Mr. Mardoqueo Hinojosa, PE, CFM, CPM, City Engineer
City of Edinburg
415 W. University Drive
Edinburg, Texas 78539

RE: RFQ No. 2026-7 – Professional Engineering Services
Professional Services Agreement

Dear Mr. Hinojosa,

B2Z Engineering, LLC (B2Z) has thoroughly reviewed the City of Edinburg's Professional Services Agreement for Professional Engineering Services cited in RFQ No. 2026-7. B2Z affirms that it satisfies, and plans to maintain, the insurance requirements outlined in the Agreement during the contract period. If chosen, B2Z agrees to sign such an agreement with the City of Edinburg.

Sincerely,

Aisha Gonzalez
President

900 S. Stewart Road, Ste. 2
Mission, TX 78572
(956) 585-3773

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

B2Z Engineering, LLC

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

Edinburg, TX 78539

RE: Statement of Qualifications (SOQ) | Request for Qualifications - Professional Engineering Services
Solicitation No: RFQ 2026-7

Dear Selection Committee Members,

Civil Design Services, Inc. dba CDS Muery is pleased to submit our Statement of Qualifications for the City of Edinburg Request for Qualifications (RFQ No. 2026-7) for Professional Engineering Services.

CDS Muery brings nearly 40 years of experience delivering successful civil infrastructure projects throughout Texas. Licensed by the Texas Board of Professional Engineers (#F-1733) and Texas Board of Professional Land Surveyors (#10049500), our team provides **civil site design, transportation engineering, traffic engineering, fuel storage and dispensing design, subsurface utility engineering, water/wastewater engineering, stormwater planning and design, surveying, and mapping services** and related services to public and private clients. CDS Muery is committed to providing responsive, high-quality engineering services and looks forward to the opportunity to support the City of Edinburg's infrastructure, planning, and capital improvement programs under this contract.

The primary point of contact for this RFQ is **Russell E. Morkovsky, PE, CFM, Principal-in-Charge**. Mr. Morkovsky will serve as CDS Muery's authorized representative for all communications pertaining to this RFQ. Correspondence regarding this submission may be directed to 100 NE Loop 410, Suite 300, San Antonio, TX 78216, phone: 210.581.1111, fax: 210.581.5555, and email: russell.morkovsky@cdsmuery.com.

CDS Muery confirms that no addenda have been issued for this solicitation as of the Statement of Qualifications submission date.

We appreciate your consideration of our qualifications and the opportunity to be considered for inclusion on the City's professional engineering services rotation list. We are confident that our team's technical expertise, local experience, and commitment to client service position us to successfully support the City of Edinburg's current and future engineering needs.

Sincerely,

Russell E. Morkovsky, PE, CFM
Principal
russell.morkovsky@cdsmuery.com

I hereby certify that I am authorized to bind Civil Design Services, Inc. dba CDS Muery to contractual obligations on behalf of the firm.

2

FIRM QUALIFICATION AND EXPERIENCE

FIRM HISTORY

Established in 1988, **Civil Design Services, Inc., dba CDS Muery,** has almost 40 years of experience developing responsible solutions and delivering successful civil infrastructure projects in today's fast-changing world. Our services include **civil site design, transportation engineering, traffic engineering, fuel storage and dispensing design, subsurface utility engineering, stormwater planning and design, water and wastewater engineering, surveying, and mapping services.** Over the past three decades, we have proudly provided civil engineering and surveying services to both private and public sectors. We are licensed through the **Texas Board of Professional Engineers (#F-1733) and Texas Board of Professional Land Surveyors (#10049500)** to provide engineering and surveying services in the State of Texas.

Our team has successfully completed projects for clients including the City of San Antonio (COSA), City of Uvalde, City of Cibolo, City of Hondo, City of Corpus Christi, Bexar County, San Antonio Water System (SAWS), American Electric Power (AEP), CPS Energy, the Texas Department of Transportation (TxDOT), and numerous other local, state, and federal agencies across Texas.

CDS Muery's unique strength lies in our combination of deep local knowledge, strong regional presence, and extensive statewide experience. Our team maintains a well-established presence in San Antonio, Bexar County, and the surrounding **South** and Central Texas region, providing firsthand knowledge of local regulations, permitting processes, infrastructure challenges, and stakeholder expectations.

Our experience serving municipalities, utility providers, transportation agencies, and other public-sector clients allows us to understand the diverse needs of communities ranging from rapidly growing metropolitan areas to smaller rural jurisdictions. This perspective enables us to deliver practical, cost-effective solutions tailored to each client's specific goals and constraints.

In addition to our strong presence in the San Antonio region, CDS Muery has provided professional engineering services throughout Texas, including numerous Gulf Coast and South Texas counties such as:

- Aransas
- Bexar
- Calhoun
- Cameron
- Galveston
- Hidalgo
- Jackson
- Jefferson
- Kenedy
- Kleberg
- Matagorda
- Nueces
- Orange
- Refugio
- San Patricio
- Victoria
- Webb
- Wharton
- Willacy

This broad geographic experience provides our team with a comprehensive understanding of infrastructure planning, design, permitting, funding, and project delivery while maintaining the responsiveness and accessibility of a local partner.

WHY CDS MUERY?

LOCAL KNOWLEDGE

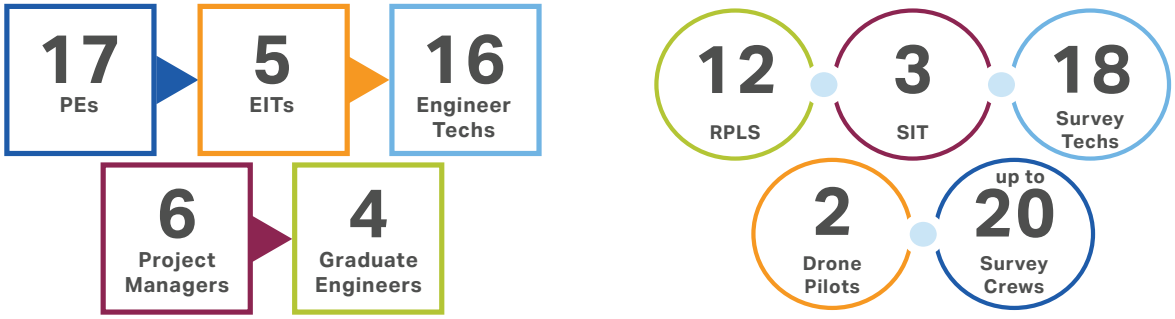
- San Antoino-Based Team
- Coastal Areas and South Texas Experience
- Regional Agency Relatioinships
- Permitting & Development Expertise

YOUR TRUSTED PARTNER

Serving Texas Communities Since 1988

- Nearly 40 Years of Service
- Responsive Project Delivery
- Dedicated Municipal Support

FULL-SERVICE CAPABILITIES



- Civil Site Design
- Water & Wastewater Infrastructure
- Drainage & Floodplain Management
- Transportation Engineering

Backed by nearly four decades of proven performance, CDS Muery combines the responsiveness and familiarity of a Texas based firm with the resources and experience of a statewide practice. Our longstanding relationships with public agencies, knowledge of regional infrastructure challenges, and successful delivery of complex capital improvement projects uniquely position us to support the City's immediate needs while advancing its long-term growth and development objectives. Through extensive experience managing on-call engineering services and rotational contracts for municipalities throughout Texas, we understand the importance of responsiveness, flexibility, and efficient project delivery.

CDS Muery has the depth and breadth of staff to support surveying, small-scale civil design, general civil engineering, transportation, drainage, and water/wastewater infrastructure projects. Our team is equipped to rapidly allocate resources and provide the technical expertise necessary to meet evolving project demands, from routine assignments to complex infrastructure initiatives. Supported by dedicated Principals-in-Charge, Project Managers, and technical leads, we provide technical excellence, clear communication, a single point of accountability, and the resources needed to consistently deliver high-quality projects on schedule and within budget.

STAFFING AND AVAILABILITY

The project team will be staffed from CDS Muery's San Antonio Headquarters at 100 NE Loop 410, Suite 300, San Antonio, Texas 78216, allowing for efficient coordination and timely on-site support. With more than 145 employees, including **17 Licensed Professional Engineers and 12 Registered Professional Land Surveyors**, CDS Muery has the resources to support assignments of varying size and complexity. Our flexible staffing approach pairs each project with a dedicated project manager who coordinates the appropriate engineering, surveying, and technical staff to efficiently deliver both small task orders and complex infrastructure projects.

PROFESSIONAL OVERVIEW

Mr. Morkovsky has 34 years of civil and municipal engineering experience. He serves as Principal, Senior Project Manager and is responsible for providing management and technical direction for stakeholder coordination, subsurface utility engineering, roadway analysis and design, stormwater drainage analysis and design, and other civil engineering discipline related projects.

PROJECT EXPERIENCE

Lajitas Golf Resort Master Planning and Engineering, Principal-in-Charge | Brewster County, TX – Served as Principal-in-Charge and Senior Project Manager for the master planning and infrastructure development of the 20,000+ ac Lajitas Golf Resort community along the Rio Grande. Led strategic planning workshops with ownership to identify development opportunities, prioritize infrastructure improvements, establish multi-year capital programs, and prepare planning-level cost estimates. Provided land planning and engineering services for resort development projects, including consultation on a proposed mountain-side Par-3 golf course. Directed utility mapping, water system investigations, UAV aerial mapping, and infrastructure feasibility studies to support continued growth and operations of the resort community.

Bexar County Flood Control Program, Luckey Road Improvements Preliminary Engineering Report, Project Manager | Bexar County, TX – Mr. Morkovsky was responsible for a drainage study and preliminary engineering report for this project in southwest Bexar County which developed and evaluated various solutions to provide unflooded access to and eliminate flooding of residences along Tributary 11 of Elm Creek within the Medina River watershed. Mr. Morkovsky evaluated various potential solutions consisting of buyouts of properties, channel improvements, and roadway improvements, including the replacement of an existing low water crossing with a larger, box culvert structure. He directed the hydrologic and hydraulic analyses of Tributary 11 to provide updated base flood elevations, and to simulate proposed road and drainage improvements.

City of San Antonio (COSA), Eisenhauer Drainage, Principal-in-Charge | San Antonio, TX – This project entailed channel improvements to relieve flooding to affected areas during major storm events at street crossings. CDS Muery prepared a Limited Drainage Study of Northwood Channel to identify and recommend drainage improvements that would satisfy the ultimate development condition in this 383-acre watershed. The study focused on drainage infrastructure improvements downstream of Eisenhauer Road to the confluence with a tributary to Salado Creek immediately east of Harry Wurzbach. The proposed ultimate drainage improvements included constructing an underground bypass system along Pike Road and Albin Drive, outside the existing channel ROW. (Professional Services 2018; Construction 2023)

City of Fair Oaks Ranch, Storm Water Drainage Improvements Preliminary Engineering Report, Project Manager | Fair Oaks, TX – This project consisted of the analysis of four (4) areas which experience drainage problems within the City of Fair Oaks Ranch. The areas include residential lot flooding due to excessive sheet flow, street and lot flooding from improper drainage at

RUSSELL E. MORKOVSKY, PE, CFM
PRINCIPAL-IN-CHARGE

an intersection, and two areas where existing, natural channels have inadequate capacity. Mr. Morkovsky directed the analysis of each of these areas using various modeling techniques. He then developed and evaluated numerous solutions for each area, and recommended specific improvements which provided the optimum balance of cost and effectiveness.

City of Nederland, Drainage Analysis of the Upper Main 'B' and 'C' Channels, Project Manager | Jefferson County, TX – Mr. Morkovsky was responsible for evaluation of drainage improvement alternatives for these two channels' watersheds. Mr. Morkovsky used HEC-1 to develop inflow hydrographs and HEC-2 (for 'B') and HEC-RAS (for 'C') to route the flows along each channel and determine water surface profiles for each. Both channels 'B' and 'C' drain to a large 2,240,000-gpm storm water pump station. Within the city, some residential areas adjacent to the main channel and/or its laterals experience frequent flooding. The purpose of this analysis was to determine whether the cause of flooding was due to inadequate storm sewer capacity, inadequate channel capacity, or inadequate pumping capacity. Proposed improvements included both channel modifications and increased storm sewer/box culvert capacity. Drainage reports were then prepared for each of the two systems analyzed.

City of Victoria, Hydrologic & Hydraulic Study of Mayfair Terrace Subdivision, Project Manager | Victoria, TX – Mr. Morkovsky led a drainage study to identify the causes and extent of localized flooding within an established residential neighborhood. The study utilized integrated 1D/2D hydraulic modeling to simultaneously evaluate surface and subsurface drainage across a 138-acre watershed, including approximately 13,550 LF of storm sewer, 79 stormwater inlets, and 875 LF of earthen channel. Under his direction, multiple drainage improvement alternatives were developed and evaluated for effectiveness and cost, providing the City with actionable solutions to reduce flooding impacts.

Grammercy Village Subdivision, Project Director | San Antonio, TX – CDS Muery provided QL-B utility investigation and 4 QL-A test holes, in Grammercy Village. The client wanted to get X,Y,Z data on a 30" gas transmission pipeline running through their new subdivision. CDS Muery coordinated with the facility owner, Enterprise, to mark and expose their pipeline. Deliverables consisted of a signed/sealed test hole data report and CADD file depicting the pipelines horizontal and vertical location.

Pedcor Creek Bend Apartments Phase 1, Project Director | San Antonio, TX – To support the design of offsite utilities for this land development project, SUE was conducted to map out a SAWS force main sewer line in order for the engineering team to design two new private force mains to parallel the existing one. Hydrovac services were utilized.

New Centerpoint Energy Gas Main, Project Director | Buda, TX – CDS Muery conducted a QL-B utility investigation along a 1.7-mile alignment in Buda, TX for the placement of a new Centerpoint Energy gas main. More the 50,000 LF of underground utility facilities were marked during the investigation. Deliverables consisted of utility CADD files.

EDUCATION
M.S.C.E., University of Texas at San Antonio, 1999

B.S., Bioenvironmental Science, Texas A&M University, 1995

PROFESSIONAL OVERVIEW

Mr. Ludwig will serve as the **Project Manager, Civil Engineering Lead, Hydrology and Hydraulics Lead, and Erosion and Sediment Control Design Lead** for this project. He has significant experience working on roadway/street design, flood study, and drainage projects for cities, counties, as well as private clients. His experience includes performing hydrology storm water runoff calculations and hydraulic analysis of culverts, storm sewer systems, channels, natural floodplains, and bridge structures. He has also performed stormwater runoff calculations and provided hydraulic analysis of culverts, storm sewer systems, channels, natural floodplains, and bridge structures. Mr. Ludwig has over 24 years of experience in the design and construction of groundwater remediation, water works, sanitary and storm sewer improvement projects. He has worked on design teams and provided technical design support and construction oversight for various large scale projects and specializes in civil engineering design, with an emphasis in hydrology and hydraulic modeling.

PROJECT EXPERIENCE

American Electric Power (AEP), North Edinburg Substation CAD Bank Expansion | Edinburg, TX – Served as the civil design lead for a new 280-foot by 420-foot electrical substation pad expansion. Managed the design of approximately 720 linear feet of access roadway, 900 linear feet of concrete drainage channel with traffic-rated crossing, and associated stormwater detention facilities. Prepared the Hidalgo County Drainage District No. 1 (HCDD #1) Stormwater Management Plan and completed platting services for the 43.7-acre North Edinburg Subdivision development.

American Electric Power (AEP), Closner Substation | Edinburg, TX – Provided hydraulic modeling and drainage design services for the storm drainage collection system and detention pond facilities. Prepared and secured HCDD #1 approval of the project's drainage report. Directed entitlement and permitting efforts, including rezoning a 5.38-acre site from Agricultural (AG) to Industrial Light (IL), preparing the subdivision plat, and representing the client before the Planning and Zoning Commission and City Council.

American Electric Power (AEP), North Edinburg 345-kV Substation Expansion and Permitting | Edinburg, TX – Led zoning, platting, and municipal permitting efforts for a new electrical substation development. Prepared and obtained approval for rezoning a 3.02-acre tract from Agricultural (AG) to Industrial Light (IL), completed the 3.02-acre North Edinburg Subdivision plat, and represented the client throughout the Planning and Zoning Commission and City Council approval process.

American Electric Power (AEP), North Edinburg 138-kV Substation Expansion | Edinburg, TX – Supported delivery of a substation expansion project involving a 77-foot by 50-foot equipment pad addition for 138-kV infrastructure upgrades. Coordinated with City of Edinburg staff during pre-development review, worked with TxDOT to verify right-of-way requirements, and prepared a Unified Development Code setback variance application. Represented the client before the Zoning Board of Adjustment and successfully secured project approvals.

JUAN LUDWIG, PE, CFM
PROJECT MANAGER

Delgar Foods, LLC, Delia's Restaurant Parking Lot Expansion | Edinburg, TX – Mr. Ludwig managed platting and civil design services for a commercial parking lot expansion project. Prepared the replat of West View III Subdivision and site civil plans supporting a parking lot and drive-through expansion that added 44 parking spaces and extended drive-through circulation lanes to improve site operations and customer access.

Bexar County, Evans Road LWC (SC-2), Hydrology / Hydraulics Engineer | San Antonio, TX – Mr. Ludwig utilized USACE HEC-RAS V4.0 modeling software to assess hydraulic conditions of the existing Evans Road low water crossing and the design for the proposed 350 Ft. Elm Waterhole Creek Bridge structure. Mr. Ludwig prepared and submitted Nationwide 14 PCN application, Bexar Co. Floodplain Development Permit, Water Pollution Abatement Plan and CLOMR documents for the project.

Bexar County, Henze Road LWC (SA-47), Design Engineer | San Antonio, TX – Project included the improvement of three existing low-water crossings in South Bexar County with box culverts along Tributary E to the San Antonio River. Mr. Ludwig provided the HEC-HMS modeling to establish flow conditions for the project and HEC-RAS modeling for the project design and FEMA CLOMR requirements. He was also responsible for permitting coordination efforts with Bexar County, AECOM, and SARA.

City of San Antonio (COSA), Eisenhauer, Engineer Design Support | San Antonio, TX – Mr. Ludwig currently serves as the Engineer Design Support and will also perform Construction Phase Services. This project entailed channel improvements to relieve flooding to affected areas during major storm events at street crossings. CDS Muery prepared a Limited Drainage Study of Northwood Channel to identify and recommend drainage improvements that would satisfy the ultimate development condition in this 383-acre watershed. The study focused on drainage infrastructure improvements downstream of Eisenhauer Road to the confluence with a tributary to Salado Creek immediately east of Harry Wurzbach. The proposed ultimate drainage improvements including constructing an underground bypass system along Pike Road and Albin Drive, outside the existing channel ROW.

City of San Antonio (COSA), San Pedro/Huisache Area Drainage Phase I, Staff Engineer | San Antonio, TX – Project included the development of PS&E for 1,400 LF of 10'x7' single box culvert in public streets and railroad right-of-way with the attendant water and sewer replacements. Project also included street reconstruction with drainage improvements.

City of San Antonio (COSA), Goliad Road - SE Military to Loop 410, Project Engineer | San Antonio, TX – The reconstruction and widening of Goliad Road from SE Military to Loop 410 Access Road (1.77 miles), with extensive storm sewer improvements. He shared the drainage responsibilities providing storm sewer design and system modeling for 19 separate storm drain systems. Mr. Ludwig also provided the HEC-RAS modeling on the outfall channel establishing tail water elevations for the storm drain models.

City of Uvalde, City Engineer, Design Engineer | Uvalde, TX – Mr. Ludwig assisted with design engineering during this On-Call Engineering Contract. Services provided to the City included, but were not limited to: subdivision plat review and coordination; council and public and zoning meeting presentations and discussion support; Zoning Map preparation; street and drainage reconstruction projects; street sealcoat and overlay projects; drainage remediation projects; and flood plain studies.

EDUCATION
B.S.C.E, Texas A&M University, 1986

PROFESSIONAL OVERVIEW

Mr. Rothe has over 39 years of experience in managing and designing a wide range of projects, including site civil design of public and private facilities, highways and roadways, drainage structures, street resurfacing, rehabilitation and reconstruction, utility rehabilitation, and municipal capital improvement projects. He has been a City Engineer for over a decade to various municipalities. He has experience managing permits with local, state, and federal permitting agencies.

PROJECT EXPERIENCE

City of San Antonio, Peggy Drive Road & Drainage, Project Manager/ Sr. Project Engineer | San Antonio, TX – This project consists of the drainage and roadway reconstruction. CDS Muery is providing surveying services and engineering design. These services include design surveying, utility coordination, and design for streets, drainage,pavement markings, signage, traffic control, storm water pollution prevention,and tree preservation/ mitigation. The Eastgate Subdivision experiences extreme street ponding due to lack of positive drainage, street slopes, and an inadequate drainage system of silted bar ditches, an undefined earthen channel, and undersized culvert pipes. The project includes providing improved drainage facilities that will require various inlets and underground piping. The construction will include a street typical section of 30-foot pavement with concrete curbs, concrete sidewalks (5' each side) and concrete driveway approaches.

City of San Antonio, Callaghan Road Reconstruction, Project Manager/ Sr. Project Engineer | San Antonio, TX – The project was developed as a LAM project for CoSA with TxDOT oversight. Reconstruction of Callaghan Road from Centerview Drive to Evers Road. Mr. Rothe was responsible for coordinating project scoping and contracting and management of the project and subconsultants. He was also responsible for the development of PS&E, ADA sidewalks, pedestrian/bicycle facilities including a 10 ft, multi-use path, traffic signals, retaining walls, noise walls, coordination of joint bid utilities, TxDOT/FHWA reviews, bid package preparation, and construction administration for the project. Specific design responsibilities included the roadway design of the project.

Bexar County, Highland Oaks Subdivision, Project Manager | San Antonio, TX – The project consisted of the design and construction of seven subdivision streets within the Highland Oaks Subdivision. The street and drainage improvements included a 32' rural roadway section, the reestablishment of roadway alignments, the reestablishment of ROW limits, and providing appropriate drainage facilities. These upgrades will significantly increase roadway functionality and enhance public safety/mobility.

City of Uvalde Water Systems Improvements, TxCDBG Grant Project (2019- 2020), Project Manager | Uvalde, TX – Mr. Rothe led the upgrade of Uvalde's water infrastructure, overseeing the replacement of 2,618 linear feet of 6-inch water mains. His comprehensive management included design development, stakeholder coordination, and complete bid-through-construction administration, ensuring successful project delivery while meeting all grant requirements.

JOHN E. ROTHE, PE, CFM
ROADWAY & TRANSPORTATION DESIGN LEAD

City of San Antonio (COSA)/San Antonio Water System (SAWS) Joint Bid, Eisenhauer Road/Northwood - Devonshire Area Phase I | San Antonio, TX – This project consisted of the engineering design, bid, and construction phase services as part of the City of San Antonio (COSA) 2017 Bond drainage improvement project. The drainage improvements included channel improvements to relieve flooding to` affected areas during major storm events at street crossings and an underground bypass system outside of the existing channel ROW. Water and sanitary sewer main replacements were also designed by CDS Muery as a joint bid with this COSA bond project.

Bexar County, Evans Road LWC (SC-2), Project Manager | San Antonio, TX – Construction of a 350 ft, 4-lane bridge over Elm Waterhole Creek. Mr. Rothe was responsible for scope definition and contracting, and management of the project and sub-consultants. He also managed the PS&E, attended multiple public meetings, participated in meetings with local residents, and was the engineer for construction phase services. Specific design responsibilities included the roadway design of the project.

Bexar County, Evans Road Phase 1, Project Manager/Sr. Project Engineer | San Antonio, TX – Alamo RMA, MPO funded project included the reconstruction and widening of 1.5 miles of a two-lane county road to a five-lane urban arterial. Mr. Rothe was responsible for scope definition and contracting, and management of the project and subconsultants. Mr. Rothe managed the PS&E, attended public meetings, participated in meetings with local residents, and was the engineer for construction phase services. Specific design responsibilities included the roadway design of the project.

Delgar Foods, LLC, Delia's Restaurant Parking Lot Expansion | Edinburg, TX – Principal-in-Charge for platting and civil design services for a commercial expansion project. Prepared the replat of West View III Subdivision and site civil plans supporting a parking lot and drive-through expansion that added 44 parking spaces and extended drive-through circulation lanes to improve site operations and customer access.

City of Cibolo, On-Call Engineering | Cibolo, TX – CDS Muery currently serves as one of the on-call engineering firms for the City of Cibolo and provides a wide variety of engineering and surveying services. Mr. Rothe was on the roadway reconstruction of Bolton Road and Santa Clara Road adjacent to the $400 million AW Texas, Inc., plant.

City of Uvalde, City Engineer | Uvalde, TX – Mr. Rothe currently serves as the City Engineer. He has worked with the City since 2003 providing a wide variety of engineering and surveying services.

City of Hondo, City Engineer | Hondo, TX – Mr. Rothe was the City Engineer for the City of Hondo for 19 years. During this time, he provided a wide variety of engineering and surveying.

DIEGO LEYVA, PE, PTOE, RSP1

TRAFFIC ENGINEERING SERVICES & TRAFFIC SIGNAL DESIGN LEAD

15 YEARS OF EXPERIENCE

TENURE WITH THE FIRM
2 Years

LICENSES / CERTIFICATIONS
Registered Professional Engineer, State of Texas #123378 (2016)
PTOE Certification No. 4193 (Exp. 03/2029)

RSP1 Certification No. 1055 (Exp. 07/2029)

TxDOT PreCertifications - 14 Categories

EDUCATION
B.S.C.E, Texas A&M University

PROFESSIONAL OVERVIEW

Mr. Leyva has over 15 years of experience in transportation and traffic operations, including traffic signal studies, traffic signal warrant analysis, speed zone studies, origin & destination studies, parking supply & demand studies, travel time & delay studies, capacity analysis studies, traffic safety studies, traffic projections, traffic signal timing studies, traffic operations evaluations, sign & pavement markings, traffic control plans, traffic signal design, illumination design, ITS planning studies & design, traffic right of way permits, roadway design, utility design, and drainage design. Diego has designed over 120 new or modified traffic signals, designed over 200 miles of sign and pavement markings, developed over 100 traffic studies for a variety of clients, reviewed over 500 plats, reviewed over 70 public improvement plans, and reviewed over 50 bond capital improvement projects. Some of his clients include Texas Department of Transportation, City of Houston, City of Austin, City of San Antonio, City of New Braunfels, and several private clients.

PROJECT EXPERIENCE

Corpus Christi Regional Transportation Authority (CCRTA), ADA Bus Stop Improvements Citywide, Assistant City Traffic Engineer | Corpus Christi, TX – Diego performed the traffic review consisting of determining if the ADA improvements met design guidelines, and if these improvements had the correct pavement/sidewalk repair per City of Corpus Christi Street cut requirements.

City of Corpus Christi, Staples Street, Midblock Pedestrian Crossing, Assistant City Traffic Engineer | Corpus Christi, TX – Diego designed a midblock pedestrian crossing to provide CCRTA bus riders a safer crossing between two bus stops on each side of Staples Street. The midblock crossing included Pedestrian Rectangular Rapid Flashing Beacons, ADA ramps, signs, and pavement markings.

City of Corpus Christi, Gollihar Road, Bus Stop Adjustments for Bond Project, Assistant City Traffic Engineer | Corpus Christi, TX – Diego worked on traffic engineering review for the Bond Project Gollihar Road from Greenwood Drive to Crosstown Expressway. As part of the traffic review, Diego coordinated with Corpus Christi Regional Transportation Authority (CCRTA) to discuss how bus riders will cross Gollihar Road to determine the safest bus stop locations where bus riders use signalized intersections and midblock pedestrian crossings.

City of Corpus Christi, Traffic Control Plan for Corpus Christi Regional Transportation Authority (CCRTA), Southside Transit Station, Assistant City Traffic Engineer | Corpus Christi, TX – As part of the ROW management, Diego coordinated with the contractor doing a street cut and installing underground utilities for the proposed Village at McArdle apartment complex development next to the CCRTA Southside Transit Station. The underground utility installation required a full street-width street cut. This street cut required a street closure and traffic control coordination to provide local access only with police officers to keep the CCRTA Southside Transit Station without interruption of service.

DIEGO LEYVA, PE, PTOE, RSP1
TRAFFIC ENGINEERING SERVICES & TRAFFIC SIGNAL DESIGN LEAD

Texas Central High-Speed Railway, Texas High Speed Rail, Senior Traffic Engineer | Houston, TX – The project involved a 240-mile bullet train between the cities of Dallas and Houston, divided into 10 segments from Dallas to Houston. Diego worked on preparing Ready for Estimate (RFE) deliverables in traffic engineering on segment 10. This segment consisted of a 9-mile stretch from west of Sam Houston Beltway 8 to the Houston Station at Northwest Mall. On this segment, the high-speed rail started in a tunnel under Beltway 8, then crossed the UPRR tracks, and then continued along Hempstead Road over a viaduct to the train station. The assignment consisted of developing Schematic Roll Plots for Maintenance of Traffic (MOT), Signing and Pavement Markings, and developed quantities for Traffic Signals.

TxDOT San Antonio District, Traffic Signal Design, FM 1346 at Dabbling Road/Stuart Road, Traffic Services Manager | Bexar County, TX – The project consisted of the intersection reconstruction of Wurzbach Road at Vance Jackson Road. Diego worked on the traffic signal design, and temporary signal design.

City of San Antonio (COSA), Harry Wurzbach at Austin Highway, Single Point Urban Interchange (SPUI), Senior Project Manager | San Antonio, TX – The project consisted of the construction of a Single Point Urban Interchange (SPUI) on Harry Wurzbach Road at Austin Highway. Diego worked on the traffic signal design, signs, and pavement markings for the proposed SPUI which included signalized crosswalks and bike lanes within the interchange.

City of San Antonio (COSA), City Wide Sign Inventory, Senior Project Manager | San Antonio, TX – The project consisted of assisting the City of San Antonio Public Works department with sign inventory services to install 8,792 new signs for the various city programs including SMP 2023, SMP 2024, and Pedestrian Safety 2025.

City of San Antonio (COSA), Traffic Engineering Specifications, Traffic Project Manager | San Antonio, TX – As a subconsultant for Camacho Hernandez & Associates, Diego worked in preparing the new Traffic Engineering Specifications in coordination with City of San Antonio Public Works Traffic staff.

JEFF RECK, PE, CFM, CDT, CCCA

Certified Floodplain Manager, Texas No. 1044-06N

Construction Document Technologist (CDT) - CSI

Certified Construction Contract Administrator (CCCA) - CSI

EDUCATION
B.S. Agricultural Engineering, Texas A&M University, 1998

ASSOCIATIONS
Water Environment Association of Texas (WEAT)

Texas Floodplain Management Association (TFMA)

Underground Construction Technology Association

PROFESSIONAL OVERVIEW

Mr. Reck has over 27 years of experience in the planning, design, permitting, review, and management of water, wastewater, and environmental projects. His wastewater system expertise includes route and capacity studies, large- and small-diameter sewer main rehabilitation by cured-in-place pipe (CIPP), sewer main replacement by pipe bursting, open cut, and boring methods; new sewer pipeline installations, lift stations, and force mains. His water expertise includes potable water supply and distribution mains, public water supply wells, ground and elevated storage tanks, service pump stations, hydropneumatic tanks, public water systems, and fire water mains.

PROJECT EXPERIENCE

Seguin 24 Inch SH46 Western Water Main | Seguin, TX – CDS Muery is a subconsultant to Kimley-Horn and Associates, Inc., on this approximately 3.80-mile water main. The project includes a Level “C” & “D” SUE investigation through the entire 3.8-mile route of a proposed 24” water transmission main running through the City of Seguin. Level “A” services for up to forty-five test hole locations are also being performed to identify the horizontal and vertical location of existing critical utilities crossing the selected alignment. Mr. Reck provides SUE team oversight, management, quality control reviews, and engineering certifications for the deliverables.

San Antonio Water System (SAWS), 2023 Water Main Replacement Project 5, Project Manager & Engineer of Record | San Antonio, TX – This project was the open-cut replacement of approximately 4,400 LF of 6- to 12-inch diameter HDPE water mains and 15,900 LF of 6- to 12-inch diameter PVC water mains. Scope also included removal and proper disposal of existing asbestos-cement water lines, installation of temporary water mains to maintain continuous service, and relocation of customer service connections from rear alley alignments to fronting streets.*

San Antonio Water System (SAWS), Redland Road Water and Sewer Adjustments, Project Manager & Engineer of Record | San Antonio, TX – Designed adjustments to existing potable water and sewer mains to accommodate storm drainage and roadway improvements. Developed a detailed phasing plan for water main installation within the intersection of Jones Maltsberger Road and Redland Road to maintain two-way traffic at all times and developed plans for a temporary water main to minimize water outages for the nearby school and church.*

San Antonio Water System (SAWS), E-74 Rosillo Creek Sewer, Project Manager And Engineer of Record | San Antonio, TX – Open cut installation of approximately 3,000 LF of new 60” diameter in-line storage pipe, 73 LF of new 30” diameter sewer main, and 353 LF of new 8” diameter sewer main, and a new access road alongside the new sanitary sewer main. The new in-line storage pipeline replaced an existing 27” diameter sewer main along a new alignment. A new storage outlet structure was designed with an orifice plate to control the flow released to reduce sanitary sewer overflows downstream. A reinforced concrete saddle bridge was also constructed over the existing Citgo pipeline due to its shallow depth of cover at the roadway

JEFF RECK, PE, CFM, CDT, CCCA
WATER, WASTEWATER, & UTILITY DESIGN LEAD

crossing. Mr. Reck managed the utility coordination team for this project, including the permitting for a Flint Hills Resources petroleum pipeline, and a Citgo Energy pipeline. The project also included a new maintenance road for access to the storage outlet structure including a new driveway from TxDOT ROW (IH-35 access road). A hydraulic model was developed to evaluate the hydraulic performance of several alternatives and confirm the optimal storage pipe and orifice size. Significant coordination with the property owner, developer, utility companies, and TxDOT were required for this project. A Phase 1 and Phase 2 ESA, Cultural Resources Survey, Endangered Species Habitat Assessment, and a Waters of US Determination were completed for this project. COSA Stormwater, floodplain, and trees permits were obtained for the project prior to construction.*

San Antonio Water System (SAWS), Expanded Carrizo Wellfield, Project Manager And Engineer of Record | San Antonio, TX – Design of approximately 2.3 miles of new 12" to 24" high-density polyethylene raw water collection system piping and approximately 366' of 24" to 36" steel casing to be installed by jack and bore methods. The project also included the design of access roadways and well site improvements. Mr. Reck was the Project Manager for pipeline, topographic surveying, roadway design and well site improvements design and the Project Engineer for pipeline layout and design.*

San Antonio Water System (SAWS), West Avenue Water Main Replacement, Project Manager | San Antonio, TX – This project entailed open cut installation of 2,134 LF of new 12" and 16" HDPE water main and associate service reconnections along West Avenue and Jackson Keller Road. Mr. Reck was responsible for the design and construction of the project and provided Quality Control review of the engineer's opinion of probable construction cost estimates for the entire project.*

Austin Water Utility, Bryker Road Water and WW Replacement Project, Project Manager And Engineer of Record | Austin, TX – This project entailed the open cut replacement of approximately 1,800 LF of existing 6" cast iron water line and 1,080 LF of existing 6" wastewater line with new 8" water and wastewater pipe and associated valves, fittings, fire hydrants, and manholes. The new pipe was replaced along new alignments within the City street right-of-way (ROW) that were already heavily congested with existing utilities. Extensive utility coordination was required with Google Fiber and Texas Gas Company for placement of the new water and sewer mains to avoid conflicts with the new and proposed utilities. Mr. Reck managed all phases of the project, including management of sub-consultants, and utility coordination.*

City of Helotes, Water and Sewer Line Project, Project Manager | Helotes, TX – This project included installation of 1.33 miles of new 12" C900 PVC water main and associated appurtenances. Mr. Reck coordinated and managed the work of the subconsultants responsible for archaeological investigations, U.S. Army Corps of Engineers permitting, threatened and endangered species habitat assessments, geological assessments for TCEQ SCS Plans, and USFW karst feature investigations and assisted with design of the water and sewer main for the project and coordination/permitting with TxDOT.*

PREVIOUS PROJECT EXPERIENCE WITHIN THE CITY OF EDINBURG

AMERICAN ELECTRIC POWER (AEP) NORTH EDINBURG SUBSTATION CAD BANK EXPANSION

Mr. Ludwig oversaw the preparation of site civil engineering plans for a 280' x 420' station pad, including the design of approximately 720 LF of access roadway, 900 LF of concrete conveyance channel (10-foot bottom width), a traffic-rated crossing, and associated stormwater detention facilities. He also directed the preparation of the Hidalgo County Drainage District No. 1 Storm Water Management Plan and the minor plat for the 43.7-acre North Edinburg Subdivision development.

AMERICAN ELECTRIC POWER (AEP) CLOSNER SUBSTATION

Mr. Ludwig provided drainage and land development services for the development of the AEP Closner Substation. His responsibilities included performing hydraulic modeling of the storm drain collection system and site detention pond, preparing an HCIDD No. 1-approved drainage report, and managing zoning and entitlement efforts. Mr. Ludwig successfully led the rezoning of a 5.38-acre parcel from Agricultural (AG) to Industrial Light (IL), prepared the final plat, and represented the client before the Planning and Zoning Commission and City Council, securing the necessary approvals for project development.

DELIA'S PARKING LOT EXPANSION

Mr. Ludwig and Mr. Rothe led the civil engineering and platting services for a commercial site expansion at the Delia's restaurant location. Their responsibilities included preparing the replat of a 0.779-acre parcel to accommodate proposed drive-thru and parking lot improvements. They developed the site civil plans and specifications for the project, which added 44 parking spaces and incorporated 22-foot-wide extended drive-thru lanes to enhance site access, circulation, and overall operational efficiency. Through their coordination and design efforts, the project successfully supported the owner's expansion objectives while meeting applicable municipal development requirements.

AMERICAN ELECTRIC POWER (AEP) NORTH EDINBURG 345-KV SUBSTATION EXPANSION AND PERMITTING

Mr. Ludwig managed entitlement and permitting services for the AEP North Edinburg Substation development. He prepared and submitted rezoning applications for a 3.02-acre parcel, facilitating the conversion from Agricultural (AG) to Industrial Light (IL) to accommodate critical electrical infrastructure improvements. Mr. Ludwig also prepared the subdivision plat and served as the client's representative throughout the Planning and Zoning Commission and City Council approval processes, successfully obtaining all required entitlements.

AMERICAN ELECTRIC POWER (AEP) NORTH EDINBURG 138-KV SUBSTATION EXPANSION

Mr. Ludwig supported the expansion of the AEP North Edinburg 138-kV Substation by providing civil engineering design, permitting, and agency coordination services. He designed a 77-foot by 50-foot substation pad expansion to support equipment upgrades and coordinated pre-development meetings with the City of Edinburg. His responsibilities included coordinating with TxDOT to verify right-of-way limits, preparing a variance request related to setback requirements under the City's Unified Development Code, and representing the client before the Zoning Board of Adjustment. Through his efforts, the project secured the necessary approvals to proceed with construction.

REQUIRED FORMS

NON-COLLUSION AFFIDAVIT

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

NON-COLLUSION AFFIDAVIT

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____

SENATE BILL 19 VERIFICATION

I, Russell E. Morkovsky, PE, CFM, Principal, the undersigned representative of Civil Design Services, Inc. CDS Muery, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

SENATE BILL 19 VERIFICATION

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

NON-COLLUSION AFFIDAVIT

CITY OF EDINBURG **NONCOLLUSION AFFIDAVIT**

NONCOLLUSION AFFIDAVIT OF PRIME BIDDER

STATE OF TEXAS

COUNTY OF HIDALGO

Russell E. Morkovsky, PE, CFM, being first duly sworn, deposes and says that: *(Name)*

(1) He is President of **Civil Design Services, Inc. dba CDS Muery,** the Bidder that has submitted the attached Bid; *(Company)*

(2) He is fully informed respecting the preparation and contents of the attached Bid and of all pertinent circumstances respecting such Bid;

(3) Such Bid is genuine and is not a collusive or sham Bid.

(4) Neither said Bidder nor any of its officers, partners, owners, agents, representatives, employees or parties in interest , including this affiant, has in any way colluded, conspired, connived or agreed directly or indirectly with another Bidder, firm or person to submit a collusive or sham Bid in connection with the Contract for which the attached Bid has been submitted or to refrain from bidding in connection with such contract, or has in any manner, directly or indirectly sought by agreement or collusion or communication or conference with any other Bidder, firm or person to fix the price or prices in the attached Bid or of any other Bidder, or to fix an overhead, profit or cost element of the Bid price or the Bid price of any other Bidder, or to secure through any collusion, conspiracy, connivance or unlawful agreement any advantage against the **CITY OF EDINBURG**, or any person interested in the proposed Contract; and

(5) The price or prices quoted in the attached Bid are fair and proper and are not tainted by any collusion, conspiracy, connivance or unlawful agreement on the part of the Bidder or any of its agents, representatives, owners, employees, or parties in interest, including affiant.

CONFLICT OF INTEREST QUESTIONNAIRE

CONFLICT OF INTEREST QUESTIONNAIRE — FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY
Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

Civil Design Services Inc., dba CDS Muery

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

None

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

Colliers Engineering & Design

July 14, 2026

City of Edinburg
Mr. Mardoqueo Hinojosa, PE, City Engineer
415 W. University Drive
Edinburg, TX 78539

RE: Professional Engineering Services, RFQ #2026-7

Dear Mr. Hinojosa and Members of the Selection Committee:

Colliers Engineering & Design ("CED") is pleased to submit our Statement of Qualifications to the City of Edinburg (the "City") for consideration as part of the City's rotation list of qualified engineering firms for Professional Engineering Services. We understand the City seeks qualified firms to provide on-call engineering support for a variety of capital improvement projects and city programs during the two-year contract term of October 1, 2026, through September 30, 2028.

The CED Advantage

CED is a nationally recognized multidisciplinary consulting firm providing comprehensive engineering, planning, environmental, and infrastructure services to municipalities, public agencies, and private-sector clients. Our team combines local responsiveness with the resources of a large organization, enabling us to efficiently deliver projects ranging from focused assignments to complex, multi-disciplinary capital improvement programs. Our professionals possess the technical expertise, project management capabilities, and commitment to client service necessary to support the City's evolving infrastructure needs.

We understand the City may require assistance in a broad range of engineering disciplines, including street and utility infrastructure, pavement management, water and wastewater systems, structural engineering, hydrology and hydraulics, transportation and traffic engineering, environmental services, civil engineering, and MEP engineering. Our team is well-positioned to provide these services and to assist the City with planning, design, permitting, stakeholder coordination, grant support, construction-phase services, and ongoing engineering consultation. CED has built a reputation for delivering high-quality engineering solutions on schedule and within budget.

Our proposed Project Manager, Guillermo Benavides, PE, ENV SP, will lead this effort from our Houston office. With more than 36 years of experience in civil engineering and stormwater infrastructure, Mr. Benavides has successfully managed complex drainage and public infrastructure projects throughout the Texas Gulf Coast. His expertise in stormwater systems, flood mitigation, municipal infrastructure, and multidisciplinary project delivery makes him exceptionally qualified to guide this project from initial analysis through final design.

Thank you for your consideration of our qualifications. We appreciate the opportunity to be considered and look forward to the possibility of partnering with the City of Edinburg to advance its infrastructure and community development goals. Should you require additional information, please contact me, the authorized representative, at chris.otto@collierseng.com or 726 223 4768.

Sincerely,

Chris Otto, PE, CFM
Regional Discipline Leader | Municipal Services

Firm Qualification and Experience

Colliers Engineering & Design

About Colliers Engineering & Design, Inc.

Colliers Engineering & Design ("CED") is a trusted provider of multi-discipline engineering, surveying, architecture, consulting and design services delivering customized solutions to public and private clients. Established in 1984 as Maser Consulting, Colliers Engineering & Design provides its same dedicated leadership, systems, and services to clients. We specialize in providing a comprehensive suite of services including survey/geospatial, subsurface utility engineering (SUE), architecture, civil/site, transportation, infrastructure, governmental, geotechnical/environmental, telecommunications, utilities/energy and project management.

Today, we are proud to say that we currently employ more than 3,500 professionals through a network of 80+ offices nationwide and beyond. Over its history, our company has consistently been recognized nationally by Engineering News Record as a Top 500 Design Firm and ranked on the Zweig Group Hot Firm List of fastest growing companies.

We are *Municipal Engineers*

CED approaches the role of City Engineer not merely as an outside consultant, but as a fully integrated extension of the City of Edinburg's staff. We recognize that municipal engineering is unique; it requires balancing technical precision with public stewardship. Your needs will inevitably fluctuate between the strategic foresight required for long-term capital planning and the urgent, tactical responsiveness needed for day-to-day operational issues. Our service delivery methodology is purpose-built to accommodate both ends of this spectrum equally, ***ensuring that the City has the technical capacity of a large firm while retaining the personalized attention of a local partner.***

Communication Strategy

Effective communication is the cornerstone of our partnership and the primary tool we use to manage risk. Our strategy goes beyond simple reporting; it ensures that City staff, Council, and stakeholders are always aligned, eliminating surprises, and fostering trust with the public.

Guillermo Benavides, PE, ENV SP, will serve as the Primary City Engineer and the City's single point of contact. In this role, he acts as the conduit to CED's 3,500+ nationwide professionals. This structure provides the City with a distinct advantage: you gain access to deep, specialized resources from structural engineers to grant writers without the administrative burden of managing multiple points of contact. Mr. Benavides filters and coordinates these resources, ensuring that every communication the City receives is consolidated, clear, and actionable.

Meeting Attendance & Technical Support

We are committed to a visible, accessible, and consistent presence. Mr. Benavides along with technical staff will attend City Council, Planning & Zoning Commission, and staff meetings as requested. Our role in these settings is to translate complex engineering data into clear, decision-ready information for officials. Whether explaining the hydraulic impact of a new development or justifying the budget for a road rehabilitation, we provide the technical confidence Council needs to make informed policy decisions.

Stakeholder Coordination

Municipal projects rarely happen in a vacuum. Including the past two years, we routinely interface with private developers, utility providers, and state agencies (TxDOT, TCEQ) on the City's behalf. Our goal is to protect the City's interests while facilitating efficient progress. For example, during utility conflicts, we proactively facilitate coordination meetings to prevent costly field delays. When dealing with state agencies, we leverage our existing relationships to expedite permits and approvals, ensuring the City's projects do not stall in bureaucratic pipelines.

Precision & Accountability

We utilize a disciplined project management framework to ensure every task order, whether a small drainage review, a complex utility adjustment, or a major road reconstruction, is delivered on time and within budget. We respect that municipal needs often arise quickly. For every new assignment, we provide a detailed Work Plan and fee estimate within 24 hours of the request when time is of the essence. This Work Plan is more than a quote; it outlines the specific scope, a visual critical path schedule, and a clear list of deliverables. This ensures that expectations are perfectly aligned before a single dollar is spent.

Cost Control & Fiscal Stewardship

We treat public funds with the same scrutiny as our own, recognizing that every dollar saved is a dollar available for other community needs. Our project managers utilize real-time financial tracking software to monitor budget burn rates against project progress. If a potential deviation is identified whether due to unforeseen site conditions or scope creep it is flagged immediately, ensuring no fiscal deviations occur without prior discussion and City authorization. We also employ value engineering techniques during the design phase to identify cost-saving alternatives without compromising quality.

Chris Otto, PE, CFM

Principal in Charge

Mr. Otto leads the Texas region for municipal services and is a subject matter expert on water, roadway, and drainage solutions for many of our projects. He boasts comprehension of HEC-RAS, dynamic storm sewer models, and dam breach analyses. Mr. Otto has experience working with the City of San Antonio, sitting on the advisory panel for the City of San Antonio's Atlas 14, assisting with development of grant applications for several municipalities, and more.

Education

BS, Mechanical Engineering Technology, Texas A&M University

Professional Registrations

Professional Engineer (PE), Texas: No. 113172

Certified Floodplain Manager (CFM), Texas: No. 0752-05N

Professional Certifications

TxDOT Pre-Certified: 4.2.1, 8.1.1, 10.8.1, 11.1.1, 17.5.1, 18.3.1, 18.4.1, 18.6.1

Key Projects

SE Legacy

Laredo, Texas

CED is actively involved in the development of a large master-planned community in Laredo, aiming to revitalize a disadvantaged area. Mr. Otto is serving as the Principal-in- Charge on this project, as CED is responsible for preparing hydrology and hydraulic models, exhibits, and GIS shapefiles for major culvert crossings on both regional and local streets. This comprehensive analysis includes the development of Corrected Effective Hydrology Models for 18 tributaries, specifically identified as Zone A Floodplain, within the overall development area. Using the HEC-HMS modeling software, CED will delineate the watershed for each tributary and employ the NRCS curve number loss method and MOAA Atlas 14 Volume 11 rainfall data to create models for both the existing 100-year storm and the ultimate conditions 100-year storm. For the hydraulic models, a combination of on-the-ground survey data and LiDAR data from TNRIS will be utilized to generate accurate models representing existing ground conditions and flow rates for the 100-year existing and ultimate scenarios. Additionally, CED's services extend to stormwater management, with the inclusion of a Transportation and Land Use plan. This plan will encompass on and off-road facilities, thoroughfare classification, and the relationship between streetscape design and adjacent land uses.

On-Call City Engineering

Shavano Park, Texas

Mr. Otto has been providing general engineering services for the City of Shavano Park. Since 2016, services included coordination with TxDOT for operational and drainage improvements of NW Military and the city-wide drainage master plan. Services provided under Mr. Otto's leadership include multiple low water crossings on rural roadways within the City.

On-Call City Engineering

City of Cibolo, Texas

In 2017, Mr. Otto and his staff were awarded the City of Cibolo's on-call professional engineering contract for city engineering services. Since then, staff has been tasked with a variety of design, consultation, project management, plan review, and plat review services on an on-call basis for various public works projects. Mr. Otto now serves as the City Engineer and Floodplain Administrator for Cibolo. As the City Engineer Chris provides all development reviews and feedback/approval for all development activity in the City and ETJ. Mr. Otto has implemented a punch list document to assist with construction phase of projects that the City has in development.

Street Maintenance Plan - Phase 1

Shavano Park, Texas

Since 2016, Mr. Otto has been providing general engineering services for the City of Shavano Park. Services have included coordination with TxDOT on drainage improvements for the Northwest Military operational improvements project and the city-wide drainage master plan. Mr. Otto identified 12 areas of concern where existing flooding is common. Mr. Otto assisted the City in prioritizing street projects based on the pavement condition index, traffic load, emergency access, cost, and overall benefit to the community. He prepared several different alternatives and Opinion of Probable Construction Cost for each, and presented the options to Planning and Zoning as well as City Council to discuss the advantages and disadvantages of each option. City Council elected for full street reconstruction and adding ribbon curbs, maximizing the street life. Mr. Otto managed the design of plan and profile construction documents for 6 miles of streets, designed to align with the existing width and elevation, minimizing construction costs and eliminating the need for TCEQ permitting within the Edwards Aquifer Recharge Zone. Plans were submitted in 30, 60, and 90 percent design increments to obtain City and stakeholder input. He presented the design progress to City Council to keep them informed and obtain input on the design. The project was advertised for bids in January 2023 and is expected to complete construction in the fall of 2024. Additionally, Mr. Otto provided utility conflict coordination organized with a matrix of alternatives.

Bexar County DFIRM Review

San Antonio, Texas

Mr. Otto performed detailed hydrology and hydraulic review for all tributaries in the Upper and Lower San Antonio River Watershed, Calaveras Watershed, and several dams in Salado Creek. He also provided review comments and additional information to the San Antonio River Authority and attended coordination meetings and participated in discussions to establish regional watershed standards with the San Antonio River Authority.

COSA 2017 Bond - West Military and Ingram Rd Connectors

San Antonio, Texas

As Project Manager, Mr. Otto worked on a master-planned, mixed-use development with multi- modal transportation alternatives. This includes the upgrade of a regional inline detention pond, CLOMR, and underground storm drain. FEMA analysis was conducted using HEC-RAS and HEC- HMS. Underground storm drain was analyzed using XPStorm. The City of San Antonio and SAWS are financially participating with bond funds.

Guillermo Benavides, PE, ENV SP

Project Manager

Mr. Benavides has over 30 years' experience in engineering and construction, business administration, project management, civil, transportation, and structural engineering. He has experience developing schematics, plan, specification, and cost estimating (PS&E), construction management and construction inspection services for major projects in public infrastructure, private development, and energy industry. He has experience in the Greater Houston Area including roadway paving and drainage Improvements, sidewalk, hiking, and biking programs, and water and wastewater improvements.

IFPO – International Freelance Photographer No.80986BEN

Key Projects

Sugar Land Airport Maintenance Bridge

City of Sugar Land, Fort Bend County, Texas

Director of Public Works overseeing the Design the replacement of a two-span maintenance services bridge located in the vicinity of runway 17 of the Sugar Land Regional Airport.

City of College Station Sidewalks and Shared Use Paths for Pedestrian Bridge

College Station, Texas

The project encompasses the engineering and layout of multiple sidewalk extensions and three primary shared-use path corridors serving the College Station ISD area and the Texas A&M vicinity. The scope includes the geometric design of concrete sidewalk segments and 10-foot-wide shared-use facilities, integration of three pedestrian bridge structures, and drainage system enhancements involving culvert extensions, swale reconstruction, and localized hydraulic adjustments. The design must comply with ADA and PROWAG requirements for accessible pedestrian routes and account for geotechnical complexities associated with chemically reactive soils.

City of Bryan – Share Use Path

Bryan, Texas

Mr. Benavides managed the professional engineering and design services for the expansion of 12-foot-wide reinforced concrete shared-use paths along Villa Maria Road (FM 1179) and West William J. Bryan Parkway. He led a multidisciplinary design effort that integrated complex roadway excavations, spread foot retaining wall construction, and the modernization of pedestrian infrastructure, including Type 7 curb ramps and advanced LED countdown crossing components. To ensure project viability within TxDOT-regulated corridors, Mr. Benavides coordinated Right-of-Way (ROW) acquisitions and oversaw the detailed design of roadway lighting, storm drainage systems (RCP), and the strategic relocation of fire hydrants and municipal utilities.

All technical specifications were meticulously authored to adhere to TxDOT and TMUTCD standards for signage and pavement markings, successfully bridging the gap between FM 2818, Midtown Park, and the Texas Avenue corridor to enhance regional multi-modal connectivity.

City of Weslaco – Roundabout at Intersection of Votech Drive and Pike Boulevard

Weslaco, Texas

Mr. Benavides spearheaded the engineering design for a modern roundabout at the critical intersection of Votech Drive and Pike Boulevard to replace an insufficient all-way stop configuration. This comprehensive traffic solution was developed to alleviate severe congestion and safety concerns driven by rapid regional expansion, including the Mid Valley Industrial Park, airport operations, and county precinct activities. Key contributions included optimizing infrastructure for improved traffic flow and safety, engineering a high-capacity design capable of accommodating significant current and future industrial and municipal growth, and collaborating with city officials and regional stakeholders to deliver an innovative solution aligned with the City of Weslaco's long-term transportation vision.

City of Texas City – Shoal Point Access Road

Texas City, Texas

Mr. Benavides provided the preliminary engineering and route study for the Shoal Point Access Road, a critical infrastructure project designed to connect hundreds of acres of industrial-zoned land at Shoal Point to FM 197. He addressed a decades-long logistical bottleneck by developing a viable entry path and utility corridor across challenging terrain primarily comprised of dredge spoils. Mr. Benavides managed the delivery of a Preliminary Engineering Report (PER), completing 30% of the roadway and utility design, and collaborating with the Texas City Economic Development Corporation and City officials to align technical solutions with the region's long-term maritime and industrial expansion goals.

General Engineering Services

Clear Lake Shores, Texas

Principal in-charge of the Houston Municipal Department. Since 2023, CED was awarded to provide general services to the City of Clear Lake Shores. As part of this agreement Mr. Benavides has participated in the City Council Meetings and other meeting as requested by the City, as well as performed other general engineering tasks not covered under specific task orders. Mr. Benavides has also managed his staff in performing tasks such as the development of scoping documents for City engineering projects and the review of project plans.

East Municipal Parking Lot Design

Clear Lake Shores, Texas

Principal in charge of the Houston Municipal Department, Mr. Benavides managed and oversaw the study, design, and construction of the public parking lot improvement at Clear Lake Shores, aimed at maximizing the use of the available space while ensuring compliance with all City ordinances. Additionally, the project focused on providing ADA compliance, ensuring access from the parking lot to the surrounding commercial areas of the city.

Carlos Fuentes, PE, CME

Project Engineer | Street Infrastructure; Pavement Management; Civil Engineering

Mr. Fuentes has nearly two decades of experience in land development and municipal services. He is well-versed in standard engineering practices for a variety of project types, including retail, commercial, residential, and municipal capital improvements. He has working knowledge of state, county, and municipal regulations and standards as well as thorough knowledge of the land development process.

Mr. Fuentes is proficient in technical software including AutoCAD Civil 3D, HydroCAD, and Hydraflow Storm Sewers. He is highly effective in managing and coordinating all facets of land development and municipal services independently or as part of a team.

Education

MS Civil Engineering, New Jersey Institute of Technology

BS Civil Engineering, New Jersey Institute of Technology

Professional Registrations

Professional Engineer (PE), Texas: No. 151041; New Jersey: No. 24GE04900400

Certified Municipal Engineer (CME), NJ

Key Projects

SE Legacy – Talise Development, Phase IB

Laredo, Texas

As part of CED's involvement with the development of a large master planned community in Laredo, Mr. Fuentes has provided support for the project coordination and design of the initial phase of this project. The design included the preparation of road, drainage and utility profiles, hydrologic analysis, hydraulic design of storm sewer systems, and floodplain coordination.

East Municipal Parking Lot

Clear Lake Shores, Texas

This project consisted of upgrading and existing gravel parking area to a concrete paved parking lot. Mr. Fuentes provided support in project management during the design, bidding and construction phases of this project. The design included the preparation of bid plans and specifications, construction cost estimates, responding to contractors' questions during the bid and construction phases, as well as review of shop drawings, payment applications and construction contract documents.

144 Wisteria Lane

Cibolo, Texas

This project consisted of hydrologic and hydraulic analysis of an existing stormwater collection ditch that serviced an established residential area. CED was tasked with analyzing the existing ditch capacity, establish existing and proposed contributing flows and improving the existing ditch to accommodate the anticipated stormwater runoff from the residential area.

MS4 General Permit Renewal – City of Clear Lake Shores

Clear Lake Shores, Texas

Mr. Fuentes performed an update of the City's Stormwater Management Plan (SWMP) to meet the state's 2024 General Permit requirements. The update included updating the City's Best Management Practices (BMPs) to be better aligned with the 2024 General Permit requirements. Updates were performed in collaboration with City Officials and staff, to ensure new BMPs established actionable goals for the City. Mr. Fuentes also coordinated with City Staff to submit a Notice of Intent form through TCEQ online portal for formal renewal of MS4 General Permit participation.

MS4 General Permit Renewal – City of Cibolo

Cibolo, Texas

Mr. Fuentes performed an update of the City's Stormwater Management Plan (SWMP) to meet the state's 2024 General Permit requirements. The update included updating the City's Best Management Practices (BMPs) to be better aligned with the 2024 General Permit requirements. Updates were performed in collaboration with City Officials and staff, to ensure new BMPs established actionable goals for the City. Mr. Fuentes also coordinated with City Staff to submit a Notice of Intent form through TCEQ online portal for formal renewal of MS4 General Permit participation.

State Highway 211 Improvements – Landon Ridge

San Antonio, Texas

Mr. Fuentes performed detailed hydrologic and hydraulic design for five proposed culverts associated with new driveway connection points onto State Highway 211. This project required adherence to TxDOT's hydrologic and Hydraulic requirements.

State Highway 534 Loop Improvements – Windridge Development

Kerrville, Texas

CED was tasked with performing hydrologic and hydraulic analysis and design for a section of existing State Highway 534. In conjunction with a proposed residential development, a portion of State Highway 534 was to be widened for a proposed turn lane. The project required design of one new culvert associated with a new driveway connection point onto State Highway 534 and analysis and redesign of an existing roadside stormwater collection ditch. This project required adherence to TxDOT's hydrologic and hydraulic requirements.

Andy Carruth, PE

Project Engineer | Utility Infrastructure Evaluation

Mr. Carruth has broad knowledge in commercial and public works engineering projects. He has experience working alongside cities, being on-call for city engineering teams like the City of Cibolo and the City of Shavano Park. Mr. Carruth's expertise is tailored to San Antonio and the surrounding region. He has provided Colliers Engineering & Design with excellent responsiveness and strategic engineering for 15 years.

Education
BS, Civil Engineering, Texas A&M University

Professional Registrations
Professional Engineer (PE), Texas - #129161

Key Projects

On-Call Engineering Services: City of Cibolo

Cibolo, Texas

Mr. Carruth performs the engineering review in the City of Cibolo. Mr. Carruth tracks all submittals and manages deadlines. Mr. Carruth reviews all preliminary and final plats, as well as construction documents for the City. Mr. Carruth has also designed the construction documents for the relocation of the water line on Haeckerville Road. Mr. Carruth assisted in design, construction management, and creating of as-builts for the 12-in. public water project.

City of Shavano Park: On-Call Engineering Services

Shavano Park, Texas

On the team responsible for the City of Shavano Park's on-call engineering, Mr. Carruth has assisted with planning and development reviews as a Third Party Engineer, ensuring proposed developments adhere to the development codes. Mr. Carruth is essential to a variety of projects serving the City, including street maintenance phasing for approx. 5-mi. of city streets. The streets in the City of Shavano Park are at least 50 years old and deteriorating; requiring improvements provided by Colliers Engineering & Design. Included in the improvements are upgrades to the existing drainage, to alleviate inundation affecting homeowners.

Gates Offsite Sewer General Engineering

San Antonio, Texas

Mr. Carruth and team completed the design for a 12-in. sanitary sewer to serve the Southeast Meadows subdivision (AKA Gates Tract) for Gordon Hartman. In this phase, the team started the design and provided options for multiple alignments. Finalizing an alignment that worked through the properties where an easement could be obtained was challenging.

Gates Tract 24" & 18" Sewer Extension

San Antonio, Texas

For this 5,000 EDU lift station, which tied into a new 24-inch and 18-inch sewer extension, Mr. Carruth and his team provided design services for 1,880 linear feet of 36-inch gravity sewer, 2,765 linear feet of 30-inch gravity sewer, and 3,250 linear feet of 15-inch gravity sewer- which terminates at an existing San Antonio Water System (SAWS) 36-inch sewer. This design serves two subdivisions and is publicly bid in accordance with SAWS requirements. This design required easement acquisition, which was partially reimbursable by SAWS to the developer.

Medio Creek Sewer Extension

San Antonio, Texas

Mr. Carruth is on the team preparing construction and civil plans for this creek's sewer extension project. 8,280 ft. of 36-in. gravity sewer runs as deep as 24 ft., 2,640 ft. of 30-in. gravity sewer runs as deep as 26 ft., and 2,160 ft. of 15-in. gravity sewer as deep as 24-ft. The system will tie in with the terminus of a 36-in. SAWS sewer line (in Unnamed Tributary 7 at Medio Creek), and complete tie-in at the north end of the 36-in. sewer extension (at Talley Road).

City of Cibolo: Venado Lift Station

Cibolo, Texas

Our engineers performed route studies, before determining that a cross-country alignment would be the most successful solution (which coincides with the City's proposed drainage project and land acquisitions). Mr. Carruth's role was to manage the construction development of this project.

Haeckerville Road Water Main Extension

Cibolo, Texas

Mr. Carruth contributed to the development of as-built plans, construction phasing, and public water design. He and his team went through extensive coordination with public officials due to the proximity of other public works projects off-site in near proximity. Our team accounted for off-site channel improvements (done by others) that would affect our project once completed. The final product was a 12" water line, approximately 2000 ft long.

Gallagher Tract 30" & 24" Sewer Extension

San Antonio, Texas

Mr. Carruth served as project engineer (under Mr. Torres as project manager) for for the design and construction of 7,479' of 30" gravity sewer. The sewer main is to begin at a future 36" gravity sewer and extend to a point 1,700' southeast of the tract. In addition, a 24" sanitary sewer will extend 4,279' and cross SH-211 to the southeast corner of another tract. Services include schematic design, tree surveying, as-built drawings, sanitary sewer field notes and exhibits, and civil engineering services including project management, design and construction, stormwater pollution prevention planning, tree preservation planning, and construction observation.

Vamshi Konduru, PE, PH, CFM, GISP

Project Engineer | Hydrology & Hydraulics

Mr. Konduru has over 20 years of experience in leading municipal and private stormwater/flood studies that include CLOMR/LOMR, SWMP, MDP, Channel Design, Erosion Control, Bridge/Culverts, plan-review, dam breach and EAPs. He has a strong knowledge and understanding of various drainage codes for City of San Antonio, City of Austin, City of New Braunfels, City of San Marcos, Bexar, Comal and Guadalupe Counties, San Antonio River Authority guidelines, Harris County Flood Control District guidelines and the TxDOT Design Criteria Manual. He has expert level expertise in drainage analysis and design and specializes in GIS based automation and advanced computer models.

Education

BS, Civil Engineering, Osmania University

Professional Registrations

Professional Engineer (PE), Texas: No. 122082

Certified Floodplain Manager (CFM), Texas: No. 2018-10N

American Institute of Hydrology (15-H-7016)

GIS Certification Institute (91536)

Key Projects

Upper San Antonio River Watershed Restudy, Lower Cibolo Watershed Floodplain Modeling and Mapping, Lower San Antonio River Watershed Modeling and Review

San Antonio, Texas

Mr. Konduru managed the development of updated hydraulic modeling and mapping for 170 stream miles in the Upper San Antonio watershed and 334 miles in the Lower Cibolo Watershed. This involved large scale automated floodplain modeling and mapping, using HEC-RAS and XP-SWMM 1D, 2D and 1D-2D coupled modeling approach. He led the coordination effort with San Antonio Rive Authority (SARA)/FEMA and other subconsultants by conducting biweekly meetings and effectively communicating action items and project progress.

MAAPNext Mapping and RiskMAP Product Development Guidance, Harris County Flood Control District (HCFCD)

Harris County, Texas

As a mapping lead for two watersheds that used a coupled 1D-2D watershed wide singular model approach and collaboration with HCFCD, Mr. Konduru developed the floodplain and floodway mapping/Base Flood Elevation (BFE) guidances to incorporated into the MAAPNext Project. The guidance uses a series of tools (in GIS) with specific parameters and tolerances to preserve modeling accuracy.

CapMetro Light Rail Adelphi to McNeil

Austin, Texas

Mr. Konduru developed a drainage Study for the proposed single-track to double-track improvements along the Redline, in the vicinity of CapMetro's Howard station, specifically between McNeil Drive to Adelphi Lane for approx. 4000 linear feet of track improvements. Mr. Konduru oversaw the development of a drainage report based on existing and proposed and future conditions H&H analyses.

Cascade Caverns CIP

Boerne, Texas

As a Drainage Task Lead, Mr. Konduru led hydrologic and hydraulic modeling for the tributaries and storm structures. Due to the complex flow patterns in the project area, existing drainage issues, limited ROW and a stern City code which required no-rise and no-adverse-impacts, Mr. Konduru developed a staggered modeling approach which started with a Pure-2D Rain-on-Grid (ROG) approach to identify flow patterns and bottlenecks.

Blossom Park (Lotus Blossom St) 2017 Bond Project

San Antonio, Texas

Mr. Konduru managed and oversaw construction plan development for the improvements along Unnamed Tributary to Lorence Creek in the vicinity of Lotus Blossom Park, which was included on the 2017 CoSA bond to mitigate flooding to properties in the vicinity of Lotus Blossom Park. The project included removal of existing/damaged erosion control measures, installation of High-Performance Turf Reinforced Matting (HPTRM) with a Turf Geosynthetic Revetment System (TGRS) for approximately 1.8 miles and included a culvert replacement/upsize.

Core 5 Industrial Park CLOMR

Schertz, Texas

As Drainage Task Lead, Mr. Konduru completed hydraulic analyses, cut and fill analysis for model updates, as well as completed the CLOMR package, addressed review comments and responses and oversaw it through FEMA approval.

San Marcos Industrial Site

San Marcos, Texas

Kimley-Horn was selected to provide development planning and engineering activities on an on-call basis for 1700 acres. Mr. Konduru is the drainage task lead for this project and has performed preliminary hydrologic and hydraulic analysis for the existing unmapped on-site low areas for a 1700 acre site.

Northfield Place Phase II Drainage Analysis and Storm Sewer System Modeling and Integration

Harris County, Texas

Mr. Konduru developed Phase 2 analysis for the Northfield Place subdivision drainage analysis and design project. The project had six parallel streets with an open-ditch drainage system, connected with driveway culverts all of which drained into P118-26-00 at six different locations. He developed analysis and design recommendation using a combination of open ditch connected with driveway culverts and an underground pipe network system. The analysis was provided to the design team for plan production.

Drainage Area Master Plan Update

New Braunfels, Texas

Mr. Konduru completed four major tasks involved in creating a new Drainage Area Master Plan for the City of New Braunfels. First, tasks included meeting with the City to discuss their current stormwater program and overall goal of creating a an updated master plan. Next, he analyzed existing hydrologic and hydraulic data currently in the possession of the City and collected data from adjacent entities (i.e.: counties, cities, watershed administrators). Third, he developed and coordinated a work plan, which he presented to the Watershed Advisory Committee, Planning Commission, and City Council for approval and execution.

Shaun Spivey, PE, PTOE, PMP

Project Engineer | Transportation; Traffic Engineering; Traffic Signal

Mr. Spivey is a transportation engineer with 18 years of experience, specializing in municipal projects for connector streets, arterials, and local residential roads. He is skilled in roadway geometric design, traffic control planning, traffic calming, and signing and pavement marking. He has led the design of complete streets, signalized corridors, and urban streetscapes, ensuring safe, cost-effective solutions that comply with applicable standards. Mr. Spivey manages all phases of projects—from planning and analysis through PS&E—and is dedicated to creating efficient, community-focused transportation systems for city, county, and state projects.

Institute of Transportation Engineers (ITE)

Key Projects

Redland Road North Reconstruction, Ridgewood Parkway to Loop 1604

San Antonio, Texas

This project involved the reconstruction and widening of Redland Road from a two-lane asphalt roadway with ditches to a five-lane roadway with a continuous left turn lane, curb, storm sewer system, sidewalks, and bicycle amenities. Mr. Spivey served as Roadway Task Leader and construction phase Project Manager. He was responsible for the geometric design, pedestrian facilities and traffic signals. This included a traffic analysis of the corridor to determine signalized intersection requirements and lane configurations.

Hopkins Street Improvements (Bishop to Moore)

San Marcos, Texas

Mr. Spivey served as Design Engineer for this project involving street reconstruction and drainage improvements for a major arterial corridor into downtown San Marcos that bisects a national historic district. The design of the roadway uses a complete streets approach with focus on traffic calming, landscape enhancement and pedestrian mobility. As roadway task leader, Mr. Spivey developed the geometric design of the roadway including the traffic elements such as signing and pavement marking and pedestrian amenities.

FM 1187 Widening and Improvements

Parker County, Texas

Widening and improvement of FM 1187 to convert a two-lane, undivided rural roadway with a continuous center-turn lane to a four-lane, curb and gutter roadway with bike lanes, sidewalks, two new traffic signals and storm drainage system. This project was designed using TxDOT design criteria and complies with Environmental Standards of Uniformity.

SOLA-C2.003 Barton Springs Road to US 290

Austin, Texas

This project transformed a busy urban segment of South Lamar Boulevard by removing existing on-street bike lanes and adding elevated bike lanes, sidewalks, and shared use paths within the state right-of-way. As Roadway Design Lead, Mr. Spivey oversaw geometric design, traffic signal modifications, and drainage coordination to ensure safe and efficient travel for motorists, pedestrians, and bicyclists. The improvements improved multimodal access, minimized conflict points, and enhanced overall corridor mobility.

SOLA-C3.005 Intersection Improvements

Austin, Texas

This project involved designing two roundabouts near the S Lamar corridor. Both the Bluebonnet Lane and Del Curto Road intersections were designed with mini roundabouts and improved pedestrian and bicycle access with shared use paths and bike ramps. As Project Professional Mr. Spivey led the geometric design of both intersections. This included designing the roundabouts and approaches to provide a traffic calming effect to improve safety through these residential streets.

Broadway/Hildebrand Corridor Improvements

City of San Antonio, Texas

Drainage and roadway capacity improvement project that included the design of a storm drain system for a seven-lane roadway and outfall into the San Antonio River through a historic City park. The storm sewer system, which was designed to carry the 100-year storm event, had to meet TxDOT criteria and included two parallel 6-by-9 box culverts. As part of this project, Mr. Spivey design two traffic signals at AT&T parking lot driveways. He also analyzed the existing parking layout and on-site routing. Then developed plans for revised striping and routing to accommodate revised flow projections. He developed a comprehensive construction phasing plan, made up of 18 phases to address traffic congestion, existing utilities and drive entrance requirements.

Mays Creek GLO Phase 1

City of Seguin, Texas

Mays Creek Phase 1 was a major drainage improvement project in Seguin, Texas, funded through the GLO. The work involved elevating the neighborhood entrance above the 100-year floodplain, designing drainage channels, culverts, and sidewalk bridges to maintain vehicular and pedestrian access during storm events. The project also introduced a new roadway connection to SH 46 and a roundabout to enhance traffic flow and safety in the area.

Bagdad Road Traffic Signal

Leander, Texas

This project involved developing plans, specifications and estimates to construct a traffic signal on CR 279/ Bagdad Rd in Leander to help connect new neighborhoods to the local middle school. As Design Engineer, Mr. Spivey conducted a traffic analysis and signal design for the intersection. He also developed the traffic control, signing plan and pavement marking design to accommodate the new traffic signal.

Diana Hernandez Videa, PE

Project Engineer | PS&E; QA/QC

Ms. Hernandez Videa, PE brings a wealth of experience delivering impactful drainage and detention solutions. She excels at conducting comprehensive analysis, earthwork calculations, and construction plan development. Ms. Hernandez Videa's skills also encompass critical review and validation of infrastructure repairs. With a knack for creating practical engineering solutions to improve communities, Ms. Hernandez Videa consistently elevates projects through her expertise and commitment.

Education

MEng, Civil Engineering, University of Texas at Arlington

BS, General Engineering, Abilene Christian University

Professional Registrations

Professional Engineer (PE), Texas: No. 155475

Key Projects

Repairs Verification and Validation Project - Harris County Flood Control District (HCFCD)

Houston, Texas

Ms. Hernandez Videa worked on the Repairs Verification and Validation Project for the Harris County Flood Control District. She aided in reading and analyzing quantity reports and as-built drawings to contribute to the repair verification and validation of projects for funding request documentation. The phase of the project Ms. Hernandez Videa worked on involved verifying which projects were completed and which were not, ensuring that the repairs being made were caused by Hurricane Harvey and were not pre-existing. This process entailed reviewing several aerial images, pictures, as-built drawings, record drawings, and cost estimates to verify this information.

Kleb Woods Basin - Little Cypress Creek

Houston, Texas

Ms. Hernandez Videa assisted in revising record drawings, contributed to plans and profiles, and conducted earthwork calculations during the construction phase for the redevelopment of the Kleb Woods Basin project along Little Cypress Creek. The goal of the project was to enhance the design without major construction impacts. Tasks involved redesigning the detention pond shape, regrading surroundings, readjusting storm sewers, recalculating earthwork and changing the temporary entrance to a permanent entrance.

Lake Arthur Drive Detention Basin

Port Arthur, Texas

This project involved improving and expanding an existing detention pond and adding a second detention pond, along with a drainage channel, on Lake Arthur Drive. The goal was to improve drainage in residential areas and address an unmaintained detention pond that had been neglected for years. Ms. Hernandez Videa assisted with the development of construction plans for the improvements.

Babe Zaharias Golf Course Drainage Improvements

Port Arthur, Texas

Ms. Hernandez Videa assisted in developing construction plans and cost estimates for drainage improvements at the Babe Zaharias golf course. The project aimed to enhance the existing drainage system on two main roads that had been impacting residential areas, involving the replacement of storm sewers, inlets, and the expansion of the detention pond. Despite three existing gas pipelines obstructing the storm sewer connection between the street and the detention pond, Ms. Hernandez Videa conducted a comprehensive analysis to determine necessary modifications. Through her efforts, the project contributed to improving long-standing drainage issues while preserving the golf course's integrity.

East Municipal Parking Lot Design

Clear Lake Shores, Texas

Ms. Hernandez Videa assisted in design and development of construction plans for converting an existing gravel public parking lot into a concrete parking lot in the commercial area of Clear Lake Shores, Texas. The project aimed to maximize the use of the available space while ensuring compliance with all City of Clear Lake Shore's ordinances. Additionally, the project included the design and striping of the intersection on the northeast side of the parking lot to improve access to nearby commercial areas and enhance ADA-compliance. Her tasks included plan production, calculating quantities, designing the parking lot layout, and grading for proper drainage. During construction Ms. Hernandez Videa also contributed through regular site inspections, submittal reviews, and preparation of record drawings.

Infrastructure for Multifamily Housing – Talise Development, Phase 1B

Laredo, Texas

Ms. Hernandez Videa assisted in developing construction plans for road, drainage and utilities for a multifamily infrastructure near Laredo, Texas. The phase of the project, she worked on involved the design of two new streets and the paving of an existing gravel street for a master development plan. Her specific tasks included plan production, coordinating with various teams and project phases, drainage calculation and participating in utility coordination. Throughout the project, Ms. Hernandez Videa also participated in the QA/QC process for each submittal stage.

MS4 General Permit Renewal

Clear Lake Shores, Texas

Ms. Hernandez Videa worked on the 2024 Stormwater Management Program Report and Annual Report for the City of Clear Lake Shores. She assisted in reviewing and updating the existing documents to ensure compliance with the new 2024 General Permit requirements. Tasks also involved communicating with the City and conducting a detailed review of the best management practices and measurable goals to be included in the City's five-year permit plans.

General Engineering Services

Clear Lake Shores, Texas

Ms. Hernandez Videa is part of the team assisting with the general services being provided to the City of Clear Lake Shores. Her specific tasks have included developing standard details and specifications for the City, reviewing construction plans submitted for drainage design approval, and conducting site inspection for construction projects.

John Walton, PE

Project Engineer | Erosion and Sediment Control Design Lead

Mr. Walton has over 20 years of progressive geotechnical engineering experience on numerous projects throughout the East Coast. These projects have included the execution of multi-phase subsurface investigations and laboratory testing programs for a variety of project types including single-story to high-rise building structures, heavy industrial facilities, highway projects, retail, residential, telecommunications, marine, energy, and institutional facilities.

Mr. Walton's experience has included interpretation of subsurface exploration, geophysical, and geologic data; development of subsurface investigations and laboratory testing programs; and identification and classification of subsurface materials. His engineering and management responsibilities include analysis and design of shallow and deep foundation systems; directing and administering field testing, remediation and exploration programs; administering geophysical surveys; developing and administering geotechnical instrumentation programs; analysis of slope stabilization and soil retention structures; evaluating and administering remedial and preventative measures for karst geology; and the development and review of geotechnical engineering reports, correspondence, and specifications.

Key Projects

Solar Energy Projects

New Jersey, *New York*, *Pennsylvania*

The scope of services for these projects included geotechnical investigations, engineering design, and construction oversight and consultation for ground-mount solar energy projects including stand-alone solar fields as well as parking lot canopy systems. Engineering services were provided for foundation systems, equipment slabs, utility trenches, and access roads. Foundation systems included helical piles, spread footings, rock screws, and driven post installations.

Mixed-Use Development

Branchburg Township, *Somerset County*, *New Jersey*

The scope of this project included a mid-rise hotel, three assisted living buildings, a bank, and a restaurant. The primary challenge of this 28-acre site was the presence of variable consistency undocumented clayey fill materials to depths of up to 25 feet. Numerous methods of soil improvement and various foundation systems were evaluated to deal with the variable fill thickness, including deep dynamic compaction, zoned excavation and replacement, rammed aggregate piers, and piles.

Corridor H

Grant County, West Virginia

This project involved over three miles of new highway construction, including two bridges, +300ft. high rock cut-slopes, and +100ft. high fill embankments. Responsible for developing and directing subsurface program consisting of more than 200 borings to depths of up to 200 feet, performing rock cut and fill slope design and stability analyses, and design of deep foundation systems, reinforced soil slopes, and MSE, cantilevered, and anchored retaining walls.

High-Rise Building

New York City, Manhattan, New York

Geotechnical Services were provided for a 17-story reinforced concrete structure for the Permanent Mission of the People's Republic of China to the United Nations. Services included design and construction consultation for underpinning, rock excavation, temporary excavation support, component foundation systems, rock bolts, and groundwater control measures.

Hog Island Road

Tinicum Township, Delaware County, Pennsylvania

This project involved the extension of Hog Island Road around the Philadelphia International Airport to provide a connection between existing township roads. Responsible for a geotechnical instrumentation program to surcharge and monitor the underlying compressible soils, as well as design and consultation for a driven steel pipe pile foundation system to support a bridge that carried the roadway over an environmentally sensitive tributary to the Delaware River.

Boos Development Group

Rochester City, Monroe County, New York; City of Poughkeepsie, Dutchess County, New York; and Worcester City, Worcester County, Massachussets

Provided geotechnical engineering services in areas throughout upstate New York and Massachusetts, including recommendations to deal with historic fills and associated stormwater testing, foundation designs, and shallow bedrock and earthwork recommendations.

NYSDOT, Pacifico

Nesconset Hamlet, Suffolk County, New York

Performed a geotechnical exploration of 26 test borings along a one-mile stretch of Route 347 in Nesconset, NY to identify subsurface conditions for sound barrier foundation design, drainage structures, and new stormwater basin and associated structures.

Route 9 Section 15-D

Smithville, Galloway Township, Atlantic County, New Jersey

Replacement of the existing bridge, including the construction of a 30+ foot high MSE wall embankment over soft bay silts. Responsibilities included directing the field work associated with installation of geotechnical instrumentation, including vibrating wire piezometers, inclinometers, magnetic probe extensometers, conventional monitoring wells, and geotextile strain gauges. Additional responsibilities included performing initial calibration of instruments, and training client representatives to maintain the instruments, obtain readings, and evaluate the acquired data.

Melissa Magno, PG

Project Geologist | Erosion and Sediment Control Design

Ms. Magno is a Senior Geologist with over five years of experience in geotechnical subsurface explorations, construction observations and materials testing, and geographic information systems (GIS) technologies. She is responsible for the planning and supervision of geotechnical field explorations, and laboratory and field-testing programs, including observation and documentation of test borings, test pits, and infiltration testing. She has experience in data collection and analysis from site investigations, foundation design recommendations, environmental inspections, project management, and preparation of proposals.

Education

BS Geology, GIS Minor, Summa Cum Laude, East Tennessee State University

Professional Certifications

Licensed Geologist (PG), North Carolina

CEPSCI Erosion Prevention & Sediment Control Inspector, South Carolina Department of Health and Environmental Control

OSHA 10-Hr Construction Safety

Key Projects

ASPA TRR Interchange Yard Expansion

Mobile, *Mobile County*, *Alabama*

Aided in the planning and supervision of a geotechnical exploration program performed for determining subgrade suitability for support of a proposed coastal railway interchange yard expansion. Coordinated field operations, attended client meetings, and provided further assistance with coordinating laboratory testing, compiling the final geotechnical report, and monitoring project financial performance.

Athens Highway

Gainesville, *Hall County*, *Georgia*

Performed and assisted with the management of a multiphase geotechnical exploration program for use in determining suitability for support of a proposed trucking terminal and related site improvements. Coordinated field operations, provided oversight of Standard Penetration Test (SPT) borings and test pits, visually classified soil samples in the field, and performed preliminary double-ring infiltrometer testing. Created test boring logs and figures, assigned laboratory testing, and assisted with the final geotechnical report.

Pit Stop

Darlington, *Darlington County*, *South Carolina*

Assisted in the design and execution of a geotechnical exploration program to determine subgrade suitability for support of a proposed ±640-acre site solar energy development. Coordinated field operations, attended client meetings, and provided further assistance with coordinating laboratory testing, compiling the final geotechnical report, and monitoring project financial performance.

Swan Cove Pool Restoration

Chincoteague, Accomack County, Virginia

Performed a multiphase geotechnical exploration to evaluate scour conditions for a water control structure and to determine preliminary support options for a proposed bridge. Coordinated and provided oversight for field operations, visually classified and logged SPT and hand auger soil samples in the field, and observed barge-mounted CPT explorations. Generated boring logs using gINT software and map figures using ArcGIS Pro software, and assisted writing the geotechnical reports.

Sam Furr Road - 4" PLM Replacement

Huntersville, Mecklenburg County, North Carolina

Performed test boring and rock core drilling inspection; visually classified and logged soils and rock for use in evaluating the subsurface conditions at the location of a proposed 4" natural gas line to be installed by horizontal directional drilling (HDD) techniques. Also performed weekly environmental inspections for the 1500-ft project corridor to ensure environmental permit compliance during construction, and adapted soil erosion and sedimentation controls in accordance with current conditions.

Strickland Road Parcel

Wilson Mills, Johnston County, North Carolina

Performed test boring drilling inspection to visually classify and log soils and rock for use in determining subgrade suitability for a proposed 700 lot residential development. Obtained bulk samples for laboratory testing. Created figures using ArcGIS Pro software and assisted writing the final geotechnical report.

PNG Line 330 – Pleasant Garden Road 12" Looping Project

Pleasant Garden, Guilford County, North Carolina

Environmental inspector for a 5.1-mile, 60.08-acre pipeline project that included open-cut trenching through multiple streams and wetlands within the project corridor. Delineated and provided oversight for stream and wetland crossings. Monitored construction sequencing, the installation and maintenance of environmental control devices, and restoration processes to ensure compliance with project-specific, state, and federal regulations. Participated in construction meetings and compiled environmental reports.

Naples Airport Improvements

Naples, Collier County, Florida

Assisted in the oversight of 27 soil explorations (17 soil test boring and 10 cone penetrometer test [CPT] explorations) performed in support of proposed improvements for Naples Airport, to possibly include typically loaded one-story hangar structures, as well as a renovated footbridge. Assisted with the desk study of historical imagery for reportedly abandoned landfill areas within the proposed site location. Visually classified and logged soil samples in the field. Generated boring logs using gINT software and map figures using ArcGIS Pro software, including an NRCS soil survey map, for use in the final geotech report.

PNG NCDOT U-4405 Construction Project

Fayetteville, Cumberland County, North Carolina

Assisted in performing a limited Phase II environmental investigation and geotechnical exploration of five subject properties located in Fayetteville, NC. Test borings were performed where samples were field-screened by visual and olfactory methods, and by a photoionization detector (PID). Samples were obtained for laboratory testing for analytes of environmental significance.

Jordan Volk, PE, PMP

Project Engineer | Water and Wastewater Evaluation

Mr. Volk has over 20 years of experience in the potable water and wastewater engineering fields, including project management, design, investigation, preparation of plans and specifications, permitting, and construction administration and observation for water and wastewater infrastructure. Specific projects have included water treatment plants, water pump stations, water distribution mains, water storage tanks, supply wells, and chemical feed stations.

Mr. Volk also has experience in hydraulic modeling, site feasibility studies, water system valuations, strategic planning, and asset management practices. His wastewater experience includes the design of wastewater pumping stations, as well as new sanitary sewers and the rehabilitation of existing sanitary sewers. He also has experience in large scale stormwater resiliency and mitigation projects.

Key Projects

Wastewater Treatment Plant Evaluation and Capital Plan

Borough of Florham Park, Morris County, New Jersey

Preparation of a wastewater treatment plant upgrade evaluation, optimization and capital plan to account for future flow increases in the Borough.

235th Street Pump Station Reconstruction, New York City Department of Environmental Protection

Bronx Borough, New York City, New York

Project Manager for the planning and design of a 3.5 MGD combined sewer pump station with an estimated construction cost of $20M.

Rebuild By Design - Living With the Bay, Governor's Office of Storm Recovery

Various Locations, Nassau County, New York

Project Manager for the design of four stormwater resiliency projects with an estimated construction cost of $50M.

JFK Airport Floodgate Installation, Port Authority of New York and New Jersey

Queens Borough, New York City, New York

Project Manager for the planning and design of two separate projects with the goal of mitigating storm surge flooding at the airport with an estimated construction cost of over $50M.

Education

WaterGems

Holland Tunnel Prefabricated Storage Building, Port Authority of NY and NJ

Jersey City, Hudson County, New Jersey

Project Manager for the planning and design of a prefabricated storage building on the NJ side of the Holland Tunnel to store flood mitigation equipment.

Building 111 Mechanical and Electrical Resiliency, Port Authority of NY and NJ

Port Newark, Hudson, County, New Jersey

Project Manager for the planning phase of a fire protection and potable water pump station to evaluate options for flood resiliency.

Port Newark Resident Engineer's Office, Port Authority of NY and NJ

Port Newark, Hudson County, New Jersey

Project Manager for the planning phase to evaluate options for a new flood resilient resident engineer.

Long Beach Bulkhead Replacement

City of Long Beach, Nassau County, New York

Project Manager for the design of a new section of bulkhead along the north shore of Long Beach to provide storm surge resiliency.

Newark Avenue Bridge Water Main Replacement, Jersey City Municipal Utilities Authority

Jersey City, Hudson County, New Jersey

Project Manager for the design and permitting of the replacement of a 36-inch water main and bridge above an active Conrail railroad line.

Newark Avenue CIPP, Jersey City Municipal Utilities Authority

Jersey City, Hudson County, New Jersey

Project Manager for the design of rehabilitation of 4,000 LF of 6-inch, 8-inch, and 12-inch water mains using a structural cured-in-place pipe (CIPP) liner.

Sodium Permanganate Chemical Feed, Jersey City Municipal Utilities Authority

Jersey City, Hudson County, New Jersey

Project Manager for the design, permitting, and construction administration of the installation of a sodium permanganate chemical feed system at the JCMUA Water Treatment Plant.

Journal Square North Water Main Rehabilitation, Jersey City Municipal Utilities Authority

Jersey City, Hudson County, New Jersey

Project Manager for the design and permitting of rehabilitation and replacement of 20,000 LF of 6-inch and 8-inch water mains within the Journal Square North Ward. Prior to design, water main coupons were taken and analyzed to determine the condition of the existing water main and the best method of rehabilitation or replacement. The design included water main replacement, cleaning and cement mortar lining and structural cured-in-place pipe (CIPP) liner.

Ezra Urigwe

Environmental Engineering Lead

Mr. Urigwe has a background in Geological Sciences with a specialization in Hydrology received from the University of Texas at San Antonio. Mr. Urigwe has collaborated with the environmental team on a number of projects including Geologic Assessments, Karst Feature Evaluations, Endangered Species & Habitat Surveys, Soil Sampling, and Phase I and Phase II Environmental Site Assessments in Texas, New Mexico, Tennessee, Virginia, Nebraska, and Oklahoma. To aid in visualizing the data for these projects, Mr. Urigwe has produced several exhibits in ArcGIS and AutoCAD in conjunction with professional geologists and engineers. In addition, he has technical competence in modeling, mapping, and analytical software including MATLAB, PSS/E, and Surfer. Post-graduate, Mr. Urigwe aims to enhance his capabilities with study in the fields of Sustainable Development and Geo-environmental Engineering.

Key Projects

Geologic Assessments

Various, Texas

Conducted the mapping of constructed and naturally occurring geologic karst features over the Edwards Aquifer Recharge Zone. Performed dimensional analysis and qualitative analysis of each karst feature to determine water infiltration and sensitivity. Determined catchment areas for sensitive features and subsurface drainage associated with extensive subsurface features. Prepared both Sewage Collection System (SCS) and Water Pollution Abatement Plan (WPAP) geologic assessment reports and submitted all GIS exhibits and attachments to TCEQ for approval.

Phase I Environmental Site Assessments

Various, Texas

Conducted Phase I ESAs, which require site reconnaissance, review of state and federal databases, interviews with property owner(s), client(s), and environmental regulating agencies, and report composition. Reports are completed in accordance with ASTM E1527-21 standards.

Phase II Environmental Site Assessments

Various, Texas

Assisted with Phase II ESAs, which may require soil borings, monitor wells, soil sampling, trench excavations, groundwater sampling, review of sample analysis, subsurface analysis using ground penetrating radar, and preparation of final Phase II site assessment report. Additional duties include coordinating remediation, asbestos and lead based paint surveys, and removal of Underground Storage Tanks (USTs). When necessary, reports are completed in accordance with applicable regulations including the Texas Risk Reduction Program (TRRP).

Karst Feature Evaluations

Various, *Texas*

Performed mapping of karst features, which included identification of karst features that have endangered karst invertebrate habitat potential, hand excavation of karst features, regional geologic mapping and literature research, preparation of a final report in general accordance with U.S. Fish and Wildlife Services protocols and recommendations for discovered features that will require extensive hand excavation and/or biological surveys. In addition to evaluations, other karst experience includes aerial photograph interpretation, cave mapping, fault trace delineation, stratigraphic interpretation, geophysical log evaluations some minor groundwater modeling.

Endangered Species/Habitat Surveys

Various, *Texas*

Assisted with the mapping of critical habitats of endangered species across Bexar County and the surrounding counties.

Oak Bend Estates

Fair Oaks Ranch, *Texas*

Performed electrical resistivity tomography (ERT) to identify and quantify groundwater and subsurface void space ahead of proposed residential development. Additionally, collected and processed geophysical data as a companion dataset to topographic LIDAR for geotechnical and environmental applications. Analytical results were ultimately used to inform hydrological implementations for the site (i.e., direct storm water and surface water drainage).

Sonoma Verde Geologic Assessment

San Antonio, *Texas*

Facilitated in the identification of thirty-four (34) karst features subsequent to a 13-month field reconnaissance effort. Twenty-five (25) of the features were further evaluated for the potential of occurrence of federally endangered karst invertebrate species. Evaluated karst features by visual inspection, probing, hand-excavation, and/or bait trapping in accordance with United States Fish and Wildlife Service, Section 10(a)(1)(A) Scientific Permit Requirements for Conduction Presence/Absence Surveys for Endangered Karst Invertebrates in Central Texas (USFWS 2022b). As a result, potential habitat for endangered troglobitic invertebrates were adequately protected.

Boonton Dam Geophysical Survey

Boonton, *New Jersey*

Utilized as a member of the permit-required confined space team to capture ground penetrating radar (GPR) data within a 36-inch dam pipe. In total, the pipe spanned a linear distance of 500 feet, and 3D renderings were created to illustrate abnormalities within the conduit pipe.

Port of Corpus Christi Authority

Corpus Christi, *Texas*

Participated in the environmental component of an effort to produce a facility capable of processing approximately 1.3 million cubic yards of dredged sediment, and converting it into sand & cement substitute. Involvement included dredge sampling of dewatered sediment within a 1.65 km2 area adjacent to Tule Lake Turning Basin. The environmental impact of this effort aimed to recycle contaminated dredged material, and to vastly reduce CO2 emissions, energy consumption, and waste generation attributed to traditional manufacturing methods.

Associated Project

Roundabout at Intersection of Votech Drive and Pike Boulevard

CED spearheaded the engineering design for a modern roundabout at the critical intersection of Votech Drive and Pike Boulevard to replace an insufficient all-way stop configuration. This comprehensive traffic solution was developed to alleviate severe congestion and safety concerns driven by rapid regional expansion, including the Mid Valley Industrial Park, airport operations, and county precinct activities. Key contributions included optimizing infrastructure for improved traffic flow and safety, engineering a high-capacity design capable of accommodating significant current and future industrial and municipal growth, and collaborating with city officials and regional stakeholders to deliver an innovative solution aligned with the City of Weslaco's long-term transportation vision.

Role of the Individuals

Principal in Charge - Chris Otto; Project Manager - Guillermo Benavides; Project Engineers - Carlos Fuentes, Diana Hernandez Videa, Melissa Magno, John Walton, and Additional Staff.

City of Clear Lake Shores

Michael W. Kramm, City Administrator
1006 S. Shore Dr., Clear Lake Shores, TX 77565

Associated Projects

General Engineering Services

Since 2023, CED was awarded to provide general services to the City of Clear Lake Shores. As part of this agreement CED has participated in the City Council Meetings and other meeting as requested by the City, as well as performed other general engineering tasks not covered under specific task orders, such as the development of scoping documents for City engineering projects and the review of project plans.

East Municipal Parking Lot Design

CED provided the study, design, and construction of the public parking lot improvement at Clear Lake Shores, aimed at maximizing the use of the available space while ensuring compliance with all City ordinances. Additionally, the project focused on providing ADA compliance, ensuring access from the parking lot to the surrounding commercial areas of the city.

Role of the Individuals

Principal in Charge - Chris Otto; Project Manager - Guillermo Benavides; Project Engineers - Carlos Fuentes, Diana Hernandez Videa, and Additional Staff.

City of Texas City

Kristin Edwards, EDC Manager
1801 9th Ave N, Texas City, TX 77590
409 643 5919 | kedwards@texascitytx.gov

Associated Project

Shoal Point Access Road

CED provided the preliminary engineering and route study for the Shoal Point Access Road, a critical infrastructure project designed to connect hundreds of acres of industrial-zoned land at Shoal Point to FM 197. We addressed a decades-long logistical bottleneck by developing a viable entry path and utility corridor across challenging terrain primarily comprised of dredge spoils. CED delivered of a Preliminary Engineering Report (PER), completing 30% of the roadway and utility design, and collaborating with the Texas City Economic Development Corporation and City officials to align technical solutions with the region's long-term maritime and industrial expansion goals.

Role of the Individuals

Principal in Charge - Chris Otto; Project Manager - Guillermo Benavides; Project Engineers - Carlos Fuentes, Diana Hernandez Videa, Vamshi Konduru, Melissa Magno, Shaun Spivey, John Walton, and Additional Staff.

Professional Services Agreement

Colliers Engineering & Design

Proposed Exceptions

3.2. INSURANCE REQUIREMENTS

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker's Compensation Statutory Coverage

Comprehensive General Liability

(City ~~named~~ included as additional insured)

City's Protective Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Policies must ~~name~~ include the City of Edinburg as an Additional Insured.

Certificates of insurance ~~naming~~ including the CITY as an additional insured shall be submitted to the CITY for approval prior to any services being performed by Contractor. Each policy of insurance required hereunder shall extend for a period equivalent to, or longer than the term of the Contract, and any insurer hereunder shall be required to give at least thirty (30) days written notice to the CITY prior to the cancellation of any such coverage on the termination date, or otherwise. This Contract shall be automatically suspended upon the cancellation, or other termination, of any required policy of insurance hereunder, and such suspension shall continue until evidence that adequate replacement coverage is provided to the CITY. If replacement coverage is not provided within thirty (30) days following suspension of the Contract, the Contract shall automatically terminate.

Reason for Insurance Exceptions: The revision reflects the Contractor's current insurance policy language. An additional named insured is for subsidiaries and affiliated only. The City will be included as an additional insured via blanket endorsement.

Re: Statement of Qualifications for Professional Engineering Services
RFQ No. 2026-7

CRUZ-HOGAN *Consultants, Inc.* is pleased to submit **electronically** of our firm's Statement of Qualifications to perform Professional Engineering Services for the City of Edinburg. This Statement has been organized to respond to your recent "Request for Qualifications."

CRUZ-HOGAN *Consultants, Inc.* has an intimate regional presence in this area and extensive experience in providing professional engineering services to local municipal and other governmental agencies for over 30 years. We currently provide or have provided engineering services for over 20 communities here in the Rio Grande Valley, and we have assisted many of these local governments with the planning, design, and construction phase services for their projects. Every project that CRUZ-HOGAN *Consultants, Inc.* undertakes is planned, designed, and completed with quality control by engineering personnel who have a combined 70 years of experience with public works projects.

We are currently assisting the City of Edinburg with the Rehabilitation of Existing Clarifiers at the Downtown Water Treatment Plant.

We are very interested in being selected to continue to provide professional engineering services for the City of Edinburg. We have reviewed the scope of work required for your projects, and we are committed to perform and complete the professional services and specific tasks required by the City in connection with the assigned projects. The engineers and support staff that will be assigned to these projects have completed many similar projects here in the Rio Grande Valley.

Finally, CRUZ-HOGAN *Consultants, Inc.* can provide the City of Edinburg with a number of advantages, which we believe to be desirable:

- Local firm with extensive experience in providing Professional Engineering Services to local City governments
- Engineering firm specializing ***only*** in public works projects
- Recent and successful completion of many roadway, water, wastewater, storm sewer, traffic and transportation engineering for Cities, Municipalities and Communities located in the Rio Grande Valley Area
- We have the ***Engineering and Support Staff*** immediately available for this assignment.

I certify that **no Addenda was received.** The information contained in this Statement of Qualifications is complete and accurate, and as such, we hereby provide permission for the City of Edinburg and its representatives to contact existing and previous clients of our firm and our consultant team members for the purpose of determining performance.

We appreciate this opportunity to present this Statement to you and sincerely hope that you will select us to perform these services for the City of Edinburg. Should you have any questions, the following will be the main point of contact for this RFQ:

Marcus Cruz, P.E., CFM
Project Engineer
605 E. Violet, Suite 1
McAllen, Texas 78504

SECTION 1

Firm Information

Company Vision

Since 1988, Cruz Hogan has been a leading expert in planning, design, and project management of wastewater projects for cities, water supply corporations and municipalities across the Rio Grande Valley and South Texas: *"Engineering Better Communities, Since 1988"*

"Engineering Better Communities, Since 1988"

Firm Introduction

CRUZ-HOGAN has an intimate regional presence in the Rio Grande Valley. We have assisted many cities and communities with planning, design, and construction phase services over the last 35 + years. Our firm specializes in providing municipal public works type consulting engineering services to cities and other public entities. In conjunction with its predecessor firm, CEC Consulting Engineers, Inc., our firm has been in business continually since 1988 and currently has a staff of over 12 employees, including associates. The office that will be working closely with you is our office location in McAllen and Weslaco, Texas. Our firm's principals have been active in the private consulting sector for many years, collectively, providing services to clients in South Texas and surrounding areas and completing some **600** public works-type projects.

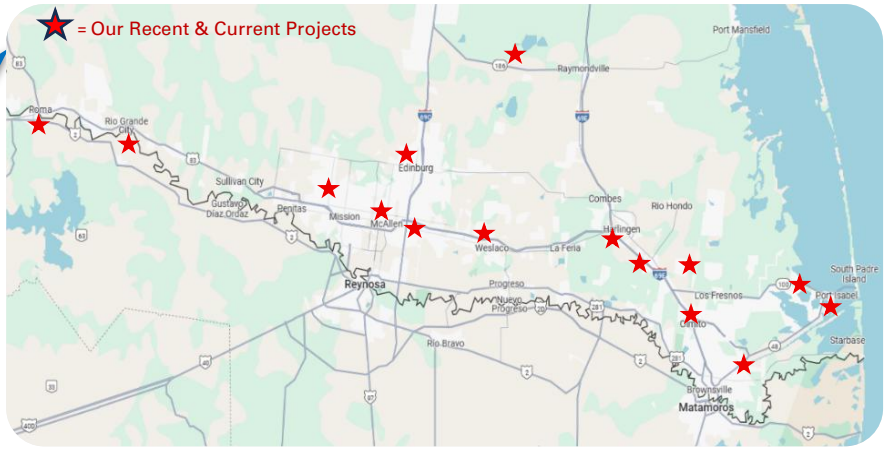
Firm Expertise

- **Sanitary Sewer Lift Station Projects**
- **Wastewater and Water Treatment Facilities Projects**
- **Wastewater Collection Projects**
- **Water Distribution Projects**
- **State (TWDB), Federal (FEMA & EPA) Funded Projects**
- **Flood and Storm Drainage Projects**
- **Roadway, Bridge, and Design**
- **Engineering Services to Local Governments**
- **GIS Mapping**

A Complete RGV Team for Edinburg

Our three local RGV offices (McAllen, Weslaco, and Harlingen) are the principal offices that will manage and execute this work for Edinburg. Our local offices house some of our firm's most well-known and respected wastewater experts locally, we have the right local technical know-how backed by 100+ years of combined experience.

CRUZ-HOGAN (Weslaco) Office – 2290 W. Pike Blvd, Ste 102
CRUZ-HOGAN (McAllen) Office – 605 E. Violet Ave, Ste 1
CRUZ-HOGAN (Harlingen) Office – 1204 N. 7th St Ste B



CRUZ-HOGAN in the RGV & South Texas

During the past 35 + years, the personnel of **CRUZ-HOGAN** have been involved in many comprehensive projects that have included various planning and design elements such as waterworks and sanitary sewage systems, population projections, land-use, thoroughfares, landfills, storm drainage, central business district, parks and recreation, zoning, subdivision regulations, and others. We have completed planning and design projects for many cities in Texas including, Alamo, Alton, Brownsville, Raymondville, Edcouch, Weslaco, San Benito, San Juan, Port Isabel, Lyford, Pharr, Mercedes, Harlingen, McAllen, Town of Laguna Vista, Town of Indian Lake, South Padre Island, Cameron County, Willacy County, Hidalgo County, and others.

