumacher, R.P.L.S. (KANE LINDSEY, Project Manager) will coordinate with Task Leaders to review schedule, project critical paths, and assess team availability. Kurt will task Robert Macheska, P.E. (GDJ Engineering, Utility Coordinator) to visit site and coordinate with utility purveyors to secure maps of records for utilities along project route. Additionally, a Texas 811 locate request for buried utility lines will be submitted. Kurt will task abstractor to locate existing recorded adjoining deeds, easements, plats, and ownership information. KANE LINDSEY Survey Technicians will sketch recorded information from recorded documents. Kurt will task Edgar H. Rodriguez (KANE LINDSEY, Senior CADD Technician) to mobilize field crews to establish project horizontal and vertical (benchmarks) points and coordinate production of control sheets for use by all team members. KANE LINDSEY field crews will utilize the abstract map to locate existing boundary and right of way corners. Horizontal and Vertical control, utility markings, abstracting, deed plots, and alignment/easement determinations commenced by end of week 1.

WEEK 2 DAY 6-10

KANE LINDSEY office technicians continue to process field data, field crews to commence cross sections/topography survey locating all visible utilities, drainage infrastructure (flow lines, diameters, type), and public entry and exit points to roadway. Kurt will task Miguel A. Rico, Jr. (KANE LINDSEY, UAS Photogrammetry, LiDAR Scanning, & Data Colelction Task Lead) to commence UAV Photogrammetry and data collection. UAV flight plan to include 50-feet outside existing right-of-way in case additional ground elevations are needed. Leica RTC360 Scanner to be used in instances of Federal Funding Requirements. Office staff processes data daily, keeping project files updated as field crews progress with survey. Robert is to finalize utility information and provide matrix and information to team. Kurt and Chris Rodriguez, P.E. (GDJ Engineering, QA/QC Task Leader) will be tasked to perform periodic QA/QC on drawings and collected field data. UAV aerial imagery delivered to all members of team.

WEEK 3 DAY 11-15

Right-of-Way and boundary analysis complete with pertinent information (easements, ownership, permits). KANE LINDSEY to begin preparing parcel metes and bounds description and survey plats for QA/QC review. Field crews to complete cross-sections and topography survey. Office staff will continue to process data for 2D and 3D deliverables for engineering design.



WEEK 4 DAY 11-15

Kurt to meet with team for project updates, progress, and delivery date to City of Edinburg. Robert will review mapping files to verify utility ownership and information shown. Kurt and Chris to provide final review of 2D and 3D mapping, legal description, and horizontal/vertical control sheets. Kurt to prepare surveyor's report. Survey Report, documents, and electronic files delivered by the 19th business day. Parcel corners and field cleanup complete by day 20.

TAB 3

TEAM MEMBER QUALIFICATIONS & EXPERIENCE

TAB 3 – TEAM MEMBER QUALIFICATIONS & EXPERIENCE

Kurt Schumacher, R.P.L.S. – Project Manager (Kane Lindsey, LLC)
Kurt will serve as the Project Manager and will be the direct contact for communication and correspondence with the City of Edinburg and the designated task leaders. KANE LINDSEY will provide field surveying, data processing, metes and bounds descriptions, right-of-way mapping, boundary surveying, and horizontal and vertical control support.

Alisha Zapata – Project Coordinator (Kane Lindsey, LLC)
Alisha will serve as the Project Coordinator, under the direction of the Survey Project Manager. She will support the Project Manager in developing, maintaining, documenting, and monitoring plans and schedules to implement any upcoming projects.

Edgar H. Rodriguez – Senior CADD Technician (Kane Lindsey, LLC)
Edgar will serve as the Senior CADD Techician, under the direction of the Survey Project Manager. He will manage and direct the field crews and office staff, assist in processing and verifying the accuracy of survey data collected, communicate project progress, and ensure all field work is conducted in accordance to regulatory standards.

Miguel A. Riro, Jr. – UAS Photogrammetry, LiDAR Scanning, & Data Collection (Kane Lindsey, LLC)
Miguel is the designated task lead for Aerial photogrammetry with data collection by UAS, to provide aerial imagery, data processing, and 3D modeling.

Robert Macheska, P.E., C.F.M. – Utility Coordinator (GDJ Engineering)
Robert is the designated task lead for utility coordination. Utility coordination tasks will include, but not be limited to: meetings and correspondence with utility operators, attainment of documents and files to verify utility infrastructure and ownership interest, document and provide a matrix consisting of utilty information obtained, and to coordinate field utility locates.

Chris Rordriguez, P.E. – Quality Assurance & Quality Control (GDJ Engineering)
Christopher is the designated task lead for QA/QC of deliverables. QA/QC task will include comprehensive review of the following: metes and bounds descriptions, survey plats, horizontal and vertical control sheets, easement delineations, Digital Terrain Model validation, Survey Report, utility review, and Final Deliverable package.

State of Texas
No. 6333

LICENSED

14 Years (2012)

ROLE EXPERIENCE

24 Years

AVAILABILITY

100 %

Kurt has over twenty-four (24) years of land surveying experience providing boundary, topographic surveys for engineering design, construction surveying, right-of-way mapping, establising horizontal & vertical control networks, as-built surveys, and surveying support for Schematic and PS&E design for multiple capital improvement projects. Kurt will be responsible for the overall direction, coordination, implementation, execution, and completion of survey projects assigned.

RELATIVE EXPERIENCE

Isla Blanca Park
(South Padre Island, TX)
As-built and improvement survey that included all sanitary sewer and overhead electric mapping for Isla Blanca Park improvements. Services included sanitary sewer inverts, overhead electric inventory, and CADD mapping.

Stenger Road
(San Benito, TX)
Surveying services for approximately 1.5 miles for new construction sidewalk project within Stenger Road right-of-way. Services included horizontal and vertical control, establishing existing road and easement right-of-ways, topography and improvement survey, utility coordination and hydro excavation, and 2D/3D mapping.

City of McAllen Public Utility Brackish Groundwater Treatment Facility Project (McAllen, TX)
Surveying services for a +/- 100 acre tract for water monitoring and detention. Services included aerial mapping by Lidar, as-built and topography survey, boundary survey, wetlands mapping, 2D/3D mapping, and project control for future construction.

La Lomita Project (McAllen, TX)
Surveying services for a +/- 20 acre tract for future water detention for the City of McAllen. Services included horizontal and vertical control, as-built topography survey, utility mapping, and 2D/3D mapping.

Russell Road: Ware Road to Mon Mack Road
(Edinburg, TX)
Surveying services of approximately three (3) miles for Russell Road expansion project. Services included horizontal and vertical control, utility coordination, right-of-entry coordination, 3D modeling, parcel exhibits and field notes for approximately twenty-nine (29) parcels for real estate/right-of-way acquisition.

Alisha has ten (10) years of experience in the field of professional land surveying. As a detail-oriented and organized team player she is able to ensure all documentation is maintained appropriately for each project. With a strong background in communication and the ability to manage execution, Alisha is capable of providing a high level of adminsitrative support to the Project Manager with the goal of completing projects within signed off time, budget, and scope.

RELATIVE EXPERIENCE

Cameron County Drainage District #6
(Cameron County, TX)
Horizontal and vertical control, cross-sections, and topography along approximately thirteen (13) miles of drainage ditches, inventory of drain structures at roadway crossings, and right-of-way coordination for the various drains that make up the main Cameron County Drainage District No. 6 system.

SPI SH100 Project
(South Padre Island, TX)
600 acre drone flight, aerial imagery, LiDAR data processing and elevation extractions. Roadway realignment, parcel sketches and field notes for two (2) parcels for SH100 realignment.

SL480 Safety Barrier Project
(Eagle Pass, TX)
Recover and verify TxDOT horizontal & vertical control, survey cross-sections, 3D modeling, set 10 – 5/8" iron rods with plastic cap for future construction control, and create machine control files for construction excavation.

Russell Road - Rooth Road to MonMack Road
(Edinburg, TX)
Topographic survey of approximately two (2) miles for future Russell Road expansion, horizontal and vertical control, utility coordination, right-of-entry coordination, 3D modeling, and parcel sketches and field notes for approximately twenty-nine (29) parcels.

Moore Road - Jackson Road to I Road
(Pharr, TX)
Horizontal and vertical control, design surveys (cross-sections, structures, utility investigation, abstracting, field property recon, abstract map/basemap), right-of-entry coordination, and SUE level A test holes.

Edgar is a highly motivated Senior CADD technician with over six (6) years of experience collaborating with engineers/project managers and leading field crews to ensure survey precision. Edgar will work directly with the Project Manager and Project Coordinator to define project tasks, project schedule, and resouce requirements. Edgar will monitor operational effectiveness throughout assigned projects and conduct weekly team meetings with all field crews to evalute and coordinate workload, and provide day to day guidance and mentoring as needed.

RELATIVE EXPERIENCE

Nolana Loop - Ware Rd. to 23rd St.
(McAllen, TX)
Design and topography survey of approximately 1 mile (including 1,000 ft West of Ware Rd. & 1,000 ft East of 23rd St) for the future expansion/road widening of Nolana Loop. Deliverables included: 2D and 3D mapping in Microstation DGN format, 3D modeling for limits of project, subsurface utility excavation, and horizontal and vertical control sheets.

2nd St. & Wisconsin Rd. Roundabout
(McAllen, TX)
Topography survey at the intersection of 2nd St and Wisconsin Rd. (1,500 ft in every direction) for future road expansion. Edgar was responsible for abstracting and establishing the existing right-of-way. Deliverables included: 3D modeling for limits of the project in both surface and grid values, horizontal and vertical control data sheets, and all field notes.

Las Lomas Paving
(Laredo, TX)
Topography & boundary survey of approximately 2.3 miles for future road paving. Deliverables included: right-of-way retracement and abstracting to establish existing right-of-way, 2D and 3D mapping and modeling in Microstation DGN format, and horizontal and vertical control data sheets.

Magana Hein Expansion
(Laredo, TX)
Topography survey of approximately 3.8 miles (including an additional 2,400 ft North and 1,100 ft South along U.S. Hwy 83) for future road expansion. Edgar was responsible for abstracting and establishing the existing right-of-way.

Robert has over 27 years of experience in the design and management of various public improvement projects. For the past 6 years Robert has served as Executive Vice President/COO for GDJ Engineering, LLC. He has previously worked for both the Texas Department of Transportation and L&G Engineering, which provided him with excellent hands on experience as to how multiple government entities function. Robert has worked on all aspects of public works projects, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management and design experience includes contract administration, supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Robert's management approach is very proactive, and he constantly maintains open and effective lines of communication.

RELATIVE EXPERIENCE

"I" Road (Rancho Blanco Road to US 281)
(Pharr, TX)
Project Manager responsible for overseeing schematic, environmental, utility coordination, and PS&E. The scope of the project included widening 4.5 miles of the existing rural roadway to accommodate a shared use path (SUP), continuous left turn lane, shoulders, and a sidewalk. The SUP is part of a city-wide plan to provide a continuous hike and bike trail system. Mr. Macheska oversaw the successful completion of the public involvement and NEPA clearance, IBWC coordination and licensing, utility coordination, and PS&E. He provided oversight on the bid documentation for the city. He provided QA/QC and ensured all proper procedures were followed.

Jackson Road Hike & Bike Phase II (Jackson Road to Auburn Road)
(McAllen, TX)
Lead Project Engineer for design, utility coordination, and PS&E. The scope of the project included providing a 10-foot-wide SUP and sidewalk along existing roadway and drainage ROW to improve multi-modal connectivity and access in the project area. The project included a pedestrian railroad crossing which required extensive coordination with Union Pacific Railroad. Mr. Macheska led coordination with both the City of McAllen and the City of Edinburg as the project spanned both jurisdictions. He provided project information and updates to all parties to ensure all persons were informed of the project process. In addition, due to the TASA funds involved, Mr. Macheska provided updates to the RGVMPO in coordination with the city, as needed. He provided QA/QC and ensured all proper procedures were followed. Mr. Macheska ensured the project remained on schedule and within budget to ensure TASA funds were not lost.

CHRIS RODRIGUEZ, P.E., C.F.M.

Chris has over 21 years of experience in the design and management of various public improvement projects. For the past 6 years Chris has served as Vice President of Engineering for GDJ Engineering, LLC. He previously worked for both the Texas Department of Transportation (San Benito Area Office) and L&G Engineering which provided him with excellent hands on experience as to how multiple government entities function. He has worked on multiple aspects of transportation and drainage projects, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management and design experience includes supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Chris has managed multiple concurrent design projects and production staff with numerous design groups under his direction.

RELATIVE EXPERIENCE

"I" Road (Rancho Blanco Road to US 281)
(Pharr, TX)
Lead Project Engineer responsible for overseeing schematic, utility coordination, and PS&E. The scope of the project included widening 4.5 miles of the existing rural roadway to accommodate a shared use path (SUP), continuous left turn lane, shoulders, and a sidewalk. The SUP is part of a city-wide plan to provide a continuous hike and bike trail system. The proposed project included a crossing over the main floodway, which required extensive coordination and licensing with IBWC. The project also required coordination with the irrigation and drainage districts. Mr. Rodriguez oversaw the utility coordination team to ensure utilities were moved quickly and on schedule.

Jackson Road Hike & Bike Phase II (Jackson Road to Auburn Road)
(McAllen, TX)
Lead Project Engineer for design, utility coordination, and PS&E. The scope of the project included providing a 10-foot-wide SUP and sidewalk along existing roadway and drainage ROW to improve multi-modal connectivity and access in the project area. The project included a pedestrian railroad crossing which required extensive coordination with Union Pacific Railroad. Mr. Rodriguez ensured the design standards were met and successfully obtained a permit from the railroad. Unique design aspects included accommodations for high power transmission lines along the proposed route and incorporation of drainage.

CITY OF EDINBURG PROJECTS

Kurt Schumacher, R.P.L.S. (Project Manager), Alisha Zapata (Project Coordinator), Miguel A. Rico, Jr. (Small Unmanned Aircraft Pilot), and Edgar H. Rodriguez (Senior CADD Technician) have no direct, past projects with the City of Edinburg, but past projects within the city limits of Edinburg include:

Russell Road (Rooth Rd. to Mon Mack Rd.)
Russell Road Realignment (Ware Rd. to Rooth Rd.)

Topography survey for engineering design, horizontal and vertical control for construction, utility coordination, and 28 parcel exhibits for real estate/right-of-way acquisition. Project Deliverables: 2D and 3D mapping in MicroStation DGN format, 3D modeling for limits of project, horizontal and vertical control sheets, parcel exhibits with descriptions for real estate acquisition, Surveyor's Report detailing project approach, survey datum, boundary conflicts, and utility matrix.

Carmen Avila & Mile 22 1/2 (Traffic Signal Light Project)

Topography survey for engineering design for the proposed addition of new traffic signal lights. Topography survey and utility coordination with the City of Edinburg. Final Microstation DGN file in surface value and DTM for intersection.

Hidalgo County Courthouse

Right-of-way mapping with parcel exhibit for a portion of Business Hwy-281 (Closner Boulevard) to be abandoned by TxDOT. Provided surveying services for engineering design, West from Courthouse Square, along SH-107 approximately 1.7 miles, for drainage outfall design.

Hidalgo County Pct. #4 HSIP Project

Design survey at the intersection of Canton Road & Cesar Chavez Road and at the intersection of Canton Road & Tower Road for the proposed addition of new traffic signal lights at both intersections. Topography survey and utility coordination. Final Microstation DGN in surface value and DTM for each intersection.

Freddy Gonzalez Roadway (Closner to I-69E)

Design Survey for engineering design for proposed road widening and pedestrian trail. Services included establishing existing road right-of-way, establishing horizontal and vertical control for future construction, Test Holes by hydro excavation at potential utility conflicts, and a digital terrain model for engineering design.

Trenton Road Subsurface Utility Engineering Project

Expose and locate 36 test holes by non-invasive hydro excavation methods for possible utility conflict. Inventoried exposed utility lines by detailing utility material, size, depth from natural ground, and condition.

FM1925 & Freddy Gonzalez (Traffic Signal Light Project)

Topography survey for engineering design, boundary recon, set two (2) project benchmarks, utility coordination, LiDAR and photogrammetry, and measure distances and angles to existing powerlines. Project Deliverables: 2D and 3D mapping in MicroStation DGN format, 3D modeling for limits of project.

Robert Macheska, P.E. (Utility Coordination) and Chris Rodrigues, P.E. (QA/QC) have worked on the following projects for the City of Edinburg:

Freddy Gonzalez Dr. Hike & Bike Trail (Closner Blvd. to Raul Longoria Rd.)
GDJ aided in the NEPA environmental analysis and document preparation. The project included providing a new shared-used path for pedestrians and bicyclists along the existing Freddy Gonzalez Dr. The purpose of the project is to improve multi-modal connectivity and access in the project area. The GDJ team coordinated the scheduling with TxDOT to ensure the project maintained its funding. Five environmental technical reports, along with a scoping document were prepared and submitted to TxDOT. The project was environmentally cleared in November 2024.

Freddy Gonzalez Dr., Intersection Improvement (9th St. to BUS 281)
GDJ team aided the city in the NEPA environmental analysis and document preparation. The scope of the project included providing an 8-foot-wide ADA-compliant sidewalk adjacent to the existing roadway, removal of an existing curb, and relocation of a power pole, curb inlet and traffic light. The GDJ team implemented an accelerated environmental schedule in coordination with TxDOT to ensure the project funding remained intact. The project successfully obtained environmental clearance in December 2025.

Freddy Gonzalez Dr. (BUS 281 to I-69C)
GDJ aided in project development, funding analysis, MPO coordination, design/schematic preparation, and environmental document preparation. The scope of the project included providing a continuous left turn lane, right turn lanes at intersections, an intersection improvement at Veterans Blvd., and incorporation of the Freddy Gonzalez Hike and Bike Trail. The GDJ team conducted a Notice and Opportunity to Comment as part of the environmental process for the project. The project was environmentally cleared in June 2026 and is currently in the PS&E stage.

Cano St. & Veterans Blvd. Trail (Cano St. from 13th Ave. to Veterans Blvd., then on Veterans Blvd. to 0.4 miles North of Canton Rd.)
GDJ aided the city with the NEPA environmental analysis and documentation preparation. The scope of the project included providing an 8-foot-wide shared use path and pedestrian poles along the existing roadways. The project required a section 4(f) analysis due to the presence of the Freddy Gonzalez Memorial Park, Freddy Gonzalez Hike & Bike Trail, and the Louisiana-Rio Grande Canal Company Irrigation District-National Historic District. The project was successfully environmentally cleared in March 2026.

1. TRANSMITTAL/LETTER OF INTEREST

July 14, 2026

Mardoqueo Hinojosa, City Engineer
City of Edinburg
415 W. University Drive
Edinburg, TX 78539

Submitted electronically to https://secure.procurenow.com/portal/cityofedinburg

Re: RFQ #2026-6 | Land Surveying Services

Dear Mr. Hinojosa and Members of the Selection Committee:

We understand the City of Edinburg (City) is seeking qualified firms to provide boundary, topographic, and related surveying services on an as-needed, task order basis, supporting projects ranging from rapid-response assignments to multi-month efforts. KCI Technologies, Inc. (KCI) is pleased to submit our qualifications in response to RFQ #2026-6 for Land Surveying Services. With more than 43 years of experience supporting Texas municipalities, KCI is well positioned to deliver accurate, reliable, and timely surveying services that support the City's continued growth.

KCI's team is structured to meet aggressive schedules while maintaining a high standard of quality. Our proven QA/QC processes reduce review comments and minimize rework, allowing projects to advance efficiently. With dedicated field crews and experienced project managers available to respond quickly to City requests, we provide the flexibility and reliability required for on-call municipal contracts.

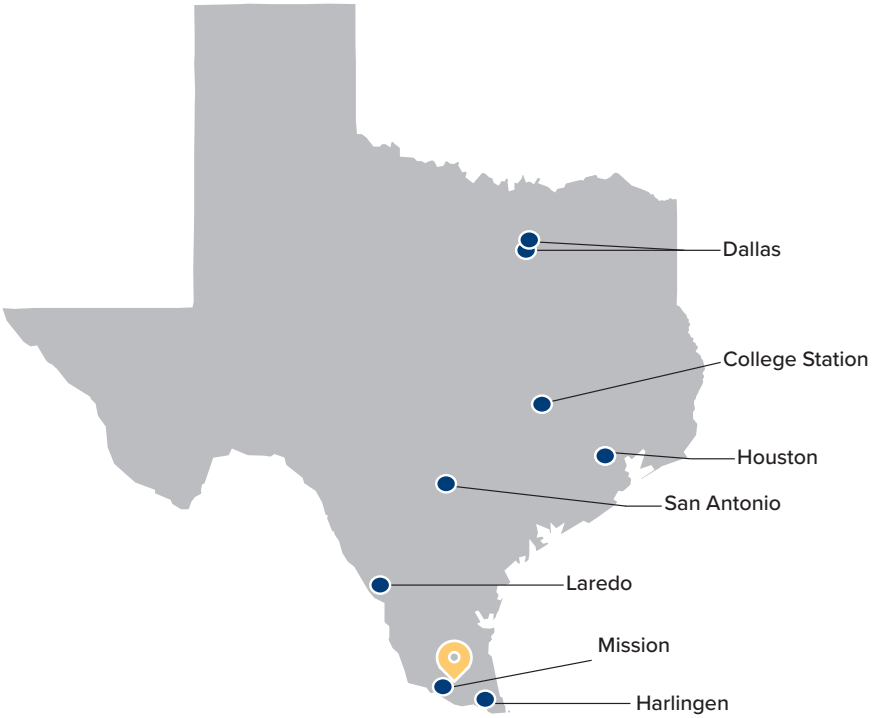
PRIMARY CONTACT

Cody Condron, RPLS, PLS, CP, CMS
2610 North Shary Road
Mission, TX 78574
Telephone: 832.975.1541 X7541
Fax: N/A
Cell phone: 832.954.7873
Email: cody.condron@kci.com

Our team's experience with municipal and joint-bid projects provides a strong foundation for navigating right-of-way coordination, utility conflicts, and multi-agency requirements, all of which are critical considerations for urban surveying assignments. We have a thorough understanding of the City's infrastructure initiatives and recognize the key role surveying plays in supporting informed planning, accurate design, efficient construction, and long-term asset management. In addition, our familiarity with the City's standards, procedures, and staff enables us to deliver coordinated, responsive services with minimal ramp-up time.

KCI is committed to supporting the City with responsive, high-quality surveying services and has the staff and resources available to immediately support this contract. We appreciate the opportunity to continue partnering with the City and are confident in our ability to deliver services that meet or exceed expectations.

KCI acknowledges there has not been any issued addendums for this RFQ.



Sincerely,

Jim Gellenthin, PLS*
Vice President // 919.278.2552 // jim.gellenthin@kci.com
*Officer of the firm authorized to bind KCI to contract

2. FIRM QUALIFICATION AND EXPERIENCE

Survey Capabilities

KCI has expertise in all phases of surveying, from initial acquisition surveys to final as-built and ALTA surveys, with the depth and flexibility to support projects of varying size and complexity. Our team is built to meet the needs of the City's Capital Improvement Plan, including roadway, utility, drainage, and airport infrastructure improvements. We provide comprehensive surveying services for highways, bridges, utilities, waterways, property acquisitions, commercial and residential developments, and public facilities. Our experienced staff of land surveyors utilizes state-of-the-art equipment and practical innovation to reduce survey costs, expedite project delivery, and maintain a superior product for our clients.

We consistently apply unique approaches using the latest technologies to provide quality and timely services, no matter the size of the project. Our licensed professionals and skilled technicians serve a diverse client base, including state and federal agencies, transportation departments, local governments, utility companies, developers, private organizations, and contractors. With offices throughout the country, KCI offers clients a detailed understanding of regional regulatory requirements and market conditions. Field personnel frequently travel and are available for a wide range of project assignments. Please see Chart 1 on the following page for a partial list of our survey capabilities.

Boundary Surveys

Using either ALTA or Texas Society of Professional Surveyors standards, we have experience producing boundary surveys in South Texas and the rest of the state. Our process includes:

- Thorough research of current and historical deeds, record maps produced by the City and other municipalities, and general land office for any state, federal or patent boundaries. All our research is done in-house by our skilled staff with knowledge of the local area. Having a local understanding of the history and community is key for complete research.
- Field work is completed with both Trimble Robotic Total Stations and dual frequency Trimble GPS (either through VRS network or base/RTK). Field work and field data are reviewed daily for accuracy and coverage. Each crew chief completes a daily field production checklist prior to leaving the jobsite each day. Our crews are furnished laptops or tablets with a MiFi device so the field data can be transmitted to the survey technician while onsite or, for larger files, in the evenings from the teams' localized offices. The survey technician reviews and processes the data that day or the following morning to verify all planned work was completed.
- Under the supervision of an RPLS and in compliance with the "Precision and Accuracy Requirements" set forth by the latest Board Rules as promulgated by the Texas Board of Professional Engineering and Land Surveying, the property survey and legal description are prepared. The final drawings are produced in either AutoCAD Civil 3D and/or MicroStation at the discretion of the client.

Topographic Surveys

Using Texas Society of Professional Surveyors standards and the City's additional requirements, KCI will develop a project-specific scope that accounts for site conditions, historic features, public awareness, future City, utility district, and municipal utility plans discovered during routine information gathering, and the survey accuracy required for urban environments.

Our approach combines specialized technology with conventional survey methods to deliver accurate topographic mapping, utility documentation, legal exhibits, and 3D models efficiently. Depending on the project size, schedule, and budget, KCI will:

- Establish site control, including a minimum of one permanent benchmark on site for each ten or fewer acres, with description and elevation to the nearest 0.01 foot. Levels will be checked by separate check level

CHART 1: SERVICE CAPABILITIES (Partial List)

- **Boundary Surveys**
- **Topographic Surveys**
- **Control Surveys**
- **As-Built Surveys**
- **Construction Stakeout**
- **Hydrographic Surveys**
- **Elevation Certifications**
- **Aerial Photogrammetry**
- **LiDAR Terrestrial Scanning**
- **Mobile Scanning**
- **3D Modeling**
- **High-Rise Construction Stakeout**
- **3D Laser Scanning**
- **ALTA/ACSM Surveys**
- **Wetland Surveys**
- **Stream Restoration Surveys**
- **Utility Designation and Location**
- **Metes and Bounds Surveys**
- **Right-of-Way (ROW) Determination**
- **Legal Descriptions**
- **Subdivision Computations**
- **Record Plats**
- **Easement and ROW Plats**
- **Plan of Surveys Preparation**
- **Minor and Major Subdivisions**
- **Existing Conditions Plans**
- **Subsurface Utility Locating**

lines, previous turning points, or benchmarks. Contours will be shown at 1-foot intervals, with allowable error not exceeding one-half contour interval, and spot elevations will be collected on a 20-foot grid, with 5-foot grid intervals beyond the site where feasible.

- Collect detailed street, boundary, and site features, including traffic devices, signs, boundary streets, adjoining rights-of-way, sidewalks, curbs, gutters, drives, street intersections, curb, sidewalk, and edge-of-pavement elevations at 5-foot intervals, far-side paving elevations, established grades where applicable, property boundary dimensions and bearings, title exceptions, easements, encroachments, setbacks, zoning, planning and zoning overlays, area measurements, written legal descriptions, and recording exhibits.
- Locate plotted structures, man-made and natural features, floor elevations at each building entrance, trees and planting areas, tree canopies, wooded and shrub areas, test borings where ascertainable, excavation or nearby water elevations, flood levels, watershed limits, potential freshet impacts, FEMA 100-year and 500-year floodplain boundaries, record flood elevations, DNR protected areas, and elevation certificate information for FEMA flood insurance coordination where required.
- Document above-grade and underground utilities, including water, gas, sanitary sewer, storm drain, culvert, electric, telephone, cable, street lighting, communications, hydrants, valves, meters, manholes, catch basins, pipe sizes, depths, pressure where available, direction of flow, rim elevations, bottom of manholes, and inverts. Utility operating authorities and applicable utility company names, addresses, and phone numbers will be listed, and the nearest available service connection will be located when utilities do not exist within or directly adjacent to the survey area.
- Use aerial LiDAR and/or photogrammetry, including planes, high-resolution drone imagery, and KCI's RiCOPTER with Riegl LiDAR and photogrammetric camera, to collect certified 3D LiDAR data. KCI has more than 40 drones, 30+ FAA-licensed remote pilots, and an established pilot safety and maintenance program.
- Use mobile LiDAR scanning by backpack or vehicle to safely capture pavement elevations, storm drains, culverts, railings, illumination, signals, retaining walls, signs, and paving surfaces while minimizing traffic impacts.
- Use terrestrial LiDAR scanning for roadway corridors, facilities, elevated piping, insulated piping, conduit, pipe racks, supports, and other above-grade features, except above building roofs unless otherwise directed.
- Use KCI's Echoboat hydrographic survey system for underwater topographic data and conventional equipment, including Trimble Robotic Total Stations, Trimble GPS using Static, VRS, or RTK methods, and digital levels.
- Prepare final topographic maps, utility information, legal descriptions, easement exhibits, ROW exhibits, record-of-survey maps when required by City or state standards, and 3D models from aerial LiDAR, mobile LiDAR, terrestrial LiDAR, photogrammetry, hydrographic, and conventional survey data. Final deliverables can be produced in AutoCAD Civil 3D and/or OpenRoads with TopoDOT.

Survey Equipment

Our survey crews are outfitted with state-of-the-art equipment and led by experienced party chiefs. Our crews are experienced in surveying simple as well as complex projects. From boundary and topographic surveys to GPS surveys as well as 3D laser scanning, KCI's survey crews are equipped to handle any project. KCI's survey staff evaluates each project to determine the most innovative, cost-effective solutions. For projects of this nature, accurate and thorough survey work is essential for delivering a high-quality product. Establishing accurate property lines, easement locations and complete site topography is the critical first step all subsequent design and plan production will be based. Detailed field survey work using high-quality and certified calibrated equipment will be supplemented by office survey research to verify the accuracy of the important "nonvisible" base plan elements (right-of-way, property lines, easement lines, buffers, wetlands, critical areas, floodplains) that are crucial to account for during the design phase.

As evident below, KCI is committed to investing in cutting edge technology. In addition, we verify all technology is properly cared for including calibrating equipment yearly or per the manufacture's guidelines. KCI invests in the best technology we can provide for our clients with detailed and

accurate data in the required time frame. Below is a list of current technology we own within Texas:

- 14 Trimble R1O-GNSS (Dual Freq. W/RTK)
- 14 Trimble TSC3 (Data loggers)
- 16 Trimble TSC (Data loggers)
- 1 P40 Leica Terrestrial Scanners
- 1 RTC 360 Leica Scanners
- 3 UAVs of various models

Performing Land Surveying Services in a Timely Manner

KCI believes the key to delivering projects on time is preparation and adherence to the schedule. We understand that schedules are "lost" a day at a time; our monitoring program will prevent that from occurring. KCI will prepare a detailed critical path method schedule for all assigned projects and address schedule issues during the scoping meeting. As is normally the case with surveying projects, obtaining right-of-entry (ROE), ROW acquisition, and utility coordination are on the critical path to getting the project ready to let for construction. Adherence to the schedule is essential to evaluating performance and will be a main topic at KCI's internal production meetings. Typical delays will be scheduled early in project development. Should schedule slippage occur, Mr. Condron will redirect the necessary resources to maintain the agreed upon schedule. Any delays will be immediately communicated to the City's representative. KCI is committed to maintaining the project's schedule, including extended working hours or on weekends as needed. The below chart demonstrates KCI's past experience meeting project schedules.

Mr. Condron will be the point of contact with the City, allocate the firm's resources, and direct our survey teams. He has the foresight to anticipate potential delay issues and proactively adjust resources to maintain project schedules. He has a successful record of managing schedules and budgets, incorporating public stakeholder concerns, and leading project teams for similar on-call contracts. He will monitor project development using project controls to shift resources as needed to maintain project schedules. He will review monthly billing reports showing itemized work in progress, overall budget, dollars spent, and remaining budget for each project he manages. He will use these reports to assess immediate and future staffing needs and to develop client-specific progress reports. He will rely on his project management experience to lead the survey team through proactive communication and delegation.

Experience Meeting Project Schedules

PROJECT NAME	ORIGINAL SCHEDULE	FINAL SCHEDULE
Brennaaleen Drainage Improvements, Edinburg, TX	02/2023 to 01/2025	02/2023 to 01/2025
Bicentennial Boulevard, McAllen, TX	11/2025 to 12/2025	11/2025 to 01/2026
Hackberry Avenue Waterline, McAllen, TX	12/2024 to 01/2025	12/2024 to 01/2025
N. McColl Road & Nolana Avenue Right Turn Lane, Edinburg, TX	05/2023 to 06/2023	05/2023 to 06/2023
Land Surveying Services for the Cardenas Property, McAllen, TX	11/2024 to 12/2024	11/2024 to 12/2024
Mile 1 East, Mercedes, TX	03/2021 to 12/2022	03/2021 to 12/2022

Uniqueness to Perform these Services

KCI, our firm and our employees, embrace a set of guiding principles—our mission, vision, and values— that are a part of the way we do business every day. Those ideals are the basis of the way we interact with our clients, manage our projects and mentor our employees, and are fundamental to who we are as consulting engineers, surveyors, construction managers and scientists, but also as members of a thriving community and growing industry.

With this strong foundation in place, KCI strives to become an extension of our clients and their staffs. Guided by these founding principles, KCI's proposed key staff consists of technical experts with strong managerial and communication skills, who are committed to the success of any task assignment.

Our firm has a staff of 200 employees located in Texas including professional surveyors, engineers, technicians, utility coordinators and designers, GIS specialists, and support staff. Through this wealth of resources, KCI has the opportunity to provide professional surveying services for the City and will use this experience and knowledge gained to successfully execute any project awarded. You will discover throughout this response our ability to become a reliable partner to the City through our experience, qualifications, past performance, capacity, and resources.

Office Location that will be Providing the Services

Our Mission Office, located at 2610 North Shary Road, will be responsible for the services provided under this contract with support from staff in Harlingen, Laredo, San Antonio, Dallas, and Houston. We are confident that our intimate knowledge of the region and community will be an asset to the City.

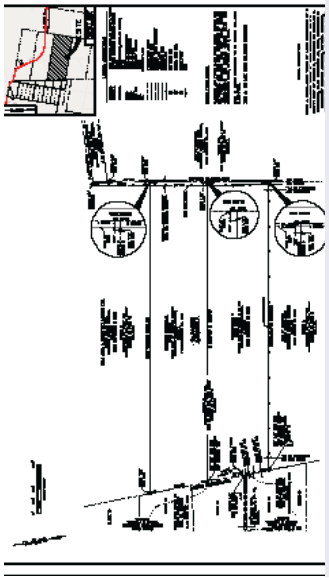
Approach to Handling Part-time Staffing Needs for Smaller Assignments

KCI has the resources to adequately staff both large and smaller assignments. Staffing needs are addressed during our weekly scheduling meetings. Mr. Condron will meet with his team every Monday to discuss project schedules and staffing needs. During this meeting a two-week staffing plan is discussed and coordinated based on fluctuating project needs. Mr. Condron and his staff use P6 and Microsoft Project to track and monitor project schedules, budgets, and staffing. All project managers and project engineers are required to keep up-to-date individual project schedules for each of their assigned projects. During the staffing meeting, projects are discussed and schedules are updated individually. During the meetings, projects are prioritized and those projects requiring the most attention or with a rapidly approaching deadline will be staffed first. Essentially, these are working meetings where discussions are constantly flowing and evolving until a solid work plan is set in place and a framework developed for the two-week workload projection schedule.

During these meetings particular attention is also paid to individual staff utilization. With input from Mr. Condron, annual targets are established for each staff member's utilization percentage (project chargeable time vs. non-chargeable time). These target percentages are compared with actual efforts on a weekly basis and also discussed during the scheduling meetings. This is important because it ensures that staff members aren't being under- or over-utilized and also provides a solid foundation for determining future staffing needs within the group. Having the ability to review and compare targets that have been established using historical group data along with the actual workload and staffing usage provides the opportunity to react to staffing needs in a quicker and more proactive way.

Should one or more key personnel not be available to complete an assigned project, Mr. Condron will reallocate project responsibilities immediately within the survey team or pull from additional qualified personnel within the firm. Many of our surveyors have overlapping skill sets -including detailed knowledge of the local terrain and historical property records - that can be allocated based on project requirements. Each dedicated employee can work overtime to maintain project schedules. We will also hire additional part-time and/or full-time employees as needed to satisfy the project's goals. Biographic summaries of the assigned personnel are provided on the following pages.

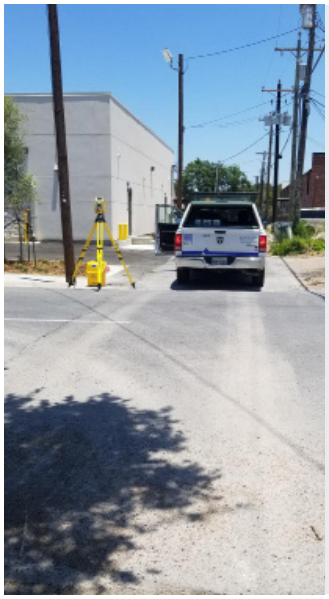
KCI has over 40 years of delivering successful professional surveying services for Texas public and private sector clients. To provide exceptional survey services, the project team must prepare and deliver detailed work order plans, concisely communicate, gain the client's agreement on the deliverables, and be disciplined to monitor the progress of preparing and delivering the work product on time and within the agreed budget costs. Over many years of successful projects, KCI has realized that successful projects demand stringent controls to meet budgets, schedules, and deliverables.



BRENNAALEEN DRAINAGE IMPROVEMENTS

City of Edinburg

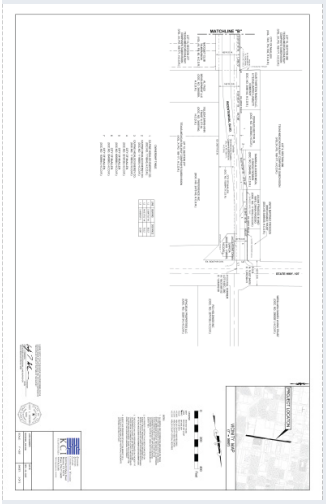
This multi-phase drainage project aimed to alleviate flooding in Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions by creating additional detention volume. Phase I involved the construction of a 120 LF bore and a 36-inch storm sewer connection leading to the proposed detention pond. The pond will discharge into the drainage canal near Freddy Gonzalez Drive. To adequately convey stormwater from the Greenbriar Subdivision and mitigate flooding, a 15-foot drainage easement was obtained. Phase II included the replacement of the undersized storm sewer system of an older flood-prone neighborhood.



KCI provided survey support for the redesign effort, establishing horizontal and vertical project control, verifying topographic survey data previously prepared by others, and performing supplemental design surveys where additional field information was needed. This survey work was essential to confirming existing conditions, identifying discrepancies in the original data, and supporting informed design modifications throughout the Cedar Heights and Greenbriar subdivision drainage improvements. KCI's field verification and construction monitoring efforts also helped confirm that drainage infrastructure improvements were implemented in accordance with the revised design intent while maintaining consideration for adjacent residents' properties. Coordination with the City was essential to meeting design criteria, supporting constructability, and advancing the project toward completion.

LAND SURVEYING SERVICES OF THE CARDENAS PROPERTY

City of Edinburg



KCI conducted a comprehensive boundary survey for two adjacent tracts totaling 125.70 acres in the Del Tule Irrigation, consisting of the N1/2 Share 3 (62.5 acres) and S1/2 Share 3 (62.85 acres). KCI performed a Category 1B, Condition 4 boundary survey in accordance with the required specifications, with an emphasis on historical research to support the boundary determination. Our team reviewed available deeds, plats, subdivision records, prior survey documents, and other recorded instruments to trace the history of the boundary, evaluate record calls, and identify potential discrepancies or conflicts affecting the tracts. This research provided the foundation for the field survey, allowing KCI's survey crew to accurately locate property corners, fence lines, and evidence of occupation while establishing precise boundary lines for both tracts. Utilizing advanced surveying equipment and techniques, KCI conducted thorough measurements and data collection, then reconciled field evidence with the historical record information to confirm boundaries and document findings. KCI prepared a detailed survey report with maps and supporting documentation to assist the City of Edinburg Solid Waste Management with reliable boundary information and project decision-making.

ALLEY REHAB SECTION A&C

City of McAllen

The primary objective of this project was to rehabilitate alleys in subpar condition while mitigating utility conflicts, improving drainage efficiency, and supporting long-term constructability. KCI performed detailed right-of-way surveys for 26 historic alleyways within the City of McAllen, many of which had minimal existing monumentation and required careful research, field verification, and professional judgment to establish reliable limits for design. These survey efforts were critical to defining the available right-of-way, identifying existing constraints, and supporting the design of horizontal alignment, vertical alignment, pavement, and driveways using OpenRoads Designer software. KCI also completed detailed topographic surveys that captured terrain elevations, surface features, drainage conditions, and both overhead and underground utilities. This comprehensive survey information allowed the design team to develop an accurate digital terrain model, prepare a utility conflict matrix, and proactively identify and address potential utility conflicts before construction. By integrating precise right-of-way, topographic, and utility data into the design process, KCI enhanced the overall quality, accuracy, and constructability of the alley rehabilitation improvements.

BICENTENNIAL BOULEVARD

City of McAllen

This project was to establish and accurately document the public ROW along the north and west boundaries of Bicentennial Boulevard. The project's primary objective was to define property lines clearly and create reliable records essential for infrastructure planning, city development, and legal compliance. By focusing on these boundaries, the survey provided stakeholders, including city planners, developers, and property owners, with precise and up-to-date information.

The survey began at the Hidalgo County Irrigation District No.1 (HCDD1) Main Canal and extends south to the ROW of Freddy Gonzalez Boulevard. From there, the project continues north from the ROW of Freddy Gonzalez Boulevard to the south ROW of Sprague Road, and finally from the north ROW of Sprague Road to the southeast corner of the property owned by Frogoza Anita. The team systematically staked out the west public ROW boundary at 200-foot intervals, ensuring precise location and documentation of survey points and boundaries for development and legal records.

HACKBERRY AVENUE WATERLINE

City of McAllen

This project involved infrastructure improvements along Hackberry Avenue between 4th Street and 6th Street in McAllen, including adjacent alleys and connecting streets within the project limits. The project is within an urban residential corridor requiring accurate existing-conditions data for below- and above-ground features. KCI provided comprehensive surveying services to support project design, including a detailed utility and topographic survey of the project corridor. Services included locating visible and underground utilities within the street ROWs and alleys, collecting topographic features, and establishing project control tied to the Texas State Plane Coordinate System (NAD 83) with vertical datum NAVD 88. KCI delivered CAD files, ASCII surface data, and field documentation to the City of McAllen to support timely and accurate design development for the waterline improvements.

N. McCOLL ROAD & NOLANA AVE RIGHT TURN LANE

City of McAllen

This project involved a detailed topographic improvement survey to support the new design within the project boundaries, with particular emphasis on documenting existing roadway features and both overhead and underground utilities. The survey covered improvements along McColl Road, approximately 235 feet south and 90 feet north of the centerline of Nolana Avenue, and along Nolana Avenue, approximately 60 feet west and 215 feet east of the centerline of McColl Road. Survey control was established using the State Plane Coordinate System, Texas South Zone NAD 83 (Survey Feet), with elevations referenced to NAVD 88, and one project benchmark was established as part of the survey. KCI collected detailed topographic data, including grade breaks and cross-sections at maximum 50-foot intervals in all directions, along with centerlines, edges of pavement, gutters, back of curb, sidewalks, existing concrete areas, easements, ROW, driveways, fences, and existing pavement markings. A key component of the survey was the collection of overhead and underground utility information, which was essential to the development of the proposed right-turn lane on the south side of McColl Road at Nolana Avenue. Utility data included valves, hydrants, manholes, inlets, standpipes, pedestals, vaults, boxes, marker signs, power poles, underground electrical and communications lines, water and sewer lines, gas lines, appurtenances, manhole and inlet inverts, and pipe sizes. This detailed topographic and utility information provided the design team with a reliable basis for evaluating existing conditions, identifying potential conflicts, refining the roadway layout, and developing an accurate and constructible design.

MILE 1 EAST IMPROVEMENTS

City of Mercedes

This project included the reconstruction of Mile 1 East for the City of Mercedes. This 1.40-mile corridor extends from BUS 83 at the south end to Mile 8 North at the north end and consists of both urban and rural roadway conditions. Throughout the project, survey activities were prioritized to provide the foundation for both design and construction. KCI performed right-of-way mapping to determine precise property boundaries, completed detailed topographic surveys to capture existing terrain and infrastructure, and meticulously located utilities throughout the project corridor. A key component of the survey effort was KCI's aerial mapping approach, which utilized a low-altitude unmanned aerial vehicle equipped with a high-definition photogrammetric camera and operated by a licensed KCI pilot. This UAV data collection provided high-definition orthomosaic imagery of the route, along with a detailed 3D mesh that was processed and certified by a KCI-certified photogrammetrist. The resulting survey deliverables provided an accurate, high-resolution visual and spatial record of the corridor, helping the design team evaluate existing conditions, identify utility conflicts, inform the storm sewer system layout with strategically placed drainage inlets, and guide the roadway reconstruction and widening. Survey services included right-of-way mapping, topographic survey, aerial mapping, UAV photogrammetry, 3D mesh development, and utility location.

NORTH MAIN DRAIN III PHASE I STORMWATER

Hidalgo County Drainage District No. 1

KCI provided comprehensive design survey services for the PS&E drainage design for this project. The survey included research, field work, analysis, computations, and documentation for topographic, boundary, right-of-way, utility, easement, and site improvement mapping. KCI reviewed ROW maps, ROE documentation, deeds, plats, title searches, title reports, recorded easements, adjacent property ownership, and title exceptions, while reconciling discrepancies between field conditions and recorded legal descriptions. Field work included establishing site control and a permanent benchmark, collecting one-foot contours, locating fences, walls, party walls, trees, improvements, structures, cross-sections, and property boundary dimensions and bearings. KCI also located and documented above-grade and underground utilities, including storm, sanitary, water, gas, electrical, telephone, cable, valves, hydrants, manholes, catch basins, culverts, rim elevations, inverts, depths, pipe sizes, flow direction, and operating authorities where available. The survey incorporated FEMA 100- and 500-year floodplain information and relevant future plans from the City, utility districts, and municipal utilities discovered during routine research. This detailed survey provided the reliable boundary, topographic, utility, title, and floodplain information needed to support drainage design, identify conflicts, and improve constructability.

NEALE HOUSE RENOVATION

City of Brownsville

KCI provided professional services for the Neale House Rehabilitation Project, which involved relocating the Recorded Texas Historical Landmark known as the Neale House, an approximately 3,110-SF pier-and-beam wood-frame home, from 230 Neale Drive to Linear Park in Brownsville. KCI provided preliminary engineering and Phase 1 support services, including surveying, engineering design, and construction-phase support. Surveying was a component of the rehabilitation effort, requiring precise horizontal and vertical control to monitor the project throughout relocation and rehabilitation activities. KCI established two control points, used GPS observations to tie the control to state plane coordinates and the project vertical datum, and provided the survey framework needed to support ongoing construction monitoring. KCI also performed detailed topographic survey work at the proposed site to support design development, tying in streets, sidewalks, drainage structures, utilities, finish floor elevations, spot elevations, and other features. This survey information helped the design team evaluate existing conditions, coordinate site improvements, and develop a more accurate and constructible rehabilitation design.

3. TEAM QUALIFICATIONS & EXPERIENCE

Project Manager and Key Staff Qualifications

KCI has assembled a project team with the experience and qualifications to successfully deliver all services required under this contract to the City of Edinburg. Our assigned staff has prior experience working with the City, Hidalgo County, HCDD1, TxDOT Pharr District, adjoining cities like McAllen, and Pharr, and the stake holding utility companies that are sure to be affected by the proposed improvements, including Texas Gas Service, American Electric & Power, Time Warner Communications, Total E&P USA, Sprint, MCI, and SBC. For this contract, **Cody Condron, RPLS, PLS, CP, CMS**, will serve as Project Manager. Mr. Condron will be supported by our 16 employees in our Mission office and nine additional employees in Harlingen. In addition to our 16-person staff in Mission, Mr. Condron has direct access to additional staff located in our other seven offices in Texas.

We maintain a qualified staff of licensed Texas-registered professional land surveyors and professional engineers, 3D specialists, surveyors-in-training, and CADD technicians. KCI has a survey team of 34 in Texas, including seven licensed surveyors and 12 field crews as available resources.

KCI implements industry-leading tools such as a cloud-based File Management System and remote collaboration tools such as Microsoft Teams so we are not limited to onsite staffing for our projects. Please see the following pages for detailed resumes of our key staff.

The KCI team is dedicated to providing quality, responsive services to the City. At KCI, we feel that the best measure of our performance is client satisfaction and our relationship with our clients. The client references to the right can attest to the performance of KCI and our key personnel. We encourage the City to discuss with these clients the capabilities of our firm and proposed staff members.

Cody Condron, RPLS, PLS, CP, CMS

Project Manager

7 Years with KCI

32 Total Years of Experience

25 % Availability

Overview

Mr. Condron is one of a handful of professionals to hold both a Registered Professional Land Surveyor and Certified Photogrammetrist license in Texas. He is also the first Certified Mapping Scientist UAS. He is responsible for overseeing all aspects of day-to-day survey operations. Mr. Condron possesses extensive experience and knowledge in control surveys, property descriptions, property conveyance documents, topographic and boundary surveys, GPS, construction staking, aerial mapping, bathymetric surveys, and land development. He has performed work with public and private entities, including Hidalgo County, cities of McAllen, Edinburg, Mercedes, and Brownsville, Port of Brownsville, and many more. The surveys produced for these entities vary from preconstruction design work through completion of projects, along with monitoring of projects after completion. Due to Mr. Condron's diverse and broad background, he has gained experience as an expert witness for numerous cases that require extensive knowledge relating to all aspects of surveying.

Certifications & Registrations

- Certified Photogrammetrist / 1616
- Certified Mapping Scientist / UAS001
- FAA Part 107 UAS (Drone) Pilot / 3929273

Education

- Coursework / Geographic Information Science / Texas A&M University Corpus Christi

Project Experience

Brennaaleen Drainage Improvements, City of Edinburg. Survey Manager. The drainage project aims to alleviate flooding in Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions by creating additional detention volume. The project included multiple phases. Phase I will involve the construction of a 120 LF bore and a 36-inch storm sewer connection leading to the proposed detention pond.

Land Surveying Services of the Cardenas Property, City of Edinburg, Survey Manager. The team located property corners and fence lines, verified boundaries against site conditions and property records, and prepared survey maps and documentation to support the City's requirements.

Alley Rehabilitation, City of McAllen. Survey Manager. This project's primary objective was to rehabilitate 26 alleys in sub-par conditions while prioritizing the mitigation of utility conflicts and enhancing drainage efficiency. Mr. Condron oversaw a comprehensive topographic survey, which proved instrumental in facilitating the precise identification and resolution of utility conflicts through the development of a utility conflict matrix. This survey also provided terrain elevations from which we created a digital terrain model essential for the drainage design process.

Faysville Drain, Hidalgo County Drainage District No 1. Survey Manager. KCI was awarded a contract by the HCDD1 for engineering and surveying services of a proposed segment of the Faysville Drain. Topographic survey was required to show existing hydraulic and hydrologic conditions to be analyzed using WMS, HEC-HMS, and Rain on 2D Mesh component within HEC-RAS. KCI provided QA/QC over all survey deliverables verifying all State and HCDD1 standards were met.

SH 48, TxDOT Pharr District. Survey Manager. KCI provided schematic design for the rehabilitation of SH 48 from FM 511 to SH 4. There were four crossings to be analyzed, each included a report and coordination with drainage districts, the County, and the City. The first task was to define the drainage area in a flat area, then analyze the Resacas and irrigation ditches using HEC-RAS. The survey portion included horizontal and vertical control throughout the project, aerial mapping and topography by use of LiDAR, supplemental topographic work for water crossings including work upstream and downstream to assist in H&H analysis, and QL-B and -C subsurface engineering support.

Queens Park Commercial Development, International Weight Inspection Services, LLC. Survey Manager. This project is ~30-acre commercial development at the Southwest intersection of Las Milpas Road and South I Road. KCI prepared a boundary survey, Category 6 Design Topographic survey and performed subdivision platting no less than the minimum standards as described by the TBPELS.

Mile 1 East Improvements, City of Mercedes. Survey Manager. This project included S&E review and PS&E services for the reconstruction of Mile 1 East. This 1.4 mile corridor consists of urban and rural roadways. This project is a local let project in Hidalgo County funded by federal, state, and city monies. Survey items included ROW mapping, topographic survey, aerial mapping, and utility locations.

Baldomero Cervantes

Assistant Project Manager

9 Years with KCI

41 Total Years of Experience

50 % Availability

Overview

Mr. Cervantes serves as a senior CADD technician with KCI's Mission office. He has a total of 41 years of experience drafting and mapping documents for municipal, county, and state engineering and surveying projects. Mr. Cervantes is experienced in developing civil construction plan sets and survey deliverables in both MicroStation and AutoCAD. He is proficient with many third-party software systems including GEOPAK, Civil 3D, and Trimble Geosystems. Mr. Cervantes incorporates existing conditions tied to the required datum, performs calculations, and produces digital 2D and 3D data in the specified file type. He has assisted with the Port of Brownsville, City of Mercedes, and Hidalgo County Drainage District demonstrating the use of Drones for topographic surveys and 3D modeling.

Education

- AS / Drafting and Design / Texas State Technical College

Project Experience

Alley Rehab Section A&C, City of Mission, TX. Surveyor. The primary objective of this project was the rehabilitation of alleys in subpar conditions while prioritizing the mitigation of utility conflicts and enhancing drainage efficiency. KCI orchestrated the design of horizontal alignment, vertical alignment, pavement, and driveways for 26 alleys within the City utilizing OpenRoads Designer software. Conducting a comprehensive topographic survey proved instrumental, facilitating the precise identification and resolution of utility conflicts by developing a utility conflict matrix. This survey also provided terrain elevations from which we created a digital terrain model essential for the drainage design process.

Brennaaleen Drainage Improvements, City of Edinburg, TX. Surveyor. The drainage project aims to alleviate flooding in Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions by creating additional detention volume. The project included multiple phases. Phase I will involve the construction of a 120 LF bore and a 36-inch storm sewer connection leading to the proposed detention pond.

North Main Drain III Phase 1 Stormwater - Hidalgo County. Surveyor. KCI provided design survey services for the PS&E drainage design for the North Main Drain III Phase I Project.

Hidalgo County Drainage District No 1, Faysville Drain - Hidalgo County, TX. Survey Technician. KCI provided engineering services for a proposed segment of the Faysville Drain. The project, part of the 2018 Hidalgo County Drainage District Bond Program, specifically aimed to alleviate flooding in the community of Faysville and the surrounding vicinity by intercepting runoff from a 12 square-mile watershed and providing the improved hydraulic performance of an existing system by improving hydraulic cross-section and incorporating pump and gate structures. We performed a hydrologic analysis of the hydraulic design, authored a drainage report, performed the final preliminary and final design, produced the final PS&E, and provided construction phase services.

City of Mercedes Mile 1 East Improvements, City of Mercedes. Survey Technician. This project included S&E review and PS&E services for the reconstruction of Mile 1 East for the City of Mercedes. This 1.4 mile corridor runs from BUS 83 (south end) to the Mile 8 North (north end) and consists of urban and rural roadways. This project is a local let project in Hidalgo County funded by federal, state, and city monies. KCI is involved in developing the Advanced Funding Agreement between the RGV MPO, TxDOT, City of Mercedes, and Hidalgo County. Mr. Cervantes provided survey coordination for the ROW mapping, topographic survey, aerial mapping, and utility locations.

Queens Park Commercial Development, International Weight Inspection Services, LLC. Survey Coordinator. This project is an approximately 30-acre commercial development at the Southwest intersection of Las Milpas Road and South I Road. KCI prepared a boundary survey, Category 6 Design Topographic survey, and performed Subdivision Platting no less than the minimum standards as described by the TBPELS.

Lewis Harrison, RPLS

Property Surveys

4 Years with KCI **40%** Availability

15 Total Years of Experience

Overview

Mr. Harrison has more than 15 years of experience performing boundary surveys of various certifications (board minimum standard, CAT-1A, ALTA/NSPS), and the specifications required to meet survey standards. He works with engineers, architects, and project managers to put together design survey scopes and budgets to meet the project's needs and deliverables, meeting municipal requirements. His experience includes reviewing construction drawing sets and creating construction staking survey scopes for projects ranging from apartment complexes to +/- 20,000 feet of railroad spur extensions. He works with clients to meet their surveying needs on long term projects, utilizing and incorporating geospatial data from LiDAR, photogrammetry, and bathymetric data to fulfill survey requirements.

Education

Project Experience

Alley Rehab, City of McAllen. Surveyor. The primary objective of this project was the rehabilitation of alleys in subpar conditions while prioritizing the mitigation of utility conflicts and enhancing drainage efficiency. Conducting a comprehensive topographic survey proved instrumental, facilitating the precise identification and resolution of utility conflicts by developing a utility conflict matrix. This survey also provided terrain elevations from which we created a digital terrain model essential for the drainage design process.

World Trade Bridge Expansion, City of Laredo. Surveyor. KCI is providing civil engineering, surveying, design and plan development for the expansion of the World Trade Bridge Port of Entry. Surveying includes the US and Mexico sides of the Rio Grande River, along with survey measurements of the river itself.

TxDOT IH35: MM16 to MM30, TxDOT Laredo District. Surveyor. KCI is providing surveying and utility coordination services for the widening of IH 35 from 2.68 miles north of the Uniroyal Interchange to 1.2 miles north of the US 83 Interchange. Surveying includes tying all existing utilities and improvements found along the corridor, along with ROW acquisition.

Grant Martinez, PE, LGPP

QA/QC

8 Years with KCI **60%** Availability

8 Total Years of Experience

Overview

Mr. Martinez has over eight years of experience in managing a diverse array of infrastructure projects, demonstrating a commitment to delivering high-quality results. He is well-versed in designing stormwater management systems and detention facilities, contributing to environmentally sustainable practices in infrastructure development. He has conducted detailed hydrologic analyses, which are critical for understanding water flow and managing stormwater effectively. Additionally, Mr. Martinez's expertise encompasses extensive coordination in roadway design and the supervision of utility coordination and design, facilitating the seamless integration of utilities within infrastructure projects.

Jose Galvan, III, SIT, CFM, GISP

Topographic Surveys

1 Year with KCI **50%** Availability

7 Total Years of Experience

Overview

Mr. Galvan is a Surveyor-in-Training with experience supporting public and private-sector projects. His expertise spans land surveying principles, AutoCAD and civil design, GIS development and database management, and advanced drone and LiDAR operations. Mr. Galvan provides comprehensive surveying support in both field and office settings, including plat development, surface modeling, and elevation analysis. He has led drone mission planning and LiDAR data acquisition and processing to produce Digital Elevation Models and has played a key role in the successful preparation and submission of MT-1, MT-2, and Elevation Certificates to FEMA in support of land development and permitting efforts.

Education

Certifications and Registrations

- SIT / TX / 110725; Certified Floodplain Manager (CFM) / 4294-22N; Geographic Information Systems Professional (GISP) / 162398; FAA Part 107 UAS (Drone) Pilot / 4433806

Project Experience

Sprague Road, City of Edinburg. Senior Survey Specialist. This project involved a comprehensive topographic survey to ensure a smooth and efficient design process for the rehabilitation of Sprague Bridge. A detailed survey was conducted to establish control and set monumentation, allowing for accurate horizontal and vertical control sheets. The project included creating roadway cross-sections at 50-foot intervals to thoroughly assess the existing conditions. Additionally, the survey examined the current bridge structure and adjacent roadway, identified existing utilities, and located property corners to accurately determine ROW.

FM 102, TxDOT Yoakum District. Senior Survey Specialist. KCI provided surveying services in support of the PS&E needed for the realignment of FM 102 in Colorado County from IH 10 to 0.66 miles south of FM 949 (6.4 miles) for design to help flatten existing curves. The survey team provided ROW mapping, parcel taking, design surveys, and horizontal and vertical control for the project.

Cole Preston, PE

SUE and Utility Coordination

8 Years with KCI

8 Total Years of Experience

Overview

Mr. Preston brings experience in UC and engineering on large and small municipal, state, and private projects. He has demonstrated expertise in utilizing TxDOT's Utility Cooperative Management Process. Mr. Preston has performed quality reviews of both NAASCO PACP and MACP inspections and made recommendations for continuous maintenance on a consent decree-driven sewer rehabilitation program. He has utilized communication skills to keep various stakeholders aligned with the goals of each individual project.

