She has experience working with right-of-way mapping, utility coordination, and development permitting processes, ensuring projects comply with applicable municipal, county, and TxDOT requirements. Ms. Rodriguez experience provides her with a strong understanding of local subdivision requirements, ETJ regulations, and approval processes, allowing her to effectively support surveying services from data collection through final plat approval.

Professional Experience

Hidalgo County Planning Department – Project Coordination / Leadership Role (February 2025 – March 2026)

- Oversaw development review processes including subdivision plats, site plans, and permitting
- Coordinated with multiple departments, agencies, and utility providers
- Ensured compliance with county regulations, development standards, and platting requirements
- Assisted in managing planning operations and supporting departmental decision-making
- Reviewed development applications for completeness and regulatory compliance

L&G Engineering – Graduate Engineer (August 2022 – Fenruary 2025)

- Designed and drafted drainage improvement projects for Hidalgo County Drainage District No. 1 (HCDD1)
- Prepared full PS&E plan sets including plan/profile sheets, drainage layouts, and earthwork quantities
- Developed 3D corridor models and performed quantity calculations
- Coordinated with irrigation districts and utility providers
- Assisted in preparation of cost estimates and bid documents

S&B Infrastructure (RRP Consulting Engineers) – Civil Structural Designer II (October 2020 – July 2022)

- Supported roadway design and stormwater projects under TxDOT and local government standards
- Prepared PS&E components including plan/profile sheets, traffic control plans, and SW3P layouts
- Developed typical sections, signage and striping layouts, and sequencing plans
- Assisted in developing cost estimates, schedules, and bid documents
- Ensured compliance with TxDOT Roadway Design Manual

Certifications

- TxDOT Local Government Project Procedures Qualification
- TxDOT ROW100 – Identifying and Managing Utility Conflicts
- ArcGIS Pro – Map Creation Certification

Technical Proficiency

- AutoCAD Civil 3D
- MicroStation
- OpenRoads
- GeoPAK
- ArcGIS Pro

MICHAEL ALEXANDER PALOMO

Title
Survey Party Chief

Years of Experience
6 years

Areas of Expertise

- Survey field work
- Topographic collector
- Data Collector Software

Summary:

Mr. Palomo has six years of experience in surveying, supporting a variety of land development and infrastructure projects throughout the Rio Grande Valley. He serves as a Survey Party Chief, where he is responsible for leading field crews, coordinating daily survey operations, and ensuring the accurate collection of topographic and boundary data. His experience includes working on subdivision developments, right-of-way surveys, and general field data collection to support engineering design. Mr. Palomo is proficient in the use of GPS equipment and data collection software, and plays a key role in maintaining data accuracy, efficiency in the field, and effective coordination with project teams.

Professional Experience:

S2 Engineering, PLLC – Survey Party Chief

- Responsible for overseeing survey field operations managing survey crews
- Coordination of data collection
- Leads the acquisition of precise field data to support engineering design, subdivision development, and right-of-way mapping projects.

Hidalgo County Drainage District, Engineering Department

- Survey Crew Member
- Performed topographic data collection in support of drainage and infrastructure improvement projects
- Assisted in the acquisition of accurate field data for engineering analysis and design.

Technical Proficiency

- Trimble R12i
- Trimble R10
- Conventional Level
- Trimble Total Station Management
- Digital Level

ANDRES CIENEGA

Title
Survey PartyChief

Years of Experience
3 years

Areas of Expertise

- Survey field work
- Topographic collector
- Data Collector Software

Summary:

Mr. Cienega serves as a Survey Party Chief with over three years of progressive experience supporting public and private sector surveying projects throughout Hidalgo County. He has a strong background in field operations, specializing in the collection of high-quality topographic and boundary data to support engineering design, drainage improvements, and subdivision development.

Professional Experience:

S2 Engineering, PLLC – Survey Party Chief

- Responsible for overseeing survey field operations managing survey crews
- Coordination of data collection
- Leads the acquisition of precise field data to support engineering design, subdivision development, and right-of-way mapping projects.

Technical Proficiency

- Trimble R12i
- Trimble R10
- Conventional Level
- Trimble Total Station Management
- Digital Level

Re: **Request for Qualifications - Professional Engineering Services, RFQ 2026-7**

Greetings Mr. Hinojosa,

SAMES, Inc. (SAMES) is pleased to submit our Statement of Qualifications in response to the City of Edinburg's (City) Request for Qualifications for Professional Engineering Services. As a locally based engineering firm with extensive experience serving municipalities throughout South Texas, we are genuinely interested in continuing to support the City's infrastructure initiatives. We are committed to providing responsive, high-quality engineering services that help the City successfully plan, design, and deliver projects that benefit the community.

Our professionals have extensive experience partnering with municipalities to plan, evaluate, design, and implement a wide variety of infrastructure improvements. In addition to our civil engineering capabilities, SAMES offers comprehensive in-house support services, including professional land surveying, drafting, environmental compliance, construction management, and construction engineering and inspection (CEI) services. This multidisciplinary approach allows us to efficiently coordinate project delivery while maintaining quality, schedule, and budget objectives.

Included in this Statement of Qualifications are our firm's qualifications, project team, representative engineering projects, and references demonstrating our successful performance on municipal projects. Through decades of municipal engineering experience—including numerous projects completed throughout South Texas and for the City of Edinburg—we understand the importance of technical excellence, clear communication, regulatory compliance, and responsive client service. We are confident in our ability to successfully perform the requested services and are fully committed to providing the professional expertise, responsiveness, and dedicated support necessary to help the City achieve its project goals.

I, Samuel D. Maldonado, PE, RPLS Principal/CEO, will serve as the primary point of contact for all correspondence regarding this RFQ. My contact information is provided below:

Samuel D. Maldonado, PE, RPLS - Principal / CEO
4943 S. Jackson Road, Edinburg, Texas 78539
Office: (956) 702-8880 Fax: (956) 702-8883 Mobile: (956) 207-7130
sam@samengineering-surveying.com

To date, we have not received any addenda related to this RFQ. As one of the firm's two principals, I have the authority to submit this Statement of Qualifications and contractually bind SAMES, Inc.

Thank you for your time and consideration. We sincerely appreciate the opportunity to be considered for this important work and would welcome the opportunity to discuss our qualifications in greater detail. SAMES is committed to establishing and maintaining a strong working relationship with the City of Edinburg, and we look forward to the opportunity to continue serving the City through the successful delivery of its engineering projects.

Respectfully,

Samuel D. Maldonado, P.E., R.P.L.S.
Principal / CEO

FIRM QUALIFICATIONS AND EXPERIENCE

As a locally owned and operated firm headquartered in Edinburg, SAMES is pleased to offer the City of Edinburg comprehensive Professional Engineering Services tailored to support the City's current and future infrastructure initiatives. We are committed to delivering timely, cost-effective solutions that facilitate successful project planning, design, construction, and long-term asset management. By combining extensive technical expertise with responsive client service, our team consistently delivers high-quality engineering solutions that address the City's evolving infrastructure needs.

Established in 2008 by brothers Samuel and Saul Maldonado, SAMES is a minority-owned engineering and surveying firm founded on the mission: *"To empower leadership that promotes excellence through teamwork, accountability, and integrity while providing quality professional engineering, construction, and surveying services."* Initially focused on the core civil engineering disciplines of roadway design, water distribution systems, wastewater collection systems, and storm sewer systems, the firm has strategically expanded its capabilities to better serve our clients. Today, SAMES provides comprehensive services that include Professional Land Surveying, Land Development, Geographic Information Systems (GIS) mapping, and Construction Engineering Inspection (CEI), enabling us to deliver integrated solutions throughout every phase of project development.

SAMES is registered and in good standing with the Texas Board of Professional Engineers and Land Surveyors and meets all applicable local, county, and state licensing and insurance requirements. We are also a Small Disadvantaged HUBZone firm certified by the U.S. Small Business Administration and are pre-certified with the Texas Department of Transportation (TxDOT) to provide engineering, surveying, and related professional services for state- and federally funded projects.

Professional Services

SAMES specializes in providing comprehensive civil engineering services for municipal infrastructure projects, including roadway, drainage, water, wastewater, and utility improvements. Our multidisciplinary team delivers planning, design, construction engineering inspection (CEI), and project management services supported by fully integrated in-house surveying, subsurface utility engineering (SUE), and land development capabilities. Our land development services include feasibility studies, subdivision platting, topographic and boundary surveys, right-of-way mapping, easement acquisition, and construction staking, allowing projects to progress efficiently from planning through construction.

Our fully staffed Surveying and Drafting Department provides timely collection, analysis, and processing of field data into accurate technical documents that support engineering design and construction. Surveying services include topographic, boundary, aerial, and A.L.T.A. surveys; utility and right-of-way mapping; horizontal and vertical control; parcel plats with metes and bounds descriptions; easement acquisition support; and construction staking. Using advanced GPS equipment with sub-centimeter accuracy, robotic total stations, electronic data collectors, and RTK network technology, our survey crews efficiently produce precise field data that integrates seamlessly with Trimble Business Center and CAD software to develop reliable engineering deliverables.

Construction Engineering Inspection services are performed with a strong commitment to quality, safety, regulatory compliance, and client satisfaction. Throughout construction, our team provides oversight, documentation, coordination, and quality assurance to help ensure improvements are completed in accordance with project plans, specifications, and applicable standards.

SAMES delivers turnkey civil engineering solutions that support projects through every phase of development. From funding assistance and preliminary engineering through final design, permitting, bid-phase services, and construction administration, our structured project delivery approach provides clients with a single source of accountability. Our objective is to develop resilient, sustainable infrastructure that meets community needs while delivering projects on schedule, within budget, and to the highest professional standards.

SAMES provides the following services:

- **Design Services**
  - Civil Engineering
  - Construction Engineering Inspections
  - GIS and Mapping
  - Project Management
- **Development and Planning**
  - Subdivision Platting
  - Feasibility Studies
- **Land Surveying**
  - Topographic & Boundary
  - ROW & Utility Mapping
  - Aerial Mapping & LiDAR
  - Construction Staking

Engineering Services

- *Planning, Research, and Development*
- *Feasibility Studies and Engineering Reports*
- *Subdivision Platting and Development*
- *Roadway and Parking Lot Design*
- *Storm Water Collection System and Drainage Design*
- *Hydrology Analysis and Hydraulics Design*
- *Erosion and Sediment Control Designs*
- *Water and Wastewater Infrastructure Design*
- *Right-of-Way Mapping and Easement Acquisitions*
- *Plans, Specifications, and Cost Estimates*
- *Procuring Federal, State, Local Grants and Permits*
- *Bid Procurement and Construction Administration*
- *Cost Estimates and Financial Analysis*
- *Environmental Evaluations*

Professional services are provided from SAMES' office located at 4943 S. Jackson Road in Edinburg, Texas, allowing our team to respond quickly and efficiently to the City's needs.

Local Government Engineering Experience

SAMES' experience, qualifications, and commitment to responsive, high-quality service have enabled us to successfully complete numerous professional engineering projects for municipalities, counties, utility districts, and private and commercial clients. The projects listed below represent a selection of our most notable engineering assignments completed for local government entities within the past two years.

- ***City of Edinburg*** *– Schunior Phase III Mon Mack Project; Chapin Pump Rehabilitation;*
- ***City of La Villa*** *– Water Tank Rehabilitation Public Improvements; Drying Beds Rehabilitation Public Improvements;*
- ***City of McAllen*** *– Foreign Trade Zone Stormwater Pump Station;*
- ***City of San Juan*** *– 2023 CDBG Street Improvements; Valley Ranch Subdivision Plan Review; Black Hills Subdivision Plan Review; Surveying and Civil Engineering Services for San Juan Parks and Recreation Center;*
- ***City of Palmview*** *– Civil Engineering Design for Ramirez Ditch Widening Project; Ramirez Drainage Project; Riverside Estate Drainage Improvements;*
- ***City of Rio Grande City*** *– Public Safety Subdivision Lot 1 Drainage Improvements; St. Ives Subdivision Lot 1: Offsite Water and Sewer Extension; RGC CDBG Street Improvements;*
- ***Rio Grande City EDC*** *- Las Velas Road Widening Project;*
- ***City of Roma*** *– Las Americas Roma Logistics and Industrial Park - Lot 18; Professional Engineering, Surveying and Construction Administration Services for Centennial Drive; Water Booster Pump Station;*

- ***Hidalgo County Urban County Program (UCP)*** *- City of La Villa 2023 CDBG Drainage Improvements;*
- ***Hidalgo County Drainage District No. 1*** *– Mission-McAllen Drain Phase III; West Main Drain Extension Phase II;*
- ***Hidalgo County Pct. 1*** *- Expansion of Shary Road 2 Miles N. of SH 107 Phase I;*
- ***Agua Special Utility District*** *- Short Term Water Plan and CIP Update; Geographic Information Systems Mapping Phase I; Alternative Capacity Requirement (ACR) Reevaluation; CCN Expansion/Amendment; EPA Application; Palmview Yardline Project Phase II: Construction Support Services; La Joya Lake Preliminary Engineering; TWDB DWSRF 5MGD WTP Application;*

Experience with Local, State and Federal Agencies

SAMES is a trusted partner to a diverse range of clients, including federal and state agencies, counties, municipalities, utility districts, and private entities. Many of our projects involve capital infrastructure improvements funded through programs administered by the Texas General Land Office (GLO), Texas Department of Transportation (TxDOT), Texas Water Development Board (TWDB), North American Development Bank (NADBank), and the Environmental Protection Agency (EPA), as well as projects funded through joint participation agreements and local government bond programs.

Through collaboration with these agencies and multiple levels of government, SAMES has developed a comprehensive understanding of the regulations, funding requirements, policies, and reporting procedures that govern publicly funded infrastructure projects. Our experience includes navigating state and federal permitting processes, environmental coordination, procurement requirements, labor compliance standards, interagency coordination, and grant administration necessary to successfully deliver projects from planning through construction.

This experience enables our team to proactively identify regulatory requirements, permitting needs, and potential project constraints during the earliest stages of project development. By incorporating these requirements into project planning and design, we help clients minimize risk, avoid costly delays, maintain compliance, and keep projects on schedule. In addition, SAMES has extensive experience supporting funding and grant application efforts, coordinating bond-funded projects, and administering federally and state-funded programs through the timely preparation and submission of required documentation, including monthly progress reports, certified payroll reviews, reimbursement packages, construction documentation, and other program deliverables. Our proactive approach ensures projects remain compliant while advancing efficiently from concept through completion.

Project Management and Approach

SAMES has developed a robust project management plan to ensure effective execution of the tasks expected of the firm if selected to provide professional engineering services to the City of Edinburg. Our approach focuses on managing risk, ensuring timely completion, and maintaining the project schedule and budget. The project will be led by a dedicated team that will coordinate with all governmental and non-governmental agencies to ensure the successful completion of each task.

We will manage all project activities in strict accordance with the schedule, ensuring each phase is completed as required and within budget. Our management plan incorporates efficient communication and progress-tracking strategies throughout the project duration. Leveraging our extensive industry knowledge and technical expertise, we will deliver best-in-class engineering solutions aligned with the City's strategic priorities.

FIRMS CAPABILITY TO MEET SCOPE OF SERVICE REQUIREMENTS

Planning – SAMES understands the distinct processes involved in planning and design services for infrastructure projects and leverages this experience to add value during the early planning stages. Aligning the level of planning with project complexity and associated risks is critical to project success. Early evaluation of alternative approaches allows SAMES to identify cost-effective solutions and opportunities to add value with minimal investment of time and resources.

Using this approach, SAMES develops a clear project plan that addresses management and execution challenges early, helping prevent delays and optimize staff and resources. Throughout design and construction, SAMES conducts ongoing project reviews to maintain focus on value, performance, schedule adherence, and budget compliance while delivering effective service to City of Edinburg.

Integration of Design Activities – SAMES' design process begins by identifying the project need or problem, followed by research of applicable technologies, prior studies, and adaptable design solutions. The process includes identifying project constraints, developing and evaluating alternatives, selecting the optimal solution, and managing the overall design effort. SAMES then communicates the final design and prepares the required specifications and construction parameters.

These activities are guided by SAMES' sustainable design approach, which ensures that facility planning, construction, operation, and eventual decommissioning are safe, energy-efficient, and environmentally responsible. By integrating sustainability throughout the design process, SAMES evaluates alternatives against project requirements and selects solutions that provide the most sustainable and cost-effective outcomes.

Schedule and Budget Compliance – SAMES employs a disciplined project management approach that emphasizes proactive planning, clear leadership, defined responsibilities, and continuous coordination to deliver projects on schedule and within budget. Following coordination with the City of Edinburg to establish project objectives, timelines, and available funding, our team develops a detailed project schedule using Primavera P6 or Microsoft Project. Schedules are developed utilizing Critical Path Methodology (CPM), incorporating task logic, durations, permitting activities, agency review periods, and key project milestones. As projects advance, schedules are continuously refined through design reviews, constructability evaluations, and coordination with City staff and regulatory agencies.

Senior Project Managers oversee schedule performance through milestone tracking, internal QA/QC review checkpoints, resource management, and ongoing communication with project stakeholders. Weekly progress meetings and routine risk assessments allow our team to identify potential schedule or budget impacts early and implement practical mitigation strategies before they affect project delivery. Our ability to self-perform surveying, civil engineering design, and construction phase services further enhances schedule control by minimizing coordination delays between multiple consultants. Drawing on extensive experience with municipal projects, we also incorporate recurring agency review cycles, planning meetings, and board meeting schedules into project planning and conduct pre-submittal coordination meetings to reduce review comments and avoid unnecessary delays. This integrated approach enables SAMES to consistently maintain schedule performance, control project costs, and deliver high-quality engineering services that meet the City of Edinburg's expectations.

Utility Coordination and Relocation - SAMES has extensive experience in utility design, coordination, and relocation management for public infrastructure projects of varying size and complexity. Our approach integrates Subsurface Utility Engineering (SUE), utility conflict analysis, coordination with utility providers, and Construction Engineering Inspection (CEI) to accurately identify, protect, and relocate utilities in accordance with project requirements.

Our team routinely coordinates with utility providers—including Texas Gas Service, American Electric Power (AEP), Spectrum, and local irrigation districts—to review design conflicts, develop relocation plans, prepare cost estimates, coordinate construction sequencing, and maintain uninterrupted utility service throughout project delivery.

SAMES' expertise is demonstrated through our ongoing blanket contract with Texas Gas Service, under which we have provided engineering and surveying services on an as-needed basis since 2014. During this time, we have successfully designed and supported numerous gas main extensions, relocations, and adjustments throughout the Rio Grande Valley while consistently meeting safety, quality, and schedule objectives.

Through proactive coordination with municipalities, TxDOT, utility providers, irrigation districts, and private developers, SAMES minimizes schedule delays and cost impacts associated with utility conflicts while effectively managing the interface between utility infrastructure and transportation, drainage, and land development projects from design through construction.

Permitting - SAMES has extensive experience coordinating with government agencies including Hidalgo County Drainage District, Hidalgo County Irrigation District, TxDOT, and the U.S. Army Corps of Engineers, among others. A key component of our project management approach is ensuring that all required permits are identified, requested, and secured prior to initiating construction phase services.

Risk Identification - SAMES takes a proactive approach during pre-planning to identify constraints early and implement corrective measures before they impact the project. Our integrated in-house surveying, engineering, and construction management teams enable us to address potential issues throughout the design, permitting, and construction phases.

Key processes we use to anticipate and manage project constraints include:

- Structured 30%, 60%, and 90% design reviews
- Formal QA/QC protocols at both field and office levels
- Early coordination with regulatory agencies and utility providers
- Continuous cost and constructability evaluations
- Internal peer review prior to each submittal

Construction Management and Inspections - SAMES provides a fully integrated construction management and inspection program that ensures projects are executed with the highest standards of quality, compliance, and cost efficiency. From initiation through completion, we manage all aspects of construction delivery—tracking progress, overseeing contractor performance, coordinating utilities, and developing phased schedules that minimize disruption and maintain productivity.

We offer comprehensive construction management, inspection, and contractor quality control services across transportation, utilities, drainage, environmental, water/wastewater, and recreational projects. Our approach relies on consistent, informed inspection and strict adherence to design documents, specifications, and contract requirements. Delivering this level of quality requires technical expertise, sound judgment, effective communication, and collaboration among all project stakeholders.

For public agencies with limited resources, SAMES provides flexible, all-inclusive Construction Engineering Inspection (CEI) teams capable of supplementing staff or managing full construction oversight as needed.

Technical Systematic Approach

SAMES' project approach is guided by our commitment to fully support our clients and their projects. We begin by understanding staff needs and then align them with regulatory requirements, budget constraints, and Board direction to ensure client goals are achieved. For most projects, our technical system approach includes the following:

1. **Site Surveying Data Collection**
    a. Topographic Survey
    b. Research right-of-way and property line information
    c. Establish on-site vertical and horizontal control for construction use
2. **Planning and Preliminary Design**
    a. Coordination with Planning Staff
    b. Preparation of forms specific to the funding agency
    c. Environmental Coordination
    d. Geo-Technical Testing Coordination
    e. Schematic Design
3. **Engineering and Design**
    a. Location Map
    b. Existing Plan Sheets
    c. Proposed Plan & Profile Sheets
    d. Hydraulic Data / Calculation
    e. Traffic Control Plans
    f. Detail Sheets
    g. Technical Specifications Book
4. **Permitting**
    a. All required Permits (e.g., HCDD #1, HCID, TxDOT, etc.)
5. **Construction Phase Services**
    a. Bidding & Award Services
    b. Construction Administration Services
    c. Regulatory Reporting
    d. Staking and Control for installation of utilities
    e. Coordinate and conduct all field testing and inspections (interim and final)
    f. Submittal Reviews
    g. Quality Control Oversight
6. **Project Close-out**
    a. Close-out Documentation
    b. Final Walk-thru and provide punch list
    c. Electronic AutoCAD As-built drawing files

Quality Assurance / Quality Control (QA/QC)

Successful management of quality involves various levels of responsibility. From these levels quality assurance for each project can be standardized.

Level of Responsibility

- PROJECT MANAGER (PM) – responsible for integrating Quality Assurance planning and controls into project management process to ensure that City of Edinburg's policies, objectives and standards are met for each project.

- PROJECT ENGINEERS/KEY TASK LEADS – responsible for executing quality control measures, including adherence to design checklists, identification and resolution of issues within functional design teams prior to submittal of deliverables.

Identification of Quality Issues

If an issue is identified with the quality of the plan set or with compliance with design requirements, the Project Manager will document the issue in a Quality Control Memo addressed to the responsible Project Engineer or Task Lead. The memo will describe the scope of the issue, the specific concern, and the required deadline for correction and resubmittal. Any dependent disciplines will be notified of the correction requirements to ensure overall project progress remains on schedule.

- Identify potential risks, assess their impact on the project and define mitigation strategies.
    - Integrate QA/QC reviews at key milestones (e.g., 30%, 60%, 90%).
    - Conduct interdisciplinary design reviews among roadway, drainage and utility components etc.
    - Conduct Resolution Meetings at bi-weekly design review meetings or as needed
    - Maintain decision log
- Utilize checklists to ensure compliance with design standards and specifications prior to submittal such as:
    - PS&E Submittal Checklist
    - PS&E Quality Control Milestone Checklist
    - Documentation Comment Log Matrix with Bluebeam Review sessions saved.

Communication Process

The purpose of the SAMES communication process is to maintain consistent communication internally, with clients, and with the public. Beginning at the pre-design conference, the Project Manager and Project Engineers will collaborate to develop and update a communication plan that formalizes stakeholder priorities and requests. The plan will clearly define what information will be communicated, to whom, and by when. This structured approach supports comprehensive planning, promotes stakeholder collaboration, and ensures that project progress and issue resolution remain a consistent focus.

Components of the Plan: Internal Communication

What should be communicated?	Format	To Whom?	By When?
Updates on (1) progress (scope, schedule and budget), (2) critical decision items, and (3) look ahead for key milestone tasks.	Written high level report	Client / Project Owner	By the 5th of every month
(1) Interdisciplinary Design Review Mtgs to report progress, discuss design related issues and updates on ongoing Utility Conflict Matrix (UCM) items.	Design review mtg agenda with meeting minutes	Design Project Team	Bi-weekly after each progress meeting
Schedule meetings to address design challenges/conflicts.	Conflict resolution mtg agenda with decision log updates	Client/Project Owner, Design Project Team, Stakeholders	Bi-weekly or as needed.
Daily communication in writing or verbally to progress design and plan set.	Updates to design summary report, UCM, decision log	Available to all through project meeting minutes	Within a week of update

Ability to Meet Schedules and Deadlines

SAMES understands that timely engineering deliverables are critical to maintaining project schedules and supporting every phase of project development and construction. Our Engineering Department utilizes efficient project management processes that enable the successful execution of multiple assignments while consistently meeting client deadlines. From contract initiation through final deliverables, project schedules are actively monitored, project teams are strategically assigned based on workload and project priorities, and resources are adjusted as needed to maintain productivity and respond to changing project demands.

Continuous communication among project managers, engineering staff, survey personnel, and field inspectors allows our team to quickly address unforeseen site conditions, design challenges, permitting issues, or other project constraints without compromising quality or schedule. Regular coordination meetings and ongoing collaboration across disciplines provide the flexibility to reallocate personnel and resources as workloads fluctuate, ensuring critical milestones and client deadlines remain on track.

This proactive approach to project planning, resource management, and communication enables SAMES to efficiently manage multiple projects simultaneously while consistently delivering accurate, high-quality engineering deliverables on schedule. Our integrated engineering, surveying, and construction support services further enhance project coordination, allowing us to respond quickly to project needs while maintaining quality, regulatory compliance, and client satisfaction.

Contingency Plan for Key Personnel Availability

SAMES has a proactive contingency plan to ensure uninterrupted service delivery to address staffing needs should key personnel become unavailable.

1. **Cross-Training & Role Redundancy** – Each critical role has a designated backup staff member trained to step in as needed. Our project managers, project engineers, and CAD technicians are cross trained to ensure continuity.
2. **Scalable Staffing & Resource Allocation** – We maintain a flexible workforce with additional engineers, technicians and administrative support on standby, ensuring smooth personnel transitions without project delays.
3. **Rapid Response & Remote Collaboration** – Cloud-based project management systems allow seamless access to plans and data, enabling any assigned team member to continue work without disruption.
4. **Subcontractor & Partner Support** – If additional resources are needed, pre-qualified subcontractors are available to supplement our in-house team, ensuring compliance with all standards.

Through this structured contingency plan, SAMES guarantees that the City's projects will stay on schedule, despite any unforeseen personnel changes.

Uniqueness to Best Perform

SAMES recognizes that successful infrastructure projects require more than sound engineering design—they require a multidisciplinary team that understands how planning, surveying, engineering, and construction activities work together to achieve successful project outcomes. As a locally owned and operated firm headquartered in Edinburg, SAMES brings extensive experience serving the City of Edinburg

and surrounding communities, providing valuable regional knowledge, familiarity with local conditions, and an understanding of the factors that influence efficient project delivery.

A key advantage of SAMES is our ability to provide comprehensive, turnkey professional services through fully integrated in-house engineering, surveying, drafting, land development, and construction support capabilities. Our engineers, survey professionals, CAD technicians, and construction personnel collaborate throughout every phase of a project, ensuring technical information is collected, analyzed, and applied with the intended design objectives in mind. This integrated approach enhances coordination, streamlines communication, reduces project risks, and produces practical, cost-effective solutions while maintaining compliance with applicable design standards and regulatory requirements.

Our fully staffed Surveying and CADD Department further strengthens our engineering services by providing timely, accurate technical data that supports roadway, drainage, utility, and land development projects. By maintaining these capabilities in-house, SAMES minimizes project handoffs, improves quality control, accelerates project delivery, and provides clients with a single point of accountability throughout the project lifecycle.

Located on Jackson Road within the City of Edinburg, SAMES is readily accessible to City staff and project stakeholders, allowing our team to respond quickly to project needs, conduct site visits, and participate in meetings with minimal delay. Combined with our local knowledge, multidisciplinary expertise, and commitment to responsive client service, SAMES is uniquely positioned to deliver high-quality professional engineering services that provide exceptional value to the City of Edinburg—from project inception through final construction.

Commitment

SAMES is pleased to have the opportunity to serve the City of Edinburg by providing responsive, high-quality Professional Engineering Services tailored to the City's infrastructure needs. As a locally owned and operated firm, we understand the unique challenges facing our communities and are committed to delivering practical, cost-effective solutions that create lasting value. Guided by experienced leadership and strong ethical principles, our team approaches every project with a collaborative mindset, technical excellence, accountability, and responsive client service. We are dedicated to meeting our contractual commitments, delivering quality engineering solutions, protecting the public's interest, and helping the City achieve its long-term infrastructure goals.

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

SAMES professionals embrace a collaborative, team-oriented philosophy embodied by our guiding principle, **"Excellence Through Teamwork."** The City of Edinburg will be supported by a multidisciplinary team of experienced professionals with the technical expertise required to successfully deliver civil engineering projects of varying size and complexity. By combining our engineering, surveying, land development, and construction support capabilities, SAMES provides integrated solutions tailored to the unique needs and conditions of each project. Having successfully collaborated on numerous infrastructure projects, our team has established proven working relationships that promote efficient coordination, seamless project execution, and consistent delivery of high-quality results.

SAMES intends to self-perform most of the services required under this contract, providing the City with a single source of accountability and enhanced project coordination. When specialized expertise is required beyond our in-house capabilities, we maintain established relationships with highly qualified

subconsultants who complement our team and share our commitment to quality and responsive client service.

SAMES is led by Firm Principals Samuel (Sam) D. Maldonado, PE, RPLS, and Saul D. Maldonado, PE. Sam brings more than 28 years of civil engineering and construction management experience, along with over 18 years of professional land surveying experience. Saul has more than 22 years of experience managing the design and construction of multidisciplinary infrastructure projects, with extensive expertise in project management and capital improvement programs. Together, they provide more than 50 years of combined professional engineering and project management experience and will lead the team serving the City of Edinburg.

The proposed project team is presented in the following table, followed by key personnel resumes highlighting relevant qualifications and project experience.

Table of Roles and Responsibilities

Name	Role	Responsibilities
Samuel D. Maldonado, PE, RPLS	Primary Point of Contact & Senior Project Manager	• Principal in Charge • Quality Assurance / Quality Control
Saul D. Maldonado, PE	Secondary Point of Contact & Project Manager	• Scope and Schedule Management • Quality Assurance / Quality Control
Jessica M. Maldonado, PE, PMP, CFM, SIT	Project Manager & Contract Administrator	• Contract Management and Compliance • Budge Management and Invoicing • Contract Reporting • Quality Assurance / Quality Control
Luis Mendez	Project Manager	• Scope and Schedule Management • Budge Management and Invoicing • Contract Reporting • Quality Assurance / Quality Control
Daniela Ortiz	Project Engineer	• Design • Permit Processing • Coordination and Field Operations

Resumes

SAMUEL D. MALDONADO, PE, RPLS

Role: Senior Project Manager

Education:

- M.B.A., University of Texas – Rio Grande Valley (2017)
- B.S., Civil Engineering, Texas A&M University - Kingsville (1997)

Registrations/Certifications:

- Professional Engineer, Texas: No. 91889
- Professional Engineer, Arizona: No. 71257
- Professional Engineer, New Mexico: No. 30412
- Registered Professional Land Surveyor, Texas: No. 6027

SAMUEL D. MALDONADO, PE, RPLS is a Licensed Professional Engineer and Registered Professional Land Surveyor with over 28 years of experience in civil engineering, project management, design, construction management, and over 18 years of professional land surveying experience. His career began in heavy civil construction, bulk materials logistics, and conveyor engineering at the Corpus Christi Ship Channel before transitioning to the planning, design, surveying, and management of municipal infrastructure and capital improvement projects.

Mr. Maldonado has led multidisciplinary teams in the planning, surveying, design, and construction of sanitary sewer collection systems, water distribution systems, roadway improvements, drainage systems, and other public infrastructure projects. His experience includes providing surveying services for federal facilities, state and local parks, subdivisions, commercial and institutional developments, roadway improvements, drainage systems, and other infrastructure projects. He has successfully managed projects for private clients as well as local, state, and federal agencies, providing leadership to professional and technical staff while overseeing all phases of project delivery.

As a Principal of SAMES, Mr. Maldonado serves as Project Surveyor for state- and federally funded projects and is pre-certified with the Texas Department of Transportation (TxDOT). His extensive experience in civil engineering, surveying, and capital improvement program management enables him to provide integrated technical leadership that supports successful project planning, design, construction, and regulatory compliance.

Project Experience:

2018 Bond Project Schunior Regional Detention Pond – Edinburg, Texas

- Provided design oversight and project management services for the design of a new lateral detention system (appx. 900 acres).
- Oversaw the preparation of a detailed study and utilized hydrologic and hydraulic calculations to finalize the engineering design of the new storm drain system, including modeling of system utilities which included conveyance design of 10 and 25-year options while detention volumes included 25 and 50-year options.

Hidalgo County Shary Road Expansion (2 Miles North of SH107) Phase I – Mission, Texas

- Oversaw Phase I project delivery for the expansion of Shary Road from a two-lane to a five-lane urban arterial, ensuring compliance with TxDOT, FHWA, and Hidalgo County standards.
- Managed schematic design development, environmental clearance, ROW acquisition, and funding coordination across multiple agencies.
- Led topographic surveying, ROW parcel plat preparation, and traffic control assessments, including line-of-sight analysis for off-system intersections.
- Coordinated public involvement, stakeholder meetings, and development of the Advance Funding Agreement (AFA) to support project funding.
- Ensured all submittals met federal and state requirements, enabling progression to PS&E development and construction readiness.

Ware Road Utility Relocation Project, TxDOT CSJ: 2094-01-038 Roadway Expansion – McAllen, Texas

- Provided engineering design of proposed 6”-16” waterline relocation, abandonment of existing waterlines, sanitary sewer line and manhole adjustments for the expansion of 2 miles of roadway.
- Provided topographical surveying, aerial surveying, and right-of-way mapping services.
- Established project controls based on TxDOT project benchmarks and surveyed all-natural ground, existing utilities, existing infrastructure, manholes, roadway, curbs, storm sewer system, property corners/boundaries, monuments and benchmarks.

Sam Houston Boulevard Widening – Pharr, Texas

- Provided subsurface utility exploration and surveying services of all existing utilities including waterlines, sanitary sewer lines, storm drains, electrical underground cable, pressure gas pipelines, and telecommunications cables.
- Prepared Right-of-Way Maps as required by TxDOT for the acquisition of 25 parcels.
- Prepared easement parcel plats by conducting a thorough investigation of the properties and obtaining title reports of all property owners fronting the roadway.
- Utilized SUE and survey maps for the realignment design of existing utilities that needed to be moved due to the widening of the road.

Escobares TxGLO Flood and Drainage Improvements – Roma, Texas

- Provided project management, topographical surveying, grant application assistance, hydrology analysis & hydraulic engineering design services for the design and installation of a new storm drain system funded by the Texas General Land Office's Disaster Recovery Program.
- Obtained all required permits and provided contract administration including all required progress and funding reports.
- Served as the primary point of contact and coordinated all parties involved including the City, County, existing utility providers and construction contractors.

Starr County BCAP Rnd III, Street and Drainage Improvements - Athens Road – Roma, Texas

- Provided surveying, grant application assistance, hydraulic & hydrologic calculations to ensure storm drain design, and project management services for the design of a new two-lane roadway including curb and gutter, new storm drain system and utility relocation design for several utilities that required adjustment.
- Followed AASHTO guidelines for vertical curves due to the steep terrain in this area of Starr County.
- Primary point of contact and coordinated with all parties involved including existing utility providers, the City of Roma, and the Starr County grant coordinator.

Final Design for Marathon WWCS Rehabilitation Project – Marathon, Texas

- Performed field surveying for over 12,000 LF of proposed sanitary sewer alignment, collecting detailed site condition data.
- Established horizontal control using Texas State Plane coordinates and generated 0.5-foot contour coverage.
- Identified property corners, limits of the right-of-way, easements, tract corners and section corners and set project benchmarks.
- Prepared and delivered a digital (CAD) and hard copy of the parcel plats with metes and bounds and plan view sheets of the collected date to the extents of the project limits.

Crestmont Utility Public Improvements – Corpus Christi, Texas

- Design and installation of public utility improvements for a new commercial plaza, including water and sanitary sewer lines, boring and excavation, trench and shoring protection, and traffic control.
- Coordinated in-house labor crew as well as subcontractors to ensure project was delivered in accordance with design and approved plans.

Pharr Port of Entry Refrigerated Cold Storage Facility – Pharr, Texas

- Provided surveying, design and construction management for the design and construction of a 3,000 SF facility building at the Pharr Port of Entry.
- Oversaw government reporting requirements and ensured regulatory compliance.
- Coordinated with multiple agencies and served as the primary point of contact for the General Services Administration.

SAUL D. MALDONADO, PE

Role: Project Manager

Education:

- B.S., Civil Engineering, Texas A&M University – Kingsville (2003)

Registrations/Certifications:

- Professional Engineer, Texas No. 100320

SAUL D. MALDONADO, PE is a Licensed Professional Engineer with more than 23 years of experience in civil engineering, project management, design, and construction administration for public infrastructure projects. His expertise includes the planning, design, and delivery of sanitary sewer collection systems, water distribution systems, roadway improvements, subdivision developments, and stormwater infrastructure for municipal clients.

Mr. Maldonado brings extensive municipal leadership experience, having served as City Engineer for the City of Palmview, District Engineer for Agua Special Utility District, and Capital Improvements Project Engineer and Subdivision Coordinator for the City of McAllen. In these roles, he directed capital improvement programs, coordinated subdivision development, and managed the planning, design, bidding, and construction of water, wastewater, drainage, and transportation infrastructure projects.

As Project Manager, Mr. Maldonado oversees project budgeting, cost estimating, procurement, design coordination, and construction administration while working closely with public officials, developers, consultants, utility providers, and regulatory agencies to ensure projects are delivered on schedule, within budget, and in compliance with applicable standards. His portfolio includes successful projects for federal, state, county, municipal, and school district clients.

Mr. Maldonado is well versed in permitting requirements, regulatory compliance, and interagency coordination with organizations including the Texas Department of Transportation (TxDOT), the Texas Commission on Environmental Quality (TCEQ), the Texas Department of Licensing and Regulation (TDLR), and the U.S. Army Corps of Engineers. His combination of municipal leadership, technical expertise, and collaborative project management provides clients with practical, efficient solutions throughout every phase of project development.

Project Experience:

La Homa Road Realignment and Bridge Project, Palmview, Texas

- Provided project management and engineering design for the construction of a new bridge spanning an irrigation canal, including roadway realignment to the existing Business Highway 83 intersection.
- Directed the roadway, structural, and storm drainage design, including hydraulic analyses and the design of a storm sewer system incorporating both gravity and pump station components to convey runoff over the irrigation canal to the ultimate outfall at Business Highway 83. Coordinated with the Texas Department of Transportation (TxDOT), utility providers, and Hidalgo County Irrigation District No. 1 to resolve utility conflicts and obtain all required approvals and permits.
- Administered construction through periodic site visits, progress reporting, utility coordination, review of material submittals, requests for information (RFIs), contractor pay applications, and project closeout.

TxGLO-DR Hutto Road Drainage Improvements – Donna, Texas

- Provided project management for the design and construction of a new storm drain facility required to intercept runoff from approximately 52 acres of residential and farming property.
- Performed a feasibility study prior to design conception and oversaw the hydrology analysis and hydraulics design for the new storm drain facility.

- Obtained all required permits from TxDOT, provided all monthly progress reports and coordinated with the funding agency, Texas General Land Office, before and during construction to ensure compliance with all program objectives.

Duval County Transportation Infrastructure Fund Grant (TIF) - Duval County, Texas

- Provided design and project management for the reconstruction and overlay of several County Roads within Duval County including the protection and improvement of existing storm water drainage systems along creek crossings, roadway and driveway culverts and roadside ditch systems.
- Performed the required Environmental Assessment for the proposed roadway expansion.
- Performed oversight and administrative design and review of the proposed SW3P and verified compliance with TCEQ requirements for Best Management Practices (BMPs).
- Performed initial review and completion / management of the EPIC sheets.

Agua SUD – DWSRF Waterline Project – Hidalgo County, Texas

- Provided project management for the design and construction of approximately 7 miles of 12", 16", and 20" PVC water distribution mains.
- Coordinated with various Irrigation Districts, Drainage District #1, and TxDOT for aerial canal crossings, sub-surface canal crossings, and bore permits for the completion of the project.

Agua SUD – DWSRF La Homa Road Waterline Adjustment – Palmview, Texas

- Provided project management for the adjustment of 14,000 LF 8" – 12" PVC waterline from Veteran's Boulevard to Graham Avenue during TxDOT's La Homa Expansion Project.
- Coordinated with TxDOT to avoid any design conflicts.
- Served as the Prime Engineer who assisted with financial applications through TWDB's Clean Water and Drinking Water State Revolving Fund (SRF) and with DBE form submittals.

Agua SUD - U.S. Highway 83 Relief Route Waterline Adjustment – Hidalgo County, Texas

- Provided design management for the adjustment of 11,000 LF 8" – 16" PVC waterline.
- Coordinated with multiple entities, including TxDOT, Hidalgo County Drainage District #1, and private firms to ensure design accuracy and minimize conflicts.

Las Americas Roma Industrial and Logistics Park – Roma, Texas

- Managed the commercial development of a 337.20-acre tract subdivided into three phases, including Phase I (+124 acres) designated for industrial and commercial development.
- Directed all aspects of project development, including coordination with utility providers, the City of Roma, Starr County, and the Texas Department of Transportation (TxDOT); participation in pre-development, public involvement, and City meetings; and preparation of required documentation, including the petition for voluntary annexation, drainage reports, preliminary utility and drainage plats, and all plat applications and submittals.
- Managed the design and construction of Phase I public improvements through 30%, 60%, and 90% design submittals and provided construction administration services, including review of material submittals, contractor pay applications, requests for information (RFIs), utility coordination, final inspections, and project closeout.

Limex Distribution Center and Cold Storage Facility, McAllen, Texas

- Oversaw the development, design and construction of a 100,000 square foot building consisting of office and storage partitions, including the preparation of a Phase I Environmental Site Assessment, architectural building design and design of civil, structural, mechanical, electrical and plumbing components.
- Obtained all required permits and coordinated with existing utility providers during design to avoid possible conflicts during construction and ensured compliance with all local and state construction requirements.

JESSICA M. MALDONADO, PE, PMP, CFM, SIT

Role: Project Manager & Contract Administrator

Education:

- M.B.A., University of Texas at Rio Grande Valley (2018)
- B.S., Civil Engineering, Texas A&M University – College Station (2005)

Registrations/Certifications:

- Professional Engineer, Texas No. 111579
- Project Management Professional, Texas No. 2077158
- Certified Floodplain Manager, Texas No. 3995-21N
- Surveyor-in-Training, Texas No. 110912

JESSICA M. MALDONADO, PE, PMP, CFM, SIT has 21 years of experience in municipal civil engineering, project management, contract administration, and construction management for publicly funded infrastructure projects. Her expertise includes civil engineering design, site surveying, land development, and the design and coordination of water, wastewater, storm drainage, utility, and roadway improvement projects. She has extensive experience integrating utility design with roadway and site development projects while ensuring constructability, regulatory compliance, and minimal service disruption.

As a Project Manager, Jessica oversees multidisciplinary engineering and surveying projects from planning through construction, with a strong emphasis on schedule management, contract administration, and funding compliance. She has successfully managed numerous federally and state-funded projects, including more than 16 Texas General Land Office (GLO)-funded drainage and roadway improvement projects. Her responsibilities include coordinating project reporting, preparing and submitting required documentation, progress reports, reimbursement packages, and other program deliverables while ensuring compliance with agency standards and funding requirements.

Jessica's experience also includes coordinating with the Texas General Land Office (GLO), the Federal Emergency Management Agency (FEMA), the Federal Highway Administration (FHWA) on TxDOT and local government projects, and the U.S. Environmental Protection Agency (EPA) on infrastructure improvements funded through economic development grants. Her comprehensive understanding of federal and state funding requirements, combined with her technical and project management expertise, enables her to successfully deliver complex infrastructure projects from design through construction.

Project Experience:

2018 Bond Referendum Project No. 12 - FM 493 & Country Road – Donna, Texas

- Provided project management services for the preparation of a detailed study to design a new storm drain system to alleviate flooding in the colonias between South River Road and the surrounding Chapparal Drain in Donna, Texas.
- Oversaw the planning, development, geotechnical services, hydraulics and hydrology design, and the preparation of plans and cost estimates required for construction.
- Coordinated with the local drainage district, the County, the City and local utility providers.

Veterans Road (SH 495) Utility Relocation Project - Palmview, Texas

- Oversaw the design and relocation of municipal water and sewer infrastructure in conflict with TxDOT's proposed four-lane roadway and storm sewer improvements, including the development of utility plans in accordance with TxDOT standards.
- Directed utility coordination among telecommunications, gas, irrigation, electric, and municipal utility providers, while supporting preparation of joint-bid packages, special specifications, and utility agreement documentation to resolve conflicts and ensure project constructability.

Sam Houston Boulevard Widening, TxDOT CSJ: 0921-02-256 – Pharr, Texas

- Provided design management for the roadway and drainage improvements, as well as the adjustment of waterline and sanitary sewer lines.
- Completed the environmental study for TxDOT funding regulations.
- Provided utility coordination and construction oversight for the relocation of existing utilities.

Hidalgo County BCAP Fresno Street Roadway & Drainage Improvements – San Juan, Texas

- Provided engineering design, contract administration and construction management for this road and drainage improvement project funded by TxDOT's Border Colonia Access Program.
- Prepared required forms and reports and ensured compliance with TxDOT program regulations.
- Oversaw the survey and CAD departments, providing direction and management when needed.

Loyola Beach Water Quality Improvements Project – Effluent Reroute – Riviera, Texas

- Managed the planning, engineering design, surveying, environmental clearance, and utility coordination for the rerouting of the Riviera Wastewater Treatment Plant effluent line to improve water quality and support coastal conservation and restoration.
- Directed the design and construction of a new 150 GPM effluent pump station and approximately 10,000 LF of force main to convey treated effluent to a new outfall location.
- Oversaw bid procurement, construction management, and project close-out, ensuring compliance with project requirements and successful project delivery.

TxGLO 2015 Floods Grant Stormwater Relief Project Ph. II – Alamo & Edinburg, Texas

- Provided project management services for the survey, design and installation of a new storm sewer system that included drainage swales, roadside ditches, inlets, and pipe networks ultimately flowing into an existing drainage ditch owned by Hidalgo County Drainage District #1.
- Prepared and submitted grant application and obtained all required permits.
- Coordinated with the GLO and County to ensure funding and schedule compliance during design and construction.

Ware Road Utility Relocation Project, TxDOT CSJ: 2094-01-038 Roadway Expansion – McAllen, Texas

- Oversaw the design and provided project management of the PS&E utility relocation package which included the waterline and sanitary sewer line improvements.
- Assisted McAllen Public Utility (MPU) with compensable utility support documentation required for the Advance Funding Agreement and Standard Utility Agreement.
- Provided project estimates and review submittals for TxDOT and MPU to review and approve.
- Oversaw the preparation of construction approved plans and specifications in accordance with TxDOT standards and MPU requirements and provided final as-builts at end of construction.
- Performed TxDOT utility coordination to avoid conflicts during construction and provided responses to all contractor requests for information.

TxDOT CapEx AWU Standalone (I-35 & Dean Keeton St.) – Austin District, TX

- Provided utility engineering services QLA for the collection and analysis of subsurface utility data using non-destructive vacuum excavation.
- Coordinated with utility owners to verify utility locations.
- Supported coordination with involved entities to ensure all work was properly permitted.
- Ensured traffic control measures complied with applicable state and federal requirements.

Kleberg County CDBG Water and Sewer Improvements – Kleberg County, Texas

- Provided project management for the survey, design and construction of 9,400 LF of waterline, water services, fire hydrants and 3,200 LF of gravity sewer line including service connections, manholes and septic tank mitigation.
- Coordinated with TxCDBG and TxDOT to ensure compliance w/ funding & permitting regulations.
- Prepared a financial/budget analysis of the project for Kleberg County authorities.

LUIS MENDEZ

Role: Project Manager

Education:

- B.S., Civil Engineering, The University of Texas – Rio Grande Valley (2023)
- A.A.S., Engineering and Technology - South Texas College (2018)
- Certificate of Applied Science, Architectural and Civil Engineering Technology - South Texas College (2017)

LUIS A. MENDEZ is a Project Manager with more than eight years of experience in civil engineering, project management, computer-aided design (CADD), and subdivision development. Throughout his career with SAMES, he has progressively advanced through the roles of CADD Technician, Project Controls Engineer, Project Engineer, and Project Manager, providing him with a comprehensive understanding of the technical, administrative, and operational requirements necessary to successfully deliver infrastructure projects.

Mr. Mendez specializes in the planning, design, and delivery of public infrastructure improvements, including water distribution systems, sanitary sewer collection systems, storm drainage systems, roadway improvements, and subdivision developments. His broad project experience enables him to effectively coordinate engineering design, technical production, project scheduling, quality control, and construction support while maintaining compliance with local, state, and federal requirements.

As Project Manager, Mr. Mendez oversees projects from planning through construction, coordinating with municipalities, utility providers, regulatory agencies, and project stakeholders to ensure timely delivery, cost control, and successful project execution. His diverse experience across multiple project roles provides a practical understanding of each phase of project development, allowing him to anticipate project needs, improve coordination among project teams, and deliver efficient, high-quality engineering solutions for clients

Project Experience:

HCDD No. 1 Mission McAllen Drain Phase III – Mission/McAllen, Texas

- Provided design management for the expansion of an existing ditch located north of the McAllen and Mission areas.
- Provided design for the ditch expansion, drainage catch basin, and drainage trunklines.
- Coordinated the process of construction plan development and ensured the design complied with the latest design standards and met all applicable rules and regulations.
- Assisted with planning and management of the procurement process and all construction related activities.

U.S. Customs and Border Protection Second Inspection Station – Roma, Texas

- Provided design and project management for the site civil design for drainage and grading improvements, public utilities, roadway and parking area improvements for a Second Inspection Station belonging to the U.S. Customs and Border Protection agency.
- Coordinated the process of construction plan development, ensuring the design complied with the latest design standards and met all applicable rules and regulations.
- Prepared “approved for construction” plans and assisted with planning and management of the procurement process.

F.M. 493 R.O.W. Acquisition – Donna, Texas

- Oversaw the performance of all required field and office work for the preparation of parcel plats with metes and bounds descriptions for 125 properties.

Water Tank Rehabilitation Public Improvements – La Villa, Texas

- Managed civil, structural, and construction engineering for rehabilitation of an elevated water storage tower for the City of La Villa, increasing peak water storage capacity.
- Conducted site visits, coordinated with utility providers, and prepared preliminary and detailed civil construction plans and specifications.
- Oversaw structural assessment coordination with subconsultants and prepared construction estimates.
- Designed two 4" valves to isolate water services into quadrants, minimizing service disruptions during construction.
- Assisted the City with advertising, bid procurement, tabulation, and award recommendation.
- Coordinated pre-construction activities, conducted periodic site inspections, reviewed material submittals and pay applications, managed contractor requests for information, and reviewed construction material testing reports to ensure compliance with contract documents.

Las Americas Roma Logistics and Industrial Park Phase I – Roma, Texas

- Provided design of all public utilities (water & sewer), storm sewer improvements, and roadway improvements for a new industrial park located on a 297-acre tract development.
- Coordinated the process of construction plan development, ensuring the design complied with the latest design standards and met all applicable rules and regulations.
- Prepared "approved for construction" plans and assisted the Project Manager with planning and management of the procurement process.

SpaceX SH4 Chamber Adjustment Design – Brownsville, Texas

- Provided redesign for the adjustment of a roadway with superelevation curves including redesign of the entire subgrade base and pavement thickness to withhold heavy traffic flow.

Beckham Square Subdivision – Harlingen, Texas

- Developed the site layout for a new subdivision which established the property boundaries and right of way. The new layout included proposed utilities, drainage, road and total number of lots in new subdivision.

Northwest Blueline Hibiscus Drainage Improvements (Drainage Utility Project) – McAllen, Texas

- Coordinated necessary surveys of existing right-of-ways, topography, utilities, and other field data required for design.
- Provided Design Plans, Specifications and Estimate in accordance with City of McAllen Standards and provided As-built record drawings.

Sunset Breeze at Laguna Vista Subdivision - Laguna Vista, Texas

- Coordinated the process of the plan development for a new 56-acre tract commercial development.
- Managed the design of all utilities (water, sanitary sewer), storm sewer improvements, and roadway improvements.

Glazers Beer and Beverage Site Civil – Weslaco, Texas

- Provided drafting design and production of engineering construction plans sheet set as per the Architectural plans provided from the client for a 20-acre tract of land to be used for a new warehouse distribution area.
- Provided design and modeling of the grading plan for the parking lot to design the utilities layout plan and profiles along with the proposed surface.

Tilt Kilt ALTA Survey – McAllen, Texas

- Managed the drafting design, preparing the survey including research of all recorded property records and plotting all current utilities and existing conditions of the property.
- Work was performed in accordance with the ALTA survey standard requirements and as per the client needs.

DANIELA ORTIZ

Role: Project Engineer

Education:

- B.S., Civil Engineering, The University of Texas – Rio Grande Valley (2021)

DANIEL ORTIZ is a Project Engineer with experience in civil engineering, design, land development, and project coordination. Her background also includes hands-on surveying experience, including construction staking inspections and topographic field data collection, providing valuable insight into how field conditions influence engineering design and project delivery.

Ms. Ortiz works closely with senior engineers and project managers on project planning, engineering design, proposal development, and client coordination. Her responsibilities include the preparation and review of bid documents, storm drainage design, water and sanitary sewer system design, roadway design, drainage reports, and the development of subdivision plats, drainage layouts, and utility layouts.

Her project experience includes street and drainage improvement projects funded through the Community Development Block Grant (CDBG) Program and the Texas General Land Office (GLO), as well as the relocation of water and sanitary sewer utilities associated with Texas Department of Transportation (TxDOT) roadway expansion projects. This diverse background has provided her with a thorough understanding of engineering design standards, regulatory requirements, utility coordination, and project delivery processes for public infrastructure improvements at the municipal and county levels

Project Experience:

Texas Gas Service R.O.W. Permit for Mac Leo Subdivision – Edinburg, Texas

- Processed and analyzed topographic survey data, assisted with property research, and coordinated with survey crews through site visits to verify accurate field information for project design.
- Developed project basemaps, construction plan sheets, material quantities, and linear footage calculations for a new gas main and service line installation.
- Prepared the 100% construction plan set and developed the Traffic Control Plan for City of Edinburg review and approval.
- Coordinated design requirements with the City of Edinburg and Texas Gas Service and assisted with the review and submission of right-of-way (R.O.W.) permit documentation.

City of Palmview Ramirez Ditch Widening Drainage Improvements – Palmview, Texas

- Processed and analyzed topographic survey data, supported property research, and coordinated with survey crews through site visits to verify accurate and complete field information.
- Assisted with the design of approximately 200 linear feet of ditch widening (30 feet wide), including preparation of ditch cross-sections, cut and fill volume calculations, and profiles.
- Prepared construction plan sets for public improvements through 30%, 60%, and 100% design submittals and coordinated ditch widening design requirements with the Cities of Mission and Palmview.

Veterans Blvd. Utility Relocation Project – Palmview, Texas

- Processed and analyzed topographic survey data, assisted with property research, and coordinated with survey crews through site visits to verify accurate and complete field information.
- Assisted with the design and relocation of approximately 12,200 linear feet of existing sanitary sewer system and the design of approximately 16,000 linear feet of new water line infrastructure.
- Prepared construction plan sets for public improvements through 30%, 60%, and 100% design submittals and assisted with project cost analysis.

2024 Agua Special Utility District (District Engineer Services) – Palmview, Texas

- Prepared and managed Preliminary Evaluation Assessment (PEA) and Service Investigation Report (SIR) documentation for proposed and existing developments, including water demand calculations, Living Unit Equivalent (LUE) calculations, and distribution analysis.
- Developed layouts and exhibits supporting SIR reports and coordinated with Agua Special Utility District (SUD) to obtain project information and address technical requirements.
- Participated in bi-weekly project coordination meetings to provide updates, discuss project status, and support timely project progression.

La Villa 2023 CDBG Flood and Drainage Improvements – La Villa, Texas

- Processed and analyzed topographic survey data, developed the project surface model, assisted with property research, and coordinated with survey personnel to support design development.
- Assisted with roadway and drainage design for approximately 2,000 linear feet of street reconstruction, including asphalt mill and overlay, base repairs, valley gutter, back of curb, storm drainage lines, and grate inlets.
- Prepared bidding and contract documents for contractor procurement and developed construction plan sets for public improvements through 30% and 60% design submittals.

San Juan 2023 CDBG Street Improvements – San Juan, Texas

- Processed and analyzed topographic survey data, developed the project surface model, assisted with property research and basemap preparation, and coordinated with survey personnel through site visits to verify accurate field information.
- Assisted with roadway design for three streets totaling approximately 1,700 linear feet of reconstruction, including asphalt mill and overlay, base repairs, level-ups, and concrete aprons.
- Managed the preparation of bidding and contract documents, supported public bidding activities including pre-bid meetings and bid openings, and developed construction plan sets for public improvements through 30%, 60%, and 100% design submittals.

Los Rios Subdivision– Alton, Texas

- Processed and analyzed topographic survey data, assisted with property research, and coordinated with survey personnel to support subdivision design and development.
- Assisted with subdivision platting, drainage and utility layouts, storm drainage analysis using SSA modeling, and the design of water and sanitary sewer systems. Prepared drainage reports, construction plan sets, and cost analyses for public improvements through 30%, 60%, and 100% design submittals.
- Supported project permitting and review processes by addressing comments from the City and regulatory agencies, performing monthly construction site visits, and preparing progress reports throughout construction.

Sullivan City 2022 CDBG Street Improvements – Sullivan City, Texas

- Processed and analyzed topographic survey data, developed the project surface model, assisted with property research and basemap preparation, and coordinated with survey personnel through site visits to verify accurate field information.
- Managed roadway design and project delivery for approximately 1,800 linear feet of street reconstruction, including asphalt mill and overlay, base repairs, level-ups, and concrete aprons.
- Prepared construction plan sets for public improvements through 30%, 60%, and 100% design submittals.

Representative Engineering Projects

SAMES will provide the City of Edinburg access to experienced professionals, technical resources, and local expertise necessary to successfully deliver a wide range of civil engineering assignments. The following representative projects demonstrate SAMES' experience and proven ability to successfully manage and deliver projects involving: (1) roadway, utility, drainage, and civil engineering design; (2) general design and construction management services; and (3) federally, state, and locally funded infrastructure improvements.

2018 BOND PROJECT - SCHUNIOR REGIONAL DETENTION POND - EDINBURG, TX

Project type: Stormwater Improvements

Client: City of Edinburg
415 W. University Drive, Edinburg, Texas 78540
Mardoqueo Hinojosa, PE, CFM, CPM, City Engineer
(956) 388-8204
mhinojosa@cityofedinburg.com

Contract: $2,386,195

Timeline: 02/26/19 – 11/08/23 (A/E contract date thru final completion)

This project included planning, surveying, hydrologic and hydraulic (H&H) analysis and design, preparation of plans, specifications, and cost estimates, bidding and award services, and construction administration.

During the preliminary phase, SAMES prepared a drainage study for approximately 900 acres to evaluate a lateral detention system and upgrades to existing drainage infrastructure. Services included topographic surveying and preliminary H&H analyses of proposed detention alternatives. Final H&H design incorporated utility modeling using USACE HEC-RAS Version 4.0 to evaluate conveyance capacity for 10- and 25-year storm events and detention volumes for 25- and 50-year storm events. During design, the scope was expanded to include additional field surveying and preparation of property title reports and seven (7) parcel plats with metes and bounds descriptions for Phase I properties south of SH 107 to accommodate increased detention capacity. Project limits were further extended to include analysis of a City drainage ditch from south of Sprague Road to the Hidalgo County Drainage District No. 1 outfall east of McColl Road. SAMES also evaluated an alternative conveyance route south of Sprague Road through additional topographic surveying and iterative HEC-RAS modeling, refined based on land acquisition constraints. Construction phase services included preparation of bid documents, bid administration, permit coordination, pre-bid and pre-construction meetings, bid tabulation, and award recommendation. During construction, SAMES performed periodic site visits, responded to RFIs and submittals, processed change orders, and reviewed pay applications for quantity verification. Post-construction services included final walkthrough, punch list preparation, and project closeout coordination.

2019 DRAINAGE UTILITY FEE PROJECT: MCALLEN FOREIGN TRADE ZONE PUMP STATION UPGRADES - MCALLEN, TX

Project type: Stormwater Improvements

Client: City of McAllen
1300 Houston Avenue, McAllen, TX 78501
Jorge Gutierrez (956) 681-1151

Contract: $20,535 (A/E)

Timeline: 04/26/22 – 10/31/23

McAllen's Foreign Trade Zone (FTZ) currently has a large detention area on the south side of the property that is drained using a manually operated pump to discharge to a control structure located across the levy just south of the subject property. SAMES Inc. was contracted to assess the existing conditions of the inlet control structure, pumps, and electronic controls currently in place. The intent being to provide similar pumping capacity while providing the ability for the pumps to operate automatically with the capability to upgrade to remote monitoring and operation (SCADA). Using historical data, the drawdown time for the detention pond was used to calculate the flow rate of the existing pump. Through coordination with an accepted pump vendor, an axial flow pump was selected to replace the existing pump. The requested control features also required coordination with an MEP engineering firm (DBR) as well as AEP to determine if any upgrades to the power distribution system were required. The existing electrical infrastructure was suited to the proposed upgrades and pump motor requirements. The existing inlet control structure was assessed for structural integrity and safety. While structurally sound, it was observed through topographic data and site visits that the earthen side slope of the detention area near the inlet control structure exceeded the maximum allowable slope of 2H:1V. City of McAllen did not wish to perform any improvements to the detention pond therefore it was proposed to extend the concrete rip rap at either side to a point where the required slope was achieved, providing additional bank stability in this area of the pond. Using as-built drawings provided by McAllen the proposed duty point of the pump was established since there were to be no upgrades to the existing discharge forcemain. Final deliverables included construction plans, technical specifications, and cost estimate to support McAllen's bidding processes.

2021 ARPA DRAINAGE IMPROVEMENTS FOR STORM SEWER SYSTEMS 204 AND 252 - HARLINGEN, TX

Project type: Stormwater Improvements

Client: City of Harlingen
24200 FM 509, Harlingen, Texas 78550
Roberto Hernandez, PE, CFM, MS, City Engineer
(956) 216-5280
rhernandez@harlingentx.gov

Contract: $674,073.70

Timeline: 12/01/22 – 08/31/25 (A/E start date thru final construction completion)

This project updated two storm sewer systems for the City of Harlingen to meet current standards as part of a citywide drainage improvement initiative funded through the American Rescue Plan Act of 2021. The project included analysis and design improvements for storm drainage systems serving the Lazy Palms subdivision in northern Harlingen and the Sun County Estates subdivision near Vela Middle School, totaling approximately 2,664 linear feet of storm drain with 22 inlet and outlet structures.

During design, SAMES addressed conflicts with existing water and wastewater infrastructure by coordinating with the City and Harlingen Waterworks System to pothole and verify the depth and location of an existing 20-inch water transmission line, ensuring compatibility with proposed outfall improvements. Additional challenges included limited drainage capacity due to relatively flat street grades. These constraints were mitigated through the implementation of concrete arch pipe systems and

retrofit improvements to existing curb inlets to increase hydraulic efficiency. Project services included topographic and boundary surveying, preparation of sealed drainage and utility surveys, verification of waterline depths through potholing, and complete design of stormwater system upgrades, including pipeline improvements, inlet modifications, and outfall structures. SAMES also prepared approved-for-construction plans, technical specifications, and engineer's cost estimates. Procurement and bidding support services included preparation of bid documents, participation in pre-bid meetings, and recommendation for contract award. During construction, SAMES provided construction administration services, including pre-construction coordination, RFI and submittal review, final walkthrough participation, closeout document review, and verification of record as-built plans for the City.

WARE ROAD (FM 2220) UTILITY RELOCATION PROJECT – MCALLEN, TX

Project type: Utility Relocation Design

Client: McAllen Public Utility
1300 Houston Avenue, McAllen, TX 78501
Carlos Gonzelez, PE, Utility Engineer
(956) 681-1630
cagonzalez@mcallen.net

Contract: $1,732,846

Timeline: 12/2018 – 10/29/2019

The Ware Road Utility Relocation Project was initiated in response to the Texas Department of Transportation (TxDOT) widening of Ware Road from Mile 3 to Mile 5. The project required relocation and adjustment of existing water and sewer infrastructure that conflicted with TxDOT's proposed right-of-way (ROW), roadway improvements, and drainage enhancements. Utility facilities were reconfigured to accommodate the proposed roadway cross-section, horizontal and vertical alignments, and applicable design standards.

SAMES provided McAllen Public Utility (MPU) with comprehensive utility relocation services, including utility relocation design, topographic surveying, right-of-way mapping, and subsurface utility engineering (SUE). These efforts supported the identification, verification, and documentation of existing utilities within the project corridor, reducing potential conflicts and improving coordination throughout design and construction. SAMES also performed compensable utility research to determine eligibility for reimbursement in accordance with TxDOT guidelines. Services included support for the Advance Funding Agreement (AFA) and Standard Utility Agreement (SUA), preparation of relocation cost estimates, and coordination with project stakeholders to ensure compliance with TxDOT utility relocation procedures and reimbursement requirements.

The project included widening the existing four-lane roadway and adding continuous center turn lanes, requiring detailed evaluation of existing conditions and utility constraints. Comprehensive topographic surveying supported accurate roadway and utility design, while ROW research and mapping established utility limits and potential acquisition requirements. SUE Level A verification was performed for municipal water facilities to confirm precise utility locations and minimize construction conflicts. SAMES developed utility relocation plans in accordance with TxDOT Utility Relocation Procedures and evaluated existing facilities for compensability based on installation permits, recorded easements, and applicable reimbursement policies.

VETERANS BLVD. (SH 495) UTILITY RELOCATION AND ADJUSTMENT – PALMVIEW, TX

Project type: Utility Relocation Design

Client: Agua Special Utility District
3120 N. Abram Road, Palmview, Texas 78572
Roberto Salinas, General Manager
(956) 585-2459
robertos@aguasud.com

Contract: $6M (OPCC)

Timeline: 09/19/2024 – in progress (100% design completion)

This project extended along Mile 3 Road from Mile 3 to Mile 5 and required the relocation of Agua Special Utility District's (Agua SUD) water and wastewater infrastructure due to TxDOT's proposed right-of-way expansion, four-lane roadway improvements, and storm drainage enhancements within an urban corridor. SAMES provided utility relocation design, coordination, and construction support services, including:

- **Sanitary Sewer Relocation Design** – Approximately 8,600 linear feet of 8-inch to 36-inch PVC SDR-26 gravity sewer, including 100 sanitary sewer connections and 26 manholes. Design included open trench and bore installations with sewer depths exceeding 20 feet.
- **Waterline Relocation Design** – Approximately 17,500 linear feet of 3-inch to 18-inch PVC C-900 waterline, including 33 wet connections, 49 gate valves, 4 flush valves, and 10 fire hydrant assemblies. Relocation design accounted for varying existing conditions, including facilities located within TxDOT right-of-way, recorded easements, and undocumented apparent easements.

As a joint-bid project requiring TxDOT plan approval and execution of an Advance Funding Agreement, SAMES provided utility coordination, preparation of special specifications, property documentation research, and identification of compensable utility facilities for Standard Utility Agreement (SUA) requirements. Additional services included design survey deliverables, traffic control phasing, utility conflict coordination, and construction cost estimating to support continuous traffic operations and efficient project delivery.

RGC PUBLIC UTILITIES PROJECT – WATER AND SEWER EXTENSION – RIO GRANDE CITY, TX

Project type: Utility Design

Client: City of Rio Grande City
5332 E. Hwy 83, Rio Grande City, TX 78582
Sara Hernandez, Assistant City Manager
(956) 487-0672
shernandez@cityofrgc.com

Contract: $555,796

Timeline: 02/08/2023 – 08/21/2023

SAMES was contracted to provide professional surveying, development, and civil engineering services for the Rio Grande City Public Safety Commercial Subdivision, a two-lot development. The primary objective of the project was to extend public utility infrastructure to serve construction of a new Public Safety Building on Lot 1 and a future Performing Arts Building on Lot 2.

The waterline improvements included approximately 240 linear feet of trenchless (jack-and-bore) installation of an 8-inch PVC C-900 waterline, consisting of a 16-inch steel casing crossing beneath Farm-to-Market Road (FM) 755. The new 8-inch line was connected to an existing 12-inch waterline via a 12-by-8-inch tee. An additional 687 linear feet of 12-inch PVC C-900 waterline extended the existing main to the northwest corner of Lot 1. A 12-by-8-inch tee was installed to serve 980 linear feet of 8-inch PVC C-900 waterline within an existing 20-foot utility easement spanning both lots. Fire hydrants, gate valves, and flush valves were installed to support system operation, fire protection, and maintenance access. The sewer improvements consisted of approximately 689 linear feet of 10-inch PVC SDR-26 gravity sanitary sewer extending an existing line north to the northwest corner of Lot 1. This work included installation of fiberglass sanitary sewer manholes spaced in accordance with Texas Commission on Environmental Quality (TCEQ) requirements. An additional 992 linear feet of 10-inch gravity sanitary sewer was installed from a manhole located within the 20-foot utility easement across both lots to a 10-foot utility easement at the terminus of Lot 2. A total of four fiberglass manholes were constructed along this alignment, meeting TCEQ spacing standards.

During construction, a field change directive addressed the placement of a fire hydrant within the east right-of-way of FM 755. The issue was resolved by redesigning a parking stall into a landscaped island to accommodate the hydrant location. SAMES provided design of all public improvements, bidding phase support, and construction administration services throughout the project.

SAN JUAN FIRE STATION SANITARY SEWER IMPROVEMENTS - SAN JUAN, TX

Project type: Sanitary Sewer Design

Client: City of San Juan
512 S. Nebraska Avenue, San Juan, Texas 78589
Daniel Tijerina, Planning Director
(956) 223-2220
Dtijerina@sjtx.us

Contract: $203,824

Timeline: 06/03/22 – 08/30/23

SAMES was contracted by the City of San Juan to provide supplemental surveying, civil engineering, and construction administration services for the replacement of an existing sanitary sewer line serving the current City Hall and future proposed Fire Station.

The project scope included topographic surveying of the project area, including existing sanitary sewer infrastructure, design of an upgraded sewer system, and construction administration for an 820-foot segment of sanitary sewer mains. This effort arose during the design and platting phase of the proposed Fire Station, as the existing sewer network was determined to have insufficient capacity to accommodate both existing and projected flows. During topographic surveying, it was identified that several residential lots were connected to the existing sewer main. The design carefully incorporated reconnection of these services with minimal disruption to property owners. Existing brick manholes were removed and replaced with fiberglass manholes to prevent leakage, and a new 8-inch sewer main was installed to provide increased capacity for the Fire Station.

Following completion of the design phase, SAMES prepared construction and bidding documents. Bids were received on October 20, 2022, and SAMES provided a recommendation to the City based on bid tabulations. Construction commenced in February 2023, with SAMES providing full construction

management services, including review of submittals, pay applications, RFIs, change orders, and construction material testing (CMT) reports. The project concluded with a final walkthrough, preparation of as-built drawings, and closeout documentation in August 2023.

HIDALGO COUNTY MPO TRANSPORTATION ALTERNATIVES: DONNA SIDEWALK PROJECT - DONNA, TX

Project type: Transportation Improvements

Client: City of Donna
307 S. 12th Street, Donna, TX 78537
Ernesto Silva, City Manager
(956) 464-3314

Contract: $49,212 (A/E)

Timeline: 05/07/2019 - 08/04/2021

SAMES was contracted to provide planning, surveying, civil design, construction administration, and environmental services (including NEPA cleared Environmental Assessment) as well as all other support service required to satisfy TxDOT funding requirements and construction of the Hidalgo County Metropolitan Planning Organization Transportation Alternatives for the City of Donna Sidewalk Project. This included full Plans, Schedules, and Estimates as well as all Environmental consideration, Specifications, Bidding and Contract Documents. The Project consisted of the construction of approximately 3.56 miles of Sidewalk along various TxDOT highways in City of Donna, Texas. The 5-ft sidewalks were designed to be ADA compliant, incorporating the installation of curb ramps, signage, two railroad crossings, pavement markings, stormwater pollution prevention plan, and traffic control plan. During project progression City of Donna's original funding scope was exceeded by the incorporation of the two railroad crossings required by TxDOT. After months of coordinating between the City of Donna, TxDOT, and Rio Valley Switching Company, a compromise was met that ensured the project ultimately moved forward. This project was regulated by TxDOT and, to ensure the project was cleared by the National Environmental Policy Act (NEPA) in a timely manner, SAMES maintained an open line of communication with TxDOT's project manager. We also increased the frequency of project update meetings from bi-weekly to weekly to ensure a timely ready-to-let status. Our regulatory involvement also consisted of compliance with the environmental standards set in place by TxDOT, concerning the management of water resources and other sustainable compliance guidelines. SAMES submitted compliance forms including Water Analysis and Species analysis to TxDOT as part of the environmental assessment.

EXTENSION OF SHARY ROAD 2 MILES NORTH OF SH 107, PHASE I - MISSION, TX

Project type: Transportation Improvements

Client: Hidalgo County Precinct 3
724 Breyfogle Road, Mission, TX 78574
Jorge Arcaute, Chief of Staff
(956) 585-4509
Jorge.arcaute@co.hidalgo.tx.us

Contract: $990K (A/E)

Timeline: 08/18/2022 - 08/17/2024

This project consists of expansion of the existing two-lane Shary Rd from SH 107 to Mile 9 in McAllen, Texas. The preliminary/proposed expansion consists of a five-lane road with a 120-foot right-of-way. SAMES was contracted to provide Phase I services: planning, schematic design, right-of-way acquisition services, environmental compliance, and assistance with project funding. The work was developed in accordance with all applicable Hidalgo County, TxDOT, and Federal regulations and specified design requirements for funding applicability. SAMES performed topographic surveying, right-of-way acquisition services, parcel plats with metes and bounds, traffic control, and line of sight analysis for off-system roadways, environmental documentation and clearance through TxDOT and FHWA, schematic development and TxDOT approval, H&H report and hydrologic map, and assistance with project funding including public involvement, entity coordination and development of the Advance Funding Agreement (AFA).

CENTENNIAL DRIVE DESIGN AND CONSTRUCTION SUPPORT SERVICES - ROMA, TX

Project type: Transportation Improvements

Client: City of Roma
201 W Convent Blvd, Roma, TX 78584
Alejandro Barrera, City Manager
(956) 286-7892
abarrera@cityofroma.net

Contract: $1,104,351

Timeline: 08/16/2024 - 04/29/2025

SAMES was contracted by the City of Roma to provide surveying, civil engineering design, and construction support services for a new street. The proposed Centennial Drive (appx. 2,200 LF) was located at the northeast intersection of FM 650 and Landfill Road in Roma, TX. Surveying scope included field topography survey to establish on-site vertical and horizontal control for the design. Near construction completion surveying field work of newly installed improvements was performed to create as-builts of Centennial Drive. Civil engineering design for on-site public improvements required coordination with franchise utilities to avoid utility conflicts and submittal of 60% and 100% construction plan set for review and approval by the City. Design of on-site public improvements included mass grading, street design, traffic signal design, SW3P (soil erosion and sediment control plan), street lighting plan, signage plan and construction details. SAMES assisted in the preparation of the advertisement for bids and bid procurement documents, responded to clarification requests and issued addendums, conducted the pre-bid and bid opening meetings, prepared meeting minutes and bid tabulations, and issued recommendation for contract award and notice of award on behalf of the City of Roma.

Upon contract award SAMES assisted in construction contract documentation preparation, attended the pre-construction meeting, and prepared Notice to Proceed letter on behalf of the City. SAMES requested, reviewed and approved contractor project schedule and material submittals, responded to all requests for information, reviewed all construction material testing reports and provided comments for compliance with contract documents when needed. SAMES performed on-site visits during construction to review project progression, take pictures and document status. A site visit report including photographic documentation was prepared and submitted to the City after each visit. At substantial completion, SAMES together with the City and contractor walked the site to determine general conformance with the construction plans and documents, then generated a punch list of items needing correction prior to final approval and acceptance. At final completion SAMES reviewed all close-out

documents including the contractor final invoice and provided signed and sealed as-built drawings based on contractor mark-ups.

LAS AMERICAS ROMA LOGISTICS AND INDUSTRIAL PARK PHASE I – ROMA, TX

Project type: Subdivision Development (multiple disciplines)

Client: City of Roma
201 W Convent Blvd, Roma, TX 78584
Alejandro Barrera, City Manager
(956) 286-7892
abarrera@cityofroma.net

Contract: $9,015,337

Timeline: 06/01/2023 - 08/30/2024

SAMES was contracted to provide surveying, land development, civil engineering design, and construction engineering inspection (CEI) services for subdivision of a 337.2-acre tract at the northeast intersection of FM 650 and Landfill Road in Roma, Texas. The project was planned in three phases, with Phase I (approximately 202 acres) focused on industrial and commercial development and infrastructure planning for future Phases II and III.

Surveying services included boundary and topographic surveys, utility locates, title research and easement documentation, property monumentation, preparation of signed and sealed plats, and post-construction as-built surveys for Phase I improvements. Development services included coordination with the City of Roma and TxDOT, public involvement for rezoning, preparation and submittal of annexation and rezoning applications, preliminary and final plats, utility and drainage layouts, and preparation of a comprehensive drainage report. SAMES coordinated with utility providers, obtained required certifications, and represented the project during Planning & Zoning and City Commission approvals.

Pre-design engineering services included Phase I Environmental Site Assessment, geotechnical investigation, trip generation analysis, and preliminary hydrologic and hydraulic (H&H) studies. SAMES prepared a conceptual master plan for all phases and a detailed preliminary site plan for Phase I incorporating roadway and lot layouts, regional detention, water and sewer extensions, sidewalks, landscaping, traffic improvements, signage, and off-site roadway connections. Final design services included 30%, 60%, and 90% plan submittals and design of approximately 8,550 LF of waterline, 8,658 LF of gravity sanitary sewer, four detention ponds, three concrete roadways, and a sanitary sewer lift station serving over 330 acres of industrial and adjacent residential development. SAMES also provided bid procurement services, including preparation of bid documents, pre-bid and bid meeting facilitation, bid evaluation, and contractor recommendation. During construction, SAMES performed CEI services including site observations, submittal and RFI review, pay application review, project closeout coordination, preparation of signed and sealed record drawings, and support of final inspections and acceptance.

Experience with the City of Edinburg

Projects	Project Description	Project Manager	Completed	City POC

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

    Sam Engineering and Surveying

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One (YES) NO

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One (YES) NO

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

LITIGATION DISCLOSURE

SAMES, Inc. has been named in five (5) litigation matters during the past ten (10) years. Four (4) of these matters have been resolved, and one (1) remains pending.

1.County Drainage Project
The first matter involved a county drainage project in which a property owner opposed the county's stormwater drainage design adjacent to the owner's property. The case was resolved, and SAMES, Inc. was not found liable or at fault.

2. Municipal Construction Project
The second matter involved litigation filed by a city against the contractor of record for alleged construction deficiencies. SAMES, Inc. served as the engineer of record and, as is common in construction litigation, was named as a party to the lawsuit. The matter has since been resolved, and SAMES, Inc. was not found liable or at fault.

3. Hidalgo County Litigation
The third matter involved multiple parties, including the contractor of record, the project owner, and all project consultants, including SAMES, Inc. The Court granted the Motion to Dismiss on September 9, 2024, and SAMES, Inc. was dismissed from the case.

Cause No. C-4866-21-L
464th Judicial District Court, Hidalgo County, Texas

Raul A. Macias and Erika Castillo, Individually and as Surviving Parents of Armando Lee Castillo, Deceased
v.
Noelia Trevino and Gerardo Garcia, as Surviving Parents of Garett Guy Garcia (Deceased); Texas Cordia Construction, LLC; County of Hidalgo; SAMES, Inc.; L & G Engineering Laboratory, LLC; and Precision Scheduling Consultants, LLC.

4. Storm Sewer Project
The fourth matter involved a storm sewer project in which a property owner challenged the municipal and engineering design of a stormwater detention pond located behind the owner's property. The litigation has since been resolved.

Civil Action No. 7:23-cv-276
United States District Court for the Southern District of Texas

Edward Dominguez
v.
City of Edinburg; SAMES, Inc.; Castle Enterprises, LLC; and Gonzalez Enterprises, LLC.

5. Brownsville Cannery Public Market Project (Pending)
The fifth matter involves the Brownsville Cannery Public Market construction project. SAMES, Inc. is currently involved in litigation with the City of Brownsville following the City's termination of the construction contract. SAMES, Inc. disputes the allegations and is actively pursuing its contractual rights through the legal process. This matter remains pending, and no final judgment has been entered.

SAMES, Inc. has never initiated litigation or requested arbitration against a client in connection with any of its projects.

HOUSE BILL 89 VERIFICATION

I, Samuel D. Maldonado, the undersigned representative of

SAMES, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

SAMES, Inc.

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

N/A

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

REQUEST FOR QUALIFICATIONS - PROFESSIONAL ENGINEERING SERVICES

#RFQ 2026-7
CITY OF EDINBURG

July 14th, 2026
3:00 PM

July 14, 2026

City of Edinburg
Purchasing Department
415 W. University Drive
Edinburg, TX 78541

RE: REQUEST FOR QUALIFICATIONS – PROFESSIONAL ENGINEERING SERVICES

Dear Selection Committee:

Scheibe Consulting, LLC appreciates the opportunity to submit our Statement of Qualifications (SOQ) for **RFQ 2026-7 – Professional Engineering Services for City of Edinburg**. Our firm is a federally registered as a Small Business comprised of industry experts in civil engineering, H&H modeling, roadway design, utility design, construction management, land surveying, and drainage design. We are well-versed in the City's local infrastructure, having provided engineering and surveying services throughout the surrounding area for over 20 years, and our staff maintain close working relationships with local entities that allow for ease of coordination on City projects.

As a Texas-based firm with offices in Austin and Harlingen, our team has a proven track record of delivering practical, innovative solutions tailored to the unique needs of Texas communities, and we are committed to providing high-quality services that align with the City of Edinburg's goals and standards. Scheibe Consulting and all professional staff assigned to this engagement are properly licensed or registered to practice in the State of Texas and remain in good standing with the Texas Board of Professional Engineers and Land Surveyors (TBPELS).

Our enclosed SOQ is organized exactly as requested in the RFQ and includes our firm's qualifications and experience, including recent and relevant engineering services projects, key personnel resumes and an organization chart, firm capability and experience, references, and all required forms and disclosures.

Mr. Luis Vargas is an officer of the firm and is authorized to bind Scheibe Consulting, LLC to contract. All addendums issued in connection with this RFQ have been acknowledged and have been fully considered in the preparation of this submittal.

Sincerely,

Scheibe Consulting, LLC

Luis Vargas, PE, CFM

FIRM QUALIFICATIONS

SCHEIBE CONSULTING LLC

Management and Staffing – Scheibe Consulting is a full-service Civil Engineering, Water Resources, and Land Surveying firm with offices in Austin and Harlingen, TX. Should the need arise, we have a total staff of 37 professionals, allowing for additional bench depth beyond that shown in the following Organizational Chart. The following is an organizational chart illustrating our overall team structure, followed by a description of each service category.

Organizational Chart
Note: All shown are full-time employees

FIRM OFFICE LOCATIONS

1 – Scheibe Consulting, LLC (608 E. Harrison Ave, Harlingen, TX, 78550) - **Office where work will be performed**
2 – Scheibe Consulting, LLC (11612 Bee Caves Rd., Bldg. 1, Ste. 240, Austin, TX 78738)

FIRM HISTORY AND SIZE

Founded in 2011, Scheibe Consulting has built a strong reputation for successfully delivering complex public infrastructure projects. The firm has grown strategically to support client demand while preserving a collaborative, client-focused culture.

The firm currently employs approximately 37 professionals across multiple disciplines, including:

- **Professional Engineers and Engineers in Training:** 7 PEs, 10 EITs
- **Professional Land Surveyors and Surveying Chiefs/Technicians:** 2 RPLSs, 3 Crew Chiefs, 4 Surveying Techs
- **Project Managers, Staff Engineers/AutoCAD Drafters:** 2 PMs, 5 Staff Engineers/AutoCAD Drafters
- **Billing Department, Marketing and Office Administration:** 1 CFO, 1 Marketing Specialist, 2 Administrative Assistants

This staffing structure provides the depth necessary to manage concurrent projects while ensuring dedicated resources remain available for each assignment.

FIRM EXPERIENCE & HISTORY PERFORMING ENGINEERING SERVICES

From its inception, Scheibe Consulting has specialized in general civil design, floodplain management, hydrologic and hydraulic (H&H) modeling, and surveying services. Over the years, the firm has expanded its capabilities to include water/wastewater infrastructure, transportation improvements, trail system projects, permitting and grant administration. The firm has extensive experience with federally funded projects, TWDB grant applications, and grant management. Scheibe's engineers and surveyors have successfully completed numerous projects throughout the South Texas region.

Over the past two years, Scheibe Consulting has built a consistent track record of delivering engineering services on time for governmental agencies throughout the region, including municipalities such as Harlingen, Raymondville, Smiley, and Woodsboro. Across these engagements, the firm has met project deadlines while maintaining technical accuracy and regulatory compliance, demonstrating a reliable ability to manage overlapping public-sector workloads without sacrificing quality or schedule adherence. This history of responsive, on-time delivery reflects the firm's operational discipline and its understanding of the unique procedural and reporting demands that come with working alongside city and county governments.

The firm is known for its collaborative approach, technical accuracy, and proactive communication, consistently producing high-quality deliverables that withstand rigorous regulatory review. By leveraging strong relationships with local partners, subconsultants, and stakeholders, Scheibe Consulting ensures projects are delivered on time, within budget, and with lasting value to the communities we serve.

Scheibe Consulting affirms our full availability and commitment to support the City of Edinburg on all assigned projects. Our firm's principal(s) and assigned professionals will dedicate the necessary staff and resources to ensure timely and high-quality delivery of services. We have the capacity to accommodate the City's project schedule while maintaining our ongoing workload commitments. Our team is also committed to reevaluating active workload capacity as project needs are identified.

Through this commitment, Scheibe Consulting ensures that the City of Edinburg will have a responsive, accessible, and accountable partner to deliver engineering services that meet or exceed expectations.

FIRM'S UNIQUENESS TO PERFORM

Our unique qualifications include:

- **Civil and Utility Design** – Delivery of transportation, trail system, water distribution, wastewater collection, and stormwater infrastructure projects, incorporating sustainable and cost-effective design approaches. Expertise includes complex trail system design/concepts, roadway design, water and wastewater mains, lift stations, force main design, pump stations, drainage design, and dry utility relocation/conversions.
- **Flood Risk and Water Resources Expertise** – Extensive experience in hydrologic and hydraulic (H&H) modeling, detention pond design and analysis, FEMA Risk MAP/BLE studies, dam safety evaluations, FEMA CLOMR/LOMR applications, 2D H&H modeling, drainage master planning, and floodplain management solutions that enhance community resilience and protect infrastructure.
- **Surveying and Mapping Capabilities** – In-house Registered Professional Land Surveyors (RPLS) and field crews equipped with GPS, LiDAR, and drone-based technologies to support design and construction.
- **Water / Wastewater Design** – Scheibe brings extensive experience in water and wastewater design services, including water distribution, treatment, wastewater collection and treatment.
- **Stakeholder and Community Engagement** – Demonstrated ability to communicate technical concepts clearly and build consensus among stakeholders through public meetings and workshops.
- **Proven Local Knowledge** – Our team has a strong presence in South Texas and a history of successfully delivering projects for nearby municipalities, counties, drainage districts and irrigation districts, ensuring familiarity with local conditions, regulations, and community priorities.

We are fully committed to supporting the City of Edinburg under this contract and view this opportunity as a continuation of our mission: to provide **practical, high-quality engineering solutions that strengthen infrastructure and improve the quality of life of communities.**

APPROACH

Scheibe Consulting's Harlingen office will serve as the primary point of service for the City of Edinburg, given its proximity to the project area and established familiarity with regional infrastructure and permitting requirements. Our Austin office will provide additional technical support and specialized resources as needed, ensuring the City has access to the full depth of the firm's expertise regardless of assignment size.

For smaller assignments or tasks with limited or intermittent scope, Scheibe Consulting utilizes a flexible staffing approach that draws on our broader team of engineers, surveyors, and technical staff across both offices. Rather than assigning dedicated full-time personnel to every task order, our project manager evaluates each assignment's scope and timeline to determine the most efficient staffing plan, which may include part-time allocation of senior staff for technical oversight paired with junior or support staff for day-to-day execution.

This approach allows the firm to remain responsive and cost-effective on smaller projects while ensuring the City continues to receive the same level of quality control and technical accuracy applied to larger engagements.

KEY STAFF MEMBER'S EXPERIENCE

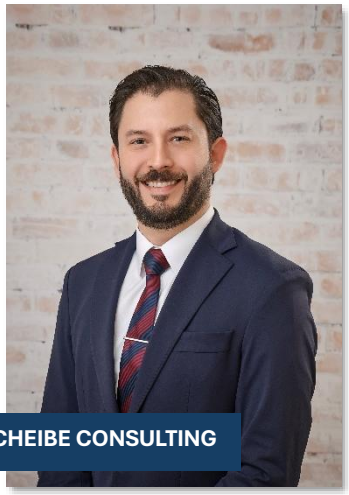
Luis Vargas, PE, CFM - Project Manager

Mr. Luis Vargas, P.E., C.F.M. (14 years of experience) will act as Project Manager (PM) and will be the primary point of contact between the City of Edinburg and the overall consultant team. Mr. Vargas will be responsible for project tracking, updates, project schedule, and all coordination. Mr. Vargas will work closely with city staff and any consultants to ensure a high-quality product and service is provided. Mr. Vargas will assist with monthly progress reports to ensure a high quality of service is being provided. Mr. Vargas has extensive experience managing large and small multi-disciplinary teams in the execution of complex projects and has an intimate knowledge of the local drainage and infrastructure issues.

QUALITY ASSURANCE / QUALITY CONTROL TEAM

The Scheibe Team is committed to a solid set of Quality Assurance (QA) and Quality Control (QC) processes. Scheibe Consulting typically develops a Quality Management Plan (QMP) at the beginning of each project, for review by the owner and/or project stakeholders. This QMP will establish dates for QA/QC reviews, document staff members responsible for these reviews, and will be aligned with the overall project schedule. In addition, all QC reviews will be conducted prior to any deliverable being submitted to the owner/stakeholder group. Daily QC checks will be made by senior staff, overseeing junior staff activities, and a 10%, 50%, and 90% QA review will be conducted by the QA/QC manager. The actual QA/QC manager will likely check from task to task, and this individual (by task) can be included in the QMP for review. Mr. Eric Scheibe, PE will be the QA/QC Lead and will ensure quality control reviews are completed prior to each key milestone. Each review will include formal review comments and responses. These formal internal reviews can be made available to the City of Edinburg upon request.

CIVIL DESIGN TEAM



The civil design efforts will be led by Mr. Jack Brown in the Harlingen office. If additional resources are needed for design, Scheibe can quickly incorporate the engineering expertise of the Bee Cave office, with Ms. Erin Cuppetilli, P.E., CFM, who has over a decade of experience in civil design in central Texas. Ms. Cuppetilli can be further supported by Ms. Marisa McKnight, PE, CFM, who also brings over a decade of civil design experience in central Texas. The focus of the Design Team of the Bee Cave office will be to provide the Harlingen office with engineering design support as needed. Ms. Cuppetilli and Ms. McKnight have extensive design and construction experience throughout Texas.

H&H TEAM

The H&H Modeling Team will be lead by Mr. Daniel Harris, PE, CFM. Mr. Harris brings over 22 years of experience with H&H modeling throughout the State of Texas. Mr. Harris has managed large-scale watershed models for the US Army Corps of Engineers, FEMA, and Texas Water Development Board. Mr. Harris will manage development of all RAS 2D, 1D, HMS, InfoWorks ICM, and XP-SWMM models for the team.

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

SCHEIBE CONSULTING LLC

LUIS VARGAS, PE, CFM

PROJECT MANAGER

Mr. Vargas is a bilingual licensed engineer with a bachelor's degree in mechanical engineering and over a decade of public sector experience managing complex infrastructure projects across South Texas. He has led multidisciplinary teams and overseen major initiatives in water, wastewater, stormwater drainage, solid waste, and public facilities. As City Engineer for Harlingen (2022–2025), he directed the Engineering Department, delivering multimillion-dollar projects funded by the American Rescue Plan Act of 2021, FEMA grant programs, and locally funded initiatives, while also serving as the City's Floodplain Administrator. Previously, he held progressively senior roles in the City of Corpus Christi, leading A/E contract negotiations, supervising water and wastewater facility operations and managing ID/IQ contracts valued at $50 million. He also served as a project manager in the Engineering Services Department, overseeing a broad portfolio of public infrastructure improvements including utilities, streets, buildings/facilities, drainage and solid waste projects. His technical and leadership credentials are supported by certifications as a Professional Engineer, Certified Floodplain Manager, Qualified Windstorm Inspector, and Certified Public Manager. As of July 2025, he is with Scheibe Consulting, LLC.

Pickens Ave. and Davis St. Stormwater System Improvements, Harlingen, TX - PM for the City of Harlingen for the design and construction phases. The project included upsizing the stormwater system of the subdivisions in Pickens Ave., Davis St., Matz Ave., McFetridge St., and N BUS 77 with new reinforced box culverts, pipes, inlets, gutters, utility adjustments, pavement and ROW restorations. Mr. Vargas also collaborated with the city's grant writer and Special Projects Dpt. staff to fund future phases for drainage improvements for this area, including a proposed 6-acre detention pond East of the mentioned streets.

Lozano Street Detention Pond, Harlingen, TX - PM for the City of Harlingen during the H&H analysis, design and construction phases. The project consisted of the construction of a 14-acre detention pond, with a pilot channel and other drainage appurtenances to mitigate flooding in the northwest area of the city. The pond was built by the city's Public Works construction crew. Mr. Vargas led the construction efforts of the pond and started the next phase of improvements, which includes a new stormwater trunkline on Wichita Avenue and more drainage improvements along Eye St. and Fairpark Blvd. This last phase is currently being designed by the city's Engineering Department.

5th St. and 7th St. Stormwater System Improvements, Harlingen, TX - PM for City of Harlingen for the H&H analysis and design phase and collaborated with the city's grant writer and Special Projects Dpt. staff to fund the construction phase with a Pre-Disaster Mitigation Grant from TDEM. Mr. Vargas also assigned a PM with the city's Engineering Department and oversaw the bid phase, construction contract execution and the coordination with TDEM prior to construction commencement. This project will improve the drainage system in 5th St. and 7th St. from Commerce St. to Polk Ave. and Van Buren Ave. Future drainage improvements are planned for this sub-watershed, with its boundaries being redefined in the city's new flood study/drainage master plan incorporating one of the city's main corridors, Commerce Street, as the main stormwater collector with a new trunkline towards the Arroyo Colorado.

Arroyo Vista Ct. and New Hampshire Ave. Stormwater System Improvements, Harlingen, TX - Engineer of record for the design and construction phases. This project addressed localized flooding at the intersection of New Hampshire Ave and Arroyo Vista Ct and was included in the city's Street Improvement Program Project of 2024. The project included new grate inlets, underground piping, new valley gutters, curb and gutter, new ADA ramps and full pavement restorations.

ERIC SCHEIBE, PE, CFM

QA/QC TEAM LEAD

Mr. Scheibe founded Scheibe Consulting, LLC in 2011. Prior to Scheibe Consulting, LLC, Mr. Scheibe work for Halff Associates, Inc. and the US Army Corps of Engineers, Galveston District. Mr. Scheibe has design experience on federal, state, county, city and private projects throughout the State of Texas and in California. His design experience includes general civil design, water resources, streambank stabilization, coastal engineering, site development, water/wastewater design, dam design, sediment analysis, environmental site assessments, and watershed modeling. Mr. Scheibe has obtained formal training in the use of HEC-HMS, HEC-RAS, HEC-RAS unsteady flow, SWAT, HEC-SSP, SMS (USACE multi-dimensional hydrodynamic modeling software), and USACE Wetland Delineation Techniques. He has hands on experience with the HEC-RAS (steady, unsteady, 2D), HEC-HMS, HEC-SSP, HEC-FDA, ArcGIS, Global Mapper, HEC-GeoHMS, HEC-GeoRAS, PC-SWMM, SMS, StormCAD, and Microstation.

SH 195 Roadway Improvement Project, Williamson County, TX – PM for the drainage design, WPAP, detention/water quality design, permitting, and construction phase services related to this roadway improvement project in Williamson County, TX.

Wilco Way Roadway Improvement Project, Williamson County, TX – PM for the drainage design, water quality design, WPAP, permitting, and surveying services for this roadway extension project for Williamson County, TX.

City of Georgetown Drainage Master Plan, Georgetown, TX (TWDB FPP) – Project Manager for TWDB Flood Protection Planning Grant funded study that includes Berry Ck., Middle Fork Ck., Pecan Branch, Mankins Branch, and Smith Branch. Services include QA/QC, H&H modeling, GIS, alternative analysis, and FEMA LOMR Submittals for all watersheds.

Valley Ditch Drainage Improvement Master Plan, Killeen, TX – PM for development of a DMP focused on the Valley Ditch watershed in downtown Killeen, TX. Project included new 1D RAS and HMS modeling of this watershed, coordination with Ft. Hood US Army Depot and City of Killeen, and identification of a comprehensive flood reduction project for this watershed.

Blanco Gardens Neighborhood Reconstruction Project, San Marcos, TX (CDBG-DR) – PM for City of San Marcos neighborhood reconstruction project. Project includes 8,200 LF stormsewer, 300 LF water main, 3,000 LF wastewater, 4,000 LF electric duct bank, full-depth roadway reconstruction, regional diversion channel, streambank stabilization, and complex environmental permitting. Project is funded by CDBG-DR funds. Services include full PS&E, construction phase services, land acquisition/easement assistance, public meetings, environmental permitting, and HUD coordination.

Gilleland Creek Risk Map and H&H Modeling/Mapping Study, Austin, TX – PM for this restudy of Gilleland Creek watershed in Austin, TX. This project includes new H&H modeling to Atlas 14, development of new FEMA floodplain maps, uploads to the MIP, and development of new Risk Map Products.

Cypress Creek Dam Master Plan, Kendall Co., TX – PM for development of a new H&H study of Cypress Creek watershed located in Kerr and Kendall Co., TX. Project resulted in the identification of 1 regional dam site to reduce flood risk to Comfort, TX.

Mr. Brown brings decades of experience throughout the State of Texas. Prior to Scheibe Consulting, LLC, Mr. Brown acted as the Cameron County Engineer and provided management of County projects, including park improvements, water, sewer, drainage facilities, as well as road, bridge construction, and maintenance. Since starting Brown Leal (and before selling to Scheibe), Mr. Brown provided engineering services for both public and private sector projects, including roadway design, detention design, drainage channel improvement design, on-call District Engineering services to CCDD5 and CCDD3, and assistance with establishing CCDD6. Mr. Brown has also managed numerous private commercial projects, residential subdivision projects, drainage projects, and road improvement projects across South Texas. Mr. Brown's reputation and experience both with the public sector and private development community make him an invaluable professional needed for quality control and overall project oversight.

Valley International Airport Drainage Master Plan, Harlingen, TX – Project Principal responsible for development of new detailed hydrology and hydraulic analysis for the existing surface and subsurface drainage of the Valley International Airport. Drainage Master Plan resulted in the identification of several drainage issues and recommended solutions.

Penn. Ave Drainage Improvement Project, San Benito, TX – Project Principal responsible for the design and construction of a diversion channel and regional detention pond located south of San Benito, TX. This project would result in flood reduction for numerous repetitive and severe repetitive loss properties. Design modeling for this project included RAS 2D.

Combes Lateral Drainage Improvement Project, Combes, TX – Project Principal responsible for the drainage master planning, drainage design, TxDOT Coordination, and Phase 1 Drainage Construction for this project. Project included development of a new InfoWorks ICM model for the entire City of Combes to identify flood reduction improvements, which included stormsewer improvements along Madeley Ave., culvert improvements under Hwy 77, 2 regional detention ponds, and an open channel diversion.

East Treasure Haven Subdivision Improvements, TX – Project Principal responsible for the overall design, permitting, and construction of the East Treasure Haven residential subdivision in Harlingen, TX. Project includes new stormsewer, wastewater improvements, water improvements, and street paving for a 50+ lot subdivision. All stormsewer design was computed using FHWA standards.

Celias Subdivision Improvements, TX – Project Principal responsible for the overall design, permitting, and construction of this residential subdivision in Harlingen, TX. Project includes new stormsewer, wastewater improvements, water improvements, and street paving for a 10+ lot subdivision. All stormsewer design was computed using FHWA standards.

Goodloe Subdivision, Llano, TX – Project Principal for this project. Project includes the design, permitting, and construction of a 30-lot residential subdivision in Llano, TX. Project permitting includes LCRA highland lakes ordinance compliance, and design to COA standards. Drainage Improvements includes diversion channel, and a bio-retention pond.

ERIN CUPPETILLI, PE, CFM

CIVIL DESIGN TEAM

Ms. Cuppetilli has been employed by Scheibe Consulting, LLC since 2014. Her design experience includes general civil design, water resources, site development, hydrology and hydraulics studies, and watershed modeling. Ms. Cuppetilli has obtained formal training in the use of HEC-RAS 2D, ArcGIS, and InfoWorks. She has experience with the HEC-RAS (steady, unsteady, 2D), HEC-HMS, ArcGIS, Global Mapper, HEC-GeoHMS, HEC-GeoRAS, PC-SWMM, InfoWorks ICM, and Microstation.

Travisso Subdivision Regional Detention / WQ Facility Design, Leander, TX – Project Engineer for construction phase services and design modifications to a regional detention and water quality facility for the 3,000 +/- acre subdivision outside Leander, TX. Project included permitting through TCEQ, LCRA, and Leander. Project included a dam rehabilitation, floodplain study, dam breach analysis, impact analysis, construction document development, and construction phase services.

Blanco Gardens Drainage Improvement Project, San Marcos, TX – Engineer for City of San Marcos drainage improvement project. Project includes coupled InfoWorks ICM 2D modelling for stormsewer, regional detention, regional water quality, roadway, and utility improvements. Provided assistance with construction documents and InfoWorks ICM 2D modeling.

MOPAC Intersections Tollway Improvements, N. of Slaughter Ln. to S. of La Crosse Ave., Austin, TX – Engineer for floodplain study of Slaughter Creek at Mopac crossing. Provided culvert crossing analysis using EPA-SWMM, HEC-RAS, and HEC-HMS. Developed stormsewer design and detention design construction documents.

Jackson County Drainage and Coastal Resiliency Master Plan, Jackson Co., TX – Project Engineer for development a dual coastal resiliency master plan and drainage master plan for Jackson County, TX. This project focuses on review of past coastal projects in the County, identification of constraints, and development of a master plan for utilization of local GOMESA funds into the future. Project includes stakeholder coordination with Jackson Co. Navigation District, Drainage District, LNRA, and other local NGOs.

Jackson County / Lavaca River FIF Study, Jackson Co., TX – Project Engineer for a TWDB study of the Lavaca River in Jackson County. Project focuses on flood risk evaluation in the inland reaches and coastal surge impacts at the outfall to the Matagorda Bay system. Project includes coastal surge analysis and flood evaluation of coastal property near the mouth of the Lavaca River.

N. Barker St Roadway and Drainage Improvements, Thrall, TX – Project Engineer for the design of drainage improvements, a new roadway crossing, and roadway improvements in Thrall for an old neighborhood with known drainage issues.

SH 195 Roadway Improvement Project, Williamson County, TX – Project Engineer for the design of roadway improvements for SH 195 in Williamson County. Project included TCEQ WPAP permitting, water quality and detention design, drainage improvement design, and H&H modeling support.

Ranchettes 2 & 3 Central Drainage Project Phase 2, Cedar Park, TX – City Project manager for design of 1,000 LF of storm sewer to connect to the first phase of the Ranchettes 2 & 3 Central Drainage Project. Project included storm system sized for future phase connections, utility adjustments, mill & overlay existing pavement, and federal funding grant management.

Brushy Creek North Fork Trail Project, Cedar Park, TX – City PM for construction of approximately 3 miles of field engineered concrete trail designed to connect existing regional trail from Brushy Creek Rd to Parmer Ln. Project included floodplain management, federal funding management, TxDOT coordination and property acquisition.

Blockhouse Creek Channelization Project, Cedar Park, TX – City PM for design of creek channelization project to reduce floodplain area and depth within established neighborhood. Project included management of alternative funding through an interlocal agreement, property acquisition, storm sewer, detention, creek channelization, utility adjustments, mill & overlay existing pavement, and improvements to existing park.

Riviera East Drainage Project, Cedar Park, TX – City PM for preliminary engineering design of storm sewer system within an established neighborhood to reduce localized flooding, increase capacity in older water system, mill & overlay existing pavement.

Krienke Ranch Rd Creek Crossing Project, Cedar Park, TX – City PM from design through construction for the removal of out of service low water crossing and replacement with bridge class culverts to pass minimum storm events. Project included floodplain analysis and management, property acquisition, coordination for funding through interlocal agreement.

807 Lone Star Dr Pond Rehabilitation Project, Cedar Park, TX – City PM from design through construction of pond renovation that increased capacity and modified outfall structure on existing pond.

E Whitestone (RM 1431) Stormwater Maintenance Project, Cedar Park, TX – City PM from design through construction of a groundwater by-pass system designed to remove constant groundwater flow from an existing water quality pond. Project included storm sewer, TxDOT and CAPMETRO coordination.

Mr. Harris joined Scheibe Consulting in January 2017. He is a civil engineer with extensive experience in water resources, H&H modeling, and drainage engineering. He has been involved in numerous hydrology and hydraulics studies throughout the state, including very large-scale 2D RAS and 2D InfoWorks ICM models. Areas of expertise include steady and unsteady hydraulic modeling, hydrologic modeling, drainage master planning, street drainage design, GIS analysis, 2D RAS analysis, InfoWorks ICM modeling, XPSWMM Modeling, StormCAD modeling, and CivilStorm modeling. Types of projects he has worked on include storm water design, water supply, dam breach analysis, FEMA CLOMR/LOMR projects, FEMA Map Modernization projects, drainage master planning, TWDB Flood Protection Planning Studies, and watershed-scale drainage floodplain mapping studies.

Tri-County Study, Wharton Co., Texas (TWDB FPP) – Project Engineer responsible for development of large scale 1D/2D HEC-RAS models of the Lower Colorado River through Colorado, Wharton, and Matagorda Counties. The study area experienced flood impacts during Harvey that exposed the need to understand the dynamics of overbank flooding to better define flood risk and develop better flood warning products to better prepare for future flood events. The 1D/2D RAS models are being developed by incorporating data from a previous LCRA study and upgrading to new LiDAR, bathymetric and survey data.

Cameron County Drainage District 5 Flood Protection Planning Project, Harlingen, TX – Lead engineer responsible for developing detailed large-scale HEC-HMS hydrologic and 1D/2D HEC-RAS hydraulic models of the CCDD5 drainage system north and west of Harlingen. LiDAR elevation datasets and dynamic modeling were used to determine base flood risk within the study area. Responsible for developing flood mitigation alternatives such as regional detention and channel improvements to reduce flood risk within the system. Models were calibrated to collected high water marks from a large rain and flooding event that occurred in June 2019. Final models replicated the flood elevations to within 0.5 feet at all locations.

Nolan Creek Flood Protection Planning Study, Bell County, TX – Lead Engineer for a watershed scale flood mitigation study of Nolan Creek and several tributaries involving detailed HEC-HMS hydrologic and 1D HEC-RAS hydraulic modeling, development of flood reduction alternatives, and coordination with multiple stakeholders including the Cities of Killeen, Harker Heights, Nolanville, and Belton. The study effort included creation of a LiDAR elevation dataset and collection of field survey data of stream crossings throughout the study area.

Blanco Gardens Stormdrain Improvements, San Marcos, TX – Project Engineering Responsible for 30% design documents and InfoWorks ICM analysis of stormdrain and additional drainage improvements including increasing storm drain capacity, regrading River Rd. to facilitate drainage, and developing a diversion ditch to reduce flooding. Engineer for alternative analyses, and PER report.

Sunset Acres Stormdrain Improvement, San Marcos, TX – Project Engineer Responsible for InfoWorks ICM 2D stormdrain modeling for preliminary design of stormdrain improvements in the Sunset Acres neighborhood. Improvements include enhancing an existing detention pond and increasing stormdrain capacity. Improvements were designed to upgrade old facilities and reduce drainage issues throughout the neighborhood.

Scheibe Consulting has not yet had the opportunity to perform direct work for the City of Edinburg, we have included a selection of relevant engineering servicing projects that showcase the depth of experience and technical capability of our staff. These representative projects reflect the same level of expertise, quality, and attention to detail that our team would bring to the City's assignments. We look forward to the opportunity to work with the City of Edinburg and are happy to support the City in any capacity needed.

PROJECT #1

Project Name/Location: Blanco Gardens Roadway, Utility, and Drainage Improvements Project
Firm Name Work Performed Under: Scheibe Consulting, LLC
Year Completed: 2025
Total Cost: $1.8 Million (Engineering Fees/Services), $15 Million (Construction Fee)
Client or Owner's Representative: Mr. Shaun Condor, PE, PMP; Director of Engineering and Capital Improvements (San Marcos)
Phone Number of Client/Owner's Representative: (512) 393-8134
This project was completed on schedule and within budget.
Individuals: Eric Scheibe, PE, CFM, Jack Brown, PE, Erin Cuppetilli, PE, CFM, and Daniel Harris, PE, CFM

Project Description: The city of San Marcos experienced severe flooding from past events including May 2015 ("Memorial Day Flood") and Oct. 2015 ("All Saints Day Flood") resulting in a federal disaster declaration for both events. Several lives were lost due to these floods and extensive flood damage was realized. The GLO, TxDEM, TWDB, and other funding agencies collaborated to help fund infrastructure improvement projects throughout the City. The Blanco Gardens project was funded through GLO CDBG-DR funding and other funding sources. Scheibe Consulting was initially hired to conduct a preliminary engineering analysis of the project area and identify flood risk areas, drainage improvement needs, roadway improvement needs, and utility adjustment/improvement needs. The preliminary engineering analysis included a 2D InfoWorks ICM model of the project area, detailed surveying, and environmental assessments. The Team was in continued collaboration with HUD/GLO review staff throughout this project and has worked closely with them and numerous resource agencies to ensure full environmental compliance with federal standards. Scheibe was then hired to provide full design and construction phase services to see this project through to completion. This project included full-depth street reconstruction of River Rd., Mill and Overlay improvements along several of the minor residential streets in the neighborhood, installation of ~6,500 LF of stormsewer (ranging from 5' x 5' RCBs to 24" RCPs, installation of 1,000 LF of new PVC WW line, installation of 500 LF of 8" Water Main, installation of 3,000 LF of electric duct bank, installation of 5,000 LF of Concrete Alley flumes, relocation of 5,000 LF of 2" & 3" gas mains, construction of a 3,000 LF (30-ft wide) diversion channel, and installation of a 500 LF by 30-ft tall limestone retaining wall and outfall structure for the outfall of the new stormdrain in to the San Marcos River. Scheibe utilized InfoWorks ICM to evaluate this project, identify the benefits, and design drainage improvements. Water quality and detention ponds were also evaluated as part of this project.

View of the inundation areas in San Marcos Texas using InfoWorks 2D Modeling

The current project objectives include the following:

- Drainage master planning
- Survey services & coordination
- Advanced hydrodynamic & 2D modeling (InfoWorks ICM)
- Drainage design
- PER development (TWDB FPP Report)
- Cost estimation
- Land Acquisition (following HUD / CDBG-DR protocol)
- Geotechnical Investigations, Roadway, and Traffic Design
- Electric Duct Bank Design
- Water/Wastewater Main Design
- Streambank Stabilization Design
- Public notification, outreach, and meetings
- Complex environmental, historical, and archeological considerations

"I highly recommend Scheibe Consulting for their professional engineering services and look forward to working with them in the future." – Rey Garcia, City of San Marcos

5X5 RCB Trench (~20-ft Deep), River Road, San Marcos, TX (Blanco Gardens Neighborhood)

PROJECT #2

Project Name/Location: Cameron County Drainage District #5 Murphy & S. Fork Lateral Regional Pond Project
Firm Name Work Performed Under: Scheibe Consulting, LLC
Year Completed: On-going. Design to be completed in May 2025.
Total Cost: $782K (Engineering Fees/Services), $4 Million (Estimated Construction)
Client or Owner's Representative: Mr. Rolando Vela, General Manager, CCDD5
Phone Number of Client/Owner's Representative: (956) 423-6411
Individuals: Luis Vargas, PE, CFM, Eric Scheibe, PE, CFM, Jack Brown, PE, Marisa McKnight, PE, CFM, Efrain Ramos, PE, CFM, and Daniel Harris, PE, CFM
This project is currently in design, on schedule and within budget.

Project Description: Cameron County Drainage District #5 desired to improve drainage along the Murphy and S. Fork Laterals, a major drainage channel within the district's jurisdiction. Scheibe Consulting was retained to apply for a TWDB FIF Category 2 grant with the TWDB in 2020. This grant was awarded and Scheibe was selected to assist with the design and construction phase services for this project. This project includes the design of two large regional detention facilities to help alleviate flood risk downstream to the City of Palm Valley.

This project includes:
• Hydrologic and Hydraulic Analysis/Modeling
• Detention Design
• Culvert Improvements
• Traffic Control Design
• Construction Phase Services
• Geotechnical investigation
• Environmental Permitting
• Structural Design
• Cost estimation
• Close coordination between TWDB, Palm Valley, and Cameron County.

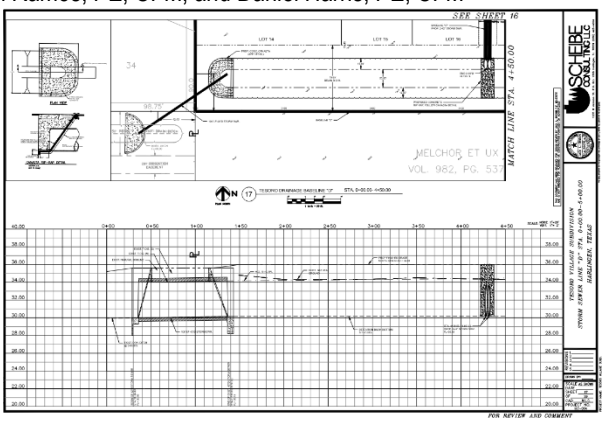
PROJECT #3

Project Name/Location: Arroyo Colorado Hike & Bike Phase 3 (Harlingen, TX)
Firm Name Work Performed Under: Scheibe Consulting, LLC
Year Completed: On-going. Design to be completed in December 2026
Total Cost: $335,000 (Engineering Fee)
Client or Owner's Representative: Roberto Hernandez, PE, CFM – Harlingen's City Engineer
Phone Number of Client/Owner's Representative: (956) 556-5245
Project Description: Scheibe is currently working on the design of this project, which consists of the construction of a 10-foot asphalt trail of approximately 1 mile from McKelvey Park to Hugh Ramsey. The proposed trail segment is located on the Arroyo Colorado, south of Parkwood Drive. Scheibe included a State Land Surveyor as a subconsultant to determine the gradient boundary of the creek and to assist with the research of land grants, property records and deeds. The topographic, boundary and drone surveying have been completed.



Master Plan of Arroyo Colorado Trails

Individuals: Luis Vargas, PE, CFM, Eric Scheibe, PE, CFM, Jack Brown, PE, Efrain Ramos, PE, CFM, and Daniel Harris, PE, CFM
This project is currently in design, on schedule and within budget.

PROJECT #4

Project Name/Location: Tesoro Escondido Subdivision (Harlingen, TX)
Firm Name Work Performed Under: Scheibe Consulting, LLC
Year Completed: On-going. Construction started April 2026.
Total Cost: $2 Million
Client or Owner's Representative: Paul Daniec, Developer
Phone Number of Client/Owner's Representative: (956) 867-4964
Project Description: This project involves a proposed 20-acre multi-family subdivision in Harlingen. Mr. Jack Brown began the project with his previous firm and delivered 100% construction plans to the developer in 2020. Although all city permits were obtained and a pre-construction meeting was held, construction did not begin because the developer placed the project on hold due to personal matters. After five years, and once the developer was ready to proceed, Mr. Daniec requested that Mr. Brown, now with Scheibe Consulting, resume the project, prompting a new pre-construction meeting with the City. Since the original plan approval, the City had updated its drainage policy, requiring Scheibe to revise the preliminary plat, drainage plan, and construction plans to enlarge the proposed detention pond. All documentation was resubmitted to the City with a new permit application. Following careful coordination, the project has now been approved, and construction is scheduled to begin in April 2026. Despite the unforeseen circumstances on the developer's side and the City's change in policies, Scheibe was able to quickly adjust the plat and construction plans for approval.

This project's design was completed on schedule and within budget.

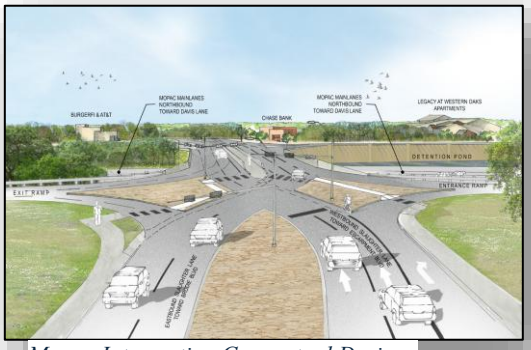
PROJECT #5

Project Name/Location: Mopac Intersections Tollway Improvements, N. Slaughter Ln. to S. of La Crosse Ave. Project, Austin, TX (TxDOT – Austin District)

Year Completed: 2020

Construction Cost: $53.5 Million

Client/Owner's Representative: Gary Hilgenberg, PE, Ex-H&H Lead - TxDOT Austin District | Current: Senior Engineer – JMT Engineering



Phone Number: 512-667-7269

Mopac Intersection Aerial Photo, Post-construction

Project Description: TxDOT desired to develop new main lanes along Mopac from La Crosse Blvd. to Slaughter Lane, Austin, TX. Project included utility relocations, new full-depth roadway improvements, Mill/Overlay improvements, new hike & bike trail, modifications to existing water quality infrastructure, design of storm sewer improvements, and design of 6 new on-site detention facilities. This project is located in The Barton Springs Watershed and associated SOS region, requiring extensive water quality design considerations. This project was also located over the Edward Aquifer in proximity to known Karst features. WQ Improvements included batch detention facilities and sand filtration facilities (all located within the project ROW). Two Innovative Multi-Stage detention ponds were designed to avoid expensive gas transmission main relocations. Due to the complexity of the project area, a large portion of this detention and storm sewer system was simulated using SWMM to dynamically route runoff through the system and properly account for non-coincident off-site/on-site peak flows and associated tailwater effects on proposed detention facilities. The following services were provided for this project:

- COA Floodplain Permit and SOS Ordinance Coordination
- Installed new stormsewer system (ranging in size from 18" to 48" DIA)
- Installed Innovative Diverging Diamond Intersections at Slaughter Ln
- Includes survey services & coordination
- Advanced hydrodynamic modeling (Dynamic stormsewer modeling using SWMM)
- Installed of 6 detention ponds and 6 water quality ponds
- Full street improvement design services
- Geotechnical field data collection and design recommendations
- Installed water and/or wastewater improvements
- Installed electrical improvements and street lighting
- **Installed new 10-ft wide concrete hike and bike trail system**
- Installed new landscaping with ROW
- Included final construction documents and cost estimates (30, 60, 90, & 100&% CDs)
- Included Bid and Construction Phase Services

Mopac Intersection Conceptual Design

Individuals: Eric Scheibe, PE, CFM, Erin Cuppetilli, PE, CFM, and Daniel Harris, PE, CFM

SECTION A - TRANSMITTAL LETTER

July 14, 2026

Mardoqueo Hinojosa, City Engineer
City of Edinburg
415 W. University Drive
Edinburg, Tx 78539

Submitted electronically to https://secure.procurenow.com/portal/cityofedinburg
RE: RFQ #2026-7 Professional Engineering Services

Dear Mr. Hinojosa and Members of the Selection Committee,

SCIVLE, PLLC (SCIVLE) which stands for **S**erving **C**ommunities through **I**nnovation, **V**alue-driven **L**eadership, and **E**xecution is proud and excited to submit for your consideration our Statement of Qualifications to provide professional engineering services. Although this is our first submission under our newly locally owned and established firm, we are confident that you will find our principals and staff extremely well-qualified to serve the City. Our immense breadth and depth of experience from successfully delivering public infrastructure projects from early conception in planning and programming, grant application and administration, developing preliminary engineering and environmental permitting, PS&E, construction, and project closeout documents on diverse scope and scale projects and programs coupled with our proven successful track record with the City and local stakeholders including Hidalgo County Drainage District #1, TxDOT Pharr District, and Hidalgo County Precinct #4 will allow us to be a vital asset to the City as it tackles it's infrastructure challenges.

By listening to the City Commission deliver the State of the City address earlier this year, it was clear to see their commitment to exponential growth and prosperity. As a locally owned firm, SCIVLE is personally vested and excited for the opportunity to partner with the City to execute the aggressive plans to improve and expand city services, mobility, access, recreation, and economic development for the City and for the region by successfully delivering the supporting infrastructure.

SCIVLE respectfully requests consideration for the following categories:

- Street Infrastructure Evaluation and Improvements
- Pavement Management and Improvements
- Utility Infrastructure Evaluation and Improvements
- Erosion and Sediment Control Design
- Hydrology and Hydraulics (H&H)
- Transportation Evaluation
- Traffic Engineering Services
- Traffic Signal Design
- Environmental Engineering Services
- Civil Engineering

Thank you for your time and consideration. Should you require any additional information, please do not hesitate to contact us.

Respectfully submitted,

Oscar Arturo Garza, P.E., RPLS, CFM*
President
*Officer of the firm authorized to bind SCIVLE, PLLC to contract

SCIVLE acknowledges receipt of any and all addenda issued for this RFQ and has incorporated their requirements into our submission.

SECTION B – FIRM QUALIFICATIONS AND EXPERIENCE

Firm History

SCIVLE, which stands for **S**erving **C**ommunities thru **V**alue-driven **L**eadership and **E**xecution was established in the summer of 2022 by Oscar Arturo Garza, P.E., RPLS, CFM. The firm is locally rooted, yet brings immense breadth and depth of project experience through its principals who have successfully delivered large scale public infrastructure planning, surveying, design, and construction management projects in many parts of Texas and throughout the United States for the past 15 years. This experience was gained through their tenure working directly for TxDOT and as consultants focused on state and federally funded transportation and drainage projects.

Approach Implemented by SCIVLE to Successfully Deliver CIP's

The below detailed **technical approach** has been **refined** over years of **experiencing successes and "lessons learned"** in the delivery of public infrastructure projects all over the state and outside of the state. From our **experience** and tailored project delivery approach, we can ensure the City will receive **efficient, timely**, and **high quality deliverables**.

Preliminary Activities

Following selection of a specific project, we would have a preliminary meeting with City staff to understand the purpose, need, goals, and any overarching constraints pertaining to the project (usually tied to funding or schedule). What also comes from this meeting is the official kick off to developing the required exhibits that will be included in the executed work order including scope, fee, and schedule. Once we have developed a conceptual level construction cost estimate and successfully negotiated the scope, fee, and schedule that meets the needs of the City, a work order will be presented by City staff and acted on by Commissioner's Court. If the item is approved, a purchase order will then be issued to allow us to commence work.

Data Collection

Following issuance of a PO, we will immediately begin data collection to include available effective hydrologic and hydraulic models of previous or ongoing same or adjacent location projects, as-built plans, existing easement and ROW information from Hidalgo County Clerk, GLO, HC Appraisal District, Irrigation Districts, TxDOT, etc., RR Commission Data, FEMA data, etc. We will also submit a OneCall request to conservatively cover the project limits

Preliminary Field Visit

Once all available data is obtained, we will perform an initial field visit of the project to confirm our understanding of the project setting, especially ROW encroachments, potential utility conflicts, evidence of additional unaccounted for easements or ROW, high water marks, evidence of scour and erosion, existing condition of infrastructure including pavement condition and drainage system and bridge serviceability etc. We will create a log of items that may require extra attention from the surveyor or design

engineer. This log will be shared with the entire project team including the survey and geotechnical providers.

Survey

Depending on the terrain to be surveyed and the needs of the project, we will deploy our surveyors to execute traditional topographic survey using conventional survey equipment, LiDAR scanning, and/or hydrographic survey for any deep underwater topographic needs. Regardless, all methods used will meet or exceed all governing requirements and Texas Society of Professional Surveyors standards.

Existing Condition Modeling - Hydrologic

Once we receive topographic data or existing terrain model, we can finalize the development of the existing condition modeling (HEC-HMS and HEC-RAS). The initial condition model will be checked and/or calibrated against available effective models and then submitted to for review and comment. Once feedback is received, we will revise the existing condition model accordingly and resubmit.

Existing Condition Modeling – Traffic and Safety

A crash analysis will be performed for the corridor. From the analysis we will determine “traffic hot spots”, determine causation, and propose safety mitigation for any issues identified.

Existing traffic data collected will be analyzed via Highway Capacity Manual standards to measure existing performance via measures of effectiveness and level of service. Operational deficiencies will be identified; mitigation will be determined for each issue.

Proposed Conditions

Following approval of the existing condition modeling, we will begin to develop recommended, alternative 1, and alternative 2 proposed condition models that satisfies the project goals and needs. Each proposed alternative will have an associated construction cost and our summary of pros and cons that each option has to offer. These proposed options will be presented to City staff directly. We will then revise at least one proposed condition model for the City to further consider. Finally, a single proposed model and design alternative will be selected by the City.

Drainage Report / PER (IF REQUIRED PER FEMA, TWDB, TxDOT, ETC.)

We will then usually develop a drainage report to include methodology, existing and proposed conditions output graphs and data. At this stage of the project, we can potentially submit for federal and state grants, so given the target project grant(s) we may alter the drainage report format to satisfy grant application requirements. Like all subsequent project deliverables, we will submit the initial drainage report and revise accordingly to facilitate acceptance/approval by the City and other reviewing agencies.

ROW Mapping

ROW acquisition is often the critical path to letting a project for construction. If a project requires additional ROW, we will prioritize the development of the proposed ROW footprint in design immediately after completing the proposed condition modeling. Once the final ROW footprint is set we will prioritize the development of metes and bounds descriptions and parcel plats, to expedite the ROW acquisition process.

Utility Coordination

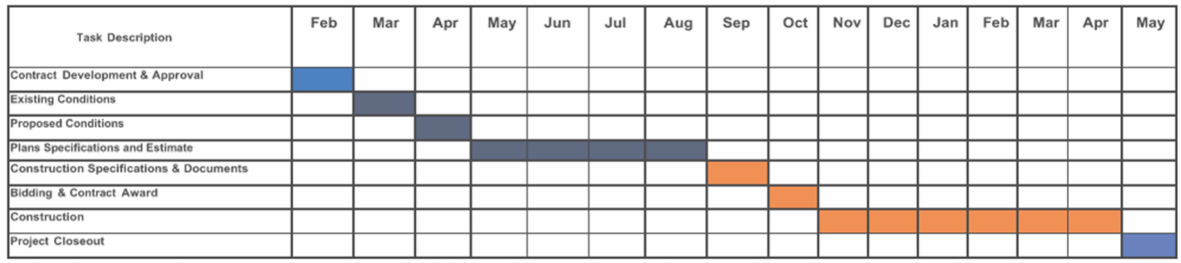
We will begin coordinating with utilities that have a stake in the project immediately after PO issuance. A utility conflict matrix will be maintained throughout the life of the project. High risk utilities will be identified early in the design process and a plan to avoid, minimize impact, or accommodate the utility will be executed. Utility conflicts can also be on the critical path to letting or a project for construction, if not dealt with early and persistently. Our proactive approach in resolving utility conflicts, results in reduced risk to projects.

PS&E Submittals

The construction plans (PS&E) will be developed per City and/or TxDOT requirements for LGPP projects. Milestone submittals of the plans will include at minimum a 30%, 60%, 95%, and a final signed and sealed submittal.

Post Design / Construction Phase Services

Following acceptance of the construction plans, SCIVLE will develop all required upfront documentation and bid tabulations in preparation for local or TxDOT letting. For local let projects - Once bids have been accepted, SCIVLE will assist the City in identifying the successful bidder (lowest responsible bidder) and developing an award letter.



Following official award, we will have a Pre-Construction meeting with City staff and the contractor to discuss proposed improvements and any high risk or pending items (i.e. existing gas line crossings) and to kick off construction activities. For the duration of construction, SCIVLE will respond to RFI’s, shop drawings, and contractor submittals within 1 business day, review pay applications, and visit the construction site at least once a month to check on activity and report progress back to the City via monthly progress reports.

Upon substantial completion of the project, City staff will join SCIVLE staff on an initial walk through of the project to develop a punch list of pending construction items. Once the contractor resolves the punch list items, SCIVLE will perform a final walk through of the project to verify construction completion.

SCIVLE will develop a final progress report and Certification of Construction Completion.

Schedule

A resource loaded critical path method schedule will be maintained and updated monthly through the entire project duration. We will take advantage of opportunities to resource load and task crash to build float into the schedule and/or make up for lost time if the project schedule slips. Below is a sample of a summarized project schedule we have successfully used on past City, County, and State projects.

Right of Way & Utilities Statement: This schedule is subject to change due to its dependency on right of way acquisition, utilities, and Southern Pacific Railroad clearance

Firm Experience in Performing Engineering Services (Past Two Years)

TxDOT Pharr District, US 281 Segment 1: SH 186 to FM 490- Edinburg, TX.
This project design was completed 4 months sooner than what was originally scoped to take advantage of some available discretionary funds while staying under the total contract amount of $6.3M. The project is currently under construction by TxDOT Pharr District.
Scope of Services Delivered by current SCIVLE Staff:

- Schematic Development
- Environmental Engineering Services
- Environmental Re-Evaluation (Environmental Assessment)
- Development of Standard Utility Agreements
- Joint-Bid Utility Design (Gas and Water)
- Utility Coordination
- Hydrology & Hydraulics
- Transportation Evaluation
- PS&E
- Traffic Engineering Services
- Traffic Signal Design
- Civil Engineering
- Erosion and Sediment Control Design

City of Edinburg, Alberta Road - Edinburg, TX.
This project is under construction by the City.
As a sub-consultant to South Texas Infrastructure Group, we met schedule and stayed within the original sub work order budget. No supplemental work orders were issued to amend schedule nor budget.
Scope of Services Delivered by current SCIVLE Staff:

- Hydrology & Hydraulics
- PS&E

- Traffic Engineering Services
- Traffic Signal Design

City of Edinburg. Brennaaleen Cedar Drainage Project – Edinburg, Tx
This project is under construction (PH III) by the City.
This project was delivered on schedule and budget.
Scope of Services Delivered by current SCIVLE Staff:
- Environmental Engineering Services
- Hydrology & Hydraulics
- PS&E
- Construction Administration
- Erosion and Sediment Control Design
- Railroad Agreement
- Utility Coordination

Hidalgo County Precinct 3. Mile 5 and Abram Intersection Improvements. Hidalgo County, Tx.
This project is set to State Let in September 2026.
This originally scoped 6-month project was delivered in 2 months, and stayed within project budget.
Scope of Services Delivered by current SCIVLE Staff:
- Environmental Engineering Services
- PS&E
- Traffic Engineering Services
- Traffic Signal Design
- Utility Coordination
- Grant Application and Administration

Hidalgo County Drainage District # 1. Bates Lateral. Hidalgo County, Tx.
This project is at 90% level of design completion and is on track to stay on schedule and within budget.
Scope of Services Delivered by current SCIVLE Staff:
- Schematic Development
- Environmental Engineering Services
- TxDOT Coordination and Permitting
- Utility Coordination
- Hydrology & Hydraulics
- PS&E
- Pavement Evaluation
- Traffic Engineering Services
- Civil Engineering
- Erosion and Sediment Control Design

Freddy Gonzalez Traffic Analysis and Traffic Signal Design at BU 281. Edinburg, Tx
This project is 100% Complete, signed, sealed, and accepted by TxDOT and was delivered on time and within budget.
Scope of Services Delivered by current SCIVLE Staff:

- Traffic Engineering Services
- Traffic Signal Design
- PS&E

Uniqueness to Best Perform Engineering Services for the City

What makes SCIVLE uniquely positioned and qualified to perform engineering services for the City are most notably the following:

1. SCIVLE boasts **"big firm" experience**, but brings the **practicality, empathy, and willingness and ability to partner** with local governments like the City of Edinburg that only a small locally owned firm can.
2. Commitment and Involvement of the firm principals:
   Because SCIVLE is lean and operationally efficient, the principals are directly involved with the development and delivery of projects. This ensures that the City will get the highest qualified staff and support needed to efficiently and effectively deliver their infrastructure projects.
3. Experience of the Principals
    a. Technically diverse scale and scope of successfully delivered projects range from $250K minor drainage improvement projects to $500M+ large transportation programs
    b. Cradle to grave experience allows SCIVLE to be a "one stop shop"
        i. Grant Applications and Grant Administration Including but not limited to:
            1. TASA
            2. HSIP
            3. CDBG
            4. FRA – RCE
            5. FEMA – FMA
            6. FEMA – BRICC
            7. FHWA – RAISE
            8. SS4A
        ii. Planning and Programming
            1. AFA Development and Execution
            2. Development of Interlocal Agreements
            3. Total Project Costs
            4. Project Development and Delivery Plan
        iii. Preliminary Engineering
            1. NEPA Clearance
                a. ESA
                b. Categorical Exclusion
                c. Environmental Assessment
            2. Public Involvement
            3. Schematic Development for FHWA and TxDOT approval
        iv. PS&E

1. TxDOT
    a. Traditional Design-Bid-Build
    b. Joint-Bid
    c. Design-Build
2. City of Edinburg
3. Hidalgo County

v. Construction Administration
1. Compliance
2. QA/QC
3. Project Closeout

Office Location that Will be Providing the Services

All engineering services will be performed on-site at the SCIVLE office located at 2416 Buddy Owens Blvd McAllen, Tx 78504.

Approach to Handling Part-Time Staffing Needs

SCIVLE is equipped and staffed to undertake any work order executed under this contract. The current staff consists of three professional engineers and six senior designers. However, in the event a work order requires additional resources, we have standing teaming and staff augmentation agreements with KCI Technologies, GDJ Engineering, & Melden and Hunt to address any part-time staffing needs and ensure successful delivery of any project awarded to us by the City.

Texas Board of Professional Engineers
CERTIFICATE OF REGISTRATION
This acknowledges that

SCIVLE, PLLC

has fulfilled the requirements of the Texas Board of Professional Engineers to offer and perform engineering services in the state of Texas

Registration Number
F-23808

Expiration Date
09/30/2026

SECTION C – TEAM MEMBER QUALIFICATIONS

Oscar Arturo Garza, PE, RPLS, CFM
Project Manager, H&H Task Lead, and Utility Coordination
15 years of Experience
Certifications & Registrations
PE / TX / 122125
RPLS / TX / 7171
Local Government Project Procedures (LGPP) / 80823
Education
Bachelor of Science of Civil Engineering

Oscar will serve as project manager, H&H task lead, and Utility Coordination task lead for this contract. He will be the sole point of contact for any project assigned and will responsible for managing the schedule and project resources including staff and budget to successfully deliver any project awarded to SCIVLE.

Mr. Garza has amassed practical and proven project methodology to solve unique design issues and challenging project schedules. His key strengths include project management, agency coordination, cost control & value engineering, and problem resolution. His background includes hydrology & hydraulics; drainage, roadway, and traffic design; and construction engineering and inspection. He is proficient in legacy GeoPAK (2D Design) and newer 3D ORD Design. He has a high understanding of governing design standards, policies, and manuals that will be pertinent to this contract and codes, including City of Edinburg Standard Details, Specifications, and General Notes, the TxDOT Roadway Design Manual, TxDOT Bridge Design Manual, PROWAG Standards, FHWA Pedestrian and Bicycle Design Guidelines, Hidalgo County and HCDD #1 policies and design standards: HCDD #1 preferred typical section, outfall design details, design and check storm frequency, required format of reports and construction plans, etc.

Further, he is very knowledgeable of the TxDOT Hydraulic Design Manual, TxDOT Geotech Manual, and HEC-18. As a CFM he, is aware of FEMA floodplain policies and best practices, Federal Aviation Administration and Railroad Commission when proposing work adjacent to said facilities and has a deep understanding of Texas Administrative Code and CFR regarding compensable and non-compensable utilities that can be a critical stakeholder on proposed public infrastructure projects. Oscar is very experienced in using Watershed Modeling System and HEC-HMS to increase the

efficiency of performing hydrologic analyses. He has successfully performed HEC-RAS 1D and 2D Steady/Unsteady state analyses to model and design complex drainage and transportation projects. Oscar is resourceful and understands how to access and use available data to supplement or calibrate design work including FEMA effective models, USGS LiDAR, NRCS, and NOAA.

Carlos Juarez, PE
Roadway and Traffic Design Task Leader
15 years of Experience
Certifications & Registrations
PE / TX / 122006
Local Government Project Procedures (LGPP)
Education
Bachelor of Science of Civil Engineering

Carlos is a principle in the firm and will lead the roadway and traffic related analyses and designs subject to any work order awarded under this contract. His 15 years of professional experience includes developing preliminary engineering designs for schematic & environmental projects as well as developing final designs and delivering plans, specifications, and estimates for construction. Types of projects that Carlos has designed throughout most of his career include added capacity projects (rural roadway and curb and gutter street widenings), new location roadway expansion of tolled and non-tolled facilities and non-capacity added rehab in place and notch and widening of paved surface.

Carlos is a proficient user of OpenRoads Designer and TxDOT-required workspace. He is an expert in FHWA, AASHTO, and TxDOT design criteria and TxDOT 2024 Specifications. He is LGPP certified and can immediately step into an existing project that already has an executed Advance Funding Agreement or can assist the City in the initial programming of a project including developing Project Information Forms and an Advance Funding Agreement.

Competency

SCIVLE has the competency to successfully deliver projects assigned under the subject contract. Oscar and Carlos have the technical experience and project management skills that will be required to plan, analyze, design, and manage the construction of a wide variety of roadway, bridge, site, and drainage projects of varying scale and complexity.

The below section includes a summarized list of recent projects relative to the subject RFQ that Oscar and Carlos have successfully delivered.

Experience and Recent Projects of Project Manager and Key Task Lead

Hidalgo County Drainage District No. 1, Faysville Drain - Hidalgo County, TX. Project Manager and H&H Task Leader. Oscar performed hydrologic analysis, hydraulic design, authored a drainage report, performed the final preliminary and final design, and provided construction phase services. Oscar used HEC-HMS and HEC-RAS 1D and 2D Unsteady State modeling components software to complete the hydrologic analysis and hydraulic design components of this project.

City of Edinburg, Alberta Road - Edinburg, TX. H&H Task Lead, Roadway Design Support. On this project, Oscar served as H&H Task Lead and Carlos served as Roadway Design Support. The project included the conversion of a two-lane rural roadway segment to an urban boulevard curb and gutter section that includes four thru lanes with a raised median, pedestrian and bicycle facilities, and a closed system storm sewer. Plans included typical sections, earthwork, general notes, roadway and storm sewer plan and profile sheets, outfall plan and profile, traffic control layouts and details, intersection improvements, traffic signal design, signing and pavement markings and details, environmental permits, and SWPPP layouts. This project was fiscally constrained under the City of Edinburg bond program, requiring a considerable Value Engineering effort pre-bid and post-award in partnership with the successful contractor. Value Engineering measures incorporated into this project resulted in decreased lane width, which lowered roadway costs by avoiding the removal and replacement of eight traffic signal poles and a signal controller and consolidation of pedestrian and bicycle facilities decreased the roadway width (on-street bicycle facilities) to minimize conflicts with compensable utilities and reduce impervious areas. Both major VE design changes allowed for reduced design peak flow to the storm drain system and outfall structure, which in turn allowed Oscar to reduce drainage structure sizes and the number of curb inlets; further reducing construction cost and construction schedule. Oscar utilized HEC-HMS for the hydrologic analysis and GeoPAK Drainage and HEC-RAS 2D steady state for the analysis and design of the storm sewer system and outfall, respectively.

TxDOT Pharr District, SH 107 - Hidalgo County, TX. H&H Task Leader. Oscar served as H&H Task Lead for this project. The project included the widening of a two-lane rural roadway to include 8’ shoulders and turning bays to improve safety. This project involved the rehabilitation of the existing roadway within the regulatory Floodway East Levee to the West Levee, which presented a significant challenge in drainage design and traffic control. The project was developed under a condensed schedule which required understanding of impacts and implications to schedule. Oscar ensured less than 0.1 AC acres of total impact to JWOTUS to ensure use of USACE nationwide permit. For IBWC approval of the project, Oscar was challenged to meet “no rise” design criteria in the ultimate build condition at the 100 yr Storm event (post construction) as well as in the interim condition (during phased construction). The “no rise” design was achieved by balancing cut and fill within the regulatory floodway and adjusting for impacts to 100 yr flow (weir flow at overtopping + culvert flow) caused by changing culvert and roadway geometry and configuration. Utilizing the latest USACE produced model to calibrate the existing condition, Oscar used HEC-RAS 1D and 2D Unsteady State and HY-8 to complete the hydrologic analysis and hydraulic design components of this project, respectively.

TxDOT Pharr District, US 281 Segment 1: SH 186 to FM 490- Edinburg, TX. Project Manager.
For this project, Oscar served as Project Manager and Roadway Design Task Leader and Carlos served as Traffic Control Plan Task Leader, Quality Assurance Manager, and Construction Phase Services Task Leader. With a construction cost estimate of over $190M, this project required an Initial Financial Plan (IFP), Value Engineering (VE) Study, a Risk Workshop, and a Risk Based Construction Cost Estimate (RBCCE). Oscar managed subconsultant progress, enforced the QA/QC plan, executed QA protocols of all subconsultant-produced work, developed the (IFP), performed annual updates to evaluate the project's health & tracked potential risks against milestone completion dates. Oscar used Bentley's OpenRoads Designer 3D to develop all proposed geometrics & comprehensive 3D models (ultimate build & TCP model). Using OpenRoads Connect Edition & ProjectWise, Oscar implemented a risk-based iterative roadway & hydraulic design approach. The final design was assessed to determine the existing & post-construction impacts on the 100-year floodplain. By implementing this hydraulic design approach, Oscar optimized the environmentally cleared ROW footprint without sacrificing the serviceability of the proposed facilities, saving TxDOT the time & cost that would have been incurred to add ROW for detention & executing an Environmental Assessment re-evaluation. To facilitate TxDOT and FEMA approval, Oscar used HEC-RAS 2D analysis (Rain on Grid) to develop pre and post construction inundation mapping to quantify floodplain impacts and demonstrate an acceptable risk-based design at the 100-yr storm event within the floodplain.

CIL Capital. Queenstown Park - City of Pharr EDC Drainage Project. Project Manager
While at KCI, Oscar developed the drainage design for all offsite public improvements required to serve a planned industrial park corridor on Las Milpas Road from Veterans Road to the Pharr South Lateral. The drainage design included a new storm sewer system 24" - 48" RCP trunkline, detention volume mitigation, and a new outfall per HCDD#1 design criteria. Oscar utilized HEC-HMS, HEC-RAS 2D Steady State, and OpenRoads DU to execute the analysis and design for this project.

City of Edinburg. Brennaaleen Cedar Drainage Project. Project Manager
While at KCI, Oscar served as project manager and engineer of record for this project. The scope included PS&E and construction phase services for a new closed storm sewer system and a new regional detention facility to alleviate flooding to the Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions. Oscar utilized HEC-HMS, HEC-RAS 2D Unsteady State, and OpenRoads DU to execute the analysis and design for this project.

Hidalgo County Precinct 3. Mile 5 and Abram Intersection Improvements. Project Manager and Traffic Signal Design Task Leader.
For this project, Carlos served as Project Manager and Traffic Signal Design Task Leader. The project was a Federally Funded Category 8 (Safety) project delivered under the Highway Safety Improvement Program administered by TxDOT. It included pavement resurfacing, approach widening, and upgrading of 2 way stop flashing beacon to a fully actuated traffic signal.

City of Brownsville. Brownsville Traffic Signal Design at Several Locations. Project Manager and Traffic Signal Design Task Leader. For this project, Carlos served as Project Manager and Traffic Signal Design Task Leader. He provided traffic signal design and traffic engineering services at McDavitt Boulevard, Oak Street, and Roosevelt Street for the City of Brownsville. The project included a design survey and design of three fully actuated traffic signals. The project was delivered under the Highway Safety Improvement Program administered by TxDOT.

Texas Department of Transportation, FM 973 from FM 969 Thyone Drive - Austin, TX. Project Manager and Roadway Design Task Lead. For this project, Carlos served as Project Manager and Roadway Design Task Lead. KCI prepared PS&E and related documents for the safety-widening project. The project limits were from FM 969 to 0.1 miles north of Thyone Drive and was for the widening of an existing 2-lane rural highway to a 5 lane curbed section with pedestrian and bike facilities. As Project Manager, Mr. Juarez verified all deliverables were in accordance with TxDOT and FHWA specifications and standards.

SECTION E – INSURANCE

SCIVLE certifies it carries the following insurance at the noted limits:

General Liability: $1M each occurrence / $2M aggregate;

Workers' Compensation: An amount not less than that required by State law and to include Employer's Liability of $1M;

Automobile Liability: $500,000 CSL

Professional Liability: $1M per claim / $1M aggregate.

SECTION F - PROFESSIONAL SERVICES AGREEMENT

SCIVLE has reviewed the Professional Engineering Services Agreement included with the RFQ. SCIVLE confirms that it will meet the prerequisite insurance requirements and, if selected, agrees to enter into the Professional Engineering Services Agreement with the City of Edinburg.

RE: Request for Qualifications – RFQ No. 2026-7
Professional Engineering Services

To Whom It May Concern,

SDI Engineering LLC is pleased to submit this Request for Qualifications for providing Professional Engineering Services, as required by the City of Edinburg. Included in this packet is a list of project experience that very closely resembles projects of size and complexity in your city. As an Engineer in the public sector for over 26 years, I have unique insight into the many different factors that make projects successful. As you will see from the information provided, the firm will bring experience in the many facets to include paving, drainage, water distribution, water treatment, wastewater collection, wastewater treatment, contract negotiations, Right-of-Way acquisition, and Stormwater Management, parking lots, HVAC Renovations, Re-Roofing improvements, as well as design and project management of school districts, cities, irrigation districts, and county improvements.

SDI Engineering LLC is comprised of personnel that have the experience and credentials to meet the needs of the city. We have successfully completed work on State and Federally funded projects from the grant application process through design and construction management. In addition, we have demonstrated history with several Cities in the Rio Grande Valley and their staff.

I, Isael Posadas, P.E., will be the person authorized to conduct final contract negotiations with the city and welcome the opportunity to be considered for your project needs. Be advised no Addendums were received for this RFQ. We look forward to discussing our proposal with you in greater detail.

Respectfully,
SDI ENGINEERING, LLC

Isael Posadas, P.E., Principal

2 – Firm Qualifications and Experience:

Name of Firm:	SDI Engineering, LLC 2105 S. Jackson Rd Edinburg, Texas 78539
Telephone Numbers:	Office: (956) 287-1818
President & Primary Contact:	Isael Posadas, P.E. (Registered Engineer, 89435)
Established:	October 2010
Firm Structure:	Limited Liability Company
Texas Registration No.:	F-13016

Firm Background

SDI Engineering was established in 2010 as a Limited Liability Company (LLC), with the goal of providing clients with quality engineering and hands-on services based on solid experience and know-how. We understand the needs of our governmental and private clients because we have a history of being a client. Having once been regulators and policy developers for several municipalities, we offer an ability to maneuver through the many rules and regulations that advance projects in a timely and efficient fashion. It is this combination of experience and proven performance that makes our company unique to the area. SDI Engineering was established to help develop and build quality projects with sound engineering practices that make communities safer and promote enhanced quality of life.

The firm's principal has a solid reputation for excellence in engineering and is a direct result of his management of public systems and the commitment to the principle that projects are built to meet the needs of the public in the long term.

The firm team has successfully supervised the preparation of design schematics and PS&E for roadways, drainage, water distribution, wastewater collection and other civil engineering projects as well as architecture plans for roof improvements, parking lot improvements, and HVAC Renovations. SDI Engineering, LLC, is committed to providing integrity and excellence in its work, resulting in only the highest levels of customer satisfaction.