In addition, our services have been performed for Cities, Waterworks and Rural Water Supply corporations, and other water systems including El Jardin Water Supply Corporation, Laguna Madre Water District, Harlingen Waterworks System, McAllen Public Utility, Olmito Water Supply Corporation, and many others.

"Our projects are RGV proud, and make lasting impressions by being a part of your community"

Care and Attention to the City of Edinburg

CRUZ-HOGAN being a local company based **100%** out of the RGV means we provide a more personalized care and attention to our clients, fostering close relationships, understanding their individual needs, and offering fine-tune cost effective tailored solutions, whereas large businesses may rely on standardized processes and less direct interaction, which can sometimes lead to a more detached customer experience and elevated overhead costs that impact small systems and municipalities. The basic principle of our firm's formation and practice is to provide complete technical and personal service to our clients, to complete projects on time, and within the budgets. We herewith commit our firm to have a principal in charge of all work performed for you and to have a principal present; specifically, **Orlando Cruz P.E. and Ronnie Cruz P.E. CFM,** whenever humanly possible, at all major presentations, contract negotiations, bid openings, and other important meetings where our projects are involved.

SECTION 2

Staff Qualifications

Team Member Personnel

Our **100% local** engineering team is composed of highly qualified professionals specializing in all municipal type engineering, specializing in municipal engineering. We bring extensive expertise in designing sustainable treatment solutions, optimizing system performance, and ensuring compliance with environmental regulations.

Orlando Cruz PE
Senior Project Manager
Client Representative

Marcus Cruz PE, CFM
Project Manager
Plans & Specfifcaitons

SECTION 3

Experience with State & Local Funding

Funding Experts

With **CRUZ-HOGAN** as your dedicated experts, we promise to keep your city's sewage flowing smoothly. Rest assured, we're dedicated to ensuring your systems operate reliably, so your community can keep moving forward without any wastewater setbacks. Let us take the pressure off your town's shoulders—because when it comes to civil engineering, we're truly the best in the business!

Experience in Planning, Design, and Public Works Development:

Our team has extensive knowledge working with the City of Edinburg through their various funding programs, including **CIP (Capital Improvement Programs), State of Texas Programs, and the TWDB (Texas Water Development Board).** This project will provide funding that will improve access to safe and reliable engineering services for moderate possibly low-income communities. **CRUZ-HOGAN** has reviewed and understands the City of Edinburg's **Capital Improvements Plant** and has extensive knowledge and expertise on how to address the sanitary sewer system needs of the City's, including exhibits, cost estimates, and preliminary design for providing compliance with capital improvement program funding. On the next page is an extensive breakdown of our successfully completed Projects.

Experience with the City of Edinburg Projects:

Water Treatment Plant Improvements: Rehabilitation of Existing Filters

- Construction Funded through TWDB
- Completed 2023

Downtown Water Treatment Plant Improvements: Rehabilitation of Existing Clarifier No.1

- Texas Water Development Board Project No. 62597
- Plans & Specification Completed May 2025
- Pending Bidding Phase

TEXAS WATER DEVELOPMENT BOARD

Capital Improvements Program

Pumping Stations

CRUZ-HOGAN has designed and managed the construction of over 80 type pump stations involving sanitary sewer collection systems, effluent, influent, return activated sludge (RAS), waste activated sludge (WAS), collective sewer overflow, and storm water. Many of our lift station designs involved special considerations for minimizing community and environmental impacts such as aesthetic architectural considerations, odor, and noise control for the neighboring citizens of Edinburg.

As part of our services, **CRUZ-HOGAN** has assisted and prepared applications, exhibits, and cost estimates for many projects. On the **next page** is an extensive breakdown of our lift and pump station projects successfully completed over the last 27 years.

Wastewater Pumping Experts

With **CRUZ-HOGAN's** extensive pump station experience, we don't need to figure out how the process works, we can advise you every step of the way to efficiently proceed through the funding, planning, and eco-friendly steps to accelerate the project to design and construction!

History with Wastewater Lift Station Projects			
PROJECT DESCRIPTION	YEAR	FUNDING	COST
City of Weslaco – Lift Station No. 12 Project	Under Construction	ARAP Funding	$ 1,860,000.00
Olmito WSC – New WWTP Including Plant Lift Station	Under Construction	RD – USDA Funding	$ 8,500,000.00
Olmito WSC - Wastewater System Master Lift Station	Design Completed	RD – USDA Funding	$ 2,200,000.00
City of San Juan – TWDB Lift Station No. 13 Rehibition	2025	TWDB - CWSRF	$ 1,097,000.00
Laguna Vista, TX & EDA Eco Tourism Center Lift Station	2022	EDA – Grant Funding	$ 297,000.00
City of McAllen Public Utility - 2nd & Violet Lift Station	2015	MPU – CIP Funding	$ 1,119,000.00
City of Pharr – Analysis of Lift Station No.40	2014	Pharr Utility Dept.	$ 11,500.00
Olmito WSC – Abelardo Lift Station Colonia Project	2012	EDAP (70% Grant)	$ 175,000.00
Olmito WSC – California Lift Station Project	2012	EDAP (70% Grant)	$ 180,300.00
City of Weslaco – Rehabilitation of Lift Station No.36	2011	City – CIP Funding	$ 3,575,225.00
City of San Juan – Rehabilitation of LS No. 1,2, &19	2011	City – CIP Funding	$ 650,000.00
City of Lyford – New Glen Lopton Lift Station	2010	City – CIP Funding	$ 233,000.00
City of McAllen Public Utility - 2nd & Jonquil Lift Station	2010	MPU – CIP Funding	$ 950,000.00
City of San Juan – New Carroll Rd Lift Station Improvements to St. Ives Corner	2008	TWDB - Loan & Grant	$ 394,000.00
City of Lyford – Rehabilitation of 8th Street Lift Station	2003	City – CIP Funding	$ 150,000.00
City of San Benito – Lift Station on South Sam Houston	2006	City – CIP Funding	$ 243,000.00
City of San Benito – Lift Station on State HWY 345	2005	City – CIP Funding	$ 420,000.00
Olmito WSC – Lift Station on Thompson Road	2004	EDAP Loan & Grant	$ 240,000.00
City of Lyford – Rehabilitation of Existing Lift Stations	2003	City – CIP Funding	$ 290,000.00
Olmito WSC – Lift Station on Lomax Road	2002	85% Grant Assistance	$ 250,000.00
City of San Benito - Rehabilitation on Rose St Lift Station	2000	City – CIP Funding	$ 350,000.00
Brooks County – Lift Station for CDBG Project	1999	County – CIP Funding	$ 150,000.00
City of San Benito – EDAP Three Lift Stations Project	1998	City – CIP Funding	$ 450,000.00
City of Alamo – Tower Rd Lift Station Rehabilitation	1995	City – CIP Funding	$ 350,000.00

Texas Water Development Board Funding Experts

CRUZ-HOGAN *Consultants, Inc.* is fully aware that a successful project not only relies on technical expertise, but also engineers that have a thorough understanding of the funding mechanisms for each project. Our team has extensive knowledge working with the Texas Water Development Board (TWDB) through their various funding programs, including **Economically Distressed Areas Program (EDAP)**, **Clean Water State Revolving Fund (CWSRF),** and **Drinking Water State Revolving Fund (DWSRF**) over the last **22 years**.

As part of our services, **CRUZ-HOGAN** has assisted and prepared applications, exhibits, and cost estimates for obtaining funds or providing compliance with these funding programs. Below is an extensive breakdown of projects successfully completed with Texas Water Development Board.

History with Texas Water Development Board Funding Programs			
FUNDING PROGRAM	Yr	Status of Funding	Cost
CWSRF – WWTP 1.5 MGD Expansion & Rehab – Weslaco, TX	2024	Awaiting IUP Ranking	$ 28,500,000
CWSRF – LS No. 13 & Force Main Improvements - San Juan, TX	2024	30% Loan Forgiveness	$ 1,700,000
CWSRF – WWTP Improvements - San Juan, TX	2023	30% Loan Forgiveness	$ 8,500,000
CWSRF – Sludge Dewatering Facility - San Juan, TX	2021	30% Loan Forgiveness	$ 1,200,000
CWSRF – First Time Sewer Connections - San Juan, TX	2019	85% Loan Forgiveness	$ 1,430,000
CWSRF – Rehab of Ground & Elevated Storage – Olmito WSC	2015	Low Interest Loan	$ 2,700,000
DWSRF – Rehab Existing WTP Clarifiers - Edinburg, TX	2024	30% Loan Forgiveness	$ 8,500,000
DWSRF – Rehab Existing WTP Filters - Edinburg, TX	2023	30% Loan Forgiveness	$ 8,500,000
DWSRF – 3.5 MGD WTP No. 2 Expansion - San Juan, TX	2018	30% Loan Forgiveness	$ 8,500,000
DWSRF – 16” Water Transfer Line – San Juan, TX	2015	30% Loan Forgiveness	$ 2,500,000
DWSRF – Water System Improvements – EL Jardin WSC	2013	Low Interest Loan	$ 3,000,000
DWSRF – 1.0 MG Elevated Storage Tank – EL Jardin WSC	2013	Low Interest Loan	$ 750,000
EDAP – First Time Sewer Connections - San Juan, TX	2019	85% Loan Forgiveness	$ 1,430,000
EDAP – Purchase of Water Rights for Pharr, TX	2012	30% Loan Forgiveness	$ 3,500,000
EDAP – First Time Sewer Connections – Olmito WSC	2012	100% Loan Forgiveness	$ 1,800,000
EDAP – First Time Sewer Connections – San Benito, TX	2002	100% Loan Forgiveness	$ 1,100,000
EDAP – Colonia Wastewater Collection System – San Benito, TX	2002	100% Loan Forgiveness	$ 1,800,000

TEXAS WATER DEVELOPMENT BOARD

SECTION 4

Firm Capability and Relevant Experience

Storm Drainage & Roadway Experience

The following pages provide our firm's local experience with drainage & roadway projects similar to the City of Edinburg's existing needs. Our team's relevant experience in the last 5 years, both inside and outside of the region, is wide-ranging. All these projects are relevant to the City of Edinburg's current needs and involve street, roadway, and drainage improvements and associated utilities improvements. We invite you to contact these references so they can attest to the value and level of service that we consistently provide.

City of Weslaco: Cleckler-Heald Elem Regional Detention Facility (RDF) TWBD FEMA - Flood Infrastructure Fund

Project Details

Cruz Hogan was the designer on a new Regional Detention Facility (RDF). Approximately 125,000 cubic yards of earthen material was excavated and hauled off. This regional detention facility is constructed with a level bottom, with a slight grade to the pond exit pipe to allow for the installation of future soccer fields and other recreational space that would be enjoyed by both school children and the general public. Additionally, earthen ramps were constructed to allow school children and the general public to safely access the recreational space. 8' metal fencing and gates were constructed to provide safety and control in the detention pond area. Both the School District and the City will maintain the detention pond. Additionally, handicap ramps, sidewalks, and driveway entrances were included in the design for use of the children. Traffic barriers and a traffic control plan were required including temporary fencing and gates were constructed to provide safety and control in busy middle and elementary school area.

Included: H&H Study & BCA/BCA Analysis

ACCOMPLISHMENTS:

- TWDB/FEMA Funded Project
- Joint Weslaco & WISD Venture
- Alleviated flooding in the surrounding neighborhood
- H&H Modeling with BCA
- FEMA Region 6 requirements

Relevance To Edinburg:
This project provided a big impact to local residents during an anticipated 50 -Yr storm occurrence.

Project Funding:
TWDB – FIF

Completion Date:
Completed 2025

Construction Cost:
$3,400,000.00

Team Involvement:
Orlando Cruz PE – Design Manager
Senior Project Manager

Marcus Cruz PE – Project Engineer
Open Channel Hydraulics

City of Weslaco: Pleasant View Regional Detention Facility (RDF)

Project Details

Cruz Hogan was the designer on a new Regional Detention Facility (RDF). Approximately 253,000 cubic yards of earthen material was excavated and hauled off. This regional detention facility is constructed with a level bottom, with a slight grade to existing pilot channel which acts as the systems drainage control and outfall. Additionally, earthen ramps were constructed to allow tractor mowing for maintenance and the general public to safely access the recreational space. Traffic barriers and a traffic control plan were required including temporary fencing and gates were constructed to provide safety and control in busy downtown area.

ACCOMPLISHMENTS:

- Addressed June 2019 Rain Event
- Joint Weslaco & HCCID Venture
- Alleviated flooding in the surrounding neighborhood

Relevance To Edinburg:

This project provided a big impact to local residents during an anticipated 50 & 100 -Yr storm occurrence.

Project Funding:
ARPA

Completion Date:
Completed 2023

Construction Cost:
$670,000.00

Team Involvement:
Orlando Cruz PE – Project Manager
Marcus Cruz PE – Project Engineer
Open Channel Hydraulics

City of Weslaco: Drainage Improvements on Border Ave.

Project Details:

Cruz Hogan was the designer on a roadway drainage project on Border Ave. This Drainage Project on Border Avenue involved the design and construction of approximately 1,120 linear feet of storm drainage RCP infrastructure to effectively mitigate flooding in adjacent neighborhoods that enhanced local flood resilience. The project included upsizing the existing drainage systems from two ditch structures to improve capacity and ensure efficient stormwater runoff management, thereby providing long-term flood protection and supporting community safety and development.

Project Included:

- 1,120 LF of 48" RCP Piping
- 3 Type "M" Storm Manholes
- 200 SY of Pavement Repair
- Type "M" Conflict Manholes
- 2 Concrete Headwalls @ Ditches
- Demo Existing RCP Piping
- **Open Channel Hydraulic Analysis**

ACCOMPLISHMENTS:

- ARAP Funded Project
- Utility coordination in urban corridors
- Alleviated flooding in the surrounding neighborhood

Relevance To Edinburg:

This project provided a big impact to local residents during an anticipated 50 & 100 -Yr storm occurrence.

Project Funding:
ARPA Fund

Completion Date:
Completed 2025

Team Involvement:
Orlando Cruz PE: Project Manager
Marcus Cruz PE: Project Engineer
Open Channel Hydraulics

Construction Cost:
$850,000.00

HCDD No.1 Highway 281 & FM 88 Levee Storm Water Pump Station

Project Details:

Cruz Hogan was served as the designer for a flood control pump station project that effectively managed stormwater by pumping over a USWBC floodway levee, ensuring continuous flood mitigation during significant storm occurrences. The system was engineered to operate in coordination with floodway gate operations, allowing the 42,000 GPM pumps to continue functioning even when the gates were shut due to high water levels, thereby providing reliable and uninterrupted flood protection for the surrounding communities. This impacted the residents just outside the city limits of Weslaco that live in the Hidalgo County Precinct No.1

ACCOMPLISHMENTS:

- Hidalgo County & USWBC Joint Project
- Levee Pump Station for County Flood Mitigation
- Alleviated flooding in the surrounding neighborhood

Relevance To Edinburg:

This project provided a big impact to local residents during an anticipated 50 & 100 -Yr storm occurrence.

Project Funding:
2018 Drainage Bond

Completion Date:
Completed 2025

Construction Cost:
$1,250,000

Team Involvement:
Orlando Cruz PE – Project Manager
Marcus Cruz PE – Project Engineer
Open Channel Hydraulics

City of McAllen N. 10th St.to N. 2nd St. Drainage Improvements

Project Details:

Cruz Hogan served as the designer the for the City of McAllen's storm water capital improvement plan project, which involved extending Dove Ave. from 41st Street to Bentsen Road. The project consisted of a box culverts large diameter RCP drainage enhancements such as installing a siphon at the irrigation canal, crossing the main drainage ditch, and widening Bentsen Road to better manage stormwater and reduce flooding risks in the community. Project included traffic control barricades, signs, detours, & traffic handling as per TXDOT requirements.

Project Included:

- 1127 LF of 48" RCP
- 1000 LF of Metal Beam Guard
- 500 LF of RCP 18"- 30" Pipe
- 2950 LF of 24" Curb & Gutter
- 1,137 LF of 8" DR-18 Waterline
- 3,000 SY of 4" Limestone Base
- 1,600 SF of 6" Concrete Driveway Replacement
- 10,700 SY of 3" HMAC Pavement
- 320 LF of 60" RCP

ACCOMPLISHMENTS:

- Multi-Phase Capital Improvement Project
- Flood Mitigation through City Thorofare
- Utility coordination in urban corridors

Relevance To Edinburg:

This project provided drainage relief during an anticipated 50 & 100 -Yr storm occurrence.

Project Funding:
CIP Drainage Bond

Completion Date:
Feb. 2026

Construction Cost:
Ph,1: $4,129,726.00
Ph,2 $1,219,762.00
Ph. 3 $1,435,291.00
Total: $8,313,000.00

Team Involvement:
Ronnie Cruz PE –Pro Manager
David Lopez PE – Project Eng
Open Channel Hydraulics

ACCOMPLISHMENTS:

Multi-Phase Capital Improvement Project
Flood Mitigation through City Thorofare
Utility coordination in urban corridors
TXDOT H&H Analysis – Floodplain No Rise

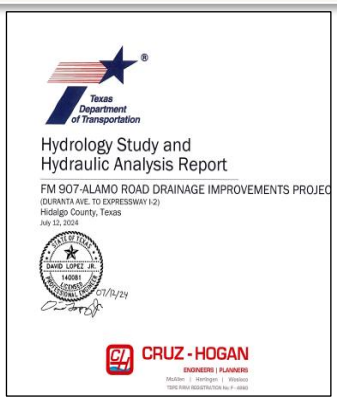
Relevance To Edinburg:

This project provided a big impact to local residents during an anticipated 5 & 10 -Yr storm occurrence.

Project Funding:
TXDOT/Alamo

Completion Date:
July 2026

Construction Cost:
$2,400,000.00



Team Involvement:
Ronnie Cruz PE – Project Manager
David Lopez PE – Project Engineer
Open Channel Hydraulics
Hydraulic Modeling

City of Alamo/TXDOT – FM 907 – Alamo Rd Drainage Improvements (Duranata to Expressway I-2)

Project Details

The proposed project consists of upgrading the existing drainage system by replacing the main truckline to be a 36-in RCP that will connect into an existing 60-in RCP at the intersection of FM 907 and Interstate Highway 2 frontage road. The existing inlets will be replaced with proposed Type “A” Inlets that will have 24-in RCP lateral connections to main truckline.

For this drainage study, site reconnaissance, field survey, TxDOT as-builts and Federal Emergency Management Agency (FEMA) maps were utilized to determine existing drainage flood insurance rate map (FIRM) and recently developed base flood elevation for storm events. Also included in this report are the computed water surface elevations for the 2-year, 5-year and 10-year storm events and computed discharges.

Town of Indian Lake: Paving & Drainage Improvements to Aztec Cove Drive, Phase II Project

Project Details

Cruz Hogan was the designer, and prime consultant, on a paving and drainage project for the Town of Indian Lake. The project involved scarifying and removing existing caliche base and asphalt material, excavation of subgrade, clearing and backfill of existing road ditch with salvage material, compaction of subgrade to final grade, watering and moisture control, tree removal and trimming, material density control and hauling and disposal of all unused materials.

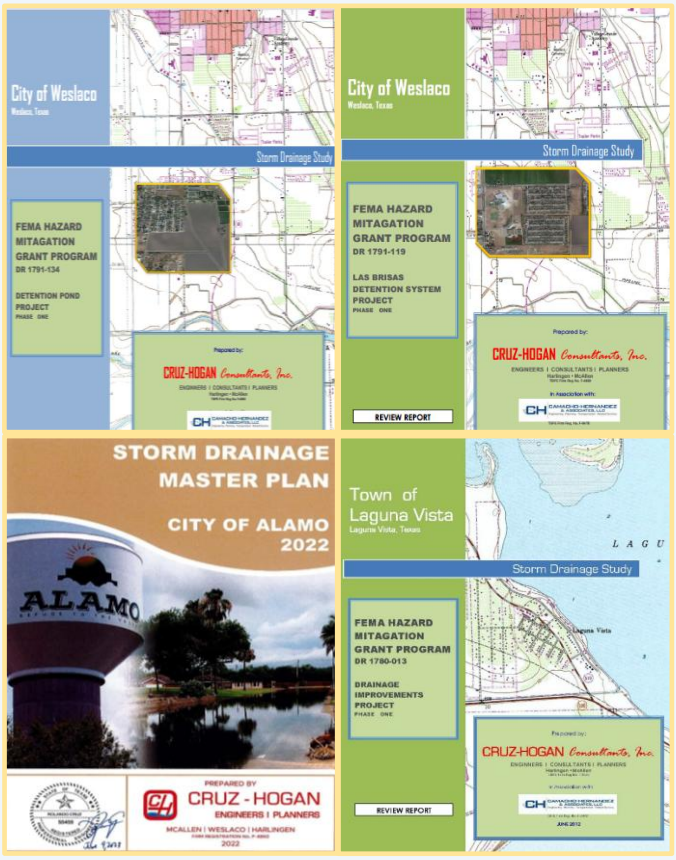
Project Included:

- Reconstruction of Approximately 700 LF of Existing Street
- 5 EA – Storm Drainage Inlets & Manholes
- 1,900 SY of 6” Limestone Base Material
- 1,600 LF of 24” Roll Over Curb and Gutter
- Concrete Handicap Ramp Sections
- 350 LF of 24” and 18” RCP Storm Drainage Line
- 2,500 SY of Lime Stabilization of Sub-Base
- 1,900 SY of 1.5” Hot Mix Asphalt Concrete
- 300 SY of Asphalt Transitions
- 4 EA - 8” PVC Waterline & Service Adjustments

ACCOMPLISHMENTS:

- Funded entirely through ARPA Funding
- Alleviated Drainage and Provided Steet Reconstruction in 3 Phases
- Utility coordination in urban corridors

Relevance To Edinburg:



This project provided is concrete roadway reconstruction that could benefit Harilngen due to extension roadway needing improvements

Project Funding:
CDBG – TDA

Completion Date:
2023 Completion

Construction Cost:
$900,000.00

Team Involvement:
Orlando Cruz PE: Project Manager
Marcus Cruz PE: Project Engineer
Roadway/Pavement

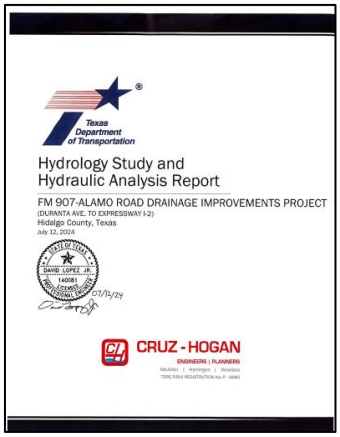
Drainage Studies and Modeling for Storm Related Systems:

Cruz Hogan has completed comprehensive drainage studies and master planning studies for the City of Weslaco, City of Alamo, Town of Laguna Vista, and other cities where we developed a sustainable, scalable Capital Improvement Plans, Benefit to Cost Ratios, and other strategies to address flood mitigation.

We take pride in successfully completing drainage analyses and studies that are fundamental to the development and implementation of effective flood control and stormwater management solutions. Our approach involves thorough data collection, detailed hydrologic and hydraulic modeling, and careful evaluation of existing conditions to identify potential drainage issues and develop cost-effective, practical solutions. Our firm is committed to ensuring that each study is comprehensive, accurate, and tailored to meet the specific needs of the project, whether it involves capacity analysis, infrastructure design, or floodplain management. By integrating demographic data, land use trends, and drainage system capacity assessments, we developed a dynamic model that allows for system scenario analysis and capacity optimization.

Firm Experience with TDEM/FEMA Funded Projects & H&H Studies

Federal/State Funding Projects:



- **FEMA -TWDB -** FIF City of Weslaco **2025** Cleckler Held RDF Conducted Full **(H&H) Modeling with BCA Calculations**
- **FEMA-TDEM – 2025** Funding Hurricane Beryl FEMA DR-4798 City of Weslaco Paisano Drainage Conducted Full **(H&H) Modeling with BCA/BRC** Calculations - Awaiting Funding
- **FEMA-TDEM – 2025** Hurricane Beryl FEMA DR-4798 - City of Weslaco Agostadero Drainage Conducted Full **(H&H) Modeling with BCA/BRC Calculations** - Awaiting Funding
- **FEMA Drainage Study** – 2012 "Hurricane Dolly Disaster Recovery"– Las Brisas – Weslaco Conducted Full **(H&H) Modeling with BCA Calculations**

Experts at Successful Projects

With **CRUZ-HOGAN's** extensive project experience, we don't need to figure out how the process works, we can advise you every step of the way to efficiently proceed through the funding, planning, and eco-friendly steps to accelerate the project to design and construction!

STORM DRAINAGE & STREET PROJECTS IN HIDALGO COUNTY		
PROJECT NAME AND LOCATION	**FINAL AMOUNT**	**PROJECTED COMPLETION**
City of Weslaco – TWDB Regional Detention Pond Project 2, Phase 1B	$2,784,636.00	2025
City of Alamo – Design of Two Regional Detention Facilities at Livas Elementary and Farias Elementary	$600,000.00	2025
Hidalgo County Precinct No. 2 – Moore Road Project (Veterans Blvd. to San Antonio Rd.)	$800,000.00	Design Phase
Hidalgo County Precinct No. 2 – Minnesota Road Project (Raul Longoria to Cesar Chavez)	$770,000.00	Design Complete
City of McAllen – Dove Avenue Drainage Improvements Project (Bentsen Road to North 41st St.)	$1,924,627.00	Design Complete
City of McAllen – Drainage Utility Project – McAllen Lateral Channel Drainage Improvements	$2,000,000.00	Design Complete
Hidalgo County Drainage District No. 1 – Highway 281 & FM 88 – 2018 Bond Referendum Project No. 14	$1,233,750.00	Construction Phase
City of McAllen – 2018 Drainage Bond Stormwater Management Improvement Projects	$2,997,000.00	Construction Phase
City of Weslaco – Regional Detention Facility for Pleasantview and 11th	$500,000.00	August 2022
City of McAllen – Drainage Utility Project – Camelia Avenue at North 8th Drainage Improvements	$185,000.00	May 2022
City of San Juan – Paving Reconstruction Improvements	$1,100,000.00	November 2020
City of San Juan – 2018 Street Improvements Project	$280,000.00	December 2019
City of Donna – 2017 Street Improvements to South Ave.	$205,000.00	August 2019
City of San Juan – Paving Reconstruction Improvements	$2,180,000.00	December 2018
Hidalgo County Precinct No. 2 – Street & Drainage Improvements	$ 460,000.00	March 2018
City of San Juan – Paseo de las Flores & Public Safety Building & Development Drainage Improvements	$ 885,000.00	2017
City of San Juan – Los Chaparrales Subdivision Phase I Drainage & Sgt. Leonel Treviño Road Widening	$ 1,323,600.00	2017
City of Pharr –Pharr/Reynosa International Bridge Northbound	$ 2,200,000.00	2015
City of Donna - Improvements to Old La Blanca Road	$ 380,000.00	2015
City of San Juan-2014 Street Reconstruction Project	$ 870,000.00	2014
City of San Juan - Lowering of Canal Crossings & Road Widening at Eldora & Sgt. Treviño	$ 650,000.00	2014

STORM DRAINGE & STREET PROJECTS IN CAMERON & WILLACY COUNTY		
PROJECT NAME AND LOCATION	**FINAL AMOUNT**	**PROJECTED COMPLETION**
City of Port Isabel – Improvements to Washington Ave (SH 100 to Pennsylvania Ave.	$356,189.36	July 2023
Town of Indian Lake – Drainage Improvements to Texoma, Iowa, and Citrus Streets	$285,000.00	November 2022
Town of Laguna Vista – Street Improvements (Fernandez, Banker, and David Cuervo Streets)	$265,000.00	November 2022
Town of Indian Lake – Paving & Drainage Improvements to Aztec Cove Drive	$218,000.00	May 2021
City of Port Isabel – Street Improvements to South Shore Drive (Cisneros St. to Adams St.)	$269,000.00	January 2021
Town of Laguna Vista - Street Paving Improvements to Beach Blvd.	$275,000.00	2018
Willacy County – Street Improvements to Wells Street (6th to 9th Street)	$180,000.00	2018
Town of Laguna Vista – Street Improvements to Orange Street (Hibiscus to FM 510)	$180,000.00	2017
City of Port Isabel – Street Improvements to Tarnava & Railroad Streets	$186,000.00	2017
Town of Indian Lake – Paving & Drainage Improvements to Aztec Cove	$175,000.00	2017
Town of Indian Lake – Improvements to Existing North Lake	$163,000.00	2016
Town of Laguna Vista - Street Improvements (Ebony/Hibiscus to FM	$168,000.00	2015
Town of Laguna Vista - Improvements to Palm Boulevard and Mesquite Drive	$323,000.00	2015
City of Lyford –Eleventh and Seventh Street Improvements Project	$130,000.00	2014
Willacy County - Contract B – Street & Drainage Improvements, Supplemental Project, Texas GLO - Hurricane Ike/Dolly	$250,000.00	2014
FEMA Storm Drainage Improvements-Phase I (HMGP) (Laguna Vista, Texas – Cameron County)	$136,000.00 (Study Report)	2012
Willacy County - Contract B – Street & Drainage Improvements Hurricane Ike/Dolly Disaster Recovery	$800,000.00	2012
Town of Laguna Vista - Drainage Improvements on Ebony Lane Hurricane Ike/Dolly Disaster Recovery	$70,000.00	2011
Cameron County Drainage Improvements – Yturria & Musina Street Areas in Port Isabel Texas Department of Rural Affairs - Hurricane Ike/Dolly Disaster Recovery	$170,000.00	2011
City of Port Isabel - Improvements to City Streets Project: City Wide Program	$170,000.00	October 2011

Preliminary Engineering Report = (PER)

As part of our services, **CRUZ-HOGAN** has assisted and prepared applications, exhibits, and cost estimates for many projects. On this page is an extensive breakdown of our storm drainage projects successfully completed over the last 27 years.

Relevant Lift Station Experience

CRUZ-HOGAN not only **"talks the talk, but we also walk the walk"** when it comes to project delivery. With you in the driver seat, we consider ourselves an extension of your staff.

The following pages provide our firm's local experience with projects similar to the City of Edinburg's existing needs. Our team's relevant experience in the last 25 years, both inside and outside of the region, is extensive. All five of these projects are relevant to the City of Edinburg and involve W/WW improvements and associated facility improvements. We invite you to contact these references so they can attest to the value and level of service that we consistently provide.

City of San Juan:
Rehabilitation of Lift Station No. 13 & Forcemain - TWDB Clean Water SRF

San Juan, Texas

Cruz Hogan was the designer, and prime consultant, on a new lift station using cost saving VFD's, innovative chopper pumps, and a Bio Air odor control system for the City of San Juan. The station is located adjacent to the San Juan Basilica and receives flow from the entire northern portion of the city.

Project Details

The project involved a new 2300 GPM Triplex lift station constructed next to the existing station. Included was the use of a "Chopper Pump System" that alleviated their rag and debris issue by having a chopping mechanism built into the pumps. The pumps were also controlled by variable frequency drives (VFD's) that provide significant power saving by speeding up or slowing motors based on influent flow. The LS provided a layout that allowed easy access to maintenance personnel and provided cover roofing for preservation of electrical controls. The station was built with an esthetic Limestone/CMU block wall to compliment the future amphitheater that will be adjacent to the station. The project also consisted of 5000 LF of 12'' force main that ran southward crossing a Union Pacific Railroad crossing and Business TxDOT HWY 83, and both entities required permits.

Before Rehab

ACCOMPLISHMENTS

- Provided odor control system to alleviate neighbors' concerns
- Provided Aesthetics Limestone Fencing
- Chopper Pump System for Debris and Rags

Relevance To City Of Edinburg

This similar design could be utilized to the aesthetics, due to the anticipated site being in view of city events and public.

Client Reference:

Juan Martinez: Utility Director
(956) 310-1670

Project Funding:

TWDB Clean Water
State Revolving Funds

Completion Date:

Construction Complete – 2025

Construction Cost:

$ 1,097,000.00

Team Involvement:

Orlando Cruz PE – Senior Project Manger
Marcus Cruz PE – Project Engineer/Environmental

Town of Laguna Vista & Laguna Madre Water District: 23 Acre Development Eco Tourism Center Lift Station Project

Laguna Vista, Texas

Cruz Hogan was the designer, and prime consultant, on a new packaged lift station using cost saving VFD's, and a new Bio Air odor control system for Laguna Madre Water District. The station is located adjacent to the Eco Tourism Center in Laguna Vista and receives flow from the entire 23 ACRE Development.

Project Details

The project involved the construction of a sized 150 GPM (gallon per minute) wastewater lift station on the most northeast corner of the twenty-three-acre site. The flow capacity of the lift station is based on the complete build out of the proposed 23-acre development site, with the site being comprised of 6.5 acres in commercial development, 6.5 acres in residential development, and the proposed Eco-Tourism Center site. A 6-inch diameter sewer force pressure main was constructed along the SH 100 road frontage, from the lift station to the existing Laguna Madre sewer manhole at the FM 510/SH 100 intersection. The distance of the 6-inch force main was approximately 3,000 LF. A 12-inch sewer line, approximately 1,400 LF in length, was installed beginning at the proposed lift station and extended to the most northwestern corner of the 23-acre development property site. The 12-inch sewer gravity line will be installed along the SH 100 road frontage. Manhole stub-outs were included for future development connections. Manholes were installed on the 12-inch sewer line spaced at approximately 300 feet intervals.

ACCOMPLISHMENTS

- Provided odor control system to alleviate Eco Tourism center concerns
- Provided Package System for easy operations
- 100% Grant Funding through EDA

Relevance To City Of Edinburg

This similar design could be utilized for the odor control containment, due to the anticipated site being in proximity to city and the public spaces.

City of Weslaco Industrial Park: New Lift Station No.12 Project

Weslaco, Texas

Cruz Hogan was the designer, and prime consultant, on a new lift station using cost saving VFD's, and innovative chopper pumps for the City of Weslaco. The station is located next to Joe Stevens Blvd and Vo-Tech in the industrial park adjacent to Mid-Valley Airport.

Project Details

This project addressed the elimination of existing lift station and the construction of a larger capacity lift station to take their place within the current wastewater collection system. The project involved a new 1900 GPM Triplex lift station constructed next to the existing station. Included was the use of a "Chopper Pump System" that alleviated their rag and debris issue by having a chopping mechanism built into the pumps. The pumps were also controlled by variable frequency drives (VFD's) that provide significant power saving by speeding up or slowing motors based on influent flow. The project also consisted of 5,800 LF of 12'' force main that ran southward crossing through Mid-Valley Airport Property.

Two ditch crossings were needed and the project provided 24'' steel casings to cross aerially with air release valving on both ends. Vo-Tech drive is heavily trafficked, thus two borings across the roadway were needed, and sub-surface excavations were needed to address fiber optic and gas line alignment congestion. This project consists of construction of a new higher flow pumping capacity wastewater lift station to replace existing undersized Lift Station No. 12. Additionally, a new 12-inch force main line will also be installed which will convey the wastewater to the City's North Wastewater Treatment Plant that conveys through Mid-Valley Airport Property. Prior to construction, a FFA Obstruction Evaluation/Airport Airspace Analysis (OE/AAA) was submitted to be aviation compliance throughout the project construction.

ACCOMPLISHMENTS

- Funded entirely through ARPA Funding
- Successfully coordinated with of Drainage District permitting to two aerial crossings
- Implemented hydro excavation for gas and fiber optic utility markings prior to construction

Relevance To City Of Edinburg

This similar design could be utilized due to similar size and pumping requirements.

Olmito Water Supply Corporation: Wastewater Master Lift Station Project

Olmito, Texas

Cruz Hogan was the designer, and prime consultant, on a new lift station using cost saving VFD's, innovative chopper pumps, and Bio Air odor control. This project will construct a new wastewater collection system master lift station to be located in the north western area in the Olmito WSC existing wastewater service area.

Project Details

This project will involve the construction of a new 1200 GPM Triplex lift station. Included was the use of a "Chopper Pump System" that alleviated their rag and debris issue by having a chopping mechanism built into the pumps. The pumps were also controlled by variable frequency drives (VFD's) that provide significant power saving by speeding up or slowing motors based on influent flow. The proposed project will provide a new sewer collection system for new residential area developments and will also include new wastewater pressure force mains which will redirect wastewater flows from four smaller existing wastewater lift stations currently experiencing limited flow capacity and conveyance problems. The new wastewater lift station will include 7000 LF of a 12-inch pressure force main. The new 8-inch force main will be installed in existing roadway, irrigation and or drainage right of ways and easements. A new 6,000 lineal food 12-inch gravity wastewater line is being installed connecting to the new master lift station and terminating at a sanitary sewer manhole approximately.

Existing Olmito WSC Lift Stations Nos. 19, 13, and 5 will all utilize existing force mains and will be redirected to connect to the new 12-inch wastewater gravity manhole proposed on Lomax Road. All wastewater from these three lift stations will have their wastewater flow redirected to the new proposed master lift station.

ACCOMPLISHMENTS

- Funded entirely through USDA RU with 70% Grant
- Successfully conducted an archeological survey for THC
- Successfully coordinated with Drainage/Irrigation District permitting crossings
- Use of innovative odor control system since site will be adjacent to homes

Relevance To City Of Edinburg

This similar design could be utilized due to similar size and pumping requirements, and will also have Limestone CMU wall for aesthetic appearances.

McAllen Public Utility Board MPU: 2nd & Violet Lift Station Replacement Project

McAllen, Texas

Cruz Hogan was the designer, and prime consultant, on a new lift station using ascetic limestone fencing for the nearby walking trail, cost saving VFD's, and an odor control system. This project consisted of a new lift station to be located adjacent to the existing lift station on intersection of 2nd & Violet in the City of McAllen.

Project Details

The service area of the new 2nd and Violet Lift Station is comprised of a mixture of residential and commercial developed area and area which was in agriculture use. The new lift station provided service to a large portion of north-east McAllen generally bounded by Nolana Avenue, 2nd Street, Dove Avenue and Jackson Road. The current area, to be served by the new Lift Station, is a mix of commercial and residential customers with approximately 40 percent currently in agriculture use.

The service area is approximately 680 acres in total size. The triplex lift station allowed for a single pump operation operating at approximately 60 to 65 percent of the total peak design flow of the lift station. A triplex lift station minimized the potential of surcharging the 27" gravity sewer main during "off peak" lift station operation and will also allow a smaller wet well and shorter cycle times. The lift station had a 1050 gpm pumping capacity and allowed for a single pump operation. The new lift station was sized to account for future wastewater flows from a fully developed service area.

ACCOMPLISHMENTS

- Sized for future growth with expandable wet well
- Use of innovative odor control system since site will be adjacent to homes
- Submersible pumps limit noise to nearby homes

Relevance To City of Edinburg

Similar aesthetic approach with metal fencing and limestone columns could be incorporated into the project.

McAllen Public Utility Board MPU: 2nd & Jonquil Lift Station Replacement Project

McAllen, Texas

Cruz Hogan was the designer, and prime consultant, on a new lift station using aesthetic limestone fencing for the nearby walking trail, cost saving (VFD's), and an odor control system. This project consisted of a new lift station to be located adjacent to the existing lift station on intersection of 2nd & Jonquil in the City of McAllen.

Project Details

The previous lift station was quite antiquated and in need of replacement. It was also plagued by the odors and caused issues for nearby residents. The existing service area of the 2nd and Jonquil lift station is comprised of a mixture of residential and commercial developed areas. The service area is located on both sides of Nolana Avenue, from 10th Street to Jackson Road. The service area is approximately 775 acres in total size.

The lift station was a Triplex with 1050 gpm pumping capacity and allowed for a single pump operation operating at approximately 50 to 60 percent of the total peak design flow of the lift station. The triplex station minimized the potential of surcharging the 21" gravity sewer main during "off peak" lift station operation and also allowed a smaller wet well and shorter cycle times.

ACCOMPLISHMENTS

- Sized for future growth with expandable wet well
- Use of innovative odor control system since site will be adjacent to homes
- Submersible pumps limit noise to nearby homes
- Looks very pleasing next to highly used walking trail

Relevance To City of Edinburg, Texas

Similar aesthetic approach with metal fencing and limestone columns could be incorporated into the project.

Familiarity with Applicable Rules and Regulations

"Our engineering team is tackling Edinburg storm drainage upgrades. Because while the Resaca is beautiful, we prefer it staying where it belongs—and not in your driveway."

Familiarity with Edinburg's Infrastructure Needs:

We are familiar with the City of Edinburg 's infrastructure and are confident that our firm can provide practical, cost-effective solutions tailored for the city's needs. Our team understands the intricacy of Edinburg drainage & roadway infrastructure through our extensive historical records and many years of working with the City through various projects. We excel at enhancing undersized and aging infrastructure to support sustainable growth and resilience. We are committed to delivering high-quality engineering services that prioritize community safety, environmental stewardship, and long-term infrastructure durability, ensuring Edinburg continues to thrive now and into the future.

Floodplain Management & Regulatory Compliance (EO 11988):

Our firm possesses specialized expertise in navigating the stringent mandates of Executive Order 11988. We provide comprehensive floodplain assessments, risk evaluations, and alternative analysis design services to ensure full regulatory compliance. Our firm also has in house Certified Floodplain Manager (CFM's) and are fully versed with regulatory requirements to floodplains NFIP and FEMA programs.

Our firm provides comprehensive **Floodway No-Rise Certifications** for complex infrastructure and development projects. We ensure that proposed encroachments within regulatory floodways will not cause any increase Base Flood Elevations (BFEs) or floodway widths, adhering to FEMA regulations and local municipal ordinances. We will integrate **Geographic Information Systems (GIS)** with hydraulic modeling to deliver accurate, spatially flood risk and water resource assessments.

Our Methodologies & Tools:

Analysis must be performed using one of the following acceptable frameworks:

- **FEMA BCA Toolkit (v6.0)**
- **USACE HEC-FDA Software (v6.0)**
- **TWDB BCR Input Interface and Analysis Tool**

FEMA Region 6 Hazard Mitigation Assistance (HMA) Compliance:

Our firm brings specialized, hands-on expertise in navigating the complex documentation and compliance frameworks unique to FEMA Region 6. We specialize in positioning municipal infrastructure projects for successful federal funding under Hazard Mitigation Assistance (HMA) programs, including BRIC and HMGP.

- **Cultural & Historical Impacts:** Review under the National Historic Preservation Act (NHPA) to ensure zero adverse effects on tribal lands or historic municipal districts common to Region 6.
- **Build America, Buy America Act (BABAA):** All domestic federal financial assistance for infrastructure projects must comply with BABAA
- **Mitigation Plan:** The sub applicant jurisdiction must possess a current, FEMA-approved Local Hazard Mitigation Plan
- **Standard Conformance:** Mitigation designs must prove compliance with accepted engineering practices, regional building codes, and municipal design standards.
- **Hydrologic & Hydraulic (H&H) Modeling:** For flood control or drainage mitigation, applications must include modeling.

FEMA

THC – SHPO – Section 106 Compliance:

Our firm offers specialized expertise in navigating Section 106 compliance and meeting the stringent requirements of the Texas Historical Commission (THC) and State Historic Preservation Offices (SHPO). We seamlessly integrate cultural resource management into the early stages of project planning to accelerate project delivery.

- All federal and state compliance project reviews must be processed through the THC's electronic system, **eTRAC (electronic Review and Compliance)**

TXDOT Specs and Standards:

Our firm features deep, practical experience complying with TxDOT Standard Specifications for Construction and Maintenance of Highways, Streets, and Bridges and the TxDOT Hydraulic Design Manual. We ensure local municipal projects are fully compliant from day one.

- Designed systems must adhere strictly to the rules laid out in the TxDOT Hydraulic Design Manual (HDM) and local district criteria.

Experts at Environmental Clearance and Permitting

Our team has extensive knowledge working with the Texas Water Development Board (TWDB) through their various funding programs, including **Economically Distressed Areas Program (EDAP)**, **Clean Water State Revolving Fund (CWSRF),** and **Drinking Water State Revolving Fund (DWSRF**) over the last **22 years**.

Project Understanding, Methodology & Approach

Project Understating

We have carefully reviewed the RFQ scope of services and have prepared an applicable cost-effective solution that will meet the objectives and priorities of the City of Edinburg and neighboring residents. The following pages outline our proposed approach and methodology to systematically address the goals Our recommended implementation of engineering projects has been a proven and reliable system, which can be incorporated into the existing systems with similar installations all over South Texas and City of Edinburg. ***We understand*** that the project services will require the project to be addressed in phases, which will include preparation of**,** preliminary engineering analysis, environmental and site assessment, projected construction budgets, design, final plans and specifications, construction phase services, and other services which may be

Project Methodology

Included below are the proposed strategies and methods that ***Cruz-Hogan Consultants, Inc.*** will follow throughout the implementation of this project to streamline the methods, as indicated below, and to meet the City of Edinburg's goals for this project. We are anticipating that the project will be done in phases as follows:

Phase I:

Preparation of Preliminary Engineering Report & Environmental Report:

Prepare a Preliminary Engineering Report to identify needs for the project and preliminary project costs. Prepare project's Environmental Report

Phase II:

Project Preliminary Design and Project Layout:

Upon City's approval of Engineer's Preliminary Engineering Report, and States approval of possible Environmental Report, Engineer begins the preparation of the project's preliminary 30% and 75% design plans and layout and submits to State and City for review and approval

Phase III:

Final Design, and TCEQ Approval and Authorization:

Upon State and City Plan approval of all preliminary design and Layouts, Engineer completes final Plans and Specifications and Bidding Documents. Engineer prepares, submits and receives Plan approval from TCEQ

Phase IV:

Bidding Phase and Construction Services:

City and Engineer prepare Project's Bidding Package, advertise the project, and receive bids. City awards the Project's Bid and Construction Contract. State approves the Construction Contract and Construction of the project proceeds

Phase I: Preparation of Preliminary Engineering & Environmental Reports

Prepare an Engineering Report to identify needs for the project:

- Evaluation of the system processes and recommend an implementation plan for design, construction, and operations
- Evaluate system requirements/necessities and make recommendations
- Review new and innovative technology alternatives and assist in selecting of equipment for the City of Edinburg

  Develop capacity requirements for any needed future growth
- Assure that all improvements meet standards required by the (TCEQ), specifically under Title Chapter 217- Design Criteria for Domestic Wastewater Systems.
- Prepare Lift Station layout of service area and project mapping.
- Develop preliminary project budgets to include cost of construction, environmental documents, engineering, surveying, project inspection, and etc.

Prepare an Environmental Report:

- Evaluate Site & Environmental conditions to determine any project requirements.
- Submit project to all Federal and State agencies and receive their approvals
- Prepare Environmental Report and submit to State for final approval

Phase II: Preliminary Engineering Design & Layout

Approval of Preliminary Engineering and Environmental Reports, if Needed:

- State approves the Preliminary Engineering Report and Environmental Report
- State Issues “Finding of No Significant Impact (FONSI) and approves the Project to move forward to final design and construction

Preliminary Design and Layout:

- Upon receiving approvals from State and City, **Engineer** will commence with the preparation of preliminary design documents and project specifications.
- Engineer will prepare and submit 75% completed plans to City and State for approval.
- Engineer will prepare and submit 100% completed final plans and project specifications to City and State for final approval.

Phase III: Final Design and TCEQ Permitting & Project Construction:

TCEQ Chapter 217 Compliance:

- Engineer prepares and submits to TCEQ transmittal letter. The purpose of this letter is to provide the Texas Commission on Environmental Quality (TCEQ) with the information necessary to comply with the requirements of 217.6(d) of the TCEQ's rules entitled "Design Criteria For Domestic Systems."
- This TCEQ requirement must be done before the project transitions to bidding and construction.

Final Project Design & Staff Approvals:

- Prepare surveys and mapping for proposed project
- Finalize design plans for City of Edinburg review and approval
- Provide updated Project Budget which may be due to cost increases, labor shortages, tariffs, etc.
- Engineer prepares entire final project budget for City of Edinburg approval
- Engineer prepares and finalizes construction documents for bidding package
- Review final engineering project design plans and specifications to ensure plan complies with their respective requirements
- Assist City of Edinburg in developing construction contracts.
- Coordinate all required project field testing and inspections with laboratory.
- Assist Edinburg with the project close-out and agency acceptances.

Phase IV: Bidding Phase and Construction:

Bidding Documents:

- Engineer assembles and prepares final Bidding Documents and Project Invitations to Bid Public Notices
- City Publishes Invitation to Bid Notices in City's Website and local newspaper
- Engineer assists the City of Edinburg with the construction bidding of the project
- Engineer assists the City with the award of the construction to bidding contractors
- Engineer assists the City of Edinburg in developing construction contracts.
- Engineer conducts Pre-Construction Meeting and issues a Notice to Proceed with Construction to selected Contractor

Project Construction:

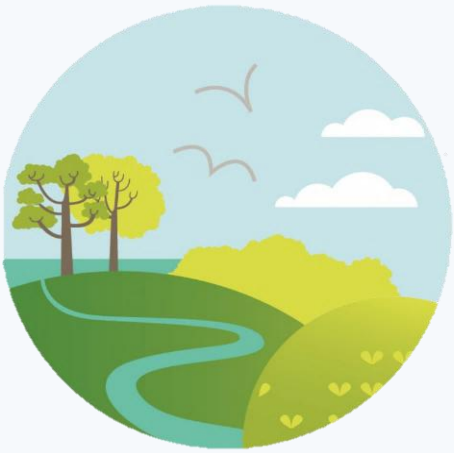
- Engineer monitors and supervises project construction through final completion
- Engineer provides project construction inspection of the project.
- Engineer coordinates all required project field testing and inspections with laboratory.
- Engineer reviews and approves all Contractor's request for payment
- Conduct Monthly Contractor Meetings to address any project issues and review project schedule
- Engineer assists the City with project close-out and agency acceptances.

Project Approach

Included below is the proposed milestone approach that **Cruz-Hogan** *Consultants, Inc.* will follow throughout the implementation of this project to streamline the methods, as indicated below, and to meet the City's goals for this project. We are anticipating that the project will be done in phases as follows:

Milestone 1.0

CRUZ-HOGAN knows how important it is to have a solid effective approach. Our company also has experience working with the current milestone approach system that we use for planning, designing, and providing construction phase services for a project. Utilizing elements of the current system, **CRUZ-HOGAN** will expand on it and develop projects in three milestone phases.



PLANNING AND SCHEMATICS: This is the first phase of project development. During this phase, the project will be looked at to determine all issues that will need to be addressed. Design alternatives and options will also be developed and evaluated from a value engineering standpoint. Our firm will also be able to provide assistance to the City with the facilitation and preparation of any funding agreements, attend preliminary conferences with the neighboring utilities, County and/or State programs, assist in obtaining approvals in relation to the Project, and prepare Preliminary Engineering Feasibility reports. Preliminary investigations and research will begin during this phase; information such as as-built plans, right of way maps, topography maps, geotechnical investigations, and previous drainage/street studies will be gathered.

DATA COLLECTION & FIELD INVESTIGATIONS: During this phase all information and data relevant to the study will be collected. This includes, but is not limited to, the following: Existing facility as-built plans and future sewer system improvement plans, historical system flows, lidar and land survey data, aerial photography maps, existing sugar road street studies, inventory of existing infrastructure, such as the sewer system master planning, sanitary system demands, historical records, water and sewer utility mapping, USFWD Wetland Mapping, FEMA floodplain maps, land use maps, USGS soils maps, etc. Extensive field investigations will also be performed during this phase to determine conditions of existing infrastructure, condition of the roadways, and whether any water & wastewater infrastructure will have to be relocated within the project vicinity.

COST ESTIMATING & VALUE ENGINEERING: Providing an accurate cost estimate forms the backbone of any successful project, by ensuring that resources are allocated efficiently and that project stakeholders have realistic expectations. Our team will conduct a quantity takeoff, which involves counting and measuring materials required for each part of the project. This includes things like concrete, steel, asphalt, and other construction materials. We

undertake a **value engineering analysis** to identify and eliminate unnecessary costs while preserving essential functions and quality. After reviewing all factors, our engineers will create a comprehensive cost estimate, which includes a detailed breakdown of all costs (materials, labor, equipment, overhead, etc.). This estimate can be used by contractors for bidding purposes, or by project owners to secure funding.

ENVIRONMENTAL INVESTIGATIONS: During this phase, as per funding requirements, an environmental investigation may have to be conducted wherever any environmental impacts may be present. An environmental assessment (also known as an environmental impact assessment) is a process that gauges the potential environmental impact of a project before it is begun. The purpose of the assessment is to identify possible environmental effects, suggest remedies to deal with adverse effects, and to predict if these remedies will be successful. An assessment that indicates a potential for substantial and/or long- lasting environmental damage can lead to modifications of the proposed project or its outright cancellation.

A successful environmental assessment produces a project that has been conceived and implemented considering the environment, and so which results in minimal environmental impact or impacts that can be remediated or anticipated.

ARCHEOLOGICAL INVESTIGATIONS: The Texas Historical Commission (THC) conducts archaeological investigations, if required, to preserve and interpret Texas's rich cultural heritage, focusing on identifying, excavating, and documenting archaeological sites across the state. These investigations help protect significant historic and prehistoric resources, ensure compliance with state and federal laws, and contribute to educational and preservation efforts. The THC collaborates with researchers, tribes, and communities to conduct fieldwork, analyze findings, and develop management plans that safeguard archaeological sites while promoting public awareness and appreciation of Texas's diverse history. In the event of an Archeological Survey is requested by the Texas Historical Commission (THC), we have a track record of working with THC and have successfully completed Archaeological Surveys in our recent projects.

TEXAS HISTORICAL COMMISSION
REAL PLACES TELLING REAL STORIES

Milestone 2.0

- ✓ Analysis & Layouts
- ✓ Condition Assessments
- ✓ Conceptual Site Plans & TCEQ Compliance

Analysis & Conceptional Layouts:

Concentration on the understanding and implementation of best use parameters for the proposed project design:

1. **Complete Evaluation**: Assess existing system capacities with factoring in future growth and recommend an implementation plan for design, construction, and operations.
2. Existing Process Analysis & TCEQ Compliance: Assess odor and capacity issues, then proceed to make recommendations for design improvements.
3. New and Innovative Treatment Technologies: Analysis of the current and new systems, and determine whether new and innovative technologies may be a better suited application.
4. Present **design/equipment alternatives** that may be feasible to the project, and could provide significant saving on operation and power costs.
5. Present design/equipment alternatives that could be used to **convert/retrofit** existing systems to provide better efficiency by the use of up-to-date technologies and cost savings in the wastewater industry

Design & TCEQ Wastewater Compliance:

CRUZ-HOGAN *Consultants, Inc.,* will be tasked with developing the detailed plans, specifications, bid tabulations/documents, and cost estimates for each project. Proposed plans will include the preparation of a title sheet/index, plan and profile sheets, irrigation crossings, drainage improvements plans, traffic control plans and sequence of work notes, TCEQ required Storm Water Pollution Prevention Plan (SWPPP) plans and notes, and miscellaneous storm water, water, & wastewater details.

Our personnel will assist the Owner with all aspects of the Project bids, advertisement, attendance of bid openings, tabulation of the bid proposals, prepare and coordinate approval of formal Contract Documents, and issue the Notice to Proceed. During this phase any other ongoing coordination will continue with the surveyors, utility companies, and others. Plans will be submitted at 30%, 60%, 90%, and 100% milestones to the Owner as well as all utility companies, and other public or private entities. Review meetings will be held to discuss and review the plan submittals. All horizontal utility conflicts will be identified at 30% and by 60% milestones, any vertical information that may be required will either be provided by the utility companies or other record documents. By the 90% milestone, utilities will be expected to provide a plan of action for any potential adjustments that may be required.

CRUZ-HOGAN will take on the task of TCEQ domestic wastewater sanitary sewer compliance and authorization, which typically outlines the technical basis for the proposed improvements, ensuring compliance with Texas Pollutant Discharge Elimination System (TPDES), or Texas Land Application Permit (TLAP) requirements.

Milestone 3.0

- ✓ Construction & Project Management
- ✓ Addressing Change Orders & Weather Delays
- ✓ Quality Control & Quality Assurance
- ✓ Workload and Availability

CONSTRUCTION & PROJECT MANAGEMENT: **CRUZ-HOGAN** *Consultants, Inc.,* will provide construction phase services support for all projects. Our personnel will be readily available during the bidding process to answer and address any questions that potential bidders may have. Upon awarding the construction contract, our personnel will request and coordinate all necessary construction staking (if required), and will make site visits to the project site to assure plan compliance. Our personnel will schedule periodic construction meetings to assure that the project is on schedule. Our staff will continue to coordinate with the contractor and the utility companies to assure that the contractor and utility companies are aware of each other's schedules. Any Requests for Information (RFI's) that the contractor may have will be promptly addressed. Our staff will coordinate and process any required change orders. If required, our staff will inspect and provide inspection reports for all Storm Water Pollution Prevention Measures, as per TPDES Requirements.

Throughout the project construction, our staff will review all shop drawings, review and recommend approval of request for payment, and will work hand-in-hand with the Owner's staff to ensure that the work is progressing per plans. Upon completion of the project, a final inspection will be performed with the Contractor, the Owner and/or City Inspectors, and Project Manager. A final punch list for the Contractor will be developed in order to assure that the project is to the satisfaction of the Owner.

Lastly, **CRUZ-HOGAN** *Consultants, Inc.,* will compile and distribute all construction redlines to design consultants for preparation of the "Plan of Record" or "As-Built" Plans from the design consultants and deliver them to the Owner.

ADDRESSING CHANGE ORDERS & WEATHER DELAYS: **CRUZ-HOGAN** *Consultants, Inc.* will effectively communicate between all stakeholders including contractors, architects, city staff, and community members. Regular meetings will be held to discuss project status, address any emerging issues, and identify potential changes early. Our engineers will document by tracking changes and their impacts. We will ensure that all original plans, specifications, and contracts are well-organized and accessible. When a change order arises, we will document the rationale behind the change, including any relevant codes, regulations, or feedback from City administration. Our meticulous record-keeping will provide clarity and support claims if disputes arise later.

CRUZ-HOGAN will be proactive in addressing rain-related issues to ensure projects stay on track and within budget. Contractors and engineers will utilize a weather forecasting service to plan and prepare any major impact on project schedules. Upon developing a construction schedule, we will incorporate non-work days to the work calendars to show which workdays might be lost due to inclement weather. Adding an "adverse weather" activity to the project schedule with incorporate a duration equal to the anticipated weather-related workdays.

Quality Assurance & Quality Control (QA/QC)

A big part of the success of **CRUZ-HOGAN** is our commitment to QA/QC Practices. We have an established set of criteria that are the foundation of our QA/QC Procedures. These criteria are the following:

- ***Knowledge/Experience:*** **CRUZ-HOGAN** will assign a knowledgeable and experienced team member to lead the various tasks to minimize errors and omissions.
- ***Coordination/Communication:*** **CRUZ-HOGAN** will establish open lines of communication between City & Engineer and all team members to assure that all project needs are addressed. All information regarding the project progress and related plan changes will be forwarded to all team members.
- ***Constructability Analysis:*** The plans will be reviewed at all project milestones to determine if the proposed designs are safe and provide adequate consideration to constructability and value engineering.
- ***Accuracy/Completeness:*** The plans will be reviewed to identify any drafting and design discrepancies and to verify that the plans are in compliance with the respective design manuals. Construction quantities will be tabulated by several individuals to verify accuracy. The plans will also be reviewed to assure that all bid items are accounted for.
- ***Design Schedules:*** Schedules will be developed for the design phase of the project in order to complete the project design in a timely manner.

The success of **CRUZ-HOGAN**'s QA/QC Program is that it incorporates the five founding criteria in a three-level review process. Prior to each submittal, the plans will first be reviewed on the production level. Technicians and draftsmen will review one another's work. The second level of review will be done by the Project Engineers and EIT's. A full set of plans will be reviewed by each of the engineers and EIT's working on the project. They will cross-reference each other's comments and redlines prior to revisions. The final level of review is by the Project Manager, Deputy Project Manager, and QA/QC Manager. They also will cross reference each other's comments and redlines prior to revisions.

- Throughout the QA/QC Process, the design and consideration of roadway design will be closely looked at to minimize conflicts. **CRUZ-HOGAN** will coordinate internally to assure the most feasible solution is used for all conflicts, whether it be a design change (i.e., inlet adjustments, profile adjustments, etc.) or having to design a utility relocate. The design and construction schedule of the utility companies will be considered in the overall project schedule and traffic control plans will include providing safe work zones for utility adjustments.

- **CRUZ-HOGAN** has demonstrated its ability to provide excellent, innovative, cost-saving engineering and design services in a timely manner. The overall commitment that **CRUZ-HOGAN** provides to the project is unsurpassed. Attention to detail and rapid response to issues are staples of **CRUZ-HOGAN**'s philosophy. **CRUZ-HOGAN** has an excellent track record for successful projects and extremely satisfied clients.

Current Workload Availability

CRUZ-HOGAN *Consultants, Inc.* currently has sufficient engineering and technical staff, resources, and capabilities to immediately commence and complete any and all work assignments. Our firm offers ***4 Registered Licensed Professional Engineers*** (PEs) and ***three offices*** here in the Rio Grande Valley and offers the flexibility to immediately respond to any project.

We are hereby committed and have the ability to commence services immediately after successfully negotiating a contract for engineering services.

SECTION 6

References, Comprehensive Resumes, Insurance & Required Forms

CRUZ-HOGAN Consultants, Inc. carries $1,000,000 of Professional Liability Insurance. Any additional insurance necessary for the completion of the proposed projects will be obtained to meet the requirements of the City of Edinburg. Certificates of Insurance with current coverages can be found in the attachments.

We have reviewed the Professional Services Agreement included in the Request for Qualifications packet, and CRUZ-HOGAN Consultants, Inc., agrees to meet the prerequisite insurance requirements, and if selected, agrees to enter into such agreement.

Mr. Cruz is currently serving as a Project Manager for our local Harlingen office and has over 15 years of engineering experience specializing in water resources. During his time there he wore many hats and took on many roles including cost estimator, field inspection engineer, CAD specialist, and project management. Mr. Cruz's duties included providing engineering and technical support to on-site projects, expediting field changes, performing QA/QC inspections, keeping RFI & Submittal logs, reviewing and processing pay applications and certified payrolls, and conducting monthly status reports. He began his career as an E.I.T and Resident Engineer for numerous civil engineering projects and now designs and manages projects in the South Texas area. Mr. Cruz is experienced in the study, design, and construction of water infrastructure, transmission, distribution, wastewater collection systems, streets & drainage, and capital improvements including the following projects:

- Construction Development

Mr. Cruz has over 39 years in experience in the design of street and drainage plans, and water and sewer line projects. Experience prior to joining the firm includes 5 years with the Texas Department of Highways as a design and project Engineer. He designed and oversaw the construction of several street and drainage projects in the Corpus Christi area. Subsequent experience includes being City Engineer for several cities and providing required City Engineering Services. Mr. Cruz was City Engineer for the City of Alamo for 9 ½ years. His responsibilities were to advise the City on engineering issues, to design and manage projects including sewer infrastructure and roads in conjunction with TXDoT. Most recently, he had been serving as City Engineer for the City of San Juan for the last 8 years. His experience also includes the planning and design of streets and utilities for various Cities throughout the Valley and knowledge of projects involving large sewer lines while working for the McAllen Public Utility. Other experience includes streets and drainage, sewer, water, etc., for the Cities of McAllen, Alamo, San Benito, Weslaco, Donna, Falfurrias, San Juan and Harlingen.

SUMMARY OF RELATED EXPERIENCE:

- City of San Juan, TX – 3.5 MGD Water Treatment Plant Expansion Project and Wastewater Collection System Improvements Projects; Water and Wastewater Master Plan Study
- 5 MG Water Treatment Plant, City of Alamo
- 1 MG Water Ground Storage Tank, City of Alamo
- Master Planning for the Cities of Schulenburg, La Grange, Alamo, and San Juan
- Waterworks Planning for the Cities of Alamo and San Juan
- 42” Sewer line Transmission, McAllen Public Utility
- Storm Sewer Projects for the Cities of McAllen, San Juan, Alamo, and Pharr
- Water line Improvements for the Cities of Alamo, San Juan, & Weslaco, and McAllen Public Utility
- 24” Sewer Line Transmission for McAllen Public Utility
- Lift Station Design for McAllen Public Utility, Cities of Alamo and San Juan
- Street Improvements Project for the Cities of San Juan, Pharr, and Alamo

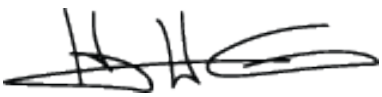
RE: RFQ No. 2026-7 | Request for Qualifications - Professional Engineering Services - Mechanical, Electrical, and Plumbing (MEP) Engineering

DBR Engineering Consultants, Inc. appreciates the opportunity to submit our qualifications for consideration under RFQ No. 2026-7. Over the past five years, DBR has had the privilege of working closely with the City of Edinburg on a variety of projects, and we are proud to support the continued growth and development of the community we serve. Our team values the strong relationships we have established with City staff and looks forward to the opportunity to continue providing exceptional engineering services to the City.

We understand that the City of Edinburg is seeking qualified professional firms to provide professional engineering services on an as-needed basis for the planning, design, renovation, repair, and construction of municipal facilities. DBR is committed to serving as a responsive and reliable member of the project team by providing comprehensive Mechanical, Electrical, and Plumbing (MEP) engineering services for assignments awarded under this contract. Our extensive experience with municipal facilities throughout Texas has equipped us with the technical expertise, project management capabilities, and quality-control processes necessary to consistently deliver successful projects.

Our team understands the unique demands of task-order and short-duration assignments and is prepared to respond quickly whenever project needs arise. We are committed to providing attentive service, maintaining open communication, and meeting aggressive project schedules while delivering high-quality engineering solutions. Our current workload allows us to begin new assignments immediately, and our depth of resources enables us to efficiently support both small and large projects.

DBR is registered with the Texas Board of Professional Engineers and Land Surveyors (TBPE Firm No. F-2234) and is in good standing with all applicable licensing requirements. Our services for the City of Edinburg will be provided from our McAllen office, supported by the full resources of our firm.



No addenda were issued as of the date of this submission.

DBR has reviewed the City's Professional Services Agreement and confirms that, if selected, we will comply with the insurance requirements and are prepared to enter into the agreement as requested by the City.

As Principal-in-Charge, I will serve as DBR's primary point of contact for this RFQ. I am authorized to bind the firm contractually and execute agreements on behalf of DBR Engineering Consultants, Inc.

Thank you for your consideration. We appreciate the opportunity to submit our qualifications and look forward to continuing our partnership with the City of Edinburg.

Sincerely,

Hugo Avila, PE, Principal
DBR Engineering Consultants, Inc.

2: Firm Qualification and Experience

2. Firm Qualification and Experience – Discuss the firm's experience and history in performing engineering services in a timely manner, particularly for other governmental agencies in the past two (2) years. Discuss the firm's uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

DBR HISTORY

DBR provides an alternative to traditional firms by providing better opportunities for our people and as a result, a better experience for our clients.

Founded in 1972, DBR Engineering Consultants, Inc. evolved from a small-scale engineering firm to a statewide mechanical, electrical, plumbing, and technology engineering firm in Texas. Our steady growth stems from serving the altering needs of our clients by adapting to economic, social and technological change. Not only are we devoted to meeting our clients' expectations, we strive to achieve their goals while delivering premium quality through close collaboration.

DBR's steady growth has been fueled by loyal clients who appreciate our willingness to listen, open-minded approach to problem-solving, and relentless commitment to service.

Now, more than 54 years later, DBR has a team of over 200 professionals across eight cities in Texas and New Mexico. While our history guides our growth, our talented team of consultants are focused on the future. We are helping to create healthy and comfortable environments that will stand the test of time.

OFFICE LOCATION THAT WILL PROVIDE THE SERVICES

Our office in McAllen, will serve as the primary office responsible for providing services to the City of Edinburg. Its proximity to the City allows for efficient project coordination, timely site visits, and responsive client service throughout each assignment.

APPROACH TO STAFFING SMALLER ASSIGNMENTS

The McAllen team is fully supported by DBR's firmwide network of professional engineers, designers, and construction administrators across Texas. These professionals are available to provide additional technical support and expertise as needed, while day-to-day project leadership and accountability remain with the local team.

We utilize a flexible staffing approach for smaller assignments. Personnel are assigned based on the scope and schedule of each project, ensuring efficient delivery of services while maintaining the same level of quality provided on larger assignments.

SUSTAINABILITY

+ GOVERNMENT

DBR's government portfolio demonstrates our experience with a wide range of municipal, state, and federal facilities.

We work closely with government agencies to understand their missions and how each facility will support their work efficiently. Our experience includes new and renovated City Halls, Courthouses, Police, Fire Stations, and Emergency Medical Service (EMS) Stations, as well as many others that perform vital functions for the communities we live in.

Government facilities are under constant scrutiny to do more with less. Our engineers understand this challenge and have worked together with a wide range of government organizations to ensure the right balance is struck between efficiency and functionality. Furthermore, our engineering solutions promote forward-thinking and positive growth that distinguishes each municipalities' identity.

What distinguishes DBR is our long-standing commitment to municipal clients and our ability to provide responsive, practical engineering solutions tailored to public-sector needs. For more than 54 years, we have partnered with cities, counties, and other governmental agencies across Texas, developing a thorough understanding of public procurement processes, stakeholder expectations, budget constraints, and facility operational requirements. This experience allows us to quickly identify project challenges, communicate effectively with City staff, and deliver solutions that align with the City's goals and priorities.

DBR provides continuity throughout the life of each project by maintaining active involvement from firm leadership and key project personnel from project initiation through construction closeout. This approach promotes clear communication, accountability, and consistency throughout design and construction. Combined with our commitment to responsiveness, technical excellence, and client service, it has helped us build long-standing relationships with public-sector clients throughout Texas and uniquely positions us to support the City of Edinburg's current and future needs.

Design Philosophy

Successful projects begin with thoughtful planning and are delivered through disciplined project management. DBR approaches each project with a focus on collaboration, clarity, and accountability. The following summarizes the project approach we will apply to City of Edinburg projects.

1. **Programming and Planning:** At the outset of each project, our team works closely with the City of Edinburg to clearly understand project priorities, operational needs, and long-term goals. During this early phase, we will:
   - **Identify** the items most critical to City of Edinburg's mission, schedule, and budget
   - **Review** City of Edinburg design guidelines and confirm alignment with city standards
   - **Evaluate** the proposed project schedule and budget
   - **Allocate** firm resources to ensure timely, consistent support throughout each phase of the project

2. **Design:** Our design process emphasizes open communication, coordination, and cost awareness. We believe there is no substitute for direct, face-to-face collaboration and regular engagement with the Owner and design team. During design, DBR will:
   - **Meet** regularly with City of Edinburg and the project team to coordinate efforts, assess progress, and confirm design direction
   - **Review** scope and budget at key milestones using a combination of DBR's construction cost database, RSMeans data, and input from equipment vendors
   - **Perform** in-house quality control reviews at each design milestone, including a comprehensive final review prior to issuing construction documents
   - **Develop** all new construction projects using Revit MEP, performing clash detection and sharing models with the design team to support thorough system coordination

3. **Construction:** During construction, DBR remains actively engaged to support successful execution and protect City of Edinburg's interests. Our approach includes:
   - **Fostering** a collaborative partnership with the construction team through clear communication, timely responses, and regular site visits
   - **Providing** consistent construction-phase support guided by City of Edinburg's best interests at every stage
   - **Encouraging** commissioning of MEP systems to verify that systems and equipment operate as intended at turnover and support long-term performance.

Design Methodology

DBR's design philosophy is to provide the Owner with the best systems within the Owner's budget. We believe that our employees must collaborate with each other and the Owner's representatives to produce a well-coordinated design. In other words, we don't keep producing the same systems over and over because it saves us money. DBR is always mindful of life cycle cost and energy savings. Adherence to City of Edinburg's design guidelines and standards will be critical to the success of each project. We have had the opportunity to work with multiple municipal entities across the state of Texas. We understand the importance of system that fit within your maintenance expertise. This is the reason for design standards, but we also know that codes change, necessitating updates to the standards. When this is necessary, we are happy to help navigate these changes. Our close collaboration with the Owner's construction and maintenance staff is essential to the success of each project.

- Begin with an open mind and a blank page.
- Listen carefully and attentively to understand the objectives of City of Edinburg's.
- Prepare concept/schematic design and review with City of Edinburg's to confirm that we are meeting their objectives.
- Perform cost estimates at each step of the project to ensure that the scope of work is in line with the budget limitations.
- Review system options with Owner and Architect to select the ideal system for the project.
- Make selections of equipment and fixtures based on district guidelines and to maximize reliability and maintainability.
- Design to maximize energy efficiency, within the budget and the above criteria.
- Incorporate City of McAllen codes, standards, and design requirements throughout the design process. We develop our specifications during the Design Development phase. By the completion of the DD phase we have a complete set of specifications with the Owner's standards incorporated. At this point we can review the proposed design and the specifications to ensure that we are following the standards.
- Coordination and quality assurance become the focus during the Contract Documents phase. This is our opportunity to focus on the details that will make a project successful.

Our experience with governmental agencies in the past 2 years includes the following projects:

CITY OF MCALLEN - PUBLIC SAFETY BUILDING - EVIDENCE ROOM | MCALLEN, TX
Renovation

Client: City of McAllen
Client Contact: Juan Martinez
Telephone: (956) 681-100

Our team provided MEP engineering services for an evidence room renovation within an existing facility.

CITY OF MCALLEN - FIRE TRAINING FACILITY | MCALLEN, TX
New Building

Client: City of McAllen
Client Contact: Juan Martinez
Telephone: (956) 681-1001

Our team provided MEP engineering services for the new 14,975 sq. ft. Fire Training Facility for the City of McAllen. The project includes offices, storage rooms, conference rooms, and training rooms.

CITY OF MCALLEN - TRES LAGOS FIRE STATION | MCALLEN, TX
New Building

Client: City of McAllen
Client Contact: Juan Martinez
Telephone: (956) 681-1001

Our team provided MEP engineering services for the new 11,000 sq. ft. Tres Lagos Fire Station for the City of McAllen. The facility includes sleeping quarters, dining and kitchen space, meeting rooms, and an apparatus bay.

CITY OF MCALLEN - MCALLEN PUBLIC LIBRARY | MCALLEN, TX
Systems Upgrades

Client: City of McAllen
Client Contact: Juan Martinez
Telephone: (956) 681-1001

Our team provided MEP engineering services for the conversion of the primary-secondary chilled water loop to a variable flow and conversion of the condenser water loop to a variable flow at the city's library. The conversion required the replacement of motor starters with variable speed drives for the pump motors. Sensors were added to facilitate control of the plant as well.

CITY OF MCALLEN - OFFICE SPACE RENOVATION | MCALLEN, TX
Renovation

Client: City of McAllen
Client Contact: Juan Martinez
Telephone: (956) 681-1001

Our team provided MEP engineering services for the renovation of the office spaces at the existing City Hall.

CITY OF MCALLEN - BUS TERMINAL | MCALLEN, TX
Systems Upgrades

Client: City of McAllen
Client Contact: Juan Martinez
Telephone: (956) 681-1001

Our team provided MEP engineering services to the city's Bus Terminal to convert two existing air handlers and one chilled water pump to variable capacity. The conversion requires replacing the fans, motors, and motor starters with new inverter duty fan motors driven by variable speed drives. The design includes one new variable frequency drive on the chilled water pump. In addition, five chilled water and five hot water valves will be replaced. Finally, the chilled water system's sequence of operation will be adjusted to facilitate variable flow control of the plant.

CITY OF MCALLEN - TRAFFIC OPERATION FACILITY | MCALLEN, TX
Systems Upgrades

Client: City of McAllen
Client Contact: Juan Martinez
Telephone: (956) 681-1001

Our team provided DBR provided MEP engineering services for the renovation of the Traffic Operations facility.

CITY OF LAREDO - SOLID WASTE MAINTENANCE BUILDING | LAREDO, TX
New Building

Client: City of Laredo
Client Contact: Ronald Miller
Telephone: (956) 727-6450

Our team is providing MEP engineering services for a new 11,000 sq. ft. single-story maintenance facility for the City of Laredo solid waste department.

3: Team Member Qualification and Experience

3 | Team Member Qualifications and Experience

3. Team Member Qualifications and Experience – Submit resumes summarizing qualifications and experience of project manager, key staff and any support staff likely to be assigned to the work.

Our firm has eight offices in McAllen, Laredo, San Antonio, Austin, Houston, Dallas , El Paso, and Albuquerque. A team of engineers in our McAllen office will work with the City of Edinburg. Edward Puentes, PE will serve as the Partner in Charge and Hugo Avila, PE will serve as the Principal-in-Charge for City of Edinburg projects. Hugo will act as the main point of contact for delivering the Owner's directives to the consultant team. Hugo's technical knowledge and ability to meet project requirements in a timely manner assure a well designed facility for the client. Please see our organizational chart below and resumes on the following pages for our proposed project team that will be assigned to the City of Edinburg's projects.

Our experience with the City of Edinburg includes the following projects:

CITY OF EDINBURG | EDINBURG, TX
Fire Station No. 5, New Building | 12,800 SF

CITY OF EDINBURG | EDINBURG, TX
West Water Treatment Plant, Emergency Generator, Systems Upgrades

CITY OF EDINBURG | EDINBURG, TX
Retail Space and Parking Garage, New Building | 22,000 SF

CITY OF EDINBURG | EDINBURG, TX
Service Center, New Building | 17,900 SF

CITY OF EDINBURG | EDINBURG, TX
Fire Dept. Emergency Operations Center, Addition/Renovation | 4,900 SF

CITY OF EDINBURG | EDINBURG, TX
Dustin M. Sekula Memorial Library, New Building | 35,000 SF

Services Provided:
DBR provided Mechanical, Electrical, and Plumbing (MEP) engineering services for new municipal facilities, public safety buildings, utility infrastructure improvements, and renovation projects. Services included HVAC, plumbing, electrical, lighting, emergency power, life-safety systems design, construction documents, and construction administration support.

Role:
Edward Puentes, PE (Partner)
Hugo Avila, PE (Principal)
Robert Tijerina, PE (Project Manager)
Maritza Garza, EIT (Sr. Mechanical Designer)
Jaime Rodriguez (Electrical Designer)
Cooper Gates (Plumbing Designer)
George Castaneda (CA)

Additionally, we have significant experience working with Edinburg CISD and have completed the following projects:

- District-Wide HVAC Improvements, Renovation, Systems Upgrades
- Brewster School - Sports Lighting, Exterior Lighting
- Canterbury Elementary School - Special Needs Classroom, Renovation
- Edinburg High School, Mechanical System Assessment | 330,000 SF
- Robert Vela High School, Renovation | 240,000 SF
- R.C. "Fito" Flores/Mark A. Zapata Elementary School, New Building | 75,000 SF
- Dr. Kay Teer Crawford Elementary, New Building | 75,000 SF
- Macaria Gorena Elementary School, New Building | 75,000 SF
- Alfonso Ramirez Elementary School, New Building | 75,000 SF
- San Carlos Elementary, System Upgrades | 62,000 SF
- Lincoln & San Carlos Elementary Schools, Addition/Renovation | 42,000 SF
- Barrientes Middle School, Addition/Renovation | 30,000 SF
- Freddy Gonzalez Elementary School - Gymnasium, Renovation | 11,347 SF
- Carmen Avila Elementary School, New Addition | 8,200 SF
- Lyndon B. Johnson Elementary Gymnasium, Renovation | 6,500 SF
- District-Wide SECO Grant Upgrades, (11) Campuses
- J. Economedes High School, Chiller Replacement
- Municipal Pool Investigation, Facility Assessment
- Edinburg High School Canopy and Ag Barn, Addition/Renovation
- Cats Stadium & Barrientes Middle School Sports Fields, Exterior Lighting
- Ramirez Elementary School - Kitchen, System Upgrades
- Robert Vela High School - Science Wing, Building Commissioning
- Thomas Jefferson Elementary School - Gym, Addition/Renovation | 5,000 SF
- Memorial Middle School, System Upgrades
- South Middle School - Print Shop, System Upgrades

5: Insurance

5. Insurance - Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. A list of any insurance claims against the firm within the past 5 years.

GENERAL LIABILITY: $1,000,000.00 (per claim)

AUTO COVERAGE: $1,000,000.00 (per claim)

WORKER'S COMPENSATION: $1,000,000.00 (per claim)

PROFESSIONAL LIABILITY COVERAGE: $5,000,000.00 (per claim)

DBR Engineering Consultants, Inc. has had the following claims filed against the firm in the past five (5) years:

1. Pharr-San Juan-Alamo ISD | Pharr, TX
   Case is pending.

2. San Diego ISD - Collins Parr Elementary School | San Diego, TX
   Case was settled and there was no wrongdoing on DBR's part.

3. Schertz Animal Adoption Center | Schertz, TX
   Case was settled without prejudice.

4. Thompson Hotel | San Antonio, TX
   Case was settled without prejudice.

July 10th, 2026

City of Edinburg
Engineering Department
Attn: Mardoqueo Hinojosa, City Engineer
415 W. University Drive
Edinburg, Texas 78539

RE: RFQ 2026-7 - Request for Qualifications - Professional Engineering Services

Dear Mr. Hinojosa and Selection Committee:

DeShazo Group, Inc. is pleased to submit our qualifications to the City of Edinburg for RFQ 2026-7, Request for Qualifications - Professional Engineering Services. DeShazo Group is submitting for professional services related to transportation evaluation, traffic engineering services, traffic signal design, access and circulation evaluation, parking analysis, and related civil/transportation support services within our professional expertise.

Founded in 1980, DeShazo Group is a Texas-based engineering firm providing traffic engineering, transportation planning, parking analysis, traffic signal design, traffic impact studies, traffic assessment studies, access and circulation evaluations, traffic management plans, parking demand studies, pedestrian and multimodal studies, and agency coordination throughout Texas. We have recent familiarity with the City of Edinburg due to our provision of Traffic Engineering and Parking services for the conversion of the UTRGV Stadium.

We understand that the City of Edinburg is establishing a rotation list of qualified professional engineering firms for as-needed assignments and that services may include discrete short-term tasks as well as work supporting larger capital improvement, planning, and city program efforts. Our team is structured to respond quickly to task assignments, coordinate directly with City staff, and produce clear, practical, and technically defensible deliverables.

DeShazo Group acknowledges receipt of the RFQ documents issued by the City of Edinburg and will review and acknowledge any addenda issued through OpenGov prior to final submission. DeShazo Group takes no exceptions to the RFQ requirements except as may be expressly stated in the required forms or portal responses.

The undersigned is authorized to bind DeShazo Group, Inc. to this response. We appreciate the opportunity to submit our qualifications and look forward to the opportunity to support the City of Edinburg.

Respectfully submitted,

Chuck DeShazo
President
DeShazo Group, Inc.
chuck.deshazo@deshazogroup.com
Direct: 214.748.6229

2. Firm Qualifications and Experience

DeShazo Group, Inc. is an engineering consulting firm specializing in traffic engineering, transportation planning, parking analysis, traffic signal design, transportation evaluation, access/circulation review, parking demand studies, wayfinding, pedestrian/multimodal evaluation, and agency coordination.

Relevant Services for the City of Edinburg

- Traffic impact studies and traffic assessment studies
- Transportation evaluation and planning
- Traffic signal warrant analysis and traffic signal design
- Intersection capacity analysis and operational review
- Access management, driveway spacing, and circulation review
- Traffic management plans and traffic control plans
- Pedestrian, bicycle, multimodal, and safety studies
- Parking demand studies and parking master planning
- Wayfinding, signage, and campus/district circulation planning
- Agency coordination with municipalities, counties, TxDOT, and project stakeholders

Firm History and Capacity

DeShazo Group has provided traffic engineering and transportation planning services in Texas for more than 45 years. The firm has completed thousands of projects involving traffic impact studies, traffic signal warrant analysis, traffic signal design, thoroughfare planning, parking analysis, functional parking design, access and circulation evaluation, site planning support, and multimodal transportation review.

The Dallas office will provide the services for this RFQ. DeShazo Group is organized to support both smaller task-order assignments and larger planning or capital improvement efforts. For smaller assignments, the firm assigns a focused project team led by a senior project manager and supported by technical staff. For larger or time-sensitive assignments, additional traffic engineers, analysts, and design support staff are assigned based on scope, schedule, and required expertise.

Technical Approach

Task Initiation and Scoping

DeShazo begins each assignment by confirming the City objective, reviewing available background information, defining the study limits, identifying applicable standards, confirming review agencies, and establishing a schedule and communication protocol with City staff.

Data Collection and Field Review

Depending on the assignment, DeShazo collects or reviews traffic volume data, turning movement counts, roadway geometry, signal timing, parking utilization, pedestrian and bicycle conditions, crash history, land use information, site access, existing plans, and field conditions.

Engineering Analysis

The team applies current engineering standards, TxMUTCD guidance, Highway Capacity Manual methodology, ITE Trip Generation where applicable, Synchro or other accepted analysis tools, and local agency requirements to evaluate operating conditions, safety, access, circulation, parking, and multimodal performance.

Recommendations and Deliverables

Recommendations are developed to be practical, implementable, and clearly tied to observed conditions and analysis results. Deliverables may include technical memoranda, traffic studies, signal warrant studies, signal design plans, parking studies, access exhibits, graphics, tables, and presentations.

Coordination and Implementation Support

DeShazo coordinates with City staff, TxDOT, utility agencies, other consultants, developers, and stakeholders as needed to support project review, comment response, and implementation decisions.

3. Ability to Meet Schedules and Deadlines

Schedule responsiveness is a core strength of DeShazo Group. On-call and task-order assignments require clear communication, realistic staffing, disciplined quality control, and timely delivery. DeShazo uses the following approach to maintain schedule performance:

- Confirm scope, schedule, assumptions, review agencies, and required deliverables at the start of each assignment.
- Assign a Project Manager responsible for schedule, budget, client communication, technical direction, and quality review.
- Use short internal check-in cycles to identify missing data, agency issues, or review comments early.
- Submit interim deliverables at agreed milestones when appropriate.
- Provide direct communication by phone, email, video meeting, or in-person meetings as needed.
- Track staff time and project budgets through internal project management procedures.
- Maintain QA/QC review by a Licensed Professional Engineer before deliverables are issued.

Communication Plan

Ziaur Rahman, P.E, PhD. will serve as the primary technical point of contact for transportation and traffic engineering assignments. Chuck DeShazo will provide principal oversight and contract-level coordination. The team will respond promptly to City requests and will provide project status updates at intervals established with City staff at the beginning of each assignment.

Quality Control / Quality Assurance

DeShazo Group is committed to providing technically sound, clear, and practical deliverables. Quality is planned through proper scoping and technical direction, monitored by the Project Manager during production, and reviewed by a Licensed Professional Engineer or Principal before submittal. Reports are reviewed for clarity, consistency, calculations, tables, exhibits, assumptions, and recommendations.

4. Team Member Qualifications and Experience

The proposed DeShazo team is built around traffic engineering, transportation planning, parking, access/circulation, and signal design expertise. The team has a history of working together on municipal, institutional, campus, commercial, and mixed-use projects throughout Texas.

Name	Role	Primary Responsibilities	Location
Chuck DeShazo	President / Principal-in-Charge	Executive oversight, contract coordination, resource allocation, senior client contact, and quality review.	Dallas, TX
Ziaur Rahman, P.E, PhD.	Principal – Traffic engineering.	Primary project management, technical oversight, traffic engineering, agency coordination, QA/QC, and final deliverable review.	Dallas, TX
Pranav Sharma, E.I.T.	Deputy Project Manager / Traffic Engineering Support	Traffic studies, assessment studies, AutoTURN support, data review, calculations, exhibits, and report preparation.	Dallas, TX
Marshall Hammack	Parking and Mobility Lead	Parking demand studies, parking master planning, campus parking analysis, circulation review, and mobility recommendations.	Dallas, TX
Rajvardhan Desai	Traffic Engineer / Technical Support	Traffic analysis, data processing, technical documentation, exhibits, and recommendations.	Dallas, TX
Dhwani Virani	Analyst / Planner	Data review, CAD/exhibits, technical support, and planning analysis.	Dallas, TX
Christopher Chuparkoff	Analyst / Planner	Traffic management planning, documentation, field data support, and technical production.	Dallas, TX
Lucas Palmitano	Marketing / Business Development / Proposal Support	Proposal coordination, documentation, client support, and administrative coordination.	Dallas, TX

Condensed Resumes

Chuck DeShazo - President / Principal-in-Charge

Chuck DeShazo leads DeShazo Group and represents the firm in public, professional, and community settings. He has been with the firm since 1993 and has served as President since 2018. His representative experience includes master planning, parking, traffic engineering, parking demand studies, and institutional and commercial transportation assignments throughout Texas.

Ziaur Rahman, P.E, PhD – Principal Traffic Engineering

Ziaur Rahman, P.E., Ph.D. provides senior traffic engineering leadership for DeShazo Group. His experience includes traffic impact analysis, traffic control plans, signal warrant analysis, illumination analysis and design, and multimodal planning for pedestrian and bicycle facilities. He has supported a wide range of public and private development projects and has coordinated with agencies such as TxDOT, WSDOT, and local municipalities

.Pranav Sharma, E.I.T. - Deputy Project Manager / Traffic Engineering Support

Pranav Sharma supports traffic impact studies, traffic assessment studies, data analysis, AutoTURN review, exhibits, calculations, and technical report preparation. He supports project managers with production, analysis, and documentation.

Marshall Hammack - Parking and Mobility Lead

Marshall Hammack provides expertise in parking demand studies, parking master planning, shared parking, campus parking analysis, access/circulation review, and mobility recommendations.

Rajvardhan Desai - Traffic Engineer / Technical Support

Rajvardhan Desai supports traffic analysis, traffic engineering studies, technical documentation, data processing, exhibits, and recommendations for municipal, institutional, and private development projects.

Dhwani Virani - Analyst / Planner

Dhwani Virani supports analysis, planning, CAD/exhibit production, documentation, and technical production for transportation, parking, and traffic engineering projects.

Christopher Chuparkoff - Analyst / Planner

Christopher Chuparkoff supports traffic management planning, documentation, field-data coordination, and technical production.

5. References and Stability

DeShazo Group has served Texas clients continuously since 1980 and maintains a stable, experienced team focused on traffic engineering, transportation planning, parking, and design services. The firm has maintained professional liability insurance and has continued to support public-sector, institutional, and private-sector clients through long-term relationships and repeat assignments.

Selected Relevant Project Experience

University of Texas Rio Grande Valley - Vackar Stadium Expansion Multi-Modal Transportation Impact Analysis, Edinburg, Texas

DeShazo prepared a multi-modal transportation impact analysis for the Vackar Stadium Expansion in Edinburg. The study evaluated parking demand, parking supply, remote parking management, transit routes, site circulation, pedestrian routes, pedestrian level of service, vehicular traffic assessment, trip generation, trip distribution, intersection capacity analysis, game-day operations, and mitigation recommendations. This project is highly relevant to Edinburg because it involved a major institutional project within the City and required coordination of vehicles, pedestrians, parking, transit, and event operations.

City of Dallas - Signal Design Group 7

DeShazo served as primary contractor for traffic signal renovation work at multiple intersections. Responsibilities included traffic signal renovation services, electrical service coordination, intersection lighting, signage evaluation and design, turning movement count assessment, coordination with subconsultants, and compliance with current MUTCD and ADA requirements.

Highland Village Thoroughfare Plan Update

DeShazo conducted review and update of a municipal thoroughfare plan, including background data review, traffic volume review, growth trend analysis, link analysis, identification of traffic-related issues, coordination with city personnel, and recommendations for future thoroughfare improvements.

Texas Tech Health Sciences Center - Campus Transportation, Wayfinding, and Safety

DeShazo evaluated access, circulation, signage, wayfinding, pedestrian safety, parking, ADA considerations, and multimodal improvements for a major institutional campus environment.

University of Texas at Arlington - Master Plan / Parking and Transportation Analysis

DeShazo supported master planning by providing parking utilization data collection, traffic data collection, access/circulation review, pedestrian safety review, multimodal transportation considerations, parking demand analysis, and recommendations.

6. Previous Experience with the City and Regional Relevance

The RFQ requests that respondents list past projects with the City of Edinburg for each proposed team member. Based on the project records reviewed for this response, DeShazo Group does not identify a prior direct contract with the City of Edinburg. DeShazo has, however, completed directly relevant transportation and traffic work within Edinburg through the University of Texas Rio Grande Valley Vackar Stadium Expansion Multi-Modal Transportation Impact Analysis.

That regional experience is relevant because it involved Edinburg-area roadway, parking, pedestrian, transit, event, and multimodal operations. DeShazo understands the importance of practical transportation recommendations that account for local circulation patterns, agency coordination, pedestrian safety, campus and institutional activity, and implementation constraints.

7. Insurance, Claims, and Professional Services Agreement Statement

Insurance

DeShazo Group carries professional liability, general liability, automobile liability, and workers compensation coverage. A current insurance certificate is intended to be uploaded separately through OpenGov as requested in the vendor questionnaire. DeShazo Group understands that certificates of insurance naming the City as additional insured, as required by the City contract, must be provided prior to services being performed.

Insurance Claims / Litigation

DeShazo Group has maintained professional liability insurance in force and has not had any insurance claim or litigation matter within the past five years that would impede the firm's ability to perform the services contemplated under this RFQ. The required Litigation Disclosure Form will be completed and uploaded separately through OpenGov.

Professional Services Agreement

DeShazo Group has reviewed the Professional Services Agreement requirements included with the RFQ materials and understands that the selected firm(s) will be required to enter into an agreement with the City of Edinburg, subject to final review and negotiation of scope, schedule, terms, and billing rates. DeShazo Group will meet the prerequisite insurance requirements prior to performance of services.

8. Contact Information and Electronic Submission Statement

Electronic Submission Statement

This Statement of Qualifications is prepared for electronic submittal through OpenGov as one complete PDF document. Required forms and the current insurance certificate are intended to be uploaded separately in the specific portal fields provided by the City of Edinburg.

9. Required Forms and Signature Checklist

The following items should be completed, signed where required, and uploaded through OpenGov in the fields provided by the City of Edinburg before the July 14, 2026, 3:00 PM deadline:

Item	Action	Signer / Owner
Statement of Qualifications PDF	Upload as one complete PDF document.	Lucas / final review by Chuck
Current Insurance Certificate	Upload current COI in the portal field.	Lucas / admin
Conflict of Interest Disclosure	Complete and sign the City form.	Chuck
General Questionnaire	Complete and sign the City form.	Chuck
Litigation Disclosure Form	Complete and upload.	Chuck
HB 89 Verification	Complete and sign.	Chuck
SB 13 Energy Company Boycotts Verification	Complete and sign.	Chuck
SB 19 Firearm Entities Verification	Complete and sign.	Chuck
Non-Collusion Affidavit	Complete and sign.	Chuck
Conflict of Interest / CIQ	Complete and sign/file if required.	Chuck
Form 1295	Required only if awarded and applicable.	Chuck / selected firm
Addenda	Download, review, sign, and attach if any addenda are issued.	Chuck

Internal RFQ control note: For electronic submissions, the response should be substantially complete and ready to upload at least four hours before the deadline. Forms requiring Chuck/Lucy signatures should be routed for signature at least three days before the due date whenever possible.

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?
Yes____ No✓

3. Is your Company authorized and/or licensed to do business in Texas? Yes✓ No____

4. Where is the Company's corporate headquarters located? 400 S. Houston Street, Suite ~~300~~ 330 Dallas, TX 75202

5. a. Does the Company have an office located in Edinburg, Texas? Yes____ No✓

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office? _____ (years) _____ (months)

c. State the number of full-time employees at the Edinburg office. _____

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity? Yes____ No✓

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. _____

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Lucas Palmitano
Address: 400 S. Houston Street, Suite 330 Dallas, TX 75202
Telephone: 214-748-6740
Fax: N/A
Email: lucas.p@deshazogroup.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (✓).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture._____

9. Bankruptcy Information

Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (✓)
If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets. _____

10. Provide any other names under which your business has operated within the last 10 years.
None

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES (NO)

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES (NO)

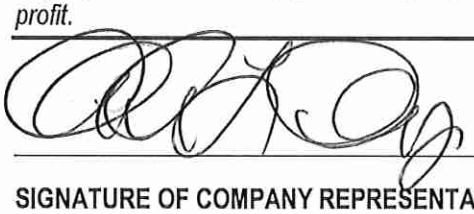
If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Chuck DeShazo, the undersigned representative of

DeShazo Group, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and



2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, Chuck DeShazo, the undersigned representative of

DeShazo Group, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

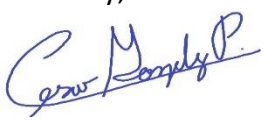
Ethos-Holistique Holdings, LLC* dba Ethos Engineering is pleased to present our qualifications for Mechanical, Electrical, and Plumbing (MEP) Engineering Services. We recognize the importance of having a responsive and innovative partner capable of delivering effective, cost-efficient engineering solutions.

We are aware of the economic challenges affecting the Rio Grande Valley (RGV) communities. Ethos Engineering helps secure loans, grants, and incentives for capital improvement projects. We successfully assisted Cameron County, Hidalgo ISD, Los Fresnos CISD, and Harlingen CISD in obtaining over $8 million in low-cost loans from the State of Texas LoanSTAR program. When state and federal grants become available, we proactively secure funding to enhance MEP systems and community resilience, driven by our commitment to sustainability and high-performance design.

Our HUB-certified team has provided MEP engineering services to municipal institutions in the RGV and Texas for over 25 years. In our 12 years of operation, we have quadrupled our staff without litigation and earned accolades such as Consultant of the Year and Engineer of the Year in 2018, 2022 and 2024. We specialize in full-service MEP engineering and energy programs funded by state and federal sources, such as SECO LoanSTAR programs and grants.

Our Services Include:

- **SECO LoanSTAR Loans and SECO Grants**
- **Prime consulting, project development, and budgeting**
- **MEP engineering for municipal clients**
- **Critical maintenance and equipment replacement (HVAC, electrical upgrades)**
- **Assistance with rebates, utility incentives, grants, and loans**
- **HVAC and ventilation upgrades to meet CDC guidelines**
- **Specialty system design (fire alarms, public address, security systems)**
- **Expert code analysis (ADA, ICC, IECC, TEA, TDI, and windstorm certifications)**
- **Utility analysis, facility assessments, and life cycle cost analysis**
- **Commissioning, retro-commissioning, and continuous commissioning**
- **Energy conservation and renewable energy design and implementation**
- **Technical training and educational seminars**
- **LEED and sustainable design solutions**
- **BIM and Revit modeling, collision detection, and constructability studies**



Ethos Engineering has successfully designed hundreds of projects, ranging from new high-performance buildings to extensive renovations for municipal clients. We have provided Prime Consultant services for MEP renovations at various entities, including Cameron County, the Cities of Brownsville, Harlingen, and Primera, TSC, STC, UT-RGV, airports, and multiple school districts.

We specialize in healthcare, transportation, education, public safety, commercial, and industrial projects, with strong expertise in municipal and government work. Familiar with city and county facilities and challenges, we deliver tailored engineering solutions, managing complex, fast-paced, and budget-conscious projects—over $50M in MEP renovations last year alone. Our large design staff and dedicated Commissioning Department handle multiple projects at once, ensuring quick field responses and seamless collaboration. With all three Principals actively involved, we offer unmatched accessibility, experience, and responsiveness.

I certify that I am authorized to bind Ethos-Holistique Holdings, LLC dba Ethos Engineering contractually, and by my signature below, commit the firm to provide the services described in this Statement of Qualifications if selected by the City of Edinburg.

Thank you for your consideration. We appreciate the opportunity to be considered and look forward to serving the City of Edinburg.

Sincerely,

Cesar Gonzalez, PE

✓ *FIRM QUALIFICATION AND EXPERIENCE*

Ethos Engineering has extensive experience providing mechanical, electrical, plumbing (MEP), commissioning, and energy engineering services for municipal, county, educational, housing authority, and other public-sector clients throughout South Texas. During the past two years, our team has successfully completed and managed engineering projects for government agencies including the City of Brownsville, Cameron County, Harlingen Housing Authority, Brownsville Housing Authority, McAllen Housing Authority, regional utility districts, school districts, colleges, and other public entities. Our proven ability to deliver projects on schedule, within budget, and with minimal construction issues has established Ethos Engineering as a trusted partner for public agencies.

The team has successfully implemented **renewable energy projects and energy efficiency upgrades** under **SECO grants in excess of $3.5M**. In the past 20 years, Rajesh has worked on several LoanSTAR projects, from project conception through the loan application process, to design and construction administration of the projects, including La Joya ISD, Los Fresnos CISD, Webb County, San Jacinto College, North Harris Community College, and Tomball College.

In the past two years, Ethos was successful in obtaining LoanSTAR loans for Hidalgo ISD ($1,8M) and Los Fresnos CISD ($2M). At Hidalgo ISD the project, in its entirety, is now complete. At LF CISD, the projects are under budget, and ready for construction phase. The projects included energy conservation measures including:

- Energy management and control systems
- Energy efficient lighting upgrades
- HVAC system replacements and upgrades
- Air management systems
- High efficiency motors
- CO2 based demand control ventilation

Our firm distinguishes itself through a responsive, client-focused approach combined with experienced leadership, rigorous quality control, and strong multidisciplinary coordination. Every project is led by experienced Professional Engineers and undergoes an independent Quality Assurance/Quality Control (QA/QC) review to ensure compliance with applicable codes, owner requirements, and industry best practices. This process consistently minimizes Requests for Information (RFIs), reduces change orders, and supports successful project delivery.

Ethos Engineering's headquarters in **Harlingen, Texas**, supported by our **Pharr office**, will provide the services requested. Our strategically located offices allow our team to respond quickly to the city for meetings, site visits, design coordination, and construction support throughout the Rio Grande Valley. This local presence enables rapid response times, improved communication, and convenient access to project sites. We also maintain key personnel

throughout the region, ensuring timely on-site support and continuous client service whenever needed.

Our staff is structured to efficiently manage both large, complex projects and smaller on-call assignments. For part-time staffing needs or limited-scope tasks, we assign appropriately sized project teams led by a dedicated Project Manager, allowing us to respond quickly while maintaining cost-effective service. Our experienced engineers, designers, and technical staff provide the flexibility to adjust resources based on project demands without impacting schedules or quality. With multiple licensed Professional Engineers and multidisciplinary design teams, we can successfully manage several assignments concurrently while maintaining our high standards of service.

Ethos Engineering emphasizes collaboration and communication throughout every phase of a project. We work closely with City staff, stakeholders, and subconsultants to develop practical, sustainable, and cost-effective engineering solutions. Our experience delivering projects under aggressive schedules and budget constraints, combined with our commitment to quality, responsiveness, and exceptional client service, makes Ethos Engineering uniquely qualified to support the City's engineering needs. We are committed to providing timely, dependable engineering services and building long-term partnerships through professionalism, technical excellence, and responsive customer service.

PRINCIPAL + MECHANICAL/ELECTRICAL ENGINEER

Highlights of Qualifications

Cesar has 19 years of experience in the Engineering Design of Mechanical, Electrical and Plumbing Systems, serving educational facilities such as Community Colleges, Universities and K-12 Schools. Among other skills, he specializes in engineering, construction coordination and commissioning.

Cesar is experienced in the simulation and modeling of system energy performance, thermodynamic and mechanical load analysis, and calculation.

At Ethos he is responsible for MEP engineering design, planning, coordination, and management. He oversees mechanical and plumbing design production, including BIM coordination. He ensures that engineering design is applied in compliance with construction codes, in a sustainable and cost-effective manner.

Cesar is committed to his profession. He has grown in the MEP Engineering industry, starting at the very basics, followed by assisting Projects' Engineers of Record, then practicing Licensed Engineering, and to finally becoming part of the Ethos Engineering Management team. His professional affiliations include ASHRAE and volunteering as an engineering mentor in STEM clubs at local schools.

ACR Engineering, Harlingen, TX 2006 – 2014

Starting as Graduate Engineer, he functioned as CAD operator performing drafting tasks and basic calculation activities. With time and experience gained, he became a Mechanical Designer, in charge of generating HVAC and Plumbing plans and documents suitable for cost estimation and constructability coordination activities. Rapidly he became qualified to perform building heat load analysis, design of HVAC systems and design of thermal plants. He also functioned as lead design engineer, engineer of record, and supervisor of the production of mechanical design.