Education

- BS / Civil Engineering / University of Memphis

Certifications and Registrations

- PE / TX / 144595

Project Experience

Veterans Boulevard, City of Edinburg. Project Engineer. The Veterans Detention Pond Phase II is part of Edinburg's ongoing flood management and infrastructure improvement program. KCI provided SUE Quality Level A as per ASCE/UESI/CI 38-22, Standard Guideline for Investigating and Documenting Existing Utilities. Locations were determined by City of Edinburg and KCI. KCI provided Utility Adjustment Coordination with individual utility companies, Local Public Agencies, City of Edinburg Program Manager, City of Edinburg Utility Staff, Hidalgo County Drainage District, Design Engineer, and maintenance staff.

Mile 1 East Improvements, City of Mercedes. Project Engineer. This project included S&E review and PS&E services for the reconstruction of Mile 1 East for the City of Mercedes. This 1.4 mile corridor runs from BUS 83 (south end) to the Mile 8 North (north end) and consists of urban and rural roadways. This project is a local let project in Hidalgo County funded by federal, state, and city monies. KCI is involved in developing the Advanced Funding Agreement between the RGV MPO, TxDOT, City of Mercedes, and Hidalgo County.

4. REFERENCES

The KCI team is dedicated to providing quality, responsive services to the City. At KCI, we feel that the best measure of our performance is client satisfaction and our relationship with our clients. The client references below can attest to the performance of KCI and our key personnel. We encourage the City to discuss with these clients the capabilities of our firm and proposed staff members.

Eduardo Mendoza, PE, PTOE

City of McAllen
P: 956.681.1151
E: edmendoza@mcallen.net

Alley Rehab Section A&C description - The primary objective of this project was to rehabilitate alleys in subpar condition while mitigating utility conflicts, improving drainage efficiency, and supporting long-term constructability. KCI performed detailed ROW surveys for 26 historic alleyways within the City of McAllen, many of which had minimal existing monumentation and required careful research, field verification, and professional judgment to establish reliable limits for design. These survey efforts were critical to defining the available ROW, identifying existing constraints, and supporting the design of horizontal alignment, vertical alignment, pavement, and driveways using OpenRoads Designer software. KCI also completed detailed topographic surveys that captured terrain elevations, surface features, drainage conditions, and both overhead and underground utilities. This comprehensive survey information allowed the design team to develop an accurate digital terrain model, prepare a utility conflict matrix, and proactively identify and address potential utility conflicts before construction. By integrating precise ROW, topographic, and utility data into the design process, KCI enhanced the overall quality, accuracy, and constructability of the alley rehabilitation improvements.

Staff Involved:
- Cody Condron / Survey Manager
- Baldomero Cervantes / Senior Survey Technician
- Esequiel Salazar / Survey Technician

Omar Cano, PE, CFM, PMP, CCM

Hidalgo County Drainage District No. 1
P: 956.292.7080
E: omar.cano@hcdd1.org

Faysville Drain - A topographic survey was required to show existing H&H conditions to be analyzed using WMS, HEC-HMS, and Rain on 2D Mesh components within HEC-RAS. The final design of the Faysville Drain segment subject to the contract was determined iteratively by producing proposed hydraulic models in HEC-RAS and comparing the hydraulic performance of each. R.O.W., one of four preferred HUB surveyors in the Lower Rio Grande Valley, provided the surveying for this contract. KCI provided QA/QC overall survey deliverables, verifying all state and HCDD1 standards were met.

Staff Involved:
- Cody Condron / Survey Manager
- Baldomero Cervantes / Survey Technician
- Grant Martinez, PE / Project Engineer

Dalinda Cardenas

City of Edinburg
P: 956.381.5635
E: dcardenas@cityofedinburg.com

Cardenas Property Survey - KCI conducted a boundary survey for two adjacent tracts totaling 125.70 acres in the Del Tule Irrigation, consisting of the N1/2 Share 3 (62.5 acres net) and S1/2 Share 3 (62.85 acres net). KCI performed a Category 1B, Condition 4 boundary survey in accordance with the required specifications, with a strong emphasis on historical research of recorded records to support the boundary determination. Our team reviewed available deeds, plats, subdivision records, prior survey documents, and other recorded instruments to trace the history of the boundary, evaluate record calls, and identify potential discrepancies or conflicts affecting the tracts.

This research provided the foundation for the field survey, allowing KCI's survey crew to accurately locate property corners, existing fence lines, and evidence of occupation while establishing precise boundary lines for both tracts. Utilizing advanced surveying equipment and techniques, KCI conducted thorough measurements and data collection, then reconciled field evidence with the historical record information to confirm boundaries and document findings. KCI prepared a detailed survey report with maps and supporting documentation to assist the City of Edinburg Solid Waste Management with reliable boundary information and project decision-making.

Staff Involved:
- Cody Condron / Survey Manager
- Baldomero Cervantes / Senior Survey Technician

The table below summarizes experience for the City of Edinburg.

City of Edinburg Project	Staff Involved
Brennaaleen Drainage Improvements	Cody Condron, Baldomero Cervantes, Esequiel Salazar
Del Tule An Irr Boundary Survey 2 Tracts	Cody Condron, Baldomero Cervantes, Esequiel Salazar
Veterans Boulevard	Cole Preston
Sprague Road Bridge Replacement	Baldomero Cervantes, Esequiel Salazar, Jose Galvan, III
Land Surveying Services of the Cardenas Property	Cody Condron, Baldomero Cervantes

5. INSURANCE

Insurance Summary

KCI certifies it carries the following insurance at the noted limits:

General Liability: $2M each occurrence / $4M aggregate;

Automobile Liability: $2M combined single limit for bodily injury and property damage;

Workers' Compensation: An amount not less than that required by State law and to include Employer's Liability of $1M;

Umbrella: $15M each occurrence / $15M aggregate over General Liability, Auto Liability, and Workers' Compensation; and

Professional Liability: $10M per claim / $15M aggregate.

Litigation Summary

Jennifer Nicole Moon, Individually and as Administrator of the Estate of Gregory Moon, Deceased, et al vs. Pittman Construction Company / Middle Georgia Paving, Inc / KCI Technologies, Inc. / Georgia Department of Transportation

Case No: 20CV0399

Jurisdiction: Superior Court of Jackson County, Georgia

Opened: June 2020

Closed: November 2021 – Settled

The claim alleged wrongful death of Gregory Moon who was driving his motorcycle through a construction zone in the early morning of June 7, 2018. When attempting to change lanes, Mr. Moon's motorcycle allegedly hit steep uneven pavement causing him to lose control. Mr. Moon later succumbed to his injuries. KCI was hired by GDOT to perform inspection and supervisory work on this paving project.

George Powell vs. City of San Marcos / 2202 Hunter Road Inv. LP / Don Durden, Inc., DBA Civil Engineering Consultants (CEC)

Case No: 19-3078

Jurisdiction: San Marcos, Texas

Opened: April 2020

Closed: December 2022 – Settled

This claim alleged negligence on the part of CEC as well as the other defendants. Plaintiff claimed the design of a detention pond caused flooding and damage to his property.

Susan Galloway, Personal Representative of the Estate of William Andrew Galloway, Deceased vs. Blythe Construction, Inc. / Stay Alert Safety Services, Inc. / South Carolina Department of Transportation / KCI Technologies, Inc. / Infrastructure Consulting & Engineering

Case No: 2019-CP-42-04336

Jurisdiction: State of South Carolina, County of Spartanburg

Opened: December 2020

Closed: January 2023 – Dismissed

The claim was based on a fatal car accident that occurred on December 14, 2017, whereby Mr. Galloway was allegedly unaware that traffic was stopped ahead and unable to avoid colliding with a vehicle stopped directly ahead of him. KCI was performing inspection services under a contract with South Carolina Department of Transportation. *KCI acquired (i) Don Durden, Inc., DBA Civil Engineering Consultants in November 2021, and (ii) McLaren Engineering Group in October 2024.

Richard A. Brinkley v. Sheldon Miner / KCI Technologies, Inc.

Case No: N21C-11-115 VLM

Jurisdiction: In the Superior Court of the State of Delaware

Opened: April 2022

Closed: June 2023 – Dismissed

Plaintiff was an employee of Mumford and Miller Concrete, Inc., working at a project site when he was allegedly struck by a vehicle driven by Sheldon Miner on December 17, 2019. KCI was hired by DelDOT to perform inspection services.

Shelton Powell v. Sheldon Miner / Mumford and Miller Concrete, Inc. / KCI Technologies, Inc.

Case No: N20C-12-149 MMJ

Jurisdiction: In the Superior Court of the State of Delaware

Opened: November 2021

Closed: July 2023 – Motion for Summary Judgment granted

Plaintiff was a passenger in a vehicle traveling through a construction zone on December 17, 2019. The vehicle allegedly drove through mud on the road causing the vehicle to crash, thereby, injuring the passenger. KCI was hired by DelDOT to perform inspection services.

Edward Zambito and Linda Zambito, both Individually and as the Co-Executors of the Estate of Allie Rose Zambito, Deceased vs. A-Del Construction Co, Inc. / Jonas Stoltzfus t/a Stoltzfus Meats & Deli / Neal Toros / KCI Technologies, Inc.

Case No: 210600429

Jurisdiction: Court of Common Pleas Philadelphia County

Opened: November 2021

Closed: August 2023 – Dismissed

The claim was based on a fatal accident that occurred when a pedestrian was attempting to cross at an intersection under construction in the evening on June 21, 2019. The intersection did not have a sidewalk and construction barriers were in place. KCI was hired by DelDOT to perform inspection services.

1000 Avenue at Port Imperial Condominium Association, Inc. v. UST Lennar PIS 10 / McLaren Engineering Group / et al. (over 60 defendants)

Case No: HUD-L-002206-18

Jurisdiction: New Jersey Superior Court, Hudson County

Opened: November 2018

Closed: November 2023 – Stipulated Dismissal

Plaintiff alleged the defendants were negligent in the planning, design, construction, ownership, and maintenance of a newly constructed residential building, which resulted in settlement and cracks throughout the building.

Michael Wilz and Lorraine Wilz v. Stadium Casino RE, LLC / Bower Lewis Thrower Architects, Ltd. / Gilbane Building Company / JPC Group, Inc. / McLaren Technical Services, Inc. / Synterra Ltd. / Stadium Casino, LLC

Case No: 21-CV-4663

Jurisdiction: U.S. District Court, Eastern District of Pennsylvania

Opened: September 2022

Closed: November 2023 - Settled

Plaintiff alleged that the sidewalk curb at Stadium Casino was improperly designed, constructed and maintained by the various defendants, which caused Mr. Wilz to trip and fall.

Victor Hans Santillana v. State of Florida Department of Transportation / Asphalt Group, Inc. / KCI Technologies, Inc.

Case No: 2023-CA-000688-0001-XX

Jurisdiction: Circuit Court of the 20th Judicial Circuit, Collier County, Florida

Opened: September 2023

Closed: March 2024 – Settled

Plaintiff crashed his motorcycle as he changed lanes from one lane that had been milled for repaving and the other lane that had not yet been milled. KCI was performing inspection services on behalf of the Florida Department of Transportation for the repaving project.

Jennifer Ferrante v. Live Hotel Casino Philadelphia / McLaren Technical Services, Inc. / et al. (over 25 defendants)

Case No: 220602221

Jurisdiction: Court of Common Pleas, Philadelphia County

Opened: June 2022

Closed: April 2024 - Settled

Plaintiff alleged that she slipped and fell on a sidewalk curb which was caused by the various defendants' failure to design, construct and maintain the subject sidewalk curb.

Arthur Lee Adams, Jr. as Personal Representative of the Estate of Pamela Adams Powell v. SC DOT / Zachary Construction Corp. / Michael Baker International, Inc. / KCI / et al.

Case No: C.A. No: 2022-CP-32-00121

Jurisdiction: State of South Carolina, County of Lexington

Opened: February 2023

Closed: April 2024 - Settled

This litigation involves a fatality on I-20 when a car was traveling on the shoulder of the highway as part of the maintenance of traffic pattern and a tree fell on the car during a high wind event. The accident occurred within the limits of the I-20 widening project and KCI was providing construction engineering and inspection services.

Alexander D. Kunkel vs. Alexander D. Kunkel vs. J.D. Eckman, Inc. / Ford Motor Company / Meaghan Peltier / Robert Talia / Established Traffic Control, Inc. / KCI Technologies, Inc. / Brian Leslie Watkins, PE / Pennsylvania Department of Transportation (PENNDOT) / Bridgestone Americas, Inc.

Case No: 2020-00200

Jurisdiction: Court of Common of Bucks County, Pennsylvania

Opened: November 2018

Closed: July 2024 – Settled

Plaintiff was a passenger in a car with six other occupants and half of the passengers were not wearing seatbelts. The driver wrecked the vehicle within a construction zone and the vehicle overturned and landed on the roof. KCI designed the maintenance of traffic for the work zone. In the criminal case, the driver plead guilty to recklessly endangering another person in addition to other related offenses.

17-25 North Main Street, LLC v. G&S Port Chester Unit 2B, LLC / RMC Development Company, LLC / Kings Capital Construction Group, Inc. / D.S. Meyer Enterprises, LLC / Sullivan Architectural Group, P.C. / Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C / M.G. McLaren, P.C. d/b/a McLaren Engineering Group / Boswell Engineering, Inc.

Case No: 72055/2023

Jurisdiction: Supreme Court of the State of New York, Westchester County

Opened: January 2024

Closed: February 2025 – Settled

Plaintiff alleged that its building sustained damage as a result of the negligent design, oversight, and construction on the lot adjacent to Plaintiff's building.

Crystal City Independent School District ("School District") v. Pfluger Architects, Inc. d/b/a Pfluger Associates, L.P. / Persyn Engineering, Inc., d/b/a Persyn Engineering / Don Durden, Inc. d/b/a Civil Engineering Consultants ("CEC") / Bartlett Cocke General Contractors, LLC d/b/a Bartlett Cocke General Contractors

Case No: 24-12-15531-ZCV

Jurisdiction: State of Texas, District Court, 365th Judicial District

Opened: December 2024

Closed: February 2025 – Settled

The defendants are the construction and design teams contracted by the School District to design and then construct additions to Crystal City High School, Sterling Fly Junior High School, and Benito Juarez Middle School, located in Crystal City, Texas. CEC was contracted to prepare civil engineering drawings and specifications and to perform construction administration services for site grading and site drainage. The School District alleges the CEC is responsible for water seepage and draining water flowing into buildings and resulting damage to the interior finishes and contents of the buildings.

Richard Gleason and Mary Gleason v. The County of Putnam / McLaren Engineering Group / Town of Carmel / John & Jane Does 1-20

Case No: 7:23-cv-04464-NSR-VR

Jurisdiction: U.S. District Court, Southern District of New York

Opened: May 2023

Closed: March 2025 – Voluntary Dismissal

A temporary detour was required as part of a bridge replacement project and the detour went through Plaintiffs' neighborhood. Plaintiffs allege that as octogenarians their rights were violated under the Americans with Disabilities Act by the County of Putnam and McLaren Engineering Group, because the increased traffic caused by the temporary detour through their street restricted their ability to enter/exit their driveway. In addition, Plaintiffs are claiming they could not walk on their street, because they could have been injured by the increased traffic.

UC Athletic, LLC v. McMillan Pazdan Smith, LLC / KCI Associates of North Carolina, P.A.

Case No: 2021-CP-46-02683

Jurisdiction: State of South Carolina, County of York

Opened: September 2022

Closed: July 2025 - Settled

Plaintiff is a developer who hired the architect to design a new a multipurpose building and athletic center. The architect contracted with KCI for certain structural design services. Plaintiff alleges a breach of duty of care and implied warranty against KCI.

Matthew P. Pinckney v. Tommy W. Welch dba Tommy Welch Livestock / Tommy Bradley Welch dba TBW Cattle / Cary A. Fields / South Carolina Department of Transportation / Blythe Construction, Inc. / Zachry Construction Corporation / Blythe Construction Inc. - Zachry Construction Corporation, a Joint Venture / KCI Technologies, Inc. / Infrastructure, Consulting & Engineering, PLLC / Johnson, Mirmiran and Thompson, Inc.

Case No: 2023-CP-11-00031

Jurisdiction: State of South Carolina, Court of Common Pleas for the Seventh Judicial Circuit

Opened: February 2024

Closed: July 2025 – Settled

The litigation is based on a car crash that occurred on March 3, 2021, whereby Plaintiff was stopped in traffic and struck from behind by a tractor trailer within the construction zone of the I-85 widening project. KCI was performing inspection services under a contract with South Carolina Department of Transportation.

Barbara Foley v. The City of New York / The New York City department of Parks and Recreation / Site Specialists Ltd. / M.G. McLaren Engineering and Land Surveying, P.C.

Case No: 704065/2022

Jurisdiction: Supreme Court of the State of New York, Queens County

Opened: February 2022

Closed: October 2025 – Stipulated Dismissal

Plaintiff alleges she was injured at a NYC public park located at 107-10 Shore Front Parkway, Queens, NY as a result of the failure to design, construct and maintain the park.

Estate of Widmann, Jr. and David J. Widmann, Sr. v. Rondell Bradley / PennDOT / Bristol Township / URS Corporation / AECOM Technical Services, Inc. / KCI Technologies, Inc.

Case No: 2022-05562

Jurisdiction: Court of Common Pleas of Buck County, Pennsylvania

Opened: December 2023

Closed: March 2026 - Settled

This litigation involves a 2022 motorcycle crash on Bristol Pike in Bristol, PA. The crash occurred when the driver of an SUV turned left and struck the motorcycle traveling toward him. Bristol Pike underwent reconstruction in the vicinity of the accident between 2013 and 2016, and KCI was a subconsultant to URS Corporation (now AECOM) as part of the design of the project.

City of Tampa v. Vasi & Associates, Inc. / KCI Technologies, Inc.

Case No: 23-CA-013513

Jurisdiction: Circuit Court of the Thirteenth Judicial Circuit

Opened: August 2025

Closed: May 2026 - Settled

On or about February 24, 2022, during horizontal directional drilling, Vasi & Associates, Inc. is reported to have struck and penetrated a 4-inch reclaimed water main and an 8-inch City sewer line. KCI had a contract with the City of Tampa for the location and marking of underground reclaimed water facilities, and the City asserts KCI did not adequately perform these services.

KCI Technologies, Inc. v. Townsend Acres, LLC / Raymond Petkevis / Michael Seidenburg

Case No: N23C-01-083 JRJ

Jurisdiction: Superior Court of the State of Delaware

Opened: April 2024

Closed: Ongoing

KCI provided professional design services for Townsend Acres, LLC in connection with the development of a proposed subdivision. As a counterclaim to a payment dispute, Defendants allege that KCI failed to identify significant cost issues related to sewer service, rendering the subdivision plans commercially unviable.

Avora at Port Imperial Condominium Association, Inc. v. LS-NJ Port Imperial, LLC / McLaren Engineering Group / et al. (over 30 defendants)

Case No: HUD-L-2172-23

Jurisdiction: New Jersey Superior Court, Hudson County

Opened: June 2023

Closed: Ongoing

Plaintiff alleges defects in design and construction of the condominium complex in New Jersey.

Novanetto, LLC dba Prose Nails Riverwalk / Dolores Novak / Andrea Fascinetto v. R Jordan Design Group, LLC dba The Jordan Group / KCI Technologies, Inc. / Jack Laurence Corporation

Case No: 2023CI21293

Jurisdiction: 57th District Court, Bexar County, Texas

Opened: October 2023

Closed: Ongoing

Plaintiff is a tenant of a building and hired an interior design firm for the design of the leased space where a nail salon was to be located. The interior design firm subcontracted with KCI for certain mechanical engineering and design services. Plaintiff alleges negligence in the provision of mechanical engineering duties.

Steven Pisani v. The City of New York / South Street Seaport Limited Partnership / The Howard Hughes Corporation / Hunter Roberts Construction Group, LLC / M.G. McLaren Engineering and Land Surveying, P.C.

Case No: 156735/2022

Jurisdiction: Supreme Court of the State of New York, County of New York

Opened: March 2024

Closed: Ongoing

Plaintiff alleges that he was injured descending an interior staircase in the building located in New York, New York ("Building"). Plaintiff alleges that while he was performing work on behalf of New York City Economic Development the subject staircase gave way and Plaintiff stepped through a tread of the staircase and fell. The Building was condemned, not habitable and in the process of being demolished. McLaren had surveyed the Building and had identified that the building was not habitable and was in a hazardous condition and in danger of collapsing. Both Pisani and his employer were aware of the condition.

Kyle Rabon / Aleah Rabon v. Blythe Construction Inc. / Zachry Construction Corporation /South Carolina Department of Transportation / Parrish and Partners, LLC / Johnson, Mirmiran and Thompson, Inc. / Stay Alert Safety Services, LLC / Sloan Construction Company, Inc. / Reeves Construction Company / KCI Technologies, Inc. / Infrastructure, Consulting & Engineering, LLC

Case No: 2025-CP-42-04019

Jurisdiction: State of South Carolina, Court of Common Pleas for the Seventh Judicial Circuit

Opened: September 2025

Closed: Ongoing

The litigation is based on a motorcycle crash that occurred on January 31, 2024 within the construction zone of the I-85 widening project. KCI was performing inspection services under a contract with South Carolina Department of Transportation.

Luis Garcia v. KCI Technologies, Inc. et al.

Case No: 11-2025-Ca-002858-0001-01

Jurisdiction: State of Florida, Circuit Court Of The 20Th Judicial Circuit In And For Collier County

Opened: December 2025

Closed: Ongoing

This litigation is based on a vehicle accident on or around January 2024 resulting from an unspecified negligent condition on I-75, in the vicinity of mile marker 7. KCI performed various inspection services under a contract with Florida Department of Transportation.

Eric Coles v. Ian Kelly Enterprises LLC / Ian Kelly / The Live Dept. / Jean Paul Firmin / Ross Zapin / Roger Vennewald / M.G. Mclaren Engineering and Land Surveying, P.C. / Guardian Barrier Services, LLC

Case No: 150852/2026

Jurisdiction: Supreme Court of the State of New York, County of New York

Opened: January 2026

Closed: Ongoing

Plaintiff alleges that defendants caused a theater to “go dark,” and caused Plaintiff to fall off the stage from a height and sustaining alleged serious and permanent injuries.

Varo Villalobos v. Brandywine Construction Co., Inc. / Delaware Transportation Authority / State of Delaware / Delaware Department of Transportation / KCI Technologies, Inc.

Case No: Jurisdiction:

Opened: March 2026

Closed: Ongoing

Plaintiff was partially trapped at a worksite when a trench wall collapsed, resulting in multiple injuries. KCI provided construction inspection services on the project.

6. PROFESSIONAL SERVICES AGREEMENT

Professional Services Agreement

KCI has reviewed the Land Surveying Services Agreement included with the RFQ. KCI confirms that it will meet the prerequisite insurance requirements and, if selected, agrees to enter into the Land Surveying Services Agreement with the City of Edinburg.

TRANSMITTAL LETTER

Tuesday, July 14, 2026

Mr. Mardoqueo Hinojosa, P.E.
City Engineer
City of Edinburg
415 W. University Drive
Edinburg, Texas 78541

RE: Statement of Qualifications
RFQ No. 2026-6 – Land Surveying Services

Dear Mr. Hinojosa:

On behalf of Melden & Hunt, Inc., I am pleased to submit our Statement of Qualifications in response to the City of Edinburg's Request for Qualifications (RFQ No. 2026-6) for Land Surveying Services. We appreciate the opportunity to be considered for inclusion on the City's rotation list of qualified land surveying firms and are committed to providing the responsive, accurate, and professional surveying services needed to support the City's Engineering Department over the term of the contract.

For nearly eight decades, Melden & Hunt has provided professional land surveying services to municipalities, counties, utility districts, state agencies, and private clients throughout South Texas. Our Edinburg office has served the Rio Grande Valley for many years, giving us a thorough understanding of the City's development patterns, infrastructure, property records, and local regulatory requirements. This local presence allows our team to respond quickly to routine assignments, time-sensitive requests, and emergency surveying needs while maintaining close coordination with City staff.

We understand that the City is seeking a consultant capable of providing a broad range of on-call surveying services for commercial and residential properties, including boundary and topographic surveys, subdivision platting, legal descriptions, easement and right-of-way surveys, ALTA/NSPS Land Title Surveys, construction staking, utility surveys, elevation certificates, and other surveying services necessary to support capital improvement projects and municipal operations. Our experienced surveyors possess the technical expertise, modern equipment, and professional resources necessary to successfully perform these services in accordance with applicable Texas laws, standards, and the City's requirements.

At Melden & Hunt, responsiveness is one of our greatest strengths. We recognize that on-call surveying contracts require more than technical capability—they require dependable communication, flexibility, and the ability to meet demanding schedules. Our survey crews, project managers, and licensed professionals work collaboratively to ensure assignments are completed efficiently, accurately, and on time. Whether supporting a one-day field investigation or a multi-phase capital improvement project, our team is committed to providing the City with exceptional service and reliable survey deliverables.

Our professionals routinely coordinate with the Texas Department of Transportation, Hidalgo County, utility providers, drainage districts, irrigation districts, developers, title companies, and regulatory agencies to facilitate efficient project delivery. This experience enables us to anticipate potential issues, minimize delays,

and provide survey products that support sound engineering decisions and successful project implementation.

Melden & Hunt has established a reputation for technical excellence, integrity, and dependable client service by consistently delivering high-quality surveying services throughout South Texas. We understand that accurate survey information is the foundation of every successful infrastructure project, and we are committed to providing the City of Edinburg with precise, defensible, and timely surveying solutions that protect the City's interests and support its continued growth.

Melden & Hunt has carefully reviewed the Request for Qualifications and fully understands the scope of services, submission requirements, and contractual obligations associated with this solicitation. We are prepared to provide the qualified personnel, equipment, and technical resources necessary to successfully perform the requested services. Furthermore, I am authorized to submit this Statement of Qualifications and to bind Melden & Hunt, Inc. contractually. Should our firm be selected, we are prepared to promptly enter into the City's Professional Services Agreement and begin providing surveying services immediately upon authorization.

Thank you for your consideration of our qualifications. We value the opportunity to continue serving the City of Edinburg and look forward to establishing a long-term partnership that provides accurate, responsive, and cost-effective land surveying services in support of the City's infrastructure, development, and public improvement initiatives.

Sincerely,

Ruben James De Jesus

FIRM INFORMATION

Since its founding in 1947, Melden & Hunt, Inc. has been a trusted leader in civil engineering and land surveying throughout South Texas, delivering innovative, practical, and reliable solutions that have supported the growth and development of communities across the region. For nearly eight decades, our firm has successfully adapted to changing technologies, evolving regulations, and the increasing complexity of public infrastructure projects while maintaining the highest standards of professional service.

Our land surveying practice has evolved alongside the profession, integrating advanced GPS technology, robotic total stations, unmanned aerial systems (UAS), GIS applications, and state-of-the-art surveying software to produce accurate, dependable, and defensible survey data. Whether performing boundary surveys, topographic surveys, right-of-way mapping, subdivision platting, ALTA/NSPS land title surveys, or construction staking, our team delivers the precise information necessary to support sound planning, engineering design, property acquisition, and successful project implementation.

While technology and industry standards have evolved significantly over the years, our commitment to our clients has remained constant. We pride ourselves on building lasting relationships through responsiveness, technical excellence, integrity, and personalized service. Every project receives the attention of experienced professionals who understand that accuracy, communication, and timely delivery are essential to our clients' success.

Today, Melden & Hunt continues to serve municipalities, counties, utility districts, state agencies, and private clients as a trusted partner in engineering and land surveying. Our long-standing reputation is built upon delivering high-quality professional services, providing practical solutions to complex challenges, and consistently exceeding client expectations. This commitment to excellence has made Melden & Hunt one of South Texas' most respected and enduring engineering and land surveying firms.

15.2.1 Design & Construction Survey
15.4.1 Horizontal & Vertical Control for Aerial Mapping

Melden & Hunt, Inc. has assembled a highly qualified team of surveying professionals with the experience, technical expertise, and local knowledge necessary to successfully provide the land surveying services requested by the City of Edinburg. Our team consists entirely of full-time Melden & Hunt employees who have extensive experience supporting municipalities, counties, utility districts, state agencies, and private clients throughout South Texas. Together, they possess the technical capabilities, responsiveness, and familiarity with local conditions needed to efficiently complete assignments ranging from routine boundary surveys to complex topographic, right-of-way, and subdivision surveying projects.

Operating from our Edinburg office, our team is strategically positioned to provide rapid response for field investigations, surveying assignments, construction support, and other time-sensitive requests. Our local presence allows us to work closely with City staff, utility providers, developers, and regulatory agencies while providing dependable service and timely project delivery.

Mario Reyna, P.E., Principal-in-Charge, will provide executive oversight for the contract and serve as Melden & Hunt's primary representative to the City. Mr. Reyna will oversee contract administration, monitor project performance, allocate the appropriate personnel and resources for each assignment, and ensure all work is completed in accordance with the City's expectations.

His leadership and decades of municipal infrastructure experience will help ensure that every task is delivered on schedule, within budget, and in accordance with the highest professional standards. Mr. Reyna will remain actively involved throughout the duration of the contract and will be available to participate in meetings, provide technical guidance, and respond to the City's needs whenever requested.

Ruben James De Jesus, P.E., R.P.L.S., Lead Land Surveyor, will oversee all land surveying services performed under this contract and serve as the City's primary technical contact for surveying assignments. As a licensed Professional Engineer and Registered Professional Land Surveyor, Mr. De Jesus brings extensive experience in boundary surveys, topographic surveys, ALTA/NSPS land title surveys, right-of-way and easement surveys, legal descriptions, subdivision platting, construction staking, and municipal mapping. He will direct field operations, supervise survey crews, review survey data and deliverables, ensure compliance with applicable Texas Board of Professional Engineers and Land Surveyors (TBPELS) standards, and maintain the highest level of accuracy and quality on every assignment.

Supporting Mr. Reyna and Mr. De Jesus is a team of experienced survey technicians, field crews, CAD specialists, and administrative personnel who are committed to providing responsive, accurate, and dependable surveying services. Melden & Hunt's collaborative approach ensures that each assignment receives the technical expertise, resources, and attention necessary to meet the City of Edinburg's schedules, project objectives, and long-term infrastructure needs.

Our organizational structure provides the City with direct access to senior leadership while ensuring every project benefits from experienced technical oversight, efficient communication, and the full resources of one of South Texas' most respected engineering and land surveying firms. We are committed to serving as a trusted extension of the City of Edinburg's Engineering Department and delivering the high-quality land surveying services the City expects and deserves.

Mario Reyna, P.E.

Melden & Hunt, Inc. maintains a highly experienced and versatile team of licensed professionals, survey crews, CAD technicians, and technical support staff, providing the depth and flexibility necessary to successfully perform multiple assignments simultaneously. Our organizational structure allows us to quickly allocate qualified personnel and specialized resources based on the scope, complexity, and schedule of each project, ensuring timely completion without compromising quality or accuracy.

Our team includes Registered Professional Land Surveyors, Professional Engineers, experienced field crews, GIS specialists, and survey technicians who work collaboratively to deliver precise, reliable, and cost-effective surveying services. This multidisciplinary approach allows us to efficiently respond to the City's on-call needs, whether performing boundary and topographic surveys, right-of-way and easement mapping, subdivision platting, construction staking, or other municipal surveying assignments.

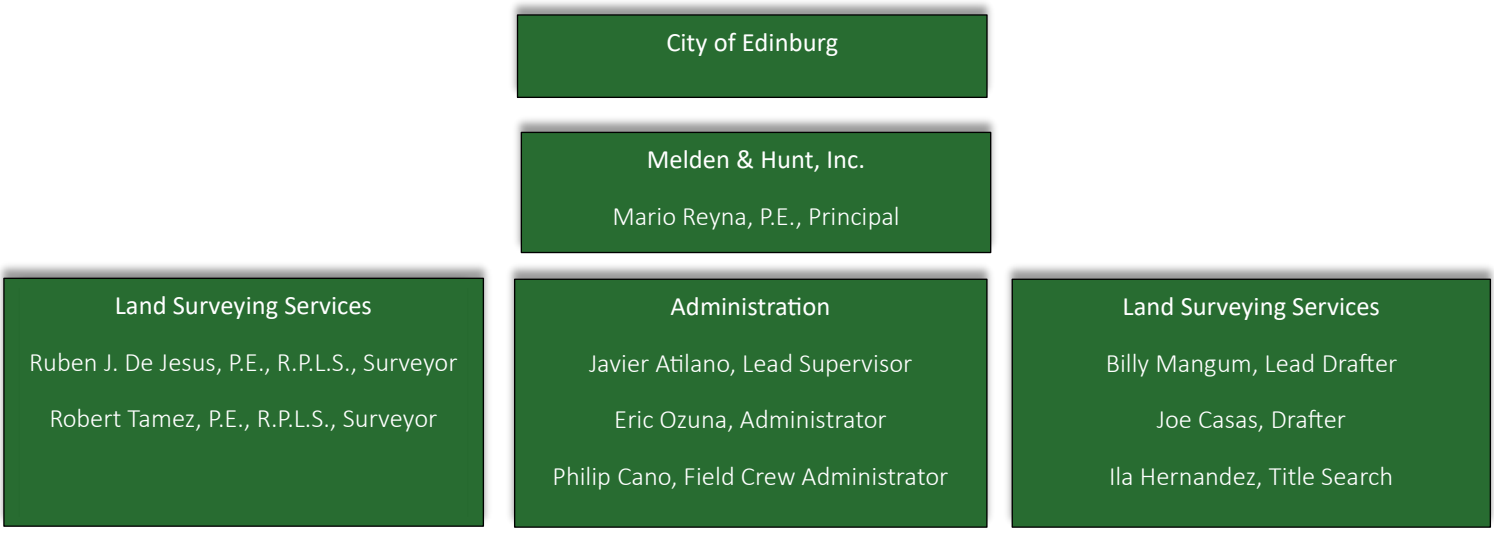
At Melden & Hunt, we believe that responsive communication is just as important as technical expertise. Our clients have direct access to our project leadership and technical staff, ensuring prompt responses, proactive coordination, and informed decision-making throughout every assignment. By combining experienced personnel, advanced surveying technology, and proven quality control procedures, we consistently deliver accurate work products on schedule, within budget, and in accordance with the highest professional standards.

Melden has the following in house professionals:

Description	No. of Staff
Registered Civil Engineer	6
Licensed Professional Land Surveyors	3
Licensed Water and Wastewater Plant Operators	2
Project Manager	1
Engineering CADD Designers	11
Survey CADD & Field Technicians	17
Construction Inspectors	3
GIS Technician	1
Project Administrators	4
Office Management Administrators	7

Organizational Chart

Project organization, combined with the assignment of qualified, responsive, and experienced professionals, is essential to the successful delivery of on-call land surveying services. Melden & Hunt, Inc. has assembled a team with the technical expertise, local knowledge, and resources necessary to provide the City of Edinburg with accurate, timely, and dependable surveying services. Our organizational structure is designed to ensure clear communication, efficient project management, and prompt response to assignments of all sizes.



Mr. Mario Reyna, P.E., Principal-in-Charge, will provide executive oversight for the contract and serve as Melden & Hunt's primary management representative. He will be responsible for overall contract administration, strategic direction, resource allocation, quality assurance, and ensuring that all services are delivered in accordance with the City's expectations. Mr. Reyna will maintain direct communication with City staff, monitor project progress, and ensure the appropriate personnel are assigned to each task to meet project schedules and objectives.

Mr. Ruben James De Jesus, P.E., R.P.L.S., Lead Land Surveyor, will be responsible for the day-to-day management and technical oversight of all surveying assignments. As the City's primary technical contact, he will oversee field operations, supervise survey crews, review survey data and deliverables, coordinate

project schedules, and ensure compliance with all applicable Texas Board of Professional Engineers and Land Surveyors (TBPELS) standards. His extensive experience in municipal land surveying, including boundary surveys, topographic surveys, ALTA/NSPS land title surveys, subdivision platting, easement and right-of-way surveys, legal descriptions, and construction staking, ensures the City will receive accurate and dependable survey products on every assignment.

Supporting Mr. Reyna and Mr. De Jesus is a team of experienced survey technicians, field personnel, CAD specialists, and administrative staff who provide the technical depth and flexibility necessary to respond quickly to multiple concurrent assignments. This collaborative approach allows Melden & Hunt to efficiently deliver high-quality surveying services while maintaining responsiveness, accuracy, and adherence to project schedules.

The core management team is as follows:

Assigned Project Team Leads – All Located in the Edinburg, Texas Corporate Office Location:

Name	Project Role
Mario Reyna, P.E.	Principal In Charge
Ruben J. De Jesus, P.E., R.P.L.S.	Land Surveyor
Robert Tamez, P.E., R.P.L.S.	Land Sruveyor

Melden & Hunt, Inc. recognizes that continuity, responsiveness, and reliability are essential to the successful delivery of on-call land surveying services for the City of Edinburg. To ensure uninterrupted service throughout the contract term, our firm has established a comprehensive succession and staffing plan that allows us to effectively manage unforeseen personnel changes while maintaining project schedules, technical quality, and client communication.

Our Edinburg office is staffed by an experienced team of licensed professionals, survey crews, CAD technicians, and technical support personnel who routinely collaborate on municipal surveying assignments. This depth of staff enables us to seamlessly reassign responsibilities whenever

necessary, ensuring that field operations, data processing, quality control, and project management continue without disruption. Because our personnel are cross-trained in our surveying procedures, quality assurance protocols, and project management systems, transitions can occur efficiently while preserving consistency across all deliverables.

Mario Reyna, P.E., Principal-in-Charge, provides executive oversight of the contract and ensures that the appropriate personnel and resources are available to meet the City's needs. Ruben James De Jesus, P.E., R.P.L.S., Lead Land Surveyor, directs the technical execution of all surveying assignments and oversees daily operations, field activities, and quality control. Should either individual become temporarily unavailable, Melden & Hunt has experienced licensed professionals and technical staff who are fully capable of assuming their responsibilities, ensuring uninterrupted service and continued compliance with all applicable surveying standards.

Our firm maintains comprehensive project documentation, digital field data, survey records, CAD files, quality control checklists, and project schedules within a centralized project management system. This approach provides authorized team members with immediate access to critical project information, allowing work to continue efficiently and minimizing any potential impact on the City.

With nearly 80 years of experience serving municipalities throughout South Texas, Melden & Hunt has developed the organizational depth, technical resources, and management practices necessary to consistently deliver responsive, accurate, and dependable land surveying services. The City of Edinburg can be confident that our team will provide uninterrupted support, maintain open communication, and successfully complete every assignment regardless of unforeseen circumstances or staffing changes.

As Principal-in-Charge, Mr. Mario Reyna, P.E., provides executive leadership, strategic direction, and quality oversight for all land surveying services performed under this contract. With decades of experience serving municipalities and public agencies throughout South Texas, Mr. Reyna understands the critical role that accurate, timely, and defensible survey information plays in the successful planning, design, construction, and maintenance of public infrastructure.

Mr. Reyna is responsible for the overall management of the contract, ensuring that every assignment receives the appropriate personnel, technical resources, and executive oversight necessary to meet the City of Edinburg's expectations. He works closely with the Lead Land Surveyor and project staff to monitor schedules, oversee quality assurance and quality control, allocate resources, and ensure that all surveying services are completed in accordance with applicable Texas laws, professional standards, and the City's requirements.

His extensive experience with municipal infrastructure projects provides valuable insight into the coordination required between surveyors, engineers, utility providers, developers, contractors, and regulatory agencies. This collaborative approach allows potential issues to be identified early, minimizing delays and ensuring that survey deliverables support efficient project planning and execution.

Mr. Reyna is committed to maintaining open communication and building strong working relationships with City staff. He believes that responsiveness, accessibility, and accountability are essential components of successful on-call professional services. Throughout the duration of the contract, he will remain actively engaged by providing executive oversight, participating in project meetings when needed, and ensuring Melden & Hunt consistently delivers accurate, reliable, and high-quality surveying services.

Under Mr. Reyna's leadership, the City of Edinburg will receive the full benefit of Melden & Hunt's nearly 80 years of experience, technical excellence, and unwavering commitment to client service. His leadership ensures that every assignment is managed with professionalism, integrity, and a focus on delivering dependable surveying solutions that support the City's continued growth, infrastructure investment, and long-term success.

Mr. Ruben James De Jesus has dedicated his professional career to Melden & Hunt, Inc., joining the firm after earning his engineering degree from The University of Texas–Pan American. Throughout his career, he has developed extensive expertise in both professional land surveying and municipal engineering, successfully managing surveying assignments for municipalities, counties, utility districts, developers, and public agencies throughout South Texas. His unique qualifications as both a Professional Engineer and Registered Professional Land Surveyor provide the City of Edinburg with the benefit of an integrated understanding of surveying, infrastructure, and municipal development.

As Lead Land Surveyor, Mr. De Jesus will be responsible for the day-to-day management and technical execution of all surveying services performed under this contract. He will oversee project planning, field operations, scheduling, survey crews, quality control, and the preparation of all survey deliverables, ensuring that each assignment is completed accurately, efficiently, and in accordance with the standards of the Texas Board of Professional Engineers and Land Surveyors (TBPELS) and the City's requirements.

Mr. De Jesus has extensive experience performing and supervising boundary surveys, topographic surveys, ALTA/NSPS Land Title Surveys, right-of-way and easement surveys, subdivision platting, legal descriptions, construction staking, utility mapping, and municipal surveying services. His thorough understanding of property boundaries, title information, easement rights, and topographic conditions enables him to identify potential issues early in the project, reducing conflicts, minimizing delays, and providing reliable survey information that supports sound engineering decisions and successful project delivery.

Working from Melden & Hunt's Edinburg office, Mr. De Jesus will remain readily accessible to City staff and will serve as the primary technical contact for surveying assignments. He is committed to maintaining open communication, responding promptly to requests, and providing the City with dependable, high-quality surveying services on projects ranging from small boundary surveys to complex municipal infrastructure and right-of-way mapping efforts.

Mr. De Jesus is recognized for his attention to detail, technical proficiency, and commitment to delivering accurate and defensible survey products. His collaborative approach, combined with his extensive municipal surveying experience, ensures that every assignment is completed with professionalism, efficiency, and the highest standards of quality. Under his technical leadership, the City of Edinburg can be confident that Melden & Hunt will consistently deliver the responsive, reliable, and accurate land surveying services necessary to support the City's ongoing infrastructure improvements, development initiatives, and long-term growth.

PROJECT UNDERSTANDING

Melden & Hunt, Inc. recognizes that accurate, timely, and dependable land surveying services are fundamental to the successful planning, design, construction, operation, and maintenance of the City of Edinburg's public infrastructure. We understand that the City is seeking qualified land surveying firms to provide commercial and residential land and topographical surveying services on an as-needed basis in support of municipal operations, capital improvement projects, property acquisitions, utility improvements, and future development initiatives.

With nearly 80 years of experience serving municipalities and public agencies throughout South Texas, Melden & Hunt possesses the technical expertise, local knowledge, and professional resources necessary to provide responsive, high-quality surveying services that meet the City's expectations. Our Edinburg office allows us to respond quickly to assignments while maintaining close coordination with City staff throughout every phase of a project.

Understanding of the Scope of Services

We understand that the City requires a surveying consultant capable of performing a wide variety of land surveying services on projects ranging from small property surveys to large municipal infrastructure improvements. The requested services include, but are not limited to, boundary surveys, topographic surveys, subdivision platting, legal descriptions, easement preparation, right-of-way acquisition support, title research, elevation certificates, and other professional surveying services necessary to support City operations and capital projects.

Our experienced surveying team is fully prepared to provide these services accurately, efficiently, and in accordance with the standards established by the Texas Board of Professional Engineers and Land Surveyors (TBPELS).

Boundary and Right-of-Way Surveys

Accurate property boundaries are essential to the successful delivery of municipal infrastructure projects. Melden & Hunt provides comprehensive boundary surveys that identify property lines, monuments, easements, encroachments, adjoining ownership, and rights-of-way. Our team also prepares legal descriptions, exhibits, and supporting documentation for property acquisitions, utility easements, roadway improvements, drainage projects, and public facilities.

Whether supporting roadway widening projects, utility extensions, park improvements, or municipal facility construction, we ensure boundary information is accurate, defensible, and fully documented.

Topographic Surveys

Comprehensive topographic information is the foundation of sound engineering design. Our survey crews collect detailed field data identifying existing grades, contours, structures, utilities, drainage features, pavement, sidewalks, vegetation, floodplain information, and other site characteristics required for engineering analysis and design.

Using advanced GPS/GNSS equipment, robotic total stations, UAV technology, and modern surveying software, we develop highly accurate digital terrain models and topographic mapping that support roadway, drainage, utility, and site development projects.

Easement, Platting and Legal Description Services

Melden & Hunt has extensive experience preparing subdivision plats, re-plats, metes and bounds descriptions, easement exhibits, utility easements, right-of-way documents, and other legal instruments necessary for municipal projects.

Our surveyors work closely with City staff, title companies, developers, attorneys, and regulatory agencies to prepare documents that facilitate property acquisition, utility installation, and land development while ensuring compliance with applicable local and state requirements.

Utility and Infrastructure Surveys

Successful infrastructure improvements depend upon accurate information regarding existing utilities and site conditions. Our survey teams locate above-ground and observable underground utilities, drainage structures, storm sewer systems, sanitary sewer systems, water distribution facilities, hydrants, valves, electrical facilities, communication infrastructure, and other improvements needed for engineering design and construction.

This information reduces conflicts during construction and provides engineers with dependable data for preparing accurate plans and specifications.

Construction Staking and Post-Construction Surveys

Melden & Hunt provides construction staking services that accurately transfer design information from plans to the field. Upon project completion, we perform as-built surveys and record documentation to verify improvements have been constructed in accordance with approved plans and applicable standards.

These services provide valuable documentation for future maintenance, operations, asset management, and GIS integration.

Responsive On-Call Surveying Services

We understand that many assignments under this contract will require prompt response and varying completion schedules, ranging from single-day field investigations to larger surveying projects extending over several months. Our experienced staff, dedicated survey crews, and Edinburg office enable us to quickly mobilize personnel and equipment while maintaining consistent communication with City staff throughout each assignment.

Our project management approach emphasizes responsiveness, schedule adherence, quality control, and proactive communication, ensuring every assignment is completed efficiently and accurately.

Quality Assurance and Technology

Melden & Hunt employs rigorous quality assurance and quality control procedures on every surveying assignment. All field data, calculations, plats, legal descriptions, CAD files, and survey deliverables undergo multiple levels of technical review before being submitted to the City.

Our survey professionals utilize state-of-the-art technology, including:

GPS/GNSS Survey Systems
Robotic Total Stations
Unmanned Aerial Systems (UAS)
Digital Levels
CAD and GIS Software
Digital Data Collection Systems

These technologies improve efficiency while providing the City with accurate, reliable, and defensible survey deliverables.

Commitment to the City of Edinburg

Melden & Hunt understands that successful municipal surveying requires more than technical expertise—it requires responsiveness, accuracy, communication, and a commitment to client service. Our experienced professionals are prepared to serve as an extension of the City of Edinburg's Engineering Department by providing dependable land surveying services that support capital improvement projects, property management, infrastructure planning, and future community development.

Our combination of local presence, experienced personnel, advanced technology, and nearly eight decades of municipal surveying experience enables us to deliver timely, accurate, and cost-effective surveying solutions for assignments of every size and complexity. We look forward to the opportunity to partner with the City of Edinburg and contribute to the continued growth, development, and success of the community.

FIRM EXPERIENCE

For nearly 80 years, Melden & Hunt, Inc. has provided professional land surveying services that support the planning, design, construction, and maintenance of public infrastructure throughout South Texas. Our surveying professionals have successfully completed thousands of assignments for municipalities, counties, utility districts, state agencies, and private clients, establishing a reputation for accuracy, responsiveness, and technical excellence.

Our Edinburg office provides the City with the advantage of experienced local professionals who understand the region's development patterns, property records, regulatory requirements, and municipal infrastructure. This local presence allows us to respond quickly to assignments while providing dependable surveying services that support the City's Engineering Department and Capital Improvement Program.

Our comprehensive surveying capabilities include:

- Boundary Surveys
- Topographic Surveys
- ALTA/NSPS Land Title Surveys
- Right-of-Way Surveys and Mapping
- Easement Preparation and Exhibits
- Legal Descriptions
- Subdivision Platting and Replats
- Construction Staking
- Utility Surveys
- FEMA Elevation Certificates
- Title Research
- Right-of-Way Acquisition Support
- As-Built Surveys
- GPS Control Surveys
- GIS Mapping Support

These services directly support the scope of services requested by the City of Edinburg for commercial and residential land surveying assignments.

Boundary Surveys

Accurate property boundaries are the cornerstone of every successful municipal project. Melden & Hunt has extensive experience performing boundary surveys for roadway improvements, utility corridors, drainage facilities, parks, municipal buildings, and public infrastructure.

Our surveyors perform comprehensive research of deed records, subdivision plats, easements, rights-of-way, and adjoining property ownership before conducting detailed field investigations.

We establish or recover monuments, identify encroachments, verify property ownership, and prepare accurate legal descriptions and exhibits that meet all applicable professional standards.

Topographic Surveys

Reliable topographic information provides engineers and planners with the data necessary to make informed design decisions.

Our survey crews collect detailed information including:

- Existing ground elevations
- Contours
- Structures
- Pavement
- Sidewalks
- Curbs and gutters
- Drainage features
- Utilities
- Trees and vegetation
- Floodplain information
- Surface improvements

Using advanced GPS/GNSS equipment, robotic total stations, digital levels, UAV technology, and modern CAD software, we develop highly accurate topographic mapping for roadway, drainage, utility, parks, and municipal facility projects.

Right-of-Way, Easement and Legal Description Services

Municipal infrastructure projects frequently require property acquisition, utility easements, and right-of-way dedication.

Melden & Hunt provides complete surveying services including:

- Right-of-way mapping
- Easement preparation
- Utility easements
- Temporary construction easements
- Permanent easements
- Metes and bounds descriptions
- Exhibit preparation
- Parcel mapping
- Property ownership research

Our team works closely with City staff, title companies, attorneys, developers, and regulatory agencies to facilitate efficient property acquisition and project delivery.

Platting and Land Development Support

Melden & Hunt has extensive experience preparing subdivision plats, replats, lot consolidations, abandonments, and other land development documents required for municipal review and approval.

Our surveyors understand local subdivision regulations and coordinate with municipal staff to prepare documents that facilitate orderly community growth while protecting the City's long-term infrastructure interests.

Utility Surveys

Successful infrastructure improvements depend upon accurate utility information.

Our survey teams identify and locate:

- Water mains
- Sanitary sewer systems
- Storm sewer systems
- Drainage structures
- Fire hydrants
- Valves
- Electric facilities
- Telephone and communications infrastructure
- Gas utilities
- Other above-ground and observable underground facilities

This information provides engineers with dependable base mapping while reducing utility conflicts during construction.

Construction Staking and As-Built Surveys

Melden & Hunt provides construction staking services that accurately transfer engineering plans to the field.

Our services include:

- Horizontal and vertical control
- Utility layout
- Roadway layout
- Drainage improvements
- Building layout
- Earthwork control
- Final as-built surveys

These services help contractors construct projects accurately while providing the City with reliable documentation for future maintenance and asset management.

Advanced Survey Technology

Melden & Hunt continually invests in modern surveying technology to improve efficiency and accuracy.

Our equipment includes:

- GPS/GNSS Survey Systems
- Robotic Total Stations
- Digital Levels
- Unmanned Aerial Systems (UAS)
- GIS Software
- CAD Mapping Software
- Digital Data Collection Systems

These technologies allow us to provide accurate survey deliverables while reducing field time and improving overall project efficiency.

Commitment to the City of Edinburg

Melden & Hunt understands that the City requires more than a surveying consultant—it requires a responsive partner capable of delivering accurate information, meeting demanding schedules, and supporting a wide variety of municipal projects.

Our experienced surveyors are committed to providing dependable, timely, and cost-effective surveying services that assist the City with infrastructure improvements, property management, land development, and capital improvement planning. Whether performing a one-day boundary survey or supporting a complex, multi-phase municipal project, our team is prepared to deliver the professional service, technical expertise, and responsiveness the City of Edinburg expects.

With nearly eight decades of experience, an office located in Edinburg, advanced surveying technology, and a team of highly qualified professionals led by Mario Reyna, P.E., Principal-in-Charge, and Ruben James De Jesus, P.E., R.P.L.S., Lead Land Surveyor, Melden & Hunt is uniquely qualified to provide the comprehensive land surveying services requested by the City. We look forward to the opportunity to serve as a trusted extension of the City's Engineering Department and contribute to the successful implementation of its infrastructure and development initiatives.

Below are successful projects that included land surveying services:

Project No. 1

Client's Name: Hidalgo County Drainage District No. 1
Type of Organization: Special District
Address: 902 N. Doolittle Road, Edinburg, Texas 78542

Contact Person: Raul E. Sesin, PE, CFM Title: General Manager
Telephone: 956.292.7080 E-mail: raul.sesin@hcdd1.org

Project Information
Name of Project: HCDD No. 1 East Mercedes Drainage Ditch Improvement Project (2018 Bid Bond Project No. Area 10A)
Scope of Work: Expansion of existing drainage ditch, topographical surveying, right of way acquisition, plans and specifications, cost estimating, bid phase services, construction inspection and construction management.

Contract Period: From 2018 to 2025
Cost: Projected $: 4.2M Actual $: TBD
Timeframe (Include Unit Measure) Projected TBD Actual TBD
Status as of 03/2025 (Circle One) Complete (In Progress) Canceled
Date

Project No. 2

Client's Name: City of McAllen
Type of Organization: Political Subdivision-Municipality
Address: 1300 Houston Avenue, McAllen, Texas 78501

Contact Person: Edwardo Mendoza, P.E. Title: Director of Engineering
Telephone: 95.681.1150 E-mail: edmendoza@mcallen.net

Project Information
Name of Project: Boeye Reservoir Mass Grading Project
Scope of Work: Proposed regional detention facility and reclaim of existing raw water reservoir. Preparation of plans and specifications, grading plan, cost estimates, topographical surveying, bid phase services, construction inspection, construction management, construction staking.

Contract Period: From 03/2024 to 12/2025
Cost: Projected $: 2.9M Actual $: TBD
Timeframe (Include Unit Measure) Projected 225 Calendar Days Actual TBD
Status as of 03/2025 (Circle One) Complete (In Progress) Canceled
Date

Project No. 3

Client's Name: City of Edinburg
Type of Organization: Political Subdivision-Municipality
Address: 415 W. University Drive, Edinburg, Texas 78539

Contact Person: Mardoqueo Hinojosa, P.E. Title: City Engineer
Telephone: 956.388.8211 E-mail: mhinojosa@cityofedinburg.com

Project Information
Name of Project: South Central Original Townsite Drainage Improvement Project
Scope of Work: Drainage Improvements along Sprauge Road from 8th Street to 18th Street. Preparation of plans and specifications, grading plan, cost estimates, topographical surveying, bid phase services, construction inspection, construction management, construction staking.
Contract Period: From 03/2019 to 03/2020
Cost: Projected $: 2.6M Actual $: 2.8M
Timeframe (Include Unit Measure) Projected 210 calendar days Actual 267 calendar days
Status as of _____ (Circle One) (Complete) In Progress Canceled
Date

Project No. 4

Client's Name: City of Mission
Type of Organization: Political Subdivision-Municipality
Address: 1201 E. 8th Street, Mission, Texas 78572

Contact Person: JP Terrazas, PE Title: Assistant City Manager
Telephone: 956.580.8650 E-mail: jpterrazas@missiontexas.us

Project Information
Name of Project: Walsh Road Paving and Drainage Improvement Project
Scope of Work: Extension of Walsh Road to Frontage Road of US Highway 83/Interstate 2. Proposed detention pond outfall and paving improvements. Preparation of plans and specifications, grading plan, topographical surveying, construction staking, plan and profiles, cost estimates, bid phase services, construction inspection, construction management.
Contract Period: From 05/2024 to 12/2025
Cost: Projected $: 1.8M Actual $: TBD
Timeframe (Include Unit Measure) Projected 330 calendar days Actual TBD
Status as of 03/2025 (Circle One) Complete (In Progress) Canceled
Date

REFERENCES

Melden & Hunt, Inc. has built long-standing relationships with municipalities, water supply corporations, irrigation districts, counties, and state and federal agencies throughout South Texas by consistently delivering responsive, high-quality engineering services. Our clients rely on us for our technical expertise, timely project delivery, proactive communication, and commitment to providing practical, cost-effective solutions.

Our references represent a diverse portfolio of municipal engineering assignments, including capital improvement programs, roadway and drainage improvements, water and wastewater infrastructure, utility relocations, subdivision development, grant-funded projects, construction administration, and on-call engineering services. These clients can attest to our ability to meet schedules and deadlines, provide responsive service, effectively coordinate with regulatory agencies and stakeholders, and successfully manage projects from planning through construction.

The references included in this Statement of Qualifications have first-hand knowledge of our firm's performance and can speak to our professionalism, technical competence, reliability, and dedication to serving the needs of local governments. We are proud of the long-term relationships we have developed and believe they reflect Melden & Hunt's commitment to delivering exceptional engineering services and becoming a trusted extension of our clients' staff.

Melden & Hunt welcomes the opportunity for the City of Edinburg to contact any of the listed references regarding our qualifications, project experience, responsiveness, and overall performance. We are confident they will confirm our reputation for delivering quality engineering services on time, within budget, and in a manner that consistently exceeds client expectations.

INSURANCE

Melden & Hunt, Inc. fully understands the insurance requirements outlined in the City of Edinburg's Request for Qualifications and maintains insurance coverage that meets or exceeds the required limits for professional engineering services. We carry comprehensive General Liability, Professional Liability (Errors and Omissions), Automobile Liability, and Workers' Compensation insurance through financially sound and reputable insurance carriers.

Our firm has successfully maintained the insurance requirements necessary to perform engineering services for municipalities, counties, state agencies, and federally funded projects throughout Texas. Upon selection, Melden & Hunt will provide certificates of insurance naming the City of Edinburg as an Additional Insured, where required, and will comply with all insurance provisions contained in the Professional Services Agreement.

Melden & Hunt has an excellent risk management program and a strong history of safe project delivery, allowing us to maintain continuous insurance coverage while protecting the interests of our clients, employees, and project stakeholders. We are fully prepared to satisfy all insurance requirements for the duration of the contract and any subsequent task orders issued by the City of Edinburg.

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: **1741737959500**
Approval Date: **December 14, 2023**
Scheduled Expiration Date: **December 14, 2027**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

MELDEN & HUNT, INC

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **December 14, 2023**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day to day management, operational control, business location) provided in the submission of the business; application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

PROFESSIONAL SERVICE AGREEMENT

Melden & Hunt, Inc. has reviewed the City of Edinburg's Professional Services Agreement and fully understands the contractual requirements, responsibilities, and obligations associated with providing on-call professional engineering services. We acknowledge the terms and conditions outlined in the Agreement and are prepared to execute the contract upon selection, subject to the successful negotiation of project-specific scopes of work and compensation in accordance with the Texas Professional Services Procurement Act.

Our firm has extensive experience entering into professional services agreements with municipalities, counties, water districts, state agencies, and federal funding agencies throughout Texas. We understand the importance of complying with contractual requirements related to insurance, indemnification, record retention, project documentation, regulatory compliance, and professional standards of care.

Melden & Hunt confirms that we are capable of meeting the insurance requirements identified in the Agreement and will provide all required certificates of insurance and supporting documentation prior to the commencement of services. We are committed to maintaining open communication, delivering responsive service, and performing all engineering services in accordance with applicable federal, state, and local regulations, as well as the highest standards of professional practice.

Should Melden & Hunt be selected, we are prepared to promptly execute the Professional Services Agreement and begin providing engineering services as an extension of the City of Edinburg's Engineering Department. We look forward to establishing a collaborative, long-term partnership focused on delivering quality infrastructure improvements that support the City's continued growth and success.

CONTACT INFORMATION

Melden & Hunt, Inc. has designated experienced professionals to serve as the City's primary points of contact throughout the duration of this contract. Our management approach emphasizes accessibility, responsiveness, and timely communication to ensure the City of Edinburg receives prompt attention for every assignment, regardless of size or complexity.

Our designated contacts are authorized to coordinate engineering services, assign qualified personnel, monitor project schedules, respond to City requests, and provide the leadership necessary to successfully deliver projects in accordance with the City's expectations. Together, they provide the technical expertise, management experience, and continuity needed to support the City of Edinburg's Engineering Department.

The contact information for Melden & Hunt, Inc. is provided below:

Melden & Hunt is committed to maintaining open communication and providing responsive, dependable engineering services throughout the term of the agreement. With our office conveniently located in Edinburg, our team is readily available to attend meetings, conduct site visits, respond to project needs, coordinate with City staff, and provide timely technical support. Our local presence enables us to serve as a true extension of the City of Edinburg's Engineering Department by delivering accessible, reliable, and high-quality engineering services whenever they are needed.