Firm Philosophy

Over the years, SDI Engineering, LLC, has undertaken many challenging projects and accumulated skills and experience in design and project management services. Today, SDI Engineering, LLC, takes on the role of various municipalities, governmental, county, schools, irrigation districts; and water provider projects to provide design inputs and engineering solution services. Our objective is to provide our clients with excellent experience when we are selected to execute their projects. Our emphasis on clear communication and follow-through procedures ensures that clients' objectives are top priority in the planning and execution of all our processes.

Project Approach/Methodology

There are several key factors to be considered in the preparation of the construction documents for any project. The firm's principal and his staff have developed an approach that has proven successful on projects time and time again. These factors include the following:

- Review the project goals and clearly understand all the client's needs, including performance and budgetary constraints.

- Identify specific work scope and establish efficient and timely milestones to complete the engineering assignment.
- Determine the local, state and federal requirements of the project based on funding and regulatory agency oversight.
- Attain as much information about existing conditions that can affect the project, including previous work, studies and efforts by others.
- Utilize design concepts that are proven in both the technical and practical application that provides long term performance with the operator of the system or facility in mind.
- Establish clear, open and honest communication with the Client and/or their representative throughout the project, from design to completion.
- Provide a product that meets or exceeds the expectations of the client.

Services Provided

SDI Engineering specializes in civil engineering, project planning, construction management and stormwater management. Our primary objective is to provide excellent personal service tailored to meet our client's goals and objectives within the framework of existing regulatory requirements, and in the most cost-efficient engineering manner possible. SDI Engineering takes pride in ensuring that all projects are completed on-time and within budget. These services have been provided to the City of Edinburg, City of McAllen, Harlingen Waterworks Systems, Hidalgo County Irrigation District No. 1, Hidalgo County Irrigation District No. 16, Edinburg CISD, North Alamo Water Supply Corporation, Sharyland Water Supply Corporation, and the City of Pharr. A solid track record has been established in the following areas:

Engineering Design / Consulting

Feasibility Study, Site Investigation, and Site Selection
Project Planning & Permitting
Hydrology and Hydrologic modeling
Road Design
Sewer System
Storm Drainage Systems
Water Systems
Grading Plans
Earthwork Calculations
Drainage Basin Analysis
Retention and Detention Systems

Project Management/Planning and Permitting

Construction Management
Owner Representation
Permit Preparation and Processing
Construction Inspection
Contract Document Preparation
Fill and Grade Permits
Variance Applications

Stormwater Management

Permit Application (NOI)
SWPPP Development
Notice of Change (NOC)
Notice of Termination (NOT)
Inspection Services
Personnel Training
Yearly Reporting
Public Involvement
BMP Specifications
Policy Development

Right of Way Acquisition Services

Parcel Identification
Appraisal Report Review
Title Work/Clearing of Encumbrances
Negotiations
Closing and Filing of Documents
Expert Witness

Municipal Policy Development

Engineering Standards
Construction Standards
Subdivision Review Policy

SDI Engineering, LLC operates out of our main office located at 2105 S. Jackson Rd, Edinburg Texas.

Project File/Name: **24-007 City of Mercedes City Hall Flooring Improvements**

Summary:
Project consists of the management of the flooring replacement project at City Hall for approximatley 9,769 sq. ft. with the options of polished sealed concrete, ceramic/porcelain/natural stone tile, or luxury vinyl tiles, complete in place, in Mercedes, Texas

Owner:
City of Mercedes

Isael Posadas, P.E., President
SDI Engineering, LLC

Education: Texas A&M University – Kingsville
Bachelor of Science in Civil Engineering

Professional Registration: Registered Professional Engineer in the State of Texas, No. 89435

HUB VID Number: 1273681906600
Vendor Number: 466960

Experience:
Mr. Posadas has over twenty-three (24) years of civil engineering work experience, the last nineteen (19) years as a registered Civil Engineer, which includes hydrologic/hydraulic studies, private and public infrastructure projects, feasibility studies, annexation/zoning issues, public presentations, preparation of engineering plans and specifications, bidding and contractual processes, construction management, public policy development, Right-of-Way acquisition, Stormwater Management and development planning. Most recently, as the City Engineer for Edinburg, Texas, he designed, bid, and performed construction management for over $11 Million in infrastructure projects and reviewed/approved over $50 Million in municipal projects designed by others.

Mr. Posadas has a strong management background having once direct oversight of Edinburg's Engineering Department, Public Works Administration, Utilities Administration, and the Edinburg International Airport. He has also previously held the top management position for the Harlingen Waterworks System and worked for the City of McAllen's Engineering and Public Utilities Departments. He is licensed as a Professional Engineer in Texas and is also a Certified Floodplain Manager.

Design and Management Projects:

ACORD™ CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY) 11/04/2025

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer any rights to the certificate holder in lieu of such endorsement(s).

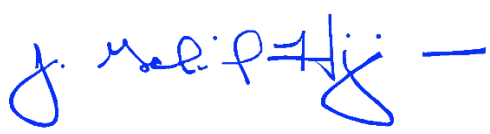
To whom it may concern,

Sigma HN Engineers, PLLC (SIGMA) is submitting this Statement of Qualifications package for Professional Engineering Services – Mechanical, Electrical, and Plumbing RFQ #2026-7. We are very interested in providing the City of Edinburg with professional engineering and construction administration services.



SIGMA is a firm whose goal is to produce quality designs for facilities that are functional, economical, energy efficient, and sustainable. SIGMA is led by two LEED Accredited Professional Engineers, Jesus Gabriel Hinojosa, and Jose Antonio Nicanor (Tony). Gabriel will handle the mechanical and plumbing engineering, and Tony will handle the electrical and special systems engineering. Both of us will be performing the construction administration duties of our respective disciplines. As the primary point of contact for the City of Edinburg, Gabriel will ensure the necessary resources are available to meet any challenge presented and ensure adherence to the quality standards expected by the City of Edinburg.

Gabriel and Tony have been providing MEP engineering services for more than 20 years combined and have worked together on numerous projects. We focus on providing quality construction documents that meet our client's needs. Because we have successfully completed projects working directly with institutional owners, we can guide you through the difficulties that may arise in a project. From design, through procurement and construction, Gabriel and Tony will be leading the project to ensure designs are properly implemented in the construction process.

The City of Edinburg will always be working directly with the principals of the firm. Our size allows us to be more nimble, more flexible, and more able to meet your needs in a cost-effective manner. We engage regularly in continuing education courses and seminars to maintain knowledge of the latest and most innovative materials and technology. With our understanding of facility infrastructure, we will evaluate existing conditions and propose solutions using appropriate mechanical, electrical, and plumbing systems.

Given our education and experience, we feel that we can be a valuable contribution to the City of Edinburg and would be excited to hear more details about the projects coming up in a near future. We appreciate the opportunity to provide MEP engineering services, and we encourage you to call our references as we you for your time and consideration.

Best Regards,

Jesus Gabriel Hinojosa, PE, LEED AP

Firm Qualifications

PRIME FIRM HISTORY

FIRM PROFILE

Sigma HN Engineers, PLLC was established in October 2012 by Jesus Gabriel Hinojosa and José Antonio Nicanor to provide excellence in MEP engineering services. All of our clients receive personal, responsive attention from the firm's principals. Both Gabriel and Tony are licensed professional engineers registered in the state of Texas and LEED accredited professionals. With over 20 years of combined experience, SIGMA is committed to the successful completion of projects on time and within budget. We have successfully completed over 300 projects, 57 of which were for higher education institutions and 103 for K-12 education institutions. To date, we have completed 33 projects for UTRGV, 21 for STC, and 1 each for TAMUK and TSTC-Harlingen. Please refer to the prime firm resumes for a more detailed description of representative projects.

Prior to forming Sigma HN Engineers, PLLC, Gabriel and Tony gained experience working on over 100 projects combined, 45 of which were for higher education. In various roles ranging from project manager to mechanical or electrical engineer of record to lead design engineer, 26 projects were completed for South Texas College, 14 for the University of Texas Pan American, 2 for the University of Texas Brownsville - South Most College, 2 for Texas State Technical College Harlingen, and 1 for the University of Texas Permian Basin.

Mission Statement

To enhance the health, safety, welfare, and comfort of the public by providing economical, responsive, and innovative professional engineering services.

Project Portfolio include new construction, renovations, and additions for higher education, K-12 education, data centers, restaurants, religious institutions, office buildings, kitchen facilities, science laboratories, gymnasiums, sports complexes, multi-purpose facilities, retail spaces, commercial plazas, medical facilities, FEMA-rated community safe rooms, private residences, public resource centers, fire stations and emergency services facilities, sanitary sewer lift stations, water-waste water treatment plants, libraries, parking lots, parks and recreation facilities, warehouses, etc.

Mechanical Engineering Services include HVAC load analysis, air balance analysis, ventilation for indoor air quality, demand control ventilation, air distribution systems, duct & piping insulation systems, air cooled and water cooled chilled water systems, packaged DX systems, split DX Systems, variable refrigerant flow systems, energy recovery systems, testing adjusting and balancing, vibration isolation, acoustic analysis, HVAC control & instrumentation systems, and energy compliance reports.

Electrical Engineering Services include emergency/standby & normal power distribution, lighting systems, network lighting control systems, alternative energy- wind and solar systems, grounding-bonding & surge suppression systems, lightning protection systems, fire alarm systems, and energy compliance reports.

Plumbing Engineering Services include domestic water systems, sanitary sewer and vent systems, grease waste systems, acid waste systems, interceptor systems, storm drainage systems, natural gas distribution systems, medical gas systems, and energy compliance reports.

Special Systems Engineering Services include structured cabling infrastructure for voice and data, design of classroom audio/visual systems, electronic safety, and security-access control & intrusion detection, and camera surveillance systems.

Facilities Services include a specialized offering of services such as power system studies, building condition assessments of Mechanical, Electrical, and Plumbing Systems, preliminary review, and on-site observations, drawings and specifications review, code compliance reviews, LEED consulting, and BIM Revit MEP modeling.

SIGMA HN ENGINEERS, PLLC

UNIQUE QUALIFICATIONS & SPECIALIZED DESIGN EXPERIENCE

We have designed the mechanical, electrical plumbing and special systems for government municipalities new construction and renovations buildings. Refer below for representative projects.

One of the qualities that makes SIGMA unique is our proximity to the City of Edinburg. Located in downtown McAllen, our office is only 18 miles away from the City of Edinburg. Our proximity to the City allows us to be there when you need us.

Our experience working directly as the prime consultant with government municipalities, higher education institutions and school district on new construction, renovations, and additions is another quality that makes SIGMA unique. We have provided engineering and construction administration services on numerous projects throughout the Rio Grande Valley. City of Weslaco, La Joya ISD, The University of Texas Rio Grande Valley, Harlingen CISD, Brownsville ISD, and Edinburg CISD.

Another quality that makes us unique is that we have gained familiarity working with government municipalities over the course of our careers.

Our size, proximity, extensive design experience, including prime firm experience, coupled with our familiarity with government municipalities, are all factors that make SIGMA uniquely qualified to perform the engineering and construction administration services for the City. Given our education and experience, we feel that we can be a valuable resource to The City of Rio Grande City and would welcome the opportunity to work with you on the projects that may arise in the future.

Small sample of projects involving with government municipalities:

- U.S. Customs Border Patrol McAllen Station Back Up Generator
- Rio Grande City FMCSA Office Renovation
- City of McAllen Harvey Ave. Stormawater Pump Station Improvements
- City of Roma North Plaza Lighting
- City of Edinburg Downtown Water Plant Section 3 Filter Control Valve Replacement
- City of Edinburg Fire Station Improvements
- City of Edinburg Water Treatment Plant Office
- City of Edinburg Transit Terminal
- Brownsville Senior Center
- Brownsville Metro Transfer Station
- Edinburg CISD Austin Gym
- Weslaco North Side Sports Complex
- Texas Department of Public Safety McAllen
- Texas Department of Public Safety Rio Grande City
- LRGV-DC 911 Center
- Texas Human Health Services
- Penitas City Hall & Police Station
- McAllen ERO Sub-Office US Immigration and Customs Enforcement
- LRGV-DC Building D Expansion

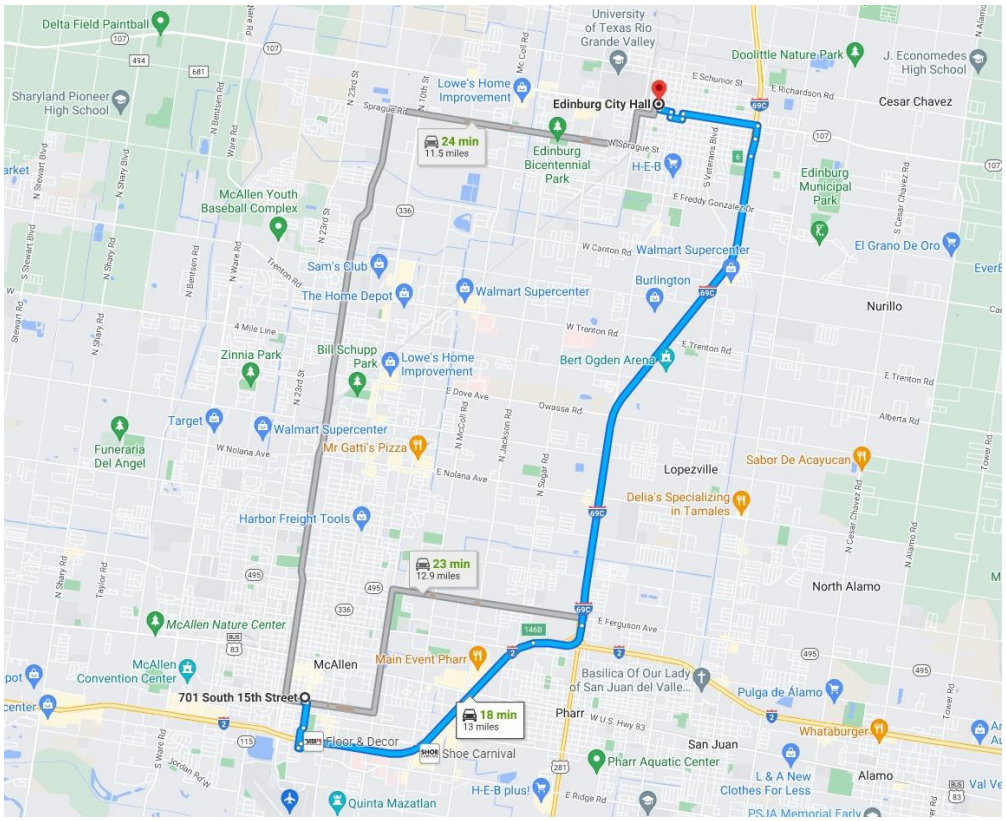
SIGMA HN ENGINEERS, PLLC

701 S 15th St
McAllen, TX 78501
(956) 332-3206

PROJECT EXECUTION

Meeting schedules and accelerated timelines is a critical part of our culture at SIGMA, and we take a great deal of pride in our commitment to meet our client's schedules and timelines. We are willing and able to expedite Mechanical, Electrical, Plumbing Engineering design and construction administration services for projects no matter how big or small. To complete projects within budget we communicate with our clients and visit the job site to clearly define a scope of work. We prepare an engineering cost estimate and establish a budget. We develop a detailed schedule and formulate a staffing plan. We also document work scope modifications and seek the client's approval prior to proceeding with the work, and we assign qualified personnel to each task. These basic elements of effective budget control allow us to provide quality designs, which minimize unanticipated cost in the construction phase such as change orders.

Early in the planning phase, we identify and communicate the technical expertise required, schedule time frames, and level of effort expected for each work order. For staffing purposes, it is simple; Gabriel and Tony will be involved in all phases of each work order. Gabriel will perform the mechanical and plumbing engineering, and Tony will perform the electrical and special systems engineering. Both Gabriel and Tony will handle the construction administrative duties of their respective disciplines. Needless to say, Gabriel and Tony will be hands-on and be fully involved in the day-to day activities of managing the project. Internal team meetings will be held throughout the duration of the contract to review progress on all delivery work orders.



Whether working on fast-track projects for demanding owners in the private sector, working for school districts on short fuse projects to meet grant deadlines, or working with higher education institutions to design improvements that can be constructed within restricted schedule downtimes, Gabriel and Tony have a track record of proven performance.

SIGMA HN ENGINEERS, PLLC

701 S 15th St
McAllen, TX 78501
(956) 332-3206

PRIME FIRM PROXIMITY

A quality that makes SIGMA unique is our proximity to Edinburg City Hall. Located in downtown McAllen, our office is only 18 miles away from Edinburg City Hall building. Our proximity to the campus facilitates design and construction administration duties. It allows us to be there when you need us.

SIGMA HN ENGINEERS, PLLC

701 S 15th St
McAllen, TX 78501
(956) 332-3206

AVAILABILITY AND COMMITMENT

Sigma HN Engineers, PLLC has the resources and is prepared to commence MEP engineering services for the City of Edinburg immediately upon receipt of a Notice to Proceed. With Gabriel and Tony as principals of the firm, we have the mechanical and electrical engineering capacity to accomplish any work order presented by the City of Edinburg. Gabriel will perform the mechanical and plumbing engineering, and Tony will perform the electrical and special systems engineering. Both Gabriel and Tony will be handling the construction administration duties of their respective disciplines. Gabriel and/or Tony will attend all required meetings with the City of Edinburg to make certain projects are completed successfully on time and within budget. As the primary point of contact for the City of Edinburg, Gabriel will ensure the necessary resources are available to meet any challenge presented and ensure adherence to the quality standards expected by the City of Edinburg. SIGMA's team will consist of the following associates whose duties and responsibilities are as follows:

- Jesus Gabriel Hinojosa, PE, LEED AP, will design the Mechanical and Plumbing systems, perform construction administration duties, and attend meetings in the design and construction phases of the project. Gabriel will also manage and supervise all phase of the project and serve as the primary point of contact for STC.

- Jose Antonio Nicanor, PE, LEED AP, will design the Electrical and Special Systems, perform construction administration duties, and attend meetings in the design and construction phases of the project.

- Anthony Nicanor, EIT, will design the Electrical and Special Systems, prepare construction documents, and assist with construction phase duties.

- Kevin Alvarez, CAD Technician, will prepare construction documents and assist with construction phase duties.

- Kevin Mejia, CAD Technician, will prepare construction documents and assist with construction phase duties.

  Lorenzo Lopez, CAD Technician, will prepare construction documents and assist with construction phase duties.

- Leonel Sanchez, Designer, will prepare construction documents and assist with construction phase duties.

- Patricia Hinojosa and Aimee Nicanor will handle any clerical and office administration duties.

We live and work in the Rio Grande Valley, and are committed not only on a professional level, but on a personal level to ensure projects are completed successfully on time and within budget. Our office is in McAllen so we will be ready to begin service immediately upon request.

QULAIFICATIONS & EXPERIENCE

Prior to pursuing his entrepreneurial endeavor with SIGMA in 2012, Tony had been with Halff Associates for more than 6 years. Tony has been the lead electrical and telecommunications engineer for new and renovation projects for commercial, institutional, industrial, and educational facilities. He has worked in numerous school district projects ranging from building renovations to new construction, thermal energy plant expansions, parking lot additions, network operating centers, electronic safety and security, data and voice networked-telecommunication infrastructure, audio/video for conference rooms, and TV production video/sound equipment and media infrastructure for school board rooms and football high school stadiums. Representative experience includes:

- South Texas College Starr County Campus Health Professions + Science Building
- South Texas College Starr County Campus Thermal Plant
- Brownsville ISD Rivera Early College High School HVAC & Lighting Improvements
- Region One Education Service Center Laredo Renovations
- Region One Education Service Center Edinburg Additions
- University Of Texas Rio Grande Valley One Stop

REPRESENTATIVE PROJECTS

City of Edinburg Central Fire Station HVAC Improvements, Edinburg, TX

- Owner/Client
  - Owner: City of Edinburg
  - Contact: Mardoqueo Hinojosa, City Engineer
  - Address: 415 W University Dr, Edinburg, Texas 78541
  - Phone: (956)-388-8211
  - Email: mhinojosa@cityofedinburg.com

- Project Construction Cost: $170K
- Completion Year: 2020
- Project Description: This was an HVAC improvements project. The Owner had consistent thermal comfort problems due to old chilled water fan coil units and air cooled chiller that had been neglected over the years and were beyond repair. We replaced the chilled water fan coil units which were suspended above the ceiling with packaged DX rooftop units. We had to be careful with the demolition plans and specifications as the existing chilled water piping was wrapped with insulation that contained asbestos. The city did not have enough funds to perform asbestos remediation, so the existing piping and chiller were abandoned in placed. We studied the existing duct and the new airflow requirements and made the air distribution duct modifications necessary to provide appropriate conditioned airflow into each space. The existing roof was analyzed to ensure it could support the weight of the new roof mounted units. We specified a new electrical panel to serve the new HVAC equipment.
- Project Manager: Jesus Gabriel Hinojosa, PE, LEED AP
- Project Engineer: Jesus Gabriel Hinojosa, PE, LEED AP/ Jose Antonio Nicanor, PE, LEED AP

City of Edinburg – Downtown Water Plant Section 3 Filter Control Valve Replacement, Edinburg, TX

- Owner/Client
  - Owner: City of Edinburg
  - Contact: Gerardo Carmona, Director of Utilities
  - Address: 415 W University Dr, Edinburg, Texas 78541
  - Phone: (956)-388-8212
  - Email: Gcarmona@cityofedinburg.com

- Project Description: Project consisted on the the replacement of control valves for the City of Edinburg Downtown Water Plant. We conducted a site visit to determine the existing conditions of the plant to coordinate the locations of the existing valves, air compressor, air dryer and other equipment that needed to be replaced. The site visits also consisted of identifying the electrical infrasctrucre of the plant to connect the new equipment.

- Project Manager: Jesus Gabriel Hinojosa, PE, LEED AP

Edinburg Police Department Training Facility, Edinburg, TX

- Owner/Client
  - ERO Architects
  - Eli R. Ochoa, Principal
  - 300 S. 8th Street, McAllen, Texas
  - 956.661.0400
  - eochoa@eroarchitects.com

- Project Construction Cost: $1.2M
- Completion Year: 2016
- Project Description: A new police training facility which houses a grand conference room, classrooms, and offices totaling 10,000 sf. Designed HVAC system using multi-zone VAV packaged DX rooftop units totaling 22 tons, single duct terminal units with electric re-heat, and stand-alone controls. Specified centrifugal exhaust fans for restrooms and custodial rooms and a unit heater to serve the fire riser room. Plumbing included specification of fixtures, performance specification of fire sprinkler system, and design of domestic water, sanitary sewer, vent, and condensate drain systems. The electrical scope of work consisted on the design and specification of light fixtures and controls, power building distribution for general purpose use and mechanical equipment, fire alarm, rough-in conduit and j-boxes for the intrusion detection system, surveillance cameras and telecommunication equipment.

July 08, 2026

City of Edinburg
Attn: Mardoqueo Hinojosa,
City Engineer
415 W. University Drive
Edinburg, Texas 78539

RE: RFQ No. 2026-7 Professional Engineering Services

Dear Mr. Hinojosa:

South Texas Infrastructure Group, L.L.C. (STIG) is pleased to present our qualifications and offer our Professional Engineering services in response to City of Edinburg's **RFQ No. 2026-7**. **South Texas Infrastructure Group, L.L.C.** is a Hidalgo County, Mission, Texas engineering firm, located on 900 South Stewart Road, Suite #13, who has the experience and knowledge in design and managing for projects in Hidalgo County and the Rio Grande Valley. As president of **South Texas Infrastructure Group, L.L.C.,** I have 27+ years of experience in the public sector where I have been able to work with yearly budgeted funding where we have to be fiscally responsible for it. My commitment to client service and excellent communication has allowed me to maintain a constant client base throughout the Rio Grande Valley.

Our goal is to provide the City of Edinburg and its residents with a thoughtfully designed and constructible public project that can be completed in a timely manner with the available funding resources. The goal can be achieved with our comprehensive team experience and our innovative approach to project design and delivery. The **South Texas Infrastructure Group, L.L.C.** program is structured to match the staffing needs to the project size. We are readily available to augment the core design services and ancillary engineering services. We believe that we offer a strong pro-active Design Team to successfully complete the selected projects and we appreciate the opportunity to submit this Statement for Qualifications.

We are eager to provide professional services to the City of Edinburg for any Professional Engineering services related work, and we thank you for the opportunity to provide you with our professional services. I am the primary contact person and may be reached at (956) 451-2670 or by email at julio@southtexasig.com.

Also, we did not receive any addendums or viewed any posted on the City of Edinburg's procurement portal. We acknowledge that this Statement of Qualifications has been prepared as per the requirements of the posted Request for Statement of Qualifications for Professional Engineering Services, RFQ No. 2026-7.

Sincerely,

Julio Cerda, P.E., President

FIRM QUALIFICATIONS AND EXPERIENCE:

South Texas Infrastructure Group, L.L.C. provides high quality, cost-effective professional engineering services for:

- ***Roadway /Transportation***
- ***Bridge and general design***
- ***Federal, state and county-funded design and construction projects***
- ***Site Work / Infrastructure***
- ***Land Development (Governmental and Private)***
- ***Utility Design and Coordination***
- ***Drainage Studies (Hydrology and Hydraulics)***
- ***Specifications and Construction Cost Estimates***
- ***Construction Management Engineering***

South Texas Infrastructure Group, L.L.C. (STIG) is a locally owned engineering firm providing a variety of civil engineering services for both the public and private industry. Our firm focuses on delivering quality, cost-effective, and innovative engineering solutions in a timely manner. STIG offers a broad range of experience in consulting services which include transportation engineering, public works, land development, utility design/coordination, planning, project management and construction phase services. We have experience in a capacity of multi-disciplined engineering services, which makes us able to exceed project/client demands and expectations. STIG offers experience, vision, dependability, and creative design approaches.

Key personnel of the STIG staff have previously worked with the City of McAllen, City of Mission, City of Edinburg, Drainage District No. 1, Hidalgo County and the Texas Department of Transportation (TxDOT). This experience further bolsters their expertise of public improvement projects. STIG has over 27 years of experience working on roadway, drainage, water, sewer, and traffic operations projects.

Professional Personnel and Experience

STIG personnel are highly qualified, experienced and motivated. This combination produces constant high-rated, cost-effective, and timely solutions and services for their Clients. In the course of our business we can:

- Plan, design, and manage a design team in development of a widely variety of projects ranging from public improvement projects to private residential and commercial projects.
- Coordinate with state and local agencies in addition to utility surveyors to determine project requirements, while minimizing construction costs and achieving client objectives. Participate in administrative and management duties related to proposal preparation, budget monitoring, and requests for additional service contracts, invoicing, maintaining client relations, and meeting client needs.
- Manage and plan land development projects from site feasibility through design and construction. Meet and coordinate with clients to establish project objectives and monetary constraints while meeting local, state, and federal agency codes. Work with client and design team to value engineer designs in order to minimize construction costs and schedules while optimizing development potential.

- Coordinate with sub-consultants, to include but not limited to the geotechnical engineer, structural engineer, and architects to resolve project and development issues.
- Design and manage preparation of construction documents and specifications for variety of projects including, but not limited to, demolition plans, grading and drainage plans, storm water pollution prevention plans, roadway plans, water and sewer plans, and dimensional control plans.
- Oversee and lead design team in preparation of plats. Track plat through platting process and coordinate with review agencies to achieve plat approval. Prepare, submit, and monitor building permits, state driveway and utility permits.
- Adhere to QC/QA policies to assure that plans are accurate and have been developed with a high level of confidence.
- Review and approve submittals by contractors during construction to determine compliance with project construction documents specifications.

Design/Process Experience

Site	▪ Site Planning, Platting, Zoning, Quitclaim ▪ Feasibility Studies
Grading and Drainage	▪ Site Grading, Underground Storm Drain Design ▪ Open-Channel Design, Culvert Design, Street Drainage, and Detention Pond Design
Hydrology and Hydraulics	▪ HEC-1, Rational Method, Boss RMS, HEC-2, ▪ Microstation Drainage, PondPack, StormCad, and Culvert Master
Roadway/Utility	▪ Roadway Design, Water Plan Design, Sewer ▪ Plan & Profile, Overall Utility Plans, Utility Relocation, and Lift Stations
Construction	▪ Site Demolition Plan, Construction Phasing, and ▪ Traffic Control Plans
Permitting	▪ Building Permit, State Driveway and Utility Permit, ▪ TPDES NOI & NOT, FEMA LOMR & CLOMR

Work Performance:

Understanding of Project & Services

South Texas Infrastructure Group, L.L.C. (STIG) understands that the City of Edinburg is seeking to contract with competent engineering firms, registered and licensed to practice in the State of Texas that have experience with Professional Engineering Services. Detailed services may encompass a broad range of services such as but not limited to the following: field investigation and data collection; feasibility evaluation and alternative analysis; design development and cost estimating; preparation of plans, specifications and estimates; review and check plans, subdivision and parcel maps, and computations submitted by private developers; review of engineering and encroachment permits; prepare environmental reports; review of environmental and engineering reports and proposals; coordination with utility agencies, consultants, and other public agencies; organization, participation and presentations at meetings held by City staff, the City Council, Neighborhood groups, and other stakeholders; preparation of preliminary documents, plans and/or reports including findings and recommendations; preparation final documents, plans and/or reports responding to City and other stakeholder comments; preparation of handouts and graphical displays for public meetings; management and monitoring of capital improvement project; management and monitoring of planning project; administration and monitoring of regional, state, and federal grants; and general civil engineering support services as assigned.

Project Approach

The successful completion of a project can best be attributed to the approach that is taken during project development. The STIG Team has experience working with the current phase-based approach system that the City uses for planning, designing and providing construction phase services for a project. Utilizing elements of the current system, the STIG Team will expand on it and develop projects in three phases. Phase 1 is the Planning and Schematic Phase; Phase 2 is the Design Phase; and Phase 3 is Construction Phase Services.

Project-Kick off Meeting

Prior to beginning any design work, the STIG Team will request a project kick-off meeting. At this meeting, the goal will be to meet the project manager and to get a thorough understanding of the scope and schedule of the project. It will be important to determine any potential issues which might slow down the project so that the scope can account for whatever services may be needed. Determining as many of these issues during this meeting will allow the STIG Team to begin to address them immediately.

Phase 1 - Planning and Schematics: This is the first phase of project development. During this phase, the project will be looked at to determine all issues that will need to be addressed. Design alternatives and options will also be developed during this phase and evaluated from a value engineering standpoint. During this phase, our team will also be able to assists the City with the facilitation of any funding agreements, or joint use agreements that may be needed. Preliminary investigations and research will begin during this phase; information such as as-built plans, right-of-way maps and topography maps will be gathered. Other key components of Phase 1 include:

Utilities/Utility Coordination: Communication with all utility companies will begin immediately (AT&T, AEP, etc.). Utility maps will be requested and all facilities will be verified for horizontal location. A preliminary conflict list will be created and distributed to all parties involved with the project. Overall, the utility coordination process will be initiated and by the end of Phase 1 all utility companies within the project limits should be accounted for. Coordination with the irrigation districts that will be affected will also be conducted during this phase.

Environmental: A key element to the project development process is obtaining all environmental clearances. During this phase, our team will work with the city to determine what type of environmental documentation is needed, such as categorical exclusions, blue line reports, and nationwide permits.

Public Involvement: During the early stages of most projects, it is important to get the public's input on the proposed improvements. The Team will develop exhibits, presentations, handouts, provide notice of meetings and any other information that may be needed for public meetings or hearings.

Phase 2 - Design: Phase 2 will consist of developing the detailed plans, specifications, bid tabulations/documents and estimates for each project. Proposed plans will include the preparation of a title sheet/index, plan and profile sheets, irrigation crossings and hydraulic calculations, water and sewer plans, and sequence of work notes. During this phase, any other ongoing coordination will continue with the surveyors, utility companies, and the geotechnical engineer.

Phase 3 - Construction Phase Services: The STIG Team will provide construction phase services support for all projects. Team personnel will be readily available during the bidding process to answer and address any questions that potential bidders may have. Upon awarding the construction contract, the STIG team personnel will request visits to the project to assure plan compliance. STIG team personnel will schedule periodic construction meetings to assure that the project is on schedule. The STIG Team will continue to coordinate with the contractor and the utility companies to assure that the contractor and utility companies are aware of each other's schedules. Any Requests for Information that the contractor may have, will be promptly addressed. Throughout the project construction, the STIG Team will review all shop drawings, review and recommend approval of request for payment, and will work hand-in-hand with the City of Edinburg staff to ensure that the work is progressing as per plans. Upon completion of the project, a final inspection will be performed with the contractor, City Inspectors, and Project Manager. A final punch list for the contractor will be developed in order to assure that the project is to the satisfaction of the City of Edinburg. Lastly, STIG will compile and distribute all construction redlines to design consultants for preparation of the "Plan of Record" or "As-Built" Plans. STIG will compile all "Plan of Record" or "As-Built" Plans from the design consultants and deliver them to the City of Edinburg's staff.

QA/QC Practices:

A big part of the success of STIG is our commitment to QA/QC Practices. We have an established set of criteria that are the foundation of our QA/QC Procedures. These criteria are the following:

- ***Knowledge/Experience:*** The STIG Team will assign a knowledgeable and experienced team member to lead the various tasks to minimize errors and omissions.
- ***Coordination/Communication:*** STIG will establish open lines of communication between City Engineer and all team members to assure that all project needs are addressed.
- ***Constructability Review:*** The plans will be reviewed at all project milestones to determine if the proposed designs are safe and provide adequate consideration to constructability and value engineering.
- ***Accuracy/Completeness:*** The plans will be reviewed to identify any drafting and design discrepancies and to verify that the plans are complying with the respective design manuals. Construction quantities will be tabulated by several individuals to verify accuracy. The plans will also be reviewed to assure that all bid items are accounted for.
- ***Design Schedules:*** Schedules will be developed for the design phase of the project in order to complete the project design in a timely manner.

The success of the STIG Team's QA/QC Program is that it incorporates the five founding criteria in a three-level review process. Prior to each submittal, the plans will first be reviewed on the production level. Technicians and draftsmen will review one another's work. The second level of review will be done by the Project Engineers and Assistant Engineers. A full set of plans will be reviewed by each of the Engineers and Assistant Engineers working on the project. They will cross reference each other's comments and redlines prior to revisions. The final level of review is by the Project Manager, Deputy Project Manager, and QA/QC Manager. They also will cross reference each other's comments and redlines prior to revisions. Throughout the QA/QC Process, the design and consideration of utility design will be closely looked at to minimize conflicts. The STIG Team will coordinate internally to assure the most feasible solution is used for all conflicts, whether it be a design change or having to design a utility relocate. The design and construction schedule of the utility companies will be considered in the overall project schedule and traffic control plans will include providing safe work zones for utility adjustments. The STIG Team has demonstrated its ability to provide excellent, innovative, cost-saving engineering and design services in a timely manner. The overall commitment that the STIG Team provides to the project is unsurpassed. Attention to detail and rapid response to issues is a staple of the STIG Team Philosophy. The STIG Team has an excellent track record for successful projects and extremely satisfied clients.

Experience:

PROJECT 1: ALBERTA RD RECONSTRUCTION: The purpose of the project was to reconstruct Alberta Rd. from West City Limits to ¼ mile East of Jackson Rd. STIG Developed the PS&E for widening to 57' B-B Roadway to include 4' bike lanes. The project consisted of widening with no Right of Way to be taken. Value Engineering was also implemented to the project. Working with staff and contractor to redesign roadway to a four-lane roadway with 8' hike and bike lane

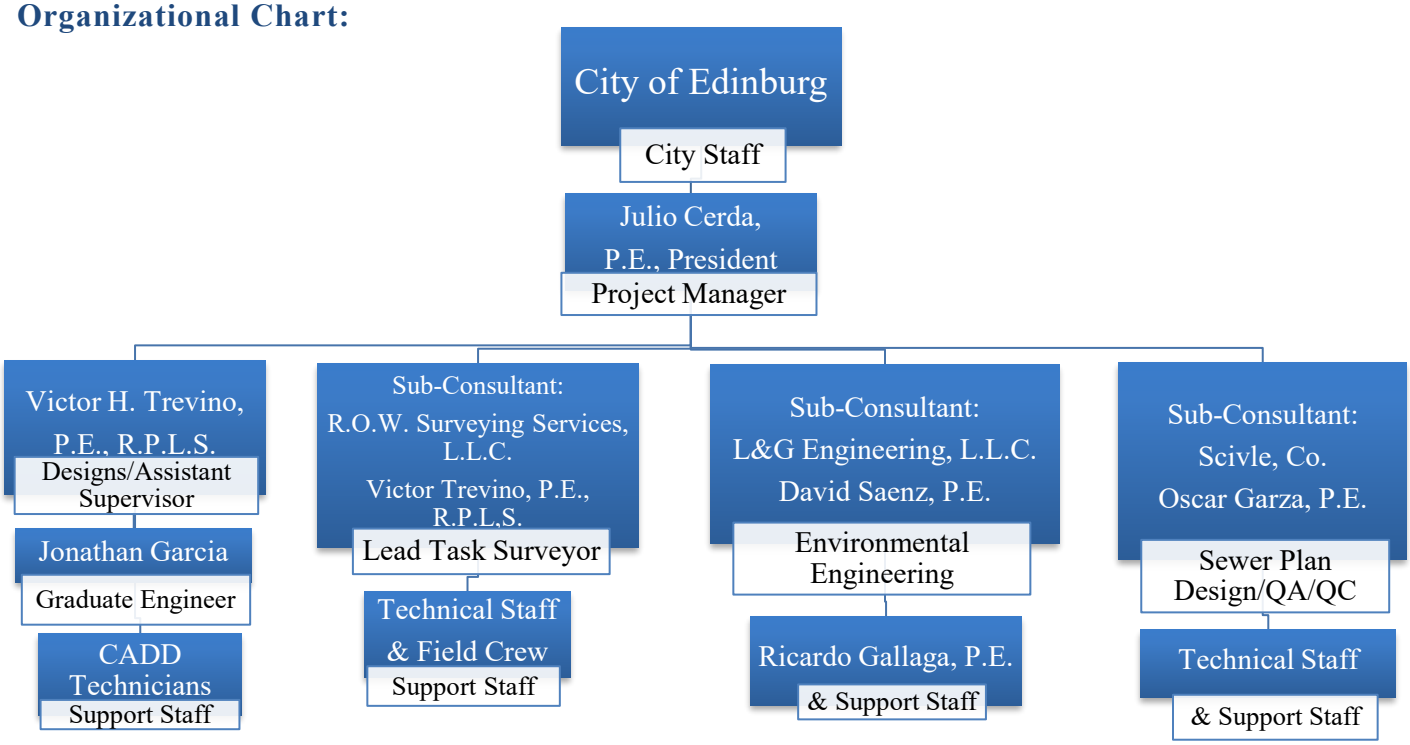
PROJECT SCOPE: STIG (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Design tasks included Design horizontal, vertical Alignment traffic, hydrology and hydraulics.

Project Manager:	Julio Cerda, P.E.
Project Completion:	Design Complete/ Const. On going
Construction Cost:	$3,017,905.20
Engineering Fee:	$325,000.00
Owner's Name:	City of Edinburg
Owner's Representative:	Mardoqueo Hinojosa P.E.
Representative's Phone #:	(956)388-1895
Representative's Email:	mhinojosa@cityofedinburg.com

Project Manager:	Julio Cerda, P.E.
Facility Size:	6.5 Miles
Project Completion:	Design Complete/ Const. On going
Construction Cost Estimate:	$11,380,950
Owner's Name:	Hidalgo County Drainage District No. 1
Owner's Representative:	Raul Sesin, P.E.
Representative's Address:	902 N. Doolittle Road Edinburg, Texas 78542
Representative's Phone #:	(956) 292-7080

PROJECT 2: MILE 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station.

PROJECT SCOPE: STIG (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Duties included contract management, QA/QC, construction phase services and local letting. Design tasks included hydraulic design, hydrologic modeling system (HEC-HMS), horizontal and vertical alignment, drain typical section, design cross-sections and storm water pollution prevention.



PROJECT 3: ELM DRAINAGE PROJECT CITY OF MISSION: This Project consisted of upgrading the existing storm sewer system by upsizing the existing storm drain pipes, adding new storm drain pipes and channel improvements.

PROJECT SCOPE: STIG (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Duties included contract management, QA/QC, construction phase services and local letting. Design tasks included storm drainage design. Provided drainage area map, hydrologic data, hydraulic data sheet, and horizontal and vertical alignments for the storm drain improvements.

Project Manager:	Julio Cerda, P.E.
Project Completion:	Design Complete/ Const. On going
Construction Cost:	$ TBD
Engineering Fee:	$ TBD
Owner's Name:	City of Mission
Owner's Representative:	JP Terrarzas, P.E.
Representative's Address:	1201 E. 8th St. Mission, Texas 78572
Representative's Phone #:	(956) 585-3275
Email Address:	jpterrazas@missiontx.us

TEAM MEMBER QUALIFICATION AND EXPERIENCE:

Organizational Chart:

Summary Paragraph

The project work to be performed with South Texas Infrastructure Group will be as follows:

Mr. Cerda will be in charge as a Project Manager, and will execute QC/QA. Mr. Trevino will be performing all surveys requested by STIG and will execute the QC/QA for any survey done by or for the City of Edinburg. Mr. Garza will execute the QC/QA for any engineering done by or for the project. Mr. Saenz will be performing all Environmental Engineering services requested by STIG. Mr. Trevino will be the design engineer for all street and utilities and land development projects.

Familiarity with Geographical Area

The STIG Team has the expertise, diversity, knowledge, and experience needed to handle public improvement projects. The Team has successfully completed numerous public improvement projects; therefore, our team is aware and up to date on the latest ordinances, standards, codes, regulations and requirements that are critical to a projects' success. The following is a listing of some of those standards and criteria:

NEPA Process, Army Corp of Engineer Permit Regulations, Federal Highway Administration Policies, FEMA – Flood Insurance Maps & Regulations, TxDOT Design Standards and Policies (Roadway, Hydraulics, Bridge, Traffic Operations), AASHTO Design Standards, Texas Commission on Environmental Quality (TCEQ), National Pollutant Discharge Elimination System (NPDES), and Institute of Transportation Engineers Traffic Design Manuals.

Ability to Commence Services Immediately

The STIG Team professionals, technical resources, and staff available for this endeavor are summarized below:

STAFF AVAILABILITY

Firm Name	Team Member	Task Leader Role/Responsibility	% Current Commitments	% Project Availability
South Texas Infrastructure Group, L.L.C. 900 S. Stewart Rd. Ste. 13 (STIG) Mission, TX 78572	Julio Cerda, P.E.	Senior Project Manager	30%	70%
	Victor Treviño, P.E., R.P.L.S.	Design	20%	80%
R.O.W. Surveying Services, L.L.C. (ROW) 900 S, Stewart Rd. Ste. 13 Mission, TX 78572	Victor Treviño, P.E., R.P.L.S.	Surveying Task Leader	35%	65%
L&G Engineering, L.L.C. (LGE) 900 S. Stewart Road, Suite 5 Mission, TX 78572	David Saenz, P.E.	Environmental Engineering	40%	60%
Scivle, CO. 2416 Buddy Owens Blvd. McAllen, Texas 78504	Oscar Garza, P.E.	Engineering	40%	60%

Team Task Leaders

Julio Cerda, P.E. (STIG) will serve as the project manager and will liaise directly with the City of Edinburg and the remainder of the STIG/ROWSS/LGE/SCIVLE leadership team. Mr. Cerda's commitment to client service and excellent communication has allowed STIG to maintain a constant client base throughout the Rio Grande Valley.

Victor Trevino, P.E., R.P.L.S. (STIG) has over 12 years of experience in engineering design in the transportation and development industry. Victor assisted Mr. Cerda on the delineation of drainage areas and in the H&H Modeling on Project 22 (Mile 11 N. & FM 1015-2018 Bond Referendum Project #22). He also has experience in management, design, street and utilities and land development projects. His experience includes developing construction plans for approval by the engineer, platting and permitting and managing construction projects.

Victor Trevino, P.E., R.P.L.S. (ROWSS) will be responsible for the direction of survey technicians and field crew and execute QA/QC for any survey done for the project. Mr. Trevino has more than 12 years of experience in professional surveying experience with vertical and horizontal control, topography, cross sections, photogrammetric ground control, boundary surveys and construction layout. This position includes performance of route surveys, boundary surveys, platting, topographic mapping, construction staking, providing quality control, direction field crews and office technicians, budgeting, scheduling, project management and client development.

David Saenz, P.E. (LGE) will serve as the Environmental Engineer for the City of Edinburg Project. Mr. Saenz is available to work immediately and see the project to a successful completion by working with the City of Edinburg staff. He will meet with the STIG and City's staff as needed to discuss environmental reports for the project

Oscar Garza, P.E. (SCIVLE) and his staff will assist with the QA/QC and sewer plan design for this project. Mr. Garza has 14 years of engineering experience with various engineering firms in Texas. His firm has experience and is familiar with local municipal and state regulations required for engineering projects.

YEARS OF EXPERIENCE

Civil Engineering Design Public Works (27+ years)

Mr. Cerda has over 27 years of experience in the design and management of various public improvement projects. For eight years Julio served as City Manager for the City of Mission overseeing the operations of the City Engineer and Public Works Director. He has previously worked as a City Engineer for the City of Mission and previous to that for the City of Harlingen. In between working for these cities, he worked as the Asst. Cameron County Engineer overseeing several drainage and roadway projects. Previous to all, he worked for the Texas Department of Transportation as a design engineer. With positions of head of departments in all of these entities provided him with excellent hands on experience with government projects. Julio has been able to take his work experience and utilize it to provide effective engineering services. Furthermore, Julio has worked extensively on the detailed design and development of numerous roadway and drainage projects. He has designed and developed roadway geometrics, traffic control plans, Storm Water Pollution Prevention Plans (SW3P), signing and pavement marking layouts, culvert and storm sewers, general notes, estimates and specifications and coordinated adjustments of conflicting utilities. Julio is also very familiar with Texas Department of Transportation, Federal Highway Administration, Hidalgo County and AASHTO regulations and design criteria. Julio also has extensive experience coordinating with utilities and local irrigation and drainage districts in Hidalgo County.

PROJECT EXPERIENCE

Alberta Rd. Reconstruction (City of Edinburg): This project consisted of reconstructing Alberta Rd from West City Limits to ¼ Mile East of Jackson RD. (Julio Cerda, P.E.) served as the Project & Design Manager for this project. STIG developed the PS& E for widening the 49'B-B Roadway to include sidewalks with no Right of Way to be taken. Duties included contract management, QA/QC, construction phase services and local letting. Duties included design task included hydraulic design, horizontal and vertical alignment and traffic.

ELM Drainage Project (City of Mission): This Project consisted of upgrading the existing storm sewer system by upsizing the existing storm drain pipes, adding new storm drain pipes and channel improvements. (Julio Cerda, P.E.) served as Project & Design Manager for this project. Duties included contract management, QA/QC, construction phase services and local letting. Design tasks included storm drainage design. Provided drainage area map, hydrologic data, hydraulic data sheet, and horizontal and vertical alignments for the storm drain improvements.

Mile 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station. Project Scope: STIG (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Duties included contract management, QA/QC, construction phase services and local letting. Design tasks included hydraulic design, hydrologic modeling system (HEC-HMS), horizontal and vertical alignment, drain typical section, design cross-sections and storm water pollution prevention.

SH 4, SH 48 @ FM 511 Intersection (TxDOT Pharr District CSJ:1504-01-031): This project consisted of the reconstruction of the major intersections from Veterans International Bridge to Port of Brownsville. Being an overweight corridor for the Mexican trucks to the Port of Brownsville, Mr. Cerda designed the intersections to the 100k to 125k trucks and trailers into the Port of Brownsville. The design and development consisted of grading, storm sewer structures, lime treated subgrade, asphaltic concrete pavement, concrete pavement, curb and gutter, roadway signage, and pavement markings. Mr. Cerda was responsible for the design and development of the roadway plans, specifications, and estimate. During the construction phase, Mr. Cerda provided the guidance to the chief inspector and contractor as the project engineer.

YEARS OF EXPERIENCE

---

12 years

Mr. Treviño has over 12 years of experience in management, design, street and utilities and land development projects. His experience includes developing construction plans for approval by the engineer, platting and permitting and managing construction projects. Mr. Treviño has worked as a project designer in new subdivisions for developers, calculating storm water detention and pipe sizes, designing water distribution, wastewater collection systems, street and roadway development, cost estimates, and cost-efficient recommendations.

PROJECT EXPERIENCE

Alberta Rd. Reconstruction (City of Edinburg): This project consisted of reconstructing Alberta Rd from West City Limits to ¼ Mile East of Jackson RD. (Victor Trevino, P.E.) served as the Project Engineer for this project. Mr. Trevino developed the PS& E for widening the 49'B-B Roadway to include sidewalks with no Right of Way to be taken. Duties included design task included hydraulic design, horizontal and vertical alignment and traffic.

Mile 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station. Project Scope: STIG (Victor Trevino, P.E.) served as the Project Engineer for this project. Duties included design tasks included hydraulic design, hydrologic modeling system (HEC-HMS), horizontal and vertical alignment, drain typical section, design cross-sections and storm water pollution prevention.

ELM Drainage Project (City of Mission): This Project consisted of upgrading the existing storm sewer system by upsizing the existing storm drain pipes, adding new storm drain pipes and channel improvements. (Victor Trevino, P.E.) served as Project Engineer for this project. Design tasks included storm drainage design. Provided drainage area map, hydrologic data, hydraulic data sheet, and horizontal and vertical alignments for the storm drain improvements.

Inspiration Rd Water and Sewer Adjustments (City of Mission): This project consisted on the relocation of water lines and sewer lines being in conflict with the expansion of Inspiration Rd. The project consisted on the relocation of 10,500 LF of 12" water line, 1,700 LF of 8" waterline, 2,300 LF of 16" sewer force main, 590 LF of 12" sewer force main and 600 LF of 10" sewer force main. The purpose of this project is to have water and sewer cleared for the reconstruction of Inspiration Rd. All of the design was developed so that it worked with the proposed street and drainage plans developed by L&G Engineering. Mr. Treviño prepared sanitary sewer plans, force main plans, water lines plans, profiles and details for the engineer.

RCW Subdivision Drainage Improvements: This project consisted grading ditches, installing storm sewer; driveway pipes and safety end treatments. Project Scope: (Victor Trevino, P.E.) served as the Project Engineer for this project. Design tasks included storm drainage design for RCW Subdivision. Provided drainage area map, hydrologic data, hydraulic data sheet, and horizontal and vertical alignments for the storm drain improvements.

Jonathan Garcia, Graduate Engineer

EDUCATION

University of Texas Rio Grande Valley – Edinburg, TX

Bachelors Degree -Civil Engineering Year 2016

YEARS OF EXPERIENCE

8+ Years

Mr. Garcia has 8+ years of experience as a Graduate Engineer in the civil infrastructure area in project that vary from residential & commercial developments to roadways & utilities locate. Mr. Garcia is knowledgeable in all aspects of surveying including CADD software design, preparing legal descriptions, problem-solving, and research.

Project Experience:

Mayfair Residential Subdivision, Mission Texas. Assist Professional Engineer in the development of an 83 Lots Residential Subdivision located in the City of Mission, Texas. The duties involved vary from collecting topographic information, deed research, preliminary design for map layout, design utilities according to the City of Mission design parameters, calculate construction estimates, coordinate construction with the contractor, recording of the documents such as easements, boundaries and final plat.

Carrizales Residential Subdivision, Mission Texas. Assist Professional Engineer in the development of an 48 Lots Residential Subdivision located in the City of Mission, Texas, ETJ. The duties involved vary from collecting topographic information, deed research, preliminary design for map layout, design utilities according to the City of Mission design parameters, calculate construction estimates, coordinate construction with the contractor, recording of the documents such as easements, boundaries and final plat.

Palo Alto Residence Phase 1 & 2 Residential Subdivision, Brownsville Texas. Assist Professional Engineer in the development of an 124 Lots Residential Subdivision located in the City of Brownsville, Texas. The duties involved vary from collecting topographic information, deed research, preliminary design for map layout, design utilities according to the City of Brownsville design parameters, calculate construction estimates, coordinate construction with the contractor, recording of the documents such as easements, boundaries and final plat.

FM 1925 Road (10th Street to McColl Road) San Benito, Texas. Survey Technician responsible for deed research, abstract maps, sketch 38 parcels plats, parent tract, metes and bounds descriptions & closure report.

US 77 83 South Parallel Corridor (FM 2520-FM 1577), San Benito, Texas. Survey Technician responsible for deed research, abstract maps, sketch 45 parcels plats, parent tract, metes and bounds descriptions & closure report.

Taylor Rd Water and Sewer Adjustments, McAllen, Texas. Assist in the relocation of Water & Sewer Utilities. Duties involved vary from locate Utility companies for information of the existing utilities, collect & process topographic information, mapping of the existing conditions, design the proposed improvements, sketch the construction sheets and calculate the estimate the construction cost.

VICTOR TREVINO, P.E., R.P.L.S.

PROJECTS:

Inspiration Rd/Military Pkway: This Project consist of field surveys for engineering from US 83 to Military Pkway. Responsible for right-of-way retracement of approximately 4.46 miles of highway. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for this project.

Mile 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station. **Project Scope:** STIG (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for this project. Duties included establishing benchmark identifications and tie into approved USGSSSS, FEMA or County Benchmark data; obtain data of existing drainage facilities and/or structures, including size, type, and flowline (upstream & downstream) elevations of structures; obtain profiles of intersecting roadways that cross existing and proposed channels; obtain data for all existing or proposed utilities that may affect the project, including but not limited to water lines, sewer lines, gal lines, telephone lines, cable lines, etc.; obtain flood plain and cross-section (along with appropriate overbank data), and establish reach lengths, as required; primary project control points (horizontal and vertical control points) and secondary control points; and coordinate with various agencies; data collection.

Bus 281 - SH 107 Roadway & Drainage Improvements: (ROW) This Project consist of field surveys for engineering from Courthouse Square to HWY 281/ Existing Outfall to Raul Longoria. Responsible for right-of-way retracement of approximately +/- 1.5 miles roadway / 1.1 Miles Existing Outfall. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for this project.

Mile 10 Road (Mile 6 to SH 1015): (ROW) This Project consist of field surveys for engineering from Mile 6 to SH 1015. Responsible for right-of-way retracement. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for

Local Government Project Procedures (LGPP) / 80823

Years of Experience: 14 years

SCIVLE
a civil engineering co.

Oscar will support analysis and design of drainage and roadway functions for this contract. His background includes hydrology & hydraulics; drainage, roadway, and traffic design; and construction engineering and inspection. He is proficient in roadway design utilizing the latest 3D design and visualization standards per TxDOT and FHWA requirements. He has a high understanding of governing design standards, policies, and manuals that will be pertinent to this contract and codes, including USACE, FEMA, TAC, Rail Road Commission, FAA, TxDOT, TxDOT Drainage Design Manual, and Cameron County Drainage Requirements. Oscar is very experienced in using Watershed Modeling System and HEC-HMS to increase the efficiency of performing hydrologic analyses. He has successfully performed HEC-RAS 1D and 2D Steady/Unsteady state analyses to model and design complex drainage and transportation projects.

Hidalgo County Drainage District No. 1, Faysville Drain - Hidalgo County, TX. **Project Manager and H&H Task Leader.** Oscar performed hydrologic analysis, hydraulic design, authored a drainage report, performed the final preliminary and final design, and provided construction phase services. Oscar used HEC-HMS and HEC-RAS 1D and 2D Unsteady State modeling components software to complete the hydrologic analysis and hydraulic design components of this project.

TxDOT Pharr District, SH 107 - Hidalgo County, TX. **H&H Task Leader.** The improvements to SH 107 were to widen the roadway from a two-lane rural roadway with four-foot shoulders to a two-lane with eight-foot shoulders and left-turn lanes at the FM 1425 intersection. This project involved the rehabilitation of the existing roadway within the regulatory Floodway East Levee to the West Levee, which presented a significant challenge in drainage design and traffic control. The project was developed under a condensed schedule which required understanding of impacts and implications to schedule. Oscar ensured less than 0.1 AC acres of total impact to JWOTUS to ensure use of USACE nationwide permit. For IBWC approval of the project, Oscar was challenged to meet “no rise” design criteria in the ultimate build condition at the 100 yr Storm event (post construction) as well as in the interim condition (during phased construction). The “no rise” design was achieved by balancing cut and fill within the regulatory floodway and adjusting for impacts to 100 yr flow (weir flow at overtopping + culvert flow) caused by changing culvert and roadway geometry and configuration. Utilizing the latest USACE produced model to calibrate the existing condition, Oscar used HEC-RAS 1D and 2D Unsteady State and HY-8 to complete the hydrologic analysis and hydraulic design components of this project, respectively.

TxDOT Pharr District, US 281 Segment 1: SH 186 to FM 490- Edinburg, TX. **Project Manager.** Oscar served as PM for this project & led the schematic refinement task & design of roadway & bridge geometrics. With a construction cost estimate of over $190M, this project required an Initial Financial Plan (IFP), Value Engineering (VE) Study, a Risk Workshop, and a Risk Based Construction Cost Estimate (RBCCE). Oscar managed subconsultant progress, enforced the QA/QC plan, executed QA protocols of all subconsultant-produced work, developed the (IFP) and in partnership with DES, performed annual updates to evaluate the project’s health & tracked potential risks against milestone completion dates. Oscar used Bentley’s OpenRoads Designer 3D to develop all proposed geometrics & comprehensive 3D models (ultimate build & TCP model). Using OpenRoads Connect Edition & ProjectWise, Oscar implemented a risk-based iterative roadway & hydraulic design approach. The final design was assessed to determine the existing & post-construction impacts on the 100-year floodplain. The delta file transfer component & dynamic 3D modeling (dynamic updates of focused geometric changes) allowed Oscar & his drainage TL to finalize geometrics & the 3D model while allowing all other TLs to continue working on detailed design. By implementing this hydraulic design approach, Oscar optimized the environmentally cleared ROW footprint without sacrificing the serviceability of the proposed facilities, saving TxDOT the time & cost that would have been incurred to add ROW for detention & executing

an EA re-evaluation. To facilitate TxDOT and FEMA approval, Oscar used HEC-RAS 2D analysis (Rain on Grid) to develop pre and post construction inundation mapping to quantify floodplain impacts and demonstrate an acceptable risk-based design at the 100-yr storm event within the floodplain.

City of Edinburg, Alberta Road - Edinburg, TX. Project Manager & H&H Task Lead. **Project Manager and H&H Task Lead.** KCI provided PS&E to reconstruct and widen a two-lane rural roadway segment to an urban boulevard curb and gutter section that includes four thru lanes with a raised median, pedestrian and bicycle facilities, and a closed system storm sewer. Plans included typical sections, earthwork, general notes, roadway and storm sewer plan and profile sheets, outfall plan and profile, traffic control layouts and details, intersection improvements, traffic signal design, signing and pavement markings and details, environmental permits, and SWPPP layouts. This project was fiscally constrained under the City of Edinburg bond program, requiring a considerable Value Engineering effort pre-bid and post-award in partnership with the successful contractor. Value Engineering measures incorporated into this project resulted in decreased lane width, which lowered roadway costs by avoiding the removal and replacement of eight traffic signal poles and a signal controller and consolidation of pedestrian and bicycle facilities decreased the roadway width (on-street bicycle facilities) to minimize conflicts with compensable utilities and reduce impervious areas. Both major VE design changes allowed for reduced design peak flow to the storm drain system and outfall structure, which in turn allowed Oscar to reduce structure sizes and the number of curb inlets; further reducing construction cost and schedule. Oscar utilized HEC-HMS for the hydrologic analysis and GeoPAK Drainage and HEC-RAS 1D for the analysis and design of the storm sewer system and outfall, respectively.

Professional Engineer, State of Texas, 2008, #102365
Certified Floodplain Manager, FEMA, 2011, Certification # 2205 11N
TxDOT Pre-Certified Categories – 3.1.1, 3.2.1, 3.3.1, 3.4.1, 3.5.1, 4.1.1, 4.2.1, 4.3.1, 5.1.1, 8.1.1, 10.2.1, 10.5.1, 11.1.1, 12.1.2, 14.1.1, 14.2.1, 14.3.1, 14.4.1

PROFESSIONAL EXPERIENCE

- **Project Manager/Engineer**, L&G Consulting Engineers, Inc. (L&G) Dec. 2008 – Present
- Engineering Assistant, L&G Consulting Engineers, Inc. (L&G) Nov. 2007 – Dec. 2008
- Engineering Assistant, Texas Dept. of Transportation – Pharr District Jan. 2004 – Nov. 2007

Mr. Saenz's post graduate engineering career begin at the Texas Department of Transportation (TxDOT) in the Pharr District Bridge Section working primarily in bridge review, bridge management, structural design and PS&E design. Under Bridge Review, he provided QC/QA of bridge geometry, bridge details and bridge design for many large scale expressway projects including US 83, US 281, and US 77/83 projects. Under Bridge and Structural Design, he provided design & details for various bridge types including slab & box beam bridges, I-beam bridges and girder bridges.

At L&G Engineering, Mr. Saenz works in a dual role providing a general **Project Engineer** role for L&G Engineering with responsibilities in planning, designing and project development of roadway and bridge geometrics, cross sections, hydrologic & hydraulic analyses, schematics, bridge designing and detailing, structural analyses, geotechnical analyses, project construction cost estimates and scheduling, general notes and bidding documents. His primary duties in this position are bridge geometrics/design, retaining wall geometrics/design, structural geotechnical projects, pavement design projects and hydraulic analyses for bridge design. Mr. Saenz also serves as the **Laboratory Engineer of Record/Geotechnical/Construction Material Testing (CMT) Engineer**. In this position Mr. Saenz is responsible for all engineering, geotechnical and construction material testing (CMT) laboratory projects in addition to the managing of various aspects of the engineering laboratory. His duties also include overseeing personnel during the development and subsequent completion of L&G projects and providing QC/QA (L&G Quality Control Director) for all laboratory testing procedures (verifying laboratory compliance with ASTM, AASHTO, ACI, TAPA and TxDOT testing requirements as specified by project). He is responsible for the review of all commercial/governmental CMT reports produced by L&G. Additionally; Mr. Saenz typically serves in the lead design role with the development and analyses of Geotechnical Studies and Recommendations for various clients. Mr. Saenz has a wealth of hands-on experience in soil classification, soil testing, and concrete field and lab testing. He has completed over 125 Geotechnical Studies in South & Central Texas including over 50 Transportation Facilities.

PROJECT EXPERIENCE (Major Projects in the Area of Geotechnical Engineering & CMT)

- Hidalgo County and DHS Levee Re-Construction and Floodwall Project
- USIBWC Lower RGV Interior Flood Control System Projects
- HCRMA SH 365 Segment I/II/III & IBTC Project
- FM 396 Anzalduas Extension and US 83/FM 396 Project (Anzalduas International Corridor)
- US 77 Project and SH 550 Project (Controlled Access Facilities – Expressway Type) (2 Projects)
- US 83 Expressway at Inspiration Rd. Project (Geotechnical Engineering for Bridge/Ret. Walls/Pavement)
- CCRMA – SPI 2nd Access Bridge Project (Geotechnical Engineering and Pavement Designs)
- CCRMA – SH 550 Toll Project (Geotechnical Engineering and CMT)
- Hidalgo County Drainage District No. 1 – Raymondville Drain Project (Hidalgo and Willacy Co.)
- Petroleum Company Site Projects – Central Processing Facilities, Oil Handling Facilities and Tank Fields
- L&G Geo/CMT Projects – Commercial Geotechnical Work (Building Foundations & Site Work)

L&G Consulting Engineers, Inc.

Ricardo S. Gallaga, Jr., P.E.

EDUCATION

Texas A&I University at Kingsville, Bachelor of Science in Civil Engineering, 1984

PROFESSIONAL REGISTRATION

Professional Engineer in the State of Texas since 1990, Serial No. 67612
Local Government Project Procedures Qualification for TxDOT (LGPP)

PROFESSIONAL EXPERIENCE

L&G Eng. / L&G Eng. Lab., **Sr. Project Manager and Sr. Construction Eng.**	2012 – Present
TxDOT, Assistant Area Engineer (San Benito - Pharr District)	1993 – 2012
TxDOT, Design Engineer (Pharr District, Pharr Area Office)	1990 – 1993
TxDOT, Construction EIT/Inspector (Tarrant Cnty Const, Ft Worth District)	1984 – 1990

Mr. Gallaga has over 28 years of experience in the public sector (beginning his career and working with TxDOT until retirement in 2012 and subsequently joining L&G Consulting Engineers, Inc. (L&G) (including L&G Lab). Mr. Gallaga brings a wealth of knowledge and experience in general transportation infrastructure projects with an emphasis in the fields of Construction Engineering including construction development, oversight, inspection, management, contract administration and scheduling. As the San Benito Area Office Assistant Area Engineer, he oversaw and was directly responsible for all of the Area Office construction projects which included the expansion of the major corridors (US 77 and US 83) during a time noted as the District's and San Benito Area Office's heaviest workload period since inception. Mr. Gallaga's experience in the field of Construction Engineering stems from his time as a Construction EIT/Inspector, and Assistant Area Engineer (over 25 years). As the Assistant Area Engineer with TxDOT San Benito Area Office, he was directly in charge of many large scale projects including the US 77 / US 83 Interchange project and all of US 77/US 83 construction projects from Harlingen to Brownsville Los Tomates Bridge. He was also directly in charge of the US 83 construction expansion from US 77 / US 83 Interchange in Harlingen to Cameron/Hidalgo County Line. Mr. Gallaga is also highly cognizant of the necessary oversight requirements of Geotechnical Testing (GEO) & Construction Material Testing (CMT) programs for construction and has personally overseen testing to ensure compliance with project specifications. At L&G Engineering, Mr. Gallaga serves as the **Senior Project Manager & Senior Construction Engineer**. Mr. Gallaga also provides QA/QC for testing and laboratory oversight.

IN THE AREA OF CONTRACT ADMINISTRATION: Mr. Gallaga was responsible for oversight of the San Benito Area Office construction program during the expansion of two primary Expressway corridors (US 83, US 77). Other projects included added capacity projects, off-system bridge projects, seal coat and overlays projects as well as various and miscellaneous project types. During this period, he participated in the resolution of disputes and claims associated with various construction issues. He has an extreme understating of necessary requirements to formally process field change orders as necessary and provide overall documentation requirements.

IN THE AREA OF CONSTRUCTION MANAGEMENT / ENGINEERING / INSPECTION: Mr. Gallaga was responsible for the day to day project activities and requirements as well as the management of various types of projects as the Assistant Area Engineer in the TxDOT San Benito Area Office. He is well versed in the requirements of transportation infrastructure construction projects and can provide insight in to potential pitfalls that can be attributed to construction scheduling issues and conflicts. He has coordinated work with various local and state to ensured Contractor compliance with contract documents. He has verified and approved shop drawings for construction.

PROJECT EXPERIENCE (Major Projects in the Area of Geotechnical Engineering, CMT & CEI)

- US 83 Expressway from Hid/Cam Cnty Line to Brownsville, TX
- US 77 Expressway from Cameron/Willacy Cnty Line to North of Raymondville TX
- US 77 Expressway and US 83 Expressway Interchange in Harlingen, TX
- SH 100 from US 77/83 Expressway to Laguna Vista
- SH 550 from US 77 to SH 48

City of Edinburg
Attn: Mardoqueo Hinojosa, City Engineer
415 W. University Drive
Edinburg, TX 78539

Dear Mr. Hinojosa,

Thank you for the opportunity to submit our Request for Qualifications for Professional Engineering Services with the City of Edinburg. SWG Engineering, LLC (SWG) is honored to present a dedicated team focused on providing innovative, dependable, and cost-effective infrastructure solutions while supporting the City's long-term goals.

SWG Engineering, LLC (SWG) has provided engineering services in the South Texas Region, with extensive projects since its establishment as a corporation in 1945. Throughout the 81 years in engineering, all SWG Professional Engineers are licensed and active with state licensing requirements, education, and professional experience to provide a wide range of engineering services that uphold our sound principles and practices. SWG maintains the required general liability insurance and active registration certificate with **SAM.GOV** and the Texas Board of Professional Engineers and Land Surveyors to abide by the state rules and regulations. SWG is a full-service Civil, Land Development, Environmental, Water Resources, Water and Wastewater Infrastructure. Our clients include the public and private sectors, and our projects span numerous communities.

Our experience includes planning, surveying, design, permitting, construction administration, feasibility studies, and project management for municipalities and utility districts across the Rio Grande Valley. We have successfully supported clients in securing funding through **USDA, TWDB, GLO**, and **NADBANK/BECC** programs, and we understand the complexities of preparing plans, specifications, and reports that meet funding and regulatory requirements.

With a skilled team, extensive regional experience, and the resources to deliver dependable results, SWG is well prepared to support the City of Edinburg in strengthening its infrastructure. We welcome the opportunity to further discuss our qualifications and look forward to the possibility of partnering with the city on this important project.

Sincerely,

Randall C. Winston, P.E. / President

E-mail: randy@swgeng.com

3.) Names of principals in the firm, years firm has been in business and size of firm:

Principals: Randall C. Winston, P.E./President, Joseph B. Winston, P.E./RPLS, and Jacob Castaneda, P.E./CFM

Years in business: 81 Years

Size: 13 (1 PEs, 1 P.E./RPLS, 1 P.E./CFM, 1 EIT's, 3 AutoCAD 2022 Drafters/GIS Specialist, 4 Administrative Staff, 1 Survey Field Personnel, and 1 Project Inspectors)

4.) Listing of all pending litigation or malpractice insurance against or involving the firm or its agents or employers with respect to any work performed; any relationship with City/County employee, officer, City/County Council, or committee member:

None

5.) Amount of professional liability insurance coverage carried by your firm:

SWG Engineering, LLC maintains a professional liability insurance in the amount of $1,000,000.00

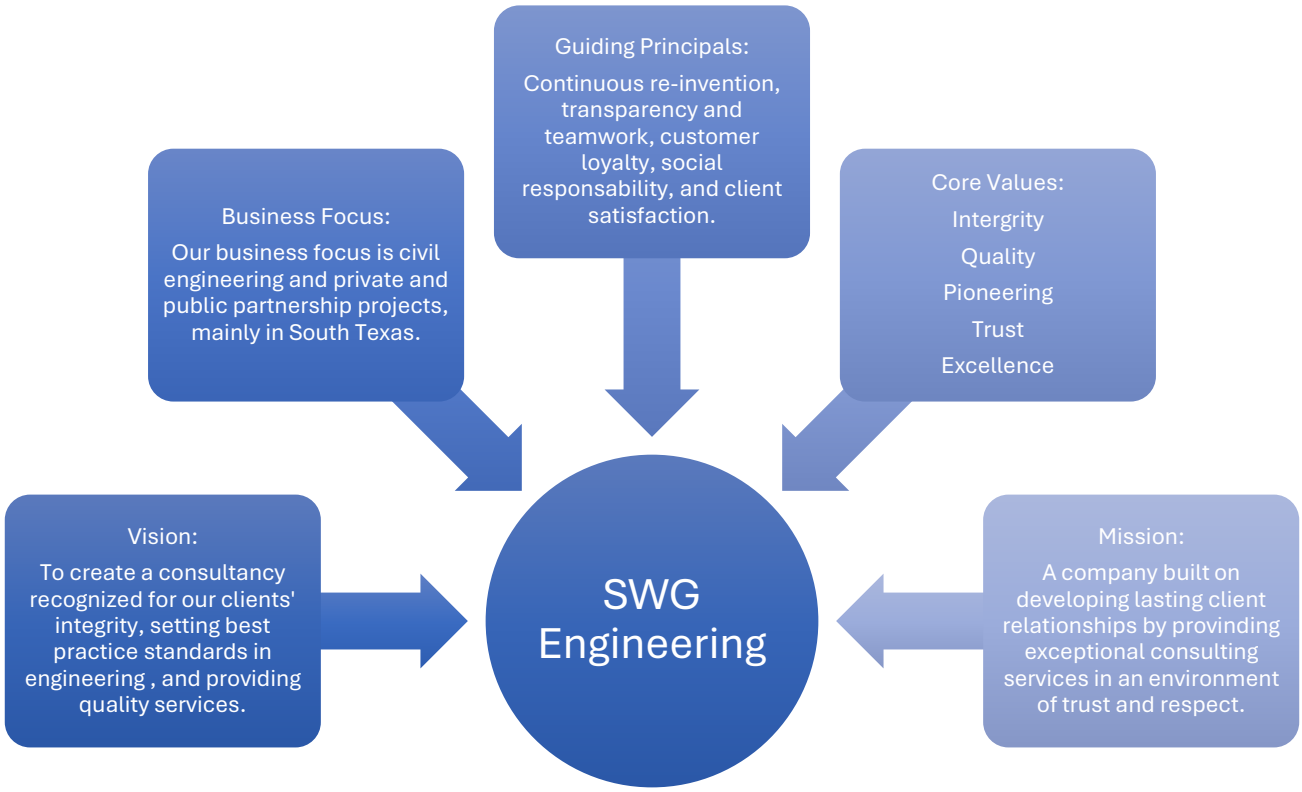
6.) Name and phone number of person to contact at the banking institution where firm does business, and list default on loan or finance agreements:

Texas National Bank
Edna R. Martinez
(956) 903-4007

Default on loan or finance agreements: N/A

7.) Disciplines of consultants for the proposed project:

SWG Engineering – Civil Engineering, Environmental Engineering, Water Resources Engineering, Construction Engineering & Inspection, Surveying, Construction Administration, Grant Writing, and Funding Procurement



8.) Commitment of the firm, assigned project staff, and current workload of staff that would be responsible for the project:

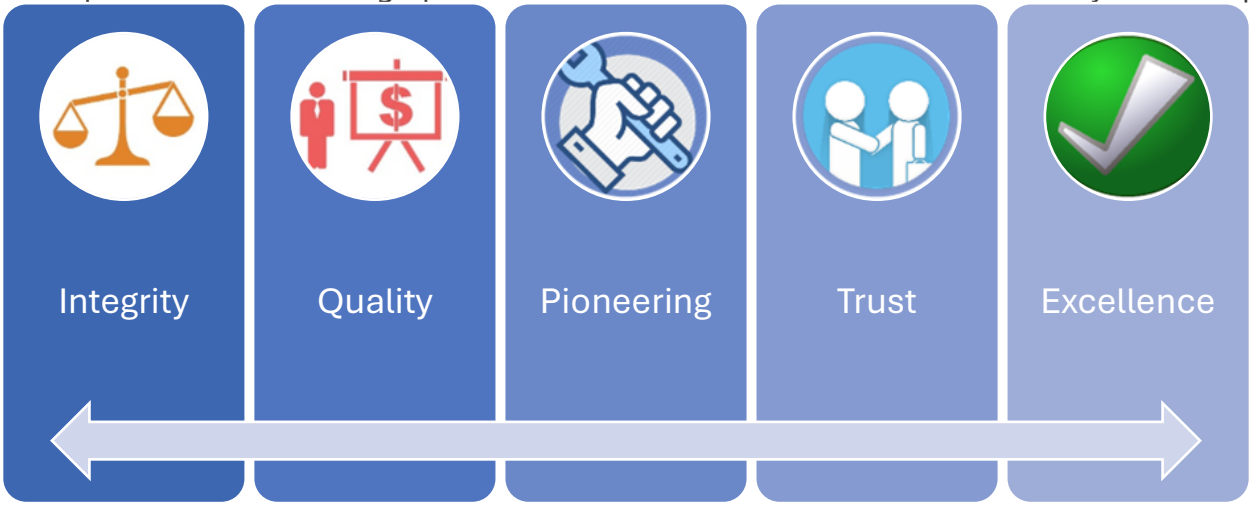
SWG Project Staff included in the Project Chart in the RFQ would be allocated 75% of their time and effort to this project and is committed to the delivery of timely results. Also, SWG has sufficient personnel in the firm to provide back-up for the assigned project staff to be on hand if required.

Project team lead would be Mr. Randy C. Winston, P.E. with project staff such as: Project Engineers, EIT's, and Engineer Inspectors on hand to provide project oversight and consulting as needed.

9.) Firm's purpose:

Our firm's philosophy is simple; we always strive to provide our clients with unparalleled consulting services by putting our clients' interest first. We work closely with our clients to identify the objectives of the project and assemble a team of highly qualified professionals to meet those needs.

Organization Profile



SWG ENGINEERING, LLC has taken a leadership role in providing quality engineering answers in the Valley through our greatest resource – a dedicated and talented staff. Leadership begins with the principals, who are all Texas-registered professional engineers. Our work speaks for itself as 80 percent of our business is from repeat clients.

Our firm's philosophy is simple, *we always strive to provide our clients with unparalleled consulting services by putting our clients' interest first.* We work closely with our clients to identify the objectives of the project and assemble a team of highly qualified professionals to meet those needs. SWG strives to be more than an engineer to our client. We are trusted partners and consultants. Our firm's principles are based on efficiency, quality and **unmatched customer service**. We envision cost-effective engineering design concepts without compromising on quality. SWG Engineering is committed to our clients' success. Our experience, combined with our advanced technical support, provides us with the unique ability to expedite the planning and design phase before the actual construction.

As a pioneer of engineering in the Rio Grande Valley, we have continually invested time and money in charitable and public-spirited activities within our community to ensure we contribute to the Valley's continued growth and development of future engineers.

OUR PRINCIPLES THAT HELP GUIDE OUR ENGINEERING VISION AT SWG

- Continuous re-invention as engineering practices constantly evolve; ensure our team is always working with the latest technologies and tools to empower them and their work.
- SWG prides itself on our transparency and our engineering team. We prioritize providing a space to encourage learning, development, and team collaboration.
- We earn customer loyalty through performance and efficiency.
- We conduct business with social responsibility, reliance on the character, and truth in actions.
- We replicate success through proven solutions, client satisfaction, and industry leadership.

Project Understanding

SWG understands that the City of Edinburg seeks qualified engineering firms to provide professional engineering services on an as-needed basis through its Engineering Services Rotation List. The City's ongoing capital improvements, infrastructure maintenance, utility expansions, drainage improvements, transportation projects, and development review activities require responsive engineering support, technical expertise, and efficient project delivery. SWG is committed to serving as a trusted partner, providing timely, cost-effective, and innovative solutions that support the City's goals while maintaining compliance with local, state, and federal requirements.

Approach to Engineering Services

Task Initiation and Project Development

- Coordinate with City staff to define project objectives, scope, budget, and schedule.
- Perform site evaluations, field investigations, and data collection as required.
- Develop preliminary engineering analyses and planning-level cost estimates.
- Identify permitting requirements and funding opportunities when applicable.
- Provide recommendations to support informed decision-making.

Engineering Design Services

- Prepare engineering studies, reports, plans, specifications, and engineer's estimates.
- Develop design documents consistent with City standards and applicable regulatory requirements.
- Conduct milestone reviews and coordination meetings throughout the design process.
- Coordinate with utility providers, regulatory agencies, and stakeholders.
- Assist with permitting and regulatory approvals.

Bid and Construction Phase Services

- Prepare bid documents and assist the City during procurement.
- Respond to contractor questions and provide addenda as necessary.
- Review contractor submittals, shop drawings, and requests for information.
- Perform construction observation and field inspections.
- Monitor project progress, budget, and schedule compliance.

Project Closeout

- Conduct final inspections and prepare punch lists.
- Review and certify project completion documentation.
- Prepare record drawings and project closeout records.
- Assist the City with final reporting and project acceptance.

Project Management

SWG will provide proactive project management and responsive communication to ensure successful delivery of engineering services.

- Dedicated Project Manager serving as the City's primary point of contact.
- Timely response to City requests and task assignments.
- Regular coordination meetings with City staff.
- Budget monitoring and schedule tracking for assigned work orders.
- Multidisciplinary coordination among internal and external stakeholders.
- Commitment to delivering projects on time and within budget.

Quality Assurance / Quality Control

SWG's quality management procedures are designed to ensure accuracy, consistency, and compliance throughout every assignment.

- Comprehensive QA/QC reviews for all engineering deliverables.
- Multi-level technical review by senior engineering professionals.
- Verification of calculations, plans, specifications, and cost estimates.
- Independent document review prior to submittal.
- Construction inspection documentation and reporting.
- Continuous process improvement based on lessons learned and client feedback.

Firm Qualifications

SWG provides comprehensive engineering services to municipalities throughout South Texas. Our team possesses extensive experience in:

- Street and roadway improvements
- Drainage and stormwater management
- Water distribution systems
- Wastewater collection systems
- Capital improvement programs
- Parks and recreational facilities
- Utility coordination
- Land development review
- Construction administration
- Funding assistance and grant support

Our commitment to responsive service, technical excellence, and efficient project delivery allows us to successfully support municipalities in achieving their infrastructure and development objectives.

Commitment to the City of Edinburg

SWG is prepared to provide responsive, high-quality engineering services across a broad range of disciplines, including transportation, drainage, water and wastewater utilities, streets, parks, municipal facilities, and capital improvement projects. Our team is committed to supporting the City of Edinburg with practical engineering solutions, exceptional client service, and a collaborative approach that helps advance the City's short- and long-term infrastructure goals.

Availability and Commitment

SWG is committed to providing the City of Edinburg with readily available professional engineering support through the Engineering Services Rotation List. Our team has the capacity, resources, and local knowledge necessary to respond quickly to City needs and deliver high-quality engineering services across a broad range of project types and disciplines.

Key Advantages of SWG

- Local and regional municipal experience
- Dedicated project management
- Multidisciplinary engineering expertise
- Proven QA/QC procedures
- Responsive communication and client service
- Successful delivery of public infrastructure projects throughout South Texas

Project Experience

Client: City of Mercedes

Contact: Sergio Zavala, City Manager

Address: 400 S. Ohio Ave, PO Box 837, Mercedes, TX 78570

Phone: 956-565-3114

Date: May 2019 – November 2019

Contract Value: $275,920.00

Project Summary: SWG Engineering, LLC provided engineering services to support the City of Mercedes in improving the performance, reliability, and regulatory compliance of its municipal Water Well System. Our work included evaluating existing well facilities, identifying operational deficiencies, and developing targeted improvements to enhance water production capacity and system resilience.

Key tasks performed:

Well Facility Assessment: Reviewed existing well conditions, pumping equipment, electrical components, and site infrastructure to determine needed upgrades and modernization.

Design of System Improvements: Prepared plans and specifications for rehabilitation of well components, replacement of aging equipment, and improvements to electrical and control systems to ensure dependable operation.

Water Quality & Compliance Enhancements: Coordinated with City staff to address TCEQ requirements, improve sampling and monitoring capabilities, and support long-term regulatory compliance.

Construction Coordination: Assisted during bidding and construction phases, responded to contractor inquiries, and ensured improvements were implemented in accordance with design intent and City standards.

These improvements strengthened the City's water supply reliability, extended the service life of critical well infrastructure, and supported continued delivery of safe, high-quality drinking water to the community.

Client: Union Water Supply Corporation (UWSC)

Contact: Mr. Jorge Bazan, General Manager

Address: 5992 FM 1430, Rio Grande City, TX 78582

Phone: (956) 487-3744

Date: 2021- Present

Contract Value: $28,945,000.00

Project Summary: Design for the construction of the System-Wide Improvements and Rehabilitation, including WTP Expansion and Rehabilitation, River Pump Station Rehabilitation, and Distribution System Upgrades

Union Water Supply Corporation (UWSC) of La Casita-Garciasville, Texas, Starr County acquired funding from USDA in the amount of $30 million dollars for a much-needed water system expansion. This improvement allows for treatment system to expand from the existing 1.5 million gallons per day to 4 million gallons per day. It will also provide for constructing a 250,000-gallon ground storage tank and rehabilitation of the existing river pump structure located on the Rio Grande River. Additionally, the funds will replace the existing 25 miles of outdated 1" to 4" small diameter pipes with more efficient 8" waterlines, which will alleviate the problem of water line breaks in the system. With new waterlines, fire hydrants will be installed to provide fire protection for the community's resident.

SWG assisted UWSC with each step of the grant process, from the earliest scope and budget preparations for application through grant administration. SWG targeted assistance with specific aspects of the funding process, such as conceptual designs, engineering reports to support a proposed project, and summaries of the project's economic development quantitative and qualitative indicators that will positively impact hundreds of residents. Project Deliverables as follow:

- **Waterline Improvements**

Upgrade existing 1-inch thru 4-inch water line to a minimum 6-inch waterline
Placement of fire hydrants for fire protection with the service area
Upgrade existing 6-inch thru 8-inch water transmission lines to 10-inch lines

- **Existing Water Plant Improvements (1.5 MGD)**

Replace the existing claricone (clarifier) with a new claricone (clarifier)
Upgrade filters - Replace filter media and replace possible underdrains
Upgrade the chemical buildings
Upgrade the electrical distribution system

Upgrade the SCADA system

- **Water Storage**

Abandon existing ground steel storage tank
Placement of a new 250,000 gallon concrete ground storage tank

- **Additional Capacity (2.5 MGD)**

Placement of Ultra-Filtration surface source water purification system
Piping from Ultra-Filtration system to storage tank

- **Plant Distribution System**

Upgrade high service pumps to the distribution system
Upgrade transfer pumps from the storage reservoir to the existing plant and the Ultra-Filtration system plant

- **Raw Water Supply**

Upgrade pumps at the River Pump Station
Stabilize River Pump Station Structure on the Rio Grande Banks

Client: City of Ingram
Contact: Ms. Heather Davis, City Secretary
Address: 230 Hwy 39, Ingram, TX 78025
Phone: (830)367-5115
Date: 2009 – 2024
Contract Value: $6,500,000.00
Project Summary:

Phase I SWG was hired by the City of Ingram to procure the funding, design, and provide easement documents for individual lot sewer system connections for 172 residential properties and decommission 172 septic tanks within the city. This provided immediate connections for the residents at no cost to them.

Phase II - SWG prepared a Preliminary Engineering Report in accordance with United States Department of Agricultural Rural Development (USDA RD) and as a result, obtained funding for the design and installation of gravity lines for collection of residential wastewater within the Phase II area, which included 302 connections and two new lift stations, which were installed to re-pump all the wastewater flow. These improvements have made a tremendous improvements on the water quality of the pristine Guadalupe River.

Phase III- SWG is currently assisting the City of Ingram with the third phase of improvements and has an estimated 152 addition connections to be added.

Client: Delta Lake Irrigation District

Contact: Mr. Troy Allen, General Manager

Address: 10370 Charles Green Rd., Edcouch, TX 78538

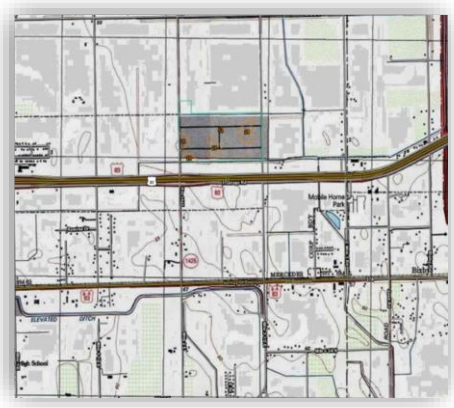
Phone: (956) 262-2101

Date: 2018 – 2023

Contract Value: $3,200,000.00

Project Summary: Canal to Pipeline Conversion of Canal A-20 and Pump Station

For this important project, a grant from the Bureau of Reclamation (BOR) of $1,000,000 was procured by the SWG to aid in the cost of construction.



The project will convert approximately **28,000 linear feet** (~5.3 miles) of deteriorated canal into a modern pipeline system. **This 36"-18" pipeline** will contain flowmeters at strategic points to monitor water flow, and has sluice gates and line gate valves at specific locations to isolate pipeline sections as necessary. Additionally, the main diesel pump station will be deleted and has been designed to be replaces as a **state-of-the art pump station, with VFD controlled twin electric pumps**, which will enable the deletion of 5

total diesel pump stations in the system. The flow meters will also connect to this master pump station, and the entire system will be capable of being monitored and controlled remotely.

The deletion of these diesel pump stations will Significantly lower operation and maintenance costs to the District, while eliminating any contamination from them. Additionally, and the primary reason why the BOR funded the project, the canal conversion to pipeline project is anticipated to save approx. 2,050 acre-feet of water, being **668 million gallons, per year.**

Client: City of Mercedes

Contact: Mr. Alberto Perez, City Manager

Address: 400 S. Ohio Ave., Mercedes, TX 78570

Phone: (956) 565-3114

Date: 2019-2024

Contract Value: $2,160,275.00

Project Summary: Proposed Sanitary Sewer Improvements, Existing Septic Systems Decommissioning, and Proposed Lift Station for Capisallo Terrace Subdivision.

The project site is located approximately 1,000 feet north of the intersection between US 83 Frontage Road and Mile 2 East Road at the proposed site will accommodate for proposed lift station and sanitary sewer line improvements. The site construction for the proposed structure is anticipated to be on a slab-on-grade or on-fill foundation provided expansive, soil-related movements will not impair the performance of the structure. Project will be divided in 4 phases:

Phase 1: Preliminary

Conduct preliminary deliberations for determination of project scope of work, prepare preliminary cost estimates and establish scope of work.

Phase 2: Funding

Assist City in procurement of funding or Funding Administrator.

Phase 3: Design

Conduct necessary analysis of project area, complete design, and develop construction plans.

Phase 4: Construction

Solicit bids, procure contractor, conduct construction management and conduct frequent site inspections. Conduct project closeout and assist in fulfillment of funding requirements, if any.

KEY STAFF QUALIFICATIONS

Randall C. Winston, P.E.

President

Registrations	Texas Registered Professional Engineer No. 70417
Education	Master of Engineering in Civil Engineering, Texas A&M University; Bachelor of Science in Civil Engineering, Texas A&M University
Experience	40 years
Key Qualifications	Mr. Winston has 41 years of experience in civil engineering with extensive leadership on large-scale water and wastewater infrastructure projects. His expertise includes treatment facilities, detention systems, lift stations, collection and distribution systems, rapid dewatering drying beds, construction management, regulatory compliance, budgeting, scheduling, and quality assurance. He has worked extensively with TCEQ, TxDOT, U.S. Army Corps of Engineers, IBWC, and numerous funding agencies including TWDB, USDA, NADBank/BECC, FEMA, CDBG, GLO, HUD, TDEM, and EDA. As Project Manager, he will oversee client service, technical delivery, QA/QC compliance, staffing coordination, and financial performance tracking to ensure successful project execution.

Joseph B. Winston, Jr., P.E., RPLS

Vice President

Registrations	Texas Registered Professional Engineer No. 31109; Texas Registered Professional Land Surveyor No. 3780
Education	Bachelor of Science in Civil Engineering, Texas Tech University
Experience	62+ years
Key Qualifications	Mr. Winston brings more than 62 years of engineering and surveying experience, including large-scale project design, construction management, environmental oversight, utility coordination, hydrologic and hydraulic analysis, transportation design, drainage improvements, and public involvement. He has served public and private clients throughout the Rio Grande Valley for over 58 years and has acted as

	Consulting City Engineer for municipalities including Alamo, San Juan, Mercedes, and La Feria. His extensive institutional knowledge and technical expertise provide valuable project guidance and quality oversight.

Jacob D. Castaneda, P.E., CFM

Project Engineer

Registrations	Texas Registered Professional Engineer No. 158326; Certified Floodplain Manager No. 4508-23N
Education	Bachelor of Science in Civil Engineering, University of Texas Rio Grande Valley
Experience	4 years
Key Qualifications	Mr. Castaneda has experience in the planning, design, and development of water resources projects, water distribution systems, wastewater collection systems, stormwater drainage improvements, flood mitigation projects, pump systems, hydraulic modeling, and paving and grading design. He has coordinated with FEMA, TCEQ, TxDOT, CDBG, GLO, NADBank, USDA, TWDB, and TPWD. As Project Engineer, he will support project management, design development, project controls, and construction coordination while applying his expertise in civil and environmental engineering.

SUMMARY OF WORK EXPERIENCE

- Delta Lake Irrigation District Canal A: 28,500 LF of Canal Conversion to 36" and 24" Pipeline Design and Project Management
- Delta Lake Irrigation District Canal A: Procurement of $1M US Bureau of Reclamations grant
  Progreso Bridge Co. Port of Entry: Paving and Detention Pond Design
- Sharyland Water Supply Corporation Design and Construction of Water Treatment Plant NO. 3
- Sharyland Water Supply 1.0 MG Elevated Water Tower
- Sharyland Water Supply WTP #1: USDA $6 Million Funding Coordination
- City of Donna 1.0 MG Elevated Water Tower
- City of Ingram Wastewater Improvements - Phase I
- City of Ingram Wastewater Improvements - Phase II
- City of Ingram Lift Station No. 1 and No. 2
- Solid waste disposal sites and transfer stations.
- City of Weslaco EDAP Facility Plan
- Weslaco T- Mobile: Civil Site Grading, Paving, and Detention Pond Design
- Landfill Closure for the City of McAllen.
- Landfill Surveying and Engineering for BFI Landfill, Donna, Texas.
- Water distribution study for the Sharyland Water Supply Corporation.
- Odor control study for the City of Weslaco Wastewater Treatment Plant and Collection System.
- Wastewater pretreatment plant for Southern Frozen Foods packing plant in Alamo (a 0.5 million gallon per day flow, 1,210 mg/l BOD5 average).
- Study and pilot program for the City of La Feria using manmade wetlands as secondary treatment for lagoon effluent.
- City of Weslaco Economically Distressed Areas Program (EDAP) Facility Plan.
- City of McAllen Wastewater Treatment Plant No. 3, Four (4) Million Gallon Per Day Addition.
- Environmental Assessment for Hidalgo County Irrigation District No. 6 for a loan application to the United States Bureau of Reclamation. Complete archeological and environmental coordination with Local, State and Federal Agencies with approval for this project was done in this report.
- Multiple site work for HEB Stores located across the Valley: Ware Road HEB, McAllen; Weslaco HEB; Mercedes HEB; and subdivision work on Alamo HEB.
- Subdivision and site work for Weslaco Luby's Cafeteria.
- Weslaco Independent School District/ South Palm Gardens -- Septic tank design and drain field.
- City of Weslaco - City Engineer from 1990 to 2006, 2018
- City of McAllen Water Treatment Plant 2 MGD addition to the North Treatment Plant to bring total permitted capacity to 8 MGD.
- City of Weslaco Odor Control for North Wastewater Treatment Plant
- City of Weslaco 1 MGD Addition Extended Aeration Wastewater Treatment Plant
- City of Weslaco Study and Master Plan for Water and Wastewater Facilities
- City of Weslaco La Colonia Las Palmas Sewer Improvements
- City of McAllen Rehabilitation of Sludge Beds at WWTP No. 2
- City of McAllen PUB Sludge Handling Facility Pilot Study and Recommendations
- City of McAllen Highland Lift Station
- City of Weslaco Re-Design of Pumps and Motors and Controls for LS No. 27

WORK EXPERIENCE

Principal-Consulting Engineering Firm of SWG Engineering, LLC. Weslaco, Texas 1969 – Present

Junior Engineer- Sigler, Winston & Greenwood, Consulting Engineers, Mercedes, Texas 1966-1969

SUMMARY OF WORK EXPERIENCE

- Served as City Engineer on a retainer basis for the cities of Alamo, Texas, and City of San Juan, Texas
- Currently serving as City Engineer on a retainer basis for the City of Mercedes, Texas, and the City of La Feria, Texas
- Prepared EDA Application for Water Distribution and Wastewater Collection System Improvements for the City of Weslaco
- Prepared EDA Application for Water Treatment and Water Distribution Improvements for the City of Alamo
- Engineer in charge of 750,000 Gallon Elevated Composite Water Tank for City of Mercedes
- Engineer in charge of 500,000 Gallon Composite Elevated Tank
- Engineer in Charge of Water Treatment Plant Renovation, Water Treatment Plant Expansion, Water Distribution Additions, Wastewater Treatment and Collection Improvements for the City of Alamo
- Assisted with collection and analysis of water samples for Area Wide Plan for Sewerage Treatment Facilities for the Rio Grande Valley Pollution Control Authority/Lower Rio Grande Valley Development Council
- Assisted with the Non-Point Source Report for the Lower Rio Grande Valley Development Council 208 Water Quality Program.
- Directed gathering and analysis of data for the Flood Insurance Survey of several cities in Hidalgo County
- Prepared Master Plan and Studies for DHUD Water Improvements, Wastewater Improvements, Paving and Drainage Improvements for the City of San Juan
- Engineer in Charge of Water Treatment Plant Renovation, Water Treatment Plant Expansion, water Distribution Improvements, Development of Raw Water Reservoir, Wastewater Collection Improvements, Wastewater Treatment Plant Expansion, Storm Water Improvements, and Paving Improvements for the City of San Juan
- Prepared Solid Waste Permits for the Cities of Mercedes, Alamo, San Juan, and McAllen
- Assisted the City of Harlingen Water Works System with full-time residence inspection services for the New 15 MGD M.F. Runnion Water Treatment Plant and Reservoir and with Water Distribution Improvements
- Chairman for three years of the Lower Rio Grande Valley Development Council's Pre-Application Review Panel
- Engineer in Charge of the 2.0 MGD Loma Alta Water Treatment Plant and Above Ground storage Tank for the Brownsville Navigation District
- Engineer in Charge of Report, Plans and Specifications for the Rehabilitation of Irrigation and Drainage Facilities of Hidalgo County Water Improvement District No. 5, Progreso -- a project with more than $ 6,000,000 in construction costs
- Engineer in Charge of the Improvements, Additions, or New Construction of Several Mobile Home Parks -- Llano Grande, Alamo Palms, Winter Ranch, etc.
- Improvements to Water Treatment Plant No. 1, including a New Clearwell, City of McAllen.
- Engineer in Charge of 54" Raw Water Line, two - 7.5 MGD Expansions, Three - 2 million Gallons Above Ground Storage Tanks with Transfer Pumping, Four Additional High Service Pumps, including Building, a $ 4,500,000 -- 8.0 MGD Addition, SCADA Instrumentation, and Exterior Improvements for the Southwest Water Treatment Plant (formerly Water Treatment Plant No. 2), City of McAllen.
- Rehabilitation of Water Treatment Plant for the City of Roma
- Assisted with Chlorination-Dichlorination, and Instrumentation for Wastewater Treatment Plants No. 2 and 3, City of McAllen.
- Assisted with Municipal Park Improvements for the cities of Hidalgo, Mercedes, and La Feria, including Swimming Pool Improvements for the City of Hidalgo and City of Mercedes.
- Engineer in Charge of 24-inch Distribution Main Improvements for the City of McAllen.
- Engineer in Charge of the Cleaning and Repairing of Elevated and Ground Storage Tanks for the cities of Laredo, San Juan Alamo, Mercedes, and La Feria.
- Assisted architectural firm with the development of a wastewater disposal system for the Zenith Electronics Maquiladora Plant in Mexico
- Engineer in Charge of report, and plans and specifications for two separate projects for the Relocation of Utilities within IH 35 for the Laredo Waterworks System
- Engineer in Charge of Repairs to Raw Water Intake Screens and Pumps for the Laredo Waterworks System
- Engineer in Charge of the Renovation of the 18.0 MGD Water Treatment Plant No. 1 including New Equipment for Mixing, Settling, Electrical, Chemical, Instrumentation, Piping, Valves, etc., for the Laredo Waterworks System.

Also included was coordination with architect of major architectural improvements
- Engineer in Charge of plans and specifications for the Renovation for the Chemical Feed Equipment for Water Treatment Plant No. 2, Laredo Waterworks System
- Engineer in Charge of Water Rate Study for the City of San Juan and the City of Mercedes. Assisted with water rate studies for the Laredo Waterworks System and the City of McAllen
- Engineer in Charge of the Renovation of the 1.3 MGD Wastewater Treatment Plant including Additional Sand Drying Beds, and the Addition of a 1.0 MGD Extended Aeration Wastewater Treatment Facility for the City of Mercedes
- Engineer in Charge of the Renovation of the Water Treatment Plant for the City of Mercedes, and the Addition of a Residual Management Basin, and a 1.2 MG Clearwell
- Engineer in Charge of Developing a Supplemental Water Well, Storage and Pumping Facilities for Southern Frozen Foods in the City of Alamo
- Engineer in Charge of Renovation of Water Treatment Plant, including Adding Clarification, 500,000 Gallon Clearwell, and Chemical Feed System for the City of La Feria
- Engineer in Charge of Additional Wastewater Treatment Capacity in the form of oxidation lagoons for the City of La Feria
- Engineer in Charge of Parking Facilities, Bus Service Roads, Tennis Courts, and Other Site Improvements for the Mercedes Independent School District
- Engineer in Charge of Rehabilitation of the Water Treatment Plant of Phoenix Frozen Foods in Monte Alto
- Engineer in Charge of Field Work and Site Development of Two Industrial Parks for the City of Mercedes
- Prepared Applications for the Innovative and Alternative Technology Funding for Land Application of Wastewater and Sludge for the city of McAllen
- Engineer in Charge of Rehabilitation of Major Lift Stations for the City of Mercedes
- Preparation of Solid Waste Site Closure Plans for the City of Mercedes and the City of McAllen
- Engineer in Charge of Field Work and Site Development of Two Industrial Park Sites for the City of La Feria
- Engineer in Charge of Plans and Specifications for Water Distribution Improvements, Wastewater Collection Improvements, Paving and Drainage Improvements for the City of Mercedes from 1978 to currently
- Engineer in Charge of Plans and Specifications for Water Distribution, Wastewater Collection and Paving and Drainage Improvements for the City of La Feria from 1976 to currently
- Prepared Study and Analysis of Leaks in a 30"/36" Raw Water Line serving CPL's J.L. Bates Power Station.
- Engineer in Charge of Solid Waste Transfer Stations for the City of La Feria and the City of Mercedes
- Engineer in Charge of O&M Manual for the City of Mercedes Wastewater Treatment Improvements
- Prepared Feasibility Study for Additional Water Treatment Plant Capacity for the City of McAllen

La Feria Master Plan
- Prepared a Joint Drainage Study for the City of La Feria and La Feria Irrigation Dist. No. 3
- Engineer in Charge for Economically Distressed Areas (EDAP) Application and Facility Plan for the City of Mercedes
- Engineer in Charge of Disinfection Studies for the Cities of La Feria, Mercedes, and McAllen
- Engineer in Charge of Site Improvements for HEB Grocery in the Cities of Weslaco and Pharr
- Engineer in Charge of Bridge over Anacuitas Seco Drain and Box Culvert and New Floodway Levee Structure for Hidalgo County Drainage District's Drainage Improvements in the City of Mercedes
- Assisted Mejia and Rose, Inc. with Water Treatment Improvements to the City of Los Fresnos Water Treatment Plant Engineer in Charge of Plans and Specifications for a New Municipal Water Well for the City of Mercedes

RE: RFQ #2026-7 Professional Engineering Rotation Services

To whom it may concern:

TEDSI Infrastructure Group Inc (TEDSI) is pleased to submit our Request for Qualifications (RFQ) for a variety of capital improvement projects and city programs and projects. **TEDSI** specializes in Street Infrastructure Evaluation and Improvements, Pavement Management and Improvements, Utility Infrastructure Evaluation and Improvements, Erosion and Sediment Control Design, Water and Wastewater Evaluation and Improvements, Hydrology & Hydraulics, Transportation Evaluation, Traffic Engineering Services, Traffic Signal Design, and Civil Engineering as described in the scope of services.

Founded over 40+ years ago, **TEDSI** is a well-established Engineering Consultant Firm with a local office in Mission, Texas. We are registered with the Texas Board of Professional Engineers (# F-1640) to perform engineering services in the State of Texas. Our professional staff has extensive experience with municipalities across the State of Texas and has experience in working with programs funded by federal, state, and local governments. The experience of our team's professional staff covers a broad spectrum of Professional Services. This experience will allow the **TEDSI Team** to provide solutions needed to complete these projects on time and with the utmost professionalism.

Our client relationships are a crucial part of our day-to-day business. Our staff is committed to the philosophy of establishing and maintaining long-term relationships with our clients in order to provide them the product they need. We have assembled a very capable team of engineers, surveyors and scientists who can meet the challenges and provide a quality product for the city.

For this RFQ, the point of contact will be Mr. Ponciano N. Longoria, P.E., CFM (ponciano.longoria@tedsi.com) 1201 E. Interstate Hwy 2, Mission TX 78572, (956) 424-7898. We pledge our total commitment and are ready to respond promptly and efficiently to serving your needs. **TEDSI** is privileged and grateful to present the following qualifications for your review and consideration.

By signing this letter of transmittal, I certify that I am the CEO & President to bind TEDSI into contract with the City of Edinburg.

Sincerely,
TEDSI INFRASTRUCTURE GROUP, INC.

Jesse Salinas
CEO/President

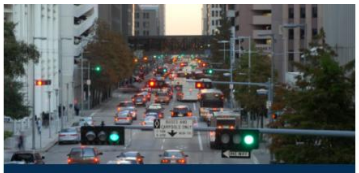
II. FIRM QUALIFICATION AND EXPERIENCE

TEDSI, founded in 1984, is registered with the Texas Board of Professional Engineers (F-1640) to perform engineering services in the State of Texas. **TEDSI** has been providing engineering services in the State of Texas for over 40+ years.

Scope of Services TEDSI can perform:

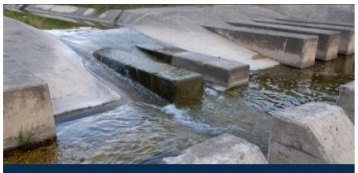
- **Street Infrastructure Evaluation and Improvements**
- **Pavement Management and Improvements**
- **Utility Infrastructure Evaluation and Improvements**
- **Erosion and Sediment Control Design**
- **Water and Wastewater Evaluation and Improvements**
- **Hydrology & Hydraulics**
- **Transportation Evaluation**
- **Traffic Engineering Services**
- **Traffic Signal Design**
- **Civil Engineering**

Engineering Services provided by firm include, but may not limited to:



- **Field investigation and data collection**
- **Feasibility evaluation and alternatives analysis**
- **Design development and cost estimating**
- **Preparation of plans, specifications and estimates**
- **Review and check plans, subdivision and parcel maps, and computations submitted by private developers**
- **Review of engineering and encroachment permits**
- **Coordination with utility agencies, consultants, and other public agencies**
- **Organization, participation and presentations at meetings held by City staff, the City Council, neighborhood groups, and other stakeholders**
- **Preparation of preliminary documents, plans and/or reports including findings and recommendations**
- **Preparation final documents, plans and/or reports responding to City and other stakeholder comments**
- **Preparation of handouts and graphical displays for public meetings**
- **Management and monitoring of capital improvement project**
- **Management and monitoring of planning projects**
- **Administration and monitoring of regional, state and federal grants**
- **General civil engineering support services as assigned**

Additional Services TEDSI can perform:



Transportation Services

TEDSI has developed a structured format to provide efficient and quality assured management of traffic signal and other transportation related construction.

Traffic Engineering and Design

Our expertise covers every aspect of new roadways, highways, expressways, urban freeways, complex interchanges and toll roads.

Hydrology and Water Resources

A major component of any project is drainage. Design, maintenance and Functionality are the standard measures of effectiveness in the area of storm-water design.

Tolling and ITS

With decades of Intelligent Transportation Systems (ITS), TEDSI has specialized in giving customers the ability to measure, evaluate and communicate traffic conditions to motorist.

ADVANCED PROJECT DEVELOPMENT	ROADWAY & PS&E	TRAFFIC ENGINEERING		WATER RESOURCES
		TRAFFIC STUDIES	TRAFFIC PS&E	
Route Studies	Roadway Design	Traffic Impact Analysis	Intelligent Transportation Systems	Storm Water Pollution
Schematics	Bridge Design	Traffic Projections	ITS Integration	Wastewater Lines
Preliminary Bridge Layouts	Storm Sewer System	Level of Service Analysis	Toll Infrastructure Design	Sanitary Sewer Design
Preliminary Utility Coordination	Culvert Crossings/Outfall Design	Lighting Contour Studies	Traffic Control Plan	Waterline Improvements

Mobility Planning	Utility Coordination Management	Intersection Control Evaluation	Signal Design	Water Reclamation
	Detentions Facility Design	Speed Zone Studies	Signing	
	Drainage Ditch Design	Traffic Analysis for Highway Design	Pavement Markings	
	Bicycle and Pedestrian Facility Design	Ramps Capacity Analysis	Traffic Control	
	Construction Management/Inspection	Freeway Weaving Analysis		
		Traffic Signal Phasing & Timings Development		

TEDSI has completed projects within budget and on a timely manner for the City of Edinburg, City of McAllen, City of Mission, City of Pharr, City of Weslaco, City of Harlingen, City of Brownsville, Hidalgo County, Cameron County, Hidalgo County Regional Mobility Authority, Cameron County Regional Mobility Authority as well as the Texas Water Development Board, TCEA, FEMA, Texas Department of Transportation (TXDOT) in the Pharr, Laredo, San Antonio, Beaumont, Dallas, Tyler , Fort Worth, Waco, Austin, Houston and El Paso Districts.

TEDSI is fully cognizant of all applicable Federal, State, County and municipal codes, ordinances, regulations and standards relating to transportation and traffic engineering. We pride ourselves in the ability to provide personalized quality-assured service and timely responses to our clients' needs. Our track record has demonstrated our performance and earned us a distinguished reputation in the field of transportation and traffic engineering.

EXPERIENCE - ENGINEERING AND PROJECT MANAGEMENT SERVICES

The **TEDSI** Team has completed projects with similar tasks required for this RFQ. **TEDSI** has extensive experience working for various entities. See below for list of representative projects (**Last 2 Years) (***Last 5 Years):

- 2022 Raise Grant – City of Edinburg, Completed 2023 **
- Jackson Rd at Chapin Rd Traffic Signal Design – City of Edinburg, On-going Construction **
- FM 1925 at M Rd – City of Edinburg, On-going Construction **
- Freddy Gonzalez Dr at Monmack Rd – City of Edinburg, On-going Construction **
- Torres Acres – City of McAllen, PS&E Complete & Pending Construction 2022 **
- Trenton at Auburn – City of McAllen, On-Going Construction **
- Dove Ave – City of McAllen, Construction Complete Mar. 2022 **
- City of Mission Master Drainage Plan – City of Mission, Completed 2020 ***
- Esperanza Drainage Improvements – City of Mission, On-Going Construction ***
- Faysville Drain – Hidalgo County Drainage District, On-Going Construction **
- J-08 Drain – Hidalgo County Drainage District, On-Going Construction **
- Pharr BSIF – City of Pharr, On-Going Construction **
- 9th & 13th Street Storm Sewer Improvements – City of Harlingen, Construction Complete 2021 **
- Jefferson Avenue Storm Sewer Improvements – City of Harlingen, On-going PS&E ***
- Hickory Hill Road Drainage Improvements – City of Harlingen, On-going PS&E **
- Victor Park Parking Lot – City of Harlingen, Ongoing PS&E **
- Brownsville-Los Fresnos Hike & Bike Trail – City of Brownsville, PS&E Complete & Pending Construction **
- UTRGV Pedestrian Study – City of Brownsville & UTRGV, Finalizing Study ***
- Whipple Road – Hidalgo County RMA, Complete Schematic ***
- Russell Rd – CCRMA, On-going PS&E ***
- HUC 10 Flood Protection Study – City of Harlingen, On-going Study **
- Delta Regional Watershed – Delta Regional Water Management, Hidalgo County Drainage District No. 1
- Sanitary Sewer Improvements, City of Edinburg***
- City of Edinburg GIS Mapping and Preliminary H&H for Master Drainage Plan Application***
- City of Edinburg Master Drainage Plan/TWDB Flood Protection Plan
- SH 107 (University Dr) at Joe Ochoa Ave Traffic Signal, City of Edinburg ***
- Safe Routes to School Project Phase I, City of Edinburg ***
- Safe Routes to School Project Phase II, City of Edinburg ***
- Edinburg Wastewater Treatment Plant Effluent Line, Edinburg, City of Edinburg ***
- J09 Drainage Outfall, Hidalgo County, Hidalgo County Pct 4 ***
- Mile 2W Rd, Mercedes, Hidalgo County Pct 1***
- Mile 6W Rd, Weslaco, TXDOT Pharr District ***
- Saenz St, Mercedes, Hidalgo County, Pct 1 ***
- Solar Lighting Project, Hidalgo County, Hidalgo County Pct 1 ***
- Dixieland Extension, Harlingen, City of Harlingen ***
- Dicker Rd-McColl Rd, Hidalgo County, Hidalgo County Pct 2 ***
- Pharr Signal Inventory, Pharr, City of Pharr ***
- Bentsen Palm Dr at Mile 4N Rd, Hidalgo County, Hidalgo County Pct 3 ***
- Hidalgo County Border Colonia Access Program Round III, Hidalgo County Pct 1 ***
- SH 48 at Keppel-AMFELS, Cameron County ***
- A Street Study, Harlingen, City of Harlingen ***
- Tennessee Rd/Treasure Hills Lateral, Harlingen, City of Harlingen ***
- Sweezy Ln, Harlingen, City of Harlingen ***

- La Homa Rd at Lobo St, Hidalgo County, La Joya ISD

TEDSI's UNIQUENESS

TEDSI can provide services and has staffing covering the following categories: Street Infrastructure Evaluation and Improvements, Pavement Management and Improvements, Utility Infrastructure Evaluation and Improvements, Erosion and Sediment Control Design, Water and Wastewater Evaluation and Improvements, Hydrology & Hydraulics, Transportation Evaluation, Traffic Engineering Services, Traffic Signal Design and Civil Engineering Projects. We understand both Traffic and Transportation aspects of a project, which makes **TEDSI** a unique company to perform these services for the city.

Our purpose is to provide professional consulting services with passion and integrity, to help build a better world for our employees, their families, our clients, and the communities we serve. We pride ourselves in the ability to provide personalized quality-assured service and timely responses to our clients' needs. Our track record has demonstrated our performance and earned us a distinguished reputation in the field of transportation and traffic engineering.

With a local office and local staff, **TEDSI** is committed to City of Edinburg and able to provide fast project deliverables. Our employees work and live in the area and are familiar with the local issues and concerns.

OFFICE LOCATION PROVIDING SERVICES

We have offices located in:

MISSION
1201 E. Interstate Highway 2
Mission TX 78572
Tel: (956) 424-7898
Fax: (956) 424-7022

HOUSTON
738 Highway 6 South Ste 430
Houston TX 77079
Tel: (832) 619-1000
Fax: (832) 619-1018

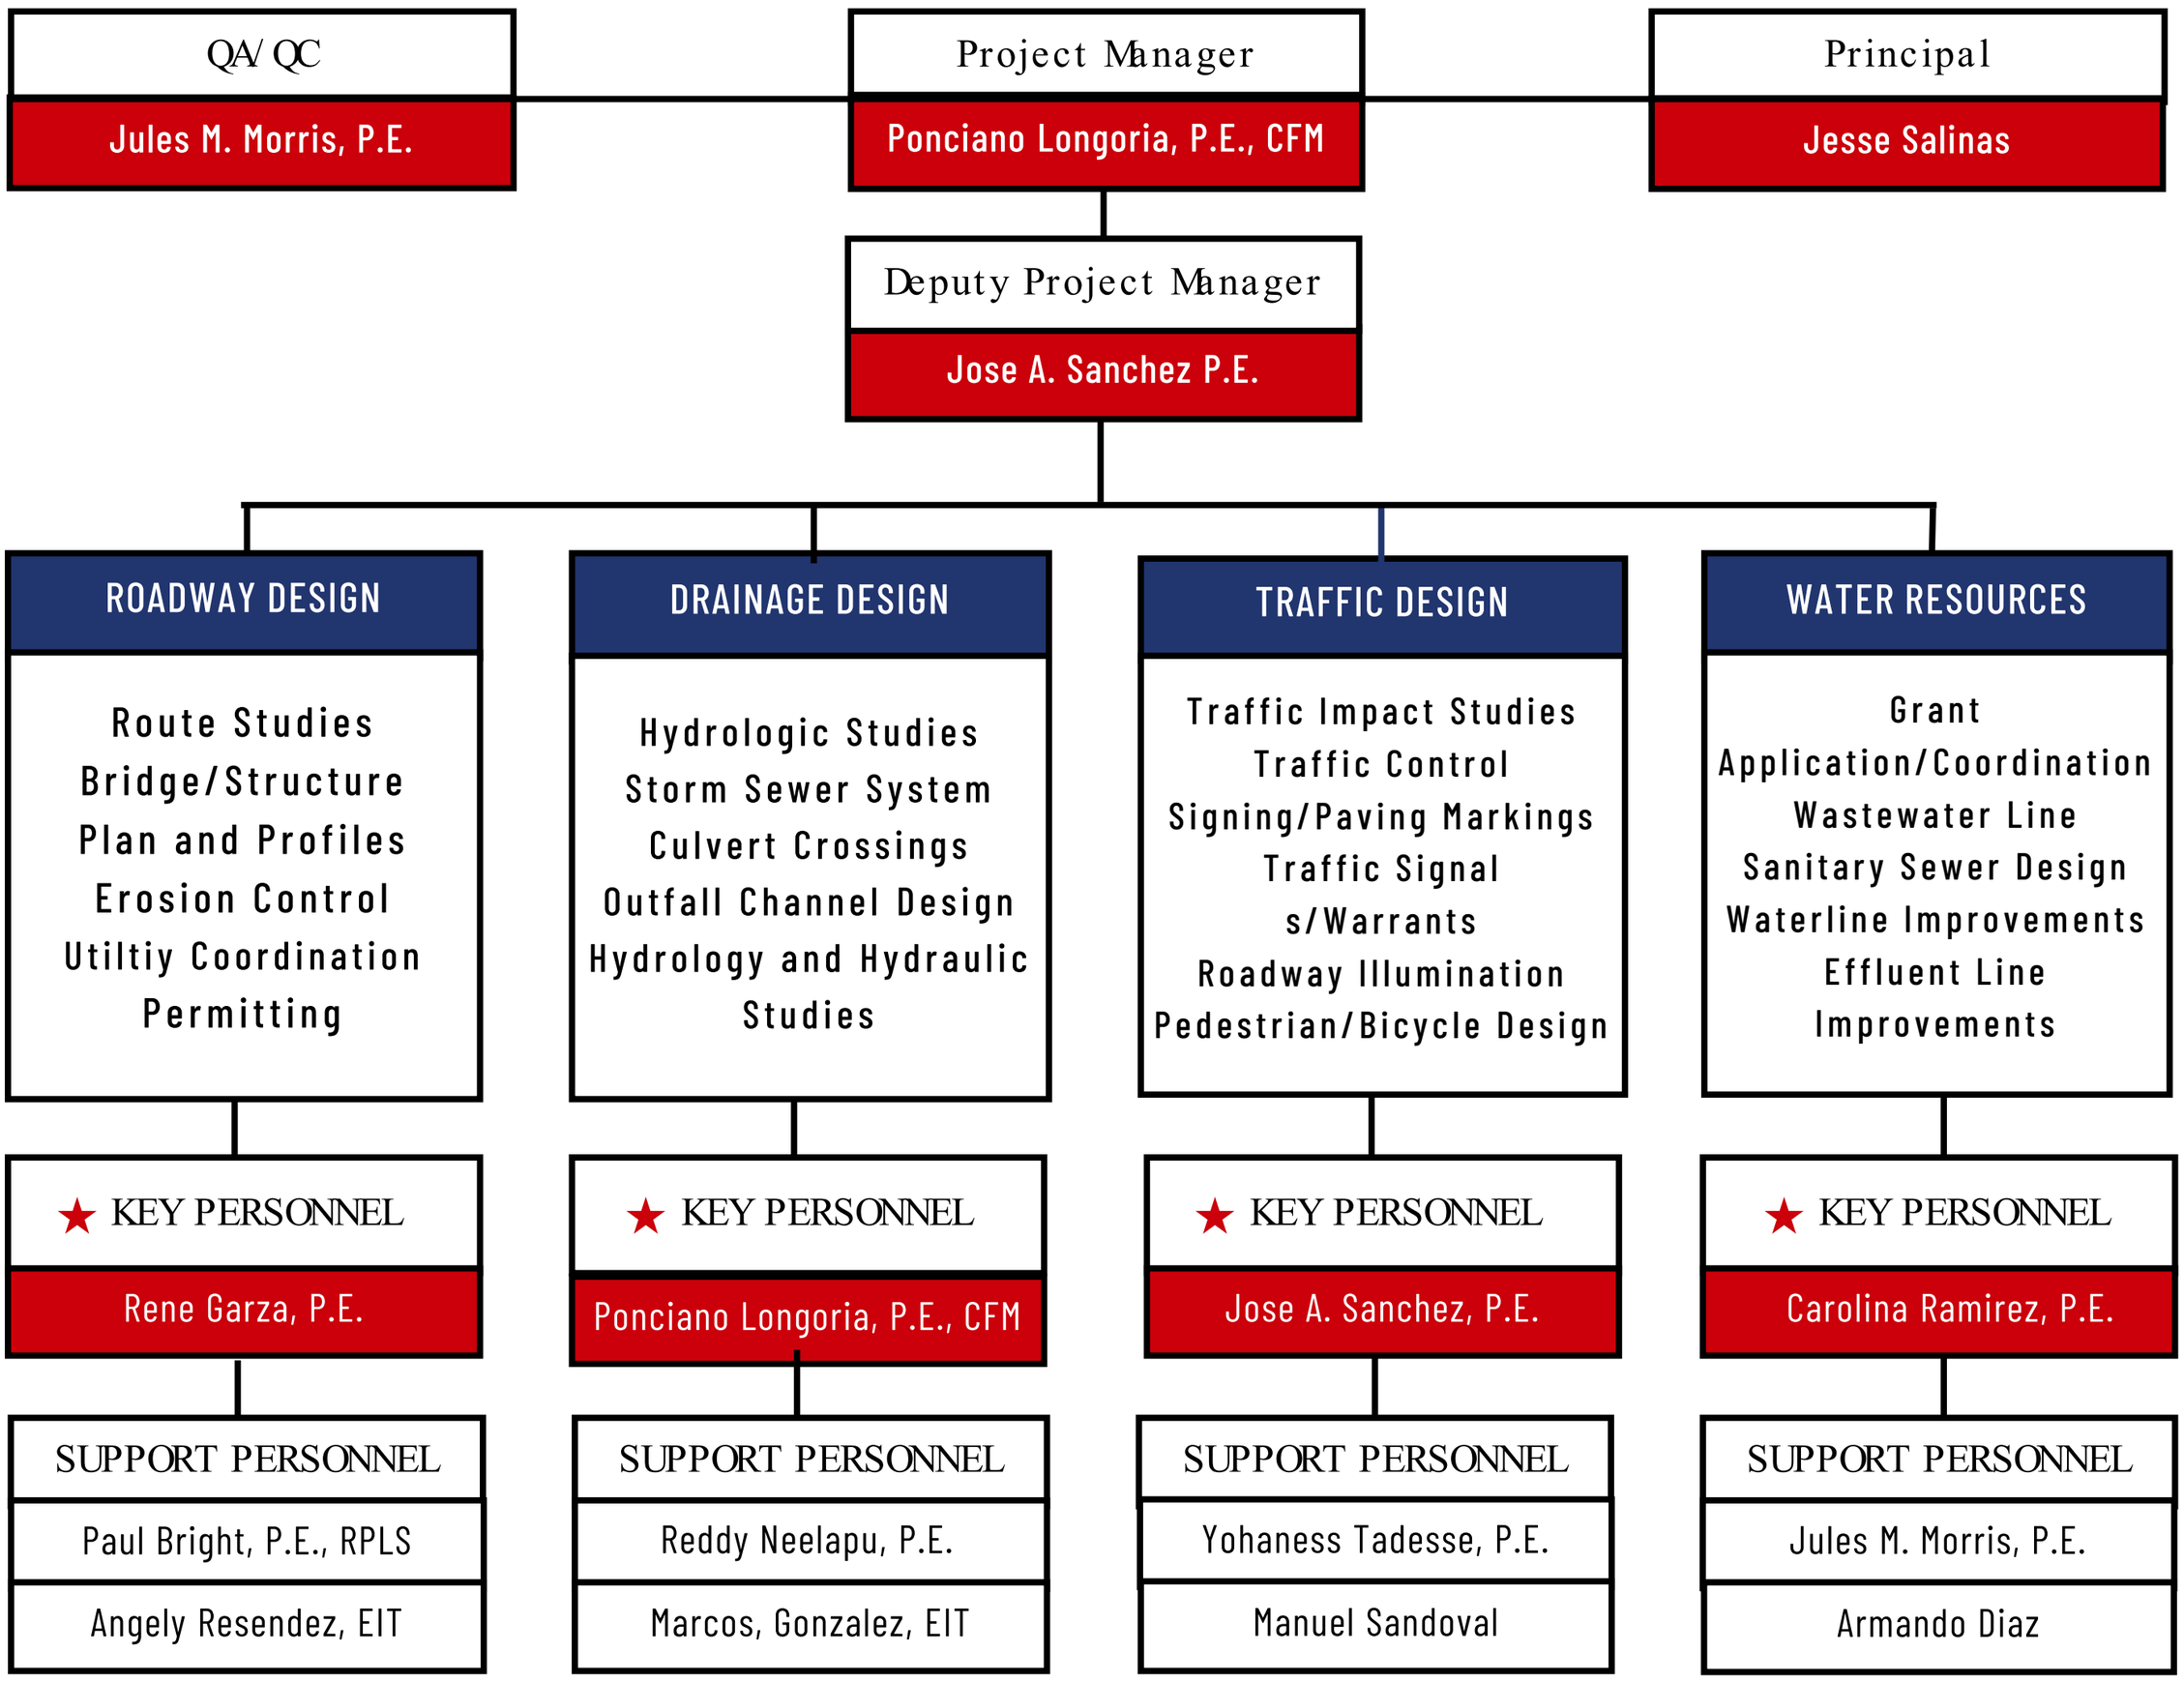
Office selected for this project: Mission (Headquarter)

The Mission Office will provide and manage all services requested by the city for this said RFQ with support from our Houston Office if needed.

Contact Person: Jesse Salinas
Chief Executive Officer/President
Tel.: (956) 424-7898 Fax: (956) 424-7022

PART TIME STAFFING

TEDSI's staff include professionals with the following licenses: 8 Professional Engineers (PE), 1 Certified Floodplain Manager (CFM) and 1 Registered Public Land Surveyor (RPLS).



Our firm has the necessary staff required to provide all services requested by the city at this time.

PAST PROJECTS WITHIN THE CITY OF EDINBURG WITH REFERENCES

Cano St. & Veterans Blvd. Trail Improvements – Edinburg TX, City of Edinburg

The purpose of this project is to prepare Plans, Specifications and Estimates (PS&E) and provide Project Management and Construction Support Services for the Cano St. & Veterans Blvd. Trail Improvement Project. The project consists of the construction of an 8 foot wide hike and bike trail along Cano Street from 13th Ave to Veterans Blvd and along Veterans Blvd from Cano Street to Dawson Drive that will include new concrete driveways ADA wheelchair ramps, pedestrian signal upgrades and signing and pavement markings. This project was funded through Hidalgo County Metropolitan Organization Transportation Alternative Program.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Jackson & Chapin Traffic Signal, Edinburg, TX

Developed signal timings using Synchro software and turning movement counts (TMCs), ensuring optimal coordination for all four approaches. This process involved creating timings that effectively manage traffic volumes during peak hours, both in the morning (AM) and evening (PM). By manually counting vehicles, gained firsthand insights into intersection dynamics and identified necessary adjustments to enhance traffic flow and efficiency.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

2022 Raise Grant Program Submittal for Sprague Road, City of Edinburg, TX

The purpose of this project was to develop the Benefit-Cost Analysis (BCA), BCA Summary, Quantities, and Cost Estimate of Sprague Street between SH 336 (10th Street) and Business 281 (Closner Boulevard). The existing Street of Sprague Street is proposed to widen and add pedestrian and drainage structures for a length of 3.13 miles. BCA summary included a description of the project, existing and proposed conditions of street, demand/project generators, and estimate of benefits.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Austin Street and Joe Ochoa Drive Street Improvements

Project involved the development of the plans, specifications and estimates, drainage area map and design of storm sewer system (hydrology and hydraulics), traffic control plans, utility coordination, signage, pavement markings and construction management for Joe Ochoa Drive from University Drive from University Drive to Fay Street.
Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Trenton Road at Professional Drive, Edinburg TX

Traffic PS&E associated with signal improvements in Edinburg, TX. Traffic engineering tasks included traffic signal design, pavement markings design and small signing design. Signals were designed as part of single plan set. Project required survey, field inventory, signal design, signing and pavement markings design, civil improvements, estimates, bid documents, pre-bid conference, award recommendation, pre-construction and shop drawing reviews.
Team Member in charge: Mr. Jose A. Sanchez, P.E.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Edinburg Safe Routes to School Phase I and II, Edinburg TX, TXDOT Pharr District.

Project involved sidewalk improvements for 28 schools/24 sites. Project required coordination with multiple entities. Project involved design of sidewalks, ramps, driveways, solar powered illuminated crosswalks, traffic signal warrants, traffic signals, overhead flashing beacons, signing, pavement markings, solar roadside school flashers, bike racks, utility coordination, balancing of various CSJ to bring project under budget, coordination with Edinburg CISD, Hidalgo County Pct 4, City of Edinburg, City of McAllen and TXDOT, specifications, estimates and standards.
Team Member in charge: Mr. Jose A. Sanchez, P.E.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM & Jesus Leal TxDOT

SH 107 (University Dr) at Joe Ochoa Ave Traffic Signal, Edinburg TX, City of Edinburg
The purpose of this project was to allow UTPA and Joe Ochoa Ave traffic to access to both approaches to SH 107. Project involved traffic signal warrant study, traffic signal design, minor roadway improvements and construction support services. Warrant study required use of existing volume counts and projected volume counts. Project required coordination with various entities including UTPA, TXDOT and City of Edinburg. Traffic Signal included spam wire installation, loops, pedestrian signal heads, bike boxes, radio spectrum, accessible pedestrian signals and opticom system for emergency vehicles. Roadway improvements included reconstruction of UTPA driveway, sidewalk, ramps, and removal of SH 107 medians. Tasks also included specifications, estimates and standards.
Team Member in charge: Mr. Eric R. Dietrich, P.E., PTOE
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM & Jesus Leal TxDOT

SH 107 - Jackson Rd to 10th Ave, Edinburg TX, TXDOT Pharr District
Project involved widening and reconstruction of SH 107. Tasks included roadway design, drainage design, sw3p, traffic control, survey, utility coordination, traffic signal design, pavement markings design, small signing design, specifications, estimates and standards.
Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM & Jesus Leal TxDOT

Sugar Rd – Owassa Rd to Trenton Rd, Edinburg TX, City of Edinburg
Project involved the widening of Sugar Rd. Tasks included roadway design, drainage design, irrigation crossing design, sw3p, traffic control, survey, utility coordination, traffic signal design, pavement markings design, small signing design, specifications, estimates and standards.
Team Member in charge: Mr. Eric R. Dietrich, P.E, PTOE
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Sugar Rd at Schunior Rd Traffic Signal, Edinburg TX, City of Edinburg
Project involved traffic signal design, survey, geotechnical study, signing, pavement markings, utility coordination, construction support services, specifications, estimates and standards.
Team Member in charge: Mr. Eric R. Dietrich, P.E, PTOE
Reference: City of Edinburg Director of Public Works Mr. Vicente Romero

SH 107 from McColl Rd to 4th Ave, City of Edinburg, Edinburg, TX
Performed a traffic engineering study analyzing the existing timing along SH 107 arterial, evaluated the benefits of signal timing coordination between McColl Rd and 4th Ave. Signal timing coordination was performed using Synchro 8 and SimTraffic simulation. Deliverables included submittal of clearance interval worksheet, existing and optimized AM, Off, Noon, & PM signal timing analysis.
Team Member in charge: Mr. Jose A. Sanchez, P.E.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Jackson Road Hike and Bike Trail – Edinburg TX, City of Edinburg
The purpose of this project was to develop the plans, specifications, estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the Jackson Road Hike and Bike

Trail from University Drive to Canton Road. This project was funded through Hidalgo County Metropolitan Organization Transportation Alternative Program.
Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Cano Walking Trail – Edinburg TX, City of Edinburg
Project involved the development of the plans, specifications and estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the Cano Hike and Bike Trail from Cano Street to Freddy Gonzalez Drive. This project was funded through a healthy living grant from the Edinburg Independent School District.
Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

McIntyre Railroad Crossing Pedestrian Project – Edinburg TX, City of Edinburg
Project involved the development of the plans, specifications and estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the railroad crossing at McIntyre Street between 5th and 6th Avenue. This project was funded through the Hidalgo County Metropolitan Organization Transportation Alternative Program.
Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Bicycle and Pedestrian Plan – Edinburg TX, City of Edinburg
Project involved the development of a Bicycle and Pedestrian Master Plan for the City of Edinburg which consisted of public meetings, data collection, pedestrian and bicycle studies and a capital improvement plan. This project was funded through the Hidalgo County Metropolitan Organization Transportation Alternative Program.

Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Sanitary Sewer Improvements – Edinburg TX, City of Edinburg
The purpose of this project was to outline the issues and aspects involved in the development of any reports or studies, identity existing conditions and design requirements. An analysis of existing lifts station was performed with a survey to collect data from the nearest upstream/downstream manhole or structure that will allow the slope and size of the associated facilities to be established. Condition assessment of the Lift Station and associated list station components.
Team Member in charge: Mr. Jose A. Sanchez, P.E.
References: City of Edinburg Director of Utilities Mr. Arturo Martinez

Phase I Preliminary H&H and Grant Application for Edinburg Master Drainage Plan, Edinburg TX, City of Edinburg.
The purpose of this project was to provide preliminary GIS Mapping and Preliminary Hydrologic and Hydraulic Modeling to formulate the back-up documentation to prepare a grant application for funding and the completion of the City of Edinburg Master Drainage Plan.
Team Member in charge: Mr. Mark W. Lupher, P.E., RPLS
References: Ivan Ortiz, CFM Texas Water Development Board/ City of Edinburg Director of Community Dev./Grants Mgmt. Ms. Marissa Garza

City of Edinburg Master Drainage Plan/TWDB Flood Protection Plan, Edinburg TX, City of Edinburg.
Development of a Stormwater Master Drainage Plan for the City of Edinburg. Tasks included Hydrologic and Hydraulic Baseline Report, Environmental Baseline Report and Master Drainage Report.
Team Member in charge: Mr. Mark W. Lupher, P.E., RPLS
References: City of Edinburg Director of Community Dev./Grants Mgmt. Ms. Marissa Garza

Edinburg Wastewater Treatment Plant Effluent Line, Edinburg TX, HCDD#1/City of Edinburg

Project currently under construction. Project involved new construction of an effluent line/open ditch from Edinburg Wastewater Treatment Plant to North Main Drain Outfall. Effluent line/open ditch extended from WWTP thru Chapin Rd-Doolittle Rd-Russell Rd-Kenyon Rd-Monte Cristo Rd-North Main Drain. Project tasks included drainage studies, drainage structures design, roadway crossings, utility coordination, construction support services, coordination duties with Hidalgo County and City of Edinburg, specifications, estimates and standards.

Team Member in charge: Mark W. Lupher, P.E., RPLS

References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM & Noe Saldivar, P.E., HCDD#1,

Edinburg Chapin Road Detention Pond Project – Edinburg, TX, City of Edinburg

Project consisted of, field surveys, data collection, hydrologic and hydraulic analyses, preparation of plans, specifications and estimates and construction management. This project was funded with a grant from the Texas Department of Emergency Management and FEMA.

Team Member in charge: Mr. Ponciano N. Longoria, P.E, CFM

VI. PROFESSIONAL SERVICES AGREEMENT

TEDSI has read RFQ Professional Services Agreement and will meet the prerequisite insurance requirements and if selected agree to enter into such agreement. TEDSI accepts the conditions contained in this RFQ with the City of Edinburg.

VII. CONTACT INFORMATION

Jesse Salinas
CEO/President
1201 E. Interstate Hwy 2,
Mission, Texas 78572
Office: (956) 424-7898
Mobile: (956) 222-5181
E-Mail: jsalinas@tedsi.com

Ponciano N. Longoria, P.E, CFM
Project Manager
1201 E. Interstate Hwy 2,
Mission, Texas 78572
Office: (956) 424-7898
Mobile: (956) 929-1467
E-Mail: ponciano.longoria@tedsi.com

VIII. ABILITY TO MEET SCHEDULES AND DEADLINES

This type of contract, above all else, requires response and close coordination with the City Project Manager/Engineer. As on all previous contracts which we have performed, we will posture our team to:

- Expedite the scoping of a work order, fee proposal and resource allocation work plan
- Negotiate the budget
- Execute Prime and Sub Agreements
- Commence work upon issuance of a Notice to Proceed

We have demonstrated our staff's qualifications and necessary expertise for these types of projects through our previously completed work. We have the utmost confidence that the TEDSI Team will fulfill your needs to your complete satisfaction, on time and within budget. The designated Project Manager, Mr. Ponciano N. Longoria, P.E., CFM, has availability to commit the necessary time to complete the projects according to the City of Edinburg schedule. Mr. Longoria as well as the entire Key/Support Personnel are ready to meet the opportunities granted by the city under this contract. The TEDSI Team members have proven track records and have demonstrated their on-time performances on similar projects with Cities, Counties, TxDOT, Regional Mobility Authorities, Toll Road Authorities and other governmental agencies. We commit to you our pledge of total quality and superior performance within time and budget constraints.

APPENDIX

Ponciano N. Longoria, P.E., CFM

Project Manager

Professional Registrations

P.E, State of Texas, No. No. 92969
TxDOT Certification #13335
CFM, #1554-09N

Mr. Longoria has 29+ years of experience in the design and construction management of civil engineering projects. Project experience include Hydrologic and Hydraulic studies, Traffic Engineering Studies as well as Plans, Specifications and Estimates (PS&E) for various projects such as traffic signalization, traffic control, signing, pavement markings, roadway design and drainage design/analysis, utility coordination, transportation and construction management services for municipal facilities, Federal Emergency Management Agency (FEMA),Texas Water Development Board (TWDB) and Texas Commission on Environmental Quality (TCEQ), Federal Transit Administration (FTA), and the Texas Department of Transportation (TXDOT) Projects.

Professional Experience

ROADWAY

US Expressway 83

Responsible for the development of the plans, specifications and estimates, drainage area map, design of storm sewer system (hydrology and hydraulics), and utility coordination for US 83 from Inspiration Road to Showers Road. Analyzed and designed the Abram Road Outfall from US Expressway 83 to BUS 83 which consisted of ditch widening and upgrading and/or adding new culverts.

Trenton & Auburn – City of McAllen

The project involved reconstructing an existing roadway and constructing a new roadway to establish an intersection aimed at improving traffic flow in the vicinity. Scope of work included installing curb and gutter, storm sewer systems, signage, and pavement markings. Collaboration with the Project Engineer spanned throughout the entire development of the PS&E (Plans, Specifications, and Estimates) package, encompassing tasks such as creating horizontal alignments, plan and profile sheets, and summary sheets. Additionally, coordination with the City of McAllen ensured incorporation of specific project design standards mandated by the city.

29+ Years of Experience

Education

B.S. Civil Engineering, Texas A&M University- Kingsville, 1996

ponciano.longoria@tedsi.com *(956) 424-7898* *www.tedsi-infrastructure.com*

Dove Avenue – City of McAllen

This project, executed in collaboration with the City of McAllen, involved widening an existing 4-lane roadway to accommodate 5 lanes. Scope of work encompassed installing curb and gutter, as well as signage and pavement markings. Throughout the project, coordination with the Project Engineer was maintained to complete the PS&E (Plans, Specifications, and Estimates). Responsibilities included developing horizontal alignments and vertical profiles for the proposed roadway. Additionally, tasks involved creating plan and profile sheets as well as the existing and proposed typical sections. Collaboration with the City of McAllen ensured integration of specific project design standards mandated by the city.

TRAFFIC

City of Edinburg Traffic Signals Projects

Responsible for the development of plans, specifications and estimate and construction management as the City Engineer for various intersections throughout the city for traffic signals, flashing beacons, or multistep intersections. Design included traffic signal warrant studies, traffic signal design, signing and pavement markings, illumination, wheelchair ramp upgrades, and utility coordination.

SH 48

Responsible for the development of the plans, specifications and estimates, drainage area map, hydrology, hydraulics, traffic control plans, utility coordination, signage, pavement markings, traffic signals and construction management for SH 48 from Bahia Grande Bridge to 3 miles north of bridge.

HYDRALOGY, HYDRAULICS

Joe Ochoa Drive

Responsible for the development of the plans, specifications and estimates, drainage area map and design of storm sewer system (hydrology and hydraulics), traffic control plans, utility coordination, signage, pavement markings and construction management for Joe Ochoa Drive from University Drive from University Drive to Fay Street.

US Expressway 83

Responsible for the development of the plans, specifications and estimates, drainage area map, design of storm sewer system (hydrology and hydraulics), and utility coordination for US 83 from Inspiration Road to Showers Road. Analyzed and designed the Abram Road Outfall from US Expressway 83 to BUS 83 which consisted of ditch widening and upgrading and/or adding new culverts.

FM 494 (Shary Road)

Responsible for the development of the plans, specifications and estimates, drainage area map, design of storm sewer system (hydrology and hydraulics), and utility coordination for Shary Road from US Expressway 83 to FM 1016. Analyzed, designed, and preformed Scour Analyses for two major crossings (outfalls).

Bar 5 Subdivision

Responsible for the development of the plans, specifications and estimates, drainage area map and design of storm sewer system (hydrology and hydraulics), traffic control plans, utility coordination, signage, pavement

markings and construction management for Bar 5 Subdivision (Elizabeth Street, Efrain Street, and Yvonne Street.

DRAINAGE

J-08 Hidalgo County Drainage Project in Hidalgo County, Texas

Responsible for assembling the Specifications and Forms of Contract, Bond and Proposal and the Bid Documents.

5th & 7th Drainage Improvements in the City of Harlingen, Texas

Responsible for the preliminary design of drainage improvements in the Harlingen Area known as 5th & 7th (System 21). Project also included the preliminary design of Traffic Control Plans, SW3P layouts, and estimate of quantities.

City of Harlingen Downtown Drainage Project

Responsible for the development of the plans, specifications and estimates, drainage area map and design of storm sewer system (hydrology and hydraulics), traffic control plans, utility coordination, signage, pavement markings and construction management for the Harlingen Downtown Drainage Improvements from Bus 77 and Jefferson Avenue to 3rd and Monroe Avenue.

Torres Acres Roadway and Drainage Improvements

Responsible for the development of the plans, specifications, and estimates, utility coordination, and construction support services for the improvements of the intersection of Trenton at Auburn/33rd Street.

North Main Drain – Hidalgo County

In collaboration with Hidalgo County Precinct 4 and the Hidalgo County Drainage District No. 1, this project entailed widening an existing drainage ditch to enhance storage capacity and accommodate maintenance access. Throughout the planning phase, tasks included creating a horizontal alignment and natural ground profile for the ditch, used to generate plan & profile sheets. Collaboration with the Project Engineer was crucial in devising proposed typical sections, addressing right-of-way issues and potential conflicts. Cross sections were then computed to determine earthwork quantities, included in the final plans. Adherence to specific project design standards mandated by Hidalgo County Drainage District No. 1 was ensured.

Esperanza Drainage Improvements Project

Responsible for the development of the plans, specifications, and estimates, utility coordination, and construction support services for the drainage improvements for the Esperanza Drainage Improvement Project.

Hickory Hill Drainage Improvements

Responsible for the development of the hydrology and hydraulic report, plans, specifications, and estimates, utility coordination, and construction support services for the improvements of the Hick Hill Culvert Crossing.

CONSTRUCTION

Dove Avenue Widening Project

Responsible for the development of the plans, specifications, and estimates, utility coordination, and construction support services for the widening of Dove Avenue from Bicentennial Blvd to 23rd Street.

Trenton At Auburn Street Improvements

Responsible for the development of the plans, specifications, and estimates, utility coordination, and construction support services for the improvements of the intersection of Trenton at Auburn/33rd Street.

PEDESTRIAN ELEMENTS

City of Edinburg Jackson Road Hike and Bike Trail

Responsible for the development of the plans, specifications and estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the Jackson Road Hike and Bike Trail from University Drive to Canton Road. This project was funded through the Hidalgo County Metropolitan Organization Transportation Alternative Program.

City of Edinburg Cano Walking Trail

Responsible for the development of the plans, specifications and estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the Cano Hike and Bike Trail from Cano Street to Freddy Gonzalez Drive. This project was funded through a healthy living grant from the Edinburg Independent School District.

Jules M. Morris, Jr., P.E.

QA/QC

Mr. Morris has over 37 years' experience in QA/QC, roadway design and traffic engineering. His past roadway design experience includes preliminary/final roadway geometry utilizing RDS roadway CADD schematics, roadway widening, drainage improvements. Traffic engineering includes freeway capacity/level of service analysis, traffic impact studies, signal warrants, traffic control plans, traffic signalization, intelligent transportation systems (ITS), signing, pavement markings and roadway illumination.

Professional Experience

- **Sam Houston North Toll Plaza – Harris County TX.** Mr. Morris served as QA/QC Manager for the design of schematics and PS&E for conversion of the toll plaza from combination of cash and electronic to an AET facility including, removal of existing toll booths and existing gantry, removal of barrier separating lanes. Design included new lane configuration, revised access to existing building, new 190' toll gantry, widening of pavement for 5 lanes with 10' shoulders, revised inlets and manholes due to widening. Also included a detailed traffic control and accompanying SW3P for safe construction.

- **SH 99 SB Frontage Road; Cinco Ranch Blvd to Westheimer Pkwy – Fort Bend County TX.** Mr. Morris has served as QA/QC Manager for the schematic and PS&E development for the proposed southbound frontage road. In designing the frontage road, removed the existing ramps, provided ramp reversal design, retaining walls, complex traffic control, pedestrian facilities within a very limited ROW and extensive adjacent development.

- **TxDOT Transportation Planning: SH 242 (from IH 45 to FM 1488) and SH 35 (from FM 1462 to FM 523)**. Project Manager for TxDOT Houston District towards projecting traffic volumes on SH 242 and SH 35 with the goal of improving mobility. The projected traffic volumes included Annual Average Daily Traffic (AADT), Design Hourly Volume (DHV), Directional Design Hourly Volume (DDHV), Truck AADT, Truck DHV etc. In each of the projects, traffic growth rates were calculated from historical traffic volumes and local Metropolitan Planning Organization's (MPO) travel demand model results. AADT for the Years 2010, 2015 and 2035 was calculated by applying the growth factor to the current AADT. Then, DHV, DDHV, truck DHV were calculated based on the K-factor, directional distribution, truck percentage. Using CALYPSO 5.1 Turns program, turning AADT volumes at each intersection along the study corridor were projected. Based on the existing and projected traffic volumes, Level of Service Analysis for various roadway segments under "no-build" and "build" conditions for Years 2010, 2015 and 2035 were performed.

Jose A. Sanchez, P.E.

Deputy Project Manager/Traffic Design

Professional Registrations

Professional Engineer, State of Texas, No. 87890

TXDOT Pre-Certification No. 11832

Mr. Sanchez has over 30 years of comprehensive experience in the design of transportation engineering projects. Project experience includes Preliminary Engineering Reports (PER), H&H Studies, FEMA Benefit Cost Analysis, Traffic Studies, Schematics and Plans, Specifications and Estimates (PS&E) for roadway design, drainage design, culvert layouts, small/large drainage areas, typical sections, earthworks, cross-sections, vertical/horizontal alignments, removal layouts, driveway layouts, SW3P, Utility Coordination, Metes and Bounds, ROW Acquisition, Railroad Permitting, Construction Management/Support Services, traffic control design, sequence of construction, detour layouts, illumination design, traffic control, intelligent transportation systems, tolling design, signing design, pavement marking design, traffic signal design, general notes, specifications and construction cost estimates.

Professional Experience

ROADWAY

Hardy Toll Rd – IH 610 to IH 45

The Project Manager responsible for a large sign schematic for 21 miles of Hardy Toll Rd in Houston, TX, with incidental limits extending to IH 610, IH 45, Beltway 8, FM 1960, and Hardy Toll Airport Connector, totaling 34 miles. This included analyzing existing signage and proposing 228 large guide sign panels, with recommendations for 23 overheads, 42 cantilever, 69 bridge-mounted, and 16 ground-mounted structures.

LP 375 – US 62/180 (Montana) to Tank Crossing No. 5

The Project Manager responsible for the development of PS&E for ITS and Illumination Design. ITS components included fiber optic backbone, CCTV, DMS, HAR, Bluetooth, lane control signals, and radar vehicle sensing devices. Illumination design encompassed conventional luminaires, high mast assemblies, underpass lighting, utility coordination, and coordination with El Paso International Airport and FHWA.

Border Safety Facility Inspection (BSIF)

The Project Manager responsible for the PS&E for the BSIF at the Pharr – Reynosa International Bridge, which included tasks like ITS,

30+ Years of Experience

Education

B.S., Civil Engineering, Texas A&I University, 1992
M.S., Civil Engineering, Stanford University, 1994

TxDOT Pre-Certifications/ Registrations

- 7.5.1 - Intelligent Transportation System

Professional Expertise

Roadway, Traffic Control, Traffic Signalization, Illumination, Drainage, Intelligent Transportation Systems, H&H Studies, Signing, Pavement Marking, Tolling, Schematics and Plans, FEMA Benefit Cost Analysis, Specifications and Estimates (PS&E), SW3P, Medes and Bounds, ROW Acquisition, Utility Coordination, Railroad Permitting, Construction Management/Support Services, cross-sections, earthworks, vertical/horizontal alignments, detour layouts, culvert layouts, removal layouts, driveway layouts.

jasanchez@tedsi.com (956) 424-7898 www.tedsi-infrastructure.com

illumination, signing, and pavement markings. The project entailed installing a Vehicle Screening System with various components like Weigh in Motion System, Dimensioning System, Static Scales, Snapshot cameras, Transponder System, Flow Manager System, CCTV cameras, DMS, and VIVDS. Additionally, the project involved estimating construction costs, preparing diagrams and layouts, detailing TMS, and selecting standards and specifications.