Experience as Prime Consultant Engineer of Record

- South Texas College (STC) – Multiple campus projects
- UTRGV – Academic and support facilities
- K-12 School Districts throughout the Rio Grande Valley
- IDEA Public Schools – Numerous campuses throughout the State of Texas
- Cameron County and Hidalgo County public facilities

MEP Renovation Experience in the Rio Grande Valley

- STC: Several campus renovation and infrastructure upgrades
- UTRGV: HVAC and central plant improvements
- IDEA Public Schools: Multi-campus renovations and system replacements
- Cameron County: Historical building renovations and adaptive reuse projects
- Higher Education Facilities: Classroom, lab, and administrative renovations
- Central Plant & Chilled Water System upgrades
- Thermal plants up to 6,000+ tons
- Phased renovations in occupied facilities

Utility Incentives

- Secured and assisted with utility incentive applications for HVAC retrofits
- Energy efficiency upgrades including high-efficiency chillers, boilers, and VFD systems
- Experience coordinating with local utilities for incentive compliance documentation
- Lifecycle cost analysis for energy-efficient system selections

High-Performance & Sustainable Design

- LEED-influenced design strategies for public institutions
- Energy modeling coordination and envelope/system optimization
- High-efficiency chilled water plants and adaptive control strategies
- Demand reduction and peak load management strategies
- Energy Star–aligned building performance improvements

Recognition & Professional Leadership

- Lead mechanical engineer on award-recognized municipal and higher education projects
- Technical mentor for engineering staff
- Oversight of QA/QC procedures for design and commissioning coordination
- Active involvement in regional engineering and industry organizations

Community Involvement at International Level

- Architectural and MEP courses at ITESM
  Tecnológico de Monterrey,
  Monterrey Mx.

Community Involvement at Local Level

STEM Programs: La Joya ISD
Harlingen ISD
Brownsville ISD
IDEA Public Schools

PRINCIPAL + QC/QA + SUSTAINTABILITY DIRECTOR + BCxP

Highlights of Qualifications

Rajesh has over 30 years of experience managing complex and diverse MEP projects. As a Principal at Ethos, he is responsible for system concepts and quality control for all projects. His main focus is energy efficiency and sustainability design.

With a graduate degree in thermodynamics and thermal fluid systems, Rajesh specialized in design of thermal plants, thermal energy storage (TES), and renewable energy technology, and energy conservation projects. He performs energy analysis, commissioning (CX), and retro-CX. He also has expertise in designing high performance buildings.

Rajesh earned his LEED Accredited Professional certification in 2004; his first LEED project 'The Austin City Hall' was awarded LEED Gold, and several of his projects have been awarded LEED and Energy Star Building certifications. In the Valley market, Rajesh honed his skills, designing comfortable, sustainable facilities that are both cost effective and easy to maintain.

His professional affiliations include **ASHRAE, EPA, and USGBC**. Rajesh volunteers as an engineering mentor in STEM clubs in schools and serves on the Board of Piedmont Environmental Alliance organization, and the **USGBC Leadership Group committee co-chair for Education and Programming**. He enjoys teaching and speaking at professional workshops and seminars and has **presented papers** at more than half a dozen technical conferences.

ACR Engineering–Austin, Harlingen, TX 1995 – 2014

For over 20 years Rajesh served as the Engineer of Record for the South Texas office. He conducted energy audits, developed technical reports, and implemented energy conservation projects. He designed new and retrofit lighting, HVAC, and DDC systems. For the State, he reviewed third party designs for code compliance. He provided training sessions in environmental and energy conservation, renewable technologies, and the use of related software and analysis techniques. He commissioned building MEP controls, and life safety systems.

Experience as Prime Consultant Engineer of Record

- UTRGV, UT-Pan American, UT Brownsville, Texas Southmost College, TSTC, Texas A&M
- South Texas College
- Colleges and universities in Texas
- Wake Forest University
- Cameron County, Hidalgo County

MEP Renovation Experience in the Rio Grande Valley

- **STC: Several projects**
- UTRGV: **Several projects**
- UT Brownsville/TSC: **Several projects**
- Dozens of schools with thermal plants up to 6,000T
- Valley International Airport: Renovation
- City of McAllen Central Library: Renovation/New construction
- Cameron County: Several projects

Utility Incentives

At the University of Houston, obtained $350,000 in incentives from CenterPoint Energy for a single chiller replacement project. In the past 5 years, applied for and received incentives in the millions from AEP for HVAC and lighting projects.

LEED and High-Performance Building Projects

Recognition and Awards:

- *Consultant of the Year Award, AIA-RGV*
- *LEED Gold – Falcon Dam*
- *Net-Zero*
- *EPA Energy Star Buildings: Several with perfect scores of 100.*
- *EPA Energy Star Buildings: Three campuses of UTRGV.*
- *National Design Award: McAllen Library: 500T, ultra-high efficiency thermal plant with oil-free magnetic bearing chillers, adaptive controls.*
- *LEED Gold: Austin City Hall: Boilers, heat exchangers, connection to district utility plant.*
- *LEED Silver: the City of Austin, 911 Center, Commissioning Agent*
- *LEED Certification (in progress): Valley Nature Center, Weslaco*
- *LEED Silver: Lance Armstrong Foundation, Austin*

PRINCIPAL + PROJECT MANAGER

Highlights of Qualifications

Guillermo has 37 years of experience in the electrical field; including design and specification of lighting and electrical systems for higher education, K12, sports facilities, office buildings, commercial, and industrial projects. He designed and specified emergency power, telecommunications, security, and fire protection systems for commercial and institutional projects.

For 15 years Guillermo served as Project Manager and Design Coordinator for projects he designed. His duties included cost estimation, budgeting, construction coordination, inspection, and final acceptance testing. He has experience in Construction Administration and has successfully overseen construction of a number of projects with costs exceeding ten million dollars.

ACR Engineering–Harlingen, TX 1999 – 2014

As the lead electrical designer, Guillermo designed lighting and electrical systems, reviewed existing systems for code compliance, and designed energy conservation measures such as lighting reflectors, high efficiency lamps, electronic ballasts, occupancy sensors, and lighting controls. Guillermo supervised design projects for the Rio Grande Valley clients. He managed the day-to-day operations of the Harlingen Office.

As a project manager, he was responsible for total project implementation, starting with initial client contact, design, project supervision, to final follow-up. He interfaced with clients, architects, and contractors to ensure proper project implementation.

Gomez Garza Design – Brownsville, TX 1992 – 1999

Guillermo was the lead designer for a range of projects, including lighting for the Valley International Airport, several projects at the Texas State Technical College - Harlingen, and more notably the complete electrical design for the Federal Courthouse, Brownsville.

Pete Garza Consulting Engineer- Harlingen, TX 1987 – 1992
Guillermo provided drafting and design services for electrical systems at schools, universities, commercial and industrial facilities.

MARK WARREN

DIRECTOR OF COMMISSIONING
Highlights of Qualifications

Mark Warren has over four decades of experience in engineering design, energy efficiency projects, facilities commissioning, and construction management. He has been principal designer, client contact, project manager, and commissioning agent for a wide gamut of both retrofit and new construction projects involving a wide range of mechanical, electrical, plumbing, and control systems. At Ethos, he is responsible for energy audits, facilities commissioning, and MEP engineering quality control. Mr. Warren has been the principal Commissioning Authority for over a hundred new and retrofit projects in the K-12 education, higher education, healthcare, museum and public works arenas.

Shah Smith & Associates, Austin, TX 2014 – 2017
At Shah Smith, Mr. Warren was the principal Commissioning Authority for multiple projects of varying size and complexity for Texas A&M system, St. Edwards University, and the Veterans Administration / Houston.

ACR Engineering, Austin, TX 1984 – 2014
As Senior Vice President at ACR, Mr. Warren produced MEP plans and specifications for new construction and for retrofit projects, supervising projects from design through bidding and construction. He performed hundreds of on-site energy audits for commercial, industrial, and institutional facilities, including energy conservation reports for the Texas State Energy Conservation Office from as far back as the Institutional Conservation Program to as recent as LoanSTAR He performed Building Commissioning services for multiple facilities, both LEED and non-LEED, including preparation of Commissioning Plans, Pre-Functional Checklists, Functional Testing procedures, and including oversight of Functional Testing and report writing / documentation of all aspects of Building Commissioning.

Ethos Principal, Cesar Gonzalez, PE, will be the Project Manager and will oversee a team of seasoned engineer - Rajesh Kapileshwari, PE, LEED AP, and Guillermo Quintanilla. Cesar will be the primary contact and handle the day-to-day coordination and project management. He will coordinate with the appropriate in-house staff members and sub-consultant personnel for meetings.

Cesar and Rajesh will work on the Plumbing, HVAC and Controls, while Guillermo will manage the electrical, lighting, and special systems projects.

Rajesh Kapileshwari, PE will oversee the planning and development of the project, starting with master planning and conceptual design. He will write a Design Intent Document showing schematic design, equipment layout, piping connections, piping schematics showing controls and P&I drawings, and an opinion of probable cost. Equipment selection will be steered by economic analysis using payback analysis, ROI, life cycle cost analysis, comparison of first costs and available budgets, etc. A detailed analysis of various options will help determine the optimum solution for you. Rajesh will perform quality control of all design documents at major milestones. He will be the primary specification writer, submittal reviewer, and the engineering liaison between the design team and the CX Agent. All documents to and from Ethos Engineering will be reviewed by Rajesh and Cesar.

Bailey Burke, Porfirio Mireles, and Chris Garza will provide engineering design. Marisol Osorio will provide plumbing/BIM services. Jesus Martinez, Raul Espinosa, Tim Looper, Brandon Trevino, Frank Rodriguez, Joshua Rodriguez, Grecia Villarreal, and Jose Vela will assist as MEP designers. Marcos Rios and Jose Leal and Carlos Lopez will work as Construction Administrators. Diane Looper and Imelda Ruiz will oversee document control and accounting.

In addition to QA/QC work above, CX Director Mark Warren will oversee the Construction Administration and Commissioning activities, including in-house (third-party) design and submittal reviews. Ryan Gilnack and Carlos Lopez will assist with CX.

Our 3 (three) principals and key members will dedicate as much time as the assigned project(s) require, up to 100% at peak, to accomplish the goals. Our company's success depends on this availability for our clients. However, we seek to exceed clients' expectations, regardless of the percentage of time the project requires.

Each member of the Ethos Engineering team is available, committed, and eager to successfully implement your projects.

NAME: FALCON DAM ADMINISTRATION BUILDING

PROJECT DESCRIPTION: The New Falcon Dam Administration Building is a single-story facility designed with high-performance HVAC, automation, plumbing, electrical, lighting, fire protection, and solar PV systems. Our MEP engineering and LEED design services earned maximum USGBC credits, exceeding federal LEED Silver requirements and achieving LEED Gold certification.
ROLE PERFORMED: MEP Engineering, LEED design, modeling.
CONTACT INFORMATION: GMES: Jose L. Munoz (956) 565-4637

NAME: UTRGV – HARLINGEN COLLEGIATE HIGH SCHOOL

PROJECT DESCRIPTION: The education facility earned an Energy Star score in the 95th percentile, saving $30,000 annually and cutting 217 tons of CO_2. Designed to exceed energy codes by 50%, it reduces potable water use by 50% and meets/exceeds CA Title 24 lighting standards. A flexible Building Automation System optimizes HVAC performance through adaptive setpoints. Design documents were developed in BIM (LOD 300) using Revit for coordination and clash detection. The City of Harlingen donated the land to UTRGV and HCISD for this building.
ROLE PERFORMED: MEP Engineering, construction administration, commissioning.
CONTACT INFORMATION: UTRGV - Gerry Rodriguez Jr., AIA, Director of Facilities Planning & Construction (956) 665-2770 and HCISD - Oscar Tapia, Asst Superintendent of District Operation, (956) 427-3300

NAME: STEC SOUTH TEXAS ECOTOURISM CENTER

PROJECT DESCRIPTION: New Park buildings, with split system heat pump units with staged compressors and variable fan speed, supplementary electric duct heaters, CO2 based demand-controlled ventilation, controls, and accessories, mini-split systems, extensive exterior parking lot and area lighting. The City of Laguna donated the land to Cameron County for this building.
ROLE PERFORMED: MEP Engineering, construction administration, commissioning.
CONTACT INFORMATION: Cameron County Danny Villareal (956) 454-1378

✓ ***SIMILAR PROJECT-RELATED EXPERIENCE OF THE TASK LEADER***

Ethos Engineering Principals Guillermo Quintanilla, Rajesh Kapileshwari, PE and Cesar Gonzalez, PE have a combined experience of over 50 years implementing projects in the **institutional, high-security, municipal, county, and governmental sectors**.

At **Cameron County**, our staff has provided MEP engineering services for the last three years on projects ranging from provision of new elevator at the courthouse and elevator upgrades at four buildings, to complete plumbing upgrades at the county jail. Recently, Ethos completed a chiller plant renovation project at the newly acquired Wells Fargo Building on East Levee Street. We have also implemented several large and small MEP renovation projects for the County. As part of the A/E team we have provided services for numerous projects, including Hall of Justice, Santa Rosa Technology Center, Social Services Building Classroom Additions, Los Fresnos Annex Building, many Parks and Recreation projects, Cameron County Elections Building and Veterans Office Building, East Levee Courthouse building, and the Sheriff's office renovation and expansion.

Relevant Experience:

LoanSTAR Project Experience in the past two years:

- Hidalgo ISD ($1.8M): Lighting, HVAC, and Controls Upgrades
  - LoanSTAR Energy Audit: Cesar Gonzalez, PE, Guillermo Quintanilla, Chris Garza
  - LoanSTAR Report: Rajesh Kapileshwari
  - LoanSTAR Application: Diane Looper
  - Design and Construction Documents: Rajesh Kapileshwari, Cesar Gonzalez
  - Construction Administration: Cesar Gonzalez, Marcos Rios, Guillermo Quintanilla
  - LoanSTAR Documentation Assistance: Diane Looper
- Los Fresnos CISD ($2.0M): Lighting, HVAC, and Controls Upgrades
  - LoanSTAR Energy Audit:
    - Controls and HVAC: Mark Warren, Cesar Gonzalez, Luis Hernandez
    - Lighting and Controls: Guillermo Quintanilla, Chris Garza, Marcos Rios
  - LoanSTAR Report: Rajesh Kapileshwari, PE and Mark Warren PE
  - LoanSTAR Application: Diane Looper
  - Design and Construction Documents: Rajesh Kapileshwari (HVAC), Mark Warren (Controls), Ray Peynado (Lighting and Electrical Design)
  - Construction Administration: Cesar Gonzalez, Marcos Rios, Guillermo Quintanilla
  - LoanSTAR Documentation Assistance: Diane Looper
  - Commissioning Related: Mark Warren, Marcos Rios

Cameron County and Judicial Complex Experience:

- Cameron County East Levee Building (Old Wells Fargo Building Renovations)
- Cameron County Hall of Justice Interior Renovations
- Cameron County Justice Complex Elevator Upgrades
- Cameron County Old County Jail Plumbing Renovations
- Cameron County Annex Building, Los Fresnos
- Cameron County Social Services Building
- Cameron County Santa Rosa Technology Center
- Cameron County Elections Building and Veterans Office Building
- Cameron County Parks and Recreation Department
- City of San Benito, City Hall and Jail Renovations
- Federal Courthouse in Brownsville (electrical design by Guillermo Quintanilla)

CONFLICT OF INTEREST
DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____

SENATE BILL 19 VERIFICATION

I, Cesar Gonzalez, the undersigned representative of Ethos-Holistique Holdings LLC, dba Ethos Engineering, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

AGREEMENT BETWEEN THE CITY OF EDINBURG AND CONSULTANT FOR PROFESSIONAL ENGINEERING SERVICES PURSUANT RFQ NO. XXXX-XXX

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit “B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

SECTION XXI
NOTICE OF GOVERNING LAW FOR STATE AND FEDERAL GRANT PROJECTS

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

1. Transmittal Letter

Dear Mr. Hinojosa and Selection Committee:

The City of Edinburg (City) is continuing to build momentum as a growing community focused on economic development, infrastructure investment and long-term success. As growth accelerates, the City has an opportunity to shape development in a way that supports both immediate needs and future resilience.

Freese and Nichols, Inc. (FNI) is excited to partner with the City to help turn these opportunities into lasting results. We understand that success requires a trusted partner who can help the City plan strategically, respond to growth and move initiatives forward with confidence. In this Statement of Qualifications (SOQ), we have detailed many reasons why the FNI team is the ideal choice for the City, including:

Experience Supporting Growing Communities: FNI has extensive experience helping growing communities align infrastructure, funding and planning to meet increasing demands. Our team works side-by-side with clients to anticipate needs, prioritize investments and deliver solutions that are both practical and forward-looking.

Collaborative, Full-Service Team: FNI brings together planning, engineering and program management under one team to simplify coordination and maintain momentum across projects. With strong regional experience in the Rio Grande Valley, we understand the local conditions, growth patterns and opportunities that are shaping communities like Edinburg.

In-House Funding Expertise: We help clients not only identify funding opportunities but also prepare applications and strategically allocate resources to move priority projects from concept to implementation.

A Responsive and Reliable Partner: FNI is committed to being a responsive, reliable partner. We focus on delivering high-quality solutions while supporting the City's broader vision—helping staff navigate change, maximize investments and create a community that continues to thrive.

We are excited about working with the City as you continue to respond to growth and development opportunities. Please feel free to contact me directly if you have any questions regarding this SOQ.

Sincerely,

Ron Guzman, PE

2. Firm Qualification and Experience

FNI is a client-focused, regionally based firm with national expertise. We meet client needs with responsiveness and flexibility. Dating back to our firm's founding in 1894, we put relationships first — clients, teaming partners and staff — and seek long-term relationships, many of which are counted in decades, not years.

FNI has a long history of helping municipalities, counties, water districts, river authorities and other governmental agencies plan, design and deliver infrastructure improvements that respond to growth, operational needs and long-term community goals. Our team provides a broad range of services, and we help our clients through every stage of the project life cycle: planning, design, program management, funding procurement, regulatory compliance, construction management, and operations and maintenance. Our project teams are known for exceeding client expectations through innovative concepts and high-performing designs.

Serving Communities Like Edinburg

FNI has supported many governmental clients facing the same pressures and opportunities that are shaping Edinburg today. In the Rio Grande Valley and broader Central/South Texas region, FNI has worked with nearby and similar agencies, including Brownsville, McAllen, Harlingen, Corpus Christi, New Braunfels, Seguin, Pflugerville, Buda and San Antonio. Our work for these clients has included on-call engineering, staff augmentation, comprehensive planning, water and wastewater master planning, impact fee studies, roadway and drainage improvements, program management, construction management and development review support.

Holly Trestle Trail — On-Call Partnership in Action

FNI has cultivated a long-standing on-call professional engineering services relationship with the City of Corpus Christi, positioning FNI as a trusted, readily available partner for planning, design and engineering needs across the City. This on-call contract allows the City to engage FNI quickly and efficiently so that when opportunities arise, the right expertise is already in place. The Holly Trestle Trail project is a prime example of how that on-call relationship translates into real, lasting community benefit.

A timber railroad trestle was constructed across Oso Bay in the 1940s to support the construction of Naval Air Station Corpus Christi in Flour Bluff. The rail line was abandoned in the 1990s, and hurricane forces eventually destroyed much of the structure. In 2020, FNI developed the Flour Bluff Area Development Plan, which identified the old trestle location as an ideal opportunity to create a hike and bike trail linking existing trail systems in Corpus Christi and Flour Bluff. That vision set the stage for a multi-year effort to transform a forgotten piece of wartime history into a vibrant community asset.

Because FNI was already an established on-call partner, the City and its stakeholders knew exactly who to call as the vision took shape. In 2022, the Friends of Redhead Pond, a Flour Bluff citizens' group, engaged FNI to conduct a feasibility study, which confirmed that the surviving trestle pilings were viable for reuse as a trail foundation. The City then turned to FNI through its on-call contract to provide conceptual-level design and develop exhibits for a TxDOT funding application. That application secured a $14 million TxDOT grant. FNI subsequently delivered a trail master plan required by TxDOT and is currently developing the preliminary design for all project features, including a fish cleaning station and accessible kayak launch, culminating in a Preliminary Engineering Report (PER) with exhibits and cost estimates.

What Sets FNI Apart

What makes FNI uniquely qualified to serve the City is the combination of local familiarity, full-service capabilities, scalable staffing and infrastructure funding support. Our nearby work with Rio Grande Valley and South Texas clients gives us familiarity with the development patterns, infrastructure demands, utility systems, regulatory environment and operational realities of fast-growing communities in this region. FNI's experience guiding similar communities through growth management, master planning, utility expansion, roadway and drainage improvements, and on-call support positions us well to provide practical, responsive service to the City.

FNI's South Texas offices (Harlingen and Corpus Christi) are located in close proximity to the City of Edinburg.

Local Presence, Regional Strength

FNI also offers the City the benefit of one connected team across disciplines. Rather than relying on fragmented handoffs between separate specialty providers, FNI can bring together planning, civil engineering, water and wastewater, transportation, drainage/stormwater, facilities, environmental services, construction management and funding support under one coordinated structure. FNI has more than 1,400 employees firmwide and more than 300 in the Central/South Texas region, giving the City access not only to core delivery staff but also to additional subject matter experts as needed.

The primary offices serving the City under this contract will be FNI's Harlingen, Corpus Christi, and San Antonio offices, with additional support available from San Marcos and Austin. This structure gives the City the benefit of both proximity and depth: local and regional staff who understand the area, backed by broader technical resources from across the firm when specialized support is needed.

Flexible, On-Call Support

FNI's on-call approach is built around responsiveness, adaptability and alignment with the City's evolving needs. Whether supporting a small task assignment or a more complex effort, our team is structured to scale appropriately—bringing the right level of expertise at the right time without overcomplicating delivery.

Our goal is to function as an extension of City staff, providing reliable support that can quickly respond to emerging priorities, development pressures and operational needs. By maintaining a deep bench of technical professionals across disciplines, we confirm the City has access to specialized expertise when needed, while still benefiting from consistent project leadership and coordination.

This flexible structure allows the City to maintain momentum across multiple initiatives, confidently address unexpected challenges and advance projects without delay. FNI's approach emphasizes clear communication, continuity of service and proactive coordination to keep work moving efficiently and effectively. To support this flexible approach, FNI uses a clear and efficient assignment workflow that allows projects to move quickly from request to execution while maintaining alignment with City priorities.

PROJECT WORKFLOW

1 TASK ASSIGNED TO PROJECT MANAGER	2 PROJECT MANAGER IDENTIFIED	3 SCOPING MEETING WITH CITY
4 AGREEMENT BY CITY	5 DETAILED SCOPE AND FEE WITH RESOURCES ID	6 PROJECT KICKOFF WITH INTRO OF KEY STAFF

3. Team Member Qualification and Experience

The Organizational Chart on the following page displays our proposed team, including project leadership, Project Manager Fred Resendez and Senior Advisor Juan Bujanos. The FNI project team brings together decades of experience in a wide range of discipline and we have found that the unique blend of our respective areas of specialization results in a solid, well-rounded project team, ultimately benefiting the City. Project Manager Fred Resendez will serve as the City's initial and primary contact for project assignments and will also provide project support as needed.

Assembling Resources for Task Assignments

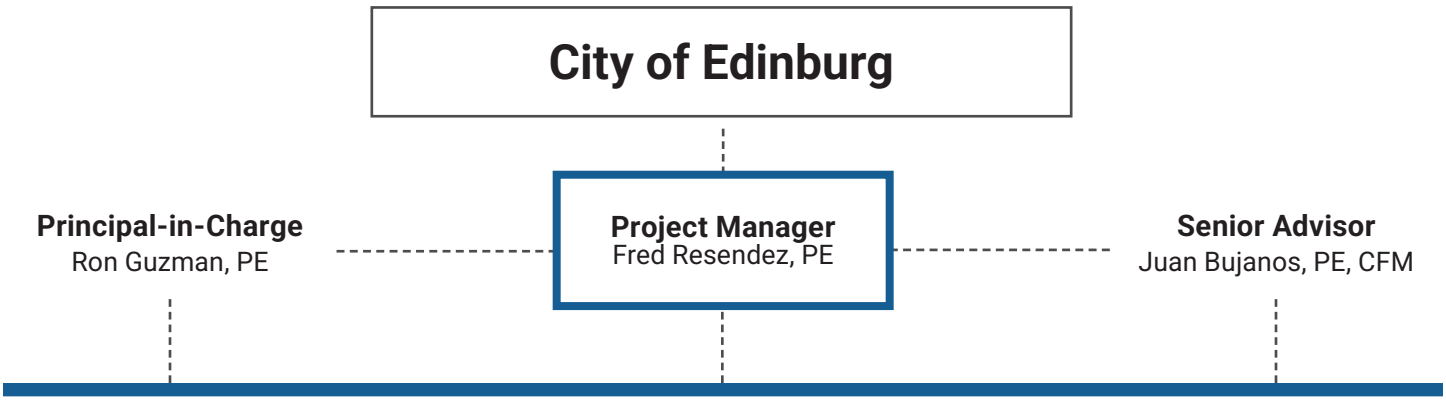
FNI has worked for both large and small municipalities throughout the state to deliver projects and solutions of all sizes and types. This will be determined by developing a scope and fee proposal for every assignment that includes positions, required hours and rates.

The specific individuals assigned to the project will be based on three primary criteria:

- Proven experience that aligns with the project needs
- Availability to adequately deliver the project and be responsive to the City
- Familiarity with City staff, standards and processes

This intentional approach verifies that each assignment is supported by professionals who not only bring the right technical expertise but also understand how to deliver work efficiently within the City's framework.

MUNICIPAL PUBLIC INFRASTRUCTURE EXPERIENCE IN TEXAS



Choosing a Project Team

We've put forth the advance-planning effort to verify we have the **right team members**, in the **right place**, with the **right availability** to meet the City's goals. Several factors influenced this choice, including individual experience and history of working together on common projects.

Our chosen team combines decades of experience in a wide range of disciplines. This complementary blend of team member expertise in their various areas of specialization results in a solid, well-rounded team, which ultimately benefits the client.

Beyond the proposed team, FNI has access to **1,400+ employees firmwide** to assist, as necessary. As a firm focused on client service, we will commit the resources required to get the job done.

Fred Resendez PE

Project Manager | Water and Wastewater Evaluation and Improvements Design

Fred is a seasoned project manager whose career has been rooted in the Rio Grande Valley, bringing deep familiarity with the municipalities, stakeholders and infrastructure challenges unique to the Edinburg area and the broader South Texas region.

He has extensive experience in designing, expanding and rehabilitating water and wastewater treatment plants, lift stations, water distribution and wastewater collection systems. He is experienced in construction management, overseeing projects from their inception phase to their closeout. Fred has coordinated local, state and federal rules and regulations with the EPA, TCEQ, TxDOT and OSHA.

RELEVANT PROJECT EXPERIENCE

Port Isabel Water Treatment Plant Improvements | Laguna Madre Water District | Assistant Project Manager
FNI is providing planning and design phase services to improve and expand the 2.9-MGD conventional water treatment plant to a 5-MGD low-pressure microfiltration system at Water Plant 1. Improvements include a new raw water pump station, microfiltration system and building, high-service pump station, 1.5-MG ground storage tank and 0.6-MG elevated storage tank. Additional work includes a new raw water transfer pump station and improvements to the high-service pump station at Water Plant 2. Fred assisted the Project Manager in managing the workload of the other FNI team members and served as the project's primary point of contact to the City's staff.

Robindale Wastewater Treatment Plant Headworks Rehabilitation | Brownsville Public Utilities Board, TX | Project Manager
FNI is providing the rehabilitation design of the existing headworks structure by replacing the existing fine screen with Duperon screens and compactors

Rio Grande River Pump Station Phase 1 | Brownsville Public Utilities Board, TX | Project Manager
FNI is providing design services for a new raw water pump station. Services include structural, architectural, mechanical, electrical and civil site design and the demolition of the existing pump stations 1 and 2.

South Wastewater Treatment Plant Improvements | Brownsville Public Utilities Board, TX | Assistant Project Manager
FNI provided design services for various improvements for a major headworks overhaul, including new grit removal equipment, consisting of grit pumps, piping, washers and classifiers, and all the associated electrical, instrumentation and controls systems. Fred was the local liaison between the Owner, Contractor and FNI Construction Management group. He conducted routine field inspections.

Juan Bujanos PE CFM

Senior Advisor | Utility Infrastructure Evaluation and Improvements | CIP Management | Grant Acquisitions

Based in the Lower Rio Grande Valley, Juan Bujanos provides responsive, locally informed service for municipal clients. He brings extensive experience leading water and wastewater infrastructure projects across South Texas, along with deep knowledge of state funding and regulatory processes gained through 15 years with the Texas Water Development Board (TWDB). His prior leadership role with Brownsville Public Utilities Board strengthens his familiarity with the perspective of utility owners.

He has managed multimillion-dollar projects, overseeing all aspects, from planning, strategy and design to inspection and post-construction work. He provides leadership to the firm's water distribution, transmission and treatment, wastewater collection and treatment, and reuse efforts, working closely with FNI specialists to match client needs and goals with proven best-practices and newer technological innovations. He serves as technical advisor and provides quality control services for the firm's treatment projects.

RELEVANT PROJECT EXPERIENCE

Master Professional Service Agreement | City of Penitas | Client Representative
FNI provided services for an on-call task authorization to review development permit applications in accordance with the City's subdivision ordinance. Juan was responsible for maintaining client relationships, overseeing deliverables and ensuring quality standards were met across all assigned tasks.

Port Isabel Water Treatment Plant Improvements | Laguna Madre Water District | Senior Advisor
FNI is providing planning and design phase services to improve and expand the 2.9-MGD conventional water treatment plant to a 5-MGD low-pressure microfiltration system at Water Plant 1. Improvements include a new raw water pump station, microfiltration system and building, high-service pump station, 1.5-MG ground storage tank and 0.6-MG elevated storage tank. Additional work includes a new raw water transfer pump station and improvements to the high-service pump station at Water Plant 2.

Planning and Design of WWTP Rehab | City of Mercedes | Senior Advisor
FNI is providing preliminary and final design services for system improvements at an existing wastewater treatment facility. Our services include the evaluation, rehabilitation and replacement of treatment processes, structures, mechanical equipment, electrical systems, instrumentation and controls and associated collection system lift stations to restore capacity and reliability and support regulatory compliance.

Professional Engineer, Texas #76782

Ron Guzman PE

Principal-in-Charge

As Principal-in-Charge, Ron will monitor overall performance of the FNI project team and work with the team in a mentoring fashion to help develop good relationships between FNI staff and client staff. He will serve as the client's advocate and monitor client satisfaction.

Ron is experienced in roadway design schematics, H&H analysis, stormwater systems, utility coordination, rail systems, site development, public outreach, and development of detailed PS&E. Ron has extensive experience working with the City of Corpus Christi, the Texas Department of Transportation and the Regional Transit Authority, both individually and concurrently.

RELEVANT PROJECT EXPERIENCE

Seawater Desalination Task Order 4 | City of Corpus Christi | Client Representative
FNI supported a regional water reliability initiative by delivering a suite of pre-procurement services, including infrastructure integration planning, power purchase agreement development and negotiations, and evaluation of procurement methodologies. To secure funding, three applications were submitted to the TWDB, resulting in $760 million in below-market rate loans through the State Water Implementation Fund for Texas (SWIFT). FNI played a key role in the pre-application, application, and funding commitment phases—conducting research, completing required forms, and coordinating with the City, TWDB, and financial and legal consultants.

Everhart Road Improvements | City of Corpus Christi | Senior Advisor
FNI is providing design services to include roadway, utility, traffic signal, sidewalk and ADA curb ramp reconstruction. The project includes TxDOT coordination.

Port Isabel Water Treatment Plant Improvements | Laguna Madre Water District | Senior Advisor
FNI is providing planning and design phase services to improve and expand the 2.9-MGD conventional water treatment plant to a 5-MGD low-pressure microfiltration system at Water Plant 1. Improvements include a new raw water pump station, microfiltration system and building, high-service pump station, 1.5-MG ground storage tank and 0.6-MG elevated storage tank. Additional work includes a new raw water transfer pump station and improvements to the high-service pump station at Water Plant 2.

Mary Rhodes Pipeline Phase 2 | City of Corpus Christi | Client Representative
FNI provided planning, design and construction management services for the TWDB-funded $125 million Mary Rhodes Phase 2 project. The project included 41 miles of 54-inch raw water pipeline, ground storage tank, intake pump station site on the Colorado River, sedimentation basin, and booster pump station and tie-in to the existing 101-mile Mary Rhodes Phase 1 pipeline system.

Nick Cecava **PE, CFM**

Street Infrastructure Evaluation and Improvements | Erosion and Sediment Control Design | Transportation Evaluation

Nick Cecava specializes in municipal transportation, utility and drainage design, and construction management projects. Nick's experience includes roadway, drainage and trail design; development plan reviews; quality control reviews; franchise utility relocation/coordination; and construction inspection.

Experience: 25 years; **Education:** BS, Civil Engineering, New Mexico State University; **Registration:** Professional Engineer, Texas #97391; Certified Floodplain Manager, #0939-06N; **Office Location:** Corpus Christi, Texas

Relevant Experience

Ben Wilson Street Corridor Improvements | City of Victoria | Project Manager; Everhart Road Reconstruction (South Padre Island Drive to Holly Road) | City of Corpus Christi | Project Manager; Williams Drive Feasibility Study | City of Corpus Christi | Project Manager

Bryan Wren

Pavement Management and Improvements

Bryan brings extensive aviation infrastructure experience, leading airport capital improvement programs and complex airside and landside projects. His background includes runways, taxiways, terminals, airfield systems, air traffic control towers, ARFF facilities and parking infrastructure. Bryan helps airport clients align project delivery with operational, safety, funding and regulatory requirements while maintaining continuity of airport operations. His experience coordinating airport leadership, FAA representatives and project stakeholders helps deliver practical solutions that support long-term airport goals and system performance.

Experience: 28 years; **Education:** BS, Professional Aeronautics, Embry-Riddle Aeronautical University; MS, Aeronautics, Embry-Riddle Aeronautical University; **Office Location:** Harlingen, Texas

Relevant Experience

Various Projects* | Assistant Director of Aviation | City of Harlingen; Various Projects* | Airport Operations Coordinator | City of Houston

**Prior to FNI*

Jessica Vassar **PE**

Water and Wastewater Evaluation and Improvements Planning

Jessica specializes in hydraulic modeling, master planning, and impact fee studies. She has developed models for water and wastewater master planning, impact fee studies and development reviews and is experienced in updating existing models. She supports utility design staff in making fully informed decisions on operating, rehabilitating and expanding their water and wastewater systems. Jessica frequently confirms growth projections for water demands and wastewater flow projections, and she utilizes the hydraulic model to confirm design decisions and operational scenarios. She is proficient in water and wastewater modeling software, such as InfoWater, InfoSewer, WaterGEMS and InfoWorks ICM. Jessica is an active member of the Water Environment Association of Texas (WEAT).

Experience: 20 years; **Education:** BS, Civil Engineering, The University of Texas at Austin; **Registration:** Professional Engineer, Texas #108934; **Office Location:** Austin, Texas

Relevant Experience

Water and Wastewater Impact Fee Study | City of Pflugerville | Project Manager; Water/Wastewater Master Plan, On-Call Modeling and Impact Fee Study | City of Seguin | Senior Advisor; Water/Wastewater Master Plan, Impact Fee Update | Brownsville PUB | Project Manager; On Call Hydraulic Modeling | Harlingen Waterworks | Project Manager

Shane Torno **PE, PMP**

Structural Engineering (Improvements and Design) | Review of Civil Construction Plans

Shane's structural engineering experience includes windstorm certifications, structural design, field studies and construction supervision. He has designed commercial, industrial and marine structures, as well as managed structural engineering teams. Shane has also conducted field studies and condition assessments evaluating existing structures.

Experience: 30 years; **Education:** BS, Ocean Engineering, Texas A&M University; **Registration:** Professional Engineer, Texas #89499; **Office Location:** Corpus Christi, Texas

Relevant Experience

South Wastewater Treatment Plant Improvements | Brownsville Public Utilities Board | Structural Engineer; Mud Bridge Emergency Repairs | City of Corpus Christi | Project Manager; Citywide Traffic Signal Structural Inspection | City of Corpus Christi | Project Manager

Sarah West **PE, CFM**

Hydrology & Hydraulic Design

Sarah is adept at coordinating with multiple stakeholders, from local elected officials to state and federal partners such as TxDOT, FEMA, the Port of Corpus Christi and the U.S. Army Corps of Engineers. She has infrastructure experience for municipalities involving stormwater, drainage and roadways. Her design expertise includes H/H applications, including stormwater infrastructure, drainage, channels and watersheds. Her transportation experience includes street design for arterial, collector and residential roadways, including underground utilities and coordination with various stakeholders.

Experience: 23 years; **Education:** BS, Wildlife and Fisheries Sciences, Texas A&M University; BS, Biological Systems Engineering, Texas A&M University; **Registration:** Professional Engineer, Texas #101328; Certified Floodplain Manager, #1791-09N; **Office Location:** Corpus Christi, Texas

Relevant Experience

Drainage Master Plan | City of Ingleside | Project Manager; Avenue B Drainage | City of Ingleside | Project Manager; Comprehensive Plan, Drainage Master Plan and Impact Fee Program Update | City of Port Aransas | Lead Technical Professional

Blaine Laechelin **PE, CFM**

Stormwater Planning/Modeling

Blaine Laechelin has worked on a variety of stormwater and water resources projects and is familiar with the region's watersheds and drainage criteria. He is experienced in H&H analyses, detention analysis, floodplain modeling and studies, dam stabilization and modernization projects, creek stabilization, water quality design, culvert and bridge analyses, and roadway storm drain design. His design experience involves assessing issues, developing alternatives with cost in an engineering report, developing the PS&E and construction oversight.

Experience: 22 years; **Education:** BS, Civil Engineering, Texas A&M University; **Registration:** Professional Engineer, Texas #103616; Certified Floodplain Manager, #1460-08N; **Office Location:** Corpus Christi, Texas

Relevant Experience

Drainage Master Plan | City of Ingleside | Technical Advisor; San Jacinto River Regional Watershed Study | Harris County Flood Control District | H&H Engineer; Martin Luther King Jr. Boulevard Transit-Oriented Development Stormwater Conveyance Improvements | City of Austin | Technical Advisor

Heather McNeal **PE, PTOE, CFM**

Traffic Engineering Services | Traffic Signal Design

Heather is an accomplished transportation engineer with extensive experience in PS&E development, roadway and trail design, traffic engineering and project management for municipal and TxDOT projects. Her ADA- and AASHTO-compliant solutions improve mobility and enhance safety while meeting stakeholder requirements. Heather has directed more than $40 million in infrastructure projects, led multi-disciplinary teams and delivered complex corridor redesigns, highway safety upgrades and railroad coordination. She efficiently guides projects through TxDOT's local-government design and construction process by combining innovative planning methods, strict adherence to regulations and proactive pursuit of funding opportunities.

Experience: 17 years; **Education:** BS, Civil Engineering, Texas A&M University; MS, Civil Engineering, Texas A&M University; **Registration:** Professional Engineer, Texas #114428; Certified Floodplain Manager, #3759-19N; Professional Traffic Operations Engineer, #4903; **Office Location:** San Antonio, Texas

Relevant Experience

Bitters Road Signal Design and Turn Lane Evaluation | City of San Antonio | Traffic Engineer; 7th Street - Guadalupe Street to IH-35 | City of Austin - Public Works and Parks | Project Manager; Citywide Pedestrian Improvements | City of New Braunfels | Assistant Project Manager

Kelsey Calvez

Environmental Engineering Services

Kelsey Calvez's expertise is focused on federal, state, and municipal water and natural resource permitting across the Texas Coast. The projects she manages involve delineating coastal resources (wetlands, oyster reefs, seagrass beds) and understanding how to navigate and permit projects under 33 CFR 325, Section 404 of the Clean Water Act, and Section 10 of the Rivers and Harbors Act. Her experiences also include technical writing for NEPA compliance projects and ArcGIS mapping and analysis.

Experience: 11 years; **Education:** BS, Environmental Studies, Texas A&M University, MS, Geographic Information Systems, Penn State University; **Office Location:** San Marcos, Texas

Relevant Experience

Chambers Creek Sites 4 and 6 Supplemental Watershed Plans | Texas State Soil and Water Conservation Board | Task Leader; East Wastewater Treatment Plant Siting Study | City of Manvel | Environmental Scientist; Water Line Relocation Environmental Services | Gulf Coast Water Authority | Environmental Scientist

Brian Bresler **PE**

Civil Engineering

Brian is experienced in the design of roadway, rail, surface and underground stormwater drainage, underground and overhead utilities, dams and parking facilities. Brian has also conducted USACE permitting, construction cost estimating, construction phase services, subsurface utility engineering, water planning and public outreach.

Experience: 21 years; **Education:** BS, Civil Engineering, Texas A&M University-Kingsville; BA, Government, The University of Texas at Austin; **Registration:** Professional Engineer, Texas #112706; **Office Location:** Corpus Christi, Texas

Relevant Experience

Everhart Road Improvements | City of Corpus Christi | Design Engineer; Ben Wilson Street Corridor Improvements | City of Victoria | Project Engineer; Wesley Seale Dewatering System and Spillway Gates Rehabilitation | City of Corpus Christi | Senior Advisor

Jesus Suarez, III **CMIT**

Infrastructure Construction Inspection

Jesus's construction management and inspection experience includes the inspection of concrete and reinforcing steel used in foundations, piers, and other structures. Prior to beginning his career as a Construction Manager and Inspector, Jesus was a United States Marine Corps Unit Supervisor where he provided instruction, supervision and evaluation of more than 35 personnel. Jesus is bilingual and is an excellent teacher/trainer who is adept at managing multiple personality types. He is able to make difficult decisions in stressful situations and is successful in learning and comprehending new systems and methods.

Experience: 28 years; **Registration:** Construction Manager-in-Training; **Office Location:** Corpus Christi, Texas

Relevant Experience

Bois d'Arc Lake Program Management, Construction Management and Inspection | North Texas Municipal Water District | Construction Inspector; Rio Lift Station Expansion Construction Management and Inspection | New Braunfels Utilities | Construction Inspector

Juan-Pablo Cantu **PE**

MEP Engineering Services

Juan-Pablo (JP) has decades of experience in the design, construction, and rehabilitation of public water supply systems, WTPs, and buildings throughout Texas, Oklahoma, Georgia, and internationally on the Kabul U.S. Military Base. He has worked directly with the City of Rio Hondo on WTP upgrades, implementing an automatic meter reading system, and water tower and ground storage tank upgrades. As an electrical engineer, JP specializes in water flow and supply systems for municipalities, including using reclamation and RO processes, with expertise in WTPs, water pump stations, reservoirs, and improving electrical and SCADA systems for municipalities, water districts and utility boards.

Experience: 27 years; **Education:** BS, Electrical Engineering, Texas A&M University-Kingsville; **Registration:** Professional Engineer, Texas #90105; **Office Location:** Harlingen, Texas

Relevant Experience

Rio Grande River Pump Station Phase 1 | Public Utilities Board | Electrical Engineer; Brushy Creek East Regional Wastewater Treatment Plant Expansion | City of Round Rock | Electrical Engineer; Bois d'Arc Lake Raw Water Pump Station Phase Two | North Texas Municipal Water District | Electrical Engineer

4. References

FNI does not have direct project experience with the City of Edinburg. However, we have established long-standing relationships with numerous municipalities, utilities and public agencies throughout the Rio Grande Valley and surrounding region.

Client/Contact	Projects
Brownsville Public Utility Board Marie Leal, PE Director of Special Projects/Water & Wastewater Engineering & Planning mleal@brownsville-pub.com 956-983-6275	**Rio Grande River Pump Station Phase 1** FNI is providing design services for a new raw water pump station. Services include structural, architectural, mechanical, electrical and civil site design and the demolition of the existing pump stations 1 and 2. **South Wastewater Treatment Plant Headworks Rehabilitation** FNI is providing services to develop plans and specifications for the structural rehabilitation of the concrete structures at the headworks. **Robindale Wastewater Treatment Plant Headworks Rehabilitation** FNI is providing the rehabilitation design of the existing headworks structure by replacing the existing fine screen with Duperon screens and compactors. **Water and Wastewater Master Plan** FNI is developing a water and wastewater master plan that includes an update to the City's Capital Improvements Plan, necessary for the assessment of impact fees. FNI is also developing hydraulic models of the City's water distribution and wastewater collection systems and evaluating the systems' performance.
City of Seguin Tim Howe Assistant City Manager thowe@seguintexas.gov 830-379-3212	**Water and Wastewater Master Plans** FNI prepared a water and wastewater master plan and developed updated land-use assumptions, water demands and wastewater flow projections. **Wastewater Projects Funding Assistance** FNI is assisting the City with funding and program compliance by applying for and managing a Clean Water State Revolving Fund (CWSRF) loan from the TWDB. **Quality Control and Construction Inspection** FNI is performing QC reviews and construction inspections for three project bid packages of water lines and transmission mains. **Lawson Street Reconstruction** FNI provided design services for the reconstruction and upgrade of Lawson Street and involved coordination with TxDOT, local stakeholders and the Southern Economic Development Council. The upgrade required new water line connections and fire hydrants.

Client/Contact	Projects
Military Highway Water Supply Corp David Garcia W/WW Operations Manager dgmhwsc2@aol.com 956-565-2491	**San Pedro Wastewater Treatment Facility Expansion** FNI is preparing an engineering feasibility report to expand the San Pedro Wastewater Treatment Facility capacity from an annual average daily flow of 0.16 MGD to an average of 0.934 MGD. **Villa Cavazos Lift Station Relocation** FNI is providing design, bid, and construction phase services to relocate the Villa Cavazos Lift Station. Scope includes demolition of the existing lift station, design of the new lift station and connecting the existing gravity sewer and force main lines to the proposed lift station. **Capital Improvements Plan Recovery Fee Study** FNI is performing a study to develop land use assumptions, a Capital Improvements Plan, and capital improvements recovery fee calculations. **Progreso Ground Storage Tank Emergency Replacement** FNI provided design, bid and construction phase services to replace a 240,000-gallon galvanized steel bolted ground storage tank at the Progreso Lakes Booster Pump Station and a 150,000-gallon galvanized steel bolted ground storage tank at the Progreso RO Booster Pump Station.
City of Corpus Christi Ernesto De La Garza ACM and Director of Public Works ErnestoD2@corpuschristitx.gov 361-826-2489	**Citywide Traffic Signal Structural Inspection** FNI is performing a structural assessment of City-owned traffic signals, cataloging measurements, photographs and noted deficiencies. **Everhart Road Reconstruction** FNI designed the full reconstruction of the existing 5-lane Everhart Road from South Padre Island Drive to Holly Road with new pavement, curb and gutter, sidewalk, ADA-compliant curb ramps, concrete bus pads, striping and signage improvements. **Holly Railroad Trestle Grant Assistance** FNI assisted the City with the TXDOT 2023 Transportation Alternative Call for Projects application. FNI developed the exhibits for use in the application and developed an OPCC using TXDOT Bid Items. The City wanted to use the old timber pilings from the Holly Railroad Trestle for the foundation of a new hike and bike trail connecting Corpus Christi to Flour Bluff. **Mud Bridge Emergency Repairs** FNI provided structural inspections, recommendations, and design drawings for short-term repairs by performing site investigations, observing damaged areas, reviewing potential repair methods and identifying the final design solutions.

5. Insurance

To help protect FNI and our clients, we maintain various types of insurance. Some of this coverage includes the following:

- Workers Compensation $1,000,000 each accident
- Employers Liability $1,000,000 each accident / $1,000,000 policy limit /
- $1,000,000 each employee
- Comprehensive General Liability $1,000,000 / $2,000,000 annual aggregate
- Automobile $1,000,000 combined single limit
- Professional Liability (claims made) $5,000,000 / $10,000,000 annual aggregate

As an added layer of protection for us and our clients, we maintain an Umbrella Liability policy with coverage of $10,000,000. This coverage sits excess over the General Liability, Auto and Employers Liability policies and helps to cover us and any of our named additional insured should there be a covered catastrophic loss.

We routinely name clients as additional insured on policies other than Workers Compensation and Professional Liability.

Our Professional Liability insurance is provided by CNA, which has stated that FNI benefits from one of the lowest modifier rates in the industry. Modifier rates are a multiplier that insurers use to rate risk exposure of certain companies. The lower the multiplier, the lower the risk the company is for the insurance underwriters to insure.

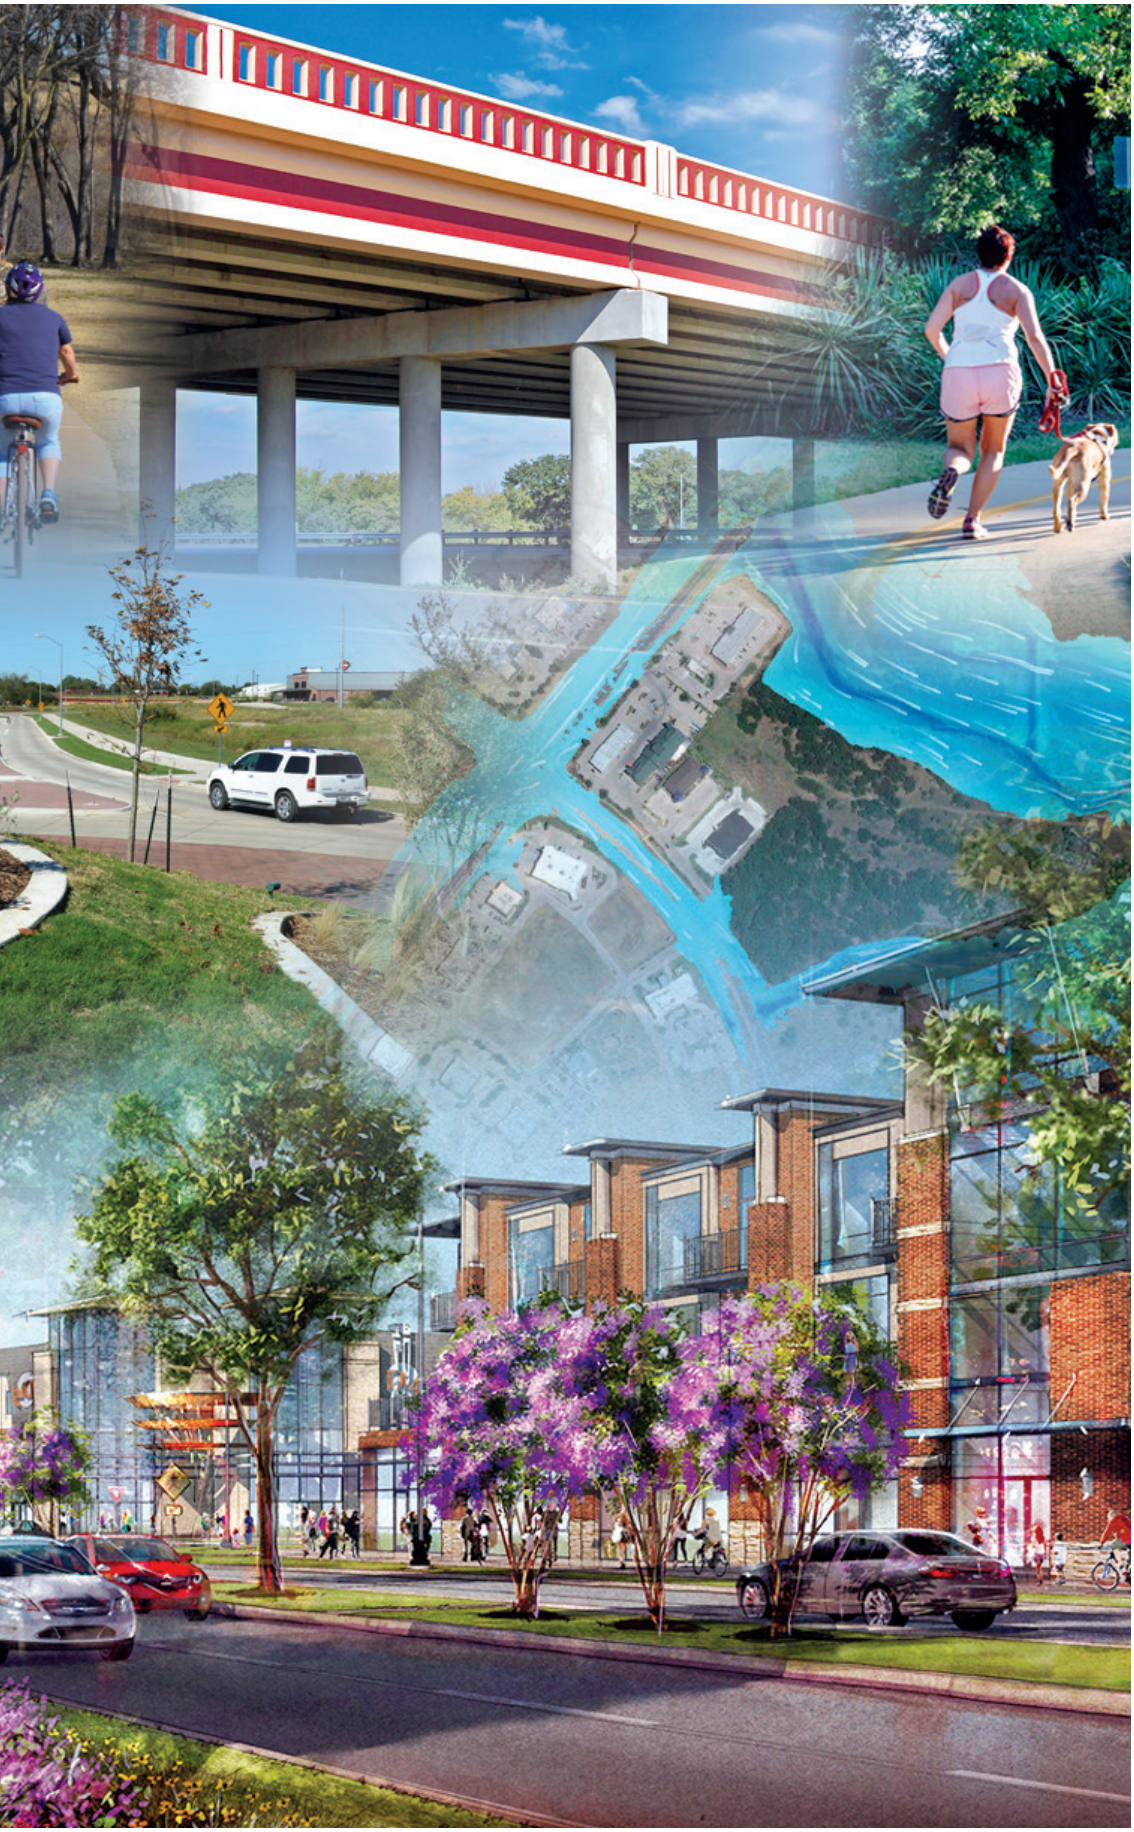
FNI should be able to meet or exceed the insurance requirements for the project. We carry an Umbrella and Excess Professional Liability policy to make up any differences between requirements and coverage requirements and may also be able to access additional coverage for specific projects as needed.

FNI has been involved in the following insurance claims in the last 5 years:

- Plaintiff (contractor) filed a lawsuit against a municipal project owner (client), FNI, and other parties involved in a public wastewater infrastructure project. Plaintiff has asserted various claims seeking recovery of damages, including allegations that it incurred additional costs and was not properly compensated due to project-related issues and conditions. **FNI disputes these allegations and is defending this matter in ongoing litigation.**
- Plaintiff (private citizen, individually and as representative of the decedent's estate) filed a lawsuit against a vehicle driver, FNI, and the construction contractor involved in a public infrastructure project. The claim arises from a single-vehicle accident that occurred within the construction zone. Plaintiff alleges the accident was caused by roadway conditions related to construction activities. **FNI disputes these allegations and is defending this matter in ongoing litigation.**
- Plaintiff (design subconsultant) filed a lawsuit against FNI. Plaintiff was hired to be part of a project team to provide engineering services to a regional water authority (client). Plaintiff's design errors led to multiple change orders that impacted the schedule during construction. FNI has not paid the subconsultant for services related to these errors. Plaintiff alleged breach of contract for non-payment. **FNI disputes these allegations and is defending this matter in ongoing litigation.**
- Plaintiffs (private citizens) filed a bodily injury lawsuit against the state agency project owner (client), design engineer, contractor, subcontractors, FNI, and other parties involved in a public roadway construction project. Plaintiffs were injured in vehicle accidents that occurred within the area of construction. Plaintiffs allege that their accidents and injuries were the result of roadway conditions caused by construction of the project. FNI's role was limited to construction inspection. **FNI disputes these allegations and is defending this matter in ongoing litigation.**
- Plaintiff (water utility operations employee) filed a bodily injury lawsuit against FNI. Plaintiff was injured while attempting to remove a blockage from the discharge area of a lime slurry pump at a water reclamation facility owned by a public water utility (client). Plaintiff alleges that his injuries were the result of actions taken under the direction

and supervision of one of FNI's employees. **FNI disputes these allegations and is defending this matter in ongoing litigation.**

- Plaintiff (contractor) filed a lawsuit against a public water utility (client), design engineer, FNI, and other parties involved in a public infrastructure construction project. Plaintiff alleged that the project owner's team interfered with its means and methods during construction. **FNI resolved this matter through mediation.**
- Plaintiff (private citizen) filed a lawsuit naming 42 defendants, including FNI and his hometown municipality (client). Plaintiff is contesting the municipality's 2024 city council and mayoral elections and seeking to cause a new election to be held. The lawsuit did not allege any causes of action against FNI. **FNI was dismissed from the lawsuit.**
- Plaintiff (contractor) filed a lawsuit against FNI and the municipal project owner (client) of a dam and spillway rehabilitation project. Plaintiff alleged that it was not properly compensated for extra work and delays due to differing site conditions and other issues it encountered during construction. **FNI resolved this matter through mediation.**
- Plaintiff (private client) filed a lawsuit against FNI. Plaintiff alleged errors and omissions in the design of wastewater handling facilities for one of its animal breeding and housing operations. **FNI resolved this matter through mediation.**
- Plaintiff (private citizen) filed a bodily injury lawsuit against the driver of a motor vehicle, FNI, municipal project owner (client), contractor, and other parties involved in a public roadway construction project. Plaintiff was injured when she was hit by a truck while riding a bicycle near the crosswalk of a city street intersection. Plaintiff alleged that her injuries were due to both the negligence of the driver and inadequate design and construction of the crosswalk and intersection. **FNI resolved this matter through mediation.**



6. Professional Services Agreement

FNI has reviewed the Professional Services Agreement and confirms that the firm can meet the prerequisite insurance requirements. If selected, FNI is prepared to negotiate and enter into the Professional Services Agreement in a form mutually acceptable to both parties.

Transmittal Letter

RE: RFQ 2026-7 PROFESSIONAL ENGINEERING SERVICES

Dear Ms. Fuentes, Mr. Hinojosa, and Members of the Edinburg Selection Committee:

GFT Infrastructure, Inc. (GFT) is pleased to submit our qualifications for the City's consideration. While our name has changed, our team has not. Formerly known as DEC - Rio Grande Valley, we are the same local professionals who have delivered infrastructure solutions across the region for more than 30 years. Now part of the larger GFT organization, we continue to provide the local expertise and relationships our clients value, now backed by a deeper bench of technical resources including in-house environmental, surveying, structural, planning, and traffic engineering services. This expanded capacity allows us to better support the City of Edinburg with faster, more innovative responses on complex, multidiscipline projects.

GFT understands that the City of Edinburg is seeking design and engineering services for city-wide civil engineering projects. We bring a long-standing history of delivering infrastructure projects for Hidalgo County, and other local agencies. We understand the City's internal review procedures, design standards, procurement requirements, and coordination processes including public outreach, council approvals, and permitting. Our team is experienced in navigating the practical challenges of urban infrastructure design, especially where coordination between multiple entities like TxDOT and City departments is required. This knowledge allows us to reduce delays, minimize risk, and keep projects moving from concept through construction.

Our proposed Project Manager is Joseph Leal, PE, LGPP, CFM. Mr. Leal has 34 years of experience in the design, review, management, maintenance, and construction of highway, street, and bridge projects involving freeway, urban, and rural systems. Before joining GFT, Joseph served for 30 years at the TxDOT Pharr District in various positions. He is committed to complying with applicable City, state, and federal requirements.

To further strengthen our team, we have partnered with trusted local subconsultants who share our commitment to this community and bring specialized expertise: B2Z Engineering, AG3, and KCI Technologies. Together, we offer a comprehensive team built around responsiveness, technical excellence, and local knowledge. GFT is proud to serve the City of Edinburg with the same dedication and familiarity our clients have trusted for years, now supported by the reach and resources of a national firm. We appreciate the opportunity and thank you for the City's consideration.

No addenda were issued for this RFQ. As Senior Vice President, I am authorized to bind GFT Infrastructure, Inc., which is committed to providing the requested services throughout the contract term.

Sincerely,

Chad Gartner, PE
Senior Vice President

Ingenuity that shapes lives ™

1

Firm Qualifications and Experience

GFT

Firm Qualifications and Experience

GFT Infrastructure, Inc. (GFT) is a nationwide engineering consulting firm, comprised of Gannett Fleming and TranSystems, with a local presence specializing in municipal and transportation engineering and provides single-source solutions in the areas of planning, engineering, environmental, surveying, and construction management services for transportation projects for public- and private sector clients. **We have a strong history with Texas municipalities, counties, TxDOT and UPRR, having completed numerous projects on time and within budget.**

GFT has been conducting business in Texas for 70+ years and currently holds the following firm registration from the Texas Board of Professional Engineers and Land Surveyors (TBPELS F-1800).

Texas Board of Professional
Engineers and Land Surveyors

CERTIFICATE OF REGISTRATION

This acknowledges that

GFT Infrastructure, Inc.

has fulfilled the requirements of the Texas Board of Professional Engineers and Land Surveyors to offer and perform engineering services in the state of Texas.

Registration Number
F-1800

Expiration Date
9/30/2026

For over 130 years, we have provided municipalities with funding support, design, and construction phase services for roadway, drainage, and water and wastewater facilities throughout Texas. We provide comprehensive planning, design, program management, and construction management services for development of public works infrastructure; highways, streets, and bridges; drainage and flood control master and mitigation planning and design; land planning; and site/ civil design. GFT has the capability to perform all aspects of the projects, including but not limited to planning, public meetings, surveying, design, cost estimation, and construction administration.

GFT has been located in South Texas since 1994 (31 years) and in McAllen since 2000 (25 years) and has performed engineering services on over $1.8 billion worth of large infrastructure projects in the McAllen/South Texas region. We have provided program management and design on over 120 miles of roadways; four master drainage plans serving multiple jurisdictions with a population of over 1.0 million people in each jurisdiction; planned and designed over 150 miles of sanitary sewer and water lines in Hidalgo County, Cameron County and Webb County; planned and designed four water treatment plants, totaling 50 MGD; and four wastewater plants, totaling 18 MGD; and designed and managed construction of over 37 miles of levee improvements with a total construction cost of over $220 million, all within the last 28 years.

Office Locations

GFT Infrastructure, Inc. (GFT) has eleven office locations statewide, including McAllen, Houston, San Antonio, Austin, Dallas, Fort Worth, and El Paso. Our firm employs more than 300 professional, technical, and support staff with extensive experience successfully delivering infrastructure projects for municipal, state, and federal clients. Nationwide we have over 5,000 professionals in over 130 offices. **Most work will be performed out of our McAllen Office, where our PM, Joseph Leal, PE, LGPP, CFM is located.**

Statement Regarding the City's Standard Terms and Conditions and Insurance Requirements

GFT has reviewed the City's Professional Services Agreement, will meet the prerequisite insurance requirements, and, if selected, agrees to enter into the agreement. Any requested exceptions will be identified on a point-by-point basis.

Included in this submittal are our sample Certificates of Insurance evidencing the types and amounts of insurance carried by GFT. We are unable to provide a list of specific insurance claims from the past five years. Claims information is considered confidential and may contain proprietary, sensitive, or personally identifiable information that cannot be distributed externally.

Part-time Staffing Needs

GFT understands that project staffing needs vary by assignment. A weekly meeting is held in order to examine current workload among groups and determine staff needs, availability, and resource allocation. Our scalable staffing approach allows us to provide highly qualified professionals on a full-time, part-time, or as-needed basis, ensuring each project receives the appropriate level of expertise while maximizing efficiency and cost-effectiveness.

Performing Engineering Services in a Timely Manner

In order to complete each project task in a timely manner and prevent delays caused by incomplete prerequisite tasks, GFT will regularly monitor project activities and task status. This allows us to focus the resources required toward critical tasks and to identify any task that may not be on schedule, so we may add resources, if necessary, to complete the task.

Within five business days after task-order authorization, Joseph will provide a work plan identifying the scope, deliverables, responsibilities, review periods, milestone dates, required City decisions, and resource assignments. Progress will be reviewed with the City at an agreed frequency, and potential milestone impacts will be identified promptly with a proposed recovery action. GFT proposes to utilize Critical Path Scheduling and Task Status Reporting, as follows:

Critical Path Scheduling

Critical Path Scheduling (CPS), scaled to the size and complexity of each assignment, will be used to schedule and monitor the work. GFT will divide the project into work tasks and assign each task a time duration and resource requirement. These tasks will be logically sequenced based on prerequisite, concurrent, and successor activities. An analysis of the sequenced chart will allow us to determine the "critical path" tasks; thereby, allowing us to focus the resources required toward such tasks.

Task Status Reporting

The Task Status Reporting (TSR) system will monitor and continually update the CPS schedule. Regular updates will be received on the progress of the active tasks from team members responsible for completion of those tasks. The status of each task will be reviewed with the CPS schedule to identify any task that is not progressing in accordance with the schedule and assign additional resources, if necessary, to complete the task. GFT has committed the services of experienced personnel who know and understand the tasks required to competently and efficiently perform the work required to successfully meet and/or exceed the schedule proposed by the City of Edinburg. GFT maintains qualified backup personnel who can supplement the core team when additional capacity or specialized expertise is needed.

Ability to Meet Schedule and Deadlines

GFT has a proven track record of consistently delivering projects on schedule by combining proactive project management, disciplined scheduling practices, and the flexibility to quickly adjust resources as project demands evolve. We recognize that meeting deadlines is critical to maintaining project momentum and minimizing impacts to our clients and stakeholders. Our project manager will continuously monitor progress against established milestones, identify potential risks early, and implement corrective actions before schedule impacts occur.

Open-end contracts require the ability to manage multiple task orders simultaneously while responding to changing priorities and varying levels of effort. GFT has the management protocols, communication processes, and resource depth necessary to successfully deliver concurrent assignments without compromising quality or schedule. Our team is large enough to rapidly scale staffing and provide specialized expertise when workloads increase, yet agile enough to ensure every project benefits from experienced project leadership and responsive decision-making.

Over the past two years, GFT has successfully delivered major transportation and infrastructure projects throughout Texas, including State Loop 1604, FM 1423, FM 1015, and the City of McAllen's Blueline Regional Detention Facility, for public-sector clients. These projects were completed using detailed milestone schedules, proactive schedule management, independent quality reviews, and scalable staffing from our McAllen office and statewide network of technical professionals.

Performing Engineering Services for Government Agencies

GFT has surveyed, planned, designed and provided construction management services for over 36 projects in Hidalgo County, Cameron County and Webb County, totaling over $1.8 billion worth of construction within the last 20 years with all the projects either being associated with water resources, highway design, or solid waste design. For more than 23 years, GFT has played a significant role along the Texas/Mexico border and throughout the Rio Grande Valley. In recent years, GFT led several major projects in the region, which included various drainage laterals for HCDD No. 1 totaling over 10 miles and Program Management services for the Hidalgo County Regional Mobility Authority (HCRMA) as Program Management Consultant (PMC); a 10 MGD expansion of the North Wastewater Treatment Plant; and a 60 MGD Influent Lift Station in McAllen for the City of McAllen Public Utility Board (PUB), along with projects having significant issues related to drainage, flood control, roadway, water, wastewater and solid waste. These include the USIBWC (HCDD No. 1) Levee Improvement Project; Webb County's International Bridge No. 5; the Anzalduas International Bridge connecting McAllen to Reynosa, Mexico; and the widening of US 83 for 63 miles from the Webb County Line to Loma Blanca Road. GFT has been working on water resource and wastewater-related projects and roadway/highway projects in Hidalgo County continuously since 1994 (31 years).

The GFT team is knowledgeable in NACTO, AASHTO, TxMUTCD, TxDOT Design Criteria, TDLR, ADA, and NEPA process. Also, the GFT team has performed engineering and construction-related services for entities that have, or have funded, facilities along the Border with Mexico:

- Texas Water Development Board (TWDB)
- Rural Urban Development (RUD)
- Magic Valley Co-op
- United States Army Corps of Engineers (USACE)
- New Mexico Department of Transportation
- Texas Commission on Environmental Quality (TCEQ)
- Lower Rio Grande Regional Development Council (LRGRDC)
- U.S. Department of Agriculture (USDA)
- U.S. Department of Transportation (USDOT)
- U.S. Fish and Wildlife Service (USFWS)
- USDA Forest Services
- DHS Customs & Border Protection

Our Subconsultants

GFT will be supported by the following subconsultants for any awarded work. We have established strong, long-standing relationships with each of our teaming partners and have successfully collaborated with them on numerous projects, enabling seamless coordination and consistent project delivery.

FIRM NAME	FIRM PROFILE
AG3 Group, LLC (AG3)	AG3 is a small consulting firm boasting 18 years of expertise in civil engineering, surveying, geospatial services (including photogrammetry and LiDAR), project management, general construction management, and inspection services. AG3 provides high-quality civil, construction, and surveying solutions to a wide array of public and private sector clients throughout Texas and Oklahoma. Our team includes registered professional engineers, licensed land surveyors, geospatial and LiDAR managers, FAA-certified UAV (drone) operators, general contractors, onstruction inspectors, survey crews, CADD technicians, and a strong support staff.
B2Z Engineering, LLC (B2Z)	B2Z is a licensed (TBPE #F-11187) engineering firm established in 2009 with offices located in Mission, Brownsville, Seguin, Austin, and Houston. B2Z has extensive experience in a multitude of disciplines, including geotechnical engineering and materials testing, general civil engineering, bridge and structural engineering, transportation planning, drainage, as well as construction management and administration. Our team was constructed with the main goal of providing our clients with the highest level of service and the necessary resources to ensure the successful completion of projects.
KCI Technologies (KCI)	KCI is a professional service firm that supports all aspects of mobility, land development, preservation, and infrastructure. KCI is a 100% employee-owned, sub-chapter S corporation incorporated in the state of Delaware. KCI has a proven track record of providing similar subsurface utility engineering (SUE) and locating services to municipalities to support water and wastewater infrastructure improvements across the state since expanding its utility business into Texas 10 years ago. Our team designates over one million linear feet of utilities and completes more than 7,000 test holes annually.

Relevant Experience (Past 2 Years)

FM 1423 Schematic Design, Donna, TX

Contact

Samantha Lozano, PE
Transportation Engineer
TxDOT Pharr District
600 West US 83 Expressway
Pharr, TX 78577
956-702-6334
samantha.lozano@txdot.gov

Completion Date:

Ongoing

This project involves the reconstruction of FM 1423 (Valverde Road) from a 2-lane rural roadway to a 4- and 6-lane urban roadway. The limits are from SH 107 to BU 83 and is over 8 miles in length. GFT was selected to develop a design schematic, including environmental documents/studies. The GFT team developed three alternatives and is evaluating them to identify a recommended alignment. Concerning drainage design, GFT has coordinated closely with numerous entities including Donna Irrigation District, Hidalgo County Irrigation District No. 1, and the City of Donna. In an effort to improve safety along the project, several deficient horizontal curves have been re-designed. FM 1423 will also include the design of several signalized intersections with ADA access compliant ramps and pedestrian crossings. All pedestrian facilities such as sidewalks, curb ramps, and driveways will be designed in compliance with ADA requirements.

North Texas Tollway Authority (NTTA) Chisholm Trail Parkway Segment #3

Contact

Eli Lerma, PE
NTTA Resident Engineer
North Texas Tollway Authority (NTTA)
5900 W Plano Pkwy, Ste 100
Plano, TX 75093
972-897-7825
ELerma@ntta.org

Completion Date:

May 2028 (Ongoing)

GFT is providing construction management services for the Chisholm Trail Parkway (CTP) Widening Project for the North Texas Tollway Authority (NTTA), segment 3 a corridor expansion adding mainlanes over approximately 6.2 miles from FM 917 to US 67. GFT supports construction operations across multiple work fronts, including earthwork, drainage, bridge structures, and roadway paving. Ongoing work includes subgrade preparation, bridge column and cap construction, ramp reconstruction, and traffic control implementation within active work zones. Responsibilities include coordination with NTTA and the contractor, processing RFIs, reviewing submittals, and providing technical responses to address field conditions. GFT supports construction sequencing, monitors progress, and assists in resolving issues to maintain schedule, quality, and safety.

Northwest Blueline Regional Detention Facility

Contact

Mario Cruz
Civil Engineer
City of McAllen
Public Utility Board
1300 Houston Ave.
McAllen, TX 78501
956-681-1600
mcruz@mcallen.net

Completion Date:

September 2025

GFT updated the previous Northwest Blueline Drainage Ditch technical analysis. Our work included analysis and design of channel improvements to the NW Blueline Ditch and investigation of the proposed Northwest Regional Detention Facility (NW RDF). The NW Blueline channel improvements and the NW RDF are two projects included in the recently approved bond program for drainage improvements for the City of McAllen. In addition to the proposed improvements, we analyzed the extension of Freddy Gonzalez Road across the NW Blueline Ditch. Existing conditions were modeled in HEC-HMS and HEC-RAS. Hydrologic calculations were performed in accordance with the drainage policy within the City of McAllen standard design for public infrastructure.

We developed the hydraulic model using data from multiple sources including survey data, design plans for the ditch obtained from the City of McAllen, and the latest available LiDAR data available downloaded from TNRIS. The hydraulic analysis was performed for the 10-, 50-, and 100-year storm events using unsteady flow analysis in HEC-RAS.

We analyzed several scenarios for proposed conditions, including future Freddy Gonzalez Road and the NW RDF and channel improvements to the NW Blueline Ditch downstream of Oxford Avenue. GFT prepared a technical report with the results of the analysis and PS&E plans.

Fort Bend Westpark Tollway from Bois D'Arc Lane/Charger Way to West of Spring Green

Contact

Lisa Castaneda,
FBCTRA Construction Manager
Fort Bent County
Toll Road Authority (FBCTRA)
1 Flour Daniel Drive,
Sugar Land, TX 77478
832-735-7385
lisacastaneda@fbctra.com

Completion Date:

November 2026 (Ongoing)

GFT is providing construction management services for the Fort Bend Westpark Tollway Extension for the Fort Bend County Toll Road Authority, extending from Bois D'Arc Lane/Charger Way to west of Spring Green/FM 723. GFT's responsibilities include review and processing of contractor pay estimates, schedule analysis, responses to RFIs, shop drawing reviews, and development and negotiation of change orders. The team also supports utility conflict resolution and oversees construction activities to ensure compliance with project requirements. Our team manages construction inspection, materials testing, SW3P compliance, and maintenance of traffic (MOT). GFT also leads project record keeping in Procore, coordinating closely with the owner and contractor to track progress, resolve issues, and maintain schedule. Through Procore, the owner has centralized access to project records, RFIs, submittals, field documentation, pay estimate backup, and project correspondence.

TxDOT FM 1015 Schematic Intersection Control Evaluation Report

Contact

Francisco Chapa, PE
Transportation Engineer
600 West Interstate 2
Pharr, TX 78577
956-702-6344
francisco.chapa@txdot.gov

Completion Date:

September 2025

GFT was the Traffic TL for the schematic of this 4.5 mile corridor. Tasks included traffic projections, traffic analysis, and preparing an Intersection Control Evaluation (ICE report). GFT identified corridor growth rates and coordinated with the Transporation Planning and Programming division for approval of the Methodology memo (Division Led/Option B). GFT used the CAP-X tool to compare conventional and roundabout intersections on the corridor in terms of capacity and prepared a safety analysis using FHWA's Safety Performance for Intersection Control Evaluation (SPICE) tool for the intersection alternatives. We also prepared a preliminary warrant analysis to determine which intersections would warrant traffic signals by the Build and Design years. GFT developed a Stage I ICE Report summarizing the results of the preliminary analysis. Intersections at Mile 12 and SH 107 require 2x2 roundabouts in the Design (+ 20 years) while 2x1 roundabouts operate at Level of Service (LOS) B in the Build year. This would result in a large and potentially confusing roundabout constructed more than 10 years before required by traffic volumes. We worked closely with in-house roundabout experts to develop staged and turbo roundabout concepts to accommodate future traffic volumes without creating an intersection that would be overbuilt or difficult to navigate opening year.

City of Fort Worth Multiple Infrastructure Projects

Contact

Edgar Garcia, Senior Capital Projects Officer
City of Fort Worth Transportation & Public Works Department
3731 SW Loop 820
Fort Worth, TX 76133
817-392-7258
edgar.garcia@fortworthtexas.gov

Completion Date:

September 2025

GFT is providing construction inspection services for the City of Fort Worth Transportation and Public Works Department, Capital Delivery Division. Construction Services. This is a citywide contract supporting multiple infrastructure projects through staff augmentation, where GFT inspectors work directly under City management to support project delivery.

Services include daily inspection of contractor work for compliance with plans and specifications, documentation of field conditions, and coordination with City staff and contractors to address issues encountered during construction. GFT supports maintenance of daily inspection reports, contractor communications, and field documentation, including redline drawings to track changes during construction.

Additional responsibilities include verification of quantities for pay estimates, monitoring construction activities for adherence to contract requirements, and reporting progress and issues to City staff. GFT also supports pre-construction activities such as plan reviews and field verification, and post-construction efforts including punch list development and closeout documentation.

City of Fort Worth Shoreview Drive and Hatch Road Water and Wastewater Extensions

Contact

Walter Norwood, PE,
Sr. Project Manager
Fort Worth Water Department
200 Texas St., Fort Worth, TX 76102
817-392-5026
walter.norwood@fortworthtexas.gov

Completion Date:

February 2025

As Prime consultant, GFT conducted a conceptual design study to determine future extensions to the city's water and sanitary systems to serve the Hatch Road and Williams Spring Road area near Lake Worth, estimated at more than 2,800 LF of 8-inch water line and more than 3,900 LF of 8- to 18-inch sanitary sewer, in addition to design and construction phase services. We are providing design and construction phase services for a 1,900 LF of 10-inch water line extension from Shoreview Drive to Heron Drive.

The Shoreview site traverses a rugged, rocky and underdeveloped city property site with grades more than 30%, requiring a combination of by-open and by-other-than-open-cut pipe installation methods. The scope for this site also required environmental studies to help select alignments for the water line extension that minimize adverse impacts to the site's thick tree canopy and natural wetlands.

SH 130 Program Management

SH 130 Concession Company, LLC
10800 N US 183 Hwy
Buda, Texas 78610
512-371-4807
jkerby@sh130cc.com

Completion Date:

Ongoing

GFT is providing overall Program Management Services in addition to bridge inspection, bridge assessment and evaluation, PS&E design and CEI services for SH130 Concession Company in Austin and San Antonio Districts. SH 130 Concession Company has a Comprehensive Development Agreement (CDA) with TxDOT to design, build, finance, operate, and maintain a 41-mile extension of SH 130 (Segments 5 and 6) under a 50-year concession from the date of opening. The extension follows the current US 183 alignment from north of Mustang Ridge to north of Lockhart and extends southwest to I-10 northeast of Seguin. These newer segments were opened to traffic in 2012 with an open-tolling system. GFT was engaged by SH 130 in 2019 to provide engineering services on the project including bridge assessments, geotechnical investigations, structural design, development of plans and specification, cost estimating, peer review, and construction engineering and inspection (CEI). The SH 130 segments that GFT is currently involved with have the highest legal speed limits in the country at 85 mph. This stretch of highway includes 99 structures with either two or three main lanes of travel in both northbound and southbound directions and two-lane frontage roads. The alignment and median width was designed to accommodate future transportation needs such as general multi-purpose lanes and high-occupancy vehicle (HOV) facilities.

Approach to Undertake the Projects

We fully understand the various project components and the quality of plans and specifications that are required for the development of a successful City project. We are very familiar with the "2021 City of Edinburg Standards Manual" document, design criteria and the standards provided, therein, for drainage, streets and roadways, water and sewer, construction plans submittal, and stormwater policies.

The team, as proposed herein, recognizes and agrees with the plan growth of the City described in the "Edinburg 2040 and Beyond Comprehensive Plan." Our approach will support the safety objectives of the Actions for Transportation within Edinburg's 2040 and Beyond Plan. With more than 31 years continuous service in South Texas, we understand the value of project development process specific to the City of Edinburg, its history, projected strategic infrastructure growth, efficiency of the system mobility, and the optimization of cultural and environmental resources. We have a highly qualified staff to meet the needs of projects of varying scope through design and construction.

Multiple relevant projects have been developed by our team in the vicinity of the proposed projects and throughout the Rio Grande Valley. We continuously coordinate and communicate with various City departments and County, State and Federal agencies, such as Hidalgo County Drainage District No. 1 (HCCD No. 1), various Irrigation districts, TxDOT, Hidalgo County Regional Mobility Authority, the USIBWC, U.S. Army Corps of Engineers (USACE), Environmental Resources agencies, Appraisal districts, etc. Typically, a project will consist of: 1. Concept phase - Preliminary Design Report; 2. Preliminary plans; 3. Final design/plans; 4. Bidding and Construction

The specifics will differ for every project, and we will adjust phases to project complexity. The concept phase will identify, to the best extent possible, all known and unknown elements that may need to be investigated to thoroughly understand the scope of the project – in terms of financial impact, construction duration, and other critical metrics. In some cases, alternate designs will be considered, i.e., there may be cost implications of adding a retaining wall versus acquiring additional right of way. The preliminary design/analysis phase is generally used to define the project, either with a report or engineering plans, to allow sufficient data for permitting and review to occur. Once this step is completed, final design/analysis will bring the project to the level necessary for construction.

1. Concept Phase – Preliminary Design Report

Upon project commencement, the first step will be to obtain, evaluate, and summarize all information that is known about the project site and infrastructure. This includes obtaining topographic and boundary surveys as necessary, obtaining plans on record at the City involving potentially affected franchised utilities, and a site visit. Conversations with City staff will be necessary to identify potential issues. This preliminary information is used to produce preliminary drainage calculations, right-of-way issues, etc. that are not available prior to performing project research. All information is summarized along with recommendations and a preliminary opinion of cost in the Preliminary Design Report. This report is submitted for review and analysis by City staff. During this phase it is anticipated that any significant concerns that may not be obvious are identified and solutions proposed.

GFT understands the City of Edinburg is actively pursuing a range of initiatives, including Arts and Downtown Revitalization, Public Safety Strategies, Infrastructure and Mobility, and Economic Development.

To support these efforts, GFT is committed to serving as an extension of the City's staff. Our dedicated professionals will take full ownership of their projects, operating under the City's supervision. This approach offers Edinburg the flexibility to deliver more projects efficiently, while also benefiting from GFT's:

- Specialized subject matter expertise
- Enhanced productivity and project continuity
- Cost-effective, scalable staff augmentation

Our goal is to seamlessly integrate with City teams, providing the support needed to keep projects on track and aligned with Edinburg's strategic priorities.

2. Preliminary Plans

Once City staff has had the opportunity to evaluate the recommendations in the Preliminary Design Report, GFT proceeds with the majority of the design work necessary to construct a project. During this phase, construction plan and profile sheets are produced identifying the locations of pavement, driveway, and sidewalk replacement, storm drain

improvements, water and sewer improvements, etc. This plan set is then submitted to the City for technical review and to any franchise utilities for possible relocations that may need to be completed.

3. Final Design Plans

Once City staff has provided feedback on the preliminary plans, GFT will update the construction plans, add traffic control plans, erosion control plans, SW3P, etc., as required. These plans will be submitted for one final review for compliance with comments provided to-date. Any remaining comments will be addressed and the plans and specifications prepared for bidding.

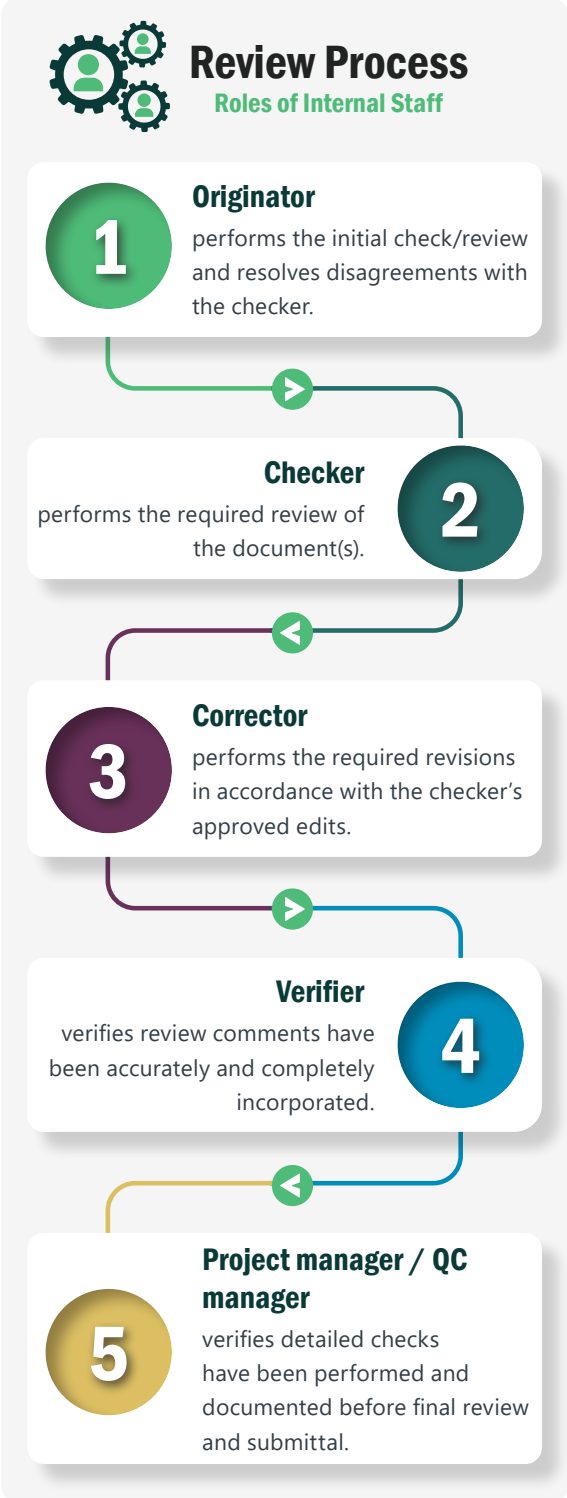
4. Bidding and Construction

GFT will augment and complement the City's staff, as requested, during the bidding and construction phase, and if required, during Contractor negotiation. GFT offers pertinent services that may be required for successful bidding and construction of a project.

Budgetary Constraints

GFT understands that a well-informed initial opinion of cost is essential to make certain that there are no cost escalations or cost overruns during the project. Based on the design drawings, our engineers will update the Opinion of Probable Construction Cost at each design deliverable milestone (i.e., 30%, 60%, 90%, and 100%).

GFT uses several tools to manage the schedule and monitor production on a project within a specified design period. These include company-wide accounting and operational databases to track all projects in progress. Additionally, GFT uses Microsoft Project to monitor the progress of the production effort and further refine the overall project schedule.



Quality Assurance

GFT is committed to providing complete quality assurance and quality control (QA/QC). Our team acknowledges that quality does not solely consist of reviewing a product after completion – rather, quality is built and monitored throughout each phase of a project.

Proactive Prevention

Our team, including subconsultants, will follow a careful, systematic approach to support delivery of a fully coordinated and consistent set of construction documents that are coordinated, complete, and developed with constructibility and maintainability in mind.

We will build QA/QC reviews into our design schedule to allow substantial time for our QA/QC Manager to perform reviews, as well as time allotted to our design team to implement all changes before the deliverable is due.

We begin our QA/QC process at project kickoff with the City of Edinburg and during our first internal kickoff workshop. Policies will be reviewed by both internal and external teams to make sure all project members are clear on their roles and responsibilities, and City leadership approves of all documented procedures. One of the key focus points of our QA/QC plan is Interdisciplinary Reviews (IDRs). The purpose of IDRs is to coordinate design responsibility and design details between and within disciplines, as well as between design packages for adjacent and overlapping products. This procedure applies to all drawings, specifications, and technical reports. The goal of IDR implementation is to coordinate and review the submittal documents for:

- Compatibility
- Interferences
- Conflicts and misalignments between design disciplines and contiguous products (e.g., drawings, specifications, calculations, and design report
- Completeness and omissions
- Sound engineering practices
- Verifying the quality records are collected, identified to the associated submittal, and transmitted to the Quality Assurance Manager

Constructibility and Maintainability

Our QA/QC Manager for this project is Robert Hasenkamp, PE, LGPP. A dedicated QA/QC Manager allows for a fresh set of eyes, performs a thorough deliverable review, and allows task leads to ask more questions by delegating an additional senior engineer (other than the PM) to the project team. Mr. Hasenkamp will review each sheet of the deliverables, marking both correct and incorrect items. The sheet is then given back to the originator, who addresses each comment or documents the technical basis for not incorporating it.

Risk Mitigation

Unforeseen problems can be costly and time consuming for both the design engineer and the City as well as inconvenient for all the City's citizens and businesses affected during construction. GFT is committed to managing and resolving any problems that arise from project start through completion.

During the initial scoping meeting, Joseph will develop a Project Risk Register that will be updated weekly. The register is an interactive document that allows team members to review open issues, provide potential resolutions, and comment on their responses. The register includes a "ball-in-court" column, so it is easy to identify who is responsible for comments and open tasks. The register is not only critical in tracking issues through resolution, but also in identifying champions and due dates for each item. Joseph uses this document to lead the project by keeping key issues front and center, working with the team to develop solutions, and engaging stakeholders to resolve issues and concerns. The register also provides discussion topics for our weekly internal team meetings where the team reviews weekly progress, interrelated project issues, schedule, and potential upcoming challenges. All decisions made during both our internal meetings and meetings with the client are recorded and documented into an organized system to maintain the ease of access to all project information.

Documentation and Traceability

If there is a disagreement between back checker and reviewer, a discussion occurs, the PM is involved, and the final result is noted. Once it has been verified that the corrector did make the corrections indicated, it is noted. Ultimately, the original sheet will have five signatures (originator, checker, back checker, corrector, and verifier) and will have yellow marks on what was originally correct, red notes on what needed correction, green checks to signify the back checker agrees with the comment, a blue circle to indicate that the correction was made, and a green circle to verify that the correction was made.

After this process is completed, the Design Lead sends the information out to all Discipline Leads for an Interdisciplinary Technical Review. This allows other Disciplines an opportunity to make sure there are no conflicts between designs. Comments are placed onto spreadsheets and each comment must be addressed and agreed to before the process moves forward.

All of this, along with any previous comments received from the City of Edinburg, are provided to Mr. Hasenkamp, who makes sure all portions of the QA/QC have been conducted appropriately. Any deficiencies are noted and given back to the Design Lead for correction. No submittals will be provided to the City until the QA/ QC Manager is satisfied that all portions of the process have been adhered to.

Ingenuity that shapes lives ™

EDUCATION:

BS, Civil Engineering, Texas A&M University

REGISTRATIONS:

PE,TX, No. 85053

CFM, No. 0962-06N

LGPP

Mr. Leal has 34 years of experience in the design, review, management, maintenance, and construction of highway, street, and bridge projects involving freeway, urban, and rural systems. During his 30 years at TxDOT, he served in several positions within the Pharr District including as District Design Team Lead Engineer, Professional Engineering Procurement Services Engineer, and District Transportation Alternatives Engineer. Mr. Leal has spent the last year in the private sector as a Project Manager, where he has worked extensively on local government projects in the planning and design phases.

PROJECT EXPERIENCE

Pedestrian and Bicycle Master Planning and Design, TxDOT Pharr District, Edinburg, TX. This $150K planning project included developing a community survey and engaging public stakeholders and developing the list of bicycle and pedestrian needs network goals and objectives. Included documentation of existing conditions, gaps, and barriers along facilities; development of a network map of pedestrian and bicycle facilities with recommendations for improvements with criteria for project priorities; and verification of destinations, barriers, and routes. Also included preparation of facility implementation guidelines calibrated for varying facility location and contexts following design requirements stated in AASHTO, FHWA, TxDOT Roadway Design Manual, Americans with disability guidelines, and proposed accessibility guidelines for pedestrian facilities in the public right of way.

McIntyre Railroad Pedestrian Crossing Improvements, TxDOT, Edinburg, TX. Transportation Engineer for this $525K new pedestrian crossing of Union Pacific/Rio Valley Switching Railroad facility. The new pedestrian/bicyclist crossing is located between 5th and 6th Avenues along McIntyre Street. The crossing construction details include signal light assemblies with automatic gate arms, warning lights, pedestrian exclusion gates, handrails, paving, walkways, fencing, sidewalk and bicycle lanes following design requirements stated in AASHTO, FHWA, TxDOT Roadway Design Manual, Americans with Disability Guidelines, and Proposed Accessibility Guidelines for Pedestrian Facilities in Public Rights-of-Way. The crossing was separated from the original McIntyre Pedestrian Corridor due to the challenging Railroad Agreement project component.

Chad Gartner, PE

PRINCIPAL IN CHARGE

YEARS OF EXPERIENCE:

35

EDUCATION:

BS, Civil Engineering, University of Texas Arlington

REGISTRATIONS:

PE, TX, No. 112864

Chad has 35 years of experience in the design, project management, program management for multimodal transportation projects across Texas, including: Class 1 railroads, intermodal facilities, industry rail build-ins, Quiet Zones, commuter rail, interstate, urban, and rural roadways. His project experience includes all phases of a project; planning, design, and construction. Chad has a proven record of identifying and mitigating risk to a projects budget and schedule before they become a problem. Chad consistently receives high performance ratings from his clients, which reflects his strong leadership, communication skills, responsiveness, and commitment.

PROJECT EXPERIENCE

Traffic Signals, City of Mesquite, TX.

This project involves the design of a new traffic signal at the intersection of Main St. and Florence St. and a modified traffic signal at the intersection of Town East Blvd and Galloway Ave. Plan preparation included coordination with TxDOT and UPRR, traffic signal layout, wiring, quantities, cost estimates, sidewalk ramp improvements, pavement markings and signing.

UPRR Fort Worth Subdivision Grade Crossing Analysis & Quiet Zones, City of Burleson, TX.

Traffic Task Leader responsible for conducting an initial review of 8 existing at-grade crossings to understand their potential for Quiet Zone designation and determine the steps that the City of Burleson would need to undertake to achieve this designation. The Quiet Zone corridor review included the following crossings on the UPRR - Fort Worth Subdivision: McAlister Road; Alsbury Boulevard; Industrial Boulevard; Commerce Street; Renfro Street; Ellison Street; Eldred Street; Farm Crossing south of Hidden Creek Parkway; and CR 714. Chad conducted 24-hour traffic counts at each crossing on a typical weekday and calculated the risk indexes associated with the crossings to understand the baseline conditions and compared it to the National Significant Risk Threshold. Using aerial photography and the City's information, GFT provided a conceptual view of the crossings to understand safety measures needed to implement a Quiet Zone. Considering risk indexes and railroad requirements, a matrix of supplemental safety measures was developed. Responsibilities also included the development of preliminary estimates of costs for construction, right-of-way acquisition, utility relocations, and UPRR crossing/signal modifications. GFT attended meetings with representatives of the FRA and the Union Pacific Railroad to review the crossings and the SSM matrix developed.

Robert Hasenkamp, PE, LGPP

QA/QC MANAGER

YEARS OF EXPERIENCE:

38

EDUCATION:

MS, Civil Engineering, University of Wyoming

BS, Civil Engineering, University of Wyoming

REGISTRATIONS:

PE, TX, No. 124010

LGPP

Mr. Hasenkamp brings 38 years of civil engineering experience working on projects ranging from intersection design to multi-lane interstate highways. Expertise includes QA/QC quality management plan and compliance programs, project management, contract documents, cost estimation, budgeting, special provisions, design plan development, and construction administration. Mr. Hasenkamp has over 25 years of experience performing QA/QC management and design review including plan revisions, alternatives review for Value Engineering (VE) for various projects, and subconsultant review.

PROJECT EXPERIENCE

Five Streets Paving and Drainage Evaluations and Mitigation Design, City of Pasadena, Pasadena, TX.

QA/QC Manager for comprehensive drainage evaluations, pavement assessment, mitigation design, preparation of construction plans, and construction phase services for the rehabilitation/reconstruction of five city streets, which were lowered to serve as storm water detention. Included extensive H&H studies and evaluation, horizontal and vertical alignment design, drainage design, and design of a storm water pump station, and signing and pavement markings. Reconstruction of five streets totaled 7,100 feet (Crescent Drive, Ellaine Avenue, Texas Avenue, West Texas Avenue, and Vince Street). Each street was lowered one to two feet below the existing terrain to gain detention capacity and to minimize the major storm impacts on the surrounding residences. Work included replacing the existing pavement with concrete pavement on crushed concrete base course, replacing or adding sidewalks, ADA ramps, new drainage and outlets, concrete walls with brick form liners, and new driveways.

Mud Gully Channel Conveyance Improvements, Harris County Flood Control District, Houston, TX.

QA/QC Manager. A co-sponsored project between Harris County Flood Control District (HCFCD) and the U.S. Army Corp of Engineers (USACE), and part of the Clear Creek Flood Risk Management Project. Civil design efforts for the preparation of plans, specifications, and estimate for Mud Gully Channel Conveyance Improvements. The project consists of improving the conveyance of a section of Mud Gully by widening the channel bottom to 45 feet and constructing a concrete lined channel. About 4,500 feet of channel will be improved with mainly 3H:1V side slopes except at bridges where the side slopes vary from 1.9H:1V to 2.5H:1V. Concrete slope lining is 6 inches thick, with a 2-foot toewall at the top of the side slopes. The bottom of the channel will have 9-inch-thick concrete. The proposed design will result in a net cut in the floodway of 50,825 cubic yards. Most of the existing storm drainpipes will be replaced within the right of way with new reinforced concrete pipes (RCP) and where required new manholes will be installed. Existing back slope drains will be eliminated since they are not required in concrete-lined channels.

Wu Ying, PE, AICP, ENV SP

PROJECT MANAGER

▶ YEARS OF EXPERIENCE:

11

▶ EDUCATION:

MS, Transportation Engineering, Texas Tech University

MS, Transportation Planning and Management, Texas Southern University

BS, Chemistry, University of Science and Technology of China

▶ REGISTRATIONS:

PE, TX, No. 144072

AICP, No. 31900

ENV SP, No. 53865

Mr. Ying is a senior transportation planner with 11 years experience in managing and leading transportation planning and engineering projects covering traffic impact study, traffic engineering study, origindestination study, travel demand modeling, statewide and regional long-range transportation plans, corridor feasibility study, planning and environmental linkages (PEL) study, mobility and livable center study, multimodal hub study, environmental and schematic design project, IAJR study, and transportation funding application. He has managed and led the development of multiple statewide, regional, citywide, and subregional plans, programs and studies.

PROJECT EXPERIENCE

Midland Priority Corridors, City of Midland, Midland, TX.
Wu served as the DPM for a strategic initiative assisting the City of Midland in implementing three priority corridor projects (Fairgrounds Road, South Outer Loop, and Northeast Outer Loop). He conducted comprehensive reviews of previous plans and studies while coordinating with regional stakeholders, including TxDOT Odessa District, Permian Basin MPO, and Midland and Martin counties. Wu developed an implementation framework with flow diagrams to visualize the project development steps and funding pathways. He managed an internal team to produce planning-level deliverables including typical sections, corridor alignments, and cost estimates, culminating in concise one-pager graphics for city leadership. His work established a clear roadmap for advancing these critical infrastructure projects.

General Planning Consultant Contract, City of Fort Worth, Fort Worth, TX.
This contract with the City of Fort Worth involved providing planning and preliminary engineering support for various transportation and infrastructure initiatives, including master transportation planning – Moving A Million (M1M), rail crossing safety program support, conceptual and preliminary engineering for bicycle/pedestrian safety enhancement projects, rail grade separation studies, roadway extension feasibility studies, grant and funding application management, and support for the 2026 bond program.

Wu served as the Contract Manager, overseeing the delivery of multiple federal and MPO funding applications—including FRA RCE, TxDOT/NCTCOG TAP, and CMAQ grants—as well as grant obligation processes and planning/ preliminary engineering studies. His project portfolio included the Everman Safe Streets initiative, arterial corridor improvements, bicycle/pedestrian safety enhancements, railroad crossing strategy and grade separation studies, quiet zone implementation support, and development of the City's Ten-Year Transportation Investment Program.

Lizardo Ceballos, PE, LGPP

ROADWAY DESIGN

YEARS OF EXPERIENCE:

20

EDUCATION:

BS, Civil Engineering, Texas A&M University-Kingsville

REGISTRATIONS:

PE, TX, No. 115555

LGPP

Mr. Ceballos has over 20 years of experience in the management and design of a wide variety of schematic and PS&E local and State transportation projects. He has served as Project Manager and major task leader in the development of roadways, highways, and bridges as well as traffic engineering operations/design. Mr. Ceballos has completed utility coordination and design, roadway geometrics, retaining wall and bridge layouts, storm drainage design, Storm Water Pollution Prevention Plans (SW3P), traffic control plans, traffic signal plans, signing and pavement marking layouts, and illumination layouts.

PROJECT EXPERIENCE

Northwest Blueline Drainage Ditch – 2018 Bond Program, McAllen, TX.
Project Manager/Engineer of Record. GFT updated the previous Northwest Blueline Drainage Ditch Technical Analysis. The Northwest Blueline Drainage Ditch improvement project begins at its junction with the Hidalgo County Drainage District No. 1, west Main Drain II South of SH 107 near W Sprague St, south along the existing irrigation canal following west across N 29th St, and turning South on the East side of the proposed Northwest Regional Stormwater Detention Facility to Oxford Avenue. Responsibilities include PS&E.

Conn Brown Harbor Roadway Reconstruction and Shared Use Path 2020, City of Aransas Pass, TX.
Project Manager for PS&E of a 2-mile, $5M hike-and-bike and road reconstruction project that consisted of replacing the entire roadway and drainage including illumination and a roundabout intersection at the entrance of the harbor. The project also included a proposed 6" water line to create a loop connection to provide service to properties along Bigelow St.

FM 1423 Schematic Design (TxDOT Pharr District), Donna, TX.
Project Manager. This project involves the reconstruction of FM 1423 (Valverde Road) from a 2-lane rural roadway to a 4- and 6-lane urban roadway. The limits are from SH 107 to BU 83 and encompass over 8 miles in length.

SH 107, McAllen and Edinburg, Hidalgo County, Texas (TxDOT), McAllena nd Edinburg, TX.
Project Engineer for the reconstruction of a 4-lane rural divided highway to a 6-lane suburban highway with raised medians.

Richard (Rick) Ibarra, PE, PTOE

TRAFFIC DESIGN

YEARS OF EXPERIENCE:

28

EDUCATION:

BS, Civil Engineering, Texas A&M University

REGISTRATIONS:

PE, TX, No. 89331

PTOE, No. 1810

Mr. Ibarra brings 28 years of experience in traffic engineering, surface transportation design, and program management, with a proven track record on complex roadway and infrastructure projects. He leads the development of PS&E for Intelligent Transportation Systems (ITS) and has managed both design and project delivery for major freeway and arterial improvements. His expertise spans geometric design (horizontal and vertical alignments), engineering and traffic studies, signing and pavement markings, signalization and illumination, retaining wall and bridge layouts, hydrology and hydraulics, and utility coordination. Mr. Ibarra also provides construction phase services to ensure that designs are implemented accurately, efficiently, and in full compliance with applicable standards.

PROJECT EXPERIENCE

TxDOT San Antonio, Corpus Christi and Laredo, 2016, 2020, & 2023 Traffic Engineering On-Call Services, Bexar County and Others, TX.
Design Task Lead, Project Manager, and Deputy PM for tasks that included corridor and isolated intersection modeling using Synchro, HCS, VISSIM, and CORSIM; upgrading existing detection systems from Loops/VIVDS to Radar; new pedestrian facilities; interchange traffic signal phasing analysis; analysis of lane configurations; traffic signal design and analysis; developing re-timing plans, warrant analysis; traffic signal upgrades; signing and pavement markings, illumination; and corridor/intersection analysis and mitigation improvements. Tasks also included data collection (TMC's, 24-hr counts, and crash data); flashing beacon assemblies, performing speed studies, developing strip maps, and performing trial runs. Safety projects included installing illumination, pedestrian improvements, and roadway improvements (FM 1581 and SL 517), consisting of widening and roadside protection. Provided traffic signal equipment inventory and upgrades at over 37 intersections, FYA signal upgrades at 12 intersections, and ITS design at multiple locations. Mr. Ibarra managed a staff of ten, which included engineers, designers, and technicians as well as six subconsultant firms.