WE LISTEN. WE ENGINEER. WE DELIVER.

At Melden & Hunt, Inc., we bring accuracy, responsiveness, and professionalism to every land surveying assignment. For nearly 80 years, our firm has provided dependable surveying services to municipalities, counties, utility districts, developers, and public agencies throughout South Texas. We understand that accurate survey information is the foundation of successful infrastructure projects, land development, and public improvements, and we are committed to delivering precise, timely, and reliable surveying services that support the City of Edinburg's operational and capital improvement needs.

Our experienced surveying professionals provide a full range of services, including boundary surveys, topographic surveys, ALTA/NSPS land title surveys, right-of-way and easement surveys, platting, construction staking, utility surveys, elevation certificates, legal descriptions, and subdivision mapping. Utilizing advanced GPS, robotic total stations, drone technology, and state-of-the-art CAD software, we deliver accurate data that enables informed decision-making and facilitates efficient project delivery.

As an established Edinburg-based firm, Melden & Hunt offers the advantage of local knowledge, rapid response, and familiarity with the City's development patterns, infrastructure, and regulatory requirements. Our surveyors work closely with engineers, architects, utility providers, developers, and City staff to ensure every assignment is completed efficiently, accurately, and in accordance with applicable state and local standards.

When the City of Edinburg selects Melden & Hunt, it gains more than a surveying consultant—it gains a trusted local partner dedicated to protecting public interests through responsive service, technical excellence, and dependable results. We are committed to providing high-quality land surveying services that support the City's continued growth, facilitate successful capital improvement projects, and provide the accurate geospatial information necessary for sound planning and development for years to come.

Firm Philosophy

Our firm provides cost effective land surveying and engineering services based on our resources, experience and knowledge. We offer the best of technical performance, high standard of professionalism and integrity to the project.

Firm History

Quintanilla, Headley & Associates, Inc.

Founded in 1986, QHA provides a wide range of engineering and land surveying services throughout the Rio Grande Valley. QHA specializes in land surveying projects for right of way mapping, survey parcels, metes, and bounds descriptions, and topographic surveying. QHA uses the latest equipment and software to ensure we provide the most accurate field data.

QHA is managed by professional individuals who are registered with the Texas Board of Professional Engineers and the Texas Board of Professional Land Surveying. QHA is a certified as a Historically Underutilized Business (HUB).

Firm Capabilities

Our project management objectives are to deliver a final plan on schedule, on budget and one that fits the needs of our clients.

Management and Organizational Approach

Our firm is located in the heart of Hidalgo County. We are very familiar with the geographies of this area. We have a long and successful relationship with the Hidalgo County staff as we have provided them with professional engineering services for a large number of developments throughout the city for the past 25 years. We have a great amount of records and data of the County's existing infrastructure.

QHA understands the County's need to constantly improve on the existing infrastructure for the people of Hidalgo County. We will provide the County with alternatives of the most cost effective systems and design. We understand the requirements of the utility companies and drainage and irrigation districts and we will design all projects in compliance.

Our firm provides full professional engineering, surveying, management, and inspection services. We use the latest equipment for field data collection and engineering design. This gives us the ability to expedite the design of the project and provide an efficient design.

Our principal, Mr. Alfonso Quintanilla is a Licensed Professional Engineer and a Registered Professional Land Surveyor. He will be the principal assigned to this project. Should the project require the acquisition of easements, Mr. Quintanilla has prepared hundreds of survey parcels with metes and bounds descriptions. This is a unique qualification that our firm provides.

Our firm ensures a successful partnership that will meet and exceed the County of Hidalgo's expectations. We will specifically become familiarized with a project by conducting field visits and gathering all information needed to properly design and execute all phases. Our project management objectives are to deliver a final plan on schedule, on budget, and personalized to meet the County's needs.

Mardoqueo Hinojosa, P.E.
Engineering Director / City Engineer
City of Edinburg
415 W. University Drive
Edinburg, TX 78539

Re: RFQ 2026-6 – Request for Qualifications – Land Surveying Services

Dear Mr. Hinojosa,

Rio Delta Engineering is pleased to submit our Statement of Qualifications for consideration in response to RFQ 2026-6 – Request for Qualifications – Land Surveying Services. We appreciate the opportunity to be considered for inclusion on the City of Edinburg's rotation list of qualified surveying firms and look forward to continuing to serve the City of Edinburg.

Our main office is located at 921 S. 10th Avenue, Edinburg, Texas 78539. As a locally owned and operated engineering and land surveying firm, we are committed to providing responsive, accurate, and high-quality professional surveying services that support the City's continued growth and infrastructure improvements. Our local presence allows us to respond quickly, maintain close communication, and provide the level of service our clients have come to expect.

Rio Delta Engineering has successfully completed numerous surveying and infrastructure-related projects for the City of Edinburg and throughout Hidalgo and Starr Counties. Our experienced staff, led by an in-house Registered Professional Land Surveyor (RPLS), provides a comprehensive range of surveying services, including boundary surveys, topographic surveys, ALTA/NSPS Land Title Surveys, right-of-way and easement surveys, parcel surveys, legal descriptions, construction staking, control surveys, subdivision plat support, drone aerial mapping, and other surveying services necessary to support public infrastructure and development projects. We possess the personnel, technology, and experience necessary to successfully deliver projects of varying size and complexity while meeting aggressive schedules and project deadlines.

Our philosophy is centered on collaboration, communication, and exceptional client service. We strive to become a trusted extension of our clients' teams by providing accurate surveying solutions, maintaining open communication throughout every phase of a project, and delivering quality work on time and within budget. We remain committed to utilizing the latest surveying technology and industry best practices to achieve successful project outcomes for the City and its residents.

We sincerely appreciate your consideration of our qualifications and welcome the opportunity to continue serving the City of Edinburg. Should you have any questions regarding our Statement of Qualifications or require additional information, please do not hesitate to contact me at (956) 380-5152, by cell at (956) 263-0934, or by email at ivan@riodeltaengineering.com.

Thank you for your time and consideration. We look forward to the opportunity to continue partnering with the City of Edinburg.

Sincerely,

Ivan Garcia, P.E., RPLS, C.F.M.
Principal
Rio Delta Engineering

SECTION II: Firm Information

a. Firm History:

Firm Name:

Gilbert J Guerra Engineering, LLC dba Rio Delta Engineering
Texas Engineering Firm #F-7628 • Texas Surveying Firm #10194027
Legal Business Description: Limited Liability Company

Address:

Main Office
921 S. 10th Ave.
Edinburg, Tx 78539
Ph: (956) 380-5152
Fax: (956) 380-5083

Branch Office #1
117 Rio Vista Boulevard
Rio Grande City, TX 78582
Ph: (956) 263-1041
Fax: (956) 263-1112

Submittal for: Main Office

Rio Delta Engineering is an engineering firm offering general civil engineering and surveying services in the Lower Rio Grande Valley and South Texas. Our staff has a variety of background experiences ranging from structural adhesives sales to general contracting and oilfield fracking. This varied experience, coupled with our education in Agricultural and Civil Engineering, allows us to apply common sense and a practical approach to our civil engineering services. We've all heard a contractor say" Sure, everything fits fine on paper, but…" when they encounter a design issue that just doesn't work as well in the ground as it does on the plan. At Rio Delta Engineering, our objective is to deliver a civil engineering project to our client that is practical, cost effective, and buildable within the allotted budget and time frame. Our experience on both sides of the project "table" allows us to communicate clearly to everyone involved with a project the objectives of our plans and designs, from the contractor to the system operator, to the Board or Council member, and on up to the funding agencies.

Names, Position, Phone and Fax Numbers of Contact Person:

The Edinburg office will lead this assignment under the direction of **Ivan Garcia, P.E., R.P.L.S.,** who will serve as Project Manager and Lead Surveyor. Mr. Garcia will oversee all surveying services, coordinate project activities, conduct on-site inspections as needed, and serve as the primary point of contact with the City.

Office Number: (956) 380-5152
Mobile Number: (956) 263-0934
Fax Number: (956) 380-5083
E-mail: ivan@riodeltaengineering.com

At Rio Delta Engineering, our objective is to provide quality engineering and surveying services to our client in a timely, professional manner. Our experience in working with a variety of clients, including private developers, municipalities, county agencies, and state agencies has shown us that listening to the client and understanding his needs is the most important step in the completion of a successful

project. To this end, we make it a practice to establish clear and open channels of communication with our clients.

Our firm has completed a variety of different types of projects in South Texas since the company's inception in 2005. The projects range from land development and roadway design, to site-civil for educational institutions, commercial development, sanitary sewer treatment and collection systems, and water treatment and distribution systems. Rio Delta Engineering has completed and is currently working on, numerous Federally and State funded projects for Starr County, Rio Grande City, Union Water Supply Corporation, North Alamo Water Supply Corporation, the City of Escobares, and the City of Roma. These projects include projects funded by the Texas Department of Rural Affairs (TDRA), the Texas Department of Agriculture (TDA), the Texas Department of Transportation (TxDOT), the Texas Water Development Board (TWDB), The Border Environment Cooperation Commission (BECC, EPA-NADBANK), the US Economic Development Agency (EDA), and the United States Department of Agriculture (USDA). The projects include roadway paving projects, extension of sanitary sewer, water distribution system improvements, wastewater treatment plant rehabilitation and new construction, and storm drainage improvements.

Rio Delta Engineering offers professional land surveying services using state-of-the-art technology and equipment. We have an in-house Registered Professional Land Surveyor (RPLS) and can provide prompt responses and full surveying services as may be needed. Some of our deliverables are ALTA, title and boundary surveys, parcel/right-of-way maps for acquisition, appraisals, and condemnation proceedings, metes and bounds/legal descriptions, construction staking for survey alignments of roadways and/or utilities including the establishments of rights-of-way, easements, baselines and legal descriptions, as-built survey, design and construction survey, topographical survey, drone-surveying for aerial photogrammetry and mapping, horizontal and vertical control points (benchmarks) and maps, construction staking, and virtually any surveying and mapping applications our clients have required for their projects.

We also coordinate and perform all surveying activities related to utility conflicts, easement/right-of-way issues, permits, and have experience working with the Hidalgo County Drainage District No. 1, TxDOT, Texas Gas Service, AEP, Spectrum, AT&T, Irrigation Districts, and Magic Valley Electric Coop.

In addition, we have an in-house GIS specialist who plans, develops, and implements systems and databases for storing and accessing geospatial data. We have the capability to create maps and graphs using GIS software and related equipment.

During our 20-year existence, Rio Delta Engineering has dealt with City, County, and State agencies to complete our projects. We can work with any person or entity necessary to move projects forward to successful completion in a timely manner.

Capacity to Perform

We are very familiar with the Hidalgo County design standards and guidelines, as well as County, State, and Federal regulations, policies and procedures to bring projects to completion while complying with any applicable regulations.

We are a local firm with offices in Edinburg and Rio Grande City. We offer our clients the whole range of surveying services while maintaining the local everyday type of availability and service required by our clients. We have an in-house Registered Professional Land Surveyor (RPLS) and can provide prompt responses and full surveying services as may be needed.

We are confident that, if given the opportunity, we can provide a broad scope of expert surveying services, and with the help of our qualified staff we are sure we can become a valuable resource to the City of Edinburg.

Familiarity with the Geographical Area

In this instance, the Edinburg's local office has taken the lead on the project. We are very familiar with the issues at hand and have worked on similar projects within Hidalgo and Starr Counties.

Current Workload

Rio Delta Engineering has the capacity to take on any project, large or small. Our current workload is such that we can begin work on any project immediately. We have the equipment and office space available with which to expand our personnel and operations as may be required.

Affirmative Action Program/Equal Employment Opportunity Affirmative Action/Program Statement of Policy:

It is the policy of Rio Delta Engineering to provide equal employment opportunity in full compliance with the Civil Rights Act of 1964, as amended, the Age Discrimination in Employment Act of 1973, the Veterans Readjustment Act of 1974, and the Presidential Executive Orders of Federal Contract Compliance Programs. This provides for equal employment without regard to race, color, religion, sex, national origin, marital status, age, disability, or veterans status.

b. Personnel and Staffing

Names of Principals in The Firm:

Rio Delta Engineering Principals	Titles
Jose Ivan Garcia, P.E., R.P.L.S., CFM	Principal
Julio A. González, Graduate Engineer, CFM	Principal

Key Personnel's Professional Background, Caliber and Availability

One of our key personnel is **Ivan Garcia, P.E., R.P.L.S., C.F.M.**, who has more than 15 years of experience in civil engineering and land surveying. His experience includes the planning, design, surveying, construction oversight, and project management of municipal utilities, drainage, roadway, and land development projects for the City of Edinburg, the City of Rio Grande City, Hidalgo County, Starr County, Edinburg CISD, Rio Grande CISD, Union Water Supply Corporation, North Alamo Water Supply Corporation, and numerous private clients.

As Project Manager and Lead Surveyor, Mr. Garcia will oversee all surveying services, coordinate field and office operations, provide quality control, and serve as Rio Delta Engineering's primary point of contact with the City throughout the duration of each assignment.

Rio Delta Engineering maintains relationships with qualified local surveying professionals to ensure uninterrupted service in the unlikely event that additional personnel or specialized resources are required. This approach provides the flexibility and capacity necessary to meet project schedules and maintain our commitment to timely, high-quality service.

Organizational Chart and Summary of Work to be Performed by each Staff Member

- Ivan Garcia, P.E., RPLS, CFM – Principal
  As the lead surveyor, Ivan would provide primary project management and surveying services coordination and supervision. He would also be primarily responsible for on-site inspections and would be the direct contact with the Owner.

- Julio Gonzalez, Graduate Engineer, CFM – Principal
  Julio would provide survey supervision and inspection and construction management support from the Rio Grande City office and Edinburg office. He would also coordinate survey support for the project

- Gilbert J. Guerra, P.E. -Senior Project Manager
  Gilbert would provide surveying, construction supervision and management support. He would be the secondary contact with the Owner.

- Edwin Pena, Graduate Engineer
  Edwin would provide surveying supervision and inspection support from the Edinburg office.

- Norberto Lopez III, Graduate Engineer
  Norberto would provide inspection support.

- Rusbel Peña, E.I.T.
  Rusbel would also provide design, surveying and construction supervision and inspection support from the Edinburg office.

- Roberto Salinas and David Rodriguez, Survey Crew
  As field data collection specialists, Roberto and David would provide field data collection services and construction staking services, for design and construction phases, respectively.

Field Data Collection	6
Administrative Staff	3
Total Personnel	**23**

Team Member Qualifications and Experience (Resumes)

Jose Ivan Garcia, P.E., R.P.L.S.
Principal, Rio Delta Engineering

Education:

Texas A&M University Kingsville, TX, BS Civil Engineering, December 2008

Licensure & Certifications:

Licensed Texas Board of Professional Engineers, December 2013, P.E.#115662

Texas Board of Professional Land Surveying, May 2014, R.P.L.S. #6496

American Institute of Constructors, March 2012, Associate Contractor (AC)

Work Experience:

May 2009 – Present — **Rio Delta Engineering**
Duties: Partner, Civil Engineer, RPLS, Project Manager

- Manages the day-to-day operations of the Edinburg office and oversees engineering and land surveying services.
- Directs engineering and surveying staff while ensuring quality control and timely project delivery.
- Plans, manages, and oversees the design and execution of municipal, infrastructure, and land development projects.
- Provides project management, client coordination, and technical oversight throughout all phases of a project.
- Represents clients at public meetings and presentations, providing project updates and supporting the approval process.
- Coordinates with municipal, county, state, and regulatory agencies to facilitate project permitting, approvals, and successful project completion.

Summer 2008 — **Texas Department of Transportation, Pharr, TX 78577**
Duties: Engineering Technician Internship

- Assisted Civil Engineer in application of principles, methods, and techniques of civil engineering technology on the planning and construction of US 83 “Arroyo Roma” bridge, FM 650 “Los Negros Creek” bridge and Garcia St. relocation of utilities in the city of Roma, Texas.

Feb 2006 – Dec 2006 — **CRC Engineering, Inc., McAllen, TX 78504**

Duties: CADD Technician

- Designed and prepared detailed electronic (CAD) working plans for complex projects from observation, measurements, sketches, specifications, and standard layouts provided by customers, consultants, and/or departmental contacts.
- Revised computer-aided designs and plans to comply with modified specifications made during actual construction.

Gilbert J. Guerra, P.E.
Senior Project Manager, Rio Delta Engineering

Education:
Texas A&M University, College Station, TX, BS Agricultural Engineering, May 1985

Licensure & Certifications:
Licensed by the Texas Board of Professional Engineers, July 2002, P.E. #90156
Licensed by the Alabama Board of Professional Engineers, February 2008, P.E. #29229

Military Service:
United States Marine Corps, 1976-1982, Honorable Discharge, E-5

Work Experience:

Jul 2005 – Present — **Gilbert J. Guerra Engineering, LLC dba Rio Delta Engineering**
Duties: Owner, President, Civil Engineer, Project Manager

- Supervises the engineering and drafting staff and all engineering design.
- Coordinates with City, County, and State agencies on behalf of the client throughout the course of completing a project.
- Consultant for Rio Grande City (8yrs)
- Consultant for Union Water Supply Corporation (7yrs)

Feb 2004 – Jun 2005 — **Rio Delta Engineering & Surveying**
Duties: Vice President, Resident Engineer

- Supervised the engineering and drafting staff and all engineering design.
- Coordinated with City, County, and State agencies on behalf of the client throughout the course of completing a project.

Aug 1996 – Feb 2004: — **J.E. Saenz & Associates, Inc., Edinburg, TX**
Duties: Director of Engineering

- Supervised the engineering and drafting staff and all engineering design.
- Coordinated with City, County, and State agencies on behalf of the client throughout the course of completing a project.
- Provided construction management and supervision on City construction projects.
- Provided field engineering services for the City on projects undertaken by City utility and street paving crews.
- Conducted weekly construction progress meetings for City construction projects on behalf of the City.
- Provided engineering reports, certifications, design and permitting services to the City for City construction projects.
- Provided engineering liaison services for TxDOT paving projects, School District projects, and UTPA projects on behalf of the

Julio A. Gonzalez, Graduate Engineer,CFM
Principal, Rio Delta Engineering

Education:

Texas A & M University Kingsville, BS Civil Engineering, December 2010

South Texas College, Associate of Mathematics and Science, May 2008

Work Experience:

July 2011 – Present
Duties:

Rio Delta Engineering
Graduate Engineer, Partner, Project Manager

- Manages day-to-day operations of the Rio Grande City office.
- Supervises the engineering and surveying staff and all engineering
  design and survey services in the Rio Grande City office.
- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project management for clients, as may be required.
- Attend public meetings to present projects for consideration and approval when required and to provide project updates when necessary.
- Coordinates with City, County, and State agencies on behalf of client throughout the course of completing a project.

Jan 2005 – Dec 2008
Duties:

Construcciones en General, Camargo, Tamaulipas
Project Manager

- Supervised site work for paving as well as sewer build outs.
- Prepared bid proposal for project bidding.
- Managed budget and expenses.

Jun 2004 – Dec 2004
Duties:

COMAPA, Camargo, Tamaulipas
Technician

- Performed analysis of potable system and wrote reports on improvements.
- Developed a computerized tracking system to keep records of gage pressures and water pH.

Norberto Lopez, Graduate Engineer, Surveyor -In-Training

Education:

University of Texas, Rio Grande Valley, BS Civil Engineering, May 2017

Work Experience:

March 2018 – Present — Rio Delta Engineering

Duties: **Graduate Engineer**

- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project management and inspection for clients, as may be required.
- Attend public meetings in order to present projects for consideration and approval when required and to provide project updates when necessary.

Edwin Pena, Graduate Engineer

Education:

University of Texas, Rio Grande Valley, BS Civil Engineering, May 2020

Work Experience:

January 2017 – Present — Rio Delta Engineering

Duties: **Graduate Engineer**

- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project inspection for clients, as may be required.
- Attend public meetings in order to present projects for consideration and approval when required and to provide project updates when necessary.

Rusbel Peña, E.I.T.

Education:

University of Texas, Rio Grande Valley, BS Civil Engineering, May 2017

Work Experience:

April 2026 – Present
Duties:

Rio Delta Engineering
E.I.T.

- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project management and inspection for clients, as may be required.
- Attends public meetings to present projects for consideration and approval when required and to provide project updates when necessary.

November 2020 – March 2026
Duties:

SAMES, INC
Assistant Project Manager

- Provides project management and inspection for clients, as may be required.
- Attends public meetings to present projects for consideration and approval when required and to provide project updates when necessary.
- Meets with clients to plan, manage, design, and supervise the construction of projects.

Scheduled Expiration Date: **September 27, 2025**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

GILBERT J. GUERRA ENGINEERING, LLC

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **September 27, 2021**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day to day management, operational control, business location) provided in the submission of the business; application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibiliy.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

SECTION III: Firms Experience and Qualifications

a.Competency

Rio Delta Engineering offers professional land surveying services using state of the art technology and equipment. We have an in-house Registered Professional Land Surveyor (RPLS) and can provide prompt responses and full surveying services as may be needed. Some of our deliverables are ALTA, title and boundary surveys, parcel/right-of-way maps for acquisition, appraisals, and condemnation proceedings, metes and bounds/legal descriptions, construction staking for survey alignments of roadways and/or utilities including the establishments of right-of-ways, easements, baselines and legal descriptions, as-built survey, design and construction survey, topographical survey, drone-surveying for aerial photogrammetry and mapping, horizontal and vertical control points (benchmarks) and maps, construction staking, and virtually any surveying and mapping applications our clients have required for their projects.

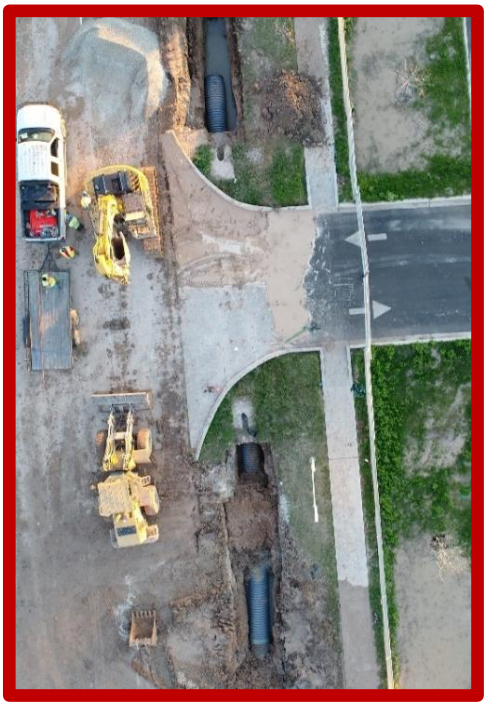
In addition, we have an in-house GIS specialist who plans, develops, and implements systems and databases for storing and accessing geospatial data. We have the capability to create maps and graphs using GIS software and related equipment.

Capacity to Perform

We are very familiar with the Hidalgo County design standards and guidelines, as well as County, State, and Federal regulations, policies and procedures to bring projects to completion while complying with any applicable regulations.

We are a local firm with offices in Edinburg and Rio Grande City. We offer our clients the whole range of surveying services while maintaining the local everyday type of availability and service required by our clients. We have an in-house Registered Professional Land Surveyor (RPLS) and can provide prompt responses and full surveying services as may be needed.

We are confident that, if given the opportunity, we can provide a broad scope of expert surveying services, and with the help of our qualified staff we are sure we can become a valuable resource to the City of Edinburg.



Familiarity with the Geographical Area

Rio Delta Engineering's Edinburg office will lead this assignment, providing the City with experienced local professionals who understand the region's unique needs. As a locally owned and operated firm, we have successfully completed numerous surveying and infrastructure projects throughout Hidalgo and Starr Counties and are familiar with local regulations, permitting requirements, utility coordination, and municipal standards.

We are committed to providing accurate, responsive, and professional surveying services while maintaining open communication and strong collaboration throughout every phase of the project.

b. Experience and Recent Projects

1. City of Edinburg – Northeast Doolittle Road Area Drainage - 2019

This project consisted of the construction of various drainage improvements, including, but not limited to, approximately 2,200 L.F. of 36" and 24" storm drain gravity lines, 2,800 L.F. of excavation/fill and re-grading of roadside ditch, and related improvements to alleviate flooding along Doolittle Road between Rogers Road and Russell Road. The improvements were completed at a cost of approximately $387,000 and have been fully operational since March 2019. Rio Delta Engineering was responsible for all design and construction surveying services required for this project.

Contact: **Mardoqueo Hinojosa, P.E., CFM, CPM**
City of Edinburg
(956) 388-8211
415 W. University Dr.
Edinburg, Texas 78541

2. City of Roma, Efren Ramirez Paving and Drainage Paving Improvements – 2018

This project consists of widening and paving approximately 2,315 lf of Efren Ramirez Street in Roma, Texas. The work involved includes installing approximately 5,630 lf of drainage improvements and constructing a new 37' B-B street section with curb and gutter. The total cost of this project is estimated to be approximately $1,921,769.00 including environmental assessment, R.O.W. acquisition, engineering, testing, inspection, and construction management. The funding for this project will be
provided by the United States Department of Agriculture. All funding applications, environmental investigations, and engineering design have been completed. The R.O.W. acquisition is also in the final phases of completion. The project is scheduled to be put out for bid within the next few months. Rio Delta Engineering was responsible for preliminary engineering reports, environmental investigation, engineering design, and surveying services for design and R.O.W. acquisition. We will also be responsible for bidding, construction inspection, testing, and project management.

City Manager, City of Roma
(956) 849-1411
P.O. Box 947
Roma, Texas 78584-0947

3. North Alamo Regional Wastewater Treatment Plant and Collection System -2018

This project consisted of constructing a new 0.5 mgd activated sludge wastewater treatment plant for North Alamo WSC. The plant is the first phase of what will ultimately be a 20-mgd plant located at the intersection of Minnesota and Goolie roads in Hidalgo County. This initial phase cost $13 million, including planning, acquisition, design, testing, permitting, and construction management. This project was funded jointly by the Texas Water Development Board (TWDB), the Border Environmental Cooperation Commission (BECC/NADBANK), and the Texas Department of Agriculture (TDA). The collection system consisted of approximately 32,000 linear feet of gravity sanitary sewer lines, approximately 15,000 linear feet of force main lines, and four sanitary sewer lift stations. This project provides sanitary sewer service to 471 families in six Colonias and will establish the backbone for future expansion and connections within the projected 50 square-mile service area. On this project we coordinated and performed all surveying activities related to utility design, construction staking, as-builts, horizontal and vertical control establishment and verification, conflicts, easement/right-of-way issues, permits, with TxDOT, Hidalgo County Irrigation District #2, Donna Irrigation District, Hidalgo County Drainage District No. 1, Texas Gas Service, AEP, Spectrum, and AT&T.

Steven Sanchez
General Manager, North Alamo WSC
(956) 383-1618
420 S. Doolittle Road
Edinburg, Texas 78542

4. Starr County, Disaster Recovery 2.2, General Land Office (GLO) Paving and Drainage Improvements - 2018

This project consisted of providing paving and drainage improvements at various locations in Starr County. The work included constructing paving and drainage improvements for one street in Pct #4, constructing paving and drainage improvements including a 1.5-acre detention pond in Pct #3, and constructing a pilot channel for approximately 1.5 miles of Los Morenos Creek in Pcts #1 and 2. The total cost of this project was approximately $1,100,000.00, including R.O.W. acquisition, engineering, testing, inspection, and construction management. The funding for this project was provided by the Disaster Recovery Fund 2.2 administered by the Texas General Land Office. All work has been completed except for the pilot channel for Los Morenos Creek. Negotiations for the acquisition of R.O.W. for these proposed improvements have been onerous due to the lack of clear title for most of the properties in this area. This area is in “undivided” Porciones. The project will have to be closed out by the end of the year with whatever progress has been accomplished at that time. Rio Delta Engineering was responsible for all design, bidding, testing, surveying services for appraisal and acquisition activities, and construction management.

Contact: **Eloy Vera**
County Judge, Starr County
(956) 716-4880
100 N. FM 3167
Rio Grande City, Texas 78582

5. Union Water Supply Corporation (UWSC) Water System Improvements - 2017

This project was split up into two contracts. The first consisted of the installation of approximately 27,000 linear feet of new water distribution lines ranging in size from eight inches to sixteen inches, the installation of two altitude valves for two existing elevated water storage tanks, and approximately 240 service reconnections. This project provided an upgrade to a distribution system that consisted mainly of six-inch lines. The water line improvements have been completed at a cost of approximately $1,527,000.00 and is fully operational. The second contract consisted of replacing approximately 1,900 old meters with new electronic meters and a remote read system at a cost of approximately $937,889.00. The total cost of this project is approximately $2,950,000.00, including engineering, testing, inspection, and construction management. This system is in place and working and has enabled UWSC to read all the meters from the office. Meter reading used to take two people two weeks to complete because of interruptions to the process during service calls. Water loss has been greatly reduced, and labor costs associated with the meter reading have decreased markedly since the new system has been in place. Both projects were funded by TWDB. Rio Delta Engineering was responsible for all planning, funding applications, design, permitting, land surveying for easement, right-of-way and parcel acquisition, bidding, and construction management.

   Back in 2019 our firm completed surveys, design, plans and specifications for a new band practice field, which included the installation of artificial turf and site drainage improvements within Robert Vela Highschool. This project was bid out but never awarded and canceled due to insufficiency of funds to complete the project and start of the COVID pandemic. Mr. Estrada was the District Architect at the time.

SECTION IV: Scope of Services

Rio Delta Engineering provides comprehensive professional land surveying services utilizing state-of-the-art technology, advanced surveying equipment, and industry-leading software. Our experienced team, led by an in-house Registered Professional Land Surveyor (RPLS), is committed to delivering accurate, timely, and cost-effective surveying solutions for public agencies, municipalities, developers, utility providers, and private clients.

Our surveying capabilities include, but are not limited to:

- ALTA/NSPS Land Title Surveys
- Boundary and Title Surveys
- Topographic Surveys
- Parcel and Right-of-Way Surveys
- Easement and Right-of-Way Mapping
- Metes and Bounds Descriptions
- Legal Descriptions
- Construction Layout and Staking
- Horizontal and Vertical Control Surveys (Benchmarks)
- As-Built Surveys
- Design and Construction Surveys
- Subdivision and Platting Support
- Drone Surveying and Aerial Photogrammetry
- GIS Mapping and Spatial Data Collection
- Surveying Services for Utility Coordination, Acquisition, Appraisal, and Condemnation Proceedings
- Other specialized surveying and mapping services as required to support public infrastructure and land development projects.

In addition to our surveying capabilities, Rio Delta Engineering maintains an in-house Geographic Information Systems (GIS) specialist who develops, manages, and maintains geospatial databases and mapping systems. Our team utilizes GIS technology to analyze, manage, and present spatial data through high-quality maps, exhibits, and digital datasets, providing clients with valuable information to support planning, design, asset management, and decision-making.

By combining experienced personnel, advanced technology, and a commitment to responsive client service, Rio Delta Engineering provides dependable surveying solutions that support projects from initial planning and design through construction and final project completion.

a.Narrative

For more than 20 years, Rio Delta Engineering has partnered with municipalities, counties, state agencies, utility providers, and private clients to successfully complete projects throughout South Texas. Our experience and collaborative approach enable us to efficiently coordinate with all stakeholders and deliver projects on time and within scope.

Project Approach

Rio Delta Engineering approaches every assignment with a commitment to accuracy, responsiveness, and open communication. Our team works closely with the City throughout each phase of a project to ensure surveying services are completed efficiently, meet project objectives, and comply with all applicable local, state, and federal requirements. Depending on the scope of each task order, our services may include the following:

Planning and Preliminary Surveying

- Attend coordination meetings with the City of Edinburg, utility providers, irrigation districts, TxDOT, Hidalgo County, and other agencies as required.
- Establish horizontal and vertical control points (benchmarks).
- Perform topographic, boundary, and existing conditions surveys.
- Prepare right-of-way, easement, and parcel surveys for acquisition and project development.
- Prepare metes and bounds descriptions, exhibits, and survey maps.
- Coordinate with utility providers and other stakeholders to identify existing facilities and potential conflicts.

Design and Construction Support

- Provide construction layout and staking for public infrastructure improvements.
- Perform as-built surveys to document completed improvements.
- Provide additional surveying services and field support throughout construction as requested by the City.
- Deliver survey data, mapping, and exhibits in formats compatible with the City's project requirements.

Rio Delta Engineering utilizes **AutoCAD Civil 3D** as its primary surveying and drafting platform and can provide deliverables in a variety of electronic formats to meet client requirements. Drafting and quality control are supported collaboratively by our Edinburg and Rio Grande City offices, ensuring timely project delivery and efficient allocation of resources. Our goal is to provide the City of Edinburg with responsive, accurate, and dependable surveying services while delivering practical, cost-effective solutions that support successful project planning, design, and construction.

Ability to Commence Services

Rio Delta Engineering has the capacity and resources to undertake projects of any size or complexity. Our current workload allows us to respond promptly to task orders and begin work immediately upon successful contract negotiations. With experienced personnel, in-house surveying capabilities, advanced technology, and dedicated field crews, we are prepared to provide timely, high-quality surveying services while meeting project schedules and exceeding client expectations.

Familiarity with the Geographical Area

Rio Delta Engineering's Edinburg office will lead this assignment, providing the City with immediate access to experienced local professionals. Our team has extensive knowledge of the City of Edinburg and the surrounding Rio Grande Valley, having successfully completed numerous surveying and infrastructure projects throughout Hidalgo and Starr Counties. This local experience provides us with a thorough understanding of regional conditions, municipal standards, regulatory requirements, utility coordination, and permitting processes, allowing us to efficiently deliver projects while minimizing delays.

Legal Documents

Insurance: General Liability ($2,000,000.00)
Professional Liability ($2,000,000.00)
Umbrella/Excess Liability ($1,000,000.00)
Commercial Auto ($1,000,000.00)
Workers Compensation ($500,000.00)

Pending Litigation:
Rio Delta Engineering is not currently under any type of legal litigation related to any professional services rendered by the firm.

Professional Services Agreement:
The Professional Services agreement has been read, and we will meet the pre-requisite insurance requirements. If selected, we agree to enter into such agreement.

Statement of Conflicts:
No potential conflicts of interest are identified.

City of Edinburg
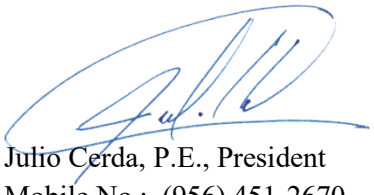
Attn: Mr. Mardoqueo Hinojosa,
City Engineer
415 W. University Drive
Edinburg, Texas 78539

RE: RFQ No. 2026-6 Land Surveying Services



Dear Mr. Hinojosa:

R.O.W. Surveying Services, L.L.C. is pleased to present our qualifications and offer our Professional Land Surveying services in response to the City of Edinburg's Request for Statement of Qualifications for Land Surveying Services, RFQ No. 2026-6. **R.O.W. Surveying Services, L.L.C.** is a Rio Grande Valley Surveying firm, who has the experience, knowledge, and resources to provide a professional solution for the City of Edinburg's request for professional surveying services. As president of **R.O.W. Surveying Services, L.L.C.,** I have 27 plus years of experience in the public sector, where I have the awareness to work with yearly budgeted funding accountability. I have a Registered Professional Land Surveyor, Victor Trevino, on staff who has over 11 years in land surveying service experience. Our commitment to client service and excellent communication has allowed our company to maintain a constant client base throughout the Rio Grande Valley.

Our goal is to provide the City of Edinburg with surveying services in a timely manner within the appropriated project budget and resources provided. We can satisfy project requirements with our comprehensive team experience and our innovative approach to project design and delivery. The **R.O.W. Surveying Services, L.L.C.** program is structured to match the staffing needs to the project size. We are readily available to augment any surveying services. It is our mission to offer a strong pro-active Surveying firm that will successfully complete the upcoming surveying project. We appreciate the opportunity to submit this Statement of Qualifications.

We are eager and committed to provide professional services to the City of Edinburg with any Land Surveying Services needed for two (2) years. We thank you for the opportunity to provide you with our professional services. We did not receive any addendums or viewed any posted on the City of Edinburg's procurement portal. We acknowledge that this Statement of Qualifications has been prepared as per the requirements of the posted Request for Statement of Qualifications for Land Surveying Services, RFQ No. 2026-6.

Sincerely,

Julio Cerda, P.E., President
Mobile No.: (956) 451-2670
Email: julio@southtexasig.com

FIRM QUALIFICATIONS AND EXPERIENCE:

R.O.W. Surveying Services, L.L.C. (ROWSS) was incorporated on March 11, 2013. ROWSS has only one location at 900 S. Stewart Road, Suite #13, Hidalgo County, Mission, Texas 78572 where all services are provided to our clients. ROWSS offers a full range of custom surveying and mapping products to meet your project specifications. ROWSS combines its experience, qualifications, and resources to solve the most challenging problems to deliver the best value to our clients. ROWSS is dedicated to providing professional land surveying services to a diverse clientele, including government agencies, private land owners, real estate attorneys and agents, contractors and other design professionals throughout the Rio Grande Valley. Our primary goal is to provide surveying services in a timely manner within the appropriated project budget and resources provided. ROWSS has extensive experience in but not limited to:

- control surveys
- property acquisition plats
- preparing right-of-way maps
- design cross sections
- topographic surveys
- producing digital terrain models for engineering design
- horizontal and vertical control for aerial mapping
- construction and right-of-way staking
- miscellaneous surveys

Our staff includes professional land surveyors, survey technicians, CAD operators and administrative personnel. Each staff member brings a strong sense of teamwork along with excellent communication skills and proven expertise in the multifaceted field of land surveying. The ROWSS team has experience working on numerous projects throughout the Rio Grande Valley for the past 27 years. Our team members are also natives of Hidalgo County, making them very knowledgeable of the geographical area. We have worked in all terrain within Hidalgo, Cameron and Starr County. We have the resources and expertise to adapt to any environment. Hidalgo, Cameron, and Starr County are unique to the rest of Texas when it comes to the original establishment of Lot and Boundary lines. We have faced challenges in boundary reconstruction such as the 10th St. Road expansion project that cut through Las Alamedas Subdivision, performed control and design survey for the Mission Inlet Pilot channel from Conway to the Main Flood Way East of Jackson Road, and retraced Irrigation District Canal Right of Way in the City of Peñitas, Texas.

The ROWSS team currently has 90% availability to begin working on projects for the City of Edinburg immediately. ROWSS's Registered Professional Land Surveyor is always available for consultation or surveying services. Our Team has access to four (4) survey field crews that can easily be engaged to begin any given assignment and can commence work on simultaneous projects as required. We currently have four (4) computer Workstations with Bentley Powercivil Select Series 2 software to accommodate DGN or DWG format deliverables. ROWSS is structured to match the staffing needs to the project size. We are readily available to augment any surveying services. It is our mission to offer a strong pro-active Surveying firm that will successfully complete the upcoming surveying project.

Understanding of the Project:

R.O.W. Surveying Services, L.L.C. (ROWSS) understands that City of Edinburg is seeking to contract with a Licensed Professional Land Surveying Firm on an "as needed" basis with experience in, but not limited to, the following areas: topographic, boundary, platting preliminary, and all other necessary land surveying tasks, as specified by the City. The services may be requested by City on a project-to-project basis, which may require from one (1) day to several months to complete. As Surveyors, will be expected to perform the services in accordance with the Scope of Services and in accordance with the requirements of this solicitation and perform at a minimum the following tasks:

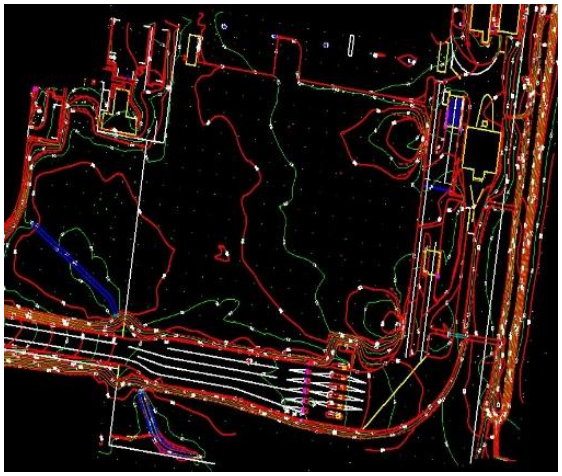
1. Boundary lines, giving length and bearing on each straight line; interior angles; radius, point of tangency, and length of curved lines. Set iron pin (monument at property corners where none exists); drive pin 18" into ground, mark with wood stake; state on drawing whether corners were found or set and describe each.
2. Legal description, including measurements in recorded deeds for comparison with observed.
3. Area in square feet if less than one acre, in acres (to 0.001 acre) if over one acre.
4. Identify, jurisdiction and width of adjoining street and highways, width and how paved. Identity of landmarks.
5. Plotted location of structures on the property and on adjacent property within 30 feet. Dimension perimeters in feet and inches to nearest ½. State character and number of stories. Dimension to property lines and other buildings. Vacant parcels shall be noted "Vacant".
6. Encroachments, including cornices, belt courses, etc., either way across property lines.
7. Fences and walls; describe. Identify party walls and locate with respect to property lines.
8. Recorded or otherwise known easements and right-of-way; state owner of right.
9. Possibilities of prescriptive right-of-way and nature of each.
10. Anticipated street widening.
11. Individual lot lines and lot and block numbers. Street numbers of buildings.
12. Sidewalks, curbs, gutters & drives on the block and extend to include the same across boundary streets.
13. Building line and setback requirements, if any.
14. Names of owners of adjacent property.
15. Reconciliation or explanation of any discrepancies between survey and recorded legal description.
16. Title searches and title reports.
17. Right-of-way acquisitions.

Topographical Survey Requirements:

1. All lines of levels shall be checked by separate check level lines or on previous turning points or benchmarks.
2. Traffic devices, signs, in connection with boundary streets.
3. Future plans of City, Utility Districts, and Municipal Utilities when such information is discovered in routine information gatherings.
4. Minimum of one permanent benchmark on site for each ten or less acres; description and elevation to nearest 0.01'.
5. Contours at 1 foot intervals; error shall not exceed one-half contour interval.
6. Spot elevations at each intersection of a 20 foot square grid covering the property and if possible 5 foot grid interval(s) beyond.
7. Spot elevations at street intersections and at 5 feet on center on curb, sidewalk, and edge of paving including far side of paving. If elevations vary from established grades, state established grades, state established grades also.
8. Plotted location of structures, man-made and natural features; floor elevations at each entrance of building on property.
9. Location, size, depth and pressure of water and gas mains, and other utilities serving or on the property, valves, meters.
10. Location of fire hydrants available to property and size of main serving each.
11. Location of electric and telephone services and characteristics of service available.
12. Location, size, depth and direction of flow of sanitary sewers, storm drains and culverts serving or on property; location of catch basins and manholes and inverts of pipe at each; same at or in boundary streets.
13. Name of operating authority of each utility.
14. Mean elevation of eater in any excavation, well or nearby body; flood level of streams.
15. Extent of watershed onto property. Probability of freshets overrunning the site.
16. Locations of test borings if ascertainable and elevation of top of holes.
17. Trees of 3" and over (Caliper 3' above ground) locate within 1' tolerance and give species.
18. Perimeter outline only of thickly wooded areas unless otherwise directed.
19. Location, size, elevation of elevated: piping insulated piping, conduit, pipe racks and supports; except that above building roofs.
20. Show dimensions and bearings of property boundaries, and plot all locatable title exceptions and easements on the survey map.
21. Show existence or non-existence of any encroachments and right-of-way.
22. The written legal description of the property and exhibit(s) for recording purpose.

23. Provide an area measurement within boundary lines.
24. Easements – all utility, city and private easements shall be shown and labeled.
25. Legal description and exhibit(s) for any easements where required.
26. Setbacks – building and parking setbacks shall be shown and noted for each property or zoning areas.
27. All above grade utilities, including but not limited to overhead electrical, telephone, cable, street lighting, and other electrical and communications equipment; location and rim elevations of sanitary and storm sewer structures, water main valves, and hydrants; gas valves and all other above grade utility equipment.
28. All underground utilities, including but not limited to storm, sanitary, water, gas, telephone, electrical, and cable. Rim elevation, bottom of manhole, and all in and out inverts of utilities shall be noted. Note: If any of these utilities do not exist within or directly adjacent to the survey area, Surveyor shall locate the nearest available service connection which can be used for future service to site.
29. Provide on the survey a list of names, addresses, and phone numbers of all applicable utility companies.
30. Trees, shrubs, and planting areas: all trees 2" caliper and larger shall be labeled with caliper and species. All tree canopies shall be accurately shown.
31. All trees 6" caliper and larger shall be labeled with caliper and species. All tree canopies shall be accurately shown and areas of woods or shrubs accurately delineated.
32. Zoning of the property and all adjacent properties within 100' of the surveyed area.
33. Provide planning and zoning overlays.
34. Currently flood plain information including FEMA Regulatory 100-year and 500-year floodplain boundaries, notation of record flood event elevation (2008 flood), 100-year flood elevation and other DNR protested area boundaries.
35. All measurement tolerances provided on such surveys must be within readings for urban survey as specified on accuracy standards for alta/acsm land title surveys.
36. When a significant discrepancy with the record maps and documents are found, or if monuments are set or if otherwise required by law, surveyor shall provide a "record of survey map" compliant with City and State standards.
37. Elevation certificate for flood insurance purpose (FEMA) coordination & documentation associated with phase I and phase II real estate.
38. All firms may not be capable of providing the above noted services. If your firm is capable and willing to provide any of the above services, a complete description of the nature of the service the firm is qualified to provide must be provided in your qualifications.
39. All other topographic surveying as assigned.

Recent Experience:



Procedures and formats indicated in the RFQ will be respected and followed. It is with understanding that we are to provide services, but not limited to the items outlined in the "Scope of Work" identified in RFQ. Standards and procedures outlined will be followed with respect to local, state, federal, and professional board rules and guidelines. ROWSS has the management experience and technical expertise to follow through with all minimum requirements of services stated. A brief Boundary/Topographic survey project outline is provided in the following paragraphs.

Coordination with the City of Edinburg and its representatives will be the first step to identify and review the project scope of services. A thorough understanding is important before onsite surveying can begin. ROWSS will ask for any resources the City of Edinburg may have that will be beneficial to the Surveyor. Coordination with onsite utility companies and municipalities will be made to mark and identify underground drainage, sewer, water, gas, telephone, and any other utility servicing project site. Project examples are as follows:

La Joya Outfall South Basin (US 83 to Military Road)

Contact Person: Reza Badiozzamani, P.E., L & G Engineering, 900 S. Stewart Road, Suite #6, Mission, Texas 78572, Telephone No.: (956) 585-1909, Survey Contract Amount: $58,851.00. The following are steps ROWSS has taken in a design survey for the La Joya Outfall South Basin. Final deliverables included establishing Horizontal and Vertical control from US 83, South to Military Road and topographic engineering design deliverables for new drainage outfall construction. Horizontal and Vertical control tied to the TxDOT La Joya Relief Route Project. Once project scope and limits delineated by Engineering consultants and approved by Hidalgo County, field crews began to establish a control network using the latest Leica Global Positioning Systems and Robotic Instruments. Our field crews and staff are professionally trained in Real Time Kinematic and Static survey procedures utilizing the latest Leica Global Positioning System (GPS) technologies.

GPS data will be processed with Leica Infinity and Geo Office software to adjust and check for any blunders or bad positions in the collected data. A Leica DNA digital level utilized to run a project bench loop establishing vertical values on project control. Once the Horizontal and Vertical Network has been completed boundary monuments recovered and tied to project control.

Field crews then begin the topographic survey identified by scope, measuring all physical improvements, significant trees, utilities, and drainage features. Field work processed daily for quality assurance and quality control.

Once existing boundary lines established and topographic survey completed, office staff begin production of final design deliverables. Digital and hard copy files delivered to the Hidalgo County engineering sub consultant per requested format. Key personnel on project: Julio Cerda (Project Manager/Client Contact), Kurt Schumacher (former R.P.L.S./Manager), Victor Trevino (Survey Technician), Jason Luna (CAD Technician), Daniel Marquez and Arturo Reyna (Survey Crew Chiefs).

Hidalgo County Regional Linear Park Project

Contact Person: David Saenz, P.E., L & G Engineering, 900 S. Stewart Road, Suite #6, Mission, Texas 78572, Telephone No.: (956) 585-7117, Survey Contract Amount: $154,51.00. ROWSS is contracted for Right of Way mapping and parcel acquisition descriptions for the Hidalgo County Regional Linear Park Project. Project limits run from San Antonio Avenue (San Juan) to Moore Road (Pharr). Project scope to produce a Right of Way map and metes and bounds descriptions for approximately 33 parcels along existing Hidalgo County Drainage District Right of Way easement. A brief project approach for this and other right of way surveys with parcel acquisition as follows:

Abstract research is the first step in the mapping process. All recorded information, such as utility maps, subdivision plats, and deed records researched at the Hidalgo County Clerk. A request will be made to Irrigation and Drainage Districts for information within project limits. Appraisal district information utilized to identify current ownership. Survey Technicians, under direction from the RPLS, begin to develop a preliminary project base map identifying all ownership and easements along project route. When base map completed, field crews begin recovering and locating boundary monuments.

Once the field survey has been completed, the RPLS analyzes and prepares a boundary resolution to establish existing and proposed right of way lines. CAD technicians then begin detailing base map for right of way sheets for parcel exhibits needed for acquisition. When project base map identifying all parcels and utilities in conflict completed, a preliminary submittal is sent to Hidalgo County and/or their representatives for review. When preliminary map redlines are returned, preparation for final deliverables can begin. Deliverables will be delivered to Hidalgo County and/or their representatives. Proposed right of way monuments will be set.

Once the map has been approved by Hidalgo County, parcel descriptions and sketches will begin. Sketches and descriptions will check for closure error and grammatical errors. Once QA/QC has been completed, signed and sealed Parcel sketches and legal descriptions will be delivered. Key personnel on project: Julio Cerda (Project Manager/Client Contact), Kurt Schumacher (former R.P.L.S./Manager), Victor Trevino (Survey Technician), Jason Luna (CAD Technician), Daniel Marquez and Arturo Reyna (Survey Crew Chiefs).

10th Street Expansion Project (2015)

Contact Person: Robert Macheska, P.E.; L & G Engineering, 900 S. Stewart Road, Suite 10, Mission, Texas 78572, Telephone No.: (956) 585-1909, Survey Contract Amount: $130,000.00. ROWSS contracted for Right of Way mapping, parcel surveys, metes and bounds descriptions, and title reports for the 10th Street Expansion Project. Project limits run from State Highway 107 to Monte Cristo Road (FM 1925). Project scope to produce a Right of Way map and metes and bounds descriptions for approximately 63 parcels along 10th Street Expansion Right of Way easement. The project was finalized in February, 2015. A brief project approach for this and other right of way surveys with parcel acquisition as follows:

Abstract research is the first step in the mapping process. All recorded information, such as utility maps, subdivision plats, and deed records researched at the Hidalgo County Clerk. A request will be made to Irrigation and Drainage District for information within project limits. Appraisal district information utilized to identify current ownership. Survey Technicians, under direction from the RPLS, begin to develop a preliminary project basemap identifying all ownership and easements along project route. When base map completed, field crews begin recovering and locating boundary monuments.

Once the field survey has been completed, the RPLS analyzes and prepares a boundary resolution to establish existing and proposed right of way lines. CAD technicians then begin detailing basemap for right of way sheets for parcel exhibits needed for acquisition. When project basemap identifying all parcels and utilities in conflict completed, a preliminary is sent to Hidalgo County and/or their representatives for review. When preliminary map redlines are returned, preparation for final deliverables can begin. Deliverables will be delivered to Hidalgo County and/or their representatives. Proposed right of way monuments will be set.

Once the map has been approved by Hidalgo County, parcel descriptions and sketches will begin. Sketches and descriptions are checked for closure error and grammatical errors. Once QA/QC has been completed, signed and sealed Parcel sketches and legal descriptions will be delivered. Key personnel on project: Julio Cerda (Project Manager/Client Contact), Kurt Schumacher (former R.P.L.S./Manager), Victor Trevino (Survey Technician), and Arturo Reyna (Survey Crew Chief).

Ware Road for the State of Texas (2014/2015)

Contact Person: Velma Garcia, Project Manager, L & G Engineering, 2100 W. Expressway 83, Mercedes, Texas 78570, Telephone No.: (956) 565-9813, Survey Contract Amount: $192,000.00. Responsible for right-of-way retracement of approximately 2.4 miles of highway. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with over 25 new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROW deliverables. Supervised technical drawings for delivery to TxDOT. Key personnel on project: Julio Cerda (Project Manager/Client Contact), Kurt Schumacher (former R.P.L.S./Manager), Victor Trevino (Survey Technician), and Arturo Reyna (Survey Crew Chief).

Highland Sewer Redirect Phase II for S.J. Louis Construction of Texas, Ltd.(2015)

Contact Person: Robert "Derrick" Gage, Project Manager, S. J. Louis Construction of Texas, LTD., 10515 Gulfdale Street, Suite #111, San Antonio, Texas 78216, Telephone No.: (210) 340-9998, Survey Contract Amount: $24,166.96. Responsible for providing Submerged Utility locations to include sketches, X, Y, Z locations, and utility descriptions at areas indicated per exhibit. PVC pipe were left in place to mark exposed area. Provided centerline construction staking at 100 foot intervals and at all bends/P.I.'s of proposed sewer alignments for Phase II. Contract Owner of Project is the McAllen Public Utility. Key personnel on project: Julio Cerda (Project Manager/Client Contact), Kurt Schumacher (former R.P.L.S./Manager), and Victor Trevino (Survey Technician).

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE:

Julio Cerda, P.E. (Project Manager)

Mr. Cerda is the Principal in charge and primary contact for R.O.W. Surveying Services, L.L.C. He provides a broad spectrum of experience in managing staff and communicating with clients. He also serves as the Quality Assurance and Quality Control Manager.

Victor Trevino, P.E., R.P.L.S. (Project Engineer & Land Surveyor)

Mr. Trevino is the Registered Professional Land Surveyor and Survey Manager for R.O.W. Surveying Services, L.L.C. Responsibilities include client communication, managing field and office staff, proposal writing, and QA/QC. He is proficient with Microstation CAD software. He is responsible for directing and supervising CAD technicians and processing field data daily.

Jonathan D. Garcia, Graduate Engineer (Survey Technician)

Jonathan is a survey technician. He is proficient with Microstation CAD software. He also assists with directing and supervising CAD technicians and processing field data daily.

Bryan G. Guzman, Graduate Engineer (Survey Technician)

Bryan is a survey technician. He is proficient with Microstation CAD software. He also assists with directing and supervising CAD technicians and processing field data daily.

Gerardo Valdez, Graduate Engineer (Survey Technician)

Gerardo is a survey technician. He is proficient with Microstation CAD software. He also assists with directing and supervising CAD technicians and processing field data daily.

Omar Tijerina, Graduate Engineer (Survey Technician)

Omar is a survey technician. He is proficient with Microstation CAD software. He also assists with directing and supervising CAD technicians and processing field data daily.

Richard Gonzalez, Survey Crew Chief

Richard supervises the field crew perform boundary, construction, and topographic surveys. He performs field calculations and field reports with over eight (8) years of experience.

TBPLS REG. FIRM# 10193886

Mr. Cerda has over 27+ years of experience in the design and management of various public improvement projects. For the past eight years Julio served as City Manager for the City of Mission overseeing the operations of the City Engineer and Public Works Director. He has previously worked as a City Engineer for the City of Mission and previous to that for the City of Harlingen. In between working for these cities, he worked as the Asst. Cameron County Engineer overseeing several drainage and roadway projects. Previous to all, he worked for the Texas Department of Transportation as a design engineer. With positions of head of departments in all of these entities provided him with excellent hands-on experience with government projects. Julio has been able to take his work experience and utilize it to provide effective engineering services. Furthermore, Julio has worked extensively on the detailed design and development of numerous roadway and drainage projects. He has designed and developed roadway geometrics, traffic control plans, Storm Water Pollution Prevention Plans (SW3P), signing and pavement marking layouts, culvert and storm sewers, general notes, estimates and specifications and coordinated adjustments of conflicting utilities. Julio is also very familiar with Texas Department of Transportation, Federal Highway Administration, Hidalgo County and AASHTO regulations and design criteria. Julio also has extensive experience coordinating with utilities and local irrigation and drainage districts in Hidalgo County.

PROJECTS:

Inspiration Rd/Military Pkway: This Project consist of field surveys for engineering from US 83 to Military Pkway. Responsible for right-of-way retracement of approximately 4.46 miles of highway. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Mr. Cerda implemented QA/QC.

Mile 10 Road (Mile 6 to SH 1015): This Project consist of field surveys for engineering from Mile 6 to SH 1015. Responsible for right-of-way retracement. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Mr. Cerda implemented QA/QC.

Mile 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station. **Project Scope:** STIG (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Duties included establishing benchmark identifications and tie into approved USGSSSS, FEMA or County Benchmark data; obtain data of existing drainage facilities and/or structures, including size, type, and flowline (upstream & downstream) elevations of structures; obtain profiles of intersecting roadways that cross existing and proposed channels; obtain data for all existing or proposed utilities that may affect the project, including but not limited to water lines, sewer lines, gal lines, telephone lines, cable lines, etc.; obtain flood plain and cross-section (along with appropriate overbank data), and establish reach lengths, as required; primary project control points (horizontal and vertical control points) and secondary control points; and coordinate with various agencies; data collection. Mr. Cerda implemented QA/QC.

Mile 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station. **Project Scope:** STIG (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for this project. Duties included establishing benchmark identifications and tie into approved USGSSSS, FEMA or County Benchmark data; obtain data of existing drainage facilities and/or structures, including size, type, and flowline (upstream & downstream) elevations of structures; obtain profiles of intersecting roadways that cross existing and proposed channels; obtain data for all existing or proposed utilities that may affect the project, including but not limited to water lines, sewer lines, gal lines, telephone lines, cable lines, etc.; obtain flood plain and cross-section (along with appropriate overbank data), and establish reach lengths, as required; primary project control points (horizontal and vertical control points) and secondary control points; and coordinate with various agencies; data collection.

Bus 281 - SH 107 Roadway & Drainage Improvements: (ROW) This Project consist of field surveys for engineering from Courthouse Square to HWY 281/ Existing Outfall to Raul Longoria. Responsible for right-of-way retracement of approximately +/- 1.5 miles roadway / 1.1 Miles Existing Outfall. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for this project.

Mile 10 Road (Mile 6 to SH 1015): (ROW) This Project consist of field surveys for engineering from Mile 6 to SH 1015. Responsible for right-of-way retracement. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for this project.

Jonathan D. Garcia, Graduate Engineer
(Survey Technician)

EDUCATION

University of Texas Rio Grande Valley – Edinburg, TX

Bachelor of Science in Civil Engineering
Graduation Year 2016

YEARS OF EXPERIENCE

8+ Years

ROW SURVEYING SERVICES, LLC.
TBPLS REG. FIRM# 10193886
900 S. STEWART RD. SUITE 13
MISSION, TEXAS 78572
TEL.: (956) 424-3335
FAX.: (956) 424-3132

Qualifications:

Mr. Garcia has 8+ years of experience as a Graduate Engineer in the civil infrastructure area in project that vary from residential & commercial developments to roadways & utilities locate. Mr. Garcia is knowledgeable in all aspects of surveying including CADD software design, preparing legal descriptions, problem-solving, and research.

Project Experience:

Mayfair Residential Subdivision, Mission Texas. Assist Professional Engineer in the development of an 83 Lots Residential Subdivision located in the City of Mission, Texas. The duties involved vary from collecting topographic information, deed research, preliminary design for map layout, design utilities according to the City of Mission design parameters, calculate construction estimates, coordinate construction with the contractor, recording of the documents such as easements, boundaries and final plat.

Carrizales Residential Subdivision, Mission Texas. Assist Professional Engineer in the development of an 48 Lots Residential Subdivision located in the City of Mission, Texas, ETJ. The duties involved vary from collecting topographic information, deed research, preliminary design for map layout, design utilities according to the City of Mission design parameters, calculate construction estimates, coordinate construction with the contractor, recording of the documents such as easements, boundaries and final plat.

Palo Alto Residence Phase 1 & 2 Residential Subdivision, Brownsville Texas. Assist Professional Engineer in the development of an 124 Lots Residential Subdivision located in the City of Brownsville, Texas. The duties involved vary from collecting topographic information, deed research, preliminary design for map layout, design utilities according to the City of Brownsville design parameters, calculate construction estimates, coordinate construction with the contractor, recording of the documents such as easements, boundaries and final plat.

FM 1925 Road (10th Street to McColl Road) San Benito, Texas. Survey Technician responsible for deed research, abstract maps, sketch 38 parcels plats, parent tract, metes and bounds descriptions & closure report.