US 83 - Sugar Rd to Bentsen Rd

The project involved widening and reconstructing 6.4 miles of US 83 in McAllen, TX, including main lanes, bridge approaches, and frontage roads. Tasks encompassed field inventory, site review, and developing traffic signal plans for five diamond intersections. Signing tasks included creating guide sign panels, sign structures, and summarizing existing and proposed signs. Pavement marking design included layouts and summaries.

TRAFFIC

LP 375 El Paso, TXDOT El Paso District - Project Manager responsible for Traffic PS&E associated with proposed widening and reconstruction of LP 375 from Fonseca Dr to Padres Dr in El Paso TX. Tasks included photometric analysis, illumination design using conventional luminaires, high mast assemblies and underpass lighting.

US 77/83, Brownsville, TXDOT Pharr District - Project Engineer responsible for Traffic PS&E associated with widening and reconstruction of US 7783 – 14th St to FM 3248 in Brownsville TX. Traffic engineering tasks included traffic signal warrants, permanent-temporary traffic signal design for diamond interchanges, pavement markings design, illumination design, large guide sign panel design, overhead structures design, large ground mounted sign design and small signing design.

US 83, Weslaco-Mercedes, TXDOT Pharr District - Project Engineer responsible for Traffic PS&E associated with widening and reconstruction of US 83 – FM 1423 to FM 1015 in Weslaco TX. Traffic engineering tasks included illumination design, traffic signal design for diamond interchanges, pavement markings design, design, large guide sign panel design, overhead structures design, large ground mounted sign design and small signing design.

US 83/SH 359 Interchange, Laredo, TXDOT Laredo District - Project Engineer responsible for Traffic PS&E associated with proposed interchange in Laredo TX. Traffic engineering tasks included traffic signal design, pavement markings design, large guide sign panel design, overhead structures design, large ground mounted sign design and small signing design.

INTELLIGENT TRANSPORTATION SYSTEMS

365 Toll Rd – Anzalduas Connector Rd to US 281 (Military Hwy), Hidalgo County RMA

Project Manager responsible for 13 miles of PS&E for ITS and Toll System including toll zone pavement design, 36 CCTV, 27 single lane Bluetooth detection, 4 multi-lane Bluetooth detection, 43 Radar Vehicle detectors, 4 LED DMS, 4 Wireless Antennas, 9 Toll Gantries Structures integrated using over 38 miles of single mode fiber optic with redundancy, 82 cabinets, 93 patch panels, 46 ITS poles, 238 TY 1 ground boxes, 165 TY 2 ground boxes w/splice enclosures, over 2800 fiber splices and Traffic Management Center Electronics/Software.

US 62/180 (Montana Ave) – Global Reach to Tierra Este. TXDOT El Paso District

Project Manager responsible for 5 miles of PS&E for ITS System including 7 CCTV, 6 multi-lane Bluetooth detection, 6 Radar Vehicle detectors, 8 LED DMS, 2 HAR integrated using over 16 miles of single mode fiber optic, 16 cabinets, 70 patch panels, 6 ITS poles, 128 TY 1 ground boxes and one TY 2 ground box w/splice enclosure.

Toll System Integration Request of Proposals, Hidalgo County RMA

Project Manager responsible for development of Request for Proposal (RFP) to procure selection of Toll System Integrator (TSI) for HCRMA. Tasks included TSI RFP preparation, TSI RFP submittals evaluation/recommendation and negotiating agreement between HCRMA and selected TSI. TSI RFP development included 16 volumes: introduction, project description, general provisions, infrastructure, system requirements, system implementation/testing, operations/maintenance, deliverables, performance requirements, scoring methodology, pricing sheets, technical response guide, payment bond, performance bond, agreement and glossary.

DRAINAGE

23rd St – Dicker Rd Water Main/Force Main Extension, McAllen TX, City of McAllen

The Project Manager developed a Preliminary Engineering Report, Schematic, and PS&E for a water main project involving:

- 16" water main on the east side of 23rd St - FM 1016 to Dicker Rd
- 12" water line on the north side of Dicker Rd - 23rd St to McColl Rd.

The report covered existing and future conditions, utilities, design alternatives, and cost estimates. The schematic included plans for water lines and future road widening on Dicker Rd. PS&E included general notes, quantities, plan and profiles, standards, specifications, and bid documents. Coordination and permitting were conducted with multiple agencies including City of Hidalgo, IBWC, Texas Commission on Environmental Quality, Texas Parks and Wildlife Department, US Army Corps of Engineers, TXDOT and others.

Evangeline Gardens Subdivision Sanitary Sewer Improvements, City of Edinburg

Project Manager responsible for design production of PS&E for sanitary sewer system improvements within the Evangeline Gardens Subdivision, consisting of approximately 3,300 linear feet of 8" sanitary sewer lines, manholes, service connections, and existing pump analysis. Coordination with the City of Edinburg and various utility companies.

9th at 13th St Storm Sewer Improvements, Harlingen TX, City of Harlingen

The project focused on Drainage PS&E, involving hydraulic and hydrologic (H&H) studies and analysis for proposed improvements. It entailed replacing the existing storm sewer system along 9th and 13th St, with tasks including FEMA BCA preparation, H&H Study, and developing Plan and Profile sheets, drainage areas, and stormwater pollution prevention plan. Coordination with TXDOT for Tyler Ave crossing approval was crucial. Additionally, the project involved pre-bid conferences, bid analysis, preconstruction meetings, and addressing Requests for Information (RFI).

Rene Garza, P.E.

Roadway Design Task Leader

Mr. Garza has over 28 years of experience with TxDOT in planning, design and construction management of transportation engineering projects. His background includes roadway design, construction oversight, corridor evaluation, and early concept development to identify and advance roadway and safety improvements. As an Area Engineer, he managed project delivery, coordinated multidisciplinary teams, and ensured compliance with State and Federal requirements. Mr. Garza has participated in and presented at numerous public meetings and stakeholder engagements, communicating project needs, gathering community input, and integrating feedback into project concepts. His experience spans project planning, PS&E development, construction management, and public outreach for a wide range of TXDOT transportation initiatives.

Professional Experience

CONCEPT DEVELOPMENT

Responsible for identifying roadway needs, evaluating corridor conditions, and developing preliminary project concepts for transportation improvements. Duties include early-stage feasibility assessments, coordination with design and construction teams, preparation of preliminary alternatives, and support for advancing projects into PS&E development. Concept development activities also include reviewing operational constraints, assessing constructability, and ensuring alignment with TxDOT standards and district priorities. Projects:

- TxDOT – FM 2220(Ware Road)(Concept Alternatives Development)
- TxDOT – IH-69C/IH-2 Interchange(Preliminary Corridor Evaluation)
- TxDOT - Four Year Roadway Improvement Plan(Roadway Needs Identification)
- TxDOT – IH-69 Connector(Workshop Support)

PUBLIC ENGAGEMENT

Responsible for supporting and conducting public involvement activities for transportation projects, including preparing presentation materials, attending public meetings, presenting project information, and gathering community feedback. Duties include coordinating with stakeholders, responding to public inquiries, documenting comments, and integrating community input into project concepts and decision-making. Engagement efforts ensure transparency, improve project understanding, and strengthen support for proposed improvements. Projects completed:

- TxDOT – FM 2220(Ware Road)
- TxDOT – SH 107(University Drive)
- TxDOT – IH-69C/IH-2 Interchange(Public Involvement Support)
- TxDOT – IH-69C Corridor(Public Involvement Support)

- 10.2.1 - Roadway Hydraulic Design
- 11.1.1 – Roadway Construction Management & Inspection
- 11.2.1 - Bridge Construction, Management &Inspection

Professional Expertise

Roadway Design, Hydrologic & Hydraulic Analysis & Design, Bridge Scour Analysis, Culvert Design, PS&E, Drainage Design/Analysis, SWPPP, Traffic Control, Signing, Pavement Markings, and Construction Management

TxDOT Experience (26+ Years)

-Pharr Area Engineer(8 years)
-District Design Engineer(2 years)
-Lead Design and Construction Engineering Roles(16 years)

rene.garza@tedsi.com (956) 424-7898 www.tedsi-infrastructure.com

Carolina Ivonne Ramirez, P.E

Water Resources Task Leader

Ms. Ramirez has 5 years of experience in the design and construction management of civil engineering projects. Project experience include Hydrologic and Hydraulic studies, SWPPP, plan, design, review and construction of stormwater infrastructure as well as Plans, Specifications and Estimates (PS&E) for various projects such as, traffic control, signing, pavement markings, roadway design and drainage design/analysis, utility coordination, transportation and construction management services for local government facilities, Federal Emergency Management Agency (FEMA), and the Texas Department of Transportation (TXDOT) Projects.

5 Years of Experience

Professional Registrations
P.E, State of Texas, No. No. 158152
LGPP Certified

Education
B.S. Civil Engineering, University of Texas Rio Grande Valley, 2020

Professional Expertise
Hydrologic & Hydraulic Analysis & Design, Culvert Design, PS&E, Drainage Design/Analysis, SUE, SWPPP, Traffic Control, Signing, Pavement Markings, Roadway Design, Cost Analysis (BCA), and Construction Management

Professional Experience

DRAINAGE/WATER RESOURCES

Designed storm drainage systems, including drainage area delineation, time of concentration calculations, land use assessments, pipe sizing, and system layout. Performed H&H modeling in HEC-RAS and HEC-HMS, generating pre- and post-mitigation inundation maps. Delivered drainage area maps, H&H reports, benefit-cost analyses (BCA), and drainage PS&E per TxDOT and FEMA standards.

- 13th and Harrison Drainage Improvements H&H Analysis & BCA – City of Harlingen (FEMA STANDARDS)
- 5th & 7th Drainage Improvements (Drainage System 21) – City of Harlingen
- J-01 Drainage Improvements
- Old Alice Road Storm Drainage Improvements – City of Brownsville
- Trenton Road Roadway Improvements

UTILITIES

Coordinated with utility providers to identify and map existing infrastructure, prevent conflicts with proposed drainage and roadway designs, and support permitting and project coordination with agencies and municipalities. Analyzed pipe layouts, sizes, and slopes to minimize conflicts with existing sewer and utility lines.

- Old Alice Road– City of Brownsville
- 5th & 7th Drainage Improvements– City of Harlingen
- Trenton Road Roadway Improvements

DESIGN

Responsible for the development of the plans, specifications and estimates, drainage area map, hydrology, hydraulics, traffic control plans, utility coordination, signage, pavement markings, traffic signals, and SWPPP.

- 13^{th} and Harrison Hydrologic & Hydraulic Analysis Study(< 5 years)
- 5^{th} & 7^{th} Drainage Improvements (< 5 years)

In accordance with the Memorandum of Agreement between the
EL PASO HISPANIC CHAMBER OF COMMERCE (EPHCC)
and the Texas Comptroller of Public Accounts (CPA), the CPA hereby certifies that

TEDSI Infrastructure Group, Inc.

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **May 22, 2024**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day-to-day management, operational control, addresses, phone and fax numbers or authorized signatures) provided in the submission of the business; application for registration/certification into EPHCC's program, you must immediately (within 30 days of such changes) notify EPHCC's program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibiliy. If your firm ceases to remain certified in the EPHCC's program, you must apply and become certified through the State of Texas HUB program to maintain your HUB certification.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

Disadvantaged Business Enterprise Program

This certifies that the following listed firm is certified as a **DBE**
in accordance with 49 Code of Federal Regulations Part 26

TEDSI Infrastructure Group, Inc. (VN: 26838)

This Certificate is subject to suspension or revocation, and DBE information verification annually, upon the anniversary month. Current certification information will be listed in the Texas Unified Certification Program (TUCP) Directory located at
https://txdot.txdotcms.com

CONFLICT OF INTEREST
DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____
_____
_____

SENATE BILL 19 VERIFICATION

I, Jesus Salinas, the undersigned representative of TEDSI Infrastructure Group, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

TEDSI Infrastructure Group, Inc.

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

N/A

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☑ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☑ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

N/A

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

Edinburg, Texas 78541

Dear Evaluation Committee:

Trimad Consultants, LLC is pleased to submit this Statement of Qualifications (SOQ) in response to RFQ No. 2026-7 – Professional Engineering Services. We appreciate the opportunity to be considered for inclusion on the City of Edinburg's Professional Engineering Services Pool.

Trimad is a South Texas-based civil engineering firm providing planning, design, construction administration, and consulting services to municipalities and public agencies throughout the Rio Grande Valley. Led by Ricardo Salazar, P.E., with more than 21 years of municipal engineering experience, our team has successfully delivered water, wastewater, drainage, roadway, and utility infrastructure projects throughout South Texas. Our local presence, experienced staff, and commitment to responsive service position us to efficiently support the City's municipal infrastructure and professional engineering needs.

Our firm's capabilities include:

- Civil engineering planning and design
- Water, wastewater, drainage, roadway, and utility improvements
- Construction administration and construction observation
- Utility coordination and permitting
- Feasibility studies and cost estimating
- Preparation of plans, specifications, and estimates
- Bid phase services and engineering support

Primary Point of Contact

Ricardo Salazar, P.E.

President, Trimad Consultants, LLC

1103 N. Raul Longoria Road, Building C San Juan, Texas 78589

Office: (956) 688-8860 | Email: rsalazar@trimadstx.com

Trimad Consultants, LLC acknowledges that no addenda have been issued for RFQ No. 2026-7 as of the date of this Statement of Qualifications.

Trimad Consultants, LLC has carefully reviewed the requirements of RFQ No. 2026-7 and is prepared to provide responsive, high-quality professional engineering services in accordance with the City's needs. I certify that I am authorized to execute this Statement of Qualifications on behalf of Trimad Consultants, LLC and to legally bind the firm.

Thank you for your consideration. We appreciate the opportunity to submit our qualifications and look forward to the opportunity to serve the City of Edinburg.

Sincerely,

Ricardo Salazar, P.E.

SECTION 2

FIRM QUALIFICATIONS

WHY TRIMAD?

CITY OF EDINBURG

WHY TRIMAD FOR PROFESSIONAL ENGINEERING SERVICES

Trimad Consultants understands that the City of Edinburg is seeking qualified engineering firms to provide professional engineering services on an as-needed basis in support of a wide range of municipal infrastructure projects and municipal initiatives. As a South Texas-based civil engineering firm, Trimad is well-positioned to serve as an extension of the City's Engineering Department by delivering responsive technical support, practical engineering solutions, and dependable project coordination from planning and design through construction. Our team is committed to maintaining open communication, meeting project schedules, coordinating with regulatory agencies and utility providers, and providing the flexibility necessary to support multiple assignments as the City's needs evolve.

Trimad offers the following advantages:

- **Responsive Local Support** – Located in the Rio Grande Valley, our team is readily available to respond quickly to project assignments, meetings, field investigations, and coordination with City staff.
- **Comprehensive Municipal Engineering Experience** – Our professionals have successfully planned, designed, and supported the construction of water, wastewater, roadway, drainage, utility, and municipal infrastructure projects for municipalities throughout South Texas.
- **Strong Utility & Agency Coordination** – We routinely coordinate with utility providers, TxDOT, TCEQ, USACE, irrigation districts, railroad companies, and other regulatory agencies to keep projects moving efficiently through design and permitting.
- **Flexible Staffing for Multiple Assignments** – Trimad maintains experienced engineering, design, and field personnel capable of supporting multiple concurrent projects while providing responsive communication and dependable service.
- **Commitment to Partnership** – We believe successful projects begin with strong working relationships. Our team emphasizes communication, accountability, and collaboration to help the City deliver quality infrastructure improvements that meet schedule, budget, and community expectations.

FIRM QUALIFICATIONS & EXPERIENCE

CITY OF EDINBURG

FIRM QUALIFICATIONS

Trimad Consultants, L.L.C. is a Texas-based civil engineering firm providing professional engineering, planning, design, consulting, and construction administration services throughout South Texas and the Rio Grande Valley. Although incorporated in 2017 and operational since 2019, Trimad's leadership team possesses extensive experience delivering municipal infrastructure projects for cities, counties, utility districts, and other public-sector clients throughout the region.

Trimad specializes in delivering engineering solutions that meet the operational, technical, budgetary, scheduling, and regulatory needs of public-sector clients. Our team understands the importance of responsive service, efficient communication, and maintaining project schedules while coordinating with City staff, regulatory agencies, utility providers, contractors, developers, and other project stakeholders.

The firm is registered with the Texas Board of Professional Engineers and Land Surveyors (TBPELS) and maintains all licenses, registrations, and insurance required to provide professional engineering services throughout the State of Texas.

Trimad is also certified as:

- Emerging Small Business Enterprise (ESBE)
- Hispanic American Business Enterprise (HABE)
- Minority Business Enterprise (MBE)
- Small Business Enterprise (SBE)
- TxDOT Disadvantaged Business Enterprise (DBE)
- SBA 8(a) Certified Firm

UNDERSTANDING OF THE CITY OF EDINBURG'S NEEDS

Trimad understands the City of Edinburg's need for a dependable engineering partner capable of providing timely, high-quality professional engineering services across a variety of municipal infrastructure projects. Our team is prepared to respond quickly to task assignments, coordinate closely with City staff, and deliver practical engineering solutions that support the City's long-term capital improvement goals.

MUNICIPAL EXPERIENCE

Trimad Consultants has extensive experience providing engineering services for municipalities throughout South Texas and the Rio Grande Valley. Our team has successfully delivered water, wastewater, drainage, roadway, and utility infrastructure projects while coordinating with regulatory agencies, utility providers, contractors, developers, and local governments. This municipal experience provides our team with a strong understanding of the technical requirements and coordination necessary to successfully deliver municipal infrastructure projects.

FIRM QUALIFICATIONS & EXPERIENCE

CITY OF EDINBURG

ENGINEERING SERVICES

Trimad Consultants provides professional engineering services to municipalities and public agencies throughout South Texas, supporting municipal infrastructure projects from planning and design through construction and project closeout. Our team delivers practical engineering solutions that address the technical, operational, budgetary, and scheduling needs of public-sector clients while maintaining effective coordination with City staff, regulatory agencies, utility providers, contractors, and other project stakeholders.

Our services include planning, preliminary engineering, civil engineering design, preparation of plans, specifications and estimates, cost estimating, bid phase services, construction administration, construction observation, field investigations, utility coordination, permitting assistance, project management, and project closeout support.

SELECTED REPRESENTATIVE PROJECTS INCLUDE:

- City of Pharr – Sanitary Sewer Collection Improvements
- City of Pharr – Water Transmission Main Improvements
- City of Pharr – Headworks Improvements Project
- City of Pharr – Lift Stations No. 10, 18 & 40 Elimination Project
- City of Pharr – Lift Station No. 23 Relocation
- Harlingen Headworks System – WWTP Headworks Equalization Basin & Influent Lift Station Improvements
- City of Alamo – Water Treatment Plant Improvements
- City of Alamo – Morningside South Sewer Project
- City of San Benito – Ratliff 12-Inch Waterline Improvement Project
- City of San Benito – Sanitary Sewer Improvements Project
- City of San Juan – Lift Station No. 6 Relocation Project
- City of Donna – Engineering Services
- City of La Villa – Drainage Improvements
- Kleberg County – Sidewalk Improvements

These representative projects demonstrate Trimad Consultants' experience providing planning, engineering design, permitting, bidding, construction administration, utility coordination, and project management services for municipal infrastructure improvements throughout South Texas. This experience has equipped our team to provide responsive, dependable engineering services that support the City of Edinburg's infrastructure needs.

Representative/ Reference Projects

THE CITY OF Edinburg

Ricardo Salazar, P.E., President of Trimad Consultants, LLC, brings over 21 years of civil engineering experience across water/wastewater, roadway, and drainage infrastructure. Before establishing Trimad in 2019, Mr. Salazar gained extensive expertise working with leading engineering and construction firms, which today enhances Trimad's technical capacity and project delivery capabilities.

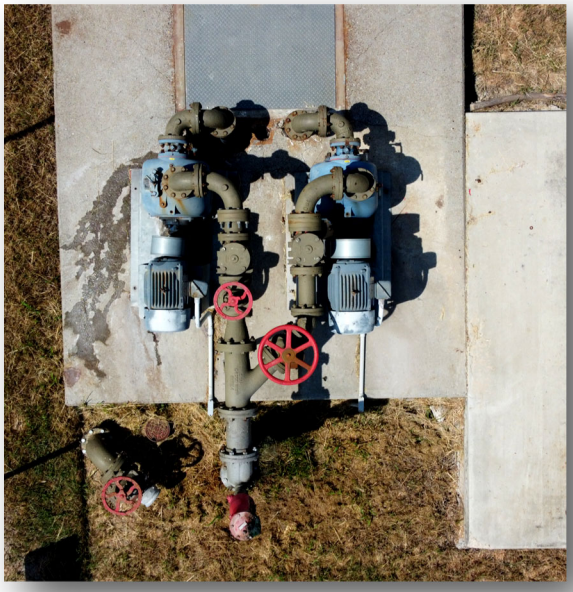
Under his leadership, Trimad is supported by a dedicated team of Graduate Engineers alongside an experienced Senior Designer with extensive industry expertise. Together, the team combines strong technical knowledge, practical field experience, and innovative problem-solving capabilities to deliver efficient, cost-effective engineering solutions. Working under Mr. Salazar's direct supervision and mentorship, the team remains committed to maintaining high standards of quality, responsiveness, and professional growth. Trimad focuses its efforts in South Texas, where our reputation is built on quality work, responsive service, and lasting client relationships. Client references included in this Statement of Qualifications reflect Trimad's commitment to responsive service, technical excellence, and successful project delivery. Our Statement of Qualifications includes representative Trimad projects as well as relevant work completed by our staff prior to joining the firm, supported by detailed resumes.

Trimad has delivered numerous projects requiring compliance with *municipal, state, and federal standards.* Our experience includes roadway reconstruction, drainage improvements, water/wastewater infrastructure, and environmental permitting for municipalities across the Rio Grande Valley. We have successfully coordinated with regulatory agencies to secure approvals such as:

- **TxDOT Utility Permits**
- **City Right-of-Way Permits**
- **Floodplain Development Permits & Railroad Crossing Permits**
- **U.S. Army Corps of Engineers (Nationwide 404 & Wetlands)**
- **Texas Historical Commission Clearances**
- **Texas Water Development Board Approvals**
- **U.S. Fish & Wildlife Service Reviews & Texas Parks & Wildlife Coordination**
- **U.S. Environmental Protection Agency Requirements**

This regulatory expertise, combined with our strong local presence and proven technical capabilities, ensures Trimad is well-prepared to support the City of Edinburg with efficient, compliant, and high-quality engineering solutions.

REPRESENTATIVE/ REFERENCE PROJECTS



CATEGORY: WASTEWATER/CONSTRUCTION MANAGEMENT

City of Pharr - Lift Station No.31 and Force Main Improvements

Total Project Cost: ***Estimated at $3.0 Million*** ***Federal Funding Agency:*** ***TWDB***

Description and Scope of Work:
Trimad is helping design a project to move and upgrade a sewer lift station located near Rudy's Country Store & Bar-B-Q. As part of the project, about 4,700 LF of 10-inch pipe will be installed to carry wastewater. The team is reviewing existing utility maps and working closely with phone and gas companies to avoid conflicts with underground lines. The new pipe will run from Eldora Road, go north along the right side of a drainage ditch to Nolana Road, then turn east toward Rudy's, where it will connect to the new lift station. The project is currently in the design phase.

Role:
TRIMAD prepared permits, design, and construction phase services. The scope of services involved

Project Manager/Engineer/ Designer:	**Ricardo Salazar, P.E, Jose Perez**

Representative/ Reference Projects

CATEGORY: DRAINAGE IMPROVEMENTS/CONSTRUCTION

City of Alamo– Laguna Park Improvements Project

Total Estimated Project Cost: 282k ***Municipal Project***

Description and Scope of Work:

The Laguna Alamo Project consists of site cleanup, feasibility analysis, drainage evaluation, and coordination with regulatory agencies to facilitate improvements to the Laguna Park detention property in Alamo, Texas. The project involves interagency coordination with TxDOT, Hidalgo County Irrigation District No. 2 (HCID #2), the City of Alamo, and the Alamo EDC to address drainage discharge, easements, right-of-way considerations, and long-term land use planning. The effort includes boundary verification, topographic data collection, permitting, and preparation of feasibility documentation to support funding applications and future development or infrastructure improvements.

Role:

Trimad is serving in a dual capacity as both the civil engineering consultant and construction services provider, managing project coordination, permitting, feasibility evaluation, and on-site cleanup operations. On the civil engineering side, Trimad is managing agency coordination, permitting (including TxDOT RULIS application), boundary and topographic surveys, feasibility study preparation, funding exhibits, and project presentations to governing entities. On the construction side, Trimad is responsible for site mobilization, debris removal, clearing within approved limits, and on-site coordination to prepare the property for evaluation and future improvements. Overall, Trimad is overseeing both the technical planning and the physical site cleanup necessary to position the project for funding and long-term development.

Representative/ Reference Projects

CATEGORY: WASTEWATER/CONSTRUCTION MANAGEMENT

City of San Juan - Lift Station #6 Relocation Project

Total Project Cost: ***$3.4 Million*** ***Federal Funding Agency*****:** ***EPA***

Description and Scope of Work:

The City of San Juan contracted TRIMAD for the development of a new lift station, including geotechnical evaluation with a 35-foot bore and buoyancy testing to support the design of a fiberglass wet well. TRIMAD performed surveying and topographic mapping, providing AutoCAD files with lot lines, control points, and easements. The firm also supplied design coordination, including invert elevation data and civil/MEP plan sets at multiple design phases for city review. TRIMAD managed all construction-phase tasks, including bidding support, inspections, and final as-built documentation.

Role:

TRIMAD's role included data collection such as geotechnical borings, topographic surveying, and providing site-specific details like lot lines, control points, and invert elevations. The firm also coordinated closely with the City of San Juan to support design development, submittals, and construction documentation.

Representative/ Reference Projects

CATEGORY: ROAD/STREET IMPROVEMENTS

City of Bishop– Main St Road Improvements (TXGLO-TxCDBG)

***Total Project Cost:** Estimated at 506K* ***Federal Funding Agency:** TXGLO-TXCDBG*

Description and Scope of Work:

The proposed project under the Texas Community Development Block Grant Program aims to address these issues through the following scope of work: Street Rehabilitation: The project involves milling and overlaying the roadway on Main Street, from Ash Avenue to Birch Avenue. This process will remove the damaged top layer of pavement and apply a new, smooth surface to restore safe and functional road conditions.

Sidewalk Construction: New sidewalks will be installed to improve pedestrian access and safety. The coverage includes sidewalk on Main St from Ash Avenue to Cedar Avenue and on Birch Avenue from South Main St to N E 4th St, as shown on the map. This addition will provide a designated walking area, enhancing mobility and connectivity for residents.

Lighting Improvements: The project includes the replacement of 5 broken light posts with new, functional lighting. This upgrade will improve street visibility and safety, particularly during the evening and nighttime hours.

Role: Trimad provided all services related to the design. This includes civil engineering, design plans, specification bidding documents, permitting, environmental clearances, bidding documents, and construction phases services.

Representative/ Reference Projects

CATEGORY: WASTEWATER/CONSTRUCTION MANAGEMENT

City of Pharr - Lift Stations Number 10, 18 & 40 Elimination Project

Total Project Cost: $5.1 Million ***Federal Funding Agency: EPA***

Description and Scope of Work:
This project involves shutting down an existing lift station and replacing it with a new system that uses gravity to move wastewater through a 24-inch sewer pipe. In addition, a new lift station will be built, along with the installation of 5,097 feet of 12-inch pressurized pipe (called a force main) to help carry wastewater where gravity flow isn't possible. These improvements will make the sewer system more efficient and reliable for the community.

Role:
TRIMAD prepared permits, design, and construction phase services. The scope of services involved data collection, design plan creation, topographic data collection, and overseeing construction.

Representative/ Reference Projects

CATEGORY: WATER INFRASTRUCTURE IMPROVEMENTS

City of San Benito - Ratliff 12-Inch Waterline Improvement Project

Total Project Cost:* *Estimated at $1.2 Million

Municipal Project

Description and Scope of Work:

The City of San Benito Ratliff 12-Inch Waterline Improvement Project includes the installation and testing of approximately 6,382 linear feet of 12-inch waterline, trench excavation safety systems, stormwater pollution prevention measures, traffic control, paving restoration, and protection or relocation of existing utilities. The project requires coordination with agencies such as the City of San Benito, Cameron County, TCEQ, and TWDB. It is currently in the design phase, with permits and approvals in progress, and will soon move into the construction phase to install the new waterline system while minimizing disruptions to nearby residents and businesses.

Role:

The scope of services for Trimad involved data collection, design plan creation, and topographic data collection. Once the design is finalized, the project will advance into the construction phase.

Project Owner and Contact:	**City of San Benito** **Enrique Hernandez, Planning Director** **(956) 361–3804** **Email: Ehernandez@cityofsanbenito.com**
Project Manager/Engineer/ Designer:	**Ricardo Salazar, P.E**

Representative/ Reference Projects

CATEGORY: WASTEWATER/CONSTRUCTION MANAGEMENT

City of San Juan - Alta Vista Waterline and Sanitary Sewer Improvements

Total Construction Cost: $988K ***Municipal Project***

Description and Scope of Work:

The Alta Vista Waterline and Sanitary Sewer improvements project consisted of improving the waterline system and sanitary sewer along W Texas Avenue and Standard Avenue in the City of San Juan as well as milling and overlay of W Texas Avenue and Standard Avenue. The waterline improvements required 1,584 linear feet of the new 8-inch C-905 waterline and a 41 Waterline Service connection. The sanitary sewer improvements required 2,000 linear feet of new 8-inch SDR-26 sanitary sewer line, 4 - 48-inch diameter fiberglass manholes, 2 – 48-inch diameter fiberglass manholes, and 60 sanitary sewer services. Paving improvements required 8,536 square yards of mill and 2” Hot Mix Asphalt Overlay.

Role:

TRIMAD provided all services related to the design of Alta Vista waterline and sanitary sewer improvements. This included civil engineering, surveying, design plans & specification bidding documents, permitting, environmental clearances, bidding documents, and construction phases services.

Project Owner and Contact:	**City of San Juan** **Alfredo De Leon, Interim Utilities Director**

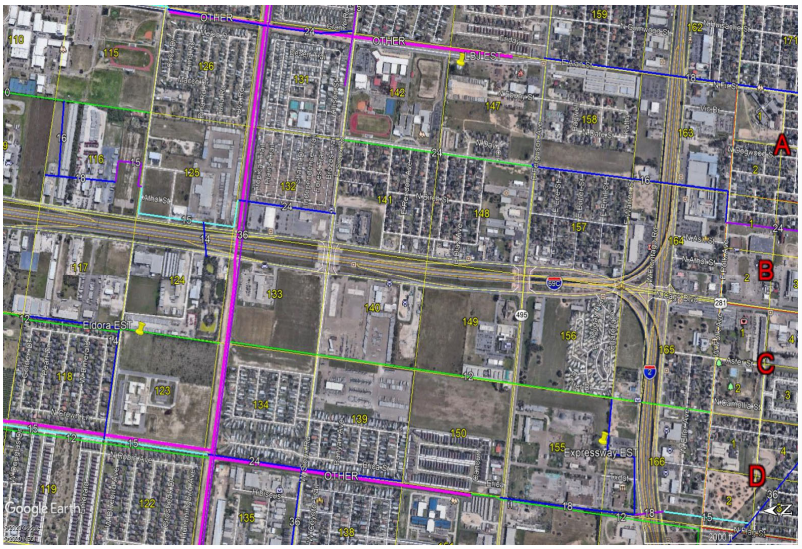
REPRESENTATIVE/ REFERENCE PROJECTS

CATEGORY: WATER INFRASTRUCTURE IMPROVEMENTS

City of Pharr - Water Transmission Main Improvements

***Total Project Cost:** Estimated at $270K* ***Federal Funding Agency:** TWDB*



Description and Scope of Work:

This project consists of installing a 16-inch Water Transmission Main to connect the Expressway Elevated Storage Tank (EST) to Eldora EST directly as per TCEQ requirements and regulations. The new transmission main will consist of a 16-inch PVC line with interconnections to existing distribution lines within the project limits.

Role:

TRIMAD prepared permits, design, and construction phase services. The scope of services involved data collection, design plan creation, topographic data collection, and overseeing construction.

Project Owner and Contact:	**City of Pharr** **Ruben Rosales, Utilities Director** **(956) 402-4000**

REPRESENTATIVE/ REFERENCE PROJECTS

CATEGORY: DRAINAGE/CONSTRUCTION MANAGEMENT

City of Donna– TxGLO 2018 STX Floods Engineering Services

Total Project Cost: Estimated at 733k ***Federal Funding Agency: TXGLO***

Description and Scope of Work:

TRIMAD Consultants were tasked with conducting thorough evaluations of the city's wastewater lift stations and designing a bypass system as part of a project funded by the Texas General Land Office (TXGLO). The project focused on assessing the current state of the lift stations, identifying essential repairs, and implementing a bypass system to ensure continuous operation during maintenance or emergency situations. This work was carried out in alignment with TXGLO's infrastructure improvement standards, aiming to enhance the efficiency and reliability of the city's wastewater management system. The scope of work included research and relevant data collection, design plans, topographic data collection, and construction phase services.

Role:

TRIMAD provided all services related to the design of the City of Donna– TxGLO 2018 STX Floods Engineering Services. This included civil engineering, surveying, design plans & specification bidding documents, permitting, environmental clearances, bidding documents, and construction phases services.

REPRESENTATIVE/ REFERENCE PROJECTS

CATEGORY: UTILITY INFRASTRUCTURE IMPROVEMENTS (WATER & SEWER)

City of Del Rio, TX– U.S Air Force (USAF) Utility Hookups Trailer

Total Project Cost: Classified ***Federal Funding Agency: USAF***

Description and Scope of Work:

This project carried out approximately 300 linear feet of 2 in water line and 775 linear feet of 6 in sanitary sewer line which were installed to provide essential utilities to a portable building at Laughlin Airforce base. The scope of work included trenching, laying, and securing the water line to ensure a reliable supply, followed by pressure testing and disinfection to meet regulatory standards. For the sanitary sewer system, three manholes were strategically placed along the 775 ft sewer line to allow for proper access and maintenance.

Role:

TRIMAD was the prime contractor for this federally funded project and provided all services related to the design and construction management of the Del Rio USAF Utility Hookups. This included civil engineering, surveying, design plans and specification bidding documents, permitting, environmental clearances, bidding documents, and construction phase services.

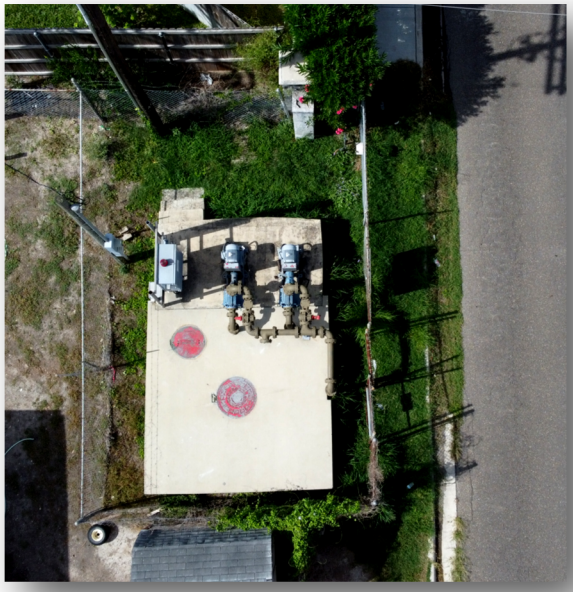
Representative/ Reference Projects

CATEGORY: WASTEWATER/CONSTRUCTION MANAGEMENT



City of Pharr- Lift Station No. 23 Relocation/Improvements Project

Total Project Cost: $2.7 Million ***Federal Funding Agency: EPA***

Description and Scope of Work:
This project involves the installation of approximately 2,630 linear feet of deep sanitary sewer line to facilitate the abandonment of existing Lift Station #23 and its relocation to a new site north of the current location. The relocation is necessary to improve system efficiency and accommodate ongoing development in the area. A parcel of land for the new lift station site will be acquired by the City of Pharr as part of the Anacua Estates Subdivision development. The project includes coordination with city departments, developers, and design teams to ensure seamless integration with existing infrastructure and future growth.

Role: TRIMAD's role has included data collection, topographic surveying, site visits, and the research and review of relevant project information. The firm has assisted with route alignment, easement identification, and coordination with the developer for land acquisition, while also providing key site data and collaborating with the City of Pharr to support design compliance and project success.

Project Owner and Contact:	**City of Pharr** **Ruben Rosales, Public Utilities Director** **(956) 402-4300**
Project Manager/Engineer/ Designer:	**Ricardo Salazar, P.E, Jose Perez**

SECTION 3

SCOPE OF SERVICES

SCOPE OF SERVICES

CITY OF EDINBURG

A. ENGINEERING SERVICES

Trimad Consultants provides comprehensive civil engineering services for municipalities and public agencies throughout South Texas. Our team has experience supporting projects from planning and design through permitting, bidding, construction administration, and project closeout. We work closely with City staff to deliver practical engineering solutions that meet project objectives, budgets, and schedules.

SERVICES INCLUDE:

- Civil engineering planning and design
- Water, wastewater, drainage, roadway, and utility infrastructure improvements
- Feasibility studies and cost estimating
- Preparation of plans, specifications, and bid documents
- Utility coordination and permitting
- Municipal Capital Improvement Program support

B. CONSTRUCTION ADMINISTRATION & FIELD COORDINATION

Trimad Consultants provides construction administration and field coordination services throughout project implementation. Our team works with City staff, contractors, utility providers, and regulatory agencies to facilitate construction activities, address field issues, review contractor submittals, and assist with project closeout while maintaining communication throughout each phase of construction.

SERVICES INCLUDE:

- Construction administration
- Construction observation and site visits
- Contractor and utility coordination
- Review of shop drawings and submittals
- Pay application review
- Change order review
- Project closeout assistance

MUNICIPAL ENGINEERING SUPPORT

Trimad Consultants provides responsive engineering support for a variety of municipal infrastructure projects and capital improvement programs. Our staff assists with project management, engineering documentation, regulatory coordination, and technical support to help successfully deliver projects from initial planning through completion.

SERVICES INCLUDE:

- Project management
- Coordination with regulatory agencies
- Utility and stakeholder coordination
- Engineering reports and technical documentation
- Bid phase support
- General engineering consulting services

SECTION 4

KEY PERSONNEL AND CAPACITY

KEY PERSONNEL & CAPACITY

CITY OF EDINBURG

KEY PERSONNEL & CAPACITY

Trimad Consultants is organized to provide responsive engineering services for municipal projects of varying size and complexity. Our team includes licensed Professional Engineers, Graduate Engineers, inspectors, CAD technicians, and administrative staff who work together to support projects from initial planning through construction and project closeout.

Depending on the City's needs, Trimad assigns personnel based on the scope and technical requirements of each project. This approach allows us to efficiently manage multiple assignments while maintaining communication with City staff, regulatory agencies, utility providers, contractors, and other project stakeholders.

FIRM CAPABILITIES INCLUDE:

- Civil engineering planning, design, and project management
- Water, wastewater, drainage, roadway, and utility improvements
- Construction administration and construction observation
- Utility coordination and permitting
- Bid phase support
- Municipal Capital Improvement Program support
- AutoCAD Civil 3D and related engineering software
- Engineering services for municipalities and public agencies throughout South Texas

The following pages include Trimad Consultants' organizational chart and resumes of key personnel available to provide engineering services for the City of Edinburg.

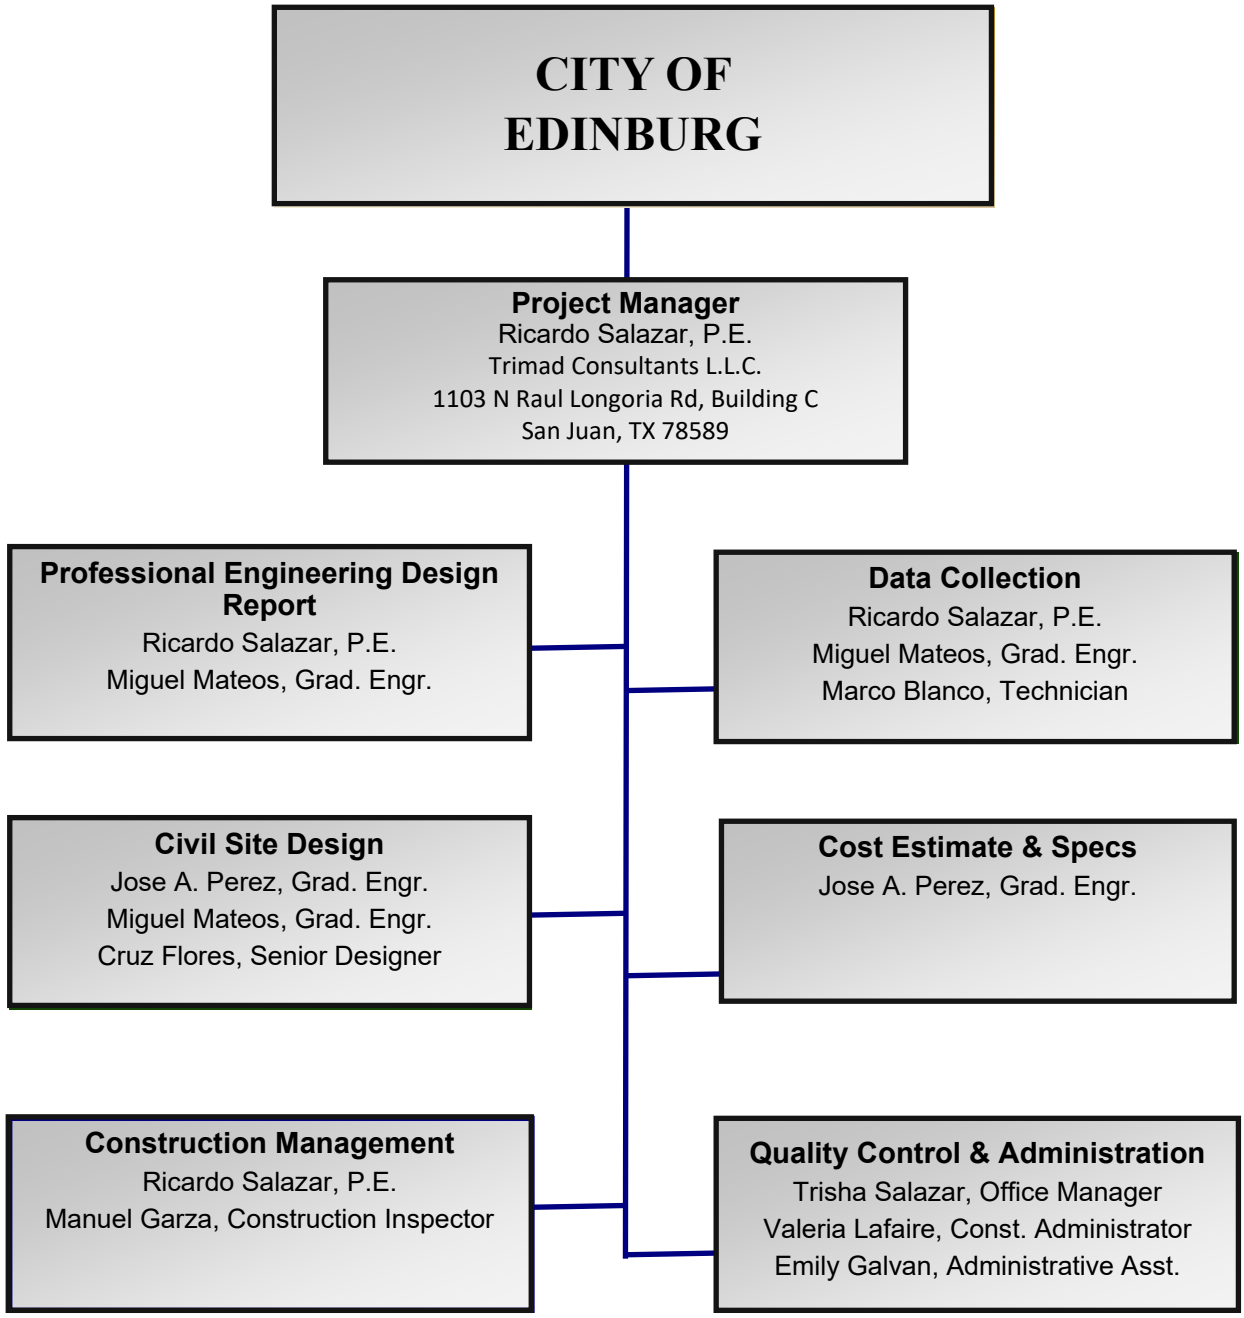
Miguel Mateos	Graduate Engineer
Cruz Flores	Senior Designer
Valeria Lafaire	Construction Administrator
Manuel Garza	Construction Inspector
Pablo Gonzalez Jr	Heavy machine operator
Marco Blanco	Technician
Trisha M. Salazar	Office Manager
Emily Galvan	Administrative Assistant

Key Team Members and Experience Summary

Provided below is a brief profile for key personnel:



Mr. Ricardo Salazar, P.E. (TRIMAD)

Role: Roadway Design, Water/Wastewater, Program Manager, Construction Manager, Client Liaison

Mr. Salazar has approximately 21-years of experience in the planning and design of civil engineering projects and survey. His project experience includes roadway improvements, drainage infrastructure, sanitary sewer collection, and water distribution. Mr. Salazar is located in San Juan, Texas and is able to quickly respond to any needs. Among communities he's has served include the Cities of Pharr, Elsa, Alamo, San Juan, Edcouch, Donna, and Pharr, Edinburg ECISD, La Joya ISD, Hidalgo County, Urban County, and number of private developers in the Rio Grande Valley.

EMPLOYMENT

TRIMAD Consultants, L.L.C. San Juan, TX December 2017—Present	GIC, L.L.C. Pharr, TX September 2017—December 2017	S& GE, L.L.C Pharr, TX March 2013—September 2017

PROFESSIONAL EXPERIENCE

Ricardo Salazar, Professional Engineer, has over 21 years of experience in a broad range of Civil Engineering areas which include roadway, drainage, utilities, etc. His knowledge and experience have been gained mainly by working with the South Texas Region and its community. Areas that Mr. Salazar has served include the City of Pharr, City of Edcouch Elsa, City of Weslaco, City of Edinburg, City of McAllen, City of Brownsville, City of La Joya, San Antonio Water Supply Corporation, as well as the Counties of Hidalgo, Starr, Cameron, and Willacy.

RELATED PROJECTS

City of Pharr Improvements Project, Pharr, Texas

Mr. Salazar has applied his knowledge to various projects involving the City of Pharr. Many of these projects include utilities, existing right-of-way, assessments, and design of new street improvements for the installation of underground infrastructure within a street paved section. The recent projects completed are as follows:

* Sanitary Sewer Collection System Improvements
* Water Transmission Main Improvements
* Eldora Elevated Storage Tank / Collection System Improvements

City of Pharr NW Collection System Improvements and Lift Station Elimination Project, Pharr, Texas

Mr. Salazar is the assigned Project Manager involved in the planning and design phase of this project. Construction is due to commence in approximately 3 months. During the construction phase of the project, Mr. Salazar will be conducting the critical changes required due to unforeseen and poorly documented record drawings of existing underground infrastructure within project limits, if necessary. In addition, he will conduct construction meetings, submittal reviews, respond to Request for Information (RFI) and Request for Proposals (RFP), construction inspections, approvals of pay requests, review of charge orders, and project completion / close-out.

City of Pharr Water and Wastewater Master Plan, Pharr, Texas

This project involved the analysis of the wastewater treatment plant and collection system to assist the City in developing a capital improvement plan to meet future demands and regulatory requirements. The scope of work included analyzation of existing water and wastewater treatment plants, the collection and distribution system. The tasks also included proposed system alignments, pipe sizing, crossing, and estimates. The completed master plan was designed for 20-year duration.

City of Pharr Wastewater Collection and Lift Station Design Project, Pharr, Texas

The project tasks included the preparation of a wastewater collection system hydraulic model and master plan, design of 23 Miles of wastewater pipelines ranging diameter from 12 inches to 36 inches, decommission 23 lift stations, and design of three (3) new lift stations ranging from 2.4 to 8 mgd. Mr. Salazar was involved during the planning, design, and construction stages of the project. Mr. Salazar conducted critical changes caused by unforeseen and poorly documented record drawings of existing underground infrastructure. Tasks also included meetings, review of submittals, responses to RFI's and RFP's, construction inspections, review and approval of pay requests, review of change orders, etc.

North McAllen WWTP Improvements and Recycle Pump Station, MPU, McAllen, Texas

The purpose of this project involved miscellaneous improvements to reliably produce Type 1 Reclaim Water with inclusion of a storage basin, effluent disk filters, chlorine disinfection, and a recycle pump station. The system was designed to filter all water from the plant and pump station designed to meet 5-mgd peak demand. Mr. Salazar conducted critical changes caused by unforeseen and poorly documented record drawings of existing underground infrastructure. Tasks also included meetings, review of submittals, responses to RFI's and RFP's, construction inspections, review and approval of pay requests, review of change orders, etc.

Hidalgo County Wide Paving and Drainage Improvements (Border Colonia Project), Hidalgo, Texas

Mr. Salazar assisted Precinct No. 1, 2, and 4 on paving and drainage projects throughout the county of Hidalgo. The scope of work involved cost estimates, review of plans, development of proposals, preparation of design and specifications. Routine visits were made to the work site in order to maintain the schedule. Weekly and monthly conferences were held in relation to each project.

Starr County Wide Paving and Drainage Improvements (Border Colonias Project), Starr, Texas

Mr. Salazar assisted the Starr County Precinct involving paving and drainage projects. Additional project tasks include design drawings for road and drainage improvements, periodic site visits for project completion tracking, weekly and monthly conferences for each related project, surveying, and quality control management. The project consisted of drainage and reconstruction of Athens Road for widening of a 24 feet cross section approximately 1 Mile long. Coordination and communication with TxDOT was necessary, as TxDOT was also reconstructing approximately 1 Mile of road tied to this project.

Hurricane Dolly Relief Program / Texas Department of Rural Affairs – Disaster Recovery (TDRA-DR) Round I & II Program – Starr, Hidalgo, Duval and Kleberg County

Mr. Salazar assisted in the designs for road and drainage improvement projects delivered under the Hurricane Dolly TDRA-DR Round I and II programs. The design provided plans and specifications, SW3P, traffic control, and surveying services needed. The project also included street replacement and drainage infrastructure improvements such as culverts, drainage channels, curb inlets, junction boxes, grated inlets, etc. Specific locations for related projects are the Balcones Height Subdivision (Penitas, TX), City of Pharr Downtown Drainage (Pharr, TX), Hutto Road Roadway Drainage (Donna, TX), Catalina Subdivision Drainage (Progreso, TX) and Vales Subdivision Drainage Channel Interceptor (Sullivan City, TX).

IH 37 Hurricane Evacuation Route Improvements, San Antonio, Texas

Mr. Salazar completed the design plans for the expansion of approximately 8 miles of IH 37. The designs included plan and profile sheets, control plans, and small / large bridge sign. TxDOT regulations and design requirements were followed and implemented.
City of San Antonio Paving and Design Improvements, San Antonio, Texas
Mr. Salazar assisted in the design plans for various COSA projects. The designs included plan and profile sheets, traffic control plans, SW3P, and existing and proposed requirements. COSA rules and regulations were implemented.

PROFESSIONAL EXPERIENCE

Mr. Perez has approximately 5 years of broad range experience in all related field of Civil Engineering which includes sewer networks, reports and construction estimates, and roadway / drainage improvements. His experience has been proudly based in the Rio Grande Valley. The agencies to have received his assistance include the City of Pharr, City of Alamo, City of San Juan, City of Donna, and Brownsville Public Utilities (BPU).

RELATED PROJECTS

Rudy's Lift Station and Force Main - Pharr, Texas

Mr. Perez is assisting with the design of this project which consists of the relocation of the lift station located next to Rudy's Country Store & Bar-B-Q and the force main. It includes the installation of approximately 4,700-lf of 10-inch pipe. The scope of work included an analysis of existing water, wastewater, and irrigation lines from as-builts to check for easements. He was consistently in contact with phone and gas companies for inquiries related to existing underground lines and is currently under design phase. The alignment starts from Eldora Road and will go north to Nolana Road on the right side of the drain ditch, it then proceeds to the east to Rudy's and connects to the newly relocated lift station.

Gravity Line and Abandonment of Lift Station #29 and #33 - Pharr, Texas

Mr. Perez is assisting in the design of this project which consists of the abandonment of two lift stations (#29 & #33) and installation of a gravity line. It includes the installation of approximately 2,900-lf of 15-inch, 1,400-lf of 18-inch, and 2,900-lf of 24-inch pipe. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with phone and gas companies for inquiries related to existing underground lines and is currently under design phase. Mr. Perez has coordinated with TxDOT / AEP for permit acquisition and crossing permit from Hidalgo County Irrigation District No. 2. (HCID No. 2). The alignment starts from Sioux Road and will go north to Eldora Road on the left side of the drain ditch, and it will switch to the right side before crossing the drain ditch (H.C.D.D No. 1) which then goes west crossing Sugar Road in between Sugar and Jackson Road it will go north to connect with lift station #29. Mr. Perez is assisting with the paving design of Eldora Road which consists of the reconstruction of the road, where gravity is going to be installed, of 2,800 linear feet. The paving of this project will commence from Allen and William Arnold Elementary School and will finish halfway between Jackson Road and Sugar Road.

City of Alamo CDBG - MIT Project - Alamo, Texas

Mr. Perez is assisting the City of Alamo in designing proposed improvements and calculating estimates corresponding to the 2015, 2016, and 2018 Texas General Land Office (TxGLO) funding applications. The City Board Members provided their assistance in selecting the most impacted areas impacted by recent flooding due to natural disasters. Based on the information gathered, certain estimates were developed respecting the grant budget. The applications' estimates consisted of the proposed drainage system, water plant improvements, street improvements, sewer improvements, and replacing existing clay lines.

WWTP Headworks Improvements - Pharr, Texas

Mr. Perez is currently assisting in the project design which requires the demolition and replacement of the existing headworks and associated lift station. It includes the redirection of the existing gravity flow mains from the City's sanitary sewer collection as well as the plant drain line to the new lift station. The scope of work includes calculating for wastewater flow projections to match the projected year 2040 plant flows, analyzing and designing new yard piping to accommodate to the upgraded headworks facility, and develop an opinion of probable

City of Donna CDBG-MIT Project - Donna, Texas

Mr. Perez assisted the City of Donna in designing proposed improvements and calculating estimates corresponding to the 2019 Texas General Land Office (TxGLO) Lower Rio Grande Valley Floods funding application. The City board members provided assistance in selecting the most impacted areas from recent flooding due to natural disasters. Based on the information that was gathered, certain estimates were developed respecting the grant budget. The applications' estimates consisted of proposed drainage system and sewer improvements.

I/2 – I-69C Interchange Project - Pharr, Texas

Mr. Perez provided assistance to Dragados - Pulice Joint Venture with the relocation of an existing sanitary sewer line which consisted of the abandonment of an existing 10-inch sanitary sewer line and redirected the flow to a southerly east direction. It included the installation of approximately 380-lf of 10-inch PVC sanitary sewer pipe. The scope of work included an analysis of existing water, wastewater, and drainage from as-builts. The alignment begins from the west ROW of North Cage Blvd. (I/69C) going southwest approximately 100-lf which then goes east to conne0ct to an existing sanitary sewer manhole approximately 280-lf on E. Warren Ave.

City of Alamo Morningside South-Sewer Project - Alamo, Texas

Mr. Perez is assisting in the design of this project which consists of a new 0.31 MGD lift station, installation of a gravity line, and force main. It includes the installation of approximately 2,210-lf of 8-inch and 720-lf of 4-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies and City of Alamo Public Works personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts along Ridge Rd. and goes along Morningside South Subdivision alleys for the gravity line and East from starting point to an existing manhole in front of Mayfair Subdivision for the force main. The Lift Station will be installed in front of a proposed subdivision East of Morningside South Subdivision along Ridge Rd.

City of San Juan Lift Station No. 6 – San Juan, Texas

Mr. Perez is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 6 and installation of a gravity line. It includes the installation of approximately 1,318-lf of 24-inch and 68-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the proposed lift station location. The force main will tie in to the existing force main located on the east side of Cesar Chavez. The Lift Station will be installed in front of a proposed subdivision (Oak Ridge Estates) and will be designed to service the majority of the north side of the City of San Juan.

City of Pharr Lift Stations 10, 18, and 40 Elimination Project – Pharr, Texas

Mr. Perez is assisting in the design of this project which consists of the elimination of Lift Station No. 10, No. 18, and No. 40 and installation of a gravity line. It includes the installation of approximately 3,593-lf of 24-inch and 2,431-lf of 36-inch gravity line. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of Pharr Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Moore Rd, Hall Acres Rd, and Plantations Subdivision. The gravity line will tie in to the new headworks location.

City of Pharr Lift Station No. 23 Relocation Project– San Juan, Texas

Mr. Perez is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 23 and installation of a gravity line and force main. It includes the installation of approximately 2,640-lf of 24-inch and 5,060-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of Pharr Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Sugar Rd and goes North approximately 1,200-lf and West approximately 1500-lf to the proposed lift station location. The force main will tie in to the existing sanitary sewer manhole located on the west side of Sugar Rd. The Lift Station will be installed in the northeast corner of an empty property and will be designed to service approximately 200-AC.

MIGUEL MATEOS,
Graduate Engineer

EDUCATION

Bachelor of Science in Civil Engineering
UTRGV, 2020

INDUSTRY TIME

2 Years

AVAILABILITY

90%

PROFESSIONAL AFFILIATIONS

- ⇒ Member of Water Environment Association of Texas (WEAT)
- ⇒ Member of American Water Works Association (AWWA)
- ⇒ Member of the American Society of Civil Engineers (ASCE)

PROFESSIONAL EXPERIENCE

Mr. Mateos has 2 years experience in the Civil Engineering field. His most recent experience includes roadway, drainage, lift stations, and civil sites. Under the supervision of Mr. Salazar, P.E., Miguel has been able to deliver in Civil Engineering Design, Construction Management, Construction Staking, Topography, Paving / Road and Drainage improvements.
Mr. Mateos' experience also includes coordination with TxDOT and County officials for successful project completion of state funded projects.

RELATED PROJECTS

City of San Juan Alta Vista Subdivision Sanitary Sewer and Waterline Improvements Project – San Juan, Texas

Mr. Mateos assisted the City of San Juan in the assessment and design of the water line system and sanitary sewer collection system improvements within Alta Vista Subdivision in the City of San Juan. The scope of work consists of the installation of approximately 1,584 lf of 8" C-905 DR PVC Water Line and 2,000 lf of 8" PVC sanitary sewer line. This project also consists of site preparation, sedimentation, erosion control and 8536 sy mill and overlay.

Subdivision Development Feasibility Studies - Rio Grande Valley

Mr. Mateos has been in charge of completing multiple subdivision development feasibility studies in various cities which include Edinburg, Mission, and Alamo, Mercedes, and Bastrop. The process includes staying in contact and meeting with city officials to ensure the development is in accordance with city codes, ordinances, and infrastructure regulations. The report is composed of detailed exhibits, engineering estimates, drainage reports, and geographic data which provide all the information needed to see if a property if feasible for an investment opportunity.

City of Alamo Morningside South-Sewer Project - Alamo, Texas

Mr. Mateos is assisting in the topography and design of this project which consists of a new 0.31 MGD lift station, installation of a gravity line, and force main. The project includes the installation of approximately 2,210-lf of 8-inch and 720-lf of 4-inch force main. The scope of work includes an analysis of existing infrastructure including any water and sewer lines from as-builts. He maintains frequent contact with gas companies and City of Alamo Public Works personnel for inquiries related to existing underground lines and is currently under design phase. The alignment for this project's gravity line starts along Ridge Rd. on the Northeast corner of this subdivision and runs along the alleys. The force main runs from the new 0.31 MGD lift station to an existing manhole in front of Mayfair Subdivision.
The Lift Station will be installed in front of a proposed subdivision East of Morningside South Subdivision along Ridge Rd.

City of San Juan Lift Station No. 6 – San Juan, Texas

Mr. Mateos is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 6 and installation of a gravity line. It includes the installation of approximately 1,318-lf of 24-inch and 68-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with companies, TXDot, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the companies companies, TXDot, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase.

The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the proposed lift station location. The force main will tie in to the existing force main located on the east side of Cesar Chavez. The Lift Station will be installed in front of a proposed subdivision (Oak Ridge Estates) and will be designed to service most of the North side of the City of San Juan.

City of Elsa- Weaver Rd. and Parking Lot improvements

Mr. Mateos assisted with the topography and the design of this project which consisted of approximately 4300 sy of mill and overlay along Weaver Rd. He maintained frequent contact with Texas 811 and City of Elsa Public Works personnel for inquiries related to existing underground lines. The parking lot was located at the intersection of E. 4th Ave and Bowie St consisted of 128 sy of 5-in sidewalk and approximately 1400 sy of 2-in hot mix asphalt.

Utility Hookups- (Del Rio TX)

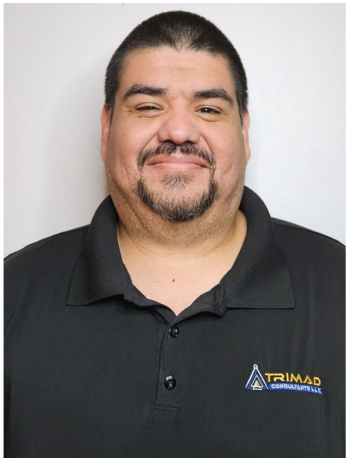
Assisted with the topographic survey, construction staking, and design of approximately 330 linear feet of 2-inch water line at Laughlin Air Force Base. In addition, provided design plans for the installation of three sanitary sewer manholes and approximately 775 linear feet of 8-inch sewer line. This system was planned to support both a building and anticipated future development in the area. The work involved determining optimal manhole placement, ensuring compliance with slope and depth requirements, and coordinating utility layouts to accommodate future capacity needs while adhering to base infrastructure standards and existing utility layouts.

City of San Juan- Urban County Street Improvements

Mr. Mateos assisted in the design for the mill and overlay of approximately 6,800 square yards of roadway which extended from Gardenia Dr to San Martin St.
This project was done to fix streets located East of an elementary school that were in need of repairs.

City of Elsa- Fannin St Roadway Improvements project (Stormwater Improvements)

Mr. Mateos assisted in the design for approximately 3,900 square yards of mill and overlay on Fannin St. This project also included the addition of a concrete apron at the intersection of Fannin St and E. Edinburg Ave to alleviate and ponding formed due to heavy rains in the area.



City of Pharr- Lift Station 23

Mr. Mateos has assisted in the topography and is currently assisting in the design of this project which consists of abandoning and relocating the existing Lift Station 23 and installing both sanitary sewer gravity line and forcemain. This project consists of approximately 2640 L.F of 24-inch sanitary sewer line and 5060 L.F of a 12-inch forcemain. The new lift station location will be at the North East corner of a vacant 200-AC property and will be used to service all future development on that land. The force main from this lift station will outfall to an existing sanitary sewer manhole located on the West side of Sugar Rd.

City of San Benito- Ratliff Water Line Improvements

Mr. Mateos is assisting in the design of approximately 5,900 L.F of 12-inch water line which will run from Zillock Rd. and connect to an existing 16 -inch line located near the North-West corner of the City of San Benito Water Plant. This project consists of coordinating with the drainage and irrigation district to ensure that all crossing standards are being met as this line will cross two canals. This design also includes the installation of 12 fire hydrants which will be used to provide optimal coverage for existing and future structures, improving emergency response capabilities.

CRUZ FLORES,
Senior Designer

INDUSTRY VENTURE
20 Years

AVAILABILITY
90%

PROFESSIONAL EXPERIENCE

Mr. Flores has experience in all aspects of project design, coordination, and construction administration. Mr. Flores has nineteen (20) years of experience working on public infrastructure projects. He has been a team member of design groups designing master planned communities that include the City of Pharr, Elsa, Edcouch, Donna, Weslaco, Edinburg, McAllen, Brownsville, La Joya, Mission, Palmview, Penitas as well as Hidalgo County, Cameron County, and Starr County.

RELATED PROJECTS

WWTP Headworks Improvements - Pharr, Texas

Mr. Flores is currently assisting in the project design which requires the demolition and replacement of the existing headworks and associated lift station. It includes the redirection of the existing gravity flow mains from the City's sanitary sewer collection as well as the plant drain line to the new lift station. The scope of work includes calculating for wastewater flow projections to match the projected year 2040 plant flows, analyzing and designing new yard piping to accommodate to the upgraded headworks facility, and develop an opinion of probable construction cost (OPCC).

City of Pharr Lift Station No. 23 Relocation Project– San Juan, Texas

Mr. Flores is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 23 and installation of a gravity line and force main. It includes the installation of approximately 2,640-lf of 24-inch and 5,060-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of Pharr Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Sugar Rd and goes North approximately 1,200-lf and West approximately 1500-lf to the proposed lift station location. The force main will tie in to the existing sanitary sewer manhole located on the west side of Sugar Rd. The Lift Station will be installed in the northeast corner of an empty property and will be designed to service approximately 200 -AC.

City of Donna CDBG-MIT Project - Donna, Texas

Mr. Flores assisted the City of Donna in designing proposed improvements and calculating estimates corresponding to the 2019 Texas General Land Office (TxGLO) Lower Rio Grande Valley Floods funding application. The City board members provided assistance in selecting the most impacted areas from recent flooding due to natural disasters. Based on the information that was gathered, certain estimates were developed respecting the grant budget. The applications' estimates consisted of proposed drainage system and sewer improvements.

City of Pharr Lift Stations 10, 18, and 40 Elimination Project – Pharr, Texas

Mr. Flores is assisting in the design of this project which consists of the elimination of Lift Station No. 10, No. 18, and No. 40 and installation of a gravity line. It includes the installation of approximately 3,593-lf of 24-inch and 2,431-lf of 36-inch gravity line. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of Pharr Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Moore Rd, Hall Acres Rd, and Plantations Subdivision. The gravity line will tie in to the new headworks location.

City of Alamo Morningside South-Sewer Project - Alamo, Texas

Mr. Flores is assisting in the design of this project which consists of a new 0.31 MGD lift station, installation of a gravity line, and force main. It includes the installation of approximately 2,210-lf of 8-inch and 720-lf of 4-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies and City of Alamo Public Works personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts along Ridge Rd. and goes along Morningside South Subdivision alleys for the gravity line and East from starting point to an existing manhole in front of Mayfair Subdivision for the force main. The Lift Station will be installed in front of a proposed subdivision East of Morningside South Subdivision along Ridge Rd.

City of San Juan Lift Station No. 6 – San Juan, Texas

Mr. Flores is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 6 and installation of a gravity line. It includes the installation of approximately 1,318-lf of 24-inch and 68-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the proposed lift station location. The force main will tie in to the existing force main located on the east side of Cesar Chavez. The Lift Station will be installed in front of a proposed subdivision (Oak Ridge Estates) and will be designed to service the majority of the north side of the City of San Juan.

City of Pharr Wastewater Collection and Lift Station Design Project, Pharr, Texas

This project included preparation of a wastewater collection system hydraulic model and masterplan, design of 23 miles of wastewater pipelines, ranging in diameter from 12 inches to 36 inches, decommissioning of 23 lift stations, and design of three new lift stations, ranging in size from 2.4 to 8-mgd. Mr. Flores was involved throughout the planning, design, and construction of the project.

City of San Juan Sgt. Leonel Trevino Sanitary Sewer Improvements Project- San Juan, Texas

Mr. Flores successfully assisted the City of San Juan in the assessment and design for the improvements to the existing force main line within Sgt. Leonel Trevino Road in the City of San Juan. The scope of work consisted or rerouting approximately 1033 LF of 6in force main to connect to the existing sanitary sewer collection system. This project also consisted of site preparation, sedimentation, erosion control, and pavement repairs.

City of Alton 2012-2014 TWDB Clean Water State Revolving Fund Project, Alton, Texas

This project included connections, collection lines, transmission lines, and upgrades to an existing lift station for a total of sixteen (16) subdivisions providing 578 connections. Mr. Flores was involved throughout the planning, design, coordinated with TxDOT with repaving, insured the contractor was on schedule.

City of Mercedes TWDB Clean Water State Revolving Fund (CWSRF) Wastewater Collection & Wastewater Treatment Plant SCADA

Mr. Flores created provided project management for rehabilitation of old, dilapidated clay sewer lines with a new technology of Cured In Place Pipe (CIPP) and rehabilitation of twenty-four (24) existing lift stations funded with a $4.3M grant from the TWDB.

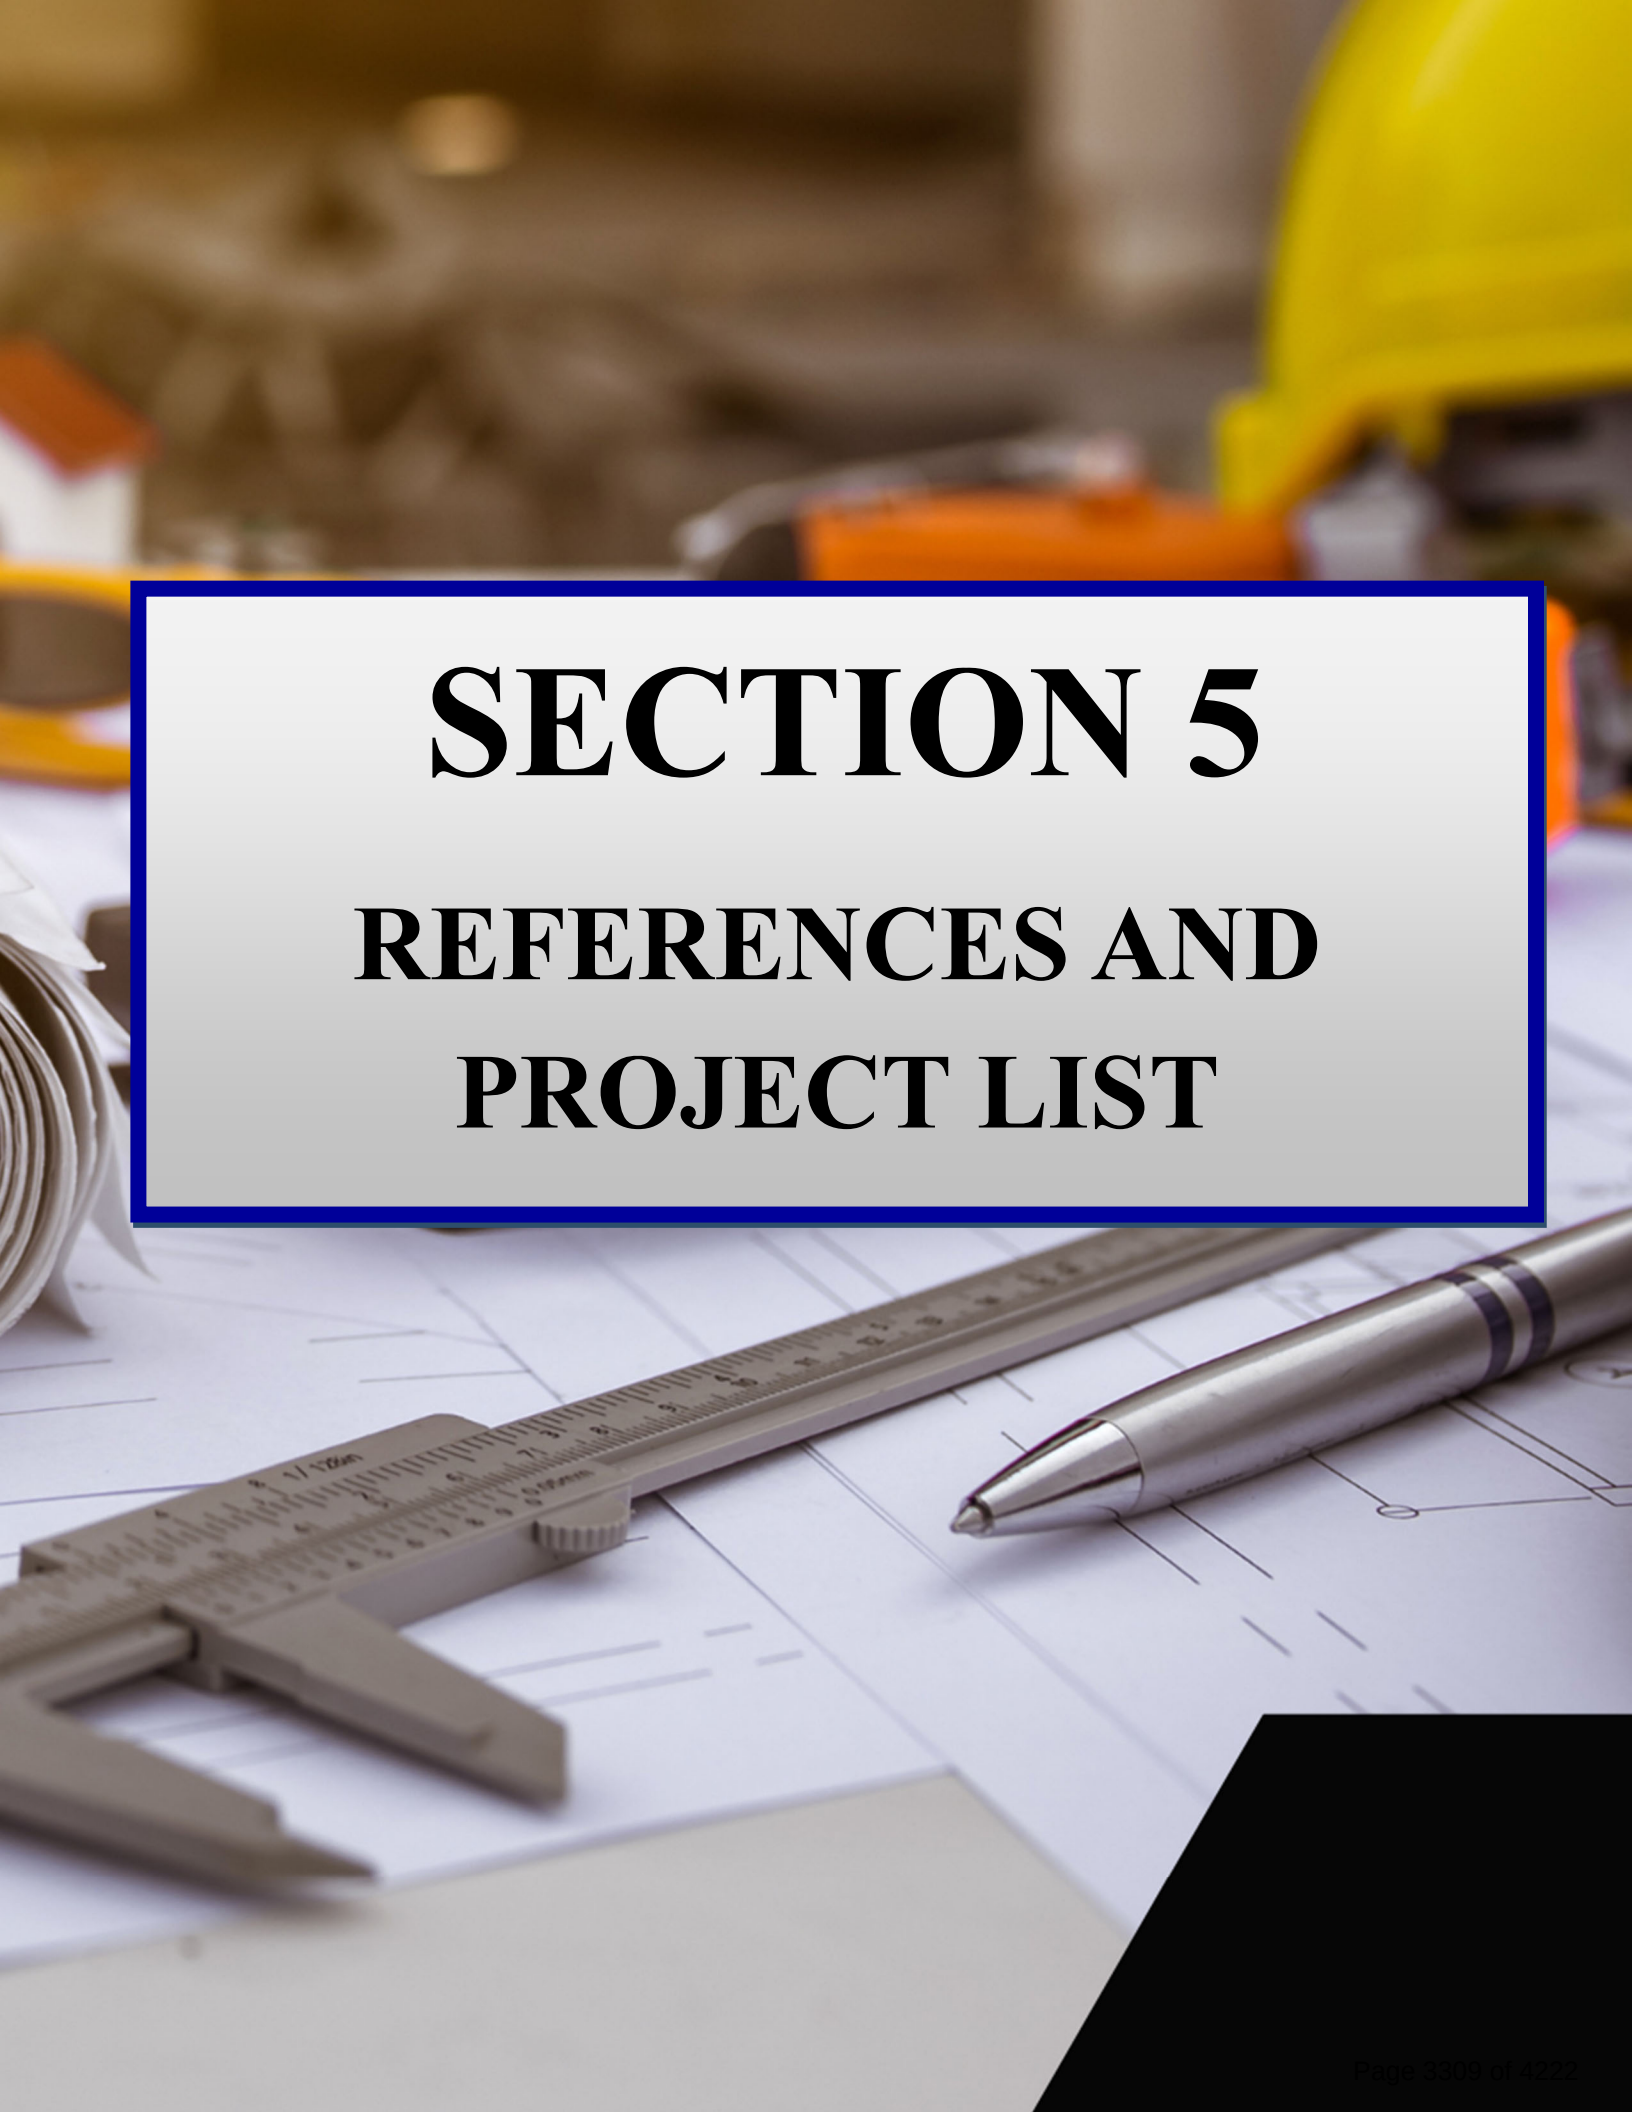
Zavala County Water Control & Improvement District No.1 Wastewater Improvements Project

This project consisted of a new 0.6 MGD wastewater treatment plant and collection system, including lift stations, for a community that has never had a centralized sewer system. Mr. Flores was involved from the initial preliminary phase all the way the construction phase of the project.

McAllen Public Utilities Board-Tres Lagos Wastewater Reuse Project & 29th Street Sports Complex Wastewater Reuse Project 2016

Mr. Flores provided McAllen PUB with civil design for the proposed wastewater collection improvements project. The project consisted of abandoning the existing undersized and inadequate water lines and replace with 16-inch PVC wastewater reuse line. Their was approximately 60-70 fire hydrants and 1500 linear feet of 12-ince bore construction with 12-inch steel casing installed. This project benefited the entire area of Tres Lagos by improved facilities and the deletion of asbestos water lines currently being used.

TWDB CWSRF Project No. 73642 City of Mercedes-Sanitary Sewer Collection System Rehabilitation Project



The project consists of rehabilitation to two (2) lift stations; demolition/reconstruction of one main (1) lift station; approximately 32,000 linear feet of Cured-In-Place Piping and Pipe Bursting of old, dilapidated clay sewer lines; and manhole replacement/rehabilitation. Mr. Flores was involved from the initial preliminary phase all the way the construction phase of the project, where he assisted in on field changes from unforeseen problems.

City of Combes-Crosswind Landing Public Park & Commercial Development-Utilities & Drainage

In this project we provided City of Combes with environmental services, park and subdivision planning, Water and Wastewater Infrastructure Design, Road and Drainage Design, Planning, Construction Phase Engineering, and Inspection for Crosswind Landing Development and Loves Truck Stop Water & Sewer Improvements located in Combes, Texas: The City of Combes utilized $11M in Public Bonds Issuance in the development of the proposed development to include ten (10) commercial lots for restaurants, hotels, and retail development along I-69 Corridor. Mr. Flores assisted in providing drainage and detention for a Love's Gas Stop located adjacent to the development, including over 2000 linear feet of water and sewer infrastructure for the Love's and the Development.

Progreso International Bridge FMCSA Inspection Station Design and Water & Wastewater Facilities

As the prime designer for the Progreso International Bridge, Mr. Flores provided preliminary design for a two-bay inspection station, including underground inspection pits, catwalks for overhead inspections, metal canopy for both bays, parking, 8800 cy of 14" concrete/steel reinforced driveways and roads, administration building coordination designed by architect, for the Owners of the Progreso Bridge, General Services Administration (GSA) and the Federal Motor & Carrier Services Administration (FMCSA) for the use by US Border Patrol & US Immigrant & Customs Administration (ICE) agents for vehicular inspections of commercial trucks. The overall cost estimate of the project is $9M for construction. Bridge Administration is waiting on approval and notice to proceed from the General Services Administration. Included in the design was a new lift station for industrial site development to be utilized by the FMCSA inspection station. New 10" waterline was designed and installed which included over 15 fire hydrants.

Trinity MEP Engineering, LLC is adept in mechanical, electrical and plumbing design and would love the opportunity to provide these services to the City of Edinburg. We are knowledgeable, experienced, and aptly suited to provide the City of Edinburg a comprehensive evaluation and professional counsel that will be both constructive and advantageous to Edinburg. Trinity MEP Engineering has a proven track record of delivering similar work for various municipalities including but not limited to: Weslaco, Mercedes, Donna, Pharr, San Juan, Alamo, Edinburg, McAllen, Palmhurst, Hidalgo, Bastrop, Cotulla, Roma, Brownsville, La Feria, and Laredo.

Our firm's best attribute is that we are client centric, and we work relentlessly to fulfill our customers' specific needs. We never cut corners by delivering the same prescription for every project, instead we focus on how to best serve the needs of our client. Our focal point is giving the owner an affordable, operable, and maintainable product. By taking an approach that focuses on quality, energy and above all customer satisfaction, we are able to consistently render superior performance on every assignment.

Trinity MEP Engineering has the manpower and commitment to not only complete our scope of work but to assist the client where needed. We have a working facility that lends itself to collective team effort. Our designs consistently convey the passion we have for our work. We use the most up to date technology to place our design concepts into a set of plans that will convey effectively our design intent to the builder. At Trinity MEP Engineering, success means providing the best possible product to a satisfied client.

The City of Edinburg can trust that we will deliver on our promises. We encourage you all to contact our references to gain a thorough understanding of our capabilities. Our philosophy is to let our work speak for itself. We thank you for your time and hope you will consider Trinity MEP Engineering, LLC for your project needs.

Sincerely,

Leonardo Munoz
President / CEO
Trinity MEP Engineering, LLC

2. Statement of Qualifications:
Firm Qualification & Experience

Trinity MEP Engineering, LLC, is a HUB certified full-service engineering consulting firm located in Weslaco, Texas. We service the construction industry and provide the design for all HVAC on new construction and existing buildings in the government and private sectors.

Since its establishment in January 2008, our company has experienced strong and sustained growth. Trinity MEP Engineering began with a back room for an office, one employee, and a vision. We envisioned a strong company that would be composed of enthusiastic employees who love what they do, have access to the best technology and software, and produce first-rate work for our customers. Today our company has relocated to new full-scale office in Weslaco, Texas, and is composed of 18 valuable and eager employees. Our employees are able to handle large and smaller assignments. Our approach is to serve our customers' specific needs, regardless of the size of the project.

Trinity MEP has over 18 years of experience working with multiple school districts, city entities, and private entities. Our approach to work is one focused on quality, energy, and customer satisfaction. Through our track record, Trinity MEP Engineering has maintained an image of responsibility and success. Our designs consistently convey the passion we have for our work. At Trinity MEP Engineering, success means providing the best possible product, so our customers can be 100% confident that their needs and desires will be met.

2. Statement of Qualifications:

Firm Qualification & Experience

Trinity MEP Engineering, LLC, is a consulting firm providing mechanical, electrical, plumbing, and fire protection system design for a diversity of industries, including educational, commercial, and industrial. Our objective is to understand the vision of the architect or owner and to then design our MEP systems to operate efficiently and effectively with the building. For either business operation or residence, we receive gratification from creating a comfortable environment. Whatever the project, we aim to improve the energy efficiency as well as the longevity of the product. In all, Trinity MEP Engineering gives the client a comfortable system that is easy to understand, meets all codes, clearances, and regulations, and sustains itself for the life of the building.

Mechanical

Power transmission and distribution systems
Medium voltage switchgear
Motor Control Centers
Lightening systems
Power factor correction
Emergency power and transfer systems
Life safety protection systems
Code compliance inspections/report
Components design and rehabilitation
Emission control
Energy analysis and systems

Electrical

Light level calculations
Back-up power generators
Electronic security systems
Emergency and standby generating systems
Fire Alarm systems
Lighting design
Lightning protection
Local Area Network
Nurse Call System
Primary and secondary electrical distribution systems
Public address/Intercom System
Uninterruptible power systems

Plumbing

Domestic water distribution system
Boiler systems
Hot water heating systems
Hot water recirculation systems
Reverse osmosis systems
Compressed air systems(pneumatic)
Chemical Sanitary and Vacuum waste systems
Condensate piping
Laboratory waste systems
Process waste systems
Grease and oil waste systems
Sediment and sand traps systems

2. Firm Qualification & Experience Cont.

MEP (Mechanical, Electrical, and Plumbing) and Energy Management Engineering Services:
1. Develop complete turnkey construction documents, including all necessary MEP and Energy Management systems engineering design plans and specifications and construction documents for all district-wide construction and general maintenance projects that may be required at any school campus, athletic facilities or administrative support service facilities.

2. Provide on-site project supervision, inspection, and full contract administration services by a Licensed Engineer (in the State of Texas), of all district-wide MEP engineering-related construction and general maintenance projects as required. Daily inspections and observations of project sites by a Licensed Engineer will be required.

3. Conduct MEP engineering designs, feasibility studies, commissioning, assessments, analysis, and evaluations of facilities' MEP systems and provide recommendations and construction documents as required.

4. Conduct building feasibility and/or commissioning studies of MEP and Energy Management facilities operating systems, energy engineering audits and investigation studies and reports, forensic engineering investigations and reports, systems evaluation and design, instrumentation and control analysis and reports, electrical power analysis and design, lighting design, electrical controls and design, and all electrical systems and components upgrades and retrofits as required.

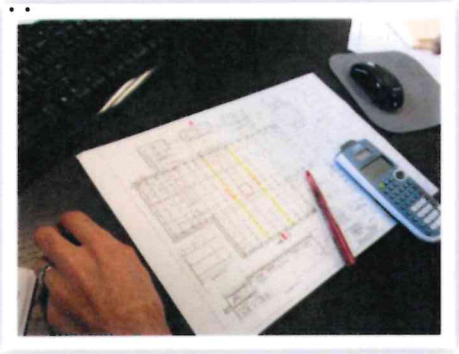
5. Develop MEP and Energy facilities master planning, evaluation and design studies and reports for school campuses, athletic facilities, or administrative support service facilities as required for HVAC, electrical, plumbing and energy management systems.

6. DESIGN ELECTRIC CONTROLS AS REQUIRED FOR ANY CONSTRUCTION OR MAINTENANCE PROJECT.

Construction Administration

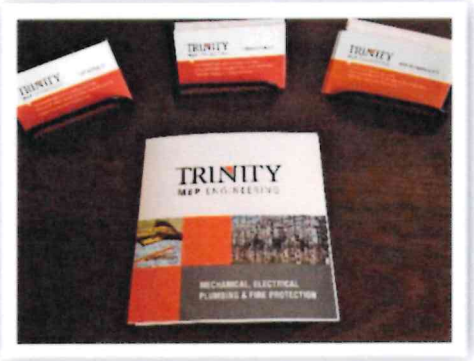
At Trinity Engineering, LLC, our professional engineers and project managers oversee construction administration for all Trinity projects, providing on-site quality control throughout the project. Our construction administration services ensure that your project meets or exceeds all local standards and regulations.

We perform key construction-phase activities including responding to requests for information, managing change order and submittal reviews, and scheduling site visits and review meeting.



2. Firm Qualification & Experience Cont.

Customer Satisfaction



Our gratification comes from a satisfied customer…

At Trinity Engineering, LLC, our gratification derives from satisfying our customers, of which we have two types: design architects and owner direct customers. The owner wants an affordable, maintainable, and operable system: the architect wants a design that complements his or her building. Both want the project to be done well and in a timely manner.

At Trinity MEP Engineering, we satisfy the needs of all our customers. Our designs meet the clients' desires as well as ensure logical thought and efficiency in the product. We provide design plans and specifications that are clear, thus minimizing Requests for Information.

Whether architects or owners, customers can expect to receive a quality product, one that results from time, design experience, and expertise.

Pledge of Excellence

Those of us at Trinity MEP Engineering, LLC, strive to produce excellent quality work in a timely manner that corresponds to the expectations of our clients. With passion and enthusiasm, we look forward to every project, big or small. Our goal is to merit the business and esteem of our clients and build strong relationships for many years to come.

More specifically, within the last 2 years, Trinity MEP Engineering, LLC, has met the MEP needs of various governmental agencies including but not limited to: The City of Edinburg, City of Mercedes, City of Laredo, the City of Mission.

BIOGRAPHY

Leo was raised in Sullivan City, Texas. Born into a migrant family, he spent months traveling to northern states to harvest crops with his family. From a young age, he served as an integral part in his family's economic survival. Leo attributes his past for
shaping him into the person he is today: driven, hardworking, and self-assured. It is with the aid of the lessons from his past that he earned a B.S. in Mechanical Engineering from the University of Texas at Austin and ultimately established Trinity MEP Engineering. Leo has accrued more than 21 years of professional practice in South Texas as a Mechanical Engineer.

Leonardo Munoz, PE, RME, is the CEO and owner of Trinity MEP Engineering, LLC. He distinguishes himself from most of the industry's engineers in the breadth of his expertise on all mechanical, electrical, plumbing, and fire protection trades. The dedicated CEO plays an extensive role in overseeing each area of the company – coordinating all aspects of projects, running day-to-day operations, and spending a sizable amount of time meeting with clients to provide the upmost satisfaction.

His role is meeting with clients to define the project school of work, assigning work to his project managers, reviewing work completed with staff and owner, and setting a schedule for project milestone and final delivery. He has been with the company for thirteen years.

Wilford L. McGee III, PE, is the Principal Mechanical Engineer for Trinity MEP Engineering. His professional duties are to design mechanical systems, manage projects within our office from inception to completion, assign duties to all his subordinates, review all work as it's being designed, and follow through with construction administration.

Throughout most of his professional workday, he manages to perform his duties while always striving to educate himself and office staff on new product lines and seeks continuing education on all aspects of engineering design system.

Wilford McGee has been with Trinity MEP Engineering since 2009 and has worked on a series of GSA projects. His most recent project was the renovation work to the existing Harlingen Border Patrol Station in Harlingen, Texas. The challenge posed by this project was to remodel the existing facility while always maintaining the building functional. Strategic planning was key for laying out the mechanical system required to meet the objective.

Wilford McGee is determined to educate owners on the best types of mechanical designs and systems based on the owner's needs, occupant classifications, as well as resources available to the end user. These factors are considered to evaluate what type of HVAC system best meets the intended application.

3. Team Member Qualifications and Experience Cont.

Developing our employees' expertise

Trinity MEP Engineering, LLC is a strong company composed of enthusiastic employees who love what they do, have access to the best technology and software and produce first-rate work for customers. Today our company is composed of 18 valuable and eager employees. Youth and high energy distinguish us from other MEP firms, as we can work quickly and efficiently to have a fast turnaround when need be.

Trinity MEP Engineering is dedicated to providing our personnel with all necessary tools and equipment, including the most current software, technology, and certifications to work at their best. Our long-term goal is to grow into a 20-engineer company, to provide our customers with the highest expertise. As a step towards achieving our goal, we aim to constantly develop our talent. Presently, our personnel are in the process of acquiring various certifications.

3. Team Member Qualifications and Experience Cont.
In House Professionals

Jessica Alacron
Electrical Designer

Jessica graduated from The University of Texas Rio Grande Valley with a bachelor's degree in civil engineering and is currently working on the electrical design team at Trinity MEP engineering. Responsibilities range from designing and drafting construction document set, generating com-checks, photometrics.

Notable Project experience: Boys & Girls Club in San Juan, TX, Weslaco FM 88 Plaza in Weslaco, TX, Anita's Tortilleria in Brownsville, TX, Laredo Logistics, and Multiple Tru-Fit Gyms and Apartments.

Cecilia Luna
Electrical Designer

Cecilia Luna graduated from Texas State Technical College in 2024 with an AAS in Architectural Drafting and Engineering Design and currently works as an electrical drafter at Trinity MEP. Her experience includes electrical design, project coordination, and assistance in completing comprehensive client project packages.

Notable project experience: XO Physical Therapy located in Mission, TX., Central Plumbing and Electrical located in Pharr TX., McQueeney Baptist Church located in New Braunfels, TX, and the historic Olvera Building located in Brownsville, TX.

Enoch Gonzalez
Electrical Designer

Enoch Gonzalez graduated with honors from the South Texas College, Architectural and Engineering Design Technology program and is currently working on the electrical design team at Trinity MEP engineering. Responsibilities range from basic design development to completed construction document set.

Notable project experience: The Casa Verde mixed-occupancy building in Laredo, TX, The Euclid St. residential in San Antonio TX., the Linn-San Manuel Veterans Park in Edinburg, TX., Multiple Tru-Fit gym, Well-Med clinic, and Affordable Attic projects.

3. Team Member Qualifications and Experience Cont.
In House Professionals

Juan Gonzalez
Plumbing Designer

Juan Gonzalez is a South Texas College graduate. He has 18 years of experience as a drafter with the last 10 years of plumbing experience. Some of his duties include plumbing systems design for commercial and industrial facilities and equipment selection.

Notable Project Experience
Zapata Museum, Weslaco Airport, La Feria Elementary, Sam Houston Elementary, Sacred Heart Church, PSJA Stadium Renovations, Progresso Technology Building, King Ranch Hunting Lodge.

Jorge A. Garza
Plumbing Designer

Jorge Garza, Marine Corps veteran, earned an Architectural and Engineering Design Technology Certificate from South Texas College. He has been with Trinity Engineering since May 2022. His current responsibilities include Designing & Drafting plumbing and fire protection plans using CAD or Revit, communicating tasks with project managers, input information to ComCheck reports, and running calculations for water demands, gas demands, and sewer drainage.

Notable project experience: Volvo Mack Laredo Dealership, Palmhurst City Hall, St. Charles Restaurant, Mercury Warehouse, TruFit, Murfreesboro, TN

Noe Martinez
CAD/ Revit BIM Technician

Noe Martinez is a South Texas College Graduate with an associate degree in Precision Manufacturing Technology. He began with Trinity MEP in April of 2022. His responsibilities include new project clean and set up, project updates and creating MEP PDF documents as advances are made in projects timeline.

Project Team
Flow Chart – Roles

If awarded the Services Contract for this RFQ Trinity MEP Engineering will be working as a Prime Firm to provide the mechanical, electrical, and plumbing design for projects. Trinity Engineering Is committed to provide 100% of our time and attention to this project to meet the scheduled milestones.

Currently, Trinity employees are working relentlessly to fulfill our customers' specific needs. As engineers, we do not issue the same prescription for every project. We feel for our customer's needs and focus on giving the owner an affordable, operable, and maintainable product. Every project design is catered to the owner's maintenance level needs at Trinity MEP Engineering.

The individuals assigned to the project will be committed for the entire duration of the project.

Recent Work:

1. Project: Edinburg Arts & Cultural Event Center
   Project Owner: City of Edinburg
   Point of Contact: Brian Godinez, ERO ARCHITECTS
   Phone #: 956-655-4655
   Brief Description:
   Provided mechanical, electrical, and plumbing engineering design and specifications for a new 45,000 SF facility. Facility will serve as a downtown venue to host local conferences, cultural art exhibits, live performances, classes and community events. The overall budget of this facility was $14 Millon. Our design consisted of the following:

   - **Mechanical Design**
     - **Heating and Cooling Loads for the facility / "Manual "J" Calculations"**
     - **HVAC design and engineered construction documents for the project inclusive of all mechanical equipment selection "Manual S", ductwork sizing, ductwork accessories, piping, and equipment controls. Design shall conform to the Mechanical Code adopted by the local municipality.**
   - **Electrical Design**
     - **Electrical design and engineered construction documents for the project inclusive of building interior and site lighting, data and special systems rough-ins, general power distribution, equipment power connections, & electrical service size and power demand load calculation. Design shall conform to the National Electrical Code as adopted by the local municipality.**
   - **Plumbing Design**
     - **Plumbing design and engineered construction documents, in 2D and isometrics, for the project inclusive of all work to 5 feet outside the foundation for the sanitary / vent / water / condensate, plumbing fixtures, piping accessories. Design shall conform to the Plumbing & Gas Codes as adopted by the local municipality.**
   - **Energy Conservation Report (ComCheck) for the Mechanical Equipment, Lighting System, and Water Heaters.**

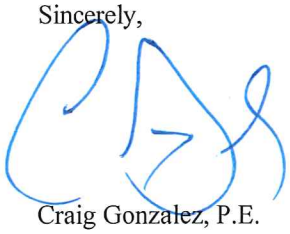
Transmittal Letter

July 14, 2026

City of Edinburg - Engineering Department
RFQ# 2026-07 Professional Engineering Services

Dear Engineering Department:



Urban Infrastructure Group, Inc. (UIG) is pleased to submit our Statement of Qualifications for the RFQ# 2026-07 Professional Engineering Services for the City of Edinburg. Urban Infrastructure Group, Inc. is a Rio Grande Valley based engineering and environmental consulting firm established in 2010 and registered with the Texas Board of Professional Engineers under Firm Registration Number F-13094. UIG operates as an S Corporation with our principal office located at 260 S. Texas Blvd., Suite 403, Weslaco, Texas 78596.

Our firm provides comprehensive engineering services including civil, environmental, and structural engineering; drainage systems; water and wastewater systems; land development; project management; CAD design; and TCEQ permitting. We work closely with county and municipal agencies, school districts, utility providers, and private developers to improve failing infrastructure while responsibly planning for future growth. We have served as the City of Sullivan City consulting engineer and we are currently on the City of Weslaco Water and Wastewater Engineers rotation list.

UIG is led by Principal and President Craig Gonzalez, P.E., and is supported by a staff of ten professionals committed to delivering practical, cost-effective, and high-quality engineering solutions. Our experience and collaborative approach allow us to successfully support projects from planning and design through construction.

We appreciate the opportunity to submit our Statement of Qualifications and would welcome the opportunity to discuss how Urban Infrastructure Group, Inc. can assist the City of Edinburg. Please feel free to contact us at (956) 405-3337 should you require any additional information.

Sincerely,

Craig Gonzalez, P.E.
President

Project Approach

UIG approaches each project with a comprehensive method to understand today s needs while looking ahead to the challenges in the years to come. We provide engineering consulting services from planning and permitting through design and construction. During the course of a project we insure the project remains in compliance with all local, State, and Federal regulations.

UIG is a firm structured to assist its clients with a holistic view of every project such that each project is influential and impressionable. The collective body of work from our staff demonstrates that the UIG team can deliver a complete, positive, and successful project for all County endeavors.

Project management services are critical to any project schedule and budget. Delays in schedule for any reason cost the client more than any other factor in the project. UIG incorporates the latest technologies and can leverage its expertise to provide the full scope of professional services required for municipal projects.

In addition to the latest tools our engineers and designers are knowledgeable of industry standards such as AWWA, ASTM, ANSI, NSF, NFPA, as well as, local, State and federal codes. Safety is our highest priority.

UIG also offers building and landscape design services with an emphasis on green and sustainable construction methods and materials. At UIG we believe that buildings and landscapes should be designed to be regionally appropriate aesthetically and produce a solution that maximizes energy efficiency based on the site and local climate.

UIG uses the latest technology and best management practices (BMP s) to provide sustainable engineering solutions. New infrastructure is not sustainable if it has a negative environmental impact. We continually research and stay up to date with current regulations, applications, and design of Low Impact Development (LID) measures.

UIG is committed to providing high quality and responsive services. UIG works to fully understand project needs and then expertly manages projects to meet the client s expectations. UIG understands that for successful projects, engineering and design services must be provided with sound technology, on a timely schedule, as well as in a cost effective manner. On any project, UIG approaches project issues in a very systematic way. UIG believes that effective project understanding and approach are based on three key principles:

- Understanding the client s goals, and mutually agreeing on specific methods and processes to accomplish them.
- Team coordination and communication among all team members, regulating entities and sub-consultants.
- Accountability resting on the assumption that the client is an integral part, and the most important part of the project team.

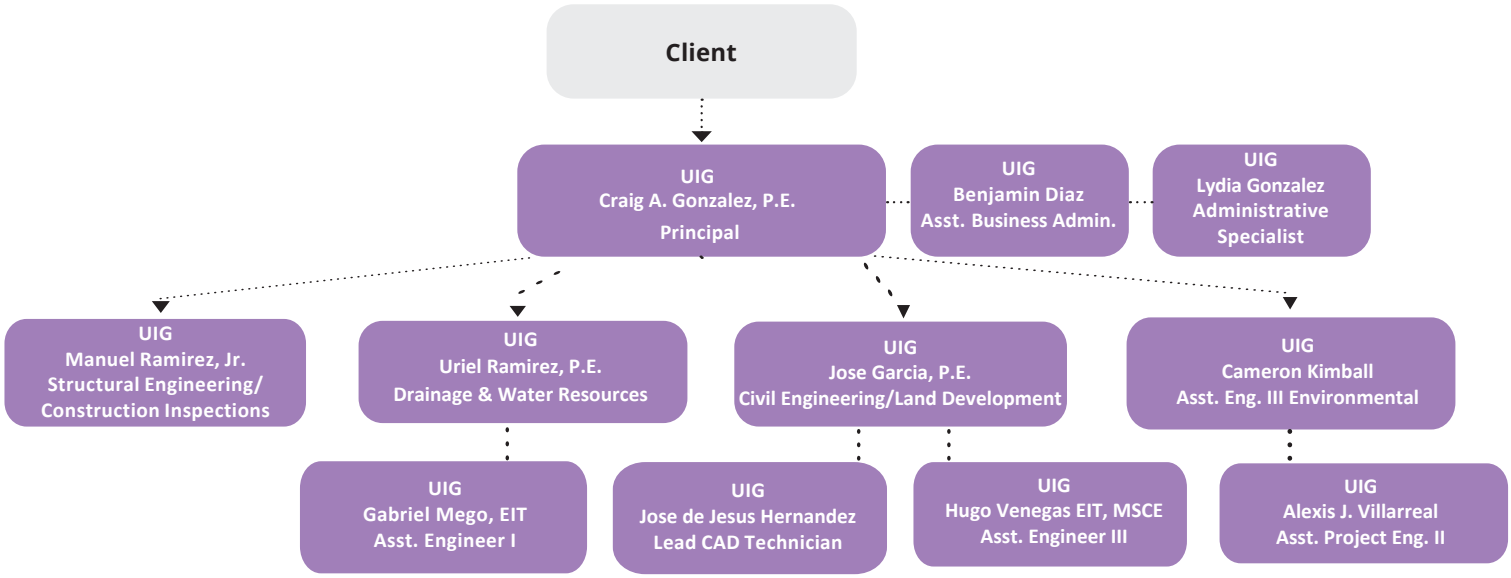
UIG Key Personnel/Project Team

Staffing and Firm Availability

UIG is available to commence services immediately after successfully negotiating a contract. UIG is prepared to increase our staff numbers to accomodate City Projects. Mr. Craig A. Gonzalez, P.E. will be leading our team of Civil Engineers. The following matrix details the assigned staff for City projects.

STAFF	PROJECT TIME
Craig A. Gonzalez, P.E. - Principal-In-Charge	10%
Jose Garcia, P.E. - Project Manager	50%
Hugo Venegas, EIT, MSCE - Assistant Eng. III	30%
Cameron Kimball - Assistant Eng. III	10%
Additional Personnel	As needed

Affirmative Action Program



UIG follows a strict policy to provide equal employment opportunity to all qualified persons without regard to their race, color, religion, age, sex, national origin, physical or mental hadicap, or because he or she is a disabled veteran. The firm shall assure qualified applicants are recruited and hired, and employees at all levels are not discriminated against because of race, color, religion, age, sex, national origin, physical or mental handicap; or because he or she is a disabled veteran.

Equal opportunity and equal consideration will be afforded to all appllicants and employees in personnel actions, which include recruiting and hiring, selection for training, promotions, fixing rates of pay or other compensation, benefits, transfers and layoff termination. UIG complies with Affirmative Action and U.S. Equal Employment Opportunity Commission (EEOC) laws.

Organizational Chart

UIG Personnel

Scope of Services

UIG provides an array of design and engineering consulting services in house. Our engineers and designers are accustomed to working on projects that require specialized solutions. We begin our services with an attentive ear to understand the client's vision and unique aspects of their project to develop a comprehensive scope of services.

General Civil & Public Infrastructure Engineering

UIG provides general civil and public infrastructure engineering services to municipalities, utility providers and other government agencies. Public sector engineering services provided by UIG include:

- General Consulting
- Capital Improvement Plans
- Storm Water Detention Facilities
- Parking Lot Design
- Plans and Specifications
- Feasibility Studies
- Multi-Family Site Plans
- Commercial Site Plans
- Park & Recreation facility engineering
- Asset Management
- Grant Application Assistance
- Storm Sewer system / Drainage Design
- Bidding Assistance
- Construction Cost Estimating
- Subdivision Plats
- Stormwater Quality BMP's
- SWPPP Plans
- Sidewalk and Hike & Bike Trail Design

Water & Wastewater Environmental

- Water Distribution Systems
- Wastewater Treatment Facilities
- Wastewater Collection Systems Water Distribution Design & Modeling Water Conservation Planning
- TCEQ Wastewater Permits
- Capital Improvement Plans
- Lift Station Design and Rehabilitation
- Water Reuse Systems
- Leak Detection Studies

Transportation & Environmental Engineering

UIG provides environmental services for commercial, industrial and agricultural facilities. Environmental services provided by UIG include:

- Environmental Site Assessments
- Master Drainage Studies Erosion Modeling
- Erosion Management
- Street & Roadway Design Route and Design Studies Right of Way Maps and Data
- FEMA Letters of Map Change
- Hydrology and Hydraulic Studies
- Conservation Plans
- Site Suitability Evaluations
- Traffic Control Plans
- Signing, Markings and Signalization
- Environmental Site Assessments (Phase 1 ESA, NEPA Docs)

UIG also provides consulting services in support of TCEQ permitting, Army Corps of Engineers permitting, TWDB and EPA regulations.

UIG Related Project Experience:

Our Lady of Mercy Catholic Church (Mercedes, Te as) Parking Lot Improvements
Assisted the Diocese of Brownsville for a new parking at Our Lady of Mercy Catholic Church. Attended meetings with Father Olivier and committee to plan the proposed parking lot. Performed civil engineering services to prepare site plan, drainage calculations and the drainage plan, SWPPP plan, paving and grading plan, accessibility plan and parking plan.

City of Weslaco Agostadero Drainage Project InfoWorks Drainage Study and Benefit Cost Analysis
Assisted the Weslaco grant manager and consulting engineer with the TDEM grant application. Performed a drainage evaluation to support the TDEM grant application for the design and construction of the City of Weslaco Agostadero Project 3, Phase 2 drainage improvements. The Agostaderos Drainage Project includes three (3) proposed 6 reinforced concrete bo (RCB) storm drain segments along Agostaderos Street and will be discharged into the new regional detention facility at Pablo Pena Park. The City of Weslaco e periences fre uent flooding during heavy rainfall events within Risk Area 3 primarily due to inade uate conveyance capacity in the e isting drainage system. This analysis was performed using InfoWorks Integrated Catchment Modelling (ICM) software by AutoDesk and focused on the hydraulic impacts of the e isting drainage infrastructure and proposed modifications under a 50-year design storm, and prepared a Benefit Cost Analysis (BCA) for the proposed Agostaderos Drainage Improvements. Evaluated the changes to the 50-year floodplain calculated in the InfoWorks model with Phase 2 partial improvements and determined the effectiveness to reduce the 50-year flood elevation. Successfully used the FEMA development cost analysis calculator to determine the cost benefit of the Phase 2 improvements was above a 1.0 ratio. The results showed that the project is favorable for funding by TDEM.

CIC services for New World Screw Worm Dispersal Facility USDA Moore Air Base Edinburg, Te as
Performed independent full-time 3rd party Construction Inspection Contractor (CIC) services for the New World Screw Worm Dispersal Facility at the U.S. Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS), Plant Protection Quarantine (PPQ), Moore Air Base, Edinburg, Te as. Project was a federal high priority project to be the first facility to combat the danger of the new world screw worm that has emerged in Me ico. UIG performed daily site inspections 7 days a week, 12 hours a day over 4 months. Daily inspections documented construction conformance to the plans and specifications and the latest edition of the International Building Code, national codes and standards, and local building codes. Prepared daily reports and distributed to USDA review team. Daily reports and construction progress was made available to the USDA review team by Field Wire. Uploaded aerial drone videos and pictures to Field Wire. Attended progress meetings with local and national USDA representatives to provide project status updates on construction schedule, conflicts, RFI and change orders. Assisted in communicating construction issues between contractor and USDA review team.

North Park Place Phase II Subdivision Weslaco, Te as
Civil Engineering services to prepare the subdivision plat for a 10-acre tract with 36 single-family residential lots located within the Weslaco city limits. UIG prepared the subdivision infrastructure plans which included the street plan and profiles, drainage plan, grading plan, horizontal control plan, SWPP plan, water distribution plan, sanitary sewer plan, street signage and lighting plan.

University Apartments Weslaco, Te as
Performed Civil and Structural engineering services for the new apartment building located at S. Illinois and E 5th Street in Weslaco. University Apartments is a 2-Buidling, 2-story, 40-unit apartments in downtown Weslaco built primarily to serve UTRG students attending the UTRG Center for Innovation and Commercialization Weslaco campus.

Citrus 674 Subdivision Weslaco, Te as
Civil Engineering services to prepare the subdivision plat for an .46-acre tract with 35 single-family residential lots located within the Weslaco city limits. UIG prepared the subdivision infrastructure plans which included the street plan and profiles, drainage plan, grading plan, horizontal control plan, SWPP plan, water distribution plan, sanitary sewer plan, street signage and lighting plan.

CIC services for Underground Utilities and Stormwater Improvements Project USDA Moore Air Base Edinburg, Te as
Performed independent full-time 3rd party Construction Inspection Contractor (CIC) services for the Underground Utilities and Stormwater Improvements Project at the U.S. Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS), Plant Protection Quarantine (PPQ), Moore Air Base, Edinburg, Te as. Performed daily site inspections to ensure that the construction of the project complied with the approved construction documents and the latest edition of the International Building Code, national codes and standards, and local building codes. Prepared daily reports and distributed

to USDA review team. Daily reports and construction progress was made available to the USDA review team by Field Wire. Uploaded aerial drone videos and pictures to Field Wire. Attended progress meetings with local and national USDA representatives to provide project status updates on construction schedule, conflicts, RFI and change orders. Assisted in communicating construction issues between contractor and USDA review team.

Sullivan City Hidalgo County Urban Program, El Faro Road Drainage Improvements

Designed drainage improvements to install new drainage system within the e isting El Faro Road. The improvements were a city infrastructure project funded through the Hidalgo County Urban County Program. Assisted the City with design, bidding and construction phase services. Coordinated with Urban County to ensure project me the re uirements for funding. This system was designed to reduce flooding in an area that is inundated during heavy rainfall and holds water for a prolonged period after significant rainfall events. New drainage system included 379 LF of 1 pipe, 451 LF of 24 pipe and 1,91 LF of 36 pipe. Coordinated with T DOT to connect drainage to US Highway 3 roadside ditch.

Hidalgo County Drainage District No. 1 - Mile 13.5 and FM 1015 Rural Drainage Development Project (near Weslaco, Te as)

Designed drainage improvements, prepared construction plans and technical specifications to reduce flooding in areas which have been fre uently inundated by recent rainfall events. The project consists of installing new drainage pipes in e isting Los Olivarez subdivision, and new drainage ditches along Mile 13.5 North Road. In addition, the improvements include a 36 bore under FM 1015, and a new drainage connection between the Mile 13.5 North Road ditch and the HCID No. 9 4E Drain using two 36 HP pipes. Assisted HCDD1 with ac uiring new drainage easements. Prepared HEC-RAS model of the HCID No. 9 4E Drainage Ditch. Performed construction administration services and construction inspections for conformance with the plans and specifications.

Heather Glen Subdivision (New Braunfels, Te as) - New Lift Station Design

Heather Glen is a new residential development in New Braunfels, Te as. Design new duple lift station in accordance with TCEQ Chapter 217. The new lift station will serve a projected total of 62 single family houses and 560 multi-family units. The lift station consists of (2) 10 hp above ground centrifugal pumps, a 10 diameter by 27.5 deep wet well, valve vault, pump controls, SCADA system and backup diesel powered pump.

Meadows at Nolte Farms (Seguin, Te as) New Lift Station Design

Designed new triple lift station in accordance with TCEQ Chapter 217 and the City of Seguin re uirements. The new lift station is being constructed for the Meadows at Nolte Farms subdivision but will function as a regional lift station for the City of Seguin. The design included three (3) 23 horsepower submersible pumps with a 10 diameter by 25 deep concrete wet well. The City of Seguin set the parameters and oversaw the design of the lift station. Prepared the final engineering report showing compliance with TCEQ Chapter 217 re uirements.

Trinity Baptist Church Faith in Action Building Addition McAllen, Te as

Project management services for the proposed multi-building addition at Trinity Baptist Church in McAllen. The project includes a new16,16 SF multi-purpose building and a new 6,456 SF classroom wing. Prepared civil and structural construction documents. Civil and project management services include coordinating project team for all professional disciplines, coordination with all local jurisdictions, performing the site analysis, prepared drainage calculations and the drainage plan, SWPPP plan, paving plan, grading plan, utility plan, accessibility plan and parking plan. UIG prepared renderings for church to advertise to raise donations for the project. Once design documents are completed UIG will assist in bidding the project and will perform construction administration services.

Twin Oaks Subdivision Los Fresnos Brownsville, Te as

Civil Engineering services to prepare the subdivision plat for a 14.9-acre tract located within the city limits of Los Fresnos and Brownsville. This is a uni ue situation to have a property located within two city limits. The subdivision includes 4 commercial lots and 46 single-family residential lots. UIG prepared the subdivision infrastructure plans which includes two 140 bores

under an irrigation canal and drainage ditch. The bores are for the proposed sanitary sewer line and proposed water lines. The plans also include the street plan and profile, drainage plan, grading plan, horizontal control plan, SWPP plan, water distribution plan, sanitary sewer plan, street signage and lighting plan.

Bellingham Park Apartments Austin, Te as
Prepared the Civil site plan for the 12 building, 2 0-unit, 265,000 SF apartment comple in Austin, Te as. Prepared the apartment infrastructure plans which included the parking plan, sewer line plan and profiles, drainage plan, stormwater uality BMP s, grading plan, horizontal control plan, SWPP plan, water distribution plan. Directed and oversaw the site civil permitting process through the City of Austin development services department which included an environmental review. Addressed comments from all development service departments and successfully obtained site development permit Performed construction phase services reviewed submittals, responded to RFI s, performed onsite progress inspections and prepared construction concurrence letters.

Crownridge Business Park San Antonio, Te as
Prepared the Civil Site Plan and Structural Plan for a new 2-story, 1 ,690 SF business park in the La Cantera area on Camp Bullis Road. The building construction is a steel beam structure with CMU block walls and COMSLAB roof system. UIG is performing project management services to coordinate all professional disciplines to obtain the construction permit. We prepared construction plans for asphalt and concrete paving, grading, drainage structures, utility improvements, and accessibility plan. It was a challenge to meet ADA re uirements because the wooded site has slopes between 6- and the San Antonio tree ordinance re uires to so save trees 4 in diameter. We prepared a HEC-RAS model to show the limits of the 100-year floodplain in the adjacent creek. Prepared Storm Water Pollution Prevention Plan and directed implementation of plan. The project also re uired the property to be re-plated. We prepared the subdivision re-plat and processed it through the City of San Antonio planning department.

Terrafina Apartments Phase 1 2 Brownsville, Te as
Prepared the Civil Site Plan and Structural Plans for the 2 Phase, 14 Building apartment comple in Brownsville, Te as. Prepared windstorm design for each 2-story, 7,090 SF apartment building. We prepared construction plans for asphalt and concrete paving, grading, drainage structures, utility improvements, and the accessibility plan. Prepared Storm Water Pollution Prevention Plan and directed implementation of plan. Project is currently under construction and windstorm inspections will be ongoing such that we can certify each new building.

Matt s Cash Carry Rebuild Brookhaven Event Center Subdivision Plat Site Structural Improvements (Pharr, Te as)
Prepared the Subdivision Plat, Site Plan and Structural Plans for the Matt s Cash Carry rebuild project in Pharr, Te as. After the original store burned down we assisted Matt s Cash Carry in the design and planning of rebuilding the store. The proposed rebuild includes appro imately 0,436 SF of retail space, 42,564 SF of warehouse space and a 10,250 SF event center. We prepared construction plans for asphalt and concrete paving, grading, drainage structures with an underground detention system and amenity ponds and utility improvements, and accessibility plan. Prepared Storm Water Pollution Prevention Plan and directed implementation of plan.

Wylie Sprayers Progresso, Te as New Commercial Development
Prepared the Subdivision Plat, Site Plan and Structural Plans for the new Wylie Sprayers store. New development includes appro imately 11,020 SF of retail and office space and 106,429 SF of warehouse space. Site improvements included appro imately 117,449 SF of new concrete paving, utility improvements, grading, drainage and detention improvements. Prepared construction plans and technical specifications.

S. First Apartments Raymondville, Te as
Prepared the Civil Site Plan and Structural Plans for new building apartment comple in Raymondville, Te as. Prepared windstorm design for each 1-story, triple , 2,763 SF apartment building. Project is currently in permit phase. Windstorm inspections will be ongoing such that we can certify each new building.

Brownsville ISD Del Castillo Elementary Reroof Inspections
Performed inspections for TDI certification for the Del Castillo Elementary reroof project on Buildings A, B, C, D, E, F, G & H.

Pharr-San uan-Alamo ISD - Southwest High School Softball Field Improvements (Pharr, Te as)
Prepared construction plans and technical specifications for the installation of new artificial turf at the e isting Southwest

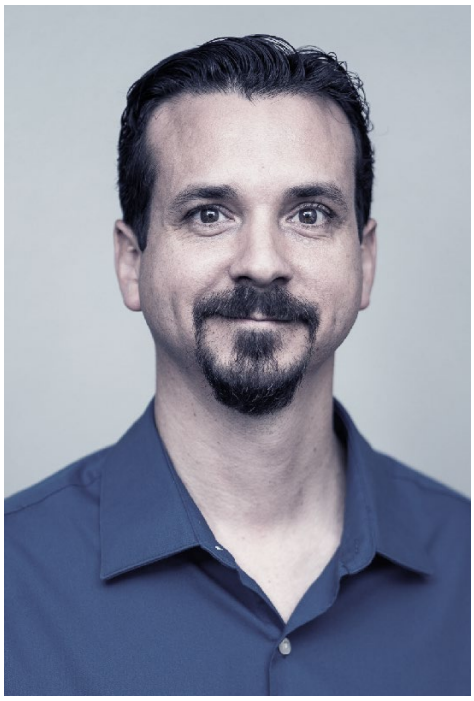
High School softball field. Improvements included drainage improvements as the outfield would remain wet for many days after a rainfall event. Designed subsurface drainage system in the infield and outfield that connected to the e isting drainage system. Performed construction administration services and construction inspections for conformance with the plans and specifications. Reviewed construction submittals, responded to contractor RFI s, processed pay re uests, and prepared and processed change orders.

Pharr-San uan-Alamo ISD - Pathways to Independence Project (Pharr, Te as)
Prepared site plan to convert e isting residential home into new outreach facility for PS A ISD. Improvements included new concrete driveway and parking lot, handicap accessible paths, and crushed granite walking trails. Prepared site plan for approval by the City of Pharr. Performed construction phase services. Reviewed construction submittals, responded to contractor RFI s, processed pay re uests, and prepared and processed change orders.

PS A ISD Elvis Ballew Campus foundation repair and remodel.
Performed construction management services for the Elvis Ballew Campus remodel and foundation repair. Project included the remodel of classrooms and administrative offices along with the raising of the foundation that had sunken down. The foundation was lifted by polyurethane foam and supported by cylindrical pilings. The remodel also included installation of a new playground and sidewalk canopy.

ista Rita Blanca Apartments Phase II (Dalhart, Te as)
Grant Funding Assistance Site Plan. ista Rita Blanca Apartments is low-income housing for migrant workers in the Te as Panhandle. Prepared a site plan and technical specifications for 10 building e pansion. Met with City of Dalhart officials concerning proposed access, water and wastewater utilities, drainage and detention. Assisted Guadalupe Economic Development Corporation in the preparation of a loan application submitted to USDA Rural Development and an application for Federal Ta Credits. Services will also include construction administration and construction inspections.

Matt s Cash Carry - Plat Site Improvements (Palmview, Te as)
Prepared the Plat and Site Plan for a new Matt s Cash Carry in Palmview, Te as. The proposed store is on a 4.4-acre tract with a building area of appro imately 34,775 s uare feet. The design included over 100,000 SF of asphalt, grading, drainage structures with three (3) detention ponds and 1,950 LF of drainage piping, utility improvements, and an accessibility plan. Prepared Storm Water Pollution Prevention Plan and directed implementation of plan. Performed construction phase services. Reviewed construction submittals, responded to contractor RFI s, processed pay re uests, and prepared and processed change orders.



Southwest Key Program - Site Improvements (Conroe, Te as)
The Southwest Key Program in Conroe, Te as is an immigration facility for minors. The e pansion of the facility was performed using Federal immigration funding. Prepared Site Plan in accordance with City of Conroe Re uirements. The e pansion included 4 new dormitories and 2 office buildings. Design included building pads, grading, landscaping plan, drainage structures and new detention pond.

Hidalgo County MUD No. 1 - Raw Waterline E tension (Palmview, Te as)
Prepared construction plans and technical specifications for 700 LF e tension of e isting 15 raw water supply line. E tension included a bore under e isting irrigation canal.

New Macedonian Christian Academy Phase 1 (Alamo, Te as)
Performed civil design services for the New Macedonian Christian Academy, Alamo Campus. The proposed Phase 1 facility included a 16,000 SF gymnasium/performing arts center and a 7,000 SF high school building. Designed the driveway, parking lot, site grading, drainage system, detention facility, on-site septic facility, and the flood irrigation for proposed soccer fields. The site has limited usable space with FEMA floodplain, an e isting gas transmission line, and an e isting drainage easement. Assisted client in laying out the school site with the limited usable space in accordance with their mission goals, while meeting all local, state and federal re uirements. Prepared Stormwater Pollution Prevention Plan in accordance with the Te as Pollution Discharge Elimination System (TPDES).

Craig A. Gonzalez, P.E.

Position: Principal
Experience: 25 years
Education: Bachelor of Science - Civil Engineering, University of Texas at Austin, 2001
Licenses: Licensed Professional Engineer, Texas License No. 99628
Certified Floodplain Manager Certification No. 3277-17N
Certified TDI Windstorm Inspector
Professional Affiliations:
Guest Lecturer at The University of Texas-Rio Grande Valley ('18-'19) American Society of Civil Engineers (ASCE)
Haestad HEC-RAS Floodplain Modeling & Navigating FEMA Approval ('03)

Areas of Expertise

Project Management
Land Development
Wastewater Engineering
Drainage Systems
Municipal Infrastructure

Experience Summary

Mr. Gonzalez is the principal of Urban Infrastructure Group, Inc. in Donna, Texas. He has been leading UIG in the Rio Grande Valley since January 2012. Prior to starting UIG Mr. Gonzalez was a Project Manager and Design Engineer at CMA Engineering, Inc. in Austin, Texas.

Mr. Gonzalez has 24 years of experience in the design and project management of civil engineering projects. His diverse project experience includes feasibility studies, residential and commercial subdivisions, commercial site plans, project scheduling, cost estimates, construction plans and technical specifications, permitting, Low Impact Development (LID) design, construction administration and inspections.

Mr. Gonzalez has worked on a variety of projects including residential and commercial land development, structural/windstorm design and TDI certification, master drainage studies, FEMA Letters of Map Change, floodplain modeling, and water and wastewater systems. He has served as a guest lecturer for Water Resources Engineering at UTRGV. He has been involved in all phases of projects from planning through construction.

Mr. Gonzalez has managed staff and other sub-consulting engineers to produce technical specifications, construction plans and contract documents that meet the client's goals and government regulations. He is a proven construction administrator experienced in cost analysis, contractor scheduling, reviewing contractor submittals, shop drawings, pay requests, and negotiating change orders between client and contractor.

Craig A. Gonzalez, PE.

Related Project E perience at CMA Engineering, Inc. 2001 - 2012

Hays County WCID No. 1 Phase 2 500,000 GPD Wastewater Treatment Plant E pansion

Project manager for the construction of a 500,000 GPD MBR wastewater treatment plant e pansion and 5.25-million-gallon prestressed concrete effluent holding tank. Construction of this facility included e cavation of a 1 0-foot diameter hole at 20 feet deep for partial burial of the prestressed concrete tank. Improvements to the site included the construction of an access road with stormwater uality BMP s, the installation of yard piping with valves, and the installation of chemical storage and process e uipment. Managed a full-time inspector, coordinated sub-consulting engineers, led construction meetings, reviewed contractor shop drawings, RFI s and pay applications. Negotiated contract change orders between client and contractor, and oversaw compliance with state and local regulations. Prepared the civil site plan for the project and assisted in the design of the facility e pansion.

City of Pasadena, Te as 1 Waterline Loop Completion Project

Project Description: A capital improvement project for the City of Pasadena, Te as. Developed a preliminary engineering report to study potential routes for the proposed 1 waterline loop completion project. Worked with City engineering staff and reviewed the City s Master Water Plan to understand the City s water needs. Performed site visits with City of Pasadena field staff and evaluated e isting infrastructure to gain a full understanding of viable routes. Coordinated with the Harris County Roadway Department, Harris County Flood Control District and the Army Corps of Engineers. Analyzed si (6) different routes and provided budget costs for each route. Presented recommendation to the City of Pasadena. Prepared construction drawings in accordance with the Te as Commission on Environmental Quality Chapter 290 rules and City of Pasadena specifications. The project included open cut trenches and directional bores for installation of the 6,500 LF 1 water line in e isting right-of-way.

Belterra Subdivision (Hays County, Te as)

Belterra Subdivision is a 1600-acre Master Planned residential community. The civil design included streets, drainage structures, stormwater uality BMP s and detention ponds, water distribution lines and a wastewater collection system with lift stations. Developed grading plans in AutoCAD for the water uality and detention ponds. Developed the Master Drainage Plan for the development. Prepared drainage plan that consisted of developing and evaluating pre- and post-development drainage conditions for the 100-year storm event. Generated reports showing drawings and calculations to present each plan. Designed regional detention facilities to reduce the peak post development runoff flow rates to pre-development peak flowrates. Prepared several FEMA MT-1 applications to remove lots throughout the subdivision from the FEMA Special Flood Hazard Area (SFHA). The FEMA MT-1 applications re uested lots be removed from the SFHA by Letter of Map Amendment (LOMA) and by Letter of Map Revision Fill (LOMR-F). The work involved preparing floodplain analyses in accordance with FEMA re uirements.

Section 6A Belterra Subdivision FEMA MT-1 App. for Letters of Map Change (Hays County, Te as)

Prepared two FEMA MT-1 applications to remove nine lots from the FEMA Special Flood Hazard Area (SFHA). Eight lots were removed by Letter of Map Amendment (LOMA) and the ninth lot was removed by Letter of Map Revision Fill (LOMR-F). The project involved preparing a floodplain analysis in accordance with FEMA re uirements. Peak flowrates for the 100-year storm event were developed using HEC-HMS. The model included 130 acres of the developed subdivision. A hydraulic analysis was performed to delineate the 100-year floodplain.

URBAN INFRASTRUCTURE GROUP, INC.

Jose L. Garcia, P.E.
Project Manager

Education

Bachelors of Science
University of Texas RGV, 2020
- Civil Engineering

Associate of Science
South Texas College, 2017
- Mathematics

Certifications

Professional Engineer License, 2026
Passed PE Exam, 2025
Engineer in Training, 2022
Professional Engineer, Texas License No. 160906

Years of Experience

1 Year Construction
2 Years Geo-technical Engineer
2 Years Civil Eng. Asst. PM

Since 2020 Mr. Garcia has had substantial experience in construction, geotechnical engineering and civil engineering design. Mr. Garcia worked as a field engineer for Noble Texas Builders where he performed construction inspections, reviewed subcontractor's submittals and shop drawings for compliance with plans and specifications for ground up commercial and institutuional construction projeects. Mr. Garcia had to prepare bid estimates, quantity take-offs, and prepared daily reports of construction activities for Nobel Texas Builders. In addition, Mr. Garcia workd as a Geotechnical Engineer for Kleinfelder in Irving, Texas. He was responsible for managing boring excavations and field testing, classifying and loging soil and rock samples, coordinating with PMs and leading bore team in the field. Here at UIG Mr. Garcia has performed CIC services for USDA APHIS PPQ at Moore Air Base in Edinburg, Texas. At Moore Air Base he performed daily site inspections, reports, maintained submittal log, RFI log, deficiency log, testing log etc. Mr. Garcia attended construction meetings and assisted with presenting project status updates. He has been responsible for engineering design, technical team production and meeting project schedules.

Related Project Experience:

- USDA APHIS PPQ MAB – CIC New World Screw Worm Distribution Facility
- USDA APHIS PPQ MAB (Edinburg, TX) – CIC Underground Utilities & Drainage Project
- Trinity Baptist Church (McAllen, TX) - multi building campus addition
- Crownridge Business Park, (San Antonio, TX) – 2-Story 18,690 SF office building project
- City of Weslaco, TX Agostadero Drainage Project – Drainage Study and Benefit Cost Analysis for grant funding
- Terrafina Apartments (Brownsville, TX) – 2-Phase, 14 building apartment complex

Manuel Ramirez Jr.

(Graduate Engineer - Structural Engineering/Sr. Construction Inspector)

Education

Bachelors of Science
University of Texas
Pan American, 2001

- Mechanical Engineering

Additional Education

RES Net/RATOR Inspector/Energy Star V3 2012

Texas Windstorm Process between Texas Department of Insurance and Texas Board of Professional Engineers

USP –Designing with USP Ties

TREC 120 Hr. Real Estate Inspector course

Simpson Strong Tie –Designing with Strong Ties

Engineering for Gulf Coast Hurricanes

Years of Experience

7 years CIC at USDA MAB

14 years as Graduate Engineer for Casa Engineering, LLC structural engineers

3 years of Construction Management

Affiliations

Member of (ASME) American Society of Mechanical Engineers

Member of (AWS) American Welding Society

For the past 8 years Mr. Ramirez has performed Construction Inspection Contractor (CIC) services for USDA APHIS PPQ at Moore Air Base in Edinburg, Texas. He has more than 24 years of experience in design and construction of structural systems. His past experience includes planning, structural design of reinforced concrete foundations, retaining walls and structures, and design of wood and steel structures for various sizes of projects from start to finish and ensuring the quality of the finished project. In addition, Manny has worked as a project manager for ground up construction for commercial, institutional, religious and residential projects.

Mr. Ramirez has not only the technical knowledge to ensure quality from start to finish but also the training to help ensure that workplace accidents are avoided. He has put these skills to work as a graduate engineer and project manager for Casa Engineering LLC.

Selected Project Experience:

- USDA APHIS PPQ MAB – CIC New World Screw Worm Distribution Facility
- USDA APHIS PPQ MAB – CIC Wastewater Treatment Plant Expansion
- USDA APHIS PPQ MAB – CIC Water Treatment Plant & Raw Water System
- USDA APHIS PPQ MAB – CIC Underground Utilities & Drainage Project
- USDA APHIS PPQ MAB – CIC Ground Water Tank No. 2
- PSJA ISD – Stadium Canopy Repair construction inspections for UIG.

URBAN INFRASTRUCTURE GROUP, INC.

Additional Selected Project Experience

- PSJA ISD – Elvis Balew Campus foundation repair and building remodel. Performed construction management and inspections for UIG.
- IDEA Public Schools – Building G – 20,000 sf Addition for NM Contracting. Managed the construction and inspections of Building G.
- Construction management of new 30,000 sf Worship Center for Centro Cristiano De Restauracion Familiar
- Construction management services to renovate Pen Aluminum industrial facility in Harlingen, Texas, UIG
- City of McAllen - East Redbud Ave at N. “K” Center Ave Drainage Improvements
- City of McAllen: HVAC Cooling Tower Modifications at McAllen International Airport. Minsa Corporation wastewater treatment facility (Muleshoe, Texas) designed reinforced concrete foundation for 24’ high by 21.5’ diameter bolted steel holding tank, for UIG.
- Heather Glen Subdivision Lift Station (New Braunfels, Texas) designed 10’ diameter by 27.5’ deep concrete wet well and 10’x10’x10’deep valve vault, for UIG.
- Creekside Hills Subdivision Lift Station (Copperas Cove, Texas) designed 12’ diameter by 26’ deep concrete wet well.
- Meadows at Nolte Farms Lift Station (Seguin, Texas) designed 10’ diameter by 25’ deep concrete wet well, for UIG.
- Brownsville ISD – Del Castillo Elementary Reroof Inspections for TDI certification Buildings A, B, C, D, E, F, G & H for UIG.
- La Villa ISD High School Sports Complex Repairs and Construction
- City of Brownsville Various Roof Repair Inspections under Casa Engineering LLC.
- City of Harlingen Various Roof Repair Inspections under Casa Engineering LLC.

MSCE Asst. Engineer III

Education

Master of Science
University of Texas RGV 2023
- Civil Engineering Construction

Bachelors of Science
University of Texas RGV, 2020
- Civil Engineering

Certifications
Engineer in Training, 2023

Additional Education
OSHA Training

Years of Experience

1 Year Industrical Construction

4 Years as an EIT/Asst. PM

Since 2020 Mr. Venegas has had substantial experience in industrial construction and civil engineering design. From 2020 – 2021 Mr. Venegas worked as an Industrial Construction Technician for Metal Fabrication & Insulation. In addition, Mr. Venegas received a Master of Science in Civil Engineering Construction. He was has served on the UIG team providing CIC services for the New Word Screw Worm Distribution Facity (NWSDF) at USDA APHIS PPQ Moore Air Base. For NWSDF he performed daily site inspections, reports, maintained submittal log, RFI log, deficiency log, testing log etc. Mr. Venegas attended construction meetings and assisted with presenting project status updates. He has also been working as an assistant project manager in the design & construction of civil infrastructure projects. Mr. Venegas has worked to prepare construction documents and to prepare technical specifications. He has also performed construction inspections for compliance with drawings and specifications. He has been responsible for the engineering design, technical team production and meeting project schedules.

Relevant Industrial Construction Experience:

UIG CIC Experience

- USDA APHIS PPQ MAB – CIC New World Screw Worm Distribution Facility

Prior Work

- Installed and maintained insulation systems for industrial facilities, including refineries, plants, and construction sites.
- Constructed, modified, and dismantled scaffolding systems to support insulation, painting, and maintenance activities.
- Supervised a crew of three workers, assigning tasks, monitoring progress, and ensuring compliance with safety standards.
- Conducted daily safety meetings and hazard assessments; enforced PPE requirements and OSHA safety procedures, including lockout/tagout near energized equipment.
- Assisted in metal fabrication and installation, painting, and other multi-trade support tasks within tanks and elevated platforms.
- Operated forklifts and handled material staging, deliveries, and site organization to maintain workflow efficiency.
- Coordinated with other trades on project sequencing and ensured housekeeping standards were upheld across the worksite.

URBAN INFRASTRUCTURE GROUP, INC.

Cameron Kimball Asst. Engineer III

Education
Bachelors of Science
University of Texas at Austin,
2023 -Environmental Engineering

Years of Experience

2 Years Civil Eng. Asst. Engineer

Mr. Kimball joined the UIG team in June 2024. He is a graduate of the University of Texas College of Environmental Engineering. Since joining the UIG team Mr. Kimball has worked on commercial site plans, wastewater permits, storm water pollution prevention plans, feasibility studies and HEC-RAS modeling. He has shown a strong ability to learn and grow professionally at a fast pace. He has been responsible for engineering design, technical research, preparation of site civil drawings and hydraulic modeling. Mr. Kimball excels as an Assistant Engineer II in organization, communication and coordination of the project technical team.

Related Project Experience:

- HEC-RAS Floodplain Analysis and Report - Bear Creek (Grand Prairie, TX)
- HEC-RAS Floodplain Analysis and Report - Village Creek (Kennedale, TX)
- AMT S. Beltline Rd. Transportation & Logistics Terminal Facility (Grand Prairie, TX)
- 24 Acre Feasibility Study for Industrial Park (Kennedale, TX)
- Great Oaks Ranch Subdivision (La Feria, TX) – Contruction Plans & Tech. Specificaitons.
- Trinity Baptist Church (McAllen, TX) – multi building campus addition
- Loving County 75,000 GPD Wastewater Permit Application
- Hidalgo County MUD No. 1 0.95 MGD Wastewater Permit Renewal
- City of Weslaco, TX Agostadero Drainage Project – Drainage Study and Benefit Cost Analysis for grant funding.

Re: RFQ No. RFQ 2026-7 – General Engineering Services Rotation List

Dear Members of the Selection Committee:

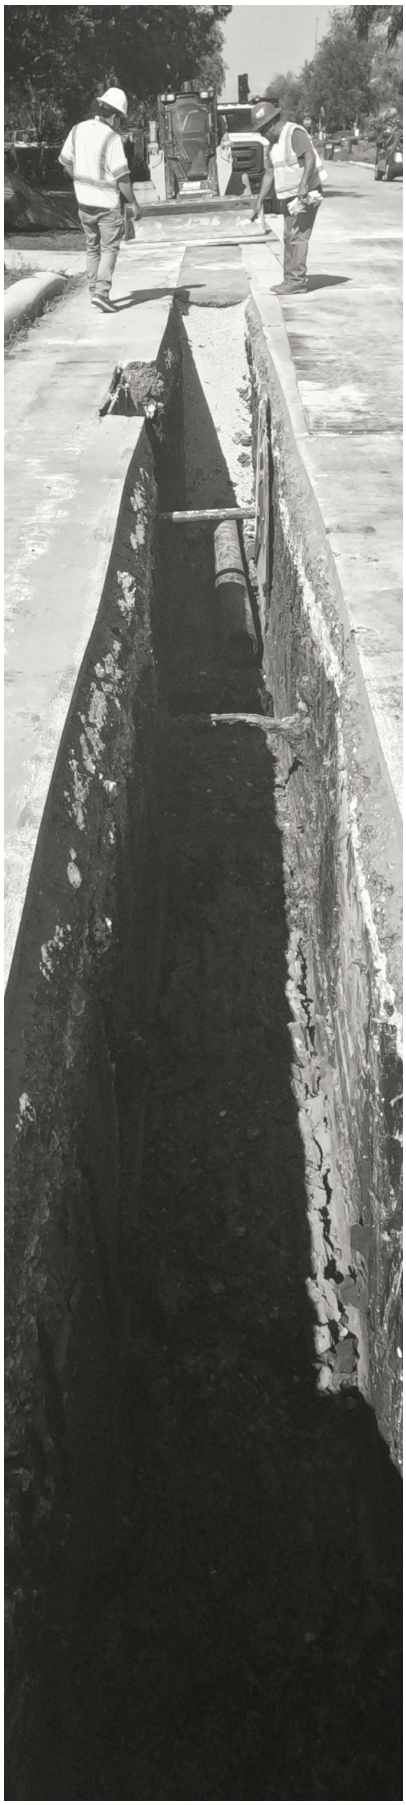
On behalf of Valdez Engineering, we respectfully submit this Statement of Qualifications and express our interest in serving the City of Edinburg through its General Engineering Services Rotation List, and are committed to providing responsive, practical, high-quality engineering services for assignments issued under the contract.

Our team offers experience supporting municipalities with water, wastewater, drainage, roadway, utility, and related civil infrastructure projects. Rotation-list assignments require a consultant who can respond promptly, develop clear scopes and fee proposals, coordinate effectively with City staff, and provide consistent technical and project management support from authorization through completion. Valdez Engineering is prepared to provide the personnel, resources, and hands-on leadership necessary to deliver individual work authorizations of varying size and complexity.

While our primary office is located in San Antonio, our team maintains an active presence in the Rio Grande Valley. Jaime Hernandez, our Senior Inspector, is from Roma and frequently works remotely from the area to support field activities and project coordination, including our ongoing and completed work in Rio Grande City. This regional presence, combined with our established experience serving South Texas municipalities, allows us to respond promptly and provide consistent, hands-on support for assignments issued under this Rotation List.

The primary person responsible for this RFQ and the City's point of contact for all correspondence is:

Enrique S. Valdez, P.E., Principal and Project Manager
Valdez Engineering · 85 NE Loop 410, Suite 215 · San Antonio, Texas 78216
Telephone: 210.236.7940 · Cell: 210.865.5828 · Fax: N/A · Email: evaldez@vtgec.com



Valdez Engineering acknowledges that no addenda were issued for this RFQ.

The undersigned is an officer of Valdez Engineering authorized to bind the firm contractually. We appreciate the City's consideration and welcome the opportunity to support Edinburg's ongoing infrastructure needs through this Rotation List.

Respectfully submitted,

Enrique Valdez, PE
Principal/Project Manager

TBPE Firm No. F-17657

ITEM 02 | FIRM QUALIFICATION AND EXPERIENCE

2.1 Firm Profile

2.2 Project Sheets

Notes

ITEM 02 - FIRM QUALIFICATION AND EXPERIENCE

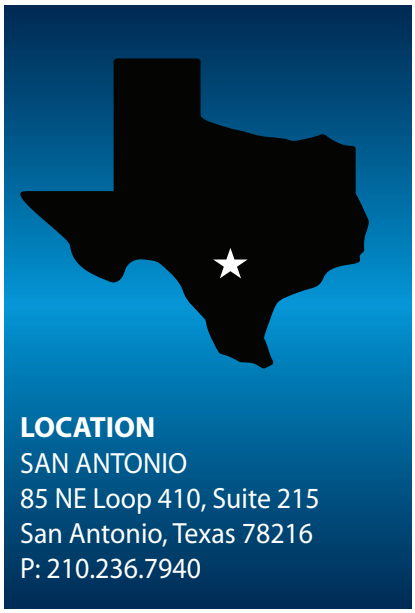
2.1 FIRM PROFILE

Valdez Engineering is a Texas civil engineering consulting firm based in San Antonio. Established in 2022, the firm provides planning, design, bidding, and construction-phase services for public infrastructure projects throughout South and Central Texas. The firm's work is centered on municipal streets, drainage, water distribution, wastewater collection, pump stations, site improvements, sidewalks, shared-use paths, and related civil infrastructure.

Valdez Engineering was formed to provide governmental clients with direct access to experienced engineering staff and practical technical support throughout the full project lifecycle. The firm works with municipalities, public utilities, counties, and other governmental entities on projects ranging from targeted infrastructure evaluations and development reviews to complete design and construction administration assignments. This public-sector focus gives the team familiarity with municipal standards, public procurement requirements, interagency coordination, regulatory review, public right-of-way constraints, and the documentation expected for publicly funded projects.

The firm's services begin with field investigation, existing-condition review, and definition of project needs. VE then develops alternatives, preliminary layouts, engineering reports, construction plans, specifications, quantities, and cost estimates. During bidding and construction, the team provides addenda support, bid review assistance, submittal and RFI review, field coordination, change evaluation, progress meeting participation, and record drawing preparation. This continuity allows the same team that develops the design to remain involved when questions arise during procurement and construction.

2.1.a DIRECT PRINCIPAL INVOLVEMENT



Enrique S. Valdez, P.E., will serve as Project Manager and primary point of accountability for this contract. With nearly two decades of experience, he has led municipal water, wastewater, street, drainage, site, and construction-phase assignments for cities, utilities, counties, and other governmental clients throughout Texas.

As firm principal, Mr. Valdez remains directly involved in scoping, staffing, technical decisions, client coordination, quality review, and schedule management. This gives City staff direct access to the individual responsible for assigning resources, resolving issues, and maintaining continuity throughout each assignment.

VE's engineering and production staff support him with field investigations, design, construction documents, cost estimating, CAD, bidding, and construction administration. Staff are assigned based on each task's technical requirements, schedule, and continuity needs, allowing the same core team to remain involved through construction support.

2.1.b OFFICE PROVIDING SERVICES

The San Antonio office houses the firm's project management, civil design, cost estimating, and CAD resources. Work assigned under this contract will be directed from this office by Enrique S. Valdez, P.E., with support from the firm's engineering and production staff. Specialty services will be incorporated through established teaming partners based on the requirements of each assignment.

The office location provides direct access to South Texas and the Rio Grande Valley through established transportation routes and allows VE personnel to travel to Edinburg for project meetings, field reviews, stakeholder coordination, and construction support. The firm already performs work for public-sector clients across South Texas and has recent municipal review experience in the Rio Grande Valley. This regional activity gives the team familiarity with the climate, soils, drainage conditions, utility constraints, development patterns, construction practices, and agency coordination common to communities in this part of Texas.

2.1.c CORE SERVICE CAPABILITIES

Valdez Engineering's core services align with the types of assignments identified in the City's RFQ, including street infrastructure, utility improvements, water and wastewater systems, drainage, civil engineering, field investigation, alternatives analysis, preparation of plans and specifications, cost estimating, agency coordination, and general engineering support.

The firm's principal service areas include:

- **Municipal Streets and Pavement Improvements**. VE provides roadway reconstruction, mill-and-overlay design, grading, drainage, curb and gutter, sidewalks, curb ramps, driveway approaches, signing, pavement markings, traffic control coordination, and pavement restoration associated with utility projects. The firm's recent work includes City of San Antonio bond and capital improvement projects involving full-depth street reconstruction, pedestrian improvements, utility coordination, and construction in developed urban corridors.

- **Water and Wastewater Infrastructure.** The team has experience with water distribution and transmission improvements, gravity sewer systems, force mains, lift stations, utility rehabilitation, manholes, service connections, utility conflict resolution, and pavement restoration. VE's work includes projects that require field verification, regulatory coordination, hydraulic evaluation, alignment development, preparation of plans and specifications, bidding support, and construction-phase services.
- **Drainage and Site Improvements.** VE evaluates grading, surface drainage, stormwater conveyance, pedestrian facilities, driveway connections, and site constraints as part of roadway, utility, and shared-use path projects. The firm coordinates drainage improvements with existing streets, adjacent properties, utilities, accessibility requirements, and applicable floodplain or stormwater criteria.
- **Development and Plan Review.** VE provides technical review of subdivision plats and construction plans on behalf of municipal clients. Reviews address water, wastewater, paving, grading, drainage, access, fire protection, utility configuration, constructability, and compliance with City standards and applicable regulations. The team documents comments in organized review logs and tracks revisions through subsequent review cycles.
- **Construction-Phase Services.** VE supports clients after design through submittal and RFI review, design clarification, field coordination, progress meetings, change evaluation, pay application support, site observations, and record drawing preparation. The firm's active construction assignments include wastewater, waterline, street, pedestrian, drainage, and site-related improvements.