City of Socorro, Traffic Engineering Services: Shared-Use Path, Intersection Improvements, Signal Design, and Sidewalks, Socorro, TX.
GFT executed multiple WAs and prepared design and bid documents for a shared-use path, two intersection improvements (including signalization and pedestrian facilities), and citywide sidewalks. GFT also developed the City's 2018 Major Thoroughfare Plan that included citywide improvement recommendations, as well as evaluating existing intersections for the feasibility of roundabouts. The project involved roadway and bridge widening, upgrading and replacing traffic signals and pedestrian facilities, signal timing, signing and striping, and illumination. The project also involved new sidewalks (ADA-compliant ramps and pedestrian crossings), corridor planning in an urban area, and crash analysis (collision diagrams).

Derek Mueller, PE

TRAFFIC DESIGN

YEARS OF EXPERIENCE:
17

EDUCATION:
BS, Civil Engineering, University of Texas

REGISTRATIONS:
PE, TX, No. 110141

With over 17 years of experience in traffic engineering and transportation planning, Derek Mueller serves as the Bike and Pedestrian Design Task Lead, bringing specialized expertise in the planning and design of pedestrian facilities, bicycle infrastructure, and multimodal improvements. His portfolio includes a wide range of projects such as shared-use paths, hike-and-bike trails, ADA-compliant pedestrian crossings, and corridor enhancements that prioritize safety, accessibility, and connectivity. Derek has also led regional transportation and multimodal studies, corridor assessments, schematic development, traffic modeling, safety studies, and traffic signal timing projects, applying an integrated approach to ensure all modes of transportation are considered.

PROJECT EXPERIENCE

Bradshaw Road Realignment to Connect to Old Lockhart Road and Rinard Creek Bridge Reconstruction, City of Austin, Austin, TX.
Worked on this traffic and feasibility study was conducted to develop improvements to Bradshaw Road. The work included an existing conditions analysis to identify key issues, deficiencies, and safety concerns. Forecast traffic volumes were prepared for the corridor, including a planned realignment of the northern segment to connect to Slaughter Lane. Multiple alternatives were developed to address traffic issues while providing pedestrian and bicycle facilities, which were previously nonexistent. A traffic signal warrant analysis was performed for the intersection at the extension of Bradshaw Road and Old Lockhart Road, and a schematic design was completed incorporating shared-use paths, curb extensions, raised crosswalks, and an RRFB pedestrian crossing. Materials were created and two public meetings facilitated to obtain resident and stakeholder feedback on current issues and proposed improvements. Coordination was also conducted with property owners along Bradshaw Road and with the City's Safe Routes to School program to ensure the improvements benefit the adjacent Wayside Charter School.

TSSM Signal Retiming, City of San Antonio, San Antonio, TX.
Traffic Engineer responsible for retiming more than 200 intersections in San Antonio as part of the conversion to 2070 controllers. Performed analysis to optimize timings and prepared signals timing files for new controllers. Performed field fine tunings after implementations and prepared before and after studies to document improvements to corridor travel times and delays.

Amy Dziuk, PE, CFM

DRAINAGE DESIGN AND H&H

YEARS OF EXPERIENCE:

13

EDUCATION:

BS, Civil Engineering, University of Texas San Antonio

REGISTRATIONS:

PE TX, No. 133701,

CFM, No. 2652-14N

Amy Dziuk brings 10 years of experience in reducing flood risk through management and implementation of a variety of drainage analysis and design projects in Harris and surrounding counties. She has eight years in H&H analysis and design, primarily for drainage and detention and roadway. She has provided services for multiple projects requiring coordination with City governments, HCFCD, and FEMA and significant experience in preparation of drainage impact studies, PS&E, and CLOMRs/LOMRs. Software includes HECRAS (steady, unsteady, & 2D), HEC-HMS, XPSWMM (1D & 2D), WinStorm, ArcMap (w/3D Analyst and Spatial Analyst), MicroStation, and AutoCAD.

PROJECT EXPERIENCE

Ridgeview Drive from Watters Road to Chelsea Boulevard, City of Allen, Allen, TX. Drainage Engineer for design services for this new roadway extension of Ridgeview Drive from the existing 4-lane divided section approximately 1,100 feet east of Watters Road to its intersection with Chelsea Boulevard to the Northeast. The new location roadway included an enclosed storm drain system, water line extension, sanitary sewer extension and a bridge over Cottonwood Creek. The general scope of the project was to provide survey, environmental coordination and engineering design services for approximately 3,300 feet of 4-lane divided roadway. The scope included a drainage report and FEMA floodplain coordination for Cottonwood Creek including LOMR/CLOMR. The Cottonwood Creek Bridge will be approximately 270' long and over 100' wide. The increased width of the cross-section accommodates two lanes plus a future lane to allow for future corridor expansion from rapid population growth. The bridge is bicycle and pedestrian friendly with ADA compliant barrier separated 10' sidewalks along both sides. The structure will have a TxGirder superstructure and cast-in-place concrete substructure and foundations for constructability and to reduce cost. The bridge incorporated City of Allen aesthetic preferences including open pedestrian rails along the outside slab edges.

Moller Road Storm Sewer and Pavement Improvement Phase 1, City of Alvin, Alvin, TX. Project Manager for the reconstruction of 0.5 miles of existing 21-foot-wide asphalt pavement to a curbed concrete pavement section measuring 30 feet from back of curb, including replacing the existing sidewalk on the east side. In addition to installing curb, the overall roadway was lowered by one to two feet to improve the existing local drainage conditions. The drainage improvements included a closed conveyance system comprised of 24-inch reinforced concrete pipe to 12-foot x 4-foot reinforced box culverts. The reinforced box culvert access manhole detail was used as an alternative to junction boxes at lateral connections to the culverts, reducing the project construction cost. Roadside ditches and swales were also reconstructed in select locations.

Yvonne Rivera, PE, PMP, ENV SP

WATER AND WASTEWATER

YEARS OF EXPERIENCE:

18

EDUCATION:

MS, Civil Engineering, University of Houston

BS, Civil Engineering, Texas Tech University

REGISTRATIONS:

PE TX, No. 113240

PMP, No. 3160156

ENV SP

Yvonne Rivera has 18 years of experience in numerous water and wastewater projects including water and wastewater treatment plants, lift stations and force mains, small- and large-diameter water lines, elevated water storage tanks, reuse water systems, rehabilitation and expansion of facilities, and water and wastewater studies. Skilled in team building, budget/contract negotiations, planning, and construction phase services. Experienced with municipal and local government projects, as well as private land development.

PROJECT EXPERIENCE

Jamaica Beach 2.0 MG Elevated Storage Tank and Booster Pump Station, City of Galveston, Galveston, TX.

Design Engineer for this new 2-million-gallon elevated tank on the west end of the island on an existing water treatment plant site. The pump station was designed to be placed on one of the elevated floors within the tank column in order to protect the station from the 100-year storm surge on Galveston Island. The pump station within the tank column was also designed to house chemical storage and injection facilities and equipment, a restroom, office and testing space, and an HVAC system. In addition to the tank and pump station, new stormwater drainage facilities and access roads were designed, connections to the existing water distribution system made, and plans prepared to demolish the existing ground storage tank and pump station. Marked up drawings for the project, designed the splash box and adjacent channel, which minimized the impact of the overflow from the tank on the site, obtained approval from the TCEQ, and reviewed the contractor's submittals. The construction cost for the project was $8.4 million and was funded by the TWDB through stimulus funds from the ARRA of 2009. There was no damage to the water storage tank from Hurricane Harvey.

Tiger Creek Detention Pond and Pump Station, Orange County Drainage District, League City, TX.

Design Engineer for engineering services associated with the design and construction of the Tiger Creek Detention Pond facility flood mitigation and drainage improvement project to increase community resilience to disasters and reduce/eliminate long-term suffering and hardship by lessening the impact of future disasters. The detention pond will be designed to maximize the facility's flood mitigation capabilities during a 100-year rainfall event, with an initial targeted functional capacity of 3,600 acre-feet. The project will include the construction of a detention pond system and installation of water control features and pumps, along with associated appurtenances. The pond system will consist of an east pond, a west pond, and potentially, a south pond, which will absorb storm flows that exceed Tiger Creek's capacity. The East Pond will be connected to the West and South Pond through two siphons across the Tiger Creek and Cole Road ditch, respectively.

Yinfei Sun, PE

STRUCTURAL DESIGN

YEARS OF EXPERIENCE:

14

EDUCATION:

MS, Structural Engineering, Carnegie Mellon University

BS, Structural Engineering, University of Houston

REGISTRATIONS:

PE, TX, No. 130211

Mr. Sun brings 14 years of diversified experience in structural design including transportation projects: top-to-bottom single/multi-span concrete and steel bridge analysis and design for TXDOT and other local agencies. He has performed detailed work to include slab design, haunch calculation, pre-cast concrete beam design (TX-I girder, U-beam, slab beam), steel beam design, abutment design, bent cap design (rectangular, inverted-T, straddle), column design, foundation design (single drilled shaft, multi-drilled shaft shallow foundation), rail transition design, specification preparation and shop drawing review, and bridge inspection. Experience with wall design includes MSE retaining wall, cantilever retaining wall, drilled shaft retaining wall, and sound wall. Underground structure design experience includes pump stations, manholes, concrete culverts, and junction boxes.

PROJECT EXPERIENCE

Grand Parkway (SH 99) Design-Build, Segment F-1, Harris County, TX.
Senior Design Engineer for Segment F-1, which included direct connectors and main lanes at US 290, and extensive drainage studies and design to ensure the surrounding area was not impacted by the improvements. Mr. Sun was responsible for design of all structural components of three U-beam connectors, two main lane bridges crossing US 290, and 10 other grade separation bridges. Overall connector length is more than 6,300 feet.

Houston Ship Channel Bridge Improvement Program, Segment 1 – Sam Houston Tollway East Over SH 225, Harris County, TX.
Senior Design Engineer responsible for preparation and design of all aspects of the structural components for this 3-phase, 4,500-ft I-girder bridge for the $80M Segment 1 project. The 1-mile Segment 1/South Approach includes widening and replacement of 2,700 feet of main lane SHTE roadway and construction of new, parallel 2,500-ft SHT overpass main lane bridges over SH 225 through the interim SHTE/SH 225 interchange. The interim interchange design accommodates the construction of all eight future direct connectors. Bridge design includes visual quality elements such as column designs and aesthetic lighting. Bridge superstructure incorporates pre-stressed concrete Tx54 and Tx70 I-girders.

Loop 20 Extension Project, State Loop 20 South of International Boulevard to US 59, Laredo, TX.
Design Engineer. The Loop 20 Extension project involves construction of main lanes and overpasses along Loop 20 from east of International Boulevard to the US 59/SL 20 Interchange for the extension of the Loop 20 main lanes through five major intersections over 6.4 miles with a total project construction cost of approximately $120 million. GFT worked with the MPO, TxDOT, County and City to program local MPO Funds (CBI Funds) to fund the Project through development of PS&E.

Jackie Benavides, LGPP

REGIONAL, STATE, AND FEDERAL GRANTS

YEARS OF EXPERIENCE:
28

REGISTRATIONS:
LGPP

Jackie offers 28 years of TxDOT experience in construction recordkeeping, auditing, and DBE compliance. She brings experience overseeing multiple projects as a recordkeeper and multiple area offices as an auditor. Jackie provided local government project oversight to the City of San Antonio and Bexar County. As Construction Division Support Lead, Jackie led the implementation of standardized electronic documentation processes to advance statewide digital delivery efforts and integration of SYNCHRO and ProjectWise. She provided statewide training for the Recordkeeper Bootcamp and Construction Change Order Workshop. Jackie ensures project records are complete, compliant, and audit ready.

PROJECT EXPERIENCE

Mission Trails Project,City of San Antonio, San Antonio, TX.
Assigned record keeper on multiple local government projects in the San Antonio area that improved the connectivity between historic missions, surrounding neighborhoods, and the regional trail network. Managed compliance records related to plans, specifications, permits, inspections, change orders, pay applications, and closeout documentation to support regulatory requirements, audits, and long term asset management.

IH 410/IH 10 Interchange, TxDOT, San Antonio, TX.
High-profile, federally funded interchange project with multiple subcontractors and a DBE compliance goal. Jackie assumed full responsibility for recordkeeping during an Area Office merger midway through the project. She stabilized and reconstructed project files without disrupting field operations, cleared pending audits, corrected documentation deficiencies, and restored on-time estimate processing with zero errors. Jackie built strong working relationships with the inspection team, contractor, and subcontractors; coordinated closely with the District Lab and Construction Office on materials documentation; and implemented in-depth weekly audits that streamlined the closeout process, ensuring full compliance and readiness for final acceptance.

IH 10/LP 1604 & Huebner Road TxDOT, San Antonio, TX.
When the prime contractor defaulted and the surety assumed control of the project with a completion contractor, Jackie, serving as District Construction Auditor, provided detailed and accurate line-item status reports reflecting completed work, pending quantities, and remaining balances for the Area Office, surety, and completion contractor. She supported the onboarding and setup of all new subcontracts in SiteManager and verified subcontract distribution to satisfy 70/30 requirements, maintaining full compliance while ensuring continuity of payments and minimizing disruption to project progress.

Lea Jacobson, PE, LGPP

REGIONAL, STATE, AND FEDERAL GRANTS

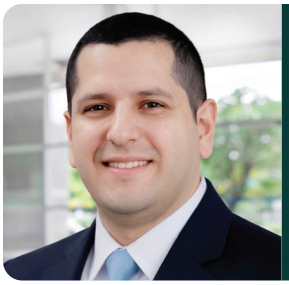
YEARS OF EXPERIENCE:
26

EDUCATION:
BS, MS, Civil Engineering, University of Texas San Antonio

REGISTRATIONS:
PE,TX,No. 97384

LGPP

With 26 years of construction experience, Lea brings construction and inspection expertise on transportation projects. Lea started her TxDOT career as an EIT field inspector, a Project Manager, and later Construction Engineer. Her experience coordinating with local governments, utility companies, contractors, and TxDOT staff gives her a strong understanding of project delivery from award through final acceptance. As Construction Engineer, Lea resolved foundation, phasing, right-of-way, utility, and plan conflicts on roadways, bridges, culverts and structure-heavy corridors. Lea oversaw the OT/OB program for the San Antonio District (73%/66%, respectively). She oversaw bridges to include piling, retaining walls, bridge-class culverts, and complex structural systems on local government projects and state highway systems.



PROJECT EXPERIENCE

Galm Rd - Phase III, Bexar County,San Antonio, TX.
Acted as Construction Engineer for roadway reconstruction and drainage Improvements which expanded a 2-lane roadway into a 5-lane roadway, a center/turn lane, bike lanes, and sidewalks. This project is a joint initiative with Bexar County, San Antonio Water System, and CPS Energy.

Huebner Creek Hike and Bike Trail, City of Leon Valley, Leon Valley, TX.
Acted as Construction Engineer for the Huebner Creek Greenway in Leon Valley, Texas roadway reconstruction and drainage improvements. It is a significant addition to the city's recreational infrastructure. The project includes design work, landscaping, irrigation, drainage analysis, and related real estate services.

Common Street Pedestrian Infrastructure, City of New Braunfels, New Braunfels,TX.
Acted as Construction Engineer on the Common Street Pedestrian Improvement Project in New Braunfels. The project enhances pedestrian amenities along Common Street from Liberty Avenue to Loop 337, including the addition of 5 to 6-foot sidewalks, ADA-compliant curb ramps, crosswalks, and pedestrian hybrid beacons.

Hill Country Sidewalk Project, City of Kerrville, Kerrville, TX.
Construction Engineer on the Hill Country Drive, Wesley Drive and Cully Drive pedestrian improvements project. The project aims to improve the form and function of the city's sidewalks on the aforementioned streets to include ADA-compliant curb ramps and crosswalks.

Ricardo Perez, PE, ENV SP

EROSION AND SEDIMENT CONTROL/UTILITY COORDINATION

YEARS OF EXPERIENCE:

8

EDUCATION:

BS, Civil Engineering, Texas A&M - Kingsville

REGISTRATIONS:

PE, TX, No. 154051

ENV. SP, No. 66002

Mr. Perez has over 8 years managing and delivering schematic design and PS&E transportation projects. Experience spans highway/roadway design, site grading, drainage, traffic control planning, and stormwater pollution prevention (SW3P). Led master drainage studies and the design of streets and storm drainage systems. Proficient in traffic engineering analyses, roadway geometrics, demolition/removal plans, 3D design and visualization, retaining wall and bridge layouts, traffic signal plans, signing and pavement marking plans, and roadway illumination layouts.

PROJECT EXPERIENCE

McAllen Northwest Blueline Regional Detention Facility, McAllen, TX.
Construction Phase Services / Design Engineer. Supported construction after delivery of the PS&E package. Responsibilities included shop drawing review, material and test documentation review, contractor question support, site visits, punch list development, record drawing coordination, warranty documentation, lien waiver tracking, and closeout support. Also supported procurement through bidder questions, prebid meeting, bid opening, bid analysis, and award recommendation. Coordinated with Hidalgo County Irrigation District No. 1, City staff, and stakeholders.

Hidalgo County Drainage District Bond Project No. 4, Pharr, TX.
Design / Construction Support. Developed construction plans and estimate for widening and regrading an existing 15-foot drainage channel into a 30-foot drainage ditch with storm drainage infrastructure relocation. Responsibilities included field condition review, TCP development, cross sections, earthwork quantities, drainage plan development, and construction plan coordination. This experience supports inspection duties related to plan interpretation, drainage construction, utility conflicts, quantities, and field coordination.

FM 1015 Roadway Design Schematic, TxDOT CSJ 1228-03-041, Mercedes, TX.
Roadway Design / Constructability Support. Supported the schematic development for a 4.434-mile TxDOT reconstruction project north of Mercedes, Texas. The project included complete reconstruction of an existing rural roadway, right-of-way acquisition, storm drainage improvements, new drainage cross culverts, driveway reconstruction, intersection improvements, shoulders, a two-way left-turn lane, bicycle lanes, and sidewalks. Ricardo's role included roadway plan development, review of drainage and geometric elements, quantity development, and coordination of design details that are directly applicable to construction inspection, including plan interpretation, constructability review, field quantity verification, TCP/MOT awareness, drainage layout review, driveway and intersection tie-ins, and contractor field coordination.

Nathaniel Olivarez, PE

UTILITY INFRASTRUCTURE

YEARS OF EXPERIENCE:

16

EDUCATION:

BS, Mechanical Engineering, University of Texas Pan American

REGISTRATIONS:

PE, TX, No. 111615

Mr. Olivarez has 16 years of experience in engineering, planning and design of civil infrastructure projects. His experience includes design for paving and drainage as well as water and wastewater utilities for transportation projects and municipal public works projects. Mr. Olivarez' experience includes schematic design for new facilities, grading and drainage design for roadway improvement projects, surveying, engineering cost estimates, preparation of contract documents and specifications, quantity calculations for construction material takeoffs, construction staking and construction inspection, and review of Contractor's submittals..

PROJECT EXPERIENCE (RES_HEADING)

La Sienna Development (750 Acres) Master Plan, Edinburg, TX.
Development of preliminary and final engineering for all drainage ditches, underground storm sewer and proposed utilities for the entire 750-Acre La Sienna Development. This project is located between Monte Cristo Road and Davis Road along US 281. Mr. Olivarez is preparing construction cost estimate for each phase of development throughout the 750 Acres as well designing the necessary utility connections. This master plan development consisted of residential housing as well commercial development of Texas Public Department of Safety building and Resaca Market.

South Texas College Regional Center for Public Safety Pharr Campus, Pharr, TX.
Civil Engineering, site lighting, landscaping, Irrigation & vehicle driving Track for the New Regional Center for Public Safety Excellence which will provide regional law enforcement, and public safety training. Mr. Olivarez was in charge of designing the utilities needed for the new Safety building. The waterline was designed to ensure the new facility had a new service line as well as fire hydrants throughout the corridor while creating a waterline loop with an existing 12" waterline. The Sanitary sewer line was designed to ensure the additional flow from the Regional Center would be contained withing the existing sanitary sewer system where we tied into the neighboring high school. Mr. Olivarez assisted in the development of the construction cost estimates at $281,342 for the utility construction and $2,133,775 for the civil site of the regional center for public safety.

David Gomez, EIT

COST ESTIMATION

YEARS OF EXPERIENCE:

4

EDUCATION:

BS, Civil Engineering, University of Texas Rio Grande Valley

REGISTRATIONS:

TX, Engineer In Training, No. 73115

David Gomez brings four years of experience providing engineering support services. He is experienced with ArcMap/ArcGIS including importing preliminary parcel data to prepare for use in Microstation, importing and preparing preliminary TNRIS LiDAR for preliminary design, and creating maps for display. Computer skills include RISA 3D, ENERCALC, Simpson Strong Tie Anchor Designer, Autodesk Inventor, Autodesk Revit, AutoCAD, Roadway Geometrics, 3D Design and Visualization, Traffic Control Plan Development., OpenRoads, Microstation, ArcMap, and Microsoft Office programs.

PROJECT EXPERIENCE

FM 1423 Reconstruction, TxDOT Pharr District, Donna, TX.

Engineering Support. The FM 1423 proposed project expands the existing FM 1423 2-lane roadway from SH 107 to US Business 83 to increase capacity, increase the level of service, and enhance safety. The project has three roadway sections. The first section from SH 107 to Minnesota Road is a reconstruction of the existing 2-lane roadway to a 4-lane curb-and-gutter roadway with a concrete raised median. This section will also include a 10-foot shared-use path on the east side and a 6-foot sidewalk on the west side. The second section from Minnesota Road to IH-2 is a reconstruction of the existing 2-lane roadway to a 6-lane curb-and-gutter roadway with a concrete raised median. This section will also include a 10-foot shared-use path on the east side and a 6-foot sidewalk on the west side. The third section from IH 2 to US Business 83 is a reconstruction of the existing 48-foot, 2-lane curb-andgutter roadway to a 56 to 84-foot, 4-lane curb-and-gutter roadway with 6-foot bike lanes. This section will also include a 5-foot sidewalk on the east and west sides.

Bond Program for Various Drainage Improvement Projects, City of McAllen, McAllen, TX.

Engineering Support. Update to the previous Northwest Blueline Drainage Ditch technical analysis including analysis and design of channel improvements to the NW Blueline Ditch and investigation of the proposed Northwest Regional Detention Facility (NW RDF). These two projects are included in the recently approved bond program for drainage improvements for the city. In addition to the proposed improvements, GFT analyzed the extension of Freddy Gonzalez Road across NW Blueline Ditch. Existing conditions were modeled in HEC-HMS and HECRAS. Hydrologic calculations were performed in accordance with the drainage policy within City of McAllen standard design for public infrastructure. This included developing the hydraulic model using data from multiple sources. The hydraulic analysis was performed for the 10-, 50-, and 100-year storm events using unsteady HEC-RAS. GFT analyzed several scenarios for proposed conditions.

Hector Siller, PE, PMP, CCM, LGPP

CONSTRUCTION ADMINISTRATION

YEARS OF EXPERIENCE:

15

EDUCATION:

BS, Civil Engineering, University of Texas San Antonio

REGISTRATIONS:

PE, TX, No. 123414

PMP, No. 3310621

CCM, Certified Construction Manager No. 27572

LGPP, No. 99694

Hector E. Siller, PE, PMP, CCM brings over 15 years of experience delivering TxDOT construction projects, with a strong focus on the Rio Grande Valley (Pharr District). He has provided leadership on more than 100 projects valued at over $1 billion, including freeways, urban arterials, roadway widenings, drainage improvements, bridge structures, and ADA-compliant pedestrian infrastructure. As Area Engineer for the Pharr Area Office, he led construction and maintenance operations across Hidalgo County, driving project delivery, directing inspection staff, and coordinating with local agencies. He is experienced in managing complex urban construction with heavy traffic control, utility conflicts, ADA requirements, and high stakeholder visibility, ensuring safe, efficient, and compliant delivery. He has also delivered multiple Local Government projects across Cameron, Hidalgo, Kenedy, Willacy, and Bexar Counties, bringing a strong field and administrative background aligned with TxDOT and City standards while maintaining schedule, budget, compliance, and documentation requirements.

PROJECT EXPERIENCE

IH 2 at Bicentennial Blvd, TxDOT Pharr, McAllen, TX.
Construction Project Manager for IH 2 reconstruction from six to eight lanes, including bridge raises at 10th and 23rd Streets, interchange reversal at Bicentennial Blvd, and overpass reconstruction. Work included sound walls, deep foundations, retaining walls, drainage, and pedestrian improvements with City and business coordination. Challenge: Unmarked City sanitary sewer force main within pavement limits threatened a key milestone. Solution: Utilized the prime contractor to perform the utility work, eliminating delays and maintaining progress without impacting the critical path.

I-69E Overpass and Pedestrian Bridge, TxDOT Pharr, McAllen, TX.
Construction Engineer for frontage road overpasses and a pedestrian bridge over UPRR within an active rail corridor. Work included steel girder erection, traffic control, utility coordination, and maintaining access for adjacent businesses. Challenge: Active rail operations, limited work windows, and strict safety requirements threatened schedule. Solution: Coordinated with the contractor, UPRR, and TxDOT Rail Division to align operations, expedite approvals, and maintain progress without rail-related delays.

SH 48 Improvements, TxDOT Pharr, McAllen, TX.
Project Manager for SH 48 improvements including medians, enhanced pedestrian crossings, ADA sidewalks, drainage, HMA pavement, signing, and pavement markings. Challenge: Change order to replace three 10'x7'x116' Bridge Class Culverts (BCCs) added scope and impacted traffic in a constrained corridor. Solution: Revised TCP to maintain one lane each direction while accelerating culvert construction and maintaining progress.

Edward Prince, RPLS

SURVEY

YEARS OF EXPERIENCE:

27

EDUCATION:

BA, Buisiness Management, University of Texas El Paso

REGISTRATIONS:

RPLS, TX, No. 6465

Mr. Prince brings extensive surveying experience across Texas, with a specialization in managing complex development and infrastructure projects. He is known for his collaborative approach to team leadership and workflow development, combining traditional land surveying with advanced technologies such as lidar, photogrammetry, and GIS to deliver comprehensive geospatial mapping solutions. He plays a key role in mentoring staff, refining quality control processes, and ensuring timely, accurate deliverables for public and private sector clients. Ed formerly served as a Director on the Board of the Texas Society of Professional Surveyors (TSPS) Alamo Chapter and contributed as a member of the TSPS Technology Committee, advocating for innovation and professional excellence in the surveying industry.

AG3 Group, LLC
ENGINEERING • SURVEY • CONSTRUCTION

PROJECT EXPERIENCE

TxDOT Pharr District, Starr County, TX.

Ed served as prime contract Project Manager and Project Principal for ROW staking services for 30 miles of proposed TxDOT ROW acquisition for the new highway facility, State Loop 195 in Rio Grande City, Starr County. Ed was responsible for task management, project coordination, and quality control of final survey deliverables. Survey services performed included survey control verification, ROW verification, installation of boundary monumentation, and installation of t-posts at 50' intervals along the new right-of-way.

Amistad Dam Pavement Rehabilitation – Mobile Lidar Mapping, US International Boundary and Water Commission, Val Verde, TX.

Edward performed as the Lidar Manager for this pavement rehabilitation project in Del Rio. His responsibilities included mobile lidar mission planning, data acquisition, and processing; coordination with USIWBC and US Customs; horizontal and vertical control; terrestrial lidar; and conventional and GPS surveying. Surveying services also included design and utility surveying; Pavement Condition Index with accompanying high-resolution imagery and geo-referenced shape files; and CAD modeling and mapping.

Topographic surveys including Horizontal and Vertical Control in UTM International units and US Survey units. Ed supported coordination with Mexican authorities, customs, and USIBWC, piezometer and bore sampling locative surveys, Aerial LiDAR and High-Resolution Photogrammetry fused with ground-based LiDAR of roadways and facilities, conventional and GPS surveying at borrows and basins, pavement analysis, construction surveying, and QA/QC and DGN mapping/3D modeling deliverables to aid in dam safety evaluation.

Mark McClelland, PE

GEOTECHNICAL ENGINEERING

YEARS OF EXPERIENCE:
43

EDUCATION:
BS, Civil Engineering, University of Texas

REGISTRATIONS:
PE, TX, No. 60710

B2Z ENGINEERING

Mr. McClelland has 43 years of experience (29 years directly with TxDOT) in all aspects of Geotechnical Engineering. Most of his career was spent working in, and ultimately managing, the TxDOT Bridge Division Geotechnical Branch. He oversaw the update of the Geotechnical Manual, wrote all foundation and retaining wall Standard Specifications for the 2004 Spec Book, and oversaw the development of all current foundation and retaining wall design processes currently in use by TxDOT. He developed and oversaw the TxDOT Scour Management Program, and the program to manage structures on unknown foundations.

PROJECT EXPERIENCE

On-Call CMT and Geotechnical, City of McAllen, McAllen, TX.
B2Z was contracted to provide on-call Construction Materials Testing (CMT) and Geotechnical Engineering services to support a variety of public infrastructure projects. Under this contract, B2Z performs field and laboratory testing of soils, concrete, asphalt, and other construction materials, as well as geotechnical investigations to evaluate subsurface conditions. These services ensure compliance with project specifications, enhance construction quality, and support the City's efforts to deliver safe, durable, and cost-effective infrastructure improvements.

With TxDOT:

Slope and Retaining Wall Stability and Settlement
Oversaw evaluations for global stability and settlement of embankments, earth slopes, and retaining walls, and has analyzed 100+ slope and retaining wall projects. He is highly proficient and experienced in the external stability and global stability of slopes and wall systems and has used programs such as GSTABL to provide detailed models and analyses.

Geotechnical Exploration and Testing
Oversaw policies and methodologies for geotechnical exploration within TxDOT and developed 100+ soils exploration plans. This included determination of soil boring number, location and depth, appropriate in-situ and laboratory testing, need for and installation of monitoring wells, inclinometers, and other filed instrumentation, and final analysis and reporting of results.

Construction Support
Acted as primary construction and maintenance support within TxDOT for issues involving bridge foundations, retaining walls, slope and wall instabilities, river migration and scour. Work included immediate resolution of time-sensitive construction problems, evaluation and remediation of ongoing maintenance issues, and training of TxDOT and contractor construction personnel.

Kyle Jones, PE

SUE ENGINEER

YEARS OF EXPERIENCE:
23

EDUCATION:
BS, Civil Engineering, Texas Tech University

REGISTRATIONS:
PE, TX, No. 101126

Mr. Jones has 23 years of experience in utility coordination and verification, SUE, municipal infrastructure design, transportation engineering design, and residential site civil design. This experience includes extensive utility coordination, utility engineering, and management of SUE projects, utility construction management and verification, and design of waterlines, wastewater lines, residential land developments, drainage systems, and transportation projects. He is experienced in producing detailed construction plans and specifications, utility agreements, and providing assistance to clients in the bidding and construction phase of projects. He is also proficient in AutoCAD, Autodesk Civil 3D, and MicroStation..

KCI

PROJECT EXPERIENCE

Veterans Blvd., City of Edinburg, Edinburg, TX.
Project Manager. The Veterans Detention Pond Phase II is part of Edinburg's ongoing flood management and infrastructure improvement program. KCI provided SUE Quality Level A as per ASCE/UESI/CI 38-22, Standard Guideline for Investigating and Documenting Existing Utilities. Locations were determined by City of Edinburg and KCI. KCI provided Utility Adjustment Coordination with individual utility companies, Local Public Agencies, City of Edinburg Program Manager, City of Edinburg Utility Staff, Hidalgo County Drainage District, Design Engineer, and maintenance staff.

Mile 1 East Improvements, City of Mercedes, Mercedes, TX.
Utilities Engineer. This project included the reconstruction of Mile 1 East for the City of Mercedes. This 1.40-mile corridor runs from BUS 83 (south end) to the Mile 8 North (north end) and consisted of urban and rural roadways.

FM 1426, TxDOT Pharr District, Hildago County, TX.
Staff Team. KCI assisted with developing conceptual planning options to upgrade pedestrian mobility and add quality-of-life improvements on South Nebraska Avenue (FM 1426) from BU 83 to IH 2. As part of this preliminary design development, KCI improved ADA compliance of sidewalks on the East and West sides of South Nebraska Avenue, lighting for vehicular and pedestrian safety, parking improvements, and landscape and hardscape improvements. KCI also developed a 4-foot-wide median with type IV curbs to be placed on the center line of South Nebraska Avenue. The survey services included verifying established control and supporting underground utility locations. KCI utilized GPS and conventional survey equipment for verifying and mapping QL-A, -B, and -C SUE.

Cindy Landez, PE

UTILITY COORDINATION

YEARS OF EXPERIENCE:
33

EDUCATION:
BS, Civil Engineering, Texas A&M University

REGISTRATIONS:
PE, TX, No. 90203

KCI

Ms. Landez has 33 years of engineering experience, from small rural roadway projects to the design of urban roadway projects across Texas. She has extensive experience coordinating with utility stakeholders throughout the project lifecycle and has extensive knowledge of TxDOT UAR, CFR, TxDOT ROW policies and procedures, utility agreements and their preparation, contracts, conflict analysis, and corridor planning.

PROJECT EXPERIENCE

Veterans Blvd., City of Edinburg, Edinburg, TX.
Utility Coordinator. The Veterans Detention Pond Phase II is part of Edinburg's ongoing flood management and infrastructure improvement program. KCI provided SUE Quality Level A as per ASCE/UESI/CI 38-22, Standard Guideline for Investigating and Documenting Existing Utilities. Locations were determined by City of Edinburg and KCI. KCI provided Utility Adjustment Coordination with individual utility companies, Local Public Agencies, City of Edinburg Program Manager, City of Edinburg Utility Staff, Hidalgo County Drainage District, Design Engineer, and maintenance staff. Ms. Landez was responsible for coordinating a work plan, developing and maintaining utility strip map/conflict exhibit, conducting easement research and verifying coordination, identifying utility conflict evaluation, developing and maintaining contact list, conducting utility kick off meeting and one-on-one utility coordination meetings.

Mile 1 East Improvements, City of Mercedes, Mercedes, TX.
Utility Coordinator. This project included the reconstruction of Mile 1 East for the City of Mercedes. This 1.40-mile corridor runs from BUS 83 (south end) to Mile 8 North (north end) and consists of urban and rural roadways. Ms. Landez was responsible for creating Utility Layouts, holding utility coordination meetings with individual utility companies, coordination, and communication with utilities. She prepared and maintained a Utility Conflict Matrix for each project and exhibits for utility coordination meetings and maintained contact with the appropriate utility owners. This project required KCI to get signed Temporary Construction Licenses (TCLs) from the property owners where there was temporary work on the property owner's sidewalks and/or driveways.

SH 48, TxDOT Pharr District, Brownsville, TX.
Utility Coordinator. KCI provided a schematic design for the rehabilitation of SH 48 from FM 511 to SH 4. There were four crossings to be analyzed, each included a report and coordination with drainage districts, the county, and the city. Mr. Landez was responsible for creating Utility Layouts, holding utility coordination meetings with individual utility companies, coordination, and communication with utilities. I have prepared and maintained a Utility Conflict Matrix for each project and exhibits for utility coordination meetings.

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

GFT

Ingenuity That Shapes Lives™

Litigation History
CONFIDENTIAL

GFT Infrastructure, Inc., (formerly Gannett Fleming, Inc.) is part of a large consulting engineering organization that has been in continuous operation since 1915 and employs over 5,000 people. It serves as the parent organization to a portfolio of subsidiaries and affiliated entities, including the wholly owned subsidiary, TranSystems Corporation and its respective subsidiaries and affiliates. GFT Infrastructure, Inc. is the primary operating company in the United States and conducts business throughout the U.S. for private and public sector clients at the municipal, state and federal levels. Although GFT Infrastructure Inc.'s involvement in claims and lawsuits is relatively infrequent due to its aggressive quality control efforts, claims and lawsuits involving GFT Infrastructure, Inc. or its affiliated companies do occur. To protect itself against such claims, GFT Infrastructure, Inc. carries automobile, general and professional liability, and workers' compensation insurance.

GFT Infrastructure, Inc. provides the following confidential information regarding project-related litigation filed within the prior ten years. This information includes the project related litigation of GFT Infrastructure, Inc., its subsidiaries and affiliates. There have been no findings of liability against GFT Infrastructure, Inc., and no claim materially affects the viability or stability of the GFT Infrastructure, Inc. organization, or our ability to serve our clients. In the event you require additional information, you may contact Audrey J. Daly, Senior Vice President and General Counsel at 300 Sterling Parkway, Suite 200, Mechanicsburg, PA 17050, email: adaly@gfnet.com.

GFT INFRASTRUCUTRE INC.
TEN (10) YEAR HISTORY - PROJECT RELATED LAWSUITS AND ARBITRATIONS
(Excludes Bodily Injury and Employment Claims)

Caption/Parties	Description of Dispute	Begin/ End Dates	Status or Outcome
Galway Bay Corp. v. Municipal Auth. of the Town of Bloomsburg Columbia Co. PA CCP 2013-cv-59	Claim by contractor for extra costs and delay damages allegedly due to design errors, failure to make payment and delays arising out of completion of instrumentation system.	01/2013 – 07/2016	During settlement negotiations, contractor was not able to provide back up for its claim. Settled without contribution by GF.
Creamer-Sanzari JV v. NJDOT v. GF Inc., et al. Bergen Co. NJ BER-L-967-14	JV entered into an agreement to reconstruct the Summit Avenue bridge, which was not completed on time. NJDOT added GF as an additional defendant.	06/2014 – 07/2016	Case was settled by NJDOT with nominal contribution by GF and construction manager.
Lobar Construction v. Red Lion Municipal Auth., et al. York Co. PA CCP 2014-SU-004050-89	Claim for cost of additional excavation filed by Lobar on behalf of Trinity Excavation for additional costs of excavation of rock in excess of estimate shown on C.S. Davidson drawing.	08/2014 - 10/2016	Matter settled via mediation with contribution by GF subconsultant who included estimate on drawing.
Sacramento v. Granite Construction City of Sacramento	Claims alleging design defects related to an intermodal transit facility	5/2015 – 7/2018	Settled 7/2018

This information is intended only for the individual or entity to which it has been addressed. It contains information from the Legal Department of GFT Infrastructure, Inc. which is proprietary and as such is privileged, confidential and protected from disclosure. If you are not the intended recipient you are hereby notified that any use, dissemination, distribution or copying of this communication is strictly prohibited.

Rainbow Club v. State of Texas Henderson, TX	Damages to trophy fishing lake alleged to be due to construction and design issues at a nearby construction site	8/2016 - 4/2019	Settled 4/2019
Municipal Auth. of the Town of Bloomsburg v. GF, Inc., et al. Columbia Co. PA CCP 2015-CV-1496	Bloomsburg filed a Writ of Summons against GF in December 2015, related to design and construction of the Bloomsburg WWTP.	11/2015 - 03/2019	GF received and responded to all issues in a letter from Bloomsburg, denying any liability. Bloomsburg dismissed the case in March 2019
U. of Ill v. Kiewit, AECOM et al. Chicago, IL	Settlement damage to an adjacent building alleged to be due to design and construction issues	12/2016 – 12/2019	Settled 12/2019
Kentucky v. AJRP et al. Franklin, KY	State resolved claims against contractor for alleged design defects related to a hospital project; seeking contribution from designers	4/2014 – 2/2021	Settled 2/2021
MJF Contracting v. Toms River et al. Toms River, NJ	Contractor cost overrun claims for emergency electrical lighting related to electrical design for a school district	3/2020 – 1/2023	Settled 1/2023
DOLI Construction Corporation v. McConnellsburg Borough Municipal Authority and Gannett Fleming, Inc. Court of Common Pleas Fulton County, PA No. 103-2021C	DOLI filed a complaint against the Borough of McConnellsburg and GF for additional costs associated with construction of a watermain. GF Inc. provided design and construction management services for a watermain replacement project. DOLI made a claim for additional paving costs and was issued a change order to cover those costs. At the end of the project, there was still a dispute over final costs.	06/2021 - 08/2023	GF retained counsel and filed an Answer to the Complaint. Summary Judgment granted in favor of GF; the matter was settled and dismissed.
Bradford Sewer Authority v. GF, Inc.	The action arises from a lawsuit by Bob Cummins Construction ("BCC") against BSA concerning payment for certain work allegedly performed on a wastewater treatment facility project. Gannett Fleming provided engineering design and consulting services. The underlying lawsuit was initially decided in BCC's favor at the trial court level, but it was appealed to the PA Commonwealth Court, which reversed the trial court decision and the jury verdict. The Pennsylvania Supreme Court denied BCC's Petition to Appeal the Commonwealth Court's reversal. The trial court is reviewing to determine any issues that were not disposed of by the appeal.	01/2020 - Pending	Bradford Sanitary Authority ("BSA") filed a Writ of Summons against Gannett Fleming, but has not filed a complaint to date.
Abington Regional Water Authority v. GF Inc. Lackawanna Co. PA CCP 2020-CV-4604	Writ of summons filed relating to design and construction management services for a wastewater treatment plant upgrade, asserting claims of design errors or construction issues.	11/2020 Pending	Complaint was filed in February 2024.
Lake Cooper v. SCDOT et al. Johnny Dobbs Blvd., SC	Allegations regarding silt and contamination in a lake was caused by drainage issues related to road improvements	3/2021 - Present	Pending
Reading Area Water Authority v. GF Inc. and UGI Utilities v. GF Inc. Berks Co. PA CCP 21-2816 and 21-2949	Two separate actions alleging professional negligence claims associated with design of a cofferdam for PennDOT's construction of the Penn Street Bridge in Reading PA.	04/2021 - Q4 2024	Complaints were served late April. Counsel has been retained and an answer to UGI's complaint has been filed. Documents continue to be reviewed and the litigation plan is being developed.

SENATE BILL 19 VERIFICATION

I, Chad Gartner, PE, the undersigned representative of

GFT Infrastructure, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

GFT Infrastructure, Inc.

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A for GFT Infrastructure, Inc.

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No N/A for GFT Infrastructure, Inc.

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No N/A for GFT Infrastructure, Inc.

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

RE: RFQ #2026-7 Request for Qualifications - Professional Engineering Services

Dear Mr. Hinojosa and Members of the Evaluation Committee:

Halff is pleased to submit our qualifications to continue providing professional engineering services to the City of Edinburg on an as-needed basis. We value the strong working relationship we have built with the City and appreciate the opportunity to continue supporting your infrastructure goals. Our team understands the City's expectations and remains committed to delivering practical, high-quality engineering solutions that are completed efficiently and successfully.

- **Local Knowledge and Experience** Halff offers a highly experienced team with the technical expertise and local knowledge necessary to provide the full range of engineering services requested in this Request for Qualifications (RFQ). Through our long-standing work with the City, including our ongoing involvement with the **Sugar Road** project, we have developed a thorough understanding of the City's standards, priorities, and project delivery expectations. **Project Manager Raul Garcia, Jr., PE, CFM, together with 17 out of 57 McAllen Office staff members proudly call the City of Edinburg home, and have vested interest in the community and its infrastructure needs.**
- **A Proven Partner** Halff's multidisciplinary team has successfully delivered projects across every service area identified in this RFQ. Our approach emphasizes collaboration, proactive communication, and quality from project initiation through construction. We consistently deliver projects with **change orders of less than five percent of the construction contract value** by focusing on thorough planning, constructability reviews, cost estimating, quality assurance and quality control, contract administration, scheduling, and construction management. Our local staff has the resources and expertise to support horizontal infrastructure projects, including streets, drainage, and utilities.

Thank you for considering Halff's qualifications. We appreciate the opportunity to continue serving the City of Edinburg and look forward to building on our successful partnership. As Project Manager, **I will serve as your primary point of contact** throughout the selection process and for all matters related to this RFQ. **As officers of Halff, Marcos Diaz and I are authorized to execute professional services agreements on behalf of the firm**. If you have any questions or would like additional information regarding our team or qualifications, please feel free to contact me at any time.

Sincerely,

Raul Garcia, Jr., PE, CFM
Project Manager

Marcos Diaz, PE

Firm Qualifications and Experience

Firm Information

Company Profile

Halff is a full-service infrastructure consulting firm designed, engineered, planned, constructed – and purposed – for people. For 76 years, we've been creating smart solutions that improve lives and communities by turning ideas into reality. The firm provides services throughout the United States from 32 offices in Texas, Arizona, Arkansas, Oklahoma, Louisiana, Florida and Georgia. The firm's staff of over 1,300 includes engineers, planners, scientists, and surveyors. Fifteen of Halff's offices are situated across Texas and we're able to provide any desired service from within the State. Edinburg services will be managed out of our McAllen office which has served the Rio Grande Valley and surrounding communities for over 33 years.

Halff is ranked #100 in *Engineering News-Record* magazine's list of the top 500 design firms in the United States. The firm was founded in Dallas in 1950 by Albert H. Halff, PhD-Eng., PE. Today, Halff remains focused on the future while preserving Dr. Halff's legacy of integrity, dedication to client service and commitment to quality. Halff develops smarter solutions for a variety of market sectors. No matter the size or scope of the project, every one of our solutions is designed with a single purpose: our client's success.

Areas of Specialization

Halff's areas of specialization include the following:

- Construction Services
- Energy
- Environmental
- Flood Infrastructure Design
- Grant Funding
- Geographic Information Systems
- Geospatial
- Intelligent Transportation Systems
- Land Development
- Landscape Architecture
- Local Infrastructure
- MEP Engineering
- Planning
- Resilience
- Right of Way
- Structural Engineering
- SUE/Utility Coordination
- Surveying
- Transportation
- Water Conveyance & Pumps
- Water/Wastewater Treatment
- Watershed Plans & Studies

In addition to the services outlined above, Halff provides comprehensive capabilities in several key disciplines essential to municipal engineering programs. These include **street infrastructure evaluation and improvements,** including condition assessment and rehabilitation strategies, as well as **pavement management and improvements** programs that support lifecycle planning and cost-effective maintenance. Our team also performs **utility infrastructure evaluation and improvements,** including condition assessment, rehabilitation, and replacement of aging systems.

Halff offers **hydrology and hydraulics (H&H) analysis** to support drainage design, flood mitigation, and regulatory compliance, along with e**rosion and sediment control design** to meet local, state, and federal permitting requirements. In the transportation sector, we provide full **traffic engineering services**, including operational analysis, safety evaluations, and **traffic signal design,** providing efficient and safe roadway systems. These integrated services complement our core engineering disciplines and reinforce our ability to deliver comprehensive, multi-disciplinary solutions for infrastructure projects of any scale.

© Halff - 2026

Office Location Where the Work Will be Performed

Halff is uniquely positioned to support the City through a highly responsive, integrated team structure that combines local expertise with the depth of a multi-office firm. Services will be provided by our 57 professionals in our McAllen office, supported by firm resources (as necessary) to provide both immediate responsiveness and access to specialized expertise. Our team's familiarity with local agencies, regulatory requirements, and funding constraints allows us to efficiently navigate project development and delivery. We maintain constant communication with our clients, document all coordination efforts, and provide practical, solution-oriented recommendations, resulting in projects that consistently meet budget, schedule, and performance objectives.

Halff's Unique Qualifications

Halff understands there are many important qualifications to selecting a qualified engineering firm. Halff has assembled a highly-qualified team with a proven history of working together and specialized experience in all aspects of the anticipated project. Our team is committed to the success of the project and will apply our knowledge and experience to:

- Be available and immediately responsive
- Listen to and understand your objectives, goals, and constraints
- Understand the regulatory and permitting requirements associated with the project
- Provide varying options for each design problem to enable the selection of solutions that best fit your needs

These factors will contribute to a successful project that meets your needs, goals, milestones, budget, and schedule.

Halff prides itself in acting as a trusted advisor to our clients and building relationships that make the project process run smoothly, resulting in successful completion that frequently exceeds client expectations and goals.

We have the capacity and capabilities to meet the City's engineering needs. Our team was strategically assembled to deliver the skill set needed across a variety of services, encompassing project approach and construction management plan development as well as the project close-out phase.

Approach for Handling Part-Time Staffing Needs for Smaller Assignments

No matter the scope or size of the project, Halff's management remains consistent as well as the goal to provide our clients exceptional service. For smaller assignments and on-call task orders, Halff employs a flexible and efficient staffing approach that maximizes responsiveness while minimizing administrative burden. Our engineers are cross-trained to manage a wide range of project tasks independently, allowing smaller projects to advance efficiently with high-level oversight from our project manager. This approach enables us to handle multiple concurrent assignments, provide rapid turnaround times, and deliver cost-effective solutions without sacrificing quality. By combining experienced project leadership with adaptable staff resources, **Halff makes sure that both large and small assignments are executed efficiently and in alignment with the City's expectations with oversight from Project Manager Raul Garcia Jr., PE, CFM.**

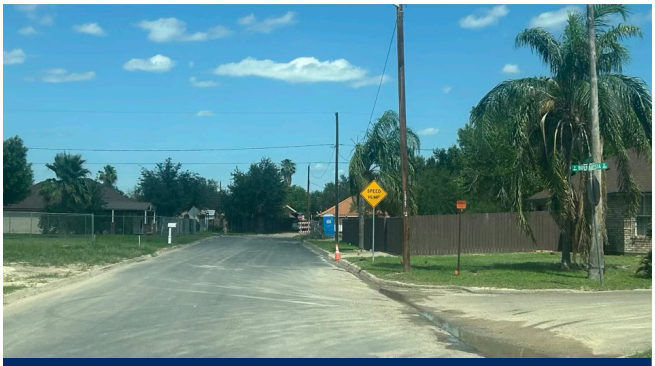
The key to completing a dedicated and accelerated project on time is establishing a realistic schedule. Halff will prepare a detailed schedule early in the project, get "buy-in" from all parties, and keep the City informed throughout the project. Our record of successful project management is one of the key qualifications we offer to the City. We routinely meet project deadlines and stay within our budgets, largely attributable to the quality of the Project Managers and Designers we have on the project team. We stay in constant contact with the City's Project Manager and document all City staff input, making certain that Halff's designs meet the City's needs and expectations. This level of management, transparency, and documentation results in complete, thorough, cost-effective designs that minimize unforeseen circumstances during construction.

© Halff - 2026

Experience within the Past Two (2) Years with Other Governmental Agencies

Halff has a proven track record of delivering engineering services for municipal and governmental clients in a timely and efficient manner. Within the past two (2) years, our team has successfully completed numerous projects for cities and public agencies such as Hidalgo County Drainage District No.1, Hidalgo County Irrigation Districts, McAllen Public Utility, Brownsville Public Utilities, Hidalgo County, Cameron County, and other local municipalities, consistently meeting or exceeding established schedules. Our ability to maintain the work schedule is fundamental to the success of each project, and Halff has built a reputation for meeting the timelines established by project owners.

Our key to successful project execution begins with developing a detailed project schedule early in the process and identifying appropriate staffing levels to support timely delivery. This process is reinforced through continuous coordination with the client and relevant regulatory agencies, as well as partnering sessions at the outset of each project to secure commitments from stakeholders and expedite decision-making and reviews.



Recent projects that demonstrate our ability to deliver similar work for other governmental agencies include:

- **Honduras Road Lift Station, McAllen, TX.** Project included the basin analysis of approximately 250 acres, design of lift station, and related infrastructure such as water, roadways and drainage to support long term development of industrial area.
- **Stewart Road Drainage Improvements, Alton, TX**. The City of Alton's N. Stewart Drainage Improvement Project is a TWDB-funded effort to reduce flooding and improve stormwater infrastructure in northeast Alton. Halff provided surveying, engineering design, H&H analysis, permitting, and construction administration for new storm sewer improvements that significantly reduce flood risk and enhance community resilience.
- **Little Creek Interceptor, Harlingen, TX.** Little Creek Interceptor was designed to be the backbone of Harlingen's wastewater system to support immediate and long-term operational and growth needs.

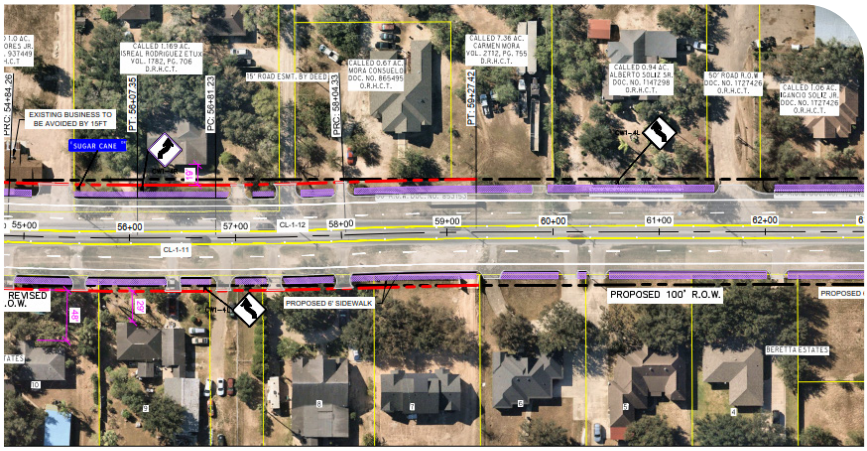
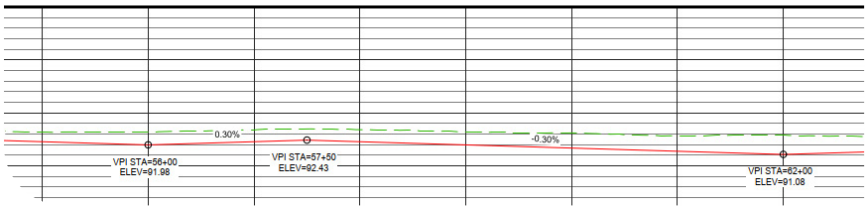
Past Project Experience with the City



Halff has been in Hidalgo County since 1993 and in Texas since 1950. Our experienced team brings many years of combined design experience in their fields and has overseen the construction of many projects in the Rio Grande Valley. We have a long-standing relationship with the City of Edinburg. As a firm, **Halff has completed over 50 projects with the City**. A few of those related projects are highlighted below:



Sugar Road Schematic Alignment, Surveying, and ROW Acquisition Services

City of Edinburg | Edinburg, TX

The Sugar Road schematic alignment project consisted of the layout for the proposed widening of Sugar Road from Chapin Road to Monte Cristo Road. Halff provided surveying services, including locating all surface improvements within the ROW, establishing horizontal and vertical control for design, and supplemental topography inside the ROW. Texas State Plane Coordinate System was utilized for control to allow for easily transferable data to the City. The schematic went through several iterations with City staff to determine the most cost-efficient location for widening. A final schematic layout was provided to the City of Edinburg for future budgeting purposes. Parcel surveys were also prepared for approximately 65 parcels to allow for the acquisition of additional ROW.

Halff is also providing the acquisition services for this project and working with appraisals to acquire the additional ROW. The future widening of Sugar Road will alleviate additional traffic generated from the University of Texas Rio Grande Valley, as this is a major arterial roadway to the campus.

Completed: Ongoing

Scope: Schematic Design, Survey, ROW

Project Team: Raul Garcia, Jr. PE, CFM; Robert Saenz, PE, CFM, PMP, DBIA, LGPP

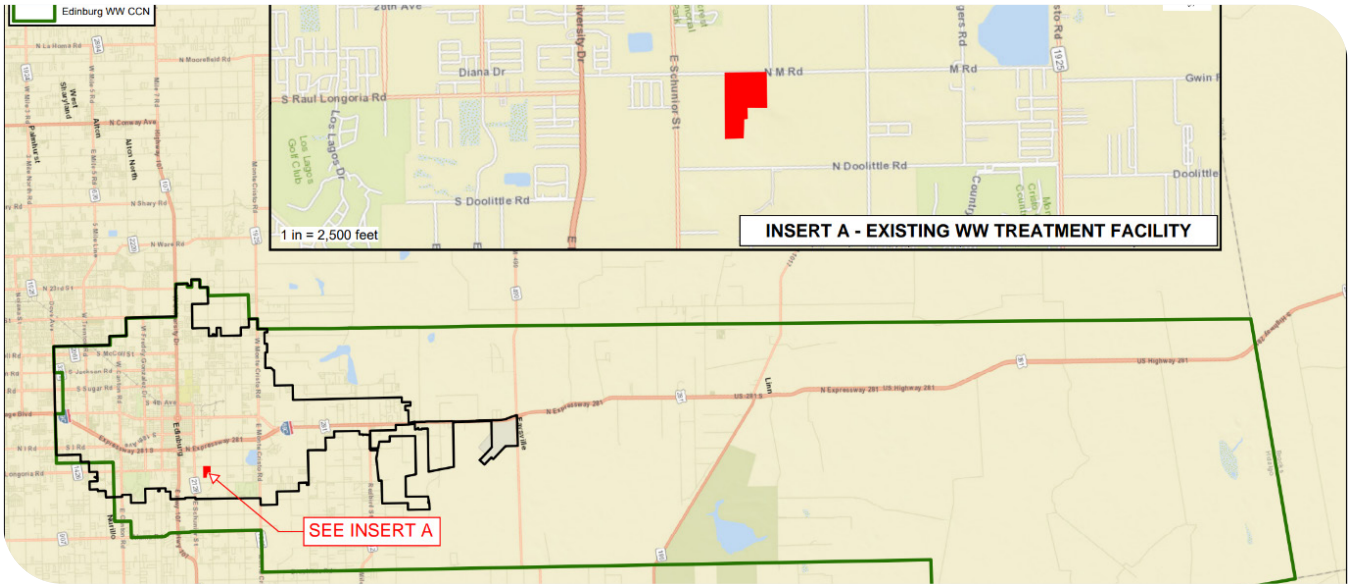
U.S. Highway North 281 Water Distribution System Improvements

City of Edinburg | Edinburg, TX

The project consists of water distribution system improvements along Highway 281, between SH 186 and FM 490. This project was triggered by a TxDOT project along Highway 281 that required the removal of existing water lines that were conflicting with the proposed highway improvements. The distribution system improvements consist of removing existing PVC (approximately 27,000-lf) and AC lines (approximately 9,500-lf), and replacing them with approximately 45,000-lf of 8-inch, and approximately 17,500-lf of PVC lines with all associated valves, fire hydrants, service connections, etc. The project also consists of the design of a new pump station for the City of Edinburg to service the communities in the same vicinity. The pump station consists of a ground storage tank, and a pre-fabricated building designed to house the booster pumps that would feed a proposed elevated storage tank to be designed by others. Halff completed the design in June 2023 and is currently performing construction administration to the completion of the project.

Completed: Ongoing

Scope: Water Line Improvements/ Replacement, TxDOT Coordination



Project Team: Raul Garcia, Jr. PE, CFM; Robert Saenz, PE, CFM, PMP, DBIA, LGPP; Gabriel Benavides, Jr. PE; Russell Limas, PE, Andrew Salinas, PE, SIT

Wastewater Treatment Plant TPDES Discharging Permit Renewal

City of Edinburg | Edinburg, TX

Halff assisted the City of Edinburg Utilities Department with the renewal of the Texas Pollutant Discharge Elimination System (TPDES) discharge permit for the City of Edinburg Wastewater Treatment Plant (WWTP). The project included support for renewing TPDES Permit No. WQ0010503002 for the City of Edinburg WWTP, which was identified by the Texas Commission on Environmental Quality (TCEQ) as Facility RN102080603 and was scheduled to expire on September 25, 2025.

To develop the permit renewal package, the project team reviewed the existing permit requirements and expiration schedule; confirmed the City's customer, regulated entity, facility, outfall, discharge route, collection system, and operator information; prepared the required TCEQ Administrative Report, Technical Reports, Supplemental Permit Information Form, plain language summary, and Core Data updates; compiled process descriptions, treatment unit data, site drawings, process flow diagrams, buffer zone documentation, receiving water information, effluent monitoring data, pollutant and toxicity analyses, biosolids management information, stormwater coverage, reuse authorization, industrial user information, and compliance/enforcement status; obtained required signatures, certifications, fee documentation, and public notice information; assembled and cross-referenced all attachments, maps, laboratory reports, and supporting calculations; submitted the complete package to TCEQ before the renewal deadline; and responded to administrative and technical notices of deficiency.

Completed: Ongoing

Scope: Permitting

Southern Cameron County Waterline Rehabilitation Project, Phase 1

Military Highway Water Supply Corporation | Cameron County, TX

Halff developed construction plans, technical specifications, and bid documents for the Military Highway Water Supply Corporation's (MHWSC) Southern Cameron County Waterline Rehabilitation Project, Phase 1. The project focuses on replacing aging and frequently failing 8-inch and 12-inch waterlines along Military Highway (US 281) in rural Cameron County, generally from Los Ranchitos Road near FM 1577 to Olivia Lane Drive west of FM 1421. The project was funded with grants and loans through the Economically Distressed Areas Program (EDAP) administered by the Texas Water Development Board (TWDB). Halff's design documents supported the replacement and relocation of deteriorated water mains within available right-of-way to improve system reliability, reduce recurring leaks and pressure losses, facilitate future maintenance, and help protect water service for MHWSC customers.

The bid documents included items for waterline demolition, replacement, and appurtenant improvements, including removal and abandonment of existing water mains; installation of new 8-inch and 12-inch PVC C900 water mains; steel casing installations at roadway, utility, and drainage crossings; gate valves, fittings, tapping saddles, and wet connections; relocation and reconnection of existing water meters and service lines; fire hydrant assemblies; trench excavation, bedding, backfill, dewatering, and trench safety systems; pavement restoration; traffic control and utility coordination; erosion and sediment control measures; hydrostatic pressure testing, flushing, disinfection, and bacteriological testing; and compliance with TWDB requirements, including U.S. Iron and Steel provisions and special environmental conditions.

Completed: Ongoing

Scope: Water/Wastewater, Planning, Design, Construction Services, Environmental

Honduras Road Extension

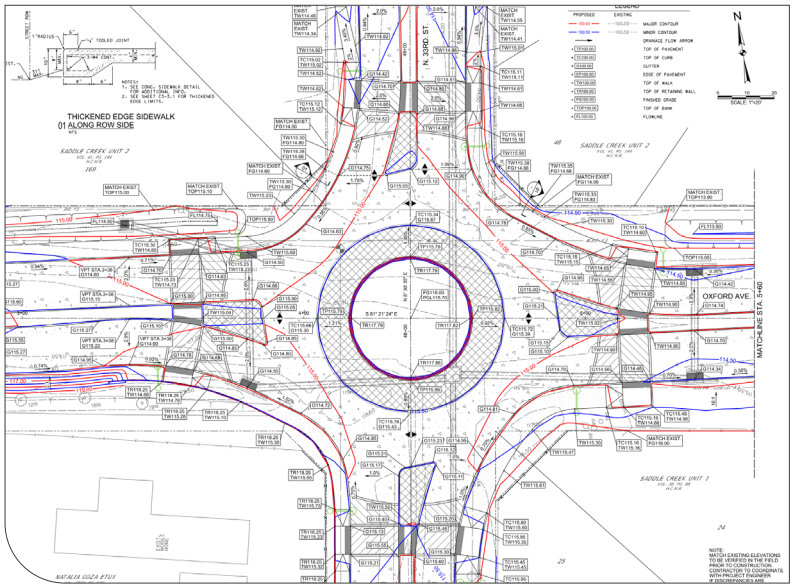
Killam Development, Ltd. | McAllen, TX

Completed: Ongoing

Scope: Civil Engineering and Design, Environmental, SUE, Surveying

Project Team: Andrew Salinas, PE, SIT, Mark Cantu, PE, Raul Garcia, Jr., PE, CFM

Reference
Chris Burns, PE
Project Manager
Killam Development, Ltd.
956.724.7141
cburns@killamco.com



The project involved the subdivision of a 40+ acre property into three industrial lots. Key improvements included extending Honduras Road to connect International Parkway and S. Shary Road (FM 494). Water, wastewater, and storm infrastructure were also installed to adhere to development requirements. Highlighting the wastewater work, a lift station was put in place to provide service to the surrounding 230+ acres of the future Business Park area. The subdivision's 3,363 feet of sanitary gravity sewer fed into the lift station which conveys wastewater through 1,770 feet of 6-inch force main over a height differential of nearly 22 feet, terminating at a dead-end manhole along Honduras Road. This upgrade significantly enhanced the City's sanitary capacity within the region.

The project also required extensive agency coordination and permitting for a utility crossing beneath an active railroad corridor. Halff coordinated with the railroad and permitting agencies to obtain the required approvals so that the crossing was designed and constructed in compliance with railroad standards while maintaining the project schedule. This improvement unlocked significant industrial development potential within the area.

© Halff - 2026

33rd Street Extension

City of McAllen | McAllen, TX

The City of McAllen undertook a significant civil engineering project to improve infrastructure in the Northwest area, near the McAllen Youth Baseball Complex, which includes the installation of a new, one-mile roadway between Auburn Avenue and Oxford Avenue, providing traffic relief in the dense suburban area and an additional access route to surrounding collector roads.

Halff was selected to provide civil engineering and surveying services for the design of roadway paving and underground drainage system improvements for effective water management and road durability. Existing potable and reuse water systems were relocated to accommodate the roadway.

The proposed improvements included a four-lane, urban roadway with 80 feet of right of way. Surveys were conducted to acquire the necessary right of way and included field ties to all surface improvements located inside right of way, establishing horizontal and vertical control for design and construction phases, and supplemental topography inside the right of way, which was required utilizing the City of McAllen's datum and coordinate system.

A roundabout was also built at 33rd Street and Oxford Avenue, improving traffic flow and enhancing the area's aesthetic appeal through landscaping and lighting. These efforts boosted transportation efficiency, water management, and overall urban aesthetics in Northwest McAllen, supporting the city's development and community improvement initiatives.

Completed: Ongoing

Scope: Surveying, Planning, Engineering Design, Bidding and Construction, Permitting

Project Team: Andrew Salinas, PE, SIT; Gabriel Benavides, Jr.,; Guadalupe Nuñez, Jr., RPLS; Raul Garcia, Jr., PE; Marcos Diaz, PE; Robert Saenz, PE, CFM, PMP, DBIA, LGPP

2020 CIP Coffee Port Road Improvements

City of Brownsville | Brownsville, TX

Built in the 1940s as a two-lane rural cross-section, concrete panel roadway, this two-mile section of pavement has taken on numerous asphalt overlays and shoulder widenings and is considered an important East-West neighborhood collector for the residents and businesses of North Brownsville.

The current design parameters include reconstructing the entire roadway bed and developing a roadway section that incorporates curb and gutter with a wider width for three to four travel lanes, including sidewalks and a multi-use path. This approximately $13.5M project includes the necessary enclosed stormwater system. The relocation and upsizing of water distribution and wastewater collection pipelines will also be included as part of this Joint-Bid Contract. All improvements are proposed to remain within the existing 80-foot of ROW. This project was part of the General Engineering Services On-Call contract.

Completed: Ongoing

Scope: Surveying, Engineering Design, Bidding, Construction Phase Services

Project Team:
John Clint, PE; Marcos Diaz, PE

North Stewart Boulevard Drainage Improvements

City of Alton | Alton, TX

The City of Alton's N. Stewart Drainage Improvement Project is a Texas Water Development Board (TWDB)-funded infrastructure initiative designed to reduce flood risk, improve public safety, and enhance long-term stormwater resilience throughout northeast Alton. The project addresses chronic flooding that has historically impacted neighborhoods, roadways, and public infrastructure.

Halff provided comprehensive professional services, including land surveying, civil engineering design, hydrologic and hydraulic (H&H) analysis, environmental permitting, and construction administration. Improvements include approximately 6,600 linear feet of 60-inch reinforced concrete storm sewer extending from the Val Verde Acres Subdivision to the existing detention pond at Josefa Garcia Park, as well as approximately 1,100 linear feet of additional storm sewer ranging from 18 to 42 inches in diameter along N. Stewart Road, Polk Avenue, Madison Avenue, Diamondhead Avenue, and the Palm Lake Estates Subdivision. The project also included installation of multiple sag and grate inlets to increase stormwater collection and conveyance capacity.

The improvements provide critical flood relief to neighborhoods along Stewart Boulevard between Mile 5 and Mile 6 Roads, where floodwaters previously exceeded four feet in depth during relatively frequent storm events. Upon completion, the project is expected to remove 91 structures from the 10-year floodplain and 55 structures from the 100-year floodplain, significantly reducing flood risk, improving roadway access during storm events, and protecting residential properties. The project represents a major investment in the City's infrastructure, enhancing community resilience and quality of life for residents.

Completed: Ongoing

Scope: H&H, Environmental Review, Feasibility, Construction Engineering, Civil Engineering, Surveying, Planning

Project Team: Raul Garcia, Jr. PE, CFM; Benjamin Luna, PE, LGPP; Mario Garcia, PE; Guadalupe Nuñez, Jr., RPLS; Marcos Diaz, PE; Robert Saenz, PE, CFM, PMP, DBIA, LGPP; Andrew Salinas, PE, SIT; Samantha Kaschel, LGPP

On-Call A/E Services

Texas A&M University - Kingsville | Kingsville, TX

Completed: Ongoing

Scope: MEP, Civil Engineering, ICT, Survey, Structural Engineering

Project Team:
Raul Garcia Jr., PE, CFM; Gabriel Benavides, Jr., PE; Trey Murray, III, PE, LEED AP

Reference
Christopher Vera
Facility Director
Texas A&M University - Kingsville
361.593.2645
Christopher.Vera@tamuk.edu

For more than 15 years, Halff has partnered with Texas A&M University-Kingsville to provide comprehensive planning, engineering, and design services for campus infrastructure and facility improvement projects. Throughout this long-standing relationship, Halff has successfully delivered projects that enhance campus infrastructure, improve mobility, address aging facilities, and support the University's continued growth and long-term development goals.

Our multidisciplinary team has provided topographic and boundary surveying, Subsurface Utility Engineering (SUE), civil engineering, drainage analysis and design, utility design, grading, parking lot improvements, demolition plans, and mechanical, electrical, and plumbing (MEP) engineering. Most projects included a combination of Survey, Civil, and MEP design services, allowing the University to rely on a single, coordinated team from planning through design and construction.

DEFERRED MAINTENANCE

This project includes a campus-wide infrastructure upgrade featuring a new chilled water loop serving more than 30 buildings to improve resiliency and energy efficiency. HVAC improvements include replacing air handling units, boilers, and cooling towers, along with integrating BACnet controls for enhanced system performance. The project also incorporates site lighting upgrades to improve campus safety and functionality while supporting long-term sustainability goals.

TURNER BISHOP DEMOLITION

This project involved the demolition of Turner Bishop Hall and redistribution of impacted utilities at Texas A&M University–Kingsville. Halff provided civil engineering services including demolition plans, erosion control recommendations, site regrading, and utility coordination, as well as electrical engineering services to assess existing infrastructure, identify impacts to surrounding facilities, and design power redistribution for affected buildings and site lighting.

DRAINAGE ANALYSIS

This project included a comprehensive drainage analysis for the west side of the Texas A&M–Kingsville campus to address flooding caused by off-site runoff. Improvements included concrete-lined channels, earthen canals, and storm drainage infrastructure that conveyed runoff to the City's drainage system. Overflow weirs and stage-controlled outlet structures were incorporated to regulate discharge rates and improve system performance during major storm events.

REPRESENTATIVE PROJECT EXPERIENCE

City of Edinburg, Sugar Road Schematic Alignment, Surveying, and ROW Acquisition Services, Edinburg, TX.
Project Manager responsible for the oversight of this project which consisted of the layout for the proposed widening of Sugar Road from Chapin Road to Monte Cristo Road. Halff worked with City staff to create several iterations of schematics to determine the most cost-efficient location for widening. Other services provided included ROW acquisition and surveying.

City of Edinburg, U.S. Highway North 281 Water Distribution System Improvements, Edinburg, TX. Served as Team Leader for water distribution system improvements along Highway 281 between SH 186 and FM 490. The project, initiated to accommodate TxDOT highway improvements, included the replacement of approximately 36,500 lf of existing PVC and AC water lines with approximately 62,500 lf of new 8-inch and 12-inch PVC water lines, including valves, fire hydrants, and service connections. The project also included the design of a new booster pump station consisting of a ground storage tank and prefabricated pump building to serve the surrounding communities and supply a future elevated storage tank designed by others.

McAllen Foreign Trade Zone, Warehouse Development, McAllen, TX. Served as Project Manager for the development of a 6.70-acre warehouse site. The planning phase included coordination with the owner, the City of McAllen, Hidalgo County Drainage District, and Hidalgo County to optimize the site layout while addressing stormwater drainage to the adjacent drainage ditch. Services included data acquisition, topographic surveying, and civil design for approximately 13,610 SY of concrete pavement and 4,190 SY of asphalt pavement.

City of Alton, North Stewart Boulevard Drainage Improvements, Alton, TX. Served as Project Manager for a new storm drainage system identified through the City of Alton Master Drainage Plan to address chronic flooding in a previously unserved, low-lying area. The project included full design of new drainage infrastructure with no existing storm system, roadway drainage redesign, and coordination with local agencies and utility providers. Improvements included large-diameter storm sewer design, including up to 60-inch reinforced concrete pipe, funded through the TWDB Flood Infrastructure Fund (FIF) program to support removal of 91 structures from the 10-year floodplain and significantly reduce localized flooding impacts.

Marcos brings experience in managing, planning, designing, and construction of projects for private and public entities involving transportation, land development, H&H analysis, storm drainage design, water/wastewater design, and preparation of construction documents including plans, specifications and engineers estimate (PS&E). He has gained experience implementing locally let projects starting with the PS&E stage and progressing through design and plan development, ROW acquisition, utility relocation, letting, contracting, and construction.

- **City of Alton, North Stewart Boulevard Drainage Improvements, Alton, TX.** Principal in charge responsible for oversight of design of 6,600 feet of 60-inch storm trunk line and various other sizes to relieve flooding at the Palm Lake Estates Subdivision.
- **City of McAllen, El Rancho Road Drainage Improvements, McAllen, TX.** Principal in charge responsible for oversight of H&H model and design to mitigate flooding risk in El Rancho Santa Cruz Subdivision and August Avenue.
- **City of McAllen, Bicentennial Boulevard, McAllen, TX.** Project Manager responsible for leading the 2.75-mile extension to Bicentennial Boulevard from Trenton Road to SH 107 and coordinating with the Client, several City departments, McAllen Public Utility, TxDOT, and Hidalgo County Drainage District during the planning and design phase.

Robert Saenz, PE, CFM, PMP, DBIA, LGPP

ROLE
Civil QA/QC Manager

EXPERIENCE
40 Years

EDUCATION
BS, Civil Engineering, Texas A&M University

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #82072
Certified Floodplain Manager: Texas #0256-00N
Local Government Project Procedures Certified: (LGPP) #044540
Project Management Professional: #3163483
Design Build Institute of America Certified: #D-3958

Robert brings experience in civil engineering, planning, design, project management, and construction management for public and private clients. His extensive work with city, county, state, and federal agencies has given him insight into feasibility analysis, preliminary engineering, and project financing.

- **City of Edinburg, U.S. Highway North 281 Water Distribution System Improvements, Edinburg, TX.** Project Engineer responsible for assisting with the waterline and water distribution system improvements along Highway 281, between SH 186 and FM 490.
- **Port of Corpus Christi Authority, Rincon Road and Cut-Off Road Improvements, Corpus Christi, TX.** QA/QC Manager for the 1.5-mile reconstruction of Rincon Road, overseeing quality control from the Joel Fulton International Trade Corridor to the PCCA maintenance facility.
- **McAllen Public Utility, Bicentennial Extension Water and Wastewater - Irrigation Siphon Improvement, McAllen, TX.** Team Leader responsible for the planning phase of this project, which included providing the horizontal and vertical alignment and drainage design for the road.

Trey Murray, III, PE, LEED AP

ROLE
MEP QA/QC Manager

EXPERIENCE
32 Years

EDUCATION
BS, Mechanical Engineering, University of Texas

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #87004
LEED Accredited Professional

Trey has experience in all aspects of MEP engineering, design, and construction management for commercial, institutional, industrial, and educational facilities. Trey has extensive experience in sustainable design with a focus on energy efficient HVAC and building systems. He has been the Mechanical Engineer of Record for eight LEED certified projects.

- **Hidalgo County, New County Courthouse, Edinburg, TX.** MEP Project Manager and Mechanical Engineer of Record for a new, 420,800-sf Justice Facility for the County. The 7-story facility includes 31 courtrooms, detention areas, clerks' offices, law library, jury selection assembly spaces, cafeteria, and public spaces.
- **Brasfield & Gorrie, San Antonio US Federal Court House, San Antonio, TX.** QA/QC Manager responsible for the quality control of the federal courthouse built as a Design-Build project which includes a 4-story building comprised of courtrooms, offices, detention spaces, and support areas inclusive of an atrium.
- **Pharr LPOE, Refrigerated Inspection Facility, Pharr, TX.** Quality Control Manager for Mechanical systems for a new inspection facility. The facility was split into two primary areas that included a 13,800-sf administrative area for CBP that also housed a USDA testing lab and a 60,800-sf cold inspection facility.

Benjamin Stephens, PE, ENV SP

ROLE
Water/Wastewater QA/QC Manager

EXPERIENCE
23 Years

EDUCATION
MS, Civil Engineering, University of Texas at Arlington;
BS, Civil Engineering, Texas Tech University

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #100231
Envision Sustainability Professional (ENV SP) #82765

Ben has extensive experience leading water, wastewater, utility, and drainage infrastructure projects. Over the past five years, he has contributed to the design of nearly 300 miles of pipeline and provided management or quality review for 45 additional miles.

- **DWU, Southwest 120-inch Water Transmission Pipeline, Irving, TX.** Led preliminary design and managed final design for a 16.9-mile, 120-inch water transmission main in southern Dallas County, including schematic design, surveying, ROW acquisition, environmental and geotechnical investigations, utility coordination, permitting, and final design of a 5-mile segment.
- **City of Irving, SH 183 Pipeline Relocation Project, Irving, TX.** QA/QC Manager responsible for the quality of the upsize and replacement of 1,200 lf of 6-inch water line with new 12-inch water line. The project included 600 lf of Other Than Open Cut construction, 500 lf of which was installed by horizontal directional drilling. Due to the congested relocation corridor, new easements will be acquired to relocate the line outside of TxDOT ROW.

Benjamin Luna, PE, LGPP

ROLE
Street Infrastructure Evaluation and Improvements

EXPERIENCE
9 Years

EDUCATION
BS, Civil Engineering, University of Texas at Austin

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #144803
Local Government Project Procedures (LGPP) #102910.

Benjamin has experience delivering transportation, land development, public works, and utility projects for municipal, state, public, and private clients. His expertise includes PS&E development, construction management and inspection, environmental compliance, and project delivery from planning and design through construction and closeout.

- **City of Edinburg, US Highway North 281, Edinburg, TX.** Lead Design Engineer for all roadway infrastructure and task leader for partnered subconsultants. Led weekly design team and TxDOT coordination meetings with the prime consultant (Entech). Developed all 3D roadway models, cross sections, plans, and profiles for main lanes and ramps. Prepared the complete construction plan set and all documentation required for PS&E submission to TxDOT. The project involved upgrading approximately 4.5 miles of a two-lane undivided highway to divided interstate standards.
- **City of McAllen, Bicentennial Boulevard, McAllen, TX.** Project Manager responsible for the design and delivery of a roadway extension from SH 107 to Trenton Road, including utility infrastructure, storm drainage, and roadway improvements. Coordinated with the City of McAllen, TxDOT, HCDD1, and HCWID No. 3 throughout design and construction.

Mario Garcia, PE

ROLE
Street Infrastructure Evaluation and Improvements

EXPERIENCE
11 Years

EDUCATION
BS, Civil Engineering, University of Texas Pan American

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #137503

As a senior project manager at Halff, Mario has extensive experience in feasibility assessments, site and land development, roadway, water/sewer improvement and public accessibility (ADA) design. He has successfully managed and designed various roadway projects and land and site development projects for clients in Harris, Montgomery, Cameron and Hidalgo counties in Texas and in Maricopa County, Arizona. He is a licensed Civil PE in Texas and New Mexico.

- **City of Alton North Stewart Boulevard, Alton, TX.** Civil Engineer that provided environmental services for the City of Alton's flood drainage improvement project, supporting development of approximately 6,600 feet of storm drainage infrastructure to reduce flood risk and remove 91 structures from the 10-year floodplain.
- **University of Texas Rio Grande Valley, Harlingen Clinical Education Building (HCEBL) Parking Lot, Harlingen, TX.** Civil Engineer for a new one-acre parking lot at UTRGV's Regional Academic Health Center, including site planning, paving, grading, drainage, landscape, irrigation, and LED lighting improvements to enhance access and parking capacity for the Health Education Building.

PhD, Pavement Management, University of Texas at Austin; DD, Pavement Engineering, University of Texas at San Antonio; MS, Road and Transportation Engineering, University of Guilan, Iran; BS, Civil Engineering, University of Mazandaran, Iran

REGISTRATIONS
Professional Engineer: Texas #129156
Local Government Project Procedures (LGPP) #91741

Hossein is a Senior Project Manager specializing in roadway design, asset management, and infrastructure planning. He was named a 2020 Rising Star by Civil + Structural Engineer and a 2022 Top Young Professional by ENR Texas & Louisiana.

- ***City of Copperas Cove, City-Wide Pavement Condition Assessment, Copperas Cove, TX.** Managed pavement assessments and a pavement management plan for a 360-lane-mile, $200 million street network, including data analysis, maintenance planning, and staff training.
- ***City of San Antonio, Street Maintenance Program, San Antonio, TX.** Program Manager for San Antonio's $550 million Street Maintenance Program, leading pavement analysis and project prioritization efforts.
- ***City of San Antonio, Citywide Handrail/Guardrail Condition Assessment, San Antonio, TX.** Project Manager responsible for assessing over 10,000 guardrail, handrail, and guard post assets and developing a maintenance plan that included condition assessments, asset prioritization, cost analysis, and long-term maintenance strategies.

*Prior to Halff

John Clint, PE

ROLE
Pavement Management and Improvements

EXPERIENCE
32 Years

EDUCATION
BS, Civil Engineering, University of Texas at San Antonio

REGISTRATIONS
Professional Engineer: Texas #85417

John has experience in water and wastewater planning and design, storm drainage and roadway design, water distribution system modeling, master plan development, civil site design, and construction management and has extensive experience with local, state, and federal funding and regulatory agencies. John also has two years of experience in geotechnical investigations, construction materials testing engineering, and construction inspection.

- **City of Brownsville, 2019 Street and Drainage Improvements, Brownsville, TX.** Project Manager and Project Engineer responsible for the drainage improvements for the City of Brownsville using General Fund, CDBG or Hurricane Dolly GLO Disaster Grant Funds to construct numerous storm drainage improvements included in the 2006 Flood Protection Study.
- **City of Brownsville, CIP Street Improvements, Brownsville, TX.** Team Leader for this project under the On-Call General Engineering Services contract. The Street CIP Improvements project included the reconstruction of five residential roadways totaling 2.5 miles in West Brownsville.
- **Brownsville Public Utility Board, WWTP Vactor Truck Facility Improvements, Brownsville, TX.** Project Manager responsible for civil site design and construction administration of Vactor Truck Disposal Facility expansion.

Andrew Salinas, PE, SIT

ROLE
Pavement Management and Improvements

EXPERIENCE
15 Years

EDUCATION
MS, Geospatial Survey Engineering, Texas A&M University; BS, Civil Engineering, University of Texas at San Antonio

REGISTRATIONS
Professional Engineer: Texas #128943
Real Estate Sales Associate: Texas #616101
Surveyor in Training (SIT) #110151

Andrew is a Civil Engineer and Project Manager in Halff's McAllen office with experience delivering municipal and county land development projects. His expertise includes roadway, drainage, water, and wastewater infrastructure, as well as subconsultant management, client and public coordination, regulatory analysis, and development of GIS-based solutions.

- **City of Edinburg, U.S. Highway North 281 Water Distribution System Improvements, Edinburg, TX.** Project Manager responsible for the oversight of the waterline and water distribution system improvements along SH 281, between SH 186 and FM 490.
- **City of McAllen, 33rd Street Extension, McAllen, TX.** Project Manager responsible for the oversight of this project which consisted of roadway paving and drainage improvements to connect Oxford Avenue and Auburn Avenue.
- **HDR Inc., Hidalgo Jail Expansion Feasibility Study, Hidalgo County, TX.** Project Manager responsible for the site investigation and coordination with local regulatory officials for this project which involved expanding the existing Hidalgo County Jail facility from 1,200 beds to 2,000.

Russell Limas, PE

ROLE
Utility Infrastructure Evaluation and Improvements

EXPERIENCE
8 Years

EDUCATION
MS, Civil Engineering, Texas A&M University
BS, Civil Engineering, Texas A&M University

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #141807

Russell has experience delivering water, drainage, land development, transportation, utility, and park improvement projects. His background includes hydraulic and water demand analyses, water distribution modeling, drainage planning, site and utility design, stakeholder coordination, and GIS-based mapping in collaboration with municipalities, regulatory agencies, and multidisciplinary teams.

- **McAllen Public Utilities, Bicentennial Extension Water and Wastewater Improvements, McAllen, TX.** Lead engineer for the 2.75-mile Bicentennial Boulevard extension from Trenton Road to SH 107, overseeing schematic design, roadway and drainage improvements, noise wall design, right-of-way planning, and coordination with City, utility, county, and TxDOT stakeholders.
- **McAllen Public Utilities, Sprague Road Interceptor Sewer Project, McAllen, TX.** Engineer that supported the design of the Sprague Road Interceptor by performing wastewater demand analyses, sewer alignment design, and preparation of construction documents and specifications for a deep wastewater system serving local subdivisions and Colonias.

© Halff - 2026

Preston Dillard, PE

ROLE
Utility Infrastructure Evaluation and Improvements

EXPERIENCE
39 Years

EDUCATION
BS, Civil Engineering, Texas A&M University

REGISTRATIONS
Professional Engineer: Texas #79277

Preston brings decades of experience in master planning, asset management, program management, and water and wastewater conveyance and treatment planning and design.

- **City of Haslet, Water Capital Improvements Plan and Master Plan, Haslet, TX.** Served as Project Manager for a water quality master plan, developing and calibrating a hydraulic model to identify system improvements, support CIP planning and impact fee updates, and evaluate pressure, water age, and chlorine residuals to address future water quality needs.
- **Town of Northlake, 2022 Water and Wastewater Impact Fees Update, Denton County, TX.** Technical Advisor for water and wastewater modeling, CIP development, and impact fee updates, including demand projections, system evaluations, and infrastructure planning for the Town of Northlake.
- **City of Tyler Water Modeling, Tyler, TX.** Technical Advisor for a water system master plan serving over 33,000 customers through 725 miles of pipeline. Assisted with system evaluation, hydraulic modeling, long-range planning, and development of capital improvements to support future growth over a 25-year horizon.

Mark Cantu, PE

ROLE
Erosion and Sediment Control Design

EXPERIENCE
6 Years

EDUCATION
BS, Civil Engineering, Texas A&M University

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #153810

Mark is a Civil Engineer with experience in drainage, flood mitigation, and roadway improvement projects for public and private clients. His background includes construction observation, compliance monitoring, and the development of 2D and 3D engineering designs using AutoCAD.

- **City of Edinburg, U.S. Highway North 281 Water Distribution System Improvements, Edinburg, TX.** Project Designer responsible for the design of the waterline and water distribution system improvements along Highway 281, between SH 186 and FM 490. This project was triggered by a TxDOT project along Highway 281 that forces the removal of existing water lines conflicting with proposed highway improvements.
- **City of McAllen, Daffodil Avenue Roadway Improvements, McAllen, TX.** Lead Engineer responsible for civil engineering tasks for the expansion of Daffodil Avenue from a two-lane collector to a four-lane minor arterial. This project will include approximately one mile of roadway improvements from Taylor Road to North Ware Road.

Kristina Leal, PE, CFM

ROLE
Water and Wastewater Evaluation and Improvements

EXPERIENCE
28 Years

EDUCATION
MS, Civil Engineering, University of California at Berkeley
BS, Civil Engineering, Massachusetts Institute of Technology

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #94759
Certified Floodplain Manager: Texas #0943-06N

Kristina brings municipal experience in civil engineering, planning, design, and project management for public agencies and experience in construction management for both public and private clients. This has given her insight into feasibility analysis, preliminary engineering, and project financing.

- **Hidalgo County Drainage District No. 1, New Administration Building, Edinburg, TX.** Construction Manager for a new 10,000-sf administration building as part of an existing facility. The project will consist of private offices, open office areas, breakroom, and conference room facilities for the engineering and administrative staff.
- **Hidalgo County Precinct 1, Flood Assessment, Hidalgo County, TX.** Project Engineer responsible for developing existing conditions models in ICM to identify problem areas and developed proposed conditions models with projects.
- **City of Mission, W&I Resort Water Line Improvements Project, Mission, TX.** Project Manager responsible for the preparation of plans and construction documents to construct a 6-inch water line system along Oleander Street to replace an existing waterline that is failing, the construction of a parallel 8-inch line with two fire hydrants, and the stub out for the future extension of this 8-inch line.

Ashley Pifer, PhD., PE

ROLE
Water and Wastewater Evaluation and Improvements

EXPERIENCE
17 Years

EDUCATION
Ph.D., Civil Engineering, University of Arkansas
BS, Civil Engineering, University of Arkansas

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #120866

Ashley specializes in water quality, treatment processes, and regulatory compliance, with expertise in distribution system management, nitrification control, Lead and Copper Rule compliance, treatment evaluations, and monitoring program development. She also has experience leading technical teams, training operators, and supporting utility planning efforts.

- **East Rio Hondo Water Supply Corporation, MASWTP DAF Improvements, Brownsville, TX.** This project involved leading the MASWTP Pretreatment Improvements project for ERHWSC. The project consists of pretreatment technologies evaluation and piloting, technology selection, design, bidding and construction phase services. The MASWTP is a conventional, 8MGD surface water treatment plant that serves as the primary treatment facility for ERHWSC.
- **City of Marshall, Water Treatment Plant Master Plan, Marshall, TX.** Water treatment specialist and technical advisor for developing a water treatment plant master plan to help the City address aging infrastructure, capacity, and water quality needs. Assessed existing treatment efficacy and compliance with current and upcoming regulatory requirements. Provided guidance to the team on selecting projects and estimating costs for near- and long-term capital improvement plans.

Guillermo Delgado, PhD., PE

ROLE
Water and Wastewater Evaluation and Improvements

EXPERIENCE
16 Years

EDUCATION
Ph,D. Civil Engineering, University of Texas at El Paso, MS, Environmental Engineering, University of Texas at El Paso, BS, Chemical Engineering, Institute of Technology of Parral, Mexico

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #139592

Guillermo is a Technical Leader specializing in water and wastewater treatment, desalination, water reuse, and water quality analysis. His experience includes treatment process design, pilot testing of advanced treatment technologies, and development of arsenic and PFAS treatment systems for municipal and federal clients.

- **Town of Northlake, Engineering Services, Northlake, TX.** Engineer that reviewed drainage studies, floodplain permits, and stormwater plans for a variety of developments in the Town of Northlake, providing compliance reviews, plan markups, and recommendations to provide adherence to local engineering and floodplain regulations.
- **East Rio Hondo Water Supply Corporation, Sludge Disposal Site Improvements, Brownsville, TX.** Engineer providing planning, design, bidding, and construction-phase services for ERHWSC's TWDB-funded sludge disposal site in Cameron County. Services include feasibility studies, environmental documentation, surveying, geotechnical investigations, design development, bidding support, construction administration, and preparation of record drawings.

Cameron Vester, PE

ROLE
Structural Engineering (Improvements and Design)

EXPERIENCE
16 Years

EDUCATION
MS, Civil Engineering, Rice University
BS, Civil Engineering, Rice University

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #128858

Cameron has structural experience designing and managing various projects. These projects include industrial, commercial, municipal, bridge, landscape and civil structures for private, federal and municipal clients. His design experience includes the use of a wide variety of construction materials including reinforced concrete, structural steel, reinforced masonry, light gage metal framing and timber. He also has an extensive knowledge in 3-dimensional technologies and design methods allowing for reduced construction errors and improved field accuracy.

- **City of McAllen, 2018 Bond Drainage Projects, McAllen, TX.** Project Manager and Design Engineer for channel rehab project. The channel rehab includes four crossings consisting of three, three-barrel RCB culverts and one prefabricated pedestrian crossing.Halff is assisting the City of McAllen with revamping four vehicular bridges crossing the Bicentennial Blueline Ditch along Bicentennial Boulevard.
- **North Texas Municipal Water District, Water Systems Center, Wylie, TX.** Engineer responsible for the analysis and design of a new Water Operations Facility located adjacent to the District's existing Wylie Plant. The project includes the design of a 12,319-sf Water Operations Building.

ROLE
Hydrology and Hydraulics

EXPERIENCE
22 Years

EDUCATION
MS, Environmental Science and Engineering, Rice University, BS, Marine Science (Marine Geology), Eckerd College

REGISTRATIONS | CERTIFICATIONS
Certified Floodplain Manager: Texas #4467-23N
Envision Sustainability Professional (ENV SP) #62661

Annemarie has experience in water resources planning, modeling, master planning, and environmental permitting. She has supported feasibility studies, civil design projects, and successful grant applications that secured funding for capital improvement projects.

- **Hidalgo County, Lower Rio Grande RFPG, State Flood Plan, Rio Grande Valley, TX.** H&H Engineer for the TWDB Region 15 (Lower Rio Grande Basin) Flood Plan which established baseline flood conditions across the watershed and identified regional flood risks, mitigation projects, and management strategies. The study evaluated structural and nonstructural solutions, updated major channel models, and developed implementation approaches to improve long-term flood protection and resilience throughout the region.
- **City of Harlingen, Lozano Street Drainage Study and Phase I Detention Pond, Harlingen, TX.** H&H Served as Project Manager for a master drainage study in Harlingen, developing a 2D stormwater model to evaluate flooding conditions and identify detention alternatives. The study resulted in the Phase I Lozano Street Detention Pond, which is currently under construction.

Elmer Hinojosa, PE

ROLE
Hydrology and Hydraulics

EXPERIENCE
7 Years

EDUCATION
BS, Civil Engineering, University of Texas Rio Grande Valley

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #149283

Elmer currently serves as a Water Resources Engineer for the McAllen office. He has been involved in different hydrologic and hydraulic studies, master drainage plans, and design level modeling projects. His modeling experience includes hydrologic modeling, 1D/2D open-channel modeling, and 1D/2D urban drainage modeling.

- **City of McAllen, Master Drainage Plan Update, McAllen, TX.** Project Manager for the project that includes, but is not limited to, data collection, hydrologic and hydraulic analysis using HEC-1/HEC HMS software or other methods acceptable to the City, flood hazard assessments, and stakeholder engagement. Additional tasks include survey and field investigation of existing infrastructure and prioritization of identified problems based on the potential for successful flood mitigation.
- **Hidalgo County Drainage District No. 1, Delta Region Flood Mitigation, Hidalgo County, TX.** Engineer responsible for the comprehensive 1D/2D flood modeling evaluation of existing drainage conditions and proposed flood mitigation solutions for the towns of Edcouch, Elsa and La Villa in Hidalgo County. This analysis follows a 50-year flood that occurred in June 2019. Analyzed entire drainage system, including 50 miles of open channels and 70 culvert crossings within a 50 sq mi drainage area.

Johnny Clayton, PE, LGPP

ROLE
Transportation Evaluation

EXPERIENCE
21 Years

EDUCATION
BS, Civil Engineering, University of Texas at San Antonio

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #107215
Local Government Project Procedures (LGPP) #99692

Johnny has extensive experience managing PS&E development and construction services for complex roadway projects, including TxDOT facilities. He provides constructability reviews, QA/QC, and design oversight throughout project delivery, helping minimize RFIs, change orders, delays, and contractor claims.

- **Alamo Area Metropolitan Planning Organization, General Planning Contract, San Antonio, TX.** Transportation Engineer providing technical support and system enhancements to improve TIP and MTP development, including project analysis, database management, and document formatting to enhance accuracy and efficiency. The team also develops integrated databases to track project amendments and updates, providing that stakeholders have access to current and reliable project information.
- **Denton County. FM 1173 PS&E Engineering Design Services, Denton County, TX.** Johnny led the engineering design services for improvements along 3.5 miles of FM 1173, from FM 156 to IH 35, to provide access for transportation in the Cities of Denton and Krum in Denton County, Texas. Services provided include data collection and analysis, retaining wall design, traffic control plans, H&H design, traffic signal and illumination design, railroad layouts, utility conflict analysis, survey, and geotechnical data collection.

Alex Reyna Jr., PE, LGPP

ROLE
Traffic Engineering Services/Traffic Signal Design

EXPERIENCE
22 Years

EDUCATION
BS, Civil Engineering, University of Texas at San Antonio

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #101243
Local Government Project Procedures (LGPP) #065743

Alex provides expertise in traffic engineering, including traffic impact analyses, signal design and timing, traffic simulation modeling, and signing and pavement marking plans. He has supported multiple Central Texas clients, including CTRMA as part of its GEC team, where he managed consultants for the MoPac Express Lanes project and assisted with traffic operations initiatives, including development of the Traffic Management Center and integration of corridor camera systems.

- **City of San Antonio, Wurzbach Road Corridor Signal Timing, San Antonio, TX.** Traffic Signal Engineer for the synchronization efforts for the Wurzbach Road Corridor, overseeing traffic operations evaluations and developing timing plans for 11 signalized intersections as part of the City of San Antonio's Traffic Signal System Modernization and Synchronization Program. He also identified operational improvements and provided short- and long-term recommendations to enhance traffic flow along the corridor.
- **City of San Antonio, Medical Center Signal Timing, San Antonio, TX.** As Project Manager, Alex developed signal timing plans for 14 intersections in the Medical Center of San Antonio as part of the City's Traffic Signal Modernization and Synchronization Program.

Professional Engineer: Texas #111340
OSHA 30-Hour Construction Industry

Garrett has experience in project management, SUE, and utility coordination for infrastructure and design-build projects nationwide. He works closely with municipalities, utility providers, and stakeholders throughout the Rio Grande Valley, actively participating in meetings and coordination efforts to support project delivery. His experience includes a design-build project that earned the 2014 FHWA Excellence in Utility Relocation and Accommodation Award for Project Development.

- **City of Edinburg, Sugar Road Detention, Edinburg, TX.** Supported the City of Edinburg's Sugar Road Detention project by performing Subsurface Utility Engineering (SUE) services, including utility designation, test hole investigations, utility mapping, records research, and coordination of underground utility data to facilitate design and construction of drainage improvements.
- **TxDOT, Grand Parkway Segments F1, F2 & G, Houston, TX.** Utility Manager for the $1.1B Grand Parkway design-build project, leading utility coordination among 51 utility owners and overseeing 148 relocations, utility investigations, and conflict resolution for a 37.5-mile corridor.

© Halff - 2026

Michael Hammack

ROLE
Subsurface Utility Engineering (SUE)

EXPERIENCE
26 Years

EDUCATION
High School Diploma, Taylor High School

Michael is the SUE Field Manager overseeing all local SUE efforts. He has experience in designating utilities using all types of geophysical prospecting equipment, locating utilities using non- destructive vacuum excavation, plan review, records requests, estimating, preparing SUE proposals and deliverables, and QA/QC. Mike is cross trained in survey, inspection, and CADD, providing a streamlined approach and cost savings to his clients, and he is willing to get his hands dirty to solve problems.

- **TxDOT Pharr District, FM 510 SUE, Cameron County, TX.** SUE/Utility Coordinator responsible for SUE Levels A through D along FM 510 from FM 1847 to FM 2480 in Cameron County.
- **TxDOT Corpus Christi District, FM 893 SUE, San Patricio County, TX.** SUE/Utility Coordinator responsible for SUE Levels A through D along 1.6 miles of FM 893, west of CR 79 to Westwood Drive in San Patricio County.
- **TxDOT Houston District, SH 105 (Conroe to FM 149), Cleveland, TX.** SUE/Utility Coordinator responsible for roadway improvements along SH 105 from 10th Street to 2,000 feet east of Scott Road in Montgomery County. Services included Level C/D SUE services for 275,000-lf of utilities; Level B SUE (3D) services for 700,000-lf of utilities; Level A SUE services for 120 test holes; conflict analysis on existing and proposed facilities; coordination and oversight of subconsultant utility coordination, survey, and SUE; and review of relocation plans for compliance with the UAR.

Our people are individuals with diverse, yet complementary, professional backgrounds. We know this attribute, more than any other, allows us to maintain a loyal client base. We are members of a company built on integrity, technical knowledge and commitment to client service.

RFQ 2026-7

Litigation Disclosure
Halff Associates, Inc.

CONFIDENTIAL & EXEMPT

July 1, 2026

Question:

Litigation Disclosure Form: Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

Response:

Halff Associates, Inc. (Halff) employs more than 1,300 people in 32 office locations (Texas, Florida, Oklahoma, Arkansas, Louisiana, Georgia, and Arizona) and is engaged in over 3,500 active projects at any given time. On rare occasions, projects are canceled for a variety of reasons, including lack of funding, client decisions that lead to ceasing pursuit of a project, and/or change in the direction of a project, among others. Halff can and does affirm that there are no prior or ongoing legal matters that would adversely affect Halff's ability to fully perform its obligations on this or any other project. In addition, Halff is not currently involved in any litigation involving the City of Edinburg and has never been involved in any litigation with the City of Edinburg.

Question:

Litigation Disclosure Form: Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

Response:

CONFIDENTIAL – For Internal City of Edinburg, Texas Use Only – Not For Disclosure
Any And All Exceptions, Protections Under Applicable Open Records Laws and The Freedom Of Information Act Are Claimed by Halff.

Due to Halff Associates, Inc. (Halff)'s size, the number and complexity of the projects that Halff is involved with, and the heightened litigious nature of our society, Halff occasionally becomes involved in legal proceedings.

Halff was, or is currently a party, in the following litigation within the past ten (10) years:

1. *Pharr-San Juan-Alamo ISD v. D. Wilson Construction Co. et al*, 2021 003006, 430th Judicial District, Hidalgo County, Texas – PENDING – PSJA ISD alleges design issues related to the HVAC system installed in an elementary school.
2. *Village Real Estate LLC v. Ziegler-Cooper, Inc. Savills Inc. F/K/A/ Savills Studley, Inc., Seawood Builders, LLC, Halff Associates, Inc., and Permit-Expediters Inc.,* 2023 22283, 55th Judicial District, Harris County, Texas – PENDING – Village Real Estate sued the architect, engineer and other advisors and consultants related to the construction of a detention pond within an easement held by a third party.
3. *City of Willow Park v. Halff Associates, Inc.,* CV23-2017, 415th District Court, Parker County, Texas – PENDING – Halff provided an opinion of construction cost related to a water transmission pipeline through the City of Hudson Oaks and the City of Willow Park, which turned out lower than actual bids received.
4. *Cameron County v. Noble Texas Builders, LLC v. Halff Associates, Inc.*, 2025-DCL-06756-B, 138th District Court, Cameron County, Texas – PENDING – County alleges negligence, breach of contract, and breach of warranties in connection with the design and construction of two County parks.
5. *Bonvillain v. Halff Associates, Inc.*, 2:25-CV-01911, United States District Court, in and for the Western District of Louisiana – RESOLVED, suit was settled in May 2026. Settlement is confidential.
6. *Y.C. Partners Ltd d/b/a Yantis Company v. The City of New Braunfels v. Halff Associates, Inc.*, C2014-0522A, 22nd Judicial District, Comal County, Texas – RESOLVED, suit was settled in January 2026. Settlement is confidential.
7. *City of Hutto v. Brooklands Partners, Ltd.*, 23-1222-C395, 395th Judicial District Court, Williamson County, Texas – RESOLVED, suit was settled in September 2025. Settlement is confidential.
8. *Almaguer v. Halff Associates, Inc.*, DC-24-07702, 14th Judicial District, Dallas County, Texas – RESOLVED, suit was settled in April 2025. Settlement is confidential.
9. *Sooner Road 80, LLC v. Jonathan Heusel; Path Engineering Design & Urbanism PLLC; Halff Associates, Inc.; and Gardner Architects LLC*, CJ-2020-5015, Oklahoma District Court, Oklahoma County – RESOLVED, suit was settled in May 2024. Settlement is confidential.
10. *Prairie Link Constructors JV, Fluor Enterprises, Inc. and Balfour Beatty Infrastructure, Inc. v. AECOM v. Halff*, DC-22-13917, 160th Judicial District, Dallas County, Texas – RESOLVED, suit settled in May 2024. Settlement is confidential.
11. *Fidencio Hernandez, et at v. City of McAllen, Spawglass Contractors, Inc., Halff Associates, Inc., Palms Crossing Town Center, LLC and Gignac & Associates LLP*, Cw0024-17-A, 92nd District Court, Hidalgo County, Texas – RESOLVED, suit was settled in June 2021. Settlement is confidential.
12. *Performance Services, Inc. v. Halff Associates, Inc., The Mystinfield Group LLC, Wiss Janney, Elstner Associates, Inc.*, 20-0475-C368, 368th Judicial District, Williamson County, Texas – RESOLVED, suit was settled in December 2021.
13. *Lou Tilchin, Jaffe Tilchin Wealth Management, Inc. v. ABI Companies, Inc., ABI Construction Services, LLC, GGI LLC, Genesis C E & I Services, LLC, Genesis Halff, Inc. and Genesis Halff CEI, Inc.,* 20CA003205 DIV. E, 13th Judicial Circuit Hillsborough, County, Florida – RESOLVED, Genesis Halff, Inc. and Genesis Halff CEI, Inc. were dismissed from the suit in December 2021.
14. *Fidencio Hernandez and Maria Garcia, Individually and as Representatives of the Estate of AHH (Decedent) and Rose Amber Cordova v. Raymond Gignac, AIA, Individually and, DBA Gignac/TVS, Gignac & Associates, L.L.P., Thompson Ventulett Stainbeck & Associates, Inc., Architects, Halff Associates, Inc. and SWA Group d/b/a SWA Group Inc.*, C-0024-17-A, 92nd Judicial District, Hidalgo County, Texas – RESOLVED, suit was settled in June 2021.