US 77 83 South Parallel Corridor (FM 2520-FM 1577), San Benito, Texas. Survey Technician responsible for deed research, abstract maps, sketch 45 parcels plats, parent tract, metes and bounds descriptions & closure report.

Taylor Rd Water and Sewer Adjustments, McAllen, Texas. Assist in the relocation of Water & Sewer Utilities. Duties involved vary from locate Utility companies for information of the existing utilities, collect & process topographic information, mapping of the existing conditions, design the proposed improvements, sketch the construction sheets and calculate the estimate the construction cost.

Bryan G, Guzman Hdz, Graduate Engineer
(Survey Technician)

EDUCATION

Facultad de Ingenieria Civil, UANL – San Nicolas De Los Garza, Nuevo Leon.

Graduation Year 2017

Master in Environmental Engineering, Facultad de Ingenieria Civil, San Nicolas De Los Garza, Nuevo Leon
Master's Student 2019-2021

YEARS OF EXPERIENCE

10+ Years

Qualifications:

Mr. Guzman has over 10+ years of experience as a Graduate Engineer with a background in the design and development of pluvial systems, sanitary systems, storm analysis, and hydraulic works, He also has knowledge in the design of water treatment plants, solid waste disposal and environmental impact studies. Mr. Guzman has knowledge of specialized hydraulic design software such as: Microstation, Geopak, AutoCAD, Civil3d, Flowmaster, HEC-RAS and HEC-HMS.

Project Experience:

Alberto Road, Edinburg, Texas.
Assist Professional Engineer in designing the pavement levels, the sanitary system, the pluvial system and the water supply system, as well as the development of the required detention pond volume. My activities consisted of the development of construction plans, profiles, and information about the lot to be subdivided, information on the parameters required by the City of Edinburg.

Taylor Road, McAllen, Texas.
Assist Professional Engineer in designing the pavement levels, the sanitary system, the pluvial system and the water supply system, as well as the development of the required detention pond volume. My activities consisted of the development of construction plans, profiles, and information about the lot to be subdivided, information on the parameters required by the City of McAllen.

Project 22, Weslaco, Texas.
Assist Professional Engineer in designing the pavement levels, the sanitary system, the pluvial system and the water supply system, as well as the development of the required detention pond volume. My activities consisted of the development of construction plans, profiles, and information about the lot to be subdivided, information on the parameters required by the City of Weslaco.

The woods at Los Fresnos Subdivision, Los Fresnos, Texas.
Assist Professional Engineer in designing the pavement levels, the sanitary system, the pluvial system and the water supply system, as well as the development of the required detention pond volume. My activities consisted of the development of construction plans, profiles, and information about the lot to be subdivided, information on the parameters required by the city of Los Fresnos.

Garden Oaks Subdivision, Los Fresnos, Texas.
Assist Professional Engineer in designing the pavement levels, the sanitary system, the pluvial system and the water supply system, as well as the development of the required detention pond volume. My activities consisted of the development of construction plans, profiles, and information about the lot to be subdivided, information on the parameters required by the city of Brownsville, quantities of work and the estimate of the final cost of the work.

Elm Drainage, Mission, Texas.
Assist Professional Engineer in identifying the existing pluvial structure and its hydraulic analysis located on Stewart Rd within the jurisdiction of Mission Texas, the pluvial infrastructure proposal was developed. Helped in the compilation of topographic survey information with the identification of manholes, conflicts with the existing sanitary system, guidelines established by the city of Mission, TX.

City of Edinburg Past Projects:

Alberta Road Expansion Phase I & II: Services provided for this project included a Topography survey, with survey exhibits including Right-of-Way map.

- Victor Trevino, P.E., R.P.L.S., was the Survey Manager overseeing the project and finalized deliverable survey exhibits.
- Daniel Garcia, Survey Technician, directed the field survey crew on data required to complete the survey and processed the field data with Microstation CAD software.
- Daniel Marquez, Survey Crew Chief, supervised the field crew and performed the boundary survey.
- Arturo Reyna, Survey Crew Chief, supervised the field crew and assisted with survey.

McIntyre Street/Missouri Pacific Railroad Pedestrian Crossing: Services provided for this project included setting Horizontal/Vertical Control, Design Survey locating all improvements (structures, utilities, flow lines), and provided survey files for engineering design.

- Victor Trevino, P.E., R.P.L.S., was the Survey Manager overseeing the project and finalized deliverable survey exhibits.
- Daniel Garcia, Survey Technician, directed the field survey crew on data required to complete the survey and processed the field data with Microstation CAD software.
- Daniel Marquez, Survey Crew Chief, supervised the field crew and collected survey data.
- Arturo Reyna, Survey Crew Chief, supervised the field crew and assisted with survey.

Hidalgo County Courthouse: Services provided for this project included survey at courthouse square and along SH 107 going West for drainage improvements.

- Victor Trevino, P.E., R.P.L.S, was the Survey Manager overseeing the project and signed and sealed the final deliverable survey exhibits.
- Daniel Garcia, Survey Technician, directed the field survey crew on data required to complete the survey and processed the field data with Microstation CAD software.
- Daniel Marquez, Survey Crew Chief, supervised the field crew and collected survey data.
- Arturo Reyna, Survey Crew Chief, supervised the field crew and assisted with survey.

INSURANCE:

RE: Request for Statement of Qualifications for Surveying Services.
Solicitation Number: RFQ 2026-6

To whom it may concern,

We are pleased to submit our Statement of Qualifications to the City of Edinburg for Professional Surveying Services. **S2 Engineering, PLLC** is a civil engineering and land surveying consulting firm established in 2021 and based in Mission, Texas. Our firm is led by Jose Noe Saldivar, P.E., C.F.M., who brings over 29 years of progressive experience in land development, transportation and drainage planning and design. His extensive background provides valuable insight into regional drainage infrastructure, regulatory processes, and coordination with local agencies.

Our surveying team is led by two Registered Professional Land Surveyors (RPLS), bringing a combined high level of experience in surveying. Both RPLS contribute over 43 years and 46 years of surveying expertise in boundary surveying, subdivision platting, construction staking, etc. This depth of experience is complemented by a Surveyor-in-Training (SIT), along with three additional graduate engineers who support project coordination, data processing, and quality assurance.

Our team possesses strong experience navigating local requirements within the City of Edinburg and its Extraterritorial Jurisdiction (ETJ), including coordination with utility providers, drainage districts, and other regulatory agencies. Our firm is actively applying city requirements, ordinances, subdivision requirements, right-of-way dedication, easement considerations throughout our current projects.

S2 Engineering is committed to delivering high-quality, reliable, and timely surveying services. Our approach emphasizes clear communication, thorough quality control, and proactive coordination to minimize delays and ensure compliance with applicable standards and regulations. We are equipped to support projects from initial field data collection through final deliverables, ensuring consistency and efficiency throughout the process.

Enclosed within this Statement of Qualifications is detailed information regarding our team's experience, technical capabilities, and representative projects that demonstrate our commitment to excellence and service to the communities we support.

Should you have any questions or require additional information, please do not hesitate to contact Mr. Jose Noe Saldivar, President, at (956) 403-9787 or via email at s2engineering.ns@gmail.com

We appreciate the opportunity to be considered for this solicitation and look forward to the possibility of working together.

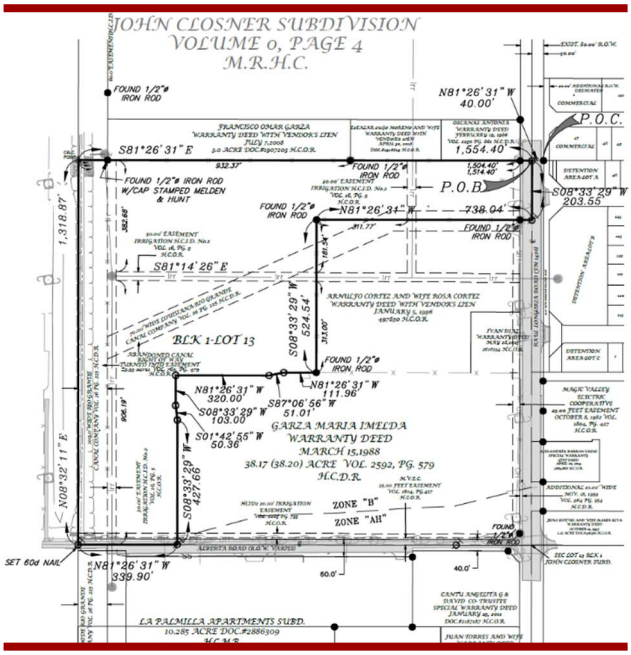
Sincerely,

S2 Engineering, PLLC

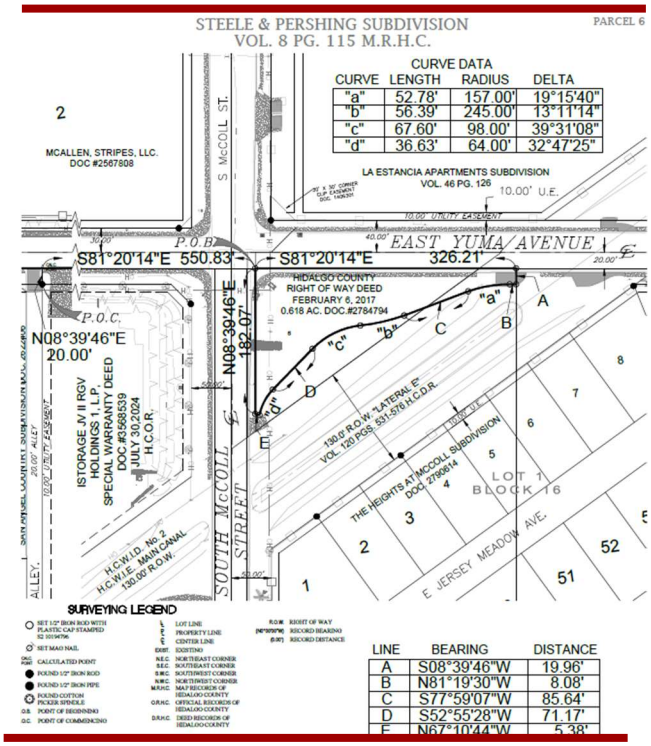
PROFILE OF

Land Surveying Services

S2 Engineering, PLLC is licensed by the Texas Board of Professional Engineers and Land Surveyors to provide engineering and surveying services in the State of Texas (TBPE Firm No. F-22858; TBLS Firm No. 10194796). The firm offers a comprehensive range of professional surveying services to support public and private development projects throughout the Lower Rio Grande Valley. Our experience includes boundary surveys, topographic surveys, subdivision platting, construction staking, right-of-way parcel acquisition, and utility surveys.



S2 Engineering has developed strong working relationships with local agencies, county precincts, municipalities, and private entities, and has been selected to provide on-call surveying services for certain public entities, reflecting our reliability, responsiveness, and consistent delivery of quality work.



Our land surveying services include the following:

- Boundary Surveys
- Topographic Surveys
- Subdivision Plats and Replats
- Improvement (As-Built) Surveys
- Construction Staking
- Right-of-Way Parcel Preparation and Acquisition Surveys
- Utility Surveys (including coordination with providers)
- Residential Lot Surveys
- Infrastructure and Public Improvement Surveys
- ALTA/NSPS Land Title Surveys
- Easement Preparation and Exhibit Surveys
- GPS Control Surveys

Supporting Services:

- Mapping / GIS
- Land Development Support
- Utility Coordination

PROGRESSIVE ENGINEERING AND SURVEYING

WITH EXPERIENCE

S2 Engineering, PLLC,

brings a highly experienced surveying team led by licensed professionals with extensive knowledge of South Texas and the Rio Grande Valley. Our surveying group is anchored by Mr. Oscar Hernandez, R.P.L.S., with over 43 years of experience, and Mr. Restituto A. Ascano III, R.P.L.S., who brings over 46 years of experience in boundary determination, title research, and survey coordination. Together, they provide deep expertise in boundary, topographic, ALTA/NSPS land title, and construction surveying, ensuring accuracy and reliability on every project. Supporting this team is our President and Senior Project Manager, Mr. Jose Noe Saldivar, P.E., C.F.M., who offers over 29 years of engineering experience and provides seamless integration between surveying and project development. Our team's combined experience allows us to efficiently manage multiple projects, coordinate with clients and agencies, and deliver high-quality survey data, plats, and legal descriptions from initial fieldwork through final project completion.

BELOW IS A LIST OF REPRESENTATIVE PROJECTS OUR TEAM HAS BEEN INVOLVED IN

Yuma Ave. Road Improvements, City of McAllen, TX (2025)

Provided professional surveying services in support of right-of-way acquisition for a proposed roadway improvement project. Scope included full topographic survey and preparation of a comprehensive ROW basemap, along with boundary surveys, parcel exhibits, and metes and bounds descriptions for multiple tracts. Deliverables were prepared in accordance with City of McAllen standards to facilitate efficient review, negotiation, and acquisition.

Mile 2 Road Improvements (Texas Department of Transportation (TxDOT) Project), Hidalgo County, TX (2024)

Provided professional surveying services as a subcontractor in support of right-of-way acquisition for a TxDOT roadway improvement project. Scope included full topographic survey and preparation of a comprehensive ROW basemap, establishment of road center line alignment along with boundary surveys, parcel exhibits, and metes and bounds descriptions for multiple tracts along the project corridor. Deliverables were prepared in accordance with TxDOT standards to facilitate efficient review and acquisition.

Russell Marine, LLC - Brownsville Cargo Dock 3, Port of Brownsville, TX (2025)

Provided topographic survey, building survey, and rail trestle survey services in support of demolition activities at the Port of Brownsville. Scope included pre-demolition documentation, existing conditions mapping, and post-demolition verification to support project coordination and site redevelopment efforts.

2023 Bond 8 Drain Ditch Improvements Hidalgo County Drainage District No. 1 (HCDD1), Hidalgo County, TX (2024)

Provided engineering and surveying services in support of a drainage improvement bond project. Scope included preparation of construction plans and parcel acquisition. Services also included boundary surveys, parcel exhibits, and metes and bounds descriptions for required right-of-way and easements. Coordination was performed with HCDD1 staff and stakeholders to support acquisition efforts and ensure compliance with applicable standards. Deliverables were prepared to facilitate efficient review, design progression, and timely acquisition for implementation of drainage infrastructure improvements.

Mile 6 Outfalls (TxDOT & HCDD1 Project) Hidalgo County, TX (2023)

Provided professional surveying services in support of right-of-way and easement acquisition for outfall improvements associated with a TxDOT roadway project along Mile 6 Road. Scope included preparation of boundary surveys, parcel exhibits, and metes and bounds descriptions for required drainage easements. Services also included identification of existing easements and encroachments, and coordination with the prime consultant and appraisal team to support acquisition efforts. Deliverables were prepared in accordance with applicable standards to facilitate efficient review and timely acquisition for implementation of drainage infrastructure improvements.

Ditch 1.9, 2, 4A, La Villa Edcouch Elsa GLO 2018, HCDD1, Hidalgo County, TX (2024)

Provided professional surveying services in support of parcel and easement acquisition for multiple drainage improvement projects. Scope included preparation of boundary surveys, parcel exhibits, and metes and bounds descriptions for required right-of-way and drainage easements. Services also included identification of existing easements and encroachments, and coordination with HCDD1 staff and appraisal consultants to support acquisition efforts. Deliverables were prepared to facilitate efficient review and timely acquisition in accordance with applicable project requirements.

Mid-Valley Drain Improvements, HCDD1, Hidalgo County, TX (2023)

Provided professional surveying services in support of parcel and easement acquisition for a drainage inlet project. Scope included preparation of boundary surveys, parcel exhibits, and metes and bounds descriptions for required right-of-way and drainage easements. Services also included identification of existing easements and encroachments, and coordination with project stakeholders to support acquisition efforts. Deliverables were prepared to facilitate efficient review and timely acquisition for implementation of drainage infrastructure improvements.

J-01 Drain – HCDD1, Hidalgo County, TX (2024)

Provided engineering and surveying services in support of a drainage ditch improvement project. Scope included full topographic survey, development of terrain models, and preparation of a comprehensive basemap to support design and parcel acquisition. Services also included boundary surveys, parcel exhibits, and metes and bounds descriptions for required right-of-way and drainage easements. Existing drainage features, easements, and site constraints were identified to support design and acquisition efforts. Deliverables were prepared to facilitate efficient review, design progression, and timely acquisition for implementation of drainage infrastructure improvements.

Bentsen Palm Drive Drainage Improvements HCDD1, Hidalgo County, TX (2024)

Provided professional surveying services in support of drainage improvements along Bentsen Palm Drive. Scope included full topographic survey and development of a comprehensive ROW basemap, along with preparation of boundary surveys, parcel exhibits, and metes and bounds descriptions for right-of-way and drainage easement acquisition. Services also included identification of existing drainage features, easements, and site constraints, and coordination with HCDD1 staff and stakeholders to support acquisition efforts. Deliverables were prepared to facilitate efficient review and timely acquisition for implementation of drainage infrastructure improvements.

Delta ARPA, Hidalgo County Precinct. No. 1, Hidalgo County, TX (2024)

Provided professional surveying services in support of parcel acquisition for a county-funded infrastructure project under the American Rescue Plan Act (ARPA). Scope included preparation of boundary surveys, parcel exhibits, and metes and bounds descriptions for multiple tracts. Services also included identification of existing easements and encroachments, and coordination with County staff and appraisal consultants to support acquisition efforts. Deliverables were prepared to facilitate efficient review and timely acquisition in accordance with applicable county requirements.

Mission Inlet Project, Hidalgo County Precinct. 2, Hidalgo County, TX (2024)

Provided professional surveying services in support of parcel and easement acquisition for a drainage inlet project. Scope included preparation of boundary surveys, parcel exhibits, and metes and bounds descriptions for required right-of-way and drainage easements. Services also included identification of existing easements and encroachments, and coordination with project stakeholders to support acquisition efforts. Deliverables were prepared to facilitate efficient review and timely acquisition for implementation of drainage infrastructure improvements.

Palmview Lateral Extension Phase I, HCDD1, Hidalgo County, TX (2024)

Provided professional surveying services in support of parcel and easement acquisition for a drainage inlet project. Scope included preparation of boundary surveys, parcel exhibits, and metes and bounds descriptions for required right-of-way and drainage easements. Services also included identification of existing easements and encroachments, and coordination with project stakeholders to support acquisition efforts. Deliverables were prepared to facilitate efficient review and timely acquisition for implementation of drainage infrastructure improvements.

On-Call Professional Surveying Services, HCDD1, Hidalgo County, TX (2023)

Our team currently serves as an on-call professional services provider for Hidalgo County Drainage District No. 1. Through this role, we support a range of drainage and infrastructure-related efforts, including survey support, right-of-way coordination, and project development assistance. This experience demonstrates our familiarity with regional drainage criteria, perming processes, and interagency coordination within Hidalgo County.

On-Call Professional Surveying Services, Hidalgo County Precinct 1, Hidalgo County, TX (2024)

Our team currently serves as an on-call professional services provider for Hidalgo County Pct. 1 Through this role, we support a range of drainage and infrastructure-related efforts, including survey support, right-of-way coordination, and project development assistance. This experience demonstrates our familiarity with regional drainage criteria, perming processes, and interagency coordination within Hidalgo County.

On-Call Professional Surveying Services, Hidalgo County Precinct 2, Hidalgo County, TX (2025)

Our team currently serves as an on-call professional services provider for Hidalgo County Pct. 2 Through this role, we support a range of drainage and infrastructure-related efforts, including survey support, right-of-way coordination, and project development assistance. This experience demonstrates our familiarity with regional drainage criteria, perming processes, and interagency coordination within Hidalgo County.

Recorded Subdivisions throughout Hidalgo County, TX

The following list highlights recorded subdivisions prepared and successfully filed by our team. Each project demonstrates our expertise in subdivision platting, right-of-way dedication, easement coordination, and compliance with applicable city and county requirements throughout the Rio Grande Valley.

- Acres of Santa Cruz Ph 4
- Acres of Santa Cruz Ph 3
- Arnold Galvan Jr
- Big D Industrial Park
- Chrisan's Manor
- Descanso
- Gardens At Villa Verde
- Los Amigos Ph 3
- Los Naranjos Estates
- OTI Subdivision No. 1
- Pulido's
- RBR No. 5
- RBR No. 7
- Bright Woods
- Rio Meadows
- Salazar Seminary
- Salida del Sol Ph IX
- Sunshine Estates No. 2
- T&O Ranch No. 3
- T&O Ranch No. 4
- T&O Ranch No. 5

Recorded Subdivisions throughout Hidalgo County, TX (Continued)

- TARS No. 1
- TARS No. 2
- Texas Star Plaza
- Uri Estates
- Vista Bonita No. 16
- Westwood Villas

Ongoing Surveying Services for Subdivision Projects throughout Hidalgo County, TX

The following list highlights subdivision projects currently being supported by our surveying team. These projects demonstrate our active role in boundary analysis, topographic surveys, right-of-way mapping, easement delineation, and preparation of preliminary and final plats. Our team works closely with engineers, developers, and local agencies to ensure accurate data collection, efficient project progression, and compliance with applicable city and county requirements throughout the Rio Grande Valley.

- Acres of Santa Cruz Ph 5
- Santa Cruz Ranches 5
- Corona de Cristo
- Garden de Villas Verde Ph 2
- McAllen Oaks Ph 1
- Heights on Wisconsin Ph 2
- La Mansion Health Clinic Subdivision
- Oti Estates No. 2
- Oti Estates No. 3
- WestWood Villas
- La Reserva
- El Coyote
- Los Naranjos Estates No. 2
- Shoppes at Closner
- J&A Subdivision
- Cityscape
- Lock House Self Storage

MEET

THE S2 TEAM

JOSE NOE SALDIVAR, P.E., C.F.M.

Title
President/Senior Project Manager

Years of Experience
29

Education

Technological Institute of Ciudad Victoria, Mexico
Bachelor's in Civil Engineering

Training/Certifications
Professional Engineer: Texas/94076
Certified Floodplain Manager
(CFM)/3340-17N
TxDOT Pre-Certifications:
3.4.1 Minor Bridge Layouts
4.2.1 Major Roadway Design
8.1.1 Signing, Pavement Marking & Channelization
10.1.1 Hydrologic Studies
10.2.1 Basic Hydraulic Design

Areas of Expertise
•PS&E • Hydraulic Design • Hydrologic Studies • FEMA Requirements, Coordination & Funding • Minor Bridge Design • Major Roadway Design

Mr. Saldivar is responsible for the overall project administration and management of S2 Engineering's services, including direct coordination with clients, agencies, and key stakeholders to ensure project objectives are met efficiently and effectively. As Senior Project Manager, he oversees project planning, design coordination, and execution, ensuring that all components of a project are aligned from initial concept through final delivery. The success of each project is driven by a strong foundation in engineering design, supported by in-house surveying and drafting capabilities. S2 Engineering emphasizes practical, cost-effective design solutions that consider constructability, regulatory requirements, and long-term performance. These efforts are supported by the firm's ability to provide accurate survey data, detailed exhibits, and high-quality construction documents. In-house drafting services utilize industry-standard software, including AutoCAD Civil 3D and MicroStation, to produce precise plans and supporting documentation for permitting, bidding, and construction. Throughout the project lifecycle, revisions and updates are carefully managed through a structured document control process to ensure consistency, accuracy, and timely delivery.

TEAM MEMBERS QUALIFICATIONS AND EXPERIENCE

S2 Engineering's goal is to establish long-term relationships with our clients by performing a highly competent service with quality and concern for the client, as well as our local communities. This is successfully done by the technical abilities, project management skills and commitment of the project team members. The resumes of key professional and technical staff are presented individually on the following pages.

Summary

Mr. Saldívar has over 24 years of progressive experience in transportation and drainage planning and design. He has served in key roles as both Project Manager and Surveying Manager for multiple engineering firms, in addition to 14 years of service with the Hidalgo County Drainage District No. 1. His experience includes route studies, planning, and the preparation of plans, specifications, and estimates (PS&E), as well as utility coordination and relocation, roadway geometrics, signage and pavement markings, and hydraulic design.

Mr. Saldívar has contributed to numerous engineering projects involving roadway development, storm drainage systems, traffic control planning, and bridge layout. His expertise includes hydraulic analysis and the preparation of drainage reports and supporting data, including evaluation of drainage areas, discharge calculations, FEMA floodplain and floodway requirements, and the design of culverts and bridge crossings. He is experienced in determining design flows, tailwater and headwater conditions, and evaluating potential overtopping scenarios.

He is proficient in industry-standard software including WinStorm, HEC-RAS, TR-55, HY-8, GEOPAK, and AutoCAD. Additionally, he has performed scour analyses and prepared Storm Water Pollution Prevention Plans (SW3Ps) to support regulatory compliance and minimize sediment transport impacts to drainage infrastructure.

Project Experience

2018 Drainage Bond Program, Hidalgo County, TX (Project Manager)

Mr. Saldívar served as Project Manager for the Hidalgo County 2018 Drainage Bond Program, overseeing the coordination and management of seventeen (17) consulting firms on countywide drainage improvement projects. The program includes a total of thirty-seven (37) projects aimed at reducing flood risk and improving drainage conditions for more than 69,000 structures, protecting over $5.5 billion in assessed property value.

His responsibilities included program-level oversight, consultant coordination, and review and approval of all hydrologic and hydraulic (H&H) analyses and deliverables. Mr. Saldívar also led coordination efforts with the United States International Boundary and Water Commission (USIBWC) for ten (10) projects requiring environmental clearance and permitting for outfalls into the USIBWC Floodway. His leadership ensured regulatory compliance, technical accuracy, and timely advancement of projects across the program.

Drainage Projects

Role: Project Engineer

- Anaquitas Drain
- Chaparral Drain Extension
- Delta Regional Water Mgmt.
- Ditch 47 & Ditch 350
- J-08 Drain
- K-07-02 Drain Improvements
- North San Juan Drainage Lateral
- Tierra Dorada Drain Improvements
- Weslaco Drain Improvements

TxDOT Projects

Role: Project Engineer

- US 277 / Maverick County
- US 83 / 359
- SH 345
- US 83 Arroyo
- Roma Creek

OSCAR HERNANDEZ , R.P.L.S.

Title
Registered Professional Land Surveyor (RPLS)

Years of Experience
43

Education
Harlingen High School

TxDOT PRE-CERTIFICATIONS:
Sequence No. 6344 Pre-certified in:
15.1.1 Survey
15.1.2 Parcel Plats
15.1.3 Legal Descriptions
15.1.4 Right of Way Maps
15.2.1 Design and Construction Survey

Areas of Expertise

- TxDOT Design Surveys
- ALTA/NSPS Survey & Commercial Land Development Support
- Right-of-Way Mapping & Parcel Aquisition Coordination
- Survey Project Management, QA/QC & Final Certification
- Coordination with Municipalities, Counties & Regulatory Agencies

Summary:

Mr. Hernandez has 43 years of surveying in South Texas from San Antonio south to Brownville and from Corpus Christi west to Laredo to good use. Mr. Hernandez's areas of experience and certifications are listed below:

Personal Experience:

SAMES, INC (JUNE 2021 – OCTOBER 2022)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects.
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity.
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

COBBFENDLEY (AUGUST 2019 – JUNE 2021)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high- performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department

TxDOT DISTRICTS:
Pharr District – US 281 from FM 506 to FM 509 (Design Survey)

- Laredo District – US 83 – from San Ygnacio, Texas to the Zapata/Webb County line (Design Survey)
- Beaumont District – FM 3180 from IH-10 to m 565 (Design Survey), IH-10 ¾ mile on each side of FM 3180 (Design Survey)
- Yoakum District – FM 80and FM 121 Rural (Design Survey) for culvert extensions
- Waco District – SH 190 6.7 miles (Design Survey) for widening inter lanes and ramp reversals
- San Antonio District – Intersection of SH 16 and Loop 1604 (Design Survey)

DRAINAGE PROJECTS (DESIGN TECHNITIAN)

- HWY 107 Drainage Improvements -Mercedes Lateral Widening
- Mile 3 Outfall to Bell RDF
- Trenton Drain Phase III

PRECINCT 4 PROJECTS (DESIGN TECHNITIAN)

- Hidalgo Surplus County
- San Carlos -Maintenance Shop Civil Plans
- Owassa Rd and Roosevelt Rd Connection

SAN ANTONIO WATER SYSTEM

- Central Basin: Locating Sanitary Sewer Manholes with GPS and measuring depths, Design Survey for 30 % Design
- Vista Ridge: Creating Metes and Bounds for Easements for construction of distribution water line
- East Sewer Shed: Creating Metes and Bounds for Construction Easement along existing Sanitary Sewer line

CITY OF SAN ANTONIO

- Alley Rehabilitation Design Survey throughout the City Boundary and Improvement Survey:
  - Huantes Property on Guadalupe Street,
  - Las Palmas Property on Commerce Street
  - St Marys Property on Culebra Street

- Sidewalk Construction Project (Design Survey):
  - Martin Luther King Drive Indiana Street
  - Aransas Avenue
  - Porter Street
  - Delmar Street
  - New Braunsfels Avenue

SURVEYS

- Agua Dental, Borwnsville, TX
- Calli Village Townhomes, Borwnsville TX
- Sunshine Village Apartments, Harlingen, TX
- Whataburger, Port Isabel, TX

RMA

- Evans Road from TCP Parkway to Hanging Oak Design Survey
- Blando Road from Wildrness Oak to 3.7 Miles North (Design Survey)

Bexar County

- Pearsall Road (Design Survey) elevating road and bridge

BAIN MEDINA BAIN (NOVEMBER 2018 – AUGUST 2019)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

GUZMAN AND MUNOZ SURVEY MANAGER (SEPTEMBER 2018 – NOVEMBER 2018)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

GONZALEZ DE LA GARZA / SURVEY MANAGER (JULY 2013 – MARCH 2018)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.

- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

PARTNER / REO ENGINEERING AND SURVEYING (APRIL 2000 - AUGUST 2002)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

CARTER AND BURGESS BROWNSVILLE (SEPTEMBER 1997 - APRIL 2000)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

RESTITUTO A. ASCANO III, R.P.L.S.

Title

Registered Professional Land Surveyor (RPLS)
Graduate Engineer

Years of Experience

46 years

Education

Mapua Institute of Technology
Bachelor's in Civil Engineering
Manila, Philippines

Areas of Expertise

- Boundary Resolution & Title Analysis
- Right-of-Way Mapping & Parcel Acquisition for TxDOT and Local Projects
- ALTA/NSPS Surveys for Commercial and Mixed-Use Developments
- Preparation of Easements & Legal Descriptions for Utility and Drainage Infrastructure
- Oversight of Topographic & Control Surveys for Site Development
- Coordination with Municipalities, Counties, Drainage Districts & Utility Providers
- Survey Project Management, QA/QC & Professional Certification

TEAM MEMBERS QUALIFICATIONS AND EXPERIENCE

Summary:

Mr. Ascano is a Registered Professional Land Surveyor with over 40 years of experience providing surveying services in support of public infrastructure and private land development projects. His experience includes subdivision platting, boundary resolution, right-of-way mapping, and preparation of metes and bounds descriptions in accordance with applicable local, state, and agency requirements. He has extensive experience working in coordination with municipalities, utility providers, and regulatory agencies to support timely project delivery.

Professional Experience:

J.A. Garza & Associates – Project Manager (2012–2014)

- Prepared subdivision plats and survey deliverables for development projects
- Performed boundary analysis, survey control verification, and data processing
- Conducted title research and evaluated easements affecting property development
- Prepared metes and bounds descriptions for plats, easements, and ROW documents

Aranda & Associates – Project Manager / Team Leader (2000–2010)

- Managed survey teams supporting land development and public infrastructure projects
- Coordinated preparation of plats, boundary surveys, and mapping deliverables
- Conducted comprehensive research of deeds, plats, and title records
- Processed field survey data and ensured accuracy of final mapping products
- Prepared legal descriptions and survey reports in accordance with project requirements. Maintained project schedules and ensured timely delivery of survey services

LMS Resources – GIS Technician (2010–2011)

- Converted AutoCAD survey files into GIS databases for infrastructure mapping
- Developed pipeline and mapping datasets using survey and historical data
- Supported integration of survey data into GIS systems for client and municipal use

Bakal De Pamplona - Buisness Owner - Manila Philippines (1997–1995)

- Managed daily business operations, including budgeting, procurement, and personnel oversight
- Coordinated supply logistics and vendor relationships to ensure timely delivery of materials
- Developed organizational and financial management skills applicable to project planning and resource allocation
- Strengthened leadership, decision-making, and client service capabilities

RRJ Construction – Project Engineer (1981–1990)

- Managed project schedules, coordinated construction activities, and resolved field issues to maintain project timelines
- Coordinated with clients, contractors, and multidisciplinary teams to align project objectives
- Developed project specifications and contributed to continuous improvement efforts to optimize efficiency and reduce costs

JC Arches Home Development – Draftsman (1978–1980)

- Prepared detailed engineering drawings based on design specifications and client requirements
- Coordinated preparation of as-built drawings to reflect accurate field conditions
- Interpreted design details and translated them into precise drafting deliverables
- Developed quantity take-offs and bills of materials to support construction and procurement

JUANITO T. MEDRANO

Title
Graduate Engineer

Years of Experience
44 years

Education

University of Nueva Caceres
Naga City, Philippines (1979-1982)
Bachelor's in Civil Engineering

Areas of Expertise

- Survey Data Processing & Analysis
- Easement Documentation & Legal Descriptions
- Topographic Surface Development
- Right-of-Way Mapping & Parcel Exhibits
- AutoCAD Civil 3D Drafting & Design

Summary:

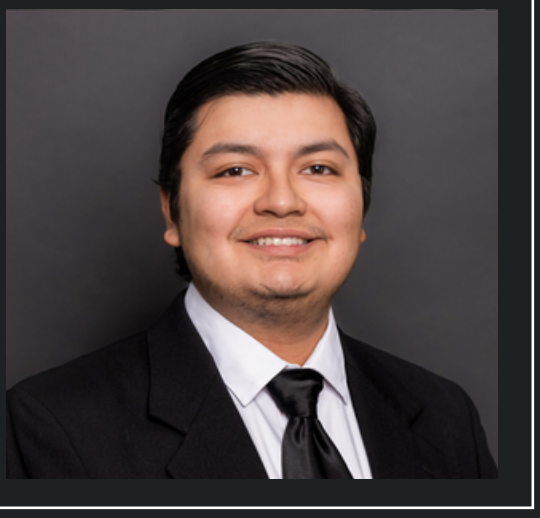
Mr. Medrano is a Graduate Engineer and Surveying Technician with over 40 years of experience supporting land surveying, right-of-way mapping, and infrastructure projects. His background includes drafting, field coordination, boundary research, and survey data processing for both public and private developments. He has extensive experience supporting subdivision and roadway projects through preparation of survey exhibits, right-of-way mapping, and coordination between field and office operations. Mr. Medrano brings a high level of accuracy, efficiency, and reliability to projects.

Professional Experience:

S2 Engineering PLLC – Graduate Engineer / Surveying Technician (June 2023 – Present)

- Prepares drafting exhibits for surveying and right-of-way mapping
- Supports development of survey base maps and project deliverables
- Assists with coordination between field data collection and office production

Aranda & Associates – Land Surveyor / Draftsman (November 1999 – December 2017)



- Supervised staff involved in data collection for survey projects
- Conducted research of parent tracts and adjoining property ownership
- Processed and analyzed field survey data to produce survey plats and mapping exhibits
- Supported preparation of boundary surveys and land development documents

Nesma & Al Fadl Contracting Co. Ltd – Civil Engineer / Site Engineer (May 1992 – May 1994)

- Supervised construction of residential and roadway infrastructure projects
- Oversaw field activities to ensure compliance with plans and specifications
- Coordinated construction efforts for large-scale infrastructure developments

Technical Proficiency

- AutoCAD
- Civil 3D
- Microstation
- Microsoft Office 55+ WPM

LUIS ROBERTO MARTÍNEZ IBARRA, S.I.T.

Title
Graduate Engineer / Surveyor in Training

Years of Experience
6 years

Education
The University of Texas Rio Grande Valley, Edinburg, TX Bachelor of Science in Civil Engineering

Areas of Expertise

- Survey Data Processing & Analysis
- Easement Documentation & Legal Descriptions
- Topographic Surface Development
- Right-of-Way Mapping & Parcel Exhibits
- AutoCAD Civil 3D Drafting & Design
- Coordination with Field Survey & Engineering Teams
- Quality Control of Survey Deliverables

Summary:

Mr. Martinez is a Surveyor-in-Training (S.I.T.) with six years of experience supporting surveying and engineering projects across the Rio Grande Valley. He plays a key role in both field and office operations, specializing in survey data processing, analysis, and the preparation of accurate deliverables to support land development and infrastructure projects. His experience includes easement documentation, legal descriptions, right-of-way mapping, and the preparation of parcel exhibits, as well as drafting survey products using AutoCAD Civil 3D. Mr. Martinez regularly coordinates with field crews and engineering teams to ensure data accuracy and project efficiency, while maintaining quality control standards for survey deliverables. His combined technical knowledge and attention to detail make him an integral part of the project team from data collection through final deliverables.

Professional Experience:

Professional Experience:

S2 Engineering, PLLC – Graduate Engineer / Surveyor-in-Training (2020–Present)

- Assisted in the preparation of subdivision plats and land development plans
- Supported drainage and utility layout design for residential subdivisions
- Prepared drafting and design documents using AutoCAD Civil 3D
- Assisted in the development of drainage reports and supporting calculations
- Coordinated with municipalities and utility providers for project approvals
- Supported preparation of right-of-way exhibits and mapping deliverables

Additional Experience (Engineering & Survey Support):

- Assisted with preparation of construction plans and design details
- Supported project coordination and document preparation for submittals
- Contributed to quality control of engineering and survey deliverables

Technical Proficiency

- AutoCAD
- Civil 3D
- Microstation
- Microsoft Office 55+ WPM

ALEX IVAN SALDIVAR SALAZAR

Title
Graduate Engineer

Years of Experience
26 years

Education

Technological Institute of Ciudad Victoria, Mexico
Bachelor's in Civil Engineering

Areas of Expertise

- Topographic Surface Developmement & Mapping
- Survey Data Integration & Plan Coordination
- Topographic Collector
- AutoCAD Civil 3D Design & Plan Production
- Utility Infrastructure Layouts
- Stormwater Design Analysis & Design
- Subdivision Planning Design

Summary:

Mr. Saldivar is a Graduate Engineer with over 26 years of experience supporting municipal infrastructure, land development, and surveying-related projects. His background includes preparation of engineering plans, topographic mapping, subdivision planning, and field data collection using GPS technologies. He has extensive experience working with municipal agencies on public works projects, including roadway, drainage, and utility infrastructure. Mr. Saldivar brings strong technical expertise and practical field experience to support project delivery.

Professional Experience:

S2 Engineering PLLC – Graduate Engineer (June 2025 – Present)

- Assists in preparation of subdivision construction plans and design documents
- Supports construction staking, survey analysis, and plat preparation
- Coordinates with project teams to support timely project delivery
- Assists with project management and technical documentation

Project Engineer / Survey Support (Independent & Recent Work) (2022 – 2025)

- Prepares engineering plans and supports measurement of urban and rural properties using GPS
- Assists in development of municipal, federal, and state project documentation
- Supports plan preparation, cost estimating, and technical reporting

Presidencia Municipal de Jiménez, Tamaulipas – Public Works Department (2005 – 2021) Sub Director / Supervisor / Auxiliary Roles

- Prepared engineering plans for municipal, state, and federal infrastructure projects
- Supervised construction activities, including roadway and public works improvements
- Developed cost estimates, budgets, and technical project documentation
- Prepared construction plans, reports, and project schedules
- Conducted field measurements and data collection using GPS equipment
- Coordinated project execution with municipal leadership and stakeholders

Los Fresnos Construction (USA) – General Support (2008)

- Assisted with preparation of plans and supervision of construction activities
- Supported field operations and coordination of construction crews

Additional Experience

- Technical Assistant – Supported engineering-related tasks and documentation
- Private Sector Roles – Experience in administration, project coordination, and operations

Technical Proficiency

- AutoCAD
- Civil 3D

JESUS ALEJANDRO RODRIGUEZ SALDIVAR

Title
Graduate Engineer

Years of Experience
13 years

Education

Technological Institute of Ciudad Victoria, Mexico
Bachelor's in Civil Engineering

Areas of Expertise

- Topographic Surface Developmement & Mapping
- Survey Data Integration & Plan Coordination
- AutoCAD Civil 3D Design & Plan Production
- Utility Infrastructure Layouts
- Stormwater Design Analysis & Design
- Subdivision Planning Design

Summary:

Mr. Rodriguez is a Graduate Engineer with 10 years of experience supporting land development, surveying, and construction-related projects. His background includes preparation of subdivision construction plans, survey data analysis, and topographic reporting. He has experience working on both public and private sector projects, including property assessments, boundary documentation, and field coordination. Mr. Rodriguez brings strong technical capabilities and adaptability to support project delivery.

Professional Experience:

S2 Engineering PLLC – Graduate Engineer (October 2024 – Present)
- Assists in preparation of subdivision construction plans and design documents
- Supports construction staking, survey analysis, and plat preparation
- Coordinates with project teams to support timely project delivery
- Assists with project management and technical documentation

Office of the Attorney General, State of Tamaulipas – Expert Witness (October 2018 – April 2024)
- Prepared appraisal reports for damages to real estate and personal property
- Developed topographic reports for land boundaries, encroachments, and disputes
- Provided technical analysis related to property conditions and land use

Secretary of Communications and Transport – Construction Resident Assistant (April 2014 – June 2018)
- Assisted in preparation of reports related to property damages and land conditions
- Supported development of topographic and boundary-related documentation
- Coordinated with field teams and project stakeholders

Municipality of Santander Jiménez – Assistant to Director of Rural Development and Tourism (April 2013 – June 2014)
- Supported project management activities including field coordination and data entry
- Assisted in planning and administrative tasks for public sector projects

Technical Proficiency
- AutoCAD
- Civil 3D
- DJI (Drone Operations)
- Microsoft Office Suite

ALEXIS JAZMIN RODRIGUEZ

Title
Graduate Engineer

Years of Experience
6 years

Education
The University of Texas Rio Grande Valley, Edinburg, TX Bachelor of Science in Civil Engineering

Areas of Expertise

- Topographic Surface Developmement & Mapping
- Survey Data Integration & Plan Coordination
- AutoCAD Civil 3D Design & Plan Production
- Utility Infrastructure Layouts
- Stormwater Design Analysis & Design
- Subdivision Planning Design

Summary:

Ms. Rodriguez has experience in land surveying, subdivision development, and public infrastructure projects throughout Hidalgo County and surrounding jurisdictions. Her background includes preparation of subdivision plats, base maps, and survey-supported design documents, as well as processing and integration of field survey data for land development projects.
She has experience working with right-of-way mapping, utility coordination, and development permitting processes, ensuring projects comply with applicable municipal, county, and TxDOT requirements. Ms. Rodriguez experience provides her with a strong understanding of local subdivision requirements, ETJ regulations, and approval processes, allowing her to effectively support surveying services from data collection through final plat approval.

Professional Experience

Hidalgo County Planning Department – Project Coordination / Leadership Role (February 2025 – March 2026)

- Oversaw development review processes including subdivision plats, site plans, and permitting
- Coordinated with multiple departments, agencies, and utility providers
- Ensured compliance with county regulations, development standards, and platting requirements
- Assisted in managing planning operations and supporting departmental decision-making
- Reviewed development applications for completeness and regulatory compliance

L&G Engineering – Graduate Engineer (August 2022 – Fenruary 2025)

- Designed and drafted drainage improvement projects for Hidalgo County Drainage District No. 1 (HCDD1)
- Prepared full PS&E plan sets including plan/profile sheets, drainage layouts, and earthwork quantities
- Developed 3D corridor models and performed quantity calculations
- Coordinated with irrigation districts and utility providers
- Assisted in preparation of cost estimates and bid documents

S&B Infrastructure (RRP Consulting Engineers) – Civil Structural Designer II (October 2020 – July 2022)

- Supported roadway design and stormwater projects under TxDOT and local government standards
- Prepared PS&E components including plan/profile sheets, traffic control plans, and SW3P layouts
- Developed typical sections, signage and striping layouts, and sequencing plans
- Assisted in developing cost estimates, schedules, and bid documents
- Ensured compliance with TxDOT Roadway Design Manual

Certifications

- TxDOT Local Government Project Procedures Qualification
- TxDOT ROW100 – Identifying and Managing Utility Conflicts
- ArcGIS Pro – Map Creation Certification

Technical Proficiency

- AutoCAD Civil 3D
- MicroStation
- OpenRoads
- GeoPAK
- ArcGIS Pro

MICHAEL ALEXANDER PALOMO

Title
Survey Party Chief

Years of Experience
6 years

Areas of Expertise

- Survey field work
- Topographic collector
- Data Collector Software

Summary:

Mr. Palomo has six years of experience in surveying, supporting a variety of land development and infrastructure projects throughout the Rio Grande Valley. He serves as a Survey Party Chief, where he is responsible for leading field crews, coordinating daily survey operations, and ensuring the accurate collection of topographic and boundary data. His experience includes working on subdivision developments, right-of-way surveys, and general field data collection to support engineering design. Mr. Palomo is proficient in the use of GPS equipment and data collection software, and plays a key role in maintaining data accuracy, efficiency in the field, and effective coordination with project teams.

Professional Experience:

S2 Engineering, PLLC – Survey Party Chief

- Responsible for overseeing survey field operations managing survey crews
- Coordination of data collection
- Leads the acquisition of precise field data to support engineering design, subdivision development, and right-of-way mapping projects.

Hidalgo County Drainage District, Engineering Department

- Survey Crew Member
- Performed topographic data collection in support of drainage and infrastructure improvement projects
- Assisted in the acquisition of accurate field data for engineering analysis and design.

Technical Proficiency

- Trimble R12i
- Trimble R10
- Conventional Level
- Trimble Total Station Management
- Digital Level

ANDRES CIENEGA

Title
Survey PartyChief

Years of Experience
3 years

Areas of Expertise

- Survey field work
- Topographic collector
- Data Collector Software

Summary:

Mr. Cienega serves as a Survey Party Chief with over three years of progressive experience supporting public and private sector surveying projects throughout Hidalgo County. He has a strong background in field operations, specializing in the collection of high-quality topographic and boundary data to support engineering design, drainage improvements, and subdivision development.

Professional Experience:

S2 Engineering, PLLC – Survey Party Chief

- Responsible for overseeing survey field operations managing survey crews
- Coordination of data collection
- Leads the acquisition of precise field data to support engineering design, subdivision development, and right-of-way mapping projects.

Technical Proficiency

- Trimble R12i
- Trimble R10
- Conventional Level
- Trimble Total Station Management
- Digital Level

Re: **Request for Qualifications - Land Surveying Services, RFQ 2026-6**

Greetings Mr. Hinojosa,

SAMES, Inc. (SAMES) is pleased to submit our Statement of Qualifications in response to the City of Edinburg's (City) Request for Qualifications for Professional Land Surveying Services. We appreciate the opportunity to be considered and are genuinely interested in partnering with the City to support its current and future initiatives. Our team is committed to delivering accurate, reliable, and timely surveying services that contribute to the successful planning, design, and construction of the City's projects.

Included in this submission are our firm's qualifications and experience, project team, representative surveying projects, and references demonstrating our successful performance on local government projects. While SAMES provides comprehensive surveying services in support of civil engineering, land development, and construction projects, our Survey Department is fully staffed and operates independently, providing standalone professional surveying services to private, commercial, municipal, state, and federal clients throughout Texas.

For more than 18 years, SAMES has successfully delivered professional surveying services on a wide range of projects across both the public and private sectors. Our experience, technical expertise, and commitment to quality enable us to provide responsive, professional, and cost-effective services. We are confident in our ability to meet the City's expectations and are committed to providing the level of service, communication, and responsiveness necessary to successfully perform the requested surveying services.

I, Samuel D. Maldonado, PE, RPLS, Principal/CEO, will serve as the primary point of contact for all correspondence related to this RFQ. My contact information is provided below:

Samuel D. Maldonado, PE, RPLS - Principal / CEO
4943 S. Jackson Road, Edinburg, Texas 78539
Office: (956) 702-8880 Fax: (956) 702-8883 Mobile: (956) 207-7130
sam@samengineering-surveying.com

To date, we have not received any addenda related to this RFQ. As one of the firm's two principals, I have the authority to submit this Statement of Qualifications and contractually bind SAMES, Inc.

Thank you for your time and consideration. We appreciate the opportunity to be considered for this important work and would welcome the opportunity to discuss our qualifications in greater detail. We look forward to the possibility of serving the City of Edinburg and establishing a successful long-term partnership.

Respectfully,

Samuel D. Maldonado, P.E., R.P.L.S.
Principal / CEO

FIRM QUALIFICATIONS AND EXPERIENCE

As a locally owned and operated firm headquartered in Edinburg, SAMES is pleased to offer the City of Edinburg comprehensive Professional Land Surveying Services tailored to support the City's current and future infrastructure initiatives. We are committed to delivering accurate, timely, and cost-effective surveying services that help facilitate successful project planning, design, construction, and long-term asset management. Our team combines extensive technical expertise with responsive client service to consistently deliver high-quality surveying solutions that meet the City's needs.

Established in 2008 by brothers Samuel and Saul Maldonado, SAMES is a minority-owned engineering and surveying firm founded on the mission: *"To empower leadership that promotes excellence through teamwork, accountability, and integrity while providing quality professional engineering, construction, and surveying services."* For more than 18 years, we have provided responsive professional services throughout Texas, including Civil Engineering Design, Professional Land Surveying, Land Development, GIS mapping, and Construction Engineering Inspection (CEI).

SAMES is registered and in good standing with the Texas Board of Professional Engineers and Land Surveyors and meets all applicable local, county, and state licensing and insurance requirements. We are also a Small Disadvantaged HUBZone firm certified by the U.S. Small Business Administration and are pre-certified with the Texas Department of Transportation (TxDOT) to provide surveying and engineering-related services for state- and federally funded projects.

Our Survey Department is fully staffed and supported by an experienced drafting team, enabling us to efficiently deliver a full range of surveying services. Over the past 18 years, SAMES has successfully completed surveying projects for agencies including the Texas Department of Transportation (TxDOT), Hidalgo County Regional Mobility Authority, Hidalgo County Drainage District No. 1, the U.S. Department of Energy, the U.S. Department of Defense (U.S. Navy and U.S. Army), the U.S. Fish and Wildlife Service, and numerous municipalities and local government entities throughout South Texas.

The Survey Department is led by Registered Professional Land Surveyor Samuel (Sam) D. Maldonado, who has more than 18 years of professional surveying experience and will serve as Project Manager for the City of Edinburg's surveying projects. All services will be provided from SAMES' office located at 4943 S. Jackson Road in Edinburg, Texas, allowing our team to respond quickly and efficiently to the City's surveying needs.

Surveying Capabilities

SAMES brings extensive experience and a systematic, client-focused approach to land surveying. We are committed to applying project-specific methodologies that ensure the successful execution of City of Edinburg's surveying assignments. Our team is equipped to provide a comprehensive range of services, including but not limited to:

- **Boundary & Property Surveys** – Delivering accurate delineation of land ownership and parcel boundaries to support legal and planning needs.
- **Construction Staking for Infrastructure Improvements** – Ensuring precision layout and implementation of construction plans for roads, drainage systems, and other improvements.

- **Drainage Infrastructure Surveys** – Providing essential survey data to support effective stormwater management, flood control, and drainage design.
- **FEMA Elevation Certificates & Floodplain Mapping** – Assisting the City in meeting federal floodplain regulations and insurance documentation requirements.
- **Right-of-Way Mapping & Easement Acquisition Support** – Facilitating land acquisition processes for roadway expansions and public utility developments.
- **Topographic Surveys** – Offering high-accuracy elevation data to inform engineering design for roadway grading, drainage improvements, and utility planning.
- **ALTA/NSPS Land Title Surveys** – Producing legally defensible surveys for property transfers, development, and financing.
- **Utility Mapping** – Identifying existing utility infrastructure to aid in effective coordination during design and construction.
- **Aerial Mapping & Drone Surveys** – Utilizing UAV technology for efficient, high-resolution site assessments over large areas.

Our surveying crews utilize GPS (global positioning systems) equipment capable of sub-centimeter measurement accuracy, Robotic Total Stations, level instruments and electronic data collectors capable of recording data using codes specific to each client's deliverable needs.

SAMES is a member of the Real Time Kinematic (RTK) network which eliminates the need to establish a local GPS base receiver and radio when utilizing GPS within the RTK network. Additionally, our survey and CAD technicians use Trimble Geomatics Business Center software which facilitates the downloading process of all surveying point data and allows our drafting technicians to translate surveying data into highly accurate and reliable drawing documents.

Project Approach and Strategy

SAMES' project approach is founded on the understanding that accurate survey data is essential to successful project delivery. From project initiation through final deliverables, our team emphasizes proactive planning, early coordination, clear communication, and rigorous quality control to produce reliable survey information that supports engineering design, minimizes risk, reduces costly redesigns, and keeps projects on schedule.

Step 1: Understanding Governing Performance Standards

The SAMES Project Manager will direct all surveying activities to ensure compliance with applicable industry standards, funding agency requirements, and project specifications. Through established surveying procedures, rigorous quality control, proactive oversight, and adherence to safety protocols, our team will deliver accurate, complete, and reliable survey data that supports informed decision-making throughout the project. SAMES will also comply with all applicable state laws governing access to public property and related liability requirements, ensuring survey operations are performed safely, professionally, and with minimal disruption to the public.

Step 2: Understanding Roles & Responsibilities

For each assignment, the Project Manager will be responsible for scope management, overall project coordination, and communication with the City. Field crews and technical staff will be assigned based on

the project's scope, schedule, and resource requirements to ensure efficient execution. Acting as an extension of the City's staff, the project team will maintain open communication and provide proactive project oversight throughout the assignment. Regular progress meetings with the City and other project stakeholders will be conducted, as needed, to review project status, resolve issues requiring collaborative action, and monitor the completion of action items.

Step 3: Understanding Scope of Work

For each work authorization, the Project Manager (PM) will review the scope of work and provide a cost estimate within the timeframe specified by the City. Upon execution of the work authorization, the PM will conduct a project kick-off meeting to define team roles and responsibilities, review the project schedule, establish key milestones, and discuss project-specific requirements. Safety will be a primary focus of the meeting to ensure potential job hazards are identified, evaluated, and addressed before any fieldwork begins. Throughout the project, quality control measures will ensure that all survey data, calculations, mapping, and deliverables comply with the City's requirements, applicable surveying standards, and all regulatory requirements associated with the project's funding source.

Step 4: Technical Execution

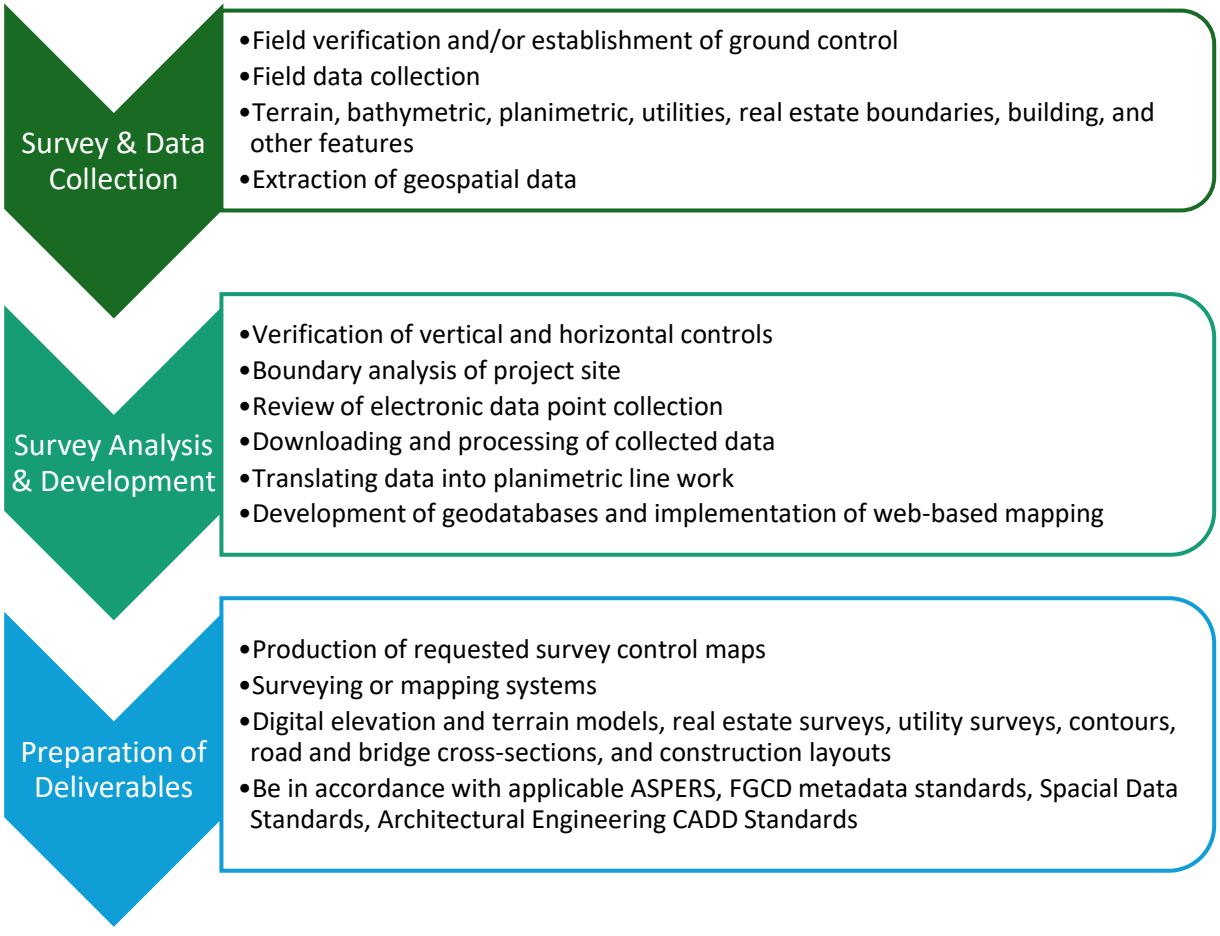
Project Scheduling – Successful projects are schedule-driven, and SAMES recognizes effective schedule management as a key component of project execution. At the City's request, a project schedule will be developed identifying key milestones, deliverables, and critical activities to monitor progress and maintain timely project completion.

Data Collection – Field data will be collected to obtain comprehensive horizontal and vertical measurements necessary to accurately establish property boundaries, right-of-way limits, terrain features, and other project-specific information. The Party Chief will oversee all field activities to ensure work is performed safely, efficiently, and in accordance with project requirements while maintaining the accuracy and completeness of all survey data. This disciplined approach supports timely project delivery without compromising quality.

Each survey assignment will begin with the establishment or verification of project control points, including primary and, when necessary, secondary control points to validate survey accuracy. All control will be referenced to the NAD83 (North American Datum 1983) and NAVD88 (North American Vertical Datum 1988) coordinate systems to ensure consistency throughout the project.

Data Processing & Quality Control – Following field collection, survey data will undergo detailed processing, including research of right-of-way records, property ownership, and adjoining parcel conveyance histories. This information will be evaluated alongside recovered field monumentation to accurately reconstruct original survey alignments and establish legal boundaries.

The Project Manager will oversee quality control throughout data processing to verify that all calculations, mapping, and survey information meet project requirements for accuracy, completeness, and compliance with applicable surveying standards before deliverables are finalized.



Deliverables – Survey deliverables will be prepared in accordance with the City's requirements and formatted for seamless integration into AutoCAD or MicroStation ORD design files. When requested, signed and sealed PDF copies will also be provided.

To maintain consistency and minimize rework, SAMES will utilize detailed internal quality control checklists throughout the project. Interim deliverables will be submitted, as identified in the scope of work, to verify progress, facilitate City review, and ensure all project requirements are satisfied in accordance with the established schedule.

Technical Systematic Approach

SAMES approaches every project with a team philosophy and a full commitment to efficient project delivery. Work on a typical survey begins immediately upon receipt of a signed work/task order. Our workflow is divided into three distinct phases to ensure accuracy and efficiency:

- **Survey & Data Collection** – Utilizing state-of-the-art GPS, LiDAR, and total stations to gather accurate geospatial data.
- **Survey Analysis & Development** – Processing data, drafting deliverables, and ensuring compliance with regulatory standards.
- **Preparation of Deliverables** – Producing maps, reports, and legal descriptions in formats compatible with the city's requirements.

Commitment to Quality

SAMES is committed to delivering highly accurate and legally defensible survey data that meets rigorous and industry best standards. To do this, we have created a structured Quality Assurance/Quality Control program that ensures compliance with local, state, and federal regulations while maintaining the highest level of precision in surveying.