2.1.d MEETING SCHEDULES AND DEADLINES

At the start of each assignment, VE will confirm the scope, deliverables, review milestones, field needs, outside coordination, required decisions, and final completion date. The level of scheduling detail will match the assignment, ranging from a concise milestone list for smaller tasks to a detailed design and coordination schedule for larger projects.

The project manager will track near-term activities, unresolved decisions, outside dependencies, and staffing needs through regular internal coordination and look-ahead planning. When an issue may affect a milestone, VE will promptly communicate the impact, available options, and action required from the City.

- **Confirm the assignment at authorization.** VE will begin each task by confirming the scope, deliverables, available information, review periods, required meetings, field needs, outside coordination, decision dates, and final completion deadline. This establishes a shared understanding of the work before resources are committed.
- **Match staffing to the schedule:** The project manager will assign engineering, production, estimating, and specialty support based on the technical needs and timing of the task. Staffing will be adjusted as the assignment moves through investigation, design, review, bidding, or construction.
- **Identify and manage schedule risks early:** Potential constraints such as survey access, utility records, SUE, easements, permitting, environmental review, utility relocations, outside-agency coordination, and owner decisions will be identified during scoping and early design. When a risk may affect a milestone, VE will communicate the issue, likely impact, available options, and required action before it becomes a late-stage delay.
- **Coordinate multidisciplinary and outside dependencies:** VE will track information and actions required from utility owners, specialty consultants, regulators, property owners, and other public agencies. For multidisciplinary assignments, the project manager will confirm that each discipline is working from current base information and that changes are reflected across the full design.
- **Integrate quality control and regulatory review into the schedule:** Quality reviews will be planned as part of project delivery rather than added immediately before submittal. Reviews will address design criteria, calculations, plan consistency, quantities, specifications, estimates, constructability, utility conflicts, and prior comment resolution. Applicable City criteria and regulatory requirements will be identified early and incorporated throughout the work.
- **Maintain responsive bidding and construction support:** VE will provide timely submittal reviews, RFI responses, design clarifications, field coordination, and change evaluations. Response priorities will be based on their effect on active work, contractor sequencing, public access, and related City projects.
- **Document decisions and track commitments:** Key decisions, unresolved issues, responsible parties, and due dates will be recorded through meeting notes, action lists, comment logs, or decision logs. This provides the City and project team with a clear record of current status and required follow-up.
- **Apply experience from comparable municipal programs:** On SAWS Street Maintenance Program Package 7, VE coordinated field verification, survey, SUE, wastewater design, waterline interfaces, and construction responses under a schedule driven by planned roadway improvements. That same approach will be applied to Edinburg assignments tied to paving, development, grants, utility upgrades, or active construction.

VE's approach is intended to keep smaller assignments efficient while providing the structure needed for larger capital projects. Each task will have a defined schedule, assigned responsibilities, visible risks, documented decisions, and direct project manager involvement from authorization through completion.

ITEM 02 - FIRM QUALIFICATION AND EXPERIENCE

PROJECT #1

Project #1 Name:	COSA West College Link		
Description	Valdez Engineering served as prime consultant for the design, bidding, and construction-phase services for the West College Link project, which included approximately 3,200 linear feet of 12-foot-wide shared-use path extending from Culebra Road to Mayberry Avenue and connecting St. Mary's University, Memorial High School, and the Zarzamora Creek Trail corridor. The project also included sidewalks and accessible routes, drainage improvements, lighting, landscaping, pedestrian amenities, street and driveway interfaces, utility adjustments, and associated site improvements. The assignment required coordination across multiple engineering and design disciplines. VE led the integration of civil, drainage, electrical, structural, landscape, traffic, utility, and accessibility-related components into a coordinated set of plans, specifications, quantities, and cost estimates. The team also coordinated with specialty consultants, City departments, utility agencies, property owners, and other stakeholders throughout design and construction. Utility coordination was a major component of the project. VE developed detailed strip maps, reviewed existing and proposed utility information, coordinated joint-bid relocation work for CPS Energy gas and electric facilities, and worked with SAWS to address water and wastewater conflicts. The team incorporated utility adjustments into the construction documents and tracked coordination items that could affect phasing, constructability, and schedule. Regulatory compliance and innovative design were also central to the project. VE coordinated the work with City of San Antonio criteria, ADA and Texas Accessibility Standards, drainage and floodplain requirements, environmental and tree-preservation considerations, utility standards, permitting requirements, and public right-of-way constraints. The project included the City's first implementation of a Soil Cell system within the public right-of-way, creating a suspended pavement system that supports healthy tree growth while maintaining pedestrian access, pavement performance, drainage, and utility clearances. This required close coordination among civil, drainage, landscape, structural, electrical, and utility design components. During construction, VE provided submittal and RFI review, design clarification, field coordination, progress meeting participation, change evaluation, and record drawing support. The project is substantially complete.		
Project Date:	Substantial Completion in May 2026.		
Client:	City of San Antonio Public Works Department	Project Manager:	Enrique S. Valdez, PE
Project Representative:	Mariano Martino, P.E. City of San Antonio, Public Works Department 210-207-2778 Mariano.Martino@sanantonio.gov	Service Offerings:	Project Management, Multidisciplinary Design Coordination, Shared-Use Path and Sidewalk Design, Grading and Drainage Design, ADA/TAS Compliance, Utility Coordination, Permitting and Regulatory Compliance, PS&E Preparation, Bid-Phase Services, and Construction-Phase Services

Why This Project Is Relevant
This project shows VE's ability to manage a complex assignment involving multiple disciplines, outside agencies, specialty consultants, and overlapping review requirements without losing control of the overall design. That experience is directly applicable to Edinburg's on-call work, where assignments may require several technical specialties, coordination across City departments, and clear accountability from a single prime consultant.

ITEM 02 - FIRM QUALIFICATION AND EXPERIENCE

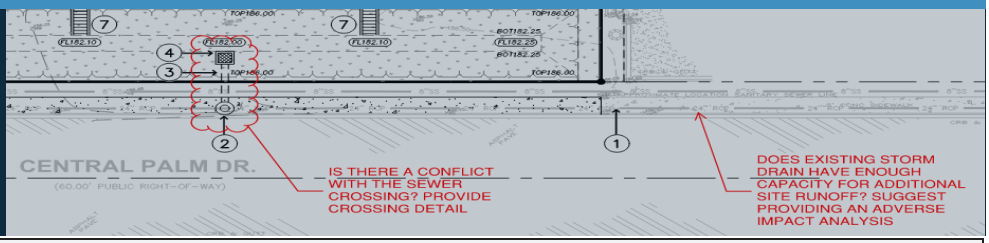
PROJECT #2

Project #2 Name:	COSA Hays Street Bridge Connections and East Side Streets		
Description	Valdez Engineering is providing roadway and civil engineering services as a subconsultant for the City of San Antonio's Hays Street Bridge Connections and East Side Streets project. The bond-funded project improves pedestrian and multimodal connectivity between the East Side, the Hays Street Bridge, and the San Antonio River Walk through shared-use path improvements, accessible pedestrian facilities, and neighborhood street reconstruction. VE is responsible for the design of the Burleson Street and North 10th Street segments, including approximately 1,624 linear feet of full-depth roadway reconstruction and 493 linear feet of mill-and-overlay improvements. The work also includes new sidewalks and driveway approaches throughout the project limits, ADA-compliant curb ramps and pedestrian connections, grading, drainage, signing and pavement markings, utility adjustments, traffic control considerations, and associated restoration. VE prepared the design through the 40%, 70%, 95%, and final PS&E phases, including alignments, plan and profile sheets, cross sections, details, and quantities. Utility coordination was a key component of the assignment. VE reviewed existing utility information, coordinated with the City, prime consultant, and utility owners, evaluated conflicts affecting roadway, sidewalk, driveway, and drainage improvements, and incorporated required adjustments into the construction documents. This coordination helped align VE's street design with the broader shared-use path and bridge-connection improvements and reduced the potential for utility conflicts during construction. Regulatory and standards compliance were incorporated throughout the design. VE developed the improvements in accordance with City of San Antonio roadway and drainage criteria, ADA and Texas Accessibility Standards, stormwater requirements, traffic control standards, utility criteria, and public right-of-way requirements. The design also accounted for existing residential and commercial access, driveway tie-ins, pedestrian circulation, and constrained construction conditions within the developed urban corridor. The project is currently in the bid phase, with construction anticipated to begin in the following months.		
Project Date:	Design completed in April 2026. Bid Phase ongoing.		
Client:	City of San Antonio Public Works Department	Project Manager:	Enrique S. Valdez, PE
Project Representative:	Mariano Martino, P.E. City of San Antonio, Public Works Department 210-207-2778 Mariano.Martino@sanantonio.gov	Service Offerings:	Roadway Reconstruction Design, Mill-and-Overlay Design, Sidewalk and Driveway Improvements, ADA/TAS Compliance, Grading and Drainage Design, Utility Coordination, PS&E Preparation, Regulatory Compliance, Bid-Phase Services, and Construction-Phase Support.

Why This Project Is Relevant
This project demonstrates VE's ability to perform effectively as part of a larger consultant team while maintaining responsibility for its own design scope, schedule, quality, and coordination obligations. That experience is relevant to Edinburg assignments requiring VE to integrate its work with other consultants, utility providers, adjacent projects, or City-led improvements while maintaining consistent standards and deliverables.

ITEM 02 - FIRM QUALIFICATION AND EXPERIENCE

PROJECT #3



Project #3 Name:	2027 SAWS Street Maintenance Program Package VII		
Description	Valdez Engineering is providing wastewater design and construction-phase services as a subconsultant for SAWS' 2027 Street Maintenance Program Package 7. The project includes approximately 2,200 linear feet of new 8-inch gravity sewer, service laterals, manholes, and two manhole rehabilitation locations along North Brazos Street and West Laurel Street. The improvements were developed to address aging infrastructure and resolve utility needs before the City of San Antonio advances planned street maintenance work within the same corridors. The assignment required an accelerated schedule so the wastewater improvements could be designed, bid, and constructed ahead of the roadway work. VE prepared plans, details, quantities, and specifications and coordinated with the prime consultant, SAWS, City staff, field operations personnel, surveyors, and SUE providers. Site visits and field verification were used to confirm service connections, manhole elevations, shallow utility crossings, and construction limits. Utility conflict resolution was a central component of the project. VE evaluated topography, manhole inverts, service connections, and available utility information to establish practical sewer alignments and grades within constrained street corridors. The team coordinated with the prime consultant responsible for the waterline design to maintain required separation, address shallow conflicts, and integrate both systems into a coordinated bid package. Field-verified information was incorporated into the plans to reduce construction conflicts and avoid delays to the street maintenance work. The design was developed in accordance with SAWS criteria, City of San Antonio requirements, applicable TCEQ standards, utility separation requirements, and pavement restoration criteria. VE maintained responsive communication throughout design and continues to provide timely submittal reviews, RFI responses, field coordination, and design clarifications during construction. The project is currently under construction. Completing the wastewater improvements ahead of the planned street work helps protect the City's pavement investment and reduce the risk of future utility cuts.		
Project Date:	Design completed in August 2025. Construction Ongoing.		
Client:	San Antonio Water System/Lochner (Prime Consultant)	Project Manager:	Enrique S. Valdez, PE
Project Representative:	Chris Boentges, PE Senior Engineer Lochner 210-491-2391 cboentges@hwlochner.com	Service Offerings:	Wastewater Collection System Design, Utility Conflict Evaluation and Resolution, SUE and Field Verification Coordination, Gravity Sewer and Manhole Design, Plan and Specification Preparation, Regulatory Compliance, Multidisciplinary Coordination, Accelerated Schedule Delivery, Bid-Phase Services, and Construction-Phase Support.

Why This Project Is Relevant

This project highlights VE's ability to work within a schedule controlled by a separate City capital program and to respond quickly when utility decisions affect downstream roadway work. The team had to resolve utility issues, coordinate field information, and provide timely design and construction responses so the wastewater improvements would not delay the planned street work, directly supporting the RFQ's emphasis on schedules and deadlines.

ITEM 02 - FIRM QUALIFICATION AND EXPERIENCE

PROJECT #4

Project #4 Name:	Subdivision Plan Reviews for the City of Rio Grande City		
Description	As a trusted advisor, Valdez Engineering provided technical plat and construction plan review services for the City of Rio Grande City, supporting the City's development review process for multiple commercial subdivision projects. Acting in the role of the City's technical reviewer, Valdez Engineering evaluated subdivision plats, boundary layouts, and supporting construction plans to verify compliance with City standards and development requirements prior to plat approval. Construction plan reviews included proposed water and wastewater utilities, paving, grading, drainage, and landscape improvements. Reviews were performed in accordance with the City's subdivision regulations while also evaluating compliance with applicable TCEQ regulations, the International Fire Code, and other governing criteria. Technical evaluations included verification of water and sanitary sewer system design, utility separation requirements, pipe sizing, fire hydrant spacing and coverage, drainage capacity, and overall conformance with municipal design standards. Where proposed utility configurations presented unique constructability challenges, Valdez Engineering evaluated the feasibility of the proposed design and, when warranted, supplemented its constructability review with input from local contractors familiar with municipal utility construction practices. Potential conflicts were documented and communicated to the design engineer for resolution while maintaining compliance with City standards and TCEQ regulations. Valdez Engineering routinely utilizes comment response forms during plan development and review for municipal projects to document design revisions, track engineering decisions, and maintain a clear record of comment resolution throughout each review cycle. As the City's technical reviewer, this same process was used to organize review comments, plan markups, applicable code references, and required revisions. The resulting comment logs provided design engineers with a clear, traceable record of review comments and responses, streamlining subsequent review cycles, improving communication between the City and design consultants, and promoting consistent, thorough, and well-documented technical reviews.		
Project Date:	2026. Ongoing.		
Client:	City of Rio Grande City	Project Manager:	Enrique S. Valdez, PE
Project Representative:	Frank Coronel City Planner City of Rio Grande City 956-488-8728 fcoronel@cityofrgc.com	Service Offerings:	Subdivision Plat Review, Construction Plan Review, Municipal Development Review Support, Water and Wastewater Utility Review, Paving and Grading Review, Drainage Review, Fire Protection and Access Review, Regulatory Compliance Evaluation, Constructability Review, Comment Log Development, and Review Coordination

Why This Project Is Relevant

This assignment demonstrates VE's ability to provide responsive, recurring technical support for smaller municipal tasks that still require sound engineering judgment and consistent documentation. The work required uniform application of City standards, organized review comments, and timely follow-up across multiple review cycles. Rio Grande City's location in the Rio Grande Valley also gives VE direct experience with development conditions, infrastructure needs, and municipal review practices within the same region as Edinburg, making the assignment especially relevant to the City's anticipated development review and general civil engineering support needs.

ITEM 03 | TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

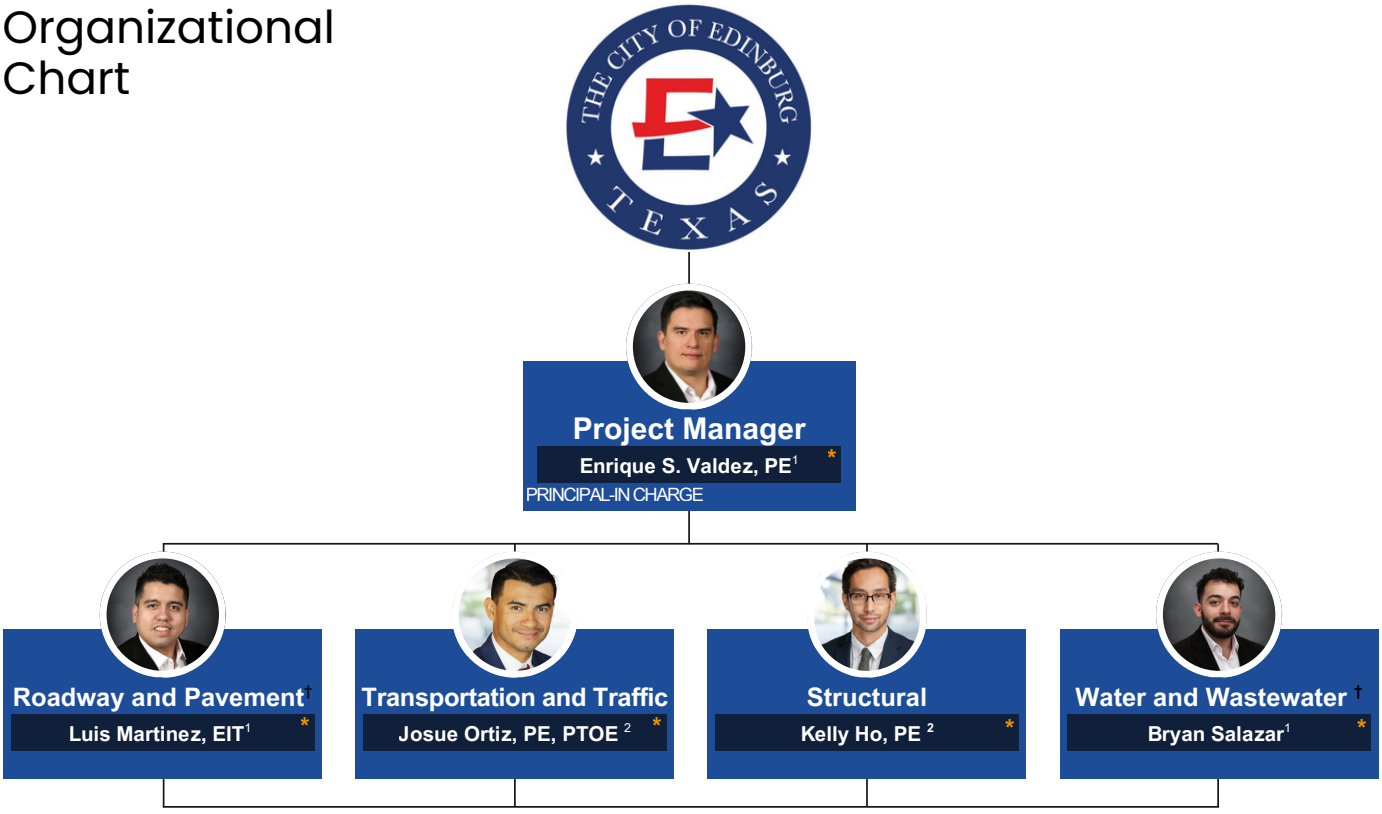
3.1 Organizational Chart

3.2 Key Personnel Resumes

Notes

ITEM 03 - TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

TEAM ORGANIZATION



Valdez Engineering has organized the proposed team around the principal services anticipated under this contract, with clear responsibility and direct accountability to the City of Edinburg. Enrique S. Valdez, PE, will serve as Project Manager and Principal-in-Charge, directing scope, schedule, quality, subconsultant coordination, and delivery. He will remain directly involved and serve as the City's primary point of contact.

Luis Martinez, EIT, will lead street and roadway assignments, including existing-condition evaluations, pavement and roadway design, drainage coordination, accessibility, plan development, and construction support. Bryan Salazar will lead utility assignments involving water, wastewater, and related municipal infrastructure. Both will work under Mr. Valdez's direct supervision.

STV will provide transportation, traffic, and structural engineering services. Jouse Ortiz, PE, PTOE, will lead transportation and traffic assignments, while Kelly Ho, PE, will lead structural services. KCI will provide surveying and subsurface utility engineering through Cody Condron, RPLS, and Kyle Jones, PE. Jaime Galm, AWB, of Raba Kistner will provide environmental support.

Mr. Valdez and Mr. Martinez will support hydrology, hydraulics, and stormwater pollution prevention planning. Mr. Martinez and Mr. Salazar will support cost estimating, while Mr. Salazar will coordinate permitting and regulatory compliance. This structure allows Valdez Engineering to scale the team for assignments of varying size while maintaining a single point of accountability to the City.

ITEM 03 - TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Enrique S. **Valdez, PE**

Project Manager

VALDEZ ENGINEERING

Enrique S. Valdez, P.E., serves as Principal and Project Manager at Valdez Engineering and brings nearly 20 years of experience delivering municipal infrastructure projects throughout South and Central Texas. His experience includes the planning, evaluation, design, permitting, bidding, and construction administration of water, wastewater, drainage, roadway, site, and other public infrastructure improvements. He has led assignments for municipalities, counties, public utilities, and other governmental clients, ranging from focused infrastructure evaluations and rehabilitation projects to larger multidisciplinary capital improvements.

Why Enrique?

Enrique's experience with the City of Laredo, Webb County, and other governmental clients gives him practical knowledge of South Texas infrastructure, agency coordination, permitting requirements, utility conflicts, construction constraints, and cost considerations. He also brings experience coordinating multidisciplinary assignments and identifying civil and utility issues that may affect other areas of the design.

Years of Experience

Total: 20 With VE: 4

City of Residence:

San Antonio, TX.

Relevant Experience

12" Force Main Rehabilitation, City of Laredo, Laredo, TX.

Mr. Valdez served as Project Manager for the trenchless rehabilitation of approximately 5,800 LF of existing 12-inch force main using a Primus Kevlar liner system for the City of Laredo Utilities Department. The work included approximately 2,000 LF along East Del Mar Boulevard and approximately 3,800 LF through a private golf course and residential area. Mr. Valdez managed the 30%, 60%, 90%, and 100% design submittals and led utility coordination with TxDOT and multiple utility companies. His work included sewer design, OPCC development, traffic control planning, erosion control, stormwater pollution prevention, permitting coordination, bypass pumping coordination, right-of-entry coordination, and street repair requirements. During construction, Mr. Valdez provided on-site construction management services for the duration of the project.

West College Link, City of San Antonio Public Works, San Antonio, TX.

Mr. Valdez served as Project Manager for the design of approximately 3,200 LF of 12-foot-wide shared-use path improvements along Memorial Street for the City of San Antonio. The work included civil/site design, drainage improvements, accessibility, lighting, landscaping, nearly 100 new trees, structural, permitting, cost estimating, and construction-phase support. Mr. Valdez managed the multidisciplinary design team and coordinated with City departments and project stakeholders. His work included design coordination, utility and site constraint evaluation, drainage and accessibility considerations, permitting coordination, OPCC development, constructability review, and coordination of improvements affecting adjacent streets and infrastructure.

Jones Maltsberger Road at Burning Trail Intersection, City of San Antonio, San Antonio, TX

Mr. Valdez served as Construction Lead for the intersection improvement project at Jones Maltsberger Road and Burning Trail, supporting final design and construction-phase services for the City of San Antonio. The project widened approximately 550 LF of Jones Maltsberger Road to provide a dedicated center-turn lane and included roadway plans and profiles, traffic control, pavement markings, drainage improvements, traffic signal modifications, and utility adjustments. During construction, he coordinated with City inspectors, utility owners, and the contractor to address field conditions, erosion and sediment control requirements, and conflicts affecting the roadway and drainage improvements.

Sombreretillo 12" Force Main, City of Laredo Utilities, Laredo, TX.

Mr. Valdez serves as Project Manager for this City of Laredo Utilities Department project involving hydraulic modeling, lift station evaluation and improvements, and approximately 9,000 LF of new 12-inch PVC force main. The work includes evaluation of existing pumps, wet-well configuration, yard and process piping, force main alignment, air release valves, plug valves, gravity sewer improvements, and pavement restoration. Mr. Valdez led field investigations, hydraulic analysis, alignment evaluation, preparation of construction documents and cost estimates, permitting coordination, and coordination with City staff and regulatory agencies. The project is currently under construction.

ITEM 03 - TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Luis **Martinez Alonso, EIT**

Project Engineer

VALDEZ ENGINEERING

Mr. Martinez Alonso serves as Project Engineer at Valdez Engineering for the design and construction of roadway, pedestrian, drainage, and utility improvements for municipal clients. His experience includes roadway reconstruction, shared-use paths, sidewalks, accessibility improvements, traffic control, pavement restoration, drainage coordination, and water and wastewater infrastructure within public rights-of-way. He works through field conditions, utility conflicts, constructability constraints, and agency requirements that may affect roadway geometry, phasing, cost, or schedule.

Why Luis?

Luis brings a practical field-to-design perspective to roadway improvements. He uses field observations, utility information, and constructability input to identify conflicts and develop workable solutions before they affect construction. His coordination with public agencies, utility owners, prime consultants, and contractors helps keep roadway design decisions aligned with existing conditions and project requirements.

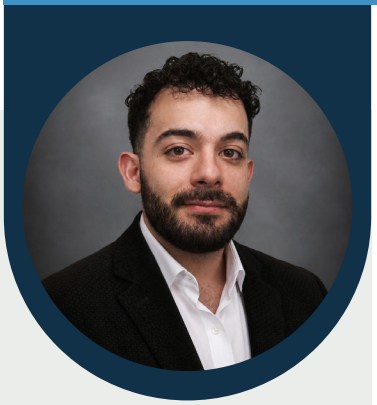
Relevant Experience

West College Link, City of San Antonio Public Works, San Antonio, TX

Mr. Martinez Alonso serves as Design Lead and Project Engineer for approximately 3,200 LF of 12-foot-wide shared-use path improvements along Memorial Street. His work includes grading, drainage evaluation, accessibility improvements, street and driveway crossings, pavement restoration, signing, pedestrian lighting, utility coordination, and preparation of plans, quantities, and cost estimates. He evaluated roadway, drainage, utility, right-of-way, and adjacent property constraints affecting the alignment and developed design transitions near the creek crossing, bridge wingwall, adjacent streets, driveways, and existing infrastructure. He also supported floodplain permitting, drainage documentation, constructability review, bid-phase responses, and construction coordination as the project progressed through final design and construction.

Hays Street Bridge Connections and East Side Streets Project, COSA PWD, San Antonio, TX

Mr. Martinez Alonso serves as Design Lead for approximately 1,624 LF of full-depth roadway reconstruction and 493 LF of mill and overlay. The project includes new sidewalks, reconstructed driveways, accessibility improvements, pavement markings, traffic control, drainage considerations, and utility coordination. He leads development of roadway plans, profiles, grading, details, quantities, and construction documents while coordinating with the prime consultant, City staff, utility owners, and other design disciplines. His work includes field verification of pavement, curb, driveway, sidewalk, drainage, and utility conditions; evaluation of roadway grades and accessible routes; coordination of utility conflicts; and incorporation of agency comments through final design. The project is currently in the bid phase.



2027 SMP Package VII, SAWS, San Antonio, TX

Mr. Martinez Alonso serves as Project Engineer for the replacement of approximately 2,200 LF of existing 8-inch vitrified clay pipe with new 8-inch PVC gravity sewer along North Brazos Street and West Laurel Street. The work is coordinated with planned City roadway and sidewalk improvements, requiring close coordination of sewer design, existing utilities, pavement restoration, access, and construction sequencing. His responsibilities include plan and profile development, review of survey and SUE information, field verification, utility conflict evaluation, service lateral reconnections, pavement restoration limits, quantities, and construction document preparation. During construction, he participates in site visits, coordination meetings, submittal and RFI review, and resolution of field conditions affecting sewer installation and roadway restoration.

Sombreretillo 12" Force Main, City of Laredo Utilities, Laredo, TX.

Mr. Martinez Alonso serves as Design Lead and Project Engineer for approximately 9,800 LF of new 12-inch force main and associated lift station improvements. His responsibilities include alignment development within public rights-of-way, evaluation of street crossings, pavement restoration, traffic control coordination, utility conflict review, and preparation of plans, profiles, details, quantities, and cost estimates. He conducted field investigations, coordinated survey and utility information, and evaluated construction constraints affecting roadway crossings, bore limits, excavation areas, access, and restoration requirements. During bidding and construction, he has reviewed submittals, RFIs, pay applications, and contractor requests affecting pavement restoration, traffic access, utility conflicts, sequencing, and design revisions.

ITEM 03 - TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Bryan **Salazar**

Project Engineer

VALDEZ ENGINEERING

Mr. Salazar serves as Project Engineer at Valdez Engineering for municipal water and wastewater infrastructure projects. His recent experience includes SAWS sanitary sewer replacement and water main replacement assignments under the SMP and WMR programs. His work includes utility design development, preparation and review of plans and specifications, construction phasing, bypass requirements, pavement restoration, utility coordination, quantities, and bid items. He applies municipal standards, TCEQ requirements, and other applicable regulatory criteria throughout design and also contributes to cost estimating as projects advance, helping maintain consistency between the proposed improvements, construction requirements, and bid documents.

Why Bryan?

Bryan understands how utility design decisions affect construction quantities, bid items, phasing, restoration, and overall project cost. His experience helps the team identify scope gaps and cost drivers early, maintain consistency across the plans and bid documents, and develop water and wastewater improvements that are practical to construct and budget.

Education

Bachelor of Science, Civil Engineering, University of Texas at San Antonio, 2023

Years of Experience

Total: 4 With VE: 2

City of Residence:

San Antonio, TX.

Relevant Experience

2025 Water Main Replacement CIP Package 2 – E. Vestal Pl., SAWS, San Antonio, TX

Mr. Salazar served as Project Engineer for the replacement of approximately 1,435 LF of existing 8-inch waterline with new HDPE waterline along East Vestal Place. He developed the waterline alignment and construction plans, reviewed available utility records, and coordinated field verification with Lochner, SAWS, and D&C Construction crews. His work included evaluating active and abandoned utilities, water and sewer separation requirements, service reconnections, roadway conditions, access, and pavement restoration. He incorporated field findings and agency coordination into the design and assisted with quantities and cost review as the construction documents advanced.

2027 SMP Package VII, SAWS, San Antonio, TX

Mr. Salazar serves as Project Engineer for the replacement of approximately 2,200 LF of existing 8-inch vitrified clay pipe with new 8-inch PVC gravity sewer along North Brazos Street and West Laurel Street. His work includes review of sewer plans and profiles, manhole and service lateral improvements, utility coordination, construction sequencing, pavement restoration, quantities, and bid items. The sewer improvements are coordinated with a planned City roadway and sidewalk project, requiring close attention to restoration limits, access, and timing. He also contributes to constructability and cost reviews to maintain consistency among the design documents, quantities, and anticipated construction requirements.

2025 Water Main Replacement CIP Package 4 – Zabra Dr, SAWS, San Antonio, TX

Mr. Salazar served as Project Engineer for the replacement of approximately 593 LF of existing 8-inch waterline along Zabra Drive. He developed the waterline layout and construction plans and coordinated with Lochner, SAWS, and D&C Construction crews to confirm existing conditions and resolve design constraints. His work included evaluating an existing manhole near the proposed alignment, utility crossings, water and sewer separation, service connections, fire hydrant coverage, pavement conditions, and restoration requirements. He incorporated field observations and coordination comments into the design and provided supporting quantities and cost information during project development.

2025 Toutant Beauregard 16-Inch Water Main Replacement, SAWS, San Antonio, TX

Mr. Salazar serves as Project Engineer for this SAWS water main replacement project as a subconsultant to Lochner. Valdez Engineering is designing approximately 2,000 LF of new 16-inch DI waterline as part of a larger project replacing approximately 6,000 LF of existing 16-inch PVC waterline. His responsibilities include waterline layout development, review of survey and utility information, field verification, preparation of construction plans and quantities, and coordination with Lochner, SAWS, and D&C Construction crews. Due to existing limestone conditions, the waterline is being replaced generally in place to avoid additional excavation and construction costs. The design also maintains water service and coordinates with Bexar County's planned intersection improvements.

ITEM 03 - TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Josue **Ortiz, PE, PTOE**

Transportation / Traffic Engineering

Josue has more than 19 years of experience in traffic engineering, specializing in traffic operations and traffic studies. His work includes traffic data collection, operational analysis, traffic impact studies, signal timings, and corridor performance evaluations for various local and state agencies. He has designed traffic signals, intelligent transportation systems (ITS), traffic control plans, signing and pavement markings, illumination, and bicycle and pedestrian facilities for numerous local and state agencies. Additional experience includes traffic control plans, construction phase support, quality control, and technical reports to support engineering decisions.

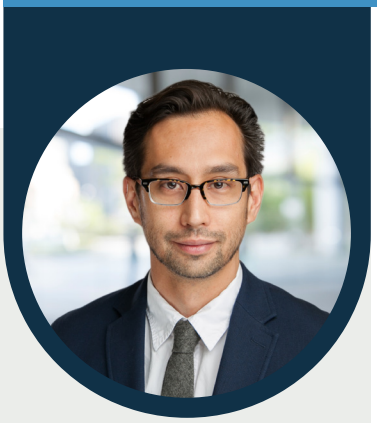
San Antonio, TX.

Relevant Experience

IH 10/IH 410 East Interchange Improvements, TxDOT San Antonio District

Lead Engineer. Josue serves as the lead engineer for the IH 10/IH 410 interchange improvements project in San Antonio, Texas. CONSOR led lighting and traffic signal design for this interchange improvement project. The project includes modification of the existing traffic signal at the IH 10/Houston Street interchange, including pole and equipment summaries, conduit and conductor schedules, and signing and striping for the modified tight diamond interchange. Lighting design efforts included continuous conventional lighting (LED fixtures) for roughly two miles of IH 10 and 2.5 miles of IH 410, new high mast lighting (LED fixtures) for the IH 10/IH 410 system interchange, and removal of conventional lighting in this area. Underpass lighting for five structures within the project limits was also provided, and eight new electrical service locations were established. Lighting design activities included civil and electrical design and preparation of complete bid documents, including layout sheets, circuit diagrams, electrical service summary sheets, a summary of quantities, and TxDOT signal and lighting details. Close coordination with the prime consultant was critical to ensure the design and detailing consistency, implementation of drainage, illumination and signing appurtenances, and aesthetic treatments.



WW White Rd Safety Study and Signal Timing Evaluation, City of San Antonio, Texas / QAQC

As part of an On-Call work authorization, STV was tasked to provide safety review of WW White Road from Hunnicut Dr to Creekmoor Rd. The study corridor consisted of six lanes and included 7 signalized intersections. Josue provided oversight and review of the traffic data analyzed by the STV team. Two types of safety assessments; sliding window analysis to find safety hotspots, and systematic analysis to identify unsafe movements which indicated intersection related contributing factors including mid-block crossings, inadequate geometry, and signal timing issues. We evaluated lane use changes and signal phasing modifications to improve pedestrian safety along the corridor, including split phasing, exclusive left turn phases, all pedestrian phases, leading pedestrian intervals, and increased crossing times for school children. STV recommended and designed changes for intersections at Houston Street, Rice Road, and Lavender Lane, as well as performed observations after implementation to confirm proper phasing and compare associated impacts with the Synchro model. As part of this study, additional safety countermeasures were recommended.

FM 1976, TxDOT San Antonio District

Project Engineer. Josue was the project engineer who was responsible for designing the widening of FM 1976 along a five-mile corridor in Bexar County. The study included signal redesign along with ADA-compliant sidewalks, ramps, and pedestrian push buttons. The design included temporary signals, permanent (span wire and mast arm) signals, some of which were designed per TxDOT standards and some per City standards, signing and pavement markings, traffic control plans during construction, drainage, roadway design, and utility coordination. The work involved coordination between TxDOT and the Cities of San Antonio, Converse, and Universal City.

ITEM 03 - TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Kelly **Ho, PE**

Structural Engineering

Kelly is a professional engineer and senior project manager with 20 years of structural engineering experience for highway and roadway projects for major public transportation agencies, including Texas Department of Transportation (TxDOT) and Oklahoma Department of Transportation (ODOT). His design expertise extends to prestressed concrete and reinforced concrete and structural steel, and he has experience in the inspection and load rating of existing structures. Kelly is familiar with AASHTO load and resistance factor design (LRFD) standards as well as regulations of various local and state agencies.

Licenses, Certifications and Associations

Professional Engineer: Texas (#112947

Years of Experience

Total: 20 With STV: 20

City of Residence:

Austin, TX.

Relevant Experience

Bexar County Public Works Department Talley Road Phase II, Bexar County, TX

Produces bridge designs for the Bexar County Public Works Department Talley Road Phase II project that will widen 2.3 miles of the road between Wiseman Boulevard and Tamaron Pass from two lanes to a 4-lane divided roadway with continuous center turn lanes. The $22.8 million project also includes median and active transportation improvements and is being developed within a limited ROW requiring the use of TxDOT standard type F and C curbs behind the sidewalk. All five proposed drainage crossings and roadway profiles were upgraded to provide 100-year [flood?] protection, and drainage was converted from a roadside ditch to an underground system to outfall at one of the five cross culverts within the project limits. Kelly is designing 2 prestressed concrete beam bridges of 150-feet and 250 feet in length, which include abutment and interior bent cap and drilled shaft foundations along with calculated bridge geometry for bearing seat elevations and bridge quantities. To maintain traffic flow during construction, the phased construction joint is being designed to be placed in the bridge deck and substructure elements to provide space for reinforcing bars to be lapped with subsequent phase lapping bars. Also, he designed custom cast-in-place culvert wingwalls.

Bexar County Public Works Department Talley Road Phase I, Bexar County, TX

Produced bridge designs for the Bexar County Public Works Department Talley Road Phase I project that widened 2.3 miles of the existing road between Potranco Road and Wiseman Boulevard from 2 lanes to a 4-lane divided roadway with a raised median. The $22.3 project also includes raised roadway profile adjusted with hydraulic team coordination at three culvert crossings and the Medio Creek Bridge to provide protection from a 100-year flood event. Kelly produced designs for the multi-phased 3-span, 240-foot-long bridge that included prestressed concrete beam, abutment and interior bent cap, lateral capacity check for columns, drilled shaft foundation, and calculated bridge geometry for bearing seat elevations and bridge quantities. To maintain traffic flow during construction, he placed the phased construction joint in the bridge deck and substructure elements to provide space for reinforcing bars to be lapped with subsequent phase lapping bars. Using TxDOT standard design parameters, he designed cast-in-place spread footing walls.

TxDOT Yoakum District Off-System Bridge Replacement Projects, South East, TX

Designed 16 bridges for a 6-year engineering services contract for the development of plans, specifications, and estimates (PS&E) of 51 off-system bridge replacements within TxDOT Yoakum District in Southeast Texas. The firm evaluated various standard bridge types, including prestressed slab beam and prestressed box beams, to provide a shallow superstructure depth allowing minimal raise in roadway profile to mitigate ROW acquisition as well as provide temporary construction easements for sufficient opening for meets-or-exceeds hydraulic conditions. Kelly oversaw design subconsultants and evaluated constructability at bridge sites, including limitations for beam transport. As deputy project manager, he coordinated design tasks, reviewed plans and construction timelines, and prepared PS&E documents, including Form 1002, state gate checklist, and general notes for all submittal milestones.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 18, 2026
AWARDING OF BIDS
Agenda Item No: 13.G.
2026-2028 Project Management Services Rotation

1. **Agenda Item:**
Consider Awarding RFQ No. 2026-8, Project Management Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s), as Projects Arise. [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

2. **Description:**
On occasion, the City of Edinburg may require Project Management Services on larger scale City projects. The qualified firm(s) selected should be experienced in Project Management for various disciplines. It is expected that the qualified firm(s) selected will have a sufficient level of innovation and appraisal expertise to carry out the projects without constraints to produce documents in a timely manner. The firm must be prepared to assure the City of Edinburg that key personnel indicated in their qualification statement will maintain their role in each project and that their present workload is such that each project will be completed on or before the due date.

On Tuesday, July 14, 2026, requests for qualifications for RFQ No. 2026-8, Project Management Services were received and opened. A total of thirteen (13) Request for Qualifications were received and reviewed by staff. All of the submittals received met the criteria set out in the Request for Qualifications. The Rotation Pool is for potential projects between October 2026 through September 2028. The following qualified firms listed in alphabetical order have submitted Statements of Qualifications in response to this RFQ:

1. B2Z Engineering, LLC*
2. Broaddus & Associates
3. Brownstone Consultants*
4. DPTV Tango, LLC
5. Dugger Grafe Swanson, Inc. dba Valbridge Property Advisors
6. Freese and Nichols, Inc.
7. LDG Enterprises, LLC (GDJ Engineering)
8. Millennium Engineers Group, Inc.
9. NM Contracting, LLC
10. Rio Delta Engineering
11. SAMES, Inc.*
12. SDI Engineering, LLC
13. Trimad Consultants, LLC

* On 2024-2026 rotation

Limiting the selection of firms between 3 and 5 will insure each firm will obtain a project as it arises. The current rotation has 7 firms and not all have received a project.

3. **Staff's Recommendation:**
Staff recommends Awarding RFQ No. 2026-8, Project Management Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s), as Projects Arise.

1. Introduction

1.1. Summary

The City of Edinburg's Engineering Department is currently seeking to retain a rotation list of qualified consulting firms to provide project management services. The term of the contract will be two (2) years from 10/01/2026 – 9/30/2028. The work will be assigned on an as-needed basis for a variety of capital improvement projects and city programs and projects. The work may be discrete, short term assignments or may be part of larger capital or planning efforts. This document outlines the requirements, selection process and documentation necessary to submit to this Request for Qualifications (RFQ).

The selected firm(s) will report to, and operate under, the direction of City of Edinburg's Department of Engineering staff. Must have a Texas Licensed Professionals with superior background, training, and qualifications meeting all requirements of this RFQ, Registered or licensed in the State of Texas.

All qualified firms or persons shall have current licenses as required under the State of Texas for the provisions of services requested for the City of Edinburg. The City of Edinburg is interested in entering into continuing contracts with one or more qualified construction management firms to provide Citywide Construction Management Services. The specified services shall consist of providing Construction Management Services throughout the City, as required and directed by the City of Edinburg staff, on its various new construction, remodeling, renovation, life safety, maintenance and repair projects.

2. Scope of Work

2.1. Scope of Work

2.1. Scope of Services for Project Manager

The scope of construction management services will be identified on a project-by-project basis and will vary depending on project needs. A project scope may include, but is not limited to, alterations and additions to existing facilities, renovations, site improvements, new construction, facility demolition, utility upgrades and improvements, electrical system upgrades, mechanical system upgrades, and plumbing system upgrades. All services shall be performed pursuant to applicable law, rule, or regulation and pursuant to applicable policy of the City of Edinburg.

The City of Edinburg reserves the right to add or delete, at any time, any or all tasks or services.

1. The firm(s) selected under this continuing contract will be responsible for assigned projects.
2. The City reserves the sole right to select more or less than three Construction Managers as it deems necessary.
3. This will be a multiple award contract for an initial period of two years. The total term of the agreement (including all renewals) shall not exceed the final completion of a project started by firm.
4. Selected firms will be required to adhere to guidelines and code as set forth by International Building Code, Unified Development Code and City's Engineering Design Standards for assigned projects (unless otherwise instructed by City Staff).

A. General – A wide range of services may be required including, but not limited to:

i. Perform assigned duties and responsibilities upon issuance of Job Task Order or notice to proceed in accordance with the scope provided in such work order or notice or upon direction of the City's designee.
ii. Work will consist of trades necessary to complete work as detailed in the construction documents, specifications and/or as directed by the City's Project Manager.
iii. All work must comply with current codes in effect at the time of work and with all OSHA requirements. Appropriate safety and security of the construction site and related area, including staging area(s) and roadway(s) is required, and will be provided by the CM at no additional cost to the City.
iv. Provide recommendations regarding construction feasibility, labor availability, material usage, time requirements and update completion date based on project plans, specifications, verbal instruction(s) or combination thereof.
v. Prepare cost estimates for alternative designs and material recommendations to improve project budget and its management.
vi. Prepare Guaranteed Maximum Price (GMP) to include any construction, material, labor, self-performed work and management cost, detailing each area of the proposal.
vii. Provide Value Engineering Services and make recommendations to assure compliance with GMP.
viii. Prepare/coordinate construction schedule for the Construction Team.
ix. Update schedules, activity sequences, and duration milestone dates as needed.
x. Always provide site supervision during the requested services.

B. Pre-Construction Phase

a. Assist the City and the City's Professional Consultants during the scope development, preliminary design, and design development phases in evaluation of options for the project.
b. Establish the master project schedule identifying all different phases and all milestone items.
c. Develop a project budget and itemized Guarantee Maximum Price (GMP) upon negotiations with the City. The GMP shall include the substantial completion date of the project.
d. Review and familiarize itself with all reports, surveys, drawings, tests and results concerning the condition of existing facilities, systems, structures, and sites.
e. Work with and coordinate activities with any other contractors that the City contracts work with for the project.
f. Review all applicable documents to ensure constructability and to minimize change orders.
g. Review the project design to identify long-lead procurement items and equipment/materials which are eligible to be purchased by the City as direct material purchases.
h. Coordinate with the City's Professional Consultants to finalize construction documents and develop bid packages.

C. Procurement (Bids and Awards)

i. Schedule and conduct pre-bid conferences with the interested subcontractors, material suppliers, and equipment suppliers.
ii. Assess conditions in the construction market to identify factors that will or may affect costs and time for completing the project.
iii. Identify and solicit multiple bid packages that together will represent the entirety of the scope of work for the project.
iv. Compile bid specifications and packages, utilizing City's bid procedures, obtaining bids for any and all construction, sub-contractor, material suppliers, including direct material purchases.
v. Solicit, advertise, accept, review, and, based on approvals by the City, award bids to qualified subcontractors based on the bid packages identified.

D. Construction Phase

a. Schedule and plan construction meetings, take and issue meeting minutes, and attendance sheets as directed by the City's Project Manager.
b. Coordinate with the Professional Consultants and IDA to schedule and conduct Pre-Construction meetings with subcontractors.
c. Plan and recommend timing for the release of drawings and specifications to enable phasing of construction project.
d. Maintain and update the master project schedule, detailed construction schedules, submittal schedules, inspection schedules, and occupancy schedules.
e. Provide materials to job site in a timely manner and assure their safe keeping, meeting the terms of the contract, adhering to project scheduling, and direct material purchase program.
f. Develop, implement cost controls, and provide financial accounting services for documentation of projects.
g. Coordinate on-site construction management services including, but not limited to:
i. progress job site meetings
ii. maintain daily on-site project log and schedule report
iii. oversee quality assurance testing and inspection programs
iv. monitor construction management staff and subcontractor work performance for deficiencies
v. maintain record copy of all contract documents
vi. coordinate requests for information (RFI) submittals
h. review adequacy of and oversee and ensure compliance with construction management staff and subcontractor safety programs and policies.

D. Close-Out Phase

i. Assemble and deliver sufficient hard copies and electronic copies on USB/Flash Drive of closeout documents, parts and operational manuals, and repair and parts manual.
ii. Coordinate project close-out, start-up and transition to operation

iii. Coordinate completion of As-Built documents with City's Building Official and Project Manager.

iv. Complete or coordinate completion of punch-list items generated by the City's Professional Consultant and the City's representatives during their inspections.

v. Coordinate with the City's Professional Consultant to provide complete Project records including Project Manual and CAD drawings corrected to show all construction changes, additions, and deletions compared to the Construction Document.

vi. Coordinate with the City's Building Official to prepare the Certificate of Final Inspection.

vii. Coordinate and conduct Building Warranty Inspections

viii. Warrantee all workmanship and material for one (1) year following substantial completion.

ix. Ensure coordination and implementation of equipment training for City staff.

x. Provide USB/Flash Drive for all project photos.

xi. Project video record of any training provided to City's staff.

2.2. Submittal Requirements

The RFQ must be submitted according to the instructions outlined herein. Each response should include, at a minimum, the following items not excluding the selection process criteria:

Transmittal letter – Indicate interest and commitment to perform services for the City of Edinburg, include contact information (physical address, telephone, fax, cell phone, and email address) for the primary person responsible for your RFQ who will be the point of contact for the City on all correspondence and communications pertaining to the RFQ. State whether any addendums to this RFQ have been received by your firm and whether consideration of their content has been included in your RFQ. The letter must be signed by an officer of the firm who is authorized to bind the firm to contract and shall contain a statement to this effect;

Insurance - Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. A list of any insurance claims against the firm within the past 5 years.

Professional Services Agreement – Provide a statement that the Professional Services Agreement has been read, that the firm will meet the prerequisite insurance requirements, and the firm, if selected, agrees to enter in to such agreement.

Contact Information – Each firm must submit the firms two (2) different contact information (Name, Title, Address, Phone Number, Mobile Number, and Email Address).

Presentation – Each firm must submit six (6), one (1) original and five (5) bound copies of the RFQ. In addition, a USB with a PDF file of response must be provided.

2.3. General Requirements

All qualified firms or persons shall have current licenses as required under the State of Texas for the provisions of services requested for the City of Edinburg. The City of Edinburg is interested in entering into continuing contracts with one or more qualified construction management firms to provide citywide construction management services. The specified services shall consist of providing construction management services throughout the City, as required and directed by the City of Edinburg staff, on its various new construction, remodeling, renovation, life safety, maintenance and repair projects.

"Construction Management Services" means those services whereby the construction manager is selected to provide consulting services during the design phase; and management and contractual responsibility for the total construction project under a negotiated fee and guaranteed maximum price construction contracting method. A fee is negotiated for profit, overhead, and direct management costs. Trade contracts are

awarded by the construction manager based on competitive bids received in response to invitations to bid issued by the construction manager. A guaranteed maximum price is provided by the construction manager, and the total price paid to the construction manager is either the fee plus the actual cost or the guaranteed maximum price, whichever is less.

“Continuing Contract for Construction Management Services” means a contract with a construction manager for work during a defined time period on construction projects described by type, which may or may not be identified at the time of entering into the contract, and under which the estimated construction cost of each individual project or study activity costs do not exceed the amount permitted by law for work of a specified nature as outlined herein or in the contract.

Electronic submittal only of the response no larger than 30 pages must be submitted no later than specified date and time (cover and index sheets excluded from 30 page count).

3. Evaluation Criteria

1. 1. Overall Qualification of Team

Discuss the firm’s experience and history in performing project management services in a timely manner, particularly for other governmental agencies in the past Two (2) years. Discuss the firm’s uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

Submit resumes summarizing qualifications and experience of project manager, key staff and any support staff likely to be assigned to the work, as well as licensed to practice Engineering or Architecture in the state of Texas.

Scoring Method:
Points Based
Weight (Points):
40 (*40% of Total*)

2. 2. Previous Experience with City

Describe any previous projects with the City of Edinburg that relate to this RFQ.

Scoring Method:
Points Based
Weight (Points):
10 (*10% of Total*)

3. 3. Ability to meet Schedules and Deadlines

Describe firm's unique approach to getting projects completed within the originally established schedules and ways to keeping projects on time.

Scoring Method:
Points Based
Weight (Points):
30 (*30% of Total*)

4. 4. Stability and References

Provide at least three references (names and current phone numbers) from recent work and List all past projects with the City of Edinburg for each proposed team member. Include a brief description of the projects associated with the reference, and the role of the individual. Include a recommendation letter from the reference.

Scoring Method:
Points Based
Weight (Points):
15 (*15% of Total*)

5. 5. Presentation

Presentation of RFQ

Scoring Method:
Points Based
Weight (Points):
5 (*5% of Total*)

STATE OF TEXAS	**§**	**AGREEMENT BETWEEN THE CITY OF EDINBURG AND PROJECT MANAGEMENT CONSULTANT FOR PROFESSIONAL SERVICES PURSUANT RFQ NO. XXXX-XXX**
COUNTY OF HIDALGO	**§**	
CITY OF EDINBURG	**§**	

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **PROJECT MANAGEMENT CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit ”B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

Section XXI
Notice of Governing Law for State and Federal Grant Projects

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

Edinburg, Texas 78539

RE: Statement of Qualifications for Project Management Services
Request for Qualification (RFQ) 2026-8

Dear Mr. Hinojosa,

B2Z Engineering, LLC (B2Z) is pleased to submit our Statement of Qualifications in response to the City of Edinburg's Request for Qualifications (RFQ 2026-8) for Project Management Services. We appreciate the opportunity to continue serving the City and are excited to present our qualifications to provide comprehensive project management services in support of the City's capital improvement program.

For more than 17 years, B2Z has successfully provided project management, construction management, construction engineering and inspection, contract administration, procurement support, and owner representation services for municipalities, counties, drainage districts, and state agencies throughout Texas. Our team has successfully managed projects from initial planning and design through procurement, construction, and final closeout, consistently delivering projects that meet our clients' expectations for quality, schedule, and budget.

B2Z is an **MBE, WBE, WOSB,** and **SBE** certified engineering consulting firm with a proven record of delivering responsive, client-focused project management services. Our experienced professionals understand the complexities associated with public infrastructure and vertical construction projects and possess extensive experience coordinating architects, engineers, contractors, regulatory agencies, and project stakeholders throughout every phase of project delivery.

Services under this contract will be provided by an experienced team of local professionals led by **Mr. J. Noe Saldivar, PE, CFM**, who will serve as **Senior Project Manager**. He will be supported by a multidisciplinary team of construction managers, construction engineers, project managers, construction superintendents, inspectors, and project controls specialists with extensive experience managing public infrastructure and facility improvement projects throughout South Texas. Mr. Saldivar will manage this contract from B2Z's headquarters located at **900 S. Stewart Road, Suite 4, Mission, Texas 78572**. He may be reached at **(956) 403-9787** or **NoeS@B2ZEng.com**

Mrs. Aisha Gonzalez, President of B2Z Engineering, LLC, is authorized to bind the firm contractually. The firm's principal office is located at 900 S. Stewart Road, Suite 12, Mission, Texas 78572, telephone (956) 585-3773.

B2Z acknowledges that no addenda were issued for this Request for Qualifications.

We appreciate your consideration and the opportunity to continue building upon our successful partnership with the City of Edinburg. We look forward to continuing to provide responsive, dependable, and high-quality project management services that contribute to the successful delivery of the City's capital improvement projects.

Thank you for your consideration.

Respectfully,

Aisha Gonzalez
President

Firm Introduction

B2Z Engineering, LLC (B2Z) is a Limited Liability Corporation (LLC) and is a **premier engineering consulting firm established in 2009** and licensed through the State of Texas as a Professional Engineering Firm (TBPE #F-11187). B2Z is **100% LOCALLY OWNED AND OPERATED** and has been headquartered in the Rio Grande Valley since 2009. We are a **Woman-Owned Minority Business** with engineering offices and materials testing laboratories in Mission, Seguin, Houston, and Austin. B2Z has a uniquely qualified group of **LOCAL TALENT** with extensive experience and knowledge in the fields of:

- **Civil Engineering**
- **Project Management**
- **Construction Management**
- **Pre-Construction/Construction Phases**
- **Procurement (Bids and Awards)**
- **Close-Out Phase**
- **Construction Engineering and Inspection**
- **Contract Administration**

Services under this contract will be performed out of our Mission office. Additional support, if needed, will be provided from our regional offices in Seguin, Houston, and Austin. B2Z's Mission Engineering & Laboratory Offices employ over 50 professional and technical personnel. Services performed out of this office include, but are not limited to civil engineering, bridge/roadway design, drainage design, construction/project management, construction engineering & inspection, geotechnical engineering & testing, and construction materials testing.

B2Z is very familiar with the management, coordination, and supervision of a wide variety of projects, including the construction of all types of public, commercial, and industrial structures, as well as roadways, drainage systems, and bridges. B2Z works primarily in the public sector, and our projects routinely have the following characteristics:

- Complex - planning for great complexity ranging from phased construction for continuous operation to programmatic challenges.
- Agile - thinking through future requirements and flexible planning for facility longevity.
- Delivery challenges - managing schedule, cost, risks and opportunities associated with multiple delivery methods
- Compliant - knowing local, state and federal regulatory requirements for compliance.
- Efficient - establishing energy efficient goals and systems for low operating costs.
- Collaborative - supporting processes for project team efficiency and collaborative working environments.

B2Z's team of project managers, administrative staff, and field personnel have worked on various types of projects, including, but not limited to, Urban County Community Resource Centers (CRCs), publicly funded vertical construction projects, county/TxDOT(state)/ and FHWA (federally) funded roadway improvement projects, and publicly funded drainage improvement projects.

B2Z's approach to risk management focuses heavily on prevention. While other firms help you handle problems – we aim to prevent them. Design and construction projects always present unique challenges, but through a collaborative approach, problems can normally be solved by using these proven techniques:

1. **Exceptional expertise that knows the market and can deliver the requested services** – With over 100 years of construction experience in the Rio Grande Valley, we understand the issues that are unique to our region. In addition, our local proximity is a benefit in terms of hands-on response time to attend meetings and address field issues as they arise.
2. **Proven Results Approach** – **B2Z's** approach to Construction Management has been used successfully on both large and small projects. Through the utilization of our approach, we consistently deliver client satisfaction focusing on the four major project elements; ***quality, scope, budget and schedule***.
3. **Proactive Process** – **B2Z's** services are focused on a pro-active management process throughout the life cycle of the project. We will develop risk-management strategies specific to your project that proactively align the four major project elements.
4. **Overall Team Experience** – Our team has a deep understanding of politically sensitive projects, along with the ability to facilitate resolution within a large group of stakeholders. Because much of our work occurs within a political environment and within the public eye, we are comfortable with the facilitation of the public process.

Statement of Interest

The B2Z business model is to develop trusted relationships by being responsive, providing top-notch customer service, and delivering reliable effective solutions to our clients in a way that minimizes construction costs and expedites construction timelines.

The team assembled for this pursuit is adequately staffed and has the capability to perform the services required. Our team was constructed with the simple goal of being able to provide the City of Edinburg with the highest level of service and necessary resources to ensure the successful completion of all assigned projects. The B2Z team offers extensive first-hand employment experience with local, state, and federal entities, and is fully cognizant of all applicable federal, state & local codes, regulations & standards relating to transportation infrastructure projects that may be assigned by the City of Edinburg.

Through the years, our team of professionals has earned a reputation for taking a prominent role in the design and construction of public and private projects. **Whether we are working on a large or small project, we give each task the same attention to technical excellence and quality control while maintaining responsiveness.**

B2Z's staff is pre-certified in a multitude of categories and has years of experience in working on the design and plan production of highway and bridge structures, in accordance with the latest AASHTO and LRFD design manuals and TxDOT requirements. The following table shows B2Z's current TxDOT pre-certifications:

11.5.1	CONSTRUCTION SCHEDULING PROJECT MANAGER	**23.13.1**	PROJECT OFFICE OPERATIONS

Our Services

The Scope of Services, as presented in the RFQ, has been read, reviewed, and analyzed to ensure that our company can provide quality deliverables for the services outlined. As an advocate and representative of the City of Edinburg, B2Z is confident in our ability to accomplish the objectives set forth in this RFQ and manage the project development process.

Pre-Design Phase Services

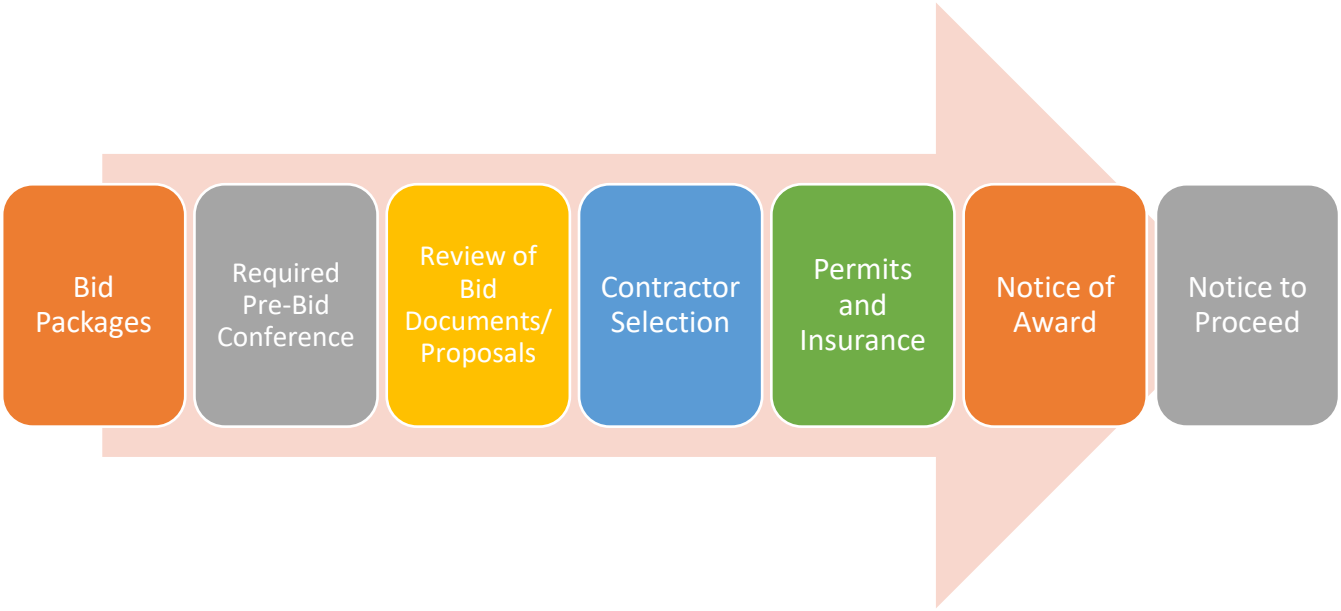
B2Z will work with City of Edinburg representatives to develop a Construction/Project Management Plan, which will define and document all project requirements in narrative form. This document will serve to outline the scope of work of each of the team members and the plans and strategies for fulfilling those requirements. Developing the Project Management Plan (PMP) is imperative during the pre-design phase to define the project requirements, guidelines, methods and procedures. Our goal is to accomplish the following items identified as part of the PMP:

- Identify project stakeholders, key staff and the project team and their respective roles
- Review Schematic Plans if available
- Review current budget and develop Master Project Budget
- Develop Master Schedule with short- and long-term milestones
- Review Master Planning and Development Documents
- Identify risks or potential icebergs and develop recovery plans
- Define the project's guiding principles
- Define design imperatives (guiding principles) for both qualitative and quantitative expectations
- Identify gaps within the program, budget, schedule and quality expectations
- Develop RFQ/RFP's for Architect selection, if not already completed.
- Explore project phasing and sequencing
- Discuss all owner needs such as FF&E and additional consultants to establish an overall program budget
- Identify communication pathways and needs
- Establish quality assurance expectations
- Establish project control procedures
- Clarify methods of claims avoidance and how to foster a collaborative team approach
- Issue the PMP

Design Phase Services

Management of Design Phase. B2Z will provide services for the design phase and support the development of scopes of construction work to be included in the design review and delivery of construction documents. Activities will include the following:

- Oversight of Architect & Design Team
- Early detection of issues is a major key to potential cost and time savings on any project. The opportunity to capture these savings is greatest during the planning and design phases and diminishes rapidly as the project progresses Milestones
- Design Management for Budget Adherence
- Cost control with periodic cost estimates
- Design schedule adherence
- Key stakeholder approvals and acceptance
- Quality reviews
- Constructability reviews
- Evaluation of alternative construction methods
- Value engineering



Task Sequencing

Time is one of the four major constraints that determine project success. The master project critical path schedule is vital in communicating the tasks that must be completed, resources needed to complete those tasks, and in what timeframe. B2Z will develop a Gantt chart or similar task sequencing model with a level of detail necessary to establish the overall sequence of project elements and timing for completion of those elements and the overall project. The master critical path schedule will include the following:

- ➔ Design Milestones
- ➔ Procurement Milestones
- ➔ Permitting and Regulatory Process
- ➔ Construction
- ➔ Close-out
- ➔ Commissioning (if applicable)
- ➔ Ongoing schedule review

Contractor Bid Solicitation and Selection

B2Z will work in conjunction with the City of Edinburg and project architects/engineers to solicit, review, and select the contractor through the agreed-upon delivery method. This will include assistance in the development and execution of:

Construction Phase Services

Acting as a liaison for the city, B2Z will operate as the City of Edinburg's representative in overseeing the day-to-day construction activities in the field. B2Z will ensure that all contractors and consultants fulfill their requirements and contractual obligations as per their respective contracts. Construction Management becomes a crucial role once the Contractor has been selected and procured. Oversight of the Contractor and consultants in all aspects of project control (quality, budget, schedule, & scope) is vital for successful project delivery.

Construction Management

- Quality Assurance (QA)/Quality Control (QC)
- Permit Coordination
- On-site Construction Administration
- Document Control
- Monitor Schedule
- Monitor Activities
- Change Order Management & Processing
- Procedure for processing Contractor Payments
- Contractor Payment Review
- Shop Drawing Management
- Maintenance of the as-built documents
- Safety & Health Program
- Operations planning & Management review

Field Inspection Services

B2Z will provide on-site field representation to ensure compliance with the schedule, budget, quality, and contractual requirements. On-site field representation during the construction phase will allow us to conduct, prepare, and present the following:

Daily Field Reports

B2Z will ensure the contractor prepares a daily log of all project activity to include:

- ☐ Weather
- ☐ Contractor(s) manpower
- ☐ Contractor(s) equipment
- ☐ Material/equipment deliveries
- ☐ General description of work performed and location
- ☐ Issues and areas of concern or critical to job progress

Monthly Progress Reports

B2Z will prepare a monthly report outlining the activities of the preceding month. The report will include, but not limited to, the following information as required by City of Edinburg:

- ☐ Updated project information
- ☐ Updated budget information
- ☐ Updated schedule information
- ☐ Progress photos

Progress Photos

B2Z will take and maintain a progress photo catalog on behalf of the City of Edinburg. Each month, a file for progress photos will be cataloged and included in the Monthly Progress report. At the completion of the project, all photos will be transferred to the City of Edinburg via the City's preferred method (i.e., USB, electronic link, etc.).

Project Progress Meetings

B2Z will organize, conduct, and document bi-weekly progress meetings involving the project architect/engineers, the contractor's principal personnel, and, as required, the City of Edinburg staff. Topics covered will include:

- Quality Assurance (QA)/ Quality Control (QC)
- On-site Construction Administration
- Document Control
- Schedule Adherence
- Budget Adherence
- Change orders
- Contractor Payment Review
- Shop Drawings
- Maintenance of the As-Built documents
- Safety & Health

Project Controls

By incorporating third-party project management software and the latest project control systems, vital information can be provided in a timely manner so that important decisions can be made by key stakeholders. These systems assist in creating a transparent environment where all stakeholders will have access to project information. B2Z will coordinate with the appropriate persons to manage the processing of schedules, design deliverables, and distribution, invoices, contracts, change orders, amendments, and other controls to develop systems that result in the delivery of work and services on time and on budget. Some of the key benefits of a successful project control system are:

- Transparency
- Reporting to Key Stakeholder's
- Record keeping of all inspection logs, test reports, pay requests, daily reports, change orders, submittals, RFI's, invoices, contracts,
- Expediting Contractor and Consultant Pay Requests

Project Close-out Phase Services

Project close-out is a critical project phase that, when performed properly, will create significant benefits for the City of Edinburg. B2Z will manage and assist the City during this phase to ensure a successful transition from project close-out to building occupancy and, finally, building operations. Key elements of project close-out include:

Meeting Timeline Requirements & Staffing

We have staff available to begin work immediately for any size project (part-time or full-time). On all B2Z projects, we are cognizant that maintaining a predictable project schedule is paramount to successful project delivery. The B2Z team prides itself on meeting, and often exceeding the schedules developed by our clients and project owners. We have developed a system for project schedule monitoring that has proven itself on over $1B worth of construction contracts. As a function of our proven system, we develop a schedule early in the process to ensure that we have the appropriate staffing levels assigned to the critical path components. This schedule is developed in conjunction with both the client and any other project stakeholders with consideration of the major project milestones and anticipated project hurdles. **B2Z has committed the services of experienced personnel who know and understand the tasks required to perform municipal projects.** This will undoubtedly allow us to keep ahead of schedule and add additional resources as appropriate. A few examples of our previous successes in this arena are as follows:

- After B2Z assisted in the procurement of a Construction Manager at Risk (CMAR) for the Hidalgo County Drainage District No. 1's new Administration Building, B2Z fast-tracked the project to comply with the Owner's accelerated project and construction schedule. B2Z worked closely with the Contractor, design team, and other project stakeholders to ensure compliance with the schedule without a reduction in project quality. B2Z was able to successfully deliver the certificate of occupancy (C of O) of the Administration Building sixty-four days ahead of schedule and coordinated FF&E move-in for the Hidalgo County Drainage District in just under two weeks**.**
- Due to fast-track negotiations with the Texas Department of Transportation Waco District, B2Z was able to exceed our project schedule on a Cat 6a Bridge Replacement project that was programmed for letting in FY2022 and position the project to receive funding in FY2019. We worked with the FHWA and TxDOT to facilitate concurrent reviews and expedited our response time for all comments they had. This accelerated schedule was based on the fact that the structure was considered structurally deficient, and as such, we (and the Client) felt it prudent to replace it as early as possible to ensure the safety of the traveling public.
- Due to the impending expiration of project funds, B2Z met an aggressive accelerated 6-month design schedule for approach roadway work and 3 independent bridge replacement projects for TxDOT in Killeen, TX. Since project funding was set to expire if these deadlines were not met, we developed a Plan of Action (POA), which included additional staffing and around-the-clock work to complete the PS&E. We ultimately finished the project 2 weeks ahead of schedule to the satisfaction of the Client.

B2Z Projects

B2Z has performed similar services for local governmental entities throughout Hidalgo County and the Rio Grande Valley. Furthermore, the B2Z team commits to learning the City of Edinburg's workflow processes for Project Management Services to seamlessly integrate into the City of Edinburg's established work protocols.

While we have not had the opportunity to provide Project Management Services directly to the City of Edinburg, our firm does have an established working relationship with the City. B2Z is currently contracted to provide On-Call Professional Engineering Services and On-Call Geotechnical and Construction Material Testing Services. B2Z has completed numerous projects within the region that are similar in scope to the one proposed. Below is a sampling of some of our most recent projects with similar scopes of work to those outlined in the City's RFQ.

Hidalgo County Health Department Testing/Bio-Safety Laboratory

Client: Hidalgo County (Mr. Eduardo Olivarez – Chief Administrative Officer – Ph. (956) 383-6221)

Description/Scope: B2Z was contracted to perform preliminary design and provide project/construction management, geotechnical engineering, and material testing services. The proposed 10,413 square feet, $4.08M facility consists of a clinic, administration, and two Bio-Safety Laboratory. Three (3) borings at a depth of 20 feet were drilled at approximate locations of the proposed building structure. Laboratory testing included Atterberg limits, gradation (-200), moisture content, sieve analysis, hydrometer, and sulfate content. B2Z provided structural evaluations of the borings, shear strength models, and soil profiles. Shallow foundation analysis and recommendations were provided, as well as construction recommendations.

County Services Facility - P4 New Justice Center – Hidalgo County Precinct No. 4

Client: Hidalgo County Precinct 4 (Commissioner Ellie Torres – Ph. (956) 383-3112)

Description/Scope: B2Z was contracted by Hidalgo County Precinct No. 4 to oversee and manage the design, procurement, and construction of a new 12,500 square foot administrative facility that will house the Hidalgo County Precinct 4 Constable and the Hidalgo County Precinct 4 Justices of the Peace, places 1 and 2. The scope of services for B2Z include but are not limited to; conceptual design assistance and preliminary design values, preliminary project estimates, conduct meetings, coordination and support for project development, preparation of bid documents, construction contract and administration, construction inspection and on-site representation, contractor payment application approval.

All-Star Park – Hidalgo County Precinct No. 4

Client: Hidalgo County Precinct 4 (Commissioner Ellie Torres – Ph. (956) 383-3112)

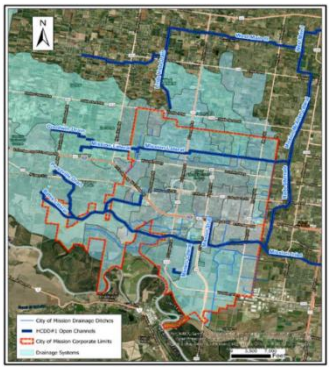
Description/Scope: B2Z was contracted to oversee and manage the design, procurement, and construction of the additions to the All-Star Park project, formerly known as Sunflower Park. The additional park amenities will include a lit concrete walking trail, an all-inclusive (ADA accessible) playground, softball/baseball field, soccer field, basketball court, a new storage shed, and a splash pad for kids of various age ranges. This park is a partnership between Hidalgo County Precinct No. 4 and the Texas Parks and Wildlife Department.

New Mechanic Shop – Hidalgo County Precinct No. 4

Client: Hidalgo County Precinct 4 (Commissioner Ellie Torres – Ph. (956) 383-3112)

Description/Scope: B2Z was contracted by Hidalgo County Precinct No. 4 as Construction Manager (CM) to oversee the construction of a new 11,500 square foot operation's facility. The B2Z team was tasked with management of design team, procurement of the CMAR, construction contract administration, CMT coordination and review, change order management, project scheduling, permitting assistance, daily site inspections, assist Hidalgo County with FF&E coordination, quality control, Biweekly Owner, Architect, Contactor meetings. The scope of services included but were not limited to; conceptual design assistance and preliminary design values, preliminary project estimates, conduct meetings, coordination and support for project development, preparation of bid documents, construction contract and administration, construction inspection and on-site representation, contractor payment application approval.

Hidalgo County Drainage District No. 1 - Administration Building



Client: Hidalgo County Drainage District No. 1 (Mr. Raul Sesin, P.E., CFM – Ph. (956) 292-7080)

Description/Scope: B2Z was contracted by Hidalgo County Drainage District No. 1 to manage the design and construction of their new administration facility. The scope of services included conceptual design assistance, management and oversight of project team (design, contractor, consultants), preliminary cost estimates, CMAR procurement (solicitation, bid document preparation, contractor selection), value engineering reports and recommendations, meetings and coordination, construction contract administration, & daily reports.

City of Mission: City-Wide Drainage Projects Design Management

Client: City of Mission (Juan Pablo 'JP' Terraza, P.E. – Ph. (956)585-3275)

Description/Scope: B2Z Engineering is currently serving the City of Mission as the City's Project Manager for the design & construction management of 7 city-wide drainage projects. This program is currently in the design phase. The B2Z team is providing design management and oversight of seven design engineers of records that were retained by the City to upgrade the drainage systems around the City. In this phase, B2Z is tasked with ensuring each project is being designed in a manner that meets constructability and specification standards, as well as enforcing schedule adherence by each engineer of record. B2Z is also providing the City with Construction Management & Inspection Services and Construction Materials Testing for the 7 drainage projects once contractors have been secured to commence construction.

Elsa Skate Park Project – Hidalgo County Urban County Program

Client: Hidalgo County Urban County Program Ph. (956) 787-8127

Description/Scope: B2Z was contracted to design and provide construction management services for a new skate park in the City of Elsa. The project included a concrete pad site with various ramps, rails, and other skateboard and roller skate amenities. B2Z prepared the bid packets and oversaw the construction of the highly anticipated recreational facility improvement project. The above-ground skate park is the first of its kind in the

Delta area, providing state-of-the-art durable ramps and rails designed to withstand the extreme elements of the Rio Grande Valley.

Precinct 1 Tax Office Substation

Client: Hidalgo County Precinct No. 1 (Commissioner David Fuentes – Ph. (956) 968-8733)

Description/Scope: B2Z was contracted by Hidalgo County Precinct No. 1 as Project Manager (PM) to oversee the design and construction of their new 5,300 square foot facility. The project is ground-up new construction and will be delivered using the Construction Manager at Risk (CMAR) delivery method. The B2Z team was tasked with management of the Architect/Engineer, procurement of the Construction Manager at Risk (CMAR), construction contract administration, change order management, value-engineering, project scheduling, permitting, daily site inspections, quality control and building turnover.

Hidalgo County Pct 2 - Community Resource Center Youth Facility

Client: Hidalgo County Precinct 2 (Commissioner Eduardo Cantu. – Ph. (956) 566-1974)

Description/Scope: B2Z was contracted by Hidalgo County Precinct 2 to project manage the design and construction of a Community Resource Center (CRC) in San Juan, TX. The scope of services included but were not limited to; conceptual design assistance and preliminary design values, preliminary project estimates, conduct meetings, coordination and support for project development, preparation of bid documents, construction contract and administration, construction inspection and on-site representation, contractor payment application approval.

Hidalgo County Pct 2 - County-Wide Shop

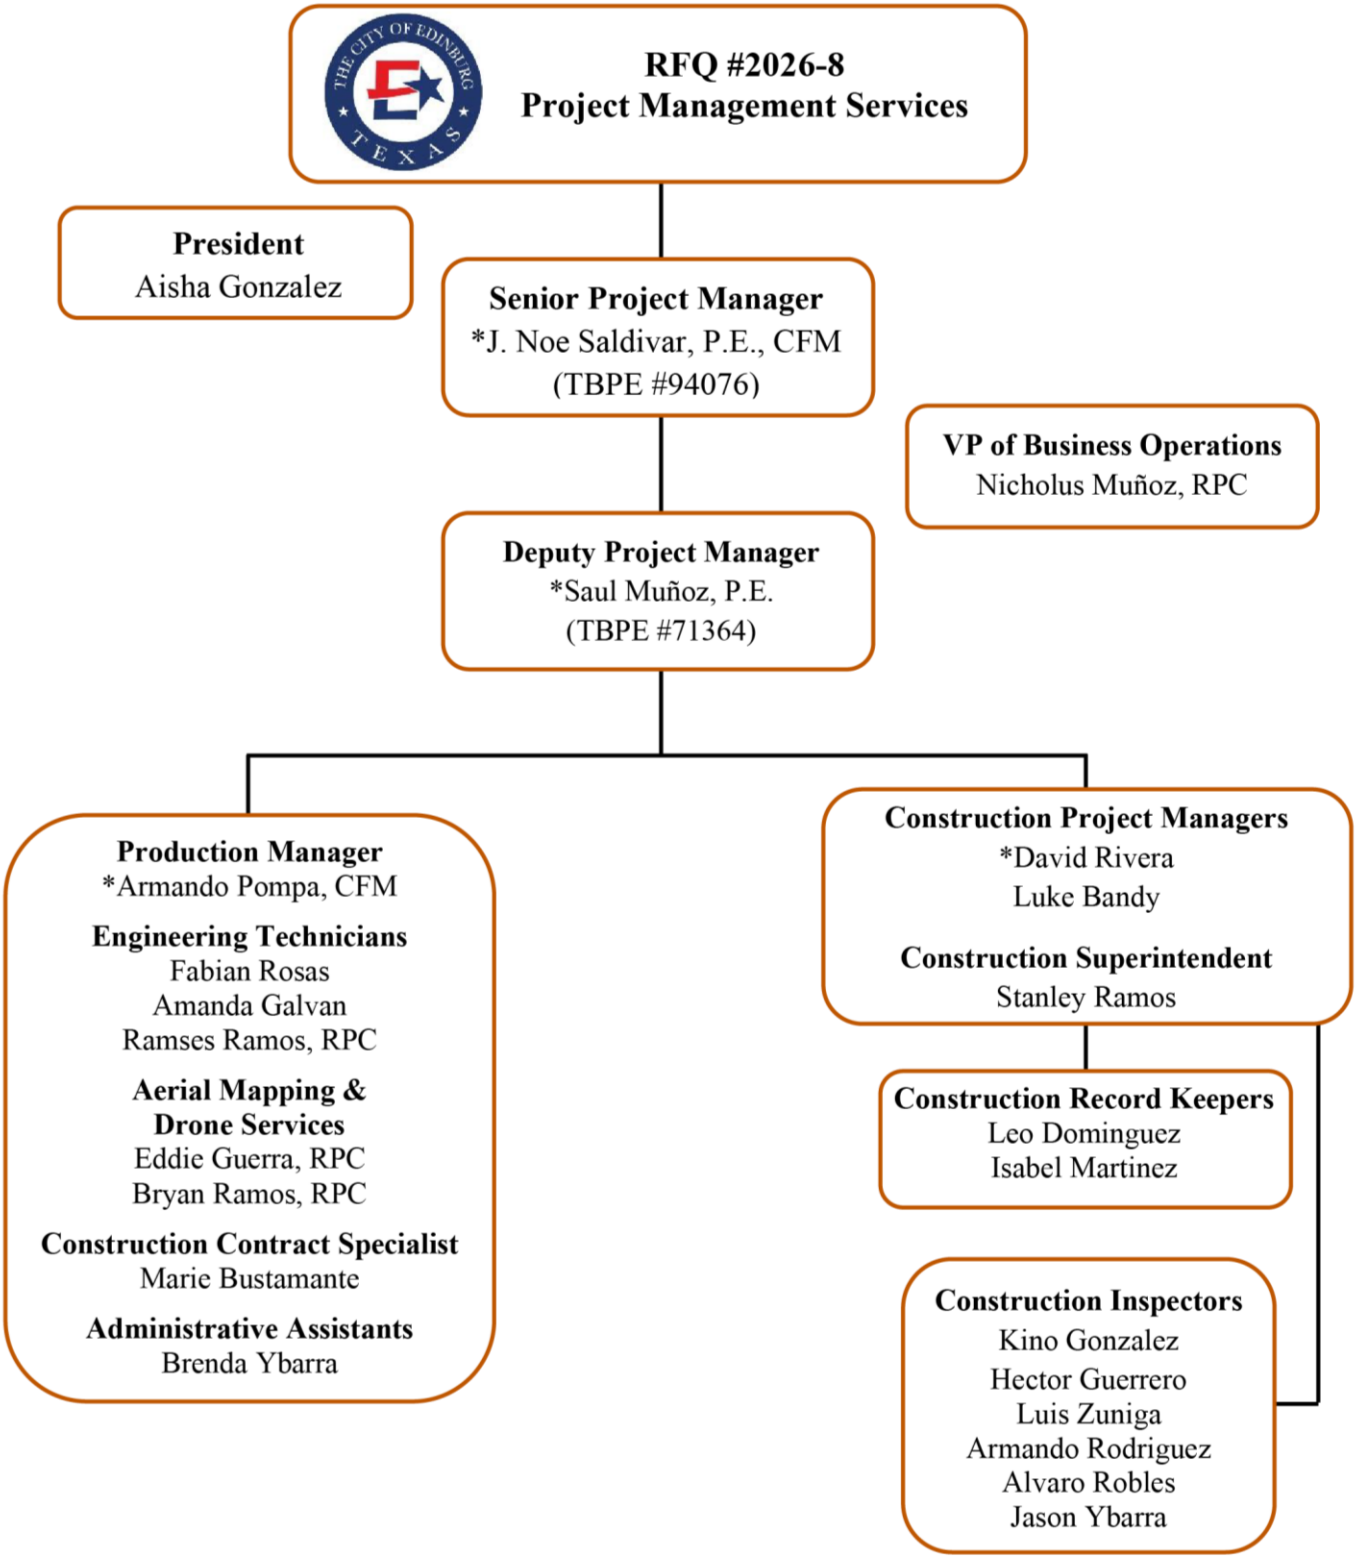
Client: Hidalgo County Precinct 2 (Commissioner Eduardo Cantu. – Ph. (956) 566-1974)

Description/Scope: B2Z was contracted by Hidalgo County Precinct No. 2 to manage the construction of the County Wide Mechanic Shop Facility located on the campus of the Precinct 2 Operations Facility. The scope of services included management and oversight of project team and project stakeholders, bid assistance, bid tabulation and contractor recommendation, meetings and coordination, construction contract administration, and daily reporting, including photos.

Tab III – Team Member Qualifications and Experience

Team Member Qualifications and Experience

B2Z and its team members hold themselves to the highest level of both personal and professional integrity and only undertake tasks in which they can perform competently and expertly. This ethical standard has resulted in B2Z not being party to a lawsuit since its inception in 2009, nor has a claim been made against its errors and omissions insurance policy. Furthermore, all B2Z personnel follow the National Society of Professional Engineer's (NSPE) code of ethics six fundamental canons.



NSPE® NATIONAL SOCIETY OF PROFESSIONAL ENGINEERS

- Hold paramount the safety, health, and welfare of the public.
- Perform services only in areas of competence.
- Issue public statements only in an objective and truthful manner.
- Act for each employer or client as faithful agents or trustees.
- Avoid deceptive acts.
- Conduct themselves honorably, responsibly, ethically, and lawfully so as to enhance the honor reputation, and usefulness of the profession.

B2Z's staff is comprised of highly skilled individuals possessing **extensive knowledge and expertise** in civil engineering, structural/bridge engineering, pavement/roadway design, drainage analysis and design, geotechnical engineering, and construction engineering (please refer to page 16 for an illustration of our organization chart).

Mr. J. Noe Saldivar, P.E., CFM will serve as B2Z's **Senior Project Manager**, bringing *over 28 years* of progressive experience in project management. **Mr. Saul Muñoz, P.E.,** will serve as the **Deputy Project Manager/Construction Engineer.** He brings *over 42 years* of experience – with 25 years at TxDOT managing PS&E design, road/bridge construction, contract administration, project letting, project management, and final project acceptance. **Mr. Armando Pompa, CFM** is B2Z's **Production Manager,** bringing *over 20 years* of experience in the infrastructure industry. He oversees the civil infrastructure department by assisting the project engineering team with plan production and design input. Mr. Pompa also oversees the GIS department with over 10 years of experience as a GIS analyst. **Mr. David Rivera** is B2Z's **Senior Construction Project Manager**. He brings *over 32 years* of experience in project/construction management and understands the nuances associated with project development through project close-out phases. **Mr. Stanley Ramos** is B2Z's **Construction Superintendent,** and he brings *over 39 years* of experience in the field of construction engineering. **Mr. Leonel Dominguez** is B2Z's **Senior Construction Record Keeper,** bringing *over 39 years* of experience in construction inspection and contract management. *Resumes with biographic summaries and project experience are provided on the following pages of this submittal.*

B2Z's Organizational Chart

*** Indicates Key Personnel**

Jose Noe Saldivar, PE, CFM

Title
Senior Project Manager

Years of Experience
28

Years with Firm
4

Education
BS, Civil Engineering
Instituto Tecnologico de Cd. Victoria, 1997

Training/Certifications
Professional Engineer: Texas/94076

Certified Floodplain Manager CFM/3340-17N

Areas of Expertise
- Hydraulic Design
- Hydrologic Studies
- FEMA Requirements, Coordination & Funding
- Bridge Design
- Roadway Design
- Project Management

TxDOT Pre-certifications
4.2.1 – Roadway Design
8.1.1 – Signing, Pavement Marking, and Channelization
10.1.1 – Hydrologic Studies
10.2.1 – Roadway Hydraulic Design

Summary

Mr. Saldivar has over 28 years of progressive experience in transportation and drainage planning and design. He has served as a Project Manager and a Surveying Manager for various engineering firms. He is experienced in route studies and planning, preparation of plans specifications, and estimates (PS&E), utility relocation, geometrics, signage and pavement markings and hydraulics. He has participated on numerous engineering assignments associated with the development of roadways, storm drainage systems, traffic control planning, bridge layout, and various other civil engineering applications. His experience includes design and development and hydraulic report/data sheet development. He is proficient in software such as Windstorm, Culvert, HEC-RAS, TR 55, HY8, Geopak and AutoCAD. Mr. Saldivar has prepared numerous drainage studies and reports including determining proposed improvement impacts, drainage areas, discharges, FEMA floodway requirements, culvert/ bridge locations and sizes, design frequency flow, tailwater and headwater elevations for design and anticipated overtopping of the bridges. He has performed scour analysis and prepared numerous SW3Ps to minimize sediment transport into drainage facilities. Mr. Saldivar's representative project experience includes:

Relevant Project Experience

2018 Drainage Bond Program, Hidalgo County, TX
As Project Manager, Mr. Saldivar was responsible for managing seventeen (17) consultants with countywide projects that would positively affect more than 69,000 structures in Hidalgo County, helping to protect more than $5.5 billion in assessed property value. The 2018 Drainage Bond Program consists of 37 projects of which ten (10) projects required coordination with USIBWC to secure environmental clearance for amended or new licenses for structures outfalling into the USIBWC Floodway. Mr. Saldivar was responsible for reviewing and approving all H&H deliverables.

US 277 / Maverick County, TxDOT-Laredo District
As Project Engineer, Mr. Saldivar was responsible for storm sewer design which proved to be more feasible since the basin size was limited and due to shallow groundwater in the area. The storm system outfalls into Canyon Grande Creek; therefore, the creek was analyzed to find appropriate tail water elevations for culvert drainage areas and regional regression equation for Canyon Grande Creek.

North I Road, Pharr, TX
As Project Engineer, Mr. Saldivar was responsible for storm sewer design, illumination, signing and pavement markings. He analyzed to find appropriate tailwater elevations for the storm drain system. Hydrology services included the rational method for small, paved drainage area. SW3P sheets were completed.

North San Juan Drainage Lateral, San Juan, TX
Performed survey and assisted in performing a hydraulic study and drainage ditch design along with drainage structure for the upsizing the irrigation district owned drainage ditch in north San Juan, Texas from 495, north to its outfall north of Canton Road.

Additional Project Information Available Upon Request

Saul R. Muñoz, PE

Title
Construction Engineer

Years of Experience
42 (25 with TxDOT)

Years with Firm
7

Education
Bachelor of Science in Natural Gas Engineering

Certifications/Training
Professional Engineer: TBPE #71364

Local Government Project Procedures Certified (LGPP)

Management Certification (FHWA)

Texas Concrete Pipe Association

Areas of Expertise
- Construction Engineering
- Construction Management
- Construction Inspection
- Constructability Review
- Project Close Out Process
- Local Government Projects Development
- Knowledge of Federal and State Highway Requirements
- Highway Construction & Design Engineering (Roadway & Bridge)
- Highway Plan Review & Preparation

Summary

Mr. Muñoz has over 42 years of experience in the field of Engineering. With over 25 years of TxDOT experience, Mr. Muñoz brings a wealth of knowledge in the areas of road/bridge design and construction, inspection and materials testing, project lettings, contract administration, change orders, construction payments, and project management. Throughout his career, Mr. Muñoz has gained extensive knowledge of working on large complex Interstate projects, State Farm to Market Highways to Off System Roads and Bridges. His experience includes working with highly experienced Contractors, Subcontractors, City Municipalities and Leaders, County Municipalities and Federal Entities including, but not limited to the Federal Highways and Administration, IBWC, and the USACE. Mr. Muñoz has managed over 100 projects specializing mainly in bridge and roadway construction. As District Construction Engineer in Pharr, Mr. Muñoz prepared several million-dollar change orders, negotiated costly utility disputes for extended performance, and settled construction claims as necessary. In the Dallas District, Mr. Muñoz was also responsible for plans, specifications, and estimates, geometric highway control, pavement thickness design, drainage area mapping, storm sewer design, and hydraulic & environmental reports.

Mr. Muñoz performed the following services on the relevant projects listed below:

- Construction site daily/weekly inspection and management
- Project plan and specification adherence
- Progress meetings
- Evaluate back-charges and change order entitlement
- Evaluate payment requests by contractor

Relevant Project & Area Experience

Mile 3 Road Project (Hidalgo County, TX)
$14M Construction Cost. The Mile 3 N Road Project consists of the reconstruction of the existing 2-lane roadway from Tom Gil Road to FM 492 (Goodwin Road) (3.41 miles) to a 4-lane divided urban roadway consisting of grading, curb and gutter, lime treated subgrade, flexible base, asphaltic concrete paving, storm sewer, culvert structures, sidewalks with ADA ramps, signing, pavement markings, traffic signals, and outfalls.

Dicker Road Project (Hidalgo County, TX)
$16.5M Construction Cost. This reconstruction project consists of expanding the existing 2 twelve-foot lanes rural roadway with shoulders and ditch drainage to a sixty-six-foot-wide divided urban roadway that will accommodate 4-lanes of traffic (two fourteen-foot shared travel lanes, two twelve-foot travel lanes, and one fourteen-foot left turn lane).

Regional Linear Park Project (Hidalgo County, TX)
$3.8M Construction Cost. The RLPP Section II was 2.64 miles of new location consisting of a ten-foot-wide asphalt trail that accommodated two-way shared-use traffic, as well as two prefabricated pedestrian bridges, and three pedestrian box culvert tunnel crossings under three major roadways. The trail was inclusive of pavement markings, signing, and continuous illumination.

US 281 Expressway, Road & Floodway Bridge - Six Segments$184M Construction Cost – Six Reconstruction Projects – 27 Miles. Managed Mainlane Construction, Frontage Roads, Bridges, Super Structures, Fly Over Structures, RE Walls, Storm Sewer Drainage, Large and Small Signing, Localized and High Mast Lighting, and Signalized Intersections.

Additional Project Information Available Upon Request

Armando Pompa, CFM

Title
Production Manager

Years of Experience
20

Years with Firm
6

Education
Bachelor of Business Administration: Information Technology & Networks

Certifications
Certified Floodplain Manager CFM/3642-19N

Areas of Expertise

- Emergency/Disaster Response Planning
- Hydrologic Mapping
- Data Research
- Drone pre-flight management & post flight processing
- Trimble Business Center
- Geo-referencing & Geo-processing
- Construction project management
- Schematics
- Conceptual Layouts/Mapping
- 3D Visualization/Rendering
- Bridge Detailing/Design
- Website Design/Creation
- Cartographic Design
- Metadata and Documentation
- Database Creation
- SQL & Python Scripting
- Utility Mapping

Summary

Mr. Pompa has over 20 years of experience in the infrastructure industry. He has participated in a wide range of projects, from road and drainage design to GIS analysis and drone surveying technology. Mr. Pompa is responsible for overseeing the civil infrastructure department by assisting the project engineering team with plan production and design input. Mr. Pompa also oversees the GIS department with over 10 years of experience as a GIS analyst. He is responsible for ensuring our clients are provided with the maps and analysis they need to effectively communicate with their constituents and provide GIS analytics to assist in community development and emergency preparedness. Mr. Pompa also oversees the Drone department which is instrumental to the industry by providing clients and in-house projects with the latest survey-grade orthomosaic imagery and existing land data, such as contours, DEMs, Hydro-statistical data and post-disaster photography and videography.

Relevant Project Experience

Recreational Trails Connectivity Project [Hidalgo County Precinct 2]
B2Z was contracted by Hidalgo County Precinct 2 to develop a Feasibility Study (WA#1) to determine how to connect two existing hike and bike trails in southern Hidalgo County. B2Z utilized drone technology to capture the latest existing property conditions while investigating properties along each alternative that contained special easements by Hidalgo County Drainage District #1 and USIBWC for access.

Hidalgo County Precinct No. 2 Stormwater Management Project
B2Z was contracted to provide a solution to Precinct 2's rural drainage problem, B2Z was tasked to design a stormwater system that provided a positive flow at all rural roads, ultimately discharging stormwater to a nearby drain ditch or detention pond. Mr. Pompa oversaw the data collection via sUAS (drone) aircraft and survey-grade data collection. B2Z processed the data collected to design and develop PS&S sheets for Precinct No. 2 staff's use.

City of Mission Geographic Information System (GIS) Services
Mr. Pompa, with the support of the GIS team, are the fiduciary agents for all data for the City of Mission. With two Senior GIS Analysts, having over 20 years of combined experience, including one GISP, B2Z is responsible for collecting, managing, and processing Mission's GIS data. Mr. Pompa oversaw the creation of the city's first ever online GIS web maps that provide their constituents with real-time planning solutions, preventing residents from having to make a trip to city hall to request city infrastructure data.

Hidalgo County Drainage District #1 Site Assessment Mapping
Mr. Pompa managed two teams to complete this project. He oversaw the drone team's task in collecting aerial imagery of all the colonia boundaries within Precinct No. 3. He also managed their effort in field data reconnaissance using survey data collection devices from Trimble and ESRI (ArcCollector and Survey 123). Mr. Pompa managed the GIS team to make sure they assimilated all the data that was collected by the drone and survey team and generated site assessment maps that identified the colonias legal boundary, easement, existing utilities, existing drainage, etc.

Moveable Bridge Inspection and Routine Maintenance Contracts (RMC)
Mr. Pompa, with the support of the Drone team, performed inspection on the Rio Hondo Lift Bridge within the TxDOT Pharr District and the Cow Bayou Swing Bridge within the Beaumont District. Utilizing drone videography and aerial imagery, Mr. Pompa collected and recorded existing bridge conditions further cataloging and categorizing the data for use within the conditions report.

Additional Project Information Available Upon Request

David Rivera

Title
Senior Construction Project Manager

Years of Experience
32

Years with Firm
8

Education
Bachelors in Business Administration – University of Texas Pan American

Areas of Expertise

- Construction Management
- Program Management
- Quality Assurance/Quality Control
- Laboratory Field Operations
- Bidding Procedures
- Report Development
- Project Planning
- Design Development
- Contractor Scheduling
- Construction Record Keeping and Reporting (Federal Monies)

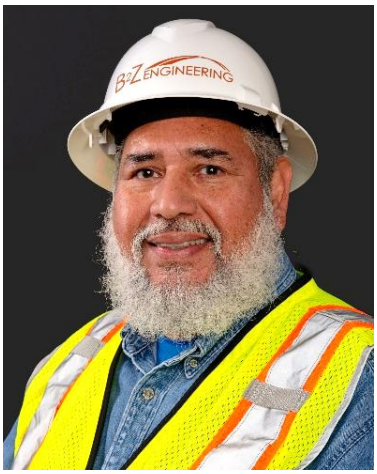
Summary

Mr. Rivera is B2Z's Senior Inspector. He has over 32 years of experience and has worked on over 100 construction projects including new construction, remodeling, and finish outs. Mr. Rivera works to establish communication procedures, including the appropriate chain of command for all communications for projects and set up an appropriate tracking system for necessary approvals. He works to develop and periodically update CPM schedules and negotiate and prepare agreements, including bid packages and contract documents, for successful execution of work. Mr. Rivera oversees construction/installation activities, including coordination of crews, and contractors. Mr. Rivera performs inspection of construction work for conformance with contract/plan requirements and specifications.

Mr. Rivera performed the following services on the relevant projects listed below:

- Pre-Design - Site Investigations
- Management of Design Team
- Procurement assistance (CMAR / GMP / CSP)
- Held Pre-Construction Meetings / Progress Meetings (OAC)
- Daily Site Inspection and Project Coordination
- Field reports & progress photos
- CMT coordination & Review
- Construction Contract Administration
- Change Order Management & Negotiation
- Review/Approve Contractor Payment Applications
- Project Closeout / Building turnover

Relevant Project Experience



Hidalgo County Precinct No. 2 – Las Milpas Park Youth Facility / Pharr, TX
$1.69M Construction Cost. B2Z was contracted as the Construction/Project Manager (CM/PM) for the Las Milpas Park Youth Facility at Aquilis "Jaime" Garza Park to oversee the construction of two buildings: community resource center at approx. 6,000 sq ft and a gym at approx. 5,500 sq ft.

Hidalgo County Precinct 4 – New Mechanic Shop / Edinburg, TX
$1.8M Construction Cost. B2Z was contracted as Construction/Project Manager (CM/PM) to oversee the construction of a new 11,500 square foot operation facility.

Hidalgo County Precinct 1 – Tax Office Substation / Weslaco, TX
$1.2M Construction Cost. B2Z was contracted by Hidalgo County Precinct No. 1 as Project Manager (PM) to oversee the design and construction of their new 5,300 square foot facility. The project is ground-up new construction and will be delivered using the Construction Manager at Risk (CMAR) delivery method.

Hidalgo County Drainage District No. 1 – Administration Building / Edinburg, TX
$1.95M Construction Cost. B2Z was contracted to manage the design and construction of their new 10,000 square foot administration building. The project was ground-up new construction and was delivered $34,000 below the established guaranteed maximum price (GMP) and 31 days ahead of an already aggressive schedule.

Additional Project Information Available Upon Request

Stanley Ramos

Title
Deputy Project Manager

Years of Experience
39 (31 with TxDOT)

Years with Firm
7

Certifications/Training
Local Government Project Procedures (LGPP)

TxDOT Environmental Storm Water Pollution Prevention Plan (SW3P) Certified

TxDOT Construction SW3P Stage Gate Inspection Report Certified

TxDOT Section 404 Wetlands & Permit Application Certified

Areas of Expertise
- Local Government Projects Development
- Knowledge of Federal and State Highway Requirements
- Project Management
- Project Close Out
- Roadway & Bridge Construction Inspection
- Materials Engineering (Aggregate, Concrete & Asphalt)
- Soils & Subgrades
- Materials Testing

TxDOT Pre-Certifications
11.3.1 12.1.4
11.4.1 18.3.1
12.1.1

Summary

Mr. Ramos has over 39 years of experience in the field of Engineering. With over 31 years of TxDOT experience, Mr. Ramos brings a wealth of knowledge in the areas of construction management, inspection and materials testing. Throughout his career, Mr. Ramos has worked on construction projects involving interchanges, bridges, overpasses, flyovers as well as continuously reinforced concrete pavement. He has extensive experience in the inspection of highway, street and bridge construction as well as sampling and testing of construction materials. At the TxDOT Pharr Area Office, Mr. Ramos has instructed professional engineers, engineers-in-training and technical employees on TxDOT's sampling and testing procedures and frequencies for each type of construction operation.

Project & Area Experience

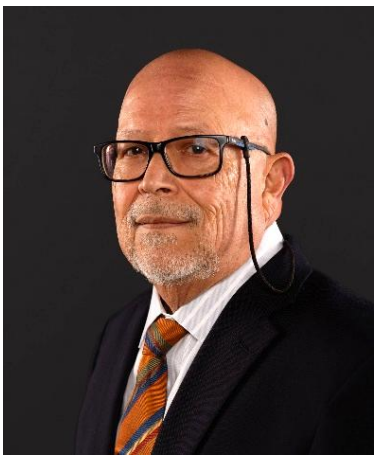
Project Name: Las Milpas Road Project, Hidalgo County, Texas
$4 M Construction, January 2023 to July 2024 (anticipated)
Client: Hidalgo County Precinct No. 2

Project Name: Mile 3 N Road Project, Hidalgo County, Texas
$14 M Construction, April 2021 to July 2024 (anticipated)
Client: Hidalgo County Precinct No. 3

Project Name: Dicker Road Project, Hidalgo County, Texas
$16.5 M Construction, August 2019 to November 2021 (anticipated)
Client: Hidalgo County Precinct No. 2

Project Name: Regional Linear Park Project, Hidalgo County, Texas
$3.8 M Construction, November 2018 to June 2021
Client: Hidalgo County Precinct No. 2

Project Name: Expressway US 83 in McAllen, Texas
$42 M Construction, September 1995 to November 1996
Role: Chief Inspector | Client: TxDOT



In the Area of Construction Inspection & Testing

As an Inspector, Mr. Ramos inspected, sampled, tested, measured, and calculated payment for both structural and non-structural concrete (i.e. drill shafts, footings, columns, caps, bents and bridge deck operations). These duties were also performed on continuously reinforced concrete pavement, structural excavation and shoring, installation and backfilling of reinforced concrete box culverts, precast inlets, manholes, junction boxes and reinforced concrete pipe, mechanically stabilized walls, sidewalks, rip-rap, asphaltic concrete pavement, traffic signal components, etc. 7-day and 28-day concrete strength tests performed to ensure minimum flexural strengths.

In the Area of Administration & Training

As a construction inspection instructor, Mr. Ramos traveled across the state training administration staff, construction inspection staff and maintenance staff for TxDOT. He conducted training for Introduction to Construction/Maintenance Inspection (CON 105) Bridge Construction Inspection (BRG 100) and Contract Administration (CON 118).

Additional Project Information Available Upon Request

Leonel Dominguez

Summary

Mr. Dominguez has over 39 years of experience in Construction Inspection and Contract Management. He brings a wealth of knowledge and experience in Contract Administration and Highway Road Construction Inspection. Mr. Dominguez oversaw and performed transportation engineering operations such as construction inspection and maintenance work in accordance with total maintenance on performance-based and/or bundled bid contracts. Mr. Dominguez also worked maintenance on highly advanced design, traffic engineering design and analysis, and surveying, including pavement data collection, bridge inspection, bridge structural analysis, construction records, and contract administration. He is experienced in reviewing plans, specifications, and estimates (PS&E), maintaining shop drawings, and performing traffic control inspections and planning. His experience extends into SiteManager, laboratory oversight of laboratory equipment calibration, and laboratory accreditation.

- SiteManager
- Contract Management
- Construction Inspection
- Local Government Projects Development
- Knowledge of Federal and State Highway Requirements
- Maintenance
- Pavement Data Collection
- Bridge Inspection
- Bridge Structural Analysis
- Traffic Control Inspection and Planning

TxDOT Pre-Certifications:
11.10.1 – Construction Record Keeper

Area Experience

In the Area of Construction Management/Engineering /Inspection

As the chief inspector in the TxDOT San Benito Area Office, Mr. Dominguez was responsible for the inspector's day-to-day work activities, project activities, and project management. He is well-versed in the requirements of construction project inspection and can provide insight into potential pitfalls that can be attributed to construction scheduling issues and conflicts. He coordinated work with Contractor compliance with contract documents. Mr. Dominguez has direct knowledge and experience with TxDOT procedures, requirements, and Construction Administration checklists. He is currently providing these services on a locally let project for the Cities & County with TxDOT oversight. Mr. Dominguez is experienced in reviewing contractor Pay Applications, Monthly Estimates, DBE Monthly Reports, Prompt Payment Certification, Certified Payrolls (Prime and Sub-Contractors), Prevailing Wage Rate, Material on Hand (MOH), Storm Water Pollution Prevention Plan (SW3P), Change Orders, Project Audits, Commercially Useful Function (CUF), Work Reports (1257's), Traffic Control Devices, etc.

In the Area of Contract Administration

Mr. Dominguez was responsible for oversight of the San Benito Area Office construction inspection record and testing deficiencies. He ensured project records were in compliance with the Construction Contract Administration Handbook and Pharr District Contract Administration Procedures.

Relevant Project

Mile 3 Road Project / Hidalgo County, TX

$14M Construction Cost. The Mile 3 N Road Project consists of the reconstruction of the existing 2-lane roadway from Tom Gil Road to FM 492 (3.41 miles) to a 4-lane divided urban roadway consisting of grading, curb and gutter, lime treated subgrade, flexible base, asphaltic concrete paving, storm sewer, culvert structures, sidewalks with ADA ramps, signing, pavement markings, traffic signals, and outfalls.

Dicker Road Project / Hidalgo County, TX

$16.5M Construction Cost. This reconstruction project consists of expanding the existing 2 twelve-foot lane rural roadway with shoulders and ditch drainage to a sixty-six-foot-wide divided urban roadway that will accommodate 4-lanes of traffic (two fourteen-foot shared travel lanes, two twelve-foot travel lanes, and one fourteen-foot left turn lane). B2Z was contracted to provide inspection, material testing and construction management services.

To whom it may concern,

Hidalgo County Precinct 2 has had the pleasure of working with B2Z Engineering (B2Z) for the last 8 years in different capacities. B2Z's attention to detail, communication, and professionalism has allowed my precinct to deliver our projects to my constituents ahead of schedule, and often times under budget. Whether B2Z is providing; Civil Engineering Design (PS&E), Construction / Project Management, or Material Testing, their quality of work and deliverables are superior.

In my precinct, two major projects that B2Z has recently been involved in are; Hidalgo County Pct. 2 Regional Linear Park Project, and the RGVMPO funded Dicker Road Expansion Project. Both projects included roles of Construction Engineering / Inspection and Construction Material Testing. The team at B2Z truly works as an extension of my full-time staff and it has been an absolute pleasure to work with B2Z Engineering!

I highly recommend B2Z Engineering for consideration on any upcoming opportunities in their respective field, and can assure you that this firm will go above and beyond to protect the best interest of their clients.

If you need any additional information, please contact me at (956) 454-7247.

Best Regards,

Eduardo "Eddie" Cantu, Commissioner

CITY OF MISSION

June 14, 2023

To whom it may concern,

I am writing this letter of recommendation for B2Z Engineering (B2Z).

B2Z has been under contract with the City of Mission for the last two years and has provided exceptional plan review, CEI, project management, and lab services for six drainage bond projects that the City of Mission sought out after the 2018 and 2019 flood events. They have performed their tasks and duties with integrity, ethics reliability, and fairness. Despite any troubles that could arise during the time of construction, B2Z would and will deliver the exceptional quality of work that is expected of them and provide response and results in a timely manner. I believe you would be very pleased with their work, attention to detail, and customer service.

Should you have any questions, please feel free to call me at (956)-580-8780.

Respectfully,

Abelardo Bocanegra Jr., PE, CFM

To whom it may concern,

I am very pleased to recommend B2Z Engineering for any service(s) that fall within their scope of work. Our experience working with this firm has exceeded our expectations by providing quality work, keeping the Hidalgo County Drainage District No. 1 updated, and meeting crucial deadlines.
At this time, B2Z Engineering continues to assist with project management/Inspections of the 365 Toll Off-Site Drainage Improvements Project and in addition, will be providing all material testing for the completion of this large scale and complex project.

I can confidently recommend B2Z Engineering. If you need any additional information or would like to discuss B2Z Engineering qualifications further, I can be reached at (956) 292-7080 or omar.anzaldua@hcdd1.org

Sincerely,

Omar Anzaldua Jr. PE, CFM, PMP, CCM

Edinburg, Texas 78539

RE: RFQ No. 2026-8 – Project Management Services
Professional Services Agreement

Dear Mr. Hinojosa,

B2Z Engineering, LLC (B2Z) has thoroughly reviewed the City of Edinburg's Professional Services Agreement for Project Management Services cited in RFQ No. 2026-8. B2Z affirms that it satisfies, and plans to maintain, the insurance requirements outlined in the Agreement during the contract period. If chosen, B2Z agrees to sign such an agreement with the City of Edinburg.

Sincerely,

Aisha Gonzalez

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

B2Z Engineering, LLC

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

July 14, 2026

Mr. Mardoqueo Hinojosa
City Engineer
City of Edinburg Engineering Department
415 W. University Drive
Edinburg, Texas 78541

RE: RFQ No. 2026-8 – Project Management Services

Dear Mr. Hinojosa:

Broaddus & Associates is pleased to submit our Statement of Qualifications in response to the City of Edinburg's RFQ No. 2026-8 for Project Management Services. We appreciate the opportunity to be considered for the City's rotation list and submit a team that is local, experienced, responsive, and prepared to protect the City's interests from planning through closeout.

Our team is prepared to provide project management, program management, construction management, owner's representation, capital improvement program support, scheduling, cost control, procurement assistance, construction administration, and closeout services on an as-needed basis for municipal capital projects, infrastructure improvements, facility renovations, new construction, maintenance and repair work, utility upgrades, life safety improvements, and other public works initiatives.

Broaddus & Associates brings a strong South Texas presence, an established Edinburg office, and the depth of statewide resources needed to respond quickly and execute well. We will provide the leadership, technical expertise, schedule discipline, budget oversight, stakeholder coordination, quality assurance, documentation control, and project controls necessary to move City projects forward with confidence.

For more than two decades, Broaddus & Associates has supported public-sector clients across Texas and the United States, including municipalities, K-12 school districts, higher education institutions, healthcare systems, convention centers, governmental agencies, and other public entities. Our approach is centered on protecting the owner's interests, maintaining transparency, proactively managing risk, and delivering projects on schedule, within budget, and in accordance with established quality standards.

Primary Point of Contact for RFQ Correspondence

Name	Grady Deaton
Title	Senior Project Manager
Firm	Broaddus & Associates
Address	204 E. Cano Street, Suite 2.109, Edinburg, Texas 78539
Phone / Cell	Office: 956.688.2307 | Mobile: 956.455.2305
Email	gdeaton@broaddususa.com

Mr. Deaton will serve as the primary point of contact for all communications, correspondence, requests for clarification, interviews, and coordination associated with this RFQ. As a member of Broaddus & Associates'

South Texas team, Mr. Deaton will provide local project management leadership and coordinate the resources necessary to support the City of Edinburg's capital improvement and infrastructure programs.

RFQ Acknowledgements and Commitments

Addenda: Broaddus & Associates acknowledges receipt and review of all addenda issued by the City of Edinburg in connection with RFQ No. 2026-8 prior to submission. All addenda received have been fully considered and incorporated into our Statement of Qualifications. If no addenda were issued, this statement shall serve as confirmation that no addenda were received by Broaddus & Associates prior to submission.

Professional Services Agreement: Broaddus & Associates has reviewed the Professional Services Agreement requirements and, if selected, agrees to enter into such agreement with the City of Edinburg, subject to final negotiation and mutual execution by both parties.

Insurance Requirements: Broaddus & Associates has reviewed the RFQ insurance requirements and will meet the prerequisite insurance requirements prior to performing services, including providing certificates of insurance and naming the City of Edinburg as an additional insured where required by the RFQ and contract documents.

Capacity and Commitment: Broaddus & Associates affirms that we possess the personnel, resources, experience, financial capability, and organizational capacity necessary to perform the requested services and satisfy the requirements contained within the RFQ.

We appreciate the City's consideration of our qualifications and look forward to the opportunity to discuss our team, experience, and approach to supporting the successful delivery of the City of Edinburg's projects.

I hereby certify that I am duly authorized to execute this Statement of Qualifications on behalf of Broaddus & Associates, Inc., and that the information contained herein is true and correct to the best of my knowledge. I further certify that I possess the authority to bind Broaddus & Associates, Inc. contractually and to make the commitments contained within this submission on behalf of the firm.
Sincerely,

BROADDUS & ASSOCIATES

Section 5.1: Statement of Qualifications

Broaddus & Associates

Firm History

Key Differentiators

- ✓ **We are South Texas Local – Office in Edinburg, TX**
- ✓ **Resources Spanning the Texas Border**
- ✓ **$25B+ Successfully Managed Projects**
- ✓ **Expert in Large Texas Complex Projects**
  - **30 Projects More Than $100M**
  - **12 Projects More Than $400M**
- ✓ **45+ Texas Public Agencies Served**
- ✓ **Texas HUB, SDVOSB Certified**

Broaddus & Associates is one of the leading providers of facilities program management, consulting, and planning services in the United States for institutional owners who are planning and developing construction projects. **Since 2000, Broaddus & Associates has managed $25B in capital projects for numerous public entities (45+ in Texas).**

Broaddus & Associates was established specifically to focus on serving and advocating for owners by dramatically improving the Capital Improvements Process. Best Practice programs such as constructability, Project Definition Rating Index (PDRI), and independent cost estimating are used to effectively control budgets, compress schedules, and create satisfied clients.

The documented value-added savings across our current project portfolio represent over 127% of our aggregate fee. In other words, we have more than paid for our services among active projects. Most of our PM teams save more than twice their fee.

We provide experienced personnel to help owners plan and manage their projects responsively and efficiently. **We employ more than 150 professionals providing project management and planning services on projects nationwide.** Our team includes architects, engineers, and construction professionals who have been on the owner's side and average 25 years of experience. We are registered as a Professional Engineering Firm in the State of Texas and our staff include Professional Engineers, Registered Architects, Licensed General Contractors, BIM Specialists, Certified Project Management Professionals, Certified Construction Managers and LEED Accredited Professionals. Additionally, the U.S. Department of Veteran's Affairs has certified our firm as a **Service-Disabled, Veteran-Owned Small Business** (SDVOSB) and we are a verified VetHUB in Texas.

Program & Project Management Services

Broaddus & Associates provides the program and project management services the City needs to move work from concept to occupancy with discipline and accountability. Our approach is straightforward: define the scope early, protect the budget, manage the schedule, document decisions, coordinate stakeholders, and close projects cleanly.

Broaddus & Associates provides a comprehensive suite of Program and Project Management Services that directly aligns with and exceeds the city's requirements for pre-construction, procurement, construction phase, and closeout services. Our approach emphasizes proactive planning, cost control, schedule management, quality assurance, and thorough oversight from concept through occupancy.

Pre-Construction Services

Broaddus supports project development through:

- Cost estimating and project budgeting
- GMP (Guaranteed Maximum Price) development support
- Constructability reviews
- Design reviews and design phase management

- Pre-project planning and facility programming
- Project Definition Rating Index (PDRI) reviews

Procurement Services

Broaddus & Associates provides comprehensive procurement assistance including:

- Designer and contractor procurement
- Bid packaging and solicitation support
- Bid evaluations and recommendations
- Contract negotiation services
- Cost database and pricing index consulting to validate bids and pricing

Construction Phase Services

During construction, Broaddus & Associates delivers hands-on project controls and management through:

- Construction management and site supervision
- Construction inspection services
- Meeting facilitation and stakeholder coordination
- RFI, submittal, and project documentation tracking
- Quality Assurance/Quality Control (QA/QC) oversight
- Schedule monitoring utilizing Primavera P6 and Microsoft Project
- Cost control and change management support
- Commissioning and start-up coordination

Closeout Services

Broaddus & Associates ensures successful project completion through:

- Punch-list management and verification
- Warranty inspections and follow-up
- Owner training coordination
- As-built document coordination and turnover
- FF&E, move management, and occupancy planning
- Post-project audits and lessons-learned evaluations
- Alternative project delivery analysis
- Total project scheduling and CPM scheduling support

Broaddus & Associates Unique Differentiators

Broaddus & Associates is currently ranked among the top 100 program management firms in the nation by McGraw Hill's *Engineering News-Record* magazine.

Our value proposition is simple: ***we serve as the owner's advocate, bringing unmatched experience, disciplined best practices, and practical judgment to every assignment.*** That combination consistently protects budgets, reduced risk, and delivered measurable value for our public-sector clients.

Successful capital delivery begins with early clarity on scope, budget, schedule, site conditions, and stakeholder expectations. Broaddus brings the right technical resources at the right time, so decisions are informed, risks are visible, and momentum is maintained.

- **Local presence that matters:** an Edinburg office, a long-standing Rio Grande Valley footprint, and direct familiarity with local agencies, contractors, and market conditions.
- **Owner-side experience:** professionals who understand public-sector accountability, decision-making, procurement, reporting, and the need to protect taxpayer dollars.
- **Budget discipline:** early cost validation, value-driven recommendations, and practical controls that align scope with available funding.
- **Transparent execution:** clear reporting, documented decisions, proactive risk management, and communication practices that support public trust.

Strategically Aligned with Your Vision

Broaddus & Associates is well aligned with the **City of Edinburg's** capital improvement and municipal program goals. We bring local presence, regional knowledge, public-sector experience, and the technical depth to support projects that must be delivered responsibly, transparently, and with long-term community value in mind.

Commitment to Best Practices

Our approach is grounded in proven construction industry best practices and disciplined project management methods. For the **City of Edinburg**, we will apply those tools with practical judgment, clear accountability, and a focus on measurable results.

Understanding Standards & Expectations

We understand the **City of Edinburg's** responsibility to deliver high-quality, cost-effective public projects. Many of our professionals have worked from the owner's side of the table, which shapes how we manage risk, control costs, maintain schedule discipline, and keep every decision aligned with the City's goals and stakeholder expectations.

Versatility That Drives Results

As a privately held, Texas-based firm led by its principals, Broaddus & Associates can scale services to match the assignment. Whether the City needs planning support, procurement guidance, project controls, construction oversight, or closeout discipline, we can bring the right resources without overstaffing the work.

A Regional Portfolio Rooted in Results

Our portfolio reflects a sustained commitment to communities across the Rio Grande Valley and South Texas. We have delivered work for the Cities of McAllen, Edinburg, San Juan, South Padre Island, Port Aransas, and Rockport, as well as for UTRGV, South Texas College,

Edinburg CISD, Refugio County, Gonzales Health System, Wilson County, and public-sector owners across the greater San Antonio area. That experience gives the City a team that understands both local conditions and the expectations of public capital delivery.

We appreciate the opportunity to earn the City's trust. Broaddus & Associates will serve as a disciplined owner's advocate for the **City of Edinburg**, bringing experienced professionals, proven procedures, practical solutions, and a local team that understands the Valley. We know best practices matter, but we also know every assignment is different. Our services will be tailored to the City's needs, scaled to the task, and focused on delivering work that is transparent, accountable, and built to last. **Broaddus & Associates is ready to serve the City of Edinburg.**

- **Our team brings recent real-time "Lessons Learned" and current market knowledge.**
- **We have successfully completed projects for the City of Edinburg.**
- **Our team has delivered more than $18B in Capital Projects.**

Local Experience

Our team has maintained offices in the Rio Grande Valley since 2004 to support South Texas and the border region. We understand the local design and construction market, and our Edinburg office is supported by professionals with direct experience working with public agencies, architects, contractors, and stakeholders throughout the Valley.

From our Edinburg office, Broaddus & Associates has delivered construction management, program management, planning, and advisory services for public and private clients across the region. This local familiarity allows us to support projects efficiently from early planning through final closeout. Representative local projects include:

- **Edinburg Consolidated Independent School District | Bond Program**
- **Edinburg Consolidated Independent School District | HVAC Upgrade Program**
- Basilio Villarreal Municipal Park Master Plan
- **Boys & Girls Club of Edinburg | Clubhouse**
- Edinburg Public Utility Board | Robindale Wastewater Treatment Plant
- **City of Edinburg | Downtown Master Plan**
- City of McAllen | Convention Center
- **City of South Padre Island | Convention Center**
- International Boundary & Water Commission | Administration Building
- McAllen-Miller International Airport
- Peninsula Island Resort & Spa
- Rio Grande Valley State Veterans Cemetery
- Roma Independent School District | Delia Garcia Elementary School
- South Texas College | 2005 Bond Program
- South Texas College | 2013 Bond Program
- Starr County | Courthouse Annex
- Texas A&M University – Kingsville | Campus Master Plan
- Texas State Technical College | Harlingen Campus Master Plan
- Texas Workforce Solutions
- **Tropical Texas Behavioral Health | Edinburg Administrative Office**
- Tropical Texas Behavioral Health | Harlingen Outpatient Clinic
- Tropical Texas Behavioral Health | Weslaco Outpatient Clinic
- **University of Texas at Edinburg/Texas Southmost College | Bond Program**
- Willacy County | Courthouse Master Plan

Serving Large Capital Projects in Texas. One key aspect of our firm is the ability to manage large capital improvement projects, a significant component of which is procurement management. Our project portfolio includes more than 30 projects greater than $100M, and 12 totaling more than $400M in the State of Texas. Broaddus & Associates understands the intricacies of these large, complex projects including compliance with state and federal procurement practices. This understanding also enables us to adapt to each program's specific needs, while engaging our research-proven Best Practices to ensure the right project team is selected. Our program management experience includes the following projects valued greater than $100M where we served as Program Manager.

- Alamo Trust | Alamo Revitalization Program | $300M | San Antonio, TX
- Bexar County Hospital District | University Health System | San Antonio, TX
- Memorial Hermann Healthcare System | Capital Improvement Program | $850M | Houston, TX
- Lone Star College District | Bond Program | $422M | Houston, TX
- Dallas County | Downtown Records Building Complex | $200M | Dallas, TX
- **Edinburg Consolidated Independent School District | Bond Program for 6 Campuses | $112M**
- Alamo Colleges | CIP Bond Program | $263M | San Antonio, TX
- Edinburg CISD | Bond Program | $112M | Edinburg, TX
- Houston Methodist | Capital Improvement Program | $390M | Houston, TX
- **South Texas College | 2013 Bond Program | $159M | Rio Grande Valley, TX**

Office Location & Staffing Approach for Smaller Assignments

Broaddus & Associates will provide services through its Edinburg office located at 204 E. Cano Street, Edinburg, Texas 78539, ensuring immediate accessibility, responsiveness, and familiarity with the **City of Edinburg's** personnel, procedures, and project priorities.

Our local presence enables us to efficiently support projects of varying sizes and complexities while maintaining direct communication with city staff.

Approach to Part-Time Staffing & Smaller Task Orders

Broaddus utilizes a flexible and scalable staffing model designed to match resources with the specific needs of each assignment. For smaller task orders, Oscar D. Garcia, Vice President and Project Executive, will provide executive-level oversight, strategic direction, and quality assurance throughout the assignment. He will be supported by local project managers and specialized subject matter experts who are assigned on an as-needed basis depending on the scope, schedule, and technical requirements of the project.

This approach gives the City access to senior leadership and specialized expertise without carrying unnecessary full-time staffing costs on smaller assignments. As project demands increase, Broaddus can expand quickly through its Edinburg office and statewide network of project management, scheduling, estimating, procurement, and construction professionals. The result is a scalable delivery model that gives the City the right level of support at the right time.

Our depth of personnel and ability to quickly mobilize additional resources enable Broaddus to successfully manage both routine task orders and complex capital improvement projects while maintaining consistent service quality, schedule compliance, and cost-effective project delivery for the **City of Edinburg.**

Proposed Team

To support the City of Edinburg, Broaddus & Associates has assembled a multidisciplinary team led by **Oscar D. Garcia, Vice President and Project Executive, with more than 30 years of experience** in public-sector, municipal, infrastructure, and capital program work. He will be supported by local project managers and specialized subject matter experts deployed as each assignment requires. ***All identified team members, including principals and assigned personnel, are available, committed, and ready to begin work upon notice to proceed.***

Resumes of Key Personnel

OSCAR D. GARCIA

Vice President – South Texas

Mr. Oscar Garcia has more than 31 years of experience providing municipal, technology, healthcare, program management, and construction management services throughout Texas. He is a practical, relationship-driven executive with deep Rio Grande Valley experience and a proven ability to engage owners, public-sector leaders, consultants, and contractors to move complex initiatives from concept to execution.

Mr. Garcia provides executive oversight on scope, budget, schedule, delivery strategy, risk management, and stakeholder coordination. His experience includes alternative delivery methods, capital planning, risk analysis, and owner-side decision support. He is also bilingual in English and Spanish, with the communication skills and regional credibility needed to support public projects across South Texas.

Relevant Project Experience

- Hidalgo County | Courthouse PM/CM Services | $185M | Hidalgo County, TX
- Hidalgo County/City of Edinburg/ TxDOT | Coordination with Highway 107 Drainage Infrastructure Project | $20M | Edinburg, TX
- City of Edinburg | Coordination with the Implementation of Integrated Edinburg Downtown Redevelopment Plan | Edinburg, TX
- Greater Edinburg Incentives Corporation
  - Small Area Plan (SAP) Phase 1 - Led implementation approach and roadmap for a multi-phase concept focused on maximizing the infrastructure performance to enhance industrial and commercial development by implementing 32 strategic projects with a capital investment of more than $3B coordinated by three key public entities, including the City of Edinburg, Edinburg Public Utility, and the Port of Edinburg.
- University of Texas Rio Grande Valley | Administration Building Site Selection | Edinburg, TX

GRADY DEATON, PH.D.

Project Manager

Grady Deaton, Ph.D., serves as a Senior Project Manager for Broaddus & Associates and is responsible to the Project Executive and owner/client for budget, schedule, quality, coordination, and day-to-day project execution. Dr. Deaton brings broad experience in construction management, inspection, facilities administration, and owner's representative services, including coordination of governmental funding and expenditure procedures.

As the former Vice President of Facilities Planning, Construction and Maintenance for Texas State Technical College, Dr. Deaton served as the division head for the building and grounds maintenance, custodial/janitorial services, and vehicle fleet maintenance department. He was involved in the design and construction for all remodels, renovations and new construction and office operations within the division on the TSTC campus in Harlingen, TX. He also managed the design and construction for the entire new TSTC campus in Rosenburg, TX. In this role, he acted as the liaison between the college, general contractors, A/E team components, subcontractors, utilities providers, local and state government representatives, and the client institution to coordinate all the team members' efforts during new construction and renovations. This position also acted as the Chief Building Official for the campus, ensuring that building codes and other applicable regulations are followed on campus.

JACQUE JUDY
Cost Estimating

Mr. Jacque Judy serves as Chief Estimator for Broaddus & Associates. He provides estimates for projects in a variety of stages, establishes budgets with owners/clients, develops project scopes, and coordinates team efforts with owner/client guidelines. He has the unique ability to provide conceptual estimates during planning and early design with great accuracy and reliability.

He leads our approach to the technical services process to accurately establish and maintain project budgets, develop project design within budget restraints, and supervises the timely completion of all pre-construction activities. During final bid preparation, he works closely with the project team to maximize participation by local, qualified trade contractors and facilitates an orderly transfer to field operations. He will continue to stay involved with the project as necessary throughout the course of construction.

Experience & Technical Competence

City & County Owners Served

The best way to briefly convey our specialized experience constructing city halls, courthouses, and other public facilities is through our portfolio of completed work. Our firm has extensive experience serving local government owners. We understand the specialized requirements associated with these facilities and will work closely with the **City of Edinburg** to ensure project success.

Ability To Meet Schedules & Deadlines

Broaddus & Associates provides owners with disciplined representation to keep projects moving, decisions documented, and risks managed before they become cost or schedule problems. Our mission is to advocate for owners and improve the capital project delivery process from the earliest planning conversation through closeout.

We help owners maximize capital dollars without sacrificing scope or accountability. The practices below illustrate how our team protects schedules, controls budgets, and differentiates Broaddus from firms that simply monitor work instead of actively managing outcomes.

Best Practices. We train our project managers in proven tools such as project implementation plans, total project budgeting, proactive schedule management, constructability and design reviews, change management analysis, commissioning, transition to operations, quality and safety planning, project closeout, and value engineering. These practices are applied selectively, based on the assignment, so the City receives practical controls that add value without adding unnecessary process.

Comprehensive Project Management Services. Capital projects require more than meeting attendance and status reports. They require planning, estimating, scheduling, procurement support, design and constructability review, total project budgeting, pre-construction coordination, technology tools, and transition-to-operations support. Broaddus has in-house resources in estimating, scheduling, planning, technology, security assessment, and specialized technical services, giving every project manager access to the expertise needed to protect the owner's interests.

Executive Support. Broaddus leadership stays close to active assignments. Project managers brief senior leadership regularly so emerging issues are visible early, resources are aligned quickly, and the owner benefits from both local execution and firm-wide executive oversight.

Project Methodology

Broaddus & Associates regularly applies a 14-step owner-oriented project management process (**Exhibit 2**) that helps guide our clients to define needs, set realistic budgets and schedules, establish design criteria, procure designers and contractors, and execute the plan. This process utilizes our research-proven industry Best Practices to offer measurable value to the owner.

These Best Practices allow for continuous improvement as we implement them repeatedly and as we share lessons learned across our project teams. Best Practices are assessed for applicability during the Pre-Project Planning Phase to allow for discussions with the Owner and determine which ones will add the most value. These Best Practices are scaled to match the level of effort and risk to be mitigated on a given project.

Exhibit 2. Broaddus & Associates 14-Step Project Management Process

Protecting the Budget. Most public programs operate within firm budget constraints. We work closely with administrators, department leaders, and project stakeholders to keep financial decisions transparent and aligned with available funding. Our planning, scheduling, estimating, and communication processes are designed to reduce avoidable delays and change orders. We use tools such as **Target Value Design** to identify costs by trade early, validate budgets as design progresses, and maximize every dollar through cost savings, cost avoidance, or strategic repurposing of funds. Our in-house estimating experts provide independent cost validation and real-time information so the City can make informed decisions.

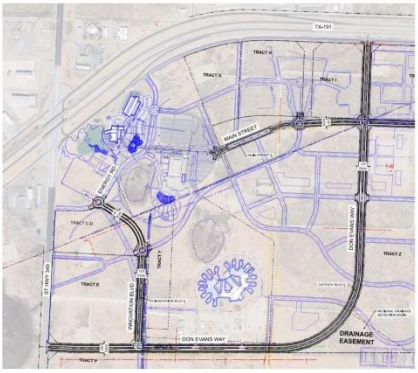
Protecting the Schedule. Schedule discipline is one of the clearest measures of effective project management. Our project managers develop, manage, and track schedules that reflect the full requirements of the work, including design, procurement, permitting, inspections, technology, security, furniture, move-in, commissioning, and occupancy. Broaddus also provides in-house scheduling resources that review contractor-provided Primavera P6 schedules, evaluate logic and float, and support monthly schedule analysis so published schedules are reliable decision-making tools.

Exhibit 3. Broaddus & Associates Project Dashboard Example

Permian Basin Beacon Infrastructure Project

THE BEACON

June 2026



Project Description

Construction of Roadways, Utilities Infrastructure, and Central Park in support of the Permian Basin Beacon development.

Project Status

Roadways & Infrastructure
- ✓ Final design (construction documents) to be issued 30 Jul.
- ✓ City of Midland review on final design to be completed 20 Aug.
- ✓ Solicitation planned to be issued first week of September.
- ✓ Construction should start end of this year.

Park
- ✓ Design presented and approved Apr Commissioners meeting.
- ✓ Schematic design meetings ongoing. SD to be issued mid July.
- ✓ CMAR solicitation to be solicited by TFC in late June.
- ✓ Construction to commence Q2 2027

Schedule

Project Budget

TOTAL PROJECT BUDGET			
	Roads/Utilities	Park	Total
DESIGN/PROFESSIONAL SERVICES	$4,198,000	$2,963,000	**$7,161,000**

THE BROADDUS COMPANIES

Periodic Reporting. We understand the importance of keeping the owner fully informed on progress, budget, schedule, risks, and pending decisions. In addition to regular working communication, we provide concise formal briefings and dashboard reporting that allow City leadership to see where projects stand, what needs attention, and what decisions are required.

Contract Acquisition. Our team has extensive experience preparing RFQs and RFPs, supporting solicitations, facilitating pre-proposal conferences, evaluating proposals, and assisting with award recommendations for professional services and construction-related contracts. We help owners ask the right questions, evaluate the right criteria, and select partners based on qualifications, value, risk, and the needs of the project. That expertise will help the **City of Edinburg** make informed, defensible procurement decisions.

Project Team Coordination. We believe strong coordination is the foundation of successful delivery. Broaddus will lead regular project team meetings with the City, design team, contractors, consultants, and other stakeholders to address issues, schedules, budgets, approvals, and time-sensitive requirements. Our goal is to keep constraints visible, decisions moving, and the full team focused on the milestones that matter.

Close Out & Activation. One of the most important phases of a project is the transition to operations. At Broaddus, we have a team of experts to aid and support our project managers that ensures **Edinburg** staff will be well prepared for immediate occupancy, including:

- Iterative punch list development and resolution so that no construction work remains during furnishing and occupancy operations.
- Close out documentation development that starts at construction commencement. Allowing facilities to be operated before all procedural and maintenance information is available is unacceptable and poses a risk to the owner.
- Comprehensive commissioning programming that includes operator training, successful equipment startup, and off-season testing.

We offer in-house scheduling and estimating resources to support accurate budgets, reliable schedules, and independent validation throughout the work. Our team will ensure each assignment receives the specialized resources it needs, and avoids resources that do not add value.

Stability & References

Project Example

CITY OF BUDA | BOND PROGRAM MANAGEMENT SERVICES

Buda, TX

Broaddus & Associates was brought on by the City of Buda when the City terminated their contract with the previous project management firm after the expectations of budget and schedule were not met. We quickly assembled our team to analyze the status of the program and developed a work implementation plan.

The first task included review of the preliminary guaranteed maximum price proposal prepared by the contractor. Second, we ascertained the viability and accuracy of the proposed construction schedule and conducted a schedule optimization workshop with the contractor. Third, we performed a constructability and value engineering analysis to develop cost-saving ideas to minimize budget overruns.

Our analysis uncovered 84 discrepancies and 23 value-engineering initiatives that were presented to the city for consideration. We were also able to uncover $200K in excess contingency in the contractors GMP, which was immediately released to the city for use.

The city also retained our firm for periodic inspections during construction to maintain quality. Ultimately, our firm assisted Buda in completing the projects on schedule while controlling a budget that had increased before we were engaged. The Program included the following:

Project Relevance

- ✓ **Texas Municipality**

Complete: 04/2018

Project Value

Total: $32M

Municipal Complex

A municipal complex that will house the new City Hall, Public Library, and the Buda Economic Development Corporation.

Public Safety Building

The 14,420-SF building is now the new home of the Buda Police Department. The building features a gated enclosure for office parking and has two exit routes leading to Main Street. The building also houses a community meeting room for public meetings and interdepartmental training.

ROCKWALL COUNTY | LAW ENFORCEMENT & JAIL RENOVATION / EXPANSION

Rockwall, TX

Broaddus & Associates was engaged to provided planning and project management services to Rockwall County for the Law Enforcement and Jail Renovation and Expansion Capital Improvement Program. Successful completion of this Design-Build project provided Rockwall County with adequate space for their existing and future staffing needs; improved operational efficiency; adequate parking for staff and visitors; a clear and simple signage plan; reduced operational and maintenance expenses (through the incorporation of energy efficient / sustainable design elements); flexibility; and a facility that accommodates future growth potential.

Our team was initially hired to perform a needs analysis and develop an optimal re-use, renovation and/or replacement plan for consideration, and offer recommendations on viable courses of action to increase rated bed capacity while also increasing the form and functionality of the overall master-planned program. An essential part of the scope was to perform a comprehensive criminal justice system analysis to forecast in-custody population over 20+ years.

With this expansion, the Rockwall County detention center has a maximum capacity of 444 beds and includes a functional medical and mental health section that provides a normative-type environment for those in need of such services. Also included are some of the most innovative design elements, such as increased natural lighting, open recreational yards, classrooms designed for vocational and GED studies for inmates, expanded remote visitation capability, courtroom, increased access to behavioral health therapy, and increased office and staff break areas.

After delivering the complex, our firm is now serving as project manager for the $21M Rockwall County Annex, a 18,000-SF administration building that will consolidate various public facing county services under one roof on a footprint that maximizes the available expansion space.

Client Satisfaction

"Broaddus works directly at multiple levels to professionally represent the County with a focus on best values both for construction and operationally.

This team has saved the county several million dollars to date, far more than their fee.

Overall, the Broaddus' project team provides a unique level of experience partnering with our owner's project team. I have been extremely satisfied with their knowledge and impressed in how they have led our project to date. I strongly suggest you partner with this team for your construction needs. "

Commissioner Dennis Bailey | Rockwall County

HALTOM CITY | MUNICIPAL IMPROVEMENTS PROGRAM

Haltom City, TX

Fire Station #3 | $5M

Alarmed that exterior design had not been updated on the planned changes during value engineering of the Design Development Phase, the city's project manager resigned under pressure and the city contracted Broaddus & Associates to rectify matters, without increasing the budget over the contracted GMP. Quickly, Broaddus & Associates assessed matters related to the unrealized changes and verified that the design team had not communicated the changes. Working with the CMAR and product manufacturers, we quickly verified solutions for changing finishes and directed the architect to detail a stucco and thin brick systems to be installed over the existing metal panels. Haltom City's Fire Station #3 was completed on time and within the project budget. As a result of our efforts, Haltom City assigned three additional projects to Broaddus & Associates to manage.

Law Enforcement Center | $29M

Working with city staff, our team developed a comprehensive master plan, program, and basis of design for this new Law Enforcement Center in just three months.

The accepted solution was the result of a cohesive continuum of team efforts led by Broaddus & Associates. During the planning phase, Broaddus & Associates and the city staff took a proactive approach for finalizing pre-planning in advance to procurement for specialized systems, IT, audio visual, electronic equipment, and specialized furniture fixtures and equipment. Moving these critical selections earlier in the project ensured comprehensive delivery of specialized services specific to the police department. **The program was completed within budget and ahead of schedule.**

City Hall | $25M

Having managed both the new Law Enforcement Center and Fire Station #3, the city engaged Broaddus & Associates to manage the new City Hall project. Prior to the bond election, Broaddus & Associates updated the program statement for the new facility; provided preliminary renderings and a site analysis; assisted with public awareness presentations and meetings with the bond commission in support of the successful bond election to fund the $25M project. After completing an RFQ/RFP selection process, Haltom City entered a Pre-Construction/Design contract with the team for the new City Hall.

CITY OF ROCKPORT | DOWNTOWN CITY HALL

Rockport, TX

Broaddus & Associates is providing project management services on the Downtown Anchor Project, which includes the City of Rockport City Hall. The Anchor Project is a major step of recovery in the reconstruction of local government facilities lost in Hurricane Harvey, a Category-4 storm that leveled scores of homes and businesses in the Rockport-Fulton area in 2017.

The Downtown Anchor Project is a multi-building complex in Downtown Rockport, which is under construction on land that previously housed the Aransas County Courthouse and contiguous lots. It will be a one-stop government complex for residents, that would include a new Aransas County Courthouse, Rockport City Hall, community room, and an open, public space.

City Hall will be located on the south side of the property designated as the Downtown Anchor Project. The 2-story, 28,000-SF building has been designed to withstand hurricanes and provide for expansion of services and staff in the future.

EDINBURG CONSOLIDATED INDEPENDENT SCHOOL DISTRICT | HVAC PROGRAM

Edinburg, TX

Broaddus & Associates is serving as owner's representatives for the Edinburg Consolidated Independent School District's (ECISD) $60M campus Heating, Ventilation, and Air Conditioning (HVAC) Improvement Program. The initiative is funded through an Elementary & Secondary School Emergency Relief (ESSER) grant, which is a part of a series of three federal programs that have provided ECISD with more than $196M in COVID relief funds. The HVAC Program is included in the third portion of funding (ESSER III) as a part of the American Rescue Plan (ARP) Act passed by the U.S. Congress in 2021.

Our program management team is providing oversight to the HVAC upgrades at 6 district campuses. This engagement includes management of all project phases, including A/E and contractor selection. On-site project management at the respective project sites is being performed as well as regular progress reporting to district leadership. An important component of our role is maintaining compliance with the requirements of the ESSER grant as well as Davis-Bacon wage compliance.

Broaddus & Associates has an impeccable history of compliance with federal, state, and local laws, applicable codes and ordinances, rules and regulations, and any EPA, OSHA, or other regulating entities. Broaddus & Associates has not received any citations from such agencies in the history of our firm.

Previous Experience with City

The Broaddus Companies have a long and meaningful history with the City of Edinburg. Our work has included planning services that helped the City rethink its core downtown area, engage leadership and community stakeholders, and develop a Downtown Master Plan that continues to serve as an implementation playbook for key projects. That history reflects the broader strength of the Broaddus platform: the ability to bring planning, program management, construction services, and project delivery expertise to bear for a client when and where it matters most. The Broaddus Companies have also supported the La Sienna multifamily housing development, a public-private partnership using private financing coordinated through a Public Housing Finance Corporation managed by the City of Edinburg, with the real estate asset ultimately returning to City ownership at the end of the lease term. Broaddus is also currently involved in the City's Downtown Parking Garage, where Broaddus Construction was selected as the design-build contractor. The project will provide needed downtown parking capacity, improve operational efficiency, and incorporate cost-effective, durable elements that reduce long-term maintenance obligations. These examples demonstrate the depth of service, local knowledge, and owner-focused perspective Broaddus can bring to future assignments for the City of Edinburg.

Section 5.2: Proprietary Documents

Broaddus & Associates will complete, execute, and submit all forms required for this SOQ. The table below summarizes the required City-issued forms and vendor-produced documentation and confirms each will be included in the Bonfire submission package.

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

SENATE BILL 19 VERIFICATION

I, Scott Broaddus, the undersigned representative of Broaddus & Associates, (Company or Business name) (hereafter referred to as company) being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:

1. **Does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,**
2. **Will not discriminate during the term of the contract against a firearm entity or firearm trade association.**

Pursuant to Section 2274.001, Texas Government Code:

1) "Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.

2) "Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.

3) "Discriminate against a firearm entity or firearm trade association":

   a) means, with respect to the entity or association, to:

      i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;

      ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or

      iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and

   b) does not include:

      (i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and

      (ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:

         (aa) to comply with federal, state, or local law, policy, or regulations or a directive by a regulatory agency; or.

         (bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) "Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.

5) "Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.

6) "Firearm entity" means:

a) firearm, firearm accessory, or ammunition manufacturer, distributor, wholesaler, supplier, or retailer; and

b) a sport shooting range as defined by Section 250.001, Local Government Code.

7) "Firearm trade association" means any person, corporation, unincorporated association, federation, business league, or business organization that:

a) is not organized or operated for profit and for which none of its net earnings inures to the benefit of any private shareholder or individual;

b) has two or more firearm entities as members; and

c) is exempt from federal income taxation under Section 50l(a), Internal Revenue Code of 1986, as an organization described by Section 50l(c) of that code.

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

Broaddus & Associates

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☒ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☒ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

N/A

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

STATE OF TEXAS	**§**	**AGREEMENT BETWEEN THE CITY OF EDINBURG AND PROJECT MANAGEMENT CONSULTANT FOR PROFESSIONAL SERVICES PURSUANT RFQ NO. XXXX-XXX**
COUNTY OF HIDALGO	**§**	
CITY OF EDINBURG	**§**	

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **PROJECT MANAGEMENT CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit "B" and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City's demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

Section XXI
Notice of Governing Law for State and Federal Grant Projects

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

Re: Transmittal Letter for Request for Qualifications No. RFQ 2026-8: Project Management Services

Dear Mr. Hinojosa,

Brownstone Consultants, LLC is pleased to submit our Statement of Qualifications to provide Project Management Services to the City of Edinburg. This letter confirms our firm's interest in, and commitment to, delivering proven, owner-focused project and construction management support that fully meets the requirements of this RFQ. Brownstone has reviewed the entire solicitation and agrees to perform the services as specified, taking no exceptions to the requirements.

Carlos Del Angel, PMP, CCM, Managing Partner, will serve as the primary point of contact for all correspondence related to this RFQ. Gilbert Gallegos, AIA, will serve as the secondary point of contact. Their full contact information is provided below. We acknowledge receipt and review of all addenda issued for this RFQ, and that the content of each has been considered and incorporated into this response.

Brownstone is a McAllen-based, Texas-registered engineering and project management firm that has delivered more than $2 billion in public infrastructure, facility, transportation, and utility work across the Rio Grande Valley, including direct, current experience with the City of Edinburg as Owner's Representative on the Downtown Parking Garage. This depth of relevant, local experience makes us exceptionally well-suited to deliver the scope of services outlined in this RFQ. The pages that follow detail our team's qualifications, our methodology for keeping projects on budget and on schedule, our stability and references, and our prior work with and within the City of Edinburg.

As an officer of the firm duly authorized to bind Brownstone Consultants, LLC to a contract, I certify that the information contained in this response is true and correct, that Brownstone has read the City's Professional Services Agreement and, if selected, agrees to enter into such agreement and to meet the prerequisite insurance requirements set forth therein.

We appreciate the opportunity to be considered and look forward to the privilege of serving the City of Edinburg.

Respectfully,

SECTION 1

OVERALL QUALIFICATIONS OF TEAM

SECTION 1: OVERALL QUALIFICATIONS OF TEAM

UNDERSTANDING OF THE CITY'S NEEDS

The City of Edinburg's Engineering Department is assembling a rotation list of qualified firms to provide project and construction management services on an as-needed basis over a two-year term, for a range of capital improvement and city projects. We understand assignments may range from short, discrete task orders to larger capital efforts, and may include alterations and additions to existing facilities, renovations, site improvements, new construction, demolition, and utility, electrical, mechanical, and plumbing system upgrades, all performed under the direction of City staff and in accordance with the International Building Code, the Unified Development Code, and the City's Engineering Design Standards.

Brownstone is built for exactly this delivery model. As an owner-focused firm, we extend the City's staff with licensed, multi-disciplined professionals who manage each assignment from planning through closeout while protecting the City's cost, schedule, and quality interests. The scope of services we are prepared to provide on each assignment includes:

- **Pre-construction:** scope development, master scheduling, budgeting and GMP development, constructability and document review, and long-lead procurement planning.
- **Procurement:** pre-bid conferences, bid-package preparation on the City's procedures, and bid solicitation, evaluation, and award support.
- **Construction:** on-site supervision, progress and coordination meetings, schedule and cost control, QA/QC and materials-testing oversight, RFI and submittal management, change-order review, and safety compliance.
- **Close-out:** punch-list management, as-builts, O&M manuals and training, final inspections and the Certificate of Final Inspection, warranty inspections, and one-year workmanship warranty tracking.
- **General services:** value engineering and cost estimating, schedule recovery, stakeholder and multi-agency coordination, and funding-compliance support for state and federally funded work.

FIRM EXPERIENCE & HISTORY

Brownstone Consultants, LLC ("Brownstone") is a McAllen, Texas-based, minority-owned project management and engineering firm established in 2019 and registered with the State of Texas as Engineering Firm No. F-23250. Our team is staffed with Professional Engineers (PE), Registered Architects (AIA), Project Management Professionals (PMP), Certified Construction Managers (CCM), a Certified Floodplain Manager (CFM), and Engineers-in-Training (EIT) who together bring the technical expertise and public-sector experience to deliver the full scope of services described in this RFQ, from alterations and additions to existing facilities, renovations, and site improvements to new construction, demolition, and utility, electrical, mechanical, and plumbing system upgrades.

Since its inception, Brownstone has delivered more than $2 billion in commercial, industrial, government, transportation, and utility work across the Rio Grande Valley, and our staff carries over 100 years of combined experience in the management, oversight, and construction administration of locally, state, and federally funded capital improvement projects. We were built to serve owners, and we measure success by the impact each project delivers for the community it serves.

Education Programs	Edinburg CISD 2008 Bond† ; South Texas College 2013 Bond†	$112M-$159M

† Reflects the relevant experience of Brownstone key personnel gained prior to joining the firm.

WHY BROWNSTONE IS UNIQUELY QUALIFIED

Brownstone is uniquely positioned to perform the project management services the City of Edinburg requires because we are:

- Skilled in managing complex, multi-agency capital projects through every phase of development: planning, design, procurement, construction, and closeout.
- A registered Texas Engineering Firm (No. F-23250) that understands the requirements of working with local governmental agencies.

- Proactive and communication-driven, addressing minor issues and resolving them before they become problems.
- Versed in financial and grant compliance for federal and state funds (TxDOT, TWDB, FHWA, ARPA, GSA), including Davis-Bacon, Buy America, DBE, and audit-ready documentation.
- Experienced in both traditional and alternative delivery methods, including Construction Manager-at-Risk (CMAR) and Design-Build.
- Strongly local: locally owned and staffed, with many team members products of UTRGV and deep knowledge of the region, including ongoing projects within the City of Edinburg.
- Multi-disciplined, with in-house PEs, AIAs, PMPs, CCMs, a CFM, EITs, and a licensed UAS (drone) pilot, backed by a statewide network of specialty sub-consultants (commissioning, estimating, scheduling, safety, parking-structure specialists).