City of Edinburg, Professional Engineering Services, RFQ 2026-7
Halff Associates, Inc. – Litigation Disclosure

Halff claims confidentiality as to the above pending litigation, as well as resolved litigation outcomes. The above-referenced resolved cases are confidential pursuant to orders or agreements reached in those cases. The details about Halff's pending litigation are confidential and exempt, since Halff's legal counsel is providing this information to the City of Edinburg, Texas as a public entity, and it thus becomes public record upon disclosure.

Halff can and does affirm that there are no prior or ongoing legal matters that would adversely affect Halff's ability to fully perform its obligations on this, or any other project. Halff can confirm it has no ongoing or pending litigation against the City of Edinburg, Texas.

Halff's legal counsel will consider requests for specific information regarding the status of the protected matters described above. Halff's Director of Legal, Nina Scherach, can be reached at nscherach@halff.com.

Required Forms
Conflict of Interest Form

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

Conflict of Interest Questionnaire

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

THERE ARE NO KNOWN BUSINESS RELATIONSHIPS BETWEEN HALFF ASSOCIATES, INC. OR ANY OF ITS EMPLOYEES OR PRINCIPALS WITH THE LOCAL GOVERNMENTAL ENTITY

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

None

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No **NOT APPLICABLE**

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No **NOT APPLICABLE**

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

NONE

6 ☒ N/A Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

RE: City of Edinburg, RFQ 2026-7 Professional Engineering Services

Dear Mr. Hinojosa,

Hanson Professional Services Inc. (Hanson) is pleased to submit our qualifications to provide professional engineering services to the City of Edinburg (the City). We appreciate the opportunity to be considered for the City's engineering services rotation list for the 2026-2028 contract term and are committed to providing responsive, high-quality professional services that support the City's infrastructure, utility, transportation, and capital improvement objectives. The City is seeking qualified firms to provide a broad range of engineering services on an as-needed basis, and **Hanson is well positioned to deliver the multidisciplinary expertise, technical resources, and local knowledge necessary to successfully support these efforts.**

For more than 70 years, Hanson has partnered with municipalities, counties, and public agencies throughout Texas, providing planning, engineering design, environmental services, grant assistance, construction administration, and program management services. Our team has extensive experience delivering roadway, drainage, water, wastewater, utility, traffic, transportation, structural, and civil engineering projects for local governments throughout the Rio Grande Valley and South Texas. We understand the importance of delivering projects efficiently, maintaining clear communication, and meeting critical schedules and funding requirements. These principles guide every assignment we undertake and have helped us establish long-term relationships with public-sector clients throughout Texas.

POINT OF CONTACT

Name: Paolina Vega, PE, CFM
Title: Project Manager
Address: 410 N Ed Carey Drive, Suite A1
Harlingen, TX 78550
Telephone/Cell Phone: 956-541-1155
Fax: N/A
Email: PVega@hanson-inc.com

WHY CHOOSE THE HANSON TEAM?

- Extensive regional experience.
- Longstanding successful relationships with local and national funding agencies.

REGISTRATIONS

- Texas Licensed Engineering Firm No. F-000417
- Texas Geoscientist Firm Registration No. 50556
- TDA Certified to Administer TxCDBG Contracts
- TxDOT Precertified

Hanson offers a full-service team capable of supporting the categories identified in the RFQ, including street and utility infrastructure improvements, water and wastewater systems, hydrology and hydraulics, traffic engineering, transportation planning and design, environmental services, structural engineering, and MEP engineering services. Our staff regularly performs field investigations, feasibility studies, alternatives analyses, engineering design, plans, specifications and estimates, environmental documentation, grant administration support, stakeholder coordination, and construction-phase services for public infrastructure projects. Our proposed team is organized to provide timely service for both large capital improvement projects and smaller task-order assignments. With professionals and dedicated resources throughout South Texas, Hanson can quickly respond to City needs while leveraging the depth and technical expertise of our statewide and national practice.

The undersigned is an officer of Hanson Professional Services Inc. and is authorized to bind the firm contractually. We appreciate your consideration of our qualifications and look forward to the possibility of continuing to enhance the City's infrastructure. Should you require any additional information, please contact us at any time.

Sincerely,
Hanson Professional Services Inc.

Paolina Vega

Paolina Vega, PE, CFM
Senior Project Manager / Vice President

HANSON®

Hanson Professional Services Inc., founded in 1954, is a national, employee-owned consulting firm providing engineering, planning, and allied services. We take a hands-on, partner-focused approach, working alongside our clients to understand project goals and deliver practical, results-driven solutions through all phases of project delivery. By combining technical expertise, regional familiarity, and commitment to responsive service, Hanson delivers compliant, constructible, and cost-effective solutions that support the development, improvement, and long-term performance of infrastructure.

Hanson specifically offers civil and site development, water and wastewater, drainage and stormwater, transportation, structural, geotechnical, and MEP engineering; flood mitigation and resilience planning; utility coordination; land surveying; planning and program management; commissioning and energy; asset management; GIS and data analysis; environmental coordination and permitting; waste management; and construction administration and inspection services.

Experience Delivering Timely Engineering Services

Hanson has successfully provided engineering, planning, surveying, and construction-related services to municipalities, counties, state agencies, utility districts, and other public-sector clients throughout Texas for over 40 years. Our project management approach emphasizes proactive communication, detailed scheduling, and accountability to keep projects moving efficiently from initiation through completion.

Hanson has 70 staff members positioned across Texas. We have offices in Harlingen, Corpus Christi, Houston, and Austin.

Over the past two years, Hanson has continued to support numerous governmental agencies with a wide range of infrastructure improvements, including transportation, water and wastewater systems, drainage and stormwater facilities, municipal utilities, parks and trails, and other public works projects. Our team understands the importance of meeting funding deadlines, coordinating with stakeholders, obtaining regulatory approvals, and delivering work products on schedule. Through effective project controls, experienced leadership, and responsive client service, we consistently provide high-quality engineering solutions while maintaining project schedules and budgets.

Why Hanson Is Uniquely Qualified to Serve the City

Hanson offers a unique combination of local presence, multidisciplinary expertise, and a client-focused approach that enables us to effectively serve the City's needs. With engineering professionals located throughout Texas, we provide responsive service and direct access to experienced technical staff who understand the challenges and opportunities facing local governments.

Our team brings expertise across the full project lifecycle, including planning, funding assistance, surveying, engineering design, permitting, bid phase services, construction administration, and program management. This integrated approach allows us to deliver seamless solutions while minimizing coordination challenges and maintaining project momentum.

What further distinguishes Hanson is our commitment to building long-term partnerships. We take the time to understand each client's goals, priorities, and budget constraints, allowing us to develop practical, cost-effective solutions tailored to their needs. By combining technical excellence, responsiveness, and a proven record of successful project delivery, Hanson is well positioned to provide the dependable, timely, and high-quality engineering services the City expects and deserves.

Office Location and Staffing Needs

The projects for the City of Edinburg will be managed from our Harlingen office, located at 401 N. Ed Carey Drive, Suite A1, Harlingen, TX 78550. For smaller assignments and part-time staffing needs, we have the staff and resources to manage our current workload while accommodating this contract. Our present and anticipated workloads will require minimal adjustment to support tasks issued under this contract. We have sufficient professional staff and resources available, and staffing levels and availability will be monitored throughout projects. Additional personnel and resources will be allocated as needed to maintain schedule performance and responsiveness.

The table below summarizes the specialized service categories requested by the City of Edinburg for professional engineering services. Throughout the following project examples, these icons are used to identify the categories applicable to each project's scope of work.

	Street Infrastructure Evaluation and Improvements		Transportation Evaluation
	Pavement Management and Improvements		Traffic Engineering Services
	Utility Infrastructure Evaluation and Improvements		Traffic Signal Design
	Erosion and Sediment Control Design		Environmental Engineering Services
	Water and Wastewater Evaluation and Improvements		Civil Engineering
	Structural Engineering		Mechanical, Electrical, and Plumbing (MEP) Engineering Services
	Hydrology and Hydraulics		

HERITAGE AND WELLNESS CENTER

Raymondville, TX

Hanson provided structural foundation design and mechanical, electrical, and plumbing services for the new Willacy County Heritage & Wellness Center, a 10,400-square-foot pre-engineered metal building funded through the Community Development Block Grant CARES Act (CDBG-CV) program. The facility was designed as a multi-purpose community center and includes office space, assembly areas, multiple restroom facilities, and supporting building systems.

Hanson developed foundation designs to support the split-level structure with a standing seam metal roof and EIFS-clad exterior walls. The project also included associated site improvements consisting of parking areas, driveways, drainage and detention facilities, utility extensions, site lighting, and other infrastructure enhancements to serve the new community resource.

Owner: Willacy County
Cost: $3,973,601
Project Timeline: 2/24/2023 - Ongoing
Key Staff Members & Role:
Anna Aldridge ..... Project Manager
Ruben Peralez ..... Structural Engineer

BEJERANO-MCFARLAND TRAIL EXTENSION

Port Isabel, TX

The project extended the Bejerano-McFarland Trail through several segments of the SH-100 corridor and adjacent local streets, adding approximately 7,200 feet of five-foot-wide ADA-compliant concrete sidewalk and improving pedestrian connectivity near Port Isabel High School and Arturo Galvan Coastal Park. A key component of Hanson's support involved environmental review and coordination. Our team conducted endangered species evaluations and facilitated cultural resources coordination to ensure the project met all applicable regulatory requirements. These efforts helped the City identify and address potential environmental constraints early, protect sensitive species and cultural sites, and maintain compliance throughout the project's development.

Owner: City of Port Isabel
Cost: $883,643
Project Timeline: 11/7/2024 - Ongoing
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager

WATER DISTRIBUTION LINES REPLACEMENT

Robstown, TX

Hanson provided environmental services to support NCWCID #3 in advancing a project to replace aging water distribution lines and upgrade existing meters to AMR technology. As part of this effort, our team guided the District through the applicable NEPA process, ensuring the project's environmental documentation met state and federal requirements tied to Texas Water Development Board (TWDB) funding programs. Our environmental review included an evaluation of potential impacts to federally and state-listed endangered species within the project area. We also assisted NCWCID #3 with the public involvement needs of the project.

Owner: Nueces County Water Control & Improvement District #3 (NCWCID #3)
Cost: $1,400,000
Project Timeline: 11/15/2024 - Ongoing

MULTIPLE LIFT STATIONS EVALUATION AND REHABILITATION

Primera, TX

This project involves the evaluation and rehabilitation of the 11 lift stations that comprise the City of Primera's wastewater system, which ultimately conveys flow to Harlingen Water Works System Lift Station No. 11. Constructed more than 20 years ago, the lift stations have components, pumps, and controls that have exceeded their expected service lives. The project includes evaluating hydraulic capacities; replacing pumps, piping, and valves; and rehabilitating wet wells and valve vaults impacted by hydrogen sulfide gas. Additional improvements include site upgrades, bypass pumping, installation of new electrical and PLC controls with SCADA integration, and the addition of backup generators. Hanson also provided environmental services, including NEPA compliance, public involvement activities, and coordination related to endangered species to support regulatory requirements and project advancement.

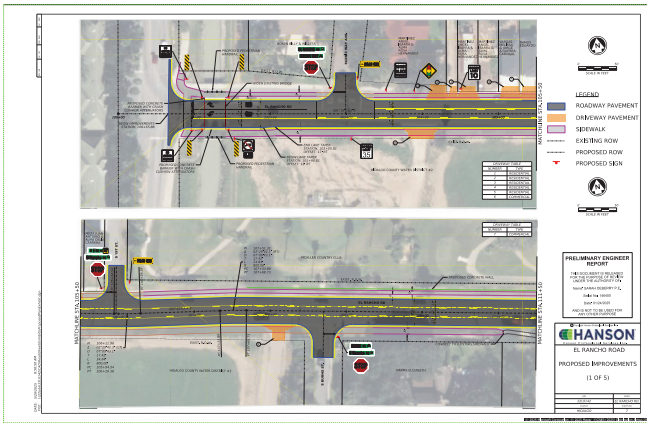
Owner: City of Primera
Cost: $4,405,000
Project Timeline: 5/17/2023 - Ongoing
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager
Romeo Barrera ..... Water/Wastewater Engineer
Clint Woods ..... Water/Wastewater Engineer
Austin Thompson ..... Electrical Engineer

OLD HIGHWAY 77 RECONSTRUCTION
Brownsville, TX

Hanson provided preliminary engineering and PS&E engineering services for the Old Highway 77 (an Urban Minor Collector) reconstruction from north of the intersection with Ruben M. Torres Boulevard (FM 802) to the south leg of the intersection with Morrison Road (approximately 1.35 miles). This project included the widening and reconstruction of the pavement and upgrading the open channel drainage to a closed drainage system.

Owner: City of Brownsville
Cost: $14,310,162
Project Timeline: 7/21/2022 - Ongoing
Key Staff Members & Role:

Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager
Sarah DeBerry ..... Roadway Engineer
David McDonald ..... Roadway Engineer
Colton Phillipp ..... Drainage Engineer
Gerry Rangel ..... Traffic Engineer



EL RANCHO ROAD WIDENING
McAllen, TX

Owner: City of McAllen
Cost: $1,173,500
Project Timeline: 6/27/2024 - Ongoing
Key Staff Members & Role:

Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Sarah DeBerry ..... Roadway Engineer
Colton Phillipp ..... Drainage Engineer
Eric Howald ..... Traffic Engineer

Hanson provided preliminary engineering and PS&E engineering services for the El Rancho Road (an Urban Minor Collector) reconstruction from north of the intersection with 2nd Street to the intersection with Jackson Road (approximately 1.2 miles).

This project includes widening and reconstruction of the pavement and upgrading the open channel drainage to a closed drainage system, implementation of traffic control, sanitary sewer, water improvements, and ADA improvements consisting of a sidewalk and trail.

STATE HIGHWAY 100 SIGNALIZATION
Port Isabel, TX

Hanson performed a traffic analysis and assisted the City with the preparation of a TxDOT HSIP application for the installation of a new signal on State Highway 100 in Port Isabel. Services included preparation of a memorandum presenting results and recommendations of the traffic study and preparation of Highway Safety Improvement Program (HSIP) documents to apply for state funding for the construction of proposed signalization improvements.

Owner: City of Port Isabel
Cost: $705,668
Project Timeline: 11/6/2025 - Ongoing
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Gerry Rangel ..... Traffic Engineer

VIOLA AND AVERY PAVEMENT IMPROVEMENTS
Corpus Christi, TX

Owner: Port of Corpus Christi Authority
Cost: $225,639 (Viola); $154,360 (Avery)
Project Timeline: 4/22/2025 - Ongoing
Key Staff Members & Role:
Anna Aldridge ..... Project Manager
Gabriel Ortiz ..... Lead Engineer

Viola Pavement Improvements: This project involves assessing existing pavement on roads and parking area conditions, followed by the design of subsequent repairs and rehabilitation in the Viola Basin and Vulcan-CC Polymers areas. Hanson's scope of services includes providing visual condition assessment, pavement repair, and rehabilitation design with related drainage and infrastructure improvements based upon the assessment, topographic surveying, geotechnical investigation, traffic loading for each distinct area, and bidding and construction phase services.

Avery Pavement Improvements: This project involves assessing existing pavement on roads and parking area conditions, followed by the design of subsequent repairs and rehabilitation in the Viola Basin and Vulcan-CC Polymers areas. Hanson's scope of services includes providing visual condition assessment, pavement repair, and rehabilitation design with related drainage and infrastructure improvements based upon the assessment, topographic surveying, geotechnical investigation, traffic loading for each distinct area, and bidding and construction phase services.

CULVERT AND SENSOR IMPROVEMENTS
Brownsville, TX

The City of Brownsville is currently implementing improvements to four culverts at various resaca crossings throughout the City. These upgrades are designed to increase water flow capacity through the crossings, reduce elevated water levels, and mitigate flood risks during heavy rainfall events.

Owner: City of Brownsville
Cost: $1,582,328
Project Timeline: 3/17/2020 - Ongoing
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager

As part of the project, the City is installing seven sensors to collect data on bidirectional flow, rainfall, water depth, and velocity at the improved crossings. All sensors will be integrated into the USGS monitoring network. Hanson is providing engineering services to support the planning, design, and implementation of these improvements.

DRAINAGE MASTER PLAN
Los Fresnos, TX

The project consists of developing a comprehensive drainage plan to address critical drainage problems within the City of Los Fresnos. The Master Drainage Plan will provide a comprehensive evaluation of existing drainage conditions, provide inventory and mapping of existing drainage infrastructure, review applicable local, state, and federal regulations related to drainage, recommendations of changes to local rules, and preparation of a capital improvement plan that includes budget estimates for proposed improvements and funding mechanisms for CIP projects. This project is being funded by Texas Water Development Board and local funding.

Owner: City of Los Fresnos
Cost: $678,704
Project Timeline: 11/8/2022 - 5/27/2025
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager
Colton Phillipp ..... Drainage Engineer
Romeo Barrera ..... Water/Wastewater Engineer

DRAINAGE MASTER PLAN
Primera, TX

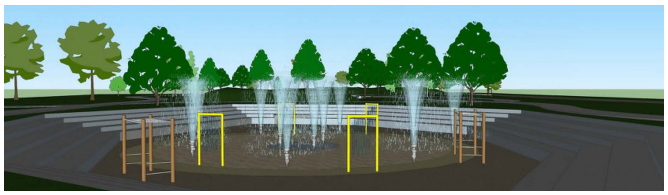
The project consists of developing a comprehensive drainage plan to address critical drainage problems within the City of Primera. The Master Drainage Plan will provide a comprehensive evaluation of existing drainage conditions, provide inventory and mapping of existing drainage infrastructure, review applicable local, state, and federal regulations related to drainage, recommendation of changes to local rules, and preparation of a capital improvement plan that includes budget estimates for proposed improvements and funding mechanisms for CIP projects. This project is being funded by Texas Water Development Board and local funding.

Owner: City of Primera
Cost: $285,000
Project Timeline: 3/9/2022 - 1/29/2025
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Colton Phillipp ..... Drainage Engineer

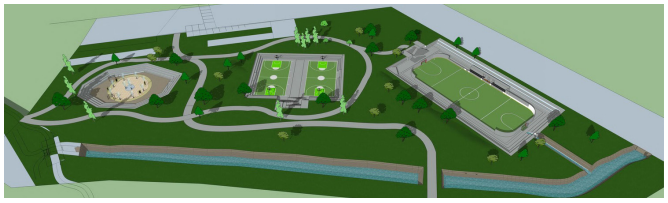
WEST BROWNSVILLE DRAINAGE IMPROVEMENTS
Brownsville, TX

A 60-inch diameter reinforced concrete pipe (RCP) that drains a portion of west downtown Brownsville has collapsed. The City of Brownsville is proposing to abandon in place a portion of the 60-inch diameter RCP trunk line and re-route the storm sewer system from W. 17th Street to the City's raw water pump station. Hanson prepared the engineering feasibility study, providing a description and purpose of the project, a map showing the location of the project areas, a discussion of known permitting and environmental issues which may affect the project, proposing three alternatives and reasons for selection of the project proposed, cost of the proposed project, and preparation of a benefit-cost ration analysis. Hanson conducted a hydraulic analysis delineating the watershed, identified rainfall distribution and storm data, and land use in order to analyze 25-and 100-year storm events. Other services include conducting topographical surveys, engineering design, preparation of PS&E, and construction management services. This project is being funded by Texas Water Development Board and local funding.

Owner: City of Brownsville
Cost: $1,555,871
Project Timeline: 10/7/2020 - 8/25/2025
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager
Colton Phillipp ..... Drainage Engineer



FOUR CORNERS DETENTION POND PARK



Brownsville, TX

The City of Brownsville is proposing to control stormwater runoff by constructing a multi-use detention facility in the Four Corners area. The project is located on a ten-acre property on Burton Drive, off International Boulevard, in Brownsville. The project improvements consist of the diversion of stormwater into a proposed seven-acre detention pond. The existing detention pond at the North corner of the property will remain and be utilized as a stormwater quality sedimentation basin. The existing drainage swale along the Northwest side of the subject property will be regraded/redirected to act as a stormwater quality bioswale. A portion of the proposed detention pond will be multipurpose and will serve as a sports field when not inundated. The project will also include a concrete walking trail around the perimeter of the proposed detention pond, and a parking lot will provide access from Burton Drive to the park amenities. The other amenities include a splash pad, gazebo, shade structures, concrete benches, picnic tables, and drinking fountains. Project is being funded by the Texas Water Development Board and local funding.

Owner: City of Brownsville
Cost: $1,434,536
Project Timeline: 6/19/2021 - Ongoing
Key Staff Members & Role:

Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager
Colton Phillipp ..... Drainage Engineer

GLADYS PORTER ZOO WATER/WASTEWATER IMPROVEMENTS

Brownsville, TX

The Gladys Porter Zoo maintained a private utility network consisting of water and sanitary sewer infrastructure that had been in place for approximately 50 years and was nearing the end of its service life. The existing cast iron and vitrified clay utility lines were deteriorating due to corrosion and structural failure, resulting in frequent collapses. Many of these lines were located beneath existing buildings, further complicating access and repairs.

The project involved the design and construction of a new potable water distribution and wastewater collection system to serve all zoo facilities, including animal exhibits, administrative offices, restrooms, water features, and support structures. Scope of services included topographic and subsurface utility surveying, system design, preparation of bidding documents, and construction administration. The project is funded through the American Rescue Plan Act (ARPA), supporting critical infrastructure improvements.

Owner: City of Brownsville
Cost: $5,111,064
Project Timeline: 10/30/2023 - Ongoing
Key Staff Members & Role:

Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager
Sarah DeBerry ..... Design Engineer
Austin Thompson ..... Electrical Engineer
Romeo Barrera ..... Water/Wastewater Engineer
Clint Woods ..... QA/QC

NUECES BAY BOULEVARD AND POTH LANE WATERLINE REPLACEMENT

Corpus Christi, TX

The Nueces Bay Boulevard water main replacement project consisted of the replacement of approximately 18,200 feet of existing 16-inch cast iron water main along two major sections of Nueces Bay Boulevard and Poth Lane with 16-inch PVC C-900 water main. The project included reconnecting large industrial water services, lateral connections, hydrants, and smaller meters. The project was constructed within the roadway and included pavement repair. Project challenges included petrochemical pipelines within the project area from 15 different industrial customers as well as storm and sanitary utilities within the alignment.

Owner: City of Corpus Christi
Cost: $11,219,912
Project Timeline: 2/17/2021 - Ongoing
Key Staff Members & Role:
Iris Cantu ..... Civil Designer

24-INCH INDUSTRIAL RECLAIMED WATERLINE

Confidential, TX

Hanson is providing survey and preliminary design services to a confidential industrial client for a proposed 15 miles of 24-inch diameter reclaimed waterline. The pipeline will convey approximately three MGD of treated municipal wastewater effluent for indirect potable reuse.

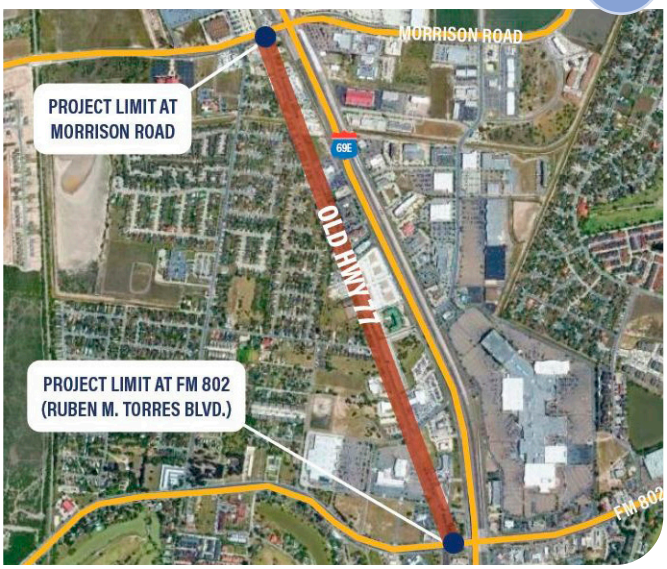
Owner: Confidential
Cost: Confidential
Project Timeline: Ongoing

LIFT STATION NO. 9 AND FORCE MAIN UPGRADE

Harlingen, TX

The purpose of this project is to replace the existing Lift Station No. 9 (LS-9) and construct a new force main that will discharge into a downstream reach of sewer with adequate capacity. This project includes the construction of approximately 6,000 linear feet of 18-inch force main for the final permanent conditions. In the meantime, an additional 2,000 linear feet of temporary 18-inch diameter force main is being constructed until the Little Creek Interceptor Sewer is built. The new force main alignment will cross under Interstate 69 (I-69) and the Arroyo Colorado and temporarily discharge to the existing sanitary sewer located northeast of the cul-de-sac along South 6th Street and South Commerce Street. The Little Creek Interceptor Sewer is under design. This project includes design of the new lift station and force main, along with the elements fundamental to wastewater lift stations including the wet well, valve vault, station and discharge piping and valves, submersible pumps, variable frequency drive, electrical controls, generator, site improvements, and influent sanitary sewer improvements. This project is being funded by Texas Water Development CWSRF funds.

Owner: Harlingen Waterworks System
Cost: $6,000,000
Project Timeline: 10/24/2024 - Ongoing
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager
Ruben Peralez ..... Structural Engineer
Austin Thompson ..... Electrical Engineer
Lee Bloome ..... Water/Wastewater Engineer
Romeo Barrera ..... Water/Wastewater Engineer



OLD HIGHWAY 77 WATER/WASTEWATER IMPROVEMENTS

Brownsville, TX

Owner: Brownsville Public Utilities Board
Cost: $5,189,836
Project Timeline: 8/8/2023 - Ongoing
Key Staff Members & Role:

Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager
Sarah DeBerry ..... Utility Coordination
Clint Woods ..... Water/Wastewater Engineer

This project included preliminary design, final design, bidding, and construction administration services for water and wastewater utility improvements along Old Highway 77. The scope consisted of extending an existing waterline, replacing an aging waterline, upsizing a force main, and relocating a gravity sanitary sewer line in anticipation of roadway expansion.

Waterline Improvements

Waterline Extension: An existing eight-inch waterline is located along the east side of Old Highway 77 and currently terminates approximately 480 linear feet (linear feet) south of the W. Morrison Road intersection. This project extended the waterline to connect with an existing 12-inch waterline located along the southern right-of-way of W. Morrison Road, creating a looped system to improve service reliability and pressure.

Waterline Replacement: An existing 12-inch asbestos cement (AC) waterline ran along the eastern right-of-way of Old Highway 77 from FM 802 north to the vicinity of Sinai Living Stone Church, spanning approximately 3,000 linear feet. The project proposed abandoning this AC line in place and replacing it with a new 12-inch PVC waterline to enhance water quality and system durability.

Sanitary Sewer Improvements

Force Main Upsizing: Lift Station No. 93 previously discharged through an eight-inch PVC force main that transitioned into a 10-inch PVC force main along the east side of Old Highway 77. This force main discharges into a manhole located about 455 linear feet north of Gilson Road. The project extended the 10-inch force main approximately 2,300 linear feet further north, along the same alignment, to connect to the receiving manhole at Lift Station No. 64.

Gravity Sewer Relocation: An existing 15-inch PVC gravity sanitary sewer line ran along the west side of Old Highway 77. Due to the planned expansion of the highway, several existing manholes conflicted with the proposed curb and gutter alignment. To resolve this, approximately 1,900 linear feet of the gravity sewer line was relocated to align with the centerline of the proposed roadway.

SANITARY SEWER IMPROVEMENTS

Primera, TX

This project will bring first-time sanitary sewer service to City of Primera residents, resulting in significant public health, environmental, and quality-of-life benefits for the community. The proposed improvements will replace aging and inadequate on-site septic systems with a reliable municipal wastewater collection system designed to meet current regulatory standards and support long-term community growth.

Owner: City of Primera
Cost: $777,709
Project Timeline: 3/8/2024 - Ongoing
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager

The project includes the installation of approximately 4,490 linear feet of 8-inch PVC SDR-26 gravity sanitary sewer line, along with the construction of new manholes to assist with proper system access, maintenance, and operational efficiency. As part of the transition to centralized sewer service, existing septic tanks will be decommissioned, eliminating potential sources of groundwater contamination and reducing long-term maintenance burdens for residents.

Professional services for the project include preparation of plans, specifications, and estimates (PS&E); coordination of all required surveying services; and comprehensive bidding and construction management support. These services will allow for the project to be delivered efficiently, complying with applicable state and local requirements, and being constructed in accordance with approved design standards and grant conditions.

The project is funded through a Texas General Land Office (GLO) Community Development Block Grant – Disaster Recovery (CDBG-DR) program, representing a cost-effective investment in critical infrastructure that will provide lasting benefits to the residents of Primera. Upon completion, the project will enhance public health and environmental stewardship, reduce reliance on failing septic systems, and provide a dependable wastewater solution that supports the City's current needs and future development goals.

WESTGATE & 18TH INTERSECTION STUDY

Weslaco, TX

Hanson is conducting a traffic study for the intersection of 18th Street and Westgate Drive in Weslaco to evaluate existing traffic operations and identify opportunities to improve safety and mobility. Services include collecting turning movement traffic counts, reviewing crash history, analyzing existing and projected traffic volumes, and evaluating intersection operations, level of service (LOS), queue lengths, and traffic signal warrants. Hanson is also assessing intersection geometry, speed conditions, and turn lane requirements and developing up to three conceptual design alternatives with accompanying benefit-cost evaluations. The study will culminate in a technical memorandum summarizing findings, recommendations, and potential improvements to support the City's future transportation planning efforts. The project is being completed under a two-month schedule and includes ongoing coordination with City staff throughout the study process.

Owner: City of Weslaco
Cost: $54,900 (Fee)
Project Timeline: 3/30/2026 - Ongoing
Key Staff Members & Role:
Anna Aldridge ..... Project Principal
Paolina Vega ..... Project Manager
Iris Cantu ..... Assistant Project Manager
Gerry Rangel ..... Traffic Engineer
Sarah DeBerry ..... Traffic Engineer

ANNA ALDRIDGE, PE

Project Principal

HANSON

Biography:
Anna provides extensive experience in planning, permitting, design, and construction for a wide range of infrastructure projects, including water, wastewater, and stormwater design and permitting, as well as municipal solid waste. These projects have required coordinating with the Texas Commission on Environmental Quality (TCEQ), the United States Environmental Protection Agency (EPA), and the Texas Department of Health. She has worked with the EPA Construction Grants program, Community Development Block Grant program (CDBG), Texas Water Development Board (TWDB), U.S. Department of Agriculture (USDA), Border Environmental Cooperation Commission (BECC), North American Development Bank (NADB), U.S. International Boundary and Water Commission (IBWC), and General Land Office (GLO), which have provided funding for planning, design, and construction of infrastructure improvements.

Firm / Total Years Experience:
» 10 / 40

Education:
» MBA / Business Administration
» BS / Industrial Engineering

Registrations & Certifications:
» Professional Engineer / TX

Relevant Project Experience:

City of Brownsville, Old Highway 77 Reconstruction, Brownsville, TX.
Role: Project Principal. **Scope:** Hanson provided preliminary engineering and PS&E engineering services for the Old Highway 77 (an Urban Minor Collector) reconstruction from north of the intersection with Ruben M. Torres Boulevard (FM 802) to the south leg of the intersection with Morrison Road (approximately 1.35 miles). This project included the widening and reconstruction of the pavement and upgrading the open channel drainage to a closed drainage system. **Cost/Fee:** $14,310,162.

City of Port Isabel, Bejerano-McFarland Trail Extension, Port Isabel, TX.
Role: Project Principal. **Scope:** This project extended the existing Bejerano-McFarland Trail along the south right-of-way of SH-100 from Roy Street to the Port Isabel High School, along the north right-of-way of SH-100 from Roy Street to past Michigan Avenue, along the north right-of-way of SH-100 from SH-48 to 2nd Street, and along the west right-of -way of 2nd Street from SH-100 to Arturo Galvan Coastal Park. The concrete sidewalk was five feet in width, approximately 7,200 long, and met ADA requirements. The project also included the design of a cul-de-sac with planter bollards at Garfield Street and Roosevelt Street. **Cost/Fee:** $883,643.

City of Brownsville, Four Corners Detention Pond Park, Brownsville, TX.
Role: Project Principal. **Scope:** The City of Brownsville is proposing to control stormwater runoff by constructing a multi-use detention facility in the Four Corners area. The project improvements consist of the diversion of stormwater into a proposed seven-acre detention pond. The existing detention pond at the North corner of the property will remain and be utilized as a stormwater quality sedimentation basin. The existing drainage swale along the Northwest side of the subject property will be regraded/redirected to act as a stormwater quality bioswale. A portion of the proposed detention pond will be multipurpose and will serve as a sports field when not inundated. The project is being funded by the Texas Water Development Board and local funding. **Cost/Fee:** $1,554,871.

City of Primera, Sanitary Sewer Improvements, Primera, TX.
Role: Project Principal. **Scope:** Hanson is providing first-time municipal sanitary sewer service to replace aging septic systems and improve public health and environmental protection. The project includes installation of approximately 4,490 linear feet of eight-inch PVC gravity sewer line, new manholes, and septic tank decommissioning. Services include PS&E development, survey coordination, bidding assistance, and construction management. Funded through the Texas GLO CDBG-DR program, the project delivers reliable wastewater infrastructure to support current and future community needs. **Cost/Fee:** $777,709.

PAOLINA VEGA, PE, CFM

Project Manager

HANSON

Biography:
Paolina provides depth of experience in planning, permitting, design, and construction for a wide range of public sector projects. She served as the Cameron County Engineer and represented the County at the RGV MPO Technical Advisory Committee for three years. These have required coordinating with numerous agencies, including the Texas Commission on Environmental Quality (TCEQ), United States Fish and Wildlife Service (USFWS), and the Texas Historical Commission (THC). Paolina has worked with TxDOT, the Community Development Block Grant program, Texas Water Development Board (TWDB), Texas Department of Housing and Community Affairs (TDHCA), and United States Department of Agriculture Rural Development (USDA-RD), which have provided funding for planning, design, and construction of infrastructure improvements.

City of Brownsville, Old Highway 77 Reconstruction, Brownsville, TX.
Role: Project Manager. **Scope:** Hanson provided preliminary engineering and PS&E engineering services for the Old Highway 77 (an Urban Minor Collector) reconstruction from north of the intersection with Ruben M. Torres Boulevard (FM 802) to the south leg of the intersection with Morrison Road (approximately 1.35 miles). This project included the widening and reconstruction of the pavement and upgrading the open channel drainage to a closed drainage system. **Cost/Fee:** $14,310,162.

City of Port Isabel, State Highway 100 Signalization, Port Isabel, TX.
Role: Project Manager. **Scope:** Hanson performed a traffic analysis and assisted the City with the preparation of a TXDOT HSIP application for the installation of a new signal on State Highway 100 in Port Isabel. Services included preparation of a memorandum presenting results and recommendations of the traffic study and preparation of Highway Safety Improvement Program (HSIP) documents to apply for state funding for the construction of proposed signalization improvements. **Cost/Fee:** $705,668.

City of Brownsville, Old Highway 77 Water/Wastewater Improvements, Brownsville, TX. **Role:** Project Manager. **Scope:** The project involves road, drainage, water, and sanitary sewer improvements along Old Highway 77 from Morrison Road to Ruben M Torres Boulevard. Old Highway 77 provides access to several residential neighborhoods and secondary vehicular access to multiple commercial businesses, restaurants, and hotels located along the U.S. Highway 77/83 Frontage Road. The proposed utility improvements include approximately 6,700 linear feet of 8-inch to 30-inch sanitary sewer; 2,400 linear feet of 8-inch sanitary force main; and 4,400 linear feet of 8-inch to 12-inch water main in coordination with proposed road and drainage improvements. **Cost/Fee:** $5,189,836.

Harlingen Waterworks System, Lift Station No. 9 and Force Main Upgrade, Harlingen, TX. **Role:** Project Manager. **Scope:** Hanson is assisting the Harlingen Waterworks System (HWWS) with the design of a new 3,750 GPM triplex lift station to replace the existing aging and undersized lift station No. 9. The new lift station will include a backup generator and building to house VFD's, electrical components, and controls in a climate-controlled environment. The design also includes 8,000 linear feet of 16-inch force main, with tunneling under I-69 and the Arroyo River. Design services include the preparation of drawings, technical specifications, cost estimates, permitting at local, state, and federal levels, as well as bidding services.
Cost/Fee: $6,000,000.

IRIS CANTU

Assistant Project Manager

HANSON

Biography:
Iris provides planning, permitting, design, and construction services for a wide range of public sector projects including water, wastewater, housing rehab and street improvements. These projects have required coordination with agencies including the Texas Commission on Environmental Quality, the Texas Department of Transportation and the U.S. Department of Agriculture. Ms. Cantu has worked with the Community Development Block Grant program, the Texas Department of Housing and Community Affairs and General Land Office, which have provided funding for planning, design and construction of infrastructure improvements.

This project included the widening and reconstruction of the pavement and upgrading the open channel drainage to a closed drainage system. **Cost/Fee:** $14,310,162.

City of Brownsville, Culvert and Sensor Improvements, Brownsville, TX. **Role:** Assistant Project Manager. **Scope:** The City of Brownsville is currently implementing improvements to four culverts at various resaca crossings throughout the City. These upgrades are designed to increase water flow capacity through the crossings, reduce elevated water levels, and mitigate flood risks during heavy rainfall events. As part of the project, the City is installing seven sensors to collect data on bidirectional flow, rainfall, water depth, and velocity at the improved crossings. All sensors will be integrated into the USGS monitoring network. Hanson is providing engineering services to support the planning, design, and implementation of these improvements.. **Cost/Fee:** $1,582,328.

City of Brownsville, Old Highway 77 Water/Wastewater Improvements, Brownsville, TX. **Role:** Project Manager. **Scope:** The project involves road, drainage, water, and sanitary sewer improvements along Old Highway 77 from Morrison Road to Ruben M Torres Boulevard. Old Highway 77 provides access to several residential neighborhoods and secondary vehicular access to multiple commercial businesses, restaurants, and hotels located along the U.S. Highway 77/83 Frontage Road. City of Brownsville, Old Highway 77 Reconstruction, Brownsville, TX.
Role: Roadway Engineer. **Scope:** Hanson provided preliminary engineering and PS&E engineering services for the Old Highway 77 (an Urban Minor Collector) reconstruction from north of the intersection with Ruben M. Torres Boulevard (FM 802) to the south leg of the intersection with Morrison Road (approximately 1.35 miles). This project included the widening and reconstruction of the pavement and upgrading the open channel drainage to a closed drainage system. **Cost/Fee:** $14,310,162.

City of McAllen, El Rancho Road Widening, McAllen, TX.
Role: Roadway Engineer. **Scope:** Hanson performed a traffic analysis and assisted the City with the preparation of a TxDOT HSIP application for the installation of a new signal on State Highway 100 in Port Isabel. Services included preparation of a memorandum presenting results and recommendations of the traffic study and preparation of Highway Safety Improvement Program (HSIP) documents to apply for state funding for the construction of proposed signalization improvements. **Cost/Fee:** $705,668.

City of Brownsville, Old Highway 77 Water/Wastewater Improvements, Brownsville, TX. **Role:** Utility Coordination. **Scope:** The project involves road, drainage, water, and sanitary sewer improvements along Old Highway 77 from Morrison Road to Ruben M Torres Boulevard. Old Highway 77 provides access to several residential neighborhoods and secondary vehicular access to multiple commercial businesses, restaurants, and hotels located along the U.S. Highway 77/83 Frontage Road. The proposed utility improvements include approximately 6,700 linear feet of 8-inch to 30-inch sanitary sewer; 2,400 linear feet of 8-inch sanitary force main; and 4,400 linear feet of 8-inch to 12-inch water main in coordination with proposed road and drainage improvements. **Cost/Fee:** $5,189,836.

City of Brownsville, Gladys Porter Zoo Water/Wastewater Improvements, Brownsville, TX. **Role:** Design Engineer. **Scope:** The Gladys Porter Zoo maintained a private utility network consisting of water and sanitary sewer infrastructure that had been in place for approximately 50 years and was approaching the end of its service life. The existing utility lines, composed of cast iron and vitrified clay pipes, were deteriorating due to corrosion and structural failure, leading to frequent collapses. The project involved the design and construction of a new potable water distribution and wastewater collection system to serve all facilities within the zoo, including animal exhibits, administrative offices, restrooms, water features, and support structures. Scope of services included topographic and subsurface utility surveying, system design, preparation of bidding documents, and construction administration. **Cost/Fee:** $5,111,064.

DAVID MCDONALD, Ph.D., PE, PTOE

Roadway Engineer

Street Infrastructure Evaluation and Improvements; Pavement Management and Improvements; Erosion and Sediment Control Design

HANSON

Biography:
David primarily serves the infrastructure market. His experience includes highway, tollway, local road and interchange design, drainage design, highway construction, and managing complex projects. He has experience in construction estimating, surveying, construction-materials testing, geotechnical engineering, environmental engineering and document writing. David also conducts transportation studies, research, and classroom instruction on engineering topics.

Relevant Project Experience:

City of Brownsville, Old Highway 77 Reconstruction, Brownsville, TX.
Role: Roadway Engineer. **Scope:** Hanson provided preliminary engineering and PS&E engineering services for the Old Highway 77 (an Urban Minor Collector) reconstruction from north of the intersection with Ruben M. Torres Boulevard (FM 802) to the south leg of the intersection with Morrison Road (approximately 1.35 miles). This project included the widening and reconstruction of the pavement and upgrading the open channel drainage to a closed drainage system. **Cost/Fee:** $14,310,162.

City of Corpus Christi, Staples Street Improvements, Corpus Christi, TX.
Role: Design Engineer. **Scope:** This project included the full-depth rehabilitation of South Staples Street from Baldwin Boulevard to Kostoryz Road. This includes various street and utility improvements. As part of the project, all existing pavement and underground infrastructure was demolished and replaced from the southern limits of the curb return at the Baldwin Boulevard Intersection to approximately the western limits of the curb return at the Kostoryz Road Intersection (4,440 linear feet). Traffic signals, bus stops, sidewalks, curb ramps, concrete driveways, and concrete curb/gutter will also be upgraded for this project area. Specific services included preparation of plans, specifications and estimates, coordination of surveying, project bidding, and construction observation and administration.
Cost/Fee: $13,466,633.

San Patricio County, County Road Improvements Program, San Patricio County, TX. **Role:** Design Engineer. **Scope:** Hanson was responsible for the design of the complete roadway rehabilitation including pavement design, roadway drainage culverts and headwalls, bridge-class culverts. Hanson also provided construction oversight, which included roadway and sealcoat inspection and testing, site visits to monitor contractor construction operations for compliance of plans and specifications, standards and progress of work. **Cost/Fee:** $10,000,000.

Norfolk Southern Railway Company, Catlett Road Relocation, Catlett, VA.
Role: Roadway Engineer. **Scope:** Hanson provided roadway design services for the reconstruction of 0.98 miles of State Route 28 (Catlett Road), southwest of Catlett, VA, to accommodate a new second Norfolk Southern Railroad mainline. The project included the realignment of two private drives, reconstruction and extension of existing drainage structures, reconstruction of roadside drainage consisting of ditches, coordination with the Virginia Department of Transportation (VDOT) and Facquier County, and a public presentation. Hanson provided engineering design and performed necessary studies to develop bid documents for the reconstruction and realignment of State Route 28. The bid documents included construction plans, bid sheet, and any special project specifications not covered by NSR or VDOT standard specifications. **Cost/Fee:** $2,130,208.

VICTOR MURILLO, PE

Roadway Engineer

Street Infrastructure Evaluation and Improvements; Pavement Management and Improvements; Erosion and Sediment Control Design

2026 Young Engineer of the Year for ASCE Corpus Christi

HANSON

Biography:
Victor has worked on numerous projects involving ADA improvements, land and site development, roadway, city parks, traffic control plan design, storm water, utility coordination, structural design and bicycle/ pedestrian trails. He also has experience in the preparation of construction plans for private commercial developments, including parking lots, grading, underground storm water drainage system, detention pond and water/ wastewater improvements. He has developed detailed designs, plans, specifications, contract documents and cost estimates for various municipal projects while working closely with project engineers.

San Patricio County, County Road Improvements Program, San Patricio County, TX. **Role:** Design Engineer. **Scope:** Hanson was responsible for the design of the complete roadway rehabilitation including pavement design, roadway drainage culverts and headwalls, bridge-class culverts. Hanson also provided construction oversight, which included roadway and sealcoat inspection and testing, site visits to monitor contractor construction operations for compliance of plans and specifications, standards and progress of work. **Cost/Fee:** $10,000,000.

City of Corpus Christi, City-wide ADA Improvements, Corpus Christi, TX. **Role:** Design Engineer. **Scope:** The City of Corpus Christi provided an initial list of potential locations requiring ADA improvements, compiled from public requests and input from internal City departments. Some locations already had action plans underway. Hanson and City staff reviewed the master list and identified 26 sites without existing plans. Hanson provided the City with an evaluation and preliminary recommendations report. **Cost/Fee:** $47,236 (Fee).

City of Corpus Christi, Residential Street Rebuild Program, Corpus Christi, TX. **Role:** Civil Engineer. **Scope:** In Bond 2018, the residents of Corpus Christi approved funding for the reconstruction of 57 residential streets. Reconstruction included the complete removal of the existing pavement components (base, asphalt, curb & gutter, driveways, etc.), lime stabilizing the subgrade, and constructing new components. Sidewalks that did not meet ADA Standards were removed and reconstructed. The streets were rehabilitated, which included removal of the existing pavement and areas of failed curb and gutter, stabilizing the base and constructing new components. **Cost/Fee:** $42,198,600.

GABRIEL ORTIZ, PE, CFM

Roadway Engineer

Street Infrastructure Evaluation and Improvements; Pavement Management and Improvements; Erosion and Sediment Control Design

HANSON

Biography:
Gabriel has 18 years of experience designing and managing numerous engineering projects, including stormwater design, drainage studies, and site development, for public and private clients in the Corpus Christi and South Texas area. He has experience in technical and computer-aided design for site improvements, stormwater conveyance, streets, water supply and distribution systems, and sanitary sewer collection systems.

Corpus Christi Regional Transportation Authority, ADA Improvements, Corpus Christi, TX. **Role:** Engineer of Record. **Scope:** Hanson provided engineering services for improvements including assessing and incorporating ADA requirements for individuals accessing buses and RTA property. Project tasks included surveying and preparation of plans related to bus stop improvements, as well as environmental assessments and cost estimates. **Cost/Fee:** $40,452 (Fee).

GERRY RANGEL, PE, PTOE

Traffic Engineer and Traffic Signal Design

HANSON

Biography:
Gerry has experience in civil and transportation engineering, including traffic operations, safety improvements, traffic signals, ITS, signing, markings, and pedestrian facilities. He performs traffic studies, modeling, traffic impact analyses, and transportation management planning.

Firm / Total Years Experience:
» 4 / 12

Education:
» MS / Engineering
» BS / Civil Engineering and Architecture

Registrations & Certifications:
» Professional Engineer / TX, FL, IL, IN, KS, MO

Relevant Project Experience:

City of Brownsville, Laredo Road Traffic Signalization Improvements, Brownsville, TX. **Role:** Design Engineer. **Scope:** The project consisted of the design of a traffic signal at the intersection of Laredo Road and Morrison Road. The scope of work included the restriping Laredo Road to one travel lane in each direction with dedicated left-turn lanes on each approach to the Morrison Road intersection, with marked bicycle lanes and dedicated left-turn lanes on Laredo Road. Hanson conducted traffic counts, designed signing, pavement markings, and traffic signal, conducted traffic analysis, prepared timing plans and designed the pedestrian ADA ramps for the intersection. Specific services included preparing 100% plans and specifications, coordinating all surveying and geotechnical, and construction administration. **Cost/Fee:** $337,387.

City of Corpus Christi, Traffic Standards Update, Corpus Christi, TX.
Role: Traffic Engineer. **Scope:** Hanson provided design services to develop standard drawings for the City of Corpus Christi. This project standardized design details for traffic signals, RRFB's, school flashers, signs, pavement markings, bike lanes, on-street parking, traffic control plans, driveways, speed humps and tables, street cuts, and base repairs. Hanson worked closely with several City departments to understand their needs and preferences. In some cases, the City still uses TxDOT standards. Hanson proposed standards that supplement the State's and focus on the City's preferred design alternatives. The City's standards considered geographical location, local vendors, maintenance, internal familiarity with equipment, and local material costs. Hanson cross referenced the City's Infrastructure Design Manual, Unified Building Code, and City ordinances so that notes and design elements aligned with these documents. Hanson's senior CAD team provided deliverables that were consistent with the City's CAD standards. **Cost/Fee:** $277,126 (Fee).

City of Weslaco, Westgate and 18th Intersection Study, Weslaco, TX.
Role: Traffic Engineer. **Scope:** Hanson is conducting a traffic study at the intersection of 18th Street and Westgate Drive to evaluate existing operations and identify opportunities to improve safety and mobility. Services include traffic counts, crash history review, traffic operations analysis, signal warrant evaluation, and assessment of intersection geometry and turn lane needs. The study also includes development and evaluation of up to three conceptual improvement alternatives. Findings and recommendations will be documented in a technical memorandum to support the City's future transportation planning efforts. **Cost/Fee:** $54,900 (Fee).

ERIC HOWALD

Transportation Evaluation

HANSON

Biography:
Eric is a senior traffic systems analyst at Hanson who brings nearly 30 years of experience in traffic signal systems and electrical system design associated with signalization, overhead lighting, and Intelligent Transportation Systems (ITS). He has expertise in optimizing traffic planning and design for cost-effectiveness and functionality, while enhancing performance and minimizing issues during construction. Eric also has extensive knowledge regarding CCTV cameras and video management software/systems. He has designed wide-area networks (WANs) and local-area networks (LANs) to connect traffic signals and other ITS field devices. Eric can implement effective traffic signal timing and optimize transportation network configurations, helping clients achieve safe, efficient public operations.

Relevant Project Experience:

City of McAllen, El Rancho Road Widening, McAllen TX.
Role: Traffic Engineer. **Scope:** Hanson provided preliminary engineering and PS&E engineering services for the El Rancho Road (an Urban Minor Collector) reconstruction from north of the intersection with 2nd Street to the intersection with Jackson Road (approximately 1.2 miles). This project includes widening and reconstruction of the pavement and upgrading the open channel drainage to a closed drainage system, implementation of traffic control, sanitary sewer, water improvements, and ADA improvements consisting of a sidewalk and trail. **Cost/Fee:** $1,173,000.

City of Corpus Christi, Traffic Standards Update, Corpus Christi, TX.
Role: Traffic Engineer. **Scope:** Hanson provided design services to develop standard drawings for the City of Corpus Christi. This project standardized design details for traffic signals, RRFB's, school flashers, signs, pavement markings, bike lanes, on-street parking, traffic control plans, driveways, speed humps and tables, street cuts, and base repairs. Hanson worked closely with several City departments to understand their needs and preferences. In some cases, the City still uses TxDOT standards. Hanson proposed standards that supplement the State's and focus on the City's preferred design alternatives. The City's standards considered geographical location, local vendors, maintenance, internal familiarity with equipment, and local material costs. Hanson cross referenced the City's Infrastructure Design Manual, Unified Building Code, and City ordinances so that notes and design elements aligned with these documents. Hanson's senior CAD team provided deliverables that were consistent with the City's CAD standards. **Cost/Fee:** $277,126 (Fee).

Peoria County, Signal Upgrades, Peoria County, IL. **Role:** Traffic Engineer. **Scope:** Hanson completed traffic signal and ADA updates at three intersections with Airport Road. **Cost/Fee:** $182,458 (Fee).

City of Peoria, University and Northmoor Intersection, Peoria, IL.
Role: Traffic Engineer. **Scope:** This project included the complete reconstruction of the Northmoor and University intersection. The work consisted of removing the existing roadway and adjacent sidewalk and constructing a new roadway section with curb and gutter, sidewalks along the north side of the road, and a multi-use path along the south side; roadway profile and alignment adjustments; storm sewers; green infrastructure to help reduce stormwater runoff; traffic signals at the intersection; and roadway lighting. **Cost/Fee:** $670,000 (Fee).

RUBEN PERALEZ, PE

Structural Engineer (Improvements & Design)

HANSON

Biography:
Ruben is a structural engineer with experience as a structural designer, windstorm inspector, structural investigator and inspector on a variety of building and miscellaneous structures. Ruben's design and inspection experience includes working with a variety of building structural materials, including timber, steel, masonry and concrete. Additionally, he has performed quality control audit inspections of numerous precast concrete fabrication plants.

Firm / Total Years Experience:
» 10 / 15

Education:
» BS / Structural Engineering

Registrations & Certifications:
» Professional Engineer / TX
» Qualified Windstorm Inspector

Relevant Project Experience:

Willacy County, Heritage and Wellness Center, Willacy County, TX.
Role: Structural Engineer. **Scope:** Hanson completed foundation design for a new pre-engineered metal building that serves a new multi-purpose community building. **Cost/Fee:** $3,973,601.

Harlingen Waterworks System, Lift Station No. 9 and Force Main Upgrade, Harlingen, TX. **Role:** Structural Engineer. **Scope:** Hanson is assisting the Harlingen Waterworks System (HWWS) with the design of a new 3,750 GPM triplex lift station to replace the existing aging and undersized lift station No. 9. The new lift station will include a backup generator and building to house VFD's, electrical components, and controls in a climate-controlled environment. The design also includes 8,000 linear feet of 16-inch force main, with tunneling under I-69 and the Arroyo River. Design services include the preparation of drawings, technical specifications, cost estimates, permitting at local, state, and federal levels, as well as bidding services. **Cost/Fee:** $6,000,000.

City of McAllen, El Rancho Park Improvements, McAllen, TX.
Role: Structural Engineer. **Scope:** The City of McAllen proposed making improvements to their El Rancho Park with Hanson assisting the City with the design of a parking lot (13 spaces) with lighting, irrigation plan for border of parking lot. The project also features an eight-foot-wide concrete trail around detention pond (approximately 2,000 linear feet in length), and foundation design for prefabricated restroom facilities. Hanson also provided ADA registration and plan review, establishing location of playground structures (to be designed by others) and design sidewalk from parking lot to playground structures. **Cost/Fee:** $263,724.

City of San Benito, Maintenance Yard Lift Station, San Benito, TX.
Role: Structural Engineer. **Scope:** The project consisted of preliminary design, final design, bidding, and construction administration services for the replacement of the existing San Benito lift station. Hanson provided preparation of plans for construction of a new wet well, above grade sanitary lift station, station piping and valves, electrical controls, site improvements, influent line, discharge piping, re-routing existing force mains that feed into the existing open air wet well and abandonment of the existing open air wet well. **Cost/Fee:** $295,380.

City of Corpus Christi, DEAAG NASCC Wastewater Line Replacement, Corpus Christi, TX. **Role:** Structural Engineer. **Scope:** Hanson replaced 5,000 linear feet of 12-inch to 24-inch gravity sanitary sewer and 19 manholes, including installation of two new manholes and lateral reconnections. Challenges included rehabilitation of sewers crossing a Navy airfield and Navy environmental requirements to limit excavation due to PFAs in groundwater. Hanson's solution included trenchless installation (pipe bursting) for a majority of the project alignment to address this challenge. **Cost/Fee:** $3,102,000.

COLTON PHILLIPP, PE, CFM

Hydraulics & Hydrology (H&H) and Drainage Engineer

HANSON

Biography:
Colton's experience encompasses general civil engineering design, including site development and drainage systems. He is proficient in AutoCAD Civil 3D, ArcMap GIS, HEC-HMS, HEC-RAS, Adobe Acrobat, Microsoft Excel, Microsoft Word and Microsoft PowerPoint. He is also versed in technical writing expectations of proposals, presentations, lab reports, and other documents.

Firm / Total Years Experience:
» 10 / 12

Education:
» BS / Biological and Agricultural Engineering

Registrations & Certifications:
» Professional Engineer / TX
» Certified Floodplain Manager

Relevant Project Experience:

City of Brownsville, Old Highway 77 Reconstruction, Brownsville, TX.
Role: Drainage Engineer. **Scope:** Hanson provided preliminary engineering and PS&E engineering services for the Old Highway 77 (an Urban Minor Collector) reconstruction from north of the intersection with Ruben M. Torres Boulevard (FM 802) to the south leg of the intersection with Morrison Road (approximately 1.35 miles). This project included the widening and reconstruction of the pavement and upgrading the open channel drainage to a closed drainage system. **Cost/Fee:** $14,310,162.

City of McAllen, El Rancho Road Widening, McAllen, TX.
Role: Drainage Engineer. **Scope:** Hanson performed a traffic analysis and assisted the City with the preparation of a TXDOT HSIP application for the installation of a new signal on State Highway 100 in Port Isabel. Services included preparation of a memorandum presenting results and recommendations of the traffic study and preparation of Highway Safety Improvement Program (HSIP) documents to apply for state funding for the construction of proposed signalization improvements. **Cost/Fee:** $705,668.

City of Brownsville, Four Corners Detention Pond Park, Brownsville, TX.
Role: Drainage Engineer. **Scope:** The City of Brownsville is proposing to control stormwater runoff by constructing a multi-use detention facility in the Four Corners area. The project improvements consist of the diversion of stormwater into a proposed seven-acre detention pond. The existing detention pond at the North corner of the property will remain and be utilized as a stormwater quality sedimentation basin. The existing drainage swale along the Northwest side of the subject property will be regraded/redirected to act as a stormwater quality bioswale. A portion of the proposed detention pond will be multipurpose and will serve as a sports field when not inundated. The project is being funded by the Texas Water Development Board and local funding. **Cost/Fee:** $1,554,871.

Cities of Los Fresnos and Primera, Drainage Master Plans, Los Fresnos and Primera, TX. **Role:** Drainage Engineer. **Scope:** These projects consists of developing comprehensive drainage plans to address critical drainage problems within the Cities of Los Fresnos and Primera. The Master Drainage Plans will provide a comprehensive evaluation of existing drainage conditions, provide inventory and mapping of existing drainage infrastructure, review applicable local, state, and federal regulations related to drainage, recommendations of changes to local rules, and preparation of a capital improvement plan that includes budget estimates for proposed improvements and funding mechanisms for CIP projects. This project is being funded by Texas Water Development Board and local funding. **Cost/Fee:** $678,704 (Los Fresnos); $285,000 (Primera).

CLINT WOODS, PE

Water and Wastewater Evaluation and Improvements Engineer

HANSON

Biography:
Clint has experience in water infrastructure engineering to Hanson's staff, primarily serving the infrastructure market through civil engineering design and analysis. His design projects have included storm and sanitary sewer design and rehabilitation. He also has project experience in residential and commercial subdivisions, commercial site design, stormwater relief projects, sanitary lift station designs for private residential subdivisions, water and sewer main extensions, bike trails, and the development of recreation areas. His inspection experience includes erosion control, material testing, and road and bridge.

Firm / Total Years Experience:
» 10 / 21

Education:
» BS / Civil Engineering

Registrations & Certifications:
» Professional Engineer / TX, KS, KY, MO, WA

Relevant Project Experience:

City of Primera, Lift Stations Evaluation and Rehabilitation, Primera, TX. **Role:** Water/Wastewater Engineer. **Scope:** This project involves the evaluation and rehabilitation of the 11 lift stations that comprise the City of Primera's wastewater system. The project includes evaluating hydraulic capacities; replacing pumps, piping, and valves; and rehabilitating wet wells and valve vaults impacted by hydrogen sulfide gas. Additional improvements include site upgrades, bypass pumping, installation of new electrical and PLC controls with SCADA integration, and the addition of backup generators. Hanson also provided environmental services, including NEPA compliance, public involvement activities, and coordination related to endangered species to support regulatory requirements and project advancement. **Cost/Fee:** $4,405,000.

City of Brownsville, Gladys Porter Zoo Water/Wastewater Improvements, Brownsville, TX. **Role:** Water/Wastewater Engineer. **Scope:** The Gladys Porter Zoo maintained a private utility network consisting of water and sanitary sewer infrastructure that had been in place for approximately 50 years and was approaching the end of its service life. The existing utility lines, composed of cast iron and vitrified clay pipes, were deteriorating due to corrosion and structural failure, leading to frequent collapses. The project involved the design and construction of a new potable water distribution and wastewater collection system to serve all facilities within the zoo, including animal exhibits, administrative offices, restrooms, water features, and support structures. Scope of services included topographic and subsurface utility surveying, system design, preparation of bidding documents, and construction administration. **Cost/Fee:** $5,111,064.

City of Brownsville, Old Highway 77 Water/Wastewater Improvements, Brownsville, TX. **Role:** Water/Wastewater Engineer. **Scope:** The project involves road, drainage, water, and sanitary sewer improvements along Old Highway 77 from Morrison Road to Ruben M Torres Boulevard. Old Highway 77 provides access to several residential neighborhoods and secondary vehicular access to multiple commercial businesses, restaurants, and hotels located along the U.S. Highway 77/83 Frontage Road. The proposed utility improvements include approximately 6,700 linear feet of 8-inch to 30-inch sanitary sewer; 2,400 linear feet of 8-inch sanitary force main; and 4,400 linear feet of 8-inch to 12-inch water main in coordination with proposed road and drainage improvements. **Cost/Fee:** $5,189,836.

City of Los Fresnos, Wastewater Treatment Plant Headworks Improvements, Los Fresnos, TX. **Role:** Project Engineer. **Scope:** This project included expansion of plant capacity to 2.0 MGD. Major plant components are an oxidation ditch with two aerators, a clarifier, a concrete flow box, sludge return pumps, chlorine disinfection, sludge drying beds, additional asphalt drive, and new headworks. **Cost/Fee:** $3,100,000.

LEE BLOOME, PE

Utility Infrastructure Evaluation Engineer

HANSON

Biography:
Lee's experience includes design and construction of sanitary sewers and lift stations, potable and raw water pump stations and elevated tanks. He is also experienced in computerized hydraulic modeling of water distribution systems, grants, and water and sewer rate evaluation and determination.

Firm / Total Years Experience:
» 20 / 28

Education:

Registrations & Certifications:
» Professional Engineer / TX, FL, IL, IN, MO

Relevant Project Experience:

Harlingen Waterworks System, Lift Station No. 9 and Force Main Upgrade, Harlingen, TX. **Role:** Water/Wastewater Engineer. **Scope:** Hanson is assisting the Harlingen Waterworks System (HWWS) with the design of a new 3,750 GPM triplex lift station to replace the existing aging and undersized lift station No. 9. The new lift station will include a backup generator and building to house VFD's, electrical components, and controls in a climate-controlled environment. The design also includes 8,000 linear feet of 16-inch force main, with tunneling under I-69 and the Arroyo River. Design services include the preparation of drawings, technical specifications, cost estimates, permitting at local, state, and federal levels, as well as bidding services.
Cost/Fee: $6,000,000.

City of Los Fresnos, Wastewater Treatment Plant Headworks Improvements, Los Fresnos, TX. **Role:** Project Engineer. **Scope:** This project included expansion of plant capacity to 2.0 MGD. Major plant components are an oxidation ditch with two aerators, a clarifier, a concrete flow box, sludge return pumps, chlorine disinfection, sludge drying beds, additional asphalt drive, and new headworks. **Cost/Fee:** $3,100,000.

City of San Benito, Maintenance Yard Lift Station, San Benito, TX.
Role: Water/Wastewater Designer. **Scope:** The project consisted of preliminary design, final design, bidding, and construction administration services for the replacement of the existing San Benito lift station. Hanson provided preparation of plans for construction of a new wet well, above grade sanitary lift station, station piping and valves, electrical controls, site improvements, influent line, discharge piping, re-routing existing force mains that feed into the existing open air wet well and abandonment of the existing open air wet well. **Cost/Fee:** $295,380.

City of Greenville, Wastewater Treatment Plant Headworks Expansion, Greenville, TX. **Role:** Water/Wastewater Engineer. **Scope:** Hanson is providing assistance with permitting, design, bidding, and construction phase services for the expansion of the City's existing wastewater treatment plant from six to 18 MGD. The plant's influent lift station is being modified to accommodate the increased flow. The proposed design includes the addition of a second wet well adjacent to the existing one, which will house two new vertical turbine solids handling pumps. Once these new pumps are installed, the existing wet well will be isolated, and the three current submersible pumps will be replaced with three new vertical turbine solids handling pumps. This new pumping arrangement, combined with variable frequency drives, will pace the influent flow, helping a smooth flow to the downstream treatment units.
Cost/Fee: $4,950,000.

AUSTIN THOMPSON, PE

Electrical Engineer

HANSON

Biography:
Austin has electrical engineering design experience with a broad background in power, lighting, communication, and building system infrastructure. His technical experience includes power load summary studies and calculations, low-voltage and medium-voltage power distribution, electrical protective device calculations and coordination, electrical equipment sizing, fire alarm and mass notification system design, building lighting control systems, fiber-optic system design, electrical equipment area classification, and heat trace design. His experience also includes power and low-voltage design to support BAS replacements and central energy plant upgrades, including re-designing electrical systems within aging infrastructure for chiller, boiler, and pump retrofits.

BRADLEY PERROTT, PE, EMP, GGP, LEED AP

Mechanical and Plumbing Engineer

HANSON

Biography:

Bradley's mechanical experience includes a focus on commissioning, HVAC design, and quality assurance for projects across the United States. His work includes extensive involvement in multi-discipline teams that support municipal, where reliability, system performance, and technical rigor are priorities. He provides mechanical leadership on complex facilities that require close coordination among architectural, structural, and electrical disciplines to achieve mission-ready and energy-efficient solutions. Bradley's background includes the development of standards and guidelines for energy-efficient design and sustainability.

Firm / Total Years Experience:

» Professional Engineer / TX, FL, GA, IN, IA, LA, NC, SC
» Energy Management Professional
» Green Globes Professional
» Leadership in Energy and Environmental Design

Relevant Project Experience:

Lake County, Government Complex Chilled Water Feasibility Study and Site Piping, Leesburg, FL. **Role:** Mechanical Engineer. **Scope:** Hanson provided assessment services (mechanical) to study the feasibility of migrating the historical courthouse, county administration building, and Sheriff's office to the north central energy plant chilled water loop within the Lake County Government Complex. Upon the completion of the feasibility study, Lake County requested Hanson provide design and CA services for the option selected in the final report. Hanson provided mechanical, structural, and survey design and construction administration services for the addition of new chilled water site piping within the Lake County Government Complex. The design included a dedicated 12-inch chilled water supply and return piping from the North CEP to the South CEP and bypass valves added to the existing main piping of the South CEP to allow the plant to serve as redundancy to the North CEP. **Cost/Fee:** $983,442.

U.S. Army Corps of Engineers - Portland District, Detroit Dam IEPT, Linn County, OR. **Role:** Mechanical Engineer. **Scope:** Bradley served on the safety assurance review panel for the downstream fish passage floating screen structure (FSS) and selective withdrawal structure (SWS) to facilitate migration of desirable species. Hanson's scope included a review of the DDR and sketches with regards to the FSS ballast pumps and HVAC (electric heaters, split systems, ductwork) for the control room, as well as the SWS hoistways, gate mechanisms, and pumps. Hanson's scope also included participation in calls and meetings and providing review comments. **Cost/Fee:** $315,000,000.

City of Cedar Rapids, Flood Damage Reduction, Cedar Rapids, IA. **Role:** Mechanical Engineer. **Scope:** As subconsultants, Hanson's hydraulic, geotechnical and structural engineers were part of a multi-discipline design team for the three-mile-long flood risk reduction system on the west side of the Cedar River through downtown Cedar Rapids. Following the flood of record in 2008, the completion of a flood risk reduction system for the Cedar River, which bi-sects downtown Cedar Rapids, was critical to having a vibrant Downtown and has been identified as one of the top goals for the City. The flood risk reduction system consists of earthen levees, floodwalls, demountable floodwalls, combination floodwalls, road and railroad closure structures, pump station analysis and critical infrastructure penetrations of the net levee section. The Hanson team was responsible for the geotechnical, structural, and hydraulic design of the system using USACE design criteria. We prepared hydraulic design submittals to state regulatory agencies, and facilitated coordination with FEMA Region VII regarding remapping of Cedar River floodplain and floodway. **Cost/Fee:** $8,043,930.

ROMEO BARRERA, PE

Civil/Site Engineer

HANSON

Biography:
Romeo has seven years of experience in civil infrastructure, site development, roadway, and utility projects. He has participated in a wide range of municipal, state, and private developments across Texas. Romeo's expertise includes the design and coordination of water, wastewater, drainage, and roadway improvements, as well as project management, permitting, and construction administration. His background includes substantial work with TxDOT standards, local development codes, and environmental compliance. Romeo's experience spans multiple firms where he developed a strong foundation in design, inspection, and multidisciplinary coordination.

Relevant Project Experience:

City of Edinburg, Regional Disposal Facility Semi-Annual Groundwater Monitoring and Reporting, Edinburg, TX. **Role:** Project Manager. **Scope:** This project consisted of performing the Semi-Annual Groundwater Monitoring and Reporting for the Edinburg Regional Disposal Facility. Two active landfills and two permits are associated with this facility. Groundwater monitoring and reporting was performed for both facilities concurrently. Additionally, Verification Resampling Events were conducted, and Alternate Source Demonstrations were prepared for both permitted facilities. **Cost/Fee:** $165,048.

City of Edinburg, Type IV Landfill Module M-5 Development, Edinburg, TX. **Role:** Geotechnical. **Scope:** Hanson is completing design, bidding and construction phase services for a 15-acre Type IV MSW disposal cell at the City of Edinburg Regional Disposal Facility. **Cost/Fee:** $2,064,580.

City of Kingsville, MSW Landfill Groundwater Monitoring Services, Kingsville, TX. **Role:** Project Manager. **Scope:** Performed verification resampling, background and semi-annual groundwater monitoring events at numerous MSW landfill facilities. Prepared verification resampling, background data evaluation, statistical evaluations, alternate source demonstrations, and semi-annual and annual reports for submittal to the TCEQ. Prepared new permit, permit amendment, and permit modification applications, GWSAP preparations, geology reports, groundwater monitoring system certifications, and monitoring well installations and repairs. **Cost/Fee:** $115,000.

City of Fort Stockton, Permit Application for a New Arid Exempt Municipal Solid Waste Landfill, Fort Stockton, TX. **Role:** Project Manager/Scientist. **Scope:** Responsible for preparation of permit application for submittal to the Texas Commission on Environmental Quality (TCEQ) for a new arid exempt landfill near Fort Stockton, Texas. A constraints analysis was performed on the proposed site prior to proceeding with the permit application to identify potential issues with permitting a new landfill at the proposed site. Coordination with federal, state and local agencies was conducted, as required, in the TCEQ permitting process. A soil-boring plan was also prepared and executed to obtain relevant subsurface information necessary for the design of the proposed facility. A soil-boring report and groundwater study of the area were prepared following the soil-boring investigation. **Cost/Fee:** N/A

JON REINHARD, PE

Environmental Support

HANSON

Biography:
Jon has an extensive background in the solid waste sector. He has experience in planning, permitting, design and construction administration for a wide range of solid waste facilities, including transfer stations and municipal, industrial and hazardous waste landfills. He also has experience with both single and double composite liner systems for waste containment, leachate collection and leak detection systems, landfill gas control and collection systems, storm water management and both lined and unlined cover systems. Jon's regulatory experience includes permit applications, permit modifications and amendments, temporary authorizations, financial assurance estimates and public meetings associated with the permit application process.

City of Edinburg, Unit 6, Cell 7B Construction, Edinburg, TX.
Role: Project Manager. **Scope:** This project consisted of developing a 8.5-acre MSW disposal cell at the Edinburg Regional Disposal Facility. Services included design, bidding, construction administration, surveying, and TCEQ reporting. This project included a composite liner system (GCL and HDPE geomembrane), leachate collection system, groundwater management, and drainage improvements. **Cost/Fee:** $1,700,000.

City of Edinburg, West Side Infrastructure Improvements, Edinburg, TX.
Role: Project Manager. **Scope:** This project consisted of developing infrastructure improvements on the west half of this regional landfill. Improvements included three 10-acre lined stormwater ponds, approximately 8,500 linear feet of roadway/berms, approximately 10,000 linear feet of stormwater drainage channels, fencing, box culverts, and utility upgrades and relocations. **Cost/Fee:** $5,889,690.

City of Edinburg, Type IV Landfill Module M-5 Development, Edinburg, TX.
Role: Project Manager. **Scope:** This project included design, bidding, and construction phase services for a 15-acre Type IV MSW disposal cell at the City of Edinburg Regional Disposal Facility. **Cost/Fee:** $1,969,500.

City of Edinburg, Compliance Services, Edinburg, TX. Role: Project Manager. **Scope:** Waste profile reviews, and coordination in support of Edinburg Regional Disposal Facility compliance with local, state, and federal regulations. Repeat business for prior services. **Cost/Fee:** $400,000 (Fee).

City of Corpus Christi, Cefe F. Valenzuela Landfill, Development of Sector 3C, Corpus Christi, TX. Role: Project Manager. **Scope:** This project was comprised of the development of a 31-acre MSW disposal cell at the Cefe Valenzuela Landfill. Services included planning, permitting, design, bidding, construction phase, surveying and TCEQ reporting (GCLER, GLER, BER). This project included groundwater management, an alternate liner system using a GCL component, roadway and drainage improvements, and a perimeter litter control fence. **Cost/Fee:** $5,600,000.

City of Corpus Christi, Cefe F. Valenzuela Landfill, Development of Sector 2A, Corpus Christi, TX. Role: Project Manager. **Scope:** This project consisted of developing a 26-acre MSW disposal cell at the Cefe Valenzuela Landfill. Services included planning, permitting, design, bidding, construction administration, surveying, and TCEQ reporting. This project included a composite liner system (compacted clay and HDPE geomembrane), leachate collection system, groundwater management, roadway and drainage improvements, adjacent stormwater detention pond development, electrical improvements, and a perimeter litter control high fence.
Cost/Fee: $7,600,000.

1 RAMIRO GOMEZ, JR.
Director, Department of Solid Waste Management | City of Edinburg

(956) 381-5635 | rgomez@cityofedinburg.com

Projects have included landfill improvements and development, groundwater monitoring, and environmental compliance services.

2 RENE GONZALEZ, PE
Transportation Engineer | City of McAllen

(956) 681-1150 | rgonzalez@mcallen.net

Project includes the widening and reconstruction of El Rancho Road in McAllen.

3 PETER HERMIDA, PE
City Engineer | City of Weslaco

(956) 973-3130 | phermida@weslacotx.gov

Projects have included traffic engineering, water/wastewater improvements, and general engineering services.

4 CARLOS LASTRA, PE
Deputy Director/City Engineer | City of Brownsville

(956) 541-1012 | carlos.lastra@brownsvilletx.gov

Projects have included drainage improvements, roadway reconstruction and improvements, a detention pond, and historic trail.

5 ROBERTO HERNANDEZ, PE, CFM
City Engineer | City of Harlingen

(956) 216-5280 | rhernandez@harlingentx.gov

Project includes the extension of the Arroyo Colorado Hike and Bike Trail in downtown Harlingen.

6 MARK MILUM
City Manager | City of Los Fresnos

(956) 233-5768 | mmilum@losfresnostx.gov

Projects have included drainage improvements, street improvements, wastewater treatment plant improvements, park improvements, sidewalk improvements, and water/wastewater improvements.

7 CELINA GONZALES
City Manager | City of Primera

(956) 493-9654 | cgonzalez@cityofprimera.com

Projects have included sidewalk improvements, drainage master planning, drainage improvements, lift station rehabilitations, and sanitary sewer improvements.

8 JARED HOCKEMA
City Manager | City of Port Isabel

(956) 943-2682 | ecadministrator@copitx.com

Projects have included a trail extension, design of a park, street improvements, and traffic improvements.

9 GABRIEL TREVINO JR., PE, M.ASCE
Utility Engineer | Harlingen Waterworks System

(956) 430-6110 | gtrevino@hwws.com
Projects have included facility generator installation and lift station and force main reroute upgrade.

INSURANCE CLAIMS WITHIN THE LAST FIVE YEARS

Information on the types and amounts of insurance carried by Hanson, including General Liability, Auto Coverage, Workers Compensation, and Professional Liability Coverage is provided on the attached Certificate of Insurance. Professional Liability Insurance claims in the past 5 years (City of Alice, TX v. Marshall Company and Naismith Engineering; Kenneth McConnell v. United Contractors Midwest, Inc.) are included in the list attached to the Litigation Disclosure Form. One Workers Compensation claim was filed against Hanson by a former employee in the past 5 years. Hanson is a national firm that has been in business continuously for over 71 years. Such claims will not result in any significant loss to the company not covered by insurance or have an adverse impact on its ability to provide professional services to its clients.

PROFESSIONAL SERVICES AGREEMENT

Hanson has read the Professional Services Agreement and meets the prerequisite insurance requirements; however, Workers Compensation and Architectural/Engineering Professional Liability Insurance policies do not allow third parties, including clients, to be named as additional insureds. The RFQ at page 6 invites respondents to "attach to his/her RFQ a list of any exceptions to the specifications/requirements." If selected, Hanson would like the opportunity to discuss certain contract terms in the sections of Professional Services Agreement listed below. The City of Edinburg has agreed to these exceptions previously with Hanson.

- Section IV H. and J.
- Section V B. (f, g, h) and I.
- Section VI B. and E.
- Section VII F.
- Section X A. and B.
- Section XI

Re: Request for Qualifications - Professional Engineering Services
RFQ NO.: 2026-7

To Whom it May Concern;

We are delighted with the opportunity to present our firm's statement of qualifications and proposal to provide our services to the City of Edinburg.

.

Izaguirre Engineering Group, LLC, is one of the few 100% woman owned and managed company here in the lower Rio Grande Valley, headquartered at 2121 E. Griffin Parkway Suite 2, Mission, Texas. Izaguirre Engineering Group LLC has been providing professional engineering services since its establishment in 2007. During the past 17 years Izaguirre Engineering Group, has successfully performed projects for City, County, Federal, and private clients throughout the South Texas region. Our civil engineering, construction management, construction materials testing and quality control capabilities are at your service.

Izaguirre Engineering Group's Senior Project Manager/ Senior Project Engineer, Gilberto A. Gracia, PE.. has over 38 years of engineering and design experience. M.r Gilberto A. Gracia, PE. . has a comprehensive wide-ranging knowledge base of the regional characteristics of the Rio Grande Valley. We are a multi-disciplinary consulting firm in civil design engineering, construction quality control engineering, construction field engineering, GPS services & construction materials testing.

Within our spectrum of experience is expertise in: Drainage master plans, Hydraulic Design &Analysis, water and sanitary sewer designs, wastewater treatment facilities, planning and development, CCN Studies, lift stations, FEMA Flood Zone Studies &LOMRs, Storm Water Drainage Systems, Minor/Major Roadway Design, Minor/Major Roadway Development, TDOT Complex Highway Design, Traffic Engineering Studies, Traffic Control, Project Quality Control, Systems, & Inspections, & Earthwork Construction Management. Together with various other categories not outlined above. As such, Izaguirre Engineering Group has assembled a staff/ team knowledgeable and experienced in various areas of civil engineering.

Izaguirre Engineering Group's primary point of contact for any matters regarding our Statement of Proposals is Diana .L Izaguirre, President of Izaguirre Engineering Group, LLC. She can be reached by phone at (956) 240-3246 or email at diana.izaguirre@yahoo.com. Our current workload allows us to confidently provide Hidalgo County project deliverables in a timely and professional matter. Thank you for the opportunity to submit a Statement of Qualifications and for your time and consideration in this matter.

Regards,

Diana Izaguirre
President

ABOUT OUR FIRM

IZAGUIRRE
Engineering Group LLC.

Izaguirre Engineering Group LLC has an office located at 2121 E. Griffin Parkway Suite 2, Mission TX 78574. We are licensed by the Texas Board of Professional Engineers Firm No. 10214.

Izaguirre Engineering Group LLC has carefully chosen experienced and knowledgeable key personnel to direct the projected services. We have had an excellent working relationship with the Texas Department of Transportation, International Boundary and Water Commission, Hidalgo County Right-of-Way Department, Hidalgo County Drainage District No.1, Hidalgo County Precinct 1, Precinct 2, & Precinct 3, City of Mission, City of McAllen, City of Edinburg, City of Pharr and several Hidalgo County Irrigation Districts.

OUR VISION

"Integrity, loyalty, and dedication."

MISSION

We take pride in the establishment of our team member within the company. United we are driven by a common goal of professional achievement and providing our clients with the best service and producsts.

Diana Izaguirre

President of Izaguirre Engineering Group, LLC

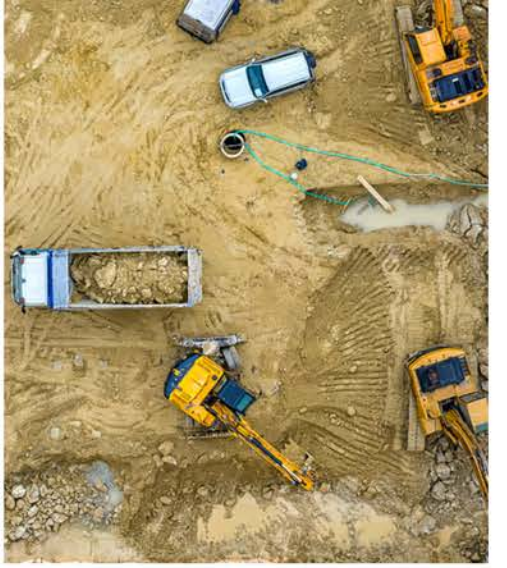
Civil Engineering

Our Team can undertake many specific civil engineering projects. Our collective years of expertise include:

- Land Planning/Engineering
- Hydrologic Studies
- Roadway Hydraulic Design
- Route Studies & Schematic Design
- Minor Roadways
- Major Roadways
- Complex Highways
- Bridge Layouts -
- Minor Bridges
- Major Bridges
- Roadway/Highway Design -
- Minor Roadways
- Major Roadways
- Complex Highways
- Freeway Interchanges
- Storm Water Systems Analysis & Design
- HEC-RAS and HEC-HMS
- Flood Zone Mapping
- Storm Water Detention Basin Design
- Traffic Engineering Studies
- Signing, Marking, & Channelization
- Signalization
- Roadway Construction -
- Management
- Inspection
- Civil Engineering
- Value Engineering
- Utility Engineering
- Construction Management

Scope of Services

Izaguirre Engineering Group, LLC., provides the following consulting services:



- Assist the City in developing and administering maintenance programs for roadways, bridges, and storm drainage facilities.
- Assist the Cityin TCEQ compliance and reporting for storm water infrastructure.
- Assist the City in preparation and administration of a Capital Improvements Plan.
- Identify necessary capital improvement projects, contract for associated engineering design services, bid & award projects, and administer construction contracts.
- Perform engineering inspection services for new residential and commercial development as requested by City staff.
- Prepare special studies and reports on a variety of subjects and activites for Mayor and City Council.
- Attend City Council, Planning & Zoning Commission, and other City Board and Commission meetings as requested by City staff.

Engineering services continued:

- Working with City, County and State officials to assure compliance with all laws, ordinances, codes and regulations, including permit process compliance.
- Development and review of solicitations for contractors to perform this scope of work.
- Production of construction documents.
- Providing Construction Administration for related aspects of the project.
  - Participation in the development of a punch list and reviewing resolution of these items.
  - Preparation of topographic map: including a field survey of the Project Site. Survey points to be collected shall include sidewalk cross sections, driveways, existing streets, site grid points, building corners, perimeter conforms, site high and low points and significant features such as light standards, utility boxes, utility poles, lines or wires crossing the site, and drainage features such as drop inlets and slope breaks.
  - Preparation of site grading and drainage plan, including the following: All topographic points to establish grade, including slope breaks, site high and low points, building corners, significant features, slopes and elevations to indicate positive flow direction. Notes and table identifying the estimated quantities and the type of material to be cut and to be filled, and all standard City of Fort Worth and City of Saginaw Grading and Drainage requirements for permitting and inspection.
- Site storm drain upgrades and re-grade of existing hardscapes shall be indicated on the plans.
- Zoning Services
- Surveying Services & Platting
- Critical Dimension Layout Plans
- Paving Plans, Specs and Details
- Existing Utility Locations, Sizes & Capacities
- Site Utility Design, Plans, Specs and Details to within 5' of Buildings
- Ability to Secure and Manage the following Services if not In-House: o Landscape Design & Documentation o Irrigation Design & Documentation
- Delivery of all documents at the end of the project
- Presentations to the City Council, administrators and the community related to construction programs when requested
- Coordinating with the sub-contractors in developing "as-builts" of the completed work.
- Coordinating with District vendors and consultants

Our project engineer Gilberto A. Gracia, P.E., and team have extensive knowledge in analyzing drainage problems and developing cost-effective solutions. Our team also includes experts in construction who bring wide-ranging construction methods and techniques that help develop more practical solutions to any construction design. Izaguirre Engineering Group, LLC employees are all local residents in an effort to continue contributing to the Rio Grande Valley economy.

CAPABILITY TO PERFORM WORK

I*zaguirre Engineering Group* has provided services to City, County, Federal, and private clients. We maintain CADD, GPS systems and Troxler Nuclear Gauges with dedicated long term team members. Our team has completed many projects that have served as building blocks to the growth of this company. Existing conditions research of any project is one of the most important considerations in development of future design. Standard operating procedure of our project manager is to visit each site before, during, and after design to ensure the best quality product and eliminate the possibilities of large change and costly orders. At Izaguirre Engineering Group we strive to assure that all reports, calculations, plans, specification, estimates and as-built's are prepared in accordance with accepted design and engineering practices. Should we require engaging a sub-consultant at any point of our projects we will consult with the HCDD1 prior to considering any engagement. Nevertheless, we are confident that our key personnel can carry out any and all work to be performed. The majority of our clients are returning clients through the years because we treat each and every single project like if it was one of our own. All of our projects have been on time and on-budget. We work very well with construction companies, given that we also offer Construction Problem Resolution Consulting. During the construction phases of many projects contractors often encounter unforeseen changes and challenges to which we have extensive experience in resolving all concerns in a productive and cost effective manner.

Our current workload allows us to focus on the needs of Hidalgo County and proved them with exceptional customer service. Diana L. Izaguirre the President of Izaguirre Engineering Group is very involved in coordinating any and all projects between municipalities, the county, clients, affected property owners, utility companies (AEP, Magic Valley, Spectrum, AT&T) and or TXDOT as she has an exceptional working relationship with the Rio Grande Valley working community. Our Company's President sits as Chairman of the Planning and Zoning Board for the City of Mission, Texas as well as the President for Hidalgo County Irrigation District No. 6. She has been building relationships with entities all over the Rio Grande Valley from Brownsville to Rio Grande City.

We take pride to announce that many of our team members have been with us since the establishment of this company. The *Integrity, loyalty, and dedication* of our team unites and drives us to a common goal of professional achievement and provide our clients with the best products.

IZAGUIRRE Engineering Group LLC.

OUR COMPLETED PROJECTS

PROJECTS

- Izaguirre Engineering Group, LLC – (Projects):
  - Project: PD Lateral Phase I – 2018 Bond Referendum Project #29 Location: Western Rd and FM 107
- Type: Drainage Improvements
  - Estimated Cost of Construction: $5,400,00.00
- Project: PD Lateral Phase II – 2018 Bond Referendum Project #29D Location: Western Rd and FM 107
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $475,000.00
- Project: Sunflower Drain – 2018 Bond Referendum Project #36 Location: Sunflower Rd
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $2,300,000.00
- Project: Western Rd & 9 Mile – 2018 Bond Referendum Project #37 Location: Western Rd and 9 Mile
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $1,300,000.00
- Project: 3 ½ Mile Rd & Bentsen Rd – 2018 Bond Referendum Project #1 Location: Bentsen Rd
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $985,000.00
- Project: 4 Mile Rd & Minnesota Rd – 2018 Bond Referendum Project #4 Location: Minnesota Rd
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $958,000.00
- Project: PD Lateral Phase 5 Drain Improvements– 2023 Bond Referendum Project # 15
  - Location: Texan Rd & 6 Mile (PCT 3)
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $ 1,500,00.00
- Project: West Main Drain Improvements – 2023 Bond Referendum Project #23
  - Location: Inspiration & 6 Mile to Conway Ave. (PCT 3)
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $ 2,300,000.00

OUR COMPLETED PROJECTS

PROJECTS CONTINUED

- Project: Mission- McAllen Drain Improvements – 2023 Bond Referendum Project #12
  - Location: Bentsen Rd & 6 ½ Mile West and East Drain (PCT 4)
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $2,600,000.00
- Project: Pharr –McAllen Drain Improvements – 2023 Bond Referendum Project #9
  - Location: Jackson & Cage Blvd between Sioux & El Dora. (PCT 2)
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $1,500,000.00
- La Villa Drain Improvements – 2023 Bond Referendum Project # 8.1
  - Location: Mile 14 ½ West and East Lateral Ditch (PCT 1)
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $1,800,000.00

- Project: Glasscock Drainage Project Location: Glasscock Rd & FM495 City of Mission Texas
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $2,500,000.00
- Project: Sullivan City – 1st & 2nd Street Improvements- Urban County
  - Location: 1st Street & 2nd Street Sullivan City
  - Type: Street Improvements
  - Estimated Cost of Construction: $280,000.00
- Project: Green Gate Grove Project – City of Palmview
  - Location: Green Gate Grove RV Park
  - Type: Drainage Improvements
  - Estimated Cost of Construction: $ 250,000.00
- Project: Street Improvements – City of Palmview
  - Palm Creek, Spring Glen, Stone Ridge, Diasy Ridge, Mesquite Lane, Jaime Lane
  - Type: Street Improvements
  - Estimated Cost of Construction: $750,000.00
- Project: Hidalgo County Border Colonia Access Projects
  - Type: Colonia Street Improvement and Drainage Projects
  - Location: Precinct 1 - Brenda Gay Subdivision: $74,200
  - Chapa No.2 Subdivision: $301,600
  - Los Castillos Subdivision: $52,100
  - Precinct 2 - Los Encinos No.1 Subdivision: $66,000
  - Los Encinos No.2 Subdivision: $158,800
  - Precinct 3 - La Homa Groves Subdivision: $131,000
  - Ramon Leal Subdivision: $101,500
  - Total $885,200

IZAGUIRRE Engineering Group LLC.

OUR COMPLETED PROJECTS

OTHER SIMILAR PROJECTS

Project: Pharr-McAllen South Drain

- Hydrologic Analysis for Pharr-McAllen South Drain
- Calculated Volume for Drainage Areas using TR-55
- Calculated runoff coefficient using Manning's Equation (Q= CIA)

Project: U.S. International Board of Water Commission

- Assist in the preparation of Final Design Technical Memorandums for Anzalduas Levee, Mission Levee, and Donna to Brownsville Levee, and Interior Levees for IBWC.
- Assist in the preparation of Final Design Technical Memorandums for Improvements to the Hidalgo Protective Levee Phase I.
- Coordination of Geotechnical and surveying for Improvements to the Hidalgo Protective Levee Phase II.

Project: Raymondville Drain

- Preliminary Design of new diversion ditch.
- Earthwork Calculations for new diversion channel
- Hydrologic Analysis for new diversion channel
- Proposal of new alternatives for Raymondville Drain improvements

Project: Main Canal Replacement

- Location: Bentsen Rd. & Nolana Rd McAllen TX.
- Type:Concrete Canal Construction
- Type: Concrete Canal
- Estimated Cost of Construction: $8,400,000.00

IZAGUIRRE
Engineering Group LLC.

DIANA L. IZAGUIRRE

PRESIDENT / GRADUATE ENGINEER

PROJECT MANAGER

Ms. Diana L. Izaguirre is the President of Izaguirre Engineering Group LLC and successful land developer of Las Diana's Land Development LLC. She graduated from Texas A & M University, Kingsville, Texas with a Bachelor's of Science in Civil Engineering in 2006. She had a passion for civil engineering since she was 17 years old. In the summers she began working for a local engineering firm named Quintanilla Headley and Associates out of Edinburg TX. Once she enrolled in college she began working the summers as an intern at the TXDOT Pharr District Office. It was then when she decided to move to Kingsville, TX and purse a civil engineering degree. After her graduation from Texas A & M University, Kingsville she was immediately hired by S & B Infrastructure because of her experience and past work background. It was at the end of 2007 when she met Mr. Gilberto A. Gracia when she decided to establish the engineering firm Izaguirre Engineering Group LLC. We firmly believe that our president's background and Mr. Gilberto Gracias experience along with the rest of the team that has strengthen the foundation of this engineering firm.

EDUCATION

2006
Bachelor of Science in Civil Engineering
Texas A & M University, Kingsville

EXPERIENCE

18 Years

AREAS OF EXPERIENCE

- **Right- of-way Acquisition and Plan Work**
- **Highway PS&E Preparation**
- **Municipal Public Works**
- **Project Coordination**
- **Private Development**

SUMMARY OF EXPERIENCE:

14 years of combined civil engineering experience in right-of-way acquisition and plan work, highway PS&E preparation, municipal public works, project coordination, and private development. Chairwoman of the PLANNING & ZONNING Board at the City of Mission, Texas. President of Board at the Hidalgo County Irrigation District # 6 and Comissioner at the Mission Housing Authority.

PROFESSIONAL REGISTRATION & ORGANIZATIONS:

- American Society of Civil Engineers (ASCE)
- National Ready Mix Concrete Association (NRMCA);
- National Inspector of Ready Mix Concrete Plants

PROJECT TYPE EXPERIENCE:

- Site Development
- Site Planning and Design
- Construction Management
- Concrete & Asphalt Design
- Quality Control/Quality Assurance
- Complex Interchange Design
- TXDOT Engineering Assistant
- Raymondville Drain- New Diversion Ditch
- Drainage Studies and Design
- Construction Inspection
- SWPPP
- Cost Estimates
- Project Scheduling

TEAM MEMBER

FERNANDO GALLEGOS

MEP PROJECT MANAGER

EDUCATION

2004
Bachelor of Science - Mechanical Engineering
University of Texas Pan American

LICENSES

Licensed Professional Engineer, Texas License No. 109882

EXPERIENCE

11 years

AREAS OF EXPERIENCE

- **Project Management**
- **Construction Administration**
- **Mechanical HVAC Design**
- **Plumbing Design**
- **BIM Design**

EXPERIENCE SUMMARY

Mr. Fernando Gallegos has worked with VME Engineering LLC. in Donna Texas. Mr. Gallegos was a Mechanical Designer for Trinity MEP Engineering, and DBR Engineering Inc.

Mr. Gallegos has 11 years of experience in the HVAC discipline. He began his experience doing test and balance of HVAC systems. There he was introduced to the all sorts of troubles encountered in the engineering designs. That experience helped him to understand the HVAC systems and design flaws. From test and balance he started working with DBR as a construction administrator. During this period Mr. Gallegos attended the job site to verify the installation of the MEP systems. He attended meetings with owners and contractors to solve any issues that arose. This experience also helped him do better designs. After construction administration Mr. Gallegos started his HVAC design career. He designed for three and a half years while at DBR.

WORK EXPERIENCE

Mr. Gallegos provided Mechanical Plumbing design for the follow city projects.

- La Feria Public Library (under MAROD Engineering)
- The project consisted of a 2 story library addition. I was responsible for the redesign of the HVAC system
- La Feria City Hall Addition (under MAROD Engineering)
- The project consisted of a 2400 sqft addition to the existing City Hall. The area consisted of mainly offices.
- La Feria Fire Station Addition (under MAROD Engineering)
- The project consisted of an addition of two truck bays with a small kitchen and sleeping quarters.
- La Feria Fire Sub-Station (Blue town) (under MAROD Engineering)
- The project consisted of a new substation with two truck bays, small kitchen and sleeping quarters.
- City of Seguin Lift Station.
- New Braunfels Lift Station
- US Border Port of Entry Pharr TX. Cold Storage addition (under SAMES) Elsa State Bank and USDA Office Roma (under SAMES)
- City Of Mission Warehouse - Provided Electrical Service design.

FERNANDO GALLEGOS: PAST PROJECTS

MUNICIPALITIES

- La Feria City Hall Addition
- La Feria Fire Station addition
- La Feria Library Addition HVAC Design
- La Feria Sub Station Blue town
- City of Brownsville Bus Station Dome
- Lighting Design.

EDUCATIONAL

- Vanguard Academy Beethoven Elementary School - Edinburg, TX
  - 36,000 sf educational facility on a future master planned campus. The project includes 32 classrooms in two wings surrounding a common core for the administration office suite and multi- purpose cafeteria for elementary grade levels
  - Full MEP engineering services provided
- Vanguard Academy Mozart Secondary School - Alamo, TX
  - 36,000 sf educational facility on an existing campus site. The project houses 32 classrooms configured with a common core for administration offices and a multi-purpose cafeteria for middle school grade levels
  - Full MEP engineering services provided
- Vanguard Academy Rembrandt Secondary Middle School Classroom Addition - Pharr, TX
  - 4,500 sf classroom addition to an existing multi-level middle school facility.
  - Full MEP engineering services provided
- Vanguard Academy Rembrandt Secondary Cafeteria Relocation and Canopy - Pharr, TX
  - Relocation of existing cafeteria for construction of new classroom addition with new site canopies for student/faculty use
  - Full MEP engineering services provided
- Contact Person for Vanguard Academy
  - Mr. Bill Baez, Vanguard Academy projects: Construction Facilitator 956.508.2239
- UTPA Temporary Band Hall HVAC Design.
- South West Key Classroom Renovation - El Paso TX
  -

COMMERCIAL PRIVATE

NOEL CANTU JR.

SENIOR ENGINEERING DESIGNER/ PROJECT MANAGER

EXPERIENCE SUMMARY

Mr. Cantu has 16 years of combined civil engineering experience in transportation and drainage design plans, and survey work. He has served as a Design CADD Technician and Survey Crew Coordinator at various engineering firms and 3 years with the Hidalgo County Drainage District No. 1. During his time at the District, he specialized in drainage ditch design and plan production, while coordinating and managing the survey crew. He is experienced in the preparation of civil site plans, drainage ditch design, roadway design, surveying and coordination with utility companies to spot and probe lines. He is proficient in drafting software such as Civil 3D and AutoCAD. Mr. Cantu has prepared numerous final plan sets, exhibits and layouts throughout his professional career. Mr. Cantu's areas of civil engineering experience are listed below:

EDUCATION

AAS, Computer Drafting and Design Technology – GIS/GPS Specialty

Texas State Technical College, Harlingen, TX

EXPERIENCE

16 years

AREAS OF EXPERIENCE

- **Civil 3D**
- **AutoCAD**
- **Carlson Land Desktop**
- **Bentley Power**
- **Survey V8i 8 TopoDot for Lidar Point Clouds**

PROJECT EXPERIENCE

- Boundary Surveys
- Construction Staking
- County Road Design
- Digital Terrain Model (DTM's)
- Ditch & Canal Design
- Earthwork Calculations
- Easement Surveys
- Land Title Surveys
- Lidar Point Clouds
- Mortgage Surveys
- Parcel Plats
- Pipeline Crossing Permits
- Research Property Information
- Right of Way Base Maps
- RRC Permit Plats

DRAINAGE PROJECTS

Role: Design Technician

- HWY 107 Drainage Improvements
- Mercedes Lateral Widening
- Mile 3 Outfall to Bell RDF
- Trenton Drain Phase III

PRECINCT 4 PROJECTS

Role: Design Technician

- Hidalgo Surplus County – San Carlos
- Maintenance Shop Civil Plans
- Owassa Rd and Roosevelt Rd Connection

SURVEYS

- Agua Dental, Brownsville, TX
- Calli Village Townhomes, Brownsville, TX
- sunshine Village Apartments, Harlingen, TX
- -Whataburger, Port Isabel, TX

TEAM MEMBER

IZAGUIRRE Engineering Group LLC.

EXPERIENCE SUMMARY

Mr. Martinez has 2 years of experience. Mr. Martinez's areas of experience are listed below:

Project Experience

- Conducting professional project presentations for different cities in the Hidalgo County.
- Coordinating and meeting with cities and/or utility companies for subdivision processes.

LUIS ROBERTO MARTINEZ IBARRA

GRADUATE ENGINEER

EDUCATION

Bachelor of Science in Civil Engineering – GPA: 3.42
Education
The University of Texas Rio Grande Valley, Edinburg, TX

Mexicano Reynosa, Reynosa, TAMPS, MX
High School Diploma - GPA 4.0

EXPERIENCE

2 years

AREAS OF EXPERIENCE

- **Design of subdivision plats.**
- **Drainage and utility layout design for subdivisions.**
- **Design and draft drainage improvement projects for the Hidalgo County Drainage District No. 1**
- **Traffic control plans design.**
- **Drainage reports for subdivisions.**

ACADEMIC/PERSONAL PROJECTS

- Senior Design – Edinburg Arts and Cultural Center; Edinburg, TX
  August 2021 – May 2022
- As the Project Manager of a team of 5, we created and designed a proposed city capital improvement project for the school board.
  - Conducted and organized over 10 meetings with Engineers and Professors to properly address technical calculations and designs.
  - Completed a formal set of plans, request for qualifications, site assessment, environmental/geotechnical studies, drainage assessment/report, 3D Rendering, cost estimates, standard details and project schedules.

ORGANIZATIONS

- ASCE – American Society of Civil Engineers
- Member January 2019 – Present
- Member of the international Concrete Canoe Competition contributing with the canoe design and concrete mix.

SKILLS

- Public speaking, teamwork, adaptability, problem solving, leadership, listening. Language proficiency: Spanish, English, French (Basic). Software proficiency: AutoCAD, Civil 3D, MicroStation, Microsoft Office. 55+ WPM.

TEAM MEMBER

IZAGUIRRE Engineering Group LLC.

MARTHA GUAJARDO

GRADUATE ENGINEER

EXPERIENCE SUMMARY

Mrs. Guajardo has over 20 years experience. Mrs. Guajardo areas of experience are listed below.

Project Experience

· Subdivisions

· Mrs. Guajardo has designed and prepared plans, specifications and estimates for many subdivision developments. Mrs. Guajardo's extensive experience includes civil engineering design, floor plans and drainage improvements, as well as GIS Mapping.

EDUCATION

1999 Bachelor's & Science in Civil Engineerin

Facultad de Ingeniería

EXPERIENCE

Over 20 years

AREAS OF EXPERIENCE

- **Project Coordinator**
- **Hidalgo County Drainage Improvements**
- **PSCE Preparation**
- **Private Development**
- **Site Planning & Design**
- **GIS Mapping**
- **Construction Staking**
- **Eartwork Calculations**

MASTER PLANS

- Edwards Subdivision No. 18-22
- Bryan Landing
- Stuart Heights
- Elite Estates
- Ariss Estates

TEAM MEMBER

IZAGUIRRE Engineering Group LLC.

RAFAEL A. OCHOA

ENGINEERING ASSISTANT

EXPERIENCE SUMMARY

Motivated Civil Engineering student with strong academic knowledge and hands-on experience in , water resource engineering, construction management, and environmental engineering. Skilled in using engineering principles and software to design and analyze infrastructure projects. A proactive team player with excellent communication and problem-solving skills, eager to contribute to innovative engineering solutions.