We apply a multi-tiered quality control approach that includes:

- **Pre-Survey Planning** – Identifying project-specific risks and regulatory requirements.
- **Real-Time Field Data Verification** – Utilizing advanced GNSS, LiDAR, and drone technology for sub-centimeter accuracy.
- **Data Validation & Error Detection** – Cross-checking field data with GIS benchmarks to eliminate inconsistencies.
- **Final Review by RPLS & Project Manager** – Ensuring all deliverables meet required specifications before submission.

Deliverable Quality Control Process

- **Pre-Submission Review** – Verify data consistency between field collection, CAD drawings, and GIS records.
- **Legal Description & Map Check –** Ensure boundary accuracy and compliance.
- **Compliance Cross-Check –** Confirm all survey deliverables meet industry best practice standards and requirements.
- **Final Approval by RPLS –** Guarantee a fully validated, compliant, and ready-to-use product.

Contingency Plan for Key Personnel Availability

SAMES has a proactive contingency plan to ensure uninterrupted service delivery to address staffing needs should key personnel become unavailable.

1. **Cross-Training & Role Redundancy** – Each critical role has a designated backup staff member trained to step in as needed. Our survey managers, field crews, and CAD technicians are cross trained to ensure continuity.
2. **Scalable Staffing & Resource Allocation** – We maintain a flexible workforce with additional licensed surveyors and field teams on standby, ensuring smooth personnel transitions without project delays.
3. **Rapid Response & Remote Collaboration** – Cloud-based project management systems allow seamless access to plans and data, enabling any assigned team member to continue work without disruption.
4. **Subcontractor & Partner Support** – If additional resources are needed, pre-qualified subcontractors are available to supplement our in-house team, ensuring compliance with all standards.

Through this structured contingency plan, SAMES guarantees that the City's projects will stay on schedule, despite any unforeseen personnel changes.

Local Government Survey Experience

SAMES' experience, qualifications, and commitment to responsive, high-quality service have enabled us to successfully complete numerous surveying projects for municipalities, counties, utility districts, and private and commercial clients. The projects listed below represent a selection of our most notable surveying assignments completed within the past five years.

- ***City of Edinburg*** *– Schematic Right-of-Way Acquisition Strip Map of Davis Road (I-69C to East City Limits); Schematic Right-of-Way Acquisition Strip Map of Schunior Road (Jackson Road to West City Limits); Topographic Surveying for Luna Subdivision Drainage Project; Parcel Plat Services for Union Pacific Railroad Company; Topographic Surveying for Intersection of Mark Pena Dr. and Closner Blvd; Parcel Plats and Title Reports for Schunior Road Detention Pond Project; Topographic Survey for 10" Sanitary Sewer on Rogers Road; Right-of-Way Map for Roel E Bazan Road.*
- ***City of Edinburg EDC*** *- Boundary Survey for Cano Street Project; Replat of Lot 3 of the North Industrial Park.*
- ***City of McAllen*** *– Topographic Surveying Services for Balboa Waterline Improvements; Topographic Survey for Country Club Terrace Drainage Improvements; Topographic Surveying services for McAllen ISD No. 6 Lot 1, Morris Park; Topographic Surveying for N. 6th Street & W. Hackberry Avenue Signal Improvements; Surveying Services for 2021 Metro Sidewalk Improvements; Surveying Services for Waterline Alignment at Bicentennial & Kendlewood Ave.; Tract Map w/ Metes & Bounds for Abandonment of Ally (16th & Beech Ave.); Surveying services for 2nd Street and La Vista Avenue; Planimetric and Topographic Surveying Services for FM 2220 Pedestrian Crossing at Houston Avenue.*
- ***City of San Juan*** *– Boundary Survey with Improvements for Old Firehouse and Old City Hall; San Juan CDBG Street Improvements.*
- ***City of Palmview*** *- Parcel Plats with Metes and Bounds for Riverside Estates Drainage Improvements; Topographic Surveying Services for Ramirez Drainage Improvements Project.*
- ***City of La Grulla*** *- Surveying Services for La Grulla Cemetery.*
- ***City of Brownsville*** *– Topographic and Boundary Surveying for TxDOT Bridge Expansion (Owens Road Parcel Acquisition); Surveying Services for Southmost Nature Trail Phase III,*
- ***City of Weslaco EDC*** *– Surveying Services for Force Main Easement and ALTA Survey for Mid-Valley International Industrial Park.*
- ***City of Rio Grande City*** *– Survey Plat with Metes & Bounds for Drainage Easement #1 and #2 for Rio Grande City Public Safety Development; Boundary Survey with Improvements for Youthplex Subdivision Lot 3 and Eisenhower Road; Surveying Services for Reynaldo Pena Commercial Subdivision; Right-of-Way Survey for Hill County Drive.*
- ***City of Roma*** *- Boundary Survey for Las Americas Logistics and Industrial Park.*
- ***Hidalgo County*** *– Surveying Services for Bio Safety Testing Laboratory.*
- ***Hidalgo County Pct. 3*** *- Surveying Services for Extension of Shary Road 2 Miles North of SH 107; Shary Road Expansion Parcel 10 Staking; Boundary Survey with Improvements for Homeville Association A Lot 75.*
- ***Hidalgo County Pct. 4*** *- Abandonment Survey for Cesar Chavez Road.*

- ***Hidalgo County Drainage District No. 1*** *– Surveying Services along Waterways for 2018 Bond Referendum Projects #12 and #13; Surveying Services for B-18-26 Mission Lateral (16 Parcels).*
- ***Hidalgo County Regional Mobility Authority (HCRMA)*** *- Surveying Services for HCRMA X-Parcels.*
- ***Agua Special Utility District*** *- Topographic Surveying Services for Jasmin Street Waterline Extension; Surveying services for Veteran's Blvd. Utility Relocation Project; Boundary with Improvement Survey for N/W Expressway 83 & 1/4 Mile North; Topographic Survey of Breyfogle from Donna Road to E Veterans 1.*

SAMES has established long-standing relationships with municipalities and public agencies throughout South Texas, resulting in repeat business and multiple ongoing contracts for professional land surveying services, including:

- **Texas Gas Service** – On-Call Surveying services
- **Hidalgo County Drainage District No. 1** –Surveying Services
- **Hidalgo County** – Surveying Services
- **Hidalgo County Pct. 4** – On-Call Surveying Services
- **City of McAllen** – On-Call Surveying Services
- **City of Edinburg** – Professional Land Surveying Services

Ability to Meet Deadlines and Aggressive Schedules

SAMES understands that timely survey deliverables are essential to maintaining project schedules and supporting subsequent phases of design and construction. Our Surveying Department utilizes efficient project management processes that enable the successful execution of multiple assignments while consistently meeting client deadlines. From contract initiation through final deliverables, project schedules are actively monitored, field crews are strategically assigned based on workload and project priorities, and resources are adjusted as needed to maintain production and respond to changing project demands.

Continuous communication between field and office personnel allows our team to quickly address unforeseen site conditions, weather impacts, or other challenges without compromising project schedules or data quality. Regular project coordination meetings and close collaboration among Project Managers provide the flexibility to reallocate personnel and resources as workloads fluctuate, ensuring critical milestones and client deadlines remain on track.

This proactive approach to project planning, resource management, and communication enables SAMES to efficiently manage multiple projects simultaneously while delivering accurate, high-quality surveying services on schedule.

Local, State and Federal Regulations, Policies and Procedures

SAMES approaches each project with a thorough understanding of the surveying standards, regulations, and client requirements applicable to local, state, and federally funded projects. During project initiation, our team identifies the specific surveying criteria, deliverables, and regulatory requirements necessary to ensure compliance and prevent delays. Our experience coordinating with multiple public agencies has

provided us with a comprehensive understanding of the standards and procedures governing public-sector surveying projects.

As applicable to the project scope, SAMES performs surveying services in accordance with:

- Texas Board of Professional Engineers and Land Surveyors (TBPELS) Rules and Regulations
- Texas Society of Professional Surveyors (TSPS) Manual of Practice
- TxDOT Surveying and Right-of-Way Mapping Standards
- FEMA Elevation Certificate and Floodplain Mapping Guidelines

In addition, SAMES follows established field procedures and quality control protocols to ensure the accuracy, consistency, and reliability of all survey data and deliverables.

Uniqueness to Best Perform

SAMES recognizes that successful surveying projects require more than accurate data collection—they require a team that understands how survey information supports the planning, design, and construction process. As a locally based firm with extensive experience serving the City of Edinburg and surrounding communities, SAMES brings valuable regional knowledge, familiarity with local conditions, and an understanding of the factors that influence successful project delivery.

A key advantage of SAMES is our fully staffed, in-house Surveying and Drafting Department, supported by a strong foundation in civil engineering services. This integrated approach allows our survey professionals, technicians, and engineers to collaborate seamlessly throughout the project lifecycle, ensuring survey data is collected, processed, and delivered with the intended design application in mind. Our understanding of roadway design, utility infrastructure, drainage systems, land development, and construction practices provides additional technical insight that enhances the accuracy, completeness, and usefulness of our survey deliverables.

SAMES is committed to providing the City of Edinburg with responsive, accessible, and personalized service. Our office, located on Jackson Road within the City of Edinburg, allows our team to quickly respond to project needs, access project sites, and coordinate directly with City staff and project stakeholders. Combined with our local knowledge, multidisciplinary capabilities, and dedicated surveying resources, SAMES is uniquely positioned to provide reliable, efficient, and cost-effective surveying services tailored to the City's needs.

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

SAMES will provide land surveying services that comply with all applicable requirements and adhere to current industry standards. The team will be led by Registered Professional Land Surveyor Samuel D. Maldonado, with support from Jessica M. Maldonado, Vice President of Professional Services and Surveyor-in-Training. Sam will serve as the Project Manager and primary point of contact for City of Edinburg. Resumes for both Sam and Jessica outlining their qualifications, project experience and professional backgrounds relevant to this contract are provided below.

Resumes

SAMUEL D. MALDONADO, PE, RPLS

Role: Project Manager

Education:

- M.B.A., University of Texas – Rio Grande Valley (2017)
- B.S., Civil Engineering, Texas A&M University - Kingsville (1997)

Registrations/Certifications:

- Professional Engineer, Texas: No. 91889
- Professional Engineer, Arizona: No. 71257
- Professional Engineer, New Mexico: No. 30412
- Registered Professional Land Surveyor, Texas: No. 6027

SAMUEL D. MALDONADO, PE, RPLS is a Licensed Professional Engineer and Registered Professional Land Surveyor with more than 18 years of professional land surveying experience and over 28 years of experience in civil engineering and project management. Throughout his career, he has provided surveying services for a diverse range of projects, including subdivisions, commercial and institutional developments, roadway improvements, drainage systems, sanitary sewer collection systems, and water distribution systems. Sam oversees major surveying assignments involving topographic and boundary surveys, utility and right-of-way mapping, aerial mapping, design and construction surveying, and the establishment of horizontal and vertical control. He also performs ALTA/NSPS Land Title Surveys in accordance with the current Minimum Standard Detail Requirements.

Pre-certified with the Texas Department of Transportation (TxDOT), Sam serves as the Project Surveyor of Record for state- and federally funded projects, ensuring compliance with applicable standards and client requirements. He is an active member of the Texas Society of Professional Surveyors and remains current with advancements in surveying technology, equipment, and software.

Project Experience:

Hidalgo County Shary Road Expansion (2 Miles North of SH107) Phase I – Mission, Texas

- Oversaw Phase I project delivery for the expansion of Shary Road from a two-lane to a five-lane urban arterial, ensuring compliance with TxDOT, FHWA, and Hidalgo County standards.
- Managed schematic design development, environmental clearance, ROW acquisition, and funding coordination across multiple agencies.
- Led topographic surveying, ROW parcel plat preparation, and traffic control assessments, including line-of-sight analysis for off-system intersections.
- Coordinated public involvement, stakeholder meetings, and development of the Advance Funding Agreement (AFA) to support project funding.
- Ensured all submittals met federal and state requirements, enabling progression to PS&E development and construction readiness.

HCRMA Parcels for the International Bridge Trade Corridor – Hidalgo County, Texas

- Conducted real property surveying, monument benchmark establishment, and staking for over 100 parcels along the approved schematic roadway alignment in Hidalgo County.
- Supported land acquisition for roadway improvements, and irrigation system reroutes.
- Established primary and secondary survey control points

- Conducted research and data collection, for preparation of the original survey control report.
- Prepared TXDOT-specific survey control deliverables
- Performed setting of control monuments, and establishment of benchmarks

Ware Road Utility Relocation Project, TxDOT CSJ: 2094-01-038 Roadway Expansion – McAllen, Texas

- Provided engineering design of proposed 6”-16” waterline relocation, abandonment of existing waterlines, sanitary sewer line and manhole adjustments for the expansion of 2 miles of roadway.
- Provided topographical surveying, aerial surveying, and right-of-way mapping services.
- Established project controls based on TxDOT project benchmarks and surveyed all-natural ground, existing utilities, existing infrastructure, manholes, roadway, curbs, storm sewer system, property corners/boundaries, monuments and benchmarks.

Port of Brownville SH 48 Utility Corridor Boundary Survey – Brownsville, Texas

- Provided boundary surveying services for a 7.5-mile easement corridor along State Highway 48, the contract was later amended to include an additional 1.5 miles to the scope of work.
- Survey included control panels for aerial flight, the setting of control monuments and iron rods, and a descriptive exhibit of the metes and bounds for the project area.
- Coordinated with existing utility companies, the Port of Brownsville and TxDOT during performance of the surveys.

New Hidalgo County Courthouse – Edinburg, Texas

- Provided surveying services specific to the construction staking of utilities, drainage and site infrastructure.
- Provided project benchmarks, established construction staking of building corners, building piers, water and sewer lines, storm drain lines and other utility improvements.
- Surveying services were provided in multiple phases to allow for minimum disturbance to ongoing construction work.

Edinburg Hospital ALTA Survey – Edinburg, Texas

- Provided topographic surveying services and subsurface utility locates of the 40-acre site to provide accurate field date for the proposed design of a new hospital tower.
- Topographic survey included existing site parking lots, sidewalks, curb and gutter, building, landscaping, HVAC systems, irrigation systems, island, building canopies, drainage ditch flowlines and natural ground elevations.
- Coordinated with private utility providers, hospital engineering department and city utility departments to obtain the most accurate utility field information.

Final Design for Marathon WWCS Rehabilitation Project – Marathon, Texas

- Performed field surveying for over 12,000 LF of proposed sanitary sewer alignment, collecting detailed site condition data.
- Established horizontal control using Texas State Plane coordinates and generated 0.5-foot contour coverage.
- Identified property corners, limits of the right-of-way, easements, tract corners and section corners and set project benchmarks.
- Prepared and delivered a digital (CAD) and hard copy of the parcel plats with metes and bounds and plan view sheets of the collected date to the extents of the project limits.

Role: Contract Administrator

Education:

- M.B.A., University of Texas at Rio Grande Valley (2018)
- B.S., Civil Engineering, Texas A&M University – College Station (2005)

Registrations/Certifications:

- Professional Engineer, Texas No. 111579
- Project Management Professional, Texas No. 2077158
- Certified Floodplain Manager, Texas No. 3995-21N
- Surveyor-in-Training, Texas No. 110912

JESSICA M. MALDONADO, PE, PMP, CFM, SIT brings 20 years of experience in municipal civil engineering, public works construction, and the administration of multidisciplinary infrastructure projects. Her background includes civil design, site surveying, land development, and utility system design and coordination for water, wastewater, and storm drainage improvements. This technical foundation enables her to effectively administer contracts, coordinate project activities, and ensure compliance with contract requirements throughout project delivery.

Jessica has extensive experience administering local, state, and federally funded infrastructure projects, ensuring compliance with contract provisions, funding agency requirements, and applicable regulations. She has successfully managed more than 16 projects funded through the Texas General Land Office (GLO), overseeing the preparation and submission of required documentation, reimbursement packages, progress reports, and other contract deliverables in accordance with program requirements. Jessica's experience also includes coordination with the Federal Emergency Management Agency (FEMA), the Federal Highway Administration (FHWA) on TxDOT and local government projects, and the U.S. Environmental Protection Agency (EPA) on infrastructure improvements funded through economic development programs. Her background in civil engineering, contract administration, and surveying—combined with her certification as a Surveyor-in-Training—enables Jessica to effectively bridge the technical and administrative aspects of surveying projects, providing valuable support in project coordination, quality assurance, regulatory compliance, and contract administration throughout every phase of the City's surveying projects.

Project Experience:

HCRMA Surveying Services for the International Bridge Trade Corridor 0010 - Hidalgo County, Texas

- Provided project management services for the topographic surveying and right-of-way mapping of FM 493 in Donna, Texas, which included appx. 105 parcel plats with metes and bounds descriptions.

TxDOT CapEx AWU Standalone (I-35 & Dean Keeton St.) – Austin District, TX

- Provided utility engineering services QLA for the collection and analysis of subsurface utility data using non-destructive vacuum excavation.
- Coordinated with utility owners to verify utility locations.
- Supported coordination with involved entities to ensure all work was properly permitted.
- Ensured traffic control measures complied with applicable state and federal requirements.

2018 Bond Referendum Project No. 13 – Hidalgo Drain – McAllen, Texas

- Served as Contract Administrator, overseeing project coordination and contract administration.
- Provided engineering design services for the upgrade of existing culvert structures and widening of an existing drainage ditch to increase linear detention and improve stormwater conveyance to the IBWC Floodway.
- Performed hydrologic and hydraulic analyses and coordinated surveying to support project design**.**

Veterans Road (SH 495) Utility Relocation Project - Palmview, Texas

- Oversaw the design and relocation of municipal water and sewer infrastructure in conflict with TxDOT's proposed four-lane roadway and storm sewer improvements, including the development of utility plans in accordance with TxDOT standards.
- Directed utility coordination among telecommunications, gas, irrigation, electric, and municipal utility providers, while supporting preparation of joint-bid packages, special specifications, and utility agreement documentation to resolve conflicts and ensure project constructability.

Sam Houston Boulevard Widening, TxDOT CSJ: 0921-02-256 – Pharr, Texas

- Provided design management for the roadway and drainage improvements, as well as the adjustment of waterline and sanitary sewer lines.
- Completed the environmental study for TxDOT funding regulations.
- Provided utility coordination and construction oversight for the relocation of existing utilities.

Hidalgo County BCAP Fresno Street Roadway & Drainage Improvements – San Juan, Texas

- Provided engineering design, contract administration and construction management for this road and drainage improvement project funded by TxDOT's Border Colonia Access Program.
- Prepared required forms and reports and ensured compliance with TxDOT program regulations.
- Oversaw the survey and CAD departments, providing direction and management when needed.

Loyola Beach Water Quality Improvements Project – Effluent Reroute – Riviera, Texas

- Managed the planning, engineering design, surveying, environmental clearance, and utility coordination for the rerouting of the Riviera Wastewater Treatment Plant effluent line to improve water quality and support coastal conservation and restoration.
- Directed the design and construction of a new 150 GPM effluent pump station and approximately 10,000 LF of force main to convey treated effluent to a new outfall location.
- Oversaw bid procurement, construction management, and project close-out, ensuring compliance with project requirements and successful project delivery.

TxGLO 2015 Floods Grant Stormwater Relief Project Ph. II – Alamo & Edinburg, Texas

- Provided project management services for the survey, design and installation of a new storm sewer system that included drainage swales, roadside ditches, inlets, and pipe networks ultimately flowing into an existing drainage ditch owned by Hidalgo County Drainage District #1.
- Prepared and submitted grant application and obtained all required permits.
- Coordinated with the GLO and County to ensure funding and schedule compliance during design and construction.

FEMA Roadway Reconstruction Project – Hidalgo County, Texas

- Oversaw surveying, design and construction of road and drainage improvements to various streets.
- Provided contract administration and coordinated with the County to ensure FEMA funding compliance.

Representative Survey Projects

Schematic Right-of-Way Acquisition Strip Map of Davis Road (I69C to East City Limits) and Schunior Road (Jackson to West City Limits) - Edinburg, TX

Client: City of Edinburg
Roberto D. Hernandez, PE, CFM, MS (formerly w/ City of Edinburg, currently serves as City Engineer for City of Harlingen)
415 W. University Drive, Edinburg, TX 78539
P: (956) 216-5223 E: RHernandez@harlingentx.gov

A/E Fee: $26,745

Start date: 03/30/2022 End date: 10/31/2022

SAMES was contracted by the City of Edinburg to provide land surveying and Right-of-Way (ROW) mapping services in support of a major drainage improvement project. The scope of work included preparation of schematic ROW acquisition strip maps for Schunior Road (2.73 miles) and Davis Road (1.75 miles). SAMES' survey team conducted comprehensive research and data collection using Hidalgo County and City maps, as well as Appraisal District property records, to develop accurate ROW exhibit maps. Aerial surveying was employed to capture existing structures, while fieldwork established minor control points to support the project. Final deliverables included maps depicting existing and proposed ROW, proposed parcel divisions, and all visible structures within the project limits.

Planimetric and Topographic Surveying Services for City of McAllen FM 2220 (Ware Road) Pedestrian Crossing at Houston Avenue – McAllen, TX

Client: RRP Consulting Engineers
Abel Marroquin, PE, Project Manager
5400 N. 10th Street, McAllen, TX 78504
P: (956) 926-5000 E: amarroquin@rrpeng.com

A/E Fee: $39,684.45

Start date: 05/22/2024 End date: 08/30/2024

SAMES was subcontracted by RRP Consulting Engineers to provide planimetric and topographic surveying services for approximately 2,000 linear feet along Ware Road, from Kennedy Avenue to Erie Avenue, extending 100 feet beyond both the east and west rights-of-way (ROW). The scope of work included identifying existing ROW within the survey limits; collecting roadway cross-sections at 100-foot intervals; 811 utility locates and locating trees (6-inch caliper and above), drainage and irrigation structures, and visible utilities, ditches, and other features within the ROW. The survey was performed using the Texas State Plane Coordinate System (NAD 83) and NAVD 88 for vertical control to ensure precision. Final deliverables included DGN files with topography, digital terrain models (DTM), and planimetric features.

Veterans Blvd. (SH 495) Utility Relocation Project – Palmview, TX

Client: Agua Special Utility District
Roberto Salinas, PE, General Manager
3120 Abram Road, Palmview, TX 78572
P: (956) 585-2459 E: robertos@aguasud.com

Construction: $6,069,333.92 (OPCC)

Start date: 08/19/2024 End date: In progress (design 100% complete)

The Veterans Blvd (SH 495) Utility Relocation Project, extending from Mile 3 to Mile 5, required the relocation of AGUA Special Utility District water and sewer infrastructure to accommodate TxDOT's roadway widening and storm drain improvements. SAMES provided surveying services to support utility relocation design, TxDOT plan set approvals, and Standard Utility Agreement requirements.

Our survey team performed boundary and topographic surveys to document existing right-of-way conditions, utility locations, easements, and apparent undocumented easements while establishing alignments for approximately 13,000 LF of waterline and 8,000 LF of sewer line relocations. The survey data supported utility relocation plans, property documentation research, and design coordination by providing accurate utility mapping, depth verification, and integration with TxDOT's roadway expansion improvements. In addition to surveying services, SAMES provided utility coordination, design support, traffic control phasing, and construction cost estimating. The project has reached 100% design completion and is scheduled for letting in 2026.

2023 Bond Program Project 12: Mission-McAllen Lateral Drain, Phase 3 – McAllen, TX

Client: Hidalgo County Drainage District No. 1
Omar Anzalduas, PE, Project Manager
902 N. Doolittle Road, Edinburg, Texas 78542
P: (956) 292-7080 E: omar.anzaldua@hcdd1.org

Construction: $1,062,868

Start date: 09/2024 End date: 08/2025

This project involved approximately 1.5 miles of drainage ditch expansion within the City of McAllen to enhance stormwater capacity, reduce flooding, and support future development. SAMES provided a full range of professional services, including preliminary coordination with utility entities, preparation of construction documents and specifications, and construction administration for ditch excavation, storm system lines, and concrete stormwater conveyance structures ("Canastas"). Surveying services played a key role throughout project delivery. Our team performed boundary and topographic surveys to establish existing conditions, define project limits, and support right-of-way delineation. Survey data was integrated into the design to guide hydraulic modeling, utility coordination, and property acquisition. During construction, our surveying staff also provided verification and support for staking to ensure the project was built in accordance with design intent.

City of McAllen Topographic Surveying Services for Balboa Waterline Improvements

Client: City of McAllen
Carlos Gonzalez, PE, Utility Engineer
1300 Houston, McAllen, TX 78501
P: (956) 681-1770 E: cagonzalez@mcallen.net

A/E Fee: $6,526.40

Start date: 04/20/2023 End date: 04/30/2023

SAMES was contracted by the City of McAllen to provide topographic surveying services for the Balboa Waterline Improvements Project. The scope of work included topographic surveying of two project corridors along South 33rd Street, extending from the August–Balboa and Balboa–Covina alleys west to the levee right-of-way. Survey services included the collection of all existing aboveground and underground features within the apparent right-of-way, including roadways, sidewalks, fences, utilities,

and the establishment of a minimum of one project benchmark. All surveying was performed using the Texas State Plane Coordinate System (NAD83) and NAVD88 to ensure a precise and consistent project reference framework. Final deliverables included CADD files, electronic survey data, and field notes.

Taylor Road Widening - Mission, TX

Client: TEDSI Infrastructure Group
Ponciano Longoria, PE, Project Manager
1201 E. IH 2, Mission, TX 78572
P: (956) 424-7898 E: Ponciano.longoria@tedsi.com

A/E Fee: $78,360

Start date: 11/01/2022 End date: 04/28/2023

This project involved extensive research and coordination with multiple agencies to develop a topographic map supporting utility relocation design and Right-of-Way (ROW) determination along a two-mile segment of Taylor Road. Sam Maldonado directed deed research, boundary monumentation, and the collection of existing underground utility information to accurately establish ROW limits. Subsurface Utility Engineering (SUE) Levels A through D were performed, incorporating survey data obtained through Tx811 utility locates. The scope of work included preparation of a topographic map depicting existing ground features, structures, utilities, and ROW information; establishment of horizontal and vertical control in accordance with TxDOT specifications; development of ROW strip maps; and verification of existing utilities and easements throughout the project corridor. Sam also managed project scheduling, quality control, coordination, and documentation to ensure the timely delivery of accurate project information.

Topographical Surveying and GPRS Services for UHS Cornerstone Regional Medical Center Expansion - Edinburg, TX

Client: Gresham, Smith & Partners
Michael D. Hunkler, Project Manager
222 Second Avenue South, Suite 1400, Nashville, TN 37201
P: (615) 770-8156 E: Mike.Hunkler@greshamsmith.com

A/E Fee: $8,649.18

Start date: 05/03/2023 End date: 05/31/2023

SAMES was contracted by Universal Health Services (UHS) to provide professional topographic surveying and Ground Penetrating Radar System (GPRS) services for the Cornerstone Regional Medical Center site located on a 4.45-acre tract in Edinburg, Texas. The scope of work included locating visible utilities, private underground utilities, and significant site features, including trees, sidewalks, ADA ramps, curbs, parking areas, roadways, and existing structures. SAMES developed a digital topographic map with one-foot contour intervals and provided critical spot elevations, established two project benchmarks, and performed Subsurface Utility Engineering (SUE) services using GPRS technology to identify private utilities. Survey deliverables were prepared in CAD and PDF formats utilizing the NAD83 (ADJ2011) horizontal datum and NAVD88 Geoid 12B vertical datum and were signed and sealed by a Texas Registered Professional Land Surveyor.

Projects for City of Edinburg

Projects	Project Description	Project Manager	Completed	City POC
Chapin Pump Station Rehabilitation	Topographic surveying, environmental and civil engineering services for removal and replacement of two pumps, SCADA system, backup power system, and associated improvements	Luis Mendez	In progress (92% complete)	Mardoqueo Hinojosa, City Engineer

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

COMPANY PROVIDING PROPOSAL GENERAL QUESTIONNAIRE

1 Name/Name of Agency/Company: SAMES, Inc.
(Full, correct legal name)

- Address: 4943 S. Jackson Rd., Edinburg, TX 78539
- Telephone/Fax: 956-702-8880
- Email address: Sam@samengineering-surveying.com

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?
Yes____ No✓

3. Is your Company authorized and/or licensed to do business in Texas? Yes✓ No____

4. Where is the Company's corporate headquarters located? Edinburg, TX

5. a. Does the Company have an office located in Edinburg, Texas? Yes✓ No____

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office? _____ (years) 4 (months)

c. State the number of full-time employees at the Edinburg office. 24

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity? Yes____ No✓

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. _____

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Samuel D. Maldonado
Address: 4943 S. Jackson Rd., Edinburg, TX 78539
Telephone: 956-702-8880
Fax: _____
Email: Sam@samengineering-surveying.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (✓).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture._____

9. Bankruptcy Information

   Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (✓)
   If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets. _____

10. Provide any other names under which your business has operated within the last 10 years.
    Sam Engineering and Surveying

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One (YES) NO

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One (YES) NO

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

LITIGATION DISCLOSURE

SAMES, Inc. has been named in five (5) litigation matters during the past ten (10) years. Four (4) of these matters have been resolved, and one (1) remains pending.

1.County Drainage Project
The first matter involved a county drainage project in which a property owner opposed the county's stormwater drainage design adjacent to the owner's property. The case was resolved, and SAMES, Inc. was not found liable or at fault.

2. Municipal Construction Project
The second matter involved litigation filed by a city against the contractor of record for alleged construction deficiencies. SAMES, Inc. served as the engineer of record and, as is common in construction litigation, was named as a party to the lawsuit. The matter has since been resolved, and SAMES, Inc. was not found liable or at fault.

3. Hidalgo County Litigation
The third matter involved multiple parties, including the contractor of record, the project owner, and all project consultants, including SAMES, Inc. The Court granted the Motion to Dismiss on September 9, 2024, and SAMES, Inc. was dismissed from the case.

Cause No. C-4866-21-L
464th Judicial District Court, Hidalgo County, Texas

Raul A. Macias and Erika Castillo, Individually and as Surviving Parents of Armando Lee Castillo, Deceased
v.
Noelia Trevino and Gerardo Garcia, as Surviving Parents of Garett Guy Garcia (Deceased); Texas Cordia Construction, LLC; County of Hidalgo; SAMES, Inc.; L & G Engineering Laboratory, LLC; and Precision Scheduling Consultants, LLC.

4. Storm Sewer Project
The fourth matter involved a storm sewer project in which a property owner challenged the municipal and engineering design of a stormwater detention pond located behind the owner's property. The litigation has since been resolved.

Civil Action No. 7:23-cv-276
United States District Court for the Southern District of Texas

Edward Dominguez
v.
City of Edinburg; SAMES, Inc.; Castle Enterprises, LLC; and Gonzalez Enterprises, LLC.

5. Brownsville Cannery Public Market Project (Pending)
The fifth matter involves the Brownsville Cannery Public Market construction project. SAMES, Inc. is currently involved in litigation with the City of Brownsville following the City's termination of the construction contract. SAMES, Inc. disputes the allegations and is actively pursuing its contractual rights through the legal process. This matter remains pending, and no final judgment has been entered.

SAMES, Inc. has never initiated litigation or requested arbitration against a client in connection with any of its projects.

HOUSE BILL 89 VERIFICATION

I, Samuel D. Maldonado, the undersigned representative of

SAMES, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

SAMES, Inc.

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

N/A

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

REQUEST FOR QUALIFICATIONS - LAND SURVEYING SERVICES

#RFQ 2026-6

CITY OF EDINBURG

JULY 14, 2026 / 3:00 PM

SCHEIBE CONSULTING
ENGINEERS | SURVEYORS

July 7, 2026

City of Edinburg
Purchasing Department
415 W. University Drive
Edinburg, TX 78541

RE: REQUEST FOR QUALIFICATIONS – LAND SURVEYING SERVICES

Dear Selection Committee:

Scheibe Consulting, LLC appreciates the opportunity to submit our Statement of Qualifications (SOQ) for **RFQ 2026-6 – Professional Land Surveying Services for City of Edinburg**. Our firm is a federally registered as a Small Business comprised of industry experts in civil engineering, H&H modeling, roadway design, utility design, construction management, land surveying, and drainage design. We are well-versed in the City's local infrastructure and platting requirements, having provided engineering and surveying services throughout the surrounding area for over 20 years, and our staff maintain close working relationships with local entities that allow for ease of coordination on City projects.

As a Texas-based firm with offices in Austin and Harlingen, our team has a proven track record of delivering practical, innovative solutions tailored to the unique needs of Texas communities, and we are committed to providing high-quality services that align with the City of Edinburg's goals and standards. Scheibe Consulting and all professional staff assigned to this engagement are properly licensed or registered to practice in the State of Texas and remain in good standing with the Texas Board of Professional Engineers and Land Surveyors (TBPELS).

Our enclosed SOQ is organized exactly as requested in the RFQ and includes our firm's qualifications and experience, including recent and relevant land surveying projects, key personnel resumes and an organization chart, firm capability and past experience, references, and all required forms and disclosures.

Luis Vargas is an officer of the firm and is authorized to bind Scheibe Consulting, LLC to contract. All addendums issued in connection with this RFQ have been acknowledged and have been fully considered in the preparation of this submittal.

Sincerely,

Scheibe Consulting, LLC

Luis Vargas, PE, CFM
Principal Engineer

FIRM QUALIFICATIONS

SCHEIBE CONSULTING LLC

Management and Staffing – Scheibe Consulting is a full-service Civil Engineering, Water Resources, and **Land Surveying** firm with offices in Austin and Harlingen, TX. Should the need arise, we have a total staff of 37 professionals, allowing for additional bench depth beyond that shown in the following Organizational Chart. The following is an organizational chart illustrating our overall team structure, followed by a description of each service category.

Organizational Chart
Note: All shown are full-time employees

FIRM OFFICE LOCATIONS

1 – Scheibe Consulting, LLC (608 E. Harrison Ave, Harlingen, TX, 78550) - **Office where work will be performed**
2- Scheibe Consulting, LLC (11612 Bee Caves Rd., Bldg. 1, Ste. 240, Austin, TX 78738)
3- Scheibe Consulting, LLC (715 Discovery Blvd, Ste. 311, Cedar Park, TX 78613)

FIRM HISTORY AND SIZE

Founded in 2011, Scheibe Consulting has built a strong reputation for successfully delivering complex public infrastructure projects. The firm has grown strategically to support client demand while preserving a collaborative, client-focused culture.

The firm currently employs approximately 37 professionals across multiple disciplines, including:

- **Professional Engineers and Engineers in Training:** 7 PEs, 10 EITs
- **Professional Land Surveyors and Surveying Chiefs/Technicians:** 2 RPLSs, 3 Crew Chiefs, 4 Surveying Techs
- **Project Managers, Staff Engineers/AutoCAD Drafters:** 2 PMs, 5 Staff Engineers/AutoCAD Drafters
- **Billing Department, Marketing and Office Administration:** 1 CFO, 1 Marketing Specialist, 2 Administrative Assistants

This staffing structure provides the depth necessary to manage concurrent projects while ensuring dedicated resources remain available for each assignment.

FIRM EXPERIENCE & HISTORY PERFORMING LAND SURVEYING SERVICES

From its inception, Scheibe Consulting has specialized in land surveying services, along with other services such as general civil design, floodplain management, and hydrologic and hydraulic (H&H) modeling. Over the years, the firm has expanded its capabilities to include water/wastewater infrastructure, transportation improvements, trail system projects, permitting and grant administration. The firm has extensive experience with federally funded projects, TWDB grant applications, and grant management. Scheibe's surveyors have successfully completed numerous projects throughout the South Texas region.

Over the past two years, Scheibe Consulting has built a consistent track record of delivering land surveying services on time for governmental agencies throughout the region, including municipalities such as Harlingen and Brownsville. Across these engagements, the firm has met project deadlines while maintaining technical accuracy and regulatory compliance, demonstrating a reliable ability to manage overlapping public-sector workloads without sacrificing quality or schedule adherence. This history of responsive, on-time delivery reflects the firm's operational discipline and its understanding of the unique procedural and reporting demands that come with working alongside city and county governments.

The firm is known for its collaborative approach, technical accuracy, and proactive communication, consistently producing high-quality deliverables that withstand rigorous regulatory review. By leveraging strong relationships with local partners, subconsultants, and stakeholders, Scheibe Consulting ensures projects are delivered on time, within budget, and with lasting value to the communities we serve.

Scheibe Consulting affirms our full availability and commitment to support the City of Edinburg on all assigned projects. Our firm's principal(s) and assigned professionals will dedicate the necessary staff and resources to ensure timely and high-quality delivery of services. We have the capacity to accommodate the City's project schedule while maintaining our ongoing workload commitments. Our team is also committed to reevaluating active workload capacity as project needs are identified.

Through this commitment, Scheibe Consulting ensures that the City of Edinburg will have a responsive, accessible, and accountable partner to deliver engineering services that meet or exceed expectations.

FIRM'S UNIQUENESS TO PERFORM

Our unique qualifications include:

- **Surveying and Mapping Capabilities** – In-house Registered Professional Land Surveyors (RPLS) and field crews equipped with GPS, LiDAR, and drone-based technologies to support design and construction.
- **Civil and Utility Design** – Delivery of transportation, trail system, water distribution, wastewater collection, and stormwater infrastructure projects, incorporating sustainable and cost-effective design approaches. Expertise includes complex trail system design/concepts, roadway design, water and wastewater mains, lift stations, force main design, pump stations, drainage design, and dry utility relocation/conversions.
- **Flood Risk and Water Resources Expertise** – Extensive experience in hydrologic and hydraulic (H&H) modeling, detention pond design and analysis, FEMA Risk MAP/BLE studies, dam safety evaluations, FEMA CLOMR/LOMR applications, 2D H&H modeling, drainage master planning, and floodplain management solutions that enhance community resilience and protect infrastructure.
- **Water / Wastewater Design** – Scheibe brings extensive experience in water and wastewater design services, including water distribution, treatment, wastewater collection and treatment.
- **Stakeholder and Community Engagement** – Demonstrated ability to communicate technical concepts clearly and build consensus among stakeholders through public meetings and workshops.
- **Proven Local Knowledge** – Our team has a strong presence in South Texas and a history of successfully delivering projects for nearby municipalities, counties, drainage districts and irrigation districts, ensuring familiarity with local conditions, regulations, and community priorities.

We are fully committed to supporting the City of Edinburg under this contract and view this opportunity as a continuation of our mission: to provide **practical, high-quality engineering solutions that strengthen infrastructure and improve the quality of life of communities.**

APPROACH

Scheibe Consulting's Harlingen office will serve as the primary point of service for the City of Edinburg, given its proximity to the project area and established familiarity with regional infrastructure and permitting requirements. Our Austin office will provide additional technical support and specialized resources as needed, ensuring the City has access to the full depth of the firm's expertise regardless of assignment size.

For smaller assignments or tasks with limited or intermittent scope, Scheibe Consulting utilizes a flexible staffing approach that draws on our broader team of engineers, surveyors, and technical staff across both offices. Rather than assigning dedicated full-time personnel to every task order, our project manager evaluates each assignment's scope and timeline to determine the most efficient staffing plan, which may include part-time allocation of senior staff for technical oversight paired with junior or support staff for day-to-day execution.

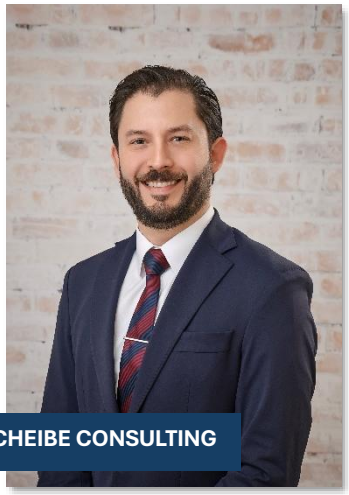
This approach allows the firm to remain responsive and cost-effective on smaller projects while ensuring the City continues to receive the same level of quality control and technical accuracy applied to larger engagements.

KEY STAFF MEMBER'S EXPERIENCE

Luis Vargas, PE, CFM - Project Manager

Mr. Luis Vargas, P.E., C.F.M. (16 years of experience) will act as Project Manager (PM) and will be the primary point of contact between the City of Edinburg and the overall consultant team. Mr. Vargas will be responsible for project tracking, updates, project schedule, and all coordination. Mr. Vargas will work closely with city staff and any consultants to ensure a high-quality product and service is provided. Mr. Vargas will assist with monthly progress reports to ensure a high quality of service is being provided. Mr. Vargas has extensive experience managing large multi-disciplinary teams in the execution of complex projects and has an intimate knowledge of the local drainage and infrastructure issues.

FIELD SURVEY TEAM



The Field Survey Team will be led by Mr. Juan Garcia, RPLS, who brings 40+ years of experience in land surveying services throughout Central Texas. Mr. Garcia will manage all data collection activities, ROW surveys, boundary surveys, design surveys, and construction surveys. Mr. Garcia is supported by three field crews with state of the art GPS and traditional survey equipment.

QUALITY ASSURANCE / QUALITY CONTROL TEAM

The Scheibe Team is committed to a solid set of Quality Assurance (QA) and Quality Control (QC) processes. Scheibe Consulting typically develops a Quality Management Plan (QMP) at the beginning of each project, for review by the owner and/or project stakeholders. This QMP will establish dates for QA/QC reviews, document staff members responsible for these reviews, and will be aligned with the overall project schedule. In addition, all QC reviews will be conducted prior to any deliverable being submitted to the owner/stakeholder group. Daily QC checks will be made by senior staff, overseeing junior staff activities, and a 10%, 50%, and 90% QA review will be conducted by the QA/QC manager. The actual QA/QC manager will likely check from task to task, and this individual (by task) can be included in the QMP for review. Mr. Eric Scheibe, PE will be the QA/QC Lead and will ensure quality control reviews are completed prior to each key milestone. Each review will include formal review comments and responses. These formal internal reviews can be made available to the City of Edinburg upon request.

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

SCHEIBE CONSULTING LLC

LUIS VARGAS, PE, CFM

PROJECT MANAGER

Mr. Vargas is a bilingual licensed engineer with a bachelor's degree in mechanical engineering and over a decade of public sector experience managing complex infrastructure projects across South Texas. He has led multidisciplinary teams and overseen major initiatives in water, wastewater, stormwater drainage, solid waste, and public facilities. As City Engineer for Harlingen (2022–2025), he directed the Engineering Department, delivering multimillion-dollar projects funded by the American Rescue Plan Act of 2021, FEMA grant programs, and locally funded initiatives, while also serving as the City's Floodplain Administrator. Previously, he held progressively senior roles in the City of Corpus Christi, leading A/E contract negotiations, supervising water and wastewater facility operations and managing ID/IQ contracts valued at $50 million. He also served as a project manager in the Engineering Services Department, overseeing a broad portfolio of public infrastructure improvements including utilities, streets, buildings/facilities, drainage and solid waste projects. His technical and leadership credentials are supported by certifications as a Professional Engineer, Certified Floodplain Manager, Qualified Windstorm Inspector, and Certified Public Manager. As of July 2025, he is with SCHEIBE Consulting, LLC.

Pickens Ave. and Davis St. Stormwater System Improvements, Harlingen, TX - PM for the City of Harlingen for the design and construction phases. The project included upsizing the stormwater system of the subdivisions in Pickens Ave., Davis St., Matz Ave., McFetridge St., and N BUS 77 with new reinforced box culverts, pipes, inlets, gutters, utility adjustments, pavement and ROW restorations. Mr. Vargas also collaborated with the city's grant writer and Special Projects Dpt. staff to fund future phases for drainage improvements for this area, including a proposed 6-acre detention pond East of the mentioned streets.

Lozano Street Detention Pond, Harlingen, TX - PM for the City of Harlingen during the H&H analysis, design and construction phases. The project consisted of the construction of a 14-acre detention pond, with a pilot channel and other drainage appurtenances to mitigate flooding in the northwest area of the city. The pond was built by the city's Public Works construction crew. Mr. Vargas led the construction efforts of the pond and started the next phase of improvements, which includes a new stormwater trunkline on Wichita Avenue and more drainage improvements along Eye St. and Fairpark Blvd. This last phase is currently being designed by the city's Engineering Department.

5th St. and 7th St. Stormwater System Improvements, Harlingen, TX - PM for City of Harlingen for the H&H analysis and design phase and collaborated with the city's grant writer and Special Projects Dpt. staff to fund the construction phase with a Pre-Disaster Mitigation Grant from TDEM. Mr. Vargas also assigned a PM with the city's Engineering Department and oversaw the bid phase, construction contract execution and the coordination with TDEM prior to construction commencement. This project will improve the drainage system in 5th St. and 7th St. from Commerce St. to Polk Ave. and Van Buren Ave. Future drainage improvements are planned for this sub-watershed, with its boundaries being redefined in the city's new flood study/drainage master plan incorporating one of the city's main corridors, Commerce Street, as the main stormwater collector with a new trunkline towards the Arroyo Colorado.

Arroyo Vista Ct. and New Hampshire Ave. Stormwater System Improvements, Harlingen, TX - Engineer of record for the design and construction phases. This project addressed localized flooding at the intersection of New Hampshire Ave and Arroyo Vista Ct and was included in the city's Street Improvement Program Project of 2024. The project included new grate inlets, underground piping, new valley gutters, curb and gutter, new ADA ramps and full pavement restorations.

ERIC SCHEIBE, PE, CFM

QA/QC TEAM LEAD

Mr. Scheibe founded Scheibe Consulting, LLC in 2011. Prior to Scheibe Consulting, LLC, Mr. Scheibe work for Halff Associates, Inc. and the US Army Corps of Engineers, Galveston District. Mr. Scheibe has design experience on federal, state, county, city and private projects throughout the State of Texas and in California. His design experience includes general civil design, water resources, streambank stabilization, coastal engineering, site development, water/wastewater design, dam design, sediment analysis, environmental site assessments, and watershed modeling. Mr. Scheibe has obtained formal training in the use of HEC-HMS, HEC-RAS, HEC-RAS unsteady flow, SWAT, HEC-SSP, SMS (USACE multi-dimensional hydrodynamic modeling software), and USACE Wetland Delineation Techniques. He has hands on experience with the HEC-RAS (steady, unsteady, 2D), HEC-HMS, HEC-SSP, HEC-FDA, ArcGIS, Global Mapper, HEC-GeoHMS, HEC-GeoRAS, PC-SWMM, SMS, StormCAD, and Microstation.

YEARS EXPERIENCE
24 Years

PROFESSIONAL REGISTRATIONS
Texas Professional Engineer No. 98357

Certified Floodplain Manager No. 1244-07N

SH 195 Roadway Improvement Project, Williamson County, TX – PM for the drainage design, WPAP, detention/water quality design, permitting, and construction phase services related to this roadway improvement project in Williamson County, TX.

Wilco Way Roadway Improvement Project, Williamson County, TX – PM for the drainage design, water quality design, WPAP, permitting, and surveying services for this roadway extension project for Williamson County, TX.

City of Georgetown Drainage Master Plan, Georgetown, TX (TWDB FPP) – Project Manager for TWDB Flood Protection Planning Grant funded study that includes Berry Ck., Middle Fork Ck., Pecan Branch,
Mankins Branch, and Smith Branch. Services include QA/QC, H&H modeling, GIS, alternative analysis, and FEMA LOMR Submittals for all watersheds.

Valley Ditch Drainage Improvement Master Plan, Killeen, TX – PM for development of a DMP focused on the Valley Ditch watershed in downtown Killeen, TX. Project included new 1D RAS and HMS modeling of this watershed, coordination with Ft. Hood US Army Depot and City of Killeen, and identification of a comprehensive flood reduction project for this watershed.

Blanco Gardens Neighborhood Reconstruction Project, San Marcos, TX (CDBG-DR) – PM for City of San Marcos neighborhood reconstruction project. Project includes 8,200 LF stormsewer, 300 LF water main, 3,000 LF wastewater, 4,000 LF electric duct bank, full-depth roadway reconstruction, regional diversion channel, streambank stabilization, and complex environmental permitting. Project is funded by CDBG-DR funds. Services include full PS&E, construction phase services, land acquisition/easement assistance, public meetings, environmental permitting, and HUD coordination.

Gilleland Creek Risk Map and H&H Modeling/Mapping Study, Austin, TX – PM for this restudy of Gilleland Creek watershed in Austin, TX. This project includes new H&H modeling to Atlas 14, development of new FEMA floodplain maps, uploads to the MIP, and development of new Risk Map Products.

Cypress Creek Dam Master Plan, Kendall Co., TX – PM for development of a new H&H study of Cypress Creek watershed located in Kerr and Kendall Co., TX. Project resulted in the identification of 1 regional dam site to reduce flood risk to Comfort, TX.

JUAN GARCIA, RPLS

SURVEYING TEAM LEAD

Mr. Garcia has been employed by Scheibe Consulting, LLC since May 2024 when JNH Surveying was acquired. He has forty-four years of experience with land surveying including boundary surveying, topographic surveying, ALTA surveying, title surveys, and construction staking projects as well as construction layout for buildings, subdivisions, roadways, curb/gutter, pipelines, and precise leveling. Mr. Garcia has some of the oldest survey records in Cameron Co., with original documents dating back to the early 1900's. Mr. Garcia's benchmark database is equally impressive resulting in reduced records search and more efficient boundary surveys for the local community.

Combes Lateral, CCDD5, Combes, TX – Survey Lead for the collection of existing utilities and surface improvements along Hwy 77 (TxDOT) ROW. Survey was used for the design of culvert improvements under Hwy 77, channel improvements east of Hwy 77, and stormsewer improvements through the town of Combes.

CCDD3 FIF Study, San Benito, TX – Survey Lead for the collection of bridge and culvert data used in the H&H models for this project. Survey included ROE, private crossings, and all survey was collected to FEMA data capture standards.

San Benito FMA Project, San Benito, TX – Survey Lead for the collection of all existing stormsewer throughout the City of San Benito. Project included traffic control, surface improvement surveys, record research, inlet surveys, flowline surveys, and pipe size measurements. Data was used for the development of an InfoWorks ICM model of the entire City stormsewer network, ultimately used for the development of a City-wide Drainage Master Plan.

Miscellaneous Title, Boundary, Topo Surveys, Cameron Co., TX – Survey Lead for title, boundary, and topographic surveys throughout Cameron County for over 40 years. Services include quick turnaround surveys, ALTA surveys, record research, expert witness services, City Limit metes/bounds, topographic surveys, and construction staking surveys.

Murphy Lateral Diversion Project, Primera, TX – Survey Lead for the boundary survey and topographic survey related to a new diversion channel connecting Murphy Lateral and S. Fork Lateral channels, upgradient of the UPRR crossing. Services include ROE, ROW delineation, ROW surveys, and coordination with property owners.

Penn. Ave. Lateral Diversion Project, San Benito, TX – Survey Lead for the boundary survey and topographic survey related to a new diversion channel connecting the Penn. Ave. Drain to an adjacent major drain, upgradient of San Benito, TX. Services include ROE, ROW delineation, ROW surveys, and coordination with property owners.

ROBERT HYSMITH, RPLS (Drone Pilot)

SURVEYING TEAM LEAD

Robert Hysmith is a seasoned Registered Professional Land Surveyor (RPLS) with more than 55 years of experience providing surveying services across Texas. His expertise spans boundary, topographic, route, ALTA/NSPS, easement, right-of-way, and construction surveying. Robert has played a key role in supporting civil infrastructure and public works projects for cities, counties, and utility providers, ensuring high standards of precision, regulatory compliance, and field-to-finish accuracy.

Over his career, Robert has managed and executed surveying assignments for floodplain studies, roadway and utility design, and large-scale public infrastructure improvements. He has extensive experience coordinating with engineers, environmental consultants, and public agencies to deliver accurate and timely survey data to inform project planning and design.

Known for his meticulous attention to detail, field crew management, and deep knowledge of Texas surveying standards, Robert continues to support projects from preliminary planning through construction, ensuring alignment with project goals and client expectations. His recent work at Scheibe Consulting includes survey coordination for flood mitigation, drainage infrastructure, and land development projects in Cameron, Travis, and Fort Bend counties.

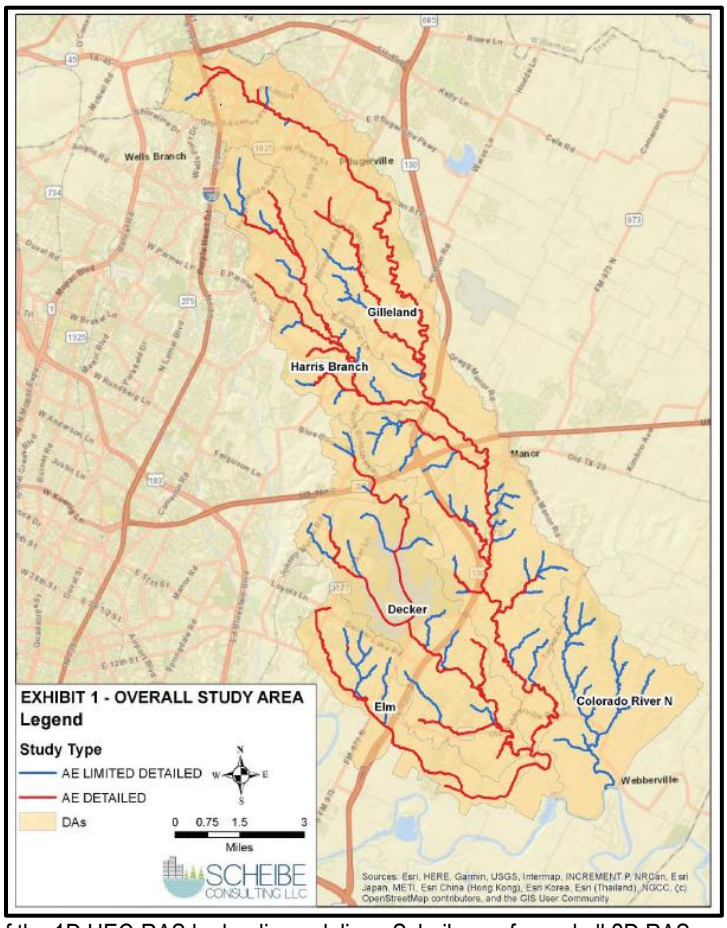
Scheibe Consulting has not yet had the opportunity to perform direct work for the City of Edinburg, we have included a selection of relevant land surveying projects that showcase the depth of experience and technical capability of our staff. These representative projects reflect the same level of expertise, quality, and attention to detail that our team would bring to the City's assignments. We look forward to the opportunity to work with the City of Edinburg and are happy to support the City in any capacity needed.

PROJECT #1

Project Name/Location: City of Austin - 2020 Stormwater Mapping and Modeling Rotation List - WA1 – Atlas 14 Floodplain Study – Gilleland and NE Colorado Tributaries, Austin, TX (CLMP277)

Individuals: Eric Scheibe, PE, CFM, Robert Hysmith, RPLS
Firm Name Work Performed Under: Scheibe Consulting, LLC



Year Completed: Ongoing

Total Cost: $3 Million (Study Cost)

Client or Owner's Representative: Mr. Karl McArthur, PE, CFM; City of Austin Watershed Protection Department

Phone Number of Client/Owner's Representative: (512) 974-9126

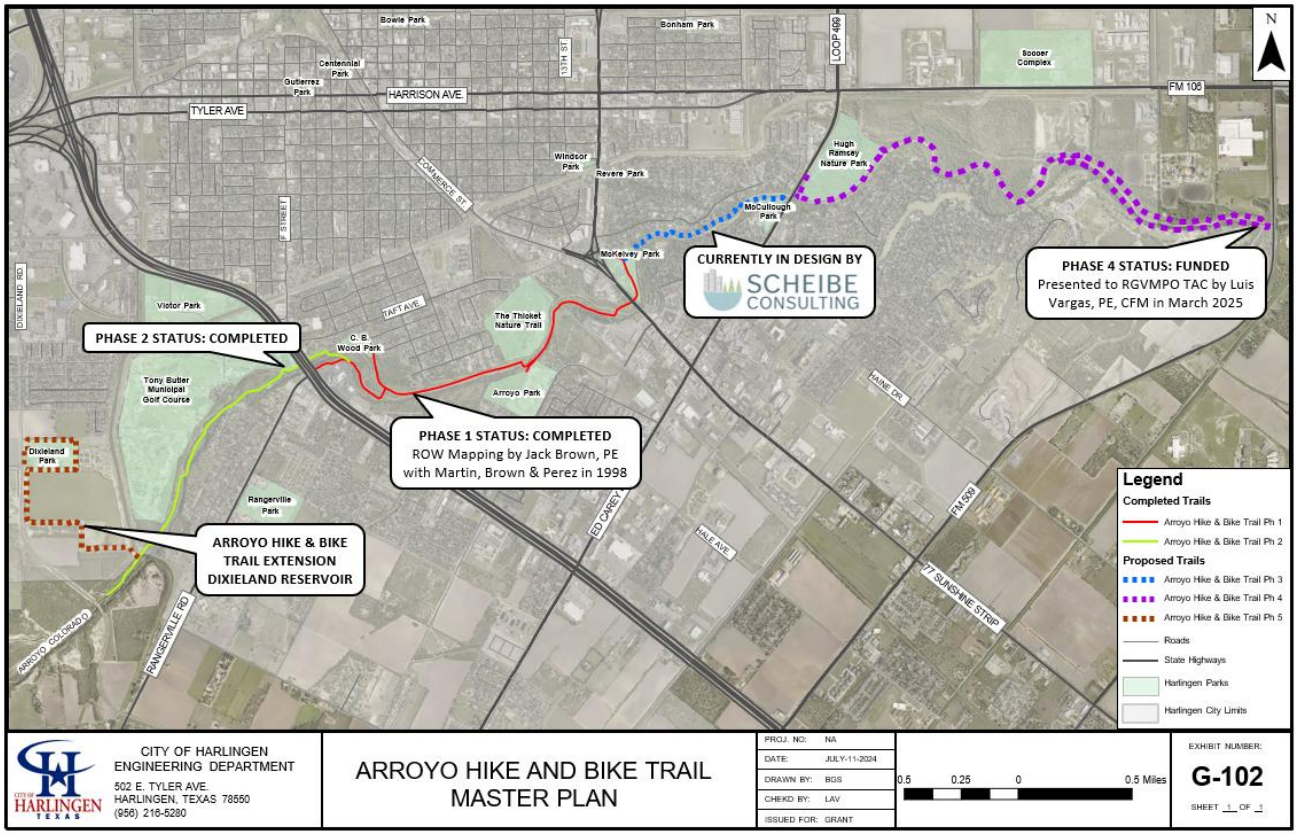
Project Description: Scheibe Consulting was hired as the prime firm to develop new H&H 1D models for the Gilleland Ck., Decker Ck., Harris Br., Elm Ck., and numerous tributaries to the Colorado River with this of incorporating Atlas 14 rainfall statistics for use in developing new FEMA floodplain and flood risk products. This entire project encompasses a total drainage area of ~86 Sq. Miles and 161 Stream Miles. Scheibe was tasked with managing a large team of subconsultants to ensure a tight timeline is met and the project meets FEMA modeling and mapping standards. Scheibe developed a 3D surface for this study area and incorporated recently completed or under construction developments into the 3D surface via Land XML editing. Scheibe managed the survey data collection of 277 bridge/culverts, 44 dams, 6 drop structures, and 222 channel cross-sections. All modeling was conducted using HEC-RAS and HEC-HMS software and all models were calibrated to historic flood events. Scheibe utilized **RAS 2D to simulate flood risk areas near the Colorado River and specifically along Elm Creek**. Scheibe also coordinated with TESLA on their factory construction within the watershed to ensure our end result was cohesive with their development. Scheibe is in the process of developing a full range of frequency flows and flood depths throughout these watersheds, which will then be used to develop final FEMA risk maps and for use by City staff and the development community for future development projects. **This project resulted in flood risk mapping for existing conditions, field survey data collection, and public outreach activities.**

Work Performed by Individual: Scheibe managed all sub-consultants, **survey data collection**, and public meetings. Scheibe performed all hydrologic modeling and performed 75% of the 1D HEC-RAS hydraulic modeling. Scheibe performed all 2D RAS modeling in complex area, and coordinated with the Tesla factory development, located within this watershed. **Scheibe provided survey data collection of key bridges, dams, and culvert crossings within this study area.**

PROJECT #2

Project Name/Location: Arroyo Hike and Bike Trail Extension Project Phase III, Harlingen, TX

Individuals: Eric Scheibe, PE, CFM, Luis Vargas, PE, CFM, Juan Garcia, RPLS, Robert Hysmith, RPLS, Jack Brown, PE



Firm Name Work Performed Under: Scheibe Consulting, LLC

Year Completed: Ongoing

Total Cost: $332,355.25 (Engineering Fees/Services)

Client or Owner's Representative: Roberto Hernandez, PE, CFM, City of Harlingen City Engineer
Phone Number: (956) 556-5245

Project Description: The Arroyo Colorado Hike & Bike Trail runs east-west along the Arroyo Colorado Creek, with approximately four miles of paved trails extending from McKelvey Park on the east to near Dixieland Road on the west. The trail serves both as a recreational amenity and as an active transportation corridor for pedestrians and cyclists. Phase III is the trail segment that from McKelvey Park to Hugh Ramsey Park and is currently being designed by Scheibe Consulting for the City of Harlingen. The project has required extensive research of property deeds to confirm the boundaries of property limits. Scheibe has partnered with a State Land Surveyor to review Arroyo's gradient boundary and determine ownership between the water's edge to the high banks of Arroyo, both north and south. Drone and on-field surveying has been completed, and the trail alignment is planned to be finalized in March 2026. The project includes the design of a 10-foot-wide paved trail along the Arroyo Colorado, the installation of at least four pedestrian bridges, and the incorporation of erosion control measures. Additional services include permitting with the International Boundary and Water Commission (IBWC), environmental permitting, geotechnical engineering, and bid phase and construction phase services.