What Sets Us Apart

- **The SPE Approach:** a disciplined Strategize, Plan, and Execute framework that aligns scope, schedule, and budget from day one.
- **Savings Optimization Log (SOL):** an owner-side ledger that quantifies value engineering, deduct opportunities, avoided change orders, and procurement savings returned to the owner each month.
- **Technology-driven delivery:** Autodesk Construction Cloud, Appia, Raken, and Bluebeam for transparent, real-time cost, schedule, and document control.
- **Public-sector focus:** we work exclusively on the owner's side, protecting the public's cost, schedule, and quality interests.

OFFICE LOCATION & PART-TIME / SMALL-ASSIGNMENT STAFFING

All services for this contract will be provided from our McAllen office, centrally located at 2205 N. Jackson Rd., McAllen, TX 78501, minutes from Edinburg. From this location, we respond quickly to City requests, attend to field issues, and join in-person meetings on short notice. Our offices in Pharr and San Antonio provide additional bench depth and surge capacity when assignments require it.

Brownstone is an agile, boutique firm built for exactly the kind of as-needed, project-by-project rotation contemplated by this RFQ. For smaller or part-time assignments, we scale staff up or down by task order without disrupting continuity, assigning only the right level of effort to each job. Depending on the assignment, Brownstone can augment City of Edinburg staff in the following roles:

Registered Architect	Professional Engineer	Sr. / Project Manager
Assistant Project Manager	Sr. Construction Inspector	Construction Inspector
Project Controls Specialist	Scheduler / Estimator	Utility Coordinator
Safety Coordinator	UAS (Drone) Pilot	Administrative Support

TEAM ORGANIZATION & ORGANIZATIONAL CHART

Brownstone's team is organized under a single point of accountability so decision-making stays clear and communication stays direct. Carlos Del Angel, PMP, CCM, serves as Project Executive with overall responsibility for contract performance and City communication. He is supported by three leads: Gilbert Gallegos, AIA, Principal Architect and Director of Institutional Projects, who directs design; David Chacon, PE, CCM, CFM, Director of CEI, who runs day-to-day execution; and Guillermo Aguilar, who provides project management. Mr. Gallegos oversees the project management and design support staff, while Mr. Chacon oversees project engineering, inspection, and project controls, with administrative support and specialty consultants added as each task order requires. This structure gives the City a consistent primary point of contact, a clear chain of responsibility, and the ability to scale without disrupting continuity.

KEY PERSONNEL RESUMES

Summaries of the qualifications and experience of the Project Manager, key staff, and support staff likely to be assigned to City of Edinburg work follow. Brownstone's team includes professionals licensed to practice Engineering (PE) and Architecture (AIA) in the State of Texas. Full certificates and licenses are provided in the Appendix.

Team Member	Assigned Role	Yrs.	Key Credentials
Carlos Del Angel	Managing Partner | Project Executive	25	PMP, CCM
Gilbert Gallegos	Principal Architect | Director, Institutional Projects	47	Registered Architect (TX 12864)
Tommy Canul	Project Manager	35	Bachelor of Architecture, OSHA-30, USACE QCM
Bobby Carrillo	Assistant Project Manager (APM)	8	CMIT, OSHA-30
Edward Garces	Assistant Project Manager (APM) | MEP	5	CMIT
David Chacon	Director of CEI	11	PE (TX 141941), CCM, CFM
Sabrina Alvarez	Project Controls Specialist	5	OSHA-10, TxDOT LGP-101
Rolando Ayala	Project Engineer | UAS	8	EIT, CCM, Drone Pilot, TxDOT LGPP
Jaime Contreras	Sr. Project Inspector	24	Bridge & roadway inspection
Guillermo Aguilar	Project Manager | Commissioning	20	Project & commissioning management

**Note this space intentionally left blank*

CARLOS DEL ANGEL, PMP, CCM

Managing Partner | Project Executive

Years of Experience

Total: 25

Education

Bachelor of Science, Construction Science
Texas A&M University

Certifications

- Project Management Professional (PMP)
- Certified Construction Manager (CCM)

Carlos Del Angel brings 25 years of construction experience, with the past decade focused exclusively on Owner's Representative and project management services for public-sector capital projects. As Managing Partner at Brownstone, he serves as Project Executive on the firm's larger municipal and heavy-civil work, directing multidisciplinary teams and controlling cost, schedule, and quality from planning through turnover.

One key strength is protecting the owner's budget before a project is at risk. On the **City of Edinburg Downtown Parking Garage**, the original concept carried a $15.8M estimate, well beyond available funding. Mr. Del Angel steered the City toward the design-build delivery method and led scope alignment workshops that refined the project to $6.2M while preserving the City's key 250-space objective, delivering more than $9M in savings and keeping a stalled project buildable.

He applies the same discipline to active Edinburg work. At the **Edinburg EDC Workforce Resource Center**, he commissioned an independent AACE Class 3 estimate to verify contractor pricing and led a focused value-engineering effort to reconcile contractor pricing with the owner's budget ahead of the EEDC Board's GMP decision, providing the Board with an objective basis for approval within its timeline.

Relevant Project Experience

- City of Edinburg | Downtown Parking Garage | $6.2M | Edinburg, TX
- Edinburg EDC | Workforce Resource Center | $5.2M | Edinburg, TX
- City of Pharr | Pharr International Bridge Expansion Project | $48M | Pharr, TX
- City of McAllen | Quinta Mazatlán | $54M | McAllen, TX
- Hidalgo County | CDBG-CV Health Facility Improvements | $7M | Edinburg, TX
- City of Pharr | Pharr One | $7.5M | Pharr, TX
- Hidalgo County | El Paraiso Project | $6.9M | Alton, TX
- City of Pharr | TEAMPHARR.NET | $54M | Pharr, TX
- Hidalgo County | Hidalgo County Courthouse Phase II | $10M | Edinburg, TX
- City of Pharr | Donations Acceptance Program (DAP16) Pharr Intl Bridge Upgrades | $45M | Pharr, TX
- Hidalgo County Drainage District No. 1 | 2018 Drainage Bond Program | $190M | Hidalgo County, TX
- UTRGV/PSJA/City of Pharr | Aquatic Center | $23M | Pharr, TX
- City of Pharr | Donations Acceptance Program (DAP15) Pharr International Bridge Upgrades | $8.2M | Pharr, TX

GILBERT GALLEGOS, AIA

Principal Architect | Director, Institutional Projects

Years of Experience
Total: 48

Education
Bachelor of Science, Environmental Design
Texas A&M University

Certifications
- State of Texas Registered Architect #12864

Gilbert Gallegos brings 48 years of construction, design, and program-management experience and serves as Brownstone's Principal Architect and Director of Institutional Projects. A Texas Registered Architect (No. 12864), he has overseen all phases of project development across the public, industrial, and multi-family sectors for owners throughout the Rio Grande Valley, managing programs totaling more than $1 billion over his career.

His depth lies in large public bond programs, where strategic decisions determine whether a program stays within its allocated budget. He led program management on the Edinburg CISD 2008 Bond ($112M) and the South Texas College 2013 Bond ($159.4M, 537,988 SF), coordinating architectural programming, design, and delivery across multiple concurrent facilities on a single public schedule and budget.

That bond-program discipline maps directly to the City's needs: aligning scope, design, and budget from day one, coordinating multiple stakeholders, and providing owner-side leadership through the full project development process. On City of Edinburg work, he provided architectural leadership on the Downtown Parking Garage and the Edinburg EDC Workforce Resource Center, including the development of design-intent packages and collaboration with the design-build teams.

Relevant Project Experience

- Edinburg CISD | 2008 Bond Program Management | $112M | Edinburg, TX
- South Texas Community College | 2013 Bond Program Management | 537,988 SF | $159.4M | Lower Rio Grande Valley (LRGV), TX
- South Texas Community College | 2006 Bond Program Management | $100.45M | Lower Rio Grande Valley (LRGV), TX
- Texas Southmost College / UT Brownsville | 2001 Bond Program | $68M | Brownsville, TX
- City of McAllen | Convention Center | $50M | McAllen, TX
- Williamson County | Criminal Justice Center (Jail & Courthouse) | $60M | Georgetown, TX
- Workforce Solutions | One-Stop Centers, Tri-County area of LRGV | $15M | Lower Rio Grande Valley, TX
- Edwards Aquifer Authority | Headquarter Expansion | $6M | TX

TOMMY CANUL

Project Manager

Years of Experience
Total: 35

Education
Bachelor of Architecture, Texas Tech University

Certifications
- OSHA-30
- Army Corps of Engineers Quality Control Manager

Tommy Canul brings over 35 years of architectural, construction, and project management experience and serves as a Project Manager and design resource on Brownstone's institutional and civic work. Over his career he has delivered more than $500 million in municipal, educational, civic, and recreational facilities, serving in senior roles including Project Executive, Project Manager, and Chief Administrative Officer, and overseeing every phase from programming and design through construction and closeout.

Mr. Canul's depth is in public civic and recreational facilities delivered under alternative delivery methods. He has managed construction manager-at-risk and design-build delivery across a range of municipal projects, including the City of Pharr's **Northside Community Center** (Amphitheater, French Garden & Fountain, $7.5M) and a multi-park improvement program, the **La Joya ISD Natatorium** ($13.1M), and the **City of McAllen Police Station** additions ($3.5M). This range gives him a practical command of how design decisions carry through procurement and into the field.

Relevant Project Experience

- Tropical Texas Behavioral Health | Facility Additions | $1.5M | Brownsville, TX
- City of Pharr | CMAR Northside Community Center - Amphitheater, French Garden & Fountain | $7.5M | Pharr, TX
- City of McAllen | Police Station Additions | $3.5M | McAllen, TX
- City of Pharr | CMAR Newcome Park Phases 1 & 2 | $3.57M | Pharr, TX
- City of Pharr | CMAR Allen & William Arnold Park + Splash Pad | $2.75M | Pharr, TX
- City of Pharr | CMAR Dr. William Long Park | $1.8M | Pharr, TX
- City of Pharr | CMAR Nature & Birding Center | $2.8M | Pharr, TX
- Catholic Diocese of Brownsville | San Cristobal Magallanes | $2.0M | Brownsville, TX
- Catholic Diocese of Brownsville | St. Eugene de Mazenod | $2.5M | Brownsville, TX
- La Joya ISD | Natatorium | $13.1M | La Joya, TX
- Mission CISD | Ag Facility | $4M | Mission, TX

BOBBY CARRILLO, CMIT

Assistant Project Manager (APM)

Years of Experience
Total: 8

Education
Bachelor of Business Administration, Business Management
Texas State University

Certifications
- CMIT (Level1)
- Excavation, Trenching, & Soil Mechanics (OHSA 30)

Bobby Carrillo serves as Assistant Project Manager, supporting project management activities for municipal, healthcare, and community facilities across South Texas. He coordinates stakeholders, manages project documentation, and supports project controls in fast-paced delivery environments, facilitating communication between owners, architects, and construction teams while keeping work aligned to project goals and timelines.

His experience is concentrated within the Edinburg City limits. He has supported delivery on the **Downtown Parking Garage ($6.2M)**, the **Edinburg EDC Workforce Resource Center ($5.2M)**, the Hidalgo County Precinct 4 **Community Resource Center ($8M),** and the **Betts Esparza Park development ($3.1M)**, a concentration of hands-on Edinburg-area work that few team members can match. On these assignments, he tracks progress, supports pay-application reviews, and assists with field-observation reporting to keep quality and contract compliance on track.

His concentration of Edinburg-area work gives him a working knowledge of the City's standards and stakeholders, supporting owner-side coordination and reporting that protects the schedule and budget while keeping the City informed.

Relevant Project Experience

- El Paraiso Health Clinic & CRC | Healthcare & Community Facility | $7.5M | Alton, TX
- Biosafety Laboratory | Healthcare / Lab Facility | $5.9M | Edinburg, TX
- Community Resource Center (CRC) | Community Facility | $8M | Edinburg, TX
- Edinburg EDC | Workforce Resource Center | $5.2M | Edinburg, TX
- City of Edinburg 3-Story Parking Garage | Parking Structure | $6.2M | Edinburg, TX
- Betts Esparza Park | Community Park Development | $3.1M | Edinburg, TX

EDWARD GARCES, CMIT
Assistant Project Manager (APM)

Years of Experience
Total: 5

Education
Bachelor of Science, Architectural Engineering
University of Texas A&M Kingsville

Certifications
- Construction Manager in Training (CMIT)

Edward Garces brings 5 years of experience in the AEC industry and serves as an Assistant Project Manager supporting MEP coordination on Brownstone's team. A mechanical designer and Construction Manager in Training (CMIT), he specializes in mechanical and plumbing system design, project coordination, and construction management across educational, commercial, multifamily, and mixed-use projects.

His technical work spans HVAC and plumbing design, ductwork and piping layouts, equipment sizing and load calculations, Revit modeling, clash detection, and multidisciplinary coordination from schematic design through construction administration. Mr. Garces has contributed to large institutional and civic projects, including the **Texas A&M Fort Worth Research & Innovation Building** ($180M), the **Dallas ISD Nolan Estes Campus** ($80M), and the **City of Pharr Multi-Use Facility** ($50M). He provided field oversight and coordination on the **City of Edinburg Downtown Parking Garage ($6.2M)**, giving him direct, current experience on a City of Edinburg project.

That background maps directly to the design-support role Brownstone brings to the City: MEP design coordination and constructability input during design, plus assistant project management support for schedule monitoring, consultant and contractor coordination, and budget tracking. He is proficient in Revit, AutoCAD, and Carrier HAP, and holds a Bachelor of Science in Architectural Engineering from Texas A&M University-Kingsville.

Relevant Project Experience

- City of Edinburg |Downtown Parking Garage| $6.2M | Edinburg, TX
- City of Pharr | Pharr Multi-Use Facility| $50M | Pharr, TX
- Dallas ISD | Dallas ISD Nolan Estes Campus | $80M | Dallas, TX
- Dallas ISD | William Lipscomb Elementary School | $8.7M | Dallas, TX
- Texas A&M Fort Worth | Research & Innovation Building | $180M | Fort Worth, TX
- Texas A&M-Commerce | Texas A&M-Commerce Recreation Center| $15M | Commerce, TX

DAVID M. CHACÓN, PE, CCM, CFM

Director of CEI

Years of Experience

Total: 11

Education

Bachelor of Science, Civil Engineering
University of Texas RGV

Certifications

- Professional Engineer (PE)
- Certified Construction Manager (CCM)
- Certified Floodplain Manager (CFM)

David Chacón directs Brownstone's Construction Engineering & Inspection (CEI) Department and brings over 11 years of experience in construction engineering, project management, and civil/structural design. A Texas Registered Professional Engineer and Certified Floodplain Manager, he has overseen all phases of project delivery across the public and private sectors.

He brings PE-level engineering review to the decisions that drive project cost and schedule. On the City of Pharr International Bridge Expansion ($48M), he advocated for the substitution of precast bent caps for cast-in-place elements and drove its approval, removing weather risk from the critical path and recovering 45 days to the schedule. Separately, his review found that the design included three overhead sign bridges, where two were sufficient; the deduct change order he issued returned roughly $1 million to the City, all while meeting every federal compliance requirement.

He brings the same discipline to procurement. For the FY16 DAP Bridge Improvements ($45M), the first bid round yielded a single proposal of $51M, well over budget. Mr. Chacón recommended rejecting the sole bid, ran constructability workshops to refine the scope, and led contractor outreach that rebuilt competition. The rebid drew multiple bidders at roughly $46M, a $5 million savings, protecting the owner from cost risk while keeping the federally funded project on schedule.

Relevant Project Experience

- City of Pharr | Pharr International Bridge Expansion Project | $48M | Pharr, TX
- City of McAllen | Quinta Mazatlán | $54M | McAllen, TX
- Hidalgo County | CDBG-CV Health Facility Improvements | $7M | Edinburg, TX
- City of Pharr | Northside Community Center, Amphitheater, & French Park | $7.5M | Pharr, TX
- Hidalgo County | El Paraiso Project | $6.9M | Alton, TX
- City of Pharr | TEAMPHARR.NET | $54M | Pharr, TX
- Hidalgo County | Hidalgo County Courthouse Phase II | $10M | Edinburg, TX
- City of Pharr | Donations Acceptance Program (DAP16) Pharr International Bridge Upgrades | $45M | Pharr, TX
- City of Pharr | Donations Acceptance Program (DAP15) Pharr International Bridge Upgrades | $8.2M | Pharr, TX
- TxDOT | 83 La Joya Phase I | $94M | La Joya, TX

SABRINA ALVAREZ

Project Control Specialist

Years of Experience
Total: 5

Education

Master's in Civil Engineering
University of Texas RGV

Bachelor of Architecture
Universidad de Guanajuato

Certifications

- OSHA-10
- TxDOT LGP-101

Sabrina Alvarez serves as a Project Controls Specialist in Brownstone's construction management department and brings five years of experience in the architecture, engineering, and construction (AEC) industry. She specializes in construction coordination, project documentation, and project controls within owner's representative and construction management environments, drawing on a multidisciplinary background in architecture and civil engineering.

Ms. Alvarez's work centers on the documentation and controls that keep a project auditable and on schedule: RFIs, submittals, site inspections, scheduling support, and project documentation management. She has contributed to healthcare, infrastructure, and civic projects, including the **Texas General Medical Center** in McAllen, the **City of Pharr International Bridge Expansion** ($48M), and the **Hidalgo County El Paraiso** health facility ($6.9M) in the Edinburg area, providing drafting, construction coordination, and field support across each.

That controls discipline maps directly to the support Brownstone provides the City: maintaining schedules, tracking RFIs and submittals, and keeping project records accurate and audit-ready throughout delivery. She is proficient in AutoCAD, Civil 3D, SketchUp, Procore, Bluebeam, and Raken, and holds a Bachelor of Architecture from Universidad de Guanajuato and a Master of Science in Civil Engineering from The University of Texas Rio Grande Valley.

Relevant Project Experience

- City of Pharr | Pharr International Bridge Expansion Project | $48M | Pharr, TX
- City of Pharr | Donations Acceptance Program (DAP16) Pharr International Bridge Upgrades | $45M | Pharr, TX
- City of Pharr | Commercial Vehicle Parking Project | $12M | Pharr, TX
- Texas General Medical Center | $48M | McAllen, TX
- Hidalgo County | El Paraiso Project | $6.9M | Alton, TX

ROLANDO AYALA, EIT, CCM

Project Engineer | UAS

Years of Experience

Total: 9

Education

Bachelor of Science, Civil Engineering
University of Texas RGV

Certifications

- Certified Construction Manager (CCM)
- Engineer in Training (EIT)
- Certified Drone Pilot
- TxDOT LGPP Qualified
- Level 1B Roadway Specialist
- OSHA-10

Rolando Ayala serves as Project Engineer, bringing over eight years of construction inspection and construction management experience across both vertical construction and roadway/infrastructure work. He is recognized for his inspection performance and his ability to lead field inspection teams across public and private projects.

His strength is holding field quality to a consistent standard. He leads inspection teams and reviews their observation reports, catching gaps before they become the owner's problem and ensuring documentation is accurate and complete across all field staff. That oversight extends to inspection programs, testing frequencies, and deficiency resolution on both building and civil work.

As a certified drone pilot, he uses aerial imaging for site assessments, inspections, and progress monitoring, and to verify pay quantities and develop independent estimates that challenge and confirm contractor pay applications, protecting owners from overbilling. He brought this discipline to the City of Pharr DAP16 Bridge Improvements ($45M), supporting inspection, testing oversight, and documentation under strict TxDOT and FHWA compliance protocols. He holds a B.S. in Civil Engineering from UT Rio Grande Valley.

Relevant Project Experience

- City of Pharr | Donations Acceptance Program (DAP15) Pharr International Bridge Upgrades | $8.2M | Pharr, TX
- City of Pharr | Pharr International Bridge Expansion Project | $48M | Pharr, TX
- City of Pharr | Donations Acceptance Program (DAP16) Pharr International Bridge Upgrades | $45M | Pharr, TX
- Hidalgo County | El Paraiso Project | $6.9M | Alton, TX
- City of Pharr | TEAMPHARR.NET | $54M | Pharr, TX

- City of Pharr | Northside Community Center, Amphitheater, & French Park | $7.5M | Pharr, TX
- Harlingen CISD | Treasure Hills Elementary PH II | $8M | Harlingen, TX
- City of Brownsville/SPI Int. Airport Hangar | $1.8M | Brownsville, TX.
- City of Pharr | Fire Station No. 4 | $2.3M | Pharr, TX

JAIME CONTRERAS

Senior Project Inspector

Years of Experience

Total: 24

Education

University of Texas RGV

Certifications

- ACI Concrete Field Testing Technician, Grade 1
- TxDOT HMAC SB102 Field Specialist
- TxDOT Construction Inspection and materials trainings

Jaime Contreras serves as Senior Project Inspector and brings 24 years of experience in roadway construction, bridge structures, underground utilities, traffic signal systems, and maintenance projects. He specializes in construction inspection and quality assurance to TxDOT standards, overseeing subgrade, base, and seal coat operations, mechanically stabilized earth walls, asphalt patch and seal coat applications, and materials-testing across heavy-civil and transportation work.

Mr. Contreras's strength is holding field quality and documentation to a consistent standard, backed by a proven record of training EITs and inspectors on-site to keep work in adherence with engineering standards and safety protocols. He is a certified ACI Concrete Field Testing Technician (Grade I) and a TxDOT HMAC SB102 Field Specialist, giving him direct command of the concrete and asphalt acceptance testing behind roadway and structural work, and he was named **Inspector of the Year (2019)** at the TxDOT Pharr Area Office. His inspection experience spans major regional programs, including the **City of Pharr International Bridge Expansion** ($48M) and **TxDOT 83 La Joya Phase I** ($94M), along with numerous roadway overlay, signal, and preventative-maintenance projects across Hidalgo County.

That depth maps directly to the inspection support Brownstone provides the City: rigorous field observation, materials-testing oversight, and accurate documentation that protects quality and contract compliance on roadway, bridge, and site work. His ACI and HMAC certifications and full TxDOT training record are provided in the Appendix.

Relevant Project Experience

- City of Pharr | Pharr International Bridge Expansion Project | $48M | Pharr, TX
- TxDOT | Hot mix Overlay Various locations | $5M | Hidalgo County
- TxDOT |Signal Traffic Various Locations | $1M | Hidalgo County

GUILLERMO AGUILAR

Project Manager | Commissioning

Years of Experience

Total: 23

Education

Bachelors of Arts, International Studies
Texas A&M University

Guillermo Aguilar serves as a Project Manager and brings over 23 years of project management experience, with an emphasis on project administration and operations. Over his career he has overseen all phases of construction and infrastructure projects across the public, industrial, and multifamily sectors, from planning through closeout.

Mr. Aguilar's strengths lie in project planning and scheduling, document control, value engineering, operational oversight, and subcontractor relationship management. His program experience includes the **Edinburg CISD Bond Program** ($112M), the **City of Pharr TEAMPHARR.NET** citywide fiber network ($54M), and the **UTRGV/City of Pharr Aquatic Center** ($23M), giving him experience managing large, multi-stakeholder capital work, including a bond program within the City of Edinburg.

That background maps directly to the project management support Brownstone brings to the City: coordinating scope, schedule, and budget across concurrent assignments while holding subcontractors and documentation to a consistent standard. He holds a Bachelor of Arts in International Studies from Texas A&M University.

Relevant Project Experience

- City of Pharr | TEAMPHARR.NET | $54M | Pharr, TX
- UTRGV/City of Pharr | Aquatic Center | $23M | Pharr, TX
- City of Pharr | CMAR Program | $19M | Pharr, TX
- City of Pharr | Northside Community Center (Amphitheater & French Park) | $7.5M | Pharr, TX
- City of Pharr | City Hall First Floor Renovation | $3.4M | Pharr, TX

SECTION 2

ABILITY TO MEET SCHEDULES AND DEADLINES

SECTION 2: ABILITY TO MEET SCHEDULES AND DEADLINES

Meeting the schedule is one of the measures that matters most on a public capital project. A missed deadline can have serious consequences, including lost grant funding, prolonged disruption to residents, and delays that trickle across every downstream trade. Brownstone protects the City's schedule not by pushing contractors harder in the field (this is typically too late), but through a proactive, disciplined framework that surfaces risk early, holds the critical path, and acts the moment slippage appears.

OUR SPE APPROACH

Every Brownstone engagement runs on three integrated threads — Strategic, Planning, Execution — that work in parallel across the full project lifecycle to hold the owner's cost, schedule, scope, and quality.

Strategic — set direction before momentum locks in. The decisions made in the first weeks of a project determine whether the schedule survives discovery. Brownstone engages early to confirm the City's success criteria, stress-test the budget and schedule against market conditions, and validate site, utility, and entitlement assumptions before they enter the critical path. ***Front-end discipline is the cheapest schedule insurance available: industry benchmarking (CII) shows that strong predesign scope definition finishes within roughly 5% of schedule, while weak definition runs over 20% late.***

Planning — lock the plan so execution holds. Brownstone converts strategic intent into a defined scope, owner-centric contracts, a validated budget, and a preliminary schedule pressure-tested against the City's milestone dates. Long-lead items are identified, and contractor and consultant procurement is sequenced before they can threaten the start. The goal is predictability. The City knows how the project will unfold, what the risks are, and how each will be managed.

Execution — hold the schedule from design through closeout. Execution isn't confined to the field; it begins during design, where Brownstone's constructability reviews and independent cost checks keep the project buildable before ground is ever broken. In construction, Brownstone maintains the master schedule, monitors progress against the critical path, and issues early-warning reports the moment a threat appears, triggering recovery through resequencing, adding capacity, or alternative procurement before a small delay becomes critical. This is by design the most straightforward phase to hold: the cost influence curve shows that the ability to shape cost and schedule is highest early and narrows as construction proceeds, so the risks resolved during Strategic and Planning are the ones that would otherwise surface as delays and change orders here. Done well, execution becomes disciplined follow-through rather than crisis management.

This framework maps directly onto the phases of the City's assignments:

Phase	Schedule Focus
Predesign	Confirm success criteria; stress-test budget and schedule against market; validate site, utility, and entitlement assumptions before they enter the critical path; PDRI scope scoring at the predesign gate
Design	Master schedule and milestones set; program and operational needs integrated into the CDs; constructability reviews at SD/DD/CD to remove change-order and long-lead risk

Procurement	Pre-bid conferences, bid packages on the City's procedures, award support, and owner-direct procurement sequencing that protects long-lead items early
Construction	Schedules maintained; documented progress meetings; continuous site supervision; RFI/submittal tracking; independent change-order review; QA and safety enforcement
Post-Construction	Punch-list, as-builts, O&M manuals and training, warranty inspections, and orderly transition to City operations

PROVEN SCHEDULE PERFORMANCE

The framework produces results. The following examples show Brownstone protecting an owner's completion date under real pressure, including on active City of Edinburg work.

City of Edinburg Downtown Parking Garage. During construction, crews encountered underground storage tanks and contaminated soil — an unforeseen condition that can stall a project for months and drive six-figure remediation costs. Brownstone led the mitigation strategy, coordinating the environmental response to compress what could have been a lengthy, expensive cleanup into a delay of under 60 days at roughly $40K, an amount expected to be absorbed within project contingency. A change order has extended the schedule by 60 days, and Brownstone is actively pursuing compression opportunities to recover toward the original completion date. This is what owner-side representation looks like when a real problem surfaces mid-construction: fast containment, cost control, and a plan to claw back time.

City of Pharr International Bridge Twin Span ($48M). A 1.35-mile bi-national span on a fixed 16-month schedule, coordinated across nine federal, state, and bi-national agencies, left no room for weather delay or rework. Brownstone recommended substituting pre-cast bent caps for cast-in-place elements to pull curing time and weather risk off the critical path, and added a dedicated crane to expedite deck-panel placement — together recovering 45 days. When heavy June rains offset part of that gain, it was the early recovery that kept the project on track to finish on schedule.

Hidalgo County Bio-Safety Laboratory (CDBG-CV). Grant funding tied this project to hard encumbrance and expenditure deadlines. When laboratory management turnover mid-construction drove multiple design changes, Brownstone recommended a brief, deliberate pause to consolidate every modification into a single change order — allowing work to continue in the rest of the facility while the lab details were resolved. The project met the grant deadline and finished roughly 30 days ahead of schedule.

Across a bond-funded facility, a fixed-schedule bridge, and a grant-deadline lab, the constant is the same: surface the risk early, hold the critical path, and coordinate close enough to the work to see a problem before it reaches the City's deadline.

SECTION 3

STABILITY AND REFERENCES

SECTION 3: STABILITY AND REFERENCES

FIRM STABILITY

Brownstone Consultants has grown steadily and responsibly since 2019 into a multi-office firm spanning the Rio Grande Valley and San Antonio, with a track record exceeding $2 billion in delivered public and private work. Our stability rests on a deep, multi-disciplined bench (PEs, AIAs, PMPs, CCMs, a CFM, and EITs), a diversified client base across municipalities, counties, school districts, and state and federal agencies, and standardized digital systems that make our delivery repeatable and auditable.

To protect continuity on City of Edinburg assignments, each key position has a pre-identified, equally qualified successor; we cross-train staff and maintain an on-call network of licensed professionals so work proceeds without disruption if a team member becomes unavailable. Cloud-based documentation in Autodesk Construction Cloud keeps all project records accessible, so any transition is seamless, and we coordinate any long-term personnel change with the City and secure approval before finalizing it.

REFERENCES

The following references from recent, relevant work are available to the City. Each may be contacted at the number provided. Signed recommendation letters are included in the Appendix.

Reference #1 | City of Edinburg: Downtown Parking Garage ($6.2M)

RECOMMENDATION LETTERS

A signed recommendation letter from reference listed above is included below. Each letter speaks to Brownstone's performance on the referenced project, including responsiveness, adherence to schedule and budget, and overall quality of service.

THE CITY OF Edinburg

March 5, 2026

Tomas D. Reyna
Assistant City Manager
UTRGV Student Government Association

Subject: Recommendation for Brownstone Consultants

Brownstone Consultants has supported the City of Edinburg as the Owner's Representative and Project Manager for the Downtown Parking Garage project, providing strong leadership in aligning the project scope with the City's available budget.

During the strategic and pre-design phase, Brownstone worked closely with City staff to evaluate project alternatives and recommend delivery methods and cost-control strategies that helped bring the project in line with available funding.

Throughout construction, their team has remained proactive in identifying and addressing issues as they arise, including assisting the City in navigating unforeseen site conditions while keeping the project progressing forward.

Brownstone has been a collaborative and solutions-oriented partner throughout this process, and I would confidently recommend them for similar public-sector projects.

Respectfully,

Tomas D. Reyna
Assistant City Manager

Re: Hidalgo County / Urban County CDBG-CV Health Facility Improvements (Bio-Safety Lab Project)

Dear Mr. Del Angel,

I wanted to take a moment to express my sincere thanks for the exceptional work you and Brownstone Consultants performed on the Bio-Safety Lab project. Your contributions were instrumental in helping us navigate the complexities of the project and ensuring that all regulations were complied with.

I particularly appreciate the following:

- Your guidance in the decision-making process helped us stay on track and make informed choices.
- Your recommendations regarding the structural canopies, which are allowing us to resolve this issue without further delaying the project.
- Your commitment to ensuring that the project remained compliant with all regulations and that the County's ARPA funds were used appropriately.

The Bio-Safety Lab will have a significant impact on the residents of Hidalgo County, and we are grateful for your dedication and professionalism throughout this effort. We look forward to the opportunity to work with you again.

Respectfully submitted,

Ellie Torres

Re: Pharr One Project

Mr. Del Angel,

I am pleased to write this letter of reference for Brownstone Consultants, LLC. Brownstone helped us manage the design and construction of our new Pharr One facility, which is a remarkable addition to the Pharr community. It is designed to provide residents with a unique outdoor gathering space and a state-of-the-art learning facility. The facility boasts a stunning French garden with a reflection pool and an outdoor amphitheater for performances and events.

Mr. Del Angel and his staff helped the City navigate several issues, including COVID-19 pandemic-related supply chain problems that were beyond the control of any team members. Although these supply chain issues delayed the project, Brownstone kept the project on budget and negotiated no additional general condition fees from the contractor.

Brownstone also assisted the City throughout the warranty period, tracking warranty items for timely resolution and conducting six- and eleven-month warranty walkthroughs to ensure outstanding warranty items were addressed before the warranty expiration date.

Thank you for your exceptional work and commitment to this project. We appreciate the dedication and professionalism that Brownstone Consultants, LLC brought to this effort. We look forward to the opportunity to work with you again in the future.

Respectfully Submitted,

Mr. Ed Wylie
Deputy City Manager
City of Pharr

SECTION 4

PREVIOUS EXPERIENCE WITH THE CITY OF EDINBURG

SECTION 4: PREVIOUS EXPERIENCE WITH THE CITY OF EDINBURG

Brownstone has direct, active experience with the City of Edinburg (currently serving as the City's Owner's Representative on the Downtown Parking Garage), and our senior staff have delivered numerous projects within the Edinburg city limits and for Edinburg-serving agencies. The flagship engagement is detailed below, followed by additional Edinburg-area experience.

City of Edinburg: Downtown Parking Garage

THE PROJECT

To ease downtown congestion and support the new Hidalgo County Courthouse, the City of Edinburg set out to build a three-level, 267-space parking garage in its urban core, improving access to government services and reinforcing downtown walkability. Brownstone served as the City's Owner's Representative from concept through construction on a design-build delivery with Broaddus Construction.

THE CHALLENGE

Cost was the defining challenge: the original concept carried a $15.8M construction estimate, well beyond the City's available funding, putting the project at risk before it could break ground.

WHAT BROWNSTONE DID

- Recommended design-build delivery paired with collaborative scope alignment and value engineering to bring the budget into reach.
- Convened City, courthouse-program, and downtown stakeholders in value-engineering workshops to confirm program priorities.
- Identified an AEP utility relocation early and built proactive mitigation to protect the critical path.
- Implemented Autodesk Construction Cloud to centralize documents, RFIs, and submittals across the City, design-build team, and consultants.
- Refined the budget from the $15.8M concept to $6.2M while maintaining the City's minimum 250-space objective.

THE RESULT

Brownstone's strategy delivered more than $9M in savings while preserving the City's minimum 250-space objective. Construction began on schedule in November 2025 and is on track for a December 2026 completion, on budget and on time.

WHY IT MATTERS FOR THE CITY OF EDINBURG

By steering the City toward the right delivery method and disciplined scope alignment, Brownstone turned a $15.8M concept the City could not fund into a $6.2M project it could build.

Edinburg EDC: Workforce Resource Center

PROJECT SNAPSHOT

PROJECT COST
$7.1M

DELIVERY
Design-Build

STATUS
Ongoing

REFERENCE
Ruadel Garza
Edinburg EDC
Executive Director
(956) 388-8914

KEY PERSONNEL

Bobby Carrillo, CMIT

THE PROJECT

The Edinburg Economic Development Corporation (EEDC) is developing the Workforce Resource Center (WRC), a two-story, approximately 12,000 SF facility on West Palm Drive in Edinburg, Texas. The building pairs a golf clubhouse on the first floor with dedicated workforce programming space on the second, delivering community recreation and economic mobility services under one roof while enhancing the Ebony Hills Golf Course. Brownstone serves as the EEDC's Owner's Representative, managing the project from initial concept through the current GMP development phase on a design-build delivery.

THE CHALLENGE

As the design advanced to permit-ready construction documents, contractor pricing diverged from the owner's construction budget of approximately $5.35 million (within a $7.1 million all-inclusive budget), putting the Guaranteed Maximum Price at risk of exceeding the figure the EEDC Board could approve.

WHAT BROWNSTONE DID

- Led the design-management process, coordinating the architect (Raine Architects) and design team, including Trinity MEP engineers, and administered the design-build contract with Gerlach Builders LLC through permit-set completion.
- Engaged an independent estimator to produce an AACE Class 3 check estimate against the 133-sheet permit set (dated June 19, 2026), giving the EEDC an objective benchmark for the contractor's GMP.
- Isolated the variance against the owner's budget, identifying the primary outlier trades.
- Structured subcontractor bid deadlines and led a focused value-engineering process to close the gap during the live bidding window, with full transparency to the EEDC.

THE RESULT

Brownstone is reconciling the GMP with Gerlach Builders ahead of the EEDC Board meeting, working toward a board-acceptable figure without compromising program scope. The independent check, estimate and disciplined value engineering give the Board an objective basis for a well-informed GMP acceptance decision within the established timeline.

WHY IT MATTERS FOR THE CITY OF EDINBURG

The Workforce Resource Center shows Brownstone delivering hands-on owner's representation on a current Edinburg public-sector project: independent cost validation, design-build administration, and value engineering to protect a public budget, the same approach Brownstone would bring to the City of Edinburg's capital projects.

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: 1834372318700
Approval Date: April 28, 2025
Scheduled Expiration Date: April 28, 2029

In accordance with the Memorandum of Agreement between the
SOUTH CENTRAL TEXAS REGIONAL CERTIFICATION AGENCY (SCTRCA)
and the Texas Comptroller of Public Accounts (CPA), the CPA hereby certifies that

Brownstone Consultants LLC

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **April 28, 2025**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day-to-day management, operational control, addresses, phone and fax numbers or authorized signatures) provided in the submission of the business; application for registration/certification into SCTRCA's program, you must immediately (within 30 days of such changes) notify SCTRCA's program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibiliy. If your firm ceases to remain certified in SCTRCA's program, you must apply and become certified through the State of Texas HUB program to maintain your HUB certification.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

DPTV TANGO, LLC

DBA BUSINESS OPERATION SOLUTIONS (TANGO BOS)

STATEMENT OF QUALIFICATIONS

PROJECT MANAGEMENT SERVICES

RFQ 2026-8 | CITY OF EDINBURG ENGINEERING DEPARTMENT

Field	Response
Submitted By	Natalia Trota, MBA, Retired USAF - CEO / Principal-in-Charge
Legal Name	DPTV Tango, LLC DBA Business Operation Solutions (Tango BOS)
Address	214 S Main St, Ste 218 #525, Duncanville, Texas 75116
Email / Phone	nataliatrota@tangobos.com | (808) 829-7977
Website	www.tangobos.com
SAM Identifiers	UEI: KNYQX62M4RU4 | CAGE: 8Y0U6
Prime Contractor Certification	SDVOSB | WOSB | Texas VetHUB | M/W/SBE Certified

Submission Note: No pricing, fee schedule, markup, or construction price is included because this is a qualifications-based RFQ and rates are negotiated after selection.

01 TRANSMITTAL LETTER

July 14, 2026

City of Edinburg Engineering Department
415 W. University Drive
Edinburg, Texas 78539

RE: RFQ 2026-8 - Project Management Services

To the Evaluation Committee:

DPTV Tango, LLC DBA Business Operation Solutions (Tango BOS) respectfully submits this Statement of Qualifications to provide citywide project management and construction management services for the City of Edinburg. Tango BOS is prepared to support capital improvements, renovations, maintenance, life-safety work, utility upgrades, mechanical systems, electrical systems, plumbing systems, site improvements, demolition, repairs and new-construction assignments under the City's continuing contract.

Tango BOS will serve as the accountable prime contractor/prime consultant for the City. Our role is to give the City one responsible point of contact for executive oversight, task-order intake, preconstruction coordination, cost and schedule management, procurement support, field coordination, quality assurance, safety oversight, document control, closeout and warranty follow-up. Our team combines government facility experience, construction management, HVAC and MEP coordination, commercial roofing, licensed plumbing support, electrical and solar technical work, quality control, field supervision and Texas-licensed architectural oversight.

Because task orders may vary by discipline, Tango BOS will assign a Texas-licensed Professional Engineer based on the requirements of each project. No professional engineering services will be performed without oversight by the properly licensed Texas Professional Engineer responsible for that discipline. The engineer's qualifications, license verification, availability and responsibilities will be submitted to the City before commencement of the applicable engineering services.

Tango BOS acknowledges the City's electronic submission requirements and confirms this response is intended to remain valid for 90 days. Addenda acknowledged: to be confirmed and uploaded separately in OpenGov with the final response package. The undersigned is authorized to bind DPTV Tango, LLC DBA Business Operation Solutions.

Respectfully submitted,

Natalia Trota, MBA, Retired USAF

Chief Executive Officer / Principal-in-Charge

DPTV Tango, LLC DBA Business Operation Solutions (Tango BOS)

UEI: KNYQX62M4RU4 | CAGE: 8Y0U6

02 EXECUTIVE SUMMARY

Tango BOS understands that this is an as-needed, multiple-award continuing contract. Assignments may range from short-duration advisory support to full construction management of complex renovations, facility upgrades, utilities, MEP systems, site improvements and new construction. The City needs a firm that can scale staffing to the assignment, mobilize the correct technical disciplines, maintain transparent controls and communicate clearly with Engineering staff.

Why Tango BOS

- Accountable prime leadership led by CEO Natalia Trota, MBA, a retired U.S. Air Force veteran with 20 years of military service and more than 20 years of combined military, federal, healthcare, procurement and business-operations leadership.
- Public-sector and healthcare-facility experience requiring disciplined documentation, safety, quality, life-safety awareness and continuity of operations.
- Scalable core-and-specialist staffing model that supports small part-time assignments as well as sustained field construction management.
- Texas-licensed architectural oversight through Kamran Mouzoon, AIA, NCARB, LEED GA, with discipline-specific Texas Professional Engineers assigned as task orders require.
- Experienced construction, facilities, HVAC, plumbing, electrical, roofing, quality-control and field-supervision personnel.
- Formal project controls for scheduling, estimating, risk, RFIs, submittals, changes, inspections, documentation, closeout and warranty follow-through.
-

City Need	Tango BOS Response	Result
Flexible staffing	Core leadership with on-call technical specialists selected by assignment.	The City receives the discipline and level of support each task order requires.
Schedule reliability	Baseline logic, milestone control, six-week and two-week look-ahead planning and recovery actions.	Early identification and correction of schedule threats.
Budget discipline	Progressive estimates, bid leveling, cost forecasting and change control.	Transparent decisions and reduced exposure to avoidable cost growth.
Quality and safety	Defined QA/QC checkpoints, inspection coordination, documented hazards and stop-work authority.	Fewer deficiencies, safer sites and more complete closeout.
Clear records	Standard logs, meeting minutes, decision tracking and electronic closeout files.	Audit-ready project files and reliable institutional knowledge.

03 FIRM OVERVIEW, SAM INFORMATION AND CERTIFICATIONS

DPTV Tango, LLC DBA Business Operation Solutions (Tango BOS) is a Texas-based small business established in 2019. The firm provides project management, construction coordination, facility maintenance, procurement, compliance, inspections, vendor coordination and closeout support for public-sector and regulated environments.

Firm Attribute	Tango BOS Response
Legal Name	DPTV Tango, LLC DBA Business Operation Solutions (Tango BOS)
Office Serving the Contract	214 S Main St, Ste 218 #525, Duncanville, Texas 75116
Principal-in-Charge	Natalia Trota, MBA, Retired USAF - CEO / Principal-in-Charge / Program Executive
Federal Identifiers	SAM Registered | UEI KNYQX62M4RU4 | CAGE 8Y0U6
Certification Line	SDVOSB | WOSB | Texas VetHUB | M/W/SBE Certified
Business Status	Service-Disabled Veteran-Owned, Woman-Owned, Minority-Owned and Small Business
Core Services	Project management, construction coordination, facility maintenance, procurement and vendor coordination, schedule/cost controls, inspections, compliance, quality assurance and closeout support
Geographic Coverage	Texas-wide support using DFW leadership and proposed personnel/partners in Central, South and Southeast Texas
Edinburg Field Presence	Project-specific field office or local reporting location established when sustained on-site services are required
Safety and Public Trust	OSHA 10-trained executive leadership; proposed team includes OSHA 10/30 personnel; Texas Notary Public and Remote Online Notary experience supporting identity verification, document execution and records integrity

Management Philosophy

Tango BOS manages each assignment as an integrated control system. Scope, schedule, budget, quality, safety, procurement and documentation are treated as connected functions. Decisions are documented, accountability is assigned and emerging issues are elevated before they become claims, delays or operational disruptions.

Professional Disciplines Available Through the Proposed Team

- Program and project management
- Preconstruction and constructability support
- Construction management and site supervision
- Architecture and design coordination
- Discipline-specific professional engineering assigned by task order
- MEP, plumbing and facility systems coordination
- Electrical and solar technical support
- Roofing and envelope coordination
- Quality control, safety and closeout management

04 UNDERSTANDING OF THE CITY'S REQUIREMENTS

Phase	City Requirement	Tango BOS Response
Assignment Initiation	Act upon task order or notice to proceed.	Confirm scope, authority, deliverables, budget, schedule, reporting format and decision protocol before work begins.
Preconstruction	Support scope, design, budget, schedule and constructability.	Establish project execution plan, master schedule, risk register, progressive estimates and constructability review log.
GMP / Cost Development	Prepare itemized estimates and recommendations.	Develop transparent estimate assumptions, allowances, contingencies, bid comparisons and value-engineering options.
Procurement	Develop packages and coordinate competitive bids.	Prepare scopes, conduct pre-bid meetings, manage questions, level bids and document recommendations for City approval.
Construction	Provide field management, controls and coordination.	Maintain site presence as required, conduct meetings, manage logs, RFIs, submittals, inspections, safety, quality, cost and schedule.
Closeout	Deliver complete records, training and warranty support.	Manage punch lists, as-builts, manuals, training, photos, final inspection, acceptance and warranty follow-up.

Tango BOS will administer each task order in accordance with the contract, City direction, adopted building and development codes, applicable OSHA requirements, professional-practice laws, manufacturer requirements, permitting authorities and project-specific standards. The assigned licensed architect or engineer will remain responsible for services requiring professional judgment within that professional discipline.

05 OVERALL QUALIFICATIONS OF THE TEAM - 40 POINTS

Proposed Individual / Firm	Role	Primary Qualifications	Assignment Basis
Natalia Trota	Principal-in-Charge / Program Executive	Retired USAF veteran; 20 years military service; 20+ years combined government, healthcare and business operations; program management, contracts, procurement, scheduling, audits/inspections, OSHA 10 and public-trust document verification.	Core - all task orders
Anthony Overstreet	Senior Project Manager	Approx. 13 years commercial construction, roofing, remodeling, workflow and trade coordination.	Primary project management and construction coordination
Kamran Mouzoon, AIA, NCARB, LEED GA	Texas-Licensed Architect / Design Principal	Texas Architect No. 13684; 25-35+ years architecture and project management.	Design/technical assignments

Proposed Individual / Firm	Role	Primary Qualifications	Assignment Basis
Richard Simons	Senior Construction / Facilities / MEP Manager	10+ years HVAC/facility management; government medical facilities; subcontractors, safety, quality and reporting.	Facilities and MEP assignments
Brian Simpson	Site Superintendent	Commercial roofing and field-supervision experience; site workflow and trade coordination.	Field-intensive assignments
Broderick Mondy	Quality Control / Cost and Risk Manager	Commercial renovations, estimating, risk, financial tracking, subcontractor schedules and quality.	QA/QC and cost-control assignments
Freeman Frazier	Assistant PM / Electrical and Facilities Coordinator	Electrical/mechanical systems, service-order estimating, safety, maintenance and government facility support.	Electrical/MEP and field support
Energize with Sunrise LLC / James Blakely	Licensed Electrical and Solar Technical Partner	Texas Electrical Contractor No. 38819; commercial AC/DC, LOTO, transformers, generators and commissioning.	Electrical/solar task orders
PPM Plumbing / Charles McClain	Texas-Licensed Plumbing Systems Partner	Responsible Master Plumber License No. M-36331; commercial and residential plumbing, gas lines, pipe repair, water heaters, jetting and 24/7 response support.	Plumbing, domestic water, sanitary, gas-line and utility-related task orders
Discipline-Specific Texas PE	Professional Engineer assigned by task order	Civil, structural, mechanical, electrical, plumbing or utility discipline selected to match project.	Assigned before engineering services begin

Task-Order Professional Engineering

Tango BOS maintains access to qualified Texas-licensed Professional Engineers through its professional consultant and teaming network. Because assignments under this continuing contract may vary significantly in technical discipline, the appropriate engineer will be selected based on each project's specific requirements. No professional engineering services will be performed without oversight by the properly licensed Texas Professional Engineer responsible for that discipline.

Team Accountability

- Natalia Trota remains the City's executive escalation point and contract authority.
- The assigned Project Manager maintains day-to-day responsibility for scope, schedule, cost, communication and deliverables.
- Licensed professionals are responsible for services within their regulated disciplines.
- The Site Superintendent controls field coordination and daily reporting when an assignment requires continuous site presence.
- The Quality Control Manager maintains inspection, deficiency, testing and closeout controls independent of production pressure.

06 PROJECT DELIVERY AND CONSTRUCTION MANAGEMENT APPROACH

Tango BOS will prepare a task-order-specific Project Execution Plan within the timeframe established by the City. The plan will identify the scope baseline, responsible personnel, deliverables, schedule, budget controls, risks, communications and closeout requirements.

1. Assignment Confirmation - Review the task order, confirm the City's objectives, define the decision-making structure, establish file protocols and identify regulatory or operational constraints.
2. Existing Conditions and Risk Review - Review reports, surveys, drawings, tests, utilities, facility conditions, hazardous-material information and operational requirements; establish a risk register with owners and due dates.
3. Scope, Design and Constructability - Coordinate with the City and professional consultants; document scope decisions; review phasing, access, maintainability, safety, long-lead items and constructability.
4. Budget and GMP Development - Prepare progressive estimates, alternates, allowances, contingencies and value-engineering recommendations; reconcile design changes and document the basis of estimate.
5. Procurement and Bid Management - Package scopes, develop bid instructions, conduct outreach and pre-bid meetings, answer questions, level bids and provide documented award recommendations.
6. Construction Administration - Conduct meetings, issue minutes, manage submittals/RFIs, maintain daily reports, monitor schedule/cost/quality/safety, coordinate inspections and track decisions.
7. Change Management - Require written scope definition, entitlement review, cost and schedule impact, supporting documentation and City approval before incorporating changes.
8. Closeout and Warranty - Drive punch-list completion, reconcile records, coordinate training, obtain manuals/as-builts/warranties, conduct final inspections and maintain warranty tracking.

Control	Primary Record	Management Purpose
Scope	Scope matrix / decision log	Prevent gaps, overlaps and unauthorized work.
Schedule	Baseline, update and look-ahead schedules	Identify critical activities and near-term constraints.
Cost	Budget report, commitment log and forecast	Show current commitments, exposure and projected final cost.
RFIs / Submittals	Aging logs with required response dates	Prevent design decisions from delaying procurement or fieldwork.
Quality	Preparatory checklists, inspection log and deficiency log	Verify requirements before work is concealed or accepted.
Safety	JHAs, observations and corrective-action log	Identify and correct hazards before incidents occur.
Change	Potential change and approved change logs	Document entitlement, value, schedule effect and approval status.
Closeout	Deliverable matrix and punch-list log	Drive complete, timely turnover and warranty readiness.

07 ABILITY TO MEET SCHEDULES AND DEADLINES - 30 POINTS

Control Point	Timing	Required Action	City Visibility
Baseline Schedule	At task-order start	Confirm work breakdown, logic, durations, milestones, procurement and inspections.	Baseline approval and milestone summary.
Six-Week Look-Ahead	Updated weekly	Identify constraints, submittals, deliveries, manpower and City decisions.	Weekly meeting review.
Two-Week Work Plan	Updated weekly	Confirm daily field activities and responsible parties.	Near-term action list.
Procurement Log	Weekly	Track long-lead items from design selection through delivery.	Exceptions highlighted.
RFI/Submittal Aging	Weekly	Prioritize items approaching required response dates.	Aging dashboard.
Milestone Variance	Weekly/monthly	Compare actual and forecast dates to baseline.	Variance and recovery narrative.
Recovery Schedule	When threshold exceeded	Add resources, resequence work, adjust shifts or expedite materials subject to City approval.	Formal corrective-action plan.
Executive Escalation	When unresolved risk threatens milestone	Elevate issue, decision required and consequence of delay.	Written decision memorandum.

Early-Warning Indicators

- Critical or near-critical activity variance
- Late design decision, permit or inspection
- Submittal/RFI aging beyond required response date
- Material lead time exceeding available float
- Insufficient manpower or production rate
- Unresolved utility, access or shutdown coordination
- Repeated quality deficiency or failed testing
- Potential change without timely scope or approval

Corrective-Action Process

9. Verify the cause and responsible party using current records.
10. Quantify the schedule effect and available float.
11. Develop practical options: resequencing, added manpower, alternate material, extended shifts, partial release, expedited review or phased turnover.
12. Evaluate cost, safety, quality and operational impacts before recommending action.
13. Obtain required City decisions and document the approved recovery plan.
14. Track recovery actions daily until the milestone is protected or a revised date is formally authorized.

Schedule Principle

No acceleration strategy will override safety, code compliance, quality requirements or the City's operational constraints. Recovery recommendations will be transparent about cost, risk and feasibility.

08 STAFFING, AVAILABILITY AND SURGE CAPACITY

The City specifically requests an approach to part-time staffing for smaller assignments. Tango BOS will use a three-tier model that matches labor to the assignment without losing leadership continuity.

Assignment Type	Typical Staffing	Service Pattern	Controls
Small / Advisory	Principal-in-Charge, part-time PM, discipline specialist as needed.	Scheduled meetings, document review and milestone deliverables.	Action log, schedule and written recommendations.
Moderate / Active Project	PM, part-time construction manager/QCM, scheduled field visits, technical specialists.	Weekly coordination with increased presence during critical work.	Full project controls and inspection tracking.
Large / Field-Intensive	Dedicated PM, superintendent, QCM, document control and technical specialists.	Continuous or near-continuous field coverage as directed.	Daily reports, meetings, schedule/cost/quality/safety controls.

Mobilization and Continuity

- A task-order staffing plan will identify the primary and backup individual for each critical role.
- Specialists will be activated only when the scope requires their discipline, reducing unnecessary cost.
- For sustained Edinburg assignments, Tango BOS will establish a project-specific local reporting location or field office.
- Meeting coverage, planned leave and emergencies will be addressed through named backups and centralized document control.
- No proposed key person will be replaced without City notification and an equally or more qualified replacement, subject to contract requirements.

09 RELEVANT GOVERNMENT AND CONSTRUCTION EXPERIENCE

Project	Customer / Value / Period	Role	Relevance to Edinburg
Facility Management and Stairwell Renovation	J&J Worldwide Services, San Antonio MTC | $121,068.28 | July 31-August 14, 2023	Prime Contractor / Project Management and Facility Support	Facility renovation and support including eyewash stations, stairwell renovation/painting, handrail restoration, dust control, barriers, daily cleanup and OSHA/NFPA/federal facility compliance. Relevant to occupied facility work, safety controls, trade coordination and fast-turnaround assignments.
Replace Bottle Filler / Water Fountains, B899	J&J Worldwide Services | $30,068.28 | June 10-August 7, 2023	Prime Contractor / Installation Contractor	Removed outdated water fountains and installed new filtered water fountains with bottle fillers across multiple floors. Relevant to plumbing/facility upgrades, installation coordination, code compliance, materials and turnover.
Containerized Ice Making System FA301624Q0052	AETC / JBSA-Lackland | $257,599.57 | 2024	Prime Contractor / Procurement and Project Coordination	Provided a high-capacity deployable ice production system with power, water filtration, generator and pump systems; managed long-lead procurement and documentation. Relevant to schedule risk,

Project	Customer / Value / Period	Role	Relevance to Edinburg
			supplier coordination and government communication.
WHASC Medical Lab Cabinets FA301624Q5018	Wilford Hall Medical Center / JBSA-Lackland AFB | $39,498.52 | 2024	Prime Contractor / Project Management, Procurement, Delivery, QA and Installation Oversight	Managed procurement, field verification, finish coordination, delivery, stakeholder communication and quality assurance for medical laboratory cabinetry. Relevant to federal healthcare settings, quality control and finish coordination.
VA Housing Kitchen and Bathroom Renovation	VA Housing - Dallas | $125,000 | period to be confirmed	Prime Contractor	Full renovation of kitchens and bathrooms including demolition, fixtures, tiling, plumbing and finishes. Relevant to renovation, occupied housing improvements and multi-trade coordination.
Energize with Sunrise - 840 South Freeway Solar Removal and Replacement	Fort Worth, Texas | 2025 | approx. 180 modules removed / 186 installed	Licensed Electrical / Solar Technical Partner	Commercial PV decommissioning and replacement with LOTO/electrical isolation, AC/DC work, public protection, testing and recommissioning. Relevant to electrical construction, safety, logistics and commissioning.

11 PREVIOUS EXPERIENCE WITH THE CITY OF EDINBURG - 10 POINTS

Tango BOS has not identified a completed direct contract with the City of Edinburg as of this proposal. The firm will not imply prior City experience that cannot be documented. Instead, Tango BOS will reduce onboarding risk through a City-specific kickoff process, clear communication, and documented compliance with City procedures.

Direct City Experience

How Tango BOS Will Overcome the Learning Curve

- Conduct a contract kickoff with Engineering, Purchasing and stakeholders to confirm standards, workflows, approval authority and reporting expectations.
- Create a City-specific procedures matrix covering design standards, permitting, bid procedures, records, invoices, inspections, closeout and public-information considerations.
- Review applicable International Building Code requirements, the Unified Development Code and City Engineering Design Standards before starting each assignment.
- Use a decision log and responsibility matrix so City staff can quickly identify open items and accountable parties.
- Establish local field coordination and maintain consistent communication with the assigned City Project Manager.
- Apply transferable federal and government-facility experience involving formal documentation, safety, quality, occupied facilities and regulated procurement.

12 INSURANCE, AGREEMENT AND COMPLIANCE STATEMENTS

Tango BOS understands that the selected firm must maintain the insurance required by the City, provide acceptable certificates and endorsements, name the City as an additional insured where required, and maintain coverage for the contract term. Professional consultants will be required to maintain coverage appropriate to their regulated services.

Requirement Area	Tango BOS Response
Workers' Compensation / Employers' Liability	Will maintain coverage required by statute and the City's Professional Services Agreement.
Commercial General Liability	Will provide COI and required additional-insured endorsement where required by contract.
Commercial Automobile Liability	Will provide coverage evidence consistent with City requirements.
Professional Liability	Professional design and engineering consultants will maintain professional liability coverage appropriate to their regulated services.
Professional Services Agreement	Tango BOS acknowledges the City's sample agreement and will enter into the final agreement if selected, subject to any mutually accepted clarifications or exceptions.
Required OpenGov Forms	Tango BOS will complete required conflict, general questionnaire, litigation, HB 89, SB 13, SB 19, non-collusion, CIQ, Form 1295 if awarded, addenda acknowledgments and COI uploads.
Licensed Trade Partners	Tango BOS will use properly licensed and insured specialty trade partners for regulated trade work, including plumbing, electrical, mechanical, and other task-order-specific scopes.

13 CLOSING COMMITMENT

Tango BOS offers the City of Edinburg a practical combination of executive accountability, government operations experience, construction and facility-management expertise, Texas-licensed architectural support, discipline-specific engineering access, and specialty capabilities in MEP, plumbing, roofing, electrical work, quality control and field supervision.

Our approach is designed for the City's continuing-contract environment: maintain a stable core team, assign only the disciplines required by each task order, provide transparent controls and escalate issues early. The City will receive clear records, direct communication and a team focused on protecting public funds, operational continuity, quality and schedule.

Tango BOS respectfully requests the opportunity to serve on the City's rotation list and to demonstrate its capabilities through responsive, well-managed assignments.

Respectfully submitted,

Natalia Trota, MBA, Retired USAF

A KEY PERSONNEL RESUMES

Natalia Trota, MBA, Retired USAF

Principal-in-Charge / Program Executive

Professional Profile

Business executive and project-management leader with more than 20 years of experience in government, healthcare management, business operations, process improvement, compliance, risk management and vendor coordination. As CEO of Tango BOS, she provides executive oversight, client accountability, subcontractor coordination and strategic direction for government and construction-related projects.

Core Qualifications

Qualification Area	Qualification Area
Executive program and project oversight	Federal contract administration and procurement
Schedule, budget, risk and resource management	20 years of U.S. Air Force service
Facility and healthcare operations	Audits, inspections and quality assurance
Vendor and subcontractor management	OSHA 10 and public-trust document verification

Selected Relevant Experience

Organization / Project	Role / Period	Relevant Responsibilities and Results
DPTV Tango, LLC DBA Business Operation Solutions	CEO / Program Manager | 2019-Present	Leads the SDVOSB/WOSB prime contractor; manages contracts, proposals, NDAs, subcontracts, modifications, pricing, procurement, vendor performance, schedules, deliverables, invoicing, risk and client communication across government, healthcare, construction and facility assignments.
Defense Contract Management Agency (DCMA), DoD	Management Analyst / Contract Compliance Support | 2019-2020	Supported compliance, governance, risk mitigation, audit readiness, inspections, security protocols, KPI reporting, workforce planning and training for operations serving more than 300 personnel; tracked milestones, records and escalations.
Tripler Army Medical Center, Department of the Army	Supervisory Health System Specialist | 2017-2019	Managed regulated healthcare operations, staffing, budgets, credentialing, billing and vendor coordination. Conducted 50+ audits, inspections, SLA reviews and compliance checks; supported accreditation readiness and recovery of more than $100,000 in billing discrepancies.
United States Air Force	Healthcare and Operations Leader | 20 Years of Military Service	Supervised teams of up to 300 personnel across multiple medical facilities; directed quality assurance, inspection readiness, workforce planning, records and process improvement. User-reported achievements include approximately $20 million in government savings.
Texas Notary Public / Remote Online Notary	Commissioned Public-Trust Professional | Current	Provides identity verification, document witnessing, execution control, records accuracy and secure public-facing services. This complements military, federal and healthcare audit, inspection and compliance experience.

Education: MBA, University of Phoenix; B.S., Business Administration, Wayland Baptist University; B.S., Health Administration, Wayland Baptist University; A.S., Allied Health Science	**Certifications / Credentials:** OSHA 10; Texas Notary Public; Texas Remote Online Notary; Salesforce/CRM certification and experience; Certified Medical Billing & Reimbursement; TeamSTEPPS leadership training; Resilient Leadership training
Availability / Assignment: Core executive for all task orders; available for kickoff, executive reviews, City leadership meetings, risk escalation, contract decisions and performance oversight.	**Proposal Positioning:** Provides role-specific support to help the City control scope, schedule, cost, quality, risk, communication, and closeout deliverables.

Anthony Overstreet

Senior Project Manager

Professional Profile

Commercial construction project manager with approximately 13 years of reported experience coordinating roofing, remodeling, deliveries, field labor, workflow sequencing and communication among site leadership and specialty trades. Proposed to lead day-to-day construction management assignments.

Core Qualifications

Qualification Area	Qualification Area
Commercial construction project management	Roofing and remodeling
Work sequencing and delivery coordination	Labor and subcontractor coordination
Daily field communication	Schedule and workflow management
Trade-interface management	Problem escalation

Selected Relevant Experience

Organization / Project	Role / Period	Relevant Responsibilities and Results
TX Morrow Construction - Roofing Portfolio	Project Management | 2021-2025	Coordinated roofing work involving shingles, TPO, PVC and metal; managed deliveries, labor accountability, workflow sequence and communication with specialty trades. Reported portfolio value: approximately $2 million.
Stanford Luxury Homes - Roofing	Project Manager | 2026	Reported management of roofing work with field sequencing, staffing and coordination. Reported project value: approximately $4 million.
Hyatt Place - Gutters, Fascia and Soffit	Project Manager | 2026	Coordinated material deliveries, labor and field workflow for a reported $26,000 project.

Education: Commercial construction experience; additional education information may be provided upon City request.	**Certifications / Credentials:** Trade and manufacturer credentials to be provided as applicable by task-order scope.

RE: RFQ 2026-3 – Real Estate Appraisal Services

Dear Mr. Hinojosa:

On behalf of Dugger, Grafe, Swanson, Inc., dba Valbridge Property Advisors | San Antonio | Austin | Dallas-Fort Worth, I am pleased to submit this Statement of Qualifications in response to the City of Edinburg's Request for Qualifications (RFQ 2026-3) for professional real estate appraisal services in accordance with Texas Government Code, Chapter 2254.

For more than 50 years, Valbridge Property Advisors has provided independent commercial real estate appraisal and advisory services to municipalities, counties, state and federal agencies, financial institutions, attorneys, and private organizations throughout Texas. We appreciate the opportunity to be considered for inclusion on the City of Edinburg's rotation list of qualified real estate appraisal professionals. Our firm is uniquely qualified to provide independent, USPAP-compliant valuation services supporting property acquisitions, easement valuation, lease analysis, financial reporting,

strategic planning, and other municipal real estate decisions requiring objective, well-supported opinions of value in accordance with the Scope of Services.

This Statement of Qualifications presents our firm's qualifications and experience, key personnel, technical approach, project management philosophy, organizational structure, and supporting documentation demonstrating our ability to successfully perform the requested appraisal services.

We appreciate your time and consideration and welcome the opportunity to serve the City of Edinburg. Should you have any questions or require additional information, please do not hesitate to contact me.

Respectfully submitted,

Paul P. Grafe, MAI, CCIM
Senior Managing Director

Understanding the City's Objectives

Supporting the City's Real Estate Decision-Making

Valbridge Property Advisors | San Antonio | Austin | Dallas-Fort Worth understands that the City of Edinburg is establishing a qualified rotation list of appraisal professionals to provide timely, objective, and defensible valuation services that support a wide range of municipal initiatives. We recognize that these assignments may include property acquisitions, easement valuation, lease analysis, financial reporting, strategic planning, and other appraisal services essential to the City's continued growth and responsible management of public assets.

Real estate decisions made by public agencies require more than an opinion of value; they require credible analyses that withstand regulatory review, support sound financial stewardship, and provide elected officials and staff with the confidence to make informed decisions. Our role is to deliver independent valuation services that are technically rigorous, clearly communicated, and responsive to the City's project objectives, schedules, and reporting requirements.

Delivering Responsive, Reliable Service

Municipal projects often involve multiple stakeholders, evolving priorities, compressed timelines, and heightened public accountability. Valbridge has developed project management processes specifically designed to meet these demands. We assign experienced appraisers, maintain proactive communication throughout each assignment, and provide the staffing flexibility necessary to respond to changing project needs without compromising quality or delivery schedules.

Our team of experienced appraisers have extensive experience serving municipalities, counties, state agencies, federal agencies, utility providers, and public institutions throughout Texas. This experience enables us to quickly assemble the appropriate appraisal team for each assignment while providing consistent project oversight, responsive client service, and dependable turnaround times.

Technical Excellence Through Independent Valuation

Every assignment performed by Valbridge is completed in accordance with the Uniform Standards of Professional Appraisal Practice (USPAP) and all applicable federal, state, and local requirements. Our quality assurance program incorporates senior-level technical review, rigorous market analysis, and standardized internal procedures to ensure each appraisal is well-supported, defensible, and tailored to the intended use of the assignment.

As one of the nation's largest independent commercial real estate appraisal organizations, Valbridge combines the resources of a national platform with the responsiveness and market knowledge of a locally owned Texas office. Because we operate independently of brokerage and investment interests, our clients receive objective analyses free from conflicts of interest thus providing the City of Edinburg with valuation services it can rely upon for acquisition, planning, financial reporting, and long-term decision-making.

We recognize that consistency, responsiveness, and timely delivery are essential for firms serving on an on-call rotation list, where assignments may vary in complexity, scope, and schedule throughout the contract term.

We appreciate the opportunity to partner with the City of Edinburg and are committed to delivering the professionalism, technical expertise, and responsive service necessary to support the City's real estate objectives throughout the term of this contract.

Company Qualifications & Experience

Valbridge Property Advisors | San Antonio | Austin | Dallas-Fort Worth *(Dugger, Grafe, Swanson, Inc.)*
Established 1974

Firm Overview

Valbridge Property Advisors | San Antonio | Austin | Dallas-Fort Worth has provided commercial real estate valuation and consulting services for more than 50 years across Texas and neighboring states. Headquartered in San Antonio, our firm is composed of a team of appraisers with deep, market-specific expertise across the regions we serve. Our professionals maintain strong academic backgrounds and specialized continuing education. The structure and size of our office enable us to provide personal attention, staffing continuity, and cost-efficient delivery—advantages not commonly found in other commercial real estate appraisal firms.

Valbridge Property Advisors | San Antonio | Austin operates independently of brokerage companies, ensuring unbiased, conflict-free valuation services aligned with industry best practices and regulatory standards. As part of one of the largest commercial appraisal firms in the United States, we combine local insight with national resources.

Professional Licensure & Affiliations

Our firm's Directors carry the MAI designation, and are Certified General Appraisers in the State of Texas, and our personnel meet or exceed required continuing education standards.

Team members maintain affiliations with the following organizations:

- Appraisal Institute
- American Society of Real Estate Counselors

Capacity to Perform (Technical Approach)

Capacity to Perform the Scope of Services

Valbridge Property Advisors | San Antonio | Austin has the staffing, experience, and infrastructure necessary to perform the full Scope of Services for appraisal and valuation assignments of all sizes, including high-volume or time-sensitive government projects. Our office employs **14 State Certified General Appraisers**, **7 designated appraisers** (MAI, ARA, CCIM, CRE) and **8 Appraiser Trainees**, supported by dedicated administrative and research personnel. This staffing depth provides the ability to manage concurrent assignments, maintain continuity, and ensure timely delivery across all project phases.

Our firm has extensive experience serving **local, state, and federal agencies**, including the U.S. Army Corps of Engineers, U.S. Department of the Interior (AVSO), Department of the Navy, U.S. Attorney's Office, numerous South Texas counties, and HUD-funded CDBG-DR/CDBG-MIT programs. This background ensures that our team can meet the technical, regulatory, and documentation requirements outlined in the Scope of Services.

Proposed Approach & Strategy

Our approach is built on a structured, defensible appraisal methodology aligned with USPAP, HUD, GLO, and other relevant federal guidelines. Our strategy includes:

1. **Initial Project Review & Coordination**
    - Confirm project parameters, timelines, deliverables, and reporting standards.
    - Identify unique regulatory or jurisdictional requirements.
    - Establish communication expectations with the assigned project manager.
2. **Data Collection & Market Analysis**
    - Conduct site inspections, highest-and-best-use analyses, and market research.
    - Leverage Valbridge's national and regional comparable sales database.
    - Utilize local appraisers familiar with the submarket to ensure accuracy and credibility.
3. **Valuation & Report Development**
    - Apply appropriate valuation methodologies (sales comparison, cost, income) based on property type and assignment.
    - Conduct internal peer review to ensure compliance and consistency.
    - Produce USPAP-compliant reports tailored to client formatting and documentation needs.
4. **Delivery, Review & Ongoing Support**

- Meet required deadlines with the ability to expedite assignments when necessary.
- Provide clarification, testimony, or supplemental analysis upon request.
- Maintain full electronic and physical recordkeeping consistent with federal and state standards.

Equipment & Products to Be Used

Valbridge Property Advisors | San Antonio | Austin maintains modern technology and tools to ensure efficient and accurate appraisal production:

- **Hardware:**
  - Current-generation Windows-based workstations and laptops (within 1–4 years old).
  - High-resolution GPS-enabled mobile devices for field inspections.
  - Commercial-grade scanners and printers for high-volume document production.
- **Software / Systems:**
  - Industry-standard appraisal software (Datappraise, and Adobe products).
  - Geographic Information Systems (GIS), ArcGIS, county appraisal district systems.
  - Valbridge's proprietary national comparable data platform.
  - Microsoft 365 for secure communication, tracking, and document management.

All electronic deliverables are produced using secure cloud-based systems and stored in compliance with client and federal guidelines.

Project Management Philosophy

Mission, Vision & Corporate Values

Mission:

To provide independent, accurate, and timely commercial real estate valuation and advisory services that empower clients to make informed decisions.

Vision:

To be the most trusted and respected source of commercial property valuation in the markets we serve, delivering expert analysis through integrity, independence, and professional excellence.

Core Values:

- **Integrity:** Maintain objectivity, independence, and ethical conduct.
- **Excellence:** Produce defensible, high-quality valuation work supported by rigorous research and the most current market data.
- **Responsiveness:** Communicate clearly, meet deadlines, and adapt to client needs.
- **Professionalism:** Uphold industry standards and continually advance expertise.
- **Collaboration:** Utilize team-based knowledge sharing to enhance accuracy and consistency.

Philosophy Toward High-Volume, Deadline-Driven Projects

Valbridge Property Advisors | San Antonio | Austin's philosophy is to deliver consistent, reliable work through efficient workflows, clear communication, and depth of staffing. Our firm has a proven history of completing large-scale, multi-parcel, and federally funded assignments requiring rapid turnaround, strict compliance, and frequent coordination with multiple stakeholders.

We achieve this by:

- Assigning a dedicated project manager for centralized communication.
- Distributing work across a team of certified appraisers for efficiency.
- Utilizing standardized templates and internal checklists to maintain uniformity.
- Conducting internal peer review to ensure accuracy and compliance.
- Maintaining flexibility in staffing to expand or realign resources when needed.

Communication, Responsiveness & Conflict Resolution

Our firm emphasizes clear, timely communication through scheduled updates, prompt email responses, and a single point of contact for the client. We proactively address potential issues by:

- Identifying risks early and proposing solutions before they impact timelines.
- Maintaining open, honest communication with project partners and stakeholders.
- Providing defensible analysis supported by data to minimize disputes.

- Offering expert-witness support when assignments require litigation or testimony.

Quality Assurance, Scheduling Flexibility & Budget Oversight

Quality assurance is maintained through a multi-layer review system that includes:

- **Primary appraisal review** by a senior or designated appraiser.
- **Secondary compliance review** for USPAP, HUD/GLO, or agency-specific requirements.
- **Document control protocols** to ensure version integrity and secure storage.

Scheduling flexibility is enhanced by our staffing capacity, allowing us to adjust workload distribution based on deadlines or surges in assignment volume. Budget oversight is managed through transparent fee structures, detailed scope alignment, and communication regarding any anticipated changes.

Mitigation of Impacts to Existing Infrastructure/Improvements

Our appraisers conduct site inspections and valuations with minimal disruption to property owners and existing improvements. This includes:

- Coordinating inspection schedules with property managers or occupants.
- Using non-invasive, photography-based documentation techniques.
- Ensuring ADA compliance, safety considerations, and respect for ongoing operations.
- Providing advance notice and obtaining access permissions in compliance with agency guidelines.

Quality Control & Quality Assurance for CE&I Professional Services

For assignments requiring CE&I-related oversight, Valbridge Property Advisors | San Antonio | Austin applies the same stringent QC/QA processes used in all federally funded appraisal assignments:

1. **Defined Standards & Checklists** – USPAP, HUD, GLO, FEMA, and FHWA requirements.
2. **Internal Peer Review** – All reports undergo review by a certified Senior Managing Director.
3. **Subconsultant Oversight** – If subconsultants are used (rare for valuation services), their work is reviewed for accuracy, regulatory compliance, and consistency with Valbridge Property Advisors | San Antonio | Austin' standards.
4. **Performance Tracking** – Documentation of turnaround times, revisions, and deliverable milestones.
5. **Documentation & Audit Readiness** – All assignments are stored in accordance with federal audit and retention requirements.

Valbridge Property Advisors – Organizational Chart

Valbridge Property Advisors operates as a **national franchise network** of independent, locally owned commercial appraisal firms supported by a central corporate entity. The organizational structure is **federated**, not hierarchical, with national leadership providing governance and shared services while local offices maintain operational autonomy.

CONFLICT OF INTEREST DISCLOSURE

CONFLICT OF INTEREST
DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____

Grafe, MAI, CCIM, the undersigned representative of DUGGER GRAFE SWANSON INC. dba Valbridge Property Advisors | San Antonio | Austin, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST DISCLOSURE

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

Education

- *Bachelor of Science Degree in Agricultural Economics* with a specialization in Real Estate – Texas A&M University; May 1985

Specialized Education

Received credit for the following courses sponsored by the Appraisal Institute, American Society of Farm Managers and Rural Appraisers, Commercial Investment Real Estate Institute and International Right-of-Way Association:

- Separating Real, Personal and Intangible Value, Appraisal Institute
- Standards of Professional Practice Part C
- Business Practices and Ethics
- Advanced Applications, Appraisal Institute
- Decision Analysis for Commercial Investment Real Estate (CI 301)
- Market Analysis for Commercial Real Estate (CI 201)
- Advanced Resource Appraisal (A-34)

Completed all core courses under the American Institute of Real Estate Appraisers required for the MAI designation, 1984-1988. During his education at Texas A&M University, he completed 18 hours of core real estate courses.

Designations/Certifications

- Accredited Member, Appraisal Institute, Certificate No. 8582, MAI; October 1990
- Member, Commercial Investment Real Estate Institute, Certificate No. 8330, CCIM; November 1998
- State Certified General Real Estate Appraiser; State of Texas; Certification No. TX-1320847-G; November 2017
- State Certified General Real Estate Appraiser; State of New Mexico; Certification No. 03585-G; November 2017.
- Texas Real Estate Broker; License No. 0354271; 1992

Experience

Presently and since 1985, Paul P. Grafe has been engaged in independent real estate fee appraisal and consultant work. Presently, he is Senior Managing Director of Valbridge Property Advisors | San Antonio and Austin. He has qualified as an expert witness and testified for real estate related matters in County, District, and Federal Courts.

Other business interests have included Alamo Fiesta Recreational Vehicle Resort, Boerne, Texas, and ranching registered Angora and Boer Goats. Mr. Grafe has served as an officer on the boards of a number

of civic and education related organizations. He has been active in coaching youth sports and is involved with several FFA and 4-H programs.

Real Estate Specializations

Clients served include corporations, law firms, accounting firms, individuals, financial institutions, mortgage lenders, conduit lenders, governmental agencies, developers and estates.

- Mixed use developments
- Office
- Multi-family
- Retail
- Hotel
- Industrial
- Special purpose properties including resort hotels and developments, retirement communities, nursing homes, golf courses, aircraft hangars, and micro processing facilities.
- Recreational and working ranches in Texas, Colorado and Wyoming
- Small grain farms
- Mushroom farms
- Fertilizer plants
- Nurseries

Paul has developed specializations in the appraisal of multi-family and retail properties as well as appraisal related to condemnation. Additionally, he developed a specialization in litigation valuation especially related to ad valorem tax and condemnation appraisal. In addition to valuation and counseling on real property, he has completed appraisals dealing with many types of equipment and rolling stock.

Generally, his trade area encompasses the State of Texas; however, Mr. Grafe has had the opportunity to complete a number of appraisals throughout the United States over the last fifteen years. These assignments varied in property type to include multi-family, credit leased properties (i.e., CVS Drugstores, Eckerd Drugstores, IHOP Restaurants, etc.), retail, office and industrial. Appraisals have been made in the states of Arkansas, California, Colorado, Indiana, Illinois, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Mississippi, New Mexico, New Hampshire, North Carolina, Oklahoma, Pennsylvania, South Carolina, and Wyoming. Appraisal assignments have also been completed in the Republic of Mexico and Puerto Rico. Appraisals in Mexico have been completed in the states of Tamaulipas, Guanajuato, Nuevo Leon, Mexico, Baja California, Chihuahua, and Sinaloa. The emphasis of these assignments has been industrial and resort properties.

From May 1985 to December 1988, Mr. Grafe was employed as an associate appraiser for Noble, Glen & Associates, Inc. From October 1984 to May 1985, he was employed part time for Brazosland Appraisals in Bryan, Texas as a residential market research intern.

Experience

Presently and since April 2014, Mitchell has been employed by Valbridge Property Advisors | San Antonio. He currently serves as a Director for the firm.

From 2007 to 2014, he worked as a commercial real estate appraiser in Corpus Christi with American Appraisers, Inc. and as a partner with the appraisal firm Smith, Kirkpatrick, & Klager, LLC.

Real Estate Specializations

Experience includes assignments as both an appraiser and a consultant in relation to various uses of real estate including: right-of-way/eminent domain, retail (regional shopping center and net leased retail), multi-tenant/single-tenant office, medical offices, multi-family, self-storage facilities, automobile dealerships, hotel/hospitality, RV parks, subdivision analysis, Yellow Book (UASFLA), contaminated land (super fund), industrial uses including: cold storage, transload (truck/rail) facilities, grain storage facility, and warehousing, air rights analysis, undivided interests, cost segregation; other special-purpose projects have included a naval-air station, an operating landfill, an armory, and a public utility. Mr. Kirkpatrick has completed assignments in the context of litigation and has served as an expert witness.

Mr. Kirkpatrick's trade area is San Antonio south to Victoria, Laredo, Corpus Christi, and the Rio Grande Valley; the Texas Hill Country, Austin, West Texas (particularly the Permian Basin region), and New Mexico are also activity areas. Appraisals have also been conducted by Mr. Kirkpatrick in California, Arizona, and Florida. Clients served include attorneys, businesses, financial institutions, governmental agencies, individuals, and non-profit organizations.

In the early-to-mid 2000's, Mr. Kirkpatrick worked as a Certified Public Accountant in the taxation and audit departments for the firms Flusche, Van Beveren, and Kilgore (FVBK), P.C. and G.F. Valdez and Company, in Corpus Christi.

312 E. Harrison Avenue,
Suite B
Harlingen, Texas 78550

Dear Mr. Hinojosa and Selection Committee:

Freese and Nichols, Inc. (FNI) is pleased to submit our Statement of Qualifications to provide Project Management Services for the City of Edinburg (City). We appreciate the opportunity to be considered for this on-call contract and are committed to delivering responsive, high-quality project management services that help the City successfully deliver capital improvement projects of every size and complexity.

With a full-service office in Harlingen, just minutes from Edinburg, FNI combines the accessibility of a local partner with the resources of one of Texas' most experienced engineering and program management firms. Our professionals have successfully managed projects throughout the Rio Grande Valley and surrounding counties, providing us with a strong understanding of the region's infrastructure needs, permitting processes and stakeholder expectations. FNI offers the City several key advantages:

Local Presence and Responsiveness. Our Harlingen office allows us to provide prompt on-site support, attend meetings on short notice and maintain close communication throughout every assignment.

Comprehensive Project Management Experience. From project initiation through closeout, FNI provides budgeting, scheduling, procurement support, design coordination, construction administration, quality management and stakeholder communication for municipal capital improvement programs.

Proven Municipal Partner. For more than 132 years, FNI has helped Texas communities deliver critical infrastructure safely, efficiently and on schedule. Our scalable team combines local leadership with statewide technical resources to meet the needs of projects of any size.

Firm Information

Full Firm Name: Freese and Nichols, Inc.

Address: 312 E. Harrison Avenue, Suite B, Harlingen, Texas 78550

Legal Status of Respondent: Corporation

State of Incorporation: Texas

Fax: N/A

Primary Point of Contact

Name/Title: Alfredo (Fred) Resendez, PE/Construction Manager

Physical Address: 312 E. Harrison Avenue, Suite B, Harlingen, Texas 78550

Phone: 956-937-3137 (office); 956-873-1203 (mobile)

Email: fred.resendez@freese.com

Secondary Point of Contact

Name/Title: Moses Ahmadi, PMP/ Project Manager

Physical Address: 9601 McAllister Freeway, Suite 1008, San Antonio, Texas 78216

Email: moses.ahmadi@freese.com

At FNI, we believe successful project management means more than delivering projects, it means serving as a trusted advisor who proactively manages risk, communicates effectively and keeps projects moving forward. We look forward to partnering with the City of Edinburg to help deliver infrastructure that serves the community for years to come.

FNI has reviewed the Professional Services Agreement and confirms that the firm can meet the prerequisite insurance requirements. If selected, FNI is prepared to negotiate and enter into the Professional Services Agreement in a form mutually acceptable to both parties.

Thank you for your consideration. We appreciate the opportunity to submit our qualifications and look forward to the opportunity to serve the City of Edinburg.

Sincerely,

Chris Trevino, PE, CCM* | Principal

Commitment to Quality

Our commitment to quality and continuous improvement has been recognized nationally, with FNI twice receiving the **Malcolm Baldrige National Quality Award**. We're the first engineering/architecture firm so honored. The Baldrige program is a public-private partnership through the U.S. Department of Commerce that recognizes organizations for national leadership in performance excellence.

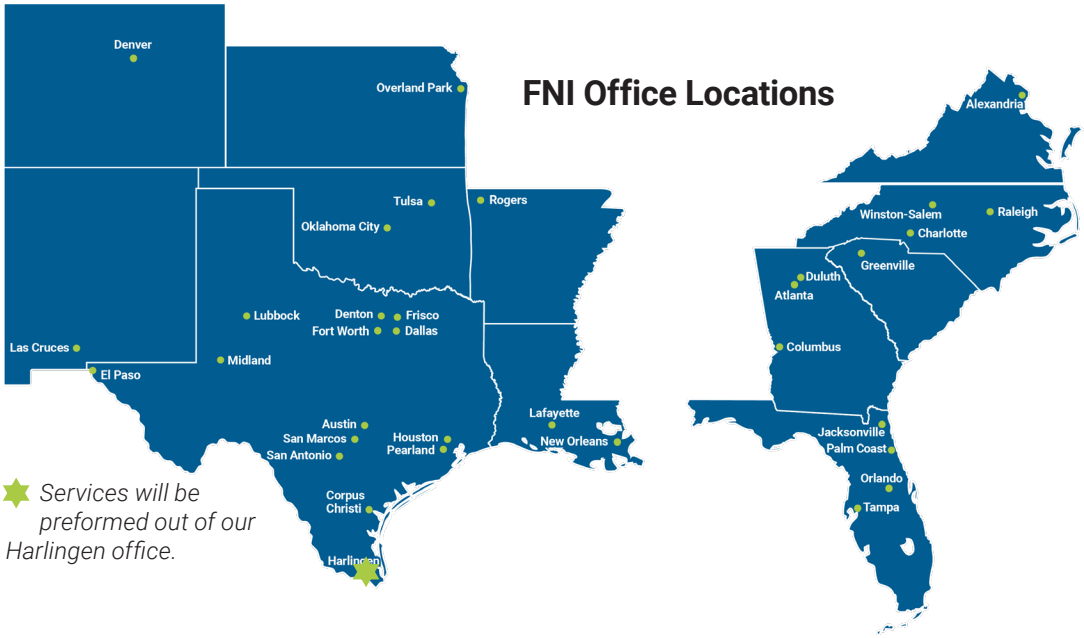
For nearly three decades, our firm has applied the Baldrige program's integrated management framework and assessment tools to improve practices and measure results, strengthening our business so we can continue delivering exceptional client service.

01

Overall Qualification of Team

Firm History and Overview

FNI is a client-focused, regionally based firm with national expertise. We meet client needs with responsiveness and flexibility. Dating back to our firm's founding in 1894, we put relationships first — clients, teaming partners and staff — and seek long-term relationships, many of which are counted in decades, not years.



FNI provides a broad range of services to plan, design and manage public infrastructure projects. We help our clients through every stage of the project life cycle: planning, design, program management, funding procurement, regulatory compliance, construction management and operations and maintenance. Our project teams are known for exceeding client expectations through innovative concepts and high-performing designs.

FNI Office Locations

Services will be preformed out of our Harlingen office.

With over 100 Program Management and Construction Management (CM) staff employed nationwide, FNI's CM Group is committed to providing exceptional client service by using established procedures and processes to monitor construction operations and verify all work complies with plans and specifications.

MUNICIPAL PUBLIC INFRASTRUCTURE EXPERIENCE IN TEXAS

Unique Qualifications and Best Practices

Project Management

FNI has a long-standing history of successfully delivering program management, owner's representative and CM services for public sector clients throughout Texas. Over the past two years, FNI has provided comprehensive project management services for multiple governmental agencies, including the City of Kerrville and the Texas Department of Transportation (TxDOT), guiding complex projects from planning and procurement through construction and occupancy while maintaining schedule, budget and stakeholder expectations.

Most recently, FNI served as the Project Manager and Design-Build (DB) Advisor for the **City of Kerrville's Public Safety Facility,** a new 55,000 SF municipal complex that consolidated police, fire administration, EMS and municipal court services into a single facility. FNI guided the City through the entire design-build selection process, coordinated communication among stakeholders and served as the primary liaison between the City and the design-build team. Through proactive project leadership, strategic decision-making and continuous stakeholder engagement, the project was completed on schedule in August 2025 and maintained its original construction budget of $45 million, including all change orders.

FNI also continues to provide Project and CM services for the **City of Kerrville's Heart of the Hills Heritage Center (formerly the A.C. Schreiner House and Grounds).** This complex historic renovation involved transforming a century-old residence into a public museum while navigating permitting challenges, hazardous material concerns, historical preservation requirements and significant post-pandemic cost escalation pressures. FNI worked closely with City leadership to evaluate project viability, manage budget constraints, coordinate stakeholder communications and provide regular reporting to the City Council, Heritage Foundation, community groups and project donors. Through diligent management and cost oversight, the project was completed below the

CITY OF KERRVILLE'S PUBLIC SAFETY FACILITY

The following services are available to the City:

- Owner's Representative
- Project Management
- Construction Management
- Schedule Management and Tracking
- Budget Management, Analysis and Tracking
- Construction Inspections
- Plan/Constructability Reviews
- Documents Control/Admin Support
- CM Field Support
- Commissioning
- Existing Facilities Condition Assessment
- Review Payment Applications and Quantities
- Review Change Orders
- Attend Various Project-Related Meetings
- Review Record Drawings for Accuracy
- Visit Project Sites, as Needed
- Manage Construction Activities and Documentation
- Coordinate Utilities for Construction Activities
- Program Management
- Architectural Support
- Cost Estimating
- Utility Systems
- Complete Range of Engineering Support
- Design Phase Support
- Pre-Construction Meeting
- Project Inspection and Reports
- Submittal Review
- Log, Track and Assist with Project Documentation Needs
- Review and Process Construction Materials
- Formulate Change Order Documentation Upon Request
- Manage Testing Results and Invoices
- Coordinate Punch List Preparation and Completion
- Provide Project Closeout Meeting and Documentation Assistance, as Needed
- Other Related Services, as Needed

original budget, with a final construction cost of $5.25 million compared to the original budget of $5.5 million.

FNI's experience managing large-scale governmental projects is further demonstrated through its role on the **TxDOT Stassney Campus Program**, a $360 million, 50-acre campus development consolidating 28 divisions and approximately 2,000 employees. FNI provided project management, program management, construction procurement, Owner's Representative services, CM and facility commissioning. Faced with significant site challenges, schedule constraints and the impacts of COVID-19, FNI successfully advised TxDOT to implement an alternative CMAR delivery approach that accelerated the construction start by six months and enabled the project to be completed on schedule while accommodating additional owner-requested scope enhancements.

Across these projects, FNI consistently demonstrated its ability to manage complex capital improvements in a timely manner by:

- Providing full-service program and project management from planning through occupancy.
- Maintaining proactive communication among owners, design teams, contractors, elected officials and community stakeholders.
- Identifying and mitigating risks early to prevent schedule and budget impacts.
- Applying alternative delivery expertise, including Design-Build and Construction Manager at Risk (CMAR).
- Delivering owner-focused construction oversight that promotes accountability, transparency and project success.

Construction Management

FNI has a large CM Group and many of our clients hire us directly for third-party CM on projects that we did not design. As part of the Project Management Plan for each project, we will include a Construction Quality Management Plan to establish the proposed procedures and processes to monitor construction operations and to verify that all work performed is in conformance with the plans and specifications. Our role will be to make sure each project has adequate and proper inspection to verify that the City is getting what it is paying for on each project.

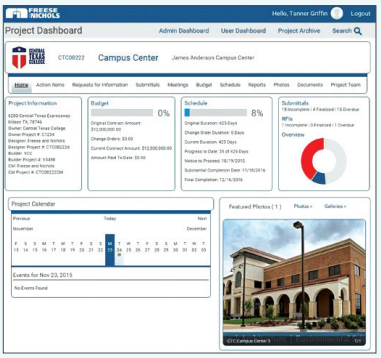
FNI's team, including owner reps, advisors and construction managers, will act as an extension of the City, aligned with its mission, values and goals. We will prioritize the City's best interests with every action and recommendation, offering transparent guidance, protecting public resources and verifying that decisions support the City's vision, safeguard investments and maximize value for residents.

The FNI team understands that our CM responsibilities include providing the City with constant communication, information flow reporting, regular meetings, quality control best practice procedures, quality assurance (QA) field oversight and accurate field documentation to provide successful project delivery of scope, budget, schedule and quality throughout the construction phase. The FNI team will review and provide feedback on the contractor and subcontractor's Quality Control (QC) Plans with emphasis on safety, quality, cost, time resources and contract document compliance.

STASSNEY CAMPUS PROGRAM MANAGEMENT AND CONSTRUCTION SERVICES

Prior to the start of new construction activities, pre-construction activity meetings will be scheduled as part of the Contractor's QC plan. This proactive measure allows the program team to understand in detail how the contractor will execute the scheduled activity and typically addresses risks, concerns, issues, or potential flaws, so they can be rectified or resolved before the start of the activity. Equipment dry runs will be recommended as part of the contractor's quality control plan.

Performing QC and maintaining program standards is the responsibility of the contractor. However, through continuous review and monitoring, FNI can verify program QA. Continual analysis of the Contractor's schedule, construction progress and reports, will assist in identifying critical issues, such as schedule slippage. These issues will be brought to the Contractor's attention and reported in weekly progress status reports, with corrective or directive action requested of the Contractor.



FNI will also develop and implement a CM QA program, details of which will be outlined in the Project Plan. The team will verify compliance with environmental permits, Stormwater Pollution Prevention Plan (SWPPP), traffic control, shop drawings, contractor personnel competency, material sourcing and approved vendors. The QA Program, will encompass, but not be limited to:

- Field quality oversight
- Detailed inspection check lists
- Daily photos and video documentation
- Inspection diary documentation
- Two-week look ahead schedule comparisons to baseline schedule
- Available onsite equipment, personnel, upcoming weather and pre-activity construction meeting minutes

At the completion of construction, the FNI team will provide facility commissioning, verify all operations and maintenance manuals, project records, as-built drawings and certifications and assist the City with contract close-out activities. Continuous contractor performance tracking throughout the duration of construction will be noted, resulting in a final contractor evaluation pertaining to scope, budget, schedule, quality, timely responsiveness and safety criterion. This evaluation could be considered by the City for future project reference and determination of contractor responsibility. A final project report will be submitted and reviewed with City management that will discuss lessons learned and operational recommendations for the City's future use.

Finally, the FNI team will request a performance evaluation from the City for feedback on our performance and ideas that could help us improve.

FNiManager

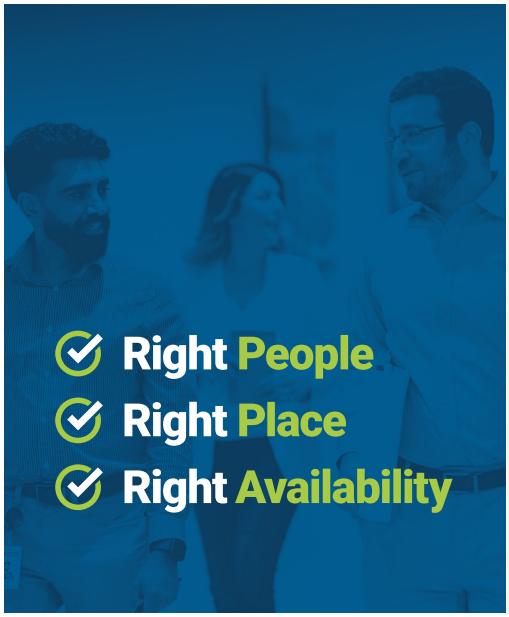
FNiManager Dashboard

Streamlining the Flow of Information

FN*i*Manager, FNI's in-house documentation management system, streamlines the flow of information and stores project data for convenient access. System benefits and features include:

- Field personnel can upload daily reports and photos from tablets or smartphones.
- Instant access to plans, specifications and project documentation expedites the construction process.
- Password protection allows for secure access by team members and stakeholders.
- Communications can be directed toward specific team groups through use of customizable permissions.
- Intuitive interface reduces time spent navigating and clicking.

Office Location and Staffing



With a full-service office in Harlingen, just minutes from Edinburg, FNI combines the accessibility of a local partner with the resources of one of Texas' most experienced engineering and program management firms. Our professionals have successfully delivered projects throughout the Rio Grande Valley and surrounding counties, giving us a strong understanding of the region's infrastructure needs, permitting processes and stakeholder expectations.

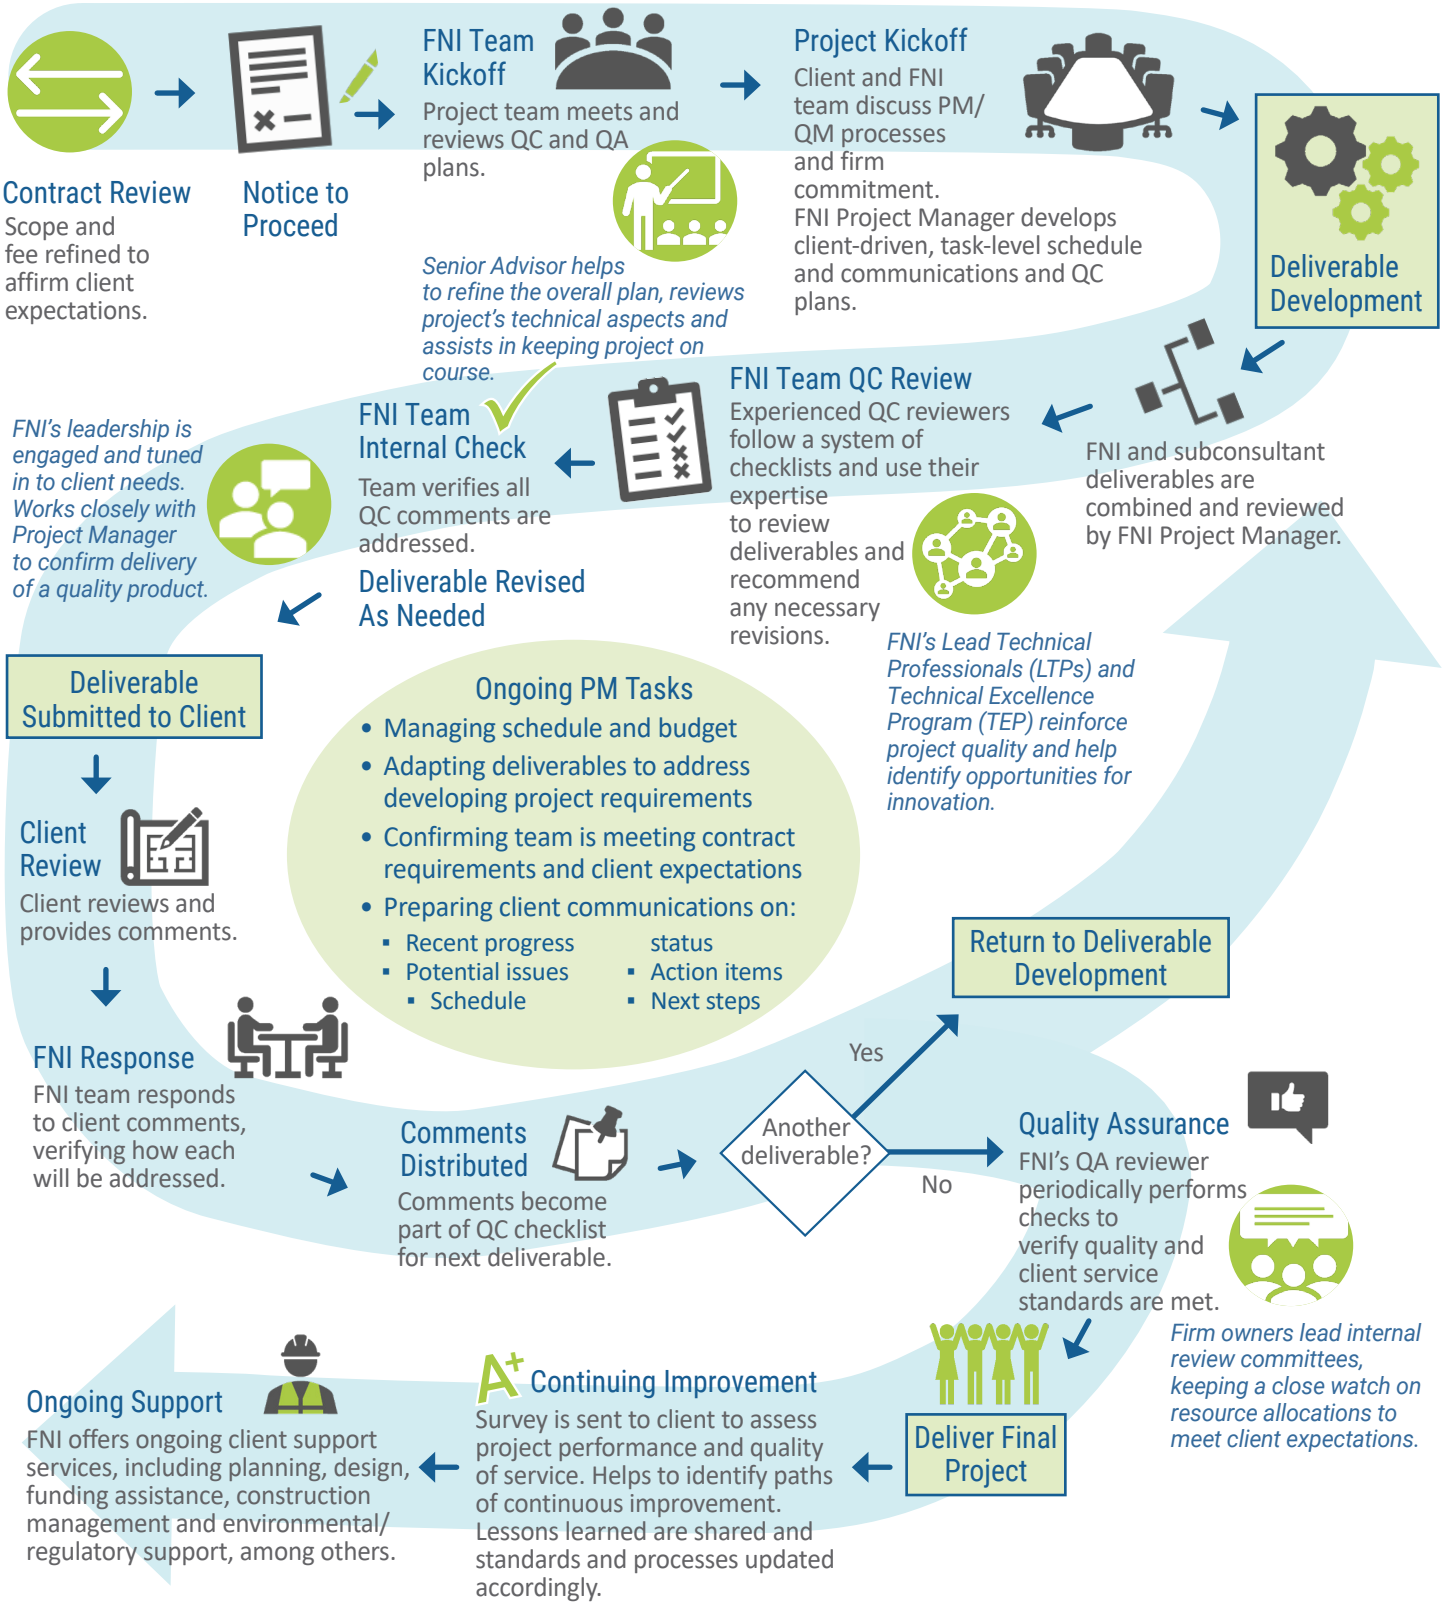
All services under this contract will be managed and coordinated through FNI's Harlingen office, allowing our team to provide prompt on-site support, attend meetings on short notice and maintain close communication with City staff throughout every assignment. Our local presence enables us to respond quickly to routine requests while providing the continuity and accessibility expected of a trusted long-term partner.

FNI is committed to providing responsive service and understands that time is money. Recognizing that on-call contracts often include projects of varying size and complexity, FNI has structured our team to efficiently support both large, multi-disciplinary assignments and smaller, task-specific projects. For routine or part-time assignments, we will tailor staffing levels to match the scope of work, utilizing a lean project team led by an experienced Project Manager with direct access to the specialized technical professionals needed for each task. This scalable approach allows the City to receive senior-level expertise without unnecessary overhead while maintaining the flexibility to quickly expand the team when project requirements warrant.

FNI has assembled the right people, in the right location, and with the right availability to successfully support the City. Our proposed team was selected based on technical expertise, familiarity with the region, and a proven history of working together on similar municipal projects. Supported by our local professionals and the depth of our firm-wide resources, we are prepared to dedicate the personnel necessary to complete every assignment on schedule, within budget, and to the City's expectations.

During all phases of planning, design, and construction, the City can expect proactive project oversight and responsive communication.

Choosing a Project Team



We've put forth the advance-planning effort to verify we have the **right team members**, in the **right place**, with the **right availability** to meet the Trust's goals. Several factors influenced this choice, including individual experience and history of working together on common projects.

Our chosen team combines decades of experience in a wide range of disciplines. This complementary blend of team member expertise in their various areas of specialization results in a solid, well-rounded team, which ultimately benefits the client.

Beyond the proposed team, FNI has access to **1,400+ employees firmwide** to assist, as necessary. As a firm focused on client service, we will commit the resources required to get the job done.

Project and Quality Management Processes

The "D" in FNI's LEADS values stands for "Deliver Quality." This value is foundational to our company culture and informs our comprehensive approach to Project Management (PM) and Quality Management (QM). Multiple components work together to foster a culture of excellence and elevate our overall quality of service. This focus extends beyond a specific project and reinforces our efforts to build trusted-advisor relationships with our clients.

History in Performing Project Management Services

HIGHLIGHTS

- Renovation of a historic existing facility
- Community Involvement – combination of tax dollars and community donations funded the project
- Transforming a facility originally built as a residence into a public space

AC Schreiner House and Grounds

City of Kerrville

The City of Kerrville's 2050 Comprehensive Plan includes a vision to create a vibrant hub and cohesive gathering place near downtown. To realize its vision, the City decided to renovate and convert the historic A.C. Schreiner house into a museum and rename it – Heart of the Hills Heritage Center.

The Heritage Center is located on the Butt-Holdsworth Memorial Library Campus, just outside of downtown Kerrville. FNI was responsible for renovating and converting the historic A.C. Schreiner House into a new public museum, along with other site improvements.

FNI acted as the Owner's Representative, playing a crucial role in overseeing the project. Not only has our team provided DB advisory services to guide decision-making during the renovation process, but we are also offering CM services to support smooth execution.

Part of these DB advisory services included collaborating with the City to assess the project's viability regarding budgeting, permitting and code compliance. Project pricing was developed before the pandemic. One challenge the City faced was funding issues in a post-COVID market where prices are 20 to 30% higher on average.

TYPE OF CONSTRUCTION
Renovation
Design-Build

With its rich history, the A.C. Schreiner house is being carefully restored to preserve its architectural significance.

Challenges during this phase included permitting issues and hazardous materials, common in structures from the turn of the 20th century. The team also evaluated the benefits of securing a historical designation for the mansion. The FNI team determined that the historical designation helps ease code challenges and avoid costly modernization.

As Owner's Representative, FNI was responsible for providing regular updates to the City Council, the Heritage Foundation, as well as community groups and donors.

COSTS

Original Project Budget:
$5,500,000

Final Construction Cost, including Change Orders:
$5,250,000

SERVICES

- DB advisory
- Owner's Representative
- CM services
- Regular updates to City Council, the Heritage Foundation, community groups and donors

HIGHLIGHTS

- Vertical construction
- Combination of funding from tax dollars and City selling bonds
- Fast-paced and high profile within the community
- Community engagement

Public Safety Facility Design-Build Owner Representative

City of Kerrville

Kerrville's forward-thinking 2050 Comprehensive Plan outlines a bold vision: modernizing and consolidating City operations within a unified hub. Responding to this vision, the City chose to consolidate four separate City offices into a cohesive entity known as the Public Safety Facility.

Recognizing the imperative to modernize City services in anticipation of projected population growth, the Public Safety Facility centralizes operations to optimize efficiency and foster collaboration among key stakeholders and traditionally siloed groups.

FNI served as the DB Advisor to the City for this transformative endeavor to construct a cutting-edge 55,000-SF building. This municipal safety operations facility seamlessly integrates the municipal court, police administration, fire administration and emergency services, all under one roof.

Additionally, a new parking lot and associated site improvements enhanced accessibility and functionality.

FNI, as the Owner's Representative, was instrumental in shepherding the City through the entire DB selection process. Through meticulous guidance and expertise, we facilitated the selection of a strong DB builder who met and exceeded expectations, delivering results on time and within budget.

Stassney Campus Program Management and Construction Services

Texas Department of Transportation

In April 2022, the TxDOT completed the design and construction of a new campus facility that consolidated 28 TxDOT divisions in Austin, Texas. This consolidation was needed to improve efficiency, communication and collaboration between the various divisions. The campus includes a large, multistory office building, structured parking garage, warehouse and print shop, materials testing laboratory, central utility plant and other corporate campus-type amenities.

The campus is a 50-acre site and includes a 400,000-SF administration building, 150,000-SF warehouse, 80,000-SF materials testing lab, structured parking for 1,600 employees, surface parking for 70 fleet vehicles, dedicated public parking and related support structures, including a central utility plant to service the campus.

Employee amenities include a full-service dining facility, a fitness center with an onsite nurse and two miles of walking trails with exercise stations.

FNI provided program and CM services across all phases of the project, from programming through design, construction procurement, onsite construction Owner's Representation and facility commissioning. During the programming, design and construction procurement phases, FNI augmented TxDOT staff with management resources to help guide the project's

HIGHLIGHTS

- Consolidates 28 stakeholder groups across Travis County
- Five secure facilities on a 50-acre site
- Tight budget set by the 2019 State Legislature
- Schedule constraints due to expiring ground leases on current facilities, creating an opportunity for changes in TxDOT's operations and work environment

TYPE OF CONSTRUCTION
New

development to meet TxDOT's goals within strict budget and schedule restraints. During construction, FNI had a team on site full-time providing CM oversight, field inspections, commissioning and verification of compliance with applicable building codes.

Significant or Sustainable Aspects of the Project

Because this project was publicly funded, TxDOT was acutely aware of public perception of how the funding was used. TxDOT views this new campus as its home for the next 60 to 80 years. In response to these factors, the campus design is focused on sustainable facilities that offer flexible working environments and building systems and finishes that are durable, reliable and maintainable.

Client Background Information and Challenges

TxDOT's Support Services Division (SSD) is responsible for design and construction of its facilities across Texas. However, SSD staff does not have the capacity to manage the design and construction of an entirely new campus the size and complexity of the consolidated campus.

The land that TxDOT acquired posed significant physical challenges for the program. The topography of the 50-acre site has significant elevation changes with ravines and a small creek bisecting it from north to south. At the time the land was acquired, TxDOT did not realize that the surrounding developments contribute a significant amount of runoff to the creek. Subsequent drainage studies resulted in the need for multiple detention ponds and large culverts at three creek crossings for utilities and vehicle movement between facilities.

TxDOT was unfamiliar with alternative project delivery methods and expected that the project would be procured using the traditional design/bid/build approach. **FNI recognized that it would be challenging to bid a complex $300 million development including 50 acres and a five-story building. Through meetings with executive leadership and general counsel, FNI advised TxDOT to use the alternative project delivery method known as CMAR to receive the best construction value while compressing the schedule by awarding early civil and foundation packages as the remaining design was completed. TxDOT approved the approach and the construction contracting community responded with great interest. A Guaranteed Maximum Price was agreed to with the most qualified proposer and Construction Notice to Proceed using a fast-tracked schedule was issued in October 2019, six months earlier than originally planned (March 2020).**

In the first year of construction, multiple periods of heavy rain caused unexpected erosion of the creek banks due to the large volume of water and poor soil conditions. At TxDOT's request, FNI's geomorphology and stormwater management experts assessed the design of the detention ponds and creek crossings. FNI's evaluations and recommendations to TxDOT and the Civil Engineer of Record resulted in modifications to detention pond outflows and armoring of the creek banks at the creek crossings to reduce the volume and velocities of the water during heavy storm events.

Despite the physical site challenges and the impact of COVID-19 through most of construction, the project remained on budget and was completed in April 2022, allowing ample time for TxDOT to relocate almost 2,000 employees from the Riverside offices and other facilities across the Austin area.

COSTS

Original Project Budget:
$320,000,000

Final Construction Cost, including Change Orders:
$360,000,000

Physical site challenges and COVID-19 impact led to owner-added scope after budget was set.

O.N. Stevens Water Treatment Plant Raw Influent Improvements

City of Corpus Christi

The City of Corpus Christi's O.N. Stevens Water Treatment Plant (ONSWTP) is the City's only water plant and has a permitted capacity of 161.5 MGD.

This effort will expand the City's sole water treatment plant capacity and resilience while maintaining continuous operations through carefully sequenced hydraulic, process and infrastructure improvements. The City of Corpus Christi's O.N. Stevens Water Treatment Plant (ONSWTP) is the City's only water plant with a permitted capacity of 161.5 MGD. Two 100 MGD treatment trains are in service, but hydraulic restrictions in pretreatment and raw water influent infrastructure limit overall capacity. FNI is leading hydraulic and process improvements design, bid and construction phase services, including new raw water piping up to 108 inches, flow metering, flow control structures and computational fluid dynamics (CFD) verification. Improvements will increase rated capacity to 200 MGD and add chemical feed, storage and containment plus required electrical, instrumentation and controls to improve mixing of multiple source waters and increase operational flexibility and resilience. A complex sequencing plan guides construction to minimize impacts to daily operations.

Project Risks and Mitigation Measures Taken

Risk: Maintaining plant operation during construction.

Mitigation: Work was sequenced to avoid interrupting treatment processes and critical functions. A sequencing strategy with multiple shutdowns was developed with the City to provide gravity bypass for major activities without long-term capacity impacts.

HIGHLIGHTS

- Expanded existing water treatment plant capacity from 161.5 MGD to 200 MGD
- Maintained continuous plant operations through phased construction
- Provided design, bidding, and construction phase services

LOCATION
Corpus Christi, TX

DATES
Actual NTP: 05/15/24
Substantial Completion: 05/12/2027

PROJECT SIZE
161.5-MGD WTP

TYPE OF CONSTRUCTION
Expansion/Renovation

Risk: Temporary re-routes.

Mitigation: Return wash water pipelines and portions of electrical power infrastructure conflicted with proposed improvements. The team coordinated with the City and Contractor in advance to define temporary pipeline and power reroutes, streamlining transitions to shutdowns.

Risk: Bypass provisions for regular operations.

Mitigation: Partial bypass capability was provided for O&M downtime of the Raw Water Junction.

Successes, Failures and Lessons Learned

Successes: Utility relocation with American Electric Power (AEP was coordinated effectively and in advance to meet clearance and access requirements within the AEP easement. The plant remains on track to stay operational at required capacities through construction shutdowns. Construction planning prioritizes maintaining service, with sequencing challenges actively managed through phasing, bypassing, utility coordination and access. Design also accounted for future expansion to avoid limiting later improvements.

Failures: Post-pandemic cost impacts resulted in a high single bid that led to re-bidding, schedule delays and added price escalation, requiring adjustments to project expectations and planning. Extended lead times for large diameter pipeline procurement are affecting the schedule and require ongoing coordination to manage impacts.

Lessons Learned: Allowance for a steel pipe alternative to bar-wrapped pipe during bidding could have reduced schedule impacts associated with procurement lead times.

COSTS

Original Project Budget:
$3,600,000

Final Construction Cost, including Change Orders:
$3,600,000

SERVICES

- Hydraulic and process improvements design
- Raw water conveyance and pipeline design (up to 108-inch diameter)
- Computational Fluid Dynamics (CFD) analysis and design verification
- Flow metering and flow control structure design
- Chemical feed, storage, and containment system design
- Electrical, instrumentation, and controls (I&C) design
- Construction sequencing and operational continuity planning
- Bid phase and construction phase services

Project Manager

Moses's extensive experience spans a wide range of construction and project management roles, primarily focused on large-scale capital improvement and infrastructure projects.

Moses has a strong background in managing all phases of projects, from initial programming and design through construction, closeout and compliance. He has a proven ability to manage project budgets, schedules, procurement processes and stakeholder coordination effectively. Clients can expect meticulous attention to detail, strong technical expertise and the ability to lead diverse teams to successful project completion.

EXPERIENCE

23 years (1 with FNI)

EDUCATION

BS, Civil and Environmental Engineering, The Citadel, The Military College of South Carolina

REGISTRATION

Project Management Professional, Project Management Institute #3652677

RELEVANT PROJECT EXPERIENCE WITH FNI

Intercollegiate Athletics Expansion and Renovation* | The University of Texas Rio Grande Valley | Project Manager
Moses' key responsibilities included managing the project budget and schedule, leading from programming through design and construction and providing smooth coordination between AE firms, University of Texas stakeholders and contractors.

Park West Infrastructure Project* | The University of Texas at San Antonio | Project Manager
Moses' role involved establishing and maintaining the project budget and schedule, managing the project from programming through design and construction and facilitating effective coordination between AE firms, University of Texas stakeholders and contractors.

Inner Harbor Seawater Desalination Plant | City of Corpus Christi | CM Services
FNI is providing owner's representative services for Phase 1 Pre-Construction of this progressive DB collaborative delivery method.

Wells 10, 11 and 12 with Collection Line | City of College Station | CM Services
FNI is providing design, bid, construction and startup phase services to construct three new water supply wells and approximately 10,000 LF of well collection line to convey flow to the existing well collection system.

Capital Improvement Projects* | New York City School Construction Authority | Project Officer
Serving as an Owner's Representative on more than 15 Capital Improvement Projects, Moses managed the coordination between the general contractors, school administrators, engineers and architects of record. He was responsible for managing the change order process with the general contractor, as well as overseeing and approving the pay application process. He verified contract compliance and managed the closeout process with both the general contractor and the Department of Buildings. Additionally, Moses reviewed and managed the submittal and RFI process.

** Non-FNI Experience*

Chris Trevino PE, CCM

Principal-in-Charge

Chris has extensive experience in the planning, design and construction of infrastructure and civil-related projects.

His experience includes transportation design, project management, construction inspection, CM, program management and client/owner representation for infrastructure and heavy civil-related projects with public and private sectors, giving him a firsthand understanding of local governments' challenges and needs.

RELEVANT PROJECT EXPERIENCE

On-Call Engineering Services | City of Hutto | Project Manager
FNI provided plan review services for projects needing additional expertise for traffic impact analysis, drainage report analysis, site plan, plat and subdivision construction plans.

2020 Transportation Bond General Engineering Consultant Services | City of Pflugerville | Program Manager
FNI provided General Engineering Consultant (GEC) services to support the management and implementation of the City's Transportation Bond Program. As the GEC, FNI supported the City in the bond program, including program and project management oversight, project controls, cash flow forecasting, schedule management, risk mitigation, design management and oversight, bid phase assistance and construction phase assistance. Chris is serving as the Senior Advisor assisting the Program Manager with managing the budget, schedule, staffing and quality of services. Previously, Chris served as the Program Manager for the City of Pflugerville's 2020 Transportation Bond Program. The $101.7 million 47 program includes neighborhood street reconstruction, intersection improvements, additional capacity, operational improvements and a corridor study.

2023 Street Maintenance Program | City of Alamo Heights | Project Manager
FNI provided design, bid and construction phase services for street improvements as part of the City's Street Maintenance Program. The street improvements varied by street and consisted of spot base failures, full-depth repairs between existing curbs, wedge milling and/or full-width milling with overlay. Chris served as the Project Manager providing design, bidding and construction phase services for the City's 2023 Street Maintenance Program. He served the same role for the 2022 and 2021 Street Maintenance Programs.

2019 On-Call Services | Ford Engineering | QA/QC
FNI performed roadway, drainage and constructability QA/QC reviews for the City of San Antonio (COSA) as part of the 2017 COSA Bond. Chris performed QA/QC and constructability reviews of submittals for various street rehabilitation projects, including the rehabilitation of urban collector and minor arterial roadways.

Juan Bujanos PE, CFM

Quality Control

Juan is an FNI Account Director based in Lower Rio Grande Valley. He has more than two decades of experience managing multimillion-dollar projects, overseeing all aspects from planning, strategy and design to inspection and post-construction work across South Texas.

His experience includes construction of heavy civil related infrastructure projects, project management, CM and client/owner representation. His experience in municipal, state and private sectors gives him a unique understanding of local governments' challenges and needs.

RELEVANT PROJECT EXPERIENCE

Port Isabel Water Treatment Plant Improvements | Laguna Madre Water District | Senior Advisor
FNI is providing planning and design phase services to improve and expand the 2.9-MGD conventional water treatment plant to a 5-MGD low-pressure microfiltration system at Water Plant 1. Improvements include a new raw water pump station, microfiltration system and building, high-service pump station, 1.5-MG ground storage tank and 0.6-MG elevated storage tank. Additional work includes a new raw water transfer pump station and improvements to the high-service pump station at Water Plant 2.

Emergency Preparedness Plan | Military Highway Water Supply Corp | Client Representative
FNI assisted the Military Highway Water Supply Corporation (MHWSC) with the new Senate Bill 3 legislative requirements for affected water utilities. MHWSC was required to develop and implement an emergency preparedness plan to demonstrate the utility's ability to provide emergency operations during an extended power outage.

South Wastewater Treatment Plant Chlorine Contact Chamber Sluice Gate Replacement | Brownsville Public Utilities Board | Senior Advisor
FNI is providing design bid and construction phase services for new gates at three chlorine contact basins and additional engineering services for each basin's existing influent gate, which includes removing the existing gate, installing a new gate upstream in the influent channel and replacing the existing manual crank with a new electric actuator with the ability to control the gate remotely.

Planning and Design of Wastewater Treatment Plant Rehabilitation | City of Mercedes | Senior Advisor
FNI is providing preliminary and final design services for system improvements at an existing wastewater treatment facility. Our services include the evaluation, rehabilitation and replacement of treatment processes, structures, mechanical equipment, electrical systems, instrumentation and controls and associated collection system lift stations to restore capacity and reliability and support regulatory compliance.

John New **PE, CCM , Assoc. DBIA**

Senior Advisor

John serves as FNI's Central Division Manager and is a firm Vice President/Principal.

As a Project and Construction Manager, John has performed cost estimating and cost control; project scheduling; progress reporting; development of communication procedures and protocols; value engineering; issue identification, tracking and resolution; conducting and documenting meetings; performing constructability reviews; administering construction contracts; facilitating and negotiating construction changes and their associated cost/time impacts; serving as full-time on-site inspector; and other related duties associated with serving as an extension of an Owner's staff. John's CM and inspection services experience includes educational buildings, recreation buildings, natatoriums, medical office facilities, laboratories, offices, warehouses, telecommunication switch facilities, courtroom renovations and maintenance buildings along with the utility and civil work associated with drainage facilities, flood control dams and reservoir dams, small asphalt parking area renovations to asphalt and concrete streets, retaining walls, 6-inch water lines to 120-inch wastewater lines and wastewater plants.

RELEVANT PROJECT EXPERIENCE WITH FNI

Heart of the Hills Heritage Center | City of Kerrville | Senior Advisor
FNI performed the renovation and conversion of the historic AC Schreiner house on the Butt-Holdsworth Memorial Library Campus into a new public museum along with other improvements to the site.

Public Safety Facility DB Owner Representative | City of Kerrville | Senior Advisor
FNI is serving as a DB Advisor to the City on its Public Safety Facility Project, which will consist of a new 69,000+ SF building that will house a municipal court, police administration and related space, fire administration and related space and a new parking lot with associated site improvements.

Customer Solutions Center | New Braunfels Utilities (NBU) | Project Manager
FNI was retained to provide Owner's Representative services on the renovation of an existing 33,000 SF facility that would accommodate approximately 100 NBU staff.

NBU Headquarters | NBU | Senior Advisor
FNI is providing third-party CM and inspection services for the vertical construction of the new NBU Headquarters. The project consists of the development of a 76-acre site, including a 150,000 SF four-story administration building, maintenance building, equipment storage building and maintenance yard.

On-Call Inspection Services | City of Austin | Principal-in-Charge
FNI provided third-party construction inspection services for projects assigned by City of Austin project managers.

Alfredo (Fred) Resendez PE

Construction Manager

Fred is a Project Manager with experience in designing, expanding and rehabilitating water and wastewater treatment plants, lift stations, water distribution and wastewater collection systems.

He is experienced in CM, overseeing projects from their inception phase to their closeout. Fred has coordinated local, state and federal rules and regulations with the EPA, TCEQ, TxDOT and OSHA.

EXPERIENCE

21 years (5 with FNI)

EDUCATION

BS, Civil Engineering, University of Texas at San Antonio

REGISTRATIONS

Professional Engineer, TX #108838

** Non-FNI Experience*

RELEVANT PROJECT EXPERIENCE

Randolph Pump Station Improvements | San Antonio Water System | Staff Team
FNI provided design services to rehabilitate and upgrade the Randolph Pump Station to comply with TCEQ requirements and American Water Works Association and OSHA standards. The project included updating disinfection facilities with on-site hypochlorite generation to enhance site safety.

Lift Station Rehabilitation and Wastewater Modeling | Laguna Madre Water District | Engineering Support
FNI provided design, bid and construction phase services for the rehabilitation of multiple lift stations. Lift Stations No.1 and No. 37 included flow monitoring, force main cleaning/C-factor analysis and design, gravity main design and collection system improvements. Lift Station No. 2 and Port Isabel Wastewater Treatment Plant Lift Station included replacement of pumps, piping and appurtenances. Fred is the local liaison between the Owner, Contractor and FNI CM group. He conducts routine field inspections.

Liberty Boulevard Utility Adjustment | City of Penitas | Project Manager
FNI is providing gravity sanitary sewer manhole adjustments and force main alignment relocation due to the TxDOT street widening project along Liberty Boulevard. Fred was the day-to-day contact. He set deadlines, assigned responsibilities, monitored and summarized progress of the project, accomplished project goals, led project meetings, coordinated the collection and dissemination of information and managed all aspects of the project, including the subconsultants.

Professional Engineering Services List* | Brownsville Public Utilities Board (BPUB) | Project Manager
The Brownsville Public Utilities Board solicited for professional engineering services for five individual engineering design projects, including Water Treatment Plant No. 1 Improvements, Robindale Wastewater Treatment Plant Improvements, South Wastewater Treatment Plant Improvements, and Lift Station Rehabilitation Packets 1 and 2. Fred coordinated with the five individual consultants and various BPUB Department Personnel to provide the necessary documentation required for preliminary design. He also assembled and coordinated review teams for design review workshops for the submitted design progress packets.

Joel Kokemor LEED AP®

Construction Manager

Joel's background includes the estimating, CM and supervision of large vertical projects and civil utility projects.

He is responsible for client communications and daily coordination while serving as the primary point of contact with the contractor, inspection services and testing laboratories. He advances project goals and objectives by establishing project procedures and monitoring compliance. Joel helps to clearly define the scope of work while overseeing the schedule and budget. He participates in client and construction meetings as an owner's representative.

RELEVANT PROJECT EXPERIENCE WITH FNI

Heart of the Hills Heritage Center | City of Kerrville | DB Senior Advisor and Owner Representative
FNI performed the renovation and conversion of the historic AC Schreiner house on the Butt-Holdsworth Memorial Library Campus into a new public museum along with other improvements to the site.

Public Safety Facility DB Owner Representative | City of Kerrville | DB Senior Advisor and Owner Representative
FNI is serving as a DB Advisor to the City on its Public Safety Facility Project, which will consist of a new 55,000 SF building that will house a municipal court, police administration and related space, fire administration and related space and a new parking lot with associated site improvements.

NBU Headquarters | NBU | Assistant Project Manager
FNI is providing third-party CM and inspection services for the vertical construction of the new NBU Headquarters. The project consists of the development of a 76-acre site, including a 150,000-sf four-story administration building, maintenance building, equipment storage building and maintenance yard. Joel also serves as Owner's Representative.

2023 Staff Augmentation and Program Management | NBU | Construction Manager
FNI is providing a variety of staff augmentation and program management services for NBU in support of their $100 million/year Capital Improvement Plan (CIP). These services include program management, project management, CM and inspection services, updating and refining the CIP, master planning, hydraulic modeling and as-needed design work.

Georgetown Harmony Science Academy | Harmony Public Schools | Project Manager
FNI provided construction services for a 58,000-SF elementary facility, including parking lot, playgrounds and landscaping. Services included concrete, drywall, glazing, finishes, roofing, electrical, mechanical, plumbing, landscaping, low voltage and other associated work.

EXPERIENCE

28 years (7 with FNI)

REGISTRATIONS

Construction Manager-in-Training, Construction Management Association of America

ACI Concrete Field Testing Technician – Grade I, American Concrete Institute

Jesus Suarez III, CMIT

Construction Representative

Jesus' CM and inspection experience includes the inspection of concrete and reinforcing steel used in foundations, piers and other structures.

Prior to beginning his career as a Construction Manager and Inspector, Jesus was a United States Marine Corps Unit Supervisor where he provided instruction, supervision and evaluation of more than 35 personnel. Jesus is bilingual and is an excellent teacher/trainer who is adept at managing multiple personality types. He is able to make difficult decisions in stressful situations and is successful in learning and comprehending new systems and methods.

RELEVANT PROJECT EXPERIENCE

Rio Lift Station Expansion CM and Inspection | NBU | Construction Inspector
FNI provided third-party inspection and CM of a lift station and force main expansion.

FY21 CM and Inspection | New Braunfels Utilities | Construction Inspector
FNI provided CM and inspection services for eight water and wastewater projects, including two lift stations, four pipelines, one elevated storage tank and one ground storage tank.

Landa Pump Station Expansion | NBU | Construction Inspector
FNI provided design, bid and construction phase services for the Landa Pump Station expansion and the Texas Pump Station decommissioning. The expansion increased the capacity of the Landa groundwater well and pump station from 6.5 MG to 10 MGD. Additional improvements include the rehabilitation of the existing 1.5-MG ground storage tank and enhancements to the chemical system.

On-Call Engineering and Program Management Services | City of San Antonio | Construction Inspector
FNI provided on-call civil engineering services, program management services, construction inspection services, construction engineering services, expanded CM services and training services.

Bois d'Arc Lake Program Management, CM and Inspection | North Texas Municipal Water District | Construction Inspector
FNI provided program management, resident CM and inspection services for the water supply program to support the reservoir development. Significant project components included environmental mitigation, dam engineering and treatment and operations facilities.

Clark Sykes **Assoc. DBIA**

Alternative Delivery

Clark has been involved in the procurement, management and delivery of more than $750 million in collaborative vertical construction projects.

He has extensive experience in early project development, preconstruction, construction and commissioning of large and complex collaborative projects. These include CMAR, DB and Integrated Project Delivery projects in municipal and government-funded projects, public safety facilities, healthcare, cultural uses, mixed-use retail developments, schools and childcare centers.

Jace Houston

Risk and Compliance

Jace is FNI's Risk and Compliance Director with recent experience as the general manager of the San Jacinto River Authority.

He oversaw every aspect of planning and implementation for major water supply and infrastructure projects. He serves as an advisor to FNI clients implementing complex, large-scale projects. Jace has extensive experience implementing major water supply projects involving numerous wholesale customers, complex permitting and financing, sophisticated communications strategies and multiple legal, political and financial hurdles. He is a valuable resource for strategies related to land acquisition, project financing, contract development drafting and communications strategy. He brings a unique combination of legal, political and management experience from the owner's perspective.

RELEVANT PROJECT EXPERIENCE

Leon Hurse Dam Construction Services | Upper Trinity Regional Water District | Risk and Compliance
Services include general engineering representation, contract administration, full-time resident engineering, CM and onsite inspection.

Water Resources Assessment and Planning | Parker County | Risk and Compliance
FNI is conducting a study of the water supply needs for the next 50 years and facilitating the formation of a public utility agency for regional collaboration.

PROJECT SPOTLIGHT
NEW BRAUNFELS UTILITIES HEADQUARTERS

FNI is providing third-party CM and inspection services for the vertical construction of the new NBU Headquarters. The project includes the design development and construction of a new 120,000 SF Headquarters multi-building complex for NBU. The 48-acre campus, located on the west side of New Braunfels, will allow NBU to consolidate their operation, maintenance and office staff to one location.

Services currently being provided include:

- Cost estimating
- Schedule development and tracking
- Technical review of design deliverables
- CMAR procurement
- Stakeholder coordination
- Construction management
- Inspection services

TEAM MEMBERS
- Joel Kokemor
- John New

02

Ability to Meet Schedules and Deadlines

Approach to Timely Completion of Design

FNI's project schedules are dynamic and flexible to meet the needs of the owner and the inevitable unforeseen circumstances that accompany complex multidiscipline projects. We will align our schedule to the City's as a critical path for project completion and/or occupancy and make adjustments that are mindful of budgetary impacts. Where delays are encountered for whatever reason, FNI's team will initiate innovative solutions to address the issues toward a successful completion schedule that is driven by the City's criteria. Our team's approach to assuring timely completion of each project begins with a detailed schedule that clearly tracks progress on the critical path tasks. It has been our experience that the successful and timely completion of a task order is directly related to management of three key factors: anticipating challenges, acknowledging delays immediately and resolving them before they become a problem. Our approach to schedule recovery involves two key actions: increasing manpower/technical resources and maintaining consistent accountability at each milestone.

Schedule Management

Establishing accurate project schedules and maintaining schedule adherence during project delivery are critical to keeping projects on budget. FNI will establish a system that will provide useful, accurate and timely information on both the schedule and budget for each project. The output of an effective scheduling and budgeting system is a powerful tool for priority definition, status reporting, problem area identification, problem impact analysis and support of corrective action planning. The project schedule also provides a basis for management-by-exception, by focusing on those tasks that are deviating from the original plan or on the tasks that are most important towards achieving the program objectives. Other advantages to good scheduling include balanced resource allocation, the exploration of project alternatives, and time/cost tradeoffs through project acceleration/delay.

We Will Manage All Required Work To Meet the Schedule

Currently, more than 95% of FNI projects are completed as scheduled/on time company-wide, including those involving expedited schedules.

Stability and References

Stability and References

Since our founding, FNI has developed a specialization in municipalities, with an extensive range of expertise and innovative solutions to meet the diverse needs of their clients. FNI has built its practice on a strong foundation of client service and a continued commitment to project excellence. FNI's outstanding reputation for quality work results in more than 87 percent of our work coming from repeat clients. We continue to offer innovative engineering solutions that help clients stretch capital and operating budgets and deliver quality services to the cities we serve. Although FNI has not previously provided services directly to the City of Edinburg, our proposed team has extensive experience delivering similar project management and engineering services for municipalities, utilities, and public agencies throughout the Rio Grande Valley.

CITY OF KERRVILLE

Michael Hornes, Assistant City Manager | 830-258-1105

Description of Projects: FNI has provided a comprehensive range of professional services to the City, including master planning, design, bidding support, cost estimating, miscellaneous engineering services, DB advisory, owner's representative services and CM. These services have supported a diverse portfolio of projects, including water and wastewater infrastructure, building renovations and new vertical construction.

Team Members: Joel Kokemor, Design-Build Senior Advisor | John New, Senior Advisor | Kirk Millican, Architect | Robert McKay, Staff Team

BROWNSVILLE PUBLIC UTILITIES BOARD

Marie C. Leal, PE, Director of W/WW Engineering and Capital Planning | 956-983-6275

Description of Projects: FNI provided planning, design and CM services for the rehabilitation of the South Wastewater Treatment Plant. The project included comprehensive engineering design, construction inspection, coordination of material testing, tracking of labor, equipment and materials, monitoring of the overall construction schedule and proactive management of field changes while maintaining close coordination with the contractor and Brownsville Public Utilities Board throughout construction.

To whom it may concern,

I am pleased to recommend Freese and Nichols, Inc. (FNI) to your organization. FNI has helped the City of Kerrville deliver numerous projects. FNI's quality of service, expertise and responsiveness has led to many successful projects while also making them a valued partner.

FNI has provided a variety of services including master planning, design, bidding, estimating, miscellaneous professional services, design build advisor, owner representative, and construction management services. Project types have included water, wastewater, building renovation work and ground up vertical construction. I look forward to continuing the City's relationship with FNI.

Please feel free to contact me at Michael.Hornes@kerrvilletx.gov, or at 830-258-1105 if you need any additional information.

Sincerely,

Michael Hornes

Re: **Reference for Freese and Nichols, Inc.**

Please accept this correspondence as recommendation for Freese and Nichols, Inc. (FNI) regarding professional engineering and construction management services. I have had the pleasure of working closely with FNI staff on numerous engineering and construction phase engagements over many years. On a recent major WWTP Rehab initiative, the South Wastewater Treatment Plant Rehab project, FNI provided Brownsville PUB with planning, design and construction management services.

Throughout the project, the Freese and Nichols team, including Juan Bujanos, PE, and Fred Resendez, PE, performed all planning and design tasks per the initial project design schedule and conducted construction phase services such as inspections, tracked all labor, equipment and materials on the site, coordinated the material testing, monitored the overall construction schedule and advised Brownsville PUB on any unforeseen changes and coordinated efficiently with the contractor.

The FNI team was very flexible and always ready to accommodate requests for meetings, updates and changes to the Project along the way. They demonstrated excellent knowledge of the work, construction documentation and communication skills. The Freese and Nichols team has proven to be highly responsive to the project's and the BPUB's needs, and as such, I heartily endorse them for any future engineering and construction management services.

Should you require additional information, please feel free to contact me at (956) 983-6275, or via email at mleal@brownsville-pub.com

Sincerely,

Marie C. Leal, P.E.

July 09, 2026

REFERENCE

Over the past several years, the Laguna Madre Water District has had the pleasure to work with Freese and Nichols on our most recent Water Treatment Plant Expansion and Wastewater Collection System Improvement Program. Freese and Nichols have assisted me and LMWD staff on multiple projects across our service area. Their Planning, Engineering and Project Management/Construction Management (PMCM) process, attention to detail and creative staff have enabled my team to prioritize the needs and find cost-effective and workable solutions to all project challenges. As a result, Freese and Nichols have consistently delivered and protected the interest of the District.

Planning, Design and Construction Management Projects: Water System Hydraulic Modeling | WTP 1 RO System | 1.0 MG Elevated Storage Tank | WTP 2 Raw Water Transfer Pump and High Service Pump Station | WTP 1 Emergency Generator | Wastewater Collection System Improvements

Each of these projects, while varying in size and scope, involved a great deal of study, discussion, planning, and coordination between the District, contractors, and equipment suppliers. Some of the activities the Freese and Nichols construction management team performed for us included: attending and leading all pre-bid and regular project meetings, preparing and distributing meeting minutes, following up on outstanding action items including commissioning work, monitoring monthly progress including project schedules, monitoring and reporting on all ongoing activities, maintaining documentation via electronic software, compiling and submitting detailed punch lists, walking job site, reviewing all change requests including pricing and contractor negotiations, providing all final documentation for project closeout,etc.

Overall, one of the most satisfactory and appreciated elements of the Freese and Nichols organization is their construction management team. They maintain a group of construction management professionals solely dedicated to contract and construction management. We were able to develop a strong working relationship with the Freese and Nichols construction management team, which was extremely beneficial, especially at the end of long projects. The Freese and Nichols construction management team has demonstrated they are professional, committed, responsive, and reliable. With their extensive history of service to municipalities and water districts, I would recommend the Freese and Nichols engineering and construction management team to any entity seeking Engineering and Construction Manager Support.

Previous Experience with City

Previous Experience with City

FNI does not have direct project experience with the City of Edinburg. However, we have established long-standing relationships with numerous municipalities, utilities and public agencies throughout the Rio Grande Valley and surrounding region. Our local team has successfully delivered planning, water, wastewater, drainage, transportation and capital improvement projects for nearby communities including Brownsville, Harlingen, McAllen, Mercedes, Pharr, Penitas, Palmview and the Laguna Madre Water District, as well as the U.S. Bureau of Reclamation. The accompanying map highlights a representative sample of these projects, demonstrating our familiarity with the region's infrastructure, regulatory environment and project delivery needs. These examples represent only a portion of FNI's experience serving communities across South Texas and reflect the local knowledge and relationships we bring to the City of Edinburg.

City of Brownsville

- PUB - South WWTP Rehab
- Robindale WWTP Headworks Rehab
- Water/Wastewater Master Plan
- Water/Wastewater Impact Fee Study

Required Forms

CONFLICT OF INTEREST
DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

Freese and Nichols, Inc.

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No N/A

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No N/A

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

N/A

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

1 Name/Name of Agency/Company: Freese and Nichols, Inc.
(Full, correct legal name)

- Address: 312 E. Harrison Avenue, Suite B, Harlingen, Texas 78550
- Telephone/Fax: 956-937-3137
- Email address: fred.resendez@freese.com

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?
Yes____ No_X__

3. Is your Company authorized and/or licensed to do business in Texas? Yes_X__ No____

4. Where is the Company's corporate headquarters located? Fort Worth, TX

5. a. Does the Company have an office located in Edinburg, Texas? Yes____ No_X__

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office? _____ (years) _____ (months) N/A

c. State the number of full-time employees at the Edinburg office. N/A

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity? Yes____ No_X__

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. N/A

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Alfredo (Fred) Resendez, PE
Address: 312 E. Harrison Avenue, Suite B, Harlingen, Texas 78550
Telephone: 956-937-3137 (office); 956-873-1203 (mobile)
Fax: N/A
Email: fred.resendez@freese.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (X).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture.

9. Bankruptcy Information

   Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (X)
   If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets. _____

10. Provide any other names under which your business has operated within the last 10 years.
    N/A

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES (NO)

   FNI has not had any contracts terminated for cause. There have occasionally been instances where contracts may have been terminated for convenience or otherwise canceled because the client elected to stop the project.

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One (YES) NO

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

Litigation in the Past 10 Years

Plaintiff (contractor) filed a lawsuit against a municipal project owner (client), FNI and other parties involved in a public wastewater infrastructure project. Plaintiff has asserted various claims seeking recovery of damages, including allegations that it incurred additional costs and was not properly compensated due to project-related issues and conditions. **FNI disputes these allegations and is defending this matter in ongoing litigation.**

Plaintiff (private citizen, individually and as representative of the decedent's estate) filed a lawsuit against a vehicle driver, FNI and the construction contractor involved in a public infrastructure project. The claim arises from a single-vehicle accident that occurred within the construction zone. Plaintiff alleges the accident was caused by roadway conditions related to construction activities. **FNI disputes these allegations and is defending this matter in ongoing litigation.**

Plaintiff (design subconsultant) filed a lawsuit against FNI. Plaintiff was hired to be part of a project team to provide engineering services to a regional water authority (client). Plaintiff's design errors led to multiple change orders that impacted the schedule during construction. FNI has not paid the subconsultant for services related to these errors. Plaintiff alleged breach of contract for non-payment. **FNI disputes these allegations and is defending this matter in ongoing litigation.**

Plaintiffs (private citizens) filed a bodily injury lawsuit against the state agency project owner (client), design engineer, contractor, subcontractors, FNI and other parties involved in a public roadway construction project. Plaintiffs were injured in vehicle accidents that occurred within the area of construction. Plaintiffs allege that their accidents and injuries were the result of roadway conditions caused by construction of the project. FNI's role was limited to construction inspection. **FNI disputes these allegations and is defending this matter in ongoing litigation.**

Plaintiff (water utility operations employee) filed a bodily injury lawsuit against FNI. Plaintiff was injured while attempting to remove a blockage from the discharge area of a lime slurry pump at a water reclamation facility owned by a public water utility (client). Plaintiff alleges that his injuries were the result of actions taken under the direction and supervision of one of FNI's employees. **FNI disputes these allegations and is defending this matter in ongoing litigation**.

Plaintiff (contractor) filed a lawsuit against a public water utility (client), design engineer, FNI and other parties involved in a public infrastructure construction project. Plaintiff alleged that the project owner's team interfered with its means and methods during construction. **FNI resolved this matter through mediation.**

Plaintiff (private citizen) filed a lawsuit naming 42 defendants, including FNI and his hometown municipality (client). Plaintiff is contesting the municipality's 2024 city council and mayoral elections and seeking to cause a new election to be held. The lawsuit did not allege any causes of action against FNI. **FNI was dismissed from the lawsuit.**

Plaintiff (contractor) filed a lawsuit against FNI and the municipal project owner (client) of a dam and spillway rehabilitation project. Plaintiff alleged that it was not properly compensated for extra work and delays due to differing site conditions and other issues it encountered during construction. **FNI resolved this matter through mediation.**

Plaintiff (private client) filed a lawsuit against FNI. Plaintiff alleged errors and omissions in the design of wastewater handling facilities for one of its animal breeding and housing operations. **FNI resolved this matter through mediation.**

Plaintiff (private citizen) filed a bodily injury lawsuit against the driver of a motor vehicle, FNI, municipal project owner (client), contractor and other parties involved in a public roadway construction project. Plaintiff was injured when she was hit by a truck while riding a bicycle near the crosswalk of a city street intersection. Plaintiff alleged that her injuries were due to both the negligence of the driver and inadequate design and construction of the crosswalk and intersection. **FNI resolved this matter through mediation.**

Plaintiff (private citizen) filed a bodily injury lawsuit against FNI and the municipal project owner (client), design engineer, contractor and other parties involved in a public roadway construction project. Plaintiff was injured when she fell into a hole in a street while walking around a closed stretch of sidewalk. Plaintiff alleged that her injuries were the result of conditions caused by construction of the project. **FNI was dismissed from the lawsuit.**

Plaintiff (governmental entity client) named FNI in a lawsuit that claimed materials used during construction of a dam stabilization project failed to alleviate erosion issues at the dam. **FNI resolved this matter through mediation.**

Plaintiff (client, municipal project owner) filed a lawsuit against FNI, contractor and the manufacturer of wind energy equipment installed on an elevated water tank. Plaintiff alleged that the wind energy features, which were incorporated into the tank design upon the Plaintiff's request, did not perform satisfactorily. **FNI resolved this matter through mediation.**

Plaintiffs (private estates/citizens) filed a lawsuit against FNI and the local municipality (client) where a vehicle accident occurred sometime after completion of a public roadway construction project. Court documents revealed that seven teenagers got into a five-person vehicle after they all had been drinking. The driver hit a fire hydrant while speeding at over twice the posted speed limit and wrecked the vehicle. The driver was intoxicated at the time of the accident and was later sentenced on charges of aggravated assault and manslaughter. Plaintiffs alleged in part that the design and construction of the fire hydrant contributed to the accident. **FNI resolved this matter through mediation.**

Plaintiff (design subconsultant) filed a lawsuit against FNI. Plaintiff was hired to be part of a project team to provide engineering services to FNI's municipal client. Plaintiff's services failed to meet the quality level that both the client and FNI required. Client asked FNI to remove the plaintiff and did not pay FNI for those services. FNI hired another subconsultant to perform the work and the project was completed successfully. Plaintiff alleged breach of contract for non-payment. **FNI resolved this matter through mediation.**

Plaintiff (contractor) filed a lawsuit against the municipal project owner (client) of a water treatment construction project. Plaintiff alleged the project owner was responsible for various delay-related claims during construction. FNI entered into a joint defense and cooperation agreement with the owner. **FNI was dismissed from the lawsuit.**

Plaintiff (private property owner) filed a lawsuit against FNI and the local municipality (client) that hired FNI to do plat reviews for a development project adjacent to the Plaintiff's property. During the project, the developer/contractor built unapproved temporary access roads that contributed to flooding of the area. Plaintiff alleged that his property was damaged due to flooding caused by the project. **FNI was dismissed from the lawsuit.**

Plaintiff (private property owner) filed a lawsuit against FNI and the municipal project owner (client) of an easement improvement project. Plaintiff alleged that his property was damaged due to flooding caused by the project. **FNI resolved this matter through mediation.**

HOUSE BILL 89 VERIFICATION

I, Chris Trevino, PE, CCM, the undersigned representative of

Freese and Nichols, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

Edinburg, Texas 78539

Re: Request for Qualifications – "Project Management Services for the City of Edinburg"
RFQ No. 2026-8

Dear Mr. Hinojosa,

On behalf of the GDJ Team and as Legal Representative of GDJ Engineering LLC, who will be the prime consultant (executor of the contract), we enthusiastically submit this Statement of Qualifications to provide ***Project Management Services*** to the City of Edinburg.

As you are aware, the City of Edinburg is a major retail and educational hub of the Rio Grande Valley connected to I-69C. Along with the commercial aspects of your infrastructure needs, the retail and residential aspects of the City of Edinburg are rapidly growing. All growth trends in the city indicate that there will be a need for transportation and drainage infrastructure upgrades to efficiently move heavy commercial traffic to stimulate the local economy and expand local roads to ensure the safety of the traveling public.

GDJ has been in in existence since 2017 with three (3) principals consisting of Mrs. Lydia Macheska as President, Mr. Robert Macheska as Executive VP/COO and Mr. Christopher Rodriguez as Vice President. GDJ staff have been involved in project development, civil engineering, design, utility coordination, environmental analysis, and construction management in the Rio Grande Valley for over 20 years and has a combined experience of over 85 years. Key staff are native to the region, are completely familiar with the challenges posed by regional transportation and drainage issues and have developed comparable projects in the region and the state. Additionally, key staff have been intimately involved with all individual MPO's in the region, as well as the merging of the three MPO's into the current RGVMPO. In addition, we are headquartered in the City of Edinburg so we are completely invested in the City's economic growth and transportation needs.