EDUCATION

BA Civil Engineering
The University of Texas Rio Grande Valley, Edinburg, Tx

Associate of Science / Engineering
South Texas College, McAllen, Tx

High School Diploma
Veterans Memorial High School, Mission, Tx

EXPERIENCE

3 years

TECHNICAL SKILLS

- **Blueprint reading, Troubleshooting, Microsoft Office, Strong Work Ethic,**
- **Surveying Equipment, AutoCAD/ Civil 3D, Construction Equipment Operation, Survey Analysis,**
- **Team Collaboration, Aerial photography, Drone Operator**

WORK EXPERIENCE

- Hidalgo County Drainage District #1 - Student Engineering Assistant
  May 2024 - Aug 2024
  - Enhanced project efficiency by assisting in the preparation and review of civil engineering designs, plans, and specifications.
  - Participated in final project inspections and ongoing project inspections to ensure quality met HCDD#1 standards.
  - Improved team collaboration through active participation in interdisciplinary meetings with engineers, contractors, and clients.

- Hidalgo County Drainage District #1 - Student Engineering Assistant
  May 2023 - Aug 2023
  - Assisted in hydraulic modeling using HEC-HMS software, conducting research, and analyzing data from FEMA maps, geographic topo maps, and Lidar data.
  - Assisted in providing accurate cost estimates for construction projects by comparing past pricing and analyzing project plans.

- Izaguirre Engineering LLC - Civil Engineering Student Intern
  May 2022 - Mar 2023
  - Assisted in the development of effective storm water management plans for sustainable urban development projects.
  - Estimated materials costs and sourcing requirements for project feasibility.
  - Expedited the permitting process through precise preparation of technical reports detailing project specifications and impacts on surrounding environment.

- S2 Engineering PLLC - Surveyor Assistant. Oct 2021 - Mar 2022
  - Used Trimble and AutoCAD to create detailed maps from raw field data.
  - Assisted in preparing topographic maps, boundary surveys, and construction stakeouts.
  - Advised contractors and engineers on ideal structure placement given drainage patterns, hydrology and topographical factors.

MEET THE REST OF THE TEAM

HOMERO LUIS GUTIERREZ, P.E., R.P.L.S.

CIVIL ENGINEER - TXDOT ESN #8695

EDUCATION

Texas A&M University, Bachelor of Science in Civil Engineering, 1970

PROFESSIONAL REGISTRATION & ORGANIZATIONS:

Professional Engineer, State of Texas, 1974, #36639
Registered Public Land Surveyor, State of Texas, 1978, #2791

PROJECT TYPE EXPERIENCE

Mr. Gutierrez has TWENTY-NINE years experience with TXDOT procedures and design criteria. He performed advance planning project studies, prepared environmental assessment documents, feasibility and route studies, developed schematics, prepared roadway construction plans and roadway construction estimates, provided project specifications, prepared right-of-way maps and utility adjustment plans. He is familiar with FHWA and State Public involvement procedures. He coordinated and made presentations at Stakeholders and Public Meetings, and Public Hearings. Coordinated the development of the Brownsville – Matamoros Railroad Relocation Project. After retirement from TXDOT, continued to performed as a Senior Project Manager the same above mentioned tasks for projects such as the Laredo Outer Loop Study, the Hidalgo County RMA Toll Loop Study for Sections B, C2 and D, the Rio Grande City Street Improvement Projects under ORCA funding, US 83 & US 77 Expressway Reconstruction and Widening Projects, and the Hidalgo County Mile 2 West Road, Mile 6 West Road and Westgate projects, and the FM 509 New Location, Chester Park Road, Extension of Grimes Road, Cemetery Road and Morrison Road in Cameron County.

PROJECT TYPE EXPERIENCE:

- Interstate Freeway Design
- Complex Interchange Design
- Urban Highway Design
- Rural Highway Design
- Minor Road Design
- Major Road Design
- Drainage Studies and Design
- Retaining Wall Design
- Construction Management
- Construction Inspection
- Project Scheduling
- Site Planning and Design

July 13, 2026

Mr. Mardoqueo Hinojosa, P.E., City Engineer
City of Edinburg
415 W. University Drive
Edinburg, Texas 78539

Re: RFQ No. 2026-7 Professional Engineering Services

Dear Mr. Hinojosa,

Javier Hinojosa Engineering (JHE) thank you for the invitation to be considered for providing Engineering Services required by the City of Edinburg. This submittal responds to your request for proposals due July 14, 2026.

We have assembled a project team and approach that will bring the proper focus and sensitivity to the Engineering services you require. Our approach will:

Incorporate an "in-depth" look at the project with respect to the goals of achieving proper approaches in the project area.

Provided a project team whose experience genuinely affords the ability to develop innovative approaches to the project.

Provide the City with the type of coordination and personal services that allows for quick responses to requests and timely solutions to problems that might arise.

Provide the City with personnel who are dedicated to the assigned project. This will ensure a high level of project involvement and personal concern with the timely and successful completion of services.

Principals in our firms will be involved in every phase of the project. Follow-through is a particular element that characterizes Javier Hinojosa Engineering.

Provide the City with a project team that has successfully completed other similar projects and has worked well with your staff in previous matters.

Mr. Javier Hinojosa, P.E., will serve as Project Manager for this assignment. Mr. Hinojosa is extremely familiar with the City's needs for this project. Mr. Hinojosa has over 41 years of experience in Civil Engineering and will be responsible in the day to day activities of the Project to its completion. Mr. Hinojosa is authorized to bind the firm to contract. Mr. Hinojosa is extremely familiar with the City of Edinburg. The following is his contact information:

Javier Hinojosa, P.E., Owner
Javier Hinojosa Engineering
416 E. Dove Avenue
McAllen, Texas 78504
Ofc: 956-668-1588
Cell: 956-624-7006
E-mail: javier@javierhinojosaeng.com

JHE's basis for rating performance on a project begins with client satisfaction. If the client is satisfied at the completion of the job, then JHE has performed well. For the client to be satisfied we expect all aspects of the project to be completed on time, within the budget allocated and with a minimum of effort on the part of the client. We would welcome the opportunity to be considered for these challenging projects and look forward to talking with you in more detail about our proposal.

Sincerely,

JAVIER HINOJOSA ENGINEERNG

Javier Hinojosa, P.E.

Texas Registration No.: 74808

Type of Organization: Sole Proprietorship

Background: Javier Hinojosa Engineering (JHE) is a Civil Engineering Company that specializes in infrastructure improvements. JHE provides clients design in water distribution systems, sanitary sewer systems, storm drainage systems, street designs, parking lot designs, surveys and land development. A further description of our services is included within this package.

History of Engineering Certification: Mr. Hinojosa received his Engineering Registration from the State of Texas on March 19, 1993. The firm of Javier Hinojosa Engineering (Registration No. F-001295) has been registered with the State of Texas since September 22, 2000.

Ability to commence services immediately after successfully negotiating a contract: Javier Hinojosa Engineering can begin work immediately.

Familiarity with geographical area: Javier Hinojosa Engineering is extremely familiar with the Edinburg area. Mr. Hinojosa has over 41 years of experience in this area.

Javier Hinojosa Engineering is an Equal Opportunity Employer.

MANAGEMENT AND ORGANIZATIONAL APPROACH

JAVIER HINOJOSA ENGINEERING (JHE) recognizes the need for economical, technically innovative and efficient facilities for construction projects. These needs can only be met by a team which provides the necessary Engineering experience, expertise, technology, planning, and understanding of the client's objectives. In addition, the team must have a project approach which effectively applies all available resources to satisfy the project requirements. JHE has the project team and project approach for the successful performance of this work. The JHE project approach outlined here combines experience and technical expertise in order to ensure the constructibility and cost effective construction of the project. The team assembled here possesses all of the necessary qualifications to achieve and integrated approach to your project. Mr. Javier Hinojosa, P.E. will provide the single point of accountability and project management control that will coordinate, direct, and focus the combined efforts of the project team. This organization of the project helps the Owner in several ways: it creates clear line of responsibilities; it establishes the best framework for communication between the team and the client; and it ensures the achievement of a rigorous schedule.

The experience represented and organized here is backed by dozens of successful Civil Engineering projects. In every organizational category, key individuals who have worked on these projects are committed to this project. No one on the Project Team will be "training" on your job; each member of the team has a background and experience in similar recent projects. Mr. Javier Hinojosa, P.E. will provide the single point of accountability and project management for the team but also will provide expertise in project administration and construction phase services for the entire assignment.

PROJECT ORGANIZATION

JHE proposed to use the principal project staff members of the firm. The duties and responsibilities of the key staff members are described in the resumes describing the related experience of each project team member. The principal staff members have been chosen to assure that this project benefits from the best staff capabilities and experience available within the firm. The individuals chosen have the technical capabilities and experience required by this project, the ability to produce responsive engineering designs within the budgetary and time requirements of the client, and the ability to effectively work with the client's staff. The Project Manager, Mr. Javier Hinojosa, is responsible for primary project execution, providing overall coordination with the client, supervising and directing the Project Team, and reviewing and approving work on the project. Mr. Hinojosa has more than 41 years of experience in Civil Engineering. He is experienced in planning, design, and construction phase services for projects similar in size and scope to the proposed projects. Mr. Hinojosa will provide technical direction and quality assurance on the project and will be responsible for ensuring that the design incorporates all current, appropriate technology, and is technically efficient, complete, and constructible.

During each phase of this work, JHE will meet with the client staff to review the project progress, discuss alternative approaches, receive and incorporate staff comments, and coordinate the Engineer design to produce the desired results. Presentations of the work will be made at appropriate points in the project schedule.

JHE's philosophy is to provide our clients with designs that are cost-effective in terms of engineering, construction, and operations and maintenance. The firm emphasizes complete analysis of design considerations, application of the most appropriate technology, comprehensive cost effectiveness assessments, and quality assurance. Mr. Hinojosa has accomplished numerous Civil Engineering Projects in Hidalgo County in recent years. In approaching this project, JHE will use a systematic development with each task serving as a building block for later stages of the project. The specific project tasks follow in this proposal for your review. These specific tasks include:

I. PROJECT ORIENTATION AND STARTUP

We propose that an initial project orientation meeting be scheduled so that both the Owner and our firm may have a clear understanding of the design and construction process, parameters to be used and the final product desired.

II. SURVEY

Topographic information will be developed by field survey. Record plans will be reviewed and confirmed. Soil boring information will be obtained during this task for use in design if necessary. Underground utilities will be located through contracts with the appropriate representatives.

III. PRELIMINARY DESIGN

Preliminary plans will be developed using the information secured from ongoing field surveys and review of record plans. A preliminary design will be accomplished. Preliminary cost estimates will be developed. During and at the completion of this task, we intend to meet with the Owner to obtain input and to provide guidance in developing recommended solutions.

IV. PRELIMINARY PLANS AND ESTIMATES

The preliminary set of plans which will result from Task IV along with cost estimates will be reviewed with the Owner for input and guidance.

VI. FINAL PLANS & SPECIFICATIONS

Final plans, specifications and estimates will be prepared. The output of this task will be the documents necessary for bidding and constructing this project. These documents will be developed to meet the Owner's requirements for the project.

VII. CONSTRUCTION

During this task we will observe ongoing work, coordinate construction with Owner and Contractor personnel and certify periodic payment requests from the Contractor. Upon completion, a final inspection will be scheduled with the Contractor and Owner. The outcome of this final inspection will be a Certificate of Completion or a punch list of items for the Contractor to complete. Upon final completion of the punch list, a Certificate of Completion will be issued.

JAVIER HINOJOSA ENGINEERING

PROJECT EXPERIENCE

1. **Project Name:** Hidalgo County Bond Referendum Project
   West Main Drain Phase 3
   Project Location: Hidalgo County Precinct No. 3
   Owner: Hidalgo County
   Contact: Mr. Raul Sesin, P.E., General Manager
   Hidalgo County Drainage District No. 1
   Address: 902 N. Doolittle Road
   Edinburg, Texas 78542
   Telephone: 956-292-7080
   Construction Cost: $1,443,414.75
   Completion Date: Ongoing
   Professional Services Provided: Provided construction design plans and specifications for construction upgrade of a drainage ditch facility.
   Name of Project Manager: Javier Hinojosa, P.E.

2. **Project Name:** Hidalgo County Bond Referendum Project 21
   Project Location: Weslaco, Texas
   Owner: Hidalgo County
   Contact: Mr. Raul Sesin, P.E., General Manager
   Hidalgo County Drainage District No. 1
   Address: 902 N. Doolittle Road
   Edinburg, Texas 78542
   Telephone: 956-292-7080
   Construction Cost: $1,936,603.00
   Completion Date: Ongoing
   Professional Services Provided: Provided construction design plans and specifications for construction upgrade of a drainage ditch facility.
   Name of Project Manager: Javier Hinojosa, P.E.

3. **Project Name:** Bryan Road Reconstruction and Drainage Improvements Project
   Project Location: Mission, Texas
   Owner: City of Mission
   Contact: Mr. JP Terrazas, P.E., Assistant City Manager
   Address: 1201 E. 8th Street
   Mission, Texas 78572
   Telephone: 956-585-3275
   Construction Cost: $6,205,710.00
   Completion Date: Ongoing

Professional Services Provided: Provided construction design plans and specifications for reconstruction of Bryan Road from Business 83 to FM 495 including drainage improvements.
Name of Project Manager: Javier Hinojosa, P.E.

4. **Project Name:** Sugar Road Area Detention
   Project Location: Edinburg, Texas
   Owner: City of Edinburg
   Contact: Mr. Mardoqueo Hinojosa, P.E., City Engineer
   Address: 415 W. University Drive
   Edinburg, Texas 78541
   Telephone: 956-388-8955
   Construction Cost: $
   Completion Date: August 25, 2022
   Professional Services Provided: Project Engineer for a drainage improvement project for a detention facility located in the Sugar Road area within the City of Edinburg.
   Name of Project Manager: Javier Hinojosa, P.E.

5. **Project Name:** City of Alton 2026 Street Improvements
   Project Location: Alton, Texas
   Owner: City of Alton
   Contact: Mr. Jeff Underwood, City Manager
   Address: City of Alton
   509 S. Alton Blvd.
   Alton, Texas 78573
   Telephone: (956) 432-0760
   Construction Cost: $969,630.00
   Completion Date: ongoing
   Professional Services Provided: Design of paving improvements for numerous streets within the City of Alton.
   Name of Project Manager: Javier Hinojosa, P.E.

TEAM MEMBER QUALIFICATIONS
AND
EXPERICENCE

KEY MEMBERS
PROJECT ASSIGNMENTS, LINES OF AUTHORITY
AND COMMUNICATION FOR PRINCIPALS

1. Javier Hinojosa, P.E., Owner: Mr. Hinojosa will be the Project Engineer for each assigned project. Mr. Hinojosa will be the primary point of contact for the City. Mr. Hinojosa will be involved with each assigned project from start of design services to completion of construction.

2. Gilbert Teegardin, Project Manager: Mr. Teegardin will be the Project Manager for each assigned project. Mr. Teegardin will coordinate day to day activities for Engineering services related to each assigned project. Mr. Teegardin will work closely with City staff to coordinate all activities within the City.

3. Daniel Lopez, Survey Technician/ Construction Inspector: Mr. Lopez will be providing services related to acquisition of field data for the preparation of the final Engineering construction documents. Mr. Lopez will also assist during the construction phase with periodic inspection of each assigned project .

4. Carlos Vasquez, RPLS (CVQ Land Surveyors, LLC): Mr. Vasquez will be responsible for boundary surveys and metes and bounds descriptions as needed or required by the City.

Noteworthy projects reflecting experience include the following:

City of Mission Drainage Improvements
Client: City of Mission
Project Engineer for the preparation of construction plans and specifications for drainage improvements within the City of Mission including Stewart Road, 1st Street, Dunlap Avenue and Citriana Avenue

City of Mission Bryan Road (FM 396) Water and Sewer Relocations
Client: City of Mission
Project Engineer for the preparation of construction plans and specifications for water and sanitary sewer improvements along South Bryan Road in conjunction with the widening of this road by TxDOT.

City of Mission Stewart "A" Drainage Improvements
Client: City of Mission
Project Engineer for the preparation of construction plans and specifications for drainage improvements along Stewart Road within the City of Mission.

Agua Special Utility District Waterline Improvements
Client: Agua Special Utility District
Project Engineer for the preparation of construction plans and specifications for waterline improvements within South Minnesota Road Subdivision, El Flaco Chiquito Subdivision and along Tom Gill Road.

International Village Subdivision Drainage Outfall
Client: Hidalgo County Precinct No. 3
Project Engineer for the preparation of construction plans and specifications for the drainage improvements of the International Village Subdivision.

Bentsen Palm Drive Drainage Outfall
Client: Hidalgo County Precinct No. 3
Project Engineer for the preparation of construction plans and specifications for the drainage improvements of Bentsen Palm Drive from the County's Main Drain north to Mile 3.

Colonia Access Program Paving and Drainage Improvements
Client: Hidalgo County Precinct No. 3
Project Engineer for the preparation of construction plans and specifications for the paving and drainage improvements of numerous subdivisions (colonias) within the Hidalgo County Precinct No. 3 areas.

City of Alton Street Improvements
Client: City of Alton
Project Engineer for the preparation of construction plans and specifications for street improvements along Los Ebanos Road and the Taurus Subdivisions within the City of Alton.

Mile 4 North Paving Improvements
Client: Hidalgo County Precinct No. 3
Project Engineer for the preparation of construction plans and specifications for the Mile 4 North paving improvements from Tom Gill Road west to Jarachinas Road.

Schunior Road Paving Improvements
Client: City of Edinburg
Project Engineer for the preparation of construction plans and specifications for the paving improvements of Schunior Road from Mon Mack Road to Jackson Road.

Hidalgo County Precinct #3 Paving Improvements
Client: Hidalgo County Precinct #3
Project Engineer for the preparation of construction plans and specifications for numerous roadways within Hidalgo County Precinct #3.

City of Mission Shary Road (FM 494) Waterline Improvements
Client: City of Mission
Project Engineer for the preparation of construction plans and specifications for waterline improvements along Shary Road from FM 495to Mile 3 North.

City of Mission Business 83 Waterline Improvements
Client: City of Mission
Project Engineer for the preparation of construction plans and specifications for waterline improvements along U.S. Business 83 from Inspiration Road to Schuerbach Road.

Monica Acres Subdivision Drainage Outfall
Client: Hidalgo County Precinct No. 3
Project Engineer for the preparation of construction plans and specifications for the drainage improvements of the Monica Acres Subdivision.

City of Palmhurst Street Improvements
Client: City of Palmhurst
Project Engineer for the preparation of construction plans and specifications for street improvements within the City of Palmhurst.

Paula Drive Paving Improvements
Client: Hidalgo County Precinct No. 3
Project Engineer for the preparation of construction plans and specifications for the paving improvements of Paula Drive from Schuerbach Road To Moorefield Road.

City of San Juan Street Improvements
Client: City of San Juan
Project Engineer for the preparation of construction plans and specifications for street improvements within the City of San Juan.

Casa De Los Vecinos Subdivision Sanitary Sewer Improvements
Client: Hidalgo County Precinct No. 3
Project Engineer for the preparation of construction plans and specifications for the sanitary sewer improvements of the Casa De Los Vecinos Subdivision.

Residential Land Development
Client: Various
Project Engineer for design and construction of numerous residential developments in the Mission, McAllen, Edinburg, Weslaco, Harlingen and Pharr areas including the following:

-Altamura Subdivision – Weslaco, Texas
-Rio Stone Subdivision – Weslaco, Texas
-Monte Cielo Subdivision - Weslaco, Texas
-Agave Estates Subdivision – Harlingen, Texas
-Sonoma Ranch Subdivision – Mission, Texas
-Rosewood Estates Subdivision – McAllen, TX
-Las Esperanzas Subdivision – Mission, Texas
-Ebanos Estates Subdivision – Mission, Texas
-Warehouse Kingdom Subd. – McAllen, TX
-Silver Oak Subdivision – McAllen, Texas
-Sunset Valley Subdivision – Alton, Texas
-Trinity Oaks Subdivision – McAllen, Texas
-Cielo Vista Subdivision – McAllen, Texas
-The Estates at Sharyland - Palmhurst, Texas
-Summer Breeze Subdivision – Mission, Texas
-The Oaks at Cimarron – Mission, Texas
-The Legends at Cimarron – Mission, Texas
-Westover Park Subdivision – Mission, Texas
-Shary Crossing Subdivision – Mission, Texas
-Redstone Estates Subdivision – Mission, Texas
-Lakeview at Palmshores Subdivision,
- La Joya, Texas
-Heritage Park Subdivision - Mission, Texas
-Tower Landing Subdivision - Alamo, Texas
-Tiffaney Estates Subdivision
- McAllen, Texas
-Hunter's Cove Subdivision - McAllen, Texas
-Malmaison Luxe at Trinity Oaks Subdivision
-Mission, Texas
-Autumn Ridge Estates - Edinburg, Texas
-Schunior Village Subdivision – Edinburg, Texas
-Villa Cantera Subdivision – McAllen, Texas
-Bentley Estates Subdivision – Edinburg, Texas
-Meadow Ridge Subdivision – Edinburg,Texas
-Garden View Subdivision – Pharr, Texas
-Hacienda Palms Subdivision – Pharr, Texas
-Providence Subdivision – Pharr, Texas

Re: Request For Qualifications - Professional Engineering Services, RFQ #2026-7

Dear Members of the Evaluation Committee,

The success of an on-call engineering contract depends on more than technical expertise—it requires a team that is responsive, adaptable, and ready to deliver solutions whenever the need arises. JRH Engineering & Environmental Services, Inc. brings nearly two decades of municipal engineering experience and a commitment to providing timely, high-quality support across a broad range of City projects. As a Texas-based civil engineering firm with extensive experience serving municipalities, public agencies, and private sector clients throughout the state, JRH Engineering is well-positioned to provide responsive, high-quality engineering services for the City's diverse capital improvement programs and infrastructure needs.

For nearly two decades, JRH Engineering has successfully delivered civil engineering solutions for roadway, drainage, utility, site development, water and wastewater, and public infrastructure projects. Our team understands the unique challenges associated with municipal projects, including coordinating with multiple stakeholders, navigating regulatory and permitting requirements, managing project schedules and budgets, and providing practical, cost-effective design solutions. As a certified Women-Owned Business Enterprise (WBE) and Women-Owned Small Business (WOSB), JRH Engineering is committed to delivering exceptional service while supporting the City's goals for diversity and community investment.

Our firm is structured to respond quickly to on-call assignments of varying size and complexity. Whether assisting with a discrete engineering task, supporting a capital improvement project, preparing plans and specifications, providing construction phase services, or assisting with long-range planning initiatives, JRH Engineering offers the technical expertise, project management experience, and responsiveness necessary to successfully support the City of Edinburg throughout the contract term.

We appreciate your consideration of our qualifications and welcome the opportunity to partner with the City of Edinburg as a trusted engineering resource. We look forward to supporting the City's continued growth by delivering timely, innovative, and reliable engineering services that enhance the quality of life for the Edinburg community.

Sincerely,

To JRH Engineering's knowledge, no addendums have been issued pertaining to this RFQ.

Jennifer Henrichs

JRH Engineering & Environmental Services, Inc., 6520 Masters Rd. Manvel, TX 77578
jlhenrichs@jrhengineering.net
Texas Firm License No. 10385

JRH Engineering & Environmental Services, Inc.

Founded in 2008, JRH Engineering & Environmental Services, Inc. is a full-service civil and structural engineering firm providing responsive, client-focused engineering services to municipalities, counties, school districts, utility districts, and private-sector clients throughout Texas. Headquartered in Manvel, Texas, the firm is licensed to practice engineering in Texas (Firm No. F-10385) and maintains a staff of nine civil engineers, three structural engineers, and an in-house licensed architect, allowing JRH to provide comprehensive engineering solutions under a single point of responsibility. **The Manvel, Texas office will be providing services for this contract.**

During the past two years, JRH has successfully delivered engineering services for numerous public-sector clients, providing planning, design, permitting, construction documents, bid support, and construction administration for infrastructure, drainage, utility, roadway, site development, and municipal facility projects. The firm's experience includes managing multiple concurrent assignments while consistently meeting client schedules, maintaining budget expectations, and responding quickly to changing project priorities. This ability to efficiently manage a diverse workload makes JRH particularly well suited for the City's on-call engineering services program.

JRH's approach is centered on responsiveness, collaboration, and practical engineering solutions. Unlike larger firms where smaller assignments may compete for resources, JRH intentionally structures its project teams to provide prompt attention regardless of project size. The firm's principals remain actively involved throughout project delivery, allowing decisions to be made quickly while maintaining consistent communication with clients. This hands-on management approach enables JRH to serve as a reliable extension of municipal engineering staff, providing timely support for both routine assignments and complex capital improvement projects.

JRH Engineering is also a certified Women-Owned Business Enterprise (WBE) and Women-Owned Small Business (WOSB), reflecting the firm's commitment to diversity and providing public agencies with opportunities to meet supplier diversity objectives.

Services under this contract will be managed from JRH Engineering's headquarters in Manvel, Texas, with additional field support provided as necessary to efficiently serve the City of Edinburg. The firm's organizational structure provides the flexibility to respond to assignments of varying size and complexity by scaling project teams based on workload. Smaller assignments are staffed with lean, experienced teams led by a licensed professional engineer, ensuring responsive service and efficient delivery without unnecessary overhead. For larger or concurrent assignments, JRH leverages its multidisciplinary staff and established consultant network to maintain schedules, preserve quality, and provide uninterrupted service throughout the duration of the contract.

JRH understands that the success of an on-call engineering contract depends not only on technical expertise but also on accessibility, responsiveness, and consistent execution. The firm's experience delivering municipal engineering services, combined with its collaborative approach and scalable staffing model, positions JRH to provide the City of Edinburg with dependable engineering support throughout the two-year contract term.

PROJECT EXPERIENCE

1. Southwest Refractory Industrial Expansion: This is a 29-acre industrial park. This project consists of expanding four buildings, extending the private development roadway with a cul-de-sac, extending the City of Alvin water main, extending the City of Alvin sanitary sewer, site building pavement, and site paving, grading, and drainage.

2. Westlake High School Building Facilities: The Westlake Lutheran High School building facilities consist of an expansion of the high school building, parking lot, utilities, grading and drainage for the building.

3. BCMU 81 c/o Sullivan Builders Brothers, Ltd. -141 Acre Subdivision, FM 2403, Alvin, Texas: This project consists of three sub projects to serve 350 residential home sites. The first part of the development currently under construction involves mass grading and drainage systems to support the neighborhoods. This portion also consists of managing the FEMA LOMR-F to bring the residential lots out of the flood plain. The second phase consists of extending the water line by 13,100 linear feet and the sanitary sewer line by 4,530 linear feet within the City of Alvin to serve the development. The final phase consists of water installation, roadway paving, sanitary, and drainage systems for the 101 homes in Section 1. This last phase also includes a four-lane major collector roadway to serve the development.

BCMUD 81 on behalf of Sullivan Builders Brothers, Ltd.- Projects-
1. BCMUD 81 / City of Alvin Utility Water and Sanitary Sewer Extension - $3,086,834.20
2. BCMUD 81 / City of Alvin- Mass Grading & Drainage Systems Contract- $2,289,338
3. BCMUD 81/ City of Alvin- Paving Contract- $2,465,500
4. BCMUD 81/ City of Alvin- Section 1 - Water, Sanitary & Drainage Section 1 Magnolia Trails- $3,485,719.62

4. Metal Building Foundations for Southwest Refractory: This project consists of the design of two 15,000-square-foot metal building foundations and two 7,500-square-foot metal building foundations. The project is currently entering the construction phase.
JRH will also provide Texas Windstorm Certification inspection services. Jason Henrichs, PE, is a Certified Windstorm Engineer with the State of Texas and will oversee the project to ensure the buildings meet all applicable windstorm certification requirements.

5. 132 Lakeside Drive, Conroe Texas: 11,000 square foot home framing and foundation design

6. Brookside Village: 12722 Wellborn Road, Brookside Village, Texas: The project consists of a 3,360-square-foot metal building expansion for the public works department.

7. Volusia County Rebuild Florida Project: JRH will serve as the Design Principal Engineer for the Volusia County Rebuild Florida Project. JRH will provide the residential architectural layouts, as well as the site drainage, mechanical, electrical, and plumbing (MEP) designs.

In addition, JRH will provide foundation design options, which may include either pier-and-beam systems or wood pilings, depending on FEMA floodplain requirements and the established Base Flood Elevation (BFE).

8. Oleander at Broadway — Galveston, Texas

Large-scale federal public housing redevelopment including resilient infrastructure, stormwater management systems, and sustainable site design for a 348-unit multifamily community. Development of a public housing community involving construction of new residential buildings, installation of public roadways, and expansion of water and sanitary sewer infrastructure. The project also included full construction management services to ensure quality control, schedule adherence, and successful project delivery.

Owner: Baron McCormack
Public Sponsor: Galveston Housing Authority
Architect of Record: RPA - Dustin Higgins
Civil Engineer: JRH Engineering & Environmental Services, Inc.
Approx. Construction Value: $111,000,000

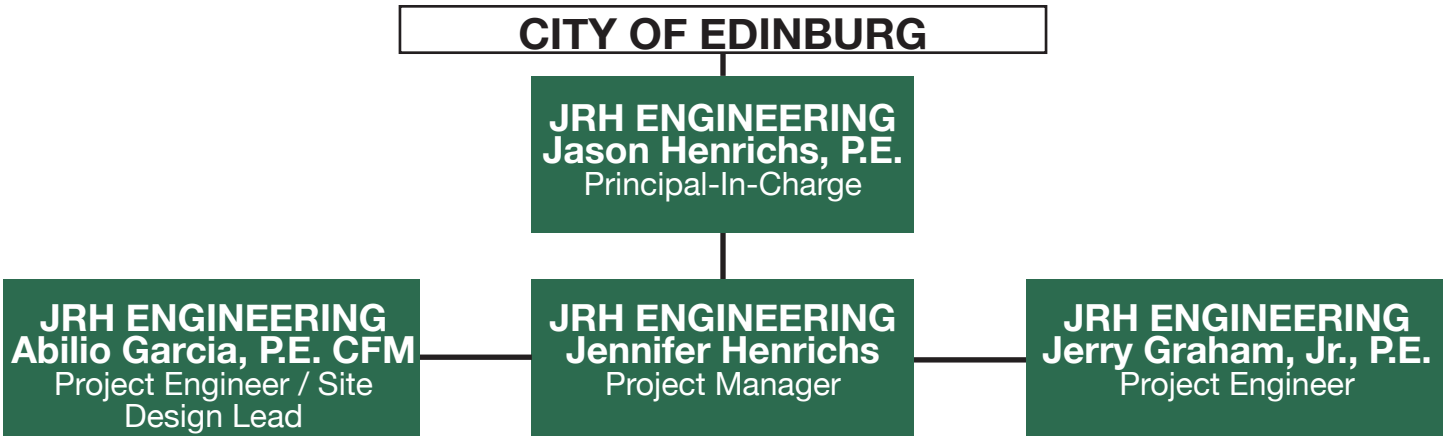
9. Fire Station No. 7 — City of Pasadena, Harris County, Texas

Abilio Garcia, P.E. provided complete civil engineering design for a new 15,000 SF fire station on a 12-acre site. Civil scope included two access driveways, parking paving, underground utilities, detention pond, 100-year floodplain mitigation, and a required left-turn lane per traffic analysis. This project required TDLR coordination, floodplain permitting, and close collaboration with the City of Pasadena.

Owner: City of Pasadena, Texas
Architect of Record: Helm Design Group
Civil Engineer: Abilio Garcia, P.E.
Approx. Construction Value: $15,000,000
**Project performed by now JRH employee, Abilio Garcia, P.E. under his previous employer*

10. Westlake Lutheran Highschool Buiding & Parking Lot- — Fort Bend County, TX

Development of a new high school campus consisting of construction of the primary educational facility, student and faculty parking areas, site grading and drainage improvements, and utility infrastructure required to support the campus. Improvements included water distribution, sanitary sewer, storm drainage, paving, and associated site development designed to accommodate operational needs and future expansion.



Owner: Lutheran Education Association of Houston
Architect of Record: Helm Design Group
Civil Engineer: JRH Engineering & Environmental Services, Inc.
Approx. Construction Value: $5,597,551.00

11. Parkside Trails Subdivision – Water, Sewer, and Drainage Improvements. - Brazoria County, TX

4672 linear feet of water, 3219 of sanitary sewer. Storm sewer facilities 1808 in a chanel bridge crossing. Construction of water, sanitary sewer, and drainage improvements for Parkside Trails Subdivision, including site preparation, fill and grading, waterlines and hydrants, sanitary sewer mains and manholes, storm sewer system, storm water quality measures, utility testing, and related subdivision infrastructure.

PROJECT TEAM EXPERIENCE

JRH Engineering has assembled a highly qualified team of professionals with extensive experience delivering civil engineering, structural engineering, environmental, and site development services for municipal, county, and public-sector clients throughout Texas. Since its founding in 2008, the firm has built a reputation for providing responsive service, practical engineering solutions, and consistent project delivery across projects of varying size and complexity.

The firm's multidisciplinary staff includes licensed professional engineers, structural engineers, environmental specialists, and an in-house architect who work collaboratively to provide integrated engineering solutions. This internal collaboration allows JRH to efficiently manage projects from planning and preliminary engineering through design, permitting, bidding, and construction administration while maintaining a single point of responsibility and clear communication with the client.

JRH's organizational structure is designed to support the demands of an on-call engineering contract. Project teams are assembled based on the specific scope and complexity of each assignment, allowing the firm to respond quickly to routine task orders while maintaining the capacity to manage larger capital improvement projects. Senior leadership remains actively involved throughout project delivery to provide quality assurance, expedite decision-making, and ensure each assignment is completed on schedule and within budget.

Through established quality control procedures, proactive communication, and a commitment to client service, JRH Engineering consistently delivers technically sound, cost-effective solutions that meet the needs of public agencies. This combination of technical expertise, responsiveness, and scalable staffing positions JRH to serve as a dependable engineering partner for the City of Edinburg throughout the duration of the on-call contract.

Jason Henrichs, P.E.
Principal-In-Charge

Years of Experience: 25+ yrs
Years with JRH: 18 yrs

Education:
B.S. Civil Engineering
Texas A&M University, 2001

Registration:
P.E. Texas Registration # 97420

Other Licenses:
Florida P.E. | North Carolina P.E. | Idaho P.E.
TWIA Windstorm Engineer (All Coastal Counties TX)
Licensed RME-G Fire Protection

Location:
Manvel, TX

Memberships & Leadership:
ACEC of Texas | ITE — Transportation Community

Jason R. Henrichs, P.E. is a founding principal of JRH Engineering & Environmental Services, Inc. with over 25 years of experience in civil, structural, and infrastructure engineering. His work encompasses public and private site development, roadway and drainage design, water and sanitary sewer infrastructure, structural engineering, and construction management. Jason's projects routinely involve public agency coordination, design to city and county standards, and execution within public rights-of-way and grant-funded programs.

Project Experience:

- Oleander at Broadway, Galveston — Civil Engineer of Record, $111M federal public housing redevelopment, WBE certified
- Parkside Trails Subdivision, Brazoria County — Civil Engineer of Record, public MUD infrastructure, $3.1M
- Lutheran South Academy, Houston — Civil Engineer of Record, outdoor site development, parking, drainage, ADA
- Metal Building Foundations for Southwest Refractory – Structural Engineer of Record and Texas Windstorm Certification inspection services
- 11,000 square foot home framing and foundation design - Structural Engineer of Record
- Brookside Village, 3,360-square-foot metal building expansion for the public works department - Structural Engineer of Record
- Volusia County Rebuild Florida Project- JRH will serve as the Design Principal Engineer for the Volusia County Rebuild Florida Project. JRH will provide the residential architectural layouts, as well as the site drainage, mechanical, electrical, and plumbing (MEP) designs.
In addition, JRH will provide foundation design options, which may include either pier-and-beam systems or wood pilings, depending on FEMA floodplain requirements and the established Base Flood Elevation (BFE).

Jennifer Henrichs

Years with JRH: 1 yr

Education:
B.S. Civil Engineering
University of Houston

Registration:
P.E. Texas Registration # 144126

Location:
Manvel, TX

Certifications:
Certified Floodplain Manager (CFM)

Abilio Garcia, P.E., CFM is a licensed Professional Engineer and Certified Floodplain Manager with experience delivering civil engineering design for public and private sector projects throughout the Houston metropolitan area. His expertise includes site grading, drainage design, stormwater detention, floodplain analysis and mitigation, paving design, utility systems, SWPPP preparation, and construction phase services.

Project Experience:

- Scholes International Airport Runway Rehabilitation, Galveston — Civil design, paving, grading, traffic control. Construction value: $5.5M

- Law Enforcement & Criminal Justice High School, Houston ISD — 59,300 SF public facility, detention, paving, TDLR. Construction value: $29M

- Spring ISD High School, Houston — 125-acre public campus, detention, floodplain mitigation, drainage, SWPPP, HC/HCFCD/MUD permits

- Elementary School Royal #2, Brookshire ISD — New elementary school, site grading, drainage, utilities, detention, construction phase services

- Elementary School ES #35, Lamar ISD, Fort Bend County — 15.5-acre school development, grading, drainage, stormwater quality

- Houston Airport System PMO Building — 52,000 SF civil design, drainage, grading, pavement, floodplain mitigation

JERROLD "JERRY" GRAHAM, JR., P.E.

Project Engineer / Site Design Lead

Years of Experience: 40+ yrs

Education:
1983, Bachelor of Science,
Civil Engineering, University of Houston College of Engineering

Registration:
P.E. Texas Registration # 66480

Location:
Houston, TX

Certifications:
Employee Sequence No. 8365
Categories: 1.4.1, 3.1.1, 3.2.1, 4.1.1, 4.2.1, 8.1.1, 9.1.1, 10.2.1, 11.1.1

Jerry has over 40 years of experience as a civil engineer serving both public and private clients as a project manager. He has performed or supervised engineering design and construction phase management for over 60 roadway, drainage, water, and wastewater projects. He has managed the design and construction of projects for TxDOT, HCTRA, Harris County, City of Houston, Metropolitan Transit Authority, developers, and municipal utility districts in Brazoria, Fort Bend, Galveston, Harris, and Montgomery Counties.

Project Experience:

SH-6, Fort Bend County, Texas. A change order redesign of 3,000 LF of six-lane roadway (with a continuous left turn lane) from Flat Bank Creek to Peninsula Drive. Project included geometric, paving, and drainage design; all designs were performed to TxDOT Standards.

SH 249 & FM 2920 Widening, Tomball, Texas. Design Engineer for reconstruction of two lane rural roadway to seven lane urban roadway including paving, minor structures, storm sewers, signing, striping and traffic control (TxDOT).

Northside Vehicle Maintenance Facility, Houston, Texas. Project Manager for 20,000 square foot vehicle maintenance facility (COH Public Works).

Cavalcade Drive Rehabilitation, Houston, Texas. Construction Manager for roadway and utility rehabilitation project which provided for the reconstruction of the roadway from a two-lane ditch section to a five-lane curb and gutter section including paving, storm sewers, water lines, sanitary sewers, signing, striping and traffic control (Metropolitan Transit Authority).

Hirsch Road Rehabilitation, Houston, Texas. Construction Manager for roadway, bridge and utility rehabilitation project which provided for the widening of the roadway from a two-lane ditch section to a four-lane boulevard including paving, storm sewers, water lines, sanitary sewers, bridge structures, signing, striping and traffic control (Metropolitan Transit Authority).

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

COMPANY PROVIDING PROPOSAL GENERAL QUESTIONNAIRE

1. TRANSMITTAL/LETTER OF INTEREST

July 14, 2026

Mardoqueo Hinojosa, City Engineer
City of Edinburg
415 W. University Drive
Edinburg, TX 78539

Submitted electronically to https://secure.procurenow.com/portal/cityofedinburg

Re: RFQ #2026-7 | Professional Engineering Services

Dear Mr. Hinojosa and Members of the Selection Committee:

KCI Technologies, Inc. (KCI) understands the City of Edinburg (City) is seeking a rotation of qualified engineering firms capable of supporting a wide range of capital improvement projects and programs, from discrete assignments and feasibility evaluations to design, permitting, grant support, and construction-phase services. Our multidisciplinary team is well positioned to provide these services efficiently and effectively while meeting the City's schedules, budget requirements, and quality expectations. With more than 43 years of experience supporting Texas municipalities, KCI is well positioned to deliver accurate, reliable, and timely surveying services that support the City's continued growth.

PRIMARY CONTACT

Grant Martinez, PE
2610 North Shary Road
Mission, TX 78574
Telephone: 956.271.6698
Fax: N/A
Cell phone: 956.457.6704
Email: grant.martinez@kci.com

KCI's team is structured to meet aggressive schedules while maintaining a high standard of quality. Our proven QA/QC processes reduce review comments and minimize rework, allowing projects to advance efficiently. With dedicated field crews and experienced project managers available to respond quickly to City requests, we provide the flexibility and reliability required for on-call municipal contracts.

KCI has a strong history supporting the City of Edinburg with roadway, drainage, utility, SUE, and surveying services. Recent work included Brennaaleen Drainage Improvements, Veterans Boulevard, Alberta Road, and Sprague Road Bridge Replacement

Our team's experience with the Texas Department of Transportation (TxDOT) and joint-bid projects strengthens our ability to navigate right-of-way (ROW) coordination, utility conflicts, and multi-agency requirements—key considerations for urban surveying projects. Additionally, our familiarity with the City's standards, procedures, and staff enables us to deliver efficient, coordinated services with minimal ramp-up time.

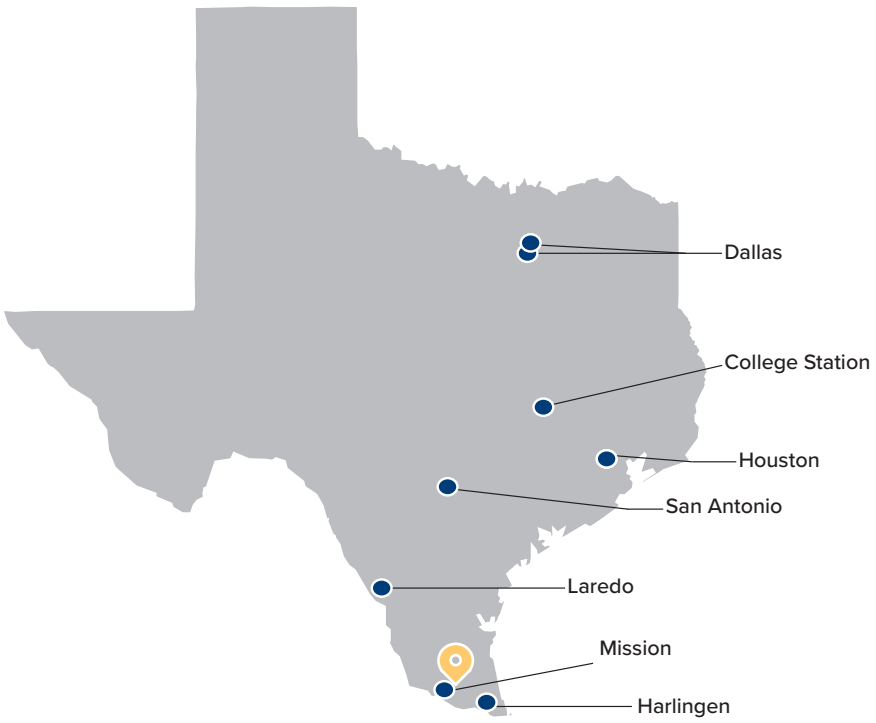
KCI wishes to be considered for the following categories:

- Street Infrastructure Evaluation and Improvements
- Pavement Management and Improvements
- Utility Infrastructure Evaluation and Improvements
- Erosion and Sediment Control Design
- Water and Wastewater Evaluation and Improvements
- Hydrology and Hydraulics (H&H)
- Transportation Evaluation
- Traffic Engineering Services
- Traffic Signal Design
- Environmental Engineering Services
- Civil Engineering
- Mechanical, Electrical and Plumbing (MEP) Engineering Services

KCI is committed to providing the City with responsive, high-quality engineering services and has the personnel, technical capabilities, and resources necessary to immediately support this contract. Our team's proven ability to meet schedules, deliver innovative solutions, and maintain strong client relationships has resulted in successful project outcomes for communities across Texas.

KCI acknowledges there has not been any issued addendums for this RFQ.

Thank you for your consideration. We appreciate the opportunity to submit our qualifications and look forward to the possibility of continuing our partnership with the City.



Sincerely,

Garland Galm, PE*
Vice President // 210.798.9239 // garland.galm@kci.com
*Officer of the firm authorized to bind KCI to contract

2. FIRM QUALIFICATIONS & EXPERIENCE

Engineering Disciplines

KCI has eight offices in Texas and over 200 employee-owners strategically located in Mission, Harlingen, Houston, San Antonio, College Station, Laredo, Wylie, and Dallas. KCI's Mission and Harlingen offices will be primarily responsible for engineering, surveying, and construction engineering inspection services. Our commitment stems from the firm's guiding principles that are the basis for our client interaction, project management, and employee mentorship. **KCI commits to creating value for the projects; delivering a diverse, high-quality range of services; and working to deliver a product on time and within budget.**

Our firm places the highest value on teamwork and mutual respect among our employees and with our clients. KCI's success is the result of working diligently as a team to perform each job with excellence, maintaining a long-term perspective and absolute integrity in the face of daily pressures. The value of our services is derived from our commitment to consistently produce high-quality work within the constraints of our clients' schedules and budgets.

The KCI team was formed based on our longstanding working relationships and knowledge of the area, as well as the team's expertise and knowledge of engineering in the Edinburg area, establishing a team with the capacity to provide on-call services.

Our commitment to excellence lies in the importance we place on utilizing the skills of our team to meet the unique needs of the City, and our adaptability to the City's unique requirements. We pride ourselves on the knowledge we bring to the table for each client. As demonstrated in this statement of qualifications (SOQ), we have the proven capability to provide on-call professional engineering and construction inspection services in the city of Edinburg and the surrounding area.

KCI's Mission and Harlingen offices will have primary responsibility for the engineering and construction engineering inspection services with support from our Houston and San Antonio offices. KCI's offices in the Rio Grande Valley (RGV) have significant experience working for the city of Edinburg, and applicable local experience working with Texas Department of Transportation (TxDOT), Hidalgo and Cameron counties; the cities of Brownsville, Mercedes, McAllen, Pharr, San Benito, and Weslaco; San Benito ISD; South Texas College; and San Juan EDC.

Vendor History

For more than 43 years, KCI has served municipalities across Texas to help improve the safety, maintenance, and efficiency of their roadways, drainage facilities, utilities and develop new and maintain existing buildings and HVAC equipment. KCI staff have completed more than 100 projects in Hidalgo County including several projects in the City, some of which are detailed within this SOQ. We will build on the lessons learned from this experience to successfully deliver projects under this City contract.

Firm Background Information

KCI was founded in 1955 and is headquartered in Sparks, Maryland. We are a 100-percent employee-owned engineering, consulting, and construction firm serving clients throughout the United States. Our roughly 2,500 employee-owners operate out of more than 70 offices in 19 states - as well as the District of Columbia. With revenues of approximately $603 million in 2025, the *Engineering News-Record* has consistently placed KCI among the top consulting engineering firms in the country. Our professional staff of engineers, planners, scientists, surveyors, and construction managers offer a broad range of engineering services, civil, structural, transportation, environmental, mechanical, electrical, subsurface utility engineering (SUE), survey, and construction management.

STREET INFRASTRUCTURE EVALUATION & IMPROVEMENTS & TRANSPORTATION EVALUATION
- Access studies
- Alternative analysis
- Bicycle facility design
- Constructability reviews
- Evaluation of alternatives
- Feasibility studies
- Roadway capacity analysis
- Roadway improvement studies & design
- Interstate guide sign design
- Plans, Specifications, & Estimates
- Parking studies & facility design
- Public involvement
- Railroad-highway grade crossing
- Roadway alignment studies & design
- Roadway lighting design
- Schematic design

PAVEMENT MANAGEMENT & IMPROVEMENTS
- Pavement inventory & condition assessment
- Visual & automated inspections
- Maintenance & rehabilitation optimization
- Pavement management system implementation
- Capital improvement planning
- Pavement image viewer dashboard
- ROW assets inventory & condition assessment
- Pavement condition data integration
- GIS-based dashboards/web platforms
- Data collection & processing

UTILITY INFRASTRUCTURE EVALUATION & IMPROVEMENTS
- Utility design
- Feasibility & strategic studies
- Plans, specifications & estimates
- SUE
- Permitting
- ROW determination & negotiations
- Utility coordination (UC)
- Manhole inspections
- Structural assessments
- As-built documentation

ENVIRONMENTAL ENGINEERING & EROSION & SEDIMENT CONTROL DESIGN
- Environmental impact statements
- Environmental documents
- Wetland delineation
- Traffic noise analysis
- Air quality analysis
- GIS mapping
- Watershed & ecological assessments
- Water quality & aquatic resource analyses
- TMDL analysis & management
- Erosion & sediment control
- NPDES permitting & regulatory compliance
- Closed storm drain design & inspection
- Stormwater management/erosion & sediment control review services
- Environmental & post-construction monitoring

WATER & WASTEWATER EVALUATION & IMPROVEMENTS
- Feasibility studies
- Asset management
- Rehabilitation of water & sewer conveyance system
- Design of water & wastewater pumping facilities
- Design of water storage facilities
- Diver inspection of underwater structures
- Evaluation & design of reclaimed water system
- Federal & state permitting

HYDROLOGY & HYDRAULICS
- FEMA/floodplain studies
- Watershed assessments
- Wetlands analysis, creation, restoration & enhancement design
- TMDL analysis & management
- H&H analysis
- Stormwater management, best management practices (BMPs)
- Bridge scour analysis

TRAFFIC ENGINEERING SERVICES
- Traffic impact studies
- Corridor studies
- Capacity analyses
- Route & interstate signing
- Roadway & pedestrian lighting
- Intelligent transportation systems (ITS)
- Transportation system management
- Traffic comm& & control systems
- Pavement markings

TRAFFIC SIGNAL DESIGN
- Operational control of traffic
- Signal system surveys
- Signal timing optimization
- Traffic command & control systems
- Traffic surveillance & control systems

CIVIL ENGINEERING
- Feasibility studies & site assessments
- Master planning & concept plans
- Playground & recreation design
- Grading plans
- Permit processing
- Special exceptions & variance requests
- Due diligence & ADA upgrades
- Athletic field design
- Irrigation design
- Value engineering
- Specification development
- As-built plans
- Sustainability design (LEED, Envision)

MECHANICAL ENGINEERING
- Heating, ventilating, & air conditioning
- Plumbing & process piping
- Commissioning & retro-commissioning
- Refrigeration
- Energy management & conservation
- Utility analysis & design
- Building management & system controls
- Material handling & process control
- Smoke control systems
- Facility assessments
- Code compliance
- Green build design

ELECTRICAL ENGINEERING SERVICES
- Normal/emergency/standby/critical power distribution systems
- Automation, control & instrumentation
- Sidewalk & pedestrian safety lighting
- Highway, street & tunnel lighting
- Interior & exterior building lighting
- Specialty lighting
- Low/medium voltage substations
- Security, access control & intrusion detection
- Renewable energy systems
- Data, audio/visual & wireless networking systems
- Communications & telecommunication systems
- Grounding systems
- Lightning protection systems
- Power studies: short circuit, protective device coordination, Arc Flash, load flow, & harmonic studies

CONSTRUCTION ADMINISTRATION
- Construction oversight & inspection
- Construction scheduling
- Document control
- Change order/RFIs/pay application oversight
- Project closeout

SURVEYING & MAPPING SERVICES
- Construction Layout & Stakeout
- Reality Capture (LiDAR, Mobile Mapping, Photogrammetry)
- 3D Modeling & Existing Conditions Documentation
- ALTA/NSPS, Environmental & Hydrographic Surveys
- Utility Locating & SUE Services
- ROW, Easement & Legal Surveying
- Subdivision & Platting Services
- Elevation Certifications & Survey Deliverables

Categories

Street Infrastructure Evaluation and Improvements

KCI's innovative roadway designs will be a benefit to the City. We provide roadway engineering to take projects from feasibility study through final design. Our transportation engineers partner with our in-house utility and traffic engineers, landscape architects, drainage engineers, and environmental scientists to manage each project's unique requirements, address stakeholder concerns, and minimize impacts to environmental and cultural resources. KCI has designed improvements for local roadways, including widening and realignment, intersection reconfiguration, streetscape and context sensitive upgrades, and green streets. Our state-of-the-art data collection and analysis uses cutting-edge modeling and design software which allows us to develop cost effective solutions that keep people, goods, and freight moving efficiently. The City cannot afford, nor should you expect, a "one size fits all" approach to infrastructure design.

Pavement Management and Improvements

KCI has been instrumental in the development, customization, and implementation of the Pavement Management System (PMS) using Micro Paver 7.0.11, working closely with clients to gather the business and system requirements for the pavement management system throughout its implementation. In addition, we assist our clients in developing the network-level pavement management optimization process. The KCI team is well-experienced in developing performance models for the various condition measures collected, including IRI, rutting, cracking, and friction for each group or family of pavement. The KCI team has also been involved in budget optimization and prioritization and developing a treatment decision matrix, including identifying the feasibility and consequences of each treatment. KCI's pavement asset management, engineering, and planning capabilities can be summarized as

- Data Collection Services
  - Pavement condition assessment (surface distress, ride quality, and structural)
  - Asset inventory and assessment on a GIS platform (trees, signs, traffic signals, curb, gutter, lighting, and any other linear/point asset that can be tied to a GPS coordinate)
  - Multiple camera high-resolution video-logging of ROW
- Customized Asset Management Software
  - Central management system implementation for all assets (CMMS, CityWorks, Maximo, Cartegraph OMS, etc.)
  - Decision support policies and analysis
  - Mobile applications for field support (asset inventory, condition surveys, and maintenance activities)
  - Signs, markings, guardrails, light poles, traffic signals, signal switch boxes
  - Geographic Information System (GIS) integration
  - Web-portal and cloud data visualization tools
  - GIS/Database Management
  - Arc/GIS 8, Avenue scripting, Map Guide Internet Server, Arc IMS, SPANS, Idrisi, MGE, and Map Info GIS software, PenMap, Field Pack Mobile, Terrasync, and ArcPad
- Engineering and Planning Services
  - Multi-year maintenance and capital improvement plan (CIP) development
  - Maintenance quality assurance review
  - Governmental policy compliance (GASB 34, retroreflectivity)
  - Non-Destructive Testing of Pavements
  - Ground Penetrating Radar (GPR)
  - Falling weight deflectometer (FWD)
- Pavement Design
  - AASHTOWare ME Pavement Design
  - Life-cycle-cost analysis (LCCA)

Utility Infrastructure Evaluation and Improvements

KCI has a proven track record providing similar SUE and locating services to municipalities to support infrastructure improvements across the state since expanding its utility business into Texas more than a decade ago. Our team designates over one million LF of utilities and completes more than 7,000 test holes annually.

KCI's SUE professionals deliver quality accurate mapping of existing underground utilities, helping clients avoid costly utility conflicts or construction delays caused by unknown or misrepresented utilities. Services include:

- Subsurface utility designating and locating
- Vacuum excavation
- Repair and maintenance
- Subsurface utility mapping
- GPR
- Underground utility locating

KCI SUE professionals bridge the gap between owners, designers, and contractors by providing pin-point accuracy and identification of underground and above ground utilities. KCI has NULCA/UTA Certified Professional Utility Locators whose experience and training ensure accuracy in their deliverable. In addition, we own and maintain the most up-to-date utility designating and location equipment on the market. Our capabilities include designating existing utilities using geophysical prospecting techniques that utilize

electromagnetic and acoustic methods and equipment, as well as GPR.

We have the in-house capability to obtain exact vertical position of subsurface utilities by excavating non-destructive test holes using our vacuum evacuation equipment and vehicles. KCI owns a fleet of VacMaster and RamVac Vacuum Excavation trucks.

Utility Coordination

KCI delivers responsive design, inspection and ROW services for electric, gas, water, sewer, steam, telephone, fiber optic and cable utility lines. The benefits of quality and efficient utility coordination can mean the difference of eliminating millions of dollars' worth of utility impacts, missed construction schedules or the delay of getting power and communication services to your new project site.

Using new technologies and innovative approaches to problem solving, we find practical, cost-effective solutions to project challenges in the rapidly advancing utilities environment. Our extensive service offerings, client base and geographic reach enable us to serve as a liaison to state and local governments, effectively coordinating multi-utility projects in complex infrastructure and changing regulatory environments.

Erosion and Sediment Control Design

KCI's engineers and scientists create innovative solutions with sustainability in mind to develop our water/wastewater and solid waste infrastructure, identify and remedy hazardous risks, restore damaged ecosystems, and preserve natural habitats. KCI's erosion and sediment control design involves planning and implementing strategies to prevent soil erosion and manage sediment runoff during construction and land-disturbing activities. The primary goal is to protect water quality and preserve soil stability by minimizing soil displacement and capturing sediment before it leaves the site. This process includes assessing the site's topography, soil type, and drainage patterns; implementing surface stabilization techniques such as mulch and erosion control blankets; constructing structural measures like sediment basins, silt fences, and check dams; and establishing vegetation through seeding and planting. Regular maintenance, monitoring, and compliance with regulatory standards are essential components to ensure the effectiveness of erosion and sediment control measures.

In addition to investigating, sampling, assessing and monitoring surface water facilities, we conduct planning studies and guide our clients through environmental permitting programs including National Pollutant Discharge Elimination System (NPDES), Municipal Separate Storm Sewer System (MS4), and Total Maximum Daily Load (TMDL) programs administered by the Environmental Protection Agency. We strive to implement cutting-edge solutions to sustainably manage and treat surface water, including bioretention facilities, floating treatment wetlands, and rain gardens. When water resources management efforts require design services, KCI offers the professional expertise of civil, structural, environmental, and geotechnical engineers.

Water and Wastewater Evaluation and Improvements

KCI recognizes that a delicate balance exists between a technologically progressive society and an ecologically secure environment. In today's environment, many government, commercial, and private utilities face challenges of high density development, aging infrastructure, limited facility capacity, and more stringent environmental regulations. We understand the issues associated with the demand for safe drinking water and the safeguarding of ground and surface waters.

Through the years, we have teamed with public and private sector clients on projects that meet ever-increasing demands for a clean water supply, adequate sewerage systems, and environmental monitoring and mitigation measures that safeguard groundwater and soils. We have achieved success in the industry because our professional staff of civil, chemical, and process engineers, environmental engineers, scientists, and other specialists work as a team.

Hydrology & Hydraulics

Provisions for adequate drainage is extremely important in the design of roadways. KCI has conducted several drainage studies for roadways, flood control projects, and commercial developments. Our technical abilities, familiarity with drainage software, and extensive experience with hydrologic and hydraulic modeling contributes to our delivery of efficient and accurate results.

Transportation Evaluation

Transportation networks contribute to the health and wealth of our communities, and we bring this understanding to bear on every project. KCI brings the relationships and industry understanding of leaders from some of the top transportation agencies in the nation to help resolve their greatest challenges. From maximizing available capital to performing long-range regional thoroughfare studies; or from planning a complete transit-oriented development to shared use of a single driveway, we provide solutions that address the increasing demand for connectivity, commuting and efficient movement of people and goods.

We take a comprehensive approach to planning by combining our team's collective insight and expertise in land use, environmental and transportation planning, as well as engineering and construction feasibility. KCI's planners are well versed in zoning, development, compliance and preservation requirements, and can guide any project through the planning process into design and construction. Using cutting-edge tools to evaluate and manage geographic, resource and traffic information, we analyze

alternatives and generate strategies to maximize benefit, streamline development, and minimize impacts and cost. Our team develops grounded plans to turn vision into reality.

Traffic Engineering

KCI provides innovative traffic engineering solutions for private- and public-sector clients in support of building new roadways, improving highway safety and operational capacity, maintaining traffic through construction sites, and evaluating the impact of proposed developments. We conduct safety studies, develop detailed traffic forecasts, prepare transportation management plans, and create effective signalization, signing, and lighting strategies. Services include:

- Traffic impact studies
- Corridor studies
- Capacity analyses
- Maintenance of traffic
- Route and interstate signing
- Highway and pedestrian lighting
- Signalization
- ITS
- Transportation system management
- Traffic command and control systems
- Pavement markings

Our staff employs the latest traffic analysis and simulation software and works closely with our planners to develop effective public involvement materials that convey project information to elected officials, the community and the public at large. Drawing from a seamless integration of engineering, planning, and environmental expertise, KCI offers all the necessary resources for meeting the traffic needs of projects ranging from small community developments to major highway interchange systems.

Traffic Signal Design

KCI has significant experience in the design of traffic signal systems, signal timing projects, traffic signal operations, and communication plans. Our traffic signal design projects often include design provisions for turn lane improvements, pedestrian crosswalks, pedestrian signals, ADA ramps and landings, and other pedestrian accommodations. Many of these projects include the need to analyze current and future traffic operations of the corridor to determine the proper communication technology to improve mobility. KCI has also developed signal system relocation plans for major arterial improvement projects.

Environmental Engineering Services

KCI has produced numerous environmentally sensitive designs for stormwater management facilities. The firm's experience with low impact development (LID) and sustainable site design includes preparation of plans that minimize pollutants in stormwater runoff, prevent soil erosion, and optimize conservation of natural features. KCI incorporates environmental site design (ESD) to the maximum extent practicable to protect streams and waterways from the impact of land development activities.

Faced with site constraints and challenging stormwater management regulations, KCI embraces ESD practices and techniques.

Civil Engineering

KCI provides efficient, cost-effective planning and engineering services to develop sites that meet our client's specific functional, aesthetic and environmental goals. Our experienced civil/site engineers work closely with landscape architects, geotechnical and environmental engineers, environmental scientists, traffic engineers, and surveyors to meet the needs of owners, architects, contractors, and institutional and government agencies.

From a small building addition to a major expansion, KCI conducts feasibility studies, prepares conceptual and final designs, and produces construction documents as we shepherd each project through the local permitting and regulatory processes. Our LEED- and ISI Envision-accredited engineers and planners prepare sustainable site plans that incorporate water-efficient landscaping, water use reduction, innovative stormwater management, reduced site disturbance, and construction waste management to maximize green building potential.

MEP Engineering Services

KCI understands that engineered systems are crucial design elements in the functionality of buildings and facilities. The firm has extensive experience designing new building engineering systems for both public and private sector clients. KCI has design experience involving systems such as HVAC ductwork, air handler units, lighting, power, fire alarm, plumbing water and sanitary, sprinkler risers and sprinkler heads, site drainage, site grading, and structural to name a few.

Unlike many other MEP firms, KCI maintains dedicated fire protection engineering staff who specialize in the planning, design, and analysis of new fire protection systems. Having specialized staff to focus on these systems allows KCI the ability to provide an exceptional level of service and design solutions to its customers.

Our team also can perform building analyses that promote energy savings as well as maintainability. KCI approaches each project with a proven step-by-step strategy aimed at best occupant amenities, with the lowest energy consumption, cost, and pollutant generation while informing integrated design processes with energy implications made by various design options. For each of our projects, we customize the design to fit the unique needs of the building based on the building program, the site's climate, and the energy utilities' billing regimes. KCI also strives

to ensure buildings are easily maintainable by the future owners and their users. We work with stakeholders and building maintenance personnel to understand their preferred method of working and maintaining consistency of equipment and manufacturers across the Owner's building portfolio.

KCI has been providing MEP engineering services to local municipal and public works clients for more than 40 years.

Local Support

KCI has established a relationship with SCIVLE, PLLC, a locally based firm founded by Oscar Garza, a former KCI employee, whose decades of experience delivering transportation and infrastructure projects throughout Texas provide valuable regional knowledge, stakeholder familiarity, and practical insights that enhance our service to clients in South Texas.

SCIVLE, which stands for Serving Communities through Innovation, Value-Driven Leadership, and Execution, is a locally rooted firm that brings immense project experience through its principals who have successfully delivered large scale public infrastructure projects from initial planning, programming, grant administration to design, and construction management. They bring broad perspective and innovation from their successes and lessons learned of delivering projects all over Texas and for out-of-state DOT's over the past 15+ years in their tenure working directly for TxDOT and as consultants focused on state and federally funded traffic and transportation projects.

Performing professional engineering services in a timely manner

Our hands-on approach equips KCI with the appropriate resources to meet project schedules. We understand that delivering on-time projects to the City is of the utmost importance and the key to achieving this success is preparation and adherence to all established milestones. We understand that schedules are "lost" a day at a time; our monitoring program will prevent that from occurring. KCI will prepare a detailed Critical Path Method (CPM) schedule for projects issued under this contract and will address schedule issues during the scoping meeting. Preparing a detailed CPM schedule helps to confirm all tasks are defined and their interdependence is understood. We will work closely with the designated primary point of contact from the City while developing and maintaining your project's schedule. Adherence to the schedule is critical to evaluating performance and will be a main topic at KCI's internal production meetings. We understand that delays are to be expected; however, we believe that building a project delivery schedule that accounts for the unforeseen is imperative to keeping a project on schedule and meeting milestone dates.

Our highly qualified Project Manager, Mr. Martinez, can anticipate potential design delay issues and proactively adjust resources to maintain project schedules. He will use project controls to shift resources, respond to schedule changes, and respond early to tasks that threaten the schedule. Should schedule delays occur, he will redirect the necessary resources to maintain the agreed upon schedule. Any delays will be immediately communicated to the City's representative. KCI is committed to maintaining the project's schedule including working extended hours and/or on weekends as needed.

When it comes to maintaining the project budget, we understand that the success of this begins with developing an accurate budget. We will perform a site visit, verify we have a complete understanding of the project scope, and confirm all parties have a clear understanding of the project budget. The goal is to avoid project overruns and the need for supplementals.

As illustrated in the table below, KCI has a long history of implementing the above approach to meet project schedules and budgets.

PROJECT	ORIGINAL SCHEDULE	FINAL SCHEDULE	ORIGINAL BUDGET	FINAL BUDGET
Brennaaleen Drainage Edinburg, TX	03/2023 to 08/2023	03/2023 to 12/2023*	$56,033	$67,082*
Stagecoach Trail Brownsville, TX	07/2022 to 02/2023	07/2022 to 06/2023**	$166,707	$166,707**
Alley Rehab McAllen, TX	08/2023 to 8/2024	08/2023 to 07/2024	$179,620	$179,620
Traffic Signal Improvements Brownsville, TX	9/2022 to 2/2023	9/2022 to 2/2023*	$63,764	$78,164*

*Additional scope required of project
**Additional scope added by the client

Uniqueness to Perform these Services

KCI brings a unique combination of local expertise, multidisciplinary resources, and proven delivery capabilities that position our team to successfully support the City's engineering program. Serving from our South Texas offices, KCI provides responsive, locally focused service backed by the resources of a statewide organization with more than 200 Texas-based professionals, including civil, transportation, water/wastewater, drainage, traffic, structural, utility, environmental, MEP, and construction management specialists.

Our team possesses extensive experience delivering roadway, drainage, utility, traffic, and infrastructure improvement projects for municipalities, counties, regional mobility authorities, drainage districts, and state agencies throughout the RGV. This experience directly aligns with the City's anticipated needs for street infrastructure, utility improvements, drainage and hydraulic analysis, transportation engineering, traffic engineering, environmental services, and capital improvement program support.

Our organizational structure allows us to efficiently support both large-scale capital improvement projects and smaller, task-specific assignments using scalable project teams tailored to each effort. Dedicated local staff are supplemented by specialized technical experts throughout Texas, ensuring the City has immediate access to qualified professionals while maintaining continuity, responsiveness, and quality control. This approach enables KCI to consistently meet schedules, quickly respond to City requests, and efficiently deliver projects ranging from feasibility studies and design services to construction support, utility coordination, grant-funded initiatives, and ongoing engineering consulting services.

Our team has successfully collaborated with the International Boundary and Water Commission, Hidalgo County Drainage District No. 1, Hidalgo County Regional Mobility Authority, TxDOT Pharr District, local irrigation districts, municipalities, counties, and school districts throughout South Texas. These long-standing relationships, coupled with our understanding of federal, state, and local regulations and permitting processes, allow us to effectively coordinate with stakeholders and advance projects from concept through completion. Through our technical expertise, regional presence, proven project delivery record, and commitment to responsive client service, KCI offers the City a reliable, long-term engineering partner capable of supporting its infrastructure goals and future growth.

Office location that will be providing the services

Our Mission Office, located at 2610 North Shary Road, will be responsible for the services provided under this contract with support from staff in Harlingen, Laredo, San Antonio, Dallas, and Houston. We are confident that our intimate knowledge of the region and community will be an asset to the City.

Approach to handling part-time staffing needs for smaller assignments

KCI has the resources to adequately staff both large and smaller assignments. Staffing needs are addressed during our weekly scheduling meetings. Mr. Martinez will meet with his team every Monday to discuss project schedules and staffing needs. During this meeting a two-week staffing plan is discussed and coordinated based on fluctuating project needs. Mr. Martinez and his staff use P6 and Microsoft Project to track and monitor project schedules, budgets, and staffing. All project managers and project engineers are required to keep up-to-date individual project schedules for each of their assigned projects. During the staffing meeting projects are discussed and schedules are updated individually. During the meetings, projects are prioritized and those projects requiring the most attention or with a rapidly approaching deadline will be staffed first. Essentially, these are working meetings where discussions are constantly flowing and evolving until a solid work plan is set in place and a framework developed for the two-week workload projection schedule.

During these meetings particular attention is also paid to individual staff utilization. With input from Mr. Martinez, annual targets are established for each staff member's utilization percentage (project chargeable time vs. non-chargeable time). These target percentages are compared with actual efforts on a weekly basis and also discussed during the scheduling meetings. This is important because it ensures that staff members aren't being under- or over-utilized and also provides a solid foundation for determining future staffing needs within the group. Having the ability to review and compare targets that have been established using historical group data along with the actual workload and staffing usage provides the opportunity to react to staffing needs in a quicker and more proactive way.

Should one or more key personnel not be available to complete the assigned project, we will re-allocate project responsibilities immediately to the design team or pull from additional personnel within KCI. Many of our project engineers and technicians have overlapping skill sets that can be allocated based on project requirements. Each dedicated employee can work overtime as necessary to maintain the project's schedule.

We are confident we have the staff available to respond to any size project assignment avoiding potential conflicts with current workloads. In the unlikely event we do not have the staff required, we will also hire additional part-time and/or full-time employees as needed to satisfy the project's goals.

ALBERTA ROAD

Edinburg, TX

KCI is providing plans, specifications, and estimates (PS&E) to reconstruct and widen a two-lane rural roadway segment to an urban boulevard curb and gutter section that includes four through lanes with a raised median, pedestrian and bicycle facilities, and a closed system storm sewer. Plans include typical sections, earthwork, general notes, roadway and storm sewer plan and profile sheets, outfall plan and profile, traffic control layouts and details, intersection improvements, traffic signal design, signing, and pavement markings and details, environmental permits, and storm water pollution prevention plan (SWPPP) layouts.

This project is fiscally constrained under the City of Edinburg bond program, requiring a considerable value engineering effort pre-bid and post-award in partnership with the successful contractor. Value engineering measures incorporated into this project have resulted in decreased lane width, which lowered roadway costs by avoiding the removal and replacement of eight traffic signal poles and a signal controller. Consolidation of pedestrian and bicycle facilities have decreased the roadway width (on-street bicycle facilities) to minimize conflict with compensable utilities and reduce impervious area. This reduced the design peak flow to our storm drain system and outfall structure, reducing pipe sizes and the number of curb inlets.

Relevance:

- Drainage Design
- Stormwater Detention
- Coordination with Union Pacific Railroad (UPRR)
- Surveying
- Construction Administration

BRENNAALEEN DRAINAGE IMPROVEMENTS

Edinburg, TX

KCI provided design and construction administration for this drainage project alleviated flooding in Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions by creating additional detention volume. Phase I constructed a 120-LF bore and a 36-inch storm sewer connection leading to a detention pond. The pond discharges into the drainage canal near Freddy Gonzalez Drive. To adequately convey stormwater from the Greenbriar Subdivision and mitigate flooding, a 15-foot drainage easement was obtained. During Phase II, the paving on Cedar Street, extended from Freddy Gonzalez north to the cul-de-sac, and Cynthia Drive, from Freddy Gonzalez Drive to north to Cedar Street, was reclaimed.

Additionally, the drainage infrastructure in Cedar Heights and Greenbriar subdivisions will be replaced with new infrastructure. These improvements will enhance the drainage system's capacity, thereby reducing the risk of flooding. Another firm conducted a survey; however, some of the data required verification, thus necessitating field visits. These visits proved to be pivotal in redesigning the drainage system. The residents' property was considered throughout the process, and the design was modified accordingly while maintaining efficiency. Coordination with the City of Edinburg was imperative to meet design criteria and help ensure timely completion.

Throughout the project, KCI maintained regular communication with Union Pacific Railroad (UPRR) as the drainage system crossed UPRR property. KCI submitted multiple design options for approval, and after careful consideration, UPRR gave the green light to the selected design. This was a significant achievement, as the design used an alternative epoxy, which eliminated the need for the usual mechanical restraints and steel casing for the pipe crossing joints. This new approach resulted in considerable cost savings.

Relevance:

- Drainage Design
- Stormwater Detention
- Coordination with Union Pacific Railroad (UPRR)
- Surveying
- Construction Administration

FAYSVILLE DRAIN

Hidalgo County, TX

This project, which was part of the 2018 Hidalgo County Drainage District Bond Program, will alleviate flooding in Faysville and the surrounding areas west of US 83. We performed hydrologic analysis and hydraulic design, authored a drainage report, performed preliminary and final design, and produced final PS&E. In addition, we will also provide construction-phase services.

The existing hydraulics and hydrology condition was analyzed using WMS, HEC-HMS, and the Rain on 2D Mesh component within HEC-RAS. The final design of the Faysville Drain segment was determined iteratively by producing proposed hydraulic models in HECRAS and comparing the hydraulic performance under 2D-unsteady state conditions.

Relevance:

- Drainage Design
- Stormwater Detention
- Surveying

HIGHWAY SAFETY IMPROVEMENT PROGRAM

Hidalgo County, TX

Under an on-call contract with the Hidalgo County, KCI provided traffic and safety studies in support of the submission of 13 project locations within Precinct 3. KCI identified the projects for consideration of funding via applicable programs and submit existing and proposed safety performance measures, preliminary proposed layouts, and preliminary construction cost estimates.

Relevance:

- Traffic Engineering
- Traffic Safety Studies
- Transportation Planning

MCDAVITT BOULEVARD & OAK/ROOSEVELT STREETS

Brownsville, TX

Two offset three-leg signalized intersections were reconfigured and combined to function as a single four-leg signalized intersection. KCI's scope for the project included utility coordination, identifying existing traffic signal inventory, assessing existing pedestrian facilities, designing new pedestrian facilities, pavement markings, and designing the new signalized intersection, which included new electrical service, a TS-2 signal controller, and pedestrian poles and signal heads.

The project location posed a challenge as it was along an urbanized corridor with minimal border width and a dense utility corridor, as well as construction cost and adverse impact to existing traffic needed to be minimized. KCI's proposed design aimed to salvage as much of the existing traffic signal inventory as possible to optimize project value (keeping construction cost to a minimum) and minimize or eliminate construction activities requiring lane shifts and/or lane closures. The final design utilized the existing traffic signal poles and existing mast arms. It only needed one new clamp on the mast arm, which allowed KCI to reduce the construction cost estimate by approximately 40%. Further, by utilizing the existing poles, KCI was able to avoid drilled shaft construction and lane closures for construction staging, which reduced the impact on the operation of the corridor and existing intersection.

Relevance:

- Traffic Signal Timing
- Intersection Safety
- Traffic Engineering
- Utility Coordination

US 281 SEGMENT 1: SH 186 TO FM 490

Edinburg, TX

KCI is managing a team of subconsultants to complete the roadway and bridge design, H&H design, traffic signal design, survey, and geotechnical data collection.

KCI performed data collection and field reconnaissance, including reviewing schematics, row maps, and SUE maps. We also provided technical assistance for social, economic, and environmental studies and public involvement.

KCI used Bentleys OpenRoads 3D to prepare the roadway design including typical sections, mainlane and frontage roads, interchange, cross streets, cut and fill quantities, pavement design, and pedestrian and bicycle facilities. KCI conducted field inspections to observe current drainage conditions at the outfall channels, cross drainage structures, drainage easements, the tributary channel, and adjoining land development. KCI conducted a hydrologic study including the calculation of discharges and a comparison of calculated discharges to the effective FEMA flows.

KCI performed a hydraulic design and analysis using HEC-RAS to quantify impacts, beneficial or adverse, in terms of increases in peak flow rates and water surface elevations. KCI designed and analyzed storm drains, cross-drainage structures, and temporary drainage facilities. Additional scope included signing, pavement markings, signalization, utility engineering, retaining walls, and traffic control plans.

Relevance:

- Project Management and Coordination
- Roadway and Bridge Design
- H&H Analysis
- Traffic Signal Design
- Utility Engineering
- Environmental and Public Involvement

STAGECOACH TRAIL

Hidalgo County, TX

Renovated using funds from the Capital Improvements Project, this initiative involved long-term investments in the City's infrastructure and facilities to improve residents' quality of life. KCI provided professional design services and construction administration for various upgrades.

KCI designed the roadway and drainage upgrades to Morrison Road, at the junction of Stagecoach Trail. These improvements included installing new drainage structures and new pavement. During construction, KCI responded to Requests for Information (RFIs), reviewed shop drawings to ensure compliance with design specifications, conducted site inspections, and prepared a final inspection report. The enhancements to Morrison Road further enhanced trail safety and accessibility.

Relevance:

- Agency Coordination
- Drainage Design
- Construction Administration

3. TEAM QUALIFICATIONS & EXPERIENCE

Project Manager and Key Staff Qualifications

KCI has assembled a highly qualified team with the professional licenses, technical expertise, resources, and availability necessary to successfully deliver the full range of engineering services required by the City. Our team's extensive experience supporting municipalities, counties, drainage districts, and transportation agencies throughout the RGV will be highly beneficial to this contract.

The services for this contract will be supported by experienced engineering and technical professionals located in KCI's Mission and Harlingen offices, providing a strong local presence and familiarity with regional conditions, stakeholders, and regulatory requirements. In addition, our local staff is supported by a statewide network of engineering professionals across Texas, allowing KCI to rapidly scale resources and provide specialized expertise as project needs evolve.

KCI utilizes industry-leading project management, document control, and collaboration technologies to ensure efficient communication, timely project delivery, and seamless coordination among team members and City staff. Our approach combines local responsiveness with the depth of resources necessary to support assignments of varying size and complexity.

The KCI team is committed to delivering quality, responsive engineering services tailored to the City's needs. We measure success through client satisfaction, consistent project delivery, and long-term relationships built on trust and performance. Our references demonstrate KCI's ability to provide reliable service, meet project schedules, and deliver successful outcomes for public-sector clients throughout Texas.

Garland Galm, PE

Project Principal

29 Years with KCI **40%** Availability

42 Total Years of Experience

Overview

Mr. Galm has more than 42 years of experience in the transportation industry. He coordinates design assignments, ensures client services are performed effectively, regularly monitors design schedules and budgets, facilitates client communication, and strives for quality in all that KCI produces. After nearly 14 years with TxDOT overseeing highway design, construction, and maintenance, he has spent 28 years managing professional services for various clients in the transportation, utilities, municipal, government, energy, and private sectors.

Education

- BS / Civil Engineering / Texas A&M University

Certifications and Registrations

- RPLS / TX / 6788

Project Experience

Brennaaleen Drainage Improvements, City of Edinburg. The drainage project aims to alleviate flooding in Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions by creating additional detention volume. The project included multiple phases. The drainage infrastructure in Cedar Heights and Greenbriar subdivisions will be replaced with new infrastructure. These improvements will enhance the drainage system's capacity, thereby reducing the risk of flooding.

SH 123, TxDOT San Antonio District. KCI provided preliminary engineering services for the development of the design schematic, and the environmental documents/studies for SH 123. Services under this work authorization included schematic work, public involvement, permit procurement, data collection analysis, mitigation and remediation, monitoring, drainage, conceptual traffic control, traffic projections, traffic engineering, and operations, including traffic simulations and 3D modeling, surveying and mapping, SUE, and utility coordination (UC). The project limits were from Cordova Lane to IH 10 in Guadalupe County.

2020 Civil Engineering and Program Management, City of San Antonio. KCI provided full-time on-call civil engineering and program management services to expedite the delivery of capital projects and provided cost savings. This included street and roadway design, drainage design, site layouts, surveying, staff augmentation for project delivery, construction management, and inspection services.

Grant Martinez, PE, LGPP

Project Manager

8 Years with KCI **60%** Availability

8 Total Years of Experience

Overview

Mr. Martinez has over eight years of experience in managing a diverse array of infrastructure projects, demonstrating a commitment to delivering high-quality results. He is well-versed in designing stormwater management systems and detention facilities, contributing to environmentally sustainable practices in infrastructure development. He has conducted detailed hydrologic analyses, which are critical for understanding water flow and managing stormwater effectively. Additionally, Mr. Martinez's expertise encompasses extensive coordination in roadway design and the supervision of utility coordination and design, facilitating the seamless integration of utilities within infrastructure projects.

Education

- BS / Civil Engineering / University of Texas at Rio Grande Valley

Certifications and Registrations

- PE / TX / 146525

Project Experience

Alley Rehab, City of McAllen. Project Engineer. The primary objective of this project was the rehabilitation of alleys in subpar conditions while prioritizing the mitigation of utility conflicts and enhancing drainage efficiency. To improve drainage, KCI used an inverted crown typical section and kept cross slopes minimal to ensure steady water flow across all alleys.

Mile 1 East Improvements, City of Mercedes. Project Engineer. This 1.4-mle project included S&E review and PS&E services for the reconstruction of Mile 1 East for the City of Mercedes. This project is a local let project in Hidalgo County funded by federal, state, and city monies. KCI is involved in developing the Advanced Funding Agreement between the RGV MPO, TxDOT, City of Mercedes, and Hidalgo County.

Faysville Drain, Hidalgo County Drainage District No. 1. Project Engineer. The project aimed to alleviate flooding by intercepting runoff from a 12 square-mile watershed and providing the improved hydraulic performance of an existing system. Mr. Martinez performed a hydrologic analysis of the hydraulic design, authored a drainage report, performed the final preliminary and final design, produced the final PS&E, and provided construction services.

Carlos Juarez, PE, LGPP
Street Infrastructure Evaluation and Improvements

9 Years with KCI **50%** Availability

14 Total Years of Experience

Overview

Mr. Juarez has 14 years of experience in the industry and has completed schematic and PS&E for many transportation design projects. He has an expertise in completing complicated roadway design for PS&E projects. Mr. Juarez has comprehensive experience in transportation and drainage engineering including developing complete PS&E. He has comprehensive experience in transportation and drainage engineering including developing complete PS&E. He has completed drainage studies and designs for rural and complex roadway systems. He has used Watershed Modeling System software to delineate watersheds and perform hydraulic analysis. He is also experienced in HY-8 to design and analyze culverts.

Education

- BS / Civil Engineering / Texas A&M University Kingsville

Certifications and Registrations

- PE / TX / 122006

Project Experience

SH 107, TxDOT Pharr District. Project Engineer. Mr. Juarez is managing the PS&E for the reconstruction of SH 107 from a two-lane rural roadway with eight-foot shoulders from FM 1425 to the IBWC Floodway East Levee. The project included 10 existing culverts, which were analyzed using HY-8 to determine discharge, headwater, and velocity. The culvert layouts were developed for the project.

SH 27, TxDOT San Antonio District. Project Engineer. Mr. Juarez provided preliminary engineering services for 14.42 miles of SH 27 for improvements between Spur 100 and Pankratz Road. The drainage elements included preliminary ditch layouts and cross-section development. Mr. Juarez ensured sidewalk and ditch sections fit within existing ROW and looked at potential new ROW areas for proper sidewalk and ditch placement.

Faysville Drain, Hidalgo County Drainage District No. 1. Project Engineer. Mr. Juarez used HEC-RAS to develop the drainage model for project. LiDAR and field survey data was analyzed to create new ditch cross-sections. He also developed PS&E for drainage ditch widening project.

Frank Jaster, PE
Pavement Management and Improvements

45 Years with KCI **50%** Availability

19 Total Years of Experience

Overview

Mr. Jaster has extensive pavement forensic investigation and design experience across Texas, including parking lots, highways, city streets, private drives, racetracks, runways, and military airfields. His work includes service on the City of San Antonio Pavement Failure Task Force, runway designs for Los Cuerños Ranch and 74-Ranch, City of San Antonio specification amendments, and civil specifications for U.S. Army Corps of Engineers projects.

Education

- BS / Civil Engineering / Texas A&M University

Certifications and Registrations

- PE / TX / 60985

Project Experience

2015 Pavement Evaluation & Assessment, City of Kyle. Pavement Design Engineer. Mr. Jaster provided a comprehensive street condition assessment for the City's 124-lane miles of asphalt streets. The team conducted a semi-automated pavement distress survey focusing on existing pavement conditions and documenting all existing cracking, pavement undulations, and minor failures. The team processed the data and downloaded the PCI and IRI scores into Street Saver®, which was utilized to prepare report charts and maps. This report included a summary of all findings, color-coded maps based upon PCI and IRI scores, and a ranking of the lowest scores, including corrective measures (i.e., total reconstruction, rehabilitation, resurfacing, crack sealing, etc.), and a detailed cost estimate for diverse options for correction. KCI also joined City staff in presenting the report to their City Council and Mayor.

2023 Pavement Evaluation & Assessment, City of Kyle. Pavement Design Engineer. Mr. Jaster used automated LCMS technology to survey the city's pavement conditions and ROW assets, documenting pavement distresses and providing an Overall Condition Index (OCI) for future planning and rehabilitation efforts. Asset inventory and conditions data was stored in the PAVER™ and Cartegraph OMS database and provided to the City in shape file format. The team also configured the Asset Condition Manager and Scenario Builder for conditions analysis, deterioration curves development, and maintenance and rehabilitation planning.

David Russell, PE
Water and Wastewater Evaluation and Improvements

10 Years with KCI **50%** Availability

15 Total Years of Experience

Overview

Mr. Russell is a project manager with 15 years of experience. His passion for the work, ability to collaboratively partner with his clients, and desire to lead a team has propelled his career forward in just a few short years. He offers diverse expertise in all phases of the project lifecycle from inception to completion including design, planning, assessing utility conflicts, and construction oversight. Mr. Russell has provided consulting services on various general civil and utility infrastructure projects for state, county, and city agencies across the state of Texas.

Education

- BS / Civil Engineering / University of Texas at San Antonio

Certifications and Registrations

- PE / TX / 123318

Project Experience

Roosevelt Avenue: South St. Mary's Street/UPRR Underpass to Steves Avenue, San Antonio Water System (SAWS). Project Manager. Mr. Russell is the design lead for water and sanitary sewer adjustments and utility relocations. The project replaces 1,600 LF of 12-, 8-, and 6-inch water mains. The work also includes replacement of fire hydrants, water valves, and service connections. KCI is also evaluating the impact against the sanitary sewer main alignment and minimizing the work to only adjust cleanouts to final elevation of the proposed sidewalk improvements

Judson Road Water Infrastructure Improvements, SAWS. Project Manager. Mr. Russell managed the planning, design, and bidding phase services for a new 2,000 LF of 16-inch HDPE water main for the SAWS Northeast Service Center. A duplex lift station with grinder pumps was also designed and 4,500 LF of 3-inch HDPE sanitary sewer force main along CoSA and TxDOT's ROW. Design included HDPE to ductile iron pipe connections, new fire hydrants, and service connections. The force main construction was completed using open trench and trenchless methods. Subsurface utility exploration located two 12-inch steel high pressure gas mains adjacent to the proposed water main alignment. Coordination and permitting with the CoSA and TxDOT was required. Mr. Russell provided oversight construction phase services.

Glenn Graham, PE
Transportation Evaluation

17 Years with KCI **50%** Availability

39 Total Years of Experience

Overview

Mr. Graham's background includes planning, design, and management of a wide range of transportation projects. His experience includes program management, feasibility studies, route location studies, environmental studies, traffic engineering, transportation planning, travel demand modeling, schematic design, final design, and preparation of PS&E for major roadway projects throughout Texas. He has managed and supported several significant program management projects. He has also led many workshops and public meetings requiring him to present the technical findings of transportation studies. Mr. Graham has experience managing indefinite delivery contracts for multiple TxDOT districts, and was responsible for managing over 25 work authorizations for the Lufkin District that ranged in scope from traffic and feasibility studies, to schematic design and plans, specifications, and estimates of urban streets and rural highways. He has also managed two indefinite delivery environmental planning contracts for the TxDOT Houston District. In recent years, his focus has been on program management for toll road and county-wide bond programs.

Education

- BS / Civil Engineering / Texas A&M University

Certifications and Registrations

- PE / TX / 72761

Project Experience

SH 302, TxDOT Odessa District. Project Manager. Schematic design for widening of an urban corridor along SH 302 for existing rural two-lane highway in Winkler County. Mr. Graham managed the team responsible for conceptual designs and executing the evaluation of alternatives (transportation evaluation) against the purposed and need of the project.

FM 2920 from North Willow Street to IH 45, TxDOT Houston District. Project Manager. Mr. Graham managed the schematic and environmental design and alternatives analysis for the project. He assembled and managed the team of subproviders and developed the WA scope and fee and proposed schedule. He prepared the Project Management Plan (PMP) including the QA/QC plan. His team prepared the schematic design using OpenRoads in a 3D design environment.

Robb Fishman, AICP, REM
Water and Wastewater Evaluation and Improvements

2 Years with KCI **50%** Availability

40 Total Years of Experience

Overview

Mr. Fishman has an extensive background in the National Environmental Policy Act (NEPA) and environmental studies supporting NEPA. He has experience in diverse settings involving a wide range of concurrent environmental issues at multiple sites. His responsibilities include management and supervision in the preparation and review of environmental documents, coordination with federal, state, and local regulatory agencies, appearances at public forums, environmental documentation support and regulatory compliance efforts. Mr. Fishman has utilized his training, field experience, and knowledge of NEPA and Council on Environmental Quality (CEQ) regulations to implement the procedural provisions of NEPA, as well as, the environmental guidelines and procedures established by federal agencies which have included the Federal Highway Administration (FHWA)/ including TxDOT, Federal Aviation Administration (FAA), Federal Transit Administration (FTA), Federal Railroad Administration (FRA), etc.

Education

- MA / Project Management / University of Houston
- BA / Civil Geology / Humboldt State University

Certifications and Registrations

- AICP / 015190; REM / 9967

Project Experience

Statewide IDIQ Environmental Services (2004-2023), TxDOT. Project Manager. Mr. Fishman's responsibilities included environmental documentation; permit preparation, data collection, analysis, mitigation, monitoring, and public involvement for highway projects located throughout the state of Texas. The environmental documentation included preparing EISs, EAs, or CEs; community impact assessments; noise analysis; air quality analysis; water quality impacts; permitting issues; wetland determinations/delineations; water body modifications; wildlife resources and endangered/threatened species; floodplain impacts; coastal resource issues; historic and archeological preservation; hazardous materials; secondary and cumulative impacts; and section 4(f) issues.

Edward Ochoa, PE, SIT, CFM
Civil Engineering

11 Years with KCI **50%** Availability

27 Total Years of Experience

Overview

Mr. Ochoa has experience in land development, municipal, and transportation projects, including master planning, feasibility studies, platting, roadway design, drainage, utilities, grading, SWPPP, and civil site improvements. His work includes highway, overpass, airport runway, urban roadway, widening, and sidewalk projects, along with survey/easement coordination. As a CFM, he is also experienced with FEMA elevation certificates and floodplain development permits.

Education

- BS / Agricultural Engineering / Texas A&M University

Certifications and Registrations

- PE / TX / 92596, SIT / TX / 6741; CFM / 3133-16N

Project Experience

World Trade Bridge FAST Lanes Relocation, City of Laredo. Project Manager. Mr. Ochoa provided the surveying, civil engineering design, and plan development for the relocated FAST Lanes on the bridge property. Civil engineering consisted of roadway design, storm drainage, traffic control, complex construction phasing, dry utilities design,utility coordination and surveying. A hydrologic analysis was conducted using the TR-55 method and the use of alternative detention concepts while following the guidelines of EPA's EISA Section 438 Technical Manual.

The New Trade Center Master Plan, City of Laredo. Project Manager. KCI provided the engineering services for over 150 acres of master-planned industrial development. Included was a hydrologic analysis of four drainage areas in pre- and post-development conditions, along with channel, detention basin and storm drainage system designs. The project also included platting, surveying, roadway, water, sanitary sewer, dry utilities design, bidding and awarding, construction staking, construction oversight, and project closeout.

Various CDBG Street Improvements Projects, Jim Hogg County. Project Manager. Mr. Ochoa provided assistance with the planning of street rehabilitation work, along with assistance for three CDBG grant applications. This was followed by the engineering, construction plans, and specifications for eight city blocks in Hebbronville, including roadway design, storm drainage, survey coordination, project bidding and awarding, construction oversight, and project closeout.

Chris Clements, PE, LEED AP

Water and Wastewater Evaluation and Improvements

19 Years with KCI **50%** Availability

20 Total Years of Experience

Overview

Mr. Clements is the regional practice leader for the MEP practice where he is responsible for the management and senior project oversight of all projects from the conceptual phase through construction and commissioning. He has performed extensive field surveys, system analyses, energy studies, and cost estimating services for a variety of public and municipal entities.

Education

- BS / Electrical Engineering / University of Texas at Austin

Certifications and Registrations

- PE / TX / 111339; LEED AP / 10372399

Project Experience

HVAC Upgrades, TxDOT Pharr District. Principal-in-Charge. KCI provided oversight for this project, which involved replacing the aging HVAC equipment at the Pharr Headquarters to improve energy efficiency and reliability, restore desired building pressurizations, and align owner changes to the use of the space.

McAllen Data Center, Bud Griffin & Associates, Inc. Project Manager. KCI provided MEP engineering design services for this addition, which included a new data center in an existing space with associated UPS, CRAC units, and distribution serving a newly-formed IT room. KCI worked with the client on specifications and engineering needed to serve an A and B side at 400kW per side.

Youth Village MEP Renovation, Harris County. Principal-in-Charge. This project renovated multiple buildings on their campus, including the central plant, gym building, trades building, administrative building, classroom building, and girls dormitory. KCI provided MEP, civil, and structural engineering services for the replacement of HVAC systems and relocation and replacement of electrical systems.

Gardener Betts/ISC Building MEP Renovation, Travis County. Principal-in-Charge. Following the completion of a physical assessment, KCI coordinated with a subconsultant to design replacement of various roofing and envelope items.

Kyle Jones, PE

Utility Infrastructure Evaluation and Improvements

10 Years with KCI **50%** Availability

23 Total Years of Experience

Overview

Mr. Jones has experience in utility coordination and verification, SUE, municipal infrastructure design, transportation engineering design, and residential site civil design. This experience includes extensive utility coordination, utility engineering, and management of SUE projects, utility construction management and verification, and design of waterlines, wastewater lines, residential land developments, drainage systems, and transportation projects. He is experienced in producing detailed construction plans and specifications, utility agreements, and providing assistance to clients in the bidding and construction phase of projects.

Education

- BS / Civil Engineering / Texas Tech University

Certifications and Registrations

- PE / TX / 101126

Project Experience

Mile 1 East, City of Mercedes. Utility Manager. This project included the reconstruction of Mile 1 East. Survey activities included ROW mapping to determine precise property boundaries, detailed topographic surveys to capture the existing terrain and infrastructure, aerial mapping for an extensive overhead perspective, and locating all utilities within the project corridor.

Veterans Boulevard, City of Edinburg. SUE Manager. The Veterans Detention Pond Phase II project supports Edinburg's flood management program by improving stormwater storage and conveyance while adding a 0.5-mile ADA-accessible trail with parking, lighting, benches, fencing, bike racks, and signage. KCI provided Quality Level (QL-A) SUE services and utility adjustment coordination with the City of Edinburg, Hidalgo County Drainage District, LPAs, utility companies, the design engineer, and maintenance staff, including utility conflict exhibits, easement research, work plan coordination, contact management, and coordination meetings.

FM 1426 - Hildago County, TX. Utility Manager. KCI developed conceptual planning options to upgrade pedestrian mobility and add quality-of-life improvements on South Nebraska Avenue (FM 1426) from BU 83 to IH 2. The survey services included verifying established control and supporting underground utility locations. KCI utilized GPS and conventional survey equipment for verifying and mapping QL-A, -B, and -C SUE.

4. REFERENCES

References

The KCI team is dedicated to providing quality, responsive services to the City. At KCI, we feel that the best measure of our performance is client satisfaction and our relationship with our clients. The client references below can attest to the performance of KCI and our key personnel. We encourage the City to discuss with these clients the capabilities of our firm and proposed staff members.

956.381.0981 // ellie.torres@co.hidalgo.tx.us

Project name and brief description: *Faysville Drain* - This project, part of the 2018 Hidalgo County Drainage District Bond Program, specifically aims at elevating flooding in Faysville and the surrounding residential areas West of US 83. We are performing hydrologic analysis and hydraulic design, authoring a Drainage Report, performing final preliminary and final design, producing final PS&E, and providing construction phase services.

KCI Staff/Role: Carlos Juarez - Project Engineer; Grant Martinez - Project Engineer; Glenn Graham - Quality Control Manager

Experience with the City of Edinburg

KCI has a strong history supporting the City of Edinburg with roadway, drainage, utility, SUE, and surveying services. Recent work is listed below.

City of Edinburg Project	Staff Involved
Brennaaleen Drainage Improvements	Carlos Juarez
Veterans Boulevard	Kyle Jones
Alberta Road	Carlos Juarez, Grant Martinez
Sprague Road Bridge Replacement	Jose Galvan III

5. INSURANCE

Insurance Summary

KCI certifies it carries the following insurance at the noted limits:

General Liability: $2M each occurrence / $4M aggregate;

Automobile Liability: $2M combined single limit for bodily injury and property damage;

Workers' Compensation: An amount not less than that required by State law and to include Employer's Liability of $1M;

Umbrella: $15M each occurrence / $15M aggregate over General Liability, Auto Liability, and Workers' Compensation; and

Professional Liability: $10M per claim / $15M aggregate.

Litigation Summary

Jennifer Nicole Moon, Individually and as Administrator of the Estate of Gregory Moon, Deceased, et al vs. Pittman Construction Company / Middle Georgia Paving, Inc / KCI Technologies, Inc. / Georgia Department of Transportation

Case No: 20CV0399

Jurisdiction: Superior Court of Jackson County, Georgia

Opened: June 2020

Closed: November 2021 – Settled

The claim alleged wrongful death of Gregory Moon who was driving his motorcycle through a construction zone in the early morning of June 7, 2018. When attempting to change lanes, Mr. Moon's motorcycle allegedly hit steep uneven pavement causing him to lose control. Mr. Moon later succumbed to his injuries. KCI was hired by GDOT to perform inspection and supervisory work on this paving project.

George Powell vs. City of San Marcos / 2202 Hunter Road Inv. LP / Don Durden, Inc., DBA Civil Engineering Consultants (CEC)

Case No: 19-3078

Jurisdiction: San Marcos, Texas

Opened: April 2020

Closed: December 2022 – Settled

This claim alleged negligence on the part of CEC as well as the other defendants. Plaintiff claimed the design of a detention pond caused flooding and damage to his property.

Susan Galloway, Personal Representative of the Estate of William Andrew Galloway, Deceased vs. Blythe Construction, Inc. / Stay Alert Safety Services, Inc. / South Carolina Department of Transportation / KCI Technologies, Inc. / Infrastructure Consulting & Engineering

Case No: 2019-CP-42-04336

Jurisdiction: State of South Carolina, County of Spartanburg

Opened: December 2020

Closed: January 2023 – Dismissed

The claim was based on a fatal car accident that occurred on December 14, 2017, whereby Mr. Galloway was allegedly unaware that traffic was stopped ahead and unable to avoid colliding with a vehicle stopped directly ahead of him. KCI was performing inspection services under a contract with South Carolina Department of Transportation. *KCI acquired (i) Don Durden, Inc., DBA Civil Engineering Consultants in November 2021, and (ii) McLaren Engineering Group in October 2024.

Richard A. Brinkley v. Sheldon Miner / KCI Technologies, Inc.

Case No: N21C-11-115 VLM

Jurisdiction: In the Superior Court of the State of Delaware

Opened: April 2022

Closed: June 2023 – Dismissed

Plaintiff was an employee of Mumford and Miller Concrete, Inc., working at a project site when he was allegedly struck by a vehicle driven by Sheldon Miner on December 17, 2019. KCI was hired by DelDOT to perform inspection services.

Shelton Powell v. Sheldon Miner / Mumford and Miller Concrete, Inc. / KCI Technologies, Inc.

Case No: N20C-12-149 MMJ

Jurisdiction: In the Superior Court of the State of Delaware

Opened: November 2021

Closed: July 2023 – Motion for Summary Judgment granted

Plaintiff was a passenger in a vehicle traveling through a construction zone on December 17, 2019. The vehicle allegedly drove through mud on the road causing the vehicle to crash, thereby, injuring the passenger. KCI was hired by DelDOT to perform inspection services.

Edward Zambito and Linda Zambito, both Individually and as the Co-Executors of the Estate of Allie Rose Zambito, Deceased vs. A-Del Construction Co, Inc. / Jonas Stoltzfus t/a Stoltzfus Meats & Deli / Neal Toros / KCI Technologies, Inc.

Case No: 210600429

Jurisdiction: Court of Common Pleas Philadelphia County

Opened: November 2021

Closed: August 2023 – Dismissed

The claim was based on a fatal accident that occurred when a pedestrian was attempting to cross at an intersection under construction in the evening on June 21, 2019. The intersection did not have a sidewalk and construction barriers were in place. KCI was hired by DelDOT to perform inspection services.

1000 Avenue at Port Imperial Condominium Association, Inc. v. UST Lennar PIS 10 / McLaren Engineering Group / et al. (over 60 defendants)

Case No: HUD-L-002206-18

Jurisdiction: New Jersey Superior Court, Hudson County

Opened: November 2018

Closed: November 2023 – Stipulated Dismissal

Plaintiff alleged the defendants were negligent in the planning, design, construction, ownership, and maintenance of a newly constructed residential building, which resulted in settlement and cracks throughout the building.

Michael Wilz and Lorraine Wilz v. Stadium Casino RE, LLC / Bower Lewis Thrower Architects, Ltd. / Gilbane Building Company / JPC Group, Inc. / McLaren Technical Services, Inc. / Synterra Ltd. / Stadium Casino, LLC

Case No: 21-CV-4663

Jurisdiction: U.S. District Court, Eastern District of Pennsylvania

Opened: September 2022

Closed: November 2023 - Settled

Plaintiff alleged that the sidewalk curb at Stadium Casino was improperly designed, constructed and maintained by the various defendants, which caused Mr. Wilz to trip and fall.

Victor Hans Santillana v. State of Florida Department of Transportation / Asphalt Group, Inc. / KCI Technologies, Inc.

Case No: 2023-CA-000688-0001-XX

Jurisdiction: Circuit Court of the 20th Judicial Circuit, Collier County, Florida

Opened: September 2023

Closed: March 2024 – Settled

Plaintiff crashed his motorcycle as he changed lanes from one lane that had been milled for repaving and the other lane that had not yet been milled. KCI was performing inspection services on behalf of the Florida Department of Transportation for the repaving project.

Jennifer Ferrante v. Live Hotel Casino Philadelphia / McLaren Technical Services, Inc. / et al. (over 25 defendants)

Case No: 220602221

Jurisdiction: Court of Common Pleas, Philadelphia County

Opened: June 2022

Closed: April 2024 - Settled

Plaintiff alleged that she slipped and fell on a sidewalk curb which was caused by the various defendants' failure to design, construct and maintain the subject sidewalk curb.

Arthur Lee Adams, Jr. as Personal Representative of the Estate of Pamela Adams Powell v. SC DOT / Zachary Construction Corp. / Michael Baker International, Inc. / KCI / et al.

Case No: C.A. No: 2022-CP-32-00121

Jurisdiction: State of South Carolina, County of Lexington

Opened: February 2023

Closed: April 2024 - Settled

This litigation involves a fatality on I-20 when a car was traveling on the shoulder of the highway as part of the maintenance of traffic pattern and a tree fell on the car during a high wind event. The accident occurred within the limits of the I-20 widening project and KCI was providing construction engineering and inspection services.

Alexander D. Kunkel vs. Alexander D. Kunkel vs. J.D. Eckman, Inc. / Ford Motor Company / Meaghan Peltier / Robert Talia / Established Traffic Control, Inc. / KCI Technologies, Inc. / Brian Leslie Watkins, PE / Pennsylvania Department of Transportation (PENNDOT) / Bridgestone Americas, Inc.

Case No: 2020-00200

Jurisdiction: Court of Common of Bucks County, Pennsylvania

Opened: November 2018

Closed: July 2024 – Settled

Plaintiff was a passenger in a car with six other occupants and half of the passengers were not wearing seatbelts. The driver wrecked the vehicle within a construction zone and the vehicle overturned and landed on the roof. KCI designed the maintenance of traffic for the work zone. In the criminal case, the driver plead guilty to recklessly endangering another person in addition to other related offenses.