PROJECT #3

Project Name/Location: City of Llano Subdivision

Individuals: Eric Scheibe, PE, CFM, Robert Hysmith, RPLS

Firm Name Work Performed Under: Scheibe Consulting, LLC

Year Completed: 2025

Total Cost: $20,000

Client or Owner's Representative: Andrew Goodloe (Providence Development)

Phone Number of Client/Owner's Representative: (737) 757-7077

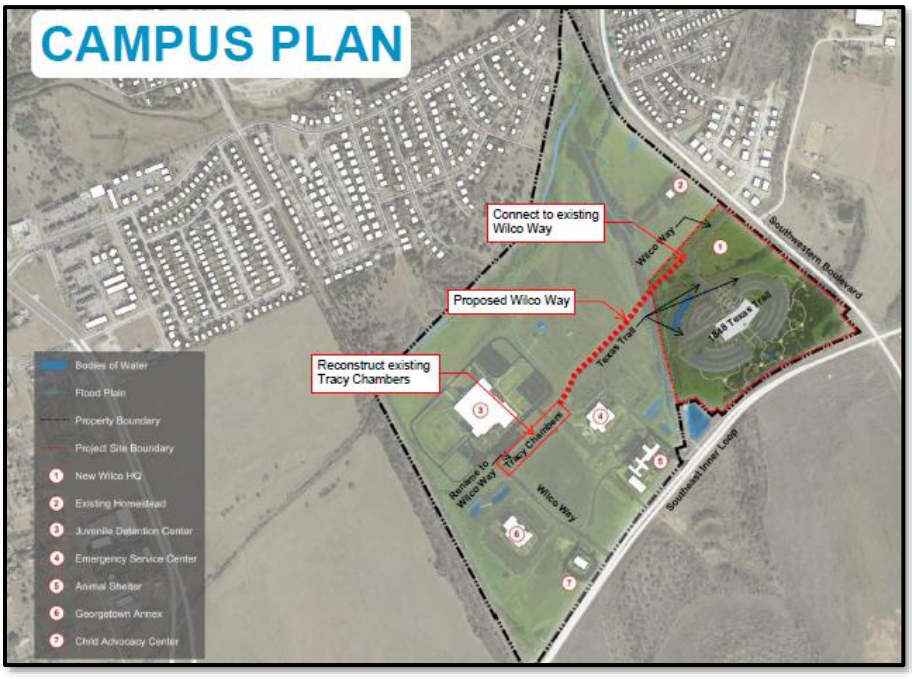
Project Description: Scheibe was hired to provide land development and land surveying services for a residential subdivision in Llano, TX. Scheibe provided all topographic, boundary, tree, and platting for this project. Scheibe also provided design services and coordination with the City of Llano on this project. Project included planning, platting, survey, roadway layout, utility layout, and coordination electric services.

PROJECT #4

Project Name/Location: Tracy Chambers Ln. Roadway Improvement Project (Williamson County, TX)

Individuals: Eric Scheibe, PE, CFM, Robert Hysmith, RPLS

Firm Name Work Performed Under: Scheibe Consulting, LLC



Year Completed: 2025

Total Cost: $2 Million (Construction Fees/Services)

Client or Owner's Representative: Bob Daigh, PE; County Engineer

Phone Number of Client/Owner's Representative: (512) 943-3330

Project Description: Williamson County contacted Scheibe Consulting to provide a very quick turn-around design for the Tracy Chambers Roadway Improvement project. Scheibe provided all land surveying, boundary survey, topographic survey, and project control survey services. Scheibe was asked to start work on this project on a Thursday and had a crew out in the field that following Monday. Scheibe was also tasked with developing drainage design and provide field surveying services for this project.

PROJECT #5

Project Name/Location: Blockhouse Creek (City of Cedar Park, TX)

Individuals: Eric Scheibe, PE, CFM, Juan Garcia, RPLS, Robert Hysmith, RPLS

Firm Name Work Performed Under: Scheibe Consulting, LLC

Year Completed: Ongoing

Total Cost: $10 Million (Engineering Fees/Services)

Client or Owner's Representative: Ryan Beardmore

Phone Number: (512) 401-5340

Project Description: The City of Cedar Park developed a Drainage Master Plan following extreme flood losses due to Hermine and the flood of 2007. One of the priority projects from the master plan was the need to improve drainage along Block House Creek just upstream of US 183. Scheibe was hired to conduct a preliminary engineering design, final design, and construction phase services for this project. Scheibe developed a new 2D RAS model for this reach of Block House Creek, developed an improved HMS model based on current land use and incorporating several existing regional detention ponds (previously ignored in the UBCWCID / FEMA model). Scheibe developed a recommended design that included the following:

1. Channel widening from US 183 up to Sumac Ln (~1,000 LF) with a benched 100-ft bottom width channel (4:1 side slopes) that meanders through Peggy Garner Park (to avoid impacts to the larger Oaks)
2. Park Improvements (including new pedestrian bridge, stormsewer improvements under the park area to maximize usable space, new basketball court, and relocation of a baseball diamond)
3. Three new culvert crossings that pass the 25-yr flood under the roadway (Peach Tree Ln, Cypress Ln, and Sumac Ln)
4. Construction of a Dam upstream of Sumac to maximize usable city property upstream,
5. Coordination with property owner (between US 183 and CapMetro) to obtain drainage easement, channel widening, and regional detention, and
6. Construction of 4 new 8x5 RCB culverts under US 183.

This project includes parkland improvements, TxDOT permitting, USACE Individual Permitting (due to exceeding the limits under NWP 43). This project involved coordination with USACE Ft. Worth District, wetland delineations, OHWM survey, and mitigation analysis. In summary the project included:

- **Survey services, ROW, boundary, topographic, SUE, & coordination**
- Advanced 2D H&H modeling (HMS and RAS 2D)
- Channel Widening & Natural Channel Design
- Full Civil Design & Construction Cost Estimates (30%, 60%, 90%, 100% + specifications)
- Bid Phase Services (including interview of contractor references)
- Construction Phase Services (including RFI responses, submittal reviews, Pay App reviews, material testing reviews, and periodic inspections).
- Land Acquisition & Property Buy-outs (6 total)
- Geotechnical Investigations (pavement design, excavation/backfill recommendations, and tunneling recommendations below US 183)
- Overhead Electric relocations
- Water/Wastewater relocations
- USACE Individual Permitting
- Dam Design and Permitting

Scheibe Consulting, LLC confirms that it has read and reviewed the Professional Services Agreement in its entirety. The firm meets, and will maintain, the prerequisite insurance requirements set forth therein. If selected, Scheibe Consulting, LLC agrees to enter into the Professional Services Agreement as presented.

WINDROSE
LAND SURVEYING | PLATTING

STATEMENT OF QUALIFICATIONS

REQUEST FOR QUALIFICATIONS – LAND SURVEYING SERVICES
RFQ 2026-6

SUBMITTED TO:
CITY OF EDINBURG

SUBMITTED BY:
WINDROSE SURVEYING & LAND SERVICES, LLC

PRIMARY CONTACT:
YVONNE PHU
BUSINESS DEVELOPMENT EXECUTIVE

JULY 13, 2026

Dear City of Edinburg,

Windrose Surveying & Land Services, LLC is pleased to submit our qualifications in response to the City of Edinburg's Request for Qualifications for Land Surveying Services. We appreciate the opportunity to be considered as a professional services provider for on-call surveying support across future capital improvement and development projects.

Our firm provides comprehensive land surveying services throughout Texas, supporting municipal infrastructure, utility coordination, roadway development, and private sector construction. We understand the critical role accurate and timely survey data plays in the successful delivery of public projects, and we are committed to providing responsive services, technical precision, and consistent communication throughout every phase of work.

Windrose Surveying offers extensive experience in boundary, topographic, ALTA/NSPS land title surveys, construction staking, and platting services. Our team operates under the direct supervision of a Texas Registered Professional Land Surveyor (RPLS), ensuring all deliverables meet or exceed applicable state and municipal standards.

We are experienced in fast-paced, infrastructure driven environments where coordination between surveyors, engineers, and public agencies is essential. Our approach emphasizes proactive communication, efficient field to office workflows, and quality-controlled deliverables that support design and construction schedules.

We have reviewed the City's Land Surveying Services Agreement and acknowledge the requirements and obligations outlined therein. The firm confirms its ability and commitment to meet the prerequisite insurance requirements and provide the required documentation upon request. If selected for this project, Windrose Surveying & Land Services agrees to execute and enter into the Land Surveying Services Agreement in accordance with the terms and conditions established by the City.

We respectfully submit this State of Qualifications for your consideration and welcome the opportunity to support the City of Edinburg as a trusted surveying partner. Please feel free to contact me directly should you require any additional information.

Thank you for your time and consideration.

Sincerely,

Yvonne Phu
Business Development

FIRM QUALIFICATIONS AND EXPERIENCE

COMPANY OVERVIEW

Windrose Surveying & Land Services, LLC, is a Texas based professional land surveying firm providing comprehensive surveying, platting, and geospatial services to public and private sector clients throughout the state of Texas since 1991. With offices in Houston, Austin, and Dallas, the firm employs over 100 professionals including Registered Professional Land Surveyors, survey technicians, GIS specialists, and UAV pilots to support and serve multiple markets. Windrose has successfully partnered with developers, engineers, architects, contractors, municipalities, and public agencies on projects of varying size and complexity throughout Texas. Our team has extensive experience supporting commercial and mixed-use developments, residential subdivisions and master-planned communities, public infrastructure and utility improvements, water, wastewater, and drainage projects, transportation and roadway improvements, education and institutional facilities, industrial and manufacturing developments. Our experience allows us to understand unique challenges associated with project entitlement, permitting, design coordination, and construction implementation, enabling us to proactively support our clients throughout the project lifecycle.

The Central Texas office located at 9360 Corporate Drive, Suite 102, Selma, TX will serve as the primary office responsible for this contract. This office houses a team leader, project management, licensed surveyors, CAD technicians, GIS personnel, and field crews dedicated to municipal surveying projects. They will also have the support of our headquarter office in Houston where staff can be assigned on an as-needed basis, allowing the City to receive prompt service without delays. Cross-trained personnel and centralized scheduling ensure adequate coverage during periods of increase workload.

EXPERIENCE

Windrose has extensive experience providing surveying services for municipal, county, and state agencies throughout Texas. The following projects demonstrate our capability to deliver accurate, timely, and compliant survey deliverables for public infrastructure development.

- **WGA Consulting Engineers – Elgin WWTP**
  Elgin, TX | 2025-Ongoing

  Provided a boundary verification, topographic survey, tree survey, title reports, and preparation of metes and bounds descriptions and exhibits. The survey information established existing conditions, identified property constraints, and supported the planning, design, and alignment of critical wastewater infrastructure improvements associated with the gravity line extensions and WWTP expansion. Phase I has been completed and we are in progress for Phase II.

- **Port of San Antonio – 36th Street Duct Bank Improvements**
  San Antonio, TX | 2026

  Provided Category 1A Condition 2 Boundary and Improvement survey, metes and bounds exhibit and construction layout support. The project involved establishing and verifying existing boundary and right-of-way information to support the design and installation of underground duct bank infrastructure within active industrial and transportation corridor. We also prepared metes and bounds description and exhibits to facilitate property and easement documentation and provided precise construction layout services to ensure the accurate placement of proposed improvements.

- **City of League City – Hometown Heroes Park Project**
  League City, TX | 2020-2026

  Provided boundary and topographic survey, form survey and easement preparation for a Hike and Bike Trail. Work included locating existing utilities, establishing control, and preparing final deliverables for design use. Windrose served as the prime survey consultant and coordinated with the architect and City engineer throughout design phases.

- **City of Baytown – Bicentennial Park**
  Baytown, TX | 2025

  Provided Category 1B Survey and title report services in support of the Bicentennial Park Improvements project. The approximately 11-acre project involved conducting a comprehensive boundary survey and preparing title reports to identify existing property ownership, easements, rights-of-way, and other encumbrances affecting the site. Windrose coordinated closely with City representatives to deliver timely and accurate survey documents that supported the advancement of park improvements and future development activities.

- **WGA Consulting Engineers – Seguin Waterline Extension-Link Rd**
  Seguin, TX | 2025

  Provided boundary verification, topographic survey and utility survey services for a waterline extension. Services included verification of existing property boundaries, mapping of existing improvements and utilities, and preparation of metes and bounds exhibit to support easement acquisition and project design. Deliverables provided critical survey data for engineering plans, permitting, and construction efforts.

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Marco Andrade, RPLS

Role: Central Texas Team Leader / Surveyor
Years of Experience: 22 years
License: Registered Professional Land Surveyor (RPLS) #6940

Marco serves as the Head RPLS and Senior Project Manager. Since starting his career in 2010, he has built extensive experience in land surveying, project management, and team leadership, establishing himself as a trusted professional in the surveying and land development industry.

With bachelor's degree in Civil Engineering and Architecture, Marco brings a unique combination of technical expertise and practical field knowledge to every project. His experience encompasses all phases of surveying, including boundary and topographic surveys, ALTA/NSPS Land Title Surveys, construction staking, easement preparation, land portioning, metes and bounds descriptions, GIS research, as-built surveys, and plat preparation.

Throughout his career, Marco has successfully managed a wide range of projects varying in size and complexity, including commercial land development, aviation infrastructure, transportation infrastructure, municipal improvements, and public-sector developments. His ability to coordinate multidisciplinary teams, maintain project schedules, and deliver accurate survey solutions has contributed to the successful completion of numerous high-profile projects across Texas.

As a licensed Registered Professional Land Surveyor (RPLS) with more than a decade of management experience, Marco is recognized for his commitment to quality, attention to detail, client-focused approach, and strong communication skills. His leadership and technical expertise continue to support Windrose's mission of delivering exceptional surveying and land services while fostering long-term client relationships.

EDUCATION & LICENSURE

Bachelor of Science, Civil Engineering
University of Texas at Tyler (2021)
Bachelor of Architecture
Cornell University (2010)
Texas Registered Professional Land Surveyor (RPLS) #6940

EXPERIENCE & LOCATION

22 Years, Texas

PROFESSIONAL ORGANIZATIONS & CERTIFICATIONS

Texas Society of Professional Surveyors National Society of Professional Surveyors Texas
Engineer-in-Training #79620 (2023)
Certified Floodplain Manager #4433-23N (2023)
Institute for Sustainable Infrastructure Professional #42759 (2021) TxDot
Certification: 11603_ 15.1.1., 15.2.1., 15.3.3., and 15.3.5

RELEVANT PROJECT EXPERIENCE

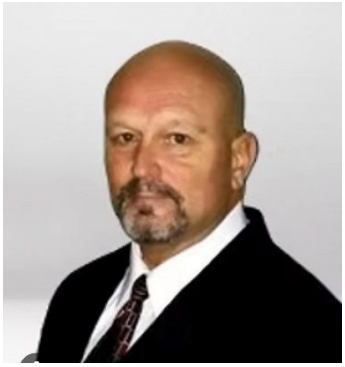
City of Baytown Bicentennial Park, Baytown, TX
Role: RPLS/Project Manager
Managed survey services including comprehensive boundary survey and preparing title reports to identify existing property ownership, easements, rights-of-way, and other encumbrances affecting the site.

TDCJ-Bell Unit, Cleveland, TX
Role: RPLS/Project Manager
Provided professional oversight for a 6.5-acre topographic survey, establishing survey control and directing the collection of detailed topographic data, including existing improvements, utilities, drainage features, hardscape, and surface elevations. The survey deliverables supported engineering design, permitting, and project development.

TDCJ-Wallace Pack Unit, Navasota, TX
Role: RPLS/Project Manager
Provided professional oversight for a 6-acre topographic survey, establishing survey control and directing the collection of detailed topographic data, including existing improvements, utilities, drainage features, hardscape, and surface elevations. The survey deliverables supported engineering design, permitting, and project development.

Woodlands Sports, Houston, TX
Role: RPLS/Project Manager
Served as the project manager for an ALTA/NSPS Land Title Survey and topographic survey for Buildings B and C. Oversaw the collection and verification of boundary information, improvements, easements, rights-of-way, and other title-related matters in accordance with ALTA/NSPS standards. Directed the preparation of detailed topographic mapping documenting existing site conditions.

City of Houston Fire Station 31, Houston TX
Role: RPLS/Project Manager
Provided professional oversight for a Categoy 1B, Condition 3 Boundary and Improvement Survey for the COH Fire Station 31. The survey included boundary verification, analysis of record information, and location of existing improvements and site features to support design and redevelopment efforts.



Steven M. Clouse WRC Primary and Secondary Treatment Expansion SAWs, San Antonio, TX
Role: RPLS/Project Manager
Completed while with Bain Medina Bain, Inc
Provided oversight for all surveying services, including a preliminary topographic survey for the target area, hydraulic surveying for existing treatment facilities, existing utility surveying, permanent onsite survey monuments, boundary retracement, and the production of easement documents for this project. This project included both pre-demolition and post-construction for new facilities built.

Echtle Offsite Sewer Extension, SAWs, San Antonio, TX
Role: RPLS/Project Manager
Completed while with Bain Medina Bain, Inc
Coordinated a construction stakeout survey of the project area to recover and verify horizontal and vertical control points. Marco provided oversight of the BMB team during a stakeout of centerline and centerline offsets as well as proposed sanitary manhole locations and field verification of manhole and borehole locations.

City of Del Rio Silver Lake WWTP, Del Rio, TX
Role: RPLS/Project Manager
Completed while with Bain Medina Bain, Inc
Provided topographic survey that included utilities, Right of Ways and recorded subdivision plats. Marco located boundary corners and led the team in preparation of the control for the aerial survey. Marco also provided hydraulic survey of the plant that included specific hydraulic elevations for design.

Stinson Municipal Airport Topographic Survey for Master Drainage Plan, San Antonio, Airport Systems, San Antonio, TX
Role: RPLS/Project Manager
Completed while with Bain Medina Bain, Inc
As the Survey Task Lead for this project, provided a topographic survey, storm sewer inverts, and camera/video of the outfall pipe services as well as a field survey which included survey project and access coordination, established horizontal and vertical control points for flow line elevations at outfalls and the immediate surrounding area(s); post process of fieldwork with QA/QC; provided 2D and 3D topographic files in AutoCad; and provided televising which consisted of camera/video images of outfall storm drain pipe.

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Paul Jones, RPLS

Role: Senior Project Manager / Surveyor
Years of Experience: 47 years
License: Registered Professional Land Surveyor (RPLS) #5480

Paul is a Senior Project Manager for Windrose Surveying & Land Services, LLC, managing projects in Central Texas region. After graduating from college in 1978, he began his career in the surveying industry, working his way up through various survey roles including Party Chief to Vice President. Paul owned his own survey company for many years, adding exponential value to our team. With 45+ years of experience within his career, he has managed an array of projects with different complexities including land and site development, oil & gas, transportation, and municipal projects. He has comprehensive knowledge of ALTA Land Title Surveys, boundary analysis, topographic surveys, construction staking, easements and general plat preparation as well as Metes and Bounds descriptions. He has 20+ years of management skills and is a great addition to the Windrose team, his customer service, attention to detail, communication, and level of expertise all lead to successful project completions.

EDUCATION & LICENSURE

Sam Houston State University, Surveying & Engineering Geomatics, 1978
Lamar University, Engineering & Computer Science, 1976
Texas Registered Professional Land Surveyor (RPLS) #5480

EXPERIENCE & LOCATION

47 Years, Texas

PROFESSIONAL ORGANIZATIONS & CERTIFICATIONS

Texas Society of Professional Surveyors
National Society of Professional Surveyors Texas
TxDOT Certification: 11603

RELEVANT PROJECT EXPERIENCE

Cherryville, Phase I, Lockhart, TX
Role: RPLS/Project Manager
Served as project manager for a 3,200-acre topographic survey, overseeing all aspects of survey execution from planning through final deliverables. Managed the integration of LiDAR technology to enhance data collection efficiency and provide accurate, high-resolution topographic mapping.

Northwest Boulevard, Georgetown, TX
Role: RPLS/Project Manager
Served as project manager for survey services on a 54-acre tract in Georgetown. Managed the completion of Category 1A Boundary survey services and a tree survey, overseeing project coordination, field operations, quality control, and a timely delivery of survey data to support project planning and design.

Titanium Commerce-E. Howard Lane, Manor, TX
Role: RPLS/Project Manager
Served as project manager for survey services on a 150-acre development, overseeing a comprehensive scope of construction and land survey services. Responsibilities included construction layout, property line staking, wall and natural ground shots for wall design, staking of curb, AE power poles, electrical utilities, lift station, EV charging station, and gas lines. Additional services included ALTA/NSPS Land Title Survey, As-built survey, preparation of drainage exhibits, and establishment of drainage and water easements. Managed project coordination, quality control, and timely delivery of survey data to support design and construction activities.

1950 S Bagdad Road, Cedar Park, TX
Role: RPLS/Project Manager
Served as a project manager for survey services, overseeing the completion of Category 1A Boundary Improvement Survey, along with detailed topographic and tree surveys. Services included boundary analysis and monumentation, collection of existing ground elevations, visible improvements, utilities, drainage features, and the location of individual trees to support site layout, engineering design, and environmental planning.

401 W Whitestone Boulevard, Cedar Park, TX
Role: RPLS/Project Manager
Served as the project manager for a development project in Cedar Park, providing professional oversight of a boundary survey, tree survey, and preparation of metes and bounds description. Managed the platting process from preparation through submittal and coordination with the City of Cedar Park, including responding to review comments and supporting revisions. Represented the project at pre-development meetings, collaborating with the owner, design team, and City staff to facilitate the entitlement process and ensure compliance with applicable surveying and municipal requirements.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 18, 2026
AWARDING OF BIDS
Agenda Item No: 13.F.
2026-2028 Professional Engineering Services Rotation

1. **Agenda Item:**
Consider Awarding RFQ No. 2026-7, Professional Engineering Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise. [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

2. **Description:**
On occasion, the City of Edinburg requires Engineering Services on City projects which do require a specific engineering specialty. The qualified firm(s) selected should be experienced in the field of Engineering, having experience in the design of road and pavement signage, traffic signals, hydrology and hydraulics, utilities infrastructure, water and wastewater infrastructure, as well as other related civil and structural improvements and design. It is expected that the qualified firm(s) selected will have a sufficient level of innovation and appraisal expertise to carry out the projects without constraints on producing documents in a timely manner. The firm must be prepared to assure the City of Edinburg that key personnel indicated in their qualification statement will maintain their role in each project and that their present workload is such that each project will be completed on or before the due date.

The rotation is for potential projects between October 2026 through September 2028. Projects to be funded in the upcoming fiscal years, as prioritized by the City Council.

Request for Qualifications were received on Tuesday, July 14, 2026, at 3:00 p.m. for Professional Engineering Services. Hard copies of RFQs are provided separately for City Council review. A total of thirty-nine (39) Request for Qualifications were received and reviewed by staff. All the submittals received met the criteria set out in the Request for Qualifications. The following qualified firms listed in alphabetical order have submitted Statements of Qualifications in response to this RFQ:

1. Andurra Group, Inc. (Civil and Structural)
2. B2Z Engineering, LLC (Civil and Traffic)*
3. Civil Design Services, Inc. (Civil)
4. Colliers Engineering & Design (Civil)
5. Cruz-Hogan Consultants, Inc. (Civil)
6. DBR Engineering (MEP)
7. DeShazo Group, Inc (Traffic)
8. Ethos Holistique Holdings, LLC (MEP)
9. Freese and Nichols, Inc. (Civil, Traffic and MEP)
10. GFT Infrastructure, Inc. (Civil)
11. Halff Associates, Inc. (Civil, Structural, Traffic and MEP)*
12. Hanson Professional Services, Inc. (Civil, Structural, Traffic and MEP)
13. Izaguirre Engineering Group, LLC (Civil and Traffic)
14. Javier Hinojosa Engineering (Civil)*
15. JRH Engineering & Environmental Services, Inc.

16. KCI Technologies, Inc. (Civil, Traffic and MEP)*
17. LDG Enterprises, LLC (GDJ Engineering) (Civil)*
18. LeFevre Engineering, PLLC (Civil)*
19. Legacy Engineering Group (Civil and Traffic)
20. Melden and Hunt, Inc. (Civil)*
21. META Engineering, LLC (Civil)
22. Millennium Engineers Group, Inc. (Geotechnical and Environmental)*
23. Perez Consulting Engineers, LLC (Civil)
24. Quintanilla, Headley & Associates, Inc. (Civil)*
25. Rio Delta Engineering (Civil)*
26. Rummel, Klepper & Kahl, LLP (Civil, Structural and Traffic)
27. S2 Engineering, PLLC (Civil)
28. SAMES, Inc. (Civil)*
29. Scheibe Consulting, LLC (Civil)
30. SCIVLE (Civil and Traffic)
31. SDI Engineering, LLC (Civil)
32. SIGMA HN Engineers (MEP)
33. South Texas Infrastructure Group, LLC (Civil)*
34. SWG Engineering, LLC (Civil)
35. TEDSI Infrastructure Group (Civil)*
36. TRIMAD Consultants, LLC (Civil)
37. Trinity MEP Engineering, LLC (MEP)*
38. Urban Infrastructure Group, Inc. (Civil)
39. Valdez Engineering (Civil)

* On 2024-2026 rotation

Limiting the selection of firms between 5 and 10 for Civil Engineers and 1-3 on MEP will insure each firm will obtain a project as it arises. The current 2024-2026 rotation has 16 firms and have received approximately 2 projects.

3. Staff's Recommendation:

Staff recommends Awarding RFQ No. 2026-7 Professional Engineering Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise.

1. Introduction

1.1. Summary

The City of Edinburg's Engineering Department is currently seeking to retain a rotation list of qualified professional Engineering firms to provide engineering services. The term of the contract will be two (2) years from 10/01/2026 – 09/30/2028. The work will be assigned on an as-needed basis for a variety of capital improvement projects and city programs and projects. The work may be discrete, short term assignments or may be part of larger capital or planning efforts.

2. Legal Notice

2.1. Notice to Respondents

The City of Edinburg is soliciting sealed proposals from qualified vendors for Request for Qualifications - Professional Engineering Services.

Sealed Proposals must be submitted electronically or received by the City Secretary's Office no later than:

3:00 pm, Tuesday, July 14, 2026.

All sealed proposals must be received either electronically or at the designated location by the deadline shown. Proposals received after the deadline will not be considered for the award of the contract and shall be considered void and unacceptable.

All proposals will be opened, and respondent's names publicly read aloud promptly in the City Hall Community Room, at 415 W. University Dr., Edinburg, TX 78539, at 3:00 pm, Tuesday, July 14, 2026.

To obtain a copy of the Request for Qualifications or submit an electronic proposal please visit:

https://procurement.opengov.com/portal/cityofedinburg

If a Respondent chooses to submit a Hard Copy Proposal, it must be delivered in a sealed envelope with a return address and clearly marked "City of Edinburg RFQ No. RFQ 2026-7 to the City Secretary's Office prior to the RFQ opening date and time. The receiving time in the City Secretary's Office will be the governing time for acceptability of the proposals. The respondent's firm name shall appear on the outside of the envelope.

Submit Hard Copy Proposals to:

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

RFQ No. RFQ 2026-7

If you have any questions or require additional information contained in the RFQ, you may contact Lorena Fuentes, Interim Purchasing Manager. Please be sure to submit your questions via OpenGov Procurement at the website listed above no later than 3:00 pm on Tuesday, July 7, 2026.

The City reserves the right to reject any or all proposals and to waive informalities or technicalities and to accept the Proposal deemed the most advantageous to the City, and hold the proposal for a period of 90 days without taking action.

3. Instructions, Terms and Conditions

3.1. General Instructions

PURPOSE

The purpose of these solicitation documents is to execute a Professional Services Contract for: RFQ 2026-7 Request for Qualifications - Professional Engineering Services

INTENT

The services to be provided under this RFQ shall be in accordance with and shall meet all specifications and/or requirements as shown in this solicitation for RFQ. There is no intention to disqualify any respondent who can meet the requirements.

DEVIATION FROM SPECIFICATION

Please read your requirements thoroughly and be sure that the RFQ offered complies with all requirements/specifications noted. Any variation from the solicitation requirements/specifications must be clearly indicated by letter, on a point by point basis, attached to and made a part of your RFQ. If no exceptions are noted, and you are the successful respondent, it will be required that the service(s) be provided as specified.

SUBMITTAL OF "HARD COPY" RFQ

If submitting a Hard Copy RFQ, it must be submitted in a sealed envelope by the vendor. **Submit two (2) complete sets of the response, one (1) original marked "ORIGINAL," and one (1) Digital Copy in a flash drive**. Each RFQ must be completely filled out and SUBMITTED IN ORIGINAL FORM complete with all supporting documentation. RFQs submitted by facsimile (fax) will not be accepted. Submittal of an RFQ in response to this solicitation constitutes an offer by the respondent. Once submitted, RFQs become the property of the City of Edinburg and as such the City reserves the right to use any ideas contained in any RFQ regardless of whether that respondent/firm is selected. Submission of a RFQ in response to this solicitation, by any respondent, shall indicate that the respondent(s) has/have accepted the conditions contained in the RFQ, unless clearly and specifically noted in the RFQ submitted and confirmed in the contract between the City and the successful respondent otherwise. RFQs which do not comply with these requirements may be rejected at the option of the City. RFQs must be filed with the City of Edinburg before the deadline day and hour. No late RFQs will be accepted. Failure to meet RFQ requirements may be grounds for disqualification.

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

AUTHORIZATION TO BIND RESPONDENT TO RFQ

RFQs MUST give full firm name and address of respondent, and be manually signed. Failure to do so will disqualify your RFQ. Person signing bid must show title or AUTHORITY TO BIND HIS/HER FIRM IN A CONTRACT. Firm name and authorized signature must appear on each page that calls for this information. The legal status of the Respondent whether corporation, partnership, or individual, shall also be stated in the RFQ. A corporation shall execute the RFQ by its duly authorized officers in accordance with its corporate by-laws and shall also list the state in which it is incorporated. A partnership Respondent shall give full names and addresses of all partners. All partners shall execute the RFQ. Partnership and Individual Respondent shall state in the proposal the names and addresses of all persons with a vested interest therein. The place of residence of each Respondent, or the office address in the case of a firm or company, with county and state and telephone number, shall be given after the signature.

ALTERATIONS/AMENDMENTS TO RFQ

RFQ CANNOT be altered or amended after opening time. Alterations made before opening time must be initialed by respondent guaranteeing authenticity. No RFQ may be withdrawn after opening time without acceptable reason in writing and only after approval by the City of Edinburg.

NO RESPONSE TO RFQ

If unable to submit a RFQ, respondent should return inquiry giving reasons.

LIST OF EXCEPTIONS

The respondent shall attach to his/her RFQ a list of any exceptions to the specifications/ requirements.

TIME ALLOWED FOR ACTION TAKEN

The City of Edinburg may hold RFQ's **90 days** after deadline without taking action. Respondents are required to hold their RFQ's firm for same period of time.

RIGHT TO REJECT/AWARD

The City of Edinburg reserves the right to reject any or all RFQs, to waive any or all formalities or technicalities, and to make such awards of contract as may be deemed to be the best and most advantageous to the City of Edinburg.

NUMBER OF CONTRACTS

THE CITY reserves the right to award one, more than one, or no contract(s) in response to this RFQ.

INDEMNIFICATION CLAUSE

The Respondent agrees to indemnify and save harmless the City, from all suits and actions of every nature and description brought against them or any of them, for or on account of the use of patented appliances, products or processes, and he shall pay all royalties and charges which are legal and equitable. Evidence of such payment or satisfaction shall be submitted upon request of the Assistant Purchasing Manager, as a necessary requirement in connection with the final estimate for payment in which such patented appliance, products or processes are used.

ADDENDA AND MODIFICATIONS

Respondent shall carefully examine the RFQ forms, specifications/requirements, and instructions to Respondents. Should the respondent find discrepancies in, or omissions from specifications/requirements, or other documents, or should he/she be in doubt as to their meaning, he/she should request an interpretation via the OpenGov portal:https://procurement.opengov.com/portal/cityofedinburg and obtain clarification by addendum prior to submitting any RFQ. Explanations, interpretations, and supplemental instructions shall be in the form of written Addenda which shall become a part of the Contract documents. Said Addenda shall be available thru the e-procurement portal and e-mailed to all prospective Respondents. All Addenda issued in respect to this project shall be considered official changes to the original RFQ documents. Verbal statements in response to inquiries and/or requests for explanations shall not be authoritative nor binding. It shall be the Respondent(s) responsibility to ensure that they have received all Addenda in respect to this project. Furthermore, Respondents are advised that they must recognize, comply with, and attach a signed copy of each Addendum which shall be made part of their RFQ Submittal. Respondent(s) signature on Addenda shall be interpreted as the respondent’s “recognition and compliance to” official changes as outlined by the City of Edinburg and as such are made part of the original solicitation documents. Failure of any respondent to receive any such addendum or interpretation shall not relieve such Respondent from its terms and requirements. The City may issue a written addendum no later than five calendar days prior to the date bids must be received. Addendums are available online at https://procurement.opengov.com/portal/cityofedinburg

SYNONYM

Where in this solicitation package SERVICES is used, its meaning shall refer to the request for qualifications Request for Qualifications - Professional Engineering Services as specified.

ASSIGNMENT

Respondents are advised that the City of Edinburg shall not allow the successful respondent to sell, assign, transfer, or convey any part of any contract resulting from this RFQ in whole or in part, to a third party without the written approval of the City of Edinburg.

RESPONDENT’S EMPLOYEES

Neither the Respondent nor his/her employees engaged in fulfilling the terms and conditions of this Service Contract shall be considered employees of the City. The method and manner of performance of such undertakings shall be under the exclusive control of the vendor on contract. The City shall have the right of inspection of said undertakings at any time.

INTERPRETATIONS

Any questions concerning the project and/or specifications/requirements with regards to this solicitation for statement(s) of qualifications shall be directed to the designated individuals as outlined in the RFQ. Such interpretations, which may affect the eventual outcome of this request for statements of qualifications, shall be furnished in writing to all prospective Respondents via Addendum. No interpretation shall be considered binding unless provided in writing by the City of Edinburg in accordance with paragraph entitled **"Addenda and Modifications".**

STATUTORY REQUIREMENTS

It shall be the responsibility of the successful respondent to comply with all applicable State & Federal laws, Executive Orders and Municipal Ordinances, and the Rules and Regulations of all authorities having jurisdiction over the work to be performed hereunder and such shall apply to the contract throughout, and that they will be deemed to be included in the contract as though written out in full in the contract documents.

RFQ PREPARATION COSTS

The City of Edinburg shall not be held liable for any costs incurred by any respondent for work performed in the preparation of and production of a RFQ or for any work performed prior to execution of contract.

CONFIDENTIAL INFORMATION

Any information deemed to be confidential by the respondent should be clearly noted on the pages where confidential information is contained; however, the City cannot guarantee that it will not be compelled to disclose all or part of any public record under Texas Public Information Act, since information deemed to be confidential by the respondent may not be considered confidential under Texas Law, or pursuant to a Court order.

VERBAL THREATS

Any threats made to any employee of the City, be it verbal or written, to discontinue the providing of item/material/services for whatever reason and/or reasons shall be considered a breach of contract and the City will immediately sever the contract with the Respondent/Consultant on contract.

RIGHT TO AUDIT

The City of Edinburg reserves the right to audit the vendor's books and records relating to the performance of this contract. The City of Edinburg, at its own expense, shall have the right at all reasonable times during normal business hours and upon at least twenty-four (24) hours' advance notice, to audit, to examine, and to make copies of or extracts from the books of account and records maintained by the vendor(s) with respect to the Supply/Service and/or Purchase Contract. If such audit shall disclose overpayment by City to vendor, written notice of such overpayment shall be provided to the vendor and the amount of overpayment shall be promptly reimbursed by vendor to the City. In the event any such overpayment is not paid within ten (10) business days after receipt of such notice, the unpaid amount of such overpayment shall bear interest at the rate of one percent (1%) per month from the date of such notice until paid.

PAST PERFORMANCE

Respondent's past performance shall be taken into consideration in the evaluation of RFQ submittal.

JURISDICTION

Contract(s) executed as part of this solicitation shall be subject to and governed under the laws of the State of Texas. Any and all obligations and payments are due and performable and payable in Hidalgo County, Texas.

VENUE

The parties agree that venue for purposes of any and all lawsuits, cause of action, arbitration, and/or any other dispute(s) shall be in Hidalgo County, Texas.

CONSIDERATION OF LOCATION OF BIDDER'S PRINCIPAL PLACE OF BUSINESS

The City may give local vendors, whose principal place of business is located within the City of Edinburg, and whose bid is within five percent (5%) of the lowest bid price preference as allowed by Section 271.9051 of the Local Government Code.

AWARD

Respondents are advised that the City of Edinburg is soliciting RFQs and award shall be made to the respondent that in the opinion of the City of Edinburg is the best qualified.

The City of Edinburg reserves the right to award contract(s) based solely on the written proposals. The City also reserves the right to request oral interviews.

FINAL SELECTION AND THE CITY COUNCIL APPROVAL

Selection shall be made of one or more proposers deemed to be fully qualified and best suited among those submitting Proposals on the basis of the evaluation factors included in the Request for Qualifications, if so stated in the Request for Qualifications. Negotiations shall be conducted with the proposers selected. After negotiations have been conducted with each proposer selected, the agency shall select the proposer which, in its opinion, has made the best proposal, and shall award the contract to that proposer. The City may cancel this Request for Qualifications or reject the Qualifications at any time prior to an award, and is not required to furnish a statement of the reasons why a particular proposal was not deemed the most advantageous. Should the City determine in writing and in its sole discretion that only one proposer is fully qualified, or that one proposer is clearly more highly qualified than the others under consideration, a contract may be negotiated and awarded to that proposer. The award document will be a contract incorporating by reference all the requirements, terms and conditions of the solicitation and the contractor's proposal as negotiated. After the selection of the most qualified firm(s), scope of services and billing rates will be negotiated and used as attachments to the City's Professional Services Agreement. This Agreement will then be submitted to the City Council for approval. If the City and the selected firm cannot successfully negotiate an agreement, then the City will enter into negotiations with the next best qualified firm on the evaluation rating list. This procedure may be repeated until one (1) or more firms has been selected and approved by the City Council.

PAYMENT

The City of Edinburg will execute payment by mail in accordance with the State of Texas Pay Law after SERVICES have been completed, introduced to the City, and found to meet City of Edinburg specifications/requirements. No other method of payment will be considered.

CONFIDENTIALITY OF INFORMATION AND SECURITY

Should the successful respondent become the holder of and have access to confidential information in the process of fulfilling its responsibilities in connection with an awarded contract the successful respondent agrees that it shall keep such information confidential and will comply fully with the laws and regulations of the State of Texas, ordinances and regulations of the City, and any applicable federal laws and regulations relating to confidentiality.

EQUAL EMPLOYMENT OPPORTUNITY

Respondent agrees that they will not discriminate in hiring, promotion, treatment, or other terms and conditions of employment based on race, sex, national origin, age, disability, or in any way violate Title VII of 1964 Civil Rights Act and amendments, except as permitted by said laws.

TERMINATION OF CONTRACT

The City of Edinburg reserves the right to terminate the contract if, in the opinion of the City of Edinburg, the successful vendor's performance is not acceptable, no funds are available, or if the City wishes, without cause, to discontinue this contract. Termination will be in written form allowing a 30-day notice.

HISTORICALLY UNDERUTILIZED BUSINESS

Firm(s)/Sub Firm(s) will be required to comply with the President's Executive Order No. 11236 and Order No. 11375 which prohibits discrimination in employment regarding race, creed, color, sex, or national origin. Firm(s)/Sub Firm(s) must comply with the Title VI of the Civil Rights Act of 1964, Minority and Women Owned Business Enterprise standards and affirmative action requirements.

ETHICAL STANDARD

No City official or employee shall have interest in any contract resulting from this bid.

IF YOU HAVE ANY QUESTIONS ABOUT COMPLIANCE, PLEASE CONSULT YOUR OWN LEGAL COUNSEL. COMPLIANCE IS THE INDIVIDUAL RESPONSIBILITY OF EACH PERSON OR AGENT OF A PERSON WHO IS SUBJECT TO THE FILING REQUIREMENT. AN OFFENSE UNDER CHAPTER 176 IS A CLASS "C" MISDEMEANOR.

3.2. INSURANCE REQUIREMENTS

Staff may waive insurance requirements for contracts $0 - $4,999.99, including but not limited to contracts for food, materials, supplies, and construction. Workers' Compensation in amounts which satisfy statutory coverage shall be required for construction projects.

The following insurance requirements will be included in all City contracts of $5,000 - $14,999.99. In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim.

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker’s Compensation Statutory Coverage

Comprehensive General Liability

(City named as additional insured)

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

The following insurance requirements will be included in all **City contracts of $15,000 or more.**

(1) The successful bidder will be required to carry the following insurance coverage and limits of coverage, as well as list the City as an additional insured to liability coverage as requested by the City. In addition, the successful bidder shall provide the City with evidence of coverage and furnish acceptable proof of payment of insurance premiums.

(2) The successful bidder will be required to secure and/or have insurance coverage in force with an admitted property and casualty insurance company licensed by the State of Texas to conduct business in the State of Texas.

(3) In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker’s Compensation Statutory Coverage

Employer’s Liability Bodily Injury by Accident:

$100,000 each accident

Bodily Injury by Disease:

$100,000 each employee/$500,000 policy limit

Comprehensive General Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Comprehensive Auto Liability

Bodily Injury $100,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

City’s Protective Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Policies must name the City of Edinburg as an Additional Insured.

Certificates of insurance naming the CITY as an additional insured shall be submitted to the CITY for approval prior to any services being performed by Contractor. Each policy of insurance required hereunder shall extend for a period equivalent to, or longer than the term of the Contract, and any insurer hereunder shall be required to give at least thirty (30) days written notice to the CITY prior to the cancellation of any such coverage on the termination date, or otherwise. This Contract shall be automatically suspended upon the cancellation, or other termination, of any required policy of insurance hereunder, and such suspension shall continue until evidence that adequate replacement coverage is provided to the CITY. If replacement coverage is not provided within thirty (30) days following suspension of the Contract, the Contract shall automatically terminate.

4. Specifications

4.1. Engineering Services

The selected firm(s) will report to, and operate under, the direction of City of Edinburg's Department of Engineering staff. Must have a Texas Licensed Professionals with superior background, training, and qualifications meeting all requirements of this RFQ, Registered or licensed in the State of Texas, and shall provide services and have staffing covering some or all of the specialized categories listed below:

- Street Infrastructure Evaluation and Improvements
- Pavement Management and Improvements
- Utility Infrastructure Evaluation and Improvements
- Erosion and Sediment Control Design
- Water and Wastewater Evaluation and Improvements
- Structural Engineering (Improvements & Design)
- Hydrology & Hydraulics
- Transportation Evaluation
- Traffic Engineering Services
- Traffic Signal Design
- Environmental Engineering Services
- Civil Engineering
- Mechanical, Electrical & Plumbing (MEP) Engineering Services

All qualified firms or persons shall have current licenses as required under the State of Texas for the provisions of services requested for the City of Edinburg.

Engineering services provided by the chosen firm(s) may include, but may not be limited to:

- Field investigation and data collection
- Feasibility evaluation and alternatives analysis
- Design development and cost estimating
- Preparation of plans, specifications and estimates
- Review and check plans, subdivision and parcel maps, and computations submitted by private developers
- Review of engineering and encroachment permits
- Prepare environmental reports
- Review of environmental and engineering reports and proposals
- Coordination with utility agencies, consultants, and other public agencies
- Organization, participation and presentations at meetings held by City staff, the City Council, neighborhood groups, and other stakeholders
- Preparation of preliminary documents, plans and/or reports including findings and recommendations
- Preparation final documents, plans and/or reports responding to City and other stakeholder comments

- Preparation of handouts and graphical displays for public meetings
- Management and monitoring of capital improvement project
- Management and monitoring of planning projects
- Administration and monitoring of regional, state and federal grants
- General civil engineering support services as assigned

4.2. Submittal Requirements

The RFQ must be submitted according to the instructions outlined herein. Each response should include, at a minimum, the following items not excluding the selection process criteria:

A. Transmittal letter – Indicate interest and commitment to perform services for the City of Edinburg, include contact information (physical address, telephone, fax, cell phone, and email address) for the primary person responsible for your RFQ who will be the point of contact for the City on all correspondence and communications pertaining to the RFQ. State whether any addendums to this RFQ have been received by your firm and whether consideration of their content has been included in your RFQ. The letter must be signed by an officer of the firm who is authorized to bind the firm to contract and shall contain a statement to this effect;

B. Firm Qualification and Experience – Discuss the firm's experience and history in performing engineering services in a timely manner, particularly for other governmental agencies in the past Two (2) years. Discuss the firm's uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

C. Team Member Qualifications and Experience – Submit resumes summarizing qualifications and experience of project manager, key staff and any support staff likely to be assigned to the work.

D. References – Provide at least three (3) references (names and current phone numbers) from recent work and List all past projects with the City of Edinburg for each proposed team member. Include a brief description of the projects associated with the reference, and the role of the individual.

E. Insurance - Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. A list of any insurance claims against the firm within the past 5 years.

F. Professional Services Agreement – Provide a statement that the Professional Services Agreement has been read, that the firm will meet the prerequisite insurance requirements, and the firm, if selected, agrees to enter in to such agreement.

G. Contact Information – Each firm must submit the firms two (2) different contact information (Name, Title, Address, Phone Number, Mobile Number, and Email Address).

H. Presentation – Electronic submittal only.

CONFLICT OF INTEREST

CHAPTER 176 OF THE TEXAS LOCAL GOVERNMENT CODE

Effective January 1, 2006, Chapter 176 of the Texas Local Government Code requires that any vendor or person considering doing business with a local government entity disclose in the Questionnaire Form CIQ, the vendor or person's affiliation or business relationship that might cause a conflict of interest with a local government entity. By law, this questionnaire must be filed with the records administrator of the City of Edinburg not later than the 7th business day after the date the person becomes aware of facts that require the statement be filed. See Section 176.006, Local Government Code. A person commits an offense if the person violates Section 176.006, Local Government Code. An offense under this section is a Class C misdemeanor.

For more information or to obtain Questionnaire CIQ go to the Texas Ethics Commission web page at
https://www.ethics.state.tx.us/data/forms/conflict/CIQ.pdf

*Response required

4.9. If awarded the 1295 form will need to be provided.*

CERTIFICATE OF INTERESTED PARTIES (Form 1295)

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016. For more information go to the Texas Ethics Commission web page at

B - Rules for Electronic Bidding

STATE OF TEXAS §

COUNTY OF HIDALGO §

CITY OF EDINBURG §

AGREEMENT BETWEEN THE CITY OF EDINBURG AND CONSULTANT FOR PROFESSIONAL ENGINEERING SERVICES PURSUANT RFQ NO. XXXX-XXX

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit “B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

SECTION XXI
NOTICE OF GOVERNING LAW FOR STATE AND FEDERAL GRANT PROJECTS

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

RE: QUALIFICATIONS FOR RFQ 2026-7 PROFESSIONAL ENGINEERING SERVICES

Dear Members of the Selection Committee:

The City of Edinburg continues to experience remarkable growth, solidifying its role as the heart of the Rio Grande Valley and a thriving hub for families, commerce, and opportunity. Ardurra Group, Inc. (Ardurra) is excited about the opportunity to provide Professional Engineering Services and support the City in its mission to deliver reliable, high-quality infrastructure to its residents. As a firm deeply rooted in South Texas, we understand the unique challenges and opportunities that come with the region's growth, and we are eager to bring our expertise to Edinburg as a trusted engineering partner. There are multiple instances where we can work alongside the City to undertake projects that will not only improve the quality of life within Edinburg, but also instill a sense of pride among your citizens as the community continues to flourish. As an experienced engineering firm with more than four decades of experience performing similar services for numerous Texas cities, and having delivered over $5 billion and 2,500 engineering projects across the state in the last decade, Ardurra provides a full range of engineering and support services that can be utilized to help support the City's vision and growth. Specifically, Ardurra offers the following:

- **A QUALIFIED, KNOWLEDGEABLE, AND RESPONSIVE PROJECT MANAGER.** *Ignacio Hinojosa, PE, Project Manager, has over ten years of experience in the planning and design of roadway, water, wastewater, utility, and traffic control projects across southern Texas. A native of the Texas–Mexico border region, he brings strong local insight, established regional partnerships, and a proven ability to deliver projects ranging from $10,000 to over $40 million. Ignacio is a strong communicator with an understanding and experience with all types of projects ranging from streets, drainage, water, wastewater, utility infrastructure improvements, and day-to-day engineering services.*
- **A FULL-SERVICE PROJECT TEAM THAT WILL PROVIDE UNMATCHED SERVICES NEEDED BY THE CITY.** *We have engineering planning, design, environmental, permitting, structural, survey, architectural, and construction management professionals that can respond quickly to the City's needs. Our team is specifically structured to serve Rio Grande Valley municipalities, with local presence and dedicated resources that ensure rapid mobilization and continuity of service.*
- **A LOCAL REPRESENTATIVE WITH RIO GRANDE VALLEY EXPERIENCE AND COMMUNITY AWARENESS.** *Roel "Roy" Rodriguez, PE, Client Service Manager, has extensive experience and knowledge of what it takes to deliver successful projects in the Valley. His understanding of risk assessment, cost estimating, and project management ensures projects will meet budgets and stay on schedule. Roy and Ignacio will work together as a dynamic team, fully committed to meeting all of the City's project needs with efficiency and excellence.*
- **OUR COMMITMENT TO PROVIDE QUALITY AND RESPONSIVE SERVICES.** *Ardurra has a proven track record as a responsive firm committed to meeting project schedules and budgets. Our large number of repeat clients — including long-standing relationships with the Cities of Corpus Christi, Del Rio, Eagle Pass, Pharr, Laredo, and others throughout the region — is an indication of the trust and confidence that our clients place in us. We have a record of providing accurate, fast, and value-driven services that will meet the City's schedules and budgets.*

Ardurra is thoroughly committed to providing exemplary engineering and responsive service to the City of Edinburg. Should you have any questions or require additional information, do not hesitate to contact me at **956.251.9985** *or* **ihinojosa@ardurra.com** *or Roy Rodriguez at* **956.279.0206** *or* **rrodriguez@ardurra.com**.

Sincerely,

Ignacio Hinojosa, PE
Project Manager

Roel "Roy" Rodriguez, PE

Firm Profile

Ardurra is a full-service engineering firm, specializing in the planning, design, construction, and management of roadways and streets, water facilities, wastewater facilities, traffic signal systems, and drainage systems.

We established the firm to provide the most efficient delivery of client-driven, innovative and customized solutions to municipalities. Formed by a group of seasoned professionals, Ardurra's leadership brings over 47 continuous years of proven, trusted engineering services in Texas. Today we are a group of approximately 2,600 professionals operating in offices coast to coast with local control and empowerment to respond quickly to your needs. In 2017, Ardurra was established as an independent company formed by the merger of like-minded firms with distinguished histories dating back to 1977.

Ardurra brings strong leadership backed by expert support to provide superior technical and client services to the City of Edinburg. Work will be performed from our Laredo office and supported by subject matter experts from our Corpus Christi, San Antonio, and Houston offices.

Due to continued growth, Ardurra has expanded our service offerings both locally and nationally; however, maintaining the "local firm" client service model is of the utmost importance. Not only does Ardurra offer some of the most experienced Texas-based engineers, but we are one of the largest public works and civil firms in Texas with more than 360+ engineers, designers, and support staff solely dedicated to municipal services.

In its 47 years of service, nearly 95% off all Ardurra clients are from the public sector. We understand the needs of local governments and their citizens, and are cognizant of the many local, state and federal regulations that govern our work, including the Texas Administrative Code; Texas Commission on Environmental Quality Rules and Regulations; Environmental Protection Agency Rules and Regulations; TxDOT; Standards, and Specifications; AWWA standards; and City of Edinburg standards manuals. Most of all, we understand your fiduciary responsibility to your constituents, and we will work in partnership with you to provide the best value in the shortest time frame to make sure your projects are successful.

Ardurra would like to be considered for:

- *General Civil Engineering*
- *Structural Engineering*
- *Traffic Engineering*
- *Electrical Engineering*
- *Construction Engineering Inspection*
- *Water & Wastewater*

Water & Wastewater

Proven Experience with Water & Wastewater Utility Engineering On-Call Consultant Service Contracts. *Ardurra has delivered successful water and wastewater projects across 50+ Texas communities.*

Ardurra's Water and Wastewater Utility Engineering On-Call Services include:

Water Services

- Transmission and Distribution Systems
- Water Treatment
- Booster and High-Service Pump Stations
- Ground Storage Tanks and Wells
- Water Reuse Projects and Quality Monitoring
- Regulatory Compliance and Taste/Odor Mitigation

Wastewater Services

- Treatment Plant Design and Upgrades
- Sanitary Sewer Lift and Pump Stations
- Conveyance Systems and Odor Control
- Biosolids Management and Nutrient Removal
- Pretreatment Programs and Permitting Support
- Hydraulic Modeling and Capacity Planning

General Civil Engineering

ROADWAY & STREET DESIGN SERVICES

Ardurra's professionals bring decades of fierce representation and advisory services for municipal clients in Texas and around the world. We have represented our client's interests each and every step, guiding them through relevant policy, risk, cost, technical, public acceptance, and service quality factors affecting the aging infrastructure.

Ardurra has provided roadway and street design that consisted of road and pavement design, pavement markings design and ADA design. We work collaboratively with the City and your stakeholders to develop and implement the most cost-effective, technically sound, long-term sustainable infrastructure solutions.

HYDROLOGY & HYDRAULICS

Municipalities in South Texas face unique hydrologic challenges due to the region's variable climate, flat terrain, and clay-heavy soils that contribute to low infiltration rates and high surface runoff. Ardurra's hydrology and hydraulics team includes subject matter experts with multiple decades of experience in watershed and drainage analysis, stormwater infrastructure improvements, floodplain management, master drainage planning, erosion and sediment control planning, and hydraulic modeling of existing and proposed infrastructure. We integrate sound hydrologic and hydraulic analysis into every stage of civil engineering—from big-picture planning through design and construction—helping municipalities make smarter, safer, and more cost-effective infrastructure decisions while meeting stringent regulatory standards.

Traffic Engineering Services

Ardurra has a unique blend of expertise in all aspects of traffic engineering that includes design of traffic signals, innovative intersections, warrant studies, intersection safety improvements, signal timing, ADA ramps, signing, pavement markings, crash analysis, traffic impact analysis, auto-turn analysis, and developing PS&E with agency project manuals. Our traffic engineers have been involved in all phases of the project life cycle and are able to provide valuable input and guidance.

Ardurra's design capabilities range from complex multilevel interchanges to urban arterial reconstruction to complete streets. We also provide specialized experience in various types of Intelligent Transportation Systems (ITS) and systems integration including computerized traffic signal systems, street, light rail transit, advanced traffic management systems, and automated travel information systems. We are the only firm with an in-house traffic signal lab to test and evaluate traffic signal equipment before it is deployed in the field. Our clients have relied on our expertise in comprehensive planning, engineering design, and construction management to provide safe and efficient transportation solutions.

Specific traffic engineering services that will be available to the City of Edinburg would include:

- Traffic and Warrant Studies
- Traffic Analysis
- Traffic Control Plans
- Traffic Engineering Studies & Forecasting
- Traffic Impact Studies
- Traffic Standards Development
- Traffic Signal Timing Plans
- Traffic Simulation

Construction Engineering Inspection (CEI)

Ardurra's proven comprehensive management approach starts by pro-actively preventing measures that historically result in change orders, budget overruns, delays, scheduling problems and design errors, while keeping the client's best interest at the forefront. Ardurra remains mindful of each project's goals and objectives while serving as the client's representative. Ardurra's personnel balance the fundamentals of construction with the latest technologies and materials and utilize state-of-the-art computer systems and software necessary to plan and manage all phases of construction. Services include Resident Project Representative (RPR) Services; Contractor coordination; Scheduling and estimating; Pion & Constructibility review; Quality control and assurance; Document control and review; Change order management; Construction oversight; Safety management; and Value engineering.

"I am always coming up with something new and Ardurra is able to respond promptly to provide what I need in a timely and professional manner. "

—MELINDA MORITZ
DIRECTOR OF PUBLIC WORKS
CITY OF LEON VALLEY

Structural Engineering

Ardurra has delivered structural solutions across Texas through on-call contracts and standalone projects, working with local governments, state agencies, and private sector clients. Our project experience demonstrates our ability to navigate local construction conditions, regulatory constraints, and multi-stakeholder coordination requirements.

Ardurra's structural engineering team provides comprehensive analysis, design, and rehabilitation services for municipal infrastructure, including water and wastewater facilities, retaining walls, pump stations, and flood control systems. Our designs prioritize resiliency, sustainability, and cost efficiency, ensuring constructability and long-term performance while adhering to the Municipal Design Criteria.

To deliver high-quality, tailored solutions, we apply advanced structural modeling and analysis techniques for site-specific challenges, evolving regulatory requirements, and environmental constraints. Whether designing new municipal buildings, rehabilitating aging infrastructure, or integrating flood-resilient solutions, Ardurra develops cost-effective structural systems that enhance safety, functionality, and long-term durability.

Beyond municipal infrastructure, our structural engineering expertise spans a diverse range of facilities, including commercial, public, industrial, and institutional developments. Our portfolio includes office buildings, educational institutions, healthcare centers, transportation structures, flood control infrastructure, and public works facilities. This broad experience allows us to apply industry best practices and innovative design strategies to meet the specific challenges of the City of Edinburg's built environment.

Electrical Engineering Services

Ardurra takes a comprehensive, collaborative, and solutions-driven approach to delivering electrical engineering services for the City of Edinburg. Our process begins with a detailed assessment of project requirements, local regulations, and existing infrastructure, ensuring all designs align with City of Edinburg standards, NEC and NESC codes, and energy efficiency goals. We work closely with City staff, utility providers, and stakeholders to integrate safe, cost-effective, and future-ready electrical solutions into municipal projects, minimizing disruptions and optimizing long-term performance.

Our team prioritizes constructability, system resilience, and sustainability, incorporating energy-efficient LED lighting, backup power solutions, smart grid technology, and SCADA system integration to enhance public safety and operational reliability. Our Laredo-based presence provides rapid response times, on-site technical support, and seamless coordination with contractors and regulatory agencies. Whether designing traffic signal systems, power distribution networks, or electrical upgrades for public facilities, Ardurra ensures reliable, scalable, and high-quality solutions that support the City of Edinburg's infrastructure growth and modernization efforts.

Ardurra's Electrical Engineering department provides various electrical design and analysis services tailored to municipal infrastructure, roadway systems, public utilities, and water/wastewater facilities. Our team specializes in power distribution, lighting design, emergency power solutions, SCADA system integration, and intelligent transportation systems (ITS), ensuring the City of Edinburg's electrical infrastructure remains reliable, energy-efficient, and future-ready.