For more than thirteen years, GDJ staff has served in an advisory position providing coordination services for various governmental entities at the local MPOs, including the City of Edinburg, the City of Mission, Hidalgo County, Hidalgo County RMA, Cameron County, and CCRMA. Duties included developing strategic plans, cost estimates, project concepts, and coordinating with staff and elected officials to prioritize local resources and ensure projects were properly programmed on the MPO planning documents.

The team understands local, state, and federal guidelines and requirements to expedite the project development. This includes the process of partnering with TxDOT to develop projects to a "Ready to Let" status where TxDOT will allow a project to utilize state and federal funds for design, Right-of-Way, construction, and construction engineering and Inspection. GDJ staff is also proficient with the coordination

TRANSPORTATIONUTILITIESDRAINAGEENVIRONMENTALSTRUCTU

of Economically Disadvantaged County or Advanced Funding Agreements with TxDOT to ensure the maximum reimbursement for project related expenses.

The GDJ Team is committed to providing excellent service to the City of Edinburg by providing accurate estimates to ensure expeditious and efficient project development. The team would use all available resources to ensure the project is shovel ready, constructed on time, within budget, and of the highest quality to maximize the benefit to the local taxpayer.

The GDJ Team also commits that all contents of this Statement of Qualifications (SOQ) are valid for at least 90 days beyond the July 14, 2026 deadline for submission. GDJ has read the sample Professional Services Agreement and the firm will meet the prerequisite insurance requirements, and, if selected, the firm agrees to enter into such agreement.

On behalf of the GDJ Team, I would again like to thank you for the opportunity to be of service to the citizens of the City of Edinburg and to help you meet our community's infrastructure needs. As legal representative of the GDJ Team, I am able execute any necessary contract documents with the City of Edinburg and serve as the authorized person to legally bind the GDJ Engineering Team to the representations put forth in this SOQ. Should you have any questions or require additional information, please do not hesitate to contact me, Robert Macheska, P.E. at (956) 603-2025.

Sincerely Yours,

Lydia Macheska

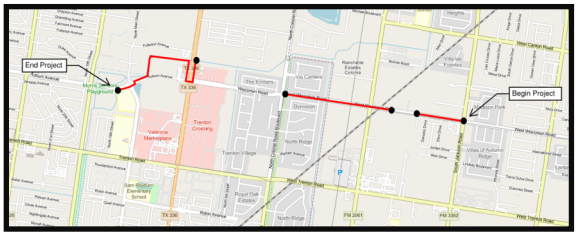
Overall Qualification of Team

Experience & History

GDJ Engineering, LLC (GDJ) is a diverse, multi-discipline engineering firm based in Edinburg, Texas at 2805 Fountain Plaza Blvd, Suite B. GDJ was formed in 2017 and currently consists of seventeen (17) full time employees that possess experience and knowledge in a wide variety of fields including street infrastructure evaluation and improvements, pavement management and improvements, erosion and sediment control design, hydrologic analysis and design, transportation planning/evaluation, traffic engineering services, traffic signal design, highway/civil, structural/bridge, environmental engineering services, and construction management.

GDJ personnel have a combined experience of over 85 years. Our engineers, designers, and environmental scientists possess the knowledge for planning, design, environmental analysis, construction, and management of the transportation infrastructure critical to the growth of our region and the state. The GDJ team is equipped to work individually or in a team environment to establish concepts, set project goals, and deliver measurable results to every assignment. As project constraints and challenges arise, our staff thrives in bringing innovative ideas to the table for creating an opportunistic solution. We believe in a balanced design concept which meets the operational objectives, produces sustainability for tomorrow, context sensitive solutions and adherence to a time-sensitive budget. Achieving these results require empowering our staff to develop unique ideas which add value for our clients and maximize their investment. GDJ staff has developed projects with a variety of public entities including local cities, counties, Regional Mobility Authorities (RMAs), Metropolitan Planning Organizations (MPOs), and the Texas Department of Transportation (TxDOT). GDJ's managerial staff is pre-certified by TxDOT in a multitude of categories, brings over 45 years of development, design, environmental and construction experience, and has completed numerous transportation infrastructure projects.



For more than 13 years, GDJ staff has served in an advisory position providing coordination services for various governmental entities at the local MPOs, including the City of Mission, Hidalgo County, Hidalgo County RMA, Cameron County, Cameron County RMA, the City of Laredo, and Webb County. Duties included coordinating with staff and elected officials to prioritize local resources and assure projects were properly programmed on the MPO planning documents. In addition to preparing project fact (budget) sheets and project planning, GDJ staff is proficient in the coordination of Advanced Funding Agreements with TxDOT. These agreements are critical to ensure TxDOT review of engineering and environmental documents. Proper coordination by firm staff of advanced planning ensured local reimbursement for locally administered projects with state and federal funding. Additionally, an analysis of existing projects sometimes allowed for projects experiencing delays to be adjusted to allow "shovel ready" projects to be constructed. Expediting the letting of projects often results in a savings in construction cost due to avoidance of escalation. The GDJ team will strive to provide the City of Edinburg with the quality of service the tax payers deserve.

Project Management Services in the Past Two Years

PROJECT: Jackson Hike & Bike Trail Phase II
LIMITS: Jackson Rd. to Morris Trail
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of McAllen
CLIENT REFERENCE: Eduardo Mendoza, P.E. City Engineer, (956) 681-1150

PROJECT DESCRIPTION:

The GDJ team is working with the City of McAllen to provide design, environmental, PS&E and construction management for phase II of the Jackson Hike and Bike Trail. The scope of the improvements include providing a 10-foot-wide shared use path and sidewalk. The purpose of the project is to improve multi-modal connectivity and access in the project area. Due to the urbanization and presence of utilities along the existing route, care was taken in the design process to minimize impacts to the properties and utilities. This project includes a pedestrian railroad crossing; therefore, engineers coordinated with the railroad companies to ensure their design standards were met. The project was allocated TASA funds that was set to expire; therefore, the team worked expeditiously with TxDOT to ensure the funding was not lost. Construction was completed in 2025.

PROJECT: Lopezville Park
LIMITS: 507 W. Minnesota Rd., San Juan, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County Pct. #2
CLIENT REFERENCE: Erika Zamora, Hidalgo County Pct. #2 Administrator, (956) 784-3510

PROJECT DESCRIPTION:

GDJ staff completed the schematic, environmental, utility coordination and PS&E on this project. The scope of the project involved providing improvements to an existing park. As part of the project, a new walking trail, a stock pond for fishing, repaved parking lot, lighting, benches, native landscape development, and other user amenities were included. The key challenges to this project was the existing historic irrigation district, TPWD pond stipulations, and transmission lines traversing the parkland. This project is currently under construction.

PROJECT: FM 1847
LIMITS: From Resaca Retreat Dr. to First St.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING LEAD: Christopher Rodriguez, P.E., CFM
CONSTRUCTION MANAGER: Eduardo Ramirez
CLIENT: CCRMA
CLIENT REFERENCE: Eric Davila, P.E., CFM (956) 621-5571

PROJECT DESCRIPTION:

Construction Engineering and Inspection Manager responsible for overseeing all aspects of construction on a project with TxDOT oversight. The scope of the project included a new five-foot-wide sidewalk along 0.65 miles of the west side of the existing roadway. The GDJ team ensured that project specifications adhered to TxDOT requirements and all activities were carried out as presented in the plans. The team prepared and submitted field reports for review, reviewed and recommended approval of contractor pay applications and provided problem solving in the field. GDJ also developed a critical path schedule and ensured the project adhered to the prescribed timeline. During the construction of the project a change order was required to remove a portion of the sidewalk at the driveway of a new development and add a new section of sidewalk in another location. This project successfully completed construction on schedule in December 2024.

PROJECT: Hidalgo County Pct. #4 Flashing Beacons
LIMITS: At 10th St. & Chapin St., W. Rogers Rd. & Depot Rd., and Carmen Avila Rd. & Mile 22 1/2 N
PROJECT MANAGER: Eduardo Ramirez
ENGINEERING LEAD: Christopher Rodriguez, P.E., CFM
CLIENT: Hidalgo County Pct. #4
CLIENT REFERENCE: Velinda Reyes, Chief Administrator (956) 383-3112

PROJECT DESCRIPTION:

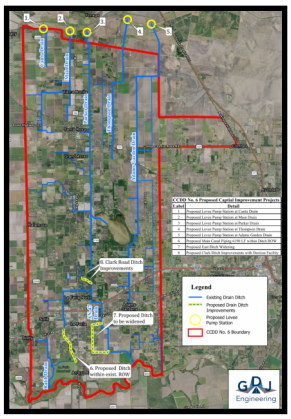
Construction Engineering and Inspection Manager responsible for overseeing all aspects of construction. The project consisted of the construction of flashing beacons at two intersections within Hidalgo County Pct. #4. The GDJ team ensured that project specifications adhered to TxDOT requirements and all activities were carried out as presented in the plans. The team prepared and submitted field reports for review, reviewed and recommended approval of contractor pay applications and provided problem solving in the field. The GDJ team successfully led the negotiation efforts with the county and contractor to add a third flashing beacon at the intersection of Carmen Avila and Mile 22 1/2. The project is complete and all three beacons are constructed and operational under budget and within the allotted contract time.

PROJECT: Las Lomas Rd.
LIMITS: From Sal Si Puedes Rd. to Camino De Norte
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
CONSTRUCTION LEAD: Eduardo Ramirez
CLIENT: Webb County
CLIENT REFERENCE: Lalo Uribe, County Judge, (956) 523-4185

PROJECT DESCRIPTION:

GDJ completed the construction management and inspection for the resurfacing, restoration, and rehabilitation of a 2.3 mile local county roadway. The team provided a bid analysis, completed field reports, attended the pre-construction meeting and biweekly field meetings. All documentation from the contractor was reviewed to ensure everything meet the plans. The GDJ team reviewed and approved pay aps, and completed inspections. The team coordinated with the materials testing company Howland Engineering for field testing of densities and hot mix.

PROJECT: Isla Blanca Park
LIMITS: Isla Blanca Park @ South Padre Island
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING LEAD: Christopher Rodriguez, P.E., CFM
CONSTRUCTION MANAGER: Eduardo Ramirez
CLIENT: Cameron County
CLIENT REFERENCE: Benjamin Worsham, P.E., (956) 247-3500



PROJECT DESCRIPTION:

GDJ is responsible for construction management and inspection of the proposed improvements to Isla Blanca Park in South Padre Island, TX. The scope of the improvements include RV site reconfiguration and construction, electrical, sanitary, and waterline upgrades and improvements. GDJ coordinated with all applicable utilities to establish a schedule to complete the work in a timely manner. Due to the nature of the project location and overlapping/conflicting utilities, GDJ has maintained an active presence throughout construction attending regular meetings, maintaining a photographic log, verifying quantities, conducting weekly inspections, and monitoring construction zones/fencing. The GDJ team maintained effective coordination with the contractor, county, and inspection team for future SpaceX rocket launches, amphitheater events, and accommodation of spring break schedules.

PROJECT: Capital Improvement Projects
LIMITS: CCDD #6, Santa Rosa & La Feria, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Cameron County Drainage District #6
CLIENT REFERENCE: Josh Ruiz, President (956) 748-2102

PROJECT DESCRIPTION:

The GDJ team is working with the CCDD #6 to provide design, PS&E, environmental analysis/permitting, and construction management for several capital improvement projects. The team provided a preliminary engineering report and phase I environmental site assessments. The GDJ team completed and obtained an IBWC license for five pump projects along the North Floodway levee. Construction on the first pump is anticipated to begin in August 2026. In addition, the team has completed environmental assessments and agency coordination for two CIP projects (Adams Garden and Parker Drain) as part of the U.S. Department of Housing and Urban Development (HUD) grant programs. The GDJ team is currently overseeing the construction management of Clark Ditch widening and detention pond in La Feria.

PROJECT: Rio Hondo City Park
LIMITS: Harris Dr., Rio Hondo, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of Rio Hondo
CLIENT REFERENCE: Ben Medina, City Administrator, (956) 748-2102

PROJECT DESCRIPTION:

The GDJ team is working with the City of Rio Hondo to provide design, PS&E and construction management at the existing boat ramp park. The scope of the improvements include providing walking trails, a kayak launch, restroom facilities, bird blinds, parking lot resurfacing, new RV parking, native landscaping and a new playground. The purpose of the project is to provide improvements that maximize the park space, while providing amenities unique to the area. Due to the location of the property, state and federal permits/approvals (i.e. TGLO & USACE) are required. Funds for this project are from a TPWD grant and a detailed budget was created to ensure the project would not exceed the funding. The project is currently under construction and is anticipated to be complete by December 2024.

Firm's Uniqueness to Best Perform these Services for the City

It is GDJ's philosophy to provide the client with the most technically competent, timely and cost effective work product possible. GDJ believes in open communication with the client and understands that direct and constant lines of communication are imperative for a project's success; both in schedule and budget. The GDJ team has experience and understanding in the overall project process from planning to post-construction, including the intricate technical details necessary for the successful completion of a project. The GDJ team has the ability to analyze, plan, and prepare projects from cradle to grave to ensure the most efficient processes and successful completion. The overall commitment that the GDJ Team provides to our projects is unsurpassed. Our attention to detail and rapid response to issues is a staple of the GDJ Team Philosophy, as we have an excellent track record for successful projects and extremely satisfied clients.

The GDJ Project Management Team equipped to work individually or in a team environment to establish concepts, set project goals, and deliver measurable results to every assignment. As project constraints and challenges arise, our staff thrives to bring innovative ideas to the table for creating an opportunistic solution. We believe in a balanced design concept which meets the operational objectives, produces sustainability for tomorrow, context sensitive solutions and adherence to a time-sensitive budget. Achieving these results require empowering our staff to develop unique ideas which add value for our clients and maximize their investment. GDJ staff has developed projects with a variety of public entities including local cities, counties, Regional Mobility Authorities (RMAs), Metropolitan Planning Organizations (MPOs), and the Texas Department of Transportation (TxDOT). GDJ's managerial staff is pre-certified by TxDOT in a multitude of categories, brings over 45 years of development, design, and construction experience, and has completed numerous public and transportation infrastructure projects.

The GDJ Team is prepared to provide detailed construction management, inspection, and materials testing services to the City of Edinburg, including but not limited to public sector projects, development/ implementation of SOPs, pre- and post-construction services, construction phase management, construction cost estimates, plans specifications, and estimates (PS&E), bid document preparation and bid analysis, report and document preparation, scheduling, risk management, construction management/ engineering, and inspection. The GDJ Team is experienced and knowledgeable regarding TxDOT quality assurance compliance and NEPA processes for a variety of project types.

GDJ can provide additional consultation in the following areas as needed: funding and planning coordination with local, state and federal entities (as needed), project development, project management, cost estimating, environmental analysis and permitting, hydrologic and hydraulic engineering evaluations, drainage design. If required, the GDJ Team can also provide foundation and structural design, surveying, pavement design, and MEP.

The GDJ team can meet any specification required and will not enter into any agreement without 100% confidence that the work product will exceed the city's expectations and requirements. GDJ has several projects that are in the process of completion and will be able to concentrate the majority of their time to the City of Edinburg. This will be accomplished with GDJ's team of qualified professionals that are amply prepared to provide the City of Edinburg with outstanding customer service and technical skills.

The GDJ team has the proven knowledge and capabilities of providing superior engineering services to the City of Edinburg.

The GDJ Engineering Team has the abilities and qualifications to provide the City of Edinburg with the following project management services:

Project Management & Planning Services

- Program & Project Management
- General Program Management (To Ensure Design/Construction Meets Requirements for Reimbursements on Reimbursable Funds Projects)
- Project Management of all Civil, Drainage, & Transportation Projects
- Planning Services

Civil Design Services

- Preliminary Engineering & Hydraulic Analysis
- Feasibility Evaluations & Alternatives Analysis
- Geometric Schematic & Typical Sections
- Utility Investigations & Analysis
- ROW Investigations
- Environmental Reports, Permitting, & Public Involvement
- Geotechnical Investigations
- Plans, Specifications & Estimates (PS&E)
- Geometric, Structural & Pavement Design
- Hydrologic & Hydraulic Design
- Environmental Design (SWPPP, EPIC Sheets)
- Traffic Design (Traffic Counts, Analysis of Traffic Movements)
- Design Packaging (Specifications, Construction Estimates, General Notes, Special Provisions)
- Bid Assistance

The GDJ Team members have developed multiple projects with governmental agencies including: City of Pharr, City of Mission, Cameron County, Cameron County Regional Mobility Authority (RMA), Hidalgo County, Hidalgo County RMA, Hidalgo County Drainage District #1 and TxDOT (Pharr and San Antonio Districts). In addition, our team members have directly coordinated with multiple regulatory agencies such as the TxDOT, U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, Texas Commission on Environmental Quality, Texas Historical Commission, and may others. Currently, the GDJ Team has no past or pending litigation against or involving its agents or employees with respect to any work we have performed.

The GDJ team has experience and understanding in the overall process from planning to construction, including the intricate technical details necessary for the successful completion of a project. The comprehensive project steps include evaluating the existing ROW and utilities, identifying environmental constraints, delineating drainage areas, evaluating and optimizing a drainage plan, developing preliminary plans and estimates for the proposed improvements, alternatives analyses, completing the environmental process, and finalizing the plans and estimates. The GDJ team is also prepared to complete any geotechnical studies associated with the project and is fully staffed to oversee the construction of the projects. The team will coordinate with the city throughout the entire process to ensure their needs and concerns are addressed.

The GDJ Team will assure the quality of deliverables, engineering services, and environmental services by implementing a proven project specific QA/QC work plan based on the following principles: Knowledge/Experience, Coordination/Communication, Constructability Review, Accuracy/ Completeness, and Thorough Design/Environmental Schedules.

Office Location

The GDJ Team is very familiar with the local geographic area. The GDJ office is located just south of the Canton Road and McColl Road intersection within the city of Edinburg and the principals live within 10 miles of the office. As persons who both live and work in the area, city projects are of great interest to the team. As a local firm with staff from all areas of the Rio Grande Valley, the GDJ team is familiar with the City of Edinburg and its geographic attributes.

The team has completed several regionally significant projects in Hidalgo County, South Texas and the state. GDJ is also well acquainted with the TxDOT Pharr District and have gained a thorough understanding of the unique problems that we are faced with in the Rio Grande Valley. We have witnessed first hand the issues the valley has faced over the years with massive rainfall events and, due to the flat topography of the region, the local/regional flooding that has occurred. We are a completely local firm in the Rio Grande Valley and understand the area and the engineering needs of the city.

Approach to Handling Part-time Staffing Needs for Smaller Assignments

GDJ assures the city that all staff included in the proposal for this pursuit will have sufficient availability to complete the project on time and within the proposed budget. The current workload that GDJ has will allow us to dedicate more than enough time to complete projects within schedule and without delay. GDJ commits to being ready and able to begin work on the project immediately after successfully negotiating a contract for said services. We stand ready and prepared to make all necessary staff available to efficiently complete the proposed projects. Should the need arise for part time staffing, GDJ has the resources and access to knowledgeable experts that would be available to complete smaller assignments. In addition, the GDJ team is adequately staffed to provide concurrent work on various projects.

University of Texas – Pan American

EXPERIENCE

Mr. Macheska has over 27 years of experience in the design and management of various public improvement projects with both state and MPO funding. For the past 6 years Robert has served as Executive Vice President/COO for GDJ Engineering, LLC. He had previously worked for both the Texas Department of Transportation and L&G Engineering which provided him with excellent hands on experience as to how multiple government entities function.

As a Construction Project Engineer for TxDOT, Mr. Macheska conducted pre-construction meetings, monitored contractor's compliance with Plans and Specifications, resolved differences between the contractor and the inspectors, authorized payments of estimates to contractors, coordinated work with municipal and county governments, oversaw the inspection and construction of roadway and bridge projects and traffic control. He was also responsible for all change orders and any public involvement.

PROJECTS

I Road Hike & Bike, City of Pharr
Mr. Macheska was the Program Manager. The scope of the project included the completion of the schematic, environmental, utility coordination and PS&E on widening of 4.5 miles of an existing roadway to accommodate a continuous left turn lane, shoulders, and a shared-use path for cyclists and pedestrians.

Dana Avenue, CCRMA, Brownsville, Texas
Mr. Macheska was responsible for the scope of services that included the completion of the schematic, environmental, & PS&E on 2.4 miles of a two lane rural roadway. The scope of the project included the addition of a continuous left turn lane, shoulders, a sidewalk, a SUP, and intersection improvements. Construction is anticipated to begin in September 2026.

FM 1847 Sidewalks, Los Fresnos, Texas
Mr. Macheska was responsible for the scope of services that included the completion of the schematic, environmental, utility coordination, and PS&E for a TASA sidewalk project along an existing state roadway. The scope of the project included providing a five-foot-wide sidewalk and pedestrian signal poles at major intersections, and improvements to an existing crosswalk at the high school.

	Jackson Hike & Bike Phase II, McAllen, Texas Mr. Macheska was responsible for the scope of services that included design, environmental, PS&E and construction management for phase II of the project. Included providing a 10-foot-wide shared use path and sidewalk to improve multi-modal connectivity and access in the project area. This project includes a pedestrian railroad crossing; therefore, engineers coordinated with the railroad companies to ensure their design standards were met. **Moore Road, McAllen, Texas** Mr. Macheska was responsible for the scope of services that included the widening and reconstruction of 2.3 miles of a two lane urban roadway to include a continuous left turn lane & shared use path. The project provided a connection between an existing Hike and Bike Trail.

EXPERIENCE

Mr. Rodriguez has over 21 years of experience in design and construction of various public improvement projects. For the past 6 years Chris has served as Vice President and Director of Engineering for GDJ Engineering, LLC. He had previously worked for both the Texas Department of Transportation (San Benito Area Office) and private consultant section which provided him with excellent hands-on experience as to how to develop projects from conception to completion within multiple governmental entities. He has worked on multiple aspects of transportation, drainage, municipal, and private developer projects, from planning to PS&E preparation, Hydrology & Hydraulics Design to Construction Phase services. His project management and design experience includes supervision of production staff, project design, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, PS&E preparation, public involvement, and construction management and inspection. Chris has managed multiple concurrent projects and production staff groups in planning, design, and construction under his direction.

As a Construction Project Manager for TxDOT and in the private consultant sector, Mr. Rodriguez conducted pre-construction meetings, monitored contractor's compliance with Plans and Specifications, resolve project concerns, measure and verify contractor pay estimates, coordinate work with municipal, county, and state governmental agencies, oversee construction project inspections, and manage construction record keeping. Managed projects include rural and urban roadway facilities, drainage projects, commercial and residential developments, municipal and recreational facilities, etc.

PROJECTS

10th Street Ext from SH 107 to FM 1925 in Edinburg, Texas
Construction manager responsible for managing the project construction to meet all state requirements and specifications. Mr. Rodriguez's responsibilities also included managing a team of inspectors and materials testing subconsultants daily throughout the project duration of 20 months. The project consisted of constructing approximately a 2-mile 84 foot urban roadway inclusive of constructing an asphaltic roadway, bridge, storm sewer, traffic signals, pedestrian facilities, drainage and irrigation structures, and tie ins into existing county and state roadways. The project also required managing the project to adjust the project plans to accommodate field condition issues as a result of seasonal irrigating from adjacent properties and to resolve the issue by

	designing a drainage system (French Drains) to prevent future undermining of the roadway substructure. Responsibilities also included reviewing and approving contractor monthly payment estimates. **Valencia Dr. From FM 510 to FM 2480 in Bayview, Texas** Construction manager responsible for managing full reconstruction of a 2 lane rural roadway including managing a team of inspectors and material testing subconsultants to assure the project is constructed in accordance to the town's and county's specifications and requirements. The project included managing the contractor and provide a traffic control to continuously provide access to local traffic and residents throughout the duration of the project while conducting full reconstruction operations. The project also included coordinating with utility owners and the irrigation district to locate and develop a plan for their underground lines to remain in place or be adjusted while minimizing impacts to their services. Mr. Rodriguez's responsibilities also included providing monthly status reports and also to review and approve contractor monthly payments. Project record keeping services were also provided as part of managing the construction for this project. **Jackson Hike & Bike Phase II, McAllen, Texas** Lead Project Engineer responsible for the scope of the project that included design, environmental, PS&E and construction management for phase II of the project. Provided a 10-foot-wide shared use path and sidewalk to improve multi-modal connectivity and access in the project area. This project included a pedestrian railroad crossing; therefore, engineers coordinated with the railroad companies to ensure their design standards were met. **Isla Blanca Park, South Padre Island, Texas** Lead Project Engineer responsible for. Construction Management and inspection of the proposed improvements at Isla Blanca Park in South Padre Island, TX. The scope of the improvements include RV site reconfiguration and construction, electrical, sanitary, and waterline upgrades and improvements. GDJ coordinated with all applicable utilities to establish a schedule to complete the work in a timely manner. Due to the nature of the project location and overlapping/conflicting utilities, GDJ has maintained an active presence throughout construction attending regular meetings, maintaining a photographic log, verifying quantities, conducting weekly inspections, and monitoring construction zones/fencing. The GDJ team maintained effective coordination with the contractor, county, and inspection team for future SpaceX rocket launches, amphitheater events, and accommodation of spring break schedules.

EXPERIENCE

Eduardo Ramirez has 30 combined years of experience in maintenance, construction inspection, project management in road construction, drainage, structural-bridge, and vertical construction projects. Ramirez's relevant construction management and inspection experience and duties include, but are not limited to, the following:

- Make sure all work was done according to plans and specifications
- Pay all work that contractor performed that was approved
- Coordinate all testing that was required by the specs
- Agreeing and confirming Pay App from Owner
- Authorizing payments for Subcontractors, Vendors and Suppliers
- Schedule delivery of suppliers
- Schedule Subcontractors for their work
- Approve all timesheets and equipment charges and run cost reports to make sure we are on budget
- Track all materials that showed up
- Approve pay apps for suppliers, vendors and subcontractors; among others

RELEVANT PROJECTS

Mr. Ramirez has construction management and inspection experience on the following projects:

- San Jose Ranch Road – Construction of a new Roadway that consists of Subgrade, Flexbase, Covert Structures and Irrigation Structures
- Cameron Co. Pct. 4 Various Roads – Consisted of Roadway resurfacing, Restoration and Rehabilitation and Drainage Outfalls
- Rio Hondo Boat Ramp Park – Construction of an ACP Access Roadway, RV Sites with Hookups, Landscaping, Kayak Launch, Restroom Facility, Pavilion, Fishing Pier, Pedestrian Trails, Lighting Improvements, Signing and Resurfacing
- Hidalgo Co. Pct#2 Parking Lot Improvement – New Parking Lot with Drainage, Lime Treat Subgrade, New Flexbase, Lighting Improvements, Hot Mix
- FM 1847 Los Fresnos Sidewalk – Construction of Curb Ramps, Sidewalks, Signage, Striping, and Miscellaneous Pedestrian Elements along FM 1847

Angel Moreno has 10 combined years of experience in maintenance, construction and inspection in road construction and drainage projects. Mr. Moreno's relevant construction management and inspection experience and duties include, but are not limited to, the following:

- Make sure all work is done according to plans and specifications
- Pay all approved contractor work performed.
- Coordinate all testing that was required by the specs
- Agreeing and confirming Pay App from Owner
- Authorizing payments for Subcontractors, Vendors and Suppliers
- Track all materials that showed up
- Approve pay apps for suppliers, vendors and subcontractors; among others

RELEVANT PROJECTS

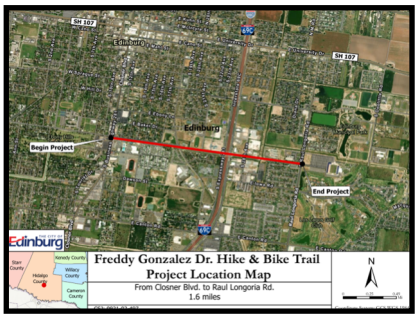
Mr. Moreno has construction management and inspection experience on the following projects:

- Rio Hondo Boat Ramp Park – Construction of an ACP Access Roadway, RV Sites with Hookups, Landscaping, Kayak Launch, Restroom Facility, Pavilion, Fishing Pier, Pedestrian Trails, Lighting Improvements, Signing and Resurfacing
- Hidalgo Co. Sheriff's Department East & West – New Parking Lot with Drainage, Lime Treat Subgrade and New Flexbase, Lighting Improvements, RCP & Headwall, Hot Mix
- Hidalgo Co. Pct#2 Parking Lot Improvement – New Parking Lot with Drainage, Lime Treat Subgrade, New Flexbase, Lighting Improvements, Hot Mix
- FM 1847 Los Fresnos Sidewalk – Construction of Curb Ramps, Sidewalks, Signage, Striping, and Miscellaneous Pedestrian Elements along FM 1847
- Hidalgo Co. Drainage District #1 Alamo Expressway Drain Ph 2 – Widening and Sloping of existing ditch, Drainage Structures, Rip Rap
- Isla Blanca Park – Construction Management and Inspection of improvements include RV site reconfiguration, construction, electrical, sanitary, waterline upgrade and improvements

Section II
Ability to meet Schedules and Deadlines

GDJ has the staff and capabilities to successfully address the city's engineering needs and schedules. GDJ has many years of experience developing, monitoring and updating critical path method schedules for multiple types of projects.

It is GDJ's philosophy to provide the client with the most technically competent, timely and cost effective work product possible. GDJ believes in open communication with the client and understands that direct and constant lines of communication are imperative for a project's success; both in schedule and budget.



GDJ creates realistic project schedules that are specifically designed to allow certain processes to run concurrently to ensure efficiency. For example, during the environmental process, agency coordination often occurs concurrently with the submission of technical reports, while the design team refines the schematic. These thorough schedules are discussed with the city and oversight agency to obtain agreement on major project milestones and document review/response times. The schedules are established early in the project process and evolve, as needed, to ensure the project proceeds in a timely fashion. The client is kept updated throughout the project process. Coordination and communication with oversight agency project managers is key to ensure the project remains on track. GDJ's strict adherence to established deadlines reflects our commitment to our clients.

GDJ has an established and proven QA/QC process based on knowledge and experience that reduces or eliminates multiple deliverable submittals. This process reduces review times and allows the project to progress at the quickest rate possible. Our extensive project experience allows us to understand the needs/operations of oversight agencies and incorporate this knowledge into our processes.

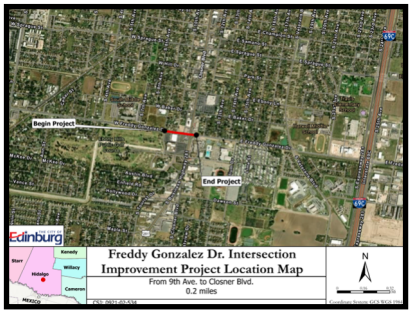
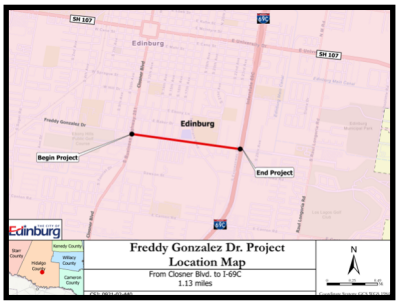
Stability and References



PAST PROJECTS WITH THE CITY OF EDINBURG

PROJECT: Freddy Gonzalez Dr. Hike & Bike Trail
LIMITS: From Closner Blvd. to Raul Longoria Rd.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
PROJECT DESCRIPTION:

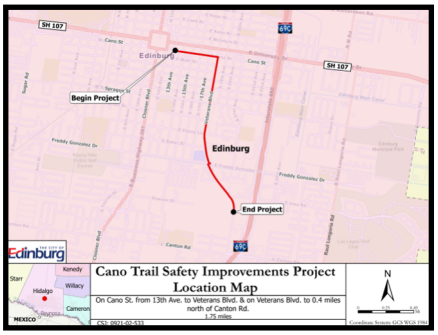


GDJ aided in the NEPA environmental analysis and document preparation. The project included providing a new shared-used path for pedestrians and bicyclists along the existing Freddy Gonzalez Dr. The purpose of the project is to improve multi-modal connectivity and access in the project area. The GDJ team coordinated the scheduling with TxDOT to ensure the project maintained its funding. Five environmental technical reports, along with a scoping document were prepared and submitted to TxDOT. The project was environmentally cleared in November 2024.

PROJECT: Freddy Gonzalez Dr. Intersection Improvement
LIMITS: From 9th St. to BUS 281
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
PROJECT DESCRIPTION:

GDJ team aided the city in the NEPA environmental analysis and document preparation. The scope of the project included providing an 8-foot-wide ADA-compliant sidewalk adjacent to the existing roadway, removal of an existing curb, and relocation of a power pole, curb inlet and traffic light. The GDJ team implemented an accelerated environmental schedule in coordination with TxDOT to ensure the project funding remained intact. The project successfully obtained environmental clearance in December 2025.

PROJECT: Freddy Gonzalez Dr.
LIMITS: From BUS 281 to I-69C
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
PROJECT DESCRIPTION:



GDJ aided in project development, funding analysis, MPO coordination, design/schematic preparation, and environmental document preparation. The scope of the project included providing a continuous left turn lane, right turn lanes at intersections, an intersection improvement at Veterans Blvd., and incorporation of the Freddy Gonzalez Hike and Bike Trail. The GDJ team conducted a Notice and Opportunity to Comment as part of the environmental process for the project. The project was environmentally cleared in June 2026 and is currently in the PS&E stage.

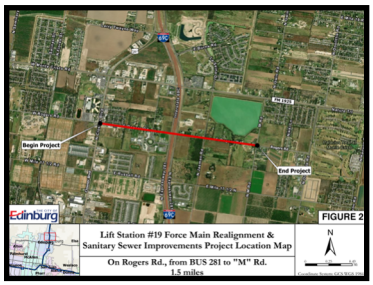
PROJECT: Cano St. & Veterans Blvd. Trail

LIMITS: On Cano St. from 13th Ave. to Veterans Blvd., then on Veterans Blvd. to 0.4 mi. north of Canton Rd.

PROJECT MANAGER: Robert Macheska, P.E., CFM

ENVIRONMENTAL LEAD: Corina Argullin

PROJECT DESCRIPTION:



GDJ aided the city with the NEPA environmental analysis and documentation preparation. The scope of the project included providing an 8-foot-wide shared use path and pedestrian poles along the existing roadways. The project required a section 4(f) analysis due to the presence of the Freddy Gonzalez Memorial Park, Freddy Gonzalez Hike & Bike Trail, and the Louisiana-Rio Grande Canal Company Irrigation District-National Historic District. The project was successfully environmentally cleared in March 2026.

PROJECT: Lift Station #19 Force Main Realignment & Sanitary Sewer Improvements

LIMITS: From BUS 281 to "M" Road

PROJECT MANAGER: Robert Macheska, P.E., CFM

ENVIRONMENTAL LEAD: Corina Argullin

PROJECT DESCRIPTION:

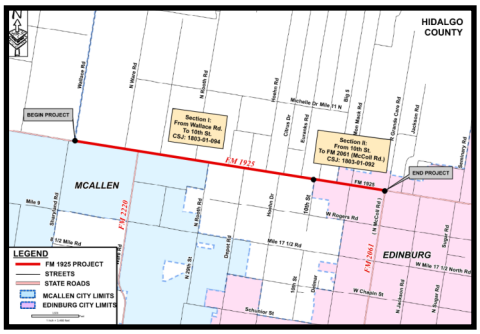
GDJ prepared the environmental assessment (EA) and agency coordination documentation for a U.S. Department of Housing and Urban Development (HUD) Community Project Funding grant program. The GDJ team completed biological resources and hazardous materials summary reports in support of the EA. They oversaw the preparation of a cultural resource analysis and prepared the request for SHPO consultation. The team prepared the letters and materials for coordination with USFWS, THC, and four Native American tribes. The final completed documentation was submitted in April 2025.

PROJECT: Los Venados Elevated Storage Tank & Smart Meters

LIMITS: 0.1 mile south of the US 281 & Los Venados Intersection

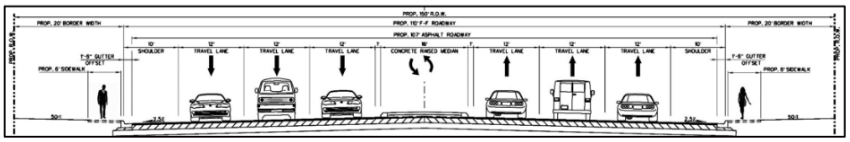
PROJECT MANAGER: Robert Macheska, P.E., CFM

ENVIRONMENTAL LEAD: Corina Argullin



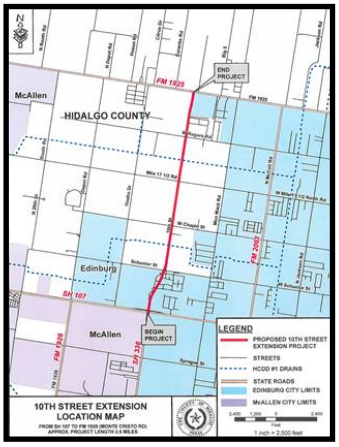
PROJECT DESCRIPTION:

The GDJ team prepared a preliminary categorical exclusion analysis and CE form as part of the City's application for a Texas Water Development Board (TWDB) Water Supply and Infrastructure Grant. The scope of the project includes upgrading the existing damaged tank to a water tower and converting approximately 690 traditional water meters to smart meters. The GDJ team submitted the preliminary documentation to the city for reivew further processing in June 2026.



PAST PROJECTS WITH THE CITY OF EDINBURG (CONTINUED)

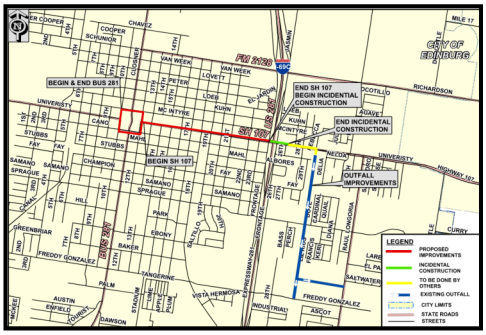
PROJECT: FM 1925
LIMITS: From Wallace Rd. to McColl Rd.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County (ICA with Edinburg)



PROJECT DESCRIPTION:

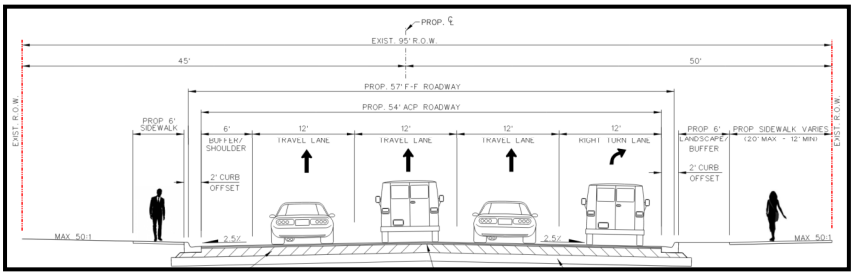
GDJ staff worked on the project development and funding, schematic completion, environmental document preparation, utility coordination, drainage design and PS&E development. The project included widening and reconstructing the existing roadway to six lanes with a median and correcting the misaligned intersection at Mon Mack Rd.

PROJECT: 10th Street Extension
LIMITS: From SH 107 to FM 1925
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County (ICA with Edinburg)



PROJECT DESCRIPTION:

GDJ staff completed the project development and funding, schematic, environmental, utility coordination and PS&E on this project. A key challenge to this project was the undermining of the existing roadway base from surrounding farm land irrigation operations. Once we identified the problem we designed a French drain system to remove the penetrating waters prior to infiltration into the roadbed.



PROJECT: SH 107
LIMITS: From BUS 281 to I-69C
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County (ICA with Edinburg)

PROJECT DESCRIPTION:

GDJ staff worked on the project development and funding, schematic completion, and environmental document preparation. The project included converting the existing roadway to a one-way traffic operations, reconstructing SH 107 within existing ROW, removing/replacing the existing storm drain system, and improving the existing drainage ditch.

RE: Letter of Recommendation
Project Management Services
RFQ-2026-8

Dear Mr. Hinojosa:

The purpose of this letter is to strongly recommend GDJ Engineering (GDJ) based on Webb County's previous and long-standing experience with GDJ Engineering.

GDJ has provided project management, preliminary engineering, construction management, and environmental services for several projects for Webb County and Webb County is very pleased with the quality of work that GDJ provides. Their responsiveness and commitment to successful project delivery sets them apart from many others.

I, in my professional capacity, am happy to strongly recommend GDJ Engineering for project management services for the City of Edinburg. Feel free to contact me at 956-523-4600 or auribe@webbcountytx.gov should you have any questions.

Respectfully,

Adelaido Uribe, III

RFQ

Request for Qualifications
"Project Management Services"
RFQ# 2026-8

Dear City of Edinburg,

The City of Edinburg is looking for the most qualified engineering firm to provide Project Management Services for the City of Edinburg. Millennium Engineers Group, Inc. (MEG) is that firm. We believe that MEG is the right choice for the City of Edinburg based on the following:

History of Stability and Strong Texas Presence

MEG is a locally owned corporation that has never been sold, acquired, or merged with other entities. We are confident that the people and company you see today will be the people and company you see for the life of your projects. Furthermore, Mr. Raul Palma, P.E. CEO and Project Manager of MEG has 39 years of engineering experience in the State of Texas and is a former TxDOT Pharr Materials Engineer. MEG has offices in Pharr, Laredo, San Benito, Odessa, Houston, San Antonio, and Austin Texas with fully functional and accredited testing labs. MEG is stable and we have invested in the future. We are consistent and we are not going anywhere. We believe MEG has placed together a team that is the most highly qualified to perform the services requested by the City of Edinburg. Our firm is a certified Disadvantage Business Enterprise (DBE), Minority Business Enterprise (MBE) and Historically Underutilized Business (HUB).

Experienced Project Manager

As your project manager, I have spent over 39 years working on Texas projects including 21 years as the CEO and Chief Engineer of MEG completing various successful projects within all of Texas.

Pride in Execution

MEG is acutely aware of the financial and management challenges facing most entities these days.

We are committed to:

- Working to identify and implement projects in the most cost-effective manner.
- Communicating closely with the client to meet your requirements and schedule.
- Knowledge and geotechnical solutions for cost effective construction methods.
- Dedicated to quality: AASHTO and USACE accredited laboratory.
- The most AASHTO accreditations of any laboratory in Texas.

Our team is thrilled about the opportunity to serve the City of Edinburg and we are ready to start immediately upon selection. If you have any questions or would like to discuss our approach or team capabilities in greater detail, please contact me at any time at apalma@megengineers.com. Thank you for your consideration.

Respectfully,
MILLENNIUM ENGINEERS GROUP, INC. TBPELS Firm No. F-3913

ABOUT
MEG ENGINEERS

Government and municipal agencies, educational institutions, architects, engineers, real estate developers, constructors, and private sector clients. Our strength is our people; combining their experience and collaborating as a unit enables us to quickly identify our roles and deliver accurate cost-effective deliverables. Whether defining a new working relationship or continuing to the next project our mission remains the same: to achieve yours.

MEG Corporate Headquarters – Pharr, Texas

History

MEG was founded in 2001 by Mr. Raul Palma, P.E. on the principles of honesty, integrity, and service. The goal to provide innovative geotechnical and material testing services, continue to raise the level of quality in the local profession, and make a difference in the community. Today,MEG provides a full range of integrated geotechnical engineering and consulting services, construction material engineering and testing, environmental engineering, forensic testing, and consulting services. Our philosophy and practices have been positively reflected in both client and employee loyalty and contribute to a steady growth in a diversity of projects.

MEG is accredited by the American Association of State Highway and Transportation Officials (AASHTO) and the United States Army Corps of Engineers (USACE). MEG is audited by an independent AASHTO & USACE auditor, as part of our accreditation process.

MEG meets the requirements for ASTME329 Standard of Recommend Practice for Inspection and Testing Agencies, and maintains yearly proficiency testing samples to AASHTO, USACE, TxDOT, and TxAPA.

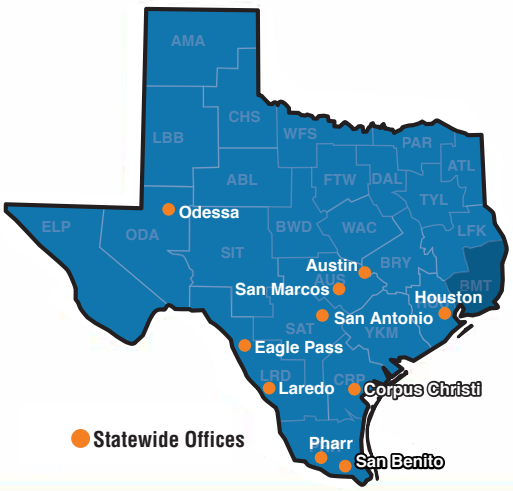
MEG COMPANY OBJECTIVE

MEG is a minority owned and operated business certified as:

- Historically Under-utilized Business (HUB)
- Small Business Enterprise (SBE)
- Minority Business Enterprise (MBE)
- Emerging Small Bus. Enterprise (ESBE)
- Hispanic American Bus. Enterprise (HABE)
- Disadvantaged Business Enterprise (DBE)



MEG has the most AASHTO accreditations of any laboratory in the State of Texas.

LABORATORY EQUIPMENT

MEG meets the requirements for ASTME329 Standard of Recommend Practice for Inspection and Testing Agencies, and maintains yearly proficiency testing samples to AASHTO, USACE, TxDOT, and TxAPA.

Our Project Team

MEG proposes to utilize the latest measurement techniques to effectively perform the services of this agreement with our current staff as proposed in our organizational chart. We understand that we need to respond quickly to some service requests, and we are practiced in having staff available on short notice, if necessary. Our current and projected workloads are such that we are confident of our ability to the City of Edinburg expectations in terms of having appropriate staff resources available when they are needed. The organization chart below reflects the staff we anticipate using for the proposed projects; however, we have additional personnel that can also be utilized if needed.

> "I count of the experience and expertise that Millennium Engineers provides- just as a good foundation is critical to a structure, a good geotechnical study is critical to a good foundation design."

PROFILE

Mr. Palma serves as office manager of MEG's Pharr, Texas office. He has over 17 years' experience in the engineering industry and vast knowledge in geotechnical engineering and construction materials testing in the Texas. Geotechnical projects that Mr. Palma has been involved with including mixed-use developments, urban mid-rise buildings, educational facilities, airport facilities, parking garages, commercial low-rise to mid-rise buildings, water and wastewater treatment facilities, elevated water towers, industrial facilities, multi-family developments, churches, residential subdivisions, and general retail centers. Pavement design projects that Mr. Palma has been involved with include highways, industrial parks, heavy-duty brick paving, freight centers and industrial applications.

As President, Mr. Palma's responsibilities include coordination of field personnel, communication with the client, generation of geotechnical engineering reports, evaluating laboratory soil testing, and scheduling and managing field personnel. Palma's responsibilities as a Construction Materials Engineer include coordination of field personnel, communication with the client, generation of daily logs and weekly status reports, training of technicians, evaluating laboratory and field construction materials testing data, and scheduling and managing field personnel.

PROFILE

Mr. Palma is a licensed Professional Engineer with over 43 years of experience in geotechnical engineering, construction materials testing, management, and engineering design of highways, streets, and utilities. Mr. Palma has directed and completed a wide variety of geotechnical projects throughout the Central Texas region. As Chief Geotechnical Engineer of the San Benito, Texas office he is responsible for overall operations management of the San Benito Office.

As geotechnical project manager, he is responsible for coordination and completion of geotechnical engineering projects. His experience includes subsurface explorations, laboratory testing, foundation investigation and design; slope stability assessments and remediation design, pre-load fill design; geotechnical plans and specifications preparation; and construction monitoring. Client relationships have included city and county agencies; engineering and architectural firms; municipal and utility districts, as well as private developers and constructors.

During Mr. Palma's employment with the Texas Department of Transportation (TxDOT), Mr. Palma gained an extensive background in the area of geotechnical and materials engineering serving as the District Materials Engineer for a centralized laboratory for TxDOT in the Pharr District located in Pharr, Texas. As the District Materials Engineer he was responsible for overseeing the testing and approval of materials for all construction projects in the Cameron, Hidalgo Starr, Zapata, Jim Hogg, Brooks, Willacy and Kennedy counties. At the end of his tenure with TxDOT, the Pharr District had a construction program of approximately $170 million dollars of construction per year. He oversaw all the geotechnical exploration and soil testing for all bridge and retaining wall structures in these same counties. Mr. Palma also served as the assistant to the State Concrete and Physical Testing Engineer at the Materials & Tests Division of TxDOT and during this period he gained extensive experience in concrete, concrete admixtures, reinforcing steel, and pre-stressed steel. Mr. Palma's extensive experience in the area of materials and geotechnical engineering gives our firm a unique ability to provide services of the highest professional caliber.

PROFESSIONAL EXPERIENCE

Dr. Pham serves as Geotechnical Engineer of MEG's Pharr, Texas office. He has over 21 years of experience in the engineering industry and vast knowledge in geotechnical engineering. Projects that Dr. Pham has been involved with include urban High-rise buildings, urban mid-rise buildings, commercial low-rise to mid-rise buildings, water and wastewater Pipelines, Advanced In-situ testing, Deep Foundation Design, Retaining Walls, and Braced Excavations/ Deep Excavations/ Tunnels.

Dr. Pham's responsibilities as a Geotechnical Engineer include geotechnical report generation and review, foundation design, review of lab and in-situ testing, and oversight of advanced in-situ.

PROJECT EXPERIENCE

URBAN HIGH-RISE BUILDINGS

- 30-40 story The hotel, office, trade center, education center, and apartment complex – Hanoi, Vietnam
- 40 story Ngan Binh high-rise buildings (Golden Hill-Alpha 4) - District 1, Ho Chi Minh City
- 25 story office building of Vietinbank Da Nang Hai Chau, Da Nang
- 20 story Office and Trade Center high-rise building Lang Ha, Hanoi
- 9 story Hanoi National University's office building, stadium, classroom, and student union – Hanoi, Vietnam

DEEP FOUNDATIONS

-in-situ pile load test and bearing capacity characteristics of steel piles with wings – Hanoi, Vietnam
-high-rise building of Vietinbank Da Nang – Hai Chau, Da Nang-Crashing House of Nghi Son Cement Plant – Thanh Hoa Province
-hyper-mega drilled shafts in Vietnam – Hanoi, Vietnam
-Control Building and Power Building at Thi Vai Liquified Natural Gas import terminal – Vung Tau Province, Vietnam

RETAINING WALLS

-Federal Highway Administration Composite behavior of geosynthetic-reinforced soil mass
Report No. FHWA-HRT-10-077

BRACED EXCAVATIONS/ DEEP EXCAVATIONS/ TUNNELS

-Lateral Movement measurements and minimizing damage of existing buildings due to construction of underground tunnel Phase 1 – Ho Chi Minh City
-Excavation and soil improvement under the wastewater pipes along the Quan Truong River – Nha Trang, Vietnam
-Design and Construction of Excavations in Complex Soil Condition – Ministry of Construction project
-Design of diaphragm walls of basements at Royal City: The hotel, office, trade center, education center, and apartment complex – Hanoi, Vietnam
-Technical Problems for underground construction projects in Urban Areas – Vietnam National Project

June 9, 2022

TO: Whom it may Concern

This is in reference to construction materials testing and geotechnical services performed for the City of Weslaco by MEG Engineers between the period of May of 2020 and May of 2022.

During this timeframe, MEG Engineers has met our expectations completing all work in a timely and professional manner. MEG has been very responsive to all our work requests and provided the services in timing and sequence with project expectations. As a matter of fact, due to the success of their work, the city has recently approved a one-year extension to their existing contract.

We are pleased to offer this letter of recommendation for their great work with the city.

If you have any questions or would like additional information concerning MEG's work with the City of Weslaco, please do not hesitate to contact me at (956)969-1533 or email me at aaldana@weslacotx.gov.

Sincerely,

Albert J. Aldana, P.E.
City Engineer

BROWNSVILLE
PUBLIC UTILITIES BOARD

January 7, 2020

RE: Letter of Recommendation – Millennium Engineers Group, Inc.

To Whom It May Concern:

On behalf of the Brownsville Public Utilities Board (BPUB) Special Projects Department and Water/Wastewater Engineering Department, the BPUB submits this letter of recommendation for Millennium Engineers Group, Inc. (MEG).

MEG has assisted the Special Projects department and the Water/Wastewater Engineering Department with geotechnical reports and materials testing services for the past several years. They have been involved with numerous projects such as Wastewater Lift Stations Rehabilitation projects and the Odor Control Improvement project. MEG is also one of our on-call material testing laboratory for all subdivision construction materials testing.
Currently, MEG is performing all material testing for the BPUB Annex Building project, an approximate 70,000 sf building project development currently under construction.
Millennium Engineers Group continues to provide accurate results in a timely manner, with the utmost professionalism and within budget.

The BPUB will continue to engage Millennium Engineers Group on future projects and confidently recommend MEG for your geotechnical and materials testing needs.

Sincerely,

Marie C. Leal, P.E.

Re: Letter of Recommendation

Dear Mr. Palma,

I would like to take this opportunity to express to you Alton's satisfaction and appreciation with the work product and professionalism exhibited by your company's employees since the outset of the engagement of your firm. The professionalism and dedication to their trade, your staff has shown, sets Millennium Engineers Group apart from the competition.

The City of Alton has enjoyed its relationship with MEG Engineers and looks forward to working with your company in the future.

If we may be of service to you in anyway, please do not hesitate to contact me at (956) 432-0760.

CITY OF MISSION

"Home of the Grapefruit"

To Whom It May Concern,

I am writing this letter of recommendation for MEG Engineers.

MEG has been under contract with the City of Mission for the last four years and has provided exceptional Lab services in numerous subdivisions and projects throughout the City. They have always exhibited with integrity, ethics, reliability and fairness. Despite any troubles that could arise at the time of construction, MEG would and will deliver the testing and results on time and with quality. I believe you would be very pleased with their work, attention to detail and customer service.

Should you have any questions, please feel free to contact me at (956) 585-3275.

Sincerely,

Juan Pablo Terrazas, P.E., CPM
Assistant City Manager/City Engineer City of Mission

Re: Millennium Engineers Group, Inc.

Our City has contracted Millennium Engineers Group, Inc. to perform Construction Material Testing and Geotechnical Engineering On-Call Services for the past three years. Mr. Andres Palma and his firm are very professional and have an excellent service response. We are very satisfied with their work. They have a great attitude and carry out their project deliverables within budget and schedule. We were very pleased with the work his firm has done on the numerous project they have work on for the City of Pharr.

I would give Millennium Engineers Group, Inc. and his team my highest recommendation.

Sincerely,

Omar Anzaldua Jr., PE, CFM, PMP, CCM | City Engineer
City of Pharr

Re: Letter of Recommendation

To Whom It May Concern:

Raul Palma is being nominated for Engineer of the Year. I have had the pleasure of knowing Raul for many years. He has impressed me with his exceptional leadership, spirit, and commitment to this profession. His professional character has excelled in his field of engineering and has given back to his community in countless volunteer efforts. I can attest not only to Raul's ability to explain and instruct, but also to his deep commitment to helping others.

Considering his extensive knowledge in engineering and achievements, he has been named the Engineer of the Year by the local Engineer's Chapter and I highly recommend his naming as Engineer of the Year.

Please feel free to contact me if you have any questions at (956) 572-3191.

Sincerely,

Patrick McNulty

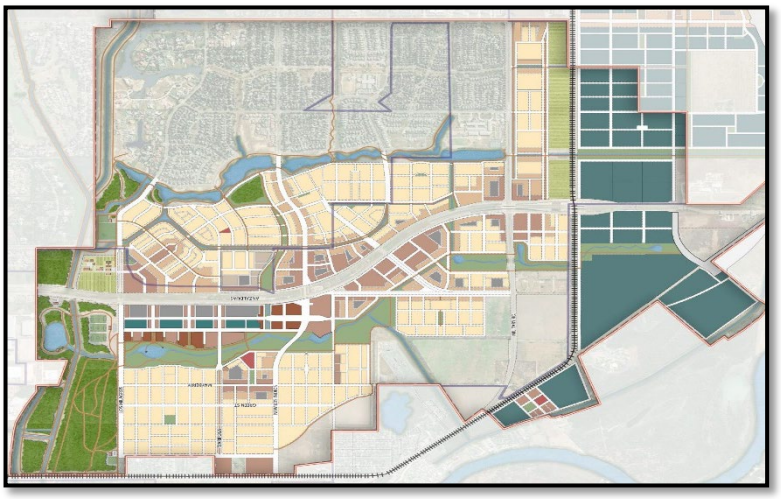
Relevant Projects

City of Mission - Public Safety Building



Construction of a new public service building development. It is also our understanding that the proposed public service building development will consist of a one (1) story structure. The site construction for the proposed structure is anticipated to be on a slab-on-grade or on-fill foundation provided expansive, soil-related movements will not impair the performance of the structure. The site also accommodates the construction of either a rigid or flexible pavement that will serve for light duty and/or heavy-duty traffic. Both flexible and rigid pavement types are viable and the selection on the type to be used will depend on the specific needs and criteria of project site

City of Edinburg – Downtown Parking Garage

Construction of a 3-level parking garage with an alternate to add a 4th level along with various add alternates to enhance the building including: first floor retail space over crawlspace; back of house receiving; elevator tower enhancements; thin-brick façade; parking guidance system; and retail restrooms. Work will include site work, selective demolition, concrete, masonry, metals, wood & plastics, thermal & moisture protection, openings, finishes, specialties, stationary loading dock equipment, electric traction elevators, fire suppression, MEP, communications, fire alarm system, exterior improvements, and utilities.

City of Mission - Los Milagros Pavement Recommendations

Performed Engineering and Construction Management and Administration of approximately 1.32 miles for the Pavement Rehabilitation Improvements by reclamation of existing asphaltic and sub-base and overlay of a new 2” asphaltic overlay of the residential streets within Los Milagros and Solera Subdivisions located in Mission, Texas.

City of Harlingen – Convention Center

New construction of a 25,000 SF standalone building consisting of five meeting rooms, reception/lobby, clinic, conference room, offices and support spaces.

Work included concrete, mansonry units, structural steel framing, modified bitumen roofing system, interior finishes, metal toilet compartments, appliances, wet fire sprinlker and standpipe system, MEP and other specified works.

City of Harlingen – Fire Station

Construction of a 10,234 SF fire station to include two bays, dorm rooms, training room, lobby, locker rooms, offices, fitness area, kitchen, vestibule, and other specified areas.

Work included concrete, cast stone masonry, structural steel framing, metal stairs, standing seam metal roof panels, metal wall panels, interior finishes, specialties, wet pipe sprinkler system, MEP, communications, fire alarm system, earthwork, and other specified works.

New Edinburg Arts, Culture & Events Center

13,500 s.f., ground-up foundation pad, two story Cultural Arts Center with Multi- Purpose events room, several conference rooms, exhibition spaces, multi-classroom settings for adults and children. Work will include site work, selective demolition, concrete, masonry, metals, wood & plastics, thermal & moisture protection, openings, finishes, specialties, stationary loading dock equipment, electric traction elevators, fire suppression, MEP, communications, fire alarm system, exterior improvements, and utilities.

INSURANCE COVERAGE & LEGAL

MEG does not have any key terms of our errors and omissions insurance coverage.

MEG maintains the insurance policies needed for this contract as for all additional contracts listed below.

2 million professional liability coverage
1 million commercial general liability coverage
1 million umbrella liability coverage

MEG is not debarred from doing business with any federal, state, or local agency.

MEG does not have any claims, judgments, and arbitration proceedings, suits pending or outstanding against itself or its officers

PROFESSIONAL SERVICES AGREEMENT

MEG has read and agrees with the Professional Services Agreement. MEG will meet the prerequisite insurance requirements, and, if selected, agrees to enter into such agreement.

WHAT WE DO?

Our Services

Our services encompass all related services to the client including, but not limited to, the following:

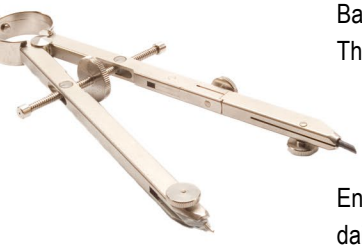
- Conducting initial discussions with the Owner and Design team for specific project requirements, project schedule, design requirements, and any additional information that will be beneficial to the Owner.
- Conducting a review of local geology at the project location.
- Conducting field soil exploration and testing services.
- Conducting the geotechnical laboratory testing program to meet the project requirements.
- Discussion with the Owner and Design team prior to report preparation to include updated project changes, requirements, or additional geotechnical options.
- Prepare precise, innovative, cost-effective geotechnical engineering recommendations for all aspects of the project.
- Discussion after the geotechnical report submittal with the Owner and the Design team to support implementation of geotechnical recommendations that will be beneficial to the Owner.

MEG Engineers exceptional levels of service since 2001:

- Material Inspection
- Forensics
- Analysis
- Design
- Quality Assurance
- Consulting
- Contract Management
- In-Depth Studies
- Investigations

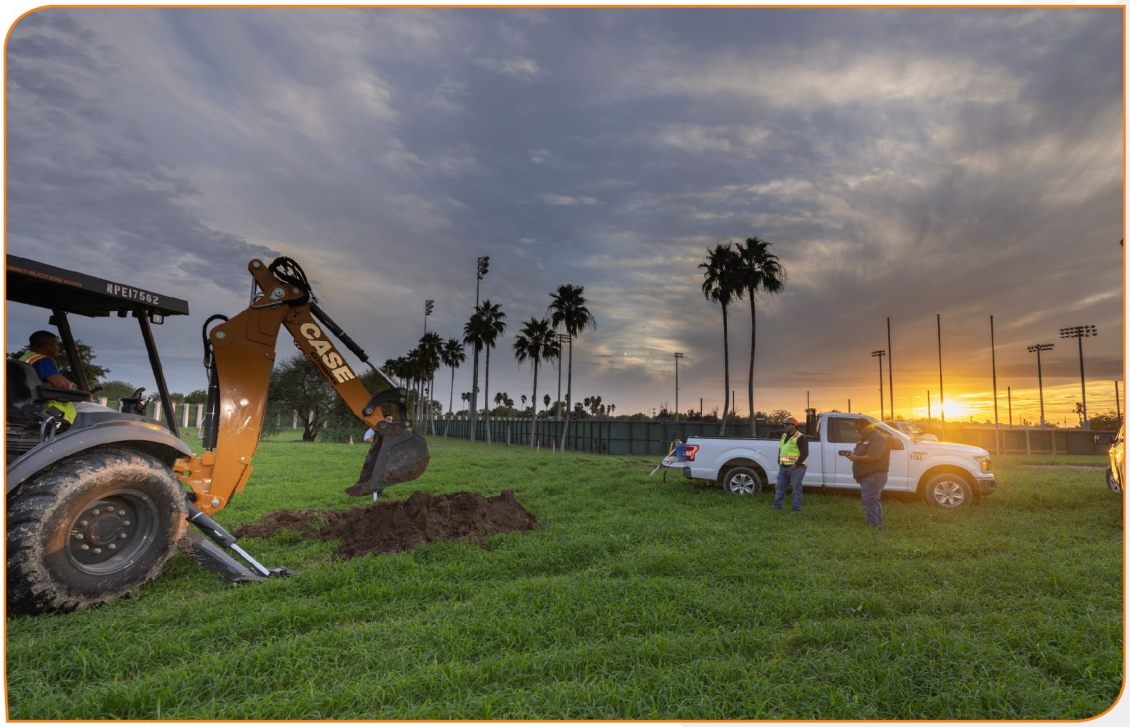
Construction Management services since 2020:

- Soil On-Site Observation and Testing
- Concrete On-Site Observation and Testing
- Asphalt On-Site Observation and Testing
- Masonry On-Site Observation and Testing



> **MEG Engineers are a knowledgeable, professional and dependable team that has met all of our complex construction project needs.**
> ***– Marie Leal, PE, Brownsville PUB***

WORKLOAD CAPACITY



The scope of work to be performed under this contract is the scope of work that MEG performs daily for our clients in Texas. MEG has the necessary capacity to meet the needs of the City of Edinburg for Professional Services. MEG has the resources and experience to provide concurrent project construction services to an individual client for your detailed project scope of work. Our resources can be shifted for operations and our staff and inspectors are cross-trained for proper allocation of personnel for this specific reason.

Based on the current workload, resources, and staff of MEG it is estimated that current operations capacity is at 70%. There is currently no backlog with our testing Services. Our staffing plan is to never be above 85% capacity, so we are able to expedite services when needed to meet critical project schedules.

Based on current and future assignments, it is estimated that during the duration of the project Millennium Engineers Group, Inc. will be operating at 80% of capacity. Engineers, Staff, and Inspectors will be able to complete the daily anticipated project tasks for this project along with current projects tasks. MEG is proficient in completing daily project tasks and expediting the testing and inspection results to the project team for the projects benefit. The project team included in this submittal that will be allocated to this project will devote the necessary time to meet your schedule and often will be various percentages of their time based on your program needs. Inspectors that are assigned to this project will devote 100% of their time to this project when required and additional inspector resources will be available on an as needed basis for this project will be devoted 20% to 50% of their time for additional services as needed.

PROJECT MANAGEMENT AND COORDINATION STATEMENTS

MEG utilizes a Management System, which facilitates the management of both the Construction Material Testing (CMT) and Geotechnical Engineering Testing (GEO) Departments. The system consolidates all aspects of the business workflow, from proposal to the final invoice. It allows an organization the ability to set up clients/projects, schedule work orders (dispatch requests), report and distribute pertinent data to clients via email or website, employ management tools for lab and field testing, and prepare invoices for each project that could be exported to the organization's accounting system. The system also gives the organization's clients the ability to retrieve reports from the customized reporting website.

Our team makes recommendation on the course of action to the Client when issues of potential delays or increased costs arise during the project. Close communication and coordination between the contractor, third parties involved in the project and our team will be a priority by our team for a successful project. Our team operates as a representative of the City of Edinburg and oversees the day-to-day construction activities of the prime contract assigned. Our team has extensive experience in administering construction contracts and overall management. Our team has experience on multiple projects performing Construction Engineering, Inspection and Construction Materials Testing services for numerous clients in Texas. Our scope of services includes but not limited to:

- Construction Administration Procedures
- Field Reports
- Monthly Progress Reports
- Progress Photos
- Project Progress Meetings
- Schedule Review
- Change Order Review
- Quality Control
- Safety and Health
- Submittal/ Shop Drawing Control
- Payment Application Review

> Millennium Engineers has always provided great, professional, friendly service. I highly recommend them.
>
> *Ramiro Gutierrez, P.E., R. Gutierrez Engineering Corp.*

PROJECT MANAGEMENT AND COORDINATION STATEMENTS

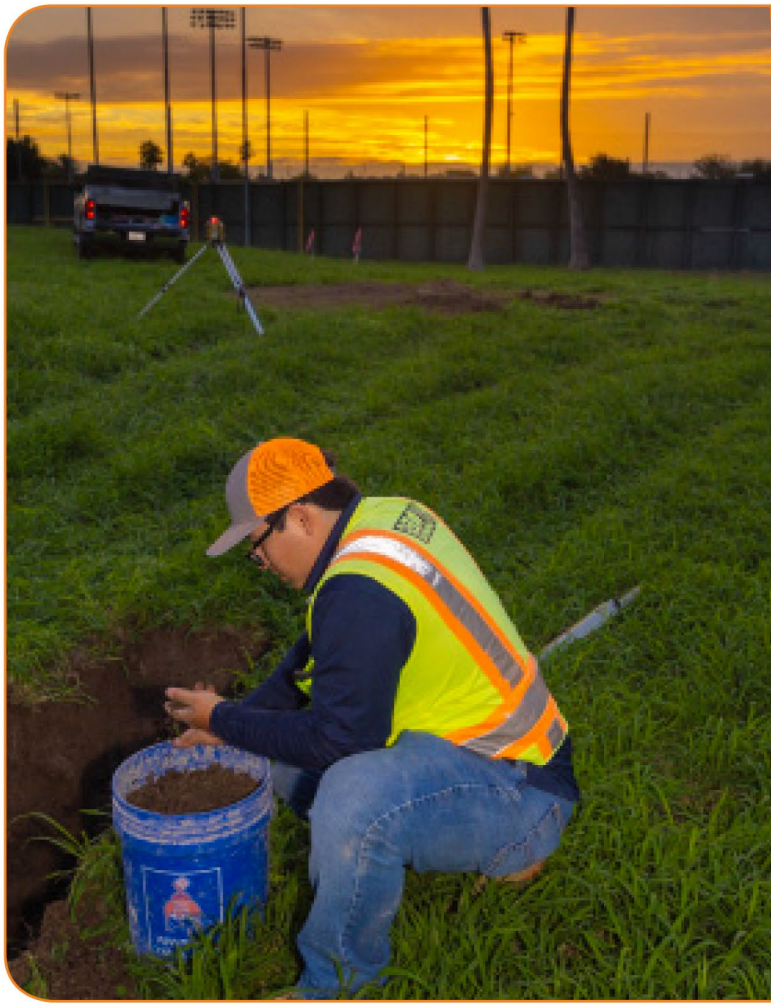
Construction Engineering and Management: MEG ensures that the project is completed on time, and on budget and within scope. This will be accomplished through review and tracking of baseline schedules and monthly updates, monthly pay estimates, change orders, plan quantities and overall project costs. We provide timely processing of contractor submittals, shop drawings, and Request for Information (RFIs). We will also work with the Engineer of Record (EOR) as needed regarding RFI's, potential design changes, or plan errors and omissions. We conduct regular progress meetings to promote partnering between all parties. We conduct pre-construction meeting with the contractor, Client, and other stakeholders prior to the start of the project. During this meeting, an escalation ladder is established to provide guidelines for resolution of construction issues.

Construction Administration and Inspection: MEG performs all necessary inspection to verify work is completed in accordance with plans and specifications. Daily Work Reports (DWR's) or other required reports will be completed to document construction progress and inspection activities as well as quantities for payment. Our inspectors inspect all construction activities daily, determine daily need for construction materials testing of work in progress and materials in use, traffic control devices on a daily basis for compliance with Traffic Control Plan and TMUTCD. SW3P inspections as per environmental requirements performed in accordance with subject guidelines.

Construction Materials Testing: MEG performs construction materials testing on all required construction activities and materials to ensure compliance with project plans and specifications in accordance with the City of Edinburg guidelines for sampling and testing. If independent assurance testing is required coordination with the third-party testing agency is scheduled at appropriate schedules and frequency.

Document Control: MEG ensures that all project progress and financial reporting is completed in accordance with contract requirements. We log all project correspondence, submittals, change orders, RFI's, shop drawings, pay estimates, MOH, etc. We also verify that the contractor is complying with Disadvantaged Business Enterprise (DBE), Equal Employment Opportunity (EEO) and Buy America guidelines. All DWR's, pay sheets and material test reports are reviewed for accuracy before submittal.

Close Out Procedures: Thorough and accurate records is maintained throughout. We generate a project specific close out checklist. The checklist is distributed to all parties at the beginning to resolve all discrepancies. The checklist allows for a guide during both construction and close out phases. Another part of quality program includes formal audits conducted at 30%, 60%, and 90% of construction completed.



Another tool that we use is performing thorough constructability reviews during the pre-construction phase. We review approved plans, specifications, general notes, TCP phasing, baseline schedule, etc. to identify potential plan errors, quantity discrepancies, utility conflicts, or potential maintenance issues. All findings during the constructability review are provided to the City of Edinburg for review and further discussion.

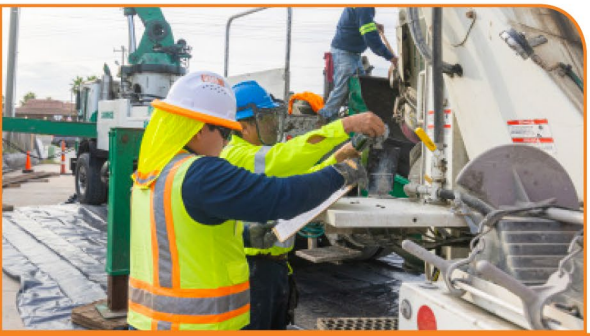
PROJECT COMMITMENT

MEG is committed to your projects, program, goals, and timelines for project schedule. We will provide the essential staff, equipment, and resources to be available and responsive daily to the City of Edinburg's needs based on your scope of services. Our offices are equipped and trained to provide the level of service and responsiveness required by the City of Edinburg. MEG has extensive local resources and expertise to complete large project programs. The key personnel presented in this Statement of Qualifications are committed to the City of Edinburg projects and will be available throughout the life of the project.

Project Communication

Communication is the key to all successful projects. The management of the testing and inspection program for the project will begin with the introduction of the project team members. Upon notification of award, our engineers and staff will meet with members of the project team who have an active role in the project. This is a critical phase in to communicate project information, goals, timelines, or potential conflicts.

Review of Construction Schedule



MEG will review the most up-to-date construction schedule by task after design documents are completed. The testing and inspection program can best support regulated testing and control final testing costs if we clearly understand the project testing requirements.

Construction Meetings

From the initiation of the project until the completion, we propose biweekly or monthly management meetings with the construction manager or his representative and other project team members. At these meetings it is necessary to review and discuss testing results, project progress, and project schedule.

Daily Communication

MEG on site representative will maintain daily communication with the contractor's superintendent, and the designated project team members in order to schedule the required services and to communicate inspection and test results. Our project manager will communicate the results of critical off-site testing and inspections to the designated project team representatives the same day testing is performed.

> MEG has been reliable and responsive to our testing needs. – Mr. Ariel Chávez II, PE/RPLS/ Director of Engineering Services

QUALITY ASSURANCE / QUALITY CONTROL

Internal Quality Management

Our firm follows a reporting structure that will best benefit our clients. Steps and processes are performed in every task of our services to give the client the best product possible. Our client first attitude, service approach, methodology of doing business, and internal quality control program allow us to continue providing services throughout the State of Texas building long term business relationships.

Reporting Structure

Reporting Structure starts within our management team. MEG is called for the requested services and to make the necessary arrangements to initiate the project. Our dispatcher will dispatch one of our highly trained technicians to the requested project site. At this point the technician will perform the requested task(s) and then complete his/her field-testing report. Field Testing reports are turned in daily and our project managers review the testing reports. The testing reports are then turned into our administrative staff and are typed for second review of the project managers. The reports are then reviewed and signed by the office engineer before they are sent to the client. The testing reports provided by MEG include all the necessary data that is often requested by the Owner and members of the design team.

Decision Making

Decision Making by MEG starts within our management team. The decisions made by our staff and key personnel come only after consulting with the principal engineer. Timing and scheduling are important factors of construction, and every decision made will consider the best interest of our client. Engineering Recommendations are only made by a Professional Engineer that is registered in the State of Texas.

Quality Control Plans

Quality Control is monitored by MEG in every aspect of our work. Our office maintains a quality control program that has been approved by the American Association of State Highway and Transportation Officials (AASHTO) and the State of Texas, Department of State Health Services Radiation Control Program. Quality control is monitored and documented by our (QA/QC) Manager and Radiation Safety Officer.

Reporting and Billing Quality Assurance

Quality assurance is maintained by MEG in every aspect of our administrative work. Our office maintains an internal quality control program that is used by our administrative staff to audit every process of our reporting and billing procedures. This quality assurance measure allows us to maintain the quality service that is essential to our client's business.

> "MEG provides excellent services in a timely and cost effective manner.– Mr. Alfonso Quintanilla, PE/RPLS/ Quintanilla, Headly, and Associates"

Pharr, TX 78577

Re: Annual Update Affidavit (AUA)
Disadvantaged Business Enterprise (DBE)

Dear Raul Palma:

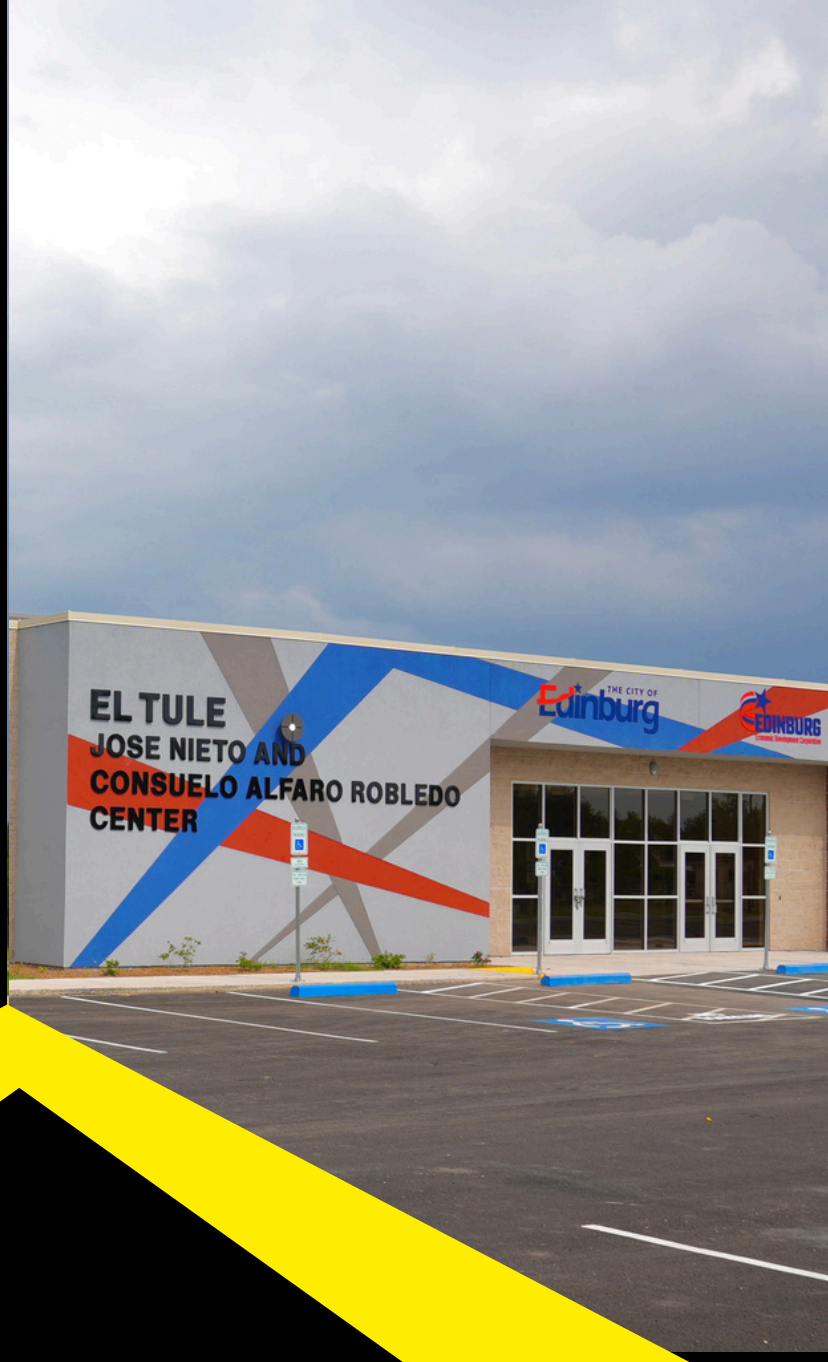
Upon review of the AUA and supporting documentation, TxDOT has determined that Millennium Engineers Group, Inc. continues to meet the eligibility requirements of the federal [DBE] program.

DBE certification does not expire, however, to remain certified it is incumbent on you to submit the AUA on or before your next certification anniversary date. A courtesy reminder will be sent from the Diversity Management System (DMS) in advance of the AUA due date.

Firms listed in the Texas Unified Certification Program (TUCP) directory located at https://txdot.txdotcms.com are currently certified DBE/ACDBEs. All DBEs certified pursuant to 49 CFR Part 26, are automatically certified in TxDOT's Small Business Enterprise (SBE) Program. TxDOT encourages you to utilize the TUCP directory as a marketing tool. In that respect you should periodically verify your firm's certification description and North American Industry Classification System (NAICS) code(s) closely describe the goods or services your firm provides.

Should your firm be awarded an opportunity to participate on a federally funded project, your firm must perform a commercially useful function (CUF). A DBE performs CUF when it is responsible for execution of the work of the contract and is carrying out its responsibilities by performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible, with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself.

For information on TxDOT's contracting and procurement opportunities visit https://www.txdot.gov.



Sincerely,

Michael D. Bryant
Director

July 14th, 2026
City of Edinburg
415 W. University Drive
Edinburg, TX 78539

Dear Mr. Mardoqueo Hinojosa

NM Contracting is pleased to submit our qualifications to serve as the Construction Manager for the proposed City of Edinburg project management services RFQ.

Founded in 1997, NM Contracting is a seasoned contractor with Construction Managment experience dedicated to delivering high-quality, cost- efficient public facilities across South Texas. With nearly three decades of experience, we have earned a reputation for excellence in managing complex civic, institutional, and educational projects from concept through completion—grounded in transparency, collaboration, and accountability.

Our team of project executives and managers has successfully completed projects for both educational and civic clients, including the delivery of multiple education and higher education facilities. These projects required a careful balance of technical expertise, stakeholder collaboration, and strict adherence to budget and schedule—all of which are central to this project's success. The strength of NM Contracting lies in our people. Our project management team, supported by skilled consultants and construction professionals, is directly engaged in preconstruction services and works side-by-side with owners and design teams from the earliest stages. By prioritizing constructability reviews, phased planning, and proactive value engineering, we safeguard the owner's budget while ensuring the project vision is realized.

NM Contracting is uniquely suited to deliver Construction Management services for this project because:
• Our senior staff and in house engineer provide extensive preconstruction planning and cost control expertise.
• Our project managers are experienced in delivering projects safely, under budget, and on schedule.
• We align with City of Edinburg vision to transform education in South Texas through innovation, professionalism, and collaboration.

As a firm rooted in the Rio Grande Valley for generations, we are deeply invested in the growth and success of this region. It would be an honor to contribute to a project that not only strengthens City of Edinburg's mission but also supports the purpose and reason for their existence.

Thank you for the opportunity to be considered.

Sincerely,

Noel Munoz, Jr.
President
NM Contracting, LLC

OUR TEAM

EXECUTIVE OVERSITE

Jerry Garcia, Senior Client Executive – Provides executive-level oversight and maintains direct communication with the Owner. He will ensure strategic alignment and client satisfaction.

PRECONSTRUCTION TEAM

- **Maria O. Scurry-Castillo, P.E., Senior Project Manager** as well as **Structural and Geotechnical Engineer Reviewer (GG4 Consulting, Inc)** – Serve as overall Pre-Construction Lead representing the City of Edinburg during design. Responsibilities are managing preconstruction services, controlling budget alignment with evolving design including value engineering options, identifying risk early, and coordinating the preparation of the eventual GMP. Will also serve as the QA/QC reviewer for Structural and Geotechnical scope.
- **Andrew Martinez, Administrative Project Manager** – Scheduling and Managing all Owner/Design Team meetings, issuing meeting notes and tasks to all meeting attendees, track schedules, ensure project deliverables per time lines and assist as project point of contact.
- **Omar Quintanilla, Project Cost Executive** – Supports budget, cost analysis, and life-cycle review, responsible for cost modeling, detailed scheduling, and budget forecasting.
- **Andrew Munoz – Leads development of the GMP,** solicits and evaluates subcontractor pricing, manages scope alignment and leveling, develops and updates the preconstruction schedule, identifies long-lead procurement items, conducts value engineering, manages cost models from SD through CD, prepares the formal GMP proposal.

CONSTRUCTION MANAGMENT TEAM

- **Maria O. Scurry-Castillo, P.E., Senior Project Manager (GG4 Consulting, LLC)** – Provides **Construction** leadership, ensuring continuity of management between phases.
- **Ismael Morales, Project Manager** – Acting as the primary day-to-day manager coordinating with all field staff.
- **Jesus Suarez, QAQC** – Ensuring compliance with QAQC and assisting in supervision.
- **Andrew Martinez, Project Engineer** – Supporting technical reviews, RFIs, submittals, and documentation.

SUPPORT SERVICES

- **Noel Muñoz, Principal / Safety Director** – Provides overall safety leadership and program-level guidance.
- **David Cramer, QAQC Manager** – Oversees quality control and compliance reviews across all project phases.

NM Contracting

ABOUT ME

Jerry Garcia has been involved in the commercial construction industry for 39 years. He has over 28 years of experience in construction management, 4 years in the project management field, and 7 years as partner/principal as director of the construction administration department at ERO Architects. Jerry understands the high value of high-quality construction documents and has learned well how to effectively communicate and provide information related to projects in a timely manner. He has reviewed hundreds of construction documents and experientially learned what works from the owners, architects, and contractors' point of view. His experience covers public and private sectors such as public schools, banks, restaurants, hotels, medical, and federal government facilities. Jerry is very meticulous and diligent in regard to construction, and as the V.P. of Operations for NM Contracting, he will work closely with the design team to ensure a successful timely completion of the contracted construction projects.

- El Tule Rec Center | $5 M | Edinburg, Texas

MARIA SCURRY

ABOUT ME

Maria Scurry, PE, is an experienced project manager with 6 years of experience working as a Senior Project Manager at an Architecture office. During that time Maria gained the knowledge and experience in developing design documents and driving decisions in Architecture and Engineering. At the same time, maria also was the Structural Engineer of Record for many of her own projects. She also led a team of administrators in the construction administration process holding the contractor responsible for all responsibilities of construction through the process.

She has more than 20 years of practicing engineering project management. Ms. Scurry served as Texas Branch Manager for a worldwide Geotechnical Engineering company. Maria led numerous geotechnical studies and analysis for both shallow and deep foundations, retaining structures, slope stability and seepage, and pavement design and remediation. Maria's experience in Construction Materials Testing, includes special inspections of foundations, concrete, CMU and pre- and post-installed anchors utilizing applicable ICC ES and ASTM guidelines. As a structural element to be constructed of wood, concrete, CMU, and structural steel.

NM Contracting

ABILITY TO MEET PROJECT SCHEDULES

NM Contracting's unique approach to maintaining the original established project schedule is rooted in proactive planning, continuous schedule monitoring, and direct accountability among all project stakeholders. Our team does not view the project schedule as a static document prepared at the beginning of a project. Instead, we utilize it as an active management tool to identify risks, track critical milestones, and address potential delays before they impact the overall completion date.

At the onset of each project, NM Contracting conducts a comprehensive review of the established program schedule, design milestones, soft cost and hard cost budgets, procurement requirements, permitting activities, and construction sequencing. We work collaboratively with the City of Edinburg, design consultants, contractors, and other project stakeholders to confirm that key milestone dates are clearly defined, responsibilities are assigned, and schedule dependencies are understood by all parties. This early schedule validation allows our team to identify potential conflicts, long-lead procurement concerns, permitting constraints, and decision points that may affect the critical path.

NM Contracting also maintains active project tracking logs to clearly identify outstanding action items, responsible parties, required response dates, and potential schedule impacts. Items affecting critical project milestones are prioritized and communicated directly to the appropriate stakeholder. Through regular coordination meetings and follow-up, our team ensures that unresolved issues remain visible and are elevated when necessary to prevent unnecessary delays. When schedule slippage is identified, we require the responsible party to provide a clear recovery strategy and work collaboratively to evaluate opportunities for resequencing activities, increasing resources, accelerating procurement, or performing concurrent work where practical.

During construction, NM Contracting compares actual project progress against the approved baseline schedule and evaluates upcoming critical activities. Our project management team maintains consistent communication with the contractor's on-site personnel and reviews manpower, sequencing, material availability, and unresolved project issues that could affect upcoming work. By maintaining detailed schedule oversight, clearly documenting responsibilities, and consistently following up on outstanding items, our team provides the City of Edinburg with a proactive project management process designed to protect the original established schedule

NM Contracting understands that projects are rarely delayed by a single event; schedule impacts often result from unresolved decisions, missed interim deadlines, or small issues that accumulate over time. Our hands-on management approach and extensive experience coordinating complex public projects enable our team to maintain aggressive schedules while safeguarding project quality and advancing the City's objectives. We are committed to providing the City with clear, timely communication and practical solutions throughout every phase of the project. By proactively identifying schedule risks, implementing corrective actions promptly, and maintaining close oversight of project activities, we help ensure that challenges are addressed early and that each project remains on track for successful and timely completion

STABILITY AND REFERENCES

NM Contracting confirms our full ability to provide Payment and Performance Bonds up to $20,000,000, backed by reputable surety partners, and to meet all insurance requirements outlined in the project's insurance specifications. We carry, at a minimum, the coverages required for this project, including:

- **Workers' Compensation** – Statutory limits
- **Employer's Liability** – $500,000 each accident; $500,000 disease each employee; $500,000 policy limit
- **Commercial General Liability** – $1,000,000 each occurrence; $2,000,000 general aggregate; $2,000,000 products/completed operations aggregate; $1,000,000 personal & advertising injury; $50,000 fire damage; $10,000 medical expense
- **Automobile Liability** – $1,000,000 combined single limit for all owned, hired, and non-owned vehicles
- **Umbrella (Excess) Liability** – $4,000,000 each occurrence/aggregate
- All additional insured endorsements, per-project aggregate endorsements, and subcontractor insurance requirements as outlined in the Owner's insurance specifications.

NM Contracting also confirms that we will ensure all subcontractors carry the same types and amounts of insurance required by the Owner—except where the contract value exemption applies—and will provide certificates and endorsements prior to the start of any work. Our bonding and insurance programs are fully active, in good standing, and capable of supporting this project's requirements without qualification.

COKINOS
BOND AGENCY

July 14th, 2026

To Whom It May Concern:

It is our understanding that our valued client, NM Contracting LLC, Inc. is being considered to act as Contractor for your project.

NM Contracting LLC is one of our most valued surety clients. We consider the Company to be properly equipped, capably staffed, and well financed. It is the privilege of Arch Insurance Company to extend and/or support Suretyship to this Company on single contracts up to $50,000,000 and contracts aggregating in excess of $150,000,000. At no time has there ever been a problem while they have demonstrated the ability to perform sizeable and difficult projects. In addition, we feel management is of the utmost integrity and willingly deal in good faith.

Subject to the usual underwriting review of contract details at the time bonds are requested, we anticipate no problem in being able to continue to assist in providing for the surety needs of NM Contracting LLC in whatever instances they might require. This letter is not an assumption of liability and is issued only as a reference request from our client.

We look forward to being called upon whenever it is felt we can be of service. Arch Insurance Company is rated A+ (Superior) with a Financial Size Category of XV (Greater than or Equal to USD 2.00 Billion) from A.M.

Sincerely,

Cokinos Bond Agency, LLC

Kyle Cokinos
President

FINANCIAL STABILITY

NM Contracting has experienced steady and sustainable growth, reflecting our expanding client base, increased project volume, and strategic investments in staffing, technology, and operational infrastructure. Our bonding capacity, current backlog, and liquidity ratios confirm that NM Contracting is well positioned to undertake projects of this scale while continuing to support our existing clients.

The accompanying workload charts illustrate a balanced distribution of current and projected projects, ensuring that we maintain appropriate staffing levels and management oversight across all active work. This analysis demonstrates our ability to accommodate the anticipated demands of this project without compromising performance on other commitments. Our internal resource planning model allows us to scale supervisory, field, and administrative teams as needed to support project fluctuations throughout the year. If any anomalies or deviations appear within the financial or workload charts NM Contracting has provided explanations for these changes within the chart annotations to ensure full transparency. Overall, NM Contracting's financial strength, bonding capacity, and historical performance confirm our ability to manage this project successfully while supporting the firm's projected growth. Our long-term trajectory reflects responsible expansion, disciplined financial management, and a strategic approach to workload balancing—all of which underscore our capability to deliver this project with confidence.

NM Contracting

Financial / Workload Analysis Chart 2022 - 2025

Year	Revenue	Number of Projects Completed	Number of Projects in Progress	Number of Employees
2022	$20,395,719	38	16	22

To Whom It May Concern:

It is with great confidence that I provide this letter of recommendation for NM Contracting LLC based on their successful completion of two recent City projects: McAllen Fire Station #8 and the McAllen Fire Training Facility.

NM Contracting LLC has consistently demonstrated a high level of professionalism, construction expertise, and responsiveness throughout both projects. Their team worked closely with City staff, design professionals, and third-party consultants to ensure the work was completed according to specifications, within the required timeframes, and with a strong commitment to quality and safety.

Their proactive communication and willingness to coordinate across departments played a significant role in the overall success of each facility. Both projects were completed with minimal disruptions, and any field issues were addressed swiftly and effectively.

Given our experience, I would gladly consider NM Contracting LLC for future construction opportunities and highly recommends them to any agency or entity seeking a dependable and capable contractor.

If additional information is needed, please feel free to contact me at (956) 681-1151.

Sincerely,
City of McAllen

Eduardo Mendoza, PE, City Engineer

Tirso Garza, Fire Chief
Carlos Alaniz, Assistant Chief
Sandra Guajardo, Administrative Assistant

September 18, 2024

To Whom It May Concern,

I am writing to recommend NM Construction Company services with any prospective clients. I have had the pleasure of working directly with their staff on our current project for the City of San Juan Fire Station #1. The scope of work for this project was a completely new construction from the ground up for future occupancy of fire administration and fire suppression personnel.

NM Construction has illustrated their attention to detail, quality and safety on a number of occasions. It is the policy of the company to strive for the highest safety standards. Working safely requires a serious commitment by everyone within the organization including their subcontractors. NM Construction Company has met and exceeded our safety and code compliance.

Scheduling within the construction industry is typically a task in itself, and NM Construction has been able to effectively meet project schedule requirements. Their project superintendent on site has been able to quickly adapt to schedule changes from subcontractors in order to keep his schedule on time and aligned with the overall project schedule. In addition, NM Construction Company has been exceptionally accommodating when dealing with unforeseen change orders.

Please consider NM Construction Company for your construction service needs. I highly recommend them and look forward to working with them on any other future City of San Juan projects.

Sincerely,

Tirso Garza, Fire Chief

RE: Letter of Reference for NM Contracting, LLC

To Whom It May Concern:

It is our pleasure to provide this letter of reference for NM Contracting, LLC. Milnet Architect had the opportunity to work with NM Contracting on the El Tule Recreation Center, a new recreation center constructed for the City of Edinburg with an approximate project value of $5,000,000.00

Throughout the project, NM Contracting demonstrated professionalism, responsiveness, and a strong commitment to the successful completion of the project. Their team worked collaboratively with the City of Edinburg, our design team, and project stakeholders to maintain clear communication, address project needs, and coordinate construction activities effectively.

NM Contracting's team was proactive in identifying and resolving project challenges and remained engaged throughout the construction process. Their ability to coordinate with the architect, consultants, subcontractors, and Owner contributed to the overall progress and successful delivery of the project.

Based on our experience working with NM Contracting, we consider them a capable and dependable construction and project management partner. Their familiarity with municipal projects and experience working with the City of Edinburg provide them with valuable insight into the coordination, communication, and accountability required for public projects.

Milnet Architect is pleased to recommend NM Contracting, LLC and believes their team possesses the experience and professionalism necessary to successfully provide project management services for the City of Edinburg.

Should you have any questions regarding our experience working with NM Contracting, LLC, please feel free to contact our office.

Sincerely,

Rudy Molina, AIA

Re: RFQ 2026-8 – Request for Qualifications – Project Management Services

Rio Delta Engineering is pleased to submit our Statement of Qualifications in response to RFQ 2026-8 – Project Management Services. We appreciate the opportunity to be considered for inclusion on the City of Edinburg's rotation list of qualified firms and look forward to continuing our longstanding partnership with the city.

Our main office is located at 921 S. 10th Avenue, Edinburg, Texas 78539. As a locally owned and operated engineering and surveying firm, Rio Delta Engineering is uniquely positioned to provide responsive, efficient, and comprehensive project management services for the City's capital improvement projects. Our local presence allows us to maintain close communication with City staff, quickly respond to project needs, and provide the level of service and accessibility that contributes to successful project delivery.

Rio Delta Engineering has extensive experience providing project management and engineering support services for municipal infrastructure projects throughout the Rio Grande Valley, including numerous assignments for the City of Edinburg. Our team has successfully managed projects from initial planning through design, permitting, bidding, construction, and project closeout while coordinating with City departments, utility providers, regulatory agencies, contractors, and other stakeholders.

Our project management approach emphasizes proactive communication, accountability, schedule management, budget control, quality assurance, and timely decision-making. We understand the importance of keeping projects moving efficiently while minimizing risks, addressing challenges promptly, and ensuring compliance with all applicable local, state, and federal requirements. Our experienced professionals are committed to providing the City with dependable leadership and technical expertise throughout every phase of project implementation.

In addition to project management, Rio Delta Engineering offers a full range of in-house professional services including civil engineering, construction administration, construction observation, utility coordination, cost estimating, permitting assistance, land and topographic surveying, drainage analysis, and related technical support. These resources allow us to effectively manage projects of varying size and complexity while providing the City with a single, responsive point of contact.

At Rio Delta Engineering, we view every project as a partnership built on trust, communication, and exceptional client service. Our goal is to serve as an extension of the City's Engineering Department by delivering practical solutions, maintaining transparency throughout the project lifecycle, and consistently meeting project objectives on schedule and within budget.

We sincerely appreciate your consideration of our qualifications and welcome the opportunity to continue serving the City of Edinburg. Should you have any questions regarding our Statement of Qualifications or require additional information, please do not hesitate to contact me at (956) 380-5152, by cell at (956) 263-0934, or by email at ivan@riodeltaengineering.com

Sincerely,

Ivan Garcia, P.E., RPLS, C.F.M.

Submittal for: Main Office

Rio Delta Engineering is an engineering firm offering civil engineering, project management, land development, construction administration, and surveying services in the Lower Rio Grande Valley and South Texas. Our staff has a variety of background experiences ranging from structural adhesives sales to general contracting and oilfield fracking. This varied experience, coupled with our education in Agricultural and Civil Engineering, allows us to apply common sense and a practical approach to our civil engineering services. We've all heard a contractor say" Sure, everything fits fine on paper, but…" when they encounter a design issue that just doesn't work as well in the ground as it does on the plan. At Rio Delta Engineering, our objective is to deliver a civil engineering project to our client that is practical, cost effective, and buildable within the allotted budget and time frame. Our experience on both sides of the project "table" allows us to communicate clearly to everyone involved with a project the objectives of our plans and designs, from the contractor to the system operator, to the Board or Council member, and on up to the funding agencies.

Names, Position, Phone and Fax Numbers of Contact Person:

Depending on the locality of the project, the local office has taken the lead on the project. In this instance, the Edinburg office managed by Ivan Garcia, P.E., R.P.L.S., would be the Lead Project Manager on any projects. Ivan would provide project management,engineering coordination, and construction administration. Ivan would also be primarily responsible for on-site inspections and would be the direct contact with the Owner.

Office Number: (956) 380-5152
Mobile Number: (956) 263-0934
Fax Number: (956) 380-5083
E-mail: ivan@riodeltaengineering.com

At Rio Delta Engineering, our objective is to provide quality engineering and surveying services to our client in a timely, professional manner. Our experience in working with a variety of clients, including private developers, municipalities, county agencies, and state agencies has shown us that listening to

the client and understanding his needs is the most important step in the completion of a successful project. To this end, we make it a practice to establish clear and open channels of communication with our clients.

Our firm has completed a variety of different types of projects in South Texas since the company's inception in 2005. The projects range from land development and roadway design, to site-civil for educational institutions, commercial development, sanitary sewer treatment and collection systems, and water treatment and distribution systems. Rio Delta Engineering has completed and is currently working on, numerous Federally and State funded projects for Starr County, Rio Grande City, Union Water Supply Corporation, North Alamo Water Supply Corporation, the City of Escobares, and the City of Roma. These projects include projects funded by the Texas Department of Rural Affairs (TDRA), the Texas Department of Agriculture (TDA), the Texas Department of Transportation (TxDOT), the Texas Water Development Board (TWDB), The Border Environment Cooperation Commission (BECC, EPA-NADBANK), the US Economic Development Agency (EDA), and the United States Department of Agriculture (USDA). The projects include roadway paving projects, extension of sanitary sewer, water distribution system improvements, wastewater treatment plant rehabilitation and new construction, and storm drainage improvements.

Rio Delta Engineering offers professional land surveying services using state-of-the-art technology and equipment. We have an in-house Registered Professional Land Surveyor (RPLS) and can provide prompt responses and full surveying services as may be needed. Some of our deliverables are ALTA, title and boundary surveys, parcel/right-of-way maps for acquisition, appraisals, and condemnation proceedings, metes and bounds/legal descriptions, construction staking for survey alignments of roadways and/or utilities including the establishments of rights-of-way, easements, baselines and legal descriptions, as-built survey, design and construction survey, topographical survey, drone-surveying for aerial photogrammetry and mapping, horizontal and vertical control points (benchmarks) and maps, construction staking, and virtually any surveying and mapping applications our clients have required for their projects.

We also coordinate and perform all surveying activities related to utility conflicts, easement/right-of-way issues, permits, and have experience working with the Hidalgo County Drainage District No. 1, TxDOT, Texas Gas Service, AEP, Spectrum, AT&T, Irrigation Districts, and Magic Valley Electric Coop.

In addition, we have an in-house GIS specialist who plans, develops, and implements systems and databases for storing and accessing geospatial data. We have the capability to create maps and graphs using GIS software and related equipment.

Our approach to projects entails a hefty combination of the latest CADD and GPS technology and equipment, creativity, and an innovative approach towards the problem at hand. By using smartphones and tablets we have implemented an effective line of real time and direct communication within our company and with our clients. We can read and reply to emails immediately, upload/view reports, schedules and photos, have remote access to drawings, budgets, set up meetings, and have live videoconferences to bring solutions and answers to our clients in real time. We also coordinate and perform all surveying activities related to utility conflicts, easement/right-of-way issues, permits, and have experience working with the Hidalgo County Drainage District No. 1, TxDOT, Texas Gas Service, AEP, Spectrum, AT&T, Irrigation Districts, and Magic Valley Electric Coop.

During our 20-year existence, Rio Delta Engineering has dealt with City, County, and State agencies to complete our projects. We can work with any person or entity necessary to move projects forward to successful completion in a timely manner.

Capacity to Perform

Rio Delta Engineering is highly familiar with the City of Edinburg's design standards, specifications, and development requirements, as well as applicable local, state, and federal regulations, policies, and procedures. Our team has extensive experience navigating the permitting, utility coordination, and regulatory processes necessary to successfully deliver municipal infrastructure projects while ensuring compliance with all applicable requirements.

As a locally owned and operated firm with offices in Edinburg and Rio Grande City, Rio Delta Engineering provides responsive, accessible service with the advantage of a local presence. Our multidisciplinary team includes licensed professional engineers, an in-house Registered Professional Land Surveyor (RPLS), GIS specialists, and experienced technical staff, enabling us to provide comprehensive project management, engineering, surveying, and construction support services under one roof.

We are confident that, if selected, Rio Delta Engineering will provide the City of Edinburg with exceptional project management services supported by experienced professionals, technical expertise, and a commitment to collaboration. Our team is dedicated to delivering projects efficiently, maintaining open communication, and serving as a trusted partner in helping the City achieve its infrastructure goals.

Familiarity with the Geographical Area

Rio Delta Engineering's Edinburg office will lead this assignment, providing the City with a local team that is readily available and familiar with the area's infrastructure, development requirements, and regulatory processes. Our experience managing municipal projects throughout Hidalgo and Starr Counties enables us to efficiently coordinate with local agencies, utility providers, and project stakeholders.

Current Workload

Rio Delta Engineering has the personnel, technical resources, and capacity to begin work immediately upon contract execution. With offices in Edinburg and Rio Grande City, we are well-positioned to provide responsive project management services and scale resources as needed to meet project demands.

Affirmative Action Program/Equal Employment Opportunity Affirmative Action/Program Statement of Policy:

It is the policy of Rio Delta Engineering to provide equal employment opportunity in full compliance with the Civil Rights Act of 1964, as amended, the Age Discrimination in Employment Act of 1973, the Veterans Readjustment Act of 1974, and the Presidential Executive Orders of Federal Contract Compliance Programs. This provides for equal employment without regard to race, color, religion, sex, national origin, marital status, age, disability, or veterans status.

b. Personnel and Staffing

Names of Principals in The Firm:

Rio Delta Engineering Principals	Titles
Jose Ivan Garcia, P.E., R.P.L.S., CFM	Principal
Julio A. González, Graduate Engineer, CFM	Principal

Key Personnel's Professional Background, Caliber and Availability

One of our key personnel is Ivan Garcia, P.E., R.P.L.S., who has accumulated over 15 years of experience in the civil engineering and surveying field ranging from supervising construction and design of municipal utilities, drainage, and roadway projects, to managing construction projects for the City of Edinburg, the City of Rio Grande City, Hidalgo County, Starr County, Edinburg CISD and Rio Grande CISD, Union Water Supply Corporation, and North Alamo Water Supply Corporation. Because of his extensive background, Ivan possesses unique expertise that will contribute to the project's success. Ivan would be the surveyor out of our local Edinburg office and would provide primary project management and project management coordination and supervision. Ivan would also be the direct contact with the Owner.

In the event that one or more key personnel are not available for any reason during the performance period, we have professional relationships with other local surveying firms that would allow us to immediately team up with other experienced and fully qualified professional surveyors and their staff in order to cover for any key personnel that might not be available.

Organizational Chart and Summary of Work to be Performed by each Staff Member

- Ivan Garcia, P.E., RPLS, CFM – Principal
  As the Lead Project Manager, Ivan would provide primary project management and project management coordination and supervision. He would also be primarily responsible for on-site inspections and would be the direct contact with the Owner.

- Julio Gonzalez, Graduate Engineer, CFM – Principal
  Julio would provide project management support and inspection and construction management support from the Rio Grande City office and Edinburg office. He would also coordinate survey support for the project

- Gilbert J. Guerra, P.E. -Senior Project Manager
  Gilbert would provide project management, construction administration, and quality management support. He would be the secondary contact with the Owner.

- Edwin Pena, Graduate Engineer
  Edwin would provide engineering and project management support and inspection support from the Edinburg office.

- Norberto Lopez III, Graduate Engineer
  Norberto would provide inspection support.

- Rusbel Peña, E.I.T.
  Rusbel would also provide design, design, construction administration, and inspection support from the Edinburg office.

- Roberto Salinas and David Rodriguez, Survey Crew
  As field data collection specialists, Roberto and David would provide field data collection services and construction staking services, for design and construction phases, respectively.

SECTION III: Firms Experience and Qualifications

a.Competency

Rio Delta Engineering possesses the experience, personnel, and technical resources necessary to successfully provide comprehensive project management services for municipal infrastructure projects.

Our multidisciplinary team has managed projects from initial planning and feasibility through design, permitting, bidding, construction, and project closeout while maintaining effective communication with owners, consultants, contractors, utility providers, and regulatory agencies.

Our project management approach emphasizes proactive coordination, schedule and budget management, quality assurance, risk mitigation, and timely decision-making to ensure projects are delivered efficiently and in accordance with client objectives. We have extensive experience managing transportation, drainage, water, wastewater, roadway, and public infrastructure improvements throughout the Rio Grande Valley.

Supporting our project management capabilities, Rio Delta Engineering offers a full range of in-house surveying services utilizing state-of-the-art technology and equipment. Our Registered Professional Land Surveyor (RPLS) provides ALTA, title, boundary, topographic, and construction surveys; right-of-way mapping; easement preparation; metes and bounds descriptions; construction staking; as-built surveys; drone-based aerial photogrammetry and mapping; and horizontal and vertical control surveys. These services allow us to efficiently support project development while minimizing the need for outside consultants.

Our team also coordinates utility conflict investigations, right-of-way and easement issues, permitting, and utility coordination with agencies and providers including the Hidalgo County Drainage District No. 1, TxDOT, Texas Gas Service, AEP Texas, Spectrum, AT&T, local Irrigation Districts, and Magic Valley Electric Cooperative.

In addition, Rio Delta Engineering has an in-house GIS specialist who develops and maintains geospatial databases, mapping systems, and spatial analysis tools that enhance project planning, asset management, decision-making, and overall project coordination.

Capacity to Perform

Rio Delta Engineering is highly familiar with the City of Edinburg's design standards, specifications, and development requirements, as well as applicable local, state, and federal regulations, policies, and procedures. Our team has extensive experience navigating the permitting, utility coordination, and regulatory processes necessary to successfully deliver municipal infrastructure projects from planning through construction and project closeout.

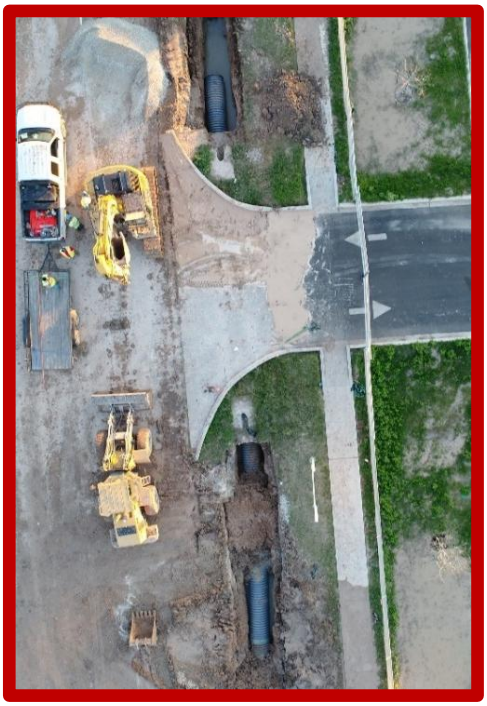
As a locally owned and operated firm with offices in Edinburg and Rio Grande City, we provide our clients with responsive, accessible service and the ability to quickly address project needs. Our multidisciplinary team includes licensed professional engineers, an in-house Registered Professional Land Surveyor (RPLS), GIS specialists, and experienced technical staff, allowing us to provide comprehensive project management, engineering, surveying, and construction support services under one roof.

We are confident that, if selected, Rio Delta Engineering will provide the City of Edinburg with professional project management services founded on collaboration, accountability, and technical excellence. Our experienced staff is committed to delivering projects efficiently, maintaining open communication, and serving as a trusted partner in helping the City successfully achieve its infrastructure goals.

Familiarity with the Geographical Area

Rio Delta Engineering's Edinburg office is leading this submission and provides the City with the advantage of a local team that is readily available and highly familiar with the community, its infrastructure, and its development needs. Our professionals have successfully managed and supported numerous municipal infrastructure projects throughout Hidalgo and Starr Counties, including projects for the City of Edinburg, giving us firsthand knowledge of the City's standards, permitting processes, utility coordination requirements, and regulatory environment.

Our objective is to provide professional project management services that ensure projects are delivered efficiently, on schedule, within budget, and in accordance with the City's goals and expectations. Through our experience working with municipalities, county agencies, state agencies, utility providers, and private developers, we have learned that successful projects begin with understanding our client's objectives and maintaining open, consistent communication throughout every phase of the project.



To achieve this, Rio Delta Engineering emphasizes collaboration, responsiveness, and proactive coordination with City staff, design consultants, contractors, utility companies, and regulatory agencies. Our project management approach focuses on identifying potential challenges early, providing practical solutions, monitoring project progress, and keeping stakeholders informed to ensure successful project delivery.

The following outlines Rio Delta Engineering's typical project management approach used to successfully deliver municipal infrastructure projects.

b. Experience and Recent Projects

1. City of Edinburg – Northeast Doolittle Road Area Drainage - 2019

This project consisted of the construction of various drainage improvements, including, but not limited to, approximately 2,200 L.F. of 36” and 24” storm drain gravity lines, 2,800 L.F. of excavation/fill and re-grading of roadside ditch, and related improvements to alleviate flooding along Doolittle Road between Rogers Road and Russell Road. The improvements were completed at a cost of approximately $387,000 and have been fully operational since March 2019. Rio Delta Engineering was responsible for all design and construction surveying services required for this project.

City of Edinburg
(956) 388-8211
415 W. University Dr.
Edinburg, Texas 78541

2. City of Roma, Efren Ramirez Paving and Drainage Paving Improvements – 2018

This project consists of widening and paving approximately 2,315 lf of Efren Ramirez Street in Roma, Texas. The work involved includes installing approximately 5,630 lf of drainage improvements and constructing a new 37' B-B street section with curb and gutter. The total cost of this project is estimated to be approximately $1,921,769.00 including environmental assessment, R.O.W. acquisition, engineering, testing, inspection, and construction management. The funding for this project will be provided by the United States Department of Agriculture. All funding applications, environmental investigations, and engineering design have been completed. The R.O.W. acquisition is also in the final phases of completion. The project is scheduled to be put out for bid within the next few months. Rio Delta Engineering was responsible for preliminary engineering reports, environmental investigation, engineering design, and surveying services for design and R.O.W. acquisition. We will also be responsible for bidding, construction inspection, testing, and project management.

(956) 849-1411
P.O. Box 947
Roma, Texas 78584-0947

3. North Alamo Regional Wastewater Treatment Plant and Collection System -2018

This project consisted of constructing a new 0.5 mgd activated sludge wastewater treatment plant for North Alamo WSC. The plant is the first phase of what will ultimately be a 20-mgd plant located at the intersection of Minnesota and Goolie roads in Hidalgo County. This initial phase cost $13 million, including planning, acquisition, design, testing, permitting, and construction management. This project was funded jointly by the Texas Water Development Board (TWDB), the Border Environmental Cooperation Commission (BECC/NADBANK), and the Texas Department of Agriculture (TDA). The collection system consisted of approximately 32,000 linear feet of gravity sanitary sewer lines, approximately 15,000 linear feet of force main lines, and four sanitary sewer lift stations. This project provides sanitary sewer service to 471 families in six Colonias and will establish the backbone for future expansion and connections within the projected 50 square-mile service area. On this project we coordinated and performed all surveying activities related to utility design, construction staking, as-builts, horizontal and vertical control establishment and verification, conflicts, easement/right-of-way issues, permits, with TxDOT, Hidalgo County Irrigation District #2, Donna Irrigation District, Hidalgo County Drainage District No. 1, Texas Gas Service, AEP, Spectrum, and AT&T.

Steven Sanchez
General Manager, North Alamo WSC

420 S. Doolittle Road
Edinburg, Texas 78542

4. Starr County, Disaster Recovery 2.2, General Land Office (GLO) Paving and Drainage Improvements - 2018

This project consisted of providing paving and drainage improvements at various locations in Starr County. The work included constructing paving and drainage improvements for one street in Pct #4, constructing paving and drainage improvements including a 1.5-acre detention pond in Pct #3, and constructing a pilot channel for approximately 1.5 miles of Los Morenos Creek in Pcts #1 and 2. The total cost of this project was approximately $1,100,000.00, including R.O.W. acquisition, engineering, testing, inspection, and construction management. The funding for this project was provided by the Disaster Recovery Fund 2.2 administered by the Texas General Land Office. All work has been completed except for the pilot channel for Los Morenos Creek. Negotiations for the acquisition of R.O.W. for these proposed improvements have been onerous due to the lack of clear title for most of the properties in this area. This area is in “undivided” Porciones. The project will have to be closed out by the end of the year with whatever progress has been accomplished at that time. Rio Delta Engineering was responsible for all design, bidding, testing, surveying services for appraisal and acquisition activities, and construction management.

Rio Grande City, Texas 78582

5. Union Water Supply Corporation (UWSC) Water System Improvements - 2017

This project was split up into two contracts. The first consisted of the installation of approximately 27,000 linear feet of new water distribution lines ranging in size from eight inches to sixteen inches, the installation of two altitude valves for two existing elevated water storage tanks, and approximately 240 service reconnections. This project provided an upgrade to a distribution system that consisted mainly of six-inch lines. The water line improvements have been completed at a cost of approximately $1,527,000.00 and is fully operational. The second contract consisted of replacing approximately 1,900 old meters with new electronic meters and a remote read system at a cost of approximately $937,889.00. The total cost of this project is approximately $2,950,000.00, including engineering, testing, inspection, and construction management. This system is in place and working and has enabled UWSC to read all the meters from the office. Meter reading used to take two people two weeks to complete because of interruptions to the process during service calls. Water loss has been greatly reduced, and labor costs associated with the meter reading have decreased markedly since the new system has been in place. Both projects were funded by TWDB. Rio Delta Engineering was responsible for all planning, funding applications, design, permitting, land surveying for easement, right-of-way and parcel acquisition, bidding, and construction management.

   Edinburg Consolidated Independent School District (ECISD)

   Back in 2019 our firm completed surveys, design, plans and specifications for a new band practice field, which included the installation of artificial turf and site drainage improvements within Robert Vela Highschool. This project was bid out but never awarded and canceled due to insufficiency of funds to complete the project and start of the COVID pandemic. Mr. Estrada was the District Architect at the time.

SECTION IV: Scope of Services

a.List of Services

Rio Delta Engineering provides comprehensive in-house surveying, GIS, and technical support services that enhance the successful management and delivery of municipal infrastructure projects. Utilizing state-of-the-art surveying equipment, GPS technology, drone aerial photogrammetry, and advanced mapping software, our team delivers accurate and timely information that supports project planning, design, construction, and project management activities.

Our in-house Registered Professional Land Surveyor (RPLS) provides a full range of surveying services, including ALTA, title, boundary, and topographic surveys; right-of-way and easement mapping; metes and bounds descriptions; construction staking; as-built surveys; horizontal and vertical control surveys; and aerial mapping. These capabilities allow Rio Delta Engineering to efficiently support projects while minimizing the need for outside consultants.

Our team also has extensive experience coordinating utility conflicts, right-of-way and easement issues, permitting, and regulatory approvals with agencies and utility providers including TxDOT, Hidalgo County Drainage District No. 1, Texas Gas Service, AEP Texas, Spectrum, AT&T, local Irrigation Districts, and Magic Valley Electric Cooperative.

In addition, Rio Delta Engineering employs an in-house GIS specialist who develops and maintains geospatial databases, mapping systems, and spatial analysis tools that support project planning, asset management, utility coordination, and informed decision-making throughout the project lifecycle.

a.Narrative

Our approach to project management combines experienced leadership, innovative problem-solving, advanced technology, and proactive communication to successfully deliver projects from initiation through completion. By utilizing industry-leading engineering software, cloud-based document management, smartphones, tablets, and GPS-enabled technology, our team maintains real-time communication and immediate access to project documents, schedules, budgets, reports, drawings, and field information. This allows us to respond quickly to project needs, coordinate efficiently with stakeholders, and provide timely solutions that keep projects moving forward.

Rio Delta Engineering has extensive experience coordinating with City, County, State, and utility agencies throughout all phases of project development. Our team routinely manages utility coordination, permitting, right-of-way and easement issues, and regulatory approvals while working closely with agencies such as TxDOT, Hidalgo County Drainage District No. 1, Texas Gas Service, AEP Texas, Spectrum, AT&T, local Irrigation Districts, and Magic Valley Electric Cooperative.

For more than 20 years, Rio Delta Engineering has successfully partnered with municipalities, public agencies, utility providers, contractors, and private developers throughout South Texas. Our experience, local relationships, and commitment to collaboration enable us to effectively manage projects, overcome challenges, and deliver successful outcomes on schedule and within budget.

Project Approach

Rio Delta Engineering provides comprehensive project management services beginning with project planning and initiation. Our team works closely with City staff, design consultants, utility providers, regulatory agencies, and other stakeholders to establish project objectives, define project scope, develop schedules and budgets, identify potential risks, and create strategies that promote successful project delivery.

Our planning services include:

- Attending project coordination and stakeholder meetings.
- Assisting with project scope development and scheduling.
- Coordinating with utility providers and regulatory agencies.
- Managing permitting and environmental review processes, as applicable.
- Monitoring project budgets and schedules.
- Identifying potential project risks and developing mitigation strategies.

Design and Construction Phase Services

Throughout design and construction, Rio Delta Engineering serves as the City's representative by coordinating communication among all project participants and monitoring project progress to ensure successful delivery.

Our construction phase services include:

- Coordinating with design consultants, contractors, and utility providers.
- Monitoring project schedules, budgets, and milestones.
- Reviewing contractor progress and assisting with issue resolution.
- Facilitating construction meetings and documenting project activities.
- Assisting with change order evaluations and contract administration.
- Coordinating project inspections, testing, and regulatory compliance.
- Monitoring project closeout activities, including punch lists, record documentation, and final acceptance.

Our project managers utilize industry-leading software, cloud-based collaboration tools, and AutoCAD Civil 3D to efficiently manage project information, schedules, reports, and technical documentation. These tools allow our team to provide timely communication, accurate reporting, and real-time coordination throughout every phase of the project.

Ability to Commence Services

Rio Delta Engineering has the personnel, technical resources, and organizational capacity to successfully manage projects of varying size and complexity. Our current workload allows us to commence services immediately upon execution of a professional services agreement, providing the City of Edinburg with responsive support and dedicated project management resources.

Familiarity with the Geographical Area

Rio Delta Engineering's Edinburg office will lead this assignment, providing the City with a local team that is readily available and thoroughly familiar with the area's infrastructure, development patterns, regulatory requirements, and utility systems. Our experience managing municipal infrastructure projects throughout Hidalgo and Starr Counties, including numerous projects within the City of Edinburg, enables us to effectively coordinate with local agencies, utility providers, contractors, and stakeholders to successfully deliver projects from inception through completion.

Re: **Request for Qualifications - Project Management Services, RFQ 2026-8**

Greetings Mr. Hinojosa,

SAMES, Inc. ("SAMES") is pleased to submit our Statement of Qualifications in response to the City of Edinburg's Request for Qualifications for Project Management Services. As a locally based firm with extensive experience managing municipal infrastructure projects throughout South Texas, we are genuinely interested in continuing to support the City's capital improvement initiatives. We are committed to providing responsive, professional project management services that ensure projects are delivered in accordance with contract requirements while maintaining compliance with all applicable local, state, and federal regulations.

Included in this Statement of Qualifications are our firm's qualifications, project team, representative project management experience, and local government references demonstrating our successful performance on similar assignments. After reviewing the RFQ scope of services, we are confident in our ability to successfully perform the requested services and are committed to delivering timely, cost-effective, and quality project management solutions that meet the City's expectations.

SAMES has assembled a multidisciplinary team with a strong foundation in civil engineering, project management, construction management, and supporting technical disciplines. Our project management approach emphasizes proactive communication, regulatory compliance, quality assurance, construction oversight, documentation, schedule management, budget control, and coordination among project stakeholders. Many of the projects we have successfully managed have been funded through a combination of local, state, and federal programs, demonstrating our ability to effectively administer complex capital improvement projects while satisfying funding agency requirements. During our more than 18 years of service, SAMES has successfully delivered numerous municipal, state, and federally funded projects throughout South Texas, including projects for the City of Edinburg. This experience has prepared us to provide the responsive leadership, technical expertise, and dedicated support necessary to successfully manage the City's projects from inception through completion.

I, Samuel D. Maldonado, PE, RPLS, Principal/CEO, will serve as the primary point of contact for all correspondence regarding this RFQ. My contact information is provided below:

Samuel D. Maldonado, PE, RPLS - Principal / CEO
4943 S. Jackson Road, Edinburg, Texas 78539

Office: (956) 702-8880 Fax: (956) 702-8883 Mobile: (956) 207-7130
sam@samengineering-surveying.com

To date, we have not received any addenda related to this RFQ. As one of the firm's two principals, I have the authority to submit this Statement of Qualifications and contractually bind SAMES, Inc.

Thank you for your time and consideration. We sincerely appreciate the opportunity to be considered for this important work and would welcome the opportunity to discuss our qualifications in greater detail. SAMES is committed to establishing and maintaining a strong working relationship with the City of Edinburg, and we look forward to the opportunity to continue serving the City through the successful management and delivery of its projects.

Respectfully,

Samuel D. Maldonado, P.E., R.P.L.S.
Principal / CEO

SECTION I: OVERALL QUALIFICATIONS OF TEAM

Firm History and Qualifications

As a locally owned and operated firm headquartered in Edinburg, SAMES is pleased to offer the City of Edinburg comprehensive Project Management and Professional Engineering Services tailored to support the City's current and future infrastructure initiatives. We are committed to delivering timely, cost-effective solutions that promote successful project planning, design, procurement, construction, and long-term asset management. By combining experienced project leadership, technical expertise, and responsive client service, our team consistently delivers high-quality infrastructure solutions that meet the City's evolving needs while maintaining schedule, budget, and regulatory compliance.

Established in 2008 by brothers Samuel and Saul Maldonado, SAMES is a minority-owned engineering and surveying firm founded on the mission: *"To empower leadership that promotes excellence through teamwork, accountability, and integrity while providing quality professional engineering, construction, and surveying services."* Initially focused on the core civil engineering disciplines of roadway design, water distribution systems, wastewater collection systems, and storm sewer systems, the firm has strategically expanded its capabilities to better serve our clients. Today, SAMES provides integrated project management, professional engineering, land surveying, land development, Geographic Information Systems (GIS) mapping, and Construction Engineering Inspection (CEI) services, enabling us to effectively manage projects through every phase of development—from planning and funding assistance through design, construction, and project closeout.

SAMES is registered and in good standing with the Texas Board of Professional Engineers and Land Surveyors and meets all applicable local, county, and state licensing and insurance requirements. We are also a Small Disadvantaged HUBZone firm certified by the U.S. Small Business Administration and are pre-certified with the Texas Department of Transportation (TxDOT) to provide engineering, surveying, and related professional services for state- and federally funded projects. Our extensive experience managing publicly funded infrastructure projects has provided our team with a thorough understanding of agency requirements, funding compliance, stakeholder coordination, and the project management practices necessary to successfully deliver municipal capital improvement programs.

Uniqueness to Best Perform

SAMES recognizes that successful project management requires more than technical expertise—it requires experienced leadership, proactive coordination, and a multidisciplinary team capable of integrating planning, engineering, surveying, utility coordination, regulatory compliance, and construction activities to achieve successful project outcomes. As a locally owned and operated firm headquartered in Edinburg, SAMES brings extensive experience serving the City of Edinburg and surrounding communities, providing valuable regional knowledge, familiarity with local conditions, and a thorough understanding of the factors that influence efficient project delivery.

Our professionals have successfully managed complex capital improvement projects involving roadway, utility, drainage, and municipal infrastructure improvements for local, county, state, and federal agencies. This experience has provided our team with an in-depth understanding of government regulations, funding requirements, procurement procedures, permitting processes, stakeholder coordination, and project reporting necessary to successfully deliver publicly funded projects. We understand that effective project management encompasses planning, directing, coordinating, and controlling the technical, administrative, and construction activities required to achieve project goals while maintaining schedule, budget, quality, and regulatory compliance.

A key advantage of SAMES is our ability to provide comprehensive, turnkey project management services supported by fully integrated in-house engineering, surveying, drafting, land development, and construction support capabilities. Our project managers, engineers, survey professionals, CAD technicians, and construction personnel collaborate throughout every phase of project delivery, improving communication, reducing project risks, minimizing handoffs between consultants, and providing the City with a single point of accountability. This integrated approach enables faster decision-making, enhanced quality control, and efficient delivery of infrastructure projects from planning through construction.

SAMES has successfully provided professional services for projects funded through numerous state and federal programs, including the Texas Department of Transportation (TxDOT), Texas Water Development Board (TWDB), Texas Department of Rural Affairs (formerly ORCA), Hidalgo County Urban County Program, North American Development Bank (NADBank), U.S. Department of Housing and Urban Development Community Development Block Grant (CDBG) Program, and the U.S. Department of Commerce Economic Development Administration (EDA). This experience allows our team to confidently manage funding compliance, reporting requirements, agency coordination, and regulatory obligations throughout the project lifecycle.

Located on Jackson Road within the City of Edinburg, SAMES is readily accessible to City staff and project stakeholders, allowing our team to respond quickly to project needs, conduct site visits, and participate in meetings with minimal delay. Combined with our local knowledge, multidisciplinary expertise, and commitment to responsive client service, SAMES is uniquely positioned to provide comprehensive project management services that deliver exceptional value to the City of Edinburg—from project planning through final construction and closeout.

Experience with Local Government Projects

SAMES' project management experience, technical qualifications, and strong leadership have resulted in the successful delivery of numerous professional services contracts for local, state, and federal government agencies. The representative projects presented below highlight a sample of the local government contracts completed within the past two years and demonstrate our experience managing a wide range of public infrastructure projects. While several projects included Construction Engineering and Inspection (CEI) services, all involved comprehensive project management from project initiation through completion.

- ***City of Edinburg*** *– Schunior Phase III Mon Mack Project; Chapin Pump Rehabilitation;*
- ***City of La Villa*** *– Water Tank Rehabilitation Public Improvements; Drying Beds Rehabilitation Public Improvements;*
- ***City of San Juan*** *– 2023 CDBG Street Improvements; Surveying and Civil Engineering Services for San Juan Parks and Recreation Center; CDBG Street Improvements – Surveying, Design, Funding Compliance, and Project Management*
- ***City of Rio Grande City*** *– Public Safety Subdivision Lot 1 Drainage Improvements; St. Ives Subdivision Lot 1: Offsite Water and Sewer Extension; RGC CDBG Street Improvements;*
- ***Rio Grande City EDC*** *- Las Velas Road Widening Project;*
- ***City of Roma*** *– Las Americas Roma Logistics and Industrial Park - Lot 18; Professional Engineering, Surveying and Construction Administration Services for Centennial Drive; Water Booster Pump Station;*
- ***City of Harlingen*** *- Drainage Improvements for Storm Sewer Systems 204 and 252*
- ***City of La Joya*** *- CDBG Street Improvements - Surveying, Design, Funding Compliance, and Project Management*
- ***City of Escobares -*** *CDBG Street Improvements - Surveying, Design, Funding Compliance, and Project Management*

- ***Weslaco EDC*** *– Mid Valley International Industrial Park – Development, Surveying, Civil Design, Funding Compliance, Project Management*
- ***Hidalgo County Urban County Program (UCP)*** *- City of La Villa 2023 CDBG Drainage Improvements;*
- ***Hidalgo County Drainage District No. 1*** *– Mission-McAllen Drain Phase III; West Main Drain Extension Phase II;*
- ***Hidalgo County Pct. 1*** *- Construction Engineering Inspections for Mile 6 W Road Project*

Experience with Local, State and Federal Agencies

SAMES is a trusted partner to a diverse range of clients, including federal and state agencies, counties, municipalities, utility districts, and private entities. Many of our assignments involve the management of capital infrastructure projects funded through programs administered by the Texas General Land Office (GLO), Texas Department of Transportation (TxDOT), Texas Water Development Board (TWDB), North American Development Bank (NADBank), and the Environmental Protection Agency (EPA), as well as projects funded through joint participation agreements and local government bond programs.

Through collaboration with these agencies and multiple levels of government, SAMES has developed a comprehensive understanding of the regulations, funding requirements, policies, procurement procedures, and reporting requirements that govern publicly funded infrastructure projects. Our project management experience includes permitting coordination, environmental compliance, labor compliance, stakeholder coordination, contract administration, grant administration, and interagency collaboration necessary to successfully deliver projects from planning through construction and closeout.

This experience enables our team to proactively identify regulatory requirements, permitting needs, funding obligations, and potential project constraints during the earliest stages of project development. By integrating these requirements into project planning, scheduling, budgeting, and risk management activities, SAMES helps clients minimize risk, avoid costly delays, maintain regulatory compliance, and achieve project milestones. We also have extensive experience supporting grant and funding applications, coordinating bond-funded projects, and administering state- and federally funded programs through the timely preparation and submission of required documentation, including project schedules, monthly progress reports, certified payroll reviews, reimbursement requests, construction documentation, and other agency deliverables. This proactive, disciplined approach ensures projects remain compliant, on schedule, within budget, and successfully progress from project initiation through final completion.

Office Location and Familiarity with the Local Geographical Area

Project management services will be provided from SAMES' office located at 4943 S. Jackson Road in Edinburg, Texas. Our local presence enables us to provide the City with responsive, accessible, and personalized professional support services close to home. As a locally owned and operated firm, SAMES has an in-depth understanding of the region's infrastructure, development patterns, regulatory environment, and community needs, allowing us to respond quickly and effectively to project challenges.

Our proximity to City facilities and project sites allows for timely site visits, coordination meetings, and direct communication with City staff and project stakeholders. This accessibility enhances project oversight, accelerates decision-making, and supports proactive problem resolution throughout the project lifecycle. As projects progress, SAMES will remain readily available to provide responsive project management, consistent communication, and the technical support necessary to successfully deliver the City's infrastructure initiatives.

Representative Project Management Experience

SAMES will provide the City of Edinburg with experienced project managers, qualified technical staff, and the resources necessary to successfully deliver a wide range of municipal infrastructure projects. Our project management capabilities are demonstrated through the successful planning, coordination, and execution of similar assignments for local, state, and federal government agencies.

The following representative projects highlight SAMES' experience providing Project and Construction Management services for federally, state-, and locally funded infrastructure improvements.

Hidalgo County Street Improvement Project – WA #1 Roadway & Bridge Inventory and Assessment Study and Reports

Contract Date: September 2021 – September 2022

Client:
Hidalgo County
Roy Quintanilla, CPM – Hidalgo County Executive office
505 S. McColl Rd, Suite J, Edinburg, TX 78539
(956) 292-7655
Contract Value: $1.7 Million

The Hidalgo County Street Inventory project is a locally funded project that involved the assessment of approximately 2,000 miles of county roads. The purpose of the project was to determine the current state of the County's public infrastructure and to centralize an easily accessible database to allocate public resources in a more efficient way thereby benefitting everyone, from taxpayers to government officials. SAMES gathered raw data from the county roads which was then input into various databases and asset management software. SAMES then processed the data to prepare graphs, tables, charts, and Geographic Information System (GIS) files and maps. The data collected on these roads included Road Name, Beginning and Ending Points, Mileage, Width, Apparent Right-of-Way, Road Type (urban, rural), Surface Type (asphalt, caliche, concrete, gravel, soil), Street Signages, Street Lighting, Culverts, Inlets, and Road Defects (Traverse & Longitudinal cracks, Corrugation, Raveling, Rutting, Shoving, Edge Cracking, Potholes, Alligator Cracks, and Deficient Drainage). Such data was then geo-referenced which allowed each Precinct the ability to see the precise location of these elements and defects. In addition to roadway assessments, SAMES is also performing quality control inspections on new subdivisions approved within the contract time frame for the Street Inventory Project. Once these subdivisions are constructed (and prior to any warranty expiration date) SAMES will perform the same assessment as with the county roads. Should any defects or deficiencies be found, SAMES will notify the respective Precinct so they can address the issue with the contractor of record and have them correct the deficiency before the warranty period expires.

Professional Engineering Services for Inspections, Material Testing and Project Management for Liberty Blvd. (US 83 to Mile 3), Penitas, Texas

Contract Date: December 2024 – in progress (estimated completion date of May 2027)

Client:
Hidalgo County Precinct No. 3
Jorge Arcaute – Chief of Staff jorge.arcaute@co.hidalgo.tx.us
724 Breyfogle Road, Mission, TX 78572
(956) 585-4509

Contract Value: $12.2 Million

This project involves the reconstruction and widening of approximately 2.4 miles of an existing non-freeway roadway into a four-lane urban facility with a continuous two-way left-turn lane, sidewalks, bridge structures, storm drainage improvements, curb and gutter, pavement, signing, striping, and related infrastructure improvements. SAMES was retained by Hidalgo County Precinct 3 to provide Construction Management and Construction Engineering Inspection (CEI) services to protect the County's investment and ensure compliance with TxDOT and Federal Highway Administration (FHWA) requirements for reimbursement.

As the County's construction management consultant, SAMES oversees contractor compliance with the plans, specifications, contract documents, and applicable TxDOT and FHWA requirements. Our responsibilities include daily construction inspection, documentation of project activities, review of material submittals and payment applications, coordination of construction materials testing, certified payroll reviews, labor interviews, DBE compliance monitoring, contractor requests for information, and assistance with funding and regulatory compliance.

SAMES serves as the primary liaison between Hidalgo County Precinct 3, TxDOT, the City of Peñitas, utility providers, and the contractor to facilitate communication, resolve utility conflicts, evaluate potential change orders, and monitor project schedule and budget. Monthly progress meetings, comprehensive construction reports, photographic documentation, and executive presentations keep project stakeholders informed while supporting timely decision-making and regulatory reporting throughout construction.

Professional Engineering Services for Inspections, Material Testing and Project Management for the Mile 6 W. Road Project (Mile 9 to Mile 11), Weslaco, Texas

Contract Date: April 2020 – November 2022

Client:
Hidalgo County Precinct No. 1
Jorge Pena – Deputy Chief jorge.pena1@co.hidalgo.tx.us
1902 Joe Stephens Avenue #101, Weslaco, TX 78596
(956) 968-8733

Contract Value: $12.3 Million

The Hidalgo County Mile 6 W Project, spanning from Mile 9 to Mile 11, entailed the construction of approximately 2 miles of a 5-lane roadway, extending the ultimate street cross-section northward. This project encompassed widening an existing 2-lane roadway, enhancing storm drainage systems, managing utility relocations, installing sidewalks, signalization, and striping. It aimed to alleviate traffic congestion in the north Weslaco area within Precinct 1. Our team at SAMES Inc. was chosen by Hidalgo County Precinct-1 as the unified project owner's representative, entrusted with providing comprehensive construction management services.

The project's execution primarily occurred within city streets, involving deep excavations that intermittently impacted the community and its infrastructure. Our approach emphasized stringent coordination across all construction phases and with involved agencies to minimize disruptions to residents and stakeholders. SAMES implemented robust quality assurance measures, including meticulous review and approval of material submittals and regular site visits to ensure adherence to construction plans and contract specifications. We meticulously scrutinized all material submittals for compliance with contract specifications, managed contractor certified payroll reports, and facilitated completion of TxDOT documentation pertaining to funding and regulatory requirements. SAMES diligently handled contractor

inquiries, oversaw material testing pre-installation, and thoroughly reviewed contractor payment applications to verify performance as specified.

Our commitment to transparent communication was evident through ongoing updates with the client on potential change orders, contractor inquiries, engineering duties status, staffing needs, and budgetary status. Weekly update meetings with Precinct-1 kept key stakeholders informed of field operations progress. Detailed Raken progress reports, generated daily by our field staff, were submitted to the client, encompassing constituent feedback, work status, safety issues, and their resolutions. Additionally, SAMES provided comprehensive weekly and monthly reports, offering a holistic view of operations, construction progress percentages, and budget updates. Our proactive management approach, meticulous quality assurance practices, and transparent communication channels demonstrate our capabilities in engineering and construction inspection, making us an ideal partner for any CEI (construction engineering inspections) project.

2018 Bond Project Schunior Regional Detention Pond, Edinburg, TX

Contract Date: February 2019 – November 2023

Client:
City of Edinburg
Mardoqueo Hinojosa- City Engineer (mhinojosa@cityofedinburg.com)
415W University Drive, Edinburg, TX 78540
(956) 388-8211

Contract Value: $2.4 Million

This project included planning, surveying, hydrologic and hydraulic analysis, engineering design, preparation of plans, specifications, and cost estimates, bid procurement, construction administration, and project management services for a regional drainage improvement project. During the preliminary phase, SAMES completed a comprehensive drainage study encompassing approximately 900 acres to evaluate alternatives for a new lateral detention system and improvements to existing drainage facilities. Services included topographic surveying and hydrologic and hydraulic modeling using the U.S. Army Corps of Engineers HEC-RAS software to evaluate multiple conveyance and detention scenarios based on 10-, 25-, and 50-year storm events.

During design, the City expanded the project scope to include property acquisition services necessary to accommodate additional detention capacity. SAMES provided property research, title reports, and seven parcel plats with metes and bounds descriptions for Phase I improvements south of SH 107. As project limits expanded to include a drainage corridor south of Sprague Road extending to the Hidalgo County Drainage District No. 1 outfall east of McColl Road, SAMES performed additional topographic surveying and multiple HEC-RAS model iterations to evaluate alternative drainage conveyance routes while considering land acquisition constraints and coordination with City staff.

SAMES also provided comprehensive construction management and construction administration services. Responsibilities included preparation of bidding documents, construction permitting, advertisement, pre-bid and bid opening services, bid evaluation, and recommendation of award. During construction, SAMES coordinated the pre-construction conference, reviewed contractor requests for information, material submittals, change orders, and pay applications, conducted periodic site visits, monitored construction progress, and coordinated project scheduling with the contractor and City staff. At project completion, SAMES performed the final walkthrough, prepared the punch list, and managed construction closeout to ensure all contract requirements were satisfactorily completed.

Hidalgo County Housing Authority – Hacienda de San Miguel

Contract Date: January 2021 – March 2022

Client:
Housing Authority of the County of Hidalgo
Mike Lopez, Executive Director
1800 N. Texas Blvd., Weslaco, TX 78599
(956) 969-5866

Contract Value: $14 Million

SAMES was subcontracted by Mata-Garcia Architects to provide surveying services, land development, civil engineering and geotechnical services for the design and project of a new subdivision and apartment complex for the Housing Authority of Hidalgo County. The development process included preparation of a subdivision plat including submittal of the application of subdivision plat and utility and drainage plans for approval through the City of Donna. During the civil design process, it was discovered that existing sewer facilities around the area were too far and lacked enough depth to be extended to the project site. As a result, SAMES proposed a submersible wet-well lift station to provide the development with sanitary sewer service. SAMES' project engineer determined all aspects of the lift station, from logistical items to operational tasks. He determined the location, design peak flow, load requirement on pumps and motors as well as identifying power sources, approved controls, designed wet-well capacity and discharge conduits. Operational costs, space requirements, effectiveness of system, maintenance required, and environmental impact were all considered throughout the design. The design was prepared in accordance with TCEQ Standards and Hydraulic Institute Standards. Once design was completed and drawings were approved for project, SAMES provided project management and inspection services to ensure the work was completed as specified.

The Heights on Wisconsin Subdivision, Edinburg, Texas

Contract Date: April 2022 – October 2023

Client:
Carranza Development
Julio Carranza - Owner
(956) 207-0987

Contract Value: $1.9 Million

The project consists of an 18.08-acre tract of land to be subdivided into approximately 82 Single-Family Residential lots. The project, located in Edinburg, Texas, represents Phase III of such development and follows the City of Edinburg Planning & Zoning standards. For this project, SAMES provides Surveying & Engineering services that include completion of survey topography of property, preparation of Final Subdivision Plat, Utility Layout and Drainage layout as per City requirements, Coordination with utility agencies to obtain certifications/plat approvals, and completion and submission of Drainage Report to Hidalgo County Drainage District No. 1 for approval. In addition, the SAMES CEI Department provides pay application review and quantity verification for all contractor progress payments. CEI performs onsite inspections to confirm the installed quantities reported by the contractor, then prepares a complete report for the owner and the lender which includes material quantities, items installed, volume of work performed, and payment recommendations to facilitate the pay application process.

Design of wastewater lift station in accordance with TCEQ and City of Edinburg standards and requirements. This lift station is to service 63-acres of existing and future residential developments. The design consists of pump/motor selection, sizing of wet well, establishing pump control parameters, lift station site layout, design of discharge force main, and project engineering details. SAMES also coordinated with AEP and electrical design engineer to provide electrical service to the site. Review of contractor submittals to ensure adherence to project plans and technical specifications.

Project Management Roles and Responsibilities

SAMES has developed a comprehensive Project Management Plan that clearly defines the roles, responsibilities, and lines of authority for each member of the project management team. Key personnel include Project and Construction Managers, Assistant Project Managers, and Field Inspectors, each with clearly defined responsibilities that promote effective communication, accountability, quality control, and successful project delivery.

Project Manager

Specific Duties of the Project Manager during project include:

- Monitor the project for compliance to program schedule, technical, quality and contract/facility interface requirements and COE regulatory, legal, and procedural requirements.
- Provide specialized support to the assistant project managers as required. Such support may include additional staffing, specialized equipment, or outside contract services.
- Review requests for funding to support project initiatives.

Assistant Project Manager

The Assistant Project Manager are intended to be the front-line managers of the project contractor, dealing with the issues addressed by the contract documents, and presenting to the Project Manager only those issues which require additional input beyond what is included in the contract documents. Specific duties of the Assistant Project Manager include:

- Manage the scope, quality, schedule, cost and payment certifications for the project and post-project phases of the project.
- Provide project contract administration to enforce contract requirements. This includes on-site visits and the monitoring of submittals, field reports, and test reports.
- Coordinate and monitor input, deadlines, and review comments on Project Contractor's submittals between Design Engineers and Project Contractors, as appropriate. Provide reminders when there are delays to timely responses on submittals to Contractor and proper logging and tracking of all submittals.
- Manage document control system by ensuring proper filing of project phase documents and maintain such files.
- Function as the primary contact with representatives of the engineer, contractor, materials testing firm, and the internal team members.
- Arrange and conduct all project meetings; ensure meeting minutes are properly prepared and issued.
- Routinely review (audit) correspondence between Field Inspectors and Project Contractors for appropriateness.
- Review and sign all correspondence related to quality, schedule, or administrative disputes with contractors.
- Liaison with Program Manager, Design Engineers, and Project Contractors regarding issues of design, constructability, drawings, or specifications.

- Upon request from COE, negotiate on their behalf for contract changes with Project Contractor to develop a proposed Change Order to COE with recommendations. COE and the Project Contractor must understand that the Project Manager's negotiation is in good faith but is non-binding and that after the proposal and recommendation, COE is free to continue negotiation directly with the Project Contractor. The Assistant Project Manager will monitor and follow up with COE to encourage timely responses to change issues and change order development, and persistently insist on proper supporting documentation from the Project Contractor.
- Monitor and document quantities on changes agreed to be paid on time and material basis if applicable.
- Routinely review (audit) all daily and weekly inspection reports to ensure appropriateness.
- Prepare monthly progress report to COE by consolidating individual input from the Project Contractor, Resident Engineer and Inspectors reflecting the status of the project contract. Present progress brief to project team and COE management, as requested.
- Review and recommend approval of contractor progress payment applications. Ensure receipt of proper progress and payment documentation. Monitor and follow up to encourage COE timely processing of payments.
- Ensure on-going communication with the Program Manager
- Review the project schedule and provide comments to the Project Manager, Program Managers, Design Engineers, and Project Contractor, as appropriate; monitor and document project progress; instruct responsible parties to initiate remedial actions, as required; and instruct submittal(s) by contractor of updated and/or recovery schedules as changes occur to ensure schedule remains in compliance with the overall project goals.
- Analyze change orders for schedule impacts.
- Monitor Project Contractor's compliance with environmental requirements and coordinate contractor activities related to environmental and safety personnel.
- Conduct final inspection and with Owner input establish final Project Contract punch list.
- Verify completion of all punch list components prior to recommending final payment.
- Ensure receipt of proper final payment documentation, final approved operations, and maintenance (O&M) manuals, and as-built drawings reviewed approved by the inspector and consulting engineer.
- Coordinate all project contract closeout procedures, including preparation of final record drawings by Design Engineer.
- Coordinate notifications and responses to warranty issues.
- Coordinate anniversary inspection prior to warranty expiration(s).

Field Inspectors

Field inspector duties are described below:

- Observe the work in progress for conformance with project documents.
- Accept rebar, formwork, and embedment for concrete pours and observe concrete site testing, placement, compaction, finishing and curing, and pipe installation and testing.
- Accept subgrade stabilization, base compaction and HMAC placement.
- Prepare daily reports and maintain an inspection diary.
- Maintain contract documentation filing system.
- Take project progress photos.
- Witness field tests.
- Respond to RFI's that involve site operations or where the contract documents are clear on the intent. If not covered in contract documents, then discuss with Project Manager for response or liaison with design team to address.

- Coordinate materials testing field services through the materials testing firm and advise the Assistant Project Manager when testing is completed.
- Coordinate initial survey meeting on site to ensure proper turnover of engineer's survey data to Project Contractor and advise the Assistant Project Manager as surveying occurs.
- Advise the Assistant Project Manager when the Design Engineer is required to witness special field tests.
- Maintain mark-up of drawings to reflect as-built conditions and review contractor's red-lined and as-built drawings. Review contractor's final, red-lined drawings and ensure proper submittal of these documents to Consulting Design Engineer for development of record drawings.
- Review field progress against approved schedule and document/report variations.
- Review progress payment applications with Project Contractor and make recommendations on percentage complete for pay items to the Assistant Project Manager.

Contingency Plan for Key Personnel Availability

SAMES has a proactive contingency plan to ensure uninterrupted service delivery to address staffing needs should key personnel become unavailable.

1. Cross-Training & Role Redundancy – Each critical role has a designated backup staff member trained to step in as needed. Our project managers, project engineers, and CAD technicians are cross trained to ensure continuity.
2. Scalable Staffing & Resource Allocation – We maintain a flexible workforce with additional engineers, technicians and administrative support on standby, ensuring smooth personnel transitions without project delays.
3. Rapid Response & Remote Collaboration – Cloud-based project management systems allow seamless access to plans and data, enabling any assigned team member to continue work without disruption.
4. Subcontractor & Partner Support – If additional resources are needed, pre-qualified subcontractors are available to supplement our in-house team, ensuring compliance with all standards.

Through this structured contingency plan, SAMES guarantees that the City's projects will stay on schedule, despite any unforeseen personnel changes.

PROJECT TEAM

The City of Edinburg will be supported by a multidisciplinary project management team with the experience, leadership, and technical expertise required to successfully manage infrastructure projects of varying size and complexity. SAMES' integrated capabilities in civil engineering, surveying, land development, and construction support allow our team to effectively coordinate all project disciplines, anticipate challenges, and implement practical solutions that support successful project delivery. Through extensive collaboration on municipal infrastructure projects, our team has developed proven processes and working relationships that promote effective communication, efficient coordination, and consistent management of project scope, schedule, budget, and quality objectives.