17-25 North Main Street, LLC v. G&S Port Chester Unit 2B, LLC / RMC Development Company, LLC / Kings Capital Construction Group, Inc. / D.S. Meyer Enterprises, LLC / Sullivan Architectural Group, P.C. / Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C / M.G. McLaren, P.C. d/b/a McLaren Engineering Group / Boswell Engineering, Inc.

Case No: 72055/2023

Jurisdiction: Supreme Court of the State of New York, Westchester County

Opened: January 2024

Closed: February 2025 – Settled

Plaintiff alleged that its building sustained damage as a result of the negligent design, oversight, and construction on the lot adjacent to Plaintiff's building.

Crystal City Independent School District ("School District") v. Pfluger Architects, Inc. d/b/a Pfluger Associates, L.P. / Persyn Engineering, Inc., d/b/a Persyn Engineering / Don Durden, Inc. d/b/a Civil Engineering Consultants ("CEC") / Bartlett Cocke General Contractors, LLC d/b/a Bartlett Cocke General Contractors

Case No: 24-12-15531-ZCV

Jurisdiction: State of Texas, District Court, 365th Judicial District

Opened: December 2024

Closed: February 2025 – Settled

The defendants are the construction and design teams contracted by the School District to design and then construct additions to Crystal City High School, Sterling Fly Junior High School, and Benito Juarez Middle School, located in Crystal City, Texas. CEC was contracted to prepare civil engineering drawings and specifications and to perform construction administration services for site grading and site drainage. The School District alleges the CEC is responsible for water seepage and draining water flowing into buildings and resulting damage to the interior finishes and contents of the buildings.

Richard Gleason and Mary Gleason v. The County of Putnam / McLaren Engineering Group / Town of Carmel / John & Jane Does 1-20

Case No: 7:23-cv-04464-NSR-VR

Jurisdiction: U.S. District Court, Southern District of New York

Opened: May 2023

Closed: March 2025 – Voluntary Dismissal

A temporary detour was required as part of a bridge replacement project and the detour went through Plaintiffs' neighborhood. Plaintiffs allege that as octogenarians their rights were violated under the Americans with Disabilities Act by the County of Putnam and McLaren Engineering Group, because the increased traffic caused by the temporary detour through their street restricted their ability to enter/exit their driveway. In addition, Plaintiffs are claiming they could not walk on their street, because they could have been injured by the increased traffic.

UC Athletic, LLC v. McMillan Pazdan Smith, LLC / KCI Associates of North Carolina, P.A.

Case No: 2021-CP-46-02683

Jurisdiction: State of South Carolina, County of York

Opened: September 2022

Closed: July 2025 - Settled

Plaintiff is a developer who hired the architect to design a new a multipurpose building and athletic center. The architect contracted with KCI for certain structural design services. Plaintiff alleges a breach of duty of care and implied warranty against KCI.

Matthew P. Pinckney v. Tommy W. Welch dba Tommy Welch Livestock / Tommy Bradley Welch dba TBW Cattle / Cary A. Fields / South Carolina Department of Transportation / Blythe Construction, Inc. / Zachry Construction Corporation / Blythe Construction Inc. - Zachry Construction Corporation, a Joint Venture / KCI Technologies, Inc. / Infrastructure, Consulting & Engineering, PLLC / Johnson, Mirmiran and Thompson, Inc.

Case No: 2023-CP-11-00031

Jurisdiction: State of South Carolina, Court of Common Pleas for the Seventh Judicial Circuit

Opened: February 2024

Closed: July 2025 – Settled

The litigation is based on a car crash that occurred on March 3, 2021, whereby Plaintiff was stopped in traffic and struck from behind by a tractor trailer within the construction zone of the I-85 widening project. KCI was performing inspection services under a contract with South Carolina Department of Transportation.

Barbara Foley v. The City of New York / The New York City department of Parks and Recreation / Site Specialists Ltd. / M.G. McLaren Engineering and Land Surveying, P.C.

Case No: 704065/2022

Jurisdiction: Supreme Court of the State of New York, Queens County

Opened: February 2022

Closed: October 2025 – Stipulated Dismissal

Plaintiff alleges she was injured at a NYC public park located at 107-10 Shore Front Parkway, Queens, NY as a result of the failure to design, construct and maintain the park.

Estate of Widmann, Jr. and David J. Widmann, Sr. v. Rondell Bradley / PennDOT / Bristol Township / URS Corporation / AECOM Technical Services, Inc. / KCI Technologies, Inc.

Case No: 2022-05562

Jurisdiction: Court of Common Pleas of Buck County, Pennsylvania

Opened: December 2023

Closed: March 2026 - Settled

This litigation involves a 2022 motorcycle crash on Bristol Pike in Bristol, PA. The crash occurred when the driver of an SUV turned left and struck the motorcycle traveling toward him. Bristol Pike underwent reconstruction in the vicinity of the accident between 2013 and 2016, and KCI was a subconsultant to URS Corporation (now AECOM) as part of the design of the project.

City of Tampa v. Vasi & Associates, Inc. / KCI Technologies, Inc.

Case No: 23-CA-013513

Jurisdiction: Circuit Court of the Thirteenth Judicial Circuit

Opened: August 2025

Closed: May 2026 - Settled

On or about February 24, 2022, during horizontal directional drilling, Vasi & Associates, Inc. is reported to have struck and penetrated a 4-inch reclaimed water main and an 8-inch City sewer line. KCI had a contract with the City of Tampa for the location and marking of underground reclaimed water facilities, and the City asserts KCI did not adequately perform these services.

KCI Technologies, Inc. v. Townsend Acres, LLC / Raymond Petkevis / Michael Seidenburg

Case No: N23C-01-083 JRJ

Jurisdiction: Superior Court of the State of Delaware

Opened: April 2024

Closed: Ongoing

KCI provided professional design services for Townsend Acres, LLC in connection with the development of a proposed subdivision. As a counterclaim to a payment dispute, Defendants allege that KCI failed to identify significant cost issues related to sewer service, rendering the subdivision plans commercially unviable.

Avora at Port Imperial Condominium Association, Inc. v. LS-NJ Port Imperial, LLC / McLaren Engineering Group / et al. (over 30 defendants)

Case No: HUD-L-2172-23

Jurisdiction: New Jersey Superior Court, Hudson County

Opened: June 2023

Closed: Ongoing

Plaintiff alleges defects in design and construction of the condominium complex in New Jersey.

Novanetto, LLC dba Prose Nails Riverwalk / Dolores Novak / Andrea Fascinetto v. R Jordan Design Group, LLC dba The Jordan Group / KCI Technologies, Inc. / Jack Laurence Corporation

Case No: 2023CI21293

Jurisdiction: 57th District Court, Bexar County, Texas

Opened: October 2023

Closed: Ongoing

Plaintiff is a tenant of a building and hired an interior design firm for the design of the leased space where a nail salon was to be located. The interior design firm subcontracted with KCI for certain mechanical engineering and design services. Plaintiff alleges negligence in the provision of mechanical engineering duties.

Steven Pisani v. The City of New York / South Street Seaport Limited Partnership / The Howard Hughes Corporation / Hunter Roberts Construction Group, LLC / M.G. McLaren Engineering and Land Surveying, P.C.

Case No: 156735/2022

Jurisdiction: Supreme Court of the State of New York, County of New York

Opened: March 2024

Closed: Ongoing

Plaintiff alleges that he was injured descending an interior staircase in the building located in New York, New York ("Building"). Plaintiff alleges that while he was performing work on behalf of New York City Economic Development the subject staircase gave way and Plaintiff stepped through a tread of the staircase and fell. The Building was condemned, not habitable and in the process of being demolished. McLaren had surveyed the Building and had identified that the building was not habitable and was in a hazardous condition and in danger of collapsing. Both Pisani and his employer were aware of the condition.

Kyle Rabon / Aleah Rabon v. Blythe Construction Inc. / Zachry Construction Corporation /South Carolina Department of Transportation / Parrish and Partners, LLC / Johnson, Mirmiran and Thompson, Inc. / Stay Alert Safety Services, LLC / Sloan Construction Company, Inc. / Reeves Construction Company / KCI Technologies, Inc. / Infrastructure, Consulting & Engineering, LLC

Case No: 2025-CP-42-04019

Jurisdiction: State of South Carolina, Court of Common Pleas for the Seventh Judicial Circuit

Opened: September 2025

Closed: Ongoing

The litigation is based on a motorcycle crash that occurred on January 31, 2024 within the construction zone of the I-85 widening project. KCI was performing inspection services under a contract with South Carolina Department of Transportation.

Luis Garcia v. KCI Technologies, Inc. et al.

Case No: 11-2025-Ca-002858-0001-01

Jurisdiction: State of Florida, Circuit Court Of The 20Th Judicial Circuit In And For Collier County

Opened: December 2025

Closed: Ongoing

This litigation is based on a vehicle accident on or around January 2024 resulting from an unspecified negligent condition on I-75, in the vicinity of mile marker 7. KCI performed various inspection services under a contract with Florida Department of Transportation.

Eric Coles v. Ian Kelly Enterprises LLC / Ian Kelly / The Live Dept. / Jean Paul Firmin / Ross Zapin / Roger Vennewald / M.G. Mclaren Engineering and Land Surveying, P.C. / Guardian Barrier Services, LLC

Case No: 150852/2026

Jurisdiction: Supreme Court of the State of New York, County of New York

Opened: January 2026

Closed: Ongoing

Plaintiff alleges that defendants caused a theater to “go dark,” and caused Plaintiff to fall off the stage from a height and sustaining alleged serious and permanent injuries.

Varo Villalobos v. Brandywine Construction Co., Inc. / Delaware Transportation Authority / State of Delaware / Delaware Department of Transportation / KCI Technologies, Inc.

Case No: Jurisdiction:

Opened: March 2026

Closed: Ongoing

Plaintiff was partially trapped at a worksite when a trench wall collapsed, resulting in multiple injuries. KCI provided construction inspection services on the project.

6. PROFESSIONAL SERVICES AGREEMENT

Professional Services Agreement

KCI has reviewed the Professional Engineering Services Agreement included with the RFQ. KCI confirms that it will meet the prerequisite insurance requirements and, if selected, agrees to enter into the Professional Engineering Services Agreement with the City of Edinburg.

7. CONTACT INFORMATION

Contact Information

Contact information for our Project Principal and Project Manager is provided below.

Mr. Mardoqueo Hinojosa – City Engineer
City of Edinburg
C/o City Secretary Department (1st Floor)
415 W. University Dr.
Edinburg, Texas 78539

Re: Request for Qualifications – "Professional Engineering Services for the City of Edinburg" RFQ No. 2026-7

Dear Mr. Hinojosa,

On behalf of the GDJ Team and as Legal Representative of GDJ Engineering LLC, who will be the prime consultant (executor of the contract), we enthusiastically submit this Statement of Qualifications to provide ***Professional Engineering Services*** to the City of Edinburg.

As you are aware, the City of Edinburg is a major retail and educational hub of the Rio Grande Valley connected to I-69C. Along with the commercial aspects of your infrastructure needs, the retail and residential aspects of the City of Edinburg are rapidly growing. All growth trends in the city indicate that there will be a need for transportation and drainage infrastructure upgrades to efficiently move heavy commercial traffic to stimulate the local economy and expand local roads to ensure the safety of the traveling public.

GDJ has been in in existence since 2017 with three (3) principals consisting of Mrs. Lydia Macheska as President, Mr. Robert Macheska as Executive VP/COO and Mr. Christopher Rodriguez as Vice President. GDJ staff have been involved in project development, civil engineering, design, utility coordination, environmental analysis, and construction management in the Rio Grande Valley for over 20 years and has a combined experience of over 85 years. Key staff are native to the region, are completely familiar with the challenges posed by regional transportation and drainage issues and have developed comparable projects in the region and the state. Additionally, key staff have been intimately involved with all individual MPO's in the region, as well as the merging of the three MPO's into the current RGVMPO. In addition, we are headquartered in the City of Edinburg so we are completely invested in the City's economic growth and transportation needs.

For more than thirteen years, GDJ staff has served in an advisory position providing coordination services for various governmental entities at the local MPOs, including the City of Edinburg, the City of Mission, Hidalgo County, Hidalgo County RMA, Cameron County, and CCRMA. Duties included developing strategic plans, cost estimates, project concepts, and coordinating with staff and elected officials to prioritize local resources and ensure projects were properly programmed on the MPO planning documents.

The team understands local, state, and federal guidelines and requirements to expedite the project development. This includes the process of partnering with TxDOT to develop projects to a "Ready to Let" status where TxDOT will allow a project to utilize state and federal funds for design, Right-of-Way,

TRANSPORTATIONUTILITIESDRAINAGEENVIRONMENTALSTRUCTU

construction, and construction engineering and Inspection. GDJ staff is also proficient with the coordination of Economically Disadvantaged County or Advanced Funding Agreements with TxDOT to ensure the maximum reimbursement for project related expenses.

The GDJ Team is committed to providing excellent service to the City of Edinburg by providing accurate estimates to ensure expeditious and efficient project development. The team would use all available resources to ensure the project is shovel ready, constructed on time, within budget, and of the highest quality to maximize the benefit to the local taxpayer.

The GDJ Team also commits that all contents of this Statement of Qualifications (SOQ) are valid for at least 90 days beyond the July 14, 2026 deadline for submission. GDJ has read the sample Professional Services Agreement and the firm will meet the prerequisite insurance requirements, and, if selected, the firm agrees to enter into such agreement.

On behalf of the GDJ Team, I would again like to thank you for the opportunity to be of service to the citizens of the City of Edinburg and to help you meet our community's infrastructure needs. As legal representative of the GDJ Team, I am able execute any necessary contract documents with the City of Edinburg and serve as the authorized person to legally bind the GDJ Engineering Team to the representations put forth in this SOQ. Should you have any questions or require additional information, please do not hesitate to contact me, Robert Macheska, P.E. at (956) 603-2025.

Sincerely Yours,

Lydia Macheska

Firm Qualifications & Experience

Experience & History

GDJ Engineering, LLC (GDJ) is a diverse, multi-discipline engineering firm based in Edinburg, Texas at 2805 Fountain Plaza Blvd, Suite B. GDJ was formed in 2017 and currently consists of seventeen (17) full time employees that possess experience and knowledge in a wide variety of fields including street infrastructure evaluation and improvements, pavement management and improvements, erosion and sediment control design, hydrologic analysis and design, transportation planning/evaluation, traffic engineering services, traffic signal design, highway/civil, structural/bridge, environmental engineering services, and construction management.

GDJ personnel have a combined experience of over 85 years. Our engineers, designers, and environmental scientists possess the knowledge for planning, design, environmental analysis, construction, and management of the transportation infrastructure critical to the growth of our region and the state. The GDJ team is equipped to work individually or in a team environment to establish concepts, set project goals, and deliver measurable results to every assignment. As project constraints and challenges arise, our staff thrives in bringing innovative ideas to the table for creating an opportunistic solution. We believe in a balanced design concept which meets the operational objectives, produces sustainability for tomorrow, context sensitive solutions and adherence to a time-sensitive budget. Achieving these results require empowering our staff to develop unique ideas which add value for our clients and maximize their investment. GDJ staff has developed projects with a variety of public entities including local cities, counties, Regional Mobility Authorities (RMAs), Metropolitan Planning Organizations (MPOs), and the Texas Department of Transportation (TxDOT). GDJ's managerial staff is pre-certified by TxDOT in a multitude of categories, brings over 45 years of development, design, environmental and construction experience, and has completed numerous transportation infrastructure projects.

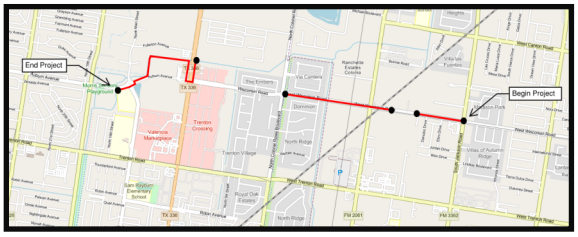
For more than 13 years, GDJ staff has served in an advisory position providing coordination services for various governmental entities at the local MPOs, including the City of Mission, Hidalgo County, Hidalgo County RMA, Cameron County, Cameron County RMA, the City of Laredo, and Webb County. Duties included coordinating with staff and elected officials to prioritize local resources and assure projects were properly programmed on the MPO planning documents. In addition to preparing project fact (budget) sheets and project planning, GDJ staff is proficient in the coordination of Advanced Funding Agreements with TxDOT. These agreements are critical to ensure TxDOT review of engineering and environmental documents. Proper coordination by firm staff of advanced planning ensured local reimbursement for locally administered projects with state and federal funding. Additionally, an analysis of existing projects sometimes allowed for projects experiencing delays to be adjusted to allow "shovel ready" projects to be constructed. Expediting the letting of projects often results in a savings in construction cost due to avoidance of escalation. The GDJ team will strive to provide the City of Edinburg with the quality of service the tax payers deserve.

Mr. Robert Macheska P.E., C.F.M., is GDJ's Program Manager and COO of the company. Mr. Macheska has over 23 years of experience with nine years working directly with TxDOT and 14 years of private sector experience. He has worked on all aspects of project development, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management

and design experience include contract administration, supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Mr. Macheska's private sector engineering consulting work has primarily consisted of managing TxDOT Local Government Project Procedures (LGPP) governed projects that have used funds from the Rio Grande Valley Metropolitan Planning Organization (RGVMPO) for Preliminary Engineering (PE), Right-of-Way (ROW), Utilities, PS&E, Construction Engineering, and Construction. He is also TxDOT LGPP Certified. Based on his current workload, Mr. Macheska will be able to assign approximately 40% of his time to these projects.

Mr. Christopher Rodriguez P.E., C.F.M. will serve as the TxDOT LGPP Certified Design Services and PS&E Manager and provide Hydrology & Hydraulic (H&H) support. Having previously worked for TxDOT and currently in the consulting engineering sector, this wide-range of experience has provided Mr. Rodriguez with excellent firsthand knowledge of the functionality of multiple government entities. He has experience on various aspects of transportation and drainage projects, from planning and PS&E preparation, H&H Design to construction phase services. His project management and design experience include supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Mr. Rodriguez has managed multiple concurrent design projects and production staff with numerous design groups under his direction. Mr. Rodriguez will be able to assign approximately 60% of his time to these projects.

Mr. Anthony Garza will serve as the MPO coordinator and project planning manager to assist with any needed coordination at the RGVMPO to accelerate the construction of the projects and source any additional state and or federal funds that may be needed for ROW, Construction Engineering, or Construction. Mr. Garza has over 16 years of experience and three years of construction management experience. He has served as the MPO representative for the City of Mission, Hidalgo County, Webb County, and Cameron County. Mr. Garza understands local, state, and federal guidelines and requirements to expedite the project development. This includes developing strategies to expedite the execution of Advanced Funding Agreements (AFA) with TxDOT to ensure review of environmental documents in a timely manner. Mr. Garza possesses a multi-disciplined approach and the necessary skills in project planning and development to successfully bring projects to a shovel ready status, leading to construction. Mr. Garza will be able to assign approximately 60% of his time to these projects.



Ms. Corina Argullin will serve as the Environmental Manager. Ms. Argullin has over 15 years of experience, with extensive knowledge of the NEPA process from planning through construction. She has completed over 30 NEPA clearances under the purview of TxDOT, 13 of which were FONSIs. She has experience in a variety of projects including maintenance/ drainage, local/state road expansions, new location roadways, and pedestrian/shared use facilities. Ms. Argullin is proficient in all aspects of public involvement, NEPA documentation, agency coordination, and environmental permitting. Her management experience includes supervision of staff and sub-consultants, QA/QC, scheduling, and document review and preparation. She is LGPP and wetland delineation certified. Ms. Argullin understands that the environmental process is the critical path to project construction; therefore, it needs to be completed in a diligent and expeditious manner. Ms. Argullin will be able to assign approximately 65% of her time to these projects.

Engineering Services in the Past Two Years

PROJECT: Jackson Hike & Bike Trail Phase II
LIMITS: Jackson Rd. to Morris Trail
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of McAllen
CLIENT REFERENCE: Eduardo Mendoza, P.E. City Engineer, (956) 681-1150
PROJECT DESCRIPTION:

The GDJ team is working with the City of McAllen to provide design, environmental, PS&E and construction management for phase II of the Jackson Hike and Bike Trail. The scope of the improvements include providing a 10-foot-wide shared use path and sidewalk. The purpose of the project is to improve multimodal connectivity and access in the project area. Due to the urbanization and presence of utilities along the existing route, care was taken in the design process to minimize impacts to the properties and utilities. This project includes a pedestrian railroad crossing; therefore, engineers coordinated with the railroad companies to ensure their design standards were met. The project was allocated TASA funds that was set to expire; therefore, the team worked expeditiously with TxDOT to ensure the funding was not lost. Construction was completed in 2025.

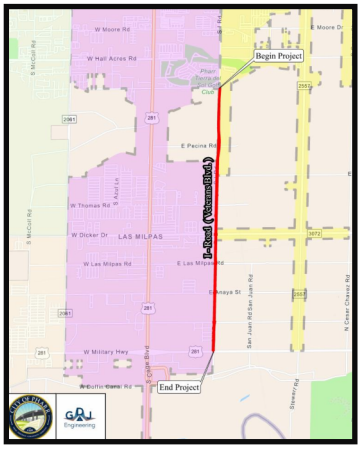
PROJECT: Dana Ave.
LIMITS: From FM 3248 to FM 802
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: CCRMA, (956) 621-5571
CLIENT REFERENCE: Eric Davila, P.E., Chief Development Eng.
PROJECT DESCRIPTION:

The GDJ Team completed schematics, environmental, & traffic impact studies for the widening of an existing roadway in Brownsville, TX. The traffic feasibility study assessed traffic impacts including corridor/ Intersections LOS determination and provided recommendations for safe and efficient traffic operations. The project required a drainage analysis utilizing the HecRas model at the two water crossings, one existing bridge over a drainage ditch and one proposed bridge at a resaca crossing. Completed a hydrologic map and hydraulic analysis for the project. Completed coordination with irrigation and drainage districts. The GDJ Team completed a traffic project methodology memo and traffic projections that were approved by TxDOT TP&P. Completed all environmental technical reports, public involvement, and received NEPA clearance. The project is currently in the ROW acquisition phase.

PROJECT: Moore Road
LIMITS: From Jackson Rd. to I Rd.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of Pharr
CLIENT REFERENCE: Patrizia Longoria, P.E., City Engineer (956) 402-4000

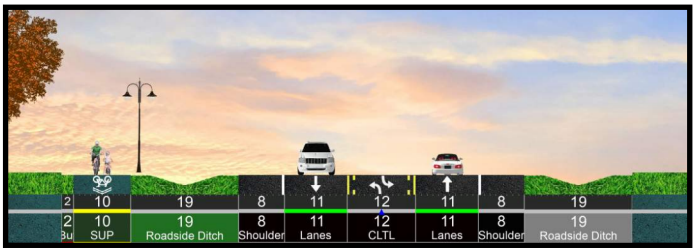
PROJECT DESCRIPTION:

GDJ staff worked on the project development, funding analysis, MPO coordination, schematic completion, environmental document preparation, utility coordination, drainage design and PS&E development. The project included a continuous left turn lane, shoulders, a sidewalk, and a shared-used path for pedestrians and bicyclists. A key challenge to this project was coordinating with the historic irrigation district and the Texas Historical Commission. The GDJ team successfully completed public involvement and obtained NEPA clearance. The project is currently in the PS&E and ROW acquisition phase.



PROJECT: FM 1847
LIMITS: From Resaca Retreat Dr. to First St.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: CCRMA
CLIENT REFERENCE: Eric Davila, P.E., CFM (956) 621-5571

PROJECT DESCRIPTION:

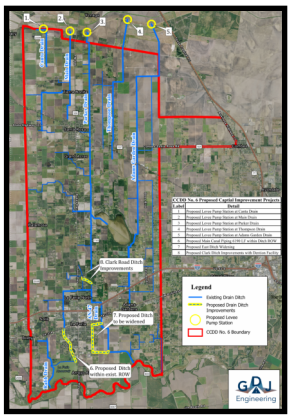


GDJ staff worked on the project development, funding analysis, MPO coordination, schematic completion, environmental document preparation, utility coordination, and PS&E development. The scope of the project included a new five-foot-wide sidewalk on the west side of the existing roadway. This project completed construction in 2025.

PROJECT: I Road
LIMITS: From Rancho Blanco Rd. to US 281
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of Pharr
CLIENT REFERENCE: Patrizia Longoria, City of Pharr Mayor (956) 402-4000

PROJECT DESCRIPTION:

GDJ staff worked on the project development, funding analysis, MPO coordination, schematic completion, environmental document preparation, utility coordination, drainage design and PS&E development. The project included a new shared-used path for pedestrians and bicyclists. A key challenge to this project was the crossing of the IBWC main floodway and Arroyo Colorado River. This required coordination with both the IBWC and USACE.



PROJECT: Lopezville Park
LIMITS: 507 W. Minnesota Rd., San Juan, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County Pct. #2
CLIENT REFERENCE: Erika Zamora, Hidalgo County Pct. #2 Administrator, (956) 784-3510

PROJECT DESCRIPTION:

GDJ staff completed the schematic, environmental, utility coordination and PS&E on this project. The scope of the project involved providing improvements to an existing park. As part of the project, a new walking trail, a stock pond for fishing, repaved parking lot, lighting, benches, native landscape development, and other user amenities were included. The key challenges to this project was the existing historic irrigation district, TPWD pond stipulations, and transmission lines traversing the parkland. This project is currently under construction.

PROJECT: Capital Improvement Projects
LIMITS: CCDD #6, Santa Rosa & La Feria, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Cameron County Drainage District #6
CLIENT REFERENCE: Josh Ruiz, President (956) 748-2102

PROJECT DESCRIPTION:

The GDJ team is working with the CCDD #6 to provide design, PS&E, environmental analysis/permitting, and construction management for several capital improvement projects. The team provided a preliminary engineering report and phase I environmental site assessments. The GDJ team completed and obtained an IBWC license for five pump projects along the North Floodway levee. Construction on the first pump is anticipated to begin in August 2026. In addition, the team has completed environmental assessments and agency coordination for two CIP projects (Adams Garden and Parker Drain) as part of the U.S. Department of Housing and Urban Development (HUD) grant programs. The GDJ team is currently overseeing the construction management of Clark Ditch widening and detention pond in La Feria.

PROJECT: Rio Hondo City Park
LIMITS: Harris Dr., Rio Hondo, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of Rio Hondo
CLIENT REFERENCE: Ben Medina, City Administrator, (956) 748-2102

PROJECT DESCRIPTION:

The GDJ team is working with the City of Rio Hondo to provide design, PS&E and construction management at the existing boat ramp park. The scope of the improvements include providing walking trails, a kayak launch, restroom facilities, bird blinds, parking lot resurfacing, new RV parking, native landscaping and a new playground. The purpose of the project is to provide improvements that maximize the park space, while providing amenities unique to the area. Due to the location of the property, state and federal permits/approvals (i.e. TGLO & USACE) are required. Funds for this project are from a TPWD grant and a detailed budget was created to ensure the project would not exceed the funding. Construction was completed in Spring of 2024.

Firm's Uniqueness to Best Perform these Services for the City

It is GDJ's philosophy to provide the client with the most technically competent, timely and cost effective work product possible. GDJ believes in open communication with the client and understands that direct and constant lines of communication are imperative for a project's success; both in schedule and budget. The GDJ team has experience and understanding in the overall project process from planning to post-construction, including the intricate technical details necessary for the successful completion of a project. The GDJ team has the ability to analyze, plan, and prepare projects from cradle to grave to ensure the most efficient processes and successful completion. The overall commitment that the GDJ Team provides to our projects is unsurpassed. Our attention to detail and rapid response to issues is a staple of the GDJ Team Philosophy, as we have an excellent track record for successful projects and extremely satisfied clients.

The GDJ Project Management Team operates under a multi-faceted strategy to avoid unexpected cost escalations and overruns; as a result, projects bid out in the past 30 months have been consistently within +/- 5% of the engineers estimate for various clients. This has become especially important with current supply chain shortages and recent escalation of oil and steel prices. The GDJ Team constantly monitors the latest bid prices through several sources: TxDOT 1 month rolling averages, CIVCAST, local county & city lettings to ensure the accuracy of our estimates.

Beginning with high quality survey and subsurface utility data, combined with extensive experience with field conditions a high-quality plan set is the first defense against these issues. During the project development process the team begins with a preliminary estimate for the purposes of budgeting funding needed from the Local Government and the RGVMPO. Through the schematic phase and the 30%, 60%, and 90% PS&E process the design team works closely with client to ensure the cost estimates for construction, right-of way, and any needed utility adjustments are as accurate as possible. This allows the GDJ Team to help maximize the amount of funding from the RGVMPO throughout the multi-year project development process and reduce the local governments cost. GDJ has all of the latest design software and our team has unique experience with all oversight and auditing entities (TxDOT, FHWA, etc…), with several of our team members having firsthand work experience with said entities.

The GDJ team can meet any specification required and will not enter into any agreement without 100% confidence that the work product will exceed the city's expectations and requirements. GDJ has several projects that are in the process of completion and will be able to concentrate the majority of their time to the City of Edinburg. This will be accomplished with GDJ's team of qualified professionals that are amply prepared to provide the City of Edinburg with outstanding customer service and technical skills. The GDJ team has the proven knowledge and capabilities of providing superior engineering services to the City of Edinburg.

The GDJ Engineering Team has the abilities and qualifications to provide the City of Edinburg with the following professional engineering services:

Project Management & Planning Services

- Program & Project Management
- General Program Management (To Ensure Design/Construction Meets Requirements for Reimbursements on Reimbursable Funds Projects)
- Project Management of all Civil, Drainage, & Transportation Projects
- Planning Services

Civil Design Services

- Field Investigations & Data Collection
- Preliminary Engineering & Hydraulic Analysis
- Feasibility Evaluations & Alternatives Analysis
- Geometric Schematic & Typical Sections
- Utility Investigations & Analysis
- ROW Investigations
- Environmental Reports, Permitting, & Public Involvement
- Geotechnical Investigations
- Plans, Specifications & Estimates (PS&E)
- Geometric, Structural & Pavement Design
- Hydrologic & Hydraulic Design
- Environmental Design (SWPPP, EPIC Sheets)
- Traffic Design (Traffic Counts, Analysis of Traffic Movements)
- Design Packaging (Specifications, Construction Estimates, General Notes, Special Provisions)
- Bid Assistance
- Preparation of Bid Package, Bid Announcement, Review of Bidder Information, Bid Award
- Review of plans, subdivision/parcel maps & engineering/encroachment permits

The GDJ Team members have experience in developing multiple projects with various governmental agencies including: City of Pharr, City of Mission, Cameron County, Cameron County Regional Mobility Authority (RMA), Hidalgo County, Hidalgo County RMA, Hidalgo County Drainage District #1 and TxDOT (Pharr and San Antonio Districts). In addition, our team members have directly coordinated with multiple state and federal regulatory agencies such as the TxDOT, U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, Texas Commission on Environmental Quality, Texas Historical Commission, and may others. Currently, the GDJ Team has no past or pending litigation against or involving its agents or employees with respect to any work we have performed.

The GDJ team has experience and understanding in the overall process from planning to construction, including the intricate technical details necessary for the successful completion of a project. The comprehensive project steps include evaluating the existing ROW and utilities, identifying environmental constraints, delineating drainage areas, evaluating and optimizing a drainage plan, developing preliminary plans and estimates for the proposed improvements, alternatives analyses, completing the environmental process, and finalizing the plans and estimates. The GDJ team is also prepared to complete any geotechnical studies associated with the project and is fully staffed to oversee the construction of the projects. The team will coordinate with the city throughout the entire process to ensure their needs and concerns are addressed.

The GDJ Team will assure the quality of deliverables, engineering services, and environmental services by implementing a proven project specific QA/QC work plan based on the following principles: Knowledge/Experience, Coordination/Communication, Constructability Review, Accuracy/ Completeness, and Thorough Design/Environmental Schedules.

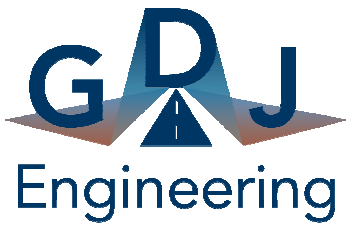
Office Location

The GDJ Team is very familiar with the local geographic area. The GDJ office is located just south of the Canton Road and McColl Road intersection within the city of Edinburg and the principals live within 10 miles of the office. As persons who both live and work in the area, city projects are of great interest to the team. As a local firm with staff from all areas of the Rio Grande Valley, the GDJ team is familiar with the City of Edinburg and its geographic attributes.

The team has completed several regionally significant projects in Hidalgo County, South Texas and the state. GDJ is also well acquainted with the TxDOT Pharr District and have gained a thorough understanding of the unique problems that we are faced with in the Rio Grande Valley. We have witnessed first hand the issues the valley has faced over the years with massive rainfall events and, due to the flat topography of the region, the local/regional flooding that has occurred. We are a completely local firm in the Rio Grande Valley and understand the area and the engineering needs of the city.

Approach to Handling Part-time Staffing Needs for Smaller Assignments

GDJ assures the city that all staff included in the proposal for this pursuit will have sufficient availability to complete the project on time and within the proposed budget. The current workload that GDJ has will allow us to dedicate more than enough time to complete projects within schedule and without delay. GDJ commits to being ready and able to begin work on the project immediately after successfully negotiating a contract for said services. We stand ready and prepared to make all necessary staff available to efficiently complete the proposed projects. Should the need arise for part time staffing, GDJ has the resources and access to knowledgeable experts that would be available to complete smaller assignments. In addition, the GDJ team is adequately staffed to provide concurrent work on various projects.



Ability to Meet Schedules and Deadlines

GDJ has the staff and capabilities to successfully address the city's engineering needs and schedules. GDJ has many years of experience developing, monitoring and updating critical path method schedules for multiple types of projects. It is GDJ's philosophy to provide the client with the most technically competent, timely and cost effective work product possible. GDJ believes in open communication with the client and understands that direct and constant lines of communication are imperative for a project's success; both in schedule and budget.

GDJ creates realistic project and environmental schedules that are specifically designed to allow certain processes to run concurrently to ensure efficiency. For example, during the environmental process, agency coordination often occurs concurrently with the submission of technical reports, while the design team refines the schematic. These thorough schedules are discussed with the city and oversight agency to obtain agreement on major project milestones and document review/response times. The schedules are established early in the project process and evolve, as needed, to ensure the project proceeds in a timely fashion. The client is kept updated throughout the project process. Coordination and communication with oversight agency project managers is key to ensure the project remains on track. GDJ's strict adherence to established deadlines reflects our commitment to our clients.

GDJ has an established and proven QA/QC process based on knowledge and experience that reduces or eliminates multiple deliverable submittals. This process reduces review times and allows the project to progress at the quickest rate possible. Our extensive project experience allows us to understand the needs/operations of oversight agencies and incorporate this knowledge into our processes.

Team Member Qualifications & Experience

Robert Macheska, P.E., C.F.M.

PROPOSED ROLE: **PRINCIPAL & PROJECT MANAGER**

EXPERIENCE

Mr. Macheska has over 25 years of experience in the design and management of various public improvement projects. For the past 6 years Robert has served as Executive Vice President/COO for GDJ Engineering, LLC. He had previously worked for both the Texas Department of Transportation and L&G Engineering which provided him with excellent hands-on experience as to how multiple government entities function.

He has worked on all aspects of public works projects, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management and design experience includes contract administration, supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Robert's management approach is very proactive, and he constantly maintains open and effective lines of communications.

PROJECTS

SH 364 from SH 495 to FM 1924 in Mission, Texas
Project Manager responsible for all design aspects of the project. The project consisted of reconstructing and widening an existing 24' rural roadway to an urban five lane section for 2 miles at a construction cost of $6.8 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. Calculated all Times of Concentration, rainfall intensities, calculated hydraulic gradient, and design discharges. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts.

10th Street Ext from SH 107 to FM 1925 in Edinburg, Texas
Project Executive responsible for all design aspects of the project. The project consisted of reconstructing and widening an existing 24' discontinuous rural roadway to an urban five lane section for 2.5 miles at a construction cost of $11 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. Calculated all Times of Concentration, rainfall intensities, calculated hydraulic gradient, and design discharges. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts.

EXPERIENCE

Mr. Rodriguez has over 20 years of experience in the design and management of various public improvement projects. For the past 4 years Chris has served as Vice President of Engineering for GDJ Engineering, LLC. He had previously worked for both the Texas Department of Transportation (San Benito Area Office) and L&G Engineering which provided him with excellent hands on experience as to how multiple government entities function. He has worked on multiple aspects of transportation and drainage projects, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management and design experience includes supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Chris has managed multiple concurrent design projects and production staff with numerous design groups under his direction.

PROJECTS

FM 681 from SH 107 to SH 364 in Mission, Texas
Deputy Project Manager responsible for all design aspects of the project. The project consisted of reconstructing and widening an existing 40' rural roadway to an urban divided highway for 2.7 miles at a construction cost of $16.8 million. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. Calculated all Times of Concentration, rainfall intensities, calculated hydraulic gradient, and design discharges. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts.

FM 493 from US 281 (Military) to Bus 83 in Donna, Texas
Deputy Project Manager responsible for all design aspects of the project. The project consisted of reconstructing and widening a 32' rural two lane roadway to a 44' rural roadway for 6.5 miles at a construction cost of $12 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections.

10th Street Ext from SH 107 to FM 1925 in Edinburg, Texas
Lead Engineer responsible for all design aspects of the project. The project consisted of reconstructing and widening an existing 24' discontinuous rural roadway to an urban five lane section for 2.5 miles at a construction cost of $11 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. Anthony Garza

PROPOSED ROLE: **AGENCY / MPO COORDINATION LEAD**

GDJ Engineering

REGISTRATIONS
Local Government Project Procedures Certified

CITY OF RESIDENCE
Harlingen

ROLE EXPERIENCE
21 Years

FIRM EXPERIENCE
6 Years

EDUCATION
Bachelor of Science
Biology
University of Texas A&M - Kingsville

EXPERIENCE

Mr. Garza has over 21 years of experience, and 6 years of Construction Management experience, in infrastructure development for public and private sector clients. He has an extensive knowledge of the federal and state environmental laws specifically with respect to roadway, infrastructure, and transportation planning coordinating environmental documents and programming state and federal funds for linear transportation projects. In this time Mr. Garza served as the representative for the City of Mission, Hidalgo County, Webb County, and Cameron County at the local Metropolitan Transportation Planning Organizations. Highlighting his skills in project planning and development. This required a multi-disciplinary approach to assure the proper coordination of advanced planning efforts to ensure local reimbursement for locally administered projects with state and federal funding.

PROJECTS

Hidalgo County MPO, Hidalgo County, Texas
Mr. Garza served as the Hidalgo County MPO TAC representative from April 2011 to May 2013 and from September 2017- October 2019. During this time his duties included coordinating with all precincts in Hidalgo County to assure their projects were properly programmed on the MPO planning documents. In addition to preparing project fact sheets and project planning and environmental documents Mr. Garza also provided project feasibility reports to determine if projects on the MPO Planning documents were "active" projects. Analysis of existing projects sometimes allowed for projects experiencing delays could be adjusted to allow "shovel ready" projects to be constructed. Expediting the letting of projects often results in a savings in construction cost due to avoidance of escalation.

Laredo Urban Transportation Study Metropolitan Transportation Planning Organization, Webb County, Texas
Mr. Garza served as an advisor to both the City of Laredo and Webb County at the previously named LUTSMPO from 2014 to 2017. During this time, he successfully coordinated a comprehensive audit of Proposition 1 & 7, Coordinated Border Infrastructure (CBI), and Category 7 funding and worked with the local governments to develop plans to fully fund the Loop 20 Expansion and the Hachar Reuthinger Parkway Projects for construction. During this time serving as the planning lead, he was able to secure over $325 million dollars in infrastructure funding within Webb County.

TxDOT Texas-Mexico Border Master Plan (Under HDR)
Served as a project manager for the subconsultant team in charge of performing data analysis and bridging the gap between project data and the wants and needs of the local governments and the final BTMP project selection criteria, scoring, and prioritization.

Corina Argullin

PROPOSED ROLE: **ENVIRONMENTAL MANAGER**

Master of Science in Environmental Science
Texas A&M University – Corpus Christi

Bachelor of Science Biology
Lubbock Christian University – Lubbock

EXPERIENCE

Miss Argullin has over 15 years of experience in National Environmental Policy Act (NEPA) documentation and procedures. She has obtained environmental clearances on over 25 different projects, ranging from categorical exclusions to environmental assessments. She has an extensive knowledge of federal and state environmental laws, specifically regarding roadway and transportation planning. Ms. Argullin has experience in coordinating and completing all aspects of the NEPA process, from project scoping to environmental inspections. Her experience includes, but is not limited to environmental documentation, agency coordination, environmental permitting and public involvement.

PROJECTS

South Parallel Corridor from FM 1479 to FM 1577 in Cameron County, Texas
Oversaw NEPA clearance on an environmental assessment for a new location roadway for the county. She completed various technical reports and environmental assessment document for the project. Ms. Argullin prepared a mitigation plan and obtained two NWP#14 from USACE for multiple resaca crossings. She handled the logistics and prepared all documentation for multiple public meetings, meetings with affected property owners, and an opportunity for public hearing.

I Road from Rancho Blanco Rd. to US 281 in Hidalgo County, Texas
Oversaw the NEPA clearance of an open-ended D-listed categorical exclusion for a roadway widening with hike/bike trail for the city. She prepared various environmental technical reports, obtained a NWP #14, submitted an IBWC license application, and oversaw the cultural resources team. Mr. Argullin coordinated logistics and prepared documents for a public meeting. She prepared all meeting materials.

Nolana Loop from FM 1426 to FM 88 in Hidalgo County, Texas
Oversaw the NEPA clearance on an environmental assessment for a roadway on existing and new location for the county. The project consisted of reconstructing and widening an existing two-lane rural roadway to a four-lane urban roadway. Ms. Argullin prepared the classification letter, various technical reports, agency coordination, and environmental assessment document. She handled the logistics and meeting materials for a public meeting and a public hearing.

Eduardo Ramirez

EDUCATION

Raymondville High School

TxDOT Field and Laboratory Certified

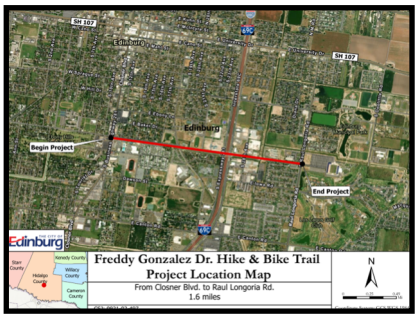
EXPERIENCE

Eduardo Ramirez has 30 combined years of experience in maintenance, construction inspection, project management in road construction, drainage, structural-bridge, and vertical construction projects. Ramirez's relevant construction management and inspection experience and duties include, but are not limited to, the following:

- Make sure all work was done according to plans and specifications
- Pay all work that contractor performed that was approved.
- Perform all testing that was required by the specs.
- Agreeing and confirming Pay App from Owner
- Authorizing payments for Subcontractors, Vendors and Suppliers;
- Schedule delivery of suppliers;
- Schedule Subcontractors for their work;
- Approve all timesheets and equipment charges and run cost reports to make sure we are on budget;
- Track all materials that showed up;
- Approve pay apps for suppliers, vendors and subcontractors; among others.

RELEVANT PROJECTS

Mr. Ramirez has construction management and inspection experience on the following projects:



- CCDD#6 – Tio Cano Pump Station – Construct Pump Station, Excavation, RCP and RipRap
- Cameron Co. Pct. 4 Various Roads – Consisted of Roadway resurfacing, Restoration and Rehabilitation and Drainage Outfalls
- Hidalgo Co. Pct#2 Parking Lot Improvement – New Parking Lot with Drainage, Lime Treat Subgrade, New Flexbase, Lighting Improvements, Hot Mix
- San Jose Ranch Road – Construction of a new Roadway that consists of Subgrade, Flexbase, Covert Structures and Irrigation Structures US 83 Harlingen to La Feria - Widening from 4 lane to 6 lane with overpasses and RW
- HCDD#1 – Pharr/McAllen Lateral E. Channel Improvements Ditch Widening Excavation, Ditch Regrading, Installation of Concrete Rip Rap, Inlets and Pipes
- FM 1847 Los Fresnos Sidewalk – Construction of Curb Ramps, Sidewalks, Signage, Striping, and Miscellaneous Pedestrian Elements along FM 1847

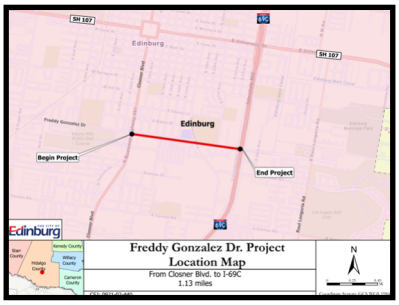
PAST PROJECTS WITH THE CITY OF EDINBURG



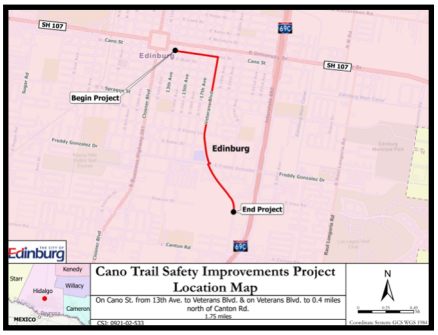
PROJECT: Freddy Gonzalez Dr. Hike & Bike Trail
LIMITS: From Closner Blvd. to Raul Longoria Rd.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
PROJECT DESCRIPTION:

GDJ aided in the NEPA environmental analysis and document preparation. The project included providing a new shared-used path for pedestrians and bicyclists along the existing Freddy Gonzalez Dr. The purpose of the project is to improve multi-modal connectivity and access in the project area. The GDJ team coordinated the scheduling with TxDOT to ensure the project maintained its funding. Five environmental technical reports, along with a scoping document were prepared and submitted to TxDOT. The project was environmentally cleared in November 2024.

PROJECT: Freddy Gonzalez Dr. Intersection Improvement
LIMITS: From 9th St. to BUS 281
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
PROJECT DESCRIPTION:

GDJ team aided the city in the NEPA environmental analysis and document preparation. The scope of the project included providing an 8-foot-wide ADA-compliant sidewalk adjacent to the existing roadway, removal of an existing curb, and relocation of a power pole, curb inlet and traffic light. The GDJ team implemented an accelerated environmental schedule in coordination with TxDOT to ensure the project funding remained intact. The project successfully obtained environmental clearance in December 2025.

PROJECT: Freddy Gonzalez Dr.
LIMITS: From BUS 281 to I-69C
PROJECT MANAGER: Robert Macheska, P.E., CFM
PROJECT ENGINEER: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
PROJECT DESCRIPTION:



GDJ aided in project development, funding analysis, MPO coordination, design/schematic preparation, and environmental document preparation. The scope of the project included providing a continuous left turn lane, right turn lanes at intersections, an intersection improvement at Veterans Blvd., and incorporation of the Freddy Gonzalez Hike and Bike Trail. The GDJ team conducted a Notice and Opportunity to Comment as part of the environmental process for the project. The project was environmentally cleared in June 2026 and is currently in the PS&E stage.

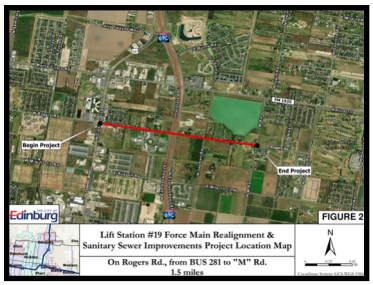
PROJECT: Cano St. & Veterans Blvd. Trail

LIMITS: On Cano St. from 13th Ave. to Veterans Blvd., then on Veterans Blvd. to 0.4 mi. north of Canton Rd.

PROJECT MANAGER: Robert Macheska, P.E., CFM

ENVIRONMENTAL LEAD: Corina Argullin

PROJECT DESCRIPTION:



GDJ aided the city with the NEPA environmental analysis and documentation preparation. The scope of the project included providing an 8-foot-wide shared use path and pedestrian poles along the existing roadways. The project required a section 4(f) analysis due to the presence of the Freddy Gonzalez Memorial Park, Freddy Gonzalez Hike & Bike Trail, and the Louisiana-Rio Grande Canal Company Irrigation District-National Historic District. The project was successfully environmentally cleared in March 2026.

PROJECT: Lift Station #19 Force Main Realignment & Sanitary Sewer Improvements

LIMITS: From BUS 281 to "M" Road

PROJECT MANAGER: Robert Macheska, P.E., CFM

ENVIRONMENTAL LEAD: Corina Argullin

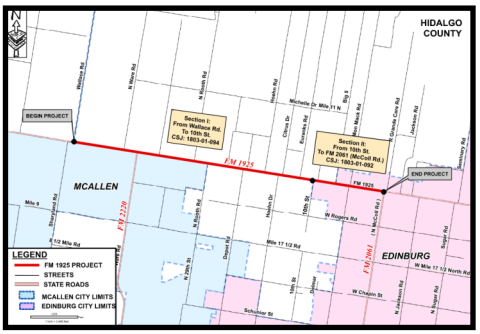
PROJECT DESCRIPTION:

GDJ prepared the environmental assessment (EA) and agency coordination documentation for a U.S. Department of Housing and Urban Development (HUD) Community Project Funding grant program. The GDJ team completed biological resources and hazardous materials summary reports in support of the EA. They oversaw the preparation of a cultural resource analysis and prepared the request for SHPO consultation. The team prepared the letters and materials for coordination with USFWS, THC, and four Native American tribes. The final completed documentation was submitted in April 2025.

PROJECT: Los Venados Elevated Storage Tank & Smart Meters

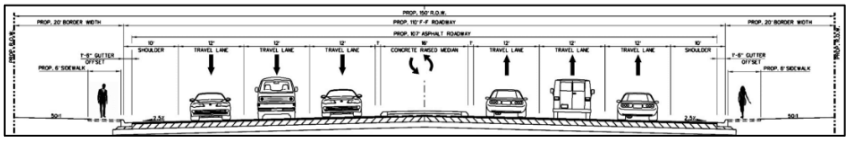
LIMITS: 0.1 mile south of the US 281 & Los Venados Intersection

PROJECT MANAGER: Robert Macheska, P.E., CFM



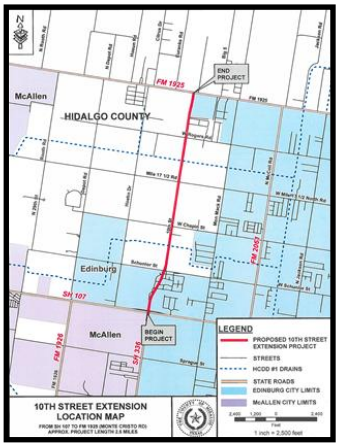
ENVIRONMENTAL LEAD: Corina Argullin

PROJECT DESCRIPTION:



The GDJ team prepared a preliminary categorical exclusion analysis and CE form as part of the City's application for a Texas Water Development Board (TWDB) Water Supply and Infrastructure Grant. The scope of the project includes upgrading the existing damaged tank to a water tower and converting approximately 690 traditional water meters to smart meters. The GDJ team submitted the preliminary documentation to the city for review further processing in June 2026.

PROJECT: FM 1925
LIMITS: From Wallace Rd. to McColl Rd.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County (ICA with Edinburg)



PROJECT DESCRIPTION:

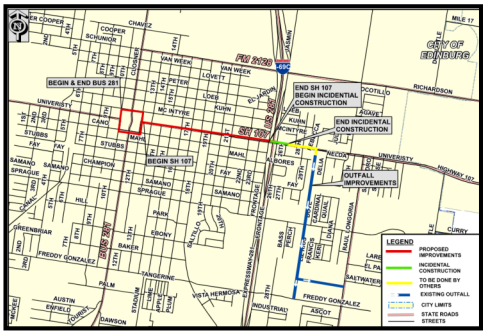
GDJ staff worked on the project development and funding, schematic completion, environmental document preparation, utility coordination, drainage design and PS&E development. The project included widening and reconstructing the existing roadway to six lanes with a median and correcting the misaligned intersection at Mon Mack Rd.

PROJECT: 10th Street Extension
LIMITS: From SH 107 to FM 1925
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County (ICA with Edinburg)

PROJECT DESCRIPTION:

GDJ staff completed the project development and funding, schematic, environmental, utility coordination and PS&E on this project. A key challenge to this project was the undermining of the existing roadway base from surrounding farm land irrigation operations. Once we identified the problem we designed a French drain system to remove the penetrating waters prior to infiltration into the roadbed.

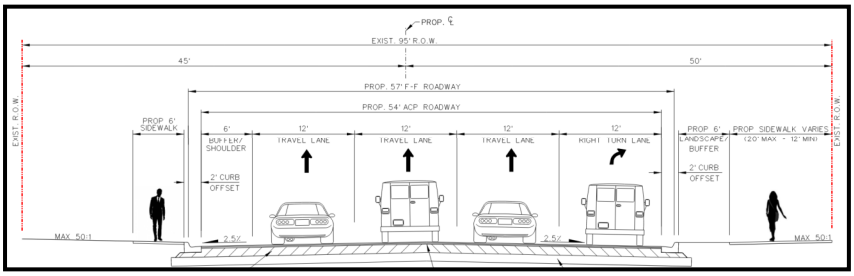
PROJECT: SH 107



LIMITS: From BUS 281 to I-69C

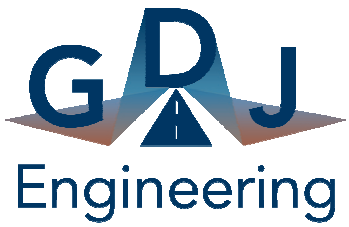
PROJECT MANAGER: Robert Macheska, P.E., CFM

ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM



ENVIRONMENTAL LEAD: Corina Argullin

CLIENT: Hidalgo County (ICA with Edinburg)



PROJECT DESCRIPTION:

GDJ staff worked on the project development and funding, schematic completion, and environmental document preparation. The project included converting the existing roadway to a one-way traffic operations, reconstructing SH 107 within existing ROW, removing/replacing the existing storm drain system, and improving the existing drainage ditch.

Re: Request for Sealed Qualifications for Engineering Services 2026-7

LeFevre Engineering, PLLC (LE) is pleased to submit our Statement of Qualifications.

LE is a multidisciplinary engineering firm licensed by the Texas Board of Professional Engineers (TBPE F-23093) with our main office located in Port Mansfield, Texas. Your point of contact is Richard LeFevre, BS, MS, CFM, PE (No. 102200), a licensed civil and environmental engineer and certified flood plain administrator. LeFevre Engineering is at 40% current capacity and is currently available to perform services for the City of Edinburg.

LeFevre Engineering strives to maintain an experienced, licensed engineer that will be your point of contact and attend all project and status meetings. Mr. LeFevre has over twenty-four (24) years of experience serving communities throughout South Texas and will serve as the design engineer and inspector, therefore alleviating the need for unnecessary time waiting for an "engineer or other consultant" who may not be authorized or available to approve the changes, resulting in idle time and delays during construction.

The City of Edinburg will always have Mr. LeFevre as your point of contact and will service all your needs that pertain to engineering, environmental issues, drainage, streets, plating, reviews, and the general needs of the projects for FY2026-2028. Additionally, Mr. LeFevre is a Certified Floodplain Administrator therefore knowledgeable in all aspects of design with regards to drainage and floodplain management and how it affects current proposed projects.

Mr. LeFevre and LE is providing or has provided city engineering and floodplain administrator services for:

- ✓ ***City of McAllen***
- ✓ ***City of Alton***
- ✓ ***City of San Juan***
- ✓ ***City of Mercedes***
- ✓ ***City of Weslaco***
- ✓ ***City of Donna***

LeFevre Engineering has not been involved and/or participated in substandard work or has violated any ethics in the past five (5) years.

At this time there has been no addendums issued in reference to this RFQ.

We appreciate your consideration regarding this proposal, and we express great interest in providing engineering services to the City of Edinburg. Please call if you have any questions or desire additional information.

LEFEVRE ENGINEERING
TEXAS REGISTERED ENGINEERING FIRM NO. 23093

Respectfully,

Richard LeFevre, P.E., CFM
President

FIRM'S PHILOSOPHY

Our philosophy begins with as experienced and proven Engineer-in-Charge who is committed to the client's satisfaction by providing responsive and practical project solutions. LeFevre Engineering strives to exceed the industry standards and the client's expectations. The attention to details throughout the project lifecycle, design, and careful planning by the team ensures the high-quality of service we are committed to providing for the client is fully satisfied. We prioritize understanding the vision and unique needs of our clients as well as the general public. Conducting our business with transparency, integrity and compliance with legal and regulatory requirements.

Our goal is to build a long-term relationship with our clients, while upholding ethical standards in all dealings is fundamental. Mr. LeFevre is the type of engineer that is familiar with the requirements for municipalities and public infrastructure projects because of his 20+ years of experience working with municipalities throughout South Texas. Mr. LeFevre believes that the engineer should be a functioning part of the project throughout the entire project. Rarely do you find a president of a firm that is the project design engineer and the inspector of the project. While working with larger firms and through his experience, we have noticed that many firms provide a "firm representative", which may or may not always be a licensed engineer.

During the selection process, many firms promise these engineer's will be present and "accessible" to the client. Many project managers may have their respective talents but are not licensed engineers and are utilized as a means of cutting costs for the firm. Far too often, due to large turnover rates, project managers do not have any authority to provide the needed changes "on the spot" and are further governed by a bureaucracy for final approval. As a result, they or are very limited in the construction activities and inspection and it creates the possibility of a delay in construction. Mr. LeFevre believes, to ensure success, the design engineer should be an integral part on behalf of the City in ALL aspects of the project.

FIRM INFORMATION

LeFevre Engineering, PLLC is a registered **Historically Underutilized Business (HUB)** by the State of Texas Historically Underutilized Business Certification and a **Disadvantaged Business Enterprise (DBE)** under the Texas Department of Transportation Compliance Program. It is the policy of the company to promote affirmative action and to provide equal opportunity to all employees and applicants for employment; and to administer all terms, conditions, and privileges of employment in a manner which does not discriminate on the basis of race, color, creed, ancestry, national origin, sex, age, marital status, liability for service in the armed forces of the United States, or because of physical or mental handicap in regard to any position for which the employee or applicant is qualified.

Firm Qualification and Experience

LEFEVRE ENGINEERING
TEXAS REGISTERED ENGINEERING FIRM NO. 23093

WHO WE ARE

LeFevre Engineering, PLLC, has the experience and expertise to provide professional engineering services in most of the disciplines needed by municipalities. LEFEVRE ENGINEERING, PLLC, formerly LeFevre Engineering, LLC, is owned and operated by Mr. Richard LeFevre, PE, CFM, and is a registered engineering firm licensed to practice in the State of Texas by the Texas Board of Professional Engineers under the firm number F-23093, also a Certified Floodplain Administrator and is located in South Texas. LeFevre Engineering, LLC was founded in 2008 and was restructured as a professional limited company in 2022. LEFEVRE ENGINEERING, PLLC is a **Professional Limited Liability Corporation**. Our clients will have access to the same LeFevre Engineering PLLC staff at nearly all hours of the day and will have access to the principal, engineers, and other support staff. The city of Edinburg will have access to the same staff throughout the entire project as we have no turnover, unlike larger firms. We will be available for unexpected meetings or construction concerns as you will find when speaking to our references and because we are a local firm.

- **Civil Engineering**
- **MEP**
- **Structural**
- **Environmental Engineering**
- **Planning**
- **Management Consulting**
- **Project Management**
- **Construction Management**

Our proven experience transcends the line between planning, design, and construction with various municipal projects in South Texas. LeFevre Engineering has proven its ability to design and provide construction phase services for the Hidalgo County, Urban County Federal Program, City of San Juan, McAllen PUB, City of Alamo, City of Alton, and Progreso International Bridge involving many different funding requirements and engineering requirements for public entities.

For our firm, it is important for clients to have access to their project engineer during all phases of the projects. Far too often, larger engineering and consulting firms have large turnover which does not allow engineers to become “engaged” in the project as they have no opportunity to “develop” a working relationship with those officials necessary to develop the project. Historically, based on our experience, a client may not interact with an engineer until the project is either completed or there is a problem. We take pride in saying that the City of Edinburg will see the lead project engineer, Mr. LeFevre, will spearhead a project from the beginning through final completion.

Firm Qualification and Experience

Our extensive experience with state and municipal requirements with design and construction of public infrastructure will provide a vital component in the success for the City of Edinburg and their infrastructure requirements for projects if needed. It furthermore shows our success to successful and affordable projects for our clients. As part of our objectives we have experience with municipalities with fixed budgets and have completed projects by providing fair and accurate cost estimates, reasonable construction scheduling, value engineering, assistance with bidding, recommendations and awarding, assistance with contract requirements for the contractor, reviewing and recommending contractor pay requests, and all other aspects needed for the City of Edinburg to be successful in design and construction of their proposed projects.

LEFEVRE ENGINEERING, PLLC. Staff have managed and designed public projects utilizing funding for the following agencies:

- ✓ **Texas Water Development Board**
- ✓ **Texas Department of Transportation**
- ✓ **General Services Administration (GSA)**
- ✓ **Federal Motor Carrier and Safety Administration (FMCSA)**
- ✓ **Environmental Protection Agency (EPA)**
- ✓ **Federal Emergency Management Agency**
- ✓ **Texas Water Development Board (TWDB)**
- ✓ **Border Environment Cooperation Commission**
- ✓ **US Department of Housing & Urban Development (HUD)**
- ✓ **US Department of Agriculture Rural Development (USDA)**
- ✓ **Texas Commission on Environmental Quality**

Firm Qualification and Experience

LEFEVRE ENGINEERING, PLLC has more than twenty years of combined experience and talent with proven engineering and support staff with the ability to multi-task and keep proposed projects on time and within budget. LeFevre Engineering, PLLC is a registered Historically Underutilized Business (HUB) by the State of Texas Historically Underutilized Business Certification and a Disadvantaged Business Enterprise (DBE) under the Texas Department of Transportation Compliance Program. LeFevre Engineering has developed a unique expertise and knowledge with public entities, such as the City of Edinburg, based on our previous work with the City and we have primarily worked with municipalities with relation to road design, drainage, water and wastewater design, environmental mitigation, permitting, construction phase engineering, inspection and project management utilizing local, state, and federal funding programs unmatched by many engineering firms in the RGV and South Texas.

Our firm understands the requirements for the City of Edinburg proposed projects and requests that we be considered for the following projects:

- ✓ **New and Rehabilitation Design of Roads.**
- ✓ **TXDOT design, route studies, permitting, and construction requirements for the City of Edinburg and TXDOT projects.**
- ✓ **Design of all aspects of Drainage, including detention, retention, swales, driveways, piping and culverts, and drainage requirements for the City of Edinburg.**
- ✓ **Design and construction of utility relocations, including water, booster stations, wastewater lift stations, sewer piping and manholes, water and sewage treatment plants.**
- ✓ **Master Planning**
- ✓ **Planning; Preliminary and Final Engineering Reports, Engineer's Estimates**
- ✓ **Water Planning, Pressure Plane Studies and Design Street Rehabilitation and New Construction.**

OUR EXPERTISE EXTENDS TO THE FOLLOWING:

- Civil Engineering
- MEP
- Structural
- Environmental Engineering
- Project Management
- Floodplain Administrator
- Social, Economic, Environmental Studies, Easements & ROW Maps
- Water Plants – Pumps, Piping, Disinfection, and Controls
- Project Development & Planning
- Facility Analysis & Master Planning
- Wastewater Collection Systems – New and Rehabilitations
- Lift Stations – New and Rehabilitations
- Wastewater Treatment Plants – New, Expansions, and Rehabilitations
- Wastewater Treatment Plant Permitting – New, Amendments, and Renewals
- Streets – New and Rehabilitation
- On-Site Sewer Systems – Design and Permitting
- Storm Drainage Pipes, Ditches, and Detention/Retention
- Drainage Design & Reports
- Engineering Studies and Plans
- Utility System Mapping
- Bond Applications and Reports
- On-site Construction Observation

ORGANIZATIONAL APPROACH

The firm's goal is to establish a long-term relationship with the clients by providing a highly competent service with integrity and concern for the client as well as the general public. We pride ourselves on our ability to design for ease of operation and maintenance and always strive to keep in mind the desires and capabilities of the client.

1.STUDY AND REPORT »

Consult with the City to define its needs, review existing available data, and establish required additional data.

Provide general economic analysis of the City's requirements as a allocation for expenditures, comparison of existing cost estimates, and/ or a statement of "not-to-exceed" values.

Meet with the City to review the established data and engineer's recommendations and opinions to solidify the project, responsibilities, and tentative schedules.

2. PRELIMINARY DESIGN »

Prepare preliminary design documents consisting of but not limited to, design premise which includes final design criteria, preliminary design drawings, outlines of specifications, and a detailed written description of the project and projections of goals.

Advise the City of additional data required, services which need to be accomplished, or final criteria definitions which must be established.

Review all facets of the Preliminary Design, probable project costs for the City, and modify the Design Premise for its final form.

3. FINAL DESIGN »

Based on the City's acceptance of the Preliminary Design and resulting Design Premise or criteria, prepare the Final Design, Plans, and Specifications.

Submit the Final Design, Specifications to the proper reviewing authorities.
Prepare and review with the City and their legal counsel, and/or other advisors all contract related documents, forms, and conditions.

Present and review all Design Plans, Specifications, and applicable Code Compliance requirements with the City, their advisors, and/or their third-party review representative.

ORGANIZATIONAL APPROACH

4.BIDDING AND NEGOTIATION »

Completed and approved construction plans, specifications, and applicable contract documents for distribution to prospective bidders.

Assist the City with the distribution of bid packages and respective adverting for bids.

Assist the City in the opening and tabulation of bids.

Analyze the bids and make recommendations for the award of the construction contract.

Assist in the preparation of formal contract documents.

5. CONSTRUCTION

Conduct inspection of the construction or project site at appropriate or predetermined intervals by the professional engineer or qualified staff member. To determine the project progress compliance with intent of design and contract documents.

Act as the City's representative, per the city's direction in all matters pertaining to the contractor and consult with or advise the City relative to the contract and project matters.

Review and take appropriate action to contractor's change orders due to unexpected conditions, submittals, shop drawings, and/or requests for payment.

Conduct a final inspection and certify completion of all project work and support documentation in accordance with the contract and applicable codes.

LeFevre Engineering exclusive experience with municipalities and familiarity with water, wastewater and roads infrastructure allows for projects to be completed "turn-key", completed on time, and within budget.

Resumes & Key Personnel

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

LE is currently staffed with project engineers, inspectors, designers, drafting technicians, and supporting staff needed to spearhead and complete any and all projects awarded to LeFevre Engineering, PLLC. The principal contact and authorized representative for all work associated with the City of Edinburg will be **Mr. Richard LeFevre, PE, CFM**. Mr. LeFevre is authorized by the Texas Board of Professional Engineers to practice in Environmental Engineering and Civil Engineering License No. 102200. Mr. LeFevre has more than twenty-four (24) years of extensive experience in federal, state, and local requirements for funding applications, design, environmental assessments, permits, project management, construction phase engineering, and project inspection and has successfully designed all types of infrastructure projects for Edinburg. Mr. LeFevre's expertise and knowledge in coordination of road and drainage, utilities and relocations, construction management, third party management, permitting, and planning is unmatched by many engineers in the valley that are not accustomed to designing infrastructure projects in the City of Edinburg. Mr. LeFevre will serve as the primary point of contact for contractual negotiations, development of scope, preliminary cost estimates and planning, design, and construction management.

Mr. Israel Gaona, PE, CFM will is a licensed engineer and will provide design and construction management of all LE projects under the supervision of Mr. LeFevre. Mr. Gaona is licensed to practice civil engineering by the Texas Board of Professional Engineers License No. 136995. Mr. Gaona has project experience with Design and Construction Phase Engineering for roads, drainage, subdivision reviews, utilities, for past projects design and managed by LeFevre Engineering.

Mr. Manuel Garza will perform as a project inspector for all needed services. Mr. Garza served as a city inspector previously with the City of McAllen and Inspector for the City of Alton, Texas. Mr. Garza has more than thirty (30) years' experience in public infrastructure projects. Mr. Garza is familiar with Edinburg projects and recognizes the requirements as an inspector for the city in required projects.

WESLEY RICHARD LEFEVRE, PE, CFM
PRESIDENT/PROJECT ENGINEER

Mr. LeFevre has extensive experience in design and project management of public and private infrastructure projects. Mr. LeFevre has successfully designed and managed projects for municipalities in the South Texas and the Rio Grande Valley for the past 16 years. Mr. LeFevre is licensed to practice in civil and environmental engineering fields in the State of Texas.

EXPERIENCE

2021-Present

LeFevre Engineering, P.LLC. LeFevre Engineering was created as a professional limited liability company and Mr. LeFevre is responsible for supervision of day-to-day activities, project control, coordination and scheduling during all phases of engineering and surveying projects.

2010 – 2021

LeFevre Engineering, LLC. Responsible for supervision of day-to-day activities, project control, coordination and scheduling during all phases of engineering and surveying projects.

2006 – 2010

Guzman & Munoz Engineering and Surveying, Inc., - McAllen, TX. - Served as Project Engineer and Principal for the McAllen office, specializing in Civil and Environmental aspects of all projects.

2004 – 2006

Turner Collie & Braden Inc. – Pharr, TX. Served as Environmental Specialist and Project Manager for regional offices in South Texas for Texas Water Development Board-Economically Distressed Areas Program (TWDB-EDAP), Border Environment Cooperation Commission (BECC), and North American Development Bank (NADBank) projects.

2001 – 2004

Texas Engineering Extension Service-Texas A&M University Frank M. Tejeda Center for Excellence in Environmental Operations – Mercedes, TX. Coordinated and provided outreach, technical assistance and technical and professional education at the local level to improve the delivery of water, wastewater, solid waste and other environmental systems to residents. Conducted on-site assessments of utility management and operation and analyzed the results of assessments performed by others. Used the results of these assessments to design tailored assistance mechanisms.

Project Role:
Principal/Project Engineer

Education:
Bachelors of Science, 1993
Hardin-Simmons University

Masters of Science, 2000
Texas A&M University at Corpus Christi

Registrations/Certifications:
Professional Engineer, Texas, No. 102200
Certified Floodplain Manager - Texas

Texas Teaching Certificate:
Licensed in Secondary Science

Professional Affiliations:
American Society Civil Engineers,
Texas Society of Professional Engineers

Years of Experience:
20+

2001

Environmental Investigator Texas Commission on Environmental Quality (TCEQ). Knowledge in Texas Administrative Codes and Code of Federal Regulations associated with compliance in industrial hazardous waste, wastewater, water, petroleum storage tanks, and municipal solid waste. Performed routine work in the fields of waste pollution. Conducted routine investigations, surveyed and performed follow-up inspections, prepared technical reports, made recommendations regarding findings and drafted.

ISRAEL GAONA, P.E., CFM
ENGINEER – QA/CC

Mr. Gaona has experience in design and project management of public and private infrastructure projects as well as construction management experience in the renewables industry. Mr. Gaona has designed multiple water, wastewater and storm water municipal projects as well as managed heavy-civil construction projects in South Texas. Mr. Gaona is a Professional Engineer and a Certified Floodplain Manager in the State of Texas.

EXPERIENCE

2019-PRESENT
SOTEX Engineering, LLC. – Currently serves as President and owner of SOTEX Engineering, LLC. Mr. Gaona oversees all aspects of civil engineering design and construction projects.

2018-2019
LEMC, LLC. – Served as a Project Engineer responsible for the design and project management of public and private infrastructure projects.

2016 – 2018
E.ON Climate & Renewables North America – Willacy & Kenedy County, Texas - Served as Civil Field Engineer for the construction of multiple large scale wind farms in Raymondville and Sarita, Texas overseeing the quality of construction work performed on all infrastructure installed. Supervise day-to-day operations of multiple contractors.

2014 – 2016
City of Weslaco – Weslaco, TX. Served as Engineer II for the City of Weslaco working on design and project management on all public improvement projects. Conducted on-site field inspections of infrastructure improvements. Performed water, wastewater and storm water construction plan reviews and subdivision reviews.

2013
Texas Department of Transportation – San Benito, TX. Served as Summer Engineering Technician. Conducted on-site field inspections for roadway improvements, bridge construction and utility installations for state road improvement projects.

Project Role:
Consultant

Education:
Bachelors of Science in Civil Engineering - 2014
Texas A&M University - Kingsville

Registrations/Certifications:
Professional Engineer - Texas, No. 136995

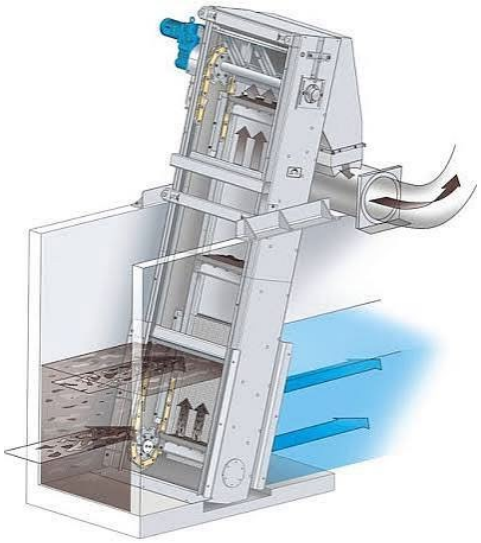
Certified Floodplain Manager – Texas No. 2893-15N

Professional Affiliations:
American Society of Civil Engineers,
Texas Floodplain Managers Association

Years of Experience:
10+

Municipal & Governmental Projects

City of Edinburg – Wastewater Treatment Plant Clarifier Rehabilitation – Plant No. 4 - 2026



LeFevre Engineering, PLLC provided engineering design and construction services for the installation of two (2) new clarifiers for the East and West Clarifiers for Plant No. 4, located in Edinburg, Texas. The design included the main torque tube, clarifier cage, sludge removal arms, scum skimmers, weir troughs, aluminum walkways, and gear drives for both clarifiers. The project was completed on time and within budget. The project was completed in June 2026. Project Budge $1.3M

City of Alamo – Texas Water Development Board – HB500 – Lift Station No. 1 Wastewater Improvements Project - 2026

The City of Alamo procured LeFevre Engineering, PLLC, to provide engineering design and construction phase services for a new triplex 2.8 MGD wastewater lift station. The lift station was moved to a new location and included a 15' diameter fiberglass wetwell, design of three (3) submersible pumps, new controls, and manifold. Three (3) lift stations were bypassed and demolished as a result of the project based on LeFevre Engineering recommendations. The new lift station project also included approximately six thousand (6000) linear feet of new 24-inch sewer line to depths of eighteen feet. The project was funded via the Texas Water Development Board and provided by House Bill 500 of the State Legislature. The project was designed in six (6) month and construction will start in August 2026. Budget: $5.4M

CITY OF SAN JUAN – TEXAS WATER DEVELOPMENT BOARD NO. 73796 – WASTEWATER TREATMENT PLANT – PHASE 2 IMPROVEMENTS PROJECT - 2026

The City of San Juan has engaged LeFevre Engineering, PLLC to provide construction phase engineering and inspection services for the rehabilitation of the existing wastewater treatment plant. The project consists of a new lab building, aeration basin motors and dissolved oxygen equipment, two (2) new mechanical bar screens, two new clarifier sludge and scum cages, new washer and compactor, grit removal system including pumps and classifier equipment, RAS/WAS pump station equipment, new blowers, and non-potable water system as part of the proposed project. The new project is being funded by Clean Water State Revolving Funds (CWSRF) provided by the Texas Water Development Board. The project is currently being bid out for construction. Project Budget: $9M

CITY OF SAN JUAN – ENVIRONMENTAL PROTECTION AGENCY LIFT STATION NO. 6 DEMOLITION & CONSTRUCTION OF A NEW 2.2 MGD LIFT STATION

CURRENTLY UNDER CONTRACT

Mr. LeFevre provides preliminary planning, preliminary engineering reports, regulatory permitting, environmental information document, and lift station engineering design as part of TRIMAD Consulting, LLC, design team. Construction estimates for this project are estimated at $3.4M for the lift station replacement and is being funded as a Direct Congressional Spending provided by Congressman Vicente Gonzalez. The project is being overseen by the Environmental Protection Agency (EPA) and is currently in the final design stage of the project. The project consists of demolition of existing Lift Station No. 6; installation of approximately 2200 LF of 24” sewer pipe, installation of three (3) new manholes, and construction of a new 2.2 MGD lift station. Mr. LeFevre is providing the design of a Quad-plex lift station with a 20’ wet well, and controls. The current lift station is undersized and dilapidated and needs to be replaced. Project Contact: Ric Salazar, PE, TRIMAD Consulting, LLC; 956-497-5355; Engineer’s Estimate: $3.4 million

CITY OF ALAMO – MORNINGSIDE LIFT STATION, ALAMO, TX

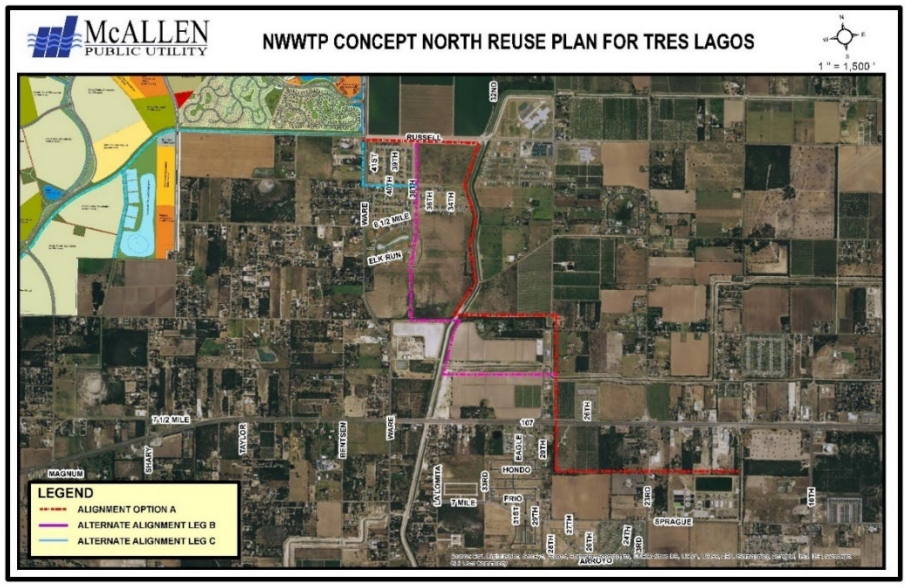
CURRENTLY UNDER CONTRACT

Mr. LeFevre provided lift station design services for the Morningside Wastewater Improvements project in association with TRIMAD Consulting, LLC. The project included the design of a new 1.0 MGD lift station, preparation of the Preliminary Engineering Report for TCEQ, and coordination with the City and utility stakeholders. The project was completed on schedule. Project contact: J.R.Garza, Mayor of Alamo- (956) 720-1008

Construction Cost: Engineer's Estimate: $1.0 million | Contract Award: $995,000

Scope of Services:

- Utility coordination and easement support
- Engineering feasibility study and preliminary engineering
- TCEQ/EPA environmental documentation and permitting
- Design of lift station and associated sewer improvements
- Preparation of plans and specifications
- Bidding, construction administration, inspection, and project closeout



PROGRESO INTERNATIONAL BRIDGE FMCSA INSPECTION STATION DESIGN FY 2022

As prime designer, LeFevre Engineering provided planning, preliminary design, and agency coordination for the Progreso International Bridge FMCSA Inspection Station and will provide construction engineering, inspection, and project management. The project includes a two-bay commercial vehicle inspection station with inspection pits, overhead catwalks, canopy, reinforced concrete paving, utility infrastructure, and coordination with the administration building design. Project contact: Bobby Sparks, Owner – (956) 650-617

LeFevre also designed the site's lift station, 10-inch waterline with fire hydrants, and gravity sewer system to serve the inspection station and industrial park.

Construction Estimate: $6.2 million (FMCSA Inspection Station)

McAllen Public Utilities Board – TWDB Tres Lagos Wastewater Reuse Project & 29th street Sports Complex Wastewater Reuse Project FY 2017

LeFevre Engineering provided environmental, design, construction administration, and inspection services for McAllen PUB's wastewater reuse project serving the Tres Lagos Development and the City of McAllen's 29th Street Sports Complex. The project included replacement of undersized and asbestos water lines with 16-inch PVC reuse waterlines, installation of approximately 37,500 linear feet of pressurized PVC pipeline, 1,500 linear feet of bored crossings with steel casing, and numerous fire hydrants.

Mr. LeFevre also prepared the Environmental Information Document (EID) and coordinated permitting with TCEQ. The project delivers reclaimed water for irrigation to the Tres Lagos master-planned community, Texas A&M University facilities, and public sports complexes.

HIDALGO COUNTY URBAN COUNTY- EAST LATERAL DRAINAGE PROJECT- CONSTRUCTION MANAGEMENT
PHASE 1-3 PROJECT START DATE: AUGUST 2015
PROJECT COMPLETION: NOVEMBER 2017

Mr. LeFevre provided construction phase engineering & **construction management services** for the Delta Connector/East Lateral drainage improvements project. The proposed drainage ditch is to aid the drainage areas from the main canal located by Mile 19 ½ Rd. to Mile 12 ½ Rd. Mr. LeFevre provided construction project status reports by collecting, analyzing and summarizing information occurring on jobsite by contractor and sub-contractors. Mr. LeFevre was responsible for developing project objectives by reviewing project proposals and plans, conferring with land owners, project engineer and contractors. *Project was funding by Hidalgo County Urban County through a combination of EPA and HUD grants and the Texas General Land Office as a mitigation project for flooding in the area. Construction Cost: $13 Million* ***:***

LeFevre Engineering did not design or provide estimates for this project. Project Contact: Former Director Hidalgo Co. Urban County; P.R. Avila, 956-472-3636

- 3rd Party Construction Phase Engineering
- Landowner Coordination for Hidalgo County
- Review and Recommendation of any and all change orders, contractor pay requests, and adjustments.
- Environmental Compliance
- Assisted Primer Engineer & Owner with Bidding & Awarding of Project
- Project Management & Scheduling Updates to County Commissioners
- Inspection
- Project Clouse out

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

NONE

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

NONE

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

Mr. Mardoqueo Hinojosa, PE
City Engineer
City of Edinburg
415 W University Drive
Edinburg, TX 78539

Subject: Statement of Qualifications – RFQ No. 2026-7
Professional Engineering Services

Dear Mr. Hinojosa:

On behalf of **Legacy Engineering Group, PLLC** (Legacy), I am pleased to submit our Statement of Qualifications for the City of Edinburg's Professional Engineering Services rotation contract. As a Texas-based, minority-owned engineering firm with strong roots in South Texas and the Rio Grande Valley, Legacy is committed to providing responsive, technically sound, and practical engineering solutions that advance the City's infrastructure, development, mobility, and long-term community goals.

Since our founding in 2019, Legacy has grown into a multidisciplinary team of more than 30 professionals with expertise in civil and transportation engineering, traffic operations and signal design, roadway and utility infrastructure, drainage and hydrology, GIS, utility coordination, and construction-phase services. Our team includes former public-sector leaders who understand the importance of accountability, responsiveness, sound engineering judgment, and timely decision-making when supporting municipal staff.

Legacy has earned a 95% repeat-client rate and was recognized as the **2023 South Texas Institute of Transportation Engineers Company of the Year**. These accomplishments reflect the confidence our clients place in our ability to deliver high-quality work, meet demanding schedules, communicate proactively, and remain responsive throughout each assignment. Legacy is also certified as a DBE, MBE, SBE, ESBE, and HABE firm.

I will personally serve as Project Manager and primary point of contact for this contract. With more than 23 years of public- and private-sector engineering experience, I have contributed to the successful delivery of more than $1 billion in infrastructure improvements throughout South Texas. My background includes serving as the TxDOT San Antonio District Traffic Engineer, where I managed multidisciplinary teams, advanced complex transportation projects, and coordinated extensively with municipalities and other public agencies.

Supporting me will be Deputy Project Manager Eduardo "Lalo" Villalon, PE, RSP_1, a Rio Grande Valley native and former TxDOT leader with extensive experience managing transportation, traffic operations, and statewide safety improvement programs. Together, we offer the City an experienced and accessible leadership team with the authority, technical depth, and regional familiarity needed to initiate assignments quickly and keep them progressing.

Legacy's experience closely aligns with the services identified in the RFQ, including street and pavement improvements, utility infrastructure, water and wastewater coordination, hydrology and hydraulics, transportation evaluations, traffic engineering, traffic signal design, civil engineering, development review, grant support, construction administration, and capital improvement program management. We routinely assist governmental clients from initial field investigation and feasibility analysis through design, permitting, agency coordination, public involvement, bidding, and construction.

Our multidisciplinary structure allows us to evaluate transportation, drainage, utility, constructability, and development considerations as interconnected components of each assignment. Whether the City requires a discrete technical evaluation, an expedited design assignment, review of private development documents, or support for a larger capital improvement project, Legacy will provide the appropriate staff and level of effort while maintaining direct access to firm leadership.

We understand that responsiveness and schedule performance are critical to the success of an on-call contract. Legacy has the staffing capacity, management systems, and established quality-control procedures necessary to accommodate concurrent assignments and changing priorities. We will operate as a dependable extension of City staff, communicate issues early, and provide clear recommendations that support timely and informed decisions.

It should be noted that Legacy has received no addenda for this RFQ on the RFQ procurement site.

As President and Chief Executive Officer of Legacy Engineering Group, PLLC, I am authorized to bind the firm contractually and confirm Legacy's interest and commitment to perform the requested services for the City of Edinburg.

Thank you for your consideration. We would be honored to partner with the City and contribute to the successful delivery of its engineering, infrastructure, and community-development initiatives.

Sincerely,

Oscar Michael Garza, PE, PTOE, PTP, RSP_1

FIRM INTRODUCTION

Legacy Engineering Group, PLLC (Legacy) is a Texas-based, minority-owned civil engineering firm with deep professional and cultural ties to South Texas and the Rio Grande Valley. Established in 2019, Legacy has grown into a multidisciplinary team of 30 professionals, including former public-sector leaders, civil and transportation engineers, traffic modelers, roadway designers, utility coordinators, GIS specialists, and construction-phase professionals.

Over the past six years, Legacy has earned a 95% repeat-client rate, reflecting both the quality of our technical work and the long-term trust we have established with our clients. Our ability to retain clients and receive successive assignments demonstrates our commitment to responsiveness, schedule performance, proactive communication, and practical engineering solutions.

Legacy's performance has also been recognized by our industry peers. In 2023, Legacy was named the South Texas Institute of Transportation Engineers Company of the Year in recognition of the firm's technical contributions, professional leadership, and service to the transportation engineering profession. Legacy is certified as a DBE, MBE, SBE, ESBE, and HABE firm and has successfully delivered work for governmental and private-sector clients throughout Texas, including:

Cities: McAllen | Buda | Converse | Fair Oaks Ranch | San Antonio | Somerset | Windcrest

TxDOT Districts: Pharr | Corpus Christi | San Antonio | Austin | San Angelo | Paris | Bryan

Counties: Hidalgo | Cameron | Bexar | Kendall

Regional Mobility Authorities: Cameron County RMA | Alamo RMA

School Districts: Boerne ISD | Judson ISD | Northeast ISD | Northside ISD | San Antonio ISD

Our municipal expertise is strengthened by extensive experience managing multidisciplinary and multi-agency projects that require coordination with public agencies, utility providers, private developers, elected officials, community stakeholders, and the traveling public. Legacy routinely supports projects involving field investigations, alternatives analysis, roadway and utility design, traffic engineering, drainage coordination, development review, public involvement, construction administration, and interagency coordination.

These capabilities closely align with the City of Edinburg's anticipated professional engineering needs. Legacy offers the technical depth and specialized resources of a larger firm while maintaining the accessibility, responsiveness, and direct principal involvement of a focused, hands-on consultant. This combination enables us to deliver technically sound, constructible, and community-centered solutions for assignments of varying size and complexity.

PROJECT MANAGER (PM) INTRODUCTION

Oscar Michael "Mike" Garza, PE, PTOE, PTP, RSP1, will serve as Legacy's Project Manager and primary point of contact for this contract. He brings more than 23 years of combined public- and private-sector experience leading the planning, design, maintenance, operations, and construction of transportation and public infrastructure projects throughout South Texas.

Mike was one of only ten professional engineers nationwide recognized by the American Society of Civil Engineers as a **New Face of Civil Engineering**. He has also received the **ITE National Rising Star Award** and the **TexITE Younger Member of the Year Award**, and he is currently serving on the Klesse College of Engineering and Integrated Design Advisory Council for the University of Texas at San Antonio.

Next page

Prior to founding Legacy, Mike served as the TxDOT San Antonio District Traffic Engineer, where he managed technical programs, advanced complex transportation projects, and coordinated extensively with municipalities, counties, regional agencies, developers, and community stakeholders. This public-sector background gives him a clear understanding of the City's expectations for accountability, budget stewardship, schedule adherence, responsiveness, and defensible engineering recommendations.

He is a licensed Professional Engineer in Texas, Louisiana, and Mississippi; a Professional Traffic Operations Engineer; a Professional Transportation Planner; and a Road Safety Professional. **Mike is also qualified under TxDOT's Local Government Project Procedures program and pre-certified in 19 TxDOT work categories.** His multidisciplinary background enables him to evaluate projects from planning, operations, safety, design, funding, constructability, and long-term maintenance perspectives.

Mike has contributed to the **successful delivery of more than $1 billion in infrastructure improvements**, ranging from focused municipal assignments to major regional transportation programs. His experience includes managing multidisciplinary teams, coordinating with local governments and public agencies, resolving technical and stakeholder issues, and advancing projects from planning through construction.

As Legacy's President and Chief Executive Officer, Mike has the authority to make binding decisions and immediately allocate personnel and technical resources to meet the City's needs. He will remain actively involved throughout each assignment rather than delegating management after selection. His leadership approach emphasizes collaboration, accountability, proactive communication, and technical excellence, principles that will guide Legacy's service to the City throughout the duration of the contract.

FIRM QUALIFICATIONS

All services under this contract will be managed through Legacy's San Antonio office, where all 30 team members are based. Our staff routinely supports clients and projects throughout South Texas and will provide regular travel to Edinburg for project meetings, field investigations, stakeholder coordination, construction support, and other on-site activities as required.

Legacy's multidisciplinary team provides engineering support throughout the complete project life cycle, from initial field investigations, feasibility studies, and alternatives development through design, permitting, bidding, construction administration, and project closeout. Our professionals have extensive experience preparing plans, specifications, and estimates; developing construction cost estimates; reviewing engineering documents; coordinating with utility providers and regulatory agencies; and providing construction-phase support for municipal infrastructure projects.

Legacy's distinguishing strength is the integration of former TxDOT leadership, municipal engineering experience, and hands-on project delivery expertise within one responsive team. Rather than relying on disconnected departments or transferring assignments among multiple offices, Legacy provides direct access to senior civil, transportation, traffic, utility coordination, GIS, drainage, and construction-phase professionals who routinely collaborate on public infrastructure projects.

This integrated structure allows us to identify issues early, quickly engage the appropriate technical specialist, develop practical solutions, and maintain consistency from project initiation through completion. It also gives the City direct access to firm leadership and decision-makers throughout every assignment.

Street Infrastructure, Pavement Management & Civil Engineering | Legacy provides civil engineering services for municipal street infrastructure, including roadway reconstruction, pavement rehabilitation, intersection improvements, sidewalks, ADA accessibility improvements, curb and gutter, drainage integration, signing and pavement markings, and complete streets elements.

Our engineers evaluate existing infrastructure conditions, identify deficiencies, compare improvement alternatives, and develop cost-effective rehabilitation or reconstruction strategies. We prepare practical construction documents that balance available funding, service life, constructability, maintenance requirements, utility conflicts, traffic impacts, and community needs.

Whether improving an existing neighborhood street, reconstructing an arterial roadway, or developing new public infrastructure, Legacy focuses on delivering safe, durable, maintainable, and constructible improvements.

Transportation Evaluation, Traffic Engineering & Signal Design | Legacy performs transportation evaluations, traffic impact analyses, operational assessments, roadway safety studies, intersection evaluations, traffic signal warrant analyses, traffic projections, access-management studies, signing and pavement marking plans, and complete traffic signal design.

Our traffic engineering practice is led by former TxDOT transportation and traffic leaders, including professionals who have managed districtwide and statewide safety, operations, and traffic engineering programs. Our team also includes Professional Traffic Operations Engineers, Professional Transportation Planners, and Road Safety Professionals who understand how to translate technical data into practical and implementable improvements.

Legacy evaluates the needs of all roadway users, including motorists, pedestrians, bicyclists, transit users, school traffic, emergency vehicles, and freight traffic. Our recommendations are developed with careful consideration of operations, safety, access, constructability, maintenance, and available funding.

Utility Infrastructure, Water/Wastewater & Coordination | Legacy supports water, wastewater, and other utility infrastructure improvements while providing comprehensive utility coordination throughout project development and construction. Our team identifies potential conflicts early, coordinates with utility owners, evaluates relocation requirements, develops conflict-resolution strategies, and incorporates utility considerations into roadway and civil design.

Legacy's utility coordination practice is led by professionals with extensive public-sector utility management experience and established working relationships with utility providers throughout Texas. By initiating coordination early and maintaining clear documentation, our team helps reduce project risk, avoid redesign, minimize construction conflicts, and prevent costly delays.

Our services include existing-utility research, conflict identification, utility coordination meetings, relocation tracking, utility risk assessments, agreement support, relocation-plan review, and coordination of utility activities with project design and construction schedules.

Hydrology, Hydraulics & Erosion and Sediment Control | Legacy develops practical drainage solutions that protect public infrastructure, support safe roadway operations, and meet applicable regulatory requirements. Our drainage-related services include roadway drainage analysis, storm sewer design, culvert evaluation and sizing, stormwater conveyance design, erosion and sediment control planning, Stormwater Pollution Prevention Plan preparation, permitting support, and coordination of drainage and utility infrastructure. We integrate drainage considerations with roadway, traffic, utility, and construction-phase planning rather than treating drainage as an isolated discipline. This approach improves system performance, reduces conflicts, minimizes future maintenance concerns, and supports long-term infrastructure resiliency.

Construction Administration & Technical Review | Legacy remains actively involved during construction to help ensure that projects are delivered in accordance with design intent, contract requirements, budget, and schedule. Our construction-phase services include preconstruction coordination, shop drawing and submittal review, responses to requests for information, pay-application review, construction observation, change-order evaluation, field coordination, punch-list development, and project closeout support. Our quality-management program is overseen by experienced former TxDOT design and construction leaders and emphasizes constructability, consistency, risk reduction, and cost-effective project delivery. Potential construction issues are evaluated during design, reducing the likelihood of conflicts, delays, and unnecessary change orders.

RESPONSIVENESS & STAFFING APPROACH

During the past two years, Legacy has successfully delivered engineering services for numerous governmental agencies, including Bexar County, the City of San Antonio, the City of Fair Oaks Ranch, the City of Converse, the City of McAllen, VIA Metropolitan Transit, and TxDOT. These assignments have included roadway and civil design, traffic engineering, utility coordination, pavement improvements, drainage design, GIS services, development review, and construction administration under both on-call and project-specific contracts.

Legacy maintains the personnel, technical resources, project-management systems, and quality-control procedures required to respond quickly to on-call assignments while consistently meeting project schedules. Our scalable staffing model matches the appropriate personnel and level of expertise to each assignment. Senior professionals provide project oversight, technical direction, and quality control, while experienced engineers and technical staff perform day-to-day project activities.

Efficient Staffing for Smaller Assignments | Legacy's staffing model is particularly well suited for discrete, short-duration, and task-order assignments. For each request, Mike will evaluate the scope, schedule, required disciplines, and level of effort before assigning a focused task team consisting only of the personnel necessary to complete the work.

Smaller assignments will receive the same Project Manager oversight and quality-control review as larger capital projects without being burdened by an unnecessarily large project team. As an assignment evolves, additional specialists can be added quickly to address drainage, traffic, utilities, GIS, construction, or other technical needs. This approach provides the City with:

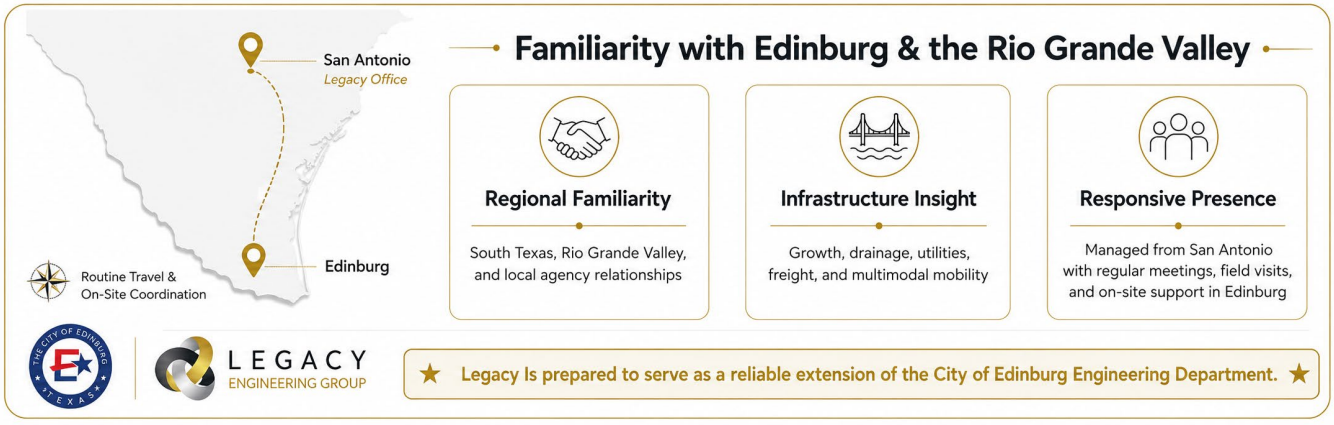
- ✓ Direct access to senior decision-makers;
- ✓ Efficient use of professional and technical staff;
- ✓ Staffing proportional to each assignment;
- ✓ Consistent Project Manager oversight; and
- ✓ Cost-effective delivery without unnecessary overhead.

Resource Availability | Legacy is currently managing approximately 20 active assignments for various clients. Our workload is actively reviewed by firm leadership through regular staffing and project-management coordination. Personnel assignments are evaluated based on project phase, anticipated deadlines, technical requirements, and individual workload. This process prevents over-allocation, identifies upcoming resource needs, and enables Legacy to accept new assignments without compromising existing commitments. Because Mike has direct authority to assign staff and engage additional resources, the City will not experience delays caused by multi-office approval processes or remote corporate decision-making.

FAMILIARITY WITH EDINBURG & THE RIO GRANDE VALLEY

Legacy has strong familiarity with South Texas, the Rio Grande Valley, and the infrastructure conditions affecting rapidly growing communities such as Edinburg. Both Mike Garza and Deputy Project Manager Eduardo “Lalo” Villalon, PE, RSP1, have deep personal and professional ties to the region. Their familiarity with local communities, agency relationships, transportation patterns, and regional priorities will help Legacy engage effectively with City staff and stakeholders.

Legacy professionals have coordinated with the TxDOT Pharr District, Hidalgo County, regional agencies, and Valley municipalities on roadway, traffic, drainage, and infrastructure assignments. The firm also currently serves the City of McAllen under an on-call engineering contract and is leading the planned widening of Nolana Avenue from 2nd Street to Jackson Road, a major municipal corridor improvement with an anticipated construction value of approximately $12 million.



Legacy has also supported other consulting teams on projects involving TxDOT and Hidalgo County roadways, providing our staff with familiarity with regional design practices, agency coordination, traffic conditions, development pressures, and utility considerations.

We understand the challenges accompanying Edinburg’s continued growth, including:

- Increasing demands on street, drainage, and utility infrastructure;
- The need to coordinate capital improvements with ongoing development;
- Regional mobility and cross-border freight activity;
- Drainage, flooding, and floodplain constraints;
- Pedestrian, bicycle, transit, and multimodal connectivity needs;
- Coordination with TxDOT, Hidalgo County, utility providers, and adjacent jurisdictions; and
- The need to advance projects efficiently while minimizing disruption to residents and businesses.

All services will be managed from Legacy’s San Antonio office; however, our team routinely travels throughout South Texas and will provide regular on-site coordination in Edinburg. We will attend meetings, perform field investigations, coordinate with stakeholders, support construction activities, and maintain an in-person presence whenever the needs of an assignment require it.

Legacy’s commitment to Edinburg will be demonstrated through responsiveness, accessibility, regular communication, and direct involvement from firm leadership. Our team is prepared to make the travel and on-site commitment necessary to serve the City as a reliable extension of its Engineering Department.

ABILITY TO MEET SCHEDULES AND DEADLINES

Legacy fully recognizes that timely delivery is one of the most visible measures of success under an on-call professional services contract. The City of Edinburg may issue assignments with short lead times, overlapping deadlines, public commitments, funding constraints, or construction windows that cannot be missed. Our team is structured to respond quickly, establish control of the schedule from the outset, and maintain accountability through final delivery. At the beginning of each assignment, Legacy develops a project-specific schedule that identifies the critical path, key dependencies, interim milestones, review periods, responsible team members, and required agency or stakeholder decisions. This schedule is reviewed with the City and updated throughout the assignment so that potential delays are identified early rather than discovered near the deadline. Clear communication is central to this process. Each team member understands their responsibilities before production begins, while the Project Manager maintains regular coordination with City staff, discipline leads, subconsultants, utility providers, and reviewing agencies. This approach reduces uncertainty, avoids duplicated effort, and allows decisions to be made before they affect downstream activities.

Early Control of Critical-Path Risks

Legacy's experience has shown that utility coordination, environmental requirements, right-of-way constraints, agency reviews, stakeholder decisions, and field conditions frequently control project schedules. We therefore initiate these activities as early as possible and track them as critical-path items. Our team advances tasks in parallel whenever practical rather than waiting for one activity to be fully completed before beginning another. This creates schedule flexibility and provides a built-in buffer for unforeseen conditions. When an issue arises, Legacy can quickly reassign personnel, elevate decisions to firm leadership, and implement a recovery plan without disrupting overall project delivery.

Project Management Tools and Controls

As Project Manager, Mike Garza will apply proven management tools tailored to the size and complexity of each assignment, including:

Project-Specific Management Plans - Define scope, responsibilities, communication protocols, quality-control procedures, milestones, and decision points.

Critical-Path Scheduling - Identify task dependencies, controlling activities, review periods, and required completion dates.

Resource-Loaded Scheduling - Evaluate staff availability and assign the appropriate personnel before production begins.

Design Coordination Journal - Maintain a current record of action items, responsibilities, decisions, risks, and outstanding coordination needs.

Weekly Schedule Reviews - Compare actual progress with planned milestones and implement corrective action before delays occur.

Real-Time Collaboration - Use Microsoft Teams and shared project platforms for meetings, document coordination, issue tracking, and file management.

Project Review Workshops - Bring the appropriate technical specialists together at key milestones to resolve issues efficiently and maintain alignment.

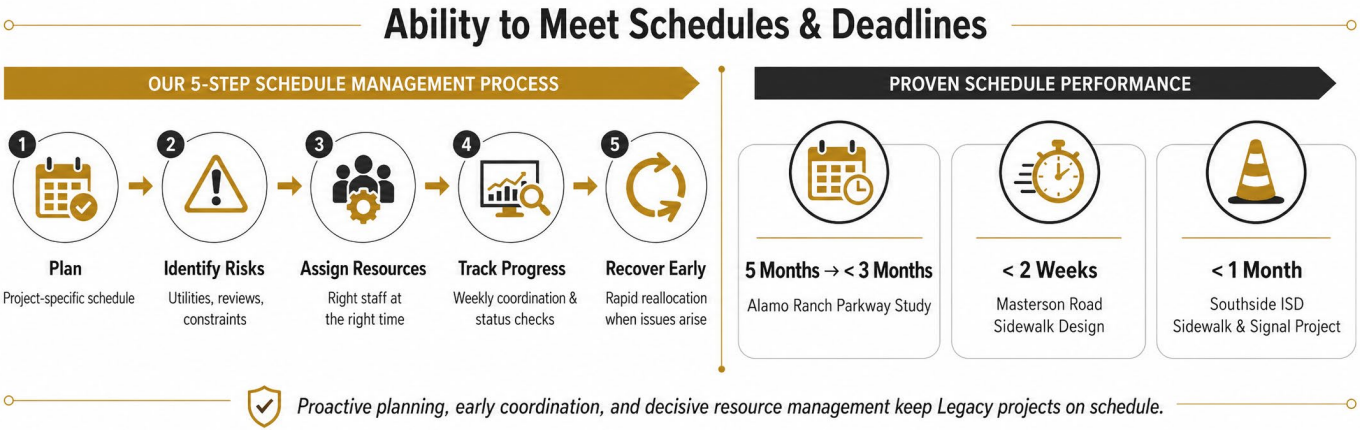
Value Engineering and Constructability Reviews - Identify design efficiencies, reduce unnecessary cost, and avoid late-stage revisions that could affect schedule.