Project Leadership, Reporting Responsibilities & How Ardurra Will Interface with the City

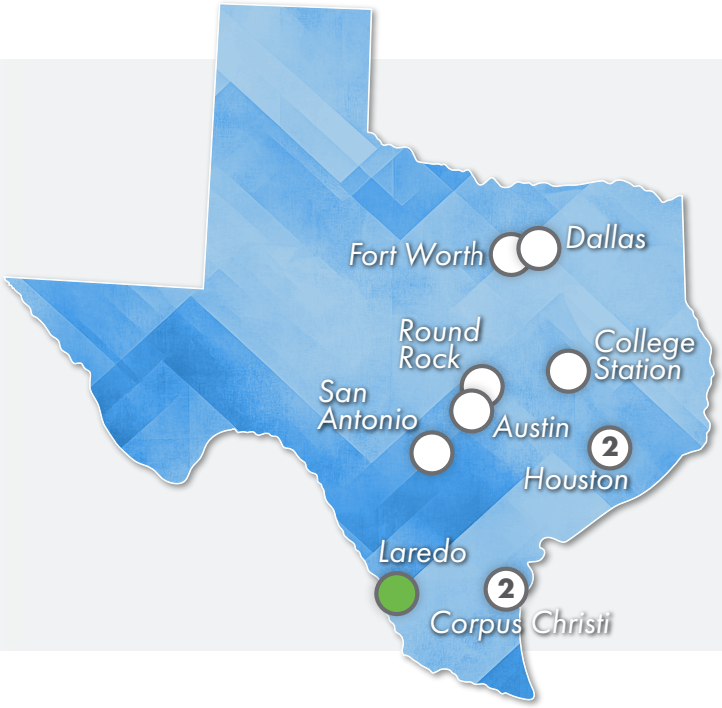
As one of the most experienced Texas design firms, Ardurra brings the strongest portfolio of lessons learned on similar roadway, water, wastewater, surveying, traffic, drainage, and public works projects, and we intend to partner with the City to enhance the infrastructure. Our Project Manager, Ignacio Hinojosa, PE, will lead and manage the internal team and all disciplines, and he will be responsible for all technical content and communication. Our Client Services Manager, Roel "Roy" Rodriquez, PE, MPA, will also be available for any and all communication concerns. Once assigned a project, we anticipate regular meetings as needed to discuss project progress. Ardurra will keep a continuous running decisions log to aid in recording process and design decisions along the way.

We have successfully utilized an electronic project management tool through Autodesk BIM 360. We will deploy similar technologies for the City like SharePoint site, Teams, etc.

Each team will be assembled based on the project and will work together to accomplish the primary goal: completing the project efficiently, on time, and within budget

The Ardurra project team is also capable and prepared to address and execute projects with aggressive schedules that need to be met under any circumstances. The ample number of engineers depicted in the organizational chart, backed by the resources of our entire firm, will be able to provide prompt service to the City and to respond and produce deliverables in short time frames during emergencies. Our project team is prepared to promptly produce multiple deliverables at the same time.

Work Products



Ardurra will provide quality work products such as reports analyses, correspondence, submittals, construction drawings and other documents produced in connection with all our services. We are also committed to transparency regarding staffing. Should there be any proposed changes to key personnel during the project, Ardurra will communicate those changes in writing to the City of Edinburg for prior approval. This ensures continuity and consistency in project execution, helping to build a strong, trust-based relationship with the City.

Responsiveness

Ardurra's team has been formed to assure aggressive schedules will be met, even under the most pressing circumstances. There is no commitment that would hinder progress of producing these services in a timely manner. Ardurra will provide answers and solutions to questions and issues for the City in a prompt and concise manner. Ardurra takes pride in the quality of our products and services.

Ardurra understands the complexity of managing projects with multiple stakeholders. We appreciate that our role includes meeting the schedule and budget expectations of City leaders while balancing the operational needs of City staff. We take this responsibility very seriously, maintaining open communication lines and soliciting stakeholders' input throughout each project. This approach fosters a collaborative working environment and ensures that project goals remain aligned with City priorities.

Our Laredo office will serve as the primary location for this project, supported by our other Texas offices, allowing us to bring together local expertise and the depth of a nationwide organization.

TECHNICAL APPROACH

Project Resource Planning

Ardurra understands that proper planning is essential to maintaining key staff availability so that completion of a project will progress in a timely and organized manner and in accordance with the established schedule. We closely monitor staff workload against current and projected staff commitments and these projections are factored into decisions of who to propose for new assignments. Using the tools we have available to predict project commitments, we are able to take on new work or adjust staffing levels as necessary to maintain a high level of service for our clients. Our Workload Projection Calculator distributes current and anticipated projects' required manpower resources over each project's anticipated schedule to compare required vs. available resources. Using this tool, our managers can predict staffing needs for the upcoming weeks and months to make sure that we have adequate manpower available for our awarded projects and probable contracts and work orders.

The Project Manager, Ignacio Hinojosa, PE, and Client Service Manager, Roy Rodriguez, PE, MPA, will work together as a dynamic duo, fully committed to meeting all of the City's project needs with efficiency and excellence. Ignacio "Nacho" will lead the overall project administration and coordination, serving as the primary liaison between the City and the design team, while ensuring the City's priorities remain central throughout the process. Drawing on extensive project management experience, our team will implement tailored tools, forms, and resources to streamline project execution to ensure timely and cost-effective delivery of specialized services, the team will strategically engage subject matter experts as needed throughout the project. These experts will be brought in to address specific technical challenges, regulatory requirements, or unique project components ensuring high-quality outcomes without unnecessary delays or costs. This resource driven approach allows the team to remain flexible and responsive while maintaining rigorous standards across all project phases.

At a minimum, the team will provide monthly status reports that include updates on active project schedules, cash flow tracking, completed tasks, upcoming activities, and any emerging issues or information needs. Microsoft Project will be used to plan and track progress, facilitate collaboration, and keep the project organized and on schedule.

In addition to the technical approach we will be presenting throughout this section, Ardurra considers the behind the scenes administrative support just as important to a successful project. Having worked recently on a range of projects funded by several different sources, including CDBG, RESTORE, ARPA, SRF, we have the understanding and experience to assist the City throughout the entire project life cycle. This will allow us to respond promptly to requests and to be proactive throughout the planning, design, bidding and construction phases - saving time and money.

Project Understanding

We understand the City of Edinburg periodically has a need for general types of projects that require various types of engineering disciplines. We are prepared and ready to facilitate these projects with the utmost of integrity and purpose.

Ardurra, like many municipalities in South Texas, recognizes the importance of building strong partnerships with neighboring communities, private industry, and local agencies. Through these collaborations, we are committed to developing reliable, forward-thinking infrastructure that serves current needs while ensuring long-term sustainability for future generations.

Our commitment to sustainable infrastructure extends across multiple sectors. In transportation, we prioritize the development of multimodal networks that reduce traffic congestion, lower emissions, and enhance connectivity by promoting walkability, public transit, and alternative mobility options. One notable success is our work in Harlingen, where we delivered a comprehensive traffic operations and safety analysis. This effort helped establish a community supported vision for a key corridor and resulted in a preferred design concept, complete with preliminary engineering to guide future improvements.

At the heart of our work is a commitment to honoring the cultural heritage and identity of the region while advancing infrastructure that is adaptable, resource-efficient, and resilient in the face of climate change and population growth.

For a typical /standard design project our approach consists of:

Preliminary Design
0 - 30% - 60%

- Ecological and geotechnical investigations
- Subsurface Utility Engineering (SUE)
- Detailed design calculations
- Equipment and material selection
- Drawing and specification development
- Cost estimating
- Permitting pre-application meetings
- Identify hardening / resiliency opportunities

Final Design
60 - 100%

- Define construction sequencing / phasing
- Complete drawings and specifications
- Obtain permits
- Value engineering
- Final cost estimates

Construction Phase

- Moderate pre-construction meeting
- Submittal and schedule of value review
- Respond to RFIs
- Provide part/full time construction observation
- Assist with pay applications, change orders/claims
- Witness testing
- Assist with startup, training, and O&M manuals
- Provide operations assistance
- Develop record drawings and final certifications

Ardurra understands that every region in Texas is rich with history and is committed to preserving that heritage while implementing sustainable improvements to support growth. By integrating eco-friendly transportation solutions, advanced water and wastewater management systems that conserve resources, and green construction practices that minimize environmental impact during the building phase, Ardurra professionals work to responsibly enhance quality of life by delivering innovative, future-ready civil engineering solutions that bring pride to every generation through thoughtful and sustainable development.

We have developed a comprehensive three-phase scope of work designed to support a proactive, results-driven approach to project delivery.

The first phase, the **Preliminary Phase,** *encompasses all foundational tasks required to initiate the design process. This includes a thorough review of project objectives, site conditions, regulatory considerations, and stakeholder input. We will facilitate collaborative discussions with all key parties to define a scope that aligns with multi-tiered needs, operational priorities, and long-term goals. This phase will conclude with a value engineering effort in coordination with the City to establish the most cost-effective strategy that maximizes return on investment.*

The second phase, the **Design Phase,** *involves the development of detailed plans, technical specifications, and supporting documentation necessary for implementation. All deliverables will be prepared in alignment with applicable codes, standards, and project requirements, ensuring constructability, efficiency, and long-term performance.*

The final phase, **Construction Administration,** *includes providing the City with comprehensive oversight and quality assurance to ensure full compliance with approved plans and specifications. This includes regular site inspections, progress monitoring, contractor coordination, and issue resolution as needed to maintain schedule, budget, and quality expectations.*

This methodology is intentionally structured to be scalable and adaptable. Once the scope for a particular project is fully defined, we will further tailor our approach to address project-specific challenges and opportunities, ensuring efficient execution and optimal outcomes.

As described earlier in our proposal, Ignacio Hinojosa, PE, will lead our team as Project Manager for City of Edinburg. His experience includes working with municipalities and public agencies on numerous projects including streets, drainage, flood control, traffic control plans, development standards and plan and plat reviews, as well as representation at City Council meetings as required.

Ignacio and the team assembled for this project, know the City of Edinburg and understand the vision and high level of working standards that the City has. Nacho and the team also take great pride in being considered an extension of City staff coordinating our projects, coordinating with other consultants, and providing input or deliverables always in the best interest of the City.

Ignacio will attend City meetings and meet with staff when requested to understand the City's needs and respond to technical questions. When assigned a specific work task, depending on the nature of the task, we will perform the work on a "time and materials" basis using agreed to rates, or we can develop a "Task Order" that defines the scope of the task and establishes a budget and schedule for performance of the task.

Project Reporting

Our PM, Ignacio, and Technical Director, Byron Sanderfer, PE, CFM, will provide to the City staff, on a bi-weekly basis, a one-page written "Project Status Report" to ensure that Engineering, Public Works, and other staff are aware of the current status of all projects. The weekly "Project Status Report" will include:

- Description of the project
- Work performed in the past week
- Work planned to be completed in the following week
- Issues that need resolving to move the project forward
- Assessment of the project scope adequacy, budget and schedule

The Project Status Reports will be e-mailed to the City for review. The City can request clarification on any of the projects, if needed. Below is an example of the spreadsheet that is currently used by Ardurra to report to the City of Edinburg.

Project Management, Communication & Responsiveness

The heart of any timely project is a detailed and accurate schedule. The key components to minimizing changes involve carefully defining the project scope with the City of Edinburg. Ardurra's project manager, Ignacio, will work with the City's staff to confirm all key steps, phases, milestones, approvals, and project meetings for the project, then incorporate the items into a detailed schedule. Ardurra's scheduling method will summarize consistent and disciplined thinking in a systematic manner. This will ensure the appropriate number of resources have been allocated.

QA/QC Program

The primary goals of our Quality Control Program are to consistently achieve the high standards of technical excellence expected by the City. Ardurra employs a quality control program that includes early involvement in project scoping to establish a coherent review process.

The quality assurance/quality control plan for a project includes the following items:

- **Project Delivery Guidelines.** Project delivery guidelines are established for project assignments to define the common vision of all team members for completion of each element of the project. A project definition workshop will be held with the City and stakeholders to establish a clear understanding of the specific needs for each project element and the appropriate delivery method to meet the project requirements.
- **Project Management Plan.** Our project manager and task leaders will develop a detailed set of project instructions for execution of the work. The instruction set will define key project information and milestones for all project team members.
- **QA/QC Team.** An inter-disciplinary team of qualified professionals including subconsultants will be assigned as quality control reviewers for each discipline. Subconsultants for Ardurra have been employed for years and on numerous projects.

Ardurra uses proprietary checklists for each aspect of the project and are changed to the specific needs of the work.

Fundamental aspects of our QC process are to conduct integrated interdisciplinary (including subconsultant) reviews at key milestones to avoid potential conflicts between disciplines, and to establish a design hold in coordination with the City at the correct milestone to ensure meeting quality, schedule, and budget.

Budgeting development for the proposed project includes the knowledge and experience that Ardurra possesses to execute the type of work involved in the proposed maintenance facility. Ardurra develops detailed scope of work and reviews with all team members to assure continuity. The proposed Opinion of Probable Construction Cost (OPCC) is then compared to historical and similar work to assure that the budget will provide for the expected work. Budgeting in today's supply chain environment can be challenging, but Ardurra's experience will provide guidance to the City for construction estimates.

Scheduling for this project will be secure and predictable with Ardurra's knowledge of the current construction market and issues involving execution of contracts. Ardurra will work with City staff to confirm key phases milestones, approvals and assure timely meetings to resolve any scheduling issues. With Ardurra's proven and consistent history of project construction delivery, the City can be assured of project completion.

Ardurra makes better use of dollars by creating and managing a master schedule with milestones at the strategic level, along with short-interval schedules. The schedule will specify the start and finish dates for each activity, as well as the interlocking relationships between activities. This effective take on the Critical Path Scheduling method will be used as a management control tool for defining, integrating and analyzing what must be done to complete each project on time and within budget. Ardurra will work with the City of Edinburg to create a smooth, more reliable workflow that maximizes productivity and minimizes waste.

Ardurra's team has been formed to assure aggressive schedules will be met, even under the most pressing circumstances. There is no commitment that would hinder progress of producing these services in a timely manner. Ardurra is committed to provide answers and solutions to questions and issues for the City in a prompt and concise manner.

Ardurra will produce deliverables for the City's review, coordination and feedback at agreed milestones. The City can also contact Ardurra's Laredo office at any time as needed. Ignacio Hinojosa and the rest of our team will be working first-hand on this project and may provide information, attend meetings, conduct investigations, and conduct site visits in a moment's notice.

Ensure Quality & Correctness of Calculations, Reports, Studies, Drawings, Specifications & Documents

To ensure project requirements are carried through the design and construction phases, Ardurra employs internal processes during design, coordinates with the client, and ensures communication between the design team and construction personnel. Internally, designs are reviewed by the supervising engineer several times throughout each phase. The reviews include line-by-line checks of reports and drawings to ensure completeness, and conformance to the project scope, schedule, and budget.

Key Individuals Responsible for QA/QC

Byron Sanderfer, PE, CFM, along with the Ardurra project team will review all design aspects, anticipate performance of proposed improvements, and note any future hindrances to operation and maintenance practices. Also, alternatives and design modifications will be vetted to address concerns found during review for consideration by the project team. Throughout planning and design, documents are coordinated and reviewed with the client and stakeholders to discuss project compliance, goals, and if requirements as designed provide expected scope conformity to the City. Ardurra's quality assurance program enhances the quality and accuracy of the final product, which in turn eliminates unnecessary change orders and constructability issues.

Approach to Facilitating the Regulatory Process

Current regulations and associated agencies applicable to project scope activities are defined by Ardurra staff after the project kick off meeting. Specific regulatory entity permits and approvals required for any projects through the construction phase will be defined during the preliminary engineering phase along with typical lead times and contact information.

Time frames including deadlines required to secure permits and approvals will be input into project schedules as they are developed during the design phases so it doesn't hinder the overall schedule.

As an example, Ardurra has worked on multiple projects that have required regulatory coordination.

After a Preliminary Engineering Report (PER) is accepted by the City of Edinburg, Ardurra will contact appropriate regulatory agencies and public entities to confirm that readily available and previously distributed regulations and requirements, as well as past policies, are still current. Submittal of documents to secure permits and approvals will depend on the levels of design required to produce supporting documentation in final form, while observing the project schedule. Ardurra will monitor progress of its submittals and address any questions from regulatory agencies and entities. If necessary, Ardurra will meet with agencies and entities to review the project scope and submittal documentation to resolve issues.

Ardurra's staff regularly secures permits and approvals from counties, state and federal agencies such as the Texas Department of Transportation, the State of Texas Office of Rural Community Affairs, EAA, TCEQ, the Army Corps of Engineers and other agencies on a regular basis. Ardurra has been highly successful in securing approvals from regulatory agencies.

Ability to Respond in an Expedited Manner

The ability to meet deadlines is crucial to any project. Ardurra uses its allocated time, cost and resources to estimate the work needed, and to manage risks as the project is implemented. We have immediate staff availability to commit to these assignments. As projects progress, Ardurra's project manager will continue to pro-actively manage risks, issues, staffing and communication.

Certain projects may be very diverse, requiring several disciplines of professional services to complete. Each design team will be assembled based on the project assignment and will work well together to accomplish the primary goal: completing the project efficiently, on time and within budget.

The Ardurra project team is also capable and prepared to address and execute future projects with aggressive schedules that need to be met under any circumstances. The ample number of engineers depicted in the organizational chart, backed by the resources of our entire firm, will be able to provide prompt service to the City of Edinburg and to respond and produce deliverables in short time frames during emergencies. Our project team is prepared to promptly produce assorted deliverables at the same time.

Additionally, some future City of Edinburg projects may require prompt initial response and extended work hours on very short notice to complete and prevent broadening of an existing problem in order to maintain regulatory compliance. Ardurra staff is adept at accessing issues quickly in emergency situations so they can quickly develop alternatives for the repair and replacement of infrastructure in short time frames.

Ardurra has held and currently holds work order type contracts with other public entities and has delivered and continues to produce deliverables for emergency-type projects in expeditious time frames for those entities.

Ardurra offices have and will continue to support each other as needed with supplementary staff support during design or construction phases to complete project deliverables and commitments within committed time frames.

Construction management activities for assigned projects will be readily performed by designated project engineers, engineers in training, or construction observers based in Ardurra's Laredo and San Antonio offices.

Above all, Ardurra will provide creative, practical solutions that deliver innovation and value to the City. We will oversee all projects to assure design work is properly implemented and not misinterpreted in the field by contractors or independent construction observers. Close coordination with the City, the design team, our subcontractors, and the contractor will assure each project's success, delivering ultimate value to the City of Edinburg.

PRELIMINARY PHASE SERVICES

- **Hold project initiation meeting:** Initial consultation will be held with the City of Edinburg staff to detail contacts, coordination, project schedule, and specific project issues and needs. The extent of the preliminary engineering activities and project limits will be defined during this initial meeting. Existing concerns, preferred materials and preferences for design will be discussed.
- **Assemble and review existing data:** All existing data related to the project will be assembled and reviewed (e.g., all available water, wastewater, electric, cable and gas utility plans for the area, existing data and interview data from the City, utility maintenance records, utility system and right of way maps, etc.).
- **Establish initial design criteria and design constraints:** Develop the specific criteria for the production of plans, specifications and estimates. Ardurra will incorporate the gathered data into its design to reduce the need for change orders.
- **Evaluate existing data:** This will include soils investigations, field surveys, and data provided by the City of Edinburg. Ardurra will gather any additional information required for the project.
- **Conduct physical inspections:** Design personnel will go to the field with available information to determine problem areas and areas where additional information is needed. This is a very important step to completely understand a project.
- **Report/Summary:** Review, prepare and finalize preliminary cost estimates and schedules for implementing the recommendations.

DESIGN PHASE SERVICES

- **Prepare detailed construction drawings in accordance with established design criteria and good engineering practices:** Key features of the drawings will include location maps, written general instructions to the Contractor detailing critical requirements, plan sheets for utility improvements, standard details, miscellaneous details, etc.
- **Prepare detailed specifications and contract documents in accordance with established design criteria and good engineering practices:** Key features of the specifications and contract documents will include a complete contract document package using any City requirements, with specific insurance requirements, safety requirements, limitations of authority, and related matters, as well as technical specifications containing detailed requirements for construction materials, execution, measurement and payment, submittals, and related project requirements.
- **Regulatory Agencies:** Submit required information to regulatory agencies for review and approval.
- **Conduct second physical inspection:** Design personnel would go to the field with the final plans and visually verify everything works on the ground. This can avoid costly construction change orders.
- **Cost Estimates and Schedules/Bidding:** Using the prepared bid forms and the most current bid prices from similar projects, Ardurra will prepare detailed cost estimates and schedules, then work with the City in requesting, receiving and reviewing bids.

CONSTRUCTION MANAGEMENT & CONSTRUCTION OVERSIGHT

Ardurra's team will attend the pre-construction meeting. Locations of proposed improvements in areas as worked with multiple variations of project delivery methods for the City of Edinburg with potential construction challenges will be discussed, critical areas requiring extra attention during design will be identified, and Ardurra will review the contractor's materials submittals to ensure compliance with specifications. Recommendations for payment will be based on established, completed milestones, and our team will prepare any necessary change orders. Ardurra will respond to requests for information submitted by the contractor to maintain construction schedules.

Ardurra will perform inspections at regular intervals as outlined in the contract and at the completion of each milestone, and the contractors progress and quality will be monitored. Ardurra will meet monthly with the City and the contractor to go over the pay requests and address any construction issues.

Governmental Agency On-Call Contract Experience - Past 2 Year Experience

Ardurra understands On-Call Governmental Contracts and over the past two years have served the following clients in South Texas:

- City of Laredo
- City of Eagle Pass
- City of Del Rio
- Webb County
- City of San Antonio
- City of Leon Valley
- City of Converse
- City of Helotes
- City of Houston
- City of Corpus Christi
- City of Alice
- Bexar County

Ardurra has successfully delivered over 50 projects for these entities in the past 2 years. These projects have ranged from $40,000 in construction costs to 10M+ through these on-call contracts.

Ardurra will rapidly mobilize a dedicated, multidisciplinary on-call team to meet the City of Edinburg's expedited schedules across all civil engineering disciplines — transportation, traffic, water and wastewater, hydrology & hydraulics, structural, and environmental. We commit immediate staff availability and firmwide resources to quickly assemble discipline-specific teams, manage scope/time/cost, mitigate risks, and deliver concurrent, high-quality deliverables from initial assessment through construction oversight. Our project managers proactively manage staffing, schedule, communications, and issues so projects advance without delay and regulatory obligations are preserved.

Key strengths and discipline-specific capabilities

- **Immediate mobilization:** *ready-to-assign personnel for transportation, traffic, water/wastewater, H&H, structural, and environmental work, with rapid augmentation from Ardurra's regional and national offices.*
- **Multidiscipline coordination:** *integrated teams (e.g., traffic engineers + structural + H&H for roadway and bridge emergencies; SCADA/controls + water operators + environmental for wastewater incidents) to produce cohesive solutions and simultaneous deliverables.*
- **Technical readiness:** *quick-turn conceptual and construction-support designs, hydraulic modeling and flood routing, traffic control/detour plans, pump/bypass designs, structural shoring/temporary repairs, and environmental sampling/permit coordination.*
- **Regulatory and funding support:** *Depending on the projects requirements, Ardurra provides the necessary compliant documentation, permitting support, and cost documentation to accelerate reimbursements and approvals of regulatory agencies.*
- **Field & construction support:** *construction management, inspection, and quality assurance from regional offices to ensure designs are implemented correctly and promptly.*
- **Extended-hours & emergency response:** *staff prepared for immediate initial response, extended work hours, and rapid alternative development to contain issues and maintain compliance.*
- **Continuity & stakeholder coordination:** *a committed core management team for project duration and close collaboration with City departments, contractors, and subcontractors to meet schedule and budget goals.*

Ardurra's depth of engineers, cross-discipline expertise, and proven emergency performance ensure the City of Edinburg receives timely, practical, and cost-effective civil engineering solutions under accelerated schedules.

While all projects will be managed out of Laredo, below is a list of the Offices that will be completing the design alongside our project manager:

WORK CATEGORY	OFFICE LOCATION				
	LAREDO	CORPUS CHRISTI	SAN ANTONIO	HOUSTON	MERCEDES*
Street Infrastructure Evaluation and Improvements	●		●		
Pavement Management and Improvements	●		●		
Utility Infrastructure Evaluation and Improvements	●	●	●	●	●

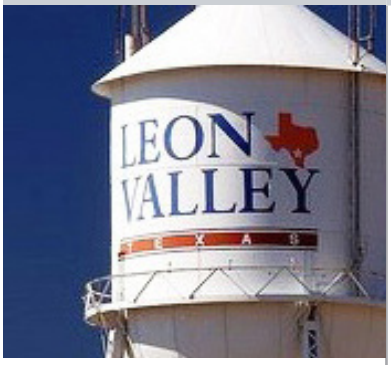
Mercedes, Texas 78570
956-565-4637

GUZMAN AND MUÑOZ ENGINEERING AND SURVEYING, INC. (GMES) *specializes in a broad range of engineering, surveying, and construction-related projects including public works improvement projects in the areas of street improvements, drainage improvements, water and wastewater plants, water distribution and wastewater collection systems, and various surveying projects.*

GMES has also provided engineering and surveying staff support to various municipalities in regard to R.O.W. acquisition, mapping, and surveying. Their list of clients includes nonprofit agencies, housing authorities, municipalities, counties, political subdivisions, governmental agencies (including various school districts), airports, and private developers. GMES is very familiar with the economic constraints that are associated with a limited budget. With that in mind, you can rest assured that economic limitations will play an important factor in providing engineering support and advice on any of your projects or program. All of these skill sets are directly applicable for the successful execution of any project assigned to GMES as necessary to complete all projects per your RFQ 2026-7 Professional Engineering Services. GMES brings the talent and depth of approximately 21 employees that includes engineers, surveyors, an environmentalist, planners, technicians, management, and related support personnel. Respectively, the experience of GMES' staff in construction management and the construction industry, knowledge of the funding criteria, and project inspection add to the analytical and project scheduling expertise that is vital to timely and cost-effective project completion.

Relevant Projects:

Owassa Road San. Sewer Line from Sugar Road, East 3,000 L.F, City of Edinburg, TX. *GMES completed boundary and topographic surveys of the project area and conducted a survey of existing utilities that may be affected, GMES developed preliminary construction plans/profiles of the project. We were informed of other unserved areas west of Sugar Road that was being worked on by another firm that would need to discharge into our project collection line. GMES proposed to start the collection line on the east end, at a point within the last unserved property, and proceed west with an 8" sewer line at a minimum slope of 33% for 3,000 L.F. and end at a proposed small grinder pump station at the northeast corner of the intersection of Owassa and Sugar Road. We also proposed 7 manholes. GMES' proposal would allow for a shallower installation of our project and for a connection from the other project west of Sugar Road to the proposed Grinder pump. From the proposed grinder pump station, a 4" discharge force main will proceed east and then north for 2,370 L.F. at the entrance of Amara Hospice and discharge into an existing manhole. GMES also prepared Surveying documents.*



Veterans Blvd Drainage Improvements, City of Edinburg, TX. *Prepared design and surveying for street, drainage, and sewer improvements to Rojas, Santa Maria, and Thomson Road and design of 8.3 acre detention.*

Similar Project Experience

The strong professional culture of project performance at Ardurra, promotes professional results, sharing of knowledge to meet goals and expectations which result in projects that not only flow in a timely manner, but also meet and exceed industry standards. Project documentation in the following list demonstrates work that is delivered on time and meets and exceeds client requirements. Ardurra stands ready to immediately provide excellence in project service delivery to the City, as it has in the past and will continue to do in the future.

	PROJECT NAME	DESCRIPTION	OWNER	DATES
	As-Needed Engineering Services Eagle Pass, Texas	Ardurra serves as the As-Needed Engineering Consultants for the City of Eagle Pass, essentially serving as an extension of staff. Ardurra is responsible for general city infrastructure improvements and maintenance, bridge infrastructure, realignment of roadways, plat reviews, construction plan reviews, park improvements, site development, drainage improvements, and any other services determined by the City. Ardurra has also assisted in securing over $6 million in federal funding for various projects.	City of Eagle Pass Eduardo Soto, PE City Engineer 830.968.2320	2019 - Ongoing
	Professional Engineering Services Leon Valley, Texas	Ardurra is providing civil engineering services for the day-to-day activities as City Engineer for the City of Leon Valley as design engineers, master planners and project managers. The majority of the design and master plan work includes drainage and detention modeling, design, preparation of plan sets, traffic control plans, utility coordination, cost estimates, technical specifications, contract documents and construction management. The majority of the project management work includes reviewing other engineering firms' work associated with drainage, water quality plans, and FEMA CLOMR and LOMR submitted to assure compliance with the City ordinances and federal requirements. As City Engineer, Ardurra reviews Water Pollution Abatement Plans, plats, re-plats, right of way permits, floodplain permits for adherence to local, state and federal compliance, and performs construction inspection for the development associated with these permits.	City of Leon Valley David Dimaline Public Works Director 210.681.1232 x201	2017 - Ongoing
	On-Call General Engineering Helotes, Texas	Ardurra is providing civil engineering services for the day-to-day activities as City Engineer for the City of Helotes as design engineers, master planners and project managers. The majority of the design and master plan work includes drainage and detention modeling, design, preparation of plan sets, traffic control plans, utility coordination, cost estimates, technical specifications, contract documents and construction management. The majority of the project management work includes reviewing other engineering firms' work associated with drainage, water quality plans, and FEMA CLOMR and LOMR submitted to assure compliance with the City ordinances and federal requirements. As City Engineer, Ardurra reviews Water Pollution Abatement Plans, plats, re-plats, right of way permits, floodplain permits for adherence to local, state and federal compliance, and performs construction inspection for the development associated with these permits.	City of Helotes Corey Vullo Public Works Director 210.326.8482	2004 - Ongoing

	PROJECT NAME	DESCRIPTION	OWNER	DATES
	City Engineering Services Castle Hills, Texas	As City Engineer, Ardurra provides civil engineering services for the day-to-day activities for the City of Castle Hills as design engineers, master planners and project managers. The firm reviews and provides recommendations to the City staff regarding plats, re-plats, right-of-way permits, zoning applications, development permits, engineering drawings, design calculations, and performs routine construction inspections for the development associated with these permits. Ardurra also serves as the City's Floodplain Administrator and the City Engineer responsible for commercial and residential development reviews. As the City's Floodplain Administrator, Ardurra performs reviews and provides recommendations for the City regarding floodplain development permits, FEMA CLOMR and LOMR submittals, and drainage plans to check for adherence to local, state, and federal compliance.	City of Castle Hills Chris Duque City Manager 210.293.9673	2014 - Ongoing
	As-Needed Engineering Water Treatment Division and Staff Augmentation Services Laredo, Texas	Ardurra currently provides As-Needed Engineering and Staff Augmentation Services for the City of Laredo's Water Treatment Division. Ardurra is committed to provide the City of Laredo's Utilities Department with the highest level of service through our local Laredo office and multiple offices across the State of Texas. Ardurra provides the following services to the City of Laredo: ▪ Site visit and inspection reports for on-going construction projects which are not part of separate contract agreements ▪ Development of plans, specifications and estimates for projects that are to be determined by the Water Treatment Division ▪ Miscellaneous As-Needed Water Quality, Water Treatment Division facility improvements or field assistance ▪ TCEQ coordination and correspondence ▪ Emergency Response coordination and consulting	City of Laredo Rolando San Miguel Water Treatment Superintendent 956.721.2000	2021 - 2025
	Water & Wastewater On-Call Services Corpus Christi, Texas	Engineering services to supplement the City's staff with personnel and resources to assist with any technical, operational, maintenance, diagnostic, and/or design concerns with City water and wastewater treatment facilities. Assisted the City with multiple tasks, under the direction of the Engineering/Utilities Departments, to ensure that the water and wastewater treatment plants and associated collection/distribution systems remained operational. Services included hydraulic modeling, evaluation of various treatment technologies to determine the best fit for the City, and the design work for the rehabilitation and/or replacement of critical equipment.	City of Corpus Christi Jeff Edmonds, PE Director of Engineering 361.826.3851	2015 - 2021

	PROJECT NAME	DESCRIPTION	OWNER	DATES
	On-Call Engineering Services Bandera, Texas	Ardurra is providing on-call engineering services for the City of Bandera to support the City's infrastructure needs. Services and engineering support includes: support for maintenance street, drainage, water and wastewater infrastructure; developing scopes and budget estimates for capital improvements to water and wastewater systems; assistance with reviewing and responding to TCEQ inquiries related to water and wastewater systems; preparing scopes and budget estimates for CDBG grant applications for improvements to the water and wastewater systems; prepare TWDB Drinking Water State Revolving Fund loan application including preliminary engineering, scoping of improvements and budget estimate; design, bidding and construction phase services for wastewater improvements including lift station replacement; design, bidding and construction phase services for water system improvements including new public water supply well; development of system wide water model; and development review.	City of Bandera Jill Shelton Dickerson City Secretary 830.796.3765	Ongoing
	As-Needed On-Call General Engineering Services Laredo, Texas	Ardurra provided general civil engineering services for construction projects as needed to serve as on-call on a rotation basis including but not limited to prepare surveys, engineering designs, preparation of plans, specifications and estimates for roadways, drainage, traffic safety, water distribution, wastewater collection, environmental, storm water pollution prevention, floodplain, sidewalks, hike and bike trails, etc. for the City of Laredo.	City of Laredo Eliud De Los Santos, PE City Engineer 956.791.7346	2022 - 2024
	On-Call Planning & Engineering Services Bellaire, Texas	Ardurra provided planning, permitting, and development related services for the day-to-day activities for the City of Bellaire. In addition to part-time in-house staff augmentation, the firm reviewed and prepared staff reports to the Zoning Board of Adjustments, City Planning and Zoning Commission and City Council regarding plats, re-plats, permits, site plan reviews, zoning, variance applications, and development permits. The Ardurra team is currently working on a Maser Drainage Plan for the City.	City of Bellaire Travis Tanner Director of Development Services 713.662.8243	2020 - 2023

Ignacio "Nacho" Hinojosa, PE

PROJECT MANAGER

Mr. Hinojosa has more than ten years of experience in the planning and design of roadway, water, wastewater, utility, and traffic control design. Native to the Texas-Mexico border and serving as the Laredo office lead, Mr. Hinojosa takes special pride in acting as an extension of his client's staff and applies his expertise with critical infrastructure improvement projects. He has served as Project Manager and Client Service Manager for the City of Eagle Pass, City of Laredo, Webb County, and Maverick County in water, wastewater, roadway engineering, transportation, traffic engineering, conceptual planning, and bridge infrastructure projects. His relevant projects include the following:

EDUCATION

BS, Civil Engineering, University of Texas, San Antonio

REGISTRATION

Professional Engineer, Texas No. 138711

YEARS OF EXPERIENCE

10 Years

As-Needed Engineering Services - City of Laredo, City of Eagle Pass, Webb County, and City of Del Rio, TX. Mr. Hinojosa serves as Project Manager for numerous projects and services for multiple municipalities and counties. Mr. Hinojosa and his team are responsible for general municipal/county infrastructure improvements and maintenance, bridge and airport construction, inspection, maintenance and improvements, realignment of roadways, plat reviews, construction plan reviews and any other services determined by our clients.

Camino Real International Bridge, Commercial Lane Realignment, City of Eagle Pass, Eagle Pass, Texas. Ignacio served as the Project Manager for the Camino Real International Bridge Commercial Lane Realignment project. He was responsible for the conceptual design of the commercial lane realignment project for the Bridge Department in the City. The commercial lane realignment conceptual design took aim at providing the City with a solution to provide left turning movements of commercial traffic exiting the Camino Real International Bridge. Ardurra team met with City staff and studied the port of entry to identify the issues related to traffic congestion, geometric constraints, real estate constraints, economic development opportunities, and other important considerations to develop a concept that address all criteria. The recommended alternative included grade separation for commercial traffic, increased outbound and inbound capacity, dedicated outbound commercial lane, dedicated Express Pass lane, drainage, and pedestrian infrastructure improvements. Ardurra coordinated with local, state and federal stakeholders to gather input and gain support for the proposed improvements. The successful delivery of this project resulted in the adoption of the conceptual alternative, and the City's pursuit to continue with the process of PS&E for the recommended project.

Eagle Pass Thoroughfare Master Plan – 2025, Eagle Pass, TX. Ignacio served as the Project Manager for the City of Eagle Pass 2025 Thoroughfare Master Plan (TMP), a 20 year plan adopted in November 2025 to guide long term transportation planning and roadway development. The TMP was developed to identify existing and future roadway corridors, establish a clear functional street classification system, guide development review and subdivision design, preserve necessary right of way prior to development, and coordinate roadway planning efforts with TxDOT and the Eagle Pass Metropolitan Planning Organization (MPO).

Zacate Creek 42" Wastewater Interceptor from Zacate Creek WWTP to Chacon Creek Design-Build, Laredo, TX (On-Going). Project Manager. Ardurra is part of a Design-Build Team for the City of Laredo's Tunnel Diversion structure. This is a 42" gravity sewer with manholes that will be constructed using microtunneling. The tunnel will tie in at the City's Zacate WWTP on the upstream end and to an existing 54" interceptor that runs along Chacon Creek on the downstream end. The project requires flow determination and diversion modeling, extensive permitting and multiple crossings, erosion and sediment control, endangered species management, and geotechnical investigation and geological formation analysis.

San Antonio Water System (SAWS), City of San Antonio, San Antonio, TX. Project Engineer. Responsible for required sanitary sewer adjustment and replacements which included 220 LF of 15-inch PVC that crosses LP 1604, reroute of approx. 210 LF of 15-inch PVS along northside of 1604, reroute of approx. 1,400 LF of 10-inch forcemain along 1604 eastern property line, reroute of approx. 160 LF of 10-inch forcemain crossing LP 1604 from Campbellton , and approx. 5,350 LF of 10-inch forcemain along southside LP 1604.

Roel "Roy" Rodriguez, *PE, MPA*

Client Service Manager

Mr. Rodriguez is an experienced City Manager with a demonstrated history of working in the government administration industry. Skilled in Capital Improvement Planning and Implementation, Economic Development Contract Negotiations, Budget Preparations, International Cooperation and Negotiations, Negotiations with State and Federal Government, Land Development, Nonprofit Organizations, Transportation Engineering, and Government. He is a member of the Texas City Managers Association (TCMA), American Society of Civil Engineers, and South Texas College Public Administration Advisory Council and former president of TCMA Region 10. He is a former director of the Lower Rio Grande Water Committee and former gubernatorial appointee to the Texas Municipal Retirement System Board of Trustees, where he twice held the position of chairman between 2005 and 2018. Additionally, he serves in multiple roles for Our Lady of Perpetual Help Catholic Church. Governor Greg Abbott has appointed Roel "Roy" Rodriguez, PE to the State Pension Review Board for a term set to expire on January 31, 2029. The Board reviews all Texas public retirement systems, both state and local, for actuarial soundness and compliance with state law. He is also currently the chairman for the South Texas Water Working Group.

EDUCATION

Master of Public Administration (MPA) , University of Texas, Pan American

Bachelors of Science, Civil Engineering, Texas A&I University

REGISTRATION

Professional Engineer, Texas No. 114851

YEARS OF EXPERIENCE

30+ Years

South Texas Region Project Development, South Padre Island, TX. Client Service Manager. Mr. Rodriguez is responsible for the client service relationship for the south Texas region. He will ensure projects are fulfilled on time and within budget. His main objective is making sure the client is completely satisfied with the services and will engage with the community as owner representative when needed.

Texas State Pension Review Board, Austin, TX. Board Member**.** Mr. Rodriguez was appointed by Governor Greg Abbott to the State Pension Review Board for a term set to expire on January 31, 2029. He is tasked with several key responsibilities including, oversight of retirement systems, data compilation and reporting, education and training, and policy recommendations. His term is through 2029.

City of McAllen, McAllen, TX. City Manager. As the City Manager Mr. Rodriguez oversaw all city departments with the aid of four Assistant City Managers, along with support staff. The Assistant City Managers monitor various departments assigned to them and report directly to the City Manager. When it comes to projects from the various city departments, the City Manager's office monitors goals, missions, spending and budgets. As the City Manager he was also known as the Chief Budget Officer, overseeing all of the finances for the City of McAllen. He also held other positions to include general manager, assistant city manager, and McAllen public utility general manager.

City of Harlingen, Harlingen, TX. City Manager. As the City Manager Mr. Rodriguez ensured that City services were accomplished in an efficient, effective, and a cordial manner; developed programs and strategies for a safer environment; created a positive perception of the City by cooperating with other governmental agencies by administering the policies established by the City Commission, and by coordinating, directing, and reviewing activities of all municipal operations. He also held the assistant City Manager and City Engineer positions.

City of Weslaco, Weslaco, TX. City Engineer. As City Engineer, Mr. Rodriguez provided analytical analyses and design, develops plans, specifications, and estimates, management, coordination, and construction support for the Public Works Department. This included water, and sewer, drainage, and roadway design. He also provided construction management and oversight for projects.

Jefferson County, Jefferson County, TX. County Engineer. Mr. Rodriguez was involved in various engineering duties, including reviewing subdivision plans, construction plans, and drainage plans to ensure compliance with county requirements. Responsible for coordinating with other agencies such as TxDOT, drainage districts, water districts, engineering firms, and other county departments related to county projects. He also managed the engineering division by supervising assigned personnel and overseeing the surveying, design, and construction of county projects. Mr. Rodriguez maintained effective working relationships with public officials, contractors, and other county and local governmental departments.

Byron Sanderfer, PE, CFM

TECHNICAL DIRECTOR AND QA/QC TASK LEAD

Mr. Sanderfer has more than 24 years of experience providing both rural and urban civil engineering services specializing in street and intersection improvements and storm drainage systems. He applies his expertise in the application of technology and scientific principles for clients in all regions of Texas. Mr. Sanderfer is an expert in managing municipal public work projects involving coordination with TCEQ, TDLR, THC, NEPA, ESA, TWDB, EAA, and FEMA. He has also been involved with grant-funded projects such as CDBG, MIT-MOD, HMA, TDEM, CDBG-DR through GLO, and HMGP.

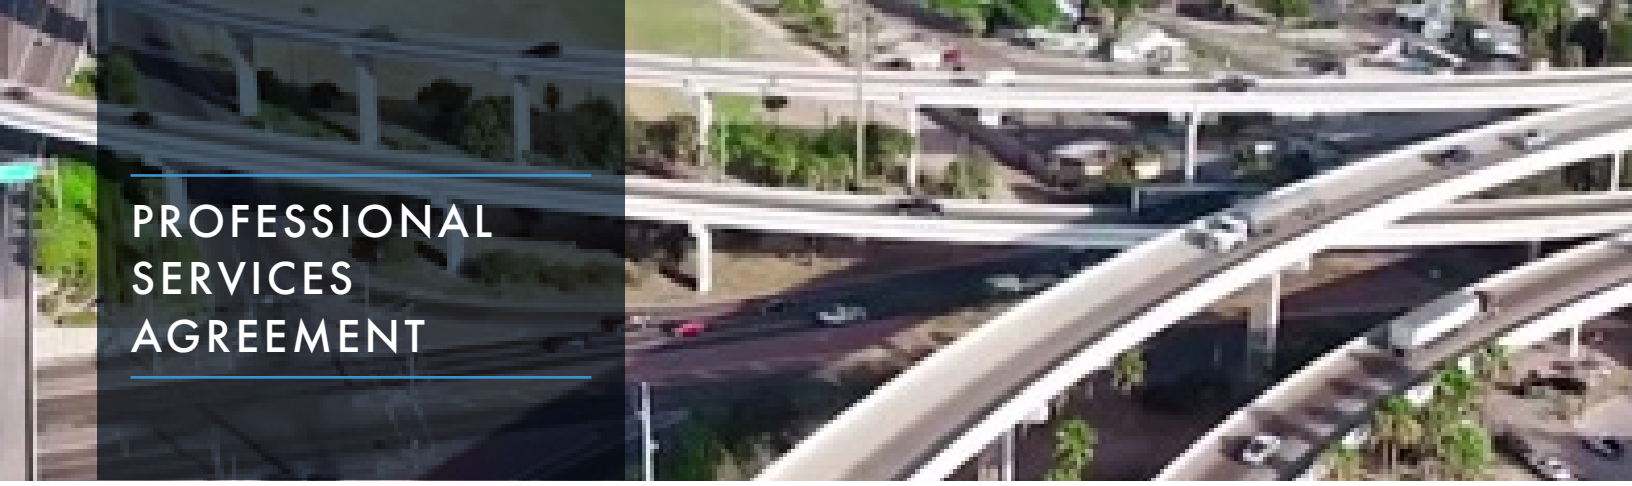
Insurance Claims Statement



Ardurra Group, Inc., its affiliated entities, and their officers and directors and senior management team have no prior or ongoing criminal actions. In addition, there are no material prior or ongoing civil actions involving the company. There have been various actions against Ardurra arising out of the ordinary conduct of its business, many of which are unrelated to the performance of its professional services (motor vehicle accident and personal injury claims). It is the opinion of management that the resolution of any ongoing actions will not materially affect the consolidated financial position of the company, the company's operations, or the company's ability to perform the services being solicited. Below is a list of litigation commenced against Ardurra Group, Inc. in the past **ten years** (which list excludes matters like motor vehicle accidents and personal injury claims):

- Copperstone Master Association, Inc. vs. The Ryland Group, Inc. and Standard Pacific of Florida GP, Inc. et al.; Circuit Court of the Twelfth Judicial Circuit Manatee County, Case No. 2017-CA-04724; July 2018; Ardurra Group, Inc., was joined into a suit in Florida regarding inspection services performed in 2015; Voluntarily dismissed.
- Woods of Ortega Condominium Association v. D.R. Horton, Inc., et al.; Circuit Court of the Fourth Judicial District Duval County; Case No. 2019-CA-4063; July 2019; Florida matter brought by condominium association regarding alleged construction defects; Voluntarily dismissed.
- Joseph Dennis Gilberti, Jr. vs. Ardurra Group, Inc., King Engineering Associates, Inc. Henningson, Duram & Richardson, Inc., Stantec Consulting Services, Inc., Carollo Engineers, Inc., Progressive Water Resources, LLC, and Hazen and Sawyer, PC; United States District Court, Middle District of Florida, Tampa Division; Case No. 8:19-cv-2012-T-33AAS; September 2019; Plaintiff asserted claims against engineering firms regarding water infrastructure; Motion to dismiss granted.
- Bowen and Kron Enterprises Inc. and Vapor Industries, LLC vs. Ardurra Group, Inc.; Nueces County, 214th District Court, Case No. 20222DCV-0498-F; February 2022; Allegations by contractor for City of Corpus Cristi for cost overruns; Resolved without Ardurra's involvement.
- City of San Diego vs. The 5125 Company, 2GS, LLC d/b/a Earthworks Enterprise, Ardurra Group, Inc. d/b/a LNV and f/k/a LNV, LLC and f/ka/ LV, Inc., and Robert Viera, P.E.; 229th Judicial District, Duval County, TX, Cause No. DC-22-157; November 2022; Claim alleging defects in construction of drainage improvement project. Ardurra denies any allegation of fault; Settled.
- City of Parma vs. Ardurra Group, Inc.; District Court for the Third Judicial District, State of Idaho, Canyon County, Case No. CV14-25-0398; April 2024; City asserted claims regarding its wastewater treatment plant that include allegations of design deficiencies; Matter is ongoing. Ardurra denies all allegations.
- Willow Bend Home Owners Association of Manatee County, Inc. a Florida non-for-profit corporation vs. CWES XV LLC, et al.; Circuit Court of the 12th Judicial Circuit, Manatee County, Case No.: 2024- CA-001501; July 2024; HOA alleges design and construction defects. Ardurra only provided environmental monitoring and none of the allegations from the HOA relate to Ardurra's scope of services; Voluntarily dismissed with prejudice.

PROFESSIONAL SERVICES AGREEMENT

Professional Services Agreement Acknowledgment Statement

Ardurra Group, Inc. hereby acknowledges that it has read and reviewed the Professional Services Agreement (PSA) as set forth by the City of Edinburg in connection with **RFQ 2026-7 for Professional Engineering Services**. Ardurra fully understands the terms, conditions, and obligations contained therein, including all prerequisite insurance requirements.

Ardurra further certifies that it is fully aware of the insurance requirements specified in the Professional Services Agreement and confirms its ability to procure and maintain the requisite insurance coverages at the required levels for the duration of any contractual agreement entered into pursuant to this solicitation. Evidence of such insurance shall be provided upon request or as required by the Agreement.

Should Ardurra be selected as the most qualified firm, it agrees to enter into the Professional Services Agreement with the City of Edinburg as presented.

RE: Statement of Qualifications for Professional Engineering Services
Request for Qualification (RFQ) 2026-7

Dear Mr. Hinojosa,

B2Z Engineering, LLC (B2Z) is pleased to submit our Statement of Qualifications in response to the City of Edinburg's Request for Qualifications (RFQ 2026-7) for Professional Engineering Services. We appreciate the opportunity to be considered for the City's engineering services rotation and are committed to continuing to provide responsive, high-quality engineering solutions that support the City's capital improvement program and long-term infrastructure goals.

For more than 17 years, B2Z has provided comprehensive engineering, geotechnical engineering, construction materials testing, and construction management services to municipalities, counties, state agencies, and other public entities throughout Texas. Since 2018, B2Z has proudly served the City of Edinburg under the City's On-Call Professional Engineering Services contract, successfully supporting numerous infrastructure improvements through responsive service, technical expertise, and dependable project delivery.

Our team offers extensive experience across the disciplines identified in this RFQ, including civil engineering, transportation engineering, street and utility infrastructure improvements, pavement management, hydrology and hydraulics, structural engineering, geotechnical engineering, and construction materials testing. Supported by experienced professional engineers, technical specialists, and field personnel, B2Z delivers practical, cost-effective solutions tailored to the unique needs of municipal clients. B2Z's **state-of-the-art, AASHTO-accredited, TxDOT-certified,** and **USACE-validated** laboratory further strengthens our ability to provide comprehensive engineering support from planning through construction.

Mr. A. Reza Badiozzamani, PE, CFM, will serve as the Senior Project Manager and primary point of contact for this contract. Mr. Badiozzamani has full authority to commit the resources of B2Z Engineering and ensure timely, responsive service throughout the duration of the agreement. He will manage this contract from B2Z's Mission office located at 900 S. Stewart Road, Ste 2, Mission, Texas 78572. He can be reached at (956) 655-1995 or Reza@B2ZEng.com.

B2Z acknowledges that no addenda were issued for this Request for Qualifications.

Thank you for your time and consideration. We value our longstanding relationship with the City of Edinburg and welcome the opportunity to continue serving the City as a trusted engineering partner. We are confident that our experienced local team, multidisciplinary capabilities, and commitment to responsive client service make B2Z well qualified to support the City's engineering needs throughout the 2026–2028 contract term.

Thank you for your consideration.

Respectfully,

Aisha Gonzalez
President

900 S. Stewart Road, Ste. 2
Mission, TX 78572
(956) 585-3773

Tab II – Firm Qualification and Experience

Firm Introduction

B2Z Engineering, LLC (B2Z) is a **premier engineering consulting firm established in 2009** and licensed through the State of Texas as a Professional Engineering Firm (TBPE #F-11187). B2Z is **100% LOCALLY OWNED AND OPERATED** and has been headquartered in the Rio Grande Valley since 2009. We are a **Woman-Owned Minority Business** with engineering offices and materials testing laboratories in Mission, Brownsville, San Antonio, Houston, and Austin.

B2Z has a uniquely qualified group of **LOCAL TALENT** with extensive experience and knowledge in the fields of:

- **Civil Engineering**
- **Structural/Bridge Engineering**
- **Street Infrastructure Evaluation & Improvements**
- **Pavement Management and Improvements (Pavement Design)**
- **Roadway Design**
- **Transportation Evaluation**
- **Hydrology & Hydraulics (Drainage Analysis and Design)**
- **Erosion & Sediment Control Design**
- **Project Management**

B2Z Certifications & Accreditations:

- **AASHTO Accredited Laboratory**
- **USACE Certified Laboratory**
- **TxDOT Certified Laboratory**
- Women's Business Enterprise (WBE)
- Minority Business Enterprise (MBE)
- Texas Board of Professional Engineers (F-11187)
- Woman Owned Small Business (WOSB)
- Economically Disadvantaged Woman Owned Small Business (EDWOSB)
- Hispanic American Business Enterprise (HABE)
- Small Business Enterprise (SBE)
- Administratively Qualified with Texas Department of Transportation

Services under this contract will be performed out of our Mission office. Additional support, if needed, will be provided from our regional offices in Brownsville, San Antonio, Houston, and Austin. B2Z's Mission Engineering & Laboratory Offices employ over 50 professional and technical personnel. Services performed out of this office include but are not limited to civil engineering, bridge design, roadway design, drainage design, construction and/or project management, construction engineering & inspection, geotechnical engineering & testing, and construction materials testing.

Statement of Interest

B2Z has an executed contract with the City of Edinburg to provide professional engineering services as needed. We are ready and able to continue to provide these services. The team assembled for this pursuit is adequately staffed and has the capability to perform the services required. Our team was constructed with the simple goal of being able to provide the City of Edinburg with the highest level of service and necessary resources to ensure the successful completion of all assigned projects. The B2Z team offers extensive first-hand employment experience with local, state, and federal entities and is fully cognizant of all applicable federal, state, and local codes, regulations, and standards relating to transportation infrastructure projects that the City of Edinburg may assign.

B2Z is contracted by various entities to provide **professional engineering services**. These entities include, but are not limited to, the Cities of Edinburg, McAllen, Mission, Hidalgo County, Hidalgo County Drainage District No. 1, Hidalgo County Regional Mobility Authority, Hidalgo County Urban County Program, and the Texas Department of Transportation (TxDOT).

B2Z recently competed on a **statewide TxDOT Bridge On/Off Replacement contract** and was **1 of 19 firms (out of 73 responsive firms) awarded a 5-year contract not to exceed $5M.**

Unique Qualifications

B2Z's team of designers and technicians have worked on various types of projects, including, but not limited to; building construction, parks and recreational facilities, parking lots, detention and drainage facilities, water towers, rural roadways, controlled access expressways, and bridge/structural design in; timber, concrete, steel, pre-stressed beam, pre-stressed box beam, pre-stressed U-beam, pan girder, steel plate girder, single column bent, multi-column bent, cantilevered and straddle bent, and strut & tie modeling. In addition to our broad design experience, B2Z has widespread experience with meeting, and in most cases exceeding, aggressive project schedules with short deadlines.

Through the years, our team of professionals has earned a reputation for taking a prominent role in the design and construction of public and private projects. **Whether we are working on a large/small project, we give each task the same attention to technical excellence and quality control while maintaining responsiveness.**

The B2Z business model is to develop trusted relationships by being responsive, providing top-notch customer service, and delivering reliable effective solutions to our clients in a way that minimizes construction costs and expedites construction timelines.

B2Z is very familiar with Plans, Specifications, and Estimates (PS&E) projects which typically consist of varying elements of design including grading, rigid pavement, flexible pavement, lime treated subgrade, flexible base, bridges, storm drain systems, rural drainage systems, environmental design, traffic control, traffic signals, signing, delineation, pavement markings, high mast illumination, safety lighting, embankments and retaining walls.

B2Z's staff is pre-certified in a multitude of categories and has years of experience in working on the design and plan production of highway and bridge structures, in accordance with the latest AASHTO and LRFD design manuals and TxDOT requirements. The following table shows B2Z's current TxDOT pre-certifications:

11.4.1	ENVIRONMENTAL INSPECTIONS	**23.13.1**	PROJECT OFFICE OPERATIONS
11.5.1	CONSTRUCTION SCHEDULING PROJECT MANAGER		

Meeting Timeline Requirements & Staffing

We have staff available to begin work immediately for any size project (part-time or full-time). On all B2Z projects, we are cognizant that maintaining a predictable project schedule is paramount to successful project delivery. The B2Z team prides itself on meeting, and often exceeding the schedules developed by our clients and project owners. We have developed a system for project schedule monitoring that has proven itself on over $1B worth of construction contracts. As a function of our proven system, we develop a schedule early in the process to ensure that we have the appropriate staffing levels assigned to the critical path components. This schedule is developed in conjunction with both the client and any other project stakeholders with consideration of the major project milestones and anticipated project hurdles. **B2Z has committed the services of experienced personnel who know and understand the tasks required to perform municipal projects.** This will undoubtedly allow us to keep ahead of schedule and add additional resources as appropriate. A few examples of our previous successes in this arena are as follows:

- B2Z was contracted to provide engineering services that included a feasibility study and design of a 46-foot-wide (overall width), 1,450-foot-long proposed bridge consisting of Tx62 prestressed girders to replace an existing lower deck truss bridge and approaches at SH 174 over the Brazos River in Hill County. **Due to fast-track negotiations with the TxDOT Waco District, B2Z was able to exceed the project schedule on a Cat 6a Bridge Replacement project that was programmed for letting in FY 2022 and position the project to receive funding in FY2019.** We worked with the FHWA and TxDOT to facilitate concurrent reviews and expedited our response time for all comments they had. This accelerated schedule was needed because the structure was considered structurally deficient, and as such we (and the client) felt it prudent to replace it as early as possible to ensure the safety of the traveling public.
- B2Z was contracted to provide engineering services that included design for SH 6 over Lake Waco and FM 116 at SH 9 overpass next to Fort Hood. Due to the impending expiration of project funds, B2Z met an aggressive accelerated 6-month design schedule for approach roadway work and two (2) independent bridge replacement projects for TxDOT. Since project funding was set to expire if these deadlines were not met, we developed a Plan of Action which included additional staffing and around-the-clock work to complete the PS&E package. We

ultimately **finished the project two (2) weeks ahead of schedule and the quality of deliverables was to the client's satisfaction.**

- B2Z encountered numerous redesigns during the construction phase services on the SH 31 project in Waco. Most redesigns resulted from streamlining construction phasing agreed to by the Contractor and TxDOT. Temporary shoring, temporary drainage, adjustments to inlet or storm sewer locations, and salvaging existing drainage all required redesign but did not impact construction milestone completion dates or budget. B2Z proposed multiple solutions and conducted a cost/benefit analysis to select the best solution. As the Engineering Firm of Record, we met with the contractor weekly to make rapid changes to the traffic control plan (TCP) to mitigate traffic issues due to weather. As a result of rapid TCP adjustments, **the Contractor earned all early finish bonuses and opened the freeway six (6) months early and the project remained on budget.**

B2Z Projects

B2Z is currently providing professional engineering services on the City of Edinburg's Schunior Road Improvement Project. We are well versed in how the City likes to conduct its business. B2Z has provided professional engineering services to governmental agencies throughout the State of Texas including, but not limited to, the City of McAllen, the City of Mission, Hidalgo County, Hidalgo County Drainage District No. 1, and the Texas Department of Transportation (TxDOT). Below is a listing of recent projects completed or currently in process.

Schunior Road Improvements – Widening, Sidewalks, Bridge Replacement, ROW Acquisition

Client: City of Edinburg

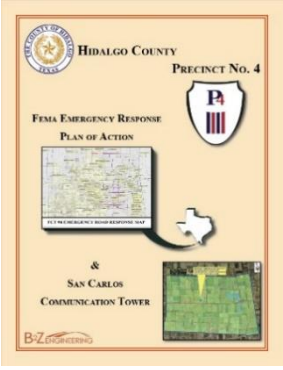
Contact: Mr. Mardoqueo Hinojosa, P.E., CFM – Ph. (956) 388-8211

Description/Scope: B2Z was contracted by the City of Edinburg to develop schematic alternatives & PS&E for roadway and drainage improvements to Schunior Rd. from Closner Road to McColl Road. This project is 2.5 miles in length and ROW varies from 40ft to 100ft throughout. The City had included this project in its 2018 roadway bond issuance proposing to widen it to 4 lanes, improve the deteriorated Rail Road Crossing, add sidewalks due to its proximity to UTRGV, replace and/or widen a prestressed box beam bridge over a drainage ditch, and warrant traffic signals at Jackson Rd. and McColl Rd. Construction documents include typical sections, estimated quantities, traffic control plan, removal plan, roadway plan and profile, utility plan, EPIC, SW3P, and earthwork cross-sections.

Mile 17 ½ from Depot Road East to Mon Mack Road

Client: Hidalgo County Precinct No. 4

Contact: Honorable Commissioner Ellie Torres – Ph. (956) 383-3112



Description/Scope: B2Z worked with the City of McAllen to develop an interlocal agreement between the City and Hidalgo County Precinct No. 4 for the Mile 17 ½ project. B2Z was contracted by Hidalgo County Precinct 4 to provide schematic, PS&E, pavement design, hydrologic studies, environmental services, public involvement, utility coordination services, uncontrolled mapping, and office surveys.

Emergency Response Plan of Action & San Carlos Communication Tower Mapping

Client: Hidalgo County Precinct 4

Contact: Honorable Joseph Palacios – Ph. (956) 383-3112

Description/Scope: B2Z was contracted by Hidalgo County to perform feasibility studies including preliminary design values, uncontrolled mapping, and preliminary ROW. Exhibits were generated for 72 locations within the precinct that were damaged due to flooding. These exhibits included city limits, county jurisdiction, on/off system roads, damaged limits, and construction cost estimates. Overall exhibits highlighting the adversely impacted areas within the precinct were developed.

Project Specific Emergency Response Engineering Analysis

Client: Hidalgo County Precinct No. 4

Contact: Honorable Joseph Palacios – Ph. (956) 383-3112

Description/Scope: B2Z was contracted to provide professional engineering services to Hidalgo County Precinct No. 4 for the emergency response engineering analysis of 18 locations through the precinct jurisdiction. The analysis included establishing basic design concepts, project controls and a general scope for the project, as well as creating overall project exhibits highlighting the impacted areas overlayed on Aerial Imagery, developing drainage area maps, project location maps, floodplain and outfall maps and digital elevation maps. This contract and task order are 100% complete.