SAMES intends to self-perform the majority of services required under this contract, providing the City with a single point of accountability and streamlined project coordination. Maintaining in-house technical resources allows project managers to make informed decisions quickly, minimize communication gaps, and effectively manage project activities from initiation through completion. When specialized expertise is required beyond our internal capabilities, SAMES maintains established relationships with qualified subconsultants who complement our team and support the successful delivery of City projects.

SAMES is led by Firm Principals Samuel (Sam) D. Maldonado, PE, RPLS, and Saul D. Maldonado, PE, who will provide executive oversight and strategic project leadership for this contract. Sam brings more than 28 years of experience in civil engineering, project management, and construction administration while Saul brings more than 22 years of experience managing the design and construction of multidisciplinary infrastructure projects, including extensive capital improvement program management. Together, they provide more than 50 years of combined professional experience and will provide the leadership, technical guidance, and oversight necessary to successfully deliver projects for the City of Edinburg.

Supporting Sam and Saul's leadership, Jessica M. Maldonado, Vice President of Professional Services, will serve as Project Manager and Contract Administrator for this contract. As a certified Project Management Professional (PMP), Jessica brings extensive experience managing municipal infrastructure projects, contract administration, funding compliance, and coordination with local, state, and federal agencies. Together, the management team will provide the City with effective project oversight, proactive communication, and disciplined management of project scope, schedule, budget, and regulatory requirements.

Resumes

SAMUEL D. MALDONADO, PE, RPLS

Role: Senior Project Manager

Education:

- M.B.A., University of Texas – Rio Grande Valley (2017)
- B.S., Civil Engineering, Texas A&M University- Kingsville (1997)

Registrations/Certifications:

- Professional Engineer, Texas: No. 91889
- Professional Engineer, Arizona: No. 71257
- Professional Engineer, New Mexico: No. 30412
- Registered Professional Land Surveyor, Texas: No. 6027

SAMUEL D. MALDONADO, PE, RPLS is a Licensed Professional Engineer and Registered Professional Land Surveyor with over 28 years of experience in civil engineering, project management, construction management, and infrastructure design, along with more than 18 years of professional land surveying experience. His career began in heavy civil construction, bulk materials logistics, and conveyor engineering at the Corpus Christi Ship Channel before transitioning to the planning, design, surveying, and management of municipal infrastructure and capital improvement projects.

Throughout his career, Mr. Maldonado has successfully managed multidisciplinary teams in the planning, design, construction, and delivery of sanitary sewer collection systems, water distribution systems, roadway improvements, drainage facilities, and other public infrastructure projects. His experience includes overseeing projects for private clients as well as local, state, and federal agencies, where he has directed professional and technical staff, coordinated with stakeholders, managed project schedules and budgets, and ensured successful execution from project initiation through construction completion.

As a Principal of SAMES, Mr. Maldonado provides executive oversight and technical leadership for engineering, surveying, and construction management assignments, including state- and federally funded projects. As Project Surveyor, he is pre-certified with the Texas Department of Transportation (TxDOT) and ensures surveying activities are effectively integrated with engineering and construction operations. His comprehensive background in engineering, surveying, and capital improvement program management enables him to deliver practical solutions, maintain regulatory compliance, effectively manage project risks, and successfully guide projects through planning, design, construction, and closeout.

Project Experience:

2018 Bond Project Schunior Regional Detention Pond – Edinburg, Texas

- Provided design oversight and project management services for the design of a new lateral detention system (appx. 900 acres).
- Oversaw the preparation of a detailed study and utilized hydrologic and hydraulic calculations to finalize the engineering design of the new storm drain system, including modeling of system utilities which included conveyance design of 10 and 25-year options while detention volumes included 25 and 50-year options.

Hidalgo County Shary Road Expansion (2 Miles North of SH107) Phase I – Mission, Texas

- Oversaw Phase I project delivery for the expansion of Shary Road from a two-lane to a five-lane urban arterial, ensuring compliance with TxDOT, FHWA, and Hidalgo County standards.
- Managed schematic design development, environmental clearance, ROW acquisition, and funding coordination across multiple agencies.
- Led topographic surveying, ROW parcel plat preparation, and traffic control assessments, including line-of-sight analysis for off-system intersections.
- Coordinated public involvement, stakeholder meetings, and development of the Advance Funding Agreement (AFA) to support project funding.
- Ensured all submittals met federal and state requirements, enabling progression to PS&E development and construction readiness.

Ware Road Utility Relocation Project, TxDOT CSJ: 2094-01-038 Roadway Expansion – McAllen, Texas

- Provided engineering design of proposed 6”-16” waterline relocation, abandonment of existing waterlines, sanitary sewer line and manhole adjustments for the expansion of 2 miles of roadway.
- Provided topographical surveying, aerial surveying, and right-of-way mapping services.
- Established project controls based on TxDOT project benchmarks and surveyed all-natural ground, existing utilities, existing infrastructure, manholes, roadway, curbs, storm sewer system, property corners/boundaries, monuments and benchmarks.

Sam Houston Boulevard Widening – Pharr, Texas

- Provided subsurface utility exploration and surveying services of all existing utilities including waterlines, sanitary sewer lines, storm drains, electrical underground cable, pressure gas pipelines, and telecommunications cables.
- Prepared Right-of-Way Maps as required by TxDOT for the acquisition of 25 parcels.
- Prepared easement parcel plats by conducting a thorough investigation of the properties and obtaining title reports of all property owners fronting the roadway.
- Utilized SUE and survey maps for the realignment design of existing utilities that needed to be moved due to the widening of the road.

Escobares TxGLO Flood and Drainage Improvements – Roma, Texas

- Provided project management, topographical surveying, grant application assistance, hydrology analysis & hydraulic engineering design services for the design and installation of a new storm drain system funded by the Texas General Land Office’s Disaster Recovery Program.
- Obtained all required permits and provided contract administration including all required progress and funding reports.
- Served as the primary point of contact and coordinated all parties involved including the City, County, existing utility providers and construction contractors.

Starr County BCAP Rnd III, Street and Drainage Improvements- Athens Road – Roma, Texas

- Provided surveying, grant application assistance, hydraulic & hydrologic calculations to ensure storm drain design, and project management services for the design of a new two-lane roadway including

curb and gutter, new storm drain system and utility relocation design for several utilities that required adjustment.

- Followed AASHTO guidelines for vertical curves due to the steep terrain in this area of Starr County.
- Primary point of contact and coordinated with all parties involved including existing utility providers, the City of Roma, and the Starr County grant coordinator.

Final Design for Marathon WWCS Rehabilitation Project – Marathon, Texas

- Performed field surveying for over 12,000 LF of proposed sanitary sewer alignment, collecting detailed site condition data.
- Established horizontal control using Texas State Plane coordinates and generated 0.5-foot contour coverage.
- Identified property corners, limits of the right-of-way, easements, tract corners and section corners and set project benchmarks.
- Prepared and delivered a digital (CAD) and hard copy of the parcel plats with metes and bounds and plan view sheets of the collected date to the extents of the project limits.

Crestmont Utility Public Improvements – Corpus Christi, Texas

- Design and installation of public utility improvements for a new commercial plaza, including water and sanitary sewer lines, boring and excavation, trench and shoring protection, and traffic control.
- Coordinated in-house labor crew as well as subcontractors to ensure project was delivered in accordance with design and approved plans.

Pharr Port of Entry Refrigerated Cold Storage Facility – Pharr, Texas

- Provided surveying, design and construction management for the design and construction of a 3,000 SF facility building at the Pharr Port of Entry.
- Oversaw government reporting requirements and ensured regulatory compliance.
- Coordinated with multiple agencies and served as the primary point of contact for the General Services Administration.

SAUL D. MALDONADO, PE

Role: Project Manager

Education:

- B.S., Civil Engineering, Texas A&M University – Kingsville (2003)

Registrations/Certifications:

- Professional Engineer, Texas No. 100320

SAUL D. MALDONADO, PE is a Licensed Professional Engineer with more than 23 years of experience in civil engineering, project management, design, and construction administration for public infrastructure projects. His expertise includes the planning, design, and delivery of sanitary sewer collection systems, water distribution systems, roadway improvements, subdivision developments, and stormwater infrastructure for municipal clients.

Mr. Maldonado brings extensive municipal leadership experience, having served as City Engineer for the City of Palmview, District Engineer for Agua Special Utility District, and Capital Improvements Project Engineer and Subdivision Coordinator for the City of McAllen. In these roles, he directed capital improvement programs, coordinated subdivision development, and managed the planning, design, bidding, and construction of water, wastewater, drainage, and transportation infrastructure projects.

As Project Manager, Mr. Maldonado oversees project budgeting, cost estimating, procurement, design coordination, and construction administration while working closely with public officials, developers, consultants, utility providers, and regulatory agencies to ensure projects are delivered on schedule, within

budget, and in compliance with applicable standards. His portfolio includes successful projects for federal, state, county, municipal, and school district clients.

Mr. Maldonado is well versed in permitting requirements, regulatory compliance, and interagency coordination with organizations including the Texas Department of Transportation (TxDOT), the Texas Commission on Environmental Quality (TCEQ), the Texas Department of Licensing and Regulation (TDLR), and the U.S. Army Corps of Engineers. His combination of municipal leadership, technical expertise, and collaborative project management provides clients with practical, efficient solutions throughout every phase of project development.

Project Experience:

La Homa Road Realignment and Bridge Project, Palmview, Texas

- Provided project management and engineering design for the construction of a new bridge spanning an irrigation canal, including roadway realignment to the existing Business Highway 83 intersection.
- Directed the roadway, structural, and storm drainage design, including hydraulic analyses and the design of a storm sewer system incorporating both gravity and pump station components to convey runoff over the irrigation canal to the ultimate outfall at Business Highway 83. Coordinated with the Texas Department of Transportation (TxDOT), utility providers, and Hidalgo County Irrigation District No. 1 to resolve utility conflicts and obtain all required approvals and permits.
- Administered construction through periodic site visits, progress reporting, utility coordination, review of material submittals, requests for information (RFIs), contractor pay applications, and project closeout.

TxGLO-DR Hutto Road Drainage Improvements – Donna, Texas

- Provided project management for the design and construction of a new storm drain facility required to intercept runoff from approximately 52 acres of residential and farming property.
- Performed a feasibility study prior to design conception and oversaw the hydrology analysis and hydraulics design for the new storm drain facility.
- Obtained all required permits from TxDOT, provided all monthly progress reports and coordinated with the funding agency, Texas General Land Office, before and during construction to ensure compliance with all program objectives.

Duval County Transportation Infrastructure Fund Grant (TIF)- Duval County, Texas

- Provided design and project management for the reconstruction and overlay of several County Roads within Duval County including the protection and improvement of existing storm water drainage systems along creek crossings, roadway and driveway culverts and roadside ditch systems.
- Performed the required Environmental Assessment for the proposed roadway expansion.
- Performed oversight and administrative design and review of the proposed SW3P and verified compliance with TCEQ requirements for Best Management Practices (BMPs).
- Performed initial review and completion / management of the EPIC sheets.

Agua SUD – DWSRF Waterline Project – Hidalgo County, Texas

- Provided project management for the design and construction of approximately 7 miles of 12”, 16”, and 20” PVC water distribution mains.
- Coordinated with various Irrigation Districts, Drainage District #1, and TxDOT for aerial canal crossings, sub-surface canal crossings, and bore permits for the completion of the project.

Agua SUD – DWSRF La Homa Road Waterline Adjustment – Palmview, Texas

- Provided project management for the adjustment of 14,000 LF 8” – 12” PVC waterline from Veteran’s Boulevard to Graham Avenue during TxDOT’s La Homa Expansion Project.
- Coordinated with TxDOT to avoid any design conflicts.

- Served as the Prime Engineer who assisted with financial applications through TWDB's Clean Water and Drinking Water State Revolving Fund (SRF) and with DBE form submittals.

Agua SUD- U.S. Highway 83 Relief Route Waterline Adjustment – Hidalgo County, Texas

- Provided design management for the adjustment of 11,000 LF 8" – 16" PVC waterline.
- Coordinated with multiple entities, including TxDOT, Hidalgo County Drainage District #1, and private firms to ensure design accuracy and minimize conflicts.

Las Americas Roma Industrial and Logistics Park – Roma, Texas

- Managed the commercial development of a 337.20-acre tract subdivided into three phases, including Phase I (+124 acres) designated for industrial and commercial development.
- Directed all aspects of project development, including coordination with utility providers, the City of Roma, Starr County, and the Texas Department of Transportation (TxDOT); participation in pre-development, public involvement, and City meetings; and preparation of required documentation, including the petition for voluntary annexation, drainage reports, preliminary utility and drainage plats, and all plat applications and submittals.
- Managed the design and construction of Phase I public improvements through 30%, 60%, and 90% design submittals and provided construction administration services, including review of material submittals, contractor pay applications, requests for information (RFIs), utility coordination, final inspections, and project closeout.

Limex Distribution Center and Cold Storage Facility, McAllen, Texas

- Oversaw the development, design and construction of a 100,000 square foot building consisting of office and storage partitions, including the preparation of a Phase I Environmental Site Assessment, architectural building design and design of civil, structural, mechanical, electrical and plumbing components.
- Obtained all required permits and coordinated with existing utility providers during design to avoid possible conflicts during construction and ensured compliance with all local and state construction requirements.

JESSICA M. MALDONADO, PE, PMP, CFM, SIT

Role: Project Manager & Contract Administrator

Education:

- M.B.A., University of Texas at Rio Grande Valley (2018)
- B.S., Civil Engineering, Texas A&M University – College Station (2005)

Registrations/Certifications:

- Professional Engineer, Texas No. 111579
- Project Management Professional, Texas No. 2077158
- Certified Floodplain Manager, Texas No. 3995-21N
- Surveyor-in-Training, Texas No. 110912

JESSICA M. MALDONADO, PE, PMP, CFM, SIT has 21 years of experience in municipal civil engineering, project management, contract administration, and construction management for publicly funded infrastructure projects. Her expertise includes civil engineering design, site surveying, land development, and the design and coordination of water, wastewater, storm drainage, utility, and roadway improvement projects. She has extensive experience integrating utility design with roadway and site development projects while ensuring constructability, regulatory compliance, and minimal service disruption.

As a Project Manager, Jessica oversees multidisciplinary engineering and surveying projects from planning through construction, with a strong emphasis on schedule management, contract administration, and funding compliance. She has successfully managed numerous federally and state-funded projects, including more than 16 Texas General Land Office (GLO)-funded drainage and roadway improvement projects. Her

responsibilities include coordinating project reporting, preparing and submitting required documentation, progress reports, reimbursement packages, and other program deliverables while ensuring compliance with agency standards and funding requirements.

Jessica's experience also includes coordinating with the Texas General Land Office (GLO), the Federal Emergency Management Agency (FEMA), the Federal Highway Administration (FHWA) on TxDOT and local government projects, and the U.S. Environmental Protection Agency (EPA) on infrastructure improvements funded through economic development grants. Her comprehensive understanding of federal and state funding requirements, combined with her technical and project management expertise, enables her to successfully deliver complex infrastructure projects from design through construction.

Project Experience:

2018 Bond Referendum Project No. 12- FM 493 & Country Road – Donna, Texas

- Provided project management services for the preparation of a detailed study to design a new storm drain system to alleviate flooding in the colonias between South River Road and the surrounding Chapparal Drain in Donna, Texas.
- Oversaw the planning, development, geotechnical services, hydraulics and hydrology design, and the preparation of plans and cost estimates required for construction.
- Coordinated with the local drainage district, the County, the City and local utility providers.

Veterans Road (SH 495) Utility Relocation Project- Palmview, Texas

- Oversaw the design and relocation of municipal water and sewer infrastructure in conflict with TxDOT's proposed four-lane roadway and storm sewer improvements, including the development of utility plans in accordance with TxDOT standards.
- Directed utility coordination among telecommunications, gas, irrigation, electric, and municipal utility providers, while supporting preparation of joint-bid packages, special specifications, and utility agreement documentation to resolve conflicts and ensure project constructability.

Sam Houston Boulevard Widening, TxDOT CSJ: 0921-02-256 – Pharr, Texas

- Provided design management for the roadway and drainage improvements, as well as the adjustment of waterline and sanitary sewer lines.
- Completed the environmental study for TxDOT funding regulations.
- Provided utility coordination and construction oversight for the relocation of existing utilities.

Hidalgo County BCAP Fresno Street Roadway & Drainage Improvements – San Juan, Texas

- Provided engineering design, contract administration and construction management for this road and drainage improvement project funded by TxDOT's Border Colonia Access Program.
- Prepared required forms and reports and ensured compliance with TxDOT program regulations.
- Oversaw the survey and CAD departments, providing direction and management when needed.

Loyola Beach Water Quality Improvements Project – Effluent Reroute – Riviera, Texas

- Managed the planning, engineering design, surveying, environmental clearance, and utility coordination for the rerouting of the Riviera Wastewater Treatment Plant effluent line to improve water quality and support coastal conservation and restoration.
- Directed the design and construction of a new 150 GPM effluent pump station and approximately 10,000 LF of force main to convey treated effluent to a new outfall location.
- Oversaw bid procurement, construction management, and project close-out, ensuring compliance with project requirements and successful project delivery.

TxGLO 2015 Floods Grant Stormwater Relief Project Ph. II – Alamo & Edinburg, Texas

- Provided project management services for the survey, design and installation of a new storm sewer system that included drainage swales, roadside ditches, inlets, and pipe networks ultimately flowing into an existing drainage ditch owned by Hidalgo County Drainage District #1.

- Prepared and submitted grant application and obtained all required permits.
- Coordinated with the GLO and County to ensure funding and schedule compliance during design and construction.

Ware Road Utility Relocation Project, TxDOT CSJ: 2094-01-038 Roadway Expansion – McAllen, Texas

- Oversaw the design and provided project management of the PS&E utility relocation package which included the waterline and sanitary sewer line improvements.
- Assisted McAllen Public Utility (MPU) with compensable utility support documentation required for the Advance Funding Agreement and Standard Utility Agreement.
- Provided project estimates and review submittals for TxDOT and MPU to review and approve.
- Oversaw the preparation of construction approved plans and specifications in accordance with TxDOT standards and MPU requirements and provided final as-builts at end of construction.
- Performed TxDOT utility coordination to avoid conflicts during construction and provided responses to all contractor requests for information.

TxDOT CapEx AWU Standalone (I-35 & Dean Keeton St.) – Austin District, TX

- Provided utility engineering services QLA for the collection and analysis of subsurface utility data using non-destructive vacuum excavation.
- Coordinated with utility owners to verify utility locations.
- Supported coordination with involved entities to ensure all work was properly permitted.
- Ensured traffic control measures complied with applicable state and federal requirements.

Kleberg County CDBG Water and Sewer Improvements – Kleberg County, Texas

- Provided project management for the survey, design and construction of 9,400 LF of waterline, water services, fire hydrants and 3,200 LF of gravity sewer line including service connections, manholes and septic tank mitigation.
- Coordinated with TxCDBG and TxDOT to ensure compliance w/ funding & permitting regulations.
- Prepared a financial/budget analysis of the project for Kleberg County authorities.

LUIS MENDEZ

Role: Project Manager

Education:

- B.S., Civil Engineering, The University of Texas – Rio Grande Valley (2023)
- A.A.S., Engineering and Technology- South Texas College (2018)
- Certificate of Applied Science, Architectural and Civil Engineering Technology- South Texas College (2017)

LUIS A. MENDEZ is a Project Manager with more than eight years of experience in civil engineering, project management, computer-aided design (CADD), and subdivision development. Throughout his career with SAMES, he has progressively advanced through the roles of CADD Technician, Project Controls Engineer, Project Engineer, and Project Manager, providing him with a comprehensive understanding of the technical, administrative, and operational requirements necessary to successfully deliver infrastructure projects.

Mr. Mendez specializes in the planning, design, and delivery of public infrastructure improvements, including water distribution systems, sanitary sewer collection systems, storm drainage systems, roadway improvements, and subdivision developments. His broad project experience enables him to effectively coordinate engineering design, technical production, project scheduling, quality control, and construction support while maintaining compliance with local, state, and federal requirements.

As Project Manager, Mr. Mendez oversees projects from planning through construction, coordinating with municipalities, utility providers, regulatory agencies, and project stakeholders to ensure timely delivery, cost

control, and successful project execution. His diverse experience across multiple project roles provides a practical understanding of each phase of project development, allowing him to anticipate project needs, improve coordination among project teams, and deliver efficient, high-quality engineering solutions for clients.

Project Experience:

HCDD No. 1 Mission McAllen Drain Phase III – Mission/McAllen, Texas

- Provided design management for the expansion of an existing ditch located north of the McAllen and Mission areas.
- Provided design for the ditch expansion, drainage catch basin, and drainage trunklines.
- Coordinated the process of construction plan development and ensured the design complied with the latest design standards and met all applicable rules and regulations.
- Assisted with planning and management of the procurement process and all construction related activities.

U.S. Customs and Border Protection Second Inspection Station – Roma, Texas

- Provided design and project management for the site civil design for drainage and grading improvements, public utilities, roadway and parking area improvements for a Second Inspection Station belonging to the U.S. Customs and Border Protection agency.
- Coordinated the process of construction plan development, ensuring the design complied with the latest design standards and met all applicable rules and regulations.
- Prepared "approved for construction" plans and assisted with planning and management of the procurement process.

Water Tank Rehabilitation Public Improvements – La Villa, Texas

- Managed civil, structural, and construction engineering for rehabilitation of an elevated water storage tower for the City of La Villa, increasing peak water storage capacity.
- Conducted site visits, coordinated with utility providers, and prepared preliminary and detailed civil construction plans and specifications.
- Oversaw structural assessment coordination with subconsultants and prepared construction estimates.
- Designed two 4" valves to isolate water services into quadrants, minimizing service disruptions during construction.
- Assisted the City with advertising, bid procurement, tabulation, and award recommendation.
- Coordinated pre-construction activities, conducted periodic site inspections, reviewed material submittals and pay applications, managed contractor requests for information, and reviewed construction material testing reports to ensure compliance with contract documents.

Las Americas Roma Logistics and Industrial Park Subdivision, Roma, Texas

- Coordinated the process of the plan development for a new industrial park (297-acre tract) development, located within the City of Roma.
- Managed the design of all utilities (water, sanitary sewer), storm sewer improvements, and roadway improvements.
- Coordinated with various agencies, TxDOT, USACE, and public works ensuring compliance with all applicable rules, regulations and requirements.

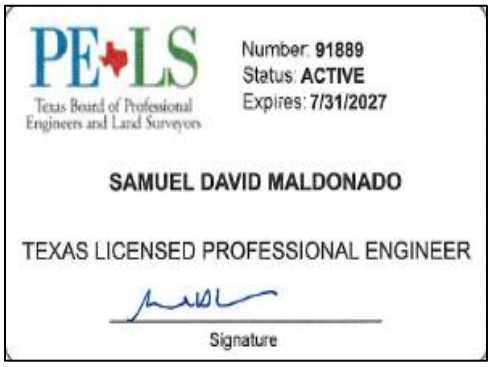
Sunset Breeze at Laguna Vista Subdivision, Laguna Vista, Cameron County, Texas

- Coordinated and managed the process of plan development for a new 56-acre tract commercial development.
- Managed the design of all utilities (water, sanitary sewer), storm sewer improvements, and roadway improvements.

PROFESSIONAL LICENSES AND REGISTRATIONS

Texas Board of Professional
Engineers and Land Surveyors

CERTIFICATE OF REGISTRATION



This acknowledges that

SAMES, Inc.
SAMES

has fulfilled the requirements of the Texas Board of Professional Engineers and Land Surveyors to offer and perform engineering services in the state of Texas.

SECTION II: PREVIOUS EXPERIENCE WITH THE CITY

CITY OF EDINBURG PROJECTS

Projects	Project Description	Project Manager	Completed	City POC
Chapin Pump Station Rehabilitation	Topographic surveying, environmental and civil engineering services for removal and replacement of two pumps, SCADA system, backup power system, and associated improvements	Luis Mendez	In progress (92% complete)	Mardoqueo Hinojosa, City Engineer
Mon Mack Drainage Ditch Improvements	Topographic & as-built surveying, civil engineering drainage design, construction plans & specifications, construction administration	Jessica Maldonado	2024	Mardoqueo Hinojosa, City Engineer
Schunior Road Detention Pond Project	Topographic surveying, hydraulics and hydrology analysis of the detention design, and preparation of plans, specifications and estimates.	Jessica Maldonado	2023	Mardoqueo Hinojosa, City Engineer
8th Street & McIntyre Intersection Improvements	Topographic Surveying and Design of Street & Drainage Improvements	Sam Maldonado	January 2009	Daniel Tijerina, Former Public Works Director
Chapin Road Sanitary Sewer Line Improvements	Topographic Surveying and Design of 24" Sanitary Sewer line	Jessica Maldonado	February 2016	Tomas Reyna, Assistant Director of Public Works
University Drive Bus Stop & Shelter Improvements	Surveying, design and construction management of Civil Improvements, including site infrastructure	Jessica Maldonado	December 2016	Tomas Reyna, Assistant Director of Public Works
WWTP Clarifier Rehabilitation Project	Design & Bid Procurement of WWTP Improvements	Saul Maldonado	June 2018	Arturo Martinez, Director of Utilities
Municipal Park	Topographic Surveying Services	Sam Maldonado	2019	Luis Rodriguez, Parks Operation Manager
Apollo Park	Topographic Surveying Services	Sam Maldonado	2019	Luis Rodriguez, Parks Operation Manager
Memorial Park	Topographic Surveying Services	Sam Maldonado	2019	Luis Rodriguez, Parks Operation Manager
Fountain Park	Topographic Surveying Services	Sam Maldonado	2019	Luis Rodriguez, Parks Operation Manager
Municipal Park Splash Pad	Topographic Surveying Services	Sam Maldonado	2019	Mardoqueo Hinojosa, City Engineer
Dr. Diaz Park Splash Pad	Topographic Surveying Services	Sam Maldonado	2019	Mardoqueo Hinojosa, City Engineer

SECTION III: ABILITY TO MEET SCHEDULES AND DEADLINES

PROJECT MANAGEMENT PLAN

SAMES is committed to delivering project management solutions tailored to the City of Edinburg's (COE) infrastructure needs. Supported by a strong foundation in civil engineering and extensive experience managing public infrastructure projects, our team is well qualified to provide the City with the following project management services:

Project Management and Project Inspection	
• *Contract Review and Negotiation* • *Change Order Analysis* • *Project Design Reviews* • *Staff Augmentation* • *Cost Estimate Evaluations*	• *Project CPM Scheduling* • *Productivity Analysis* • *Dispute Avoidance and Resolution* • *Project Control Systems* • *Inspections and Quality Assurance*

Project Management Approach

SAMES has developed a comprehensive project management approach to ensure the efficient execution of professional engineering services for the City of Edinburg, if selected. Our management plan emphasizes proactive coordination, effective communication, risk management, and quality control to support the successful delivery of each project assignment. A dedicated project management team will serve as the City's primary point of contact and coordinate with City staff, regulatory agencies, utility providers, stakeholders, and other entities as necessary to facilitate timely project execution.

Our approach is designed to effectively manage project scope, schedule, budget, and quality throughout every phase of project delivery. Through regular communication, continuous progress monitoring, and timely decision-making, we will promptly identify and address potential issues before they affect project objectives. By leveraging our extensive experience with municipal infrastructure projects and our multidisciplinary technical expertise, SAMES will deliver practical, cost-effective engineering solutions that align with the City's goals while meeting all applicable regulatory and funding requirements.

Schedule and Budget Compliance – SAMES employs a disciplined project management approach that emphasizes proactive planning, accountability, effective communication, and continuous monitoring to deliver projects on schedule and within budget. In coordination with the City of Edinburg, our project management team establishes project objectives, priorities, funding constraints, critical milestones, and performance expectations at project initiation. Based on these requirements, we develop and maintain comprehensive project schedules using Primavera P6 or Microsoft Project, incorporating Critical Path Methodology (CPM), permitting activities, agency review periods, procurement milestones, and key project deliverables. Throughout project execution, schedules are routinely updated to reflect project progress, changing priorities, and potential risks, allowing the City to make informed decisions and maintain project momentum.

Senior Project Managers provide ongoing oversight through milestone tracking, budget monitoring, resource management, quality assurance reviews, and regular communication with City staff, consultants, contractors, utility providers, and regulatory agencies. Weekly progress meetings, project status reporting, and routine risk assessments enable our team to identify potential schedule or budget impacts early and implement timely corrective actions before they affect project delivery. Our experience managing multidisciplinary teams, combined with our ability to self-perform surveying, engineering, and construction phase services when appropriate, streamlines coordination, reduces delays, and improves responsiveness

throughout the project lifecycle. By integrating stakeholder coordination, regulatory review schedules, procurement activities, and governing board milestones into the overall project management process, SAMES consistently delivers well-managed projects that meet the City's schedule, budget, quality, and performance objectives.

Utility Coordination and Relocation – SAMES has extensive experience managing utility coordination and relocation activities for public infrastructure projects of varying size and complexity. Our project and construction management approach emphasizes early utility identification, proactive coordination, conflict resolution, and continuous communication to minimize schedule impacts and support uninterrupted project delivery. By integrating Subsurface Utility Engineering (SUE), utility conflict analysis, and Construction Engineering Inspection (CEI), our team effectively manages utility-related risks throughout planning, design, and construction.

Our Project Managers coordinate closely with utility owners, contractors, municipalities, TxDOT, irrigation districts, and regulatory agencies to identify potential conflicts, establish relocation priorities, develop utility relocation schedules, monitor progress, and maintain continuous communication throughout construction. We facilitate coordination meetings, track utility commitments, review relocation schedules, and promptly address unforeseen field conditions to minimize delays, avoid construction conflicts, and maintain project momentum.

SAMES has successfully managed utility coordination efforts involving Texas Gas Service, American Electric Power (AEP), Spectrum, local irrigation districts, and numerous municipal utility providers. This experience is further demonstrated through our ongoing blanket contract with Texas Gas Service, under which we have provided engineering and surveying services on an as-needed basis since 2014. Through this long-standing relationship, we have supported numerous gas main extensions, relocations, and adjustments throughout the Rio Grande Valley while consistently meeting project schedule, quality, and safety objectives.

By maintaining proactive communication among all project stakeholders and closely monitoring utility activities throughout construction, SAMES minimizes the risks associated with utility conflicts and relocations, helping keep projects on schedule, within budget, and in compliance with all applicable regulatory requirements.

Construction Management and Inspections - SAMES provides a fully integrated construction management and inspection program that ensures projects are executed with the highest standards of quality, compliance, and cost efficiency. From initiation through completion, we manage all aspects of construction delivery—tracking progress, overseeing contractor performance, coordinating utilities, and developing phased schedules that minimize disruption and maintain productivity.

We offer comprehensive construction management, inspection, and contractor quality control services across transportation, utilities, drainage, environmental, water/wastewater, and recreational projects. Our approach relies on consistent, informed inspection and strict adherence to design documents, specifications, and contract requirements. Delivering this level of quality requires technical expertise, sound judgment, effective communication, and collaboration among all project stakeholders.

For public agencies with limited resources, SAMES provides flexible, all-inclusive Construction Engineering Inspection (CEI) teams capable of supplementing staff or managing full construction oversight as needed.

Risk Identification and Mitigation – SAMES employs a proactive risk management process that identifies potential issues early, evaluates their potential impact, and implements practical mitigation strategies before they affect project objectives. Our project management team continuously monitors project activities throughout planning, procurement, design, construction, and closeout to minimize risks related

to schedule, budget, quality, regulatory compliance, utility coordination, and stakeholder involvement. By maintaining open communication with the City, consultants, contractors, utility providers, and regulatory agencies, we promote informed decision-making and timely resolution of issues as they arise.

Risk management is integrated into every phase of project delivery through routine project monitoring, progress evaluations, and coordination meetings. Potential risks are documented, prioritized based on their likelihood and potential impact, assigned to responsible team members, and tracked through resolution. This structured approach enables our team to anticipate challenges, implement corrective actions promptly, and maintain project momentum while minimizing disruptions to construction activities.

Key elements of our risk management process include:

- Development and maintenance of project risk registers to identify, evaluate, and monitor project risks.
- Regular project status meetings to review schedule, budget, procurement, utility coordination, permitting, and construction progress.
- Ongoing schedule and budget monitoring to identify potential variances and implement corrective actions.
- Early identification and resolution of utility conflicts, permitting requirements, and right-of-way constraints.
- Continuous coordination with City staff, consultants, contractors, utility providers, and regulatory agencies.
- Review and management of Requests for Information (RFIs), submittals, change orders, and potential claims to minimize project impacts.
- Quality assurance reviews, field observations, and construction progress monitoring to identify issues before they affect project delivery.
- Routine evaluation of project risks with timely communication and recommendations to support informed decision-making by the City.

This proactive and collaborative approach enables SAMES to effectively manage uncertainty, reduce project risk, and deliver projects that meet the City's expectations for schedule, budget, quality, safety, and regulatory compliance.

Managing Contracted Work – SAMES has extensive experience providing project and construction management services for public infrastructure projects involving multiple contractors, consultants, utility providers, and regulatory agencies. Our management approach emphasizes proactive communication, accountability, and continuous oversight to ensure contracted work is performed in accordance with project requirements, contract documents, established schedules, and budget objectives. The Program Manager and Project Manager provide overall leadership throughout project execution, serving as the primary liaison between the City, design professionals, contractors, and other project stakeholders.

Prior to construction, SAMES conducts a comprehensive preconstruction meeting to establish project expectations, review contract requirements, confirm project schedules and milestones, discuss reporting procedures, invoicing requirements, safety protocols, environmental considerations, utility coordination, and communication procedures. This collaborative process ensures all participants clearly understand their roles, responsibilities, and performance expectations before work begins.

Throughout construction, SAMES actively monitors contractor performance through regular site visits, progress meetings, schedule reviews, and ongoing coordination with project stakeholders. Our team tracks project milestones, reviews construction progress, facilitates timely resolution of field issues, and

coordinates sequential and concurrent work activities to minimize conflicts and maintain project momentum. Weekly progress meetings provide a structured forum to review completed work, discuss upcoming activities, evaluate potential risks, and identify corrective actions necessary to keep the project on schedule and within budget.

By maintaining clear communication, comprehensive project documentation, and continuous oversight of contracted work, SAMES helps ensure projects are completed safely, efficiently, and in accordance with the City's quality, schedule, budget, and contractual expectations.

Quality Assurance and Quality Control – SAMES implements a comprehensive quality management approach to ensure projects are delivered in accordance with contract requirements, approved plans and specifications, applicable regulations, and the City of Edinburg's expectations for quality and performance. Quality management begins at project initiation and continues throughout design, procurement, construction, and project closeout through proactive oversight, effective communication, and continuous monitoring of project activities.

Regular project meetings and ongoing coordination among the Project Manager, City staff, design professionals, contractors, utility providers, and other stakeholders establish a collaborative environment for identifying issues, evaluating corrective actions, and maintaining project objectives. Project status reports, field observations, meeting minutes, and construction progress updates are routinely provided to the City to ensure transparency and support informed decision-making throughout project delivery.

SAMES utilizes a project-specific Quality Management Plan that establishes quality objectives, defines roles and responsibilities, outlines inspection and documentation procedures, and identifies quality control checkpoints throughout the project lifecycle. Our team monitors contractor performance, reviews submittals and testing documentation, verifies compliance with contract requirements, and coordinates with inspectors and testing personnel to ensure work is performed in accordance with project specifications and applicable standards.

SAMES maintains a comprehensive document control system to ensure all project records are organized, current, and readily accessible throughout the project lifecycle. Our team tracks and manages contracts, correspondence, meeting minutes, Requests for Information (RFIs), submittals, change orders, pay applications, inspection reports, testing results, schedules, and project photographs using standard filing and documentation procedures. This systematic approach provides complete project documentation, supports regulatory compliance, facilitates timely decision-making, and establishes a clear audit trail for all project activities while ensuring the City has accurate and up-to-date information at every stage of project delivery.

Quality management activities include preparatory reviews prior to major work activities, ongoing construction observations, verification of corrective actions, and continuous documentation of project performance. By emphasizing prevention, accountability, and timely resolution of deficiencies, SAMES minimizes rework, reduces project risks, and promotes the successful delivery of high-quality projects that meet schedule, budget, and regulatory requirements.

SECTION IV: STABILITY AND REFERENCES

Past Projects with City of Edinburg for Proposed Team Members

SAMES has successfully managed numerous infrastructure projects involving project management, construction management, engineering design, and surveying services for local cities, counties, utility districts, and educational institutions. Our professionals also bring experience working directly with the City of Edinburg on a variety of municipal infrastructure projects. The following representative projects highlight the City of Edinburg experience of the proposed project management team.

- Samuel D. Maldonado
  - Project Manager for:
    - 8th Street and McIntyre Intersection Improvements
    - WWTP Clarifier Rehabilitation Project
    - Topographic Surveying for Municipal Park, Apollo Park, Memorial Park, Memorial Park, Fountain Park, Municipal Park Splash Pad, Dr. Diaz Park Splash Pad
- Jessica M. Maldonado
  - Project Manager for:
    - Schunior Regional Detention Pond
    - Chapin Road Sanitary Sewer Improvements
    - University Drive Bus Stop and Shelter Improvements
- Luis Mendez
  - Project Manager for:
    - Chapin Pump Station Rehabilitation Improvements

Reference Projects

The following three representative projects highlight the experience and performance of SAMES' proposed project management team and include reference information for completed assignments.

HCDD #1 2018 Bond Referendum Project No. 12-FM 493 & County Road (Donna)

Client: Hidalgo County Drainage District No.1
902 N Doolittle Road Edinburg, TX 78542
Reference: Raul E. Sesin – General Manager (raul.sesin@hcdd1.org)
(956) 292-7080

Contract: $113,933.45 (A/E); $1,077,186 (construction);

Start: 11/18/2022 (NTP for construction) End: 08/18/2023 (construction acceptance)

Project Manager: Jessica M. Maldonado

This project consists of a detailed study to design a new storm drainage system for the neighborhoods located between South River Road and surrounding the Chaparral Drain in Donna, Texas. At completion, storm runoff will outfall to the existing Hidalgo County Drainage District #1 facilities, thus eliminating the flooding in these colonias. SAMES is providing planning, development, surveying, parcel mapping, geotechnical services, hydraulics and hydrology design services, and preparation of plans, specifications, and cost estimates for construction, bid procurement and project administration services during construction. For H&H, SAMES prepared a detailed study (of appx. 6,010 acres) to design a lateral detention system or upgrade the existing facilities. The drainage requirements of this project were to design a drainage system that will alleviate the flooding of River Road, La Piñata, and Tierra Bella subdivisions after

a 10-year storm event. The area in which these subdivisions are located is in a low terrain with elevations ranging from 79-feet to 70-feet, grading towards ditch. The critical water surface elevation was determined to be the lowest roadway centerline elevation, 71.53 feet of the adjacent subdivisions confirmed with topographic survey data. The drainage requirements further require a ditch analysis to determine the additional detention capacity of the drainage ditch, in order to determine the required widening to detain the design criteria storm event. The system within the subdivisions will be designed for a 10-year storm event, and a 50-year design analysis is required for the ditch. The hydrology and hydraulics models are developed with the HEC-HMS and HEC-RAS software, with incorporation of an unsteady flow analysis as well as Atlas 14 precipitation intensity update.

SAMES provided recommendation for this project to upsize the existing drainage system at La Piñata subdivision adequate for a 10-year storm, as well as incorporate new drainage systems for conveyance of a 10-year storm for River Road and Tierra Bella subdivisions. For the Chaparral Drain drainage ditch it was recommended to widen the existing 50.0-foot ditch to an ultimate HCDD1 typical cross- section of 120.0 ft from the approximate location of Laurie Drive to Ivey Road, which would provide nearly 25,000 CY of additional volume capacity to contain a 25-year storm event below the critical water surface elevation.

SAMES provided construction management services including Bidding and Contract Award, Construction Site Visits and Administration of Contract Documents for payment applications, requests for information and material submittals. Construction for Phase I of the Project commenced in November 2022 and the project was closed out on September 2023. Throughout the duration of construction, a SAMES field engineer was present regularly at the construction site coordinating closely with the General Contractor on work being performed. There was a significant amount of culverts being proposed for residential properties which encompassed roadside ditch regrading and driveway repairs. Before any of this work was performed a final assessment of driveway pavement type and condition was performed to avoid any change orders during the course of construction for the proposed installation of RCP/HPE culverts. SAMES assisted the Contractor with the coordination associated with utility relocations including but not limited to, water/sewer utility conflicts, communication lines, gas and irrigation crossing conflicting with the proposed storm infrastructure for the existing subdivisions into the drainage ditch undergoing widening. Upon completion of the drainage improvements within the subdivisions and drainage ditch SAMES attended preliminary and final walkthroughs to confirm work was performed as provided in construction documents or had been modified as approved by Client during the course of construction. Phase I of the 2018 Bond Referendum Project No. 12 was closed out after approximately 10 months of construction with change orders totaling $34,831.00, a 3.34% increase from the original contract amount.

Las Americas Roma Logistics and Industrial Park: Centennial Drive Design and Construction Support Services

Client: City of Roma
77 Convent Ave., PO Box 947, Roma, TX 78584
Reference: Alejandro Barrera – City Manager (abarrera@cityofroma.net)
(956) 286-7892

Contract: $60,057.54 (A/E); $1,104,350.75 (construction)

Start: 08/16/2024 End : 04/29/2025

Project Manager: Luis Mendez

SAMES was contracted by the City of Roma to provide surveying, civil engineering design, and construction support services for a new street. The proposed Centennial Drive (appx. 2,200 LF) was located at the northeast intersection of FM 650 and Landfill Road in Roma, TX. Surveying scope included field topography survey to establish on-site vertical and horizontal control for the design. Near construction completion surveying field work of newly installed improvements was performed to create as-builts of Centennial Drive. Civil engineering design for on-site public improvements required coordination with franchise utilities to avoid utility conflicts and submittal of 60% and 100% construction plan set for review and approval by the City. Design of on-site public improvements included mass grading, street design, traffic signal design, SW3P (soil erosion and sediment control plan), street lighting plan, signage plan and construction details. SAMES assisted in the preparation of the advertisement for bids and bid procurement documents, responded to clarification requests and issued addendums, conducted the pre-bid and bid opening meetings, prepared meeting minutes and bid tabulations, and issued recommendation for contract award and notice of award on behalf of the City of Roma. Upon contract award SAMES assisted in construction contract documentation preparation, attended the pre-construction meeting, and prepared Notice to Proceed letter on behalf of the City. SAMES requested, reviewed and approved contractor project schedule and material submittals, responded to all requests for information, reviewed all construction material testing reports and provided comments for compliance with contract documents when needed. SAMES performed on-site visits during construction to review project progression, take pictures and document status. A site visit report including photographic documentation was prepared and submitted to the City after each visit. At substantial completion, SAMES together with the City and contractor walked the site to determine general conformance with the construction plans and documents, then generated a punch list of items needing correction prior to final approval and acceptance. At final completion SAMES reviewed all close-out documents including the contractor final invoice and provided signed and sealed as-built drawings based on contractor mark-ups.

Mid- Valley International Industrial Park, Weslaco, TX

Client: Weslaco Economic Development Corporation
275 South Kansas Avenue, Suite A, Weslaco, Texas 78596
Reference: Steven Valdez - Executive Director (svaldez@weslacoedc.com)
(956) 969-0838

Contract: $11 M

Start: 10/21/2022 (construction) End: 06/15/2024

SAMES was the prime firm contracted to provide professional Construction Engineering Inspection (CEI) services for the construction phase of the proposed subdivision which consisted of a 161.8 Acre tract of land located at the northeast intersection of FM 1015 & Mile 9 near Weslaco, TX.

The scope of work for this project involves providing comprehensive Construction Engineering Inspection (CEI) services throughout the duration of the project. These services encompass various tasks aimed at ensuring compliance with design specifications, quality standards, and regulatory requirements. The project involves the construction of a subdivision development project, and the CEI services will be instrumental in facilitating smooth project execution and successful completion.

SAMES was the responsible party for Submittals/RFIs, Field Observations for CEI, Material Testing Report Review, Payment Application Recommendations, Change Order Review for Dispute or Approval, and provided monthly updates to the Client focusing on Scope of Work Completed, Schedule and Budget.

The submittal and Request for Information (RFI) review process is a critical aspect of ensuring the quality and compliance of construction projects. This process involves the thorough examination of project documents, materials, and inquiries to verify adherence to design specifications, standards, and contractual requirements.

Field Observations for Construction Engineering Inspection consisted of 4,840 linear feet of a 50 concrete roadway cross section. The Roadway Inspection included inspections of pavement, pavement markings, and signage installation. 10,525 linear feet of curb and gutter and 1,105 SF of sidewalks were also inspected as part of paving improvements for the project.

Water System Inspection consisted of 12,600 linear feet of 6", 8", and 12" PVC C900 waterline with the associated valves, hydrants, bends, thrust blocks, and other appurtenances. SAMES: The Sanitary Sewer System Inspection consisted of 6,032 linear feet of 8", 10", 12", and 18" PVC SDR-26 sewer line with the associated manholes, sanitary sewer services and also consisted of 9,359 linear feet of 10" PVC DR 21 force main with associated air release valves, bends, thrust blocks, and other appurtenances. SAMES observed that all water, sewer, and force main pipes were constructed to the specified depth and alignment, with proper backfill and compaction performed as indicated by plans and specifications. As a closeout to the utility design proposed for this Project, SAMES was present during the connection to existing water distribution network and sewer lift station that was proposed for this project.

Drainage System Inspection consisted of the widening of existing drainage and irrigation district canals that were proposed to be widened for purposes of future runoff. The inspections performed by SAMES consisted of verification of widenings to existing drainage facilities per plans, construction of concrete cast in place headwalls and reinforced concrete pipe outfalls, reinforced concrete box equalizers within the proposed subdivision as well as a newly constructed drainage swale for additional runoff storage and conveyance to the existing drainage canals that were widened. In addition to field observations during construction to ensure construction was being performed in accordance with plans, SAMES reviewed all applicable Construction Material Testing reports for conformance with specifications for compaction density for canal widenings and concrete strength testing related to any headwall or cast in place structures that were constructed as part of the canal improvements.

Construction for this project began on October 21, 2022, with the original completion date set at July 18, 2023, but through the process of reviewing and recommending change order approvals, the project was completed June 15, 2024. The original construction cost was set at $11,000,000.00 but saw a savings of $455,173.06 through the processing of approving change orders, bringing the total cost of construction to $10,455,826.94.

Insurance

SAMES, Inc. maintains Professional Liability Insurance with coverage limits of $2,000,000, as well as Commercial General Liability and Automobile Liability insurance, and meets all applicable county and state insurance requirements. A current Certificate of Insurance, including policy coverage and effective dates, is provided in the Appendix of this Statement of Qualifications. A list of insurance claims filed over the past five (5) years is provided below.

1) Tatiyana Altecor vs. SAMES, INC
   a) Status: Dismissed
2) Edward Dominguez vs. SAMES, Inc.
   a) Status: Dismissed
3) Hidalgo County BSL Canopy
   a) Status: Dismissed

4) Rodriguez v SAMES, INC
   a) Status: Dismissed
5) Armando Rodriguez vs. SAMES, INC
   a) Status: Dismissed

Professional Services Agreement

SAMES, Inc. has read the sample Professional Services Agreement released with this Request for Qualifications. We will meet the prerequisite insurance and, if selected, our firm agrees to enter into such an agreement.

Commitment

SAMES approaches every project with a collaborative team philosophy and an unwavering commitment to delivering successful outcomes for our clients. Our experienced project management professionals provide the leadership, technical expertise, and accountability necessary to effectively manage scope, schedule, budget, quality, and stakeholder coordination throughout every phase of project delivery. Drawing on decades of experience managing municipal infrastructure and capital improvement projects, we are well-equipped to achieve program objectives while minimizing project risks and maximizing value.

As a locally owned and operated firm, SAMES understands the unique needs and priorities of the City of Edinburg and the communities it serves. We are committed to serving as a trusted partner by providing responsive project leadership, protecting the City's interests, maintaining transparent communication, and ensuring projects are delivered safely, efficiently, and in accordance with all contractual and regulatory requirements. We appreciate the opportunity to be considered for these services and look forward to supporting the City's continued investment in high-quality public infrastructure.

APPENDIX

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY): 5/22/2026

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____

   Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (✓)
   If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets. _____

10. Provide any other names under which your business has operated within the last 10 years.
    Sam Engineering and Surveying

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One (YES) NO

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One (YES) NO

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

LITIGATION DISCLOSURE

SAMES, Inc. has been named in five (5) litigation matters during the past ten (10) years. Four (4) of these matters have been resolved, and one (1) remains pending.

1.County Drainage Project
The first matter involved a county drainage project in which a property owner opposed the county's stormwater drainage design adjacent to the owner's property. The case was resolved, and SAMES, Inc. was not found liable or at fault.

2. Municipal Construction Project
The second matter involved litigation filed by a city against the contractor of record for alleged construction deficiencies. SAMES, Inc. served as the engineer of record and, as is common in construction litigation, was named as a party to the lawsuit. The matter has since been resolved, and SAMES, Inc. was not found liable or at fault.

3. Hidalgo County Litigation
The third matter involved multiple parties, including the contractor of record, the project owner, and all project consultants, including SAMES, Inc. The Court granted the Motion to Dismiss on September 9, 2024, and SAMES, Inc. was dismissed from the case.

Cause No. C-4866-21-L
464th Judicial District Court, Hidalgo County, Texas

Raul A. Macias and Erika Castillo, Individually and as Surviving Parents of Armando Lee Castillo, Deceased
v.
Noelia Trevino and Gerardo Garcia, as Surviving Parents of Garett Guy Garcia (Deceased); Texas Cordia Construction, LLC; County of Hidalgo; SAMES, Inc.; L & G Engineering Laboratory, LLC; and Precision Scheduling Consultants, LLC.

4. Storm Sewer Project
The fourth matter involved a storm sewer project in which a property owner challenged the municipal and engineering design of a stormwater detention pond located behind the owner's property. The litigation has since been resolved.

Civil Action No. 7:23-cv-276
United States District Court for the Southern District of Texas

Edward Dominguez
v.
City of Edinburg; SAMES, Inc.; Castle Enterprises, LLC; and Gonzalez Enterprises, LLC.

5. Brownsville Cannery Public Market Project (Pending)
The fifth matter involves the Brownsville Cannery Public Market construction project. SAMES, Inc. is currently involved in litigation with the City of Brownsville following the City's termination of the construction contract. SAMES, Inc. disputes the allegations and is actively pursuing its contractual rights through the legal process. This matter remains pending, and no final judgment has been entered.

SAMES, Inc. has never initiated litigation or requested arbitration against a client in connection with any of its projects.

HOUSE BILL 89 VERIFICATION

I, Samuel D. Maldonado, the undersigned representative of

SAMES, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, Samuel D. Maldonado, the undersigned representative of

SAMES, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

SAMES, Inc.

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

N/A

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

RE: Request for Qualifications – RFQ No. 2026-8
Project Management Services

To Whom It May Concern,

SDI Engineering, LLC is pleased to submit this Request for Qualifications for providing Project Management Services, as required by the City of Edinburg. Included in this packet is a list of project experience that very closely resembles projects of size and complexity in your city. As an Engineer in the public sector for over 26 years, I have unique insight into the many different factors that make projects successful. As you will see from the information provided, the firm will bring experience in the many facets to include paving, drainage, water distribution, water treatment, wastewater collection, wastewater treatment, contract negotiations, Right-of-Way acquisition, and Stormwater Management, parking lots, HVAC Renovations, Re-Roofing improvements, as well as design and project management of school districts, cities, irrigation districts, and county improvements.

SDI Engineering LLC is comprised of personnel that have the experience and credentials to meet the needs of the city. We have successfully completed work on State and Federally funded projects from the grant application process through design and construction management. In addition, we have demonstrated history with several Cities in the Rio Grande Valley and their staff.

I, Isael Posadas, P.E., will be the person authorized to conduct final contract negotiations with the city and welcome the opportunity to be considered for your project needs. We look forward to discussing our proposal with you in greater detail.

Respectfully,
SDI ENGINEERING, LLC

Isael Posadas

Firm Qualifications and Experience:

Name of Firm:	SDI Engineering, LLC 2105 S. Jackson Rd Edinburg, Texas 78539
Telephone Numbers:	Office: (956) 287-1818
President & Primary Contact:	Isael Posadas, P.E. (Registered Engineer, 89435)
Established:	October 2010
Firm Structure:	Limited Liability Company
Texas Registration No.:	F-13016

Firm Background

SDI Engineering was established in 2010 as a Limited Liability Company (LLC), with the goal of providing clients with quality engineering and hands-on services based on solid experience and know-how. We understand the needs of our governmental and private clients because we have a history of being a client. Having once been regulators and policy developers for several municipalities, we offer an ability to maneuver through the many rules and regulations that advance projects in a timely and efficient fashion. It is this combination of experience and proven performance that makes our company unique to the area. SDI Engineering was established to help develop and build quality projects with sound engineering practices that make communities safer and promote enhanced quality of life.

The firm's principal has a solid reputation for excellence in engineering and is a direct result of his management of public systems and the commitment to the principle that projects are built to meet the needs of the public in the long term.

The firm team has successfully supervised the preparation of design schematics and PS&E for roadways, drainage, water distribution, wastewater collection and other civil engineering projects as well as architecture plans for roof improvements, parking lot improvements, and HVAC Renovations. SDI Engineering, LLC, is committed to providing integrity and excellence in its work, resulting in only the highest levels of customer satisfaction.

Firm Philosophy

Over the years, SDI Engineering, LLC, has undertaken many challenging projects and accumulated skills and experience in design and project management services. Today, SDI Engineering, LLC, takes on the role of various municipalities, governmental, county, schools, irrigation districts; and water provider projects to provide design inputs and engineering solution services. Our objective is to provide our clients with excellent experience when we are selected to execute their projects. Our emphasis on clear communication and follow-through procedures ensures that clients' objectives are top priority in the planning and execution of all our processes.

Project Approach/Methodology

There are several key factors to be considered in the preparation of the construction documents for any project. The firm's principal and his staff have developed an approach that has proven successful on projects time and time again. These factors include the following:

- Review the project goals and clearly understand all the client's needs, including performance and budgetary constraints.

- Identify specific work scope and establish efficient and timely milestones to complete the engineering assignment.
- Determine the local, state and federal requirements of the project based on funding and regulatory agency oversight.
- Attain as much information about existing conditions that can affect the project, including previous work, studies and efforts by others.
- Utilize design concepts that are proven in both the technical and practical application that provides long term performance with the operator of the system or facility in mind.
- Establish clear, open and honest communication with the Client and/or their representative throughout the project, from design to completion.
- Provide a product that meets or exceeds the expectations of the client.

Services Provided

SDI Engineering specializes in civil engineering, project planning, construction management and stormwater management. Our primary objective is to provide excellent personal service tailored to meet our client's goals and objectives within the framework of existing regulatory requirements, and in the most cost-efficient engineering manner possible. SDI Engineering takes pride in ensuring that all projects are completed on-time and within budget. These services have been provided to the City of Edinburg, City of McAllen, Harlingen Waterworks Systems, Hidalgo County Irrigation District No. 1, Hidalgo County Irrigation District No. 16, Edinburg CISD, North Alamo Water Supply Corporation, Sharyland Water Supply Corporation, and the City of Pharr. A solid track record has been established in the following areas:

Engineering Design / Consulting

Feasibility Study, Site Investigation, and Site Selection
Project Planning & Permitting
Hydrology and Hydrologic modeling
Road Design
Sewer System
Storm Drainage Systems
Water Systems
Grading Plans
Earthwork Calculations
Drainage Basin Analysis
Retention and Detention Systems

Project Management/Planning and Permitting

Construction Management
Owner Representation
Permit Preparation and Processing
Construction Inspection
Contract Document Preparation
Fill and Grade Permits
Variance Applications

Stormwater Management

Permit Application (NOI)
SWPPP Development
Notice of Change (NOC)
Notice of Termination (NOT)
Inspection Services
Personnel Training
Yearly Reporting
Public Involvement
BMP Specifications
Policy Development

Right of Way Acquisition Services

Parcel Identification
Appraisal Report Review
Title Work/Clearing of Encumbrances
Negotiations
Closing and Filing of Documents
Expert Witness

Municipal Policy Development

Engineering Standards
Construction Standards
Subdivision Review Policy

SDI Engineering, LLC operates out of our main office located at 2105 S. Jackson Rd, Edinburg Texas.

Project File/Name: **24-007 City of Mercedes City Hall Flooring Improvements**

Summary:
Project consists of the management of the flooring replacement project at City Hall for approximatley 9,769 sq. ft. with the options of polished sealed concrete, ceramic/porcelain/natural stone tile, or luxury vinyl tiles, complete in place, in Mercedes, Texas

Owner:
City of Mercedes
Mr. Alberto Perez, City Manager
400 S. Ohio Ave.
Mercedes, Texas 78570
(956) 565-3114

Isael Posadas, P.E., President
SDI Engineering, LLC

Education: Texas A&M University – Kingsville
Bachelor of Science in Civil Engineering

Professional Registration: Registered Professional Engineer in the State of Texas, No. 89435

HUB VID Number: 1273681906600
Vendor Number: 466960

Experience:
Mr. Posadas has over twenty-three (24) years of civil engineering work experience, the last nineteen (19) years as a registered Civil Engineer, which includes hydrologic/hydraulic studies, private and public infrastructure projects, feasibility studies, annexation/zoning issues, public presentations, preparation of engineering plans and specifications, bidding and contractual processes, construction management, public policy development, Right-of-Way acquisition, Stormwater Management and development planning. Most recently, as the City Engineer for Edinburg, Texas, he designed, bid, and performed construction management for over $11 Million in infrastructure projects and reviewed/approved over $50 Million in municipal projects designed by others.

Mr. Posadas has a strong management background having once direct oversight of Edinburg's Engineering Department, Public Works Administration, Utilities Administration, and the Edinburg International Airport. He has also previously held the top management position for the Harlingen Waterworks System and worked for the City of McAllen's Engineering and Public Utilities Departments. He is licensed as a Professional Engineer in Texas and is also a Certified Floodplain Manager.

DEMONSTRATE ABILITY TO MEET SCHEDULES AND DEADLINES

SDI Engineering, LLC, has consistently delivered projects on time, demonstrating strong time management and organization skills. Our team has a proven track record of meeting tight deadlines without compromising quality. Efficiency and transparency are critical components to the daily oversight and ongoing communication of all parties involved in construction and management projects. We will utilize a software program that meets the needs of the City of Edinburg project that offers, at a minimum, the following features:

- Provide the owner with visibility into every step of the construction process.
- Manage the flow of information from a single source of truth.
- Allow for efficient and timely monitoring and decision making.
- Process and approve payment applications to avoid project delays.
- Manage accurate budgets and track critical costs.
- Connects all parties in real time, at the office or on the jobsite, to optimize resources and deliver quality work.

SDI staff operates with maximum flexibility to provide sound alternatives and solutions to complex projects that meet project goals, schedule, and budget. To accomplish this, we have based our company on principles and values that promote high moral and ethical standards, quality control processes, and interdependence in the project team.

Projects listed below were completed prior to their respective deadlines:

- Edinburg CISD – Canterbury Elementary Reconstruction Project - 2025
  Scheduled completion time: 7 weeks
  Completed time: 5 weeks.

- Johnny Economedes High School Bus Drive Improvements - 2025
  Scheduled completion time: 8 weeks
  Completed time: 6 weeks.

- Hidalgo County Irrigation District No. 1 Lining of Main Canal Mile 5 to Ware Rd – 2025
  Scheduled completion time: 270 Calendar days
  Completed time: 243 Calendar days.

To Whom it May Concern

Subject: Reference Letter

Dear Sir/Madam,

This letter is intended to serve as confirmation that SDI Engineering has been engaged in consulting engineering services with McAllen Public Utility for various projects over the years. The most recent project included an ambitious large diameter Gravity Sewerline relocation project along Mile 676 between Ware Road and Taylor Road. This project required close coordination with TxDOT and other utility agencies. The utility relocation component has been completed and we are pleased with final product.

Earlier this year, MPU solicited Statements of Qualifications from Engineering Firms for inclusion into an Engineering Rotation List. After completing an evaluation process, SDI, along with other firms, were included in final Engineering Rotation List.

Feel free to reach out if further information is needed.

Respectfully,

Carlos Gonzalez, P.E.
Utility Engineer

To Whom It May Concern:

This letter is written to express my strong recommendation for SDI Engineering, LLC. In my capacity as General Manager of Hidalgo County Irrigation District No. One, I have had the opportunity to work closely with SDI Engineering on a number of critical infrastructure projects for our District.

SDI Engineering has consistently demonstrated an extremely high level of competence and professionalism while serving as our Project Manager. Their oversight and management of the TxDOT Crossing Ware Road from SH 107 to Monte Cristo Road and the Lining of Main Canal from FM 676 to FM 2220 Improvements were executed with the highest standard of excellence. These are essential projects for our District's water conservation and delivery capabilities, and SDI's efforts were instrumental in their success.

Throughout our partnership, SDI Engineering has proven to be a valuable asset to our District. Their engineering expertise and project management skills have resulted in significant cost savings, ensuring that projects are completed both on time and within budget. Their ability to manage complex logistics and navigate the specific requirements of entities like TxDOT has been vital for the smooth execution of these improvements.

We at Hidalgo County Irrigation District No. One consider SDI Engineering a trusted partner and highly recommend their services. They will be an asset to any organization seeking a reliable and competent engineering firm.

Respectfully,

Carlos Guzman
General Manager

To Whom It May Concern,

Subject: Letter of Recommendation for SDI Engineering, LLC

It is my pleasure to write this letter of recommendation on behalf of SDI Engineering, LLC as they submit their bid for your upcoming municipal infrastructure project. As the City Manager for the City of Mercedes, I had the privilege of working closely with their team during our recent City Hall Roof and Floor Improvement Project.

Our City Hall project was highly complex, requiring comprehensive structural and cosmetic upgrades to an active municipal building. SDI Engineering, LLC served as the lead engineering firm, managing everything from initial structural assessments and design to construction oversight. The scope included a complete overhaul of our aging roofing system to improve energy efficiency and drainage, alongside a structural stabilization and modernization of our main facility flooring.

Throughout the entire lifecycle of the project, SDI Engineering, LLC demonstrated an exceptional level of professionalism, technical expertise, and dedication to public service standards. A few key areas where their team excelled include:

- **Minimizing Operational Disruption:** Because City Hall had to remain open to the public, the engineering team meticulously phased the project, ensuring critical municipal operations and public services faced zero downtime.
- **Budgetary Discipline:** They provided highly accurate cost estimations early on. Through proactive value engineering, they delivered the project on budget, preventing the costly change orders that frequently plague municipal projects.
- **Clear Communication:** The firm maintained transparent, consistent updates with city staff, stakeholders, and our City Council, ensuring compliance with all local and state procurement and building codes.

The resulting improvements have significantly extended the lifespan of our municipal headquarters and provided a safer, more modern environment for our staff and residents.

Based on our excellent experience, I give SDI Engineering, LLC my highest recommendation. They understand the unique constraints, transparency requirements, and responsibilities that come with working for a public entity. I am confident they will bring the same level of skill, integrity, and diligence to your city.

If you require any further information regarding their performance on our project, please do not hesitate to contact my office.

TRANSMITTAL LETTER

July 14, 2026

City of Edinburg
Attn: Lorena Fuentes, Purchasing Manager
415 W. University Drive
Edinburg, TX 78539

RE: RFQ No. 2026-8 – Project Management Services

Dear Evaluation Committee:

Trimad Consultants, LLC is pleased to submit this Statement of Qualifications (SOQ) in response to RFQ No. 2026-8 – Project Management Services. We appreciate the opportunity to be considered for inclusion on the City of Edinburg's rotation list of qualified firms. Trimad is a South Texas-based civil engineering firm with extensive experience providing project management, construction administration, contractor coordination, utility coordination, scheduling, cost estimating, quality assurance, permitting assistance, and construction support services for municipal infrastructure projects throughout the Rio Grande Valley.

Our team understands the importance of delivering projects on schedule, within budget, and in close coordination with City staff, contractors, and stakeholders. We recognize that the City is seeking qualified firms capable of responding quickly to a variety of assignments on an as-needed basis. Our local presence, experienced staff, and familiarity with municipal project delivery position us to provide responsive, dependable project management services that support the City of Edinburg's infrastructure projects.

Primary Point of Contact

Ricardo Salazar, P.E.

President

Trimad Consultants, LLC

1103 N. Raul Longoria Road, Building C San Juan, Texas 78589

Office: (956) 688-8860 | Email: rsalazar@trimadstx.com

Trimad Consultants, LLC acknowledges that no addenda have been issued for RFQ No. 2026-8 as of the date of this Statement of Qualifications.

I certify that I am authorized to execute this Statement of Qualifications on behalf of Trimad Consultants, LLC and to legally bind the firm.

Thank you for your consideration. We appreciate the opportunity to submit our qualifications and look forward to the opportunity to serve the City of Edinburg.

Sincerely,

Ricardo Salazar

Ricardo Salazar, P.E.

SECTION 2

FIRM QUALIFICATIONS

WHY TRIMAD?

CITY OF EDINBURG

WHY TRIMAD FOR PROJECT MANAGEMENT SERVICES

Trimad Consultants understands that the City of Edinburg is seeking qualified firms to provide Project Management Services on an as-needed basis to support the successful delivery of municipal infrastructure and capital improvement projects. As a South Texas-based civil engineering firm, Trimad is well-positioned to serve as an extension of the City's staff by providing responsive project management, construction administration, contractor coordination, schedule management, quality assurance, utility coordination, and project oversight from project initiation through closeout. Our team is committed to maintaining open communication, meeting project schedules, coordinating with stakeholders, and providing the flexibility necessary to successfully manage multiple concurrent assignments.

Trimad offers the following advantages:

- **Responsive Local Support** – Located in the Rio Grande Valley, our team is readily available to respond quickly to project assignments, meetings, field visits, and coordination with City staff.
- **Proven Municipal Project Management Experience** – Our professionals have successfully managed and supported municipal infrastructure projects involving water, wastewater, roadway, drainage, utility, and public infrastructure improvements throughout South Texas.
- **Construction Administration & Coordination** – Trimad provides contractor coordination, construction oversight, schedule monitoring, progress meetings, submittal coordination, quality assurance, and project documentation to help projects remain on schedule, within budget, and in accordance with project requirements.
- **Strong Agency & Utility Coordination** – We routinely coordinate with utility providers, TxDOT, TCEQ, USACE, irrigation districts, railroad companies, contractors, and other stakeholders to facilitate efficient project delivery.
- **Flexible Staffing for Multiple Assignments** – Our experienced project managers, engineers, designers, and field personnel are equipped to manage multiple concurrent assignments while providing responsive communication and dependable service.
- **Commitment to Partnership** – We believe successful projects begin with strong working relationships. Our team emphasizes communication, accountability, and collaboration to help the City deliver quality infrastructure improvements that meet schedule, budget, and community expectations.

FIRM QUALIFICATIONS

CITY OF EDINBURG

FIRM QUALIFICATIONS

Trimad Consultants, L.L.C. is a Texas-based civil engineering firm providing professional project management, construction management, engineering support, planning, design, consulting, and construction administration services throughout South Texas and the Rio Grande Valley. Although incorporated in 2017 and operational since 2019, Trimad's leadership team possesses extensive experience delivering and managing municipal infrastructure projects for cities, counties, utility districts, and other public-sector clients throughout the region. Located in San Juan, Texas, Trimad is well-positioned to provide responsive local support to the City of Edinburg.

Trimad specializes in delivering successful municipal projects through proactive project management, stakeholder coordination, engineering solutions that meet the operational, technical, budgetary, scheduling, and regulatory needs of public-sector clients. Our team understands the importance of responsive service, efficient communication, and maintaining project schedules while coordinating with City staff, regulatory agencies, utility providers, contractors, developers, and other project stakeholders. Our experience includes contractor coordination, schedule monitoring, construction administration, progress meetings, submittal coordination, and project documentation to help projects remain on schedule and within budget.

The firm is registered with the Texas Board of Professional Engineers and Land Surveyors (TBPELS) and maintains all licenses, registrations, and insurance required to provide professional engineering services throughout the State of Texas.

Trimad is also certified as:

- Emerging Small Business Enterprise (ESBE)
- Hispanic American Business Enterprise (HABE)
- Minority Business Enterprise (MBE)
- Small Business Enterprise (SBE)

UNDERSTANDING OF THE CITY OF EDINBURG'S NEEDS

Trimad Consultants understands the importance of delivering responsive project management and engineering support services that support the City of Edinburg's ongoing infrastructure improvements and capital investment initiatives. Whether providing project management services, construction administration, contractor coordination, engineering support for individual assignments or larger municipal capital improvement projects, our team is committed to delivering practical engineering solutions while maintaining schedules, budgets, regulatory compliance, and clear communication throughout every phase of project development.

We understand that successful project delivery requires continuous coordination between City staff, contractors, utility providers, regulatory agencies, and other stakeholders. Our team emphasizes proactive communication, timely decision-making, schedule monitoring, and effective project oversight to help the City successfully deliver its capital improvement program.

MUNICIPAL EXPERIENCE

Trimad Consultants has extensive experience providing engineering services and project management support for municipalities throughout South Texas and the Rio Grande Valley. Our team has successfully delivered water, wastewater, drainage, roadway, and utility infrastructure projects while coordinating with regulatory agencies, utility providers, contractors, developers, and local governments. Our experience includes construction administration, contractor coordination, progress meetings, schedule monitoring, submittal review, pay application coordination, field observation, project documentation, and utility coordination throughout project delivery. This municipal experience provides our team with a strong understanding of the technical requirements and coordination necessary to successfully deliver municipal infrastructure projects.

FIRM QUALIFICATIONS

CITY OF EDINBURG

PROJECT MANAGEMENT SERVICES

Trimad Consultants provides professional project management, construction administration, and engineering support services to municipalities and public agencies throughout South Texas, supporting municipal infrastructure projects from project initiation and planning through construction and project closeout. Our team manages project delivery by coordinating schedules, budgets, stakeholders, contractors, utility providers, and regulatory agencies while providing responsive communication and oversight throughout every phase of a project. Working alongside City staff, we help facilitate successful project execution by monitoring progress, addressing project challenges, and maintaining effective coordination among all project participants.

Our services include project planning and coordination, project scheduling, cost estimating, procurement and bid phase support, contractor coordination, construction administration, construction observation, progress meetings, field investigations, submittal and RFI coordination, pay application review, utility coordination, permitting assistance, project documentation, quality assurance, regulatory coordination, and project closeout support.

SELECTED REPRESENTATIVE PROJECTS INCLUDE:

- City of Pharr – Sanitary Sewer Collection Improvements
- City of Pharr – Water Transmission Main Improvements
- City of Pharr – Headworks Improvements Project
- City of Pharr – Lift Stations No. 10, 18 & 40 Elimination Project
- City of Pharr – Lift Station No. 23 Relocation
- Harlingen Headworks System – WWTP Headworks Equalization Basin & Influent Lift Station Improvements
- City of Alamo – Water Treatment Plant Improvements
- City of Alamo – Morningside South Sewer Project
- City of San Benito – Ratliff 12-Inch Waterline Improvement Project
- City of San Benito – Sanitary Sewer Improvements Project
- City of San Juan – Lift Station No. 6 Relocation Project
- City of Donna – Engineering Services
- City of La Villa – Drainage Improvements
- Kleberg County – Sidewalk Improvements

These representative projects demonstrate Trimad Consultants' experience managing and supporting municipal infrastructure projects through project coordination, construction administration, contractor coordination, utility coordination, schedule monitoring, regulatory coordination, and project oversight. This experience has equipped our team to provide responsive project management services that help municipalities successfully deliver municipal capital improvement projects while maintaining quality, schedules, budgets, and effective communication throughout project delivery.

SECTION 3

RELEVANT PROJECT MANAGEMENT EXPERIENCE

Representative/ Reference Projects

CATEGORY: WASTEWATER/CONSTRUCTION MANAGEMENT

City of San Juan - Lift Station #6 Relocation Project

Total Project Cost: ***$3.4 Million*** ***Federal Funding Agency*****:** ***EPA***

Description and Scope of Work:

The City of San Juan contracted TRIMAD for the development of a new lift station, including geotechnical evaluation with a 35-foot bore and buoyancy testing to support the design of a fiberglass wet well. TRIMAD performed surveying and topographic mapping, providing AutoCAD files with lot lines, control points, and easements. The firm also supplied design coordination, including invert elevation data and civil/MEP plan sets at multiple design phases for city review. TRIMAD managed all construction-phase tasks, including bidding support, inspections, and final as-built documentation.

Role:

TRIMAD provided project management and construction administration services throughout project development, including geotechnical coordination, topographic surveying, design coordination, bidding support, construction inspections, submittal review, contractor coordination, construction documentation, and final as-built documentation. The firm worked closely with the City of San Juan throughout the design and construction phases to support successful project delivery.

Project Owner and Contact:	**City of San Juan** **Alfredo De Leon, Interim Utilities Director** **(956) 223-2200**
Project Manager/Engineer/ Designer:	**Ricardo Salazar, P.E., Jose Perez**

Representative/ Reference Projects

CATEGORY: WASTEWATER/CONSTRUCTION MANAGEMENT

City of Pharr - Lift Stations Number 10, 18 & 40 Elimination Project

Total Project Cost: $5.1 Million ***Federal Funding Agency: EPA***

Description and Scope of Work:
This project involves shutting down an existing lift station and replacing it with a new system that uses gravity to move wastewater through a 24-inch sewer pipe. In addition, a new lift station will be built, along with the installation of 5,097 feet of 12-inch pressurized pipe (called a force main) to help carry wastewater where gravity flow isn't possible. These improvements will make the sewer system more efficient and reliable for the community.

Role:
TRIMAD prepared permits, design, and construction phase services. The scope of services involved data collection, design plan creation, topographic data collection, and overseeing construction.

Project Owner and Contact:	**City of Pharr** **Ruben Rosales, Public Utilities Director** **(956) 402-4300**
Project Manager/Engineer/	**Ricardo Salazar, P.E., Jose Perez**

Representative/ Reference Projects

CATEGORY: WASTEWATER/CONSTRUCTION MANAGEMENT

City of San Juan - Alta Vista Waterline and Sanitary Sewer Improvements

Total Construction Cost: $988K ***Municipal Project***

Description and Scope of Work:

The Alta Vista Waterline and Sanitary Sewer improvements project consisted of improving the waterline system and sanitary sewer along W Texas Avenue and Standard Avenue in the City of San Juan as well as milling and overlay of W Texas Avenue and Standard Avenue. The waterline improvements required 1,584 linear feet of the new 8-inch C-905 waterline and a 41 Waterline Service connection. The sanitary sewer improvements required 2,000 linear feet of new 8-inch SDR-26 sanitary sewer line, 4 - 48-inch diameter fiberglass manholes, 2 – 48-inch diameter fiberglass manholes, and 60 sanitary sewer services. Paving improvements required 8,536 square yards of mill and 2” Hot Mix Asphalt Overlay.

Role:

TRIMAD provided all services related to the design of Alta Vista waterline and sanitary sewer improvements. This included civil engineering, surveying, design plans & specification bidding documents, permitting, environmental clearances, bidding documents, and construction phases services.

Project Owner and Contact:	**City of San Juan** **Alfredo De Leon, Interim Utilities Director** **(956) 223-2200**
Project Manager/Engineer/	**Ricardo Salazar, P.E.**

REPRESENTATIVE/ REFERENCE PROJECTS

CATEGORY: DRAINAGE/CONSTRUCTION MANAGEMENT

City of Donna– TxGLO 2018 STX Floods Engineering Services

Total Project Cost: Estimated at 733k ***Federal Funding Agency: TXGLO***

Description and Scope of Work:

TRIMAD Consultants were tasked with conducting thorough evaluations of the city's wastewater lift stations and designing a bypass system as part of a project funded by the Texas General Land Office (TXGLO). The project focused on assessing the current state of the lift stations, identifying essential repairs, and implementing a bypass system to ensure continuous operation during maintenance or emergency situations. This work was carried out in alignment with TXGLO's infrastructure improvement standards, aiming to enhance the efficiency and reliability of the city's wastewater management system. The scope of work included research and relevant data collection, design plans, topographic data collection, and construction phase services.

Role:

TRIMAD provided all services related to the design of the City of Donna– TxGLO 2018 STX Floods Engineering Services. This included civil engineering, surveying, design plans & specification bidding documents, permitting, environmental clearances, bidding documents, and construction phases services.

Project Owner and Reference Contact:	**City of Donna Sotero Valdez, Utilities Director (956) 464-3314**
Project Manager/Engineer/ Designer:	**Ricardo Salazar, P.E., Jose Perez**

REPRESENTATIVE/ REFERENCE PROJECTS

CATEGORY: DRAINAGE IMPROVEMENTS/CONSTRUCTION MANAGEMENT

City of Alamo– Laguna Park Improvements Project

Total Estimated Project Cost: 282k ***Municipal Project***

Description and Scope of Work:

The Laguna Alamo Project consists of site cleanup, feasibility analysis, drainage evaluation, and coordination with regulatory agencies to facilitate improvements to the Laguna Park detention property in Alamo, Texas. The project involves interagency coordination with TxDOT, Hidalgo County Irrigation District No. 2 (HCID #2), the City of Alamo, and the Alamo EDC to address drainage discharge, easements, right-of-way considerations, and long-term land use planning. The effort includes boundary verification, topographic data collection, permitting, and preparation of feasibility documentation to support funding applications and future development or infrastructure improvements.

Role:

Trimad is serving in a dual capacity as both the civil engineering consultant and construction services provider, managing project coordination, permitting, feasibility evaluation, and on-site cleanup operations. On the civil engineering side, Trimad is managing agency coordination, permitting (including TxDOT RULIS application), boundary and topographic surveys, feasibility study preparation, funding exhibits, and project presentations to governing entities. On the construction side, Trimad is responsible for site mobilization, debris removal, clearing within approved limits, and on-site coordination to prepare the property for evaluation and future improvements. Overall, Trimad is overseeing both the technical planning and the physical site cleanup necessary to position the project for funding and long-term development.

Project Owner and Reference Contact:	**City of Alamo** **Mayor "JR" Felix Garza** **(956) 787-0006**
Project Manager/Engineer/ Designer:	**Ricardo Salazar, P.E., Miguel Mateos**

SECTION 4

PROJECT MANAGEMENT APPROACH

Project Management Approach

CITY OF EDINBURG

Project Planning & Initiation

Successful projects begin with clear communication and defined objectives. Trimad works closely with City staff to establish project scope, schedules, responsibilities, project milestones, and communication protocols while identifying utility, permitting, and construction constraints before work begins. This proactive planning approach helps establish a clear path for successful project delivery.

Representative Experience

City of Pharr – Lift Station No. 23 Relocation • City of Alamo – Morningside South Sewer Project • City of Pharr – Lift Stations No. 10, 18 & 40 Elimination

---

Communication with City Staff

Trimad emphasizes responsive communication throughout every phase of project delivery by providing regular progress updates, coordinating meetings, documenting project activities, and maintaining open communication with City staff, contractors, utility providers, and regulatory agencies.

Representative Experience

City of San Juan – Lift Station No. 6 Relocation • City of San Benito – Ratliff 12-Inch Waterline Improvements • City of Donna – Engineering Services

---

Risk Management & Issue Resolution

Our team proactively identifies potential project risks, scheduling conflicts, permitting challenges, utility conflicts, and construction issues before they impact project delivery. Trimad works collaboratively with City staff, contractors, utility providers, regulatory agencies, and other stakeholders to develop practical solutions that minimize delays, reduce disruptions, and maintain project momentum while protecting the City's interests.

Representative Experience

City of Pharr – Lift Stations No. 10, 18 & 40 Elimination Project • City of Pharr – Lift Station No. 23 Relocation Project • City of La Villa – Drainage Improvements

---

Schedule & Budget Management

Our team continuously monitors project schedules, evaluates contractor progress, tracks key milestones, and assists the City in identifying potential delays before they impact construction. By proactively coordinating with project stakeholders, Trimad helps keep projects progressing efficiently while supporting budget and schedule objectives.

Representative Experience

Harlingen Headworks Improvements • City of Pharr – Water Transmission Main Improvements • City of San Benito – Sanitary Sewer Improvements

PROJECT MANAGEMENT APPROACH

CITY OF EDINBURG

Quality Assurance / Quality Control (QA/QC)

Trimad implements quality assurance and quality control procedures throughout project delivery to promote accuracy, consistency, and compliance with applicable standards and contract requirements. Senior project personnel provide oversight throughout each assignment by reviewing project documentation, monitoring construction activities, verifying compliance with project requirements, and coordinating corrective actions when necessary.

Representative Experience

Harlingen Headworks System – WWTP Headworks Equalization Basin & Influent Lift Station Improvements • City of San Benito – Ratliff 12-Inch Waterline Improvement Project • City of Pharr – Water Transmission Main Improvements

---

Construction Administration, Coordination & Reporting

Trimad provides construction administration services including contractor coordination, construction observation, progress meetings, submittal coordination, utility coordination, project documentation, and progress reporting to support successful project delivery.

Representative Experience

City of Pharr – Headworks Improvements • City of Pharr – Sanitary Sewer Collection Improvements • City of La Villa – Drainage Improvements

---

Project Closeout

As projects near completion, Trimad coordinates punch list completion, final inspections, project documentation, contractor closeout, record drawing coordination, and final project deliverables. Our team remains engaged through final acceptance to help ensure all contract requirements have been satisfied and projects are successfully transitioned to the City.

Representative Experience- City of Pharr – Lift Stations No. 10, 18 & 40 Elimination Project • City of Alamo – Morningside South Sewer project • City of San Benito – Ratliff 12-Inch Waterline Improvement Project

SECTION 5

PROJECT TEAM AND KEY PERSONNEL

KEY PERSONNEL & CAPACITY

CITY OF EDINBURG

KEY PERSONNEL & CAPACITY

Trimad Consultants is organized to provide responsive project management, construction administration, and engineering support services for municipal capital improvement projects of varying size and complexity. Our team includes a licensed Professional Engineer, Graduate Engineers, inspectors, CAD technicians, and administrative staff who work collaboratively to support projects from project initiation through construction and project closeout.

Depending on the City's needs, Trimad assigns personnel based on the scope, complexity, and schedule of each assignment. This flexible approach allows our team to effectively manage multiple concurrent projects while maintaining communication with City staff, contractors, regulatory agencies, utility providers, and other project stakeholders to support successful project delivery.

FIRM CAPABILITIES INCLUDE:

- Project management and construction management services
- Construction administration and construction observation
- Contractor coordination and progress meeting facilitation
- Schedule monitoring and budget support
- Submittal, RFI, and pay application coordination
- Quality Assurance / Quality Control (QA/QC)
- Utility coordination and permitting
- Water, wastewater, drainage, roadway, and utility infrastructure improvements
- Municipal Capital Improvement Program (CIP) support
- AutoCAD Civil 3D and related engineering software

The following pages include Trimad Consultants' organizational chart and resumes of key personnel available to provide project management and construction management services for the City of Edinburg.

Organizational Chart

THE CITY OF Edinburg

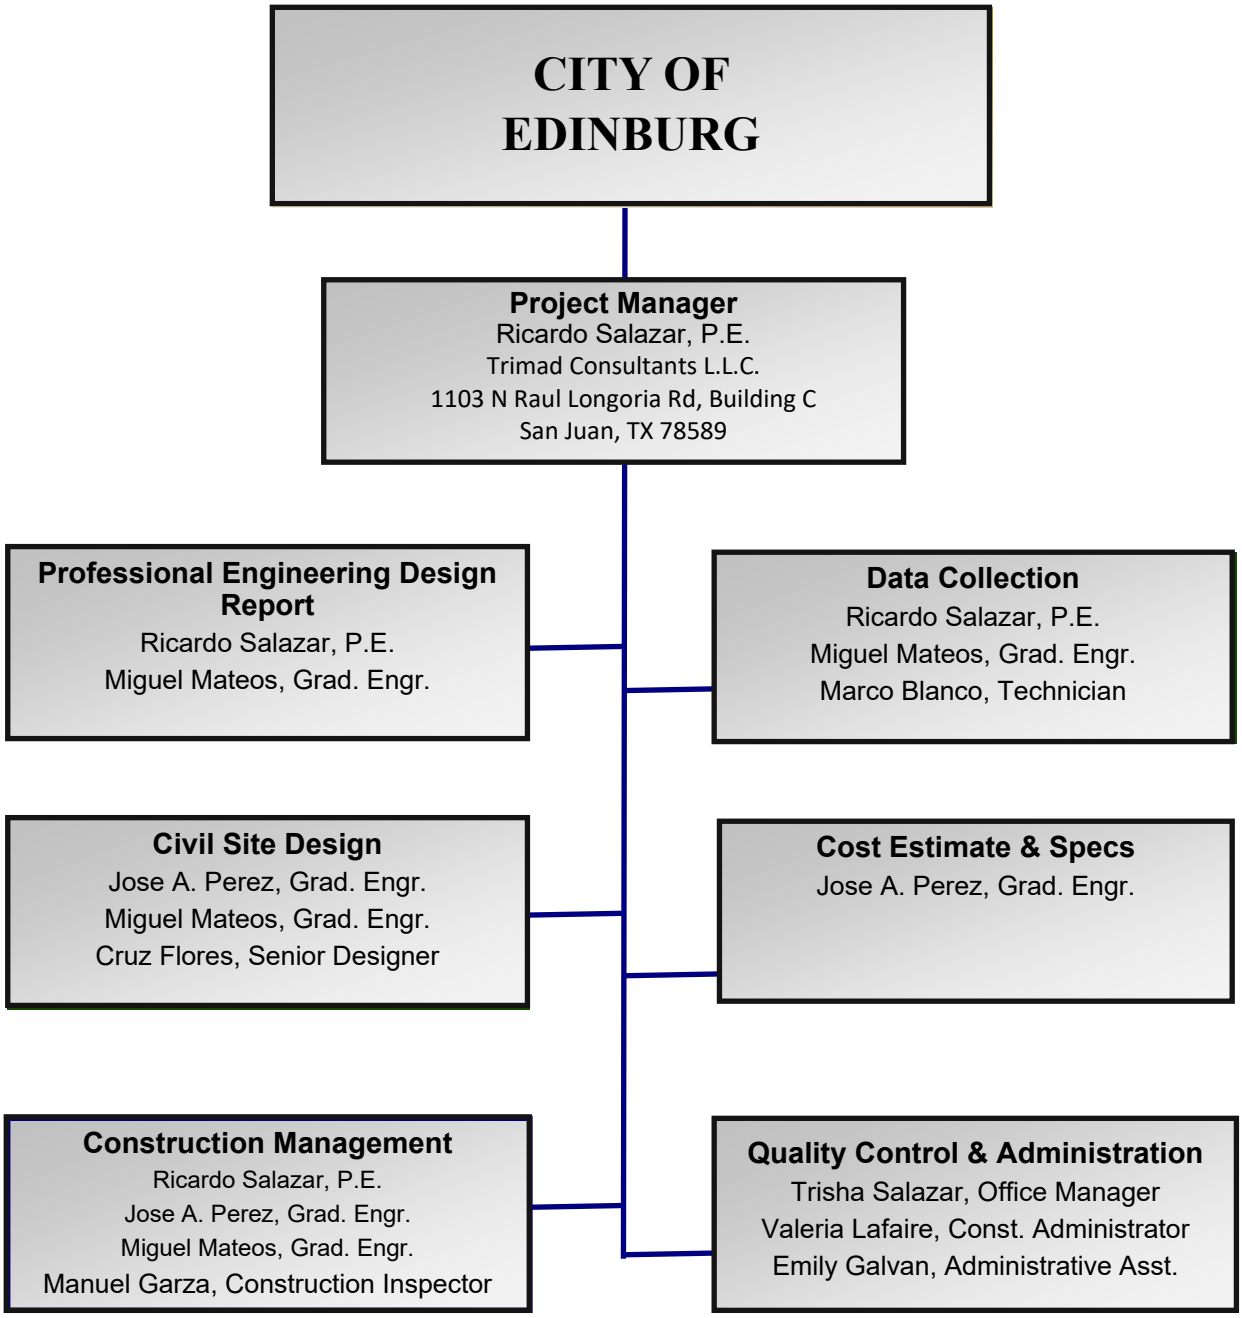
Trimad Staff List

The Key Project Personnel is noted below: **Trimad: 1**

Trimad Consultants, L.L.C.	
Personnel	**Discipline**
Ricardo Salazar, P.E.	Professional Engineer / President
Jose A. Perez	Graduate Engineer
Miguel Mateos	Graduate Engineer
Cruz Flores	Senior Designer
Valeria Lafaire	Construction Administrator
Manuel Garza	Construction Inspector
Pablo Gonzalez Jr	Heavy machine operator
Marco Blanco	Technician
Trisha M. Salazar	Office Manager
Emily Galvan	Administrative Assistant

Key Team Members and Experience Summary

Provided below is a brief profile for key personnel:



Mr. Ricardo Salazar, P.E. (TRIMAD)

Role: Roadway Design, Water/Wastewater, Program Manager, Construction Manager, Client Liaison

Mr. Salazar has approximately 21-years of experience in the planning and design of civil engineering projects and survey. His project experience includes roadway improvements, drainage infrastructure, sanitary sewer collection, and water distribution. Mr. Salazar is located in San Juan, Texas and is able to quickly respond to any needs. Among communities he's has served include the Cities of Pharr, Elsa, Alamo, San Juan, Edcouch, Donna, and Pharr, Edinburg ECISD, La Joya ISD, Hidalgo County, Urban County, and number of private developers in the Rio Grande Valley.

EMPLOYMENT

TRIMAD Consultants, L.L.C. San Juan, TX December 2017—Present	GIC, L.L.C. Pharr, TX September 2017—December 2017	S& GE, L.L.C Pharr, TX March 2013—September 2017

PROFESSIONAL EXPERIENCE

Ricardo Salazar, Professional Engineer, has over 21 years of experience in a broad range of Civil Engineering areas which include roadway, drainage, utilities, etc. His knowledge and experience have been gained mainly by working with the South Texas Region and its community. Areas that Mr. Salazar has served include the City of Pharr, City of Edcouch Elsa, City of Weslaco, City of Edinburg, City of McAllen, City of Brownsville, City of La Joya, San Antonio Water Supply Corporation, as well as the Counties of Hidalgo, Starr, Cameron, and Willacy.

RELATED PROJECTS

City of Pharr Improvements Project, Pharr, Texas

Mr. Salazar has applied his knowledge to various projects involving the City of Pharr. Many of these projects include utilities, existing right-of-way, assessments, and design of new street improvements for the installation of underground infrastructure within a street paved section. The recent projects completed are as follows:

* Sanitary Sewer Collection System Improvements
* Water Transmission Main Improvements
* Eldora Elevated Storage Tank / Collection System Improvements

City of Pharr NW Collection System Improvements and Lift Station Elimination Project, Pharr, Texas

Mr. Salazar is the assigned Project Manager involved in the planning and design phase of this project. Construction is due to commence in approximately 3 months. During the construction phase of the project, Mr. Salazar will be conducting the critical changes required due to unforeseen and poorly documented record drawings of existing underground infrastructure within project limits, if necessary. In addition, he will conduct construction meetings, submittal reviews, respond to Request for Information (RFI) and Request for Proposals (RFP), construction inspections, approvals of pay requests, review of charge orders, and project completion / close-out.

City of Pharr Water and Wastewater Master Plan, Pharr, Texas

This project involved the analysis of the wastewater treatment plant and collection system to assist the City in developing a capital improvement plan to meet future demands and regulatory requirements. The scope of work included analyzation of existing water and wastewater treatment plants, the collection and distribution system. The tasks also included proposed system alignments, pipe sizing, crossing, and estimates. The completed master plan was designed for 20-year duration.

City of Pharr Wastewater Collection and Lift Station Design Project, Pharr, Texas

The project tasks included the preparation of a wastewater collection system hydraulic model and master plan, design of 23 Miles of wastewater pipelines ranging diameter from 12 inches to 36 inches, decommission 23 lift stations, and design of three (3) new lift stations ranging from 2.4 to 8 mgd. Mr. Salazar was involved during the planning, design, and construction stages of the project. Mr. Salazar conducted critical changes caused by unforeseen and poorly documented record drawings of existing underground infrastructure. Tasks also included meetings, review of submittals, responses to RFI's and RFP's, construction inspections, review and approval of pay requests, review of change orders, etc.

North McAllen WWTP Improvements and Recycle Pump Station, MPU, McAllen, Texas

The purpose of this project involved miscellaneous improvements to reliably produce Type 1 Reclaim Water with inclusion of a storage basin, effluent disk filters, chlorine disinfection, and a recycle pump station. The system was designed to filter all water from the plant and pump station designed to meet 5-mgd peak demand. Mr. Salazar conducted critical changes caused by unforeseen and poorly documented record drawings of existing underground infrastructure. Tasks also included meetings, review of submittals, responses to RFI's and RFP's, construction inspections, review and approval of pay requests, review of change orders, etc.

Hidalgo County Wide Paving and Drainage Improvements (Border Colonia Project), Hidalgo, Texas

Mr. Salazar assisted Precinct No. 1, 2, and 4 on paving and drainage projects throughout the county of Hidalgo. The scope of work involved cost estimates, review of plans, development of proposals, preparation of design and specifications. Routine visits were made to the work site in order to maintain the schedule. Weekly and monthly conferences were held in relation to each project.

Starr County Wide Paving and Drainage Improvements (Border Colonias Project), Starr, Texas

Mr. Salazar assisted the Starr County Precinct involving paving and drainage projects. Additional project tasks include design drawings for road and drainage improvements, periodic site visits for project completion tracking, weekly and monthly conferences for each related project, surveying, and quality control management. The project consisted of drainage and reconstruction of Athens Road for widening of a 24 feet cross section approximately 1 Mile long. Coordination and communication with TxDOT was necessary, as TxDOT was also reconstructing approximately 1 Mile of road tied to this project.

Hurricane Dolly Relief Program / Texas Department of Rural Affairs – Disaster Recovery (TDRA-DR) Round I & II Program – Starr, Hidalgo, Duval and Kleberg County

Mr. Salazar assisted in the designs for road and drainage improvement projects delivered under the Hurricane Dolly TDRA-DR Round I and II programs. The design provided plans and specifications, SW3P, traffic control, and surveying services needed. The project also included street replacement and drainage infrastructure improvements such as culverts, drainage channels, curb inlets, junction boxes, grated inlets, etc. Specific locations for related projects are the Balcones Height Subdivision (Penitas, TX), City of Pharr Downtown Drainage (Pharr, TX), Hutto Road Roadway Drainage (Donna, TX), Catalina Subdivision Drainage (Progreso, TX) and Vales Subdivision Drainage Channel Interceptor (Sullivan City, TX).

IH 37 Hurricane Evacuation Route Improvements, San Antonio, Texas

Mr. Salazar completed the design plans for the expansion of approximately 8 miles of IH 37. The designs included plan and profile sheets, control plans, and small / large bridge sign. TxDOT regulations and design requirements were followed and implemented.
City of San Antonio Paving and Design Improvements, San Antonio, Texas
Mr. Salazar assisted in the design plans for various COSA projects. The designs included plan and profile sheets, traffic control plans, SW3P, and existing and proposed requirements. COSA rules and regulations were implemented.

PROFESSIONAL EXPERIENCE

Mr. Perez has approximately 5 years of broad range experience in all related field of Civil Engineering which includes sewer networks, reports and construction estimates, and roadway / drainage improvements. His experience has been proudly based in the Rio Grande Valley. The agencies to have received his assistance include the City of Pharr, City of Alamo, City of San Juan, City of Donna, and Brownsville Public Utilities (BPU).

RELATED PROJECTS

Rudy's Lift Station and Force Main - Pharr, Texas

Mr. Perez is assisting with the design of this project which consists of the relocation of the lift station located next to Rudy's Country Store & Bar-B-Q and the force main. It includes the installation of approximately 4,700-lf of 10-inch pipe. The scope of work included an analysis of existing water, wastewater, and irrigation lines from as-builts to check for easements. He was consistently in contact with phone and gas companies for inquiries related to existing underground lines and is currently under design phase. The alignment starts from Eldora Road and will go north to Nolana Road on the right side of the drain ditch, it then proceeds to the east to Rudy's and connects to the newly relocated lift station.

Gravity Line and Abandonment of Lift Station #29 and #33 - Pharr, Texas

Mr. Perez is assisting in the design of this project which consists of the abandonment of two lift stations (#29 & #33) and installation of a gravity line. It includes the installation of approximately 2,900-lf of 15-inch, 1,400-lf of 18-inch, and 2,900-lf of 24-inch pipe. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with phone and gas companies for inquiries related to existing underground lines and is currently under design phase. Mr. Perez has coordinated with TxDOT / AEP for permit acquisition and crossing permit from Hidalgo County Irrigation District No. 2. (HCID No. 2). The alignment starts from Sioux Road and will go north to Eldora Road on the left side of the drain ditch, and it will switch to the right side before crossing the drain ditch (H.C.D.D No. 1) which then goes west crossing Sugar Road in between Sugar and Jackson Road it will go north to connect with lift station #29. Mr. Perez is assisting with the paving design of Eldora Road which consists of the reconstruction of the road, where gravity is going to be installed, of 2,800 linear feet. The paving of this project will commence from Allen and William Arnold Elementary School and will finish halfway between Jackson Road and Sugar Road.

City of Alamo CDBG - MIT Project - Alamo, Texas

Mr. Perez is assisting the City of Alamo in designing proposed improvements and calculating estimates corresponding to the 2015, 2016, and 2018 Texas General Land Office (TxGLO) funding applications. The City Board Members provided their assistance in selecting the most impacted areas impacted by recent flooding due to natural disasters. Based on the information gathered, certain estimates were developed respecting the grant budget. The applications' estimates consisted of the proposed drainage system, water plant improvements, street improvements, sewer improvements, and replacing existing clay lines.

WWTP Headworks Improvements - Pharr, Texas

Mr. Perez is currently assisting in the project design which requires the demolition and replacement of the existing headworks and associated lift station. It includes the redirection of the existing gravity flow mains from the City's sanitary sewer collection as well as the plant drain line to the new lift station. The scope of work includes calculating for wastewater flow projections to match the projected year 2040 plant flows, analyzing and designing new yard piping to accommodate to the upgraded headworks facility, and develop an opinion of probable

City of Donna CDBG-MIT Project - Donna, Texas

Mr. Perez assisted the City of Donna in designing proposed improvements and calculating estimates corresponding to the 2019 Texas General Land Office (TxGLO) Lower Rio Grande Valley Floods funding application. The City board members provided assistance in selecting the most impacted areas from recent flooding due to natural disasters. Based on the information that was gathered, certain estimates were developed respecting the grant budget. The applications' estimates consisted of proposed drainage system and sewer improvements.

I/2 – I-69C Interchange Project - Pharr, Texas

Mr. Perez provided assistance to Dragados - Pulice Joint Venture with the relocation of an existing sanitary sewer line which consisted of the abandonment of an existing 10-inch sanitary sewer line and redirected the flow to a southerly east direction. It included the installation of approximately 380-lf of 10-inch PVC sanitary sewer pipe. The scope of work included an analysis of existing water, wastewater, and drainage from as-builts. The alignment begins from the west ROW of North Cage Blvd. (I/69C) going southwest approximately 100-lf which then goes east to conne0ct to an existing sanitary sewer manhole approximately 280-lf on E. Warren Ave.

City of Alamo Morningside South-Sewer Project - Alamo, Texas

Mr. Perez is assisting in the design of this project which consists of a new 0.31 MGD lift station, installation of a gravity line, and force main. It includes the installation of approximately 2,210-lf of 8-inch and 720-lf of 4-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies and City of Alamo Public Works personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts along Ridge Rd. and goes along Morningside South Subdivision alleys for the gravity line and East from starting point to an existing manhole in front of Mayfair Subdivision for the force main. The Lift Station will be installed in front of a proposed subdivision East of Morningside South Subdivision along Ridge Rd.

City of San Juan Lift Station No. 6 – San Juan, Texas

Mr. Perez is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 6 and installation of a gravity line. It includes the installation of approximately 1,318-lf of 24-inch and 68-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the proposed lift station location. The force main will tie in to the existing force main located on the east side of Cesar Chavez. The Lift Station will be installed in front of a proposed subdivision (Oak Ridge Estates) and will be designed to service the majority of the north side of the City of San Juan.

City of Pharr Lift Stations 10, 18, and 40 Elimination Project – Pharr, Texas

Mr. Perez is assisting in the design of this project which consists of the elimination of Lift Station No. 10, No. 18, and No. 40 and installation of a gravity line. It includes the installation of approximately 3,593-lf of 24-inch and 2,431-lf of 36-inch gravity line. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of Pharr Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Moore Rd, Hall Acres Rd, and Plantations Subdivision. The gravity line will tie in to the new headworks location.

City of Pharr Lift Station No. 23 Relocation Project– San Juan, Texas

Mr. Perez is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 23 and installation of a gravity line and force main. It includes the installation of approximately 2,640-lf of 24-inch and 5,060-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of Pharr Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Sugar Rd and goes North approximately 1,200-lf and West approximately 1500-lf to the proposed lift station location. The force main will tie in to the existing sanitary sewer manhole located on the west side of Sugar Rd. The Lift Station will be installed in the northeast corner of an empty property and will be designed to service approximately 200-AC.

MIGUEL MATEOS,
Graduate Engineer

INDUSTRY TIME

3 Years

AVAILABILITY

90%

PROFESSIONAL AFFILIATIONS

- ⇒ Member of Water Environment Association of Texas (WEAT)
- ⇒ Member of American Water Works Association (AWWA)
- ⇒ Member of the American Society of Civil Engineers (ASCE)

PROFESSIONAL EXPERIENCE

Mr. Mateos has 2 years experience in the Civil Engineering field. His most recent experience includes roadway, drainage, lift stations, and civil sites. Under the supervision of Mr. Salazar, P.E., Miguel has been able to deliver in Civil Engineering Design, Construction Management, Construction Staking, Topography, Paving / Road and Drainage improvements.
Mr. Mateos' experience also includes coordination with TxDOT and County officials for successful project completion of state funded projects.

RELATED PROJECTS

City of San Juan Alta Vista Subdivision Sanitary Sewer and Waterline Improvements Project – San Juan, Texas

Mr. Mateos assisted the City of San Juan in the assessment and design of the water line system and sanitary sewer collection system improvements within Alta Vista Subdivision in the City of San Juan. The scope of work consists of the installation of approximately 1,584 lf of 8" C-905 DR PVC Water Line and 2,000 lf of 8" PVC sanitary sewer line. This project also consists of site preparation, sedimentation, erosion control and 8536 sy mill and overlay.

Subdivision Development Feasibility Studies - Rio Grande Valley

Mr. Mateos has been in charge of completing multiple subdivision development feasibility studies in various cities which include Edinburg, Mission, and Alamo, Mercedes, and Bastrop. The process includes staying in contact and meeting with city officials to ensure the development is in accordance with city codes, ordinances, and infrastructure regulations. The report is composed of detailed exhibits, engineering estimates, drainage reports, and geographic data which provide all the information needed to see if a property if feasible for an investment opportunity.

City of Alamo Morningside South-Sewer Project - Alamo, Texas

Mr. Mateos is assisting in the topography and design of this project which consists of a new 0.31 MGD lift station, installation of a gravity line, and force main. The project includes the installation of approximately 2,210-lf of 8-inch and 720-lf of 4-inch force main. The scope of work includes an analysis of existing infrastructure including any water and sewer lines from as-builts. He maintains frequent contact with gas companies and City of Alamo Public Works personnel for inquiries related to existing underground lines and is currently under design phase. The alignment for this project's gravity line starts along Ridge Rd. on the Northeast corner of this subdivision and runs along the alleys. The force main runs from the new 0.31 MGD lift station to an existing manhole in front of Mayfair Subdivision.
The Lift Station will be installed in front of a proposed subdivision East of Morningside South Subdivision along Ridge Rd.

City of San Juan Lift Station No. 6 – San Juan, Texas

Mr. Mateos is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 6 and installation of a gravity line. It includes the installation of approximately 1,318-lf of 24-inch and 68-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with companies, TXDot, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the companies companies, TXDot, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase.

The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the proposed lift station location. The force main will tie in to the existing force main located on the east side of Cesar Chavez. The Lift Station will be installed in front of a proposed subdivision (Oak Ridge Estates) and will be designed to service most of the North side of the City of San Juan.

City of Elsa- Weaver Rd. and Parking Lot improvements

Mr. Mateos assisted with the topography and the design of this project which consisted of approximately 4300 sy of mill and overlay along Weaver Rd. He maintained frequent contact with Texas 811 and City of Elsa Public Works personnel for inquiries related to existing underground lines. The parking lot was located at the intersection of E. 4th Ave and Bowie St consisted of 128 sy of 5-in sidewalk and approximately 1400 sy of 2-in hot mix asphalt.

Utility Hookups- (Del Rio TX)

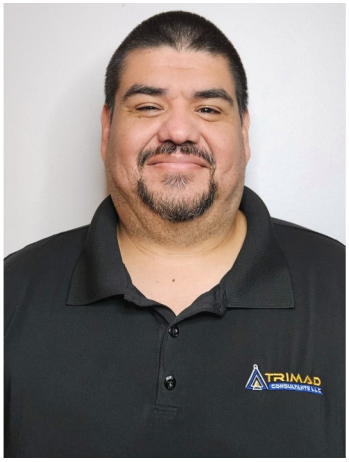
Assisted with the topographic survey, construction staking, and design of approximately 330 linear feet of 2-inch water line at Laughlin Air Force Base. In addition, provided design plans for the installation of three sanitary sewer manholes and approximately 775 linear feet of 8-inch sewer line. This system was planned to support both a building and anticipated future development in the area. The work involved determining optimal manhole placement, ensuring compliance with slope and depth requirements, and coordinating utility layouts to accommodate future capacity needs while adhering to base infrastructure standards and existing utility layouts.

City of San Juan- Urban County Street Improvements

Mr. Mateos assisted in the design for the mill and overlay of approximately 6,800 square yards of roadway which extended from Gardenia Dr to San Martin St.
This project was done to fix streets located East of an elementary school that were in need of repairs.

City of Elsa- Fannin St Roadway Improvements project (Stormwater Improvements)

Mr. Mateos assisted in the design for approximately 3,900 square yards of mill and overlay on Fannin St. This project also included the addition of a concrete apron at the intersection of Fannin St and E. Edinburg Ave to alleviate and ponding formed due to heavy rains in the area.



City of Pharr- Lift Station 23

Mr. Mateos has assisted in the topography and is currently assisting in the design of this project which consists of abandoning and relocating the existing Lift Station 23 and installing both sanitary sewer gravity line and forcemain. This project consists of approximately 2640 L.F of 24-inch sanitary sewer line and 5060 L.F of a 12-inch forcemain. The new lift station location will be at the North East corner of a vacant 200-AC property and will be used to service all future development on that land. The force main from this lift station will outfall to an existing sanitary sewer manhole located on the West side of Sugar Rd.

City of San Benito- Ratliff Water Line Improvements

Mr. Mateos is assisting in the design of approximately 5,900 L.F of 12-inch water line which will run from Zillock Rd. and connect to an existing 16 -inch line located near the North-West corner of the City of San Benito Water Plant. This project consists of coordinating with the drainage and irrigation district to ensure that all crossing standards are being met as this line will cross two canals. This design also includes the installation of 12 fire hydrants which will be used to provide optimal coverage for existing and future structures, improving emergency response capabilities.

CRUZ FLORES,
Senior Designer

INDUSTRY VENTURE
20 Years

AVAILABILITY
90%

PROFESSIONAL EXPERIENCE

Mr. Flores has experience in all aspects of project design, coordination, and construction administration. Mr. Flores has nineteen (20) years of experience working on public infrastructure projects. He has been a team member of design groups designing master planned communities that include the City of Pharr, Elsa, Edcouch, Donna, Weslaco, Edinburg, McAllen, Brownsville, La Joya, Mission, Palmview, Penitas as well as Hidalgo County, Cameron County, and Starr County.

RELATED PROJECTS

WWTP Headworks Improvements - Pharr, Texas

Mr. Flores is currently assisting in the project design which requires the demolition and replacement of the existing headworks and associated lift station. It includes the redirection of the existing gravity flow mains from the City's sanitary sewer collection as well as the plant drain line to the new lift station. The scope of work includes calculating for wastewater flow projections to match the projected year 2040 plant flows, analyzing and designing new yard piping to accommodate to the upgraded headworks facility, and develop an opinion of probable construction cost (OPCC).

City of Pharr Lift Station No. 23 Relocation Project– San Juan, Texas

Mr. Flores is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 23 and installation of a gravity line and force main. It includes the installation of approximately 2,640-lf of 24-inch and 5,060-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of Pharr Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Sugar Rd and goes North approximately 1,200-lf and West approximately 1500-lf to the proposed lift station location. The force main will tie in to the existing sanitary sewer manhole located on the west side of Sugar Rd. The Lift Station will be installed in the northeast corner of an empty property and will be designed to service approximately 200 -AC.

City of Donna CDBG-MIT Project - Donna, Texas

Mr. Flores assisted the City of Donna in designing proposed improvements and calculating estimates corresponding to the 2019 Texas General Land Office (TxGLO) Lower Rio Grande Valley Floods funding application. The City board members provided assistance in selecting the most impacted areas from recent flooding due to natural disasters. Based on the information that was gathered, certain estimates were developed respecting the grant budget. The applications' estimates consisted of proposed drainage system and sewer improvements.

City of Pharr Lift Stations 10, 18, and 40 Elimination Project – Pharr, Texas

Mr. Flores is assisting in the design of this project which consists of the elimination of Lift Station No. 10, No. 18, and No. 40 and installation of a gravity line. It includes the installation of approximately 3,593-lf of 24-inch and 2,431-lf of 36-inch gravity line. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of Pharr Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Moore Rd, Hall Acres Rd, and Plantations Subdivision. The gravity line will tie in to the new headworks location.

City of Alamo Morningside South-Sewer Project - Alamo, Texas

Mr. Flores is assisting in the design of this project which consists of a new 0.31 MGD lift station, installation of a gravity line, and force main. It includes the installation of approximately 2,210-lf of 8-inch and 720-lf of 4-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies and City of Alamo Public Works personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts along Ridge Rd. and goes along Morningside South Subdivision alleys for the gravity line and East from starting point to an existing manhole in front of Mayfair Subdivision for the force main. The Lift Station will be installed in front of a proposed subdivision East of Morningside South Subdivision along Ridge Rd.

City of San Juan Lift Station No. 6 – San Juan, Texas

Mr. Flores is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 6 and installation of a gravity line. It includes the installation of approximately 1,318-lf of 24-inch and 68-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the proposed lift station location. The force main will tie in to the existing force main located on the east side of Cesar Chavez. The Lift Station will be installed in front of a proposed subdivision (Oak Ridge Estates) and will be designed to service the majority of the north side of the City of San Juan.

City of Pharr Wastewater Collection and Lift Station Design Project, Pharr, Texas

This project included preparation of a wastewater collection system hydraulic model and masterplan, design of 23 miles of wastewater pipelines, ranging in diameter from 12 inches to 36 inches, decommissioning of 23 lift stations, and design of three new lift stations, ranging in size from 2.4 to 8-mgd. Mr. Flores was involved throughout the planning, design, and construction of the project.

City of San Juan Sgt. Leonel Trevino Sanitary Sewer Improvements Project- San Juan, Texas

Mr. Flores successfully assisted the City of San Juan in the assessment and design for the improvements to the existing force main line within Sgt. Leonel Trevino Road in the City of San Juan. The scope of work consisted or rerouting approximately 1033 LF of 6in force main to connect to the existing sanitary sewer collection system. This project also consisted of site preparation, sedimentation, erosion control, and pavement repairs.

City of Alton 2012-2014 TWDB Clean Water State Revolving Fund Project, Alton, Texas

This project included connections, collection lines, transmission lines, and upgrades to an existing lift station for a total of sixteen (16) subdivisions providing 578 connections. Mr. Flores was involved throughout the planning, design, coordinated with TxDOT with repaving, insured the contractor was on schedule.

City of Mercedes TWDB Clean Water State Revolving Fund (CWSRF) Wastewater Collection & Wastewater Treatment Plant SCADA

Mr. Flores created provided project management for rehabilitation of old, dilapidated clay sewer lines with a new technology of Cured In Place Pipe (CIPP) and rehabilitation of twenty-four (24) existing lift stations funded with a $4.3M grant from the TWDB.

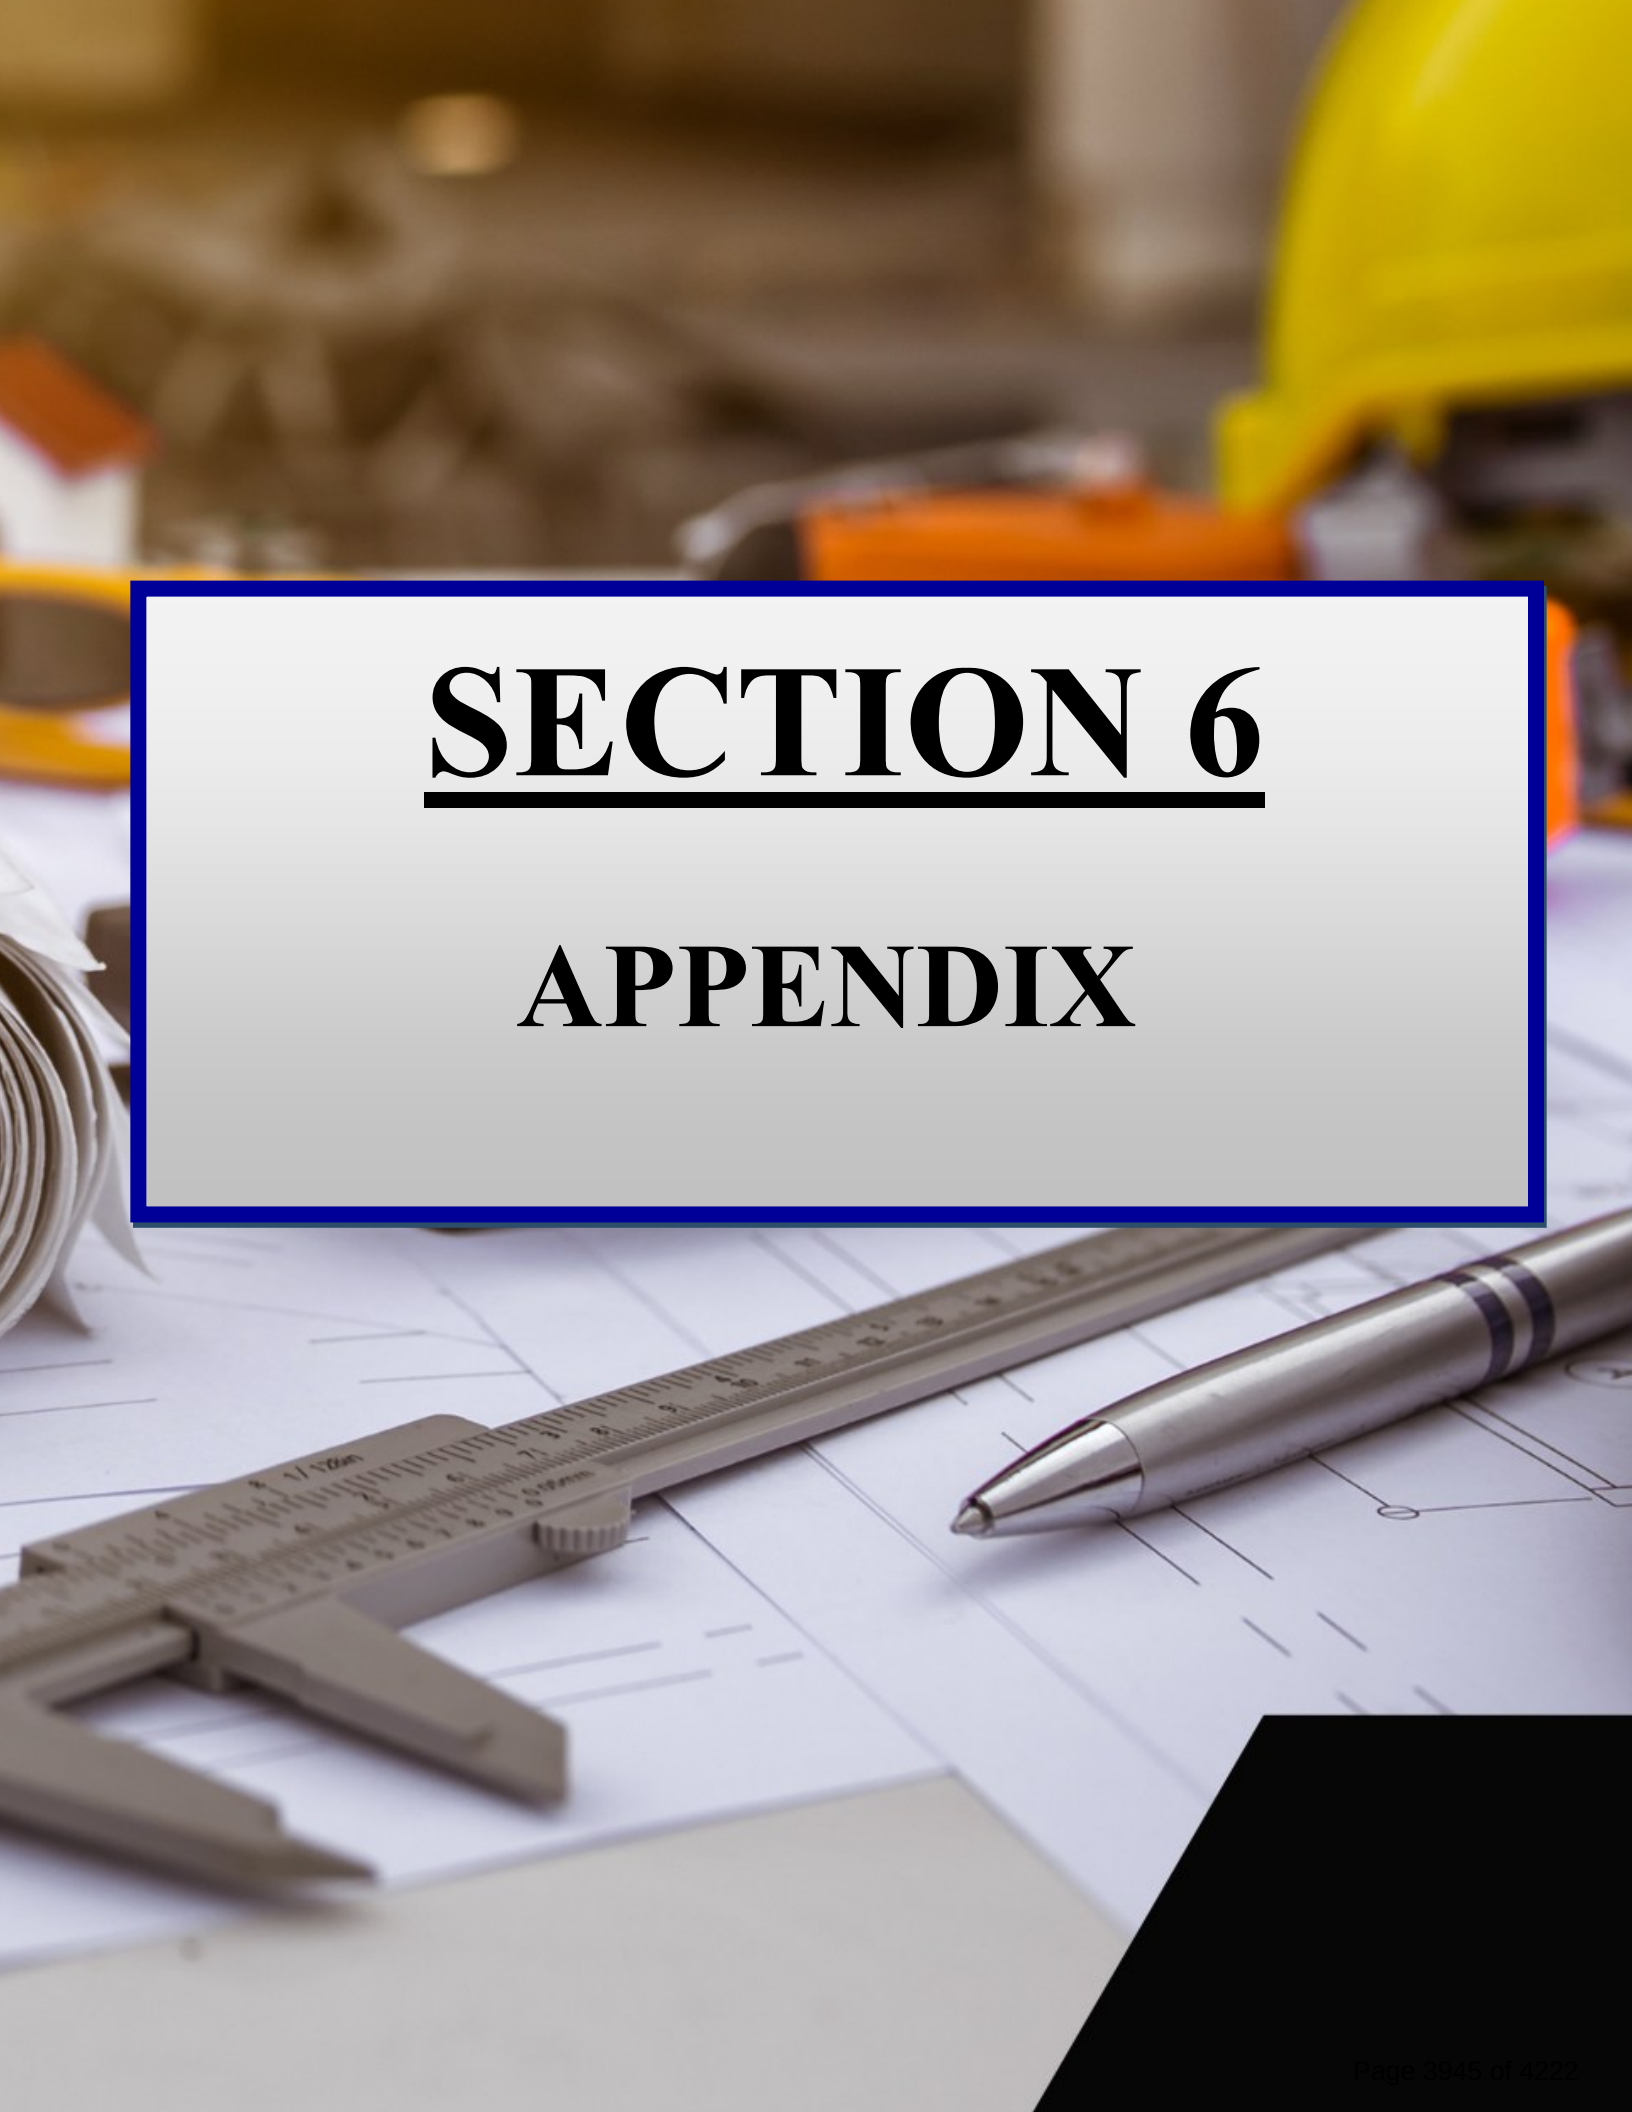
Zavala County Water Control & Improvement District No.1 Wastewater Improvements Project

This project consisted of a new 0.6 MGD wastewater treatment plant and collection system, including lift stations, for a community that has never had a centralized sewer system. Mr. Flores was involved from the initial preliminary phase all the way the construction phase of the project.

McAllen Public Utilities Board-Tres Lagos Wastewater Reuse Project & 29th Street Sports Complex Wastewater Reuse Project 2016

Mr. Flores provided McAllen PUB with civil design for the proposed wastewater collection improvements project. The project consisted of abandoning the existing undersized and inadequate water lines and replace with 16-inch PVC wastewater reuse line. Their was approximately 60-70 fire hydrants and 1500 linear feet of 12-ince bore construction with 12-inch steel casing installed. This project benefited the entire area of Tres Lagos by improved facilities and the deletion of asbestos water lines currently being used.

TWDB CWSRF Project No. 73642 City of Mercedes-Sanitary Sewer Collection System Rehabilitation Project



The project consists of rehabilitation to two (2) lift stations; demolition/reconstruction of one main (1) lift station; approximately 32,000 linear feet of Cured-In-Place Piping and Pipe Bursting of old, dilapidated clay sewer lines; and manhole replacement/rehabilitation. Mr. Flores was involved from the initial preliminary phase all the way the construction phase of the project, where he assisted in on field changes from unforeseen problems.

City of Combes-Crosswind Landing Public Park & Commercial Development-Utilities & Drainage

In this project we provided City of Combes with environmental services, park and subdivision planning, Water and Wastewater Infrastructure Design, Road and Drainage Design, Planning, Construction Phase Engineering, and Inspection for Crosswind Landing Development and Loves Truck Stop Water & Sewer Improvements located in Combes, Texas: The City of Combes utilized $11M in Public Bonds Issuance in the development of the proposed development to include ten (10) commercial lots for restaurants, hotels, and retail development along I-69 Corridor. Mr. Flores assisted in providing drainage and detention for a Love's Gas Stop located adjacent to the development, including over 2000 linear feet of water and sewer infrastructure for the Love's and the Development.

Progreso International Bridge FMCSA Inspection Station Design and Water & Wastewater Facilities

As the prime designer for the Progreso International Bridge, Mr. Flores provided preliminary design for a two-bay inspection station, including underground inspection pits, catwalks for overhead inspections, metal canopy for both bays, parking, 8800 cy of 14" concrete/steel reinforced driveways and roads, administration building coordination designed by architect, for the Owners of the Progreso Bridge, General Services Administration (GSA) and the Federal Motor & Carrier Services Administration (FMCSA) for the use by US Border Patrol & US Immigrant & Customs Administration (ICE) agents for vehicular inspections of commercial trucks. The overall cost estimate of the project is $9M for construction. Bridge Administration is waiting on approval and notice to proceed from the General Services Administration. Included in the design was a new lift station for industrial site development to be utilized by the FMCSA inspection station. New 10" waterline was designed and installed which included over 15 fire hydrants.

Expiration Date
1/31/2027

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 18, 2026
AWARDING OF BIDS
Agenda Item No: 13.H.
Award RFP NO. 2026-018 Medial Insurance

1. **Agenda Item:**
Consider Rejecting RFP No. 2026-018, Group Employee Medical Insurance FY 2026-2027 and Authorize the City Manager to Negotiate a Renewal with Blue Cross Blue Shield and Enter Into an Agreement Related Thereto. [Erica A. Balli, Director of Human Resources]

2. **Description:**
The City seeks to award a contract to a qualified and experienced insurance benefits carrier to administer and manage its group medical insurance program. The selected carrier will be responsible for delivering a comprehensive benefit plan design, competitive rate structure, regulatory compliance, and detailed reporting. In addition, the carrier will support the City in strategic plan management and employee engagement initiatives to ensure high-quality, cost-effective coverage that serves the best interests of the City and its employees.

On Tuesday, August 4, 2026, Requests for Proposals (RFPs) were opened for RFP No. 2026-018, Group Employee Medical Insurance FY 2026-2027. Six (6) proposals were received.

All the proposals received were assessed and ranked by the City's current Insurance Consultant, Valley Risk Consulting, and the current Agent of Record, Voyager Benefits Alliance.

The following carriers are listed in alphabetical order:

1. Assured Benefits Administrators
2. Curative Insurance Company
3. HCSC (Blue Cross Blue Shield)
4. JLG Pharmaceutic Consulting, LLC.
5. Matrix Quality, Inc.
6. Veracity Benefits, LLC.

The Consultant and the Agent of Record met with the City's current carrier, Blue Cross Bluss Shield, to negotiate the services and cost. The proposed renewal rate with Blue Cross Blue Shield under a self-insured plan is the best option at this time.

3. **Staff's Recommendation:**
Consider Rejecting RFP No. 2026-018, Group Employee Medical Insurance FY 2026-2027 and Authorize the City Manager to Negotiate a Renewal with Blue Cross Blue Shield and Enter Into an Agreement Related Thereto.

AWARDING OF BIDS
Agenda Item No: 13.I.
Award RFP No. 2026-013, Prescription Personal Importation Program

1. **Agenda Item:**
Consider Awarding RFP No. 2026-013, Prescription Personal Importation Program and Authorize the City Manager to Negotiate and Enter Into an Agreement Related Thereto. [Erica A. Balli, Director of Human Resources]

2. **Description:**
The City seeks to award a contract to a qualified and experienced carrier to manage its prescription pharmaceuticals mail order services for the City's employees and eligible dependents (the "Members"). The program is a voluntary mail order prescription program.

On Tuesday, April 14, 2026, Requests for Proposals (RFPs) were opened for RFP No. 2026-013, Prescription Personal Importation Program. One (1) proposal was received.

The proposal received was assessed by the City's current Insurance Consultant, Valley Risk Consulting.

The following carriers are listed:

Veracity Benefitrs, LLC.

The Consultant will meet with the carrier to negotiate the services and cost.

3. **Staff's Recommendation:**
Consider Awarding RFP No. 2026-013, Prescription Personal Importation Program to Veracity Benefits, LLC and Authorize the City Manager to Negotiate and Enter Into an Agreement Related Thereto.

Re: RFP# 2026-013 RX Performance Importation Program

The City of Edinburg issued a request for proposals on March 25, 2026, for an RX Performance Importation Program under RFP# 2026-013. This program aims to address the rising costs of specific high-priced medications that can be sourced internationally at discounted rates for the city. The advertisement was distributed through local and OpenGov Procurement Notifications, with a submission deadline set for Tuesday, April 14, 2026.

As a result, one (1) proposal was received under RFP# 2026-013. The proposal was tabulated and evaluated, and a brief outline of the evaluation matrix summary is attached for your review. (See Exhibit A)

Based on our review and evaluation, we recommend that the Commissioners Court award RFP# 2026-013 RX Performance Importation Program to the sole responding firm, Veracity Rx.

STATE OF TEXAS §

COUNTY OF HIDALGO §

CITY OF EDINBURG §

AGREEMENT BETWEEN THE CITY OF EDINBURG AND "VENDOR" FOR Rx PERSONAL IMPORTATION PROGRAM.

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and "VENDOR" (hereinafter **"Vendor"**), are the parties to this Agreement.

RECITALS

WHEREAS, the City desires to engage the Vendor for certain services and to provide all labor, materials and equipment necessary to perform work as described in Exhibit A, and

WHEREAS, Vendor has the professional knowledge, ability, equipment, and personnel to properly provide services needed by the City; and

WHEREAS, City desires to engage Vendor to render services in connection therewith:

NOW, THEREFORE, City and Vendor do mutually agree as follows:

SECTION I
EMPLOYMENT OF VENDOR

A. City agrees to employ Vendor to furnish and provide services, labor, materials, and equipment ("Services") as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Vendor as stated in this Agreement.

SECTION II
SERVICES OF VENDOR

A. The Vendor shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Vendor with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall

in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Vendor's work with the following tasks:

1. Provide Vendor with its requirements for the Services.

2. Assist Vendor by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Vendor to enter upon public property as reasonably required for Vendor to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Vendor and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Vendor.

5. Give prompt written notice to Vendor whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Manager or such other representative that the City may appoint by written notice to Vendor with whom Vendor will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Vendor with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF VENDOR

A. Vendor shall perform the Services described in **Exhibits "A".**

B. Vendor shall perform its Services (including the furnishing of labor, materials, and equipment) with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Vendor shall comply with all applicable federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Vendor fails to meet applicable professional

standards, Vendor shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Vendor shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Vendor under this Agreement. Vendor shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Vendor, Vendor agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Vendor will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of this Agreement for review and establishment of the level of detail to be included.

E. Vendor will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Vendor during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Vendor shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Vendor of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Vendor shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Vendor's negligent performance of any of the Services furnished under this Agreement. Vendor shall not be responsible for any time-delays in the project caused by circumstances beyond Vendor's control.

I. Vendor's obligations under this clause are in addition to the Vendor's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Vendor for Vendor's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Vendor for Services being contracted herein as follows:

A. Vendor shall submit all invoices to City in the manner specified herein. City shall pay Vendor for the services requested at the unit prices in Exhibit A. Except as specifically authorized by City in writing, Vendor shall not bill City for duplicate services performed by more than one person. Vendor and City acknowledge and agree that compensation paid by City to Vendor under this Agreement is based upon Vendor's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Vendor. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Vendor and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Vendor's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Vendor's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Vendor has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Vendor has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Vendor immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Vendor any amount remaining after deduction of the amount so withheld. City shall promptly pay Vendor the amount so withheld, or any adjustment thereto agreed to by City and Vendor, if Vendor remedies the reasons for such action. The reduction imposed will be binding on Vendor unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Vendor under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Vendor's employees' taxes. Vendor hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Vendor and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Vendor shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Vendor to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Vendor shall, within seven (7) days from the date it receives the City's request, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The governing body of the City must approve any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Vendor from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Vendor following termination or expiration of this Agreement as defined below, the Vendor shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) twelve months from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Manager. The City, in its sole option, may elect to renew this Agreement for an additional one year term up to a total of 3 renewal terms.

B. City may terminate this Agreement upon giving 10 days' prior written notice thereof to Vendor. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Vendor breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Vendor except for charges for Services performed by Vendor and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Vendor's Services hereunder or at such other time as may be requested by City, Vendor shall return to City within seven (7) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Vendor or others, in Vendor's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Vendor. Vendor shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Vendor except for charges for Services performed by Vendor and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Vendor shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Vendor shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Vendor or its employees. In accordance with City ordinances, Vendor shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence

2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional
$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit ”B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Vendor fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Vendor, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Vendor shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Vendor.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Vendor shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Vendor hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Agreement;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Agreement to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises

under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and costs.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Vendor agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any and all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees arising out of or directly connected with the negligent or willful conduct of Vendor, its agents, officers and employees.

B. Vendor agrees to assist City in defense of claims or litigation brought against the City related to this project, including but not limited to providing written witness statements, documents, and witness testimony upon demand.

SECTION XI
LIMITATION OF LIABILITY

A. Vendor agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Vendor's total fees paid by the City to Vendor for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Vendor agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Vendor's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Vendor represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Vendor threated against or affecting the Vendor or any subsidiaries of the Vendor, questioning the validity or any action taken or to be taken by the Vendor in connection with the execution, delivery, and performance by the Vendor of this Agreement to which the Vendor may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Vendor hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Vendor to perform, its obligations under this Agreement to which the Vendor may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Vendor or on the ability of the Vendor to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Vendor:

Vendor
Attn:
Address
City, State, Zip Code

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Vendor each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Vendor shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Task Orders (including exhibits), the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of the City, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the strict performance by Vendor of its covenants, obligations, or agreements under this Agreement, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of Vendor and the rights and remedies of the City upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Vendor of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Vendor shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 2026.

B - Rules for Electronic Bidding

1. Introduction

1.1. Summary

The City is soliciting proposals for prescription pharmaceuticals mail order services for the City's employees and eligible dependents (the "Members") that are part of a voluntary personal importation mail order prescription program.

1.2. Background

The City of Edinburg is a self-insured municipality employing approximately 1,300 full-time employees and providing benefits to approximately 100 eligible retirees. As part of its ongoing commitment to cost containment and high-quality healthcare benefits, the City is soliciting proposals to evaluate and determine the most effective strategy for managing prescription pharmaceutical expenditures through a Prescription Drug Performance Importation Program (PIP). Proposers are invited to review the City's current program and provide analysis, recommendations, and implementation guidance to optimize cost savings and program performance.

1.4. Timeline

Release Project Date	March 25, 2026

Question Submission Deadline	April 2, 2026, 3:00pm
Proposal Submission Deadline	April 14, 2026, 3:00pm

2. Legal Notice

2.1. Notice to Respondents

The City of Edinburg is soliciting sealed proposals from qualified vendors for Rx Performance Importation Program.

Sealed Proposals must be submitted electronically or received by the City Secretary's Office no later than:

3:00 pm, Tuesday, April 14, 2026.

All sealed proposals must be received either electronically or at the designated location by the deadline shown. Proposals received after the deadline will not be considered for the award of the contract and shall be considered void and unacceptable.

All proposals will be opened, and bidder's names publicly read aloud promptly in the City Hall Community Room, at 415 W. University Dr., Edinburg, TX 78539, at 3:00 pm, Tuesday, April 14, 2026.

To obtain a copy of the Request for Proposals or submit an electronic proposal please visit:

https://procurement.opengov.com/portal/cityofedinburg

If a Respondent chooses to submit a Hard Copy Proposal, it must be delivered in a sealed envelope with a return address and clearly marked "City of Edinburg RFP No. 2026-013" to the City Secretary's Office prior to the RFP opening date and time. The receiving time in the City Secretary's Office will be the governing time for acceptibility of the proposals. The Respondent's firm name shall appear on the outside of the envelope.

Submit Proposals to:

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

RFP No. 2026-013

If you have any questions or require additional information contained the RFP, you may contact Lorena Fuentes, Interim Purchasing Manager, please submit your questions via OpenGov Procurement at the website listed above no later than 3:00 pm on Thursday, April 2, 2026.

The City of Edinburg reserves the right to reject any or all proposals and to waive informalities or technicalities and to accept the Proposal deemed most advantageous to the City, and hold the proposal for a period of **90 days** without taking action.

3. Instructions, Terms and Conditions

3.1. General Instructions

PURPOSE

The purpose of these solicitation documents is to provide a Proposals for: Rx Performance Importation Program

INTENT

The services to be provided under this RFP shall be in accordance with and shall meet all specifications and/or requirements as shown in this solicitation for RFP. There is no intention to disqualify any respondent who can meet the requirements.

SUBMITTAL OF "HARD COPY" RFP

If submitting a Hard Copy RFP, it must be submitted in a sealed envelope by the vendor. **Submit two (2) complete sets of the response, one (1) original marked "ORIGINAL," and one (1) Digital Copy in a flash drive**. Each RFP must be completely filled out and SUBMITTED IN ORIGINAL FORM complete with all supporting documentation. RFPs submitted by facsimile (fax) will not be accepted. Submittal of an RFP in response to this solicitation constitutes an offer by the respondent. Once submitted, RFPs become the property of the City of Edinburg and as such the City reserves the right to use any ideas contained in any RFP regardless of whether that respondent/firm is selected. Submission of a RFP in response to this solicitation, by any respondent, shall indicate that the respondent(s) has/have accepted the conditions contained in the RFP, unless clearly and specifically noted in the RFP submitted and confirmed in the contract between the City and the successful respondent otherwise. RFPs which do not comply with these requirements may be rejected at the option of the City. RFPs must be filed with the City of Edinburg before the deadline day and hour. No late RFPs will be accepted. Failure to meet RFP requirements may be grounds for disqualification.

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

TIME ALLOWED FOR ACTION TAKEN

The City of Edinburg may hold RFPs **90** days after deadline without taking action. Respondents are required to hold their RFPs firm for same period of time.

RIGHT TO REJECT/AWARD

The City of Edinburg reserves the right to reject any or all RFPs, to waive any or all formalities or technicalities, and to make such awards of contract as may be deemed to be the best and most advantageous to the City of Edinburg.

ASSIGNMENT

Respondents are advised that the City of Edinburg shall not allow the successful respondent to sell, assign, transfer, or convey any part of any contract resulting from this RFP in whole or in part, to a third party without the written approval of the City of Edinburg.

AWARD

Respondents are advised that the City of Edinburg is soliciting RFPs and award shall be made to the respondent that in the opinion of the City of Edinburg is the best qualified.

The City of Edinburg reserves the right to award contract(s) based solely on the written proposals. The City also reserves the right to request oral interviews.

FINAL SELECTION AND THE CITY COUNCIL APPROVAL

Selection shall be made of one or more proposers deemed to be fully qualified and best suited among those submitting Proposals on the basis of the evaluation factors included in the Request for Proposals, if so stated in the Request for Proposals. Negotiations shall be conducted with the proposers selected. After negotiations have been conducted with each proposer selected, the agency shall select the proposer which, in its opinion, has made the best proposal, and shall award the contract to that proposer. The City may cancel this Request for Proposals or reject the Proposals at any time prior to an award, and is not required to furnish a statement of the reasons why a particular proposal was not deemed the most advantageous. Should the City determine in writing and in its sole discretion that only one proposer is fully qualified, or that one proposer is clearly more highly qualified than the others under consideration, a contract may be negotiated and awarded to that proposer. The award document will be a contract incorporating by reference all the requirements, terms and conditions of the solicitation and the contractor's proposal as negotiated. After the selection of the most qualified firm(s), scope of services and billing rates will be negotiated and used as attachments to the City's Professional Services Agreement. This Agreement will then be submitted to the City Council for approval. If the City and the selected firm cannot successfully negotiate an agreement, then the City will enter into negotiations with the next best qualified firm on the evaluation rating list. This procedure may be repeated until one (1) or more firms has been selected and approved by the City Council.

NUMBER OF CONTRACTS

THE CITY reserves the right to award one or no contract in response to this RFP.

STATUTORY REQUIREMENTS

It shall be the responsibility of the successful respondent to comply with all applicable State & Federal laws, Executive Orders and Municipal Ordinances, and the Rules and Regulations of all authorities having jurisdiction over the work to be performed hereunder and such shall apply to the contract throughout, and that they will be deemed to be included in the contract as though written out in full in the contract documents.

ALTERATIONS/AMENDMENTS TO RFP

RFP CANNOT be altered or amended after opening time. Alterations made before opening time must be initialed by respondent guaranteeing authenticity. No RFP may be withdrawn after opening time without acceptable reason in writing and only after approval by the City of Edinburg.

NO RESPONSE TO RFP

If unable to submit a RFP, respondent should return inquiry giving reasons.

LIST OF EXCEPTIONS

The respondent shall attach to his/her RFP a list of any exceptions to the specifications/ requirements.

PAYMENT

The City of Edinburg will execute payment by mail in accordance with the State of Texas Pay Law after **SERVICES** have been completed, introduced to the City, and found to meet City of Edinburg specifications/requirements. No other method of payment will be considered.

SYNONYM

Where in this solicitation package SERVICES is used, its meaning shall refer to the request for Rx Performance Importation Program as specified.

RESPONDENT'S EMPLOYEES

Neither the Respondent nor his/her employees engaged in fulfilling the terms and conditions of this Service Contract shall be considered employees of the City. The method and manner of performance of such undertakings shall be under the exclusive control of the vendor on contract. The City shall have the right of inspection of said undertakings at any time.

INDEMNIFICATION CLAUSE

The Respondent agrees to indemnify and save harmless the City, from all suits and actions of every nature and description brought against them or any of them, for or on account of the use of patented appliances, products or processes, and he shall pay all royalties and charges which are legal and equitable. Evidence of such payment or satisfaction shall be submitted upon request of the Purchasing Manager, as a necessary requirement in connection with the final estimate for payment in which such patented appliance, products or processes are used.

INTERPRETATIONS

Any questions concerning the project and/or specifications/requirements with regards to this solicitation for Proposals shall be directed to the e-procurement portal as outlined in the RFP. Such interpretations, which may affect the eventual outcome of this request for Proposals, shall be furnished in writing to all prospective Respondents via Addendum. No interpretation shall be considered binding unless provided in writing by the City of Edinburg in accordance with paragraph entitled "Addenda and Modifications".

VERBAL THREATS AND OFFICIAL CONTACT

Any threats made to any employee of the City, be it verbal or written, to discontinue the providing of item/material/services for whatever reason and/or reasons shall be considered a breach of contract and the City will immediately sever the contract with the Respondent/Consultant on contract.

Respondents shall not offer gratuities, favors or any monetary value to any official or employee of the City for purpose of influencing the selection. Any attempt by any Respondent to influence the selection process by any means, other than disclosure of Proposals and credentials through the proper channels, shall be grounds from exclusion from the selection process. Once the project is advertised, there shall be no contact with any city official or employee unless using the formal process through the Purchasing Department. Failure to comply will result in the firm being disqualified from the process.

CONFIDENTIAL INFORMATION

Any information deemed to be confidential by the respondent should be clearly noted on the pages where confidential information is contained; however, the City cannot guarantee that it will not be compelled to disclose all or part of any public record under Texas Public Information Act, since information deemed to be confidential by the respondent may not be considered confidential under Texas Law, or pursuant to a Court order.

PAST PERFORMANCE

Respondent's past performance shall be taken into consideration in the evaluation of RFP submittal.

JURISDICTION

Contract(s) executed as part of this solicitation shall be subject to and governed under the laws of the State of Texas. Any and all obligations and payments are due and performable and payable in Hidalgo County, Texas.

RIGHT TO AUDIT

The City of Edinburg reserves the right to audit the vendor's books and records relating to the performance of this contract. The City of Edinburg, at its own expense, shall have the right at all reasonable times during normal business hours and upon at least twenty-four (24) hours' advance notice, to audit, to examine, and to make copies of or extracts from the books of account and records maintained by the vendor(s) with respect to the Supply/Service and/or Purchase Contract. If such audit shall disclose overpayment by City to vendor, written notice of such overpayment shall be provided to the vendor and the amount of overpayment shall be promptly reimbursed by vendor to the City. In the event any such overpayment is not paid within ten (10) business days after receipt of such notice, the unpaid amount of such overpayment shall bear interest at the rate of one percent (1%) per month from the date of such notice until paid.

VENUE

The parties agree that venue for purposes of any and all lawsuits, cause of action, arbitration, and/or any other dispute(s) shall be in Hidalgo County, Texas.

CONSIDERATION OF LOCATION OF BIDDER'S PRINCIPAL PLACE OF BUSINESS

The City may give local vendors, whose principal place of business is located within the City of Edinburg, and whose bid is within five percent (5%) of the lowest bid price preference as allowed by Section 271.9051 of the Local Government Code.

MATHEMATICAL ERRORS

In the event that mathematical errors exist in any bid unit prices/rates will govern.

CONFIDENTIALITY OF INFORMATION AND SECURITY

Should the successful respondent become the holder of and have access to confidential information in the process of fulfilling its responsibilities in connection with an awarded contract the successful respondent agrees that it shall keep such information confidential and will comply fully with the laws and regulations of the State of Texas, ordinances and regulations of the City, and any applicable federal laws and regulations relating to confidentiality.

TERMINATION OF CONTRACT

The City of Edinburg reserves the right to terminate the contract if, in the opinion of the City of Edinburg, the successful vendor's performance is not acceptable, no funds are available, or if the City wishes, without cause, to discontinue this contract. Termination will be in written form allowing a 30-day notice.

ADDENDA AND MODIFICATIONS

Respondent shall carefully examine the RFP forms, specifications/requirements, and instructions to Respondents. Should the respondent find discrepancies in, or omissions from specifications/requirements, or other documents, or should he/she be in doubt as to their meaning, he/she should request an interpretation via the OpenGov portal:https://procurement.opengov.com/portal/cityofedinburg and obtain clarification by addendum prior to submitting any RFP. Explanations, interpretations, and supplemental instructions shall be in the form of written Addenda which shall become a part of the Contract documents. Said Addenda shall be available thru the e-procurement portal, and e-mailed, to all prospective Respondents. All Addenda issued in respect to this project shall be considered official changes to the original RFP documents. Verbal statements in response to inquiries and/or requests for explanations shall not be authoritative nor binding. It shall be the Respondent(s) responsibility to ensure that they have received all Addenda in respect to this project. **Furthermore, Respondents are advised that they must recognize, comply with, and attach a signed copy of each Addendum which shall be made part of their RFP Submittal if submitting a Hard Copy Solicitation. Electronic submittals should be acknowledged through OpenGov.** Respondent(s) signature on Addenda shall be interpreted as the respondent's "recognition and compliance to" official changes as outlined by the City of Edinburg and as such are made part of the original solicitation documents. Failure of any respondent to receive any such addendum or interpretation shall not relieve such Respondent from its terms and requirements. The City may issue a written addendum no later than five calendar days prior to the date bids must be received. Addendums are available online at https://procurement.opengov.com/portal/cityofedinburg

RFP PREPARATION COSTS

The City of Edinburg shall not be held liable for any costs incurred by any respondent for work performed in the preparation of and production of a RFP or for any work performed prior to execution of contract.

EQUAL EMPLOYMENT OPPORTUNITY

Respondent agrees that they will not discriminate in hiring, promotion, treatment, or other terms and conditions of employment based on race, sex, national origin, age, disability, or in any way violate Title VII of 1964 Civil Rights Act and amendments, except as permitted by said laws.

AUTHORIZATION TO BIND RESPONDENT TO RFP

RFPs MUST give full firm name and address of respondent, and be manually signed. Failure to do so will disqualify your RFP. Person signing bid must show title or AUTHORITY TO BIND HIS/HER FIRM IN A CONTRACT. Firm name and authorized signature must appear on each page that calls for this information. The legal status of the Respondent whether corporation, partnership, or individual, shall also be stated in the RFP. A corporation shall execute the RFP by its duly authorized officers in accordance with its corporate by-laws and shall also list the state in which it is incorporated. A partnership Respondent shall give full names and addresses of all partners. All partners shall execute the RFP. Partnership and Individual Respondent shall state in the proposal the names and addresses of all persons with a vested interest therein. The place of residence of each Respondent, or the office address in the case of a firm or company, with county and state and telephone number, shall be given after the signature.