Brushline Road – PS&E, Hidalgo County, Texas

Client: Hidalgo County Precinct 4

Contact: Hon. Joseph Palacios – Ph. (956) 383-3112

Description/Scope: B2Z was contracted to provide professional engineering services to Hidalgo County Precinct No. 4 for the needed roadway improvements to Brushline Road from FM 490 to SH 186. This project was 1.2 miles long which scope of work included feasibility studies, and roadway design controls (geometric design, general guidelines for project development, grading design, and pavement design), drainage mapping, signings, markings and signalization, as well as traffic control planning.

Tower Road, Cesar Chavez Road, and San Juan Road Bridge Repairs

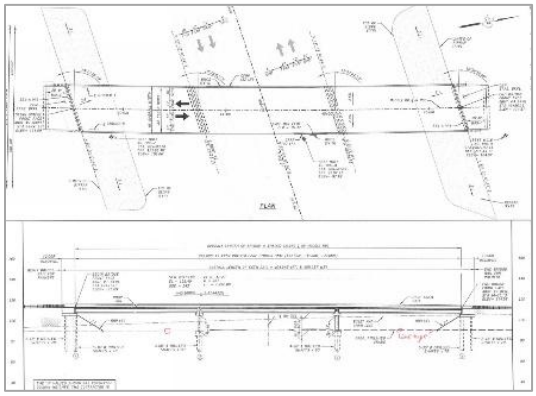
Client: Hidalgo County Precinct No. 2

Contact: Honorable Commissioner Eduardo "Eddie" Cantu – Ph. (956) 787-1891

Description/Scope: B2Z was contracted by Hidalgo County Precinct 2 to develop full PS&E for the roadway and bridge improvements for the off-system bridge replacements at Tower Rd, Cesar Chavez Rd., San Juan Rd, and a bridge class culvert at Highline Rd. all crossing the South Floodwater Channel. These projects included structural analysis, geotechnical engineering, and bridge design. Construction documents include roadway and bridge typical sections, bridge layouts, abutment details, span sheets, and interior bent details.

Regional Linear Park Project

Client: Hidalgo County Precinct No. 2



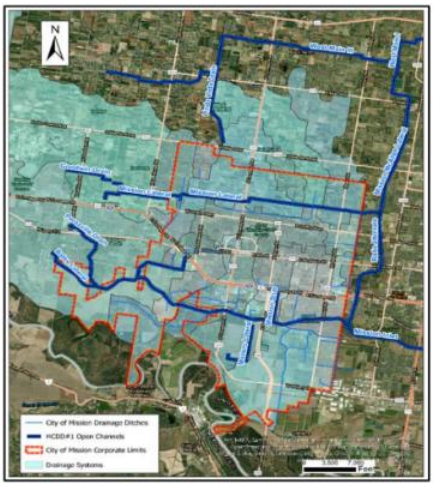
Contact: Honorable Commissioner Eduardo "Eddie" Cantu – Ph. (956) 787-1891

Description/Scope: B2Z was contracted to provide professional engineering services to Hidalgo County Precinct No. 2 for the Regional Linear Park Project. The scope of work provided included feasibility studies, environmental assessment reviews, public involvement coordination, schematic design, PS&E, landscaping and irrigation layouts. B2Z assisted in the completion of the PS&E for the project as well as created all landscaping and irrigation layouts.

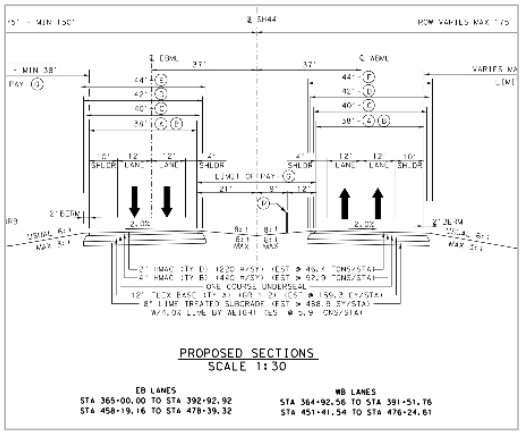
SH 365 Bridge Layout Development & Design Detailing at USIBWC Floodway

Client: Hidalgo County Regional Mobility Authority (HCRMA)

Contact: Mr. Pilar Rodriguez, P.E., Executive Director – Ph. (956) 402-4762



Description/Scope: B2Z was contracted to develop the bridge layout for the SH 365 Mainlanes Bridge over the USIBWC Main Floodway (consisting of an approx. 3,500 ft long by 56 ft wide Ph. I and 118 ft wide Ph. II - including portion over 23rd St., Tx-Girder bridge with concrete deck on rectangular caps and circular columns founded on drilled shafts). The bridge layout incorporated a proposed levee realignment of the north main floodway levee bank. Additionally, B2Z was tasked with development of Bridge Layouts for 3 connecting bridges including SH 365 Mainlanes over 23rd St (SP 115), SH 365 On & Off Ramp to SP 115 (same structure type as mainlanes noted - 850 ft long by 26 to 33 ft wide).



City of Mission City-Wide Drainage Projects Design Management

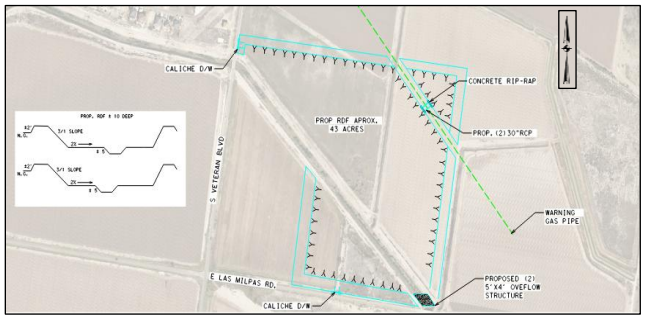
Client: City of Mission

Contact: Mr. Juan Pablo 'JP' Terrazas, P.E, Assistant City Manager – Ph. (956) 585-3275

Description/Scope: B2Z Engineering is currently serving the City of Mission as the City's project managers for the design & construction management of 7 city-wide drainage projects. This program is currently in the design phase. The B2Z team is providing design management and oversight of seven design engineers of records that were retained by the City to upgrade the drainage systems around the City. In this phase, B2Z is tasked with ensuring each project is being designed in a manner that meets constructability and specification standards, as well as enforcing schedule adherence by each engineer of record. B2Z is also providing the City with Construction Management & Inspection Services and Construction Materials Testing for the 7 drainage projects.

SH 44 PS&E / Corpus Christi, TX

Client: L&G Engineering



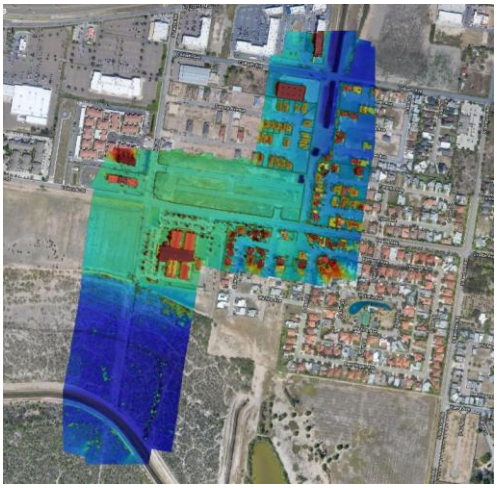
Contact: Mr. Jorge Madrigal – Ph. (956) 585-1909

Description/Scope: B2Z was contracted by L&G Engineering to provide bridge design and PS&E services to TxDOT for 3 pairs of twin bridges on SH 44 outside of Corpus Christi. The design consists of 6 TX-Girder bridges with concrete deck on rectangular caps. The 2 twin bridge overpasses that cross CR 61 and SH 24 have circular columns founded on drilled shafts. The twin bridge at OSO creek has a 60-degree bent skew and is founded on prestressed concrete piles.

South Lateral Drain 43 AC Regional Detention Facility

Client: Hidalgo County Drainage District No. 1

Contact: Mr. Raul Sesin, P.E., CFM, District Manager – Ph. (956) 292-7080

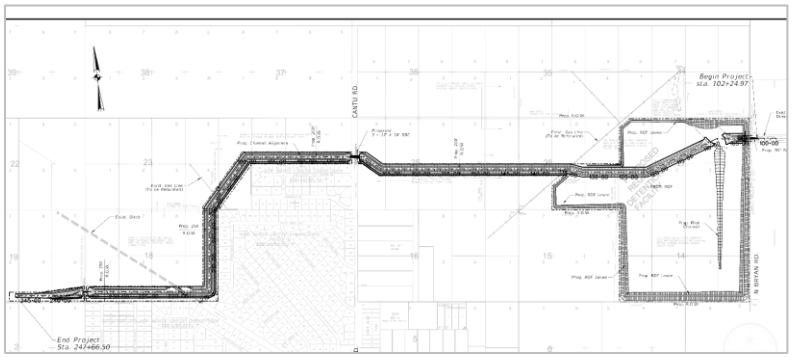


Description/Scope: B2Z was contracted by Hidalgo County Drainage District No. 1 to provide project development services and full Plans, Specifications, and Estimates (PS&E) for a proposed 43 AC Regional Detention Facility (RDF) adjacent to the South Lateral Drain east of Veterans Road. The proposed RDF is 10 feet deep and has two overflow structures, which will help alleviate heavy flooding for the project area. B2Z is also preparing a Hydrologic and Hydraulic report to model the RDF's benefits for the area. The report consists of a 2D unsteady flow HEC-RAS model, showing the flooding extents for existing and proposed conditions along the RDF, for different storm events. This project is still in the design phase, the Engineer Construction Estimate is $3.4M.

2018 Drainage Bond Project #25: Mission McAllen Rado Alternate Phases I & II

Client: Hidalgo County Drainage District No. 1

Contact: Mr. Raul Sesin, P.E., CFM, District Manager – Ph. (956) 292-7080



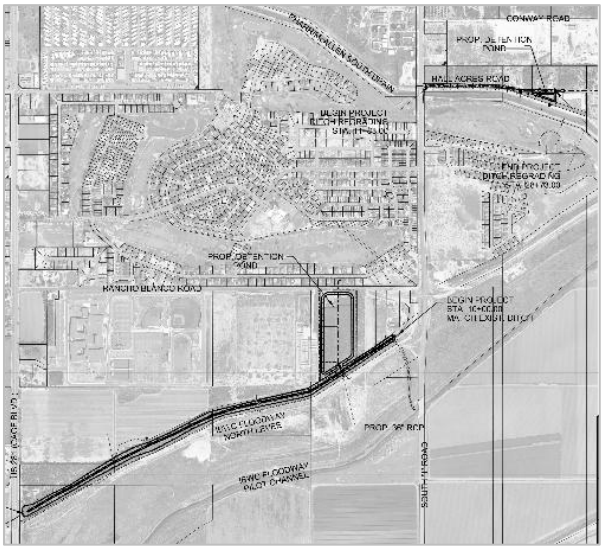
Description/Scope: B2Z was contracted by Hidalgo County Drainage District No. 1 to minimize the threat of flooding in Precinct 2 by upgrading the existing Rado Drain that outfalls into the Mission Inlet. The project includes analyzing and developing existing and proposed hydrologic conditions using HEC-HMS and hydraulic models using HEC-RAS. Several alternatives have been analyzed to optimize the most cost-effective solution. B2Z is using these models to design a new drainage structure (3,600 LF of new location 10' x 8' box culvert) that will add enough capacity to accommodate a 50-year storm event. B2Z is also preparing an engineering report, schematic, roadway reconstruction PS&E, and drainage PS&E for this project. Phases I & II are currently under construction.

2018 Drainage Bond Project #27: Monte Cristo Road & Conway Road

Client: Hidalgo County Drainage District No. 1

Contact: Mr. Raul Sesin, P.E., CFM, District Manager – Ph. (956) 292-7080

Description/Scope: B2Z was contracted by Hidalgo County Drainage District No. 1 to design culvert and channel improvements for the Monte Cristo & Conway Drain. The services being provided include but are not limited to data collection, geographic information systems, hydrologic analysis, hydraulic analysis, hydrologic and floodplain mapping, channel/drainage design, roadway design, plans, specifications and estimates, field surveying and photogrammetry. B2Z is designing a new drainage system to include a 90-acre regional detention facility. The new channel will consist of 140ft to 240ft of ditch right-of-way. After conducting survey and field investigations, B2Z identified a low-lying area to create the proposed 90-acre basin (Regional Detention Facility). B2Z proposed an alternate design to be the first



of its kind in the Rio Grande Valley. This design would include higher banks (instead of costly excavation) to retain water on site. A 48" RCP bleeder line would connect to the outfall drain. B2Z performed a 2D Unsteady Flow Model using HEC-RAS to show the flooding extents before and after improvements.

2018 Drainage Bond Project #33: South I Road Detention Phases I & II

Client: Hidalgo County Drainage District No. 1

Contact: Mr. Raul Sesin, P.E., CFM, District Manager – Ph. (956) 292-7080

Description/Scope: B2Z was contracted by Hidalgo County Drainage District No. 1 to provide Plans, Specifications, and Estimate (PS&E) for the South I Rd Detention project. This project is broken up into two segments, where segment one's limits are on Javalina Dr. from Cage Blvd (Bus. 281) to S I Rd. Segment two's limits are on Hall Acres Rd. from S I Rd to 0.35 miles west. On segment one, B2Z was tasked with improving the drainage adjacent to the north floodway to provide relief to a historically recorded flood-prone area. Drainage improvements for this segment include upgrading a drainage ditch that runs the length of the limits and a detention pond that bleeds into a permanent pump structure at the top of the north International Boundary & Water Commission (IBWC) Floodway levee. B2Z was responsible for designing the permanent pump structure and ensuring that it was IBWC approved. On segment two, B2Z was tasked with improving the drainage in the area and design a pump structure to discharge the collected water into an adjacent HCDD1 drain ditch. B2Z's design for this segment includes improving the roadside ditches, ensuring a positive flow to a detention pond at the end of the project. B2Z also designed a pump platform to hold the pump structure as well as provide specifications to HCDD1 for the appropriately sized submersible pump. This design will accommodate a 100-year storm event.

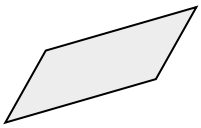
Our Services

As shown through our past project experience, B2Z is highly qualified to provide superior professional engineering services to the City of Edinburg. B2Z would like the City to **continue** to view our firm as an extension of its staff, utilizing our expertise whenever necessary. We understand the City of Edinburg is seeking to retain a rotation list of qualified professional engineering firms to provide the following services:

- Field investigation and data collection.
- Feasibility evaluation and alternatives analysis.
- Design Development and cost estimating.
- Preparation of plans, specifications, and estimates (PS&E).
- Review and check plans, subdivision and parcel maps, and computations submitted by private developers.
- Review of engineering and encrouchment permits.
- Prepare environmental reports.
- Review of environmental and engineering reports and proposals.
- Coordination with utility agencies, consultants, and other public agencies.
- Organization, participation and presentations at meetings held by City staff, the City Council, neighborhood groups, and other stakeholders.
- Preparation of preliminary documents, plans and/or reports including findings and recommendations.
- Preparation of final documents, plans and/or reports responding to City and other stakeholder comments.
- Preparation of handouts and graphical displays for public meetings.
- Management and monitoring of capital improvement projects.
- Management and monitoring of planning projects.
- Administration and monitoring of regional, state, and federal grants.
- General civil engineering support services as assigned.

For the purposes of this statement of qualification, we would like to elaborate on typical procedures for providing Preliminary Engineering & Plans, Specifications, and Estimates (PS&E) Services.

Part 1 – Pre-Design: Development of Design Criteria & Laying the Groundwork



The first steps in designing civil/transportation projects are: creating (or adopting) specifications and design criteria (typically based on the project funding source), identifying constraints and/or areas of concern, establishing design parameters, and developing a project schedule through a Design Concept Conference (DCC). The DCC meeting is intended to discuss items such as: pavement design, hydraulic design, typical sections, horizontal & vertical alignments, design speed, ROW widths, impacts to local and state roads, overpass and ramp locations, utility coordination, bridge structures, etc. The next step in project development is laying the groundwork for the project including ROW Surveys & Mapping, Route and Design Studies & Schematic Design, and Utility Location & Coordination.

Design Surveys

Design surveying is the collection of field data to establish the spatial relationship of existing features required by the engineer for the development of the proposed improvements. Requirements for data will change based on needed scope of work.

ROW Surveys & Mapping

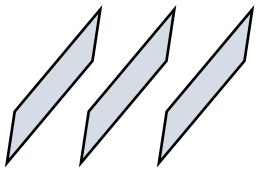
Right-of-Way (ROW) mapping is a boundary survey of parcels of land to be acquired for proposed project purposes. The ROW map, parcel plats and property descriptions must be prepared under the supervision of an RPLS. We work with the RPLS to ensure ROW mapping delineates all fee title and easement interests.

Route Studies & General Schematic

Route Studies are conducted in coordination with survey, ROW, and utility locates to determine optimal path of least resistance for design. These studies are utilized to develop a design that avoids high impacts on the ROW or areas of environmental concern; helping to keep the project on schedule. Lastly, the preliminary schematic is generated and typically submitted to resource agencies and approval authorities for approval prior to PS&E.

Utility Location & Coordination

Utility adjustments are frequently required for civil projects. The coordination process consists of initial project advisory letters, exposure letters, follow-up letters, and final adjustment letters. Compensable utilities are handled by the Compensable Utility Process as required by the TxDOT Utility Accommodation Policy. Final utility adjustment packages include all impacted compensable and non-compensable utilities.



Part 2 – Design the Project (PS&E)

The design phase of the project is when everything starts to come together. Thoroughly developing, reviewing, and modifying all plans, specifications, and estimates is crucial for every successful project. It is of the utmost importance that the management of the preliminary engineering phase (Part 1) is carefully and delicately executed. The final product is only as good as the preliminary information gathered. The following highlights the main components of the design process.

Roadway Design

- Horizontal Alignments and Vertical Profiles
- Plan & Profile Sheets (Geometry of Project)
- Intersection Layouts and Roadway Data Sheets
- Removal Layouts (In Areas of Existing Infrastructure)
- Design of Geometric Cross Sections

B2Z will determine the optimal alignment and vertical profile using roadway design software such as GEOPAK. Once the alignment and profile are set, design cross-sections are analyzed to determine ROW needs and costs associated with earthwork quantities. B2Z will adhere to the guidelines and specifications as outlined in the latest TxDOT Roadway Design Manual and/or local government standards & manuals.

Traffic Control Plan (TCP) & Design

This includes the construction phasing of traffic including TCP layouts, TCP typical sections and design of traffic-related items such as signals, signing, and striping.

- **TCP**: B2Z will ensure all requirements of the Texas Manual on Uniform Traffic Control Devices (TMUTCD) will be followed.
- **Signing**: B2Z will show small & large signs on plan layouts.
- **Striping**: B2Z will prepare pavement marking layouts including pavement markings, delineation, raised pavement markers, and object markers. Compliance with ADA standards for accessible design will be verified on all pedestrian facilities.
- **Signalization**: B2Z will verify signal warrants and will design signalized intersections based on existing and projected traffic volumes and proposed traffic analyses.

Structural Design (Bridges & Miscellaneous Structures)

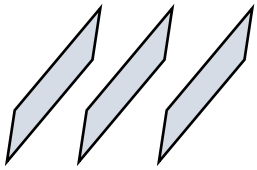
- Bridge Layouts
- Typical Sections
- Foundation Layout
- EQ & Bearing Seat Elevations
- Abutment & Bent Sheets
- Column Details
- Span Sheets
- Beam Layouts
- Miscellaneous Details
- Aesthetic Treatments

B2Z has completed a multitude of projects on various bridge types including typical overpasses and underpasses, small waterway crossings (drainage ditches and irrigation canals), medium to large waterway crossings (floodways), combination overpasses (roadways combined with railroads/other), and direct connectors/flyovers. B2Z has many years of experience in designing structures with the latest AASHTO LRFD Bridge Design specifications and TxDOT Bridge Design manuals. We utilize TxDOT design programs such as Bridge Geometry System (BGS), Pre-stressed Concrete Beam Design/Analysis Programs (PSTRS 14 & PGSuper), Bent Cap Analysis Program (CAP 18), and Foundation Design/Analysis Program (WINCORE). In addition, we continue to implement design techniques such as finite-element modeling using RISA-3D and other software programs to analyze complicated transportation structures ensuring the most precise analysis and the most efficient structural designs.

Drainage Design

- **Hydrology** – Study of Drainage Area (Watershed)
- **Hydraulics** – Design of Ditches, Outfalls, Culverts, and Other Stormwater Control Devices to Effectively Control Water
- Drainage Area Maps
- Hydrologic Computation Sheets
- Utilties & Drainage (U&D) Sheets

ESRI ArcGIS Pro will be utilized to facilitate various spatial data processes required for the hydrologic model development including topographic data development, watershed delineation, and hydrologic parameter extraction. A project Digital Elevation Map (DEM) will be developed using Light Detection and Radar (LiDAR) data and supplemented by field survey. ArcGIS extensions such as ArcHydro have the capability to process DEM datasets for automated watershed delineations and create input files for use in hydrologic modeling. Existing land use data will be estimated from current aerial photography and Hidalgo County parcel maps. US Army Corps of Engineers' HEC-HMS software will be used for computing peak flows and generating hydrographs for further use in hydraulic evaluations of channels and crossings. A frequency based hypothetical storm method referenced from NOAA's Precipitation Frequency Data Server for Atlas 14 will be inputted. NRCS Unit Hydrograph transformation method and NRCS Curve Number loss rate method will both be used to estimate runoff. Peak flows will be calculated for different storm events, for both existing and proposed conditions.



Environmental Services

If work being performed requires any environmental permitting or inspections prior to, or during construction, the B2Z team can provide all services related to this task. Furthermore, if any State or Federal funding will be utilized, requiring the need for environmental studies following the NEPA process, the team is ready to provide said services.

Drainage Design continued

A hydraulic model for channels and crossings will be evaluated using the US Army Corps of Engineers' HEC-RAS software. RAS Mapper will be utilized to prepare geometric data from GIS for import into HEC-RAS, such as the terrain model. Field survey of the channels and crossings will be integrated into the geometric data. Peak flow data determined by the HEC-HMS model will be entered as boundary conditions for the HEC-RAS model. Existing and proposed conditions water surface elevations will be evaluated for the design storm event.

For stormwater drainage systems, B2Z uses GEOPAK Drainage for analysis and design. B2Z will consider the overall watershed and any future additions of the system. HY-8 may also be used for proposed drainage culvert analysis. Depending on the drainage area size, Rational Method will be used to size side ditches in rural projects.

Geotechnical Engineering

Geotechnical Field and Lab

B2Z has 3 drilling rigs, 3 drilling support vehicles, and 5 full-service Geotechnical and Construction Material Testing Laboratories (including 2 mobile labs).

Geotechnical Engineering Analysis

B2Z provides Soil Survey Models, Shear Strength Profile Development, Scour Analysis, Foundation Analysis/Design, Earth Structure and Global Stability Analysis, Settlement Analysis, Retention Systems Analysis, Soil Stabilization, Pavement Design (Flexible/Rigid Pavement), RW Design, TSS (Shoring) Design, etc.

Part 3 – Finalize PS&E Package and Prepare Submittal Documents (Bid Package)

After completion of all Design Tasks, B2Z will compile all documentation into a Plan, Specifications and Estimates package including but not limited to: Final Set of Design Plan Sheets – Construction Drawings (mylar or paper copies), Final Project and Construction Specifications, Final Quantities, Engineer's Construction Estimate (and Estimate of Construction Time), Design Documentation Forms and Design Bid Forms (specific to the city). B2Z is also well-versed in the bidding process and can assist the City of Edinburg with this task upon request.

Quality Assurance / Quality Control (QA/QC)

The B2Z team understands the importance of QA/QC and is familiar with the frustrations of poor QA/QC practices. The B2Z team is not just aware but committed to minimizing the review and oversight required by the Client through the implementation of an internally developed QA/QC process.

Quality Assurance is defined as an overall management plan to guarantee the integrity of the product, while **Quality Control** is defined as the series of analytical measurements used to assess the quality of the product. The goal of quality assurance and quality control (QA/QC) is to identify and implement data collection and analytical methodologies that limit the introduction of error. The B2Z team will ensure the implementation of a Project QA/QC Program, which will be the blueprint for identifying how the quality system of the organization will be performing the work for each task:

Step 1 - Project Management and Organization.
Planning and scoping processes that will assist the team performance, production quality and timeliness of results. This step is important since it creates the foundation and boundaries for teamwork. All the objectives for this project will be evaluated and agreed upon by all members of the team/client; the planning meetings and progress reports will determine the success of the tasks.

Step 2 - Data Generation and Collection.
Operations need to be planned and the data collected needs to be reviewed to ensure the information being utilized by the team is reliable and of good quality. If the data integrity is compromised; the results obtained will undoubtedly be erroneous regardless of the amount of effort and consistency of the team's work.

Step 3 - Assessment and Oversight. Consistent monitoring throughout the life of the project will be achieved by setting up a project schedule chart depicting the timetables and responsibilities of each team member. There will be continuous regular meetings to assess the flow of information, data collected, status of work and to assure the quality of work is being preserved. The Project Manager will be in constant communication and coordination with each one of the team members to provide necessary flow of information. The Client's Program Manager will be kept abreast of every detail.

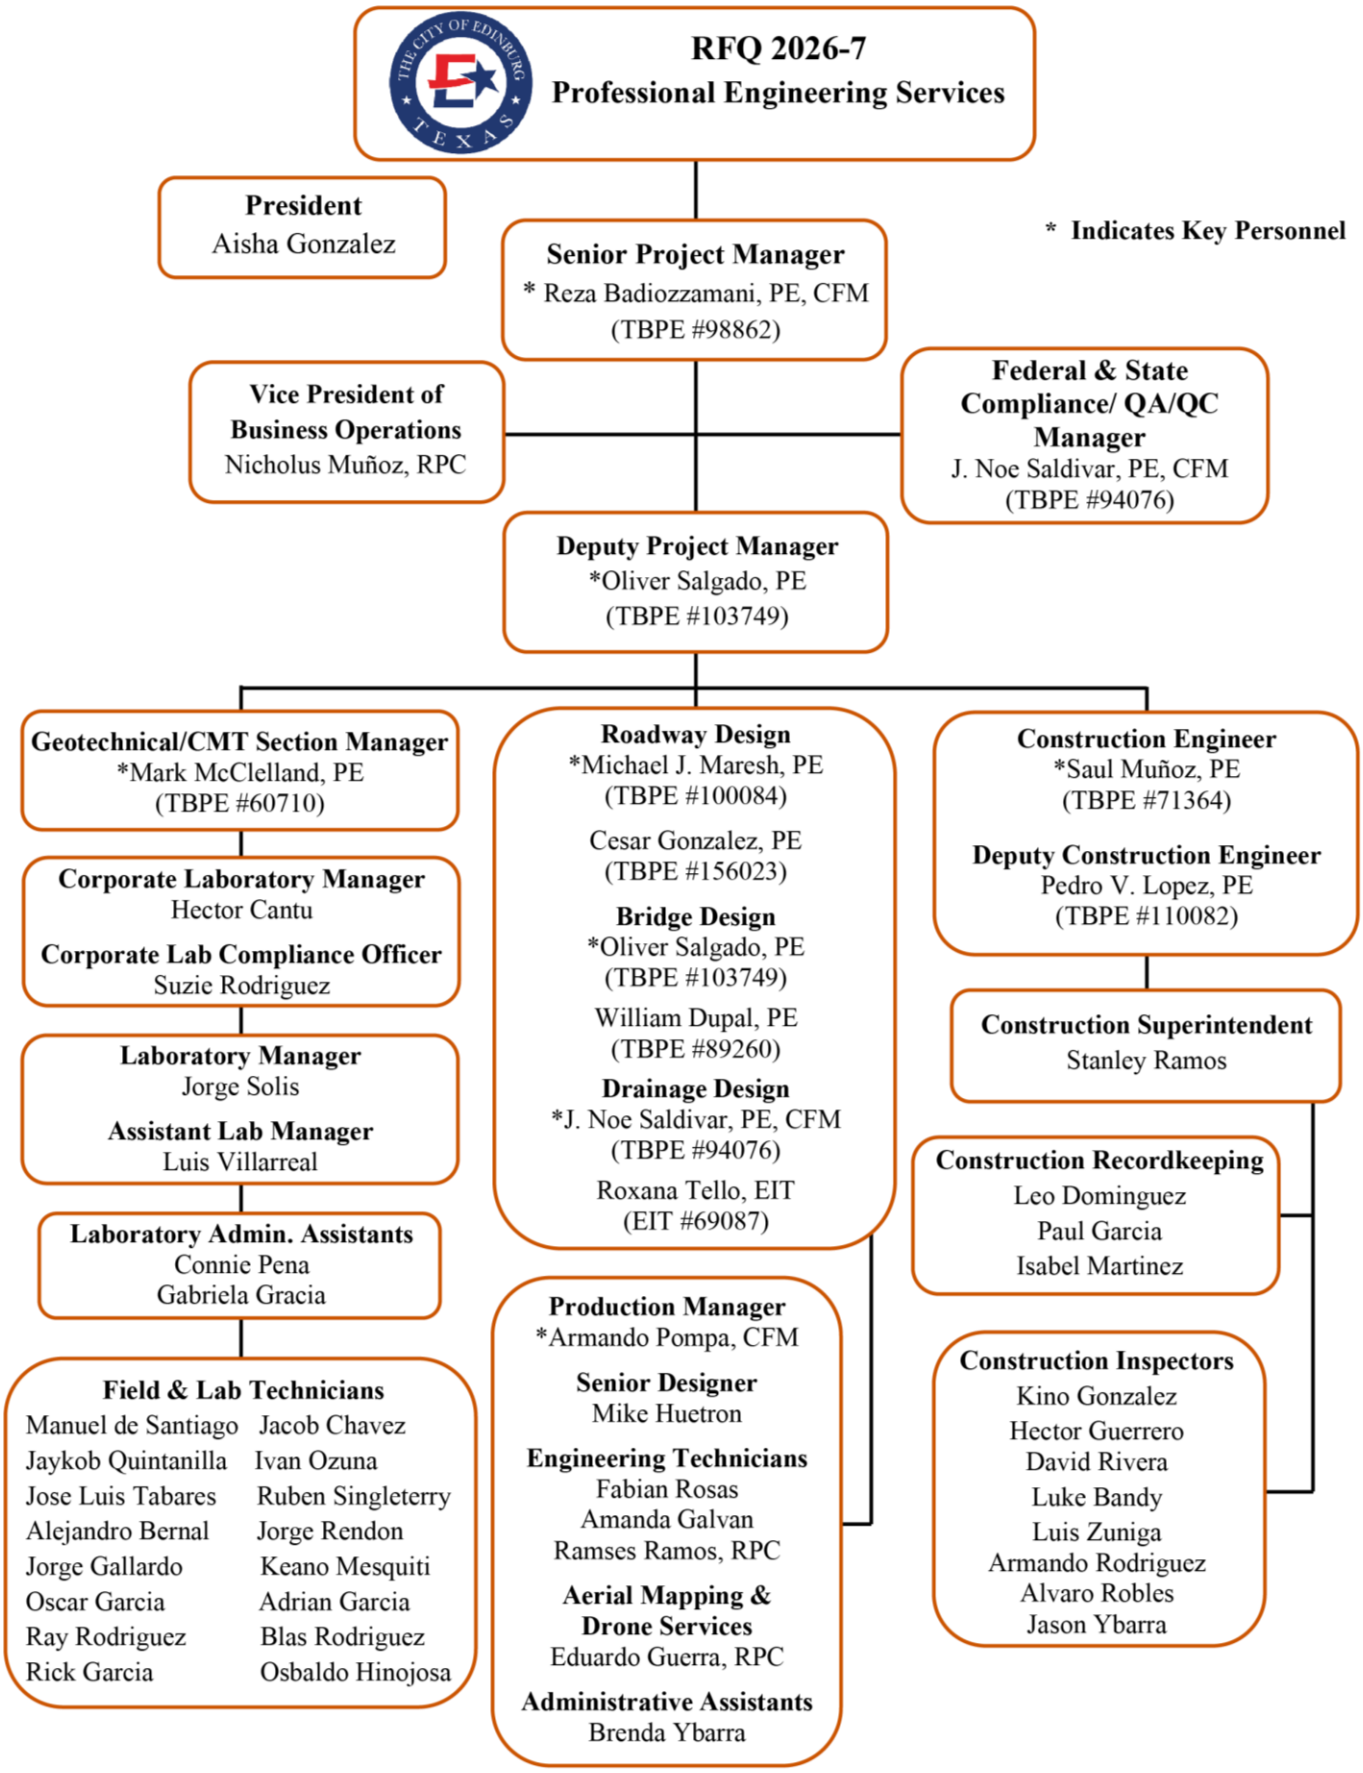
Step 4 - Project Validation and Product Delivery. Quality review will be audited at various stages of the project. Internal audit target dates have been established at 30%, 60%, and 90% completion of each. Team leaders will be given a checklist of the product completeness expected. Independent peer review will be implemented prior to submitting any information to the Project Manager (PM). A thorough review by the PM and QA/QC Manager will be required prior to submitting any information to the Client's Contract Manager. All contact and flow of information for this project will be done directly by the Project Manager to the Client's Program Manager and/or Board of Directors.

Step 5 - Approval of the QA/QC. Prior to implementing this plan, schedules, meeting times, places, data collection techniques, etc. will be presented to the Client's Program Manager for review and approval. All meetings with stakeholders and local entities will be organized, documented, and provided to all people involved in the project.

Tab III – Team Member Qualifications and Experience

Team Member Qualifications and Experience

B2Z and its team members hold themselves to the highest level of both personal and professional integrity and only undertake tasks in which they can perform competently and expertly. This ethical standard has resulted in B2Z not being party to a lawsuit since its inception in 2009, nor has a claim been made against its errors and omissions insurance policy. Furthermore, all B2Z personnel follow the National Society of Professional Engineers' (NSPE) code of ethics and its six fundamental canons.



NSPE NATIONAL SOCIETY OF PROFESSIONAL ENGINEERS

- Hold paramount the safety, health, and welfare of the public.
- Perform services only in areas of competence.
- Issue public statements only in an objective and truthful manner.
- Act for each employer or client as faithful agents or trustees.
- Avoid deceptive acts.
- Conduct themselves honorably, responsibly, ethically, and lawfully so as to enhance the honor reputation, and usefulness of the profession.

B2Z's staff is comprised of highly skilled individuals possessing **extensive knowledge and expertise** in civil engineering, structural/bridge engineering, pavement/roadway design, drainage analysis and design, geotechnical engineering, and construction engineering (please refer to page 22 for an illustration of our organizational chart).

Mr. Reza Badiozzamani, PE, CFM, will serve as the **Senior Project Manager.** He brings *over 23 years* of experience in Civil Engineering, with an emphasis on Program and Project Management. **Mr. Oliver Salgado, PE,** will serve as the **Deputy Project Manager and Bridge Design Engineer.** He brings *over 23 years* of experience managing the delivery of Plans, Specifications, and Estimates (PS&E) for various complex bridge structures and roadway projects. **Mr. Mark McClelland, PE,** will serve as the **Geotechnical/CMT Section Manager**, bringing *over 44 years* of geotechnical engineering and testing experience. **Mr. Michael Maresh, PE,** will serve as the **Roadway Design Engineer.** He brings *over 23 years* of transportation engineering experience in urban and rural roadway design. **Mr. J. Noe Saldivar, PE, CFM,** will serve as the **QA/QC Manager & Drainage Analysis/Design Engineer**, bringing *over 28 years* of progressive experience in transportation and drainage planning and design. **Mr. Saul Muñoz, PE,** will serve as the **Construction Engineer.** He brings *over 42 years* of experience – with 25 years at TxDOT managing PS&E design, road/bridge construction, contract administration, project letting, project management, and final project acceptance. **Mr. Armando Pompa, CFM,** is B2Z's **Production Manager,** bringing *over 20 years* of experience in the infrastructure industry. He oversees the civil infrastructure department by assisting the project engineering team (Task Leads) with plan production and design input. Mr. Pompa also oversees the GIS department with over 12 years of experience as a GIS analyst. *Resumes with biographical summaries and project experience are provided on the following pages of this submittal.*

5.2.1	12.1.3	14.4.1
5.5.1	12.4.1	14.5.1
8.1.1	12.5.1	

Summary

Mr. Badiozzamani functions as B2Z's Senior Project Manager. Mr. Badiozzamani is responsible for all engineering, geotechnical and construction material testing laboratory projects in addition to managing various aspects of the engineering laboratory division. His duties also include overseeing personnel during the development and subsequent completion of the B2Z projects and providing QC/QA for all laboratory testing procedures (verifying laboratory compliance with ASTM, AASHTO, ACI, and TxDOT testing requirements as specified by the project). Mr. Badiozzamani is responsible for the review of all Commercial and Governmental Construction Material Testing Reports produced by B2Z Engineering. Additionally, Mr. Badiozzamani assists the Geotechnical Engineer with the development and analyses of Geotechnical Studies and Recommendations for various clients. Mr. Badiozzamani has a wealth of hands-on experience in Soil Classification, Soil Testing, Soil Specialty Testing (Vane-Shear, Unconfined Compression, One-Dimensional Consolidation), and Concrete Field and Laboratory Testing.

Relevant Project Experience

Hidalgo County Outerloop Masterplanning Effort, Hidalgo County RMA

Mr. Badiozzamani was the lead engineer for over 60 professionals working on the master planning of over 130 miles of the new location Hidalgo County Outer loop project. This project consisted of over 12 different public open houses strategically held throughout the county to inform the affected stakeholders of the proposed facilities. Mr. Badiozzamani represented Hidalgo County RMA before the TxDOT Commission and ran point on the successful application of securing over $112M to the project. Mr. Badiozzamani made various presentations to Hidalgo County Commissioners Court as to the status of the project and worked with the Hidalgo County MPO to have the adopted alignments included in the Hidalgo County Therefore Plan for the protection of the ROW.

Mission Inlet Recertification Project, Hidalgo County Drainage District No. 1

Mr. Badiozzamani was responsible for all public involvement and outreach with affected stakeholders. He worked as the liaison between Hidalgo County Drainage District No. 1 (HCDD1) and FEMA/IBWC for the needed recertification and remapping efforts for Hidalgo County. Mr. Badiozzamani made multiple presentations to the Cities of Mission & McAllen on behalf of HCDD1 and managed the various aspects needed for implementation of the remapping effort.

Madero International Bridge Presidential Permit, City of Mission

Mr. Badiozzamani worked with the City of Mission and their Mexican counterpart to perform a "feasibility study" for a new international bridge crossing across the Rio Grande. This coordination included outreach with the state department as well as the state of Tamaulipas needed for the final permitting of this new international bridge crossing.

TX-MX Border Transportation Master Plan – HDR Engineering – TxDOT

This project was a multimodal, binational transportation plan to address challenges, issues, opportunities and needs for moving goods and people across the Texas-Mexico border. Several rounds of meetings were held every 2 to 3 months including Binational Regional Steering Committee (BNRSC) meetings that included key public officials coordinating with the Border Trade Advisory Committee (BTAC) and TxDOT to help develop the master plan. Stakeholder meetings were conducted with binational public and private sector stakeholders. Public meetings were advertised and held.

Additional Project Information Available Upon Request

Oliver F. Salgado, PE

Title
Deputy Project Manager & Bridge Design Engineer

Years of Experience
23

Years with Firm
9

Education
BS, Civil Engineering
University of Texas Austin, 2002

Training/Certifications
Professional Engineer: Texas/103749

Local Government Project Procedures Certified (LGPP)

3.2.1	8.1.1	14.2.1
4.2.1	10.1.1	14.3.1
5.2.1	10.2.1	14.5.1
5.3.1	12.1.3	
5.5.1	14.1.1	

Summary

Mr. Salgado has over 23 years of progressive experience in managing a wide range of diverse civil engineering projects. He has managed the delivery of plans, specifications, and estimates (PS&E) for various complex bridge structure and roadway projects as both a consultant and working for TxDOT's Bridge Division and Waco District offices. Mr. Salgado has successfully delivered several multi-disciplinary and multi-office projects demonstrating his ability to increase and sustain efficiency in large scale projects, particularly within accelerated schedule environments. Furthermore, Mr. Salgado has been Engineer of Record on several complex structures including multi-level interchanges. Mr. Salgado is proficient in all TxDOT bridge design softwares (BGS, Bridgelink, Cap18, Wincore) and 3rd party softwares (Vbent, Open Bridge, and SP column).

Relevant Bridge Project Experience

Recreational Trails Connectivity Project [Hidalgo County Precinct 2]

B2Z was contracted by Hidalgo County Precinct 2 to develop a Feasibility Study (WA#1) to determine how to connect two existing hike and bike trails in southern Hidalgo County. B2Z utilized drone technology to capture the latest existing property conditions while investigating properties along each alternative that contained special easements by Hidalgo County Drainage District #1 and USIBWC for access.

SH 6 Over Lake Waco (TxDOT Waco District)

B2Z was contracted by the Texas Department of Transportation (TxDOT) to provide engineering services for a Feasibility Study and 30% plans to replace an existing twin bridge and approaches at SH 6 over lake Waco in McLennan County. Mr. Salgado, serving as Deputy Project Manager and Task Lead (Bridge) was responsible for designing and directing preliminary plans for (3 phase, 116' wide, 14 span 3,950'), simply supported prestressed concrete TX 70 girder, rectangular bent cap bridge with an 8.5 inch reinforced concrete slab. The substructure consists of 42" diameter columns and 42" drilled shafts. Mr. Salgado directed and developed the preliminary bridge geometrics using BGS, preliminary girder design using Bridge Link and the bent design using cap 18, and SP column. (Project on Hold)

SH 31 at FM 939 and FM 2311 (TxDOT Waco District)

B2Z was contracted by the Texas Department of Transportation (TxDOT) to provide engineering PS&E services for two on-system bridges on SH 31 at the intersection of FM 939 and FM 2311. Mr. Salgado, serving as Deputy Project Manager and Task Lead (Bridge) was responsible for designing and directing the preparation of plans for FM 2311 (twin 40' wide, 3 span 70-125-70, 15 degree skew) and FM 939 (twin 40' wide, 3 span 70-127-70, 19 degree skew), simply supported prestressed concrete TX 54 girder, rectangular bent cap bridge with an 8.5 inch reinforced concrete slab. The substructure consists of 36"diameter columns and 42" drilled shafts. Mr. Salgado directed and developed the bridge geometrics using BGS, girder design using Bridge Link and the bent design using cap 18, and SP column.

SH 174 Over Lake Whitney (TxDOT Waco District)

B2Z was contracted by the Texas Department of Transportation (TxDOT) to provide engineering services for a Feasibility Study and PS&E to replace a lower deck truss bridge and approaches at SH 174 over Lake Whitney in Hill County. Mr. Salgado was responsible for designing and directing the preparation of the superstructure for (46' wide, 10 span, 1,450') simply supported prestressed concrete TX 62 girder, rectangular bent cap bridge. He directed the design of the substructure consisting of 42" and 48" columns and Drilled Shafts using V-bent and SP Column designed columns ranging from 17 ft tall to 50 ft tall.

Mark McClelland, PE

Title
Geotechnical/CMT Section Manager

Years of Experience
44 (29 with TxDOT)

Years with Firm
8

Education
BS, Civil Engineering
University of Texas Austin

Training/Certifications
Professional Engineer:
Texas/60710

Areas of Expertise
- Geotechnical Engineering
- Geotechnical Drilling & Testing
- Retaining Wall Analysis & Design
- Deep Foundation Design
- Vessel Impact Analysis & Fender System Design
- Construction Materials Testing
- Laboratory/Field Operations
- Project Management
- Construction Support
- Quality Assurance/Quality Control
- Structural Engineering
- Roadway & Bridge Design

TxDOT Pre-Certifications

5.2.1	14.2.1
5.3.1	14.3.1
10.5.1	14.4.1
14.1.1	14.5.1

Summary

Mr. McClelland has 44 years of experience (29 years directly with TxDOT) in all aspects of Geotechnical Engineering. Most of his career was spent working in, and ultimately managing, the TxDOT Bridge Division Geotechnical Branch. He oversaw the update of the Geotechnical Manual, wrote all foundation and retaining wall Standard Specifications for the 2004 Spec Book, and oversaw the development of all current foundation and retaining wall design processes currently in use by TxDOT. He developed and oversaw the TxDOT Scour Management Program, and the program to manage structures on unknown foundations.

Relevant Experience

Structural Foundation Design
Oversaw foundation design for structures and personally designed foundations for 1000+ bridges ranging from simple off-system structures to complex, major bridge structures. Foundation types designed include drilled shafts, auger-cast piling, prestressed concrete piling, steel H-piling, steel pipe piling, steel and prestressed concrete sheet piling, and spread footings.

Slope and Retaining Wall Stability and Settlement
Oversaw evaluations for global stability and settlement of embankments, earth slopes, and retaining walls, and has analyzed 100+ slope and retaining wall projects. He is highly proficient and experienced in the external stability and global stability of slopes and wall systems and has used programs such as GSTABL to provide detailed models and analyses.

Geotechnical Exploration and Testing
Oversaw policies and methodologies for geotechnical exploration within TxDOT and developed 100+ soil exploration plans. This included determination of soil boring number, location and depth, appropriate in-situ, and laboratory testing, need for and installation of monitoring wells, inclinometers, and other field instrumentation, and final analysis and reporting of results.

Construction Support
Acted as primary construction and maintenance support within TxDOT for issues involving bridge foundations, retaining walls, slope and wall instabilities, river migration, and scour. Work included immediate resolution of time-sensitive construction problems, evaluation and remediation of ongoing maintenance issues, and training of TxDOT and contractor construction personnel.

Relevant Project Experience

Raymondville Drain – Hidalgo and Willacy County Main Outfall Project
This project consists of Geotechnical Exploration, Laboratory Testing and Value Engineering Recommendations for the placement of a new location Main County Outfall System in Hidalgo County and connection to & expansion of an existing Delta Region drain system in Willacy County approximately 60 Miles in length with the purpose of getting water from Hidalgo County to the Laguna Madre. The project includes: 20 Miles of New Location Outfall, 40 Miles of Existing Location Expansion to Outfall, 60 Bridge Crossings (including major crossings of US 281, US 77, SH 100 and Railroad), 1 Major Control Structure at North Main Drain (Interim Phase I Conditions), Potential Lake Detention Pond at La Sal Vieja Lake, Alternative for Diversion to Main Floodwater Channel in Willacy County. Geotechnical information has been primarily collected along all outfall stretches and various analyses were completed to verify adequacy of side slopes for proposed channel section (Slope Stability). Additionally, Foundation Design Analyses & Curves have been primarily generated for all crossings including investigation of Scourability based on D50-D90 parameters at the structure locations. This job is being let out in phases and as such is still currently underway.

Additional Project Information Available Upon Request

Michael J. Maresh, PE

Summary

Mr. Maresh has 23 years of transportation engineering experience in urban and rural roadway design; 10 of those years working for the Texas Department of Transportation's Houston District Office. His responsibilities have included the development of PS&E packages for various types of facilities including freeways, arterials, direct connectors, and county roads. Mr. Maresh's design experience includes 2R, 3R, and 4R design projects, basic operational improvement projects, and full reconstruction of roadways including heavy and complex traffic control issues. He has used various software applications, such as Projectwise, Geopak, and Openroads in the design and coordination of projects.

Title
Roadway Design Engineer

Years of Experience
23

Years with Firm
7

Education
BS, Civil Engineering
Texas A&M University

Training/Certifications
Professional Engineer:
Texas/100084

Areas of Expertise
- Project Management
- Roadway Design
- Bikeway Design
- Schematic Design
- Facility Development

TxDOT Pre-Certifications:
3.2.1 Route Studies and Schematic Design
4.2.1 Major Roadway Design
4.4.1 Freeway Interchanges
9.1.1 Bicycle and Pedestrian Facility Development
9.4.1 Bikeway Design
18.6.1 Utility Management & Coordination Oversight

Relevant Project Experience

Recreational Trails Connectivity Project [Hidalgo County Precinct 2]
B2Z was contracted by Hidalgo County Precinct 2 to develop a Feasibility Study (WA#1) to determine how to connect two existing hike and bike trails in southern Hidalgo County. B2Z utilized drone technology to capture the latest existing property conditions while investigating properties along each alternative that contained special easements by Hidalgo County Drainage District #1 and USIBWC for access.

University Blvd, Sugar Land, TX [City of Sugar Land]
Mr. Maresh served as project engineer for this project that reconstructed University Blvd South (US 90A) and extended the roadway from US 90A to tie-in south of Imperial Blvd. Mr. Maresh supervised the design of University Blvd North from US 90A to Stadium Dr north of Oyster Creek. This included work on the alignments and profiles of University Blvd and an adjustment of US 90A lanes so that University Blvd would have a safe transition to an atgrade railroad crossing with the Union Pacific Railroad lines running parallel to US 90A on the north side. This project involved negotiations with TxDOT because the project would require connecting to a TxDOT facility, altering the cross-slopes of the TxDOT facility, and adding a turn lane on their facility. Mr. Maresh also worked on the demolition of US 90A, the Traffic Control Plan for US 90A maintaining the same number of existing lanes, the at-grade railroad crossing, the bridge over Oyster Creek, and a shared use path on the new bridge and tie-into an existing bike path north of Oyster Creek.

Multi-Use Bike Pathway Design (West NASA Parkway/FM 528) [TxDOT Houston]
Mr. Maresh served as project engineer for the design of a multi-use bike pathway along the north and south sides of NASA Parkway and FM 528. The pathway extended from the west sides of IH 45 through the intersection of IH 45 and tied to the existing bike lanes on West NASA Pkwy.

US 287/US 81 at Harmon Road, Ft. Worth, TX [TxDOT Fort Worth]
Mr. Maresh served as the deputy project manager for the urban freeway widening and frontage road reconstruction project. He supervised the design of the new frontage roads, the realignment of three ramps, the addition of mainlane auxiliary lanes, the new construction of two underpass bridges, and new shared-use paths. Mr. Maresh assisted in the coordination of surveys, Geotech investigation, hydraulic analysis of a FEMA channel with a bridge class culvert, and utility relocation agreements. The project required coordination with the City of Fort Worth for the adjustment of city street profiles to accommodate the required underpass clearances.

Additional Project Information Available Upon Request

Jose Noe Saldivar, PE, CFM

Title
Drainage Design Engineer

Years of Experience
28

Years with Firm
4

Education
BS, Civil Engineering
Instituto Tecnologico de Cd. Victoria, 1997

Training/Certifications
Professional Engineer: Texas/94076

Certified Floodplain Manager CFM/3340-17N

Areas of Expertise
- Hydraulic Design
- Hydrologic Studies
- FEMA Requirements, Coordination & Funding
- Bridge Design
- Roadway Design
- Project Management

TxDOT Pre-certifications
4.2.1 – Roadway Design
8.1.1 – Signing, Pavement Marking, and Channelization
10.1.1 – Hydrologic Studies
10.2.1 – Roadway Hydraulic Design

Summary

Mr. Saldivar has over 28 years of progressive experience in transportation and drainage planning and design. He has served as a Project Manager and a Surveying Manager for various engineering firms. He is experienced in route studies and planning, preparation of plans specifications, and estimates (PS&E), utility relocation, geometrics, signage and pavement markings and hydraulics. He has participated on numerous engineering assignments associated with the development of roadways, storm drainage systems, traffic control planning, bridge layout, and various other civil engineering applications. His experience includes design and development and hydraulic report/data sheet development. He is proficient in software such as Windstorm, Culvert, HEC-RAS, TR 55, HY8, Geopak and AutoCAD. Mr. Saldivar has prepared numerous drainage studies and reports including determining proposed improvement impacts, drainage areas, discharges, FEMA floodway requirements, culvert/ bridge locations and sizes, design frequency flow, tailwater and headwater elevations for design and anticipated overtopping of the bridges. He has performed scour analysis and prepared numerous SW3Ps to minimize sediment transport into drainage facilities. Mr. Saldivar's representative project experience includes:

Relevant Project Experience

2018 Drainage Bond Program, Hidalgo County, TX
As Project Manager, Mr. Saldivar was responsible for managing seventeen (17) consultants with countywide projects that would positively affect more than 69,000 structures in Hidalgo County, helping to protect more than $5.5 billion in assessed property value. The 2018 Drainage Bond Program consists of 37 projects of which ten (10) projects required coordination with USIBWC to secure environmental clearance for amended or new licenses for structures outfalling into the USIBWC Floodway. Mr. Saldivar was responsible for reviewing and approving all H&H deliverables.

US 277 / Maverick County, TxDOT-Laredo District
As Project Engineer, Mr. Saldivar was responsible for storm sewer design which proved to be more feasible since the basin size was limited and due to shallow groundwater in the area. The storm system outfalls into Canyon Grande Creek; therefore, the creek was analyzed to find appropriate tail water elevations for culvert drainage areas and regional regression equation for Canyon Grande Creek.

North I Road, Pharr, TX
As Project Engineer, Mr. Saldivar was responsible for storm sewer design, illumination, signing and pavement markings. He analyzed to find appropriate tailwater elevations for the storm drain system. Hydrology services included the rational method for small, paved drainage area. SW3P sheets were completed.

North San Juan Drainage Lateral, San Juan, TX
Performed survey and assisted in performing a hydraulic study and drainage ditch design along with drainage structure for the upsizing the irrigation district owned drainage ditch in north San Juan, Texas from 495, north to its outfall north of Canton Road.

Additional Project Information Available Upon Request

Saul R. Muñoz, PE

Title
Construction Engineer

Years of Experience
42 (25 with TxDOT)

Years with Firm
7

Education
Bachelor of Science in Natural Gas Engineering

Certifications/Training
Professional Engineer: TBPE #71364

Local Government Project Procedures Certified (LGPP)

Management Certification (FHWA)

Texas Concrete Pipe Association

Areas of Expertise
- Construction Engineering
- Construction Management
- Construction Inspection
- Constructability Review
- Project Close Out Process
- Local Government Projects Development
- Knowledge of Federal and State Highway Requirements
- Highway Construction & Design Engineering (Roadway & Bridge)
- Highway Plan Review & Preparation

Summary

Mr. Muñoz has over 42 years of experience in the field of Engineering. With over 25 years of TxDOT experience, Mr. Muñoz brings a wealth of knowledge in the areas of road/bridge design and construction, inspection and materials testing, project lettings, contract administration, change orders, construction payments, and project management. Throughout his career, Mr. Muñoz has gained extensive knowledge of working on large complex Interstate projects, State Farm to Market Highways to Off System Roads and Bridges. His experience includes working with highly experienced Contractors, Subcontractors, City Municipalities and Leaders, County Municipalities and Federal Entities including, but not limited to the Federal Highways and Administration, IBWC, and the USACE. Mr. Muñoz has managed over 100 projects specializing mainly in bridge and roadway construction. As District Construction Engineer in Pharr, Mr. Muñoz prepared several million-dollar change orders, negotiated costly utility disputes for extended performance, and settled construction claims as necessary. In the Dallas District, Mr. Muñoz was also responsible for plans, specifications, and estimates, geometric highway control, pavement thickness design, drainage area mapping, storm sewer design, and hydraulic & environmental reports.
Mr. Muñoz performed the following services on the relevant projects listed below:

- Construction site daily/weekly inspection and management
- Project plan and specification adherence
- Progress meetings
- Evaluate back-charges and change order entitlement
- Evaluate payment requests by contractor

Relevant Project & Area Experience

Mile 3 Road Project (Hidalgo County, TX)
$14M Construction Cost. The Mile 3 N Road Project consists of the reconstruction of the existing 2-lane roadway from Tom Gil Road to FM 492 (Goodwin Road) (3.41 miles) to a 4-lane divided urban roadway consisting of grading, curb and gutter, lime treated subgrade, flexible base, asphaltic concrete paving, storm sewer, culvert structures, sidewalks with ADA ramps, signing, pavement markings, traffic signals, and outfalls.

Dicker Road Project (Hidalgo County, TX)
$16.5M Construction Cost. This reconstruction project consists of expanding the existing 2 twelve-foot lanes rural roadway with shoulders and ditch drainage to a sixty-six-foot-wide divided urban roadway that will accommodate 4-lanes of traffic (two fourteen-foot shared travel lanes, two twelve-foot travel lanes, and one fourteen-foot left turn lane).

Regional Linear Park Project (Hidalgo County, TX)
$3.8M Construction Cost. The RLPP Section II was 2.64 miles of new location consisting of a ten-foot-wide asphalt trail that accommodated two-way shared-use traffic, as well as two prefabricated pedestrian bridges, and three pedestrian box culvert tunnel crossings under three major roadways. The trail was inclusive of pavement markings, signing, and continuous illumination.

US 281 Expressway, Road & Floodway Bridge - Six Segments$184M Construction Cost – Six Reconstruction Projects – 27 Miles. Managed Mainlane Construction, Frontage Roads, Bridges, Super Structures, Fly Over Structures, RE Walls, Storm Sewer Drainage, Large and Small Signing, Localized and High Mast Lighting, and Signalized Intersections.

Armando Pompa, CFM

Title
Production Manager

Years of Experience
20

Years with Firm
6

Education
Bachelor of Business Administration: Information Technology & Networks

Certifications
Certified Floodplain Manager CFM/3642-19N

Areas of Expertise

- Emergency/Disaster Response Planning
- Hydrologic Mapping
- Data Research
- Drone pre-flight management & post flight processing
- Trimble Business Center
- Geo-referencing & Geo-processing
- Construction project management
- Schematics
- Conceptual Layouts/Mapping
- 3D Visualization/Rendering
- Bridge Detailing/Design
- Website Design/Creation
- Cartographic Design
- Metadata and Documentation
- Database Creation
- SQL & Python Scripting
- Utility Mapping

Summary

Mr. Pompa has over 20 years of experience in the infrastructure industry. He has participated in a wide range of projects, from road and drainage design to GIS analysis and drone surveying technology. Mr. Pompa is responsible for overseeing the civil infrastructure department by assisting the project engineering team with plan production and design input. Mr. Pompa also oversees the GIS department with over 10 years of experience as a GIS analyst. He is responsible for ensuring our clients are provided with the maps and analysis they need to effectively communicate with their constituents and provide GIS analytics to assist in community development and emergency preparedness. Mr. Pompa also oversees the Drone department which is instrumental to the industry by providing clients and in-house projects with the latest survey-grade orthomosaic imagery and existing land data, such as contours, DEMs, Hydro-statistical data and post-disaster photography and videography.

Relevant Project Experience

Recreational Trails Connectivity Project [Hidalgo County Precinct 2]
B2Z was contracted by Hidalgo County Precinct 2 to develop a Feasibility Study (WA#1) to determine how to connect two existing hike and bike trails in southern Hidalgo County. B2Z utilized drone technology to capture the latest existing property conditions while investigating properties along each alternative that contained special easements by Hidalgo County Drainage District #1 and USIBWC for access.

Hidalgo County Precinct No. 2 Stormwater Management Project
B2Z was contracted to provide a solution to Precinct 2's rural drainage problem, B2Z was tasked to design a stormwater system that provided a positive flow at all rural roads, ultimately discharging stormwater to a nearby drain ditch or detention pond. Mr. Pompa oversaw the data collection via sUAS (drone) aircraft and survey-grade data collection. B2Z processed the data collected to design and develop PS&E sheets for Precinct No. 2 staff's use.

City of Mission Geographic Information System (GIS) Services
Mr. Pompa, with the support of the GIS team, are the fiduciary agents for all data for the City of Mission. With two Senior GIS Analysts, having over 20 years of combined experience, including one GISP, B2Z is responsible for collecting, managing, and processing Mission's GIS data. Mr. Pompa oversaw the creation of the city's first ever online GIS web maps that provide their constituents with real-time planning solutions, preventing residents from having to make a trip to city hall to request city infrastructure data.

Hidalgo County Drainage District #1 Site Assessment Mapping
Mr. Pompa managed two teams to complete this project. He oversaw the drone team's task in collecting aerial imagery of all the colonia boundaries within Precinct No. 3. He also managed their effort in field data reconnaissance using survey data collection devices from Trimble and ESRI (ArcCollector and Survey 123). Mr. Pompa managed the GIS team to make sure they assimilated all the data that was collected by the drone and survey team and generated site assessment maps that identified the colonias legal boundary, easement, existing utilities, existing drainage, etc.

Moveable Bridge Inspection and Routine Maintenance Contracts (RMC)
Mr. Pompa, with the support of the Drone team, performed inspection on the Rio Hondo Lift Bridge within the TxDOT Pharr District and the Cow Bayou Swing Bridge within the Beaumont District. Utilizing drone videography and aerial imagery, Mr. Pompa collected and recorded existing bridge conditions further cataloging and categorizing the data for use within the conditions report.