COOPERATIVE PRICING

Bidders are advised that in addition to responding to our "local" solicitation for bids/Bids with Dealer pricing, vendors/contractors are encouraged to provide pricing on the below referenced items/products/services based on BuyBoard, TX-MAS, H-GAC and/or any other State of Texas recognized and approved cooperative which has complied with the bidding requirements for the State of Texas. If bidding other than or in addition to "dealer" pricing, kindly duplicate the bid forms for each bid being provided from a cooperative contract. Any and all applicable fees must be included. All cooperative pricing must be submitted on or before bid opening date and hour.

ETHICAL STANDARD

No City official or employee shall have interest in any contract resulting from this bid.

IF YOU HAVE ANY QUESTIONS ABOUT COMPLIANCE, PLEASE CONSULT YOUR OWN LEGAL COUNSEL. COMPLIANCE IS THE INDIVIDUAL RESPONSIBILITY OF EACH PERSON OR AGENT OF A PERSON WHO IS SUBJECT TO THE FILING REQUIREMENT. AN OFFENSE UNDER CHAPTER 176 IS A CLASS "C" MISDEMEANOR.

3.2. INSURANCE REQUIREMENTS

Staff may waive insurance requirements for contracts $0 - $4,999.99, including but not limited to contracts for food, materials, supplies, and construction. Workers' Compensation in amounts which satisfy statutory coverage shall be required for construction projects.

The following insurance requirements will be included in all City contracts of $5,000 - $14,999.99. In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim.

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker's Compensation Statutory Coverage

Comprehensive General Liability

(City named as additional insured)

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

The following insurance requirements will be included in all **City contracts of $15,000 or more**.

(1) The successful bidder will be required to carry the following insurance coverage and limits of coverage, as well as list the City as an additional insured to liability coverage as requested by the City. In addition, the successful bidder shall provide the City with evidence of coverage and furnish acceptable proof of payment of insurance premiums.

(2) The successful bidder will be required to secure and/or have insurance coverage in force with an admitted property and casualty insurance company licensed by the State of Texas to conduct business in the State of Texas.

(3) In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim.

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker's Compensation Statutory Coverage

Employer's Liability Bodily Injury by Accident:

$100,000 each accident

Bodily Injury by Disease:

$100,000 each employee/$500,000 policy limit

Comprehensive General Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Comprehensive Auto Liability

Bodily Injury $100,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

City's Protective Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Policies must name the City of Edinburg as an Additional Insured.

Certificates of insurance naming the CITY as an additional insured shall be submitted to the CITY for approval prior to any services being performed by Contractor. Each policy of insurance required hereunder shall extend for a period equivalent to, or longer than the term of the Contract, and any insurer hereunder shall be required to give at least thirty (30) days written notice to the CITY prior to the cancellation of any such coverage on the termination date, or otherwise. This Contract shall be automatically suspended upon the cancellation, or other termination, of any required policy of insurance hereunder, and such suspension shall continue until evidence that adequate replacement coverage is provided to the CITY. If replacement coverage is not provided within thirty (30) days following suspension of the Contract, the Contract shall automatically terminate.

4. Specifications

4.1. 1.1 Pharmaceutical Requirement

The pharmaceuticals requested under the RFP shall include the medications on the **Formulary Drugs List provided in the RFP**, but are not limited to, and may be subject to change based on plan utilization, cost shifts in the market, dosage changes, etc..

4.2. 1.2 Respondents shall:

a. Ensure all pharmaceuticals follow current Food and Drug Administration ("FDA") regulations.

b. Upload a complete list of countries with participating pharmacies.

c. Upload a sample of Respondent's standard monthly reporting package.

d. Upload a list of offices and facilities that would provide services under this contract.

4.3. 1.3 Awarded Respondent shall:

a. Collaborate with the awarded third-party pharmacy benefits manager. The pharmacy benefits manager will support the City's utilization of the international mail order pharmacy program by:

i. Providing monthly electronic files of Members to the Awarded Vendor.

ii. Sending weekly letters, on the City's letterhead, to Members who have used a U.S.-based pharmacy to obtain a medication that is available through Awarded Vendor, with information on how to access Awarded Vendor's services and Members' copay savings.

iii. Incorporate claims from Awarded Vendor into pharmacy benefits manager data warehouse to support clinical programs.

iv. Include claims from the Awarded Vendor in the summary financial reports monthly.

v. Accepting a monthly file from the Awarded Respondent of all medications filled for the Members.

vi. Work with the City and the City's Pharmacy Benefit Manager to develop a revolving formulary of various pharmaceuticals that provide the most competitive pricing for the Members

vii. Ensure that the proposed pharmaceutical price in U.S. dollars shall only be increased or decreased to reflect the following: global currency fluctuations; and price increases or decreases by the manufacturer and/or distributor for the cost of the pharmaceutical(s).

viii. Arrange for the supply of those pharmaceuticals to the Members with a valid prescription from their United States ("U.S.") attending physician.

ix. Provide pharmaceuticals that meet quality assurance standards. The City's preferred quality assurance standards are outlined in Minimum Quality Assurance Standards.

x. Provide a list to the City of the fulfilled pharmaceuticals, including prices, in U.S. dollars, upon request.

xi. Make available, upon request, the listed price in U.S. dollars of any handling and delivery costs incurred by the pharmacy with respect to the shipment of the pharmaceuticals to the Members.

xii. Prepare and submit, monthly, a detailed invoice for all pharmaceuticals purchased by the Members to the City.

CONFLICT OF INTEREST

CHAPTER 176 OF THE TEXAS LOCAL GOVERNMENT CODE

Effective January 1, 2006, Chapter 176 of the Texas Local Government Code requires that any vendor or person considering doing business with a local government entity disclose in the Questionnaire Form CIQ, the vendor or person's affiliation or business relationship that might cause a conflict of interest with a local government entity. By law, this questionnaire must be filed with the records administrator of the City of Edinburg not later than the 7th business day after the date the person becomes aware of facts that require the statement be filed. See Section 176.006, Local Government Code. A person commits an offense if the person violates Section 176.006, Local Government Code. An offense under this section is a Class C misdemeanor.

For more information or to obtain Questionnaire CIQ go to the Texas Ethics Commission web page athttps://www.ethics.state.tx.us/data/forms/conflict/CIQ.pdf

*Response required

*5.5.10. If awarded the 1295 form will need to be provided**

CERTIFICATE OF INTERESTED PARTIES (Form 1295)

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016. For more information go to the Texas Ethics Commission web page at https://www.ethics.state.tx.us/filinginfo/1295/

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 18, 2026
BUDGET
Agenda Item No: 14.A.

1. **Agenda Item:**
Discuss and Consider Proposed Tax Rate for the City of Edinburg for Fiscal Year Beginning October 1, 2026 through September 30, 2027 and Setting Public Hearing. [Ascencion Alonzo, Director of Finance]

2. **Description:**
Senate Bill (S.B.) 18, 79, 79th Texas Legislature, Regular Session, provides for changes in notices and hearings, The notice and hearing limit is the no-new revenue tax rate or the voter-approval tax rate, whichever is lower for the taxing unit. The taxing unit's governing body must vote to place the proposal to adopt the rate on the agenda at a future meeting as an action item. The vote must be recorded and the proposal must specify the desired rate. If the motion passes, the governing body must schedule a public hearing on the proposal. The governing body must publish a quarter-page notice notifying the public of the hearing and must hold the public hearing before adopting the tax rate.

S.B. 18 also amends Section 2606(d) Tax Code. It states that after each public hearing required by subsection (b), the governing body shall give notice of the meeting at which it will vote on the proposed tax rate. The notice of the vote must include the date and time of the public hearing.

Property tax rate was decrease by $0.04 from $0.6800 to $0.6400 for Fiscal Year 2022-2023, decreased by $0.01 from $0.6400 to $0.6300 for Fiscal Year 2023-2024 remained the same for Fiscal Year 2024-2025 and 2025-2026. The City Manager recommends the proposed tax rate to remain at $0.6300 for Fiscal Year 2026-2027. Comparing tax rates without adjusting for changes in property value, the tax rate would not change per $100 of taxable value, which is a zero percent change compared to last year's tax rate.

A record vote must be recorded on the proposed tax rate along with the governing body scheduling a public hearing on the proposal. City Manager recommends public hearing to be held at Edinburg City Hall-Council Chambers, 415 West University on September 15, 2026 at 6:00 p.m.

3. **Staff's Recommendation:**
Authorize Proposed Tax Rate of $0.6300 for the City of Edinburg for Fiscal Year Beginning Octover 1, 2026 through September 30, 2027 and Setting the Public Hearing to be Held on September 15, 2026 at 6:00 p.m.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 18, 2026
CONSENT AGENDA
Agenda Item No: 15.A.
Debt Collection Rate

1. **Agenda Item:**
Consider and Accept the Statutory Certification of the 2026 Anticipated Collection Rate and 2025 Excess Debt Collections Submitted by the Hidalgo County Tax Assessor Collector. [Ascencion Alonzo, Director of Finance]

2. **Description:**
Under Texas Tax Code § 26.04(b), the taxing unit's collector must certify the anticipated collection rate to the governing body**.** The tax assessor/collector is responsible for certifying the anticipated collection rate. The tax assessor/collector certifies the following:

1. 2026 Certified Anticipated Collection Rate
2. 2025 Excess Debt Collections

The certification of the anticipated property-tax collection rate is required primarily because the rate is used to calculate the taxing unit's voter-approval tax rate, including the debt-service portion of that calculation.

Although a taxing unit may levy property taxes to fund its budget, it cannot assume that 100% of the taxes levied will be collected during the relevant period. The anticipated collection rate provides a realistic estimate of the revenue the taxing unit can reasonably expect to receive.

The anticipated collection rate is based on estimated collections from July 1 through June 30, including current and delinquent taxes, certain rollback taxes, and applicable penalties and interest.

The collector certifies the anticipated collection rate so that the governing body calculates its allowable tax rate based on the revenue the taxing unit can reasonably expect to collect, rather than the amount it levies.

This process also supports taxpayer protection. Texas's Truth-in-Taxation system is intended to promote transparency in the property-tax rate-setting process and helps prevent taxing units from increasing tax rates beyond what is reasonably necessary to fund their obligations.

3. **Staff's Recommendation:**
Consider and Accept the Statutory Certification of the 2026 Anticipated Collection Rate and 2025 Excess Debt Collections Submitted by the Hidalgo County Tax Assessor Collector.

Re: 2025 CITY OF EDINBURG Anticipated Collection Rate
And Excess 2024 Debt Tax Collections

Dear Mr/s. ALONZO:

As you are aware, a taxing unit that levies a Debt Tax must consider anticipated collections in calculating the debt component of its Voter Approval Tax Rate. The collector must certify the above mentioned in addition to excess Debt Tax Collections for the year 2024 to the governing body.

Certification

This is to certify that the Estimated Collection Rate for the year 2025 has been projected at the 100% rate.

Also, the 2024 Estimated Collection Rate was projected at 100% and consequently no excess Debt Tax Collections are to be reported in Schedule "B", 2024 Debt Service Report.

Sincerely,

Pablo (Paul) Villarreal Jr., PCC

Encl.

Form Updated 4/19/2023

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 18, 2026
CONSENT AGENDA
Agenda Item No: 15.C.
Bid No. 2026-14, Fountain Pool Filtration Improvements

1. **Agenda Item:**
Consider Awarding Bid No. 2026-14, Fountain Pool Filtration Improvements – Rebid to South Texas Pools, the Lowest Aggregate Bidder, Meeting Specifications in the Amount of $67,000 and Authorize the City Manager to Enter Into an Agreement Related Thereto. [Javier Garza, Director of Parks & Recreation]

2. **Description:**
This Equipment Installation Contract is to replace & upgrade the Existing Fountain Pool Filtration Equipment in the Pump House and extend the longevity of its operations. This project was rebid because no bids were received on the first attempt.

On Wednesday, July 28, 2026, Bids were opened for Bid No. 2026-14, Edinburg Fountain Pool Filtration Improvements Rebid. A total of Three (3) Bids were received and opened. After review and tabulation staff recommends awarding Bid No. 2026-14, Fountain Pool Filtration Improvements Rebid to South Texas Pools to be the lowest responsible bidder meeting specifications in the amount of $67,000.00. The City of Edinburg has previously done business with South Texas Pools. The City has verified no monies are owed to the City by South Texas Pools.

Below is the list of vendors who responded to the bid:

- 8/A Builders LLC - $101,649.00
- BG Interpool Inc - $139,882.00
- South Texas Pools – $67,000.00

Funding is available in the 2025-2026 Capital Outlay, Other, Parks & Recreation Department.

3. **Staff's Recommendation:**
Approve Awarding Bid No. 2026-14, Fountain Pool Filtration Improvements Rebid to South Texas Pools, the Lowest Aggregate Bidder, Meeting Specifications and Authorize the City Manager to Enter into an Agreement.

1. Introduction

1.1. Summary

This project is located at Edinburg Fountain Pool, 1227 E McIntyre St. Edinburg Tx, 78541. With an ongoing renovation of the pool pump house, we aim to remove and replace the current pool filtration system & pumps. The goal is to update the circulation such as new piping, pumps, valves, sand filter, pool controller and chemical feeders as described in the attachments. Included in the attachments are pictures of what the current filtration that needs to be removed looks like. Additional pictures with a description of entrance and exit for both the removal and installation of old and new equipment is included. In addition are the pump house renovation building plans that provide dimensions to ensure all equipment bid fits within the housing.

1.2. Background

Due to heavy equipment being removed and installed, this is considered a construction project that will need a bond to be included in the bid packet.

BID No. Bid 2026-14

If you have any questions or require additional information contained the Bid, you may contact Lorena Fuentes, Interim Purchasing Manager, please submit your questions via OpenGov Procurement at the website listed above no later than 3:00 pm on Friday, July 17, 2026.

The City of Edinburg reserves the right to reject any or all bids and to waive informalities or technicalities and to accept the Bids deemed most advantageous to the City, and hold the bid for a period of **60 days** without taking action.

3. Instructions, Terms and Conditions

3.1. General Instructions

PURPOSE

The purpose of these solicitation documents is to provide a Bids for: Edinburg Fountain Pool Filtration Improvements Re-bid

INTENT

The services to be provided under this Bid shall be in accordance with and shall meet all specifications and/or requirements as shown in this solicitation for Bid. There is no intention to disqualify any respondent who can meet the requirements.

SUBMITTAL OF "HARD COPY" BID

If submitting a Hard Copy Bid, it must be submitted in a sealed envelope by the vendor. **Submit two (2) complete sets of the response, one (1) original marked "ORIGINAL," and one (1) Digital Copy in a flash drive**. Each Bid must be completely filled out and SUBMITTED IN ORIGINAL FORM complete with all supporting documentation. Bids submitted by facsimile (fax) will not be accepted. Submittal of an Bid in response to this solicitation constitutes an offer by the respondent. Once submitted, Bids become the property of the City of Edinburg and as such the City reserves the right to use any ideas contained in any Bid regardless of whether that respondent/firm is selected. Submission of a Bid in response to this solicitation, by any respondent, shall indicate that the respondent(s) has/have accepted the conditions contained in the Bid, unless clearly and specifically noted in the Bid submitted and confirmed in the contract between the City and the successful respondent otherwise. Bids which do not comply with these requirements may be rejected at the option of the City. Bids must be filed with the City of Edinburg before the deadline day and hour. No late Bids will be accepted. Failure to meet Bid requirements may be grounds for disqualification.

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

TIME ALLOWED FOR ACTION TAKEN

The City of Edinburg may hold Bids **60** days after deadline without taking action. Respondents are required to hold their Bids firm for same period of time.

RIGHT TO REJECT/AWARD

The City of Edinburg reserves the right to reject any or all Bids, to waive any or all formalities or technicalities, and to make such awards of contract as may be deemed to be the best and most advantageous to the City of Edinburg.

ASSIGNMENT

Respondents are advised that the City of Edinburg shall not allow the successful respondent to sell, assign, transfer, or convey any part of any contract resulting from this Bid in whole or in part, to a third party without the written approval of the City of Edinburg.

AWARD

Respondents are advised that the City of Edinburg is soliciting Bids and award shall be made to the respondent that in the opinion of the City of Edinburg is the best qualified.

The City of Edinburg reserves the right to award contract(s) based solely on the written Bids. The City also reserves the right to request oral interviews.

NUMBER OF CONTRACTS

THE CITY reserves the right to award one or no contract in response to this Bid.

STATUTORY REQUIREMENTS

It shall be the responsibility of the successful respondent to comply with all applicable State & Federal laws, Executive Orders and Municipal Ordinances, and the Rules and Regulations of all authorities having jurisdiction over the work to be performed hereunder and such shall apply to the contract throughout, and that they will be deemed to be included in the contract as though written out in full in the contract documents.

ALTERATIONS/AMENDMENTS TO BID

Bids CANNOT be altered or amended after opening time. Alterations made before opening time must be initialed by respondent guaranteeing authenticity. No Bid may be withdrawn after opening time without acceptable reason in writing and only after approval by the City of Edinburg.

NO RESPONSE TO BID

If unable to submit a Bid, respondent should return inquiry giving reasons.

LIST OF EXCEPTIONS

The respondent shall attach to his/her Bid a list of any exceptions to the specifications/ requirements.

PAYMENT

The City of Edinburg will execute payment by mail in accordance with the State of Texas Pay Law after **SERVICES** have been completed, introduced to the City, and found to meet City of Edinburg specifications/requirements. No other method of payment will be considered.

SYNONYM

Where in this solicitation package SERVICES is used, its meaning shall refer to the request for Edinburg Fountain Pool Filtration Improvements Re-bid as specified.

RESPONDENT'S EMPLOYEES

Neither the Respondent nor his/her employees engaged in fulfilling the terms and conditions of this Service Contract shall be considered employees of the City. The method and manner of performance of

such undertakings shall be under the exclusive control of the vendor on contract. The City shall have the right of inspection of said undertakings at any time.

INDEMNIFICATION CLAUSE

The Respondent agrees to indemnify and save harmless the City, from all suits and actions of every nature and description brought against them or any of them, for or on account of the use of patented appliances, products or processes, and he shall pay all royalties and charges which are legal and equitable. Evidence of such payment or satisfaction shall be submitted upon request of the Purchasing Manager, as a necessary requirement in connection with the final estimate for payment in which such patented appliance, products or processes are used.

INTERPRETATIONS

Any questions concerning the project and/or specifications/requirements with regards to this solicitation for Bids shall be directed to the e-procurement portal as outlined in the Bid. Such interpretations, which may affect the eventual outcome of this request for Bids, shall be furnished in writing to all prospective Respondents via Addendum. No interpretation shall be considered binding unless provided in writing by the City of Edinburg in accordance with paragraph entitled “Addenda and Modifications”.

VERBAL THREATS AND OFFICIAL CONTACT

Any threats made to any employee of the City, be it verbal or written, to discontinue the providing of item/material/services for whatever reason and/or reasons shall be considered a breach of contract and the City will immediately sever the contract with the Respondent/Consultant on contract.

Respondents shall not offer gratuities, favors or any monetary value to any official or employee of the City for purpose of influencing the selection. Any attempt by any Respondent to influence the selection process by any means, other than disclosure of Bids and credentials through the proper channels, shall be grounds from exclusion from the selection process. Once the project is advertised, there shall be no contact with any city official or employee unless using the formal process through the Purchasing Department. Failure to comply will result in the firm being disqualified from the process.

CONFIDENTIAL INFORMATION

Any information deemed to be confidential by the respondent should be clearly noted on the pages where confidential information is contained; however, the City cannot guarantee that it will not be compelled to disclose all or part of any public record under Texas Public Information Act, since information deemed to be confidential by the respondent may not be considered confidential under Texas Law, or pursuant to a Court order.

PAST PERFORMANCE

Respondent’s past performance shall be taken into consideration in the evaluation of Bid submittal.

JURISDICTION

Contract(s) executed as part of this solicitation shall be subject to and governed under the laws of the State of Texas. Any and all obligations and payments are due and performable and payable in Hidalgo County, Texas.

RIGHT TO AUDIT

The City of Edinburg reserves the right to audit the vendor's books and records relating to the performance of this contract. The City of Edinburg, at its own expense, shall have the right at all reasonable times during normal business hours and upon at least twenty-four (24) hours' advance notice, to audit, to examine, and to make copies of or extracts from the books of account and records maintained by the vendor(s) with respect to the Supply/Service and/or Purchase Contract. If such audit shall disclose overpayment by City to vendor, written notice of such overpayment shall be provided to the vendor and the amount of overpayment shall be promptly reimbursed by vendor to the City. In the event any such overpayment is not paid within ten (10) business days after receipt of such notice, the unpaid amount of such overpayment shall bear interest at the rate of one percent (1%) per month from the date of such notice until paid.

VENUE

The parties agree that venue for purposes of any and all lawsuits, cause of action, arbitration, and/or any other dispute(s) shall be in Hidalgo County, Texas.

CONSIDERATION OF LOCATION OF BIDDER'S PRINCIPAL PLACE OF BUSINESS

The City may give local vendors, whose principal place of business is located within the City of Edinburg, and whose bid is within five percent (5%) of the lowest bid price preference as allowed by Section 271.9051 of the Local Government Code.

MATHEMATICAL ERRORS

In the event that mathematical errors exist in any bid unit prices/rates will govern.

CONFIDENTIALITY OF INFORMATION AND SECURITY

Should the successful respondent become the holder of and have access to confidential information in the process of fulfilling its responsibilities in connection with an awarded contract the successful respondent agrees that it shall keep such information confidential and will comply fully with the laws and regulations of the State of Texas, ordinances and regulations of the City, and any applicable federal laws and regulations relating to confidentiality.

TERMINATION OF CONTRACT

The City of Edinburg reserves the right to terminate the contract if, in the opinion of the City of Edinburg, the successful vendor's performance is not acceptable, no funds are available, or if the City wishes, without cause, to discontinue this contract. Termination will be in written form allowing a 30-day notice.

ADDENDA AND MODIFICATIONS

Respondent shall carefully examine the Bid forms, specifications/requirements, and instructions to Respondents. Should the respondent find discrepancies in, or omissions from specifications/requirements, or other documents, or should he/she be in doubt as to their meaning, he/she should request an interpretation via the OpenGov portal:https://procurement.opengov.com/portal/cityofedinburg and obtain clarification by addendum prior to submitting any Bid. Explanations, interpretations, and supplemental instructions shall be in the form of written Addenda which shall become a part of the Contract documents. Said Addenda shall be available thru the e-procurement portal, and e-mailed, to all prospective Respondents. All Addenda issued in respect to this project shall be considered official changes to the original Bid documents. Verbal statements in response to inquiries and/or requests for explanations shall not be authoritative nor binding. It shall be the Respondent(s) responsibility to ensure that they have received all Addenda in respect to this project. **Furthermore, Respondents are advised that they must recognize, comply with, and attach a signed copy of each Addendum which shall be made part of their Bid Submittal if submitting a Hard Copy Solicitation. Electronic submittals should be acknowledged through OpenGov.** Respondent(s) signature on Addenda shall be interpreted as the respondent's "recognition and compliance to" official changes as outlined by the City of Edinburg and as such are made part of the original solicitation documents. Failure of any respondent to receive any such addendum or interpretation shall not relieve such Respondent from its terms and requirements. The City may issue a written addendum no later than five calendar days prior to the date bids must be received. Addendums are available online at https://procurement.opengov.com/portal/cityofedinburg

BID PREPARATION COSTS

The City of Edinburg shall not be held liable for any costs incurred by any respondent for work performed in the preparation of and production of a Bid or for any work performed prior to execution of contract.

EQUAL EMPLOYMENT OPPORTUNITY

Respondent agrees that they will not discriminate in hiring, promotion, treatment, or other terms and conditions of employment based on race, sex, national origin, age, disability, or in any way violate Title VII of 1964 Civil Rights Act and amendments, except as permitted by said laws.

AUTHORIZATION TO BIND RESPONDENT TO BID

Bids MUST give full firm name and address of respondent, and be manually signed. Failure to do so will disqualify your Bid. Person signing bid must show title or AUTHORITY TO BIND HIS/HER FIRM IN A CONTRACT. Firm name and authorized signature must appear on each page that calls for this information. The legal status of the Respondent whether corporation, partnership, or individual, shall also be stated in the Bid. A corporation shall execute the Bid by its duly authorized officers in accordance with its corporate by-laws and shall also list the state in which it is incorporated. A partnership Respondent shall give full names and addresses of all partners. All partners shall execute the Bid. Partnership and Individual Respondent shall state in the proposal the names and addresses of all persons with a vested interest therein. The place of residence of each Respondent, or the office address in the case of a firm or company, with county and state and telephone number, shall be given after the signature.

COOPERATIVE PRICING

Respondents are advised that in addition to responding to our "local" solicitation for bids/Bids with Dealer pricing, vendors/contractors are encouraged to provide pricing on the below referenced items/products/services based on BuyBoard, TX-MAS, H-GAC and/or any other State of Texas recognized and approved cooperative which has complied with the bidding requirements for the State of Texas. If bidding other than or in addition to "dealer" pricing, kindly duplicate the bid forms for each bid being provided from a cooperative contract. Any and all applicable fees must be included. All cooperative pricing must be submitted on or before bid opening date and hour.

ETHICAL STANDARD

No City official or employee shall have interest in any contract resulting from this bid.

IF YOU HAVE ANY QUESTIONS ABOUT COMPLIANCE, PLEASE CONSULT YOUR OWN LEGAL COUNSEL. COMPLIANCE IS THE INDIVIDUAL RESPONSIBILITY OF EACH PERSON OR AGENT OF A PERSON WHO IS SUBJECT TO THE FILING REQUIREMENT. AN OFFENSE UNDER CHAPTER 176 IS A CLASS "C" MISDEMEANOR.

3.2. INSURANCE REQUIREMENTS

Staff may waive insurance requirements for contracts $0 - $4,999.99, including but not limited to contracts for food, materials, supplies, and construction. Workers' Compensation in amounts which satisfy statutory coverage shall be required for construction projects.

The following insurance requirements will be included in all City contracts of $5,000 - $14,999.99. In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim.

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker's Compensation Statutory Coverage

Comprehensive General Liability

(City named as additional insured)

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

The following insurance requirements will be included in all **City contracts of $15,000 or more**.

(1) The successful bidder will be required to carry the following insurance coverage and limits of coverage, as well as list the City as an additional insured to liability coverage as requested by the City. In addition, the successful bidder shall provide the City with evidence of coverage and furnish acceptable proof of payment of insurance premiums.

(2) The successful bidder will be required to secure and/or have insurance coverage in force with an admitted property and casualty insurance company licensed by the State of Texas to conduct business in the State of Texas.

(3) In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim.

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker's Compensation Statutory Coverage

Employer's Liability Bodily Injury by Accident:

$100,000 each accident

Bodily Injury by Disease:

$100,000 each employee/$500,000 policy limit

Comprehensive General Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Comprehensive Auto Liability

Bodily Injury $100,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

City's Protective Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Policies must name the City of Edinburg as an Additional Insured.

Certificates of insurance naming the CITY as an additional insured shall be submitted to the CITY for approval prior to any services being performed by Contractor. Each policy of insurance required hereunder shall extend for a period equivalent to, or longer than the term of the Contract, and any insurer hereunder shall be required to give at least thirty (30) days written notice to the CITY prior to the cancellation of any such coverage on the termination date, or otherwise. This Contract shall be automatically suspended upon the cancellation, or other termination, of any required policy of

insurance hereunder, and such suspension shall continue until evidence that adequate replacement coverage is provided to the CITY. If replacement coverage is not provided within thirty (30) days following suspension of the Contract, the Contract shall automatically terminate.

3.3. BID BOND REQUIREMENTS – CONSTRUCTION PROJECTS ONLY

If the contract amount is over twenty-five-thousand dollars ($25,000) for construction of the project, the successful bidder shall provide a bid guarantee, give a good and sufficient bond in the full amount of the contract price for the faithful performance of such contract, executed by a surety company authorized to do business in the State of Texas, in accordance with Article 5160, Vernon's Texas Civil Statutes, and amendments thereto. A payment bond in the full amount of the contract price to assure payment shall be required by law of all persons supplying labor and material in the execution of the project provided for in the contract documents.

A bid guarantee equivalent to five percent (5%) of the bid price will be required from each bidder. The "bid guarantee" shall consist of a firm commitment, such as a bid bond, certified check or other negotiable instrument accompanying a bid as assurance that the bidder will upon acceptance of his/her bid, execute such contractual documents as may be required within the time specified.

A performance bond on the part of the contractor for one-hundred percent (100%) of the contract price will be required. A "performance bond" is one executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract.

A payment bond on the part of the contractor for one-hundred percent (100%) of the contract price will be required. A "payment bond" is one executed in connection with a contract to assure payment, as required by law, of all persons supplying labor and material in execution of the work provided for in the contract documents.

Bidders are expressly advised to review the contract documents fully and insurance requirements of the proposed contract as to their legal requirements and the causes which may lead to the disqualification of a bidder and/or rejection of a bid proposal. No bid may be withdrawn within a period of sixty (60) days after the dated fixed for opening the bids. Unless all bids are rejected, the Owner will give Notice of Award of Contract to the successful bidder as soon as possible consistent with the time for a thorough analysis of bids submitted. Bidders are expected to inspect the site of work and to inform themselves regarding all local conditions which may affect their bid.

4. Specifications

4.1. Pool Specifications for Equipment Sizing

Edinburg Fountain Pool is a 135,000 gallon body of water shaped as a bean.

The circulation pumps used are two Pentair 7.5 HP. One at a time.

Recommended filter is a Waterco Micron Commercial Horizontal Sand Filter with dimensions of 48" X 75" Right Man Way. Item # 2229075R, or Equal to.

The Recommended Pool Comm is a Hayward CAT 5000, or equal to.

Current filter is to be removed along with all attached plumbing located after the filtration pumps, leading to the water waste line.

CONFLICT OF INTEREST

CHAPTER 176 OF THE TEXAS LOCAL GOVERNMENT CODE

Effective January 1, 2006, Chapter 176 of the Texas Local Government Code requires that any vendor or person considering doing business with a local government entity disclose in the Questionnaire Form CIQ, the vendor or person's affiliation or business relationship that might cause a conflict of interest with a local government entity. By law, this questionnaire must be filed with the records administrator of the City of Edinburg not later than the 7th business day after the date the person becomes aware of facts that require the statement be filed. See Section 176.006, Local Government Code. A person commits an offense if the person violates Section 176.006, Local Government Code. An offense under this section is a Class C misdemeanor.

For more information or to obtain Questionnaire CIQ go to the Texas Ethics Commission web page athttps://www.ethics.state.tx.us/data/forms/conflict/CIQ.pdf

*5.4.9. If awarded the 1295 form will need to be provided**

CERTIFICATE OF INTERESTED PARTIES (Form 1295)

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016. THE STATE OF TEXAS §

COUNTY OF HIDALGO §

CONSTRUCTION CONTRACT §

CONTRACT FOR FORMAL BID NO. 2026-14 FOUNTAIN POOL FILTRATION IMPROVEMENTS BETWEEN CITY OF EDINBURG AND

The City of Edinburg, Hidalgo County, Texas, a municipal corporation (hereinafter called **"City"**), and Vendor, (hereinafter **"Contractor"**), entered into an agreement for the Fountain Pool Filtration Improvements.

RECITALS

WHEREAS, the City desires to engage the Contractor for certain Work in connection therewith; and,

WHEREAS, Contractor represents that is has the knowledge, ability, equipment, and personnel to properly provide Work needed by the City; and

NOW, THEREFORE, the City and Contractor do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONTRACTOR

A. City agrees to employ Contractor to provide the following Work as stated in the agreement and Formal Bid No. 2026-14 Notice to Bidders and Bid Form attached as Exhibit "A". Upon receipt of Work to the City's satisfaction, the City agrees to pay Contractor as stated in this Agreement.

SECTION II
WORK OF CONTRACTOR

A. The Contractor agrees to perform the Work in connection therewith, under the terms of this Agreement for the Fountain Pool Filtration Improvements at its own proper cost and expense to furnish all labor, insurance and other accessories and Work necessary to complete the said task in accordance with the conditions and prices stated in Specifications and Formal Bid pertaining to Bid No. 2026 – 14 Fountain Pool Filtration Improvements**.**

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implications to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITES OF CONTRACTOR

A. Contractor shall perform the Work described in **Exhibits "A".**

B. Contractor shall perform its Work with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Work furnished under this Agreement. Contractor shall comply with all applicable federal, state, and local laws, ordinances, codes and regulations in performing the Work. If Contractor fails to meet applicable professional standards, Contractor shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Contractor shall be responsible for the professional quality, technical accuracy, timely completion, and coordination of Work furnished by Contractor under this Agreement. Contractor shall keep the City informed of the Work performed under this Agreement. In connection with the performance of the Work by Contractor, Contractor agrees to promptly and fully disclose to City any information regarding the Work as City may request.

D. Contractor will develop and maintain a detailed schedule for completion of the Work.

E. Contractor will submit monthly progress data for the reporting period. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City.

G. City's review or approval of reports and other Work furnished hereunder shall not in any way relieved Contractor of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Work shall be construed as a waiver of any rights under this Agreement of any cause of action arising out of the performance of this Agreement.

H. Contractor shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Contractor's negligent performance of any of the Work furnished under this Agreement.

I. Contractor's obligations under this clause are in addition to the Contractor's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Contractor for Contractor's errors or omissions.

SECTION IV
PAYMENT AND FEES

City agrees to pay Contractor for Work herein contracted for as follows:

A. Contractor shall provide an invoice in accordance with City regulations. Invoice shall be submitted to City upon completion and inspection of each project and shall include unit price amounts set forth in the Bid form(s). The total compensation to the Contractor shall not

exceed $. Payment terms shall be net thirty (30) days from receipt of invoice. Invoice shall be completed and processed in accordance with City regulations.

B. Except as specifically authorized by City in writing, Contractor shall not bill City for duplicate Work performed by more than one person. Contractor and City acknowledge and agree that compensation paid by City to Contractor under this Agreement is based upon Contractor's estimated costs of providing the Work required hereunder, including salaries and benefits of employees and subcontractors of Contractor. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and /or annuities to which Contractor and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensations required under this Agreement.

C. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Contractor's conduct in the performance or furnishing of Work, or City has incurred costs, losses, or damages resulting from Contractor's conduct in the performance or furnishing of Work, including property damage, and non-compliance with Laws and Regulations;

b. Contractor has failed to take reasonable and customary measures to avoid damage, delay, and interference with Work and related work;

c. Contractor has failed to provide and maintain required insurances;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or cost related to evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Work is defective, requiring correction or replacement;

g. City has been required to correct defective Work or has accepted defective Work;

h. Liens have been filed in connection with the Work; or

i. Other items entitle City to a set-off against the payment amount.

D. If City imposes any set-off against payment, City will give Contractor immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Contractor any amount remaining after deduction of the amount so withheld. City shall promptly pay Contractor the amount so withheld, or any adjustment thereto agreed to by City and Contractor, if Contractor remedies the reasons for such action. The reduction imposed will be binding on Contractor unless it duly submits written notice contesting the reduction with 30 day of receiving City's written notice.

E. All fees payable to Contractor under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Contractor's employees' taxes. Contractor hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

F. Contractor and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

G. The City may, at any time, request Contractor to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Contractor shall, within fourteen (14) days from the date it receives the City's request, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The governing body of the City must approve any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Contractor from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Contractor following termination or expiration of this Agreement as defined below, the Contractor shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION V
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Work to be performed under it, shall commence within ten (10) days after the Notice to Proceed, as set forth in this contract and as specified by the City. Work will continue until the Project is declared complete in a written instrument signed by the City Manager. The city shall have the right, in its sole discretion, to extend the term of this Agreement for an additional period of time. If approved by City, City shall provide Contractor with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Contractor. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Work rendered by Contractor breach

or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Contractor except for charges for Work performed by Contractor and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either of both parties hereunder shall so survive the termination, cancellation or completion of performance of this Agreement.

D. Upon termination or completion of Contractor's Work hereunder or as such other time as may be requested by City, Contractor shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Contractor or others, in Contractor's possession and related to the Work.

E. The City reserves the right to suspend work on the Work, with or without cause, in whole or in part, upon giving notice to Contractor. Contractor shall resume the Work so suspended when directed to so by the City. The City shall have no lability to Contractor except for charges for work performed by Contractor and accepted by the City prior to receipt of notice of suspension of Work. If only a portion of the Work are suspended, Contractor shall be compensated only for Work of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Work under this Section, the City may take over the work and may obtain the Work of another entity to complete the work under this Agreement.

SECTION VI
TIME OF COMPLETION

Time of completion is **60** days. City and the Contractor recognize that time is of the essence of this agreement and that the City may suffer financial loss if the Work is not completed within the time specified herein.

SECTION VII
SCHEDULE REQUIREMENTS

Whenever, in the sole discretion of the City, the Work falls behind schedule, the Contractor shall, to the extent necessary to meet said schedule, increase its labor force and/or provide overtime, Saturday, and Sunday and/or holiday work, and shall have each Subcontractor do likewise, all at no additional cost to or compensation from City. Further, City shall have the right to offset against any amounts then or thereafter due to the Contractor, or to be reimbursed by the Contractor for, any additional costs City may incur as a direct result of said increase in labor force or overtime, Saturday, Sunday, and/or holiday work.

SECTION VIII
WRITTEN NOTICE OF ISSUE

In the event that any issue arises relating to any of the provisions contained in this Agreement, including, but not limited to potential delays, change orders, time extensions, weather delays, etc., Contractor agrees to notify the City, in writing, immediately, relating to such issue and provide a proposed resolution. Failure to give such notice shall constitute a waiver of any other remedies available to Contractor hereunder.

SECTION IX
NO DAMAGE FOR DELAY

In the event of any delay, not the fault of the Contractor, the Contractor shall be entitled to an extension of time for completion only, and shall not be entitled to any additional payment on account of such delay. Without limiting the foregoing, the Contractor shall not be entitled to payment or compensation of any kind from the City for direct, indirect or impact damages, and/or consequential damages, including but not limited to costs of acceleration arising because of hindrance or from any cause or whatsoever, whether such hindrances or delays be reasonable or unreasonable, foreseeable or unforeseeable, or avoidable or unavoidable.

SECTION X
UNREASONABLE SITE INSPECTION REQUIREMENTS

The Contractor acknowledges that it has taken steps necessary to ascertain the nature and location of the Work and that it has investigated and satisfied itself as to the general and local conditions which can affect the Work and its costs. The Contractor also acknowledges that it has satisfied itself as to the character, quality, and quantity of surface and subsurface materials or obstacles to be encountered or difficulties or access insofar as this information is ascertainable from an inspection of the site, and available documents, including all information from exploratory work done by the City and its design consultants as well as from the Drawings and Specifications made a part of this Contract.

SECTION XI
DUTY TO COORDINATE AMONG SEPARATE PRIME CONTRACTORS

The City reserves the right to engage separate contractors to perform aspects of the Project other than the Work under this Agreement. In such case, contractor shall coordinate sequence and schedule its work together and in cooperation with such other contractors. In the event of any difficulties caused by any such other separate contractor, this Contractor shall look solely for relief to such other contractors and shall not make claim against City.

SECTION XII
CONTRACT DOCUMENTS

The Contract Documents which comprise the entire agreement between City and Contractor concerning the Work consist of this Agreement and the following attachments to this Agreement:

- Invitation to Formal Bid Form
- Instructions to Bidders

• Formal Bid Forms including the Quote, Quote Schedule(s), Information Required of Bidder, and all required certificates and affidavits

There are no Contract Documents other than those listed in this section. The Contract Documents may only be amended by Change Order pursuant to City Regulations and/or laws of this state or as allowed by this Agreement.

SECTION XIII
ASSIGNMENT

No assignment by a party hereto of any rights under or interests in the Contract Documents will be binding on another party hereto without the written consent of the party sought to be bound; and specifically but without limitation monies that may become due and monies that are due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under the Contract Documents.

SECTION XIV
MINIMUM INSURANCE REQUIREMENTS

Contractor shall be adequately insured and carry liability, workers compensation, automobile insurance an professionals liability for injury to its employees and others incurring loss or injury as a result of the acts of Contractor or its employees. In accordance with city ordinances, Contractor shall be required to hold the following minimum insurance coverage throughout the duration of this Agreement:

A. Workers Compensation-
In accordance with the State statute

B. Comprehensive General Liability
1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate

-or- $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

-or- $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

-or- $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit "B" and the City shall be listed as an additional insured.

G. Contractor shall not commence work under this Agreement until all insurance requirements have been obtained and proof of such insurance shall have been provided to the City, nor shall Contractor allow any Sub-Contractor to commence work until all insurance as noted above has been so obtained and provided to the City. Approval of the insurance by City shall not relieve or decrease the liability of the Contractor.

H. If at any time and for any reason contractor fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to contractor, City may, but shall have no obligation to , procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Contractor shall, with ten (10) days following City's demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Contractor.

I. With respect to each and every one of the insurance policies required to be obtained, kept or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and least fifteen (15) days before this expiration of any policy required hereunder previously obtained, Contractor shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

J. Contractor hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums, payable under each insurance policy required to be obtained, kept , and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the

extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept and maintained under this Lease to be void, voidable, unenforceable, suspended, or impaired in whole or in part of which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstance of which it is aware which, if not disclosed to its insurers or re-insures, is likely to affect adversely the nature or extend of the coverage to be provided under any insurance policy required hereunder.

SECTION XV
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arrases under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a “Dispute”), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute with seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with the section below.

SECTION XVI
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the City shall be entitled to its attorneys’ fees, cost, and expenses.

SECTION XVII
INDEMNIFICATON

A. To the maximum extent allowed by law, Contractor agrees to and shall indemnify, hold harmless and defend City, its officers, agents, and employees from any and all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees arising out of or directly connected with the negligent or willful conduct of Contractor, its agents, officers and employees.

B. Contractor agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other Work provided by Contractor regarding this agreement.

SECTION XVIII
LIMITATION OF LIABILITY

A. Contractor agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Contractor's total fees paid by the City to Contractor for the Work. Contractor agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profit, or loss of data, arising in connection with this Agreement, Contractor's performance of Work, or of any other obligations relating to his Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XIX
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this agreement. This agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XX
NO PENDING LITIGATION

A. Contractor represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, be foe any court, arbitrator, governmental or other board or official, pending to the best knowledge of Contractor threated against or affecting the Contractor or any subsidiaries of the Contractor, questioning the validity or any action taken or to be taken by the Contractor in connection with the execution, delivery, and performance by the Contractor of this Agreement to which the Contractor may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Contractor hereof or thereof, where in an

unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Contractor to perform, its obligations under this Agreement to which the Contractor may be party or (ii) would have an adverse effect on the consolidated financial conditions or results of operations of the Contractor or on the ability of the Contractor to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XXI
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated

SECTION XXII
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn: City Attorney

(b) Notices to Contractor:

Attn: Owner

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, there (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XXIII

NON-APPROPRIATIONS

A. Notwithstanding anything in the contract documents to the contrary, any and all payments which the City is required to make under this contract shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the contract by providing (10) ten days written notice to the other party.

SECTION XXIV
SUCCESSORS AND ASSIGNS

City and Contractor each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Contractor shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XXV
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits, other documents composing the Contract Documents, or any current or future Task Orders and/or Change Orders, the terms of this Agreement shall be controlling.

City and Contractor each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Contractor shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XXVI
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instance (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Agreement, shall operate as a waive, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future excise thereof or insistence thereupon or the exercise of any other right, power, remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Work with knowledge of a breach by Contractor of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance

of Work or payment to Contractor shall be deemed to be other than on account of the earliest installment of the amount due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept Work or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

EXECUTED by the parties in triplicate originals on this ____ day of _____, 2026.

TEXAS WAIVER OF OUR RIGHT TO RECOVER FROM OTHERS ENDORSEMENT

This endorsement applies only to the insurance provided by the policy because Texas is shown in item 3.A. of the Information Page.

We have the right to recover our payments from anyone liable for an injury covered by this policy. We will not enforce our right against the person or organization named in the Schedule, but this waiver applies only with respect to bodily injury arising out of the operations described in the schedule where you are required by a written contract to obtain this waiver from us.

This endorsement shall not operate directly or indirectly to benefit anyone not named in the Schedule.

The premium for this endorsement is shown in the Schedule.

Schedule

1. ( ) Specific Waiver
   Name of person or organization
   (X) Blanket Waiver
   Any person or organization for whom the Named Insured has agreed by written contract to furnish this waiver.

2. Operations: ALL TEXAS OPERATIONS
3. Premium:
   The premium charge for this endorsement shall be **2.00** percent of the premium developed on payroll in connection with work performed for the above person(s) or organization(s) arising out of the operations described.
4. Advance Premium: Included, see Information Page

This endorsement changes the policy to which it is attached effective on the inception date of the policy unless a different date is indicated below.
(The following "attaching clause" need be completed only when this endorsement is issued subsequent to preparation of the policy.)
This endorsement, effective on 5/18/26 **at 12:01 a.m.** standard time, forms a part of:

Policy no. 0001157124 of Texas Mutual Insurance Company effective on 5/18/26

Issued to: CARLYON & NORMAN ENTERPRISES INC

HB 89

The 85th Texas Legislature approved new legislation, effective Sept. 1, 2017, which amends Texas Local Government Code Section 1. Subtitle F, Title 10, Government Code by adding Chapter 2270 which states that a governmental entity may not enter into a contract with a company for goods or services unless the contract contains a written verification from the company that it:

1) does not boycott Israel; and

2) will not boycott Israel during the term of the contract

SB 13 ENERGY COMPANY BOYCOTTS

The 87th Texas Legislature approved new legislation, effective Sept. 1, 2021, which amends Texas Local Government Code 2274.001. Subtitle F, Title 10, Chapter 809 which states that a governmental entity may not enter into a contract with a company for goods or services unless the contract contains a written verification from the company that it:

1) does not boycott energy companies and will not boycott energy companies during the term of the Contract. If Respondent does not make that verification, Respondent must so indicate in its Response and state why the certification is not required, or

2) the verification required by Section 2274.002 of the Texas Government Code does not apply to the contract. If circumstances relevant to this provision change during the course of the contract, Respondent shall promptly notify Agency.

PLEASE FILL OUT AND SIGN THE CONFLICT OF INTEREST FORM AND UPLOAD HERE*
CONFLICT OF INTEREST

CHAPTER 176 OF THE TEXAS LOCAL GOVERNMENT CODE

Effective January 1, 2006, Chapter 176 of the Texas Local Government Code requires that any vendor or person considering doing business with a local government entity disclose in the Questionnaire Form CIQ, the vendor or person's affiliation or business relationship that might cause a conflict of interest with a local government entity. By law, this questionnaire must be filed with the records administrator of the City of Edinburg not later than the 7th business day after the date the person becomes aware of facts that require the statement be filed. See Section 176.006, Local Government Code. A person commits an offense if the person violates Section 176.006, Local Government Code. An offense under this section is a Class C misdemeanor.

For more information or to obtain Questionnaire CIQ go to the Texas Ethics Commission web page athttps://www.ethics.state.tx.us/data/forms/conflict/CIQ.pdf

Conflict_of_Interest_Questionnaire.pdf

IF AWARDED THE 1295 FORM WILL NEED TO BE PROVIDED*
CERTIFICATE OF INTERESTED PARTIES (Form 1295)

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at

least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016. For more information go to the Texas Ethics Commission web page at https://www.ethics.state.tx.us/filinginfo/1295/

PLEASE FILL OUT AND SIGN THE CONFLICT OF INTEREST FORM AND UPLOAD HERE*
CONFLICT OF INTEREST

CHAPTER 176 OF THE TEXAS LOCAL GOVERNMENT CODE

Effective January 1, 2006, Chapter 176 of the Texas Local Government Code requires that any vendor or person considering doing business with a local government entity disclose in the Questionnaire Form CIQ, the vendor or person's affiliation or business relationship that might cause a conflict of interest with a local government entity. By law, this questionnaire must be filed with the records administrator of the City of Edinburg not later than the 7th business day after the date the person becomes aware of facts that require the statement be filed. See Section 176.006, Local Government Code. A person commits an offense if the person violates Section 176.006, Local Government Code. An offense under this section is a Class C misdemeanor.

For more information or to obtain Questionnaire CIQ go to the Texas Ethics Commission web page atthttps://www.ethics.state.tx.us/data/forms/conflict/CIQ.pdf

COI_Signed.pdf

IF AWARDED THE 1295 FORM WILL NEED TO BE PROVIDED*
CERTIFICATE OF INTERESTED PARTIES (Form 1295)

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract

to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016. For more information go to the Texas Ethics Commission web page at https://www.ethics.state.tx.us/filinginfo/1295/

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____

_____

_____

Date: 1-28-2026

CONFLICT OF INTEREST QUESTIONNAIRE

For vendor doing business with local governmental entity

FORM CIQ

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

None

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

None

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☑ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☑ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

None

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

Bid Bond

CONTRACTOR:
(Name, legal status and address)
South Texas Pools
28897 Orange Grove Rd,
La Feria, TX 78559

SURETY:
(Name, legal status and principal place of business)
Lexington National Insurance Corporation
11426 York Road, 2nd Floor
Cockeysville, MD 21030

OWNER:
(Name, legal status and address)
City of Edinburg,
Edinburg, TX

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

Any singular reference to Contractor, Surety, Owner or other party shall be considered plural where applicable.

BOND AMOUNT: Five Percent of Greatest Amount Bid (5% GAB)

PROJECT:
(Name, location or address, and Project number, if any)
Install new Swimming pool Filters and Pumps, Bid 2026-14 Fountain Pool Filtration Re-Bid (#4705), Edinburg, TX

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

IMPORTANT NOTICE – THIS POWER OF ATTORNEY IS VOID IF "LNIC Original" WATERMARK IS NOT PRESENT

POWER OF ATTORNEY

Lexington National Insurance Corporation

11426 York Road, 2nd Floor, Cockeysville, Maryland 21030

Lexington National Insurance Corporation, a corporation duly organized under the laws of the State of Florida and having its principal administrative office in Baltimore County, Maryland, does hereby make, constitute and appoint:

Gregory Klement

as its true and lawful attorney-in-fact, each in their separate capacity, with full power and authority to execute, acknowledge, seal and deliver on its behalf as surety any bond or undertaking of $6,000,000 or less. This Power of Attorney is void if used for any bond over that amount.

This Power of Attorney is granted under and by authority of the following resolutions adopted by the Board of Directors of the Company on June 5, 2025:

Be it Resolved, that the Chief Executive Officer, President or any Vice-President shall be and is hereby vested with full power and authority to appoint suitable persons as Attorney-in-Fact to represent and act for and on behalf of the Company subject to the following provisions:

Attorney-in-Fact may be given full power and authority for and in the name of and on the behalf of the Company, to execute, acknowledge and deliver any and all bonds, policies, contracts, Consents of Surety, undertakings, indemnity and other conditional or obligatory undertakings, including any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts, and any all notices and documents cancelling or terminating the Company's liability thereunder and also such instruments and documents which the business of the Company may require, and such instruments and documents so executed by such Attorney-in-Fact shall be binding upon the Company as if signed by the Chief Executive Officer and sealed by the Corporate Secretary.

RESOLVED further, that the signature and attestations of the Chief Executive Officer, President or any Vice-President of the Company may be affixed to any such Power of Attorney or to any certificate relating to the Power of Attorney by electronic means or by facsimile, and the seal of the Company may be embossed, stamped, affixed electronically or by facsimile to any such Power of Attorney. Any such power so executed and sealed shall be valid and binding on the Company.

IN WITNESS WHEREOF, the Company have caused this instrument to be signed and their corporate seal to be hereto affixed.

LEXINGTON NATIONAL INSURANCE CORP. INCORPORATED 1989 FLORIDA

Ronald A. Frank, Chief Executive Officer

State of Maryland
County of Harford County, SS:

Before me, a notary public, personally appeared, Ronald A. Frank, Chief Executive Officer of Lexington National Insurance Corporation, who proved to me on the basis of satisfactory evidence to be the person whose name is subscribed to the within instrument and acknowledged to me that he executed the same in his capacity, and that by his signature on the instrument the person, or the entity upon behalf of which the person acted, executed the instrument.

I certify under the PENALTY of PERJURY under the laws of the State of Maryland that the foregoing paragraph is true and correct.

WITNESS my hand and official seal.

CERTIFICATE OF BIDDER'S EXPERIENCE & QUALIFICATIONS

The undersigned bidder certifies that he is, at the time of bidding, and shall be, throughout the period of the contract, licensed by the State of Texas to do the type of work required under terms of the contract documents. Bidder further certifies that he is skilled and regularly engaged in the general class and type of work called for in the contract documents.

The bidder represents that he is competent, knowledgeable and has special skills on the nature, extent and inherent conditions of the work to be performed. Bidder further acknowledges that there are certain peculiar and inherent conditions existent in the construction of the particular facilities which may create, during the construction program, unusual or peculiar unsafe conditions hazardous to persons and property. Bidder expressly acknowledges that he is aware of such peculiar risks and that he has the skill and experience to foresee and to adopt protective measures to adequately and safely perform the construction work with respect to such hazards.

EQUIPMENT & MATERIAL SUPPLIERS LIST

PURPOSE: To assist the Owner in determining the ability of each Bidder to properly fulfill the requirements of this proposed contract, the Bidder shall complete the following items. All questions must be answered and the data given must be clear and comprehensive. If necessary, questions may be answered on separate attached sheets as specified by 00420 Statement of Bidder's Qualifications. If, in the course of evaluating the bids, the Owner discovers that answers to these questions are false or misleading then the Owner reserves the right to reject the bid based on non-responsiveness. **This statement must be notarized.**

The undersigned hereby authorizes and requests any person, firm, or corporation to furnish any information requested by the Owner in verification of the recitals comprising this Statement of Bidder's Qualifications.

A. EQUIPMENT AVAILABLE FOR THIS CONTRACT: The Bidder shall provide below a list of equipment available for use on this contract:

CITY OF EDINBURG NON-BRIBERY MODEL FORM

[*Bidder's letterhead*]
South Texas Pools

[*Date*] 7-28-2026

[*Name and address*] 28897 Orange Grove Ct.

Dear [*Name of Owner*] : Royce Norman

The undersigned party certifies that [*Name of bidding company*] South Texas Pools complies with the following criteria:

1. They have not engaged and will not engage in bribery of officials related to potential or active City of Edinburg projects.

2. Respondents shall not offer gratuities, favors or any monetary value to any official or employee of the City for purpose of influencing the selection. Any attempt by any Respondent to influence the selection process by any means, other than disclosure of qualifications and credentials through the proper channels, shall be grounds from exclusion from the selection process. Once the project is advertised, there shall be no contact with any city official or employee unless using the formal process through the Purchasing Department. Failure to comply will result in the firm being disqualified from the process.

3. They have corporate policies that clearly prohibit the use of any bribery in a corporate activity.

4. They have neither been convicted of (nor found by a civil judgment to have committed) bribery of domestic officials, fraud, embezzlement, theft, forgery, destruction of records, making false statements to government officials, receiving stolen property, or any other offense indicating a lack of business integrity or business honesty, within five years of the date of this certification.

PROJECT:
(Name, location or address, and Project number, if any)
Install new Swimming pool Filters and Pumps, Bid 2026-14 Fountain Pool Filtration Re-Bid (#4705), Edinburg, TX

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

POWER OF ATTORNEY

Lexington National Insurance Corporation

11426 York Road, 2nd Floor, Cockeysville, Maryland 21030

Lexington National Insurance Corporation, a corporation duly organized under the laws of the State of Florida and having its principal administrative office in Baltimore County, Maryland, does hereby make, constitute and appoint:

Gregory Klement

as its true and lawful attorney-in-fact, each in their separate capacity, with full power and authority to execute, acknowledge, seal and deliver on its behalf as surety any bond or undertaking of $6,000,000 or less. This Power of Attorney is void if used for any bond over that amount.

This Power of Attorney is granted under and by authority of the following resolutions adopted by the Board of Directors of the Company on June 5, 2025:

Be it Resolved, that the Chief Executive Officer, President or any Vice-President shall be and is hereby vested with full power and authority to appoint suitable persons as Attorney-in-Fact to represent and act for and on behalf of the Company subject to the following provisions:

Attorney-in-Fact may be given full power and authority for and in the name of and on the behalf of the Company, to execute, acknowledge and deliver any and all bonds, policies, contracts, Consents of Surety, undertakings, indemnity and other conditional or obligatory undertakings, including any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts, and any all notices and documents cancelling or terminating the Company's liability thereunder and also such instruments and documents which the business of the Company may require, and such instruments and documents so executed by such Attorney-in-Fact shall be binding upon the Company as if signed by the Chief Executive Officer and sealed by the Corporate Secretary.

RESOLVED further, that the signature and attestations of the Chief Executive Officer, President or any Vice-President of the Company may be affixed to any such Power of Attorney or to any certificate relating to the Power of Attorney by electronic means or by facsimile, and the seal of the Company may be embossed, stamped, affixed electronically or by facsimile to any such Power of Attorney. Any such power so executed and sealed shall be valid and binding on the Company.

IN WITNESS WHEREOF, the Company have caused this instrument to be signed and their corporate seal to be hereto affixed.

LEXINGTON NATIONAL INSURANCE CORP. INCORPORATED 1989 FLORIDA

Ronald A. Frank, Chief Executive Officer

State of Maryland
County of Harford County, SS:

Before me, a notary public, personally appeared, Ronald A. Frank, Chief Executive Officer of Lexington National Insurance Corporation, who proved to me on the basis of satisfactory evidence to be the person whose name is subscribed to the within instrument and acknowledged to me that he executed the same in his capacity, and that by his signature on the instrument the person, or the entity upon behalf of which the person acted, executed the instrument.

I certify under the PENALTY of PERJURY under the laws of the State of Maryland that the foregoing paragraph is true and correct.

WITNESS my hand and official seal.

CERTIFICATION REGARDING DEPARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS

The prospective participant certifies to the best of its knowledge and belief that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal, State, or local department or agency;

(b) Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction: violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a government entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (b) of this certification; and

(d) Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

I understand that a false statement on this certification may be grounds for rejection of this proposal or termination of the award. In addition, under 18 USC Section 1001, a false statement may result in a fine of up to $10,000 or imprisonment for up to 5 years, or both.

WORKERS' COMPENSATION AND EMPLOYERS LIABILITY POLICY

WC 42 03 04 B
Insured copy

TEXAS WAIVER OF OUR RIGHT TO RECOVER FROM OTHERS ENDORSEMENT

This endorsement applies only to the insurance provided by the policy because Texas is shown in item 3.A. of the Information Page.

We have the right to recover our payments from anyone liable for an injury covered by this policy. We will not enforce our right against the person or organization named in the Schedule, but this waiver applies only with respect to bodily injury arising out of the operations described in the schedule where you are required by a written contract to obtain this waiver from us.

This endorsement shall not operate directly or indirectly to benefit anyone not named in the Schedule.

The premium for this endorsement is shown in the Schedule.

Schedule

1. ( ) Specific Waiver
   Name of person or organization
   (X) Blanket Waiver
   Any person or organization for whom the Named Insured has agreed by written contract to furnish this waiver.

2. Operations: ALL TEXAS OPERATIONS
3. Premium:
   The premium charge for this endorsement shall be **2.00** percent of the premium developed on payroll in connection with work performed for the above person(s) or organization(s) arising out of the operations described.
4. Advance Premium: Included, see Information Page

This endorsement changes the policy to which it is attached effective on the inception date of the policy unless a different date is indicated below.
(The following "attaching clause" need be completed only when this endorsement is issued subsequent to preparation of the policy.)
This endorsement, effective on 5/18/26 **at 12:01 a.m.** standard time, forms a part of:

Policy no. 0001157124 of Texas Mutual Insurance Company effective on 5/18/26

Issued to: CARLYON & NORMAN ENTERPRISES INC

DBA: SOUTH TEXAS POOL SUPPLY

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

SENATE BILL 19 VERIFICATION

I, Ryan Norman, the undersigned representative of South Texas Pools, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) "Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.

5) "Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.

6) "Firearm entity" means:
   a) firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and
   b) a sport shooting range as defined by Section 250.001, Local Government Code.

7) "Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:

   a) is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;
   b) has two or more firearm entities as members; and
   c) is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

None

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

None

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☑ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☑ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

None

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

Randy Miranda, Construction Superintendent

Construction Superintendent, Head of construction and field operations. With 40+ years experience and work in various swimming pool construction markets in California and Florida over the years, has been with South Texas Pools for the Pass 20 years and a key asset in managing the day-to-day construction responsibility needs. Over sees crews in the field and manages schedules and delivery and ordering of materials and all work-flow needs. Runs all of the residential construction project and some commercial projects as well.

Armando Flores, Construction Superintendent

Construction Superintendent, Handles workflow, scheduling, and permits. Large Project Construction Manager with 20 years experience. Has been with south Texas Pools for the past 5 years. Working as a tradesman and Field Construction Forman. Understands Large Commercial Construction from build large residential specialized projects to large scale Commercial work like School Project, Aquatic Centers, and Water Park project. Handles all of the Larger Projects and managing construction needs for these type of jobs and has a good attitude and the ability to get the job done.

Beto Bocanegra, Construction Superintendent

Construction Superintendent, Handles workflow, with different trads organizes field work and has been a great asset for the company for over 25 years. Well respect in the pool industry and with many years of hands-on experience and now as a manager is able to understand the work process and has a good eye for quality and attention to detail and communicating to the workers and understanding what it takes to get projects started and completed.

Terry Garcia, Secretary / Accounting Bookkeeper

Terry (a.k.a Super Secretary) has been a great asset. With 30+ years as a secretary and bookkeeper for many business over the years we for fortunate to hire her 1 year ago, after my first secretary for 25 years had retired. Terry has been able to learn quick and understand the Accounting and Bookkeeping side of the swimming pool business and the fast past of the company. She helps in managing the maintenance / pool service side of the business and also the construction side of the business. Very well round and helps us keep up with Payroll, Employees time sheets, accounts Receivables and accounts Payables.

Jaz Aceves, Design Lead / Sales and Project Coordinator

Swimming Pool and Hardscape and Landscape Designer. Designs all of the Residential and some commercial swimming pool projects. Deals with clients on design and backyard swimming pool project goals. Designs all projects with CAD software that give a #D and Plan view of the project and backyard designs. Able to prepare cost and quotes for these projects and handles task of pulling permits, submittals, ordering materials, and producing drawings for the clients and field construction managers. Helps manage new sale opportunities and current and on-going projects that are under construction. With this being his first job out of collage with a CAD Design Degree, he as over the past 5 years experience and as matured into a well round person able to fill the role as a CAD Designer / Project Coordinator for South Texas Pools.

Albert Aguirre, Equipment Operator, Delivery Driver, and Field Coordinator

With 35+ years as a construction equipment operator and truck diver, Albert has been asset with us for 8 years. He helps transport our equipment like excavators and bobcat skid steers and other equipment to the different projects during construction phases. He also runs our dump trucks and soil removal from each job. Also a skilled equipment operator in all equipment from Large Excavators, Backhoes, and Skid-steers. Performs the task of site work and grading out sites as needed. Also coordinates with trades and construction managers to deliver bulk materials to the jobsites, like Plumbing, Rebar, and travertine stone flooring, and other bulk soils / sand as needed. It's a very busy part of the job, delivery and running equipment, delivery of materials, over a covered radius of 80 miles. You can usually find him pulling a trailer with equipment and / or supplies on it for the trades in the field and helping them get what they need to perform the task.

Aldo Aguirre, Swimming Pool Maintenance Coordinator tech

Aldo not related to Albert has been a pool cleaning tech for 6 years and now helps manage the pool maintenance and service part of the business. Helps over see regular customer pool cleanings and repairs as needed. Helps manage 5 pool cleaning techs and 2 service and repair techs. Also helps with new pool completed project and helps clean and service new pools upon completion. Helps visit with customers and helps with new pool education for new customers ,we call it Pool School.

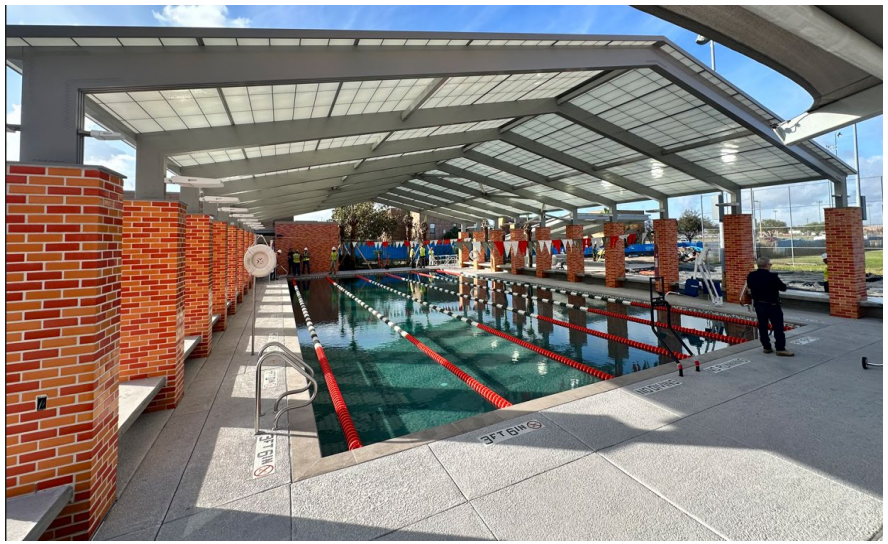
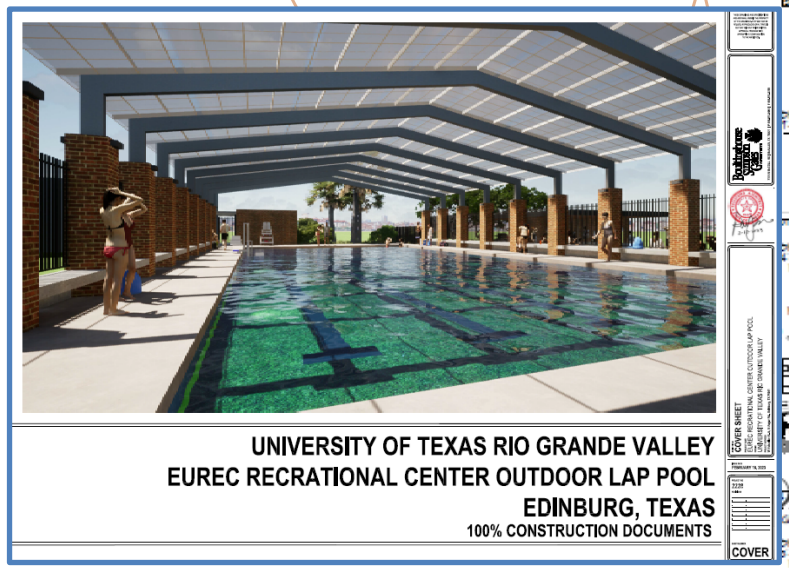
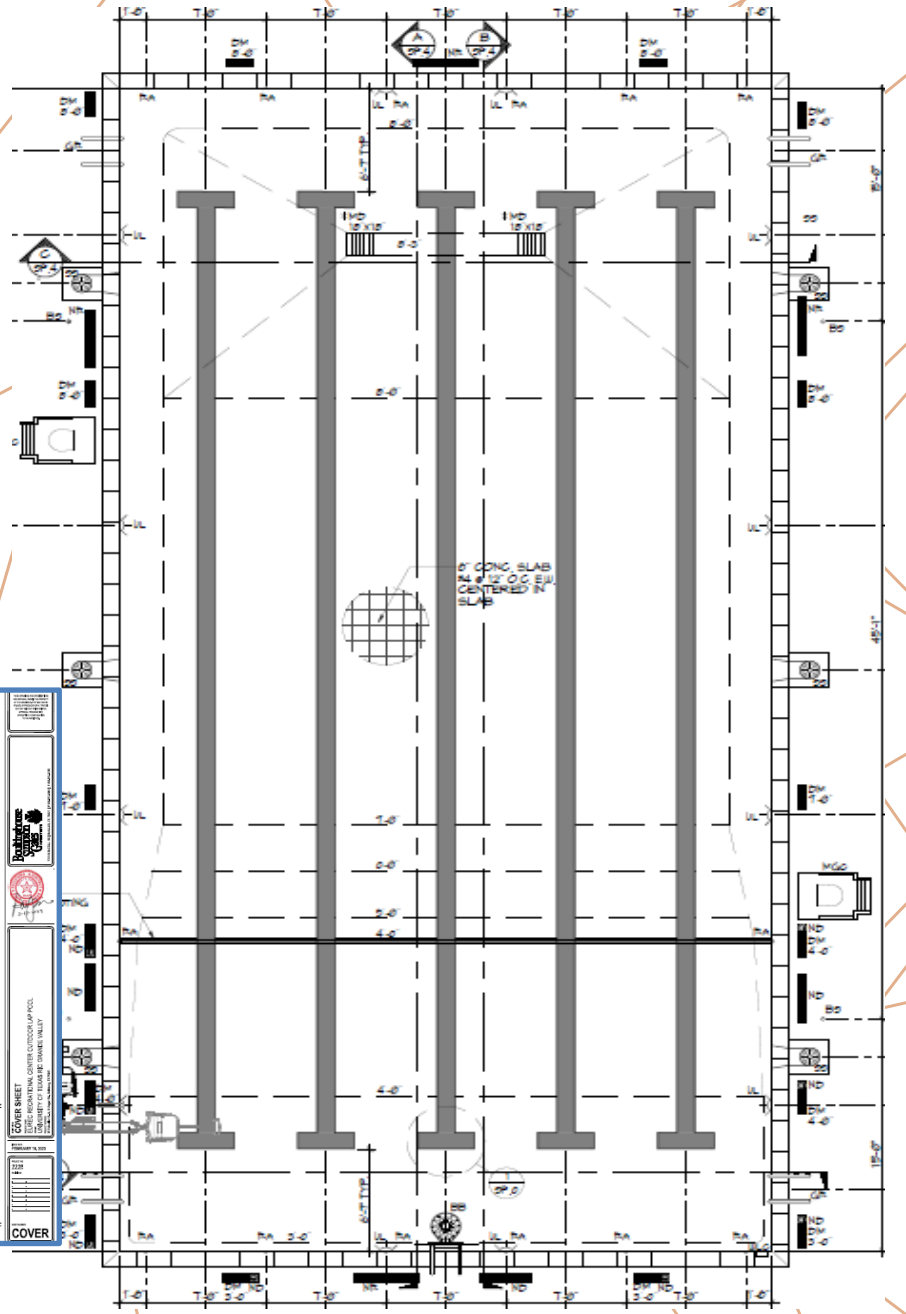
This is a summary of projects scope of work, difficulty of the project, special feature associated with each project, and cost of projects.
- Summary and Values and Mission Statement

Pirate's Cove Water Park



University of Texas UTRGV 5 Lane Lap Pool Rec Center Expansion Project

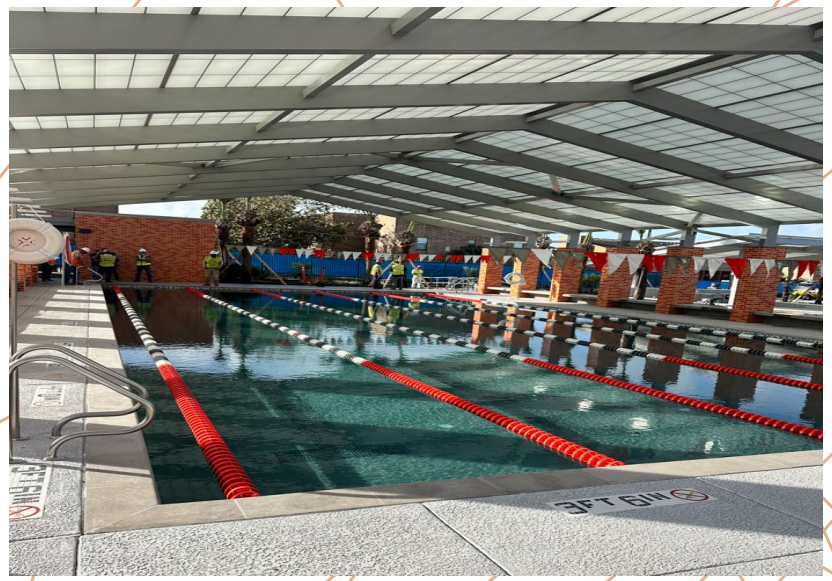


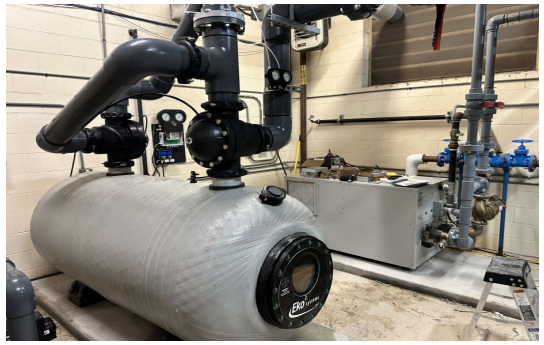


Tres Lagos Community Pool & Rec Center

University of Texas Rio Grand Valley UTRGV, Recreation Pool 5 lane Lap Pool

- **Project:** 5 lane Lap Pool Recreation Center Pool Expansion Project
- **Location:** 613 N. Sugar Rd, Edinburg Tx
- **Client:** UTRGV Rec Center Student Health and Services Department, D-Willison Construction. GC
- **Scope of Work:** Large rec pool for the University, 5 lanes of swimming with the pool depth being 4 feet to 8 feet deep. The shallow area consist of a basketball area. This was a two-step process where we poured the floors and shotcrete the walls. Installation of swim lane tile. Plumbing sizes ranged from 2" to 10". Coping was a cast concrete coping and decking system was Kool Decking and slot drain.
- **Architects:** Boultinghouse & Simpson & Gates, John Gates 956 630 9494
- **Engineer**: Aquatic Design Group, Gregory Ferrell and Project Lead Rick Jennings 760 473 5792
- **Cost:** $985,000.00 **Pool and Decking and Equipment**

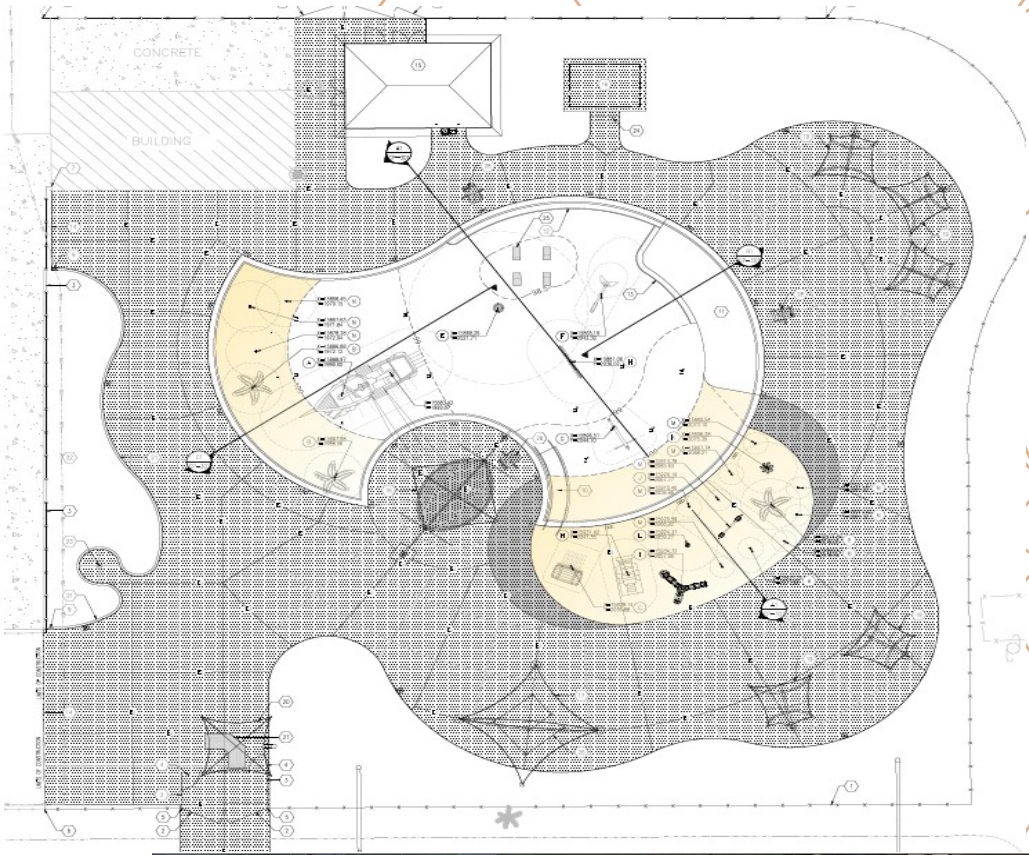




Architect's Rendering on the cover page of the plans and picture of final project completion

University of Texas Rio Grand Valley UTRGV, Recreation Pool 5 lane Lap Pool

• **Scope of Work:** Swimming Mechanical consist of 1 single horizontal sand filter EKO2 with diagram automatic valves. Circulation pump is a 7.5 hp Pentair aurora pump Class C Series. Becs'7 controller for filtration back wash operation and chimerical feeding. Had to plumb and pipe in a existing mechanical room that housed other pool equipment from a adjacent pool that was built in 1995. the challenges were the mechanical room had very limited access and had to build a wall support system because filter and heater was located on opposite of the room. Heater was 1.25 mil BTU heater. The Pool was difficult also with the closeness of the columns and surrounding pool and buildings. The University had to keep access and availability to the students open during construction. Quite Challenging project overall from start to finish, but was a success.



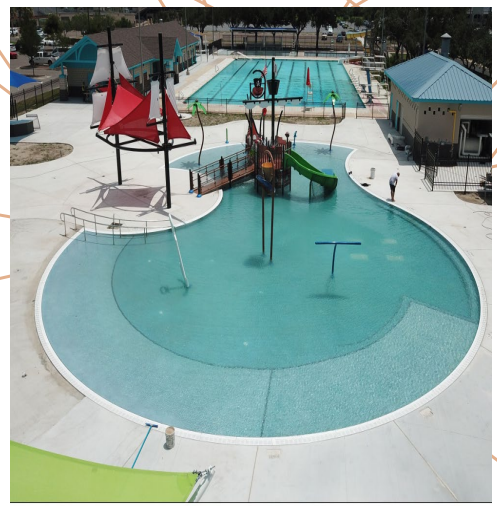
Pirate’s Cove Waterpark

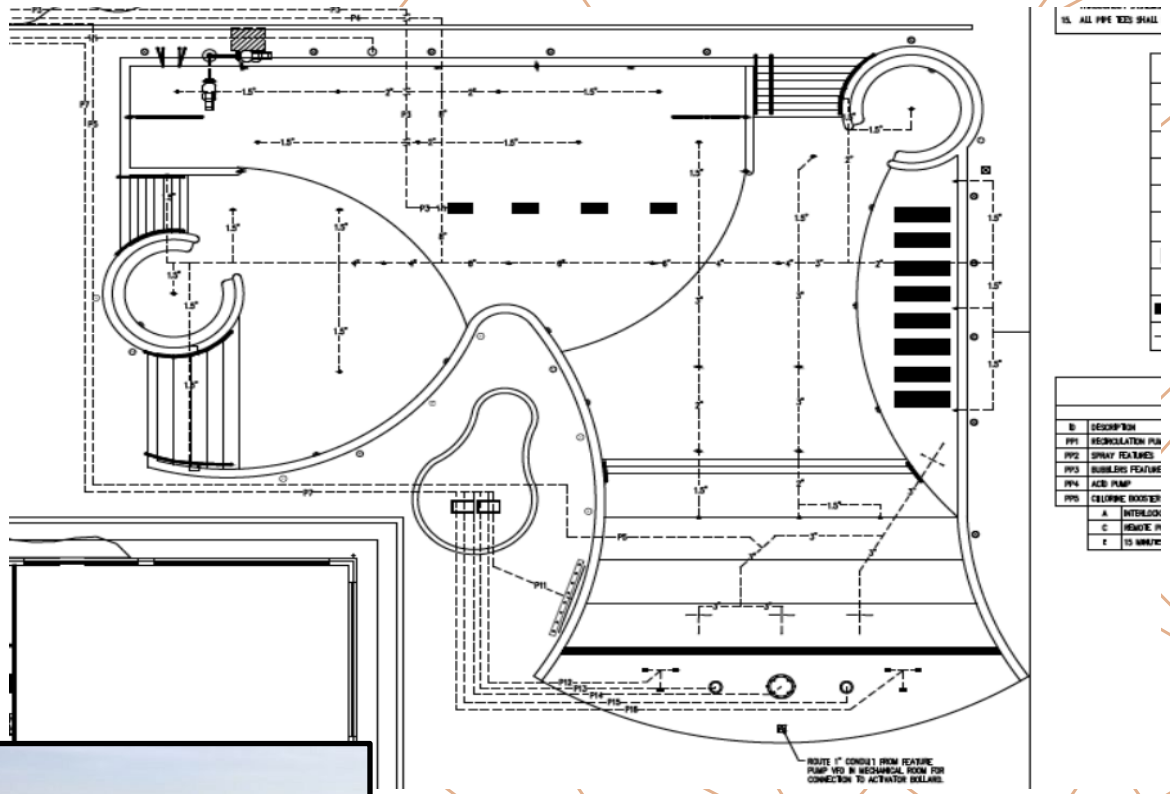
- **Project:** Edinburg Splash Park / Waterpark Pirate’s Cove
- **Location:** 125 Mark Pena Dr Edinburg Tx
- **Client:** City of Edinburg, Parks & Rec Department.
- **Scope of Work:** Large commercial Pool 6,000 sq ft , with Vortex Splash features, Perimeter flow Stainless Steel Gutter System, Beach Entrance with Splash pad Features, Decking 24,000 sqft. With a center mass sail structure and 6 large shade structures, site improvements, including Upgraded electrical and water and sewer requirements, and fence and landscaping items. Also constructed new pump room building and all equipment for the structure. This was a very involved project. We the Prime General Contractors selected for the project directly with the City of Edinburg
- **Architects:** Brandstetter, and Carroll Aquatic Engineer, Charlie Schneider Phone. 859 248 6049
- **Cost:** $3,300,000.00 **Water Park , Splash Park**

Vortex Pirate Themed Platform and Interactive spray features and slide, Shade structures by USA Shades

Pirate’s Cove Waterpark

- **Scope of Work:** Built entire pump room with sunken lower are for pumps so they are below water level. Also two adjacent rooms for chlorine and acid storage with chemical feeders. Pump features are 7.5 hp EQ series pump powering water splash platform and Vortex water feature system and controller to be interactive play. Middle pump features for the splash pad with 3 stages of play options. Main Circulation 20 hp pump for water circulation and also a Medium Pressure Neptune Benson Ultraviolet light system. Filtration system is 2 double stacked horizontal filters by Stark / Pentair. Heating by Repack 2 million BTU High efficiency heater High Delta Model. Controller Bec's 7 controller to operate all items and chemical feeders.
- **NOTE:** Perimeter Overflow with Stainless Steel Gutter system, by Paddock, Seamless and custom made and installed, First Continues Radius Gutter System of it’s Kind!!





Tres Lagos Community Center Recreation Pool Area

Tres Lagos is a mastered planed Community with 3,000 + Homes with Shopping Centers and School districts located in one area

- **Project:** Tres Lagos Community Pool Aquatic Center

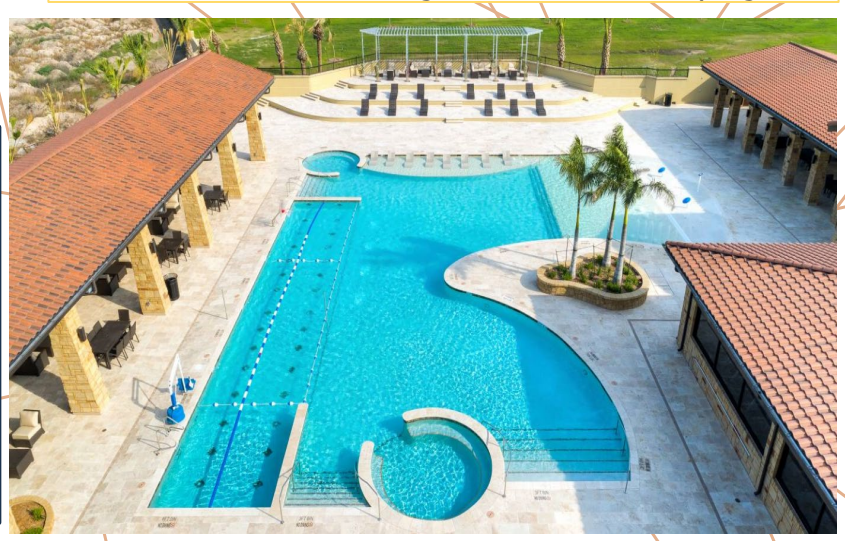
- **Scope of Work:** Commercial Swimming Pool and Beach Entry, Swimming Lap area, Travertine Coping and Decking at 24,000 sq ft, Planters / hardscapes, and Equipment Room build out. Pool size 7,850 Sq. Ft 140' x 90, built by a two-step process where the floor is poured out then the walls are shotcrete, all sch 80 PVC ranging from 2" to 10" plumbing. Pump room has (2) double stacked filtration system and a 20hp circulation pump and (2) 7.5 hp pumps for water features, Some challenges were a add 2 million BTU heater and Glacier Chiller for water temp control, and automatic chemistry controls as well. We performed the entire work for the project for the pool construction and all the decking and all equipment for the project.
- **Architects:** Sam Garcia, 956 212 4930
- **Engineer**: Councilman & Hunsaker INC. Engineers Stacy Pye & Daniel and Barnard P.E office 314 894 1245
- **Cost:** $1,635,000.00 **Commercial Swimming Pool and Kiddy Play Area**

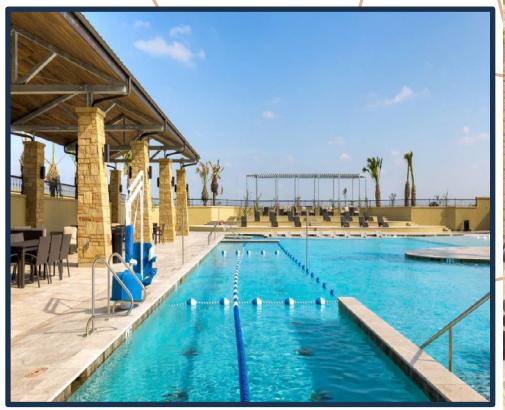
Splash Pad , Beach Entry to Pool Kiddy play Area

Vortex Splash Pad Equipment

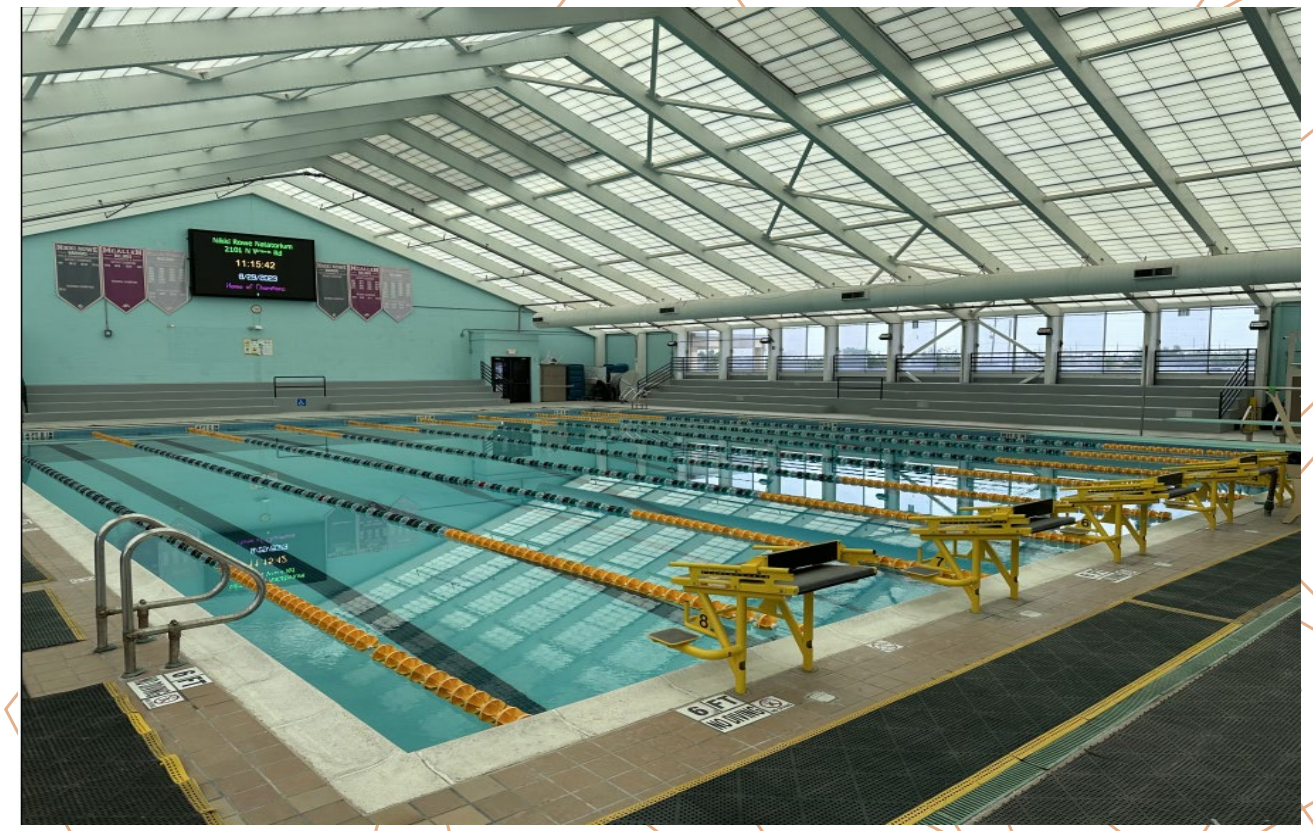


Tres Lagos Community Center Recreation Pool Area

- **Scope of Work:** Large Leisure pool 7,850sq ft. With 2 seating areas and swim lame, beach entrance with a kiddy splash pad area, also a large sunself for lounge seating, and 3 step entrances. Coping and Decking system is Travertine decking flooring paver installation 23,000 sq ft, *We did not do the structures, just everything else*



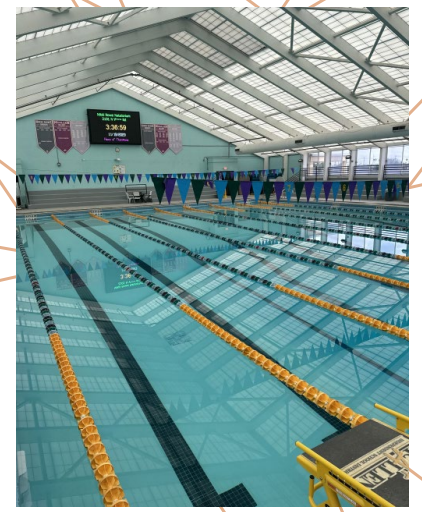
Raised platform area for multiple use for small bands and or ceremonies and weddings with an overhead pergola

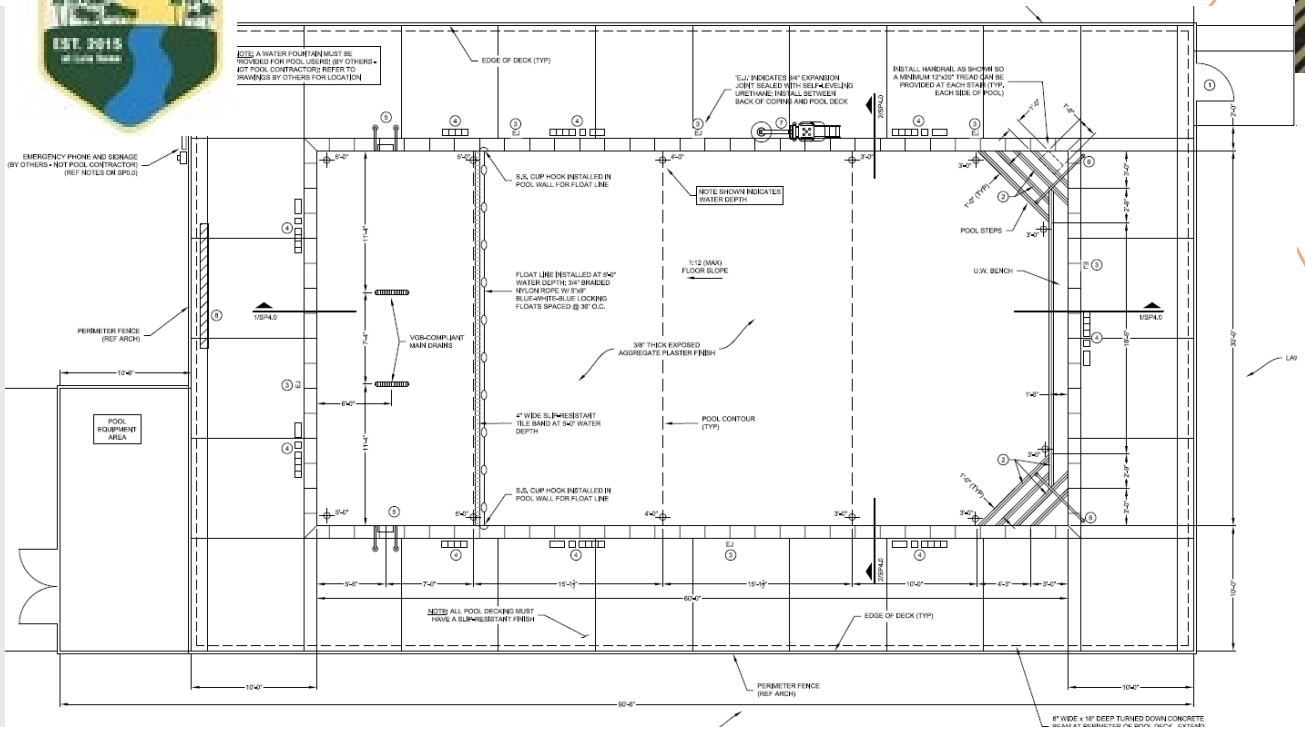


2 Swim Lanes

Nikki Row High School Natatorium

- **Project:** : Nikkie Row High School, McAllen Tx
- **Location:** 2101 N Ware Rd, McAllen T 78501
- **Client:** Nikkie Row High School , School District McAllen Tx, Mr. Trevino 956 605 9296
- **Scope of Work:** Large 8 lane pool inside a Natatorium Building, this was a remodel / renovation and project, complete chip out and replaster and tile, this project was a large pool with a 12-foot-deep end, Also a smaller pool that was 4 feet deep for practice. Changes of the project was to work during school was in session and meet a quick schedule for the pool to be ready for practice and competitions. The pool had so other items that we had to address like multiple leaks and we were able to fix 4 in the floor of the pool and one that was in the foundation of the storage room area adjacent to the coaches' office. Also included was the equipment set, we installed 2 large horizontal filters and 2 pumps 7.5hp for water circulation. Also installed a UV system and !.5 Mil BTU heater. Also the smaller pool was re plumbed and all new equipment as well. This was a fast-pace project that was difficult at times but was able to deliver it ahead of schedule. We were the GC on the project direct contract with the school district.
- **Engineer :** Brannon Corp Aquatics Travis Bozick PE office 903 597 6575, 903 597 2122
- **Cost:** $785,000.00 **Swimming Pool renovation**





IDEA School District Camp Rio at Historic Lula Sams Nature and Educational Park

- **Project:** IDEA School District, Charter School, grades 1 – 12
- **Location:** Brownsville Texas, 200 South Railroad Rd
- **Scope of Work:** Large Commercial Pool 40 x 65 pool, and 8 foot deep with 15 foot of decking Kool deck around the pool. Recreation pool designed to me a multi use pool and where kids can lean to swim. Location was in the center of a nature park and in the middle of a wooded area, difficulties of the project was to not damage vegetation no more then the foot print of the project. Had to work with clint and environmental and naturalist to be has careful as possible to preserve the wooded area. Installed fencing and Shade Structures and all decking for the pool project

28897 Orange Grove Rd,
La Feria, TX 78559

SURETY:
(Name, legal status and principal place of business)
Lexington National Insurance Corporation
11426 York Road, 2nd Floor
Cockeysville, MD 21030

OWNER:
(Name, legal status and address)
City of Edinburg,
Edinburg, TX

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

Any singular reference to Contractor, Surety, Owner or other party shall be considered plural where applicable.

BOND AMOUNT: Five Percent of Greatest Amount Bid (5% GAB)

PROJECT:
(Name, location or address, and Project number, if any)
Install new Swimming pool Filters and Pumps, Bid 2026-14 Fountain Pool Filtration Re-Bid (#4705), Edinburg, TX

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

POWER OF ATTORNEY
Lexington National Insurance Corporation

11426 York Road, 2nd Floor, Cockeysville, Maryland 21030

Lexington National Insurance Corporation, a corporation duly organized under the laws of the State of Florida and having its principal administrative office in Baltimore County, Maryland, does hereby make, constitute and appoint:

Gregory Klement

as its true and lawful attorney-in-fact, each in their separate capacity, with full power and authority to execute, acknowledge, seal and deliver on its behalf as surety any bond or undertaking of $6,000,000 or less. This Power of Attorney is void if used for any bond over that amount.

This Power of Attorney is granted under and by authority of the following resolutions adopted by the Board of Directors of the Company on June 5, 2025:

Be it Resolved, that the Chief Executive Officer, President or any Vice-President shall be and is hereby vested with full power and authority to appoint suitable persons as Attorney-in-Fact to represent and act for and on behalf of the Company subject to the following provisions:

Attorney-in-Fact may be given full power and authority for and in the name of and on the behalf of the Company, to execute, acknowledge and deliver any and all bonds, policies, contracts, Consents of Surety, undertakings, indemnity and other conditional or obligatory undertakings, including any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts, and any all notices and documents cancelling or terminating the Company's liability thereunder and also such instruments and documents which the business of the Company may require, and such instruments and documents so executed by such Attorney-in-Fact shall be binding upon the Company as if signed by the Chief Executive Officer and sealed by the Corporate Secretary.

RESOLVED further, that the signature and attestations of the Chief Executive Officer, President or any Vice-President of the Company may be affixed to any such Power of Attorney or to any certificate relating to the Power of Attorney by electronic means or by facsimile, and the seal of the Company may be embossed, stamped, affixed electronically or by facsimile to any such Power of Attorney. Any such power so executed and sealed shall be valid and binding on the Company.

IN WITNESS WHEREOF, the Company have caused this instrument to be signed and their corporate seal to be hereto affixed.

STATEMENT OF BIDDER'S QUALIFICATIONS

ARTICLE 1—GENERAL INFORMATION

1.01 Provide contact information for the Business:

Legal Name of Business:	South Texas Pools		
Corporate Office	La Feria		
Name:	Royce Norman	Phone number:	956-730-6588
Title:	President	Email address:	royce@southtexaspools.com
Business address of corporate office:	28897 Orange Grove Rd. La Feria Tx 78559.		
Local Office	La Feria Tx.		
Name:	South Texas Pools	Phone number:	956-730-6588
Title:	President	Email address:	royce@southtexaspools.com
Business address of local office:			

1.02 Provide information on the Business's organizational structure:

Form of Business:	☐ Sole Proprietorship ☐ Partnership ☑ Corporation Scorp.		
☐ Limited Liability Company ☐ Joint Venture comprised of the following companies:			
	1.		
	2.		
	3.		
Provide a separate Qualification Statement for each Joint Venturer.			
Date Business was formed:	1982	State in which Business was formed:	
Is this Business authorized to operate in the Project location?		☐ Yes ☐ No ☐ Pending	

1.03 Identify all businesses that own Business in whole or in part (25% or greater), or that are wholly or partly (25% or greater) owned by Business:

Name of business:		Affiliation:	
Address:			
Name of business:		Affiliation:	
Address:			
Name of business:		Affiliation:	
Address:			

1.04 Provide information regarding the Business's officers, partners, and limits of authority.

Name:	Royce Normann	Title:	President 100%
Authorized to sign contracts: ☒ Yes ☐ No		Limit of Authority:	$
Name:		Title:	
Authorized to sign contracts: ☐ Yes ☐ No		Limit of Authority:	$
Name:		Title:	
Authorized to sign contracts: ☐ Yes ☐ No		Limit of Authority:	$
Name:		Title:	

ARTICLE 2—LICENSING

2.01 Provide information regarding licensure for Business, if applicable:

Name of License:	Pool Construction		
Licensing Agency:			
License No:		Expiration Date:	
Name of License:			
Licensing Agency:			
License No:		Expiration Date:	

ARTICLE 3—DIVERSE BUSINESS CERTIFICATIONS

3.01 Provide information regarding Business's Diverse Business Certification, if any. Provide evidence of current certification.

Certification	Certifying Agency	Certification Date
☐ Disadvantaged Business Enterprise		
☐ Minority Business Enterprise		
☐ Woman-Owned Business Enterprise		
☑ Small Business Enterprise	SBA. Small Business	
☐ Disabled Business Enterprise		
☐ Veteran-Owned Business Enterprise		
☐ Service-Disabled Veteran-Owned Business		
☐ HUBZone Business (Historically Underutilized) Business		
☐ Other		
☐ None		

ARTICLE 4—SAFETY

4.01 Provide information regarding Business's safety organization and safety performance.

Name of Business's Safety Officer:	Royce Norman, Rudy Menendez	
Safety Certifications		
Certification Name	Issuing Agency	Expiration
OSHA 10		

4.02 Provide Worker's Compensation Insurance Experience Modification Rate (EMR), Total Recordable Frequency Rate (TRFR) for incidents, and Total Number of Recorded Manhours (MH) for the last 3 years and the EMR, TRFR, and MH history for the last 3 years of any proposed Subcontractor(s) that will provide Work valued at 10% or more of the Contract Price. Provide documentation of the EMR history for Business and Subcontractor(s).

Year	2024			2025			2026		
Company	EMR	TRFR	MH	EMR	TRFR	MH	EMR	TRFR	MH
South Texas Rock			.01			.01			.01

ARTICLE 5—FINANCIAL

5.01 Provide Annual Gross Revenue (Past Year): ☐ $100,000 or less ☐ $100,000 - $500,000 ☐ $500,000 - $1,000,000 ☑ $1,000,000 - $5,000,000 ☐ $5,000,000 and over

5.02 Will bidder/proposer provide copy of its financial statements for the past two years, if requested by the City of Edinburg? ☑ Yes ☐ No

CERTIFICATE OF BIDDER'S EXPERIENCE & QUALIFICATIONS

The undersigned bidder certifies that he is, at the time of bidding, and shall be, throughout the period of the contract, licensed by the State of Texas to do the type of work required under terms of the contract documents. Bidder further certifies that he is skilled and regularly engaged in the general class and type of work called for in the contract documents.

The bidder represents that he is competent, knowledgeable and has special skills on the nature, extent and inherent conditions of the work to be performed. Bidder further acknowledges that there are certain peculiar and inherent conditions existent in the construction of the particular facilities which may create, during the construction program, unusual or peculiar unsafe conditions hazardous to persons and property. Bidder expressly acknowledges that he is aware of such peculiar risks and that he has the skill and experience to foresee and to adopt protective measures to adequately and safely perform the construction work with respect to such hazards.

EQUIPMENT & MATERIAL SUPPLIERS LIST

PURPOSE: To assist the Owner in determining the ability of each Bidder to properly fulfill the requirements of this proposed contract, the Bidder shall complete the following items. All questions must be answered and the data given must be clear and comprehensive. If necessary, questions may be answered on separate attached sheets as specified by 00420 Statement of Bidder's Qualifications. If, in the course of evaluating the bids, the Owner discovers that answers to these questions are false or misleading then the Owner reserves the right to reject the bid based on non-responsiveness. **This statement must be notarized.**

The undersigned hereby authorizes and requests any person, firm, or corporation to furnish any information requested by the Owner in verification of the recitals comprising this Statement of Bidder's Qualifications.

A. EQUIPMENT AVAILABLE FOR THIS CONTRACT: The Bidder shall provide below a list of equipment available for use on this contract:

EQUIPMENT	OWN	RENT/LEASE (Supplier & Phone #)
I own all my Equipment	✓	
No Equipment Needed for this project.	✓	

B. MATERIALS AND MAJOR EQUIPMENT: The Bidder shall provide below a list of manufacturers and suppliers of major equipment and materials proposed on this contract:

CITY OF EDINBURG NON-BRIBERY MODEL FORM

[*Bidder's letterhead*]
South Texas Pools

[*Date*] 7-28-2026

[*Name and address*] 28897 Orange Grove Dr.

Dear [*Name of Owner*] : Royce Norman

The undersigned party certifies that [*Name of bidding company*] South Texas Pools complies with the following criteria:

1. They have not engaged and will not engage in bribery of officials related to potential or active City of Edinburg projects.

2. Respondents shall not offer gratuities, favors or any monetary value to any official or employee of the City for purpose of influencing the selection. Any attempt by any Respondent to influence the selection process by any means, other than disclosure of qualifications and credentials through the proper channels, shall be grounds from exclusion from the selection process. Once the project is advertised, there shall be no contact with any city official or employee unless using the formal process through the Purchasing Department. Failure to comply will result in the firm being disqualified from the process.

3. They have corporate policies that clearly prohibit the use of any bribery in a corporate activity.

4. They have neither been convicted of (nor found by a civil judgment to have committed) bribery of domestic officials, fraud, embezzlement, theft, forgery, destruction of records, making false statements to government officials, receiving stolen property, or any other offense indicating a lack of business integrity or business honesty, within five years of the date of this certification.

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

POWER OF ATTORNEY

Lexington National Insurance Corporation

11426 York Road, 2nd Floor, Cockeysville, Maryland 21030

Lexington National Insurance Corporation, a corporation duly organized under the laws of the State of Florida and having its principal administrative office in Baltimore County, Maryland, does hereby make, constitute and appoint:

Gregory Klement

as its true and lawful attorney-in-fact, each in their separate capacity, with full power and authority to execute, acknowledge, seal and deliver on its behalf as surety any bond or undertaking of $6,000,000 or less. This Power of Attorney is void if used for any bond over that amount.

This Power of Attorney is granted under and by authority of the following resolutions adopted by the Board of Directors of the Company on June 5, 2025:

Be it Resolved, that the Chief Executive Officer, President or any Vice-President shall be and is hereby vested with full power and authority to appoint suitable persons as Attorney-in-Fact to represent and act for and on behalf of the Company subject to the following provisions:

Attorney-in-Fact may be given full power and authority for and in the name of and on the behalf of the Company, to execute, acknowledge and deliver any and all bonds, policies, contracts, Consents of Surety, undertakings, indemnity and other conditional or obligatory undertakings, including any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts, and any all notices and documents cancelling or terminating the Company's liability thereunder and also such instruments and documents which the business of the Company may require, and such instruments and documents so executed by such Attorney-in-Fact shall be binding upon the Company as if signed by the Chief Executive Officer and sealed by the Corporate Secretary.

RESOLVED further, that the signature and attestations of the Chief Executive Officer, President or any Vice-President of the Company may be affixed to any such Power of Attorney or to any certificate relating to the Power of Attorney by electronic means or by facsimile, and the seal of the Company may be embossed, stamped, affixed electronically or by facsimile to any such Power of Attorney. Any such power so executed and sealed shall be valid and binding on the Company.

IN WITNESS WHEREOF, the Company have caused this instrument to be signed and their corporate seal to be hereto affixed.

LEXINGTON NATIONAL INSURANCE CORPORATED 1989 FLORIDA

Ronald A. Frank, Chief Executive Officer

State of Maryland
County of Harford County, SS:

Before me, a notary public, personally appeared, Ronald A. Frank, Chief Executive Officer of Lexington National Insurance Corporation, who proved to me on the basis of satisfactory evidence to be the person whose name is subscribed to the within instrument and acknowledged to me that he executed the same in his capacity, and that by his signature on the instrument the person, or the entity upon behalf of which the person acted, executed the instrument.

I certify under the PENALTY of PERJURY under the laws of the State of Maryland that the foregoing paragraph is true and correct.

WITNESS my hand and official seal.

PROJECT:
(Name, location or address, and Project number, if any)
Install new Swimming pool Filters and Pumps, Bid 2026-14 Fountain Pool Filtration Re-Bid (#4705), Edinburg, TX

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

POWER OF ATTORNEY

Lexington National Insurance Corporation

11426 York Road, 2nd Floor, Cockeysville, Maryland 21030

Lexington National Insurance Corporation, a corporation duly organized under the laws of the State of Florida and having its principal administrative office in Baltimore County, Maryland, does hereby make, constitute and appoint:

Gregory Klement

as its true and lawful attorney-in-fact, each in their separate capacity, with full power and authority to execute, acknowledge, seal and deliver on its behalf as surety any bond or undertaking of $6,000,000 or less. This Power of Attorney is void if used for any bond over that amount.

This Power of Attorney is granted under and by authority of the following resolutions adopted by the Board of Directors of the Company on June 5, 2025:

Be it Resolved, that the Chief Executive Officer, President or any Vice-President shall be and is hereby vested with full power and authority to appoint suitable persons as Attorney-in-Fact to represent and act for and on behalf of the Company subject to the following provisions:

Attorney-in-Fact may be given full power and authority for and in the name of and on the behalf of the Company, to execute, acknowledge and deliver any and all bonds, policies, contracts, Consents of Surety, undertakings, indemnity and other conditional or obligatory undertakings, including any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts, and any all notices and documents cancelling or terminating the Company's liability thereunder and also such instruments and documents which the business of the Company may require, and such instruments and documents so executed by such Attorney-in-Fact shall be binding upon the Company as if signed by the Chief Executive Officer and sealed by the Corporate Secretary.

RESOLVED further, that the signature and attestations of the Chief Executive Officer, President or any Vice-President of the Company may be affixed to any such Power of Attorney or to any certificate relating to the Power of Attorney by electronic means or by facsimile, and the seal of the Company may be embossed, stamped, affixed electronically or by facsimile to any such Power of Attorney. Any such power so executed and sealed shall be valid and binding on the Company.

IN WITNESS WHEREOF, the Company have caused this instrument to be signed and their corporate seal to be hereto affixed.

LEXINGTON NATIONAL INSURANCE CORP. INCORPORATED 1989 FLORIDA

Ronald A. Frank, Chief Executive Officer

State of Maryland
County of Harford County, SS:

Before me, a notary public, personally appeared, Ronald A. Frank, Chief Executive Officer of Lexington National Insurance Corporation, who proved to me on the basis of satisfactory evidence to be the person whose name is subscribed to the within instrument and acknowledged to me that he executed the same in his capacity, and that by his signature on the instrument the person, or the entity upon behalf of which the person acted, executed the instrument.

I certify under the PENALTY of PERJURY under the laws of the State of Maryland that the foregoing paragraph is true and correct.

WITNESS my hand and official seal.

THE STATE OF TEXAS §

COUNTY OF HIDALGO §

CONSTRUCTION CONTRACT §

CONTRACT FOR FORMAL BID NO. 2026-14 FOUNTAIN POOL FILTRATION IMPROVEMENTS BETWEEN CITY OF EDINBURG AND

The City of Edinburg, Hidalgo County, Texas, a municipal corporation (hereinafter called **"City"**), and Vendor, (hereinafter **"Contractor"**), entered into an agreement for the Fountain Pool Filtration Improvements.

RECITALS

WHEREAS, the City desires to engage the Contractor for certain Work in connection therewith; and,

WHEREAS, Contractor represents that is has the knowledge, ability, equipment, and personnel to properly provide Work needed by the City; and

NOW, THEREFORE, the City and Contractor do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONTRACTOR

A. City agrees to employ Contractor to provide the following Work as stated in the agreement and Formal Bid No. 2026-14 Notice to Bidders and Bid Form attached as Exhibit "A". Upon receipt of Work to the City's satisfaction, the City agrees to pay Contractor as stated in this Agreement.

SECTION II
WORK OF CONTRACTOR

A. The Contractor agrees to perform the Work in connection therewith, under the terms of this Agreement for the Fountain Pool Filtration Improvements at its own proper cost and expense to furnish all labor, insurance and other accessories and Work necessary to complete the said task in accordance with the conditions and prices stated in Specifications and Formal Bid pertaining to Bid No. 2026 – 14 Fountain Pool Filtration Improvements.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implications to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITES OF CONTRACTOR

A. Contractor shall perform the Work described in **Exhibits "A".**

B. Contractor shall perform its Work with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Work furnished under this Agreement. Contractor shall comply with all applicable federal, state, and local laws, ordinances, codes and regulations in performing the Work. If Contractor fails to meet applicable professional standards, Contractor shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Contractor shall be responsible for the professional quality, technical accuracy, timely completion, and coordination of Work furnished by Contractor under this Agreement. Contractor shall keep the City informed of the Work performed under this Agreement. In connection with the performance of the Work by Contractor, Contractor agrees to promptly and fully disclose to City any information regarding the Work as City may request.

D. Contractor will develop and maintain a detailed schedule for completion of the Work.

E. Contractor will submit monthly progress data for the reporting period. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City.

G. City's review or approval of reports and other Work furnished hereunder shall not in any way relieved Contractor of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Work shall be construed as a waiver of any rights under this Agreement of any cause of action arising out of the performance of this Agreement.

H. Contractor shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Contractor's negligent performance of any of the Work furnished under this Agreement.

I. Contractor's obligations under this clause are in addition to the Contractor's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Contractor for Contractor's errors or omissions.

SECTION IV
PAYMENT AND FEES

City agrees to pay Contractor for Work herein contracted for as follows:

A. Contractor shall provide an invoice in accordance with City regulations. Invoice shall be submitted to City upon completion and inspection of each project and shall include unit price amounts set forth in the Bid form(s). The total compensation to the Contractor shall not

exceed $. Payment terms shall be net thirty (30) days from receipt of invoice. Invoice shall be completed and processed in accordance with City regulations.

B. Except as specifically authorized by City in writing, Contractor shall not bill City for duplicate Work performed by more than one person. Contractor and City acknowledge and agree that compensation paid by City to Contractor under this Agreement is based upon Contractor's estimated costs of providing the Work required hereunder, including salaries and benefits of employees and subcontractors of Contractor. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and /or annuities to which Contractor and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensations required under this Agreement.

C. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Contractor's conduct in the performance or furnishing of Work, or City has incurred costs, losses, or damages resulting from Contractor's conduct in the performance or furnishing of Work, including property damage, and non-compliance with Laws and Regulations;

b. Contractor has failed to take reasonable and customary measures to avoid damage, delay, and interference with Work and related work;

c. Contractor has failed to provide and maintain required insurances;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or cost related to evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Work is defective, requiring correction or replacement;

g. City has been required to correct defective Work or has accepted defective Work;

h. Liens have been filed in connection with the Work; or

i. Other items entitle City to a set-off against the payment amount.

D. If City imposes any set-off against payment, City will give Contractor immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Contractor any amount remaining after deduction of the amount so withheld. City shall promptly pay Contractor the amount so withheld, or any adjustment thereto agreed to by City and Contractor, if Contractor remedies the reasons for such action. The reduction imposed will be binding on Contractor unless it duly submits written notice contesting the reduction with 30 day of receiving City's written notice.

E. All fees payable to Contractor under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Contractor's employees' taxes. Contractor hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

F. Contractor and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

G. The City may, at any time, request Contractor to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Contractor shall, within fourteen (14) days from the date it receives the City's request, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The governing body of the City must approve any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Contractor from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Contractor following termination or expiration of this Agreement as defined below, the Contractor shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION V
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Work to be performed under it, shall commence within ten (10) days after the Notice to Proceed, as set forth in this contract and as specified by the City. Work will continue until the Project is declared complete in a written instrument signed by the City Manager. The city shall have the right, in its sole discretion, to extend the term of this Agreement for an additional period of time. If approved by City, City shall provide Contractor with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Contractor. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Work rendered by Contractor breach

or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Contractor except for charges for Work performed by Contractor and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either of both parties hereunder shall so survive the termination, cancellation or completion of performance of this Agreement.

D. Upon termination or completion of Contractor's Work hereunder or as such other time as may be requested by City, Contractor shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Contractor or others, in Contractor's possession and related to the Work.

E. The City reserves the right to suspend work on the Work, with or without cause, in whole or in part, upon giving notice to Contractor. Contractor shall resume the Work so suspended when directed to so by the City. The City shall have no liability to Contractor except for charges for work performed by Contractor and accepted by the City prior to receipt of notice of suspension of Work. If only a portion of the Work are suspended, Contractor shall be compensated only for Work of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Work under this Section, the City may take over the work and may obtain the Work of another entity to complete the work under this Agreement.

SECTION VI
TIME OF COMPLETION

Time of completion is **60** days. City and the Contractor recognize that time is of the essence of this agreement and that the City may suffer financial loss if the Work is not completed within the time specified herein.

SECTION VII
SCHEDULE REQUIREMENTS

Whenever, in the sole discretion of the City, the Work falls behind schedule, the Contractor shall, to the extent necessary to meet said schedule, increase its labor force and/or provide overtime, Saturday, and Sunday and/or holiday work, and shall have each Subcontractor do likewise, all at no additional cost to or compensation from City. Further, City shall have the right to offset against any amounts then or thereafter due to the Contractor, or to be reimbursed by the Contractor for, any additional costs City may incur as a direct result of said increase in labor force or overtime, Saturday, Sunday, and/or holiday work.

SECTION VIII
WRITTEN NOTICE OF ISSUE

In the event that any issue arises relating to any of the provisions contained in this Agreement, including, but not limited to potential delays, change orders, time extensions, weather delays, etc., Contractor agrees to notify the City, in writing, immediately, relating to such issue and provide a proposed resolution. Failure to give such notice shall constitute a waiver of any other remedies available to Contractor hereunder.

SECTION IX
NO DAMAGE FOR DELAY

In the event of any delay, not the fault of the Contractor, the Contractor shall be entitled to an extension of time for completion only, and shall not be entitled to any additional payment on account of such delay. Without limiting the foregoing, the Contractor shall not be entitled to payment or compensation of any kind from the City for direct, indirect or impact damages, and/or consequential damages, including but not limited to costs of acceleration arising because of hindrance or from any cause or whatsoever, whether such hindrances or delays be reasonable or unreasonable, foreseeable or unforeseeable, or avoidable or unavoidable.

SECTION X
UNREASONABLE SITE INSPECTION REQUIREMENTS

The Contractor acknowledges that it has taken steps necessary to ascertain the nature and location of the Work and that it has investigated and satisfied itself as to the general and local conditions which can affect the Work and its costs. The Contractor also acknowledges that it has satisfied itself as to the character, quality, and quantity of surface and subsurface materials or obstacles to be encountered or difficulties or access insofar as this information is ascertainable from an inspection of the site, and available documents, including all information from exploratory work done by the City and its design consultants as well as from the Drawings and Specifications made a part of this Contract.

SECTION XI
DUTY TO COORDINATE AMONG SEPARATE PRIME CONTRACTORS

The City reserves the right to engage separate contractors to perform aspects of the Project other than the Work under this Agreement. In such case, contractor shall coordinate sequence and schedule its work together and in cooperation with such other contractors. In the event of any difficulties caused by any such other separate contractor, this Contractor shall look solely for relief to such other contractors and shall not make claim against City.

SECTION XII
CONTRACT DOCUMENTS

The Contract Documents which comprise the entire agreement between City and Contractor concerning the Work consist of this Agreement and the following attachments to this Agreement:

- Invitation to Formal Bid Form
- Instructions to Bidders

- Formal Bid Forms including the Quote, Quote Schedule(s), Information Required of Bidder, and all required certificates and affidavits

There are no Contract Documents other than those listed in this section. The Contract Documents may only be amended by Change Order pursuant to City Regulations and/or laws of this state or as allowed by this Agreement.

SECTION XIII
ASSIGNMENT

No assignment by a party hereto of any rights under or interests in the Contract Documents will be binding on another party hereto without the written consent of the party sought to be bound; and specifically but without limitation monies that may become due and monies that are due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under the Contract Documents.

SECTION XIV
MINIMUM INSURANCE REQUIREMENTS

Contractor shall be adequately insured and carry liability, workers compensation, automobile insurance an professionals liability for injury to its employees and others incurring loss or injury as a result of the acts of Contractor or its employees. In accordance with city ordinances, Contractor shall be required to hold the following minimum insurance coverage throughout the duration of this Agreement:

A. Workers Compensation-
In accordance with the State statute

B. Comprehensive General Liability
1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate

-or- $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

-or- $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

-or- $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit "B" and the City shall be listed as an additional insured.

G. Contractor shall not commence work under this Agreement until all insurance requirements have been obtained and proof of such insurance shall have been provided to the City, nor shall Contractor allow any Sub-Contractor to commence work until all insurance as noted above has been so obtained and provided to the City. Approval of the insurance by City shall not relieve or decrease the liability of the Contractor.

H. If at any time and for any reason contractor fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to contractor, City may, but shall have no obligation to , procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Contractor shall, with ten (10) days following City's demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Contractor.

I. With respect to each and every one of the insurance policies required to be obtained, kept or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and least fifteen (15) days before this expiration of any policy required hereunder previously obtained, Contractor shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

J. Contractor hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums, payable under each insurance policy required to be obtained, kept , and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the

extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept and maintained under this Lease to be void, voidable, unenforceable, suspended, or impaired in whole or in part of which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstance of which it is aware which, if not disclosed to its insurers or re-insures, is likely to affect adversely the nature or extend of the coverage to be provided under any insurance policy required hereunder.

SECTION XV
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arrases under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute with seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with the section below.

SECTION XVI
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the City shall be entitled to its attorneys' fees, cost, and expenses.

SECTION XVII
INDEMNIFICATON

A. To the maximum extent allowed by law, Contractor agrees to and shall indemnify, hold harmless and defend City, its officers, agents, and employees from any and all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees arising out of or directly connected with the negligent or willful conduct of Contractor, its agents, officers and employees.

B. Contractor agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other Work provided by Contractor regarding this agreement.

SECTION XVIII
LIMITATION OF LIABILITY

A. Contractor agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Contractor's total fees paid by the City to Contractor for the Work. Contractor agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profit, or loss of data, arising in connection with this Agreement, Contractor's performance of Work, or of any other obligations relating to his Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XIX
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this agreement. This agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XX
NO PENDING LITIGATION

A. Contractor represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, be foe any court, arbitrator, governmental or other board or official, pending to the best knowledge of Contractor threated against or affecting the Contractor or any subsidiaries of the Contractor, questioning the validity or any action taken or to be taken by the Contractor in connection with the execution, delivery, and performance by the Contractor of this Agreement to which the Contractor may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Contractor hereof or thereof, where in an

unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Contractor to perform, its obligations under this Agreement to which the Contractor may be party or (ii) would have an adverse effect on the consolidated financial conditions or results of operations of the Contractor or on the ability of the Contractor to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XXI
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated

SECTION XXII
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn: City Attorney

(b) Notices to Contractor:

Attn: Owner

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, there (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XXIII

NON-APPROPRIATIONS

A. Notwithstanding anything in the contract documents to the contrary, any and all payments which the City is required to make under this contract shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the contract by providing (10) ten days written notice to the other party.

SECTION XXIV
SUCCESSORS AND ASSIGNS

City and Contractor each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Contractor shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XXV
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits, other documents composing the Contract Documents, or any current or future Task Orders and/or Change Orders, the terms of this Agreement shall be controlling.

City and Contractor each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Contractor shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XXVI
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instance (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Agreement, shall operate as a waive, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future excise thereof or insistence thereupon or the exercise of any other right, power, remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Work with knowledge of a breach by Contractor of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance

of Work or payment to Contractor shall be deemed to be other than on account of the earliest installment of the amount due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept Work or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

EXECUTED by the parties in triplicate originals on this ____ day of _____, 2026.

Meeting Date: August 18, 2026
CONSENT AGENDA
Agenda Item No: 15.D.
Servers Warranty Renewal

1. **Agenda Item:**
Consider Authorizing the Renewal of the City's Servers Warranty Via Waypoint Solutions Through Department of Information Resources (DIR), Contract Numbers DIR-DELL EMC and DIR-CPO-5792, in the Amount of $41,033.43. [Daniel Vera, Director of Information Technology]

2. **Description:**
In an effort to continue providing efficient and cost-effective purchasing for the City of Edinburg, the City is a member of the following different Cooperative Purchasing Entities in the State of Texas, Houston Galveston Area Council (HGAC), Local Government Purchasing Cooperative (BuyBoard), Sourcewell, Texas Interlocal Purchasing System (TIPS), OMNIA Partners Cooperative, Texas Department of Information Resources (DIR) and the Texas Facilities Commission (TFC). Through the combined efforts of these cooperative entities, members comply with Texas State Procurement Statues while identifying vendors of commodities, goods and services at extremely competitive bid prices.

City staff is requesting the renewal of fourteen (14) server ProSupport Plus Mission Critical warranties. Renewal of the warranties allows the City the necessary resources to ensure the servers continue to operate at maximum efficiency. Any disruption to the City's servers may be detrimental not only to the City's infrastructure but to its ability to service the citizens of Edinburg. Estimated delivery will be realized approximately within one (1) week from the vendor receiving a Purchase Order.

This renewal is through the Department of Information Resources (DIR), contract numbers DIR-DELL EMC AND DIR-CPO-5792, in the amount of $41,033.43, for a term of twelve (12) months.

Funding is available within the Fiscal Year 2025-2026 Information Technology Budget under Account Number 100-1000-513301, Office Maintenance & Contractual - IT.

3. **Staff's Recommendation:**
Approve Authorizing the Renewal of the City's Servers Warranty Via Waypoint Solutions Through Department of Information Resources (DIR), Contract Numbers DIR-DELL EMC and DIR-CPO-5792, in the Amount of $41,033.43.

Water Line Access Agreement

1. **Agenda Item:**
Consider Authorizing the City Manager to Enter into a Waterline Access Agreement with North Alamo Water Supply Corporation to provide Fire Protection services to Tesoro Phase I Subdivision. [Gerardo Carmona Jr, P.E., Director of Utilities]

2. **Description:**
This agreement authorizes the installation of fire hydrants and associated appurtenances to provide adequate fire protection for Tesoro Phase I Subdivision. The property owner/developer will cover all material and installation cost, while the City will assume responsibility for ongoing maintenance. Tesoro Phase I Subdivision lies within North Water Supply Corporation's Certificate of Convenience and Necessity (CCN) and is located inside the city limits.

3. **Staff's Recommendation:**
Approve Authorizing the City Manager to Enter Into a Waterline Access Agreement with North Alamo Water Supply Corporation to provide fire protection services to Tesoro Phase I Subdivision.

RE: Waterline Access Agreement - North Alamo Water Supply Corporation, City of Edinburg, Fortis Land Company, LLC - Tesoro Phase I Subdivision

Dear Ms. Ayala:

Enclosed please find four (4) original **Waterline Access Agreements** (***"Agreement"***) for the Tesoro Phase I Subdivision for signature on behalf of the City of Edinburg (***"City"***) along with the signed Form 1295 signed by North Alamo Water Supply Corporation. Please review the Agreement documents, cause them to be executed on behalf of the City in the areas indicated, and provide a City Commissioners' Resolution and/or certified Minutes approving the Agreement.

Once the documents have been signed on behalf of the City, please return the documents (signed Agreements and Resolution and/or Minutes reflecting City's approval of the Agreement) back to this office in the self-addressed envelope provided herein for your convenience.

When the documents have been signed on behalf of the City and returned to this office along with the City's Resolution and/or certified Minutes, we will review the documents and then forward them to North Alamo Water Supply Corporation for further execution. After the documents have been fully-signed by all parties, we will distribute a fully-executed document to each party.

Thank you for your attention to this matter. If you should have any questions, please do not hesitate to call.

Sincerely,

/S/ Richard W. Fryer

(Declarant)

STATE OF TEXAS	§	**BETWEEN:**
	§	**NORTH ALAMO WATER SUPPLY**
	§	**CORPORATION AND CITY OF**
	§	**EDINBURG**
COUNTY OF HIDALGO	§	

WATERLINE ACCESS AGREEMENT
(with City)

WHEREAS, North Alamo Water Supply Corporation (**"NAWSC"**) has a water distribution system which was designed for potable water distribution to rural communities; and

WHEREAS, such system was not designated specifically with the intent of providing water for fire protection purposes; and

WHEREAS, the City of Edinburg (**"City"**) through its own forces or through the forces of those subject to a contract to provide services, may provide fire protection services to its citizens, some of which fall within the area of the Certificate of Convenience and Necessity granted to NAWSC; and

WHEREAS, City, a governmental entity of the State of Texas, may provide fire protection services to its constituents; and

WHEREAS, Section 67.0105 of the Texas Water Code authorizes water supply corporations to contract with governmental entities like the City to supply water for use in fire suppression, and further provides that the act of supplying such water by water supply corporations such as NAWSC, is an essential governmental function. It also provides that the contract for supplying such water must be to the mutual benefit to the contracting parties; and

WHEREAS, pursuant to Section 67.0105, a corporation that provides a governmental entity with a water supply or equipment to carry out the governmental function as described herein may be liable for damages resulting therefrom only to the extent that the governmental entity would be liable if the governmental entity were performing the governmental function directly; and

WHEREAS, NAWSC and City are mindful of the benefits that can be received by the citizens of the City and the members of NAWSC with the availability of water for use in controlling fires and thereby for the protection of life and property; and

WHEREAS, Fortis Land Company, LLC (**"Owner"**) are constructing a subdivision on the property described in **Exhibit "A",** Tesoro Phase I Subdivision (the **"Subdivision"**) and the City requires fire protection for the Subdivision as part of the Subdivision process.

THEREFORE, in exchange for the recitals herein made, the consideration exchanged

and the goodwill generated, NAWSC and City agree as follows:

1. This agreement pertains only to those areas in the Subdivision which also are within the boundaries of the Certificate of Convenience and Necessity granted to NAWSC in HIDALGO County, Texas and only **with respect to those areas specifically listed in** Exhibit "A". No other parts of NAWSC lines shall be affected by this agreement unless specifically set forth in writing by the parties and adopted by official acts of their respective governing bodies.

2. City shall have access to NAWSC lines with no less than six inches (6") in diameter for the purpose of operating and maintaining a fire hydrant system in accordance with industry standards and all federal, state and local codes and as shown in **Exhibit "B"** (**"Fire Hydrants"**). Such Fire Hydrants to be used solely for the governmental purpose of fire-fighting filling stations. No other use of water shall be made under this agreement. City shall determine if the pressure and volume available on such lines are suitable and sufficient. NAWSC shall gratuitously furnish to City's designated engineer, such waterline modeling information as it may have to the extent such information affects the lines and hydrants shown in Exhibit "A"; such information does not constitute any representation or warranty of any condition and is subject to all limitations, disclaimers, etc. found in this agreement.

3. Except as otherwise provided in this paragraph, all City fire hydrants on NAWSC waterlines or any part of NAWSC's system, shall be used for the governmental purposes of fire-fighting filling stations and shall be painted black with a white bonnet (cap) so as to be designated that they may be available for that limited use in a fire emergency and shall be operated by City such that a positive pressure of no less than 30 p.s.i. is maintained in NAWSC's water line at the point of connection between the water line and the fire hydrant. Should City perform annual testing of each hydrants subject to this agreement so as to determine the color coding attributable to each hydrant under City's fire hydrant coding scheme, City may paint the tested hydrants the appropriate color under that color coding scheme for a period of one (1) year following the test, after which a new test must be done or the hydrant shall be painted black with a white bonnet (cap) until the appropriate test is done. Should a tested and color coded hydrant's condition change after being tested and its condition be such that a different color code is appropriate, City will immediately repaint the hydrant accordingly or should a year expire without a hydrant being re-tested, City will immediately paint it black with a white bonnet (cap) and if City fails to so test and paint City's fire hydrants, NAWSC may (but is not required to) do so at City's expense, such expense to be paid by City to NAWSC upon demand. By allowing a hydrant subject to this agreement to be painted any color other than black with a white bonnet (cap), NAWSC is not representing or warranting that the hydrant is available and suitable for use in a fire emergency.

4. The Fire Hydrants will be constructed by Owner and owned and maintained by City as set out in Exhibit "B." If concrete is used for additional stability, the hydrant weep holes should not be covered.

5. All water used from NAWSC system will be reported monthly to NAWSC by City. This report will state the estimated amount of water used, the date of use, the location of use and any problems encountered with the Fire Hydrants. Forms will be provided by City.

6. There may be an annual charge by NAWSC for water used in fire protection. Such charge will be established annually by the Board of Directors. However, in no case will water be used for any domestic use, equipment wash-downs or construction purposes or any other purpose other than the actual use in controlling fires and maintaining the Fire Hydrants.

7. Because NAWSC is a rural system that cannot patrol all locations daily, a problem may arise as to the abuse of Fire Hydrants by the taking of water for uses other than fire protection. If this becomes a problem, NAWSC reserves the right to install security devices on all hydrants at the cost of City. Sufficient special wrenches, or keys, will be provided to NAWSC by City at no cost to NAWSC. Should City fail to install the required security devices, NAWSC may install such devices as it deems appropriate at a cost to the City.

8. All Fire Hydrants maintenance, inspection and flushing will be done by City personnel, or those under contract to City, for which City will retain responsibility. A schedule will be set up by City to perform flushing no less frequently than once every six (6) months; maintenance, inspection and testing according to National Fire Protection Association 291 shall be performed by City no less frequently than every twelve (12) months. Such schedule shall be provided to NAWSC in writing no later than thirty (30) days prior to any date shown on the schedule. City will maintain the Fire Hydrants such that they may be used as a temporary water sales point and as a flush valve by NAWSC and if City fails to so maintain the Fire Hydrants, NAWSC may (but is not required to) do so at City's expense, such expense to be paid by City to NAWSC upon demand. NAWSC may use the Fire Hydrants as temporary water sales point and as flush valves in order to assure the sanitary conditions of the potable water. In order to assure the integrity of its system and to maintain the sanitary conditions of the potable water, NAWSC personnel will be present at the times of Fire Hydrants maintenance, inspection and flushing and no such activity will occur without such presence. All Fire Hydrants maintenance, inspection and flushing will be done at City's expense. NAWSC may require such maintenance, inspection, and/or flushing to be made at any time, and after notice of such is given to City, such will be conducted as soon as reasonably possible.

9. All installation and replacement of Fire Hydrants and appurtenances will be performed by those personnel approved by NAWSC and under City's authority and responsibility, but only under NAWSC's inspection for defects in construction that may affect water quality. No installation or replacement of Fire Hydrants and appurtenances may occur without the presence of NAWSC personnel. All expenses involved in the installation and replacement of Fire Hydrants and appurtenances will be borne by City, including a reasonable fee for the presence and administration of NAWSC's personnel.

10. CITY ACKNOWLEDGES AND AGREES THAT NAWSC, BY ALLOWING ACCESS TO ITS SYSTEM, ASSUMES A DUTY TO NOT INJURE A PERSON EMPLOYED BY OR OTHERWISE AUTHORIZED BY CITY TO USE, ACCESS, OR IN ANY WAY BENEFIT FROM THE FIRE HYDRANTS, THE WATER THEREIN OR ANY APPURTENANCES THERETO (THE **"USER"**) BY WILLFUL OR WANTON CONDUCT OR BY GROSS NEGLIGENCE, AND THAT NAWSC ASSUMES NO OTHER DUTY OR STANDARD OF CARE. CITY UNDERSTANDS THAT THE STANDARD OF CARE ASSUMED UNDER THIS AGREEMENT DOES NOT REQUIRE NAWSC TO WARN THE USER OF AN UNSAFE CONDITION OR TO MAKE AN UNSAFE CONDITION SAFE SHOULD NAWSC BECOME AWARE, EITHER ACTUALLY OR CONSTRUCTIVELY, OF A CONDITION WHICH RESULTS IN AN UNREASONABLE RISK TO THE USER. FURTHER, CITY UNDERSTANDS THAT NAWSC MAY CHANGE THE CONDITION OF ITS SYSTEM IN A MANNER THAT MIGHT RENDER THE SYSTEM UNSAFE FOR A USER WITHOUT INCURRING LIABILITY FOR SUBSEQUENT INJURY TO USER BY THE NEW DANGER. CITY AGREES TO USE THE WATER AND SYSTEM AT ITS OWN RISK AND AS IT IS FOUND. NAWSC, WITHOUT ACCEPTING ANY DUTY, GRATUITOUSLY WILL ENDEAVOR TO NOTIFY CITY OF ANY CONDITION THAT MIGHT RENDER THE SYSTEM UNSAFE FOR USE BY CITY SHOULD ITS MANAGER BECOME CONSCIOUSLY AWARE OF SUCH A CONDITION. NAWSC HEREBY SPECIFICALLY DISCLAIMS ANY WARRANTY, GUARANTY, OR REPRESENTATION, ORAL OR WRITTEN, PAST, PRESENT OR FUTURE, OF, AS TO, OR CONCERNING (A) THE NATURE AND CONDITION OF THE SYSTEM INCLUDING, WITHOUT LIMITATION, THE PIPELINES, HYDRANTS, FLUSH VALVES, APPURTENANCES, WATER AND REAL PROPERTY, THE SUITABILITY THEREOF FOR ANY AND ALL ACTIVITIES AND USES WHICH CITY MAY ELECT TO CONDUCT OR THE EXISTENCE OF ANY HAZARD OR CONDITION; (B) THE NATURE AND EXTENT OF ANY RIGHT-OF-WAY, LEASE, POSSESSION, LICENSE, RESERVATION, CONDITION OR OTHERWISE; AND (C) THE COMPLIANCE OF THE SYSTEM OR ITS OPERATION WITH ANY LAWS, ORDINANCES OR REGULATIONS OF ANY GOVERNMENTAL ENTITY OR BODY. CITY ACKNOWLEDGES BY USE OF THE SYSTEM THAT IT HAS AND WILL INSPECT THE SYSTEM AND CITY WILL RELY SOLELY ON ITS OWN INVESTIGATION OF THE SYSTEM AND NOT ON ANY INFORMATION PROVIDED OR TO BE PROVIDED BY OR ON BEHALF OF NAWSC. CITY FURTHER ACKNOWLEDGES THAT THE INFORMATION PROVIDED AND TO BE PROVIDED WITH RESPECT TO THE SYSTEM WAS OBTAINED WITHOUT CONSIDERATION BEING GIVEN AND NAWSC (1) HAS NOT MADE ANY INVESTIGATION OR VERIFICATION OF SUCH INFORMATION; (2) DOES NOT MAKE ANY REPRESENTATION AS TO THE ACCURACY OR COMPLETENESS OF SUCH INFORMATION. ACCESS TO THE SYSTEM IS ALLOWED ON AN "AS IS", "WHERE IS", AND "WITH ALL FAULTS" BASIS, AND CITY EXPRESSLY ACKNOWLEDGES THAT, IN CONSIDERATION OF THIS ACCESS, NAWSC MAKES NO WARRANTY OR REPRESENTATION,

EXPRESSED OR IMPLIED, OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTY OF CONDITION OR FITNESS FOR PARTICULAR PURPOSE WITH RESPECT TO THE SYSTEM OR ANY PORTION THEREOF.

CITY AGREES BY ITS USE OF THE SYSTEM, DIRECTLY OR THROUGH OTHERS, THAT NAWSC SHALL NOT BE RESPONSIBLE OR LIABLE TO THE CITY FOR ANY DEFECT, ERRORS, OMISSIONS, OR ON ACCOUNT OF ANY OTHER CONDITIONS AFFECTING THE SUBDIVISION, AS CITY MAKES USE OF THE SYSTEM "AS-IS", "WHERE-IS", AND "WITH ALL FAULTS". CITY OR ANYONE CLAIMING BY, THROUGH, OR UNDER CITY, HEREBY FULLY RELEASES NAWSC, ITS EMPLOYEES, OFFICERS, DIRECTORS, REPRESENTATIVES, ATTORNEY AND AGENTS FROM ANY COST, LOSS LIABILITY, DAMAGE, EXPENSE, DEMAND, ACTION OR CAUSE OF ACTION ARISING FROM OR RELATED TO ANY DEFECTS, ERRORS, OMISSIONS, OR OTHER CONDITIONS AFFECTING THE SYSTEM. CITY BY THEIR USE OF THE SYSTEM, FURTHER ACKNOWLEDGES AND AGREES THAT THIS RELEASE SHALL BE GIVEN FULL FORCE AND EFFECT ACCORDING TO EACH OF THE EXPRESSED TERMS AND PROVISIONS.

TO THE EXTENT APPLICABLE AND PERMITTED BY LAW, CITY, IN CONSIDERATION FOR USING THE SYSTEM AND AS A MATERIAL INDUCEMENT TO NAWSC FOR ALLOWING SUCH USE, WAIVES THE PROVISIONS OF THE TEXAS DECEPTIVE TRADE PRACTICES-CONSUMER PROTECTION ACT, AS WELL AS ALL OTHER STATUTORY PROVISIONS WHICH MIGHT CREATE A CLAIM AGAINST NAWSC AS A RESULT OF THE USE OF NAWSC'S SYSTEM. ACCORDINGLY, CITY BY AND THROUGH THE BELOW SIGNING REPRESENTATIVES WHO HAVE BEEN GIVEN THE APPROPRIATE AUTHORITY BY THEIR GOVERNING BODIES STATE:

> I WAIVE MY RIGHTS UNDER THE DECEPTIVE TRADE PRACTICES CONSUMER PROTECTION ACT, SECTION 17.41 ET SEQ, BUSINESS AND COMMERCE CODE, A LAW THAT GIVES CONSUMERS SPECIAL RIGHTS AND PROTECTIONS. AFTER CONSULTATION WITH AN ATTORNEY OF MY OWN SELECTION, I VOLUNTARILY CONSENT TO THIS WAIVER.

TO THE EXTENT APPLICABLE AND PERMITTED BY LAW, CITY, BY ITS USE OF THE SYSTEM, DIRECTLY OR THROUGH OTHERS, AGREES TO INDEMNIFY, PROTECT, DEFEND, SAVE AND HOLD HARMLESS NAWSC, ITS EMPLOYEES, OFFICERS, DIRECTORS, REPRESENTATIVES, ATTORNEYS AND AGENTS FROM AND AGAINST ANY AND ALL DEBTS, DUTIES, OBLIGATIONS, LIABILITIES, SUITS, CLAIMS, DEMANDS, CAUSES OF ACTION, LOSSES, COST AND EXPENSES AND TO PAY ALL EXPERTS' AND ATTORNEYS' FEES AND EXPENSES AND COURT COSTS ASSERTED OR INCURRED BY NAWSC AT

ANY TIME AND IN ANY WAY RELATING TO, CONNECTED WITH, OR ARISING OUT OF THE CONDITION OF NAWSC'S SYSTEM AND THE USE OF THE FIRE HYDRANTS OR THE OPERATION, MAINTENANCE AND MANAGEMENT THEREOF, INCLUDING ANY CLAIMS, SUITS, OR CAUSES OF ACTION ARISING FROM ANY NEGLIGENCE, INCLUDING GROSS NEGLIGENCE OF NAWSC AND ITS AGENTS, OFFICERS AND EMPLOYEES AS THEY RELATE TO THE PROVISION OF WATER AND ACCESS TO NAWSC'S SYSTEM UNDER THIS AGREEMENT.

IT IS THE EXPRESS INTENTION OF THE PARTIES THAT THE INDEMNITY PROVIDED FOR IN THIS AGREEMENT IS TO INDEMNIFY AND PROTECT NAWSC FROM THE CONSEQUENCES OF ITS OWN NEGLIGENCE AND GROSS NEGLIGENCE, EVEN WHEN THAT NEGLIGENCE AND GROSS NEGLIGENCE IS FOUND TO BE THE SOLE CAUSE OF THE INJURY, DEATH OR DAMAGES. CITY ALSO WAIVES ALL RIGHTS TO SUBROGATION AGAINST NAWSC.

11. This Agreement is intended to provide NAWSC with all the protections and limitations from liability allowed by the laws as they exist and will exist, including, but not limited to, Texas Water Code §67.0105, and the common law and all the terms and conditions hereof shall be liberally construed to effectuate this purpose and to sustain the validity of this Agreement. The parties agree that this Agreement shall not be construed in favor of or against either party on the basis that the party did or did not author the Agreement. This Agreement constitutes the entire agreement between the parties.

12. This agreement is effective upon execution by the parties and the recordation of Exhibit "A", with the official records of Hidalgo County and continues until terminated by either party in writing, such termination to occur only after written notice by the terminating party at least two (2) months prior to the termination date. All parties may terminate in the event of a default if such default is left uncured for 30 days after giving written notice.

13. Each person, signing below, warrants and represents to the parties to this Agreement, that he has been given full authority to execute this Agreement, such that it binds the party for which he signs to fully fulfill the terms of this Agreement.

14. This Agreement is not executed for the benefit of any third party and its terms shall not be enforceable by or in favor of any person or entity other than the express parties to the Agreement.

15. NAWSC shall have the right to locate the pipe and accessories necessary to provide water for the Fire Hydrants on the Subdivision at a point to be chosen by NAWSC, and shall have access to the Subdivision and equipment constructed by Owner and/or City at all reasonable and necessary times for any purpose with or in the furtherance of its business operations, and upon discontinuance of service, NAWSC shall have the right to remove any of its equipment from the Subdivision. NAWSC may inspect its valves,

piping, and appurtenances to the supply line as well as the Fire Hydrants on an annual basis for a reasonable fee to be set by NAWSC (initially $200.00), which may be increased based on future costs increases to provide this service. Where applicable, and upon notice, City shall have personnel present as necessary to assist in the inspection. NAWSC shall also have access to the Subdivision for purpose of inspecting for possible illegal connections, cross-connections, potential contamination hazards, and illegal lead materials, and City agrees to annual inspections of its own facilities for these conditions.

16. City shall enforce the following restrictions to ensure the public health and welfare. The following undesirable practices are prohibited by State regulations and by this Agreement:

    a. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contaminations shall be isolated from the Fire Hydrants by an air gap or an appropriate backflow prevention assembly in accordance with state regulations.

    b. No cross-connection between the Fire Hydrants and a private water system is permitted. Potential threats to the public drinking water supply shall be eliminated at the service connection by the proper installation of an air gap or an appropriate backflow prevention assembly. Backflow assemblies require annual inspections and testing by a certified backflow prevention assembly tester and documentation of the inspections reflecting proper installation, maintenance, and operation must be provided to NAWSC no later than 30 days after the inspection.

    c. No connection which allows condensing, cooling, industrial process water, or any water of unknown quality to be returned to the Fire Hydrants or the public drinking water supply is permitted.

    d. No pipe or pipe fitting which contains more than 8.0% lead may be used for the installation or repair of the plumbing in the Fire Hydrants.

    e. No solder or flux which contains more than 0.2% lead may be used for the installation or repair of the plumbing in the Fire Hydrants.

17. NAWSC may notify City, as applicable, of any cross-connection or other undesirable practices which have been identified during the initial or subsequent inspection. City shall immediately correct any undesirable practice on the Subdivision. City shall, at its expense, properly install, test and maintain any backflow prevention device required by NAWSC. Copies of all testing and maintenance records shall be provided to NAWSC. Failure to comply with the terms of this Agreement shall cause NAWSC to terminate services or to install, test, and maintain an appropriate backflow prevention device at the service connection at the sole expense of City. Any expenses associated with the enforcement of this Agreement shall be paid to NAWSC upon presentation to City, as applicable.

18. City agrees that the maximum amount of liability to City that may be incurred by NAWSC by virtue of any noncompliance with the terms of this Agreement is limited to the amount of fees paid by City to NAWSC for services provided under this Agreement during the calendar year in which the noncompliance occurs.

19. Any expenses associated with the enforcement of the Agreement shall be paid to NAWSC upon presentation to City, and in compliance with the Texas Prompt Payment Act.

20. Should any amounts to be paid by any party hereto, remain unpaid after the date the payment is due, such unpaid amount shall accrue interest in compliance with the Texas Prompt Payment Act.

21. In the event any litigation arises out of this Agreement between the parties hereto, the non-prevailing party shall pay the prevailing party all reasonable and necessary attorney's fees, expert fees, expenses and costs of court expended or incurred in connection with the litigation pursuant to Section 271.153 of the Texas Local Government Code or similar authority effective at the time of the execution of this Agreement.

22. If any part, term, or provision of this Agreement is held by the courts to be illegal, invalid, or otherwise unenforceable, such illegality, invalidity, or enforceability shall not affect the validity of any other part, term, or provision, and the rights of the parties will be construed as if the part, term, or provision was never part of this Agreement.

23. The Agreement may be supplemented, amended, or modified only by the mutual agreement of the parties. No supplement, amendment, or modification of this Agreement shall be binding unless it is in writing and signed by all parties.

By signing and delivering this Agreement to the appropriate official of NAWSC, the City authorizes completion of this Agreement by filling in the Effective Date below.

IN WITNESS WHEREOF, EXECUTED by NAWSC and City, acting under the authority of their respective governing bodies in multiple originals effective as of the _____ day of _____, 20____.

THE CITY OF EDINBURG

EXHIBIT "B"

Fire Hydrant Installation

Each fire hydrant run-out shall be equipped with a 6" flanged mechanical joint resilient seated gate valve. This valve may be located adjacent to the mainline or between the mainline and the hydrant. Each fitting (Branch Tee, Gate Valve & Hydrant) shall be separately supported by a concrete thrust block including anchor rods. Care must be taken that the hydrant drain be kept clear when pouring concrete. Mainline Tees shall have mechanical joint, flanged fittings. Mega lugs shall also be used at all mechanical joint fittings.