Executive Resource Authority - As Legacy's President and CEO, Mike can immediately reallocate staff, authorize overtime or accelerated production, and engage additional technical resources whenever required for the City.

Where appropriate and authorized, Legacy may also begin limited preliminary activities while contract administration or task-order negotiations are being finalized so that critical field coordination, data collection, or schedule-sensitive work is not unnecessarily delayed.

Proven Performance Under Accelerated Schedules

Mike's ability to manage accelerated and concurrent assignments has been demonstrated through multiple on-call and project-specific contracts. Under the 2023-2026 Bexar County Civil Engineering On-Call Contract, he managed more than 30 assignments over a two-year period, many of which were driven by commitments to elected officials, schools, and/or residents. Examples include:



Alamo Ranch Parkway Study - Originally scheduled for five months, Legacy accelerated the study and completed it in less than three months in response to heightened public and media interest.

Masterson Road Sidewalk Design - Legacy completed the design in less than two weeks, allowing construction to proceed during the summer and be completed before the beginning of the school year.

Southside ISD Sidewalk and Signal Improvements - Following a fatal pedestrian crash, Legacy completed the design in less than one month and coordinated with Bexar County and TxDOT to advance construction before the start of school.

These examples demonstrate Legacy's ability to mobilize quickly, manage multiple activities in parallel, resolve critical-path risks, and deliver high-quality work under compressed schedules. Our team maintains clear accountability throughout each assignment, communicates potential issues early, and reallocates resources as needed to prevent minor challenges from becoming schedule delays. By combining proactive planning, senior-level oversight, and disciplined quality-control procedures, Legacy consistently advances projects without sacrificing technical accuracy or constructability.

The City of Edinburg can rely on Legacy to maintain accuracy, safety, quality, and accountability while meeting demanding project commitments. We will provide the responsiveness, staffing flexibility, and direct leadership involvement necessary to keep each assignment progressing and deliver dependable results when the City needs them.

LEGACY'S RECENT & RELEVANT EXPERIENCE

Legacy selected the following projects to demonstrate our recent experience delivering multidisciplinary engineering services for municipalities. Collectively, these assignments encompass transportation planning, street and roadway design, traffic engineering, utility coordination, drainage integration, preparation of plans, specifications, and estimates, bidding, public and stakeholder coordination, and construction-phase services. Each project reflects the responsive project management, multidisciplinary coordination, and practical engineering judgment required to successfully support the City of Edinburg under an as-needed professional engineering contract.

Babcock Road Improvements | City of San Antonio | Prime Consultant | $7M

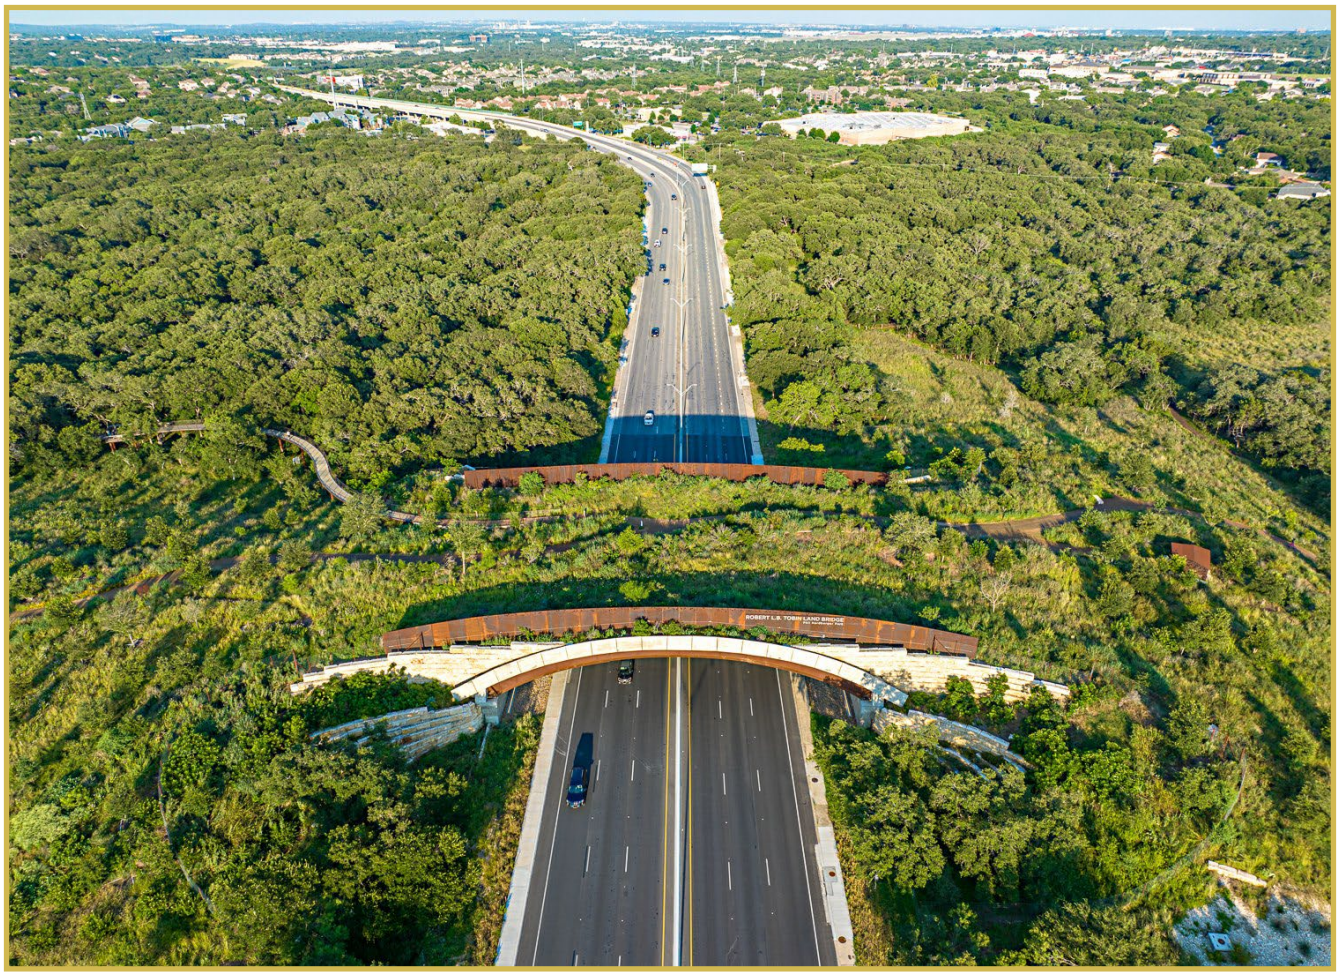
Legacy served as prime consultant for this City of San Antonio Bond Program project to reconstruct and widen Babcock Road from Hausman Road to north of UTSA Boulevard from an existing two-lane roadway to a five-lane urban section. Legacy's services included traffic analysis, schematic development, roadway design, traffic control planning, traffic signal design, signing and pavement markings, pedestrian and ADA improvements, utility coordination, preparation of plans, specifications, and estimates, bidding support, public involvement, and construction-phase services. The project required extensive coordination with the University of Texas at San Antonio, utility providers, adjacent property owners, City departments, the contractor, and the traveling public. Key challenges included maintaining pedestrian access near the UTSA campus, coordinating multiple utility relocations, implementing temporary and permanent traffic signals, and sequencing construction while preserving mobility for motorists, pedestrians, bicyclists, transit users, and emergency vehicles. Legacy continues to support the City during construction through responses to requests for information, submittal reviews, pay-application reviews, biweekly progress meetings, utility coordination, field evaluations, design clarifications, and public communications. Construction is scheduled for completion in 2027.

Relevant Services: Roadway Design | Traffic Engineering | Utility Coordination | PS&E | Public Involvement | Construction Administration

WT Montgomery Road Extension | Bexar County | Lead PS&E Consultant | $18M

Legacy served as the lead PS&E and roadway design consultant for the WT Montgomery Road Extension, a major arterial roadway project delivered through a P3 agreement between Bexar County Public Works and three private development partners. The project was recently opened to the traveling public and included extending WT Montgomery Road from US 90 to Canthree Drive in west Bexar County, Texas. Legacy developed roadway typical sections and layouts, removal plans, traffic control plans, signing and pavement marking plans, illumination and traffic components, construction cost estimates, and the complete PS&E package. The firm also provided bidding and construction-phase support. The project required extensive coordination to align roadway improvements with private development schedules, preserve property access, address utility connections, coordinate TxDOT project overlap, and integrate the work with adjoining roadway projects. Legacy's team developed practical phasing and access solutions that allowed the County and its partners to advance the project while managing external dependencies.

Relevant Services: Roadway Design | P3 Coordination | Traffic Control | Utilities | Cost Estimating | PS&E | Construction Support



Wurzbach Parkway RTZ Project | TxDOT | Lead PS&E Consultant | $22M

Legacy served as the PS&E development lead for the Wurzbach Parkway Road to Zero (RTZ) Safety Enhancement Project, a 10.3-mile federally funded corridor safety project extending from FM 1535 to O'Connor Road in San Antonio.

Legacy supported the project from the initial traffic engineering study and crash analysis through identification of safety countermeasures, preliminary construction cost estimating, Road to Zero funding-application support, accelerated PS&E development, and construction-phase coordination. The project included rehabilitation of existing roadway sections, replacement of raised median islands with concrete barrier, storm-drainage improvements to address roadway ponding, safety lighting, intelligent transportation system components, wrong-way driving countermeasures, dynamic message signs, end-of-queue warning devices, and pedestrian and bicycle enhancements.

Legacy also coordinated the roadway safety improvements with a planned land bridge located within the project limits. This assignment demonstrates Legacy's ability to integrate traffic safety, roadway design, drainage, illumination, ITS, multimodal accommodations, funding requirements, and constructability into one coordinated PS&E package.

Relevant Services: Safety Analysis | Federal Funding Support | Roadway Rehabilitation | Drainage | ITS | Multimodal Design | PS&E

YEARS OF EXPERIENCE

23

CITY OF RESIDENCE

San Antonio, TX

LEGACY ENGINEERING GROUP

Mr. Garza will serve as Project Manager and primary point of contact for this contract. He has over 23 years of experience and has managed several on-call engineering contracts supporting public agencies, including the development of task-order scopes, fee negotiations, staffing plans, schedules, quality-control procedures, and delivery strategies for multiple concurrent assignments. His technical background includes traffic operations, safety analysis, traffic projections, roadway design, traffic signals, illumination, TCP, signing, pavement markings, and ITS improvements. As Legacy's President and CEO, he has full authority to allocate resources, resolve issues, and maintain scope, schedule, budget, and quality commitments. He is TxDOT Precertified in 19 Work Categories and LGPP Qualified.

Project Experience:

General Engineering Consultant – Fair Oaks Ranch, TX

Mr. Garza is currently serving as the GEC Project Manager for the City of Fair Oaks Ranch (since 2019). In this role, he works as an extension of City Staff with a specific focus on various initiatives such as: Traffic/Safety/Operational Analysis of Various Intersections; Chartwell Realignment Project; CIP Development & Project Management; Ammann Road Reconstruction Project; Post Oak Trail HSIP Project; Mid-Block Crossings; Development Review/Approvals; Roadway CIP and Annual Maintenance Budget Analysis; Dietz Elkhorn Road Sidewalk Gap Project; Battle Intense Sidewalk Project; Pavement Preservation Plan; and Construction Engineering/Inspection.

General Engineering Consultant – Somerset, TX

Mr. Garza is currently serving as the GEC Project Manager for the City of Somerset (since 2023). In this role, he works as an extension of City Staff with a specific focus on various on-call civil engineering initiatives such as: Traffic/Safety/Operational Analysis; Wastewater Master Plan Development; Grant Writing/Applications; Ped Crossings; Development Reviews; Roadway CIP and Annual Maintenance Budget Analysis; Pavement Preservation Plan Development; and Construction Engineering/Inspection.

General Engineering Consultant – Olmos Park, TX

Mr. Garza is currently serving as the GEC Project Manager for the City of Olmos Park (since 2025). In this role, he works as an extension of City Staff with a specific focus on various on-call civil engineering initiatives such as: Traffic/Safety/Operational Analysis; Grant Writing/Applications; Ped Crossings; Public Involvement Initiatives; Development Reviews; Roadway CIP and Annual Maintenance Budget Analysis; Pavement Preservation Plan Development; and Construction Engineering/Inspection.

Bexar County Traffic Engineering On-Call Contract – Bexar County, TX

Mr. Garza is currently serving as the Project Manager for an on-call contract with Bexar County, which began in 2023. In this role, he has successfully managed over 30 assignments, including stop and signal warrant analyses, sidewalk design, traffic signal design, corridor studies, and stakeholder coordination. Notable projects completed under this contract include the Masterson Road Safety, Infrastructure, and Traffic Engineering (SITE) Analysis, sidewalk design, and pedestrian crossing improvements; Southside ISD SITE Analysis, sidewalk design, and traffic signal upgrades; Bulverde Road Corridor Study (TPC Parkway to Evans Road); TPC Parkway Corridor Study (Bulverde Road to Evans Road); Marbach Village Subdivision SITE Analysis; Fox Grove Subdivision SITE Analysis; Alamo Ranch Corridor Study (Calaveras Way to Loop 1604); and the Alamo Ranch Parkway Preliminary Schematic Design & Estimate Development.

TxDOT San Antonio District Traffic Engineering On-Call Contract – San Antonio, TX

Mr. Garza served as the Project Manager for this $3M on-call contract with TxDOT to provide various on-call traffic engineering services as required by the SAT District. The contract included a total of five work authorizations with a total of over 50 task orders which included: traffic engineering studies, speed zone studies, signal warrant studies, safety studies, schematic/concept development, traffic signal design, HSIP project application support, cable median barrier design, small/large signing inventories, R-CUT simulations, railroad coordination, and PS&E Package development.

Babcock Rd Bond Project – San Antonio, TX

Mr. Garza is currently serving as the Project Manager for this 0.7-mile project (from W Hausman Rd to Casina Run) as a part of the COSA Bond Program. This $7M project includes the reconstruction and widening of an existing 2-lane to 5-lane facility, drainage improvements, TCEQ coordination, sidewalk/bicycle accommodations, park/trail lighting, and traffic/safety enhancements.

LEGACY ENGINEERING GROUP

Eduardo "Lalo" Villalon is a certified Roadway Safety Professional (RSP1) and Licensed Professional Engineer with over 13 years of experience in transportation. He is exceedingly proficient in the analysis, design, and implementation of various transportation engineering elements such as traffic simulation, operational analysis, safety/crash studies, travel demand modeling, traffic projection development, and the development of roadway design, traffic signals, illumination, TCP, signing, and pavement markings on rural/urban corridors throughout the State of Texas. Prior to joining Legacy Engineering Group, Mr. Villalon served as the Traffic Engineer for the Texas Department of Transportation's (TxDOT) San Antonio District. He was later promoted to Section Director within TxDOT's Traffic Safety Division (TRF), where he oversaw the $400 million Highway Safety Improvement Program (HSIP) and played a key role in shaping policies and initiatives aimed at improving roadway safety and operations across the state.

Project Experience:

Traffic Safety Division Section Director – TxDOT | Statewide Level

As Traffic Engineering Section Director for TxDOT's Traffic Safety Division (3 years), Mr. Villalon led statewide transportation safety planning and program development efforts, coordinating with FHWA, TxDOT Districts, MPOs, local governments, and private stakeholders. He oversaw the prioritization and programming of safety and operational improvements across urban and rural corridors statewide, ensuring consistency with federal and state planning objectives. His role required frequent collaboration with regional planning agencies and local jurisdictions to evaluate corridor level needs, balance mobility and safety objectives, and support data driven investment decisions tied to long range planning and funding programs.

District Traffic Engineer – TxDOT | San Antonio District (12 Counties)

As District Traffic Engineer for TxDOT's San Antonio District (5 years), Mr. Villalon led traffic planning, safety evaluation, and operational feasibility efforts across 12 counties encompassing urban, suburban, and rural contexts. He supported corridor studies, early phase project development, and planning level analyses to improve mobility, access management, and safety on regionally significant facilities. His responsibilities included traffic forecasting, safety prioritization, and coordination with local agencies, railroads, and utilities to ensure proposed improvements aligned with long range transportation plans, environmental process needs, and regional mobility goals.

District Wide Traffic Signal Project – San Antonio District, TX

As Project Manager, Mr. Villalon led the planning, design, and implementation of new traffic signals at selected intersections throughout the San Antonio District. He collaborated with local municipalities and the TxDOT District Traffic Operations office to identify and prioritize locations based on crash history, traffic volumes, pedestrian activity, and traffic signal warrant analyses. He oversaw the development of signal designs with a strong focus on signal phasing, conduit and conductor sizing, and strategic pole placement to ensure adequate visibility and clearance. He also coordinated the integration of pedestrian and vehicle detection systems. During construction, he managed design modifications related to adjacent active projects and reviewed and approved contractor shop drawings to ensure compliance with TxDOT specifications and MUTCD standards. This project delivered critical safety and operational enhancements for both vehicular and pedestrian traffic across multiple corridors within the district.

District Wide Pavement Marking Project – San Antonio District, TX

As Project Manager, Mr. Villalon led this district-wide pavement marking project aimed at improving roadway safety, visibility, and compliance with TMUTCD standards. He coordinated location selection based on crash history, field evaluations, and retroreflectivity data to identify corridors with deteriorated markings or geometric deficiencies. Mr. Villalon oversaw cross-section evaluations to identify and implement safety enhancements, including widened shoulders, dedicated turn lanes, profile pavement markings, rumble strips, and optimized lane alignments to improve delineation in low-visibility conditions. He managed construction, ensuring proper surface preparation, material application, and adherence to specifications. The project included both site-specific and non-site-specific locations, requiring design and layout development beyond project letting. These improvements significantly enhanced daytime and nighttime visibility and delivered low-cost, high-impact safety benefits across key corridors in the district.

San Antonio, TX

LEGACY ENGINEERING GROUP

Mr. Hernandez has over 18 years of experience in Roadway Design, Construction Engineering/Inspection, and overall PS&E package preparation. As the former TxDOT San Antonio District Central Design Supervisor, he is proficient in the analysis, design and implementation of transportation engineering elements including complex roadway geometric design utilizing OpenRoads, 3D renderings/visualizations, TCP, hydrology and hydraulics analysis/design, signing, pavement markings, illumination, construction scheduling using P6 CPM, SW3P, roadway pavement designs, and utility design/coordination. He is currently serving as the Director of Engineering of Legacy Engineering Group, which is headquartered in San Antonio, TX. Mr. Hernandez is also LGPP Qualified.

Project Experience:

Bexar County Traffic Engineering On-Call Contract - Bexar County, Texas

Mr. Hernandez is currently serving as the Roadway Task Lead for this on-call contract with Bexar County, which began in 2023. In this role, he has successfully managed the design and PS&E development for the Masterson Road sidewalk and pedestrian crossing improvements; the Southside ISD sidewalk design and traffic signal upgrades (Martinez Losoya Road); and the Alamo Ranch Parkway Preliminary Schematic Design & Estimate Development.

TxDOT Traffic Engineering On-Call Contract - Bexar County, Texas

Mr. Hernandez served as the Roadway Task Lead for this $3M contract to provide various on-call traffic engineering services as required by the TxDOT SAT District. The contract included emergency/on-demand work authorizations including: Schematic/Concept Development, Traffic Signal Design, Cable Median Barrier Design, R-CUT Projects, Railroad Coordination, and PS&E Package Development.

WT Montgomery Road Project - Bexar County, Texas

Mr. Hernandez served as the Roadway Design Task Lead for this 2.5-mile roadway project, involving both reconstruction and new facility construction, funded through a Public-Private Partnership (P3) between Bexar County and multiple developers. His responsibilities included developing the roadway design and cross-sections and coordinating the completion of multiple PS&E packages. The project was recently completed in construction and opened to the public in February 2026.

Crestway Dr and Eaglecrest Blvd - Windcrest, Texas

Mr. Hernandez served as the Roadway Task Leader for this traffic signal and pedestrian improvements project in Windcrest, Texas. He was responsible for developing the roadway and intersection layouts, traffic signals, signing/striping, project TCP, and proposed pedestrian crossing layouts in accordance with TxMUTCD requirements. He also created the project construction schedule and cost estimate as part of developing the full PS&E package.

General Engineering Consultant - Fair Oaks Ranch, Texas

Mr. Hernandez is currently serving as the GEC Deputy PM for the City of Fair Oaks Ranch. In this role, he works as an extension of City Staff with a specific focus on various transportation and traffic engineering initiatives such as: Dietz-Elkhorn Road Corridor Study; Mid-Block Pedestrian/Trail and Golf Cart Crossing Signing & Markings; Roadway CIP; Annual Maintenance Budget Analysis; Cartegraph Software Program; and the development of a City-Wide Pavement Preservation Plan with all Signing & Marking Upgrades.

LP 1604 & Bandera Rd Displaced Left Turn Interchange Project - San Antonio, Texas

Mr. Hernandez, while with TxDOT, served as PM for the first constructed innovative intersection of its kind in the San Antonio area: the Loop 1604 and Bandera Road Displaced Left-Turn Intersection. The project included construction of two-lane displaced left-turn movements for northbound and southbound Bandera Road. Mr. Hernandez was responsible for roadway geometric design using OpenRoads, TCP, hydrology and hydraulics, signing, pavement markings, illumination, and SW3P. He refined the schematic roadway geometrics to avoid ROW acquisition and reduce project impacts. Due to the complex operations of the intersection, his design incorporated extensive supplemental signing and frequent pavement-marking legends to clearly guide motorists, bicyclists, and pedestrians through the corridor. He also coordinated closely with traffic operations, drainage, utility, and construction personnel to ensure the innovative design was practical, understandable, and constructible. His leadership helped advance a highly complex project while maintaining safety, minimizing impacts, and supporting successful implementation of the region's first displaced left-turn intersection.

AUSTIN PORLIER, PE

EDUCATION

Bachelor of Science in Civil Engineering

University of Texas at San Antonio, 2015

REGISTRATION

Licensed Professional Engineer

State of Texas

No. 129945

YEARS OF EXPERIENCE

8

CITY OF RESIDENCE

San Antonio, TX

LEGACY ENGINEERING GROUP

Mr. Porlier has over 8 years of roadway design, drainage design, and traffic control plan (TCP) experience, with a strong background delivering TxDOT roadway, safety, rehabilitation, and operational improvement projects from concept development through PS&E and construction support. As a former TxDOT Design Lead, he brings first-hand knowledge of roadway criteria, design exception documentation, constructability reviews, sequencing strategies, interdisciplinary coordination, and TxDOT plan development expectations. His technical strengths include geometric layout development, typical section and cross-section design, drainage and utility conflict identification, construction access planning, work zone phasing, signing and pavement marking coordination, and 3D corridor modeling. Mr. Porlier understands how early roadway and TCP decisions directly affect ROW needs, access, utilities, drainage, safety, construction sequencing, and long-term maintainability. He focuses on developing practical, constructible roadway solutions and TCP strategies that maintain mobility, protect adjacent properties and businesses, reduce driver confusion, and position each assignment for efficient construction.

Project Experience:

SW Military Drive Project – San Antonio, TX

Mr. Porlier served as the TCP Task Leader for this $5.2M roadway rehabilitation project along 6.4 miles of SW Military Drive. The project included base repair, milling, overlay, and related pavement improvements along a heavily traveled urban corridor with frequent driveways, intersections, pedestrian activity, and adjacent commercial access needs. He developed traffic control phasing that maintained traffic flow, preserved business access, and reduced work zone conflicts while supporting efficient construction. His approach helped provide safe and predictable travel paths for motorists, pedestrians, businesses, and construction personnel throughout project implementation.

SH 16 R-CUT Project – Bexar/Atascosa County, TX

Mr. Porlier served as the Roadway and TCP Task Leader for this $7.1M HSIP project along 4.1 miles of SH 16. The project replaced 18 median openings with strategically located directional U-turns to improve safety and operations on a high-speed divided facility. He led roadway design efforts including widening layouts, median modifications, U-turn geometry, grading considerations, signing, and pavement marking coordination. He also developed construction phasing and traffic control concepts that maintained business access, accommodated heavy truck traffic, and enhanced work zone safety. His phasing approach helped sequence the improvements so new U-turn movements could be made available before adjacent median closures were implemented..

LP 1604 Displaced Left Turn Intersection Project - Bexar County, TX

Mr. Porlier served as the Drainage and Traffic Control Design Lead for this operational improvement project at the SH 16 and Loop 1604 interchange, which introduced one of Texas' first Displaced Left-Turn (DLT) intersections. He led the development of signing, pavement marking, drainage, and TCP elements supporting the innovative intersection configuration. His responsibilities included evaluating existing conditions, coordinating with TxDOT traffic personnel, developing traffic control devices to enhance driver comprehension and safety, and leading hydrologic and hydraulic analyses for the storm drainage system. He coordinated with multidisciplinary team members throughout design, helped address constructability considerations tied to the non-standard intersection layout, and supported cost estimating and project delivery.

SH 151 Rehab Project – San Antonio, TX

Mr. Porlier served as the Roadway Design Lead for this $13.1M frontage road rehabilitation project along SH 151, which included improvements to approximately 9.1 miles of frontage roads. He led the evaluation and redesign of ADA-compliant curb ramps and metal beam guard fence systems throughout the corridor. His work included reviewing existing conditions, identifying deficiencies, developing practical improvement solutions, and preparing design details in accordance with TxDOT standards. He coordinated roadway, safety, and accessibility improvements with corridor constraints and project stakeholders to support implementation. His work helped enhance corridor safety, ADA compliance, and long-term performance while maintaining a practical rehabilitation-focused project scope.

YEARS OF EXPERIENCE

16

CITY OF RESIDENCE

San Antonio, TX

LEGACY ENGINEERING GROUP

Ms. Pulido is a Licensed Professional Engineer with more than 16 years of specialized experience in utility coordination and engineering. Prior to joining Legacy Engineering Group, she served as TxDOT's Right of Way Utility Portfolio Section Director, where she led the agency's statewide utility program. She also served as the San Antonio District Utility Engineer, managing complex utility coordination efforts for major roadway projects and implementing both joint-bid and non-joint-bid strategies. Her expertise spans utility scoping, constructability, relocation planning, scheduling, agreement development, reimbursement, and construction coordination. Her perspective was further strengthened through prior experience as a CPS Energy Project Manager overseeing utility relocations for multiple infrastructure projects. Ms. Pulido is highly knowledgeable in TxDOT utility requirements, relocation procedures, and industry best practices, bringing a comprehensive, agency-focused approach to each assignment.

Project Experience:

TxDOT ROW Utility Portfolio Section Director

As the Utility Portfolio Section Director, Ms. Pulido directed the development and implementation of the Utility Accommodations Program for all districts' portfolio of projects. She oversaw the development of the new comprehensive utility management system, and the development and implementation of the TxDOT Utility Accommodation Policies and advised and instructed statewide district personnel in the proper implementation. Her team was responsible for the administrative review of all utility adjustments and reimbursements statewide, auditing the Utility Accommodation program for Buy America and other federal and state compliance requirements, directing and developing utility training courses for the department and industry personnel, and overseeing the consultant contracts.

Old Fredericksburg Rd Project – Bexar County Public Works, San Antonio, TX

Ms. Pulido is currently serving as the Utility Coordinator Task Lead for this $12M project which includes the reconstruction and widening of an existing 2-lane facility, drainage improvements, sidewalk/bike lane accommodations, and traffic/safety enhancements between I-10 and FM 3351 in northwest Bexar County. During the design phase, Ms. Pulido identified utility conflicts and worked closely with the design team to avoid, minimize, and accommodate conflicts; she worked with the utility owners to develop a utility relocation schedule that phased the utility relocation work in alignment with the ROW acquisition phasing. Ms. Pulido successfully led monthly meetings and worked closely with CPS Energy, AT&T, Spectrum, Zayo, and Grey Forest Gas to relocate their facilities ahead of schedule. She also coordinated with joint bid utilities SAWS, and the City of Fair Oaks Ranch to ensure the plans and estimates were submitted on time with each milestone.

Blanco Rd Ph III Project – Bexar County Public Works, San Antonio, TX

Ms. Pulido is currently serving as the Utility Coordinator Task Lead for this $38M project which includes the reconstruction and widening of an existing 2-lane facility, drainage improvements, sidewalk/bike lane accommodations, and safety enhancements between Borgfeld Drive and the Bexar County Line in Bexar County. During the design, Ms. Pulido identified utility conflicts and worked closely with the team to avoid, minimize, and accommodate conflicts; Ms. Pulido successfully coordinated with CPS Energy, GVTC, Spectrum, and Zayo to verify there were no conflicts with non-joint bid utilities early in the design phase. She also coordinated with joint bid utilities SAWS, and CPS gas to ensure the plans and estimates were submitted on time.

Babcock Rd Project – San Antonio, TX

Ms. Pulido is currently serving as the Utility Coordinator Task Lead for this $6M project which includes the reconstruction and widening of an existing 2-lane facility, drainage improvements, sidewalks, and safety enhancements between W. Hausman and north of UTSA Blvd in San Antonio. During the early stages of the design phase, Ms. Pulido identified utility conflicts and worked closely with the design team to avoid, minimize, and accommodate conflicts; she worked diligently with the design team to avoid conflicts with the existing 24" CSC water main. She also worked closely with the utility owners to develop a detailed utility relocation schedule to clear utilities prior to construction. Ms. Pulido successfully led monthly meetings with CPS Energy, Grey Forest Utilities, AT&T, Spectrum, Google Fiber, and MCI to accommodate their relocations and ensure no additional conflicts were being created. She also coordinated joint bid utilities (SAWS and CPS Gas) to ensure the plans and estimates were submitted on time with each milestone.

San Antonio, TX

LEGACY ENGINEERING GROUP

Ms. Tarrants brings more than 33 years of transportation experience, including 29 years with the Texas Department of Transportation and consultant experience supporting municipal asset management programs. She recently earned a Master of Science in Geospatial Technology, strengthening her expertise in GIS-based data management, spatial analysis, and visualization for transportation planning, safety, and infrastructure decision-making. During her TxDOT tenure, she served more than 16 years as the District Railroad Coordinator, acting as the liaison between TxDOT, railroad companies, local governments, and regulatory agencies to facilitate transportation improvements and safety projects within railroad rights of way.

Currently serving as a Senior Transportation Engineering Specialist with Legacy Engineering Group, Ms. Tarrants supports roadway maintenance planning, safety analysis, and capital programming using GIS and asset management tools. She is experienced in ArcGIS Pro, enterprise GIS workflows, and Cartegraph/OpenGov integration. An RSP2- and LGPP-certified professional, she is recognized for integrating data from multiple sources, improving workflows, and supporting informed infrastructure decisions.

Project Experience:

Transportation GIS and Asset Mapping – TxDOT

During her tenure with TxDOT, Ms. Tarrants developed and maintained district-wide GIS datasets supporting operational, safety, and planning initiatives. She mapped all posted speed zones and maintained a comprehensive traffic signal inventory. She produced GIS visualizations for four-year pavement plans and mapped existing audible pavement markings to support safety and accessibility initiatives. She also maintained emergency evacuation route maps ensuring accurate information for emergency management coordination.

Ms. Tarrants also performed geospatial safety analyses to support data-driven decision-making including conducting crash density and severity analyses for the San Antonio Region to identify high-injury roadway segments relative to traffic volumes (ADT). By segmenting roadway networks, spatially analyzing fatal and serious injury crashes, and developing GIS-based visualizations, she helped identify corridors where targeted safety improvements could provide the greatest benefit.

Crash Data Analysis and Safety Evaluation – TxDOT and Legacy Engineering Group

As a Road Safety Professional (RSP2) and former Highway Safety Improvement Program (HSIP) Coordinator for TxDOT, Ms. Tarrants applies a data-driven approach to identifying and addressing transportation safety issues. She evaluates crash trends, roadway characteristics, traffic volumes, and operational conditions to identify systemic and site-specific risks. Using Crash Modification Factors (CMFs), benefit-cost analysis, and engineering judgment, she develops and prioritizes countermeasures that maximize safety benefits while balancing mobility, constructability, and cost. Her holistic approach considers roadway geometry, multimodal needs, access management, and operational performance to identify practical, high-value safety improvements.

Business SH 46 Railroad Underpass Project (UPRR) – Comal County, TX

Ms. Tarrants served as Railroad Coordinator for modifications to an existing railroad underpass while maintaining uninterrupted rail operations during construction. She supported field reviews, railroad coordination, and on-site issue resolution to mitigate impacts to rail service during phased construction. Key constraints included shoofly planning, proximity to adjacent crossings, pump station needs due to the low roadway profile near the Guadalupe River, and the historic designation of the existing bridge structure. Her coordination supported constructible sequencing, railroad safety compliance, and successful roll-in placement of the final bridge.

Municipal Asset Management and Pavement Planning – Legacy Engineering Group

As General Engineering Consultant for the City of Fair Oaks Ranch, Ms. Tarrants maintains roadway asset data using ArcGIS Pro integrated with Cartegraph/OpenGov. She updates pavement inventories, supports pavement area calculations, and develops of the City's annual pavement preservation plan. Her work includes scenario evaluation based on pavement condition, available budgets, recent projects, and recommended maintenance applications. Ms. Tarrants also applies GIS to visualize transportation, roadway, and utility assets. Through layered spatial data and interactive mapping tools, she helps City staff and project teams evaluate infrastructure needs, track assets, support capital planning, and prepare clear exhibits for bidding and construction.

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

Printed Name and Title: Oscar Michael Garza, President and CEO

Authorized Signatory:

COMPANY PROVIDING PROPOSAL GENERAL QUESTIONNAIRE

1 Name/Name of Agency/Company: Legacy Engineering Group, PLLC
(Full, correct legal name)

- Address: 7800 W. Interstate 10, Suite 830, San Antonio, TX 78230
- Telephone/Fax: 210-660-1960 / N/A
- Email address: Mike.Garza@LEG-PLLC.com

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?
Yes____ No x

3. Is your Company authorized and/or licensed to do business in Texas? Yes x No____

4. Where is the Company's corporate headquarters located? San Antonio, Texas

5. a. Does the Company have an office located in Edinburg, Texas? Yes____ No x

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office? _____ (years) _____ (months)

c. State the number of full-time employees at the Edinburg office. _____

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity? Yes____ No x

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. _____

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Oscar Michael Garza, President and CEO
Address: 7800 W. Interstate 10, Suite 830, San Antonio, TX 78230
Telephone: 210-660-1960
Fax: N/A
Email: Mike.Garza@LEG-PLLC.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (x).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture._____

9. Bankruptcy Information

   Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (x)
   If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets. _____

10. Provide any other names under which your business has operated within the last 10 years.
    N/A

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES (NO)

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES (NO)

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Oscar Michael Garza, the undersigned representative of

Legacy Engineering Group, PLLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

N/A

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

N/A

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No N/A

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No N/A

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

N/A

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

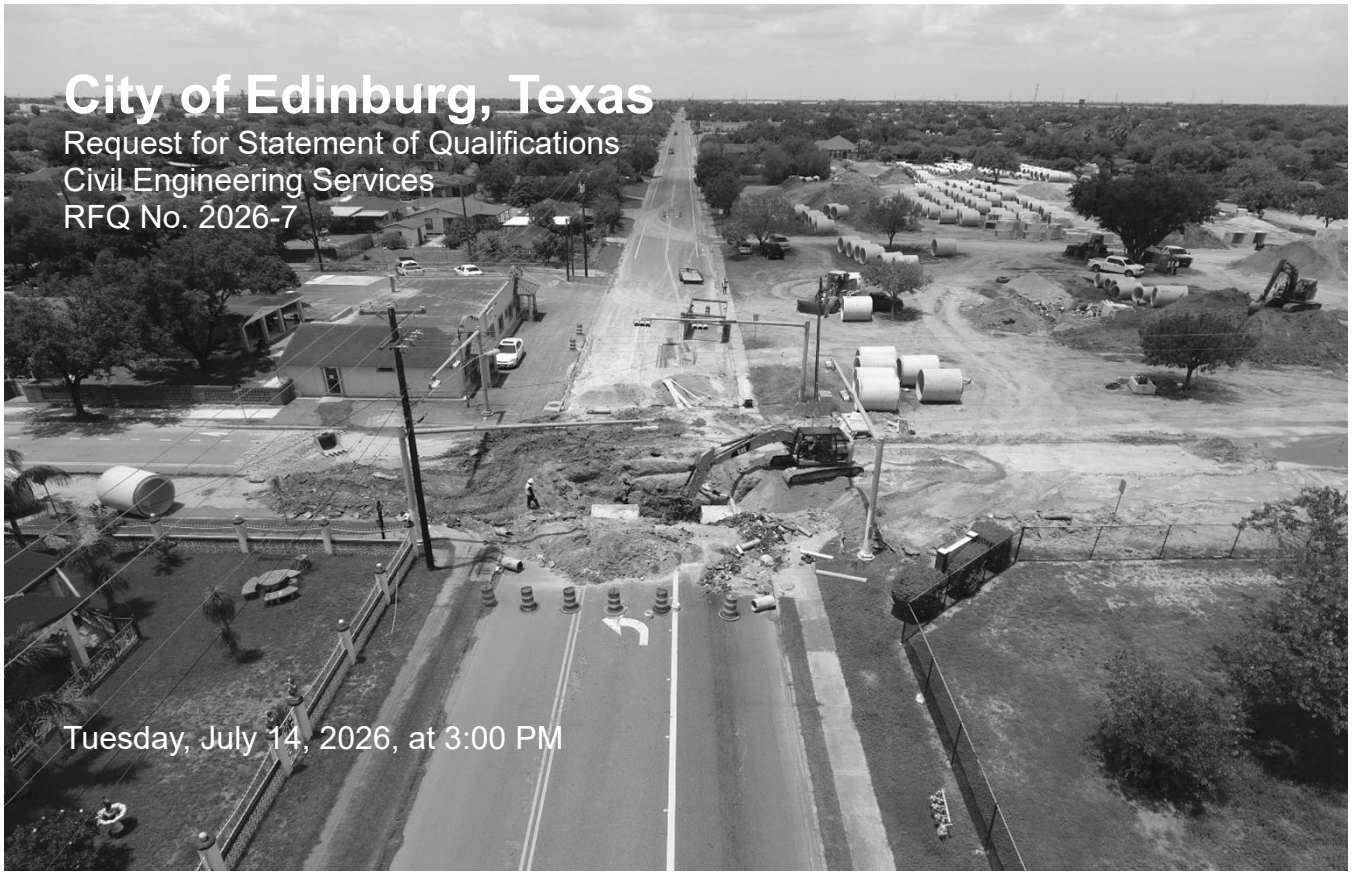
(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);



(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

TRANSMITTAL LETTER

July 14, 2026

Mardoqueo Hinojosa, P.E.
City Engineer
City of Edinburg
415 W. University Drive
Edinburg, Texas 78539

Ref: City of Edinburg
Request for Statement of Qualifications
Civil Engineering Services
RFQ No. 2026-7

Dear Mr. Hinojosa,

Melden & Hunt, Inc. is pleased to submit this Statement of Qualifications in response to the City of Edinburg's Request for Qualifications for On-Call Professional Engineering Services. We are excited about the opportunity to continue our longstanding partnership with the City and to provide the professional engineering services necessary to support the City's capital improvement program, infrastructure planning, development review, and engineering initiatives. With more than 79 years of dedicated service to municipalities throughout South Texas, Melden & Hunt is a multidisciplinary engineering firm uniquely qualified to provide the broad range of services requested under this RFQ.

Our firm has enjoyed a long and successful working relationship with the City of Edinburg, providing engineering services on a variety of municipal infrastructure projects over the years. Through this partnership, we have developed a comprehensive understanding of the City's engineering standards, infrastructure systems, development processes, regulatory requirements, and long-term vision for growth. This familiarity enables our team to integrate seamlessly with City staff and efficiently deliver responsive, practical, and cost-effective engineering solutions that meet the City's objectives.

As a full-service municipal engineering firm, Melden & Hunt offers extensive expertise in civil engineering, street and pavement improvements, utility infrastructure, water and wastewater systems, hydrology and hydraulics, drainage and flood mitigation, transportation and traffic engineering, construction administration, capital improvement planning, grant administration, and development review. Our multidisciplinary approach allows us to provide comprehensive engineering support for projects ranging from small task assignments to large, complex infrastructure improvements while maintaining the highest standards of technical quality and client service.

Our team understands that successful on-call engineering services require more than technical expertise they require responsiveness, flexibility, and the ability to function as an extension of the City's Engineering Department. Whether assisting with field investigations, feasibility studies, design development, environmental compliance, permitting, construction administration, public presentations, or project management, Melden & Hunt is committed to delivering timely, innovative, and sustainable engineering solutions that protect the City's investment and enhance the quality of life for its residents.

We believe that selecting Melden & Hunt, Inc. will provide the City of Edinburg with a trusted engineering partner that combines decades of municipal experience, local knowledge, and a proven record of successfully delivering infrastructure projects throughout South Texas. Our established relationships with regulatory agencies, funding entities, utility providers, and local stakeholders enable us to efficiently navigate project challenges, streamline project delivery, and maximize available funding opportunities while maintaining schedules and budgets.

We sincerely appreciate the opportunity to submit our qualifications and thank the City of Edinburg for its continued confidence in Melden & Hunt, Inc. We value the longstanding relationship we have built with the City and look forward to continuing to serve as a trusted engineering partner for years to come. Should you require any additional information or wish to discuss our qualifications further, we would welcome the opportunity to meet with you.

Thank you for your time and consideration. We look forward to continuing our partnership with the City of Edinburg and supporting its ongoing commitment to providing safe, reliable, and sustainable infrastructure for the community.

Sincerely,

Mario Reyna, P.E.
President

FIRM INFORMATION

Since its founding in 1947, Melden & Hunt, Inc. has been a trusted leader in municipal engineering, land surveying, and infrastructure development throughout South Texas. For more than 79 years, our firm has partnered with cities, counties, utility districts, and public agencies to plan, design, and deliver infrastructure improvements that strengthen communities, support economic growth, and enhance quality of life. Throughout our history, we have successfully adapted to evolving technologies, changing regulatory requirements, and increasingly complex engineering challenges while maintaining our commitment to providing exceptional professional services.

From traditional surveying and roadway design to advanced GIS applications, water and wastewater infrastructure, drainage and flood mitigation, transportation engineering, and comprehensive capital improvement programs, Melden & Hunt has consistently delivered practical, innovative, and sustainable engineering solutions. Our multidisciplinary team combines technical expertise with decades of municipal experience to successfully manage projects from initial planning and funding through design, permitting, construction, and project closeout.

A cornerstone of our success has been our longstanding relationship with the City of Edinburg. Over the years, we have had the privilege of assisting the City with numerous engineering initiatives, giving our team a comprehensive understanding of its infrastructure systems, engineering standards, development practices, regulatory environment, and long-term capital improvement goals. This familiarity enables us to respond quickly, coordinate effectively with City staff, and serve as a seamless extension of the City's Engineering Department.

While the engineering profession has evolved significantly over the past seven decades, one principle has remained constant our unwavering commitment to our clients. We take pride in building lasting relationships founded on trust, responsiveness, technical excellence, and integrity. Every project receives the personal attention of experienced professionals who are dedicated to delivering high-quality, cost-effective, and timely engineering solutions that exceed client expectations.

As the City of Edinburg continues to invest in its infrastructure and plan for future growth, Melden & Hunt is prepared to provide the responsive, multidisciplinary engineering services necessary to support the City's vision. Our proven experience, local presence, and commitment to exceptional client service make us uniquely qualified to continue serving the City as a trusted engineering partner for years to come.

Melden & Hunt, Inc. has assembled a highly qualified multidisciplinary team of engineering professionals with the technical expertise, municipal experience, and local knowledge necessary to successfully deliver the full range of on-call engineering services requested by the City of Edinburg. Each member of our proposed team is a full-time employee of Melden & Hunt, Inc. and has extensive experience providing planning, evaluation, design, permitting, construction administration, and project management services for municipal infrastructure projects throughout South Texas.

Beyond their technical qualifications, our team offers the significant advantage of a longstanding professional relationship with the City of Edinburg. Having successfully collaborated with the City on numerous engineering projects over the years, our professionals possess a thorough understanding of the City's engineering standards, development review processes, infrastructure

systems, regulatory requirements, and capital improvement objectives. This familiarity enables our team to integrate seamlessly with City staff, respond quickly to assignments, and efficiently deliver high-quality engineering solutions while minimizing project startup time.

Our team will operate from Melden & Hunt's Edinburg office, allowing us to provide immediate responsiveness and personalized service whenever requested by the City. This local presence ensures that our engineers are readily available for field investigations, coordination meetings, development reviews, public presentations, emergency response, construction observation, and other on-call assignments. Supported by the firm's full complement of engineering, surveying, GIS, environmental, and construction administration professionals, our local staff has the resources and flexibility to manage multiple task orders simultaneously while consistently meeting project schedules and maintaining the highest standards of quality.

Melden & Hunt is committed to serving as an extension of the City's Engineering Department by providing experienced professionals who are responsive, accessible, and dedicated to helping the City of Edinburg successfully plan, design, and implement infrastructure improvements that support the community's continued growth and long-term success.

Melden & Hunt, Inc. has designated Mr. Mario Reyna, P.E., as the Principal-in-Charge and Chief Project Engineer for the City of Edinburg. Mr. Reyna will provide executive oversight for all task orders and serve as the City's primary executive resource, ensuring that every assignment receives the firm's highest level of technical expertise, quality assurance, and management support. He will work closely with City staff to establish project priorities, develop work plans, allocate resources, and monitor schedules, budgets, and overall project performance to ensure each assignment is completed efficiently and in accordance with the City's expectations.

Working collaboratively with the project team, Mr. Reyna will serve as an extension of the City's Engineering Department by providing responsive leadership, technical guidance, and proactive communication throughout the duration of each assignment. He will be responsible for assembling the most qualified personnel for each task order, drawing upon Melden & Hunt's multidisciplinary staff to provide the specialized expertise required for projects involving transportation, streets, utilities, drainage, water and wastewater systems, traffic engineering, construction administration, and capital improvement planning. Mr. Reyna is committed to ensuring that the appropriate technical resources are readily available to meet the City's needs and deliver projects on schedule and within budget.

Supporting Mr. Reyna will be Mr. Ruben James De Jesus, P.E., R.P.L.S., who will serve as a senior engineering resource and provide valuable technical leadership based on more than 15 years of municipal engineering experience throughout South Texas. Mr. De Jesus will assist with project planning, technical reviews, design oversight, and coordination with City staff while ensuring that each assignment benefits from sound engineering judgment and practical, cost-effective solutions. He will also help ensure that key project personnel remain actively engaged throughout each task

order and that the necessary technical specialists and support staff are available to successfully complete every assignment.

Both Mr. Reyna and Mr. De Jesus are based in Melden & Hunt's Edinburg office, which serves as the firm's primary operations center for serving the City of Edinburg. This local presence enables our team to respond quickly to requests for engineering support, attend meetings and field investigations on short notice, coordinate closely with City staff, and provide the level of accessibility and responsiveness expected of an on-call engineering consultant. Together, they are committed to delivering exceptional client service while serving as a trusted extension of the City's Engineering Department.

Mario Reyna, P.E.
Office Number: 956.381.0981 **Mobile Number:** 956.500.2734

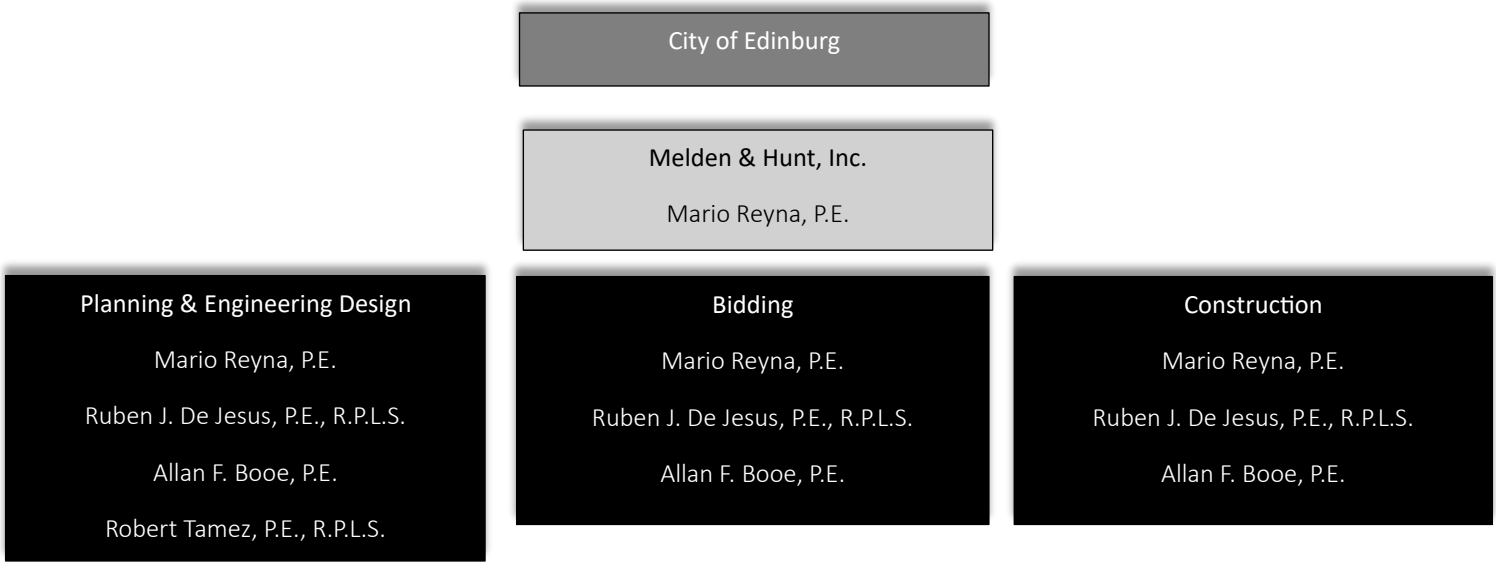
Melden & Hunt, Inc. maintains a highly experienced and flexible multidisciplinary team capable of providing the full range of engineering services requested by the City of Edinburg. Our depth of technical expertise enables us to efficiently assemble project teams that are specifically tailored to the requirements of each individual task order. Whether the City requires support for utility infrastructure, water and wastewater systems, drainage, traffic engineering, or construction administration, we have the personnel and resources readily available to respond quickly and effectively.

Our staff includes licensed Professional Engineers, Professional Land Surveyors, technical specialists, CAD designers, construction administrators, grant specialists, and support personnel with extensive experience serving municipalities throughout South Texas. This depth of expertise allows us to manage multiple assignments simultaneously while maintaining the high level of quality, responsiveness, and technical excellence that the City expects from its engineering consultant.

At Melden & Hunt, we believe that successful project delivery begins with strong communication and collaboration. Our clients benefit from direct access to key project personnel and decision-makers, ensuring prompt responses, clear communication, and proactive coordination throughout every phase of an assignment. Supported by our experienced technical staff and comprehensive quality assurance/quality control program, we consistently deliver accurate, cost-effective, and technically sound engineering solutions that are completed on schedule and within budget.

Our local presence in Edinburg, combined with the depth of our multidisciplinary team, enables us to serve as a seamless extension of the City's Engineering Department, providing the resources, expertise, and responsiveness necessary to successfully support the City's ongoing capital improvement program and on-call engineering needs.



Melden has the following in house professionals:

Description	No. of Staff
Registered Civil Engineer	6
Licensed Professional Land Surveyors	3
Licensed Water and Wastewater Plant Operators	2
Project Manager	1
Engineering CADD Designers	11
Survey CADD & Field Technicians	17
Construction Inspectors	3
GIS Technician	1
Project Administrators	4
Office Management Administrators	7

Organizational Chart

Project Organization, alongside the assignment of qualified, responsive, and experienced personnel are the most important factors to ensure a project's success. Beginning with Melden & Hunt, Inc.'s ***Mr. Mario Reyna, P.E.***, as the assigned Project Principal, he will hold primary management and decision-making responsibility for your project, for our proposed team. The given organizational chart also shows other key professionals that will have responsibility for individual project tasks, as well as other key entities involved in the project.

The core management team will be as follows:

Assigned Project Team Leads – All Located in the Edinburg, Texas Corporate Office Location:

Name	Project Role
Mario Reyna, P.E.	Project Principal and Chief Project Engineer
Ruben J. De Jesus, P.E., R.P.L.S.	Design Engineer and Land Surveyor
Allan F. Booe, P.E.	Utility Engineer
Robert Tamez, P.E., R.P.L.S.	Design Engineer and Land Surveyors

Melden & Hunt, Inc. understands the importance of continuity, responsiveness, and reliability in providing on-call engineering services to the City of Edinburg. To ensure uninterrupted project delivery, we maintain a well-structured staffing approach that allows us to seamlessly transition responsibilities should key personnel become unavailable during the course of an assignment.

Our multidisciplinary team consists of experienced engineers, project managers, and technical professionals who are cross-trained across multiple disciplines and supported by comprehensive project documentation and established quality control procedures. This enables us to quickly reassign qualified personnel while maintaining project schedules, continuity, and the high level of service expected by the City.

Through proactive project oversight, strong internal communication, and the depth of our technical staff, Melden & Hunt is fully prepared to provide uninterrupted engineering support and consistently deliver high-quality, timely, and cost-effective services throughout the term of the City's on-call engineering contract.

Texas Historical Commission

As Principal in Charge, Mr. Mario Reyna brings an unmatched level of leadership, technical expertise, and dedication to every project he oversees. With decades of experience in municipal engineering, construction management, and large-scale infrastructure development, Mr. Reyna possesses a deep understanding of the unique challenges facing City of Edinburg. His extensive knowledge of paving and drainage systems, flood mitigation strategies, and regulatory compliance ensures that every project meets the highest standards of quality, efficiency, and resilience.

Mr. Reyna has a proven track record in successfully planning, designing, and executing complex drainage projects. He understands the intricacies of stormwater management, flood control infrastructure, detention and retention systems, and channel improvements—critical elements in enhancing the region's ability to mitigate flooding and protect communities. His ability to analyze hydrologic and hydraulic data, implement sustainable drainage solutions, and navigate regulatory requirements makes him an invaluable resource for the City's ongoing and future initiatives.

His expertise extends beyond technical proficiency; Mr. Reyna excels in coordinating large-scale drainage and infrastructure projects, managing multidisciplinary teams, and fostering strong relationships with key stakeholders. He is committed to proactive problem-solving, ensuring that potential challenges are addressed before they become obstacles. His strategic vision, combined with his hands-on approach, guarantees that every project is executed with precision and tailored to the City's specific needs.

Beyond his technical expertise, Mr. Reyna is known for his unwavering commitment to client success. He understands the importance of transparency, responsiveness, and collaboration, making him a trusted partner in delivering innovative, cost-effective drainage solutions. Whether leading major flood control initiatives, improving stormwater conveyance systems, or overseeing critical drainage enhancements, Mr. Reyna is dedicated to ensuring that every project contributes to the long-term sustainability and resilience of the City. The City of Edinburgcan move forward with confidence, knowing that under his leadership, Melden & Hunt, Inc. will deliver exceptional results that protect and enhance the community.

Mr. Ruben De Jesus has dedicated his civil engineering career to Melden & Hunt, Inc., joining the firm after earning his degree from the University of Texas-Pan American. With a wealth of experience in land surveying and civil engineering, he has successfully designed and managed a diverse range of projects for both public and private sectors across South Texas. His expertise spans critical areas such as drainage infrastructure, flood control, roadway design, and utility development, making him a valuable asset in delivering comprehensive engineering solutions. His deep understanding of surveying and project execution allows him to translate complex data into practical, high-performing designs that align with regulatory standards and community needs.

As Design Engineer and Land Surveyor for this proposed project, Mr. De Jesus will play a key role in ensuring its successful planning and execution. He will develop a detailed work plan, oversee scheduling, and coordinate all project tasks with precision and efficiency. His unwavering commitment to the City of Edinburg goes beyond technical expertise—he will act as an extension of your staff, proactively addressing challenges and responding promptly to any project needs, even on short notice. Dedicated to delivering results, he will leverage all available resources to keep the project on track and within scope.

Operating from our Edinburg office, Mr. De Jesus will remain readily accessible for consultations, ensuring seamless communication and immediate responsiveness to any requests. His hands-on approach, problem-solving mindset, and passion for excellence make him a trusted partner in delivering high-quality drainage improvements that enhance the resilience and functionality of the region's infrastructure. The City of Edinburg can rely on his leadership, technical knowledge, and steadfast commitment to achieving project success.

UNDERSTANDING OF THE PROJECT

Melden & Hunt, Inc. understands that the City of Edinburg is seeking a highly qualified and responsive engineering firm to provide comprehensive on-call professional engineering services in support of the City's Capital Improvement Program (CIP), infrastructure maintenance, and future development. We recognize that the City requires a trusted partner capable of responding quickly to project assignments while providing innovative, practical, and cost-effective engineering solutions that improve the quality of life for its residents and support continued economic growth.

As one of the fastest-growing communities in South Texas, the City of Edinburg faces the ongoing challenge of expanding and maintaining critical public infrastructure while balancing growth, regulatory compliance, public safety, environmental stewardship, and fiscal responsibility. Successfully meeting these challenges requires an engineering consultant with extensive municipal experience, local knowledge, and the technical resources to deliver projects efficiently from planning through construction.

Melden & Hunt has proudly served communities throughout South Texas for decades and has developed a thorough understanding of the engineering, environmental, permitting, and regulatory requirements associated with municipal infrastructure projects. Our familiarity with City operations, regional conditions, and coordination with agencies such as TxDOT, TCEQ, FEMA, USACE, TWDB, Hidalgo County Drainage Districts, utility providers, and other stakeholders enables us to efficiently advance projects while minimizing delays.

Comprehensive Municipal Engineering Services

We understand that on-call engineering services require flexibility and responsiveness. Assignments may range from small evaluations and emergency response efforts to large-scale capital improvement projects. Our multidisciplinary staff is prepared to provide engineering services for a wide variety of municipal infrastructure projects, including:

- Water distribution systems and transmission mains.
- Wastewater collection systems and treatment facilities.
- Drainage and stormwater management improvements.
- Streets, roadways, and intersection improvements.
- Traffic control and transportation engineering.
- Bridge and structural engineering.
- Utility relocations and coordination.
- Site development and municipal facilities.
- Parks and recreational improvements.
- Pavement rehabilitation and reconstruction.
- Hydraulic and hydrologic analyses.
- Engineering studies, master planning, and feasibility evaluations.
- Construction plans, specifications, and contract documents.
- Bid phase assistance and procurement support.
- Construction administration, observation, and project closeout.
- Grant application support and funding coordination.
- Responsive Project Delivery

We recognize that the success of an on-call engineering contract depends on the consultant's ability to respond quickly and efficiently to City requests. Melden & Hunt has established project management procedures that allow us to mobilize staff immediately, assign experienced professionals, and begin work without unnecessary delays.

Each assignment is managed by a dedicated Project Manager who serves as the City's single point of contact, ensuring consistent communication, prompt responses, and accountability throughout every phase of the project. Our team maintains close coordination with City staff to clearly define project objectives, establish realistic schedules, monitor budgets, and proactively address potential challenges before they impact project delivery.

Quality Engineering Solutions

Our engineering philosophy focuses on developing practical, sustainable, and constructible solutions that maximize the City's investment in public infrastructure. Every project undergoes a comprehensive Quality Assurance/Quality Control (QA/QC) review to ensure technical accuracy, regulatory compliance, and complete construction documents.

Our engineers utilize the latest design software, hydraulic modeling programs, GIS technologies, surveying equipment, and CAD platforms to produce efficient, accurate, and reliable engineering solutions that comply with City standards, TxDOT requirements, TCEQ regulations, and all applicable local, state, and federal requirements.

Construction Phase Services

Our commitment to the City extends well beyond design. Melden & Hunt provides comprehensive construction phase services that help ensure projects are completed in accordance with the approved plans, specifications, budget, and schedule.

These services include contractor coordination, pre-construction meetings, shop drawing and submittal reviews, responses to Requests for Information (RFIs), construction observation, pay estimate review, change order evaluation, final inspections, project documentation, and project closeout. Throughout construction, our engineers work collaboratively with City staff and contractors to resolve issues quickly while protecting the City's interests.

Local Experience and Long-Term Partnership

Our team understands the unique engineering challenges facing the City of Edinburg, including aging infrastructure, continued residential and commercial development, drainage improvements, utility system expansion, transportation enhancements, and the need to maximize available funding opportunities. We recognize that every assignment contributes to the City's long-term vision for sustainable growth and improved public services.

Melden & Hunt is committed to developing a long-term partnership with the City by providing responsive service, sound engineering judgment, innovative solutions, and exceptional client support. Our goal is to become an extension of the City's engineering staff by delivering dependable technical expertise, maintaining open communication, and consistently exceeding expectations.

Commitment to Excellence

Melden & Hunt appreciates the opportunity to submit our qualifications to serve the City of Edinburg as its on-call engineering consultant. We are committed to providing the technical expertise, responsiveness, and personalized service necessary to successfully deliver projects of every size and complexity.

Our experience with municipal infrastructure, multidisciplinary capabilities, and dedication to quality position us to provide the City of Edinburg with reliable engineering services that enhance public safety, strengthen infrastructure, improve resiliency, and support the City's continued growth for many years to come.

FIRM EXPERIENCE & QUALIFICATIONS

Delivering Responsive Municipal Engineering Services Since 1947

Since 1947, Melden & Hunt, Inc. has provided comprehensive professional engineering, surveying, and construction management services to municipalities, counties, water districts, state agencies, and federal agencies throughout South Texas. With nearly eight decades of experience, our firm has successfully completed hundreds of public infrastructure projects while establishing a reputation for technical excellence, responsiveness, and dependable client service.

Our Edinburg office is strategically located to provide immediate support to the City, allowing our staff to respond quickly to project needs, field investigations, construction issues, development reviews, and emergency situations. This local presence enables us to provide the level of service expected from an on-call engineering consultant while maintaining direct communication with City staff.

Melden & Hunt understands that on-call municipal engineering requires more than design expertise. It requires the ability to respond quickly, manage multiple assignments simultaneously, coordinate with numerous agencies and stakeholders, and consistently deliver projects on schedule and within budget. Our team has the personnel, experience, and resources necessary to successfully support the City of Edinburg's Engineering Department.

Comprehensive Municipal Engineering Services

Our firm provides multidisciplinary engineering services covering virtually every aspect of municipal infrastructure. Our experience includes:

- Street infrastructure evaluations and roadway improvements
- Pavement management and rehabilitation programs
- Utility infrastructure evaluation and replacement
- Water distribution system design
- Wastewater collection system design
- Drainage improvements and stormwater management
- Hydrologic and hydraulic studies
- Traffic engineering and traffic signal design
- Civil site development
- Environmental permitting and regulatory compliance
- Construction administration and resident project representation
- Capital Improvement Program (CIP) planning and implementation

These services closely align with the disciplines identified by the City of Edinburg for its on-call engineering services contract.

Experience Supporting Municipal Capital Improvement Programs

Melden & Hunt has extensive experience assisting municipalities with every phase of capital improvement projects, including:

- Field investigations and engineering studies
- Feasibility analyses and alternatives evaluations
- Preliminary engineering reports
- Cost estimating and budgeting
- Preparation of plans, specifications, and contract documents
- Bid phase services
- Construction administration
- Construction observation
- Final project closeout

Our engineers routinely coordinate with utility companies, developers, regulatory agencies, contractors, funding agencies, and public stakeholders to ensure projects progress efficiently from planning through construction.

Development Review and Municipal Support

Beyond traditional engineering design, our staff regularly assists municipalities by providing technical support for development-related activities, including:

- Engineering review of subdivision plats
- Review of private development plans
- Utility availability evaluations
- Drainage reviews
- Engineering permit reviews
- Coordination with developers and consultants
- Preparation of engineering recommendations
- Technical presentations before City Councils, Planning & Zoning Commissions, utility boards, and public meetings

Our familiarity with municipal development processes allows us to serve as an extension of City engineering staff whenever additional resources are required.

Water, Wastewater, Drainage and Utility Infrastructure

Melden & Hunt has designed, rehabilitated, and managed numerous municipal utility projects throughout South Texas. Our experience includes:

- Water treatment facilities

- Water distribution systems
- Groundwater production wells
- Wastewater treatment facilities
- Wastewater collection systems
- Lift stations
- Force mains
- Storm sewer systems
- Drainage channels
- Culverts
- Regional detention facilities
- Flood mitigation improvements

Our engineers utilize the latest hydraulic modeling, GIS technologies, and engineering software to develop cost-effective, sustainable infrastructure solutions that improve system reliability while meeting regulatory requirements.

Roadway and Transportation Improvements

Our transportation experience includes the planning, design, rehabilitation, and construction management of municipal streets, collectors, thoroughfares, and TxDOT-related roadway improvements.

Services include:

- Street reconstruction
- Pavement rehabilitation
- Intersection improvements
- ADA compliance
- Traffic control plans
- Utility coordination
- Drainage integration
- Right-of-way coordination
- Construction phase services

Our roadway designs emphasize public safety, efficient traffic flow, long-term durability, and maintainability.

Experience with State and Federal Funding Programs

Melden & Hunt has extensive experience delivering projects funded through local, state, and federal agencies, including:

- Texas Water Development Board (TWDB)

- Texas Department of Transportation (TxDOT)
- USDA Rural Development
- Bureau of Reclamation
- NADBank
- FEMA
- HUD Community Development Block Grant Programs
- Texas General Land Office
- Texas Department of Agriculture

Our staff understands the unique documentation, procurement, reporting, environmental compliance, and grant administration requirements associated with these funding sources, allowing our clients to maintain compliance while maximizing available funding opportunities.

Commitment to Responsiveness and Schedule

The City of Edinburg's evaluation places significant emphasis on the firm's ability to meet schedules and deadlines. Melden & Hunt has developed proven project management procedures that emphasize responsiveness, communication, and accountability. Dedicated project managers monitor project schedules, coordinate internal resources, and maintain continuous communication with City staff to ensure assignments are completed accurately and on time.

Because our professionals are located within the Rio Grande Valley, we are able to provide rapid response for meetings, construction observations, field investigations, emergency utility issues, and other time-sensitive assignments.

Qualified Staff and Local Resources

Melden & Hunt employs experienced professional engineers, project managers, CAD technicians, construction inspectors, surveyors, GIS specialists, and support personnel who routinely collaborate across multiple engineering disciplines.

Our multidisciplinary approach allows us to efficiently staff projects of varying size and complexity while providing continuity throughout the life of each assignment. The depth of our technical staff ensures that specialized expertise is readily available whenever required.

A Proven Municipal Partner

For nearly 80 years, municipalities throughout South Texas have relied on Melden & Hunt to deliver practical engineering solutions that improve public infrastructure and enhance quality of life. Our long-standing relationships with local governments are built on technical competence, responsiveness, integrity, and a commitment to exceptional client service.

Melden & Hunt is prepared to serve as an extension of the City of Edinburg's Engineering Department by providing timely, innovative, and cost-effective engineering services that support the City's Capital Improvement Program, development activities, and long-term infrastructure goals. Our experience, local presence, multidisciplinary capabilities, and commitment to meeting schedules make us exceptionally qualified to provide the professional engineering services requested under this RFQ.

This version is much stronger for the Edinburg RFQ because it directly addresses the City's requested engineering disciplines, emphasizes responsiveness and schedule adherence (30% of the evaluation), highlights the qualifications of the engineering team (40% of the evaluation), and focuses on municipal engineering support rather than predominantly roadway and bridge design.

Project No. 1

Client's Name: Hidalgo County Drainage District No. 1
Type of Organization: Special District
Address: 902 N. Doolittle Road, Edinburg, Texas 78542

REFERENCES

Melden & Hunt, Inc. has built long-standing relationships with municipalities, water supply corporations, irrigation districts, counties, and state and federal agencies throughout South Texas by consistently delivering responsive, high-quality engineering services. Our clients rely on us for our technical expertise, timely project delivery, proactive communication, and commitment to providing practical, cost-effective solutions.

Our references represent a diverse portfolio of municipal engineering assignments, including capital improvement programs, roadway and drainage improvements, water and wastewater infrastructure, utility relocations, subdivision development, grant-funded projects, construction administration, and on-call engineering services. These clients can attest to our ability to meet schedules and deadlines, provide responsive service, effectively coordinate with regulatory agencies and stakeholders, and successfully manage projects from planning through construction.

The references included in this Statement of Qualifications have first-hand knowledge of our firm's performance and can speak to our professionalism, technical competence, reliability, and dedication to serving the needs of local governments. We are proud of the long-term relationships we have developed and believe they reflect Melden & Hunt's commitment to delivering exceptional engineering services and becoming a trusted extension of our clients' staff.

Melden & Hunt welcomes the opportunity for the City of Edinburg to contact any of the listed references regarding our qualifications, project experience, responsiveness, and overall performance. We are confident they will confirm our reputation for delivering quality engineering services on time, within budget, and in a manner that consistently exceeds client expectations.

INSURANCE

Melden & Hunt, Inc. fully understands the insurance requirements outlined in the City of Edinburg's Request for Qualifications and maintains insurance coverage that meets or exceeds the required limits for professional engineering services. We carry comprehensive General Liability, Professional Liability (Errors and Omissions), Automobile Liability, and Workers' Compensation insurance through financially sound and reputable insurance carriers.

Our firm has successfully maintained the insurance requirements necessary to perform engineering services for municipalities, counties, state agencies, and federally funded projects throughout Texas. Upon selection, Melden & Hunt will provide certificates of insurance naming the City of Edinburg as an Additional Insured, where required, and will comply with all insurance provisions contained in the Professional Services Agreement.

Melden & Hunt has an excellent risk management program and a strong history of safe project delivery, allowing us to maintain continuous insurance coverage while protecting the interests of our clients, employees, and project stakeholders. We are fully prepared to satisfy all insurance requirements for the duration of the contract and any subsequent task orders issued by the City of Edinburg.

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: **1741737959500**
Approval Date: **December 14, 2023**
Scheduled Expiration Date: **December 14, 2027**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

MELDEN & HUNT, INC

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **December 14, 2023**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day to day management, operational control, business location) provided in the submission of the business; application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

PROFESSIONAL SERVICE AGREEMENT

Melden & Hunt, Inc. has reviewed the City of Edinburg's Professional Services Agreement and fully understands the contractual requirements, responsibilities, and obligations associated with providing on-call professional engineering services. We acknowledge the terms and conditions outlined in the Agreement and are prepared to execute the contract upon selection, subject to the successful negotiation of project-specific scopes of work and compensation in accordance with the Texas Professional Services Procurement Act.

Our firm has extensive experience entering into professional services agreements with municipalities, counties, water districts, state agencies, and federal funding agencies throughout Texas. We understand the importance of complying with contractual requirements related to insurance, indemnification, record retention, project documentation, regulatory compliance, and professional standards of care.

Melden & Hunt confirms that we are capable of meeting the insurance requirements identified in the Agreement and will provide all required certificates of insurance and supporting documentation prior to the commencement of services. We are committed to maintaining open communication, delivering responsive service, and performing all engineering services in accordance with applicable federal, state, and local regulations, as well as the highest standards of professional practice.

Should Melden & Hunt be selected, we are prepared to promptly execute the Professional Services Agreement and begin providing engineering services as an extension of the City of Edinburg's Engineering Department. We look forward to establishing a collaborative, long-term partnership focused on delivering quality infrastructure improvements that support the City's continued growth and success.

CONTACT INFORMATION

Melden & Hunt, Inc. has designated experienced professionals to serve as the City's primary points of contact throughout the duration of this contract. Our management approach emphasizes accessibility, responsiveness, and timely communication to ensure the City of Edinburg receives prompt attention for every assignment, regardless of size or complexity.

Our designated contacts are authorized to coordinate engineering services, assign qualified personnel, monitor project schedules, respond to City requests, and provide the leadership necessary to successfully deliver projects in accordance with the City's expectations. Together, they provide the technical expertise, management experience, and continuity needed to support the City of Edinburg's Engineering Department.

The contact information for Melden & Hunt, Inc. is provided below:

Primary Contact
Mario Reyna, P.E.
Principal-in-Charge
Melden & Hunt, Inc.
115 W. McIntyre Street
Edinburg, Texas 78541
Office: (956) 381-0981
Email: mario@meldenandhunt.com

Secondary Contact
Ruben James De Jesus, P.E., R.P.L.S.
Project Engineer & Registered Professional Land Surveyor
Melden & Hunt, Inc.

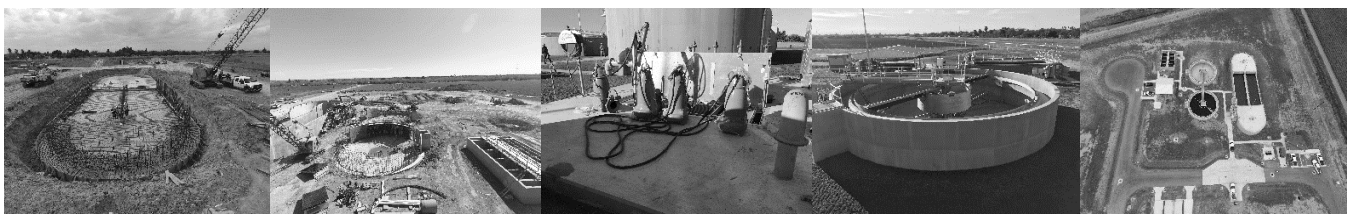
Edinburg, Texas 78541
Office: (956) 381-0981
Email: ruben@meldenandhunt.com

Melden & Hunt is committed to maintaining open communication and providing responsive, dependable engineering services throughout the term of the agreement. With our office conveniently located in Edinburg, our team is readily available to attend meetings, conduct site visits, respond to project needs, coordinate with City staff, and provide timely technical support. Our local presence enables us to serve as a true extension of the City of Edinburg's Engineering Department by delivering accessible, reliable, and high-quality engineering services whenever they are needed.

WE LISTEN. WE ENGINEER. WE DELIVER.

It is our sincere hope that the dedication, responsiveness, and technical excellence reflected in Melden & Hunt, Inc.'s longstanding commitment to municipal engineering demonstrate the level of professional service we are prepared to provide the City of Edinburg. For decades, Melden & Hunt has had the privilege of partnering with the City on numerous infrastructure initiatives, establishing a trusted working relationship founded on collaboration, technical excellence, and a shared commitment to serving the community. This long-standing partnership has provided our team with a thorough understanding of the City's engineering standards, infrastructure systems, development processes, and long-term capital improvement objectives.



At Melden & Hunt, Inc., our goal is to bring the full strength of our multidisciplinary engineering team—supported by more than 79 years of service to communities across South Texas, advanced technical resources, and innovative engineering solutions—to assist the City in planning, evaluating, designing, and implementing infrastructure improvements that support continued growth and enhance the quality of life for its residents.

Our team has extensive experience delivering a broad range of municipal engineering services, including street and pavement improvements, utility infrastructure, water and wastewater systems, drainage and flood mitigation, hydrology and hydraulics, capital improvement planning, construction administration, development review, and grant-funded infrastructure projects. We understand the importance of providing timely, practical, and cost-effective engineering solutions while maintaining close coordination with City staff, regulatory agencies, utility providers, developers, and the public.

Melden & Hunt, Inc. is uniquely qualified to serve as an extension of the City of Edinburg's Engineering Department by providing responsive, on-call engineering support for projects of all sizes. Our long history of serving the City, combined with our local presence and familiarity with its infrastructure, operational needs, and regulatory environment, enables us to respond quickly and effectively while consistently delivering high-quality engineering services. We remain committed to providing innovative, sustainable, and fiscally responsible solutions that support the City's continued growth and success.

We value the confidence the City of Edinburg has placed in Melden & Hunt throughout our longstanding professional relationship and appreciate the opportunity to continue serving the community. Our experienced professionals are committed to building upon that legacy through exceptional client service, sound engineering judgment, and dependable project delivery. We look forward to continuing our partnership with the City and contributing to the successful implementation of its capital improvement program and ongoing engineering initiatives for many years to come.

Mario Reyna, P.E.
President

Edinburg, TX 78539

RE: Request for Qualifications RFQ 2026-7 – Professional Engineering Services

Dear Mr Hinojosa,

META Engineering LLC is pleased to submit our Statement of Qualifications for Professional Engineering Services. We welcome the opportunity to support City of Edinburg by providing comprehensive engineering services, including preliminary and final design plans and specifications, along with interim and final construction inspections.

Our submittal reflects our commitment to delivering high-quality, cost-effective solutions that align with the City's goals, budget, and schedule. We understand the importance of public works improvements and are fully prepared to assist the City in achieving durable, community-focused infrastructure outcomes.

- META Engineering meets all Texas licensing requirements (TBPE Firm No. F-22397) and employs multiple licensed professional engineers in Texas.
- META Engineering has had no record of substandard work within the past five years.
- META Engineering has not engaged in any unethical practices within the past five years.

Over the past two years, META Engineering has completed a range of planning and design water projects for Maxwell Special Utility District and East Central Utility Districts. All projects are led directly by our firm's principals, Project Manager Miguel Sanchez, PE, MBA, and Design Manager John Salazar, PE, CFM, ensuring responsive communication, technical oversight, and attentive service throughout each assignment.

We appreciate the opportunity to present our qualifications and look forward to the possibility of working with City of Edinburg on this important initiative. Thank you for your consideration.

Sincerely,

Miguel Sanchez, PE, MBA, Principal,
META Engineering, LLC
Email: msanchez@meta-engr.com
(210) 838-8585

Design Services: Planning Through Construction

SECTION 2 - FIRM QUALIFICATIONS & EXPERIENCE

META Engineering LLC (META), is registered with the Texas Board of Professional Engineers (TBPE) under F-22397. Founded in 2021 and based in Helotes, TX, META specializes in general civil engineering services, including roadway, traffic, drainage, and utilities design. With five years of experience, META is committed to delivering high-quality engineering solutions.

Vision Statement

META's goal is to create transformative solutions that go beyond technical service requirements, aiming to deliver lasting benefits to our communities, clients, and stakeholders. We desire to be a "user-friendly" company, providing clear, informative communication and quality work.

Firm Leadership

Co-founded by Miguel Sanchez, PE, MBA, and John Salazar,PE, CFM, META benefits from their extensive experience and leadership in design and the public sector experience, respectively. Miguel Sanchez brings over 26 years of focused expertise in roadway, traffic and utility design, while John Salazar contributes over 30 years of invaluable experience gained from various roles within the public sector in development services, stormwater, and utilities.

Our proposed PM, Miguel Sanchez, PE, MBA, brings over 27 years of experience in design and management of street and roadway projects which includes 10 years of municipal project designs, including design of over 60 street and road projects. Miguel will be supported by our design manager, John Salazar, PE, CFM, is also a certified floodplain manager with floodplain and **design review experience on over 100 projects** within the Central and South Texas area. His experience also includes over four years of utility design and design review of water and wastewater projects for the San Antonio Water System. John is a hands-on manager and will lead META's team of multiple professional engineers, engineers-in-training and design technicians. Together, Miguel, John and their senior engineers have design and managed **over 400 projects** in the South Texas region.

META's Unique Expertise in the Community Funding Grant (CFG) Processes Application through Construction:

META has extensive experience with the CFG processes, having successfully supported various municipalities and organizations throughout the entire project lifecycle. META has worked with Federally and State funded projects. META staff are familiar with Federally and State funded grant applications and can assist with application writing and exhibits. Our expertise covers all aspects of CFG-funded projects, from community applications to final construction:

1. **Community Application**: META is highly skilled in preparing and submitting CFG funding applications, ensuring full compliance with local, state, and federal guidelines. We meticulously prepare documentation and provide technical guidance to ensure projects meet CFG eligibility criteria. META's principal, John Salazar, PE, CFM, brings his extensive public agency experience (including work with SAWS, the City of San Antonio, and TxDOT) to help communities navigate the application process and secure funding. John Salazar utilizes his background to identify and assess community needs effectively.
2. **Project Approval Process**: META excels in guiding projects through the approval process, collaborating with local and state agencies to meet all regulatory requirements. We assist with environmental reviews, public notices, and other necessary documentation for CFG compliance. For example, we are currently working with the City of Niederwald and Pine Island to ensure their project is in line with community needs and receive timely approval. Our team completed a comprehensive feasibility study, evaluated the city's infrastructure needs, and identified several viable alternatives. We also created project location maps, typical sections, and developed construction cost estimates in compliance with

CFG budget guidelines. META is prepared to support City of Edinburg with services like project identification, application assistance, grant writing, and project design.

3. **Design**: Our engineering team is experienced in designing projects that meet CFG requirements. We follow our established project management processes (outlined in our MANAGEMENT OF PROJECT section) to deliver cost-effective, sustainable, and compliant designs tailored to the specific needs of the community. Our designs maximize the impact of CFG funding while ensuring thorough documentation for federal and local reviews. For design and construction, we adhere to the activities outlined in our "Work Plan", ensuring every phase is completed efficiently and in compliance with CFG standards.
4. **Construction**: META oversees the construction phase by managing the procurement process and ensuring adherence to project budgets, schedules, and quality standards. Our team provides construction management and inspection services to guarantee that projects are completed on time, within budget, and in full compliance with CFG requirements. We ensure all projects meet federal labor standards, environmental regulations, and other relevant laws.

Project Design Experience with Federal and Grant Programs

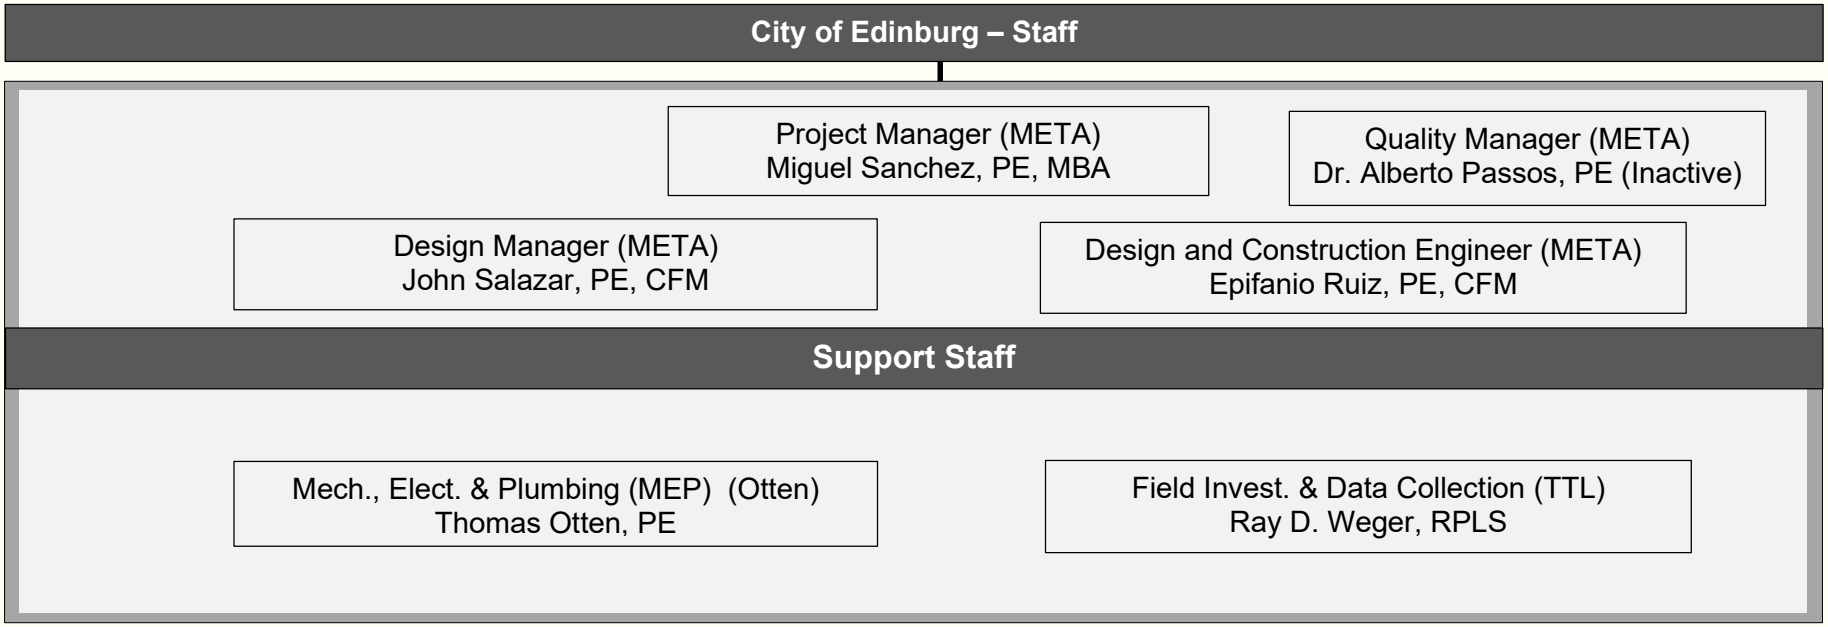
With our comprehensive experience across all stages of the CFG process, META is well-equipped to support clients at every phase. Our commitment to compliance, transparency, and community involvement ensures that each project delivers lasting value for the communities served.

Location of Office to Perform Work:

In the State of Texas, META Engineering has 2 offices in Houston and Helotes. META Engineering continuously performed engineering services for cities throughout the state. META Engineering is poised to provide the City of Edinburg with engineering (and additional) services. The office to perform proposed work is:

META Engineering, LLC
13438 Bandera Rd, #104
Helotes, TX 78023
(210) 874-6666 (office)

TECHNICAL RESOURCES



META Engineering offers comprehensive technical resources to support transportation, site development, and public infrastructure projects. Our team is equipped with advanced CAD and GIS software, enabling efficient and precise design, modeling, and analysis. Key platforms include *MicroStation*, *ConceptStation*, *LumenRT*, and *OpenRoads* for roadway and site design, with additional capabilities in drainage and utility modeling through *OpenRoads Drainage and Utilities*, *StormCAD, FlowMaster, and CulvertMaster*. We utilize *ArcGIS* for geospatial analysis, *HEC-HMS and HEC-RAS* for hydrologic and hydraulic modeling. Project scheduling and coordination are managed with *Microsoft Project*, ensuring timely and organized project delivery.

Experience with Federal and Grant Programs

Client	Project Name
City of Niederwald	Schubert Road Reconstruction – TxCDBG (current)
Town of Pine Island	Porter Road Low Water Crossings - TxCDBG (current)
City of Laredo	Los Altos Colonia - EDAP Water and Sewer Project
City of Laredo	Laredo Ranchettes Colonia - EDAP Water and Sewer Project
City of Laredo	Ranchitos 359 East Colonia - EDAP Water and Sewer Project
City of Laredo	D-5 Acres Colonia - EDAP Water and Sewer Project
City of Laredo	Old Milwaukee Colonia - EDAP Water and Sewer Project
City of Laredo	Tanquecitos I and II Colonias - EDAP Water and Sewer Project
Webb County	Rancho Penitas West Colonia – Street Construction
Webb County	Rancho Penitas West Colonia – EDAP Water and Sewer Project
Webb County	Webb County Regional Water Plan Study
Webb County	Webb County Border Stations

SECTION 3 - ORGANIZATIONAL CHART

Our Project Manager, Miguel Sanchez, PE, MBA will lead a multi-disciplined project team. META has assembled a highly experienced team to develop this project. Our team has over 120 years of experience, our leaders have an average of 27 years of experience in their respective fields. Each member of our team was selected for their expertise and years of experience to deliver a successful service while meeting your expectations.

Prime Office Location
META Engineering, LLC
13438 Bandera Rd, Ste. 104
Helotes, Tx 78023
Phone: (210) 874-6666

Sub Consultant Office Location
Otten Engineering
7910 Shady Hollow San Antonio,
Texas 78255

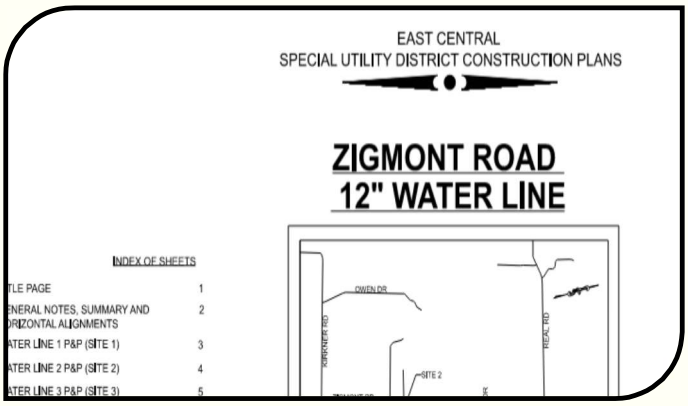
Sub Consultant Office Location
TTL, Inc.
17215 Jones Maltsberger Rd. #101
San Antonio, Texas 78247
Phone: (210) 560-3685

SMALL BUSINESS CERTIFICATION: South-Central Texas Regional Certification Agency (SCTRA) NO. 221035972 ESBE, HABE, MBE, SBE, HUB, DBE



SAM DATA:
META has not been disbarred from the SAM System.
Unique Entity ID: LBLFKZKRUPE6
Account name: META LLC.

Adequacy of Resources:

Each task lead member of our team is supported by multiple Engineers-in-Training, Design Technicians and Administrative Support staff to ensure responsive and quality deliverables.

SECTION 3 - META'S RELEVANT EXPERIENCE

East Central SUD 12" Water Lines at Zigmont Road Low Water Crossings (2025-2026)

META served as a subconsultant to Gallegos Engineering, Inc., Engineer for East Central SUD, providing PS&E design services for water system improvements along Zigmont Road. The project replaces existing 6-inch waterlines with a 12-inch waterline at three low-water crossings. META developed plan and profile sheets for a 16-inch water distribution line, calculated earthwork quantities, and determined bore pit locations at roadway crossings.

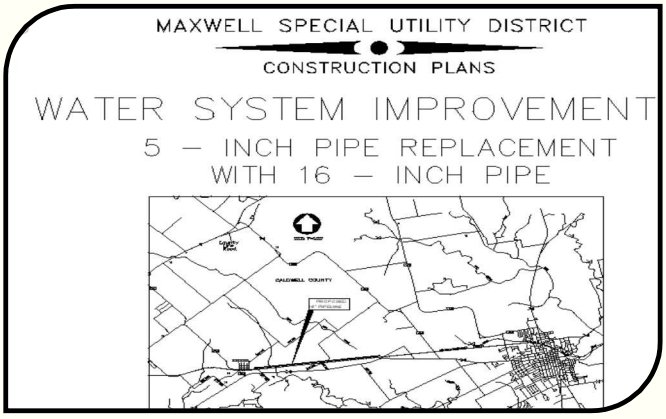
META prepared the project SW3P, gate valve details, thrust blocks, bore pit and blow-off valve details, fire hydrant locations, and encasement details. Additional services included preparation of a construction cost estimate and identification of a required 25-foot construction easement to accommodate construction access for equipment and personnel.

META coordinated closely with the drainage and low-water crossing designers to ensure adequate cover relative to channel grading and construction, and with roadway consultants to integrate the waterline improvements into Bexar County's Zigmont road plans. The project was completed on an accelerated four-week design schedule and is 100 percent complete in January 2026. Construction cost is estimated at $400k and is anticipated to begin in April 2026.

Agencies coordinated with during the project included East Central SUD, TWDB, TCEQ, Bexar County, and the roadway design consultants.

Contact for both projects: Richard Gallegos, PE, Gallegos Engineering, Inc., rg@gallegoseng.com *(210) 341-6200*

Maxwell SUD - Yarrington Rd Pump Station (2025-2026)



META has served as the subconsultant for the planning and design firm to Gallegos Engineering, Inc (Maxwell SUD Engineer). META Engineering LLC is currently leading the design of a new $1.5M pump station and waterlines to serve the existing Yarrington Road Water Tower. The scope includes planning and civil design of the pump station facility, chemical room, and eye wash station, along with preparation of a detailed construction cost estimate. The pump station will connect to existing infrastructure via a 12-inch water line and include provisions for reliable operation such as a gas generator, construction access, and a three-phase transformer connection.

META is coordinating with the MEP design team to integrate pump systems, electrical connections, and mechanical requirements, and is working directly with Mansfield Pump to confirm proper pump and skid selection consistent with project performance criteria. Survey services were provided by Do-Rite Engineering LLC, including identification of easements, title research, and establishment of construction right-of-way boundaries to ensure property constraints are fully incorporated into the design.

The project emphasizes proactive coordination, QA/QC, and clear communication with stakeholders and is anticipated to be complete in February 2026.

Agencies Coordinated With: MSUD, TWDB, TCEQ, City of San Marcos, and Hays County

Water Lines: 16" Water Line Replacement for Maxwell Special Utility District (SUD) (2025)

META has served as an On-Call firm to Gallegos Engineering, Inc (Maxwell SUD Engineer). As a subconsultant, META created the PS&E plans for replacing an existing 5" water line with a 16" water line. The team developed plans and profiles for the 6600 LF of 16" water distribution line, calculated earthwork quantities, and determined the locations for bore pits. Additionally, META designed the project's SW3P plans, gate valve details, thrust blocks, bore pit and blow-off valve details, fire hydrant locations, and encasement details. META also prepared a construction cost estimate and identified the need for a 25-foot construction easement to allow access for equipment and personnel. Other design tasks included determining required construction easements and utility easements including identifying locations for bore equipment and receiving pits at private driveways and roads. META is 95% complete with the design, which is expected to be finalized by February 2025. Construction is slated for completion by October 2025. The project will enhance the water distribution system's capacity and reliability for Maxwell SUD. Once completed, the improved infrastructure will provide long-term service to the community while meeting current and future demands. META's expertise and attention to detail will ensure the project is completed on schedule and within budget, benefiting both Maxwell SUD and the local residents.

Contact: Richard Gallegos, PE, Gallegos Engineering, Inc. for Maxwell Special Utility District, rg@gallegoseng.com (210) 341-6200

Traffic Design: Military Drive – from Warren HS to Rapla Crossing, City of San Antonio (2025)

As a subconsultant to CONSOR, META led the traffic design team for the PS&E plans, which included signing, pavement markings, and school zone traffic signals. The project involves extending the existing four-lane roadway section of Military Drive from Warren HS to Reed Road to accommodate growing local traffic. META conducted site visits to assess current conditions and explore options for bicycle and pedestrian paths. Additionally, META designed the street and intersection pavement markings to meet Texas MUTCD standards and City of San Antonio Design Standards. As part of the design, META developed a new traffic signal to replace the existing school zone signal, incorporating solar panels, a backup battery, and flashing overhead signals near the Warren HS school zone. META also designed sidewalks, including a shared-use path with bicycle signage and pavement markings. This project is set for completion in May 2025, with estimated construction costs of $11.5M. META ensured the designs align with future transportation needs while improving safety for both pedestrians and cyclists. Our team also worked closely with local agencies to ensure traffic signal timing and coordination are seamlessly integrated with adjacent intersections. These enhancements will not only reduce congestion but also provide safe and accessible routes for students at Warren High School and local commuters.

Contact: David Rios, CONSOR Engineers, Project Engineer, (210) 985-2736

david.rios@consoreng.com

Traffic Control and Sidewalks: SH 16 Reconstruction, TxDOT (2022), Helotes, TX

As a subconsultant, META Engineering provided traffic control plan design services to improve traffic flow through a highly congested corridor in northwest Bexar County. Leading the traffic control PS&E effort, META redesigned traffic control and detour plans to optimize construction sequencing and minimize disruptions to motorists.

The project scope included a detailed site and barrier assessment to update existing traffic control plans along the corridor from Cedar Trail to FM 1560. META evaluated each intersection and developed custom barrier layouts that maintained adequate sight distances and ensured uninterrupted access to State Highway 16 for Helotes area residents.

A key challenge was accelerating the construction schedule without compromising safety. META's innovative solution involved redesigning the median barrier system by replacing standard barriers with taller, reinforced options. This modification allowed the contractor to stage materials and remove excavated earth within the median, eliminating the need for frequent lane closures. As a result, the project realized significant cost savings and shortened the construction timeline by three months while maintaining safe, continuous traffic flow during peak periods.

Design work was completed using MicroStation and OpenRoads for plan production, with traffic control layouts developed in compliance with TxDOT standards and the Texas Manual on Uniform Traffic Control Devices (TxMUTCD). CAD tools ensured precision and constructability throughout the design process.

All deliverables underwent META's rigorous Quality Assurance and Quality Control (QA/QC) process, including multi-level peer reviews to verify accuracy, safety compliance, and adherence to client and regulatory requirements.

Contact: Clinton Witherell, Dan Williams Co., (210) 854-0319 cwitherell@danwilliamscompany.com

Downtown Improvements: Griner Street and Sidewalk Construction for City of Del Rio (2024)

As the Prime Consultant, META Engineering led the development and design of the PS&E for Griner Street and its sidewalks, encompassing 3,700 linear feet of roadway, traffic control plans, and detour designs. META conducted a comprehensive site assessment to define the project scope and developed improvements for both sidewalks and pavement along Griner Street, from Ogden Street to Nicholson Street. The design focused on enhancing pedestrian flow and connectivity within downtown Del Rio.

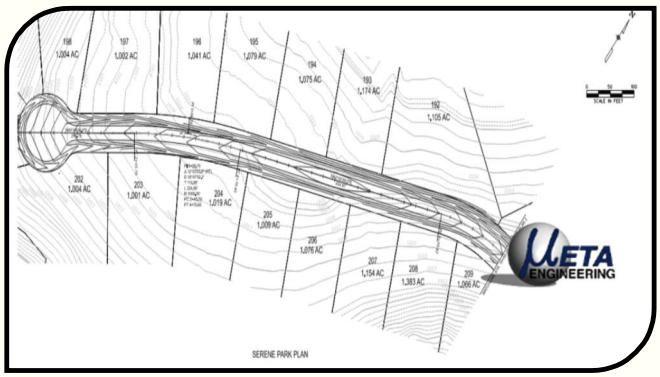
During site visits, META evaluated existing sidewalk and driveway conditions, identifying sections requiring pavement reconstruction. This assessment resulted in the exclusion of recently constructed sidewalks from the project scope, generating approximately $200,000 in construction cost savings for the City of Del Rio. Additionally, META applied value engineering strategies by optimizing pavement designs and material selections to reduce construction costs while maintaining long-term durability and performance.

META collaborated closely with the City to obtain GIS data on existing utilities, including gas, water, sewer, and electric systems, and managed utility coordination to address necessary adjustments to manholes, water valves, and meters throughout the project area.

META's PM and Design Manager worked in partnership with TxDOT to resolve issues related to localized work within the State's right-of-way. The design phase was completed on schedule in August 2024. Construction costs were estimated and competitively bid at $1 million. This project supports the revitalization of downtown Del Rio by improving pedestrian infrastructure and enhancing connectivity for residents and visitors alike.

Contact: Greg Velazquez, City of Del Rio Public Works Director, (830) 774-8535, gvelazquez@cityofdelrio.com

Strickland Street and Sidewalk Improvements City of Del Rio, TX (2023)



As the Prime consultant, META developed and designed sidewalk PS&E plans to address the construction 3,300 LF of sidewalks, pavement improvements, and utility adjustments on Strickland Street from Nicholson Street to Griner Street. META conducted a thorough site and roadway assessment to create the project's curb and sidewalk plans. The assessment revealed that the existing sidewalks did not meet ADA standards due to issues such as cross-slopes, inadequate sidewalk widths, and lack of continuity. META provided rehabilitation recommendations to improve pedestrian access, including the installation of ADA ramps and proper driveway tie-ins. Utility coordination was also a key component of the design, and META identified necessary adjustments to manholes, water valves, and meters throughout the project. Site visits were conducted to verify existing survey features, including sanitary sewer cleanouts, power poles, gas meters, and water valves. META also evaluated drainage conditions along the new curb and gutter locations to ensure proper drainage flow.

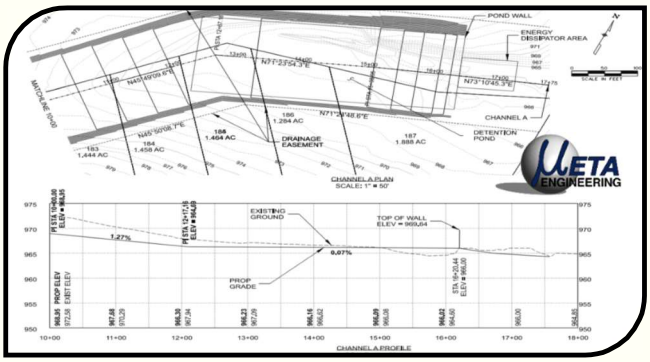
In addition, META designed with future accessibility in mind, ensuring it would accommodate the growing demands of pedestrians and vehicles in the area. The design was completed in January 2024, with construction costs estimated and bid at $1M. The final improvements will enhance safety, accessibility, and connectivity for the residents south of downtown and for local commuters along the residential street in Del Rio.

Contact: Greg Velazquez, City of Del Rio Public Works Director, (830) 774-8535, gvelazquez@cityofdelrio.com

Serene Park Street Construction (2021) Comal County, Texas

As a subconsultant on this $700,000 project, META Engineering prepared the PS&E plans for 2,200 linear feet of Serene Park Street, including cul-de-sac layout, roadside drainage ditch design, and drainage easement development. The scope also included designing drainage profiles and cross-culvert structures throughout the project limits. All work was completed in accordance with Comal County roadway and drainage standards.

META produced detailed street and drainage ditch plans and profiles, calculated earthwork quantities, and prepared Storm Water Pollution Prevention Plans (SW3P). The team coordinated drainage easements to ensure adequate right-of-way and effective long-term water conveyance.



As part of the design process, META implemented value engineering strategies to reduce construction costs and enhance constructability. This included optimizing ditch slopes and cross-structure locations to reduce excavation, minimize utility conflicts, and streamline construction sequencing, without compromising hydraulic performance.

Construction was completed in May 2024 with no change orders issued due to design errors or omissions. META's attention to detail and proactive design approach ensured effective stormwater management, reduced flood risk, and long-term system efficiency.

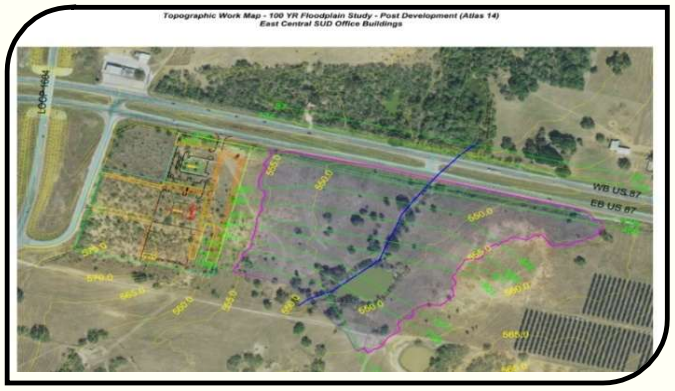
The project's successful delivery reflects META's commitment to quality, regulatory compliance, and delivering cost-effective infrastructure solutions that meet the needs of both the client and the community.

Contact: Richard Gallegos, PE, Gallegos Engineering, Inc., rg@gallegoseng.com *(210) 341-6200*

Serenity Pass and Serene Park Streets including Drainage and Detention Pond Designs (2021) Comal County, Texas

As a subconsultant on this $300,000 project, META Engineering prepared the PS&E plans for Channel A within the Serenity Oaks Subdivision. The scope included 1,800 linear feet of channel grading, drainage design, detention pond layout, and the development of drainage easements through the subdivision. All design work was completed in accordance with Comal County standards.

META developed detailed plans and profiles for the channel system, calculated earthwork quantities, and designed the subdivision's comprehensive drainage network. Storm Water Pollution Prevention Plans were also prepared to address construction-phase runoff and sediment control.



To optimize constructability and reduce costs, META applied value engineering principles, refining channel geometry and grading to reduce unnecessary excavation while maintaining drainage performance. These design refinements contributed to construction cost efficiency without compromising functionality.

The project was delivered on time and within the allocated budget, with construction completed in May 2024 and no change orders issued. All deliverables underwent META's internal quality assurance and quality control (QA/QC) process, including multidisciplinary peer reviews to ensure compliance with county standards and to maintain design accuracy and constructability.

META's thorough and efficient design ensured optimal stormwater management, minimized flood risk, and supported the long-term resilience of the subdivision's drainage infrastructure.

Contact: Richard Gallegos, PE, Gallegos Engineering, Inc., rg@gallegoseng.com (210) 341-6200

Drainage Conveyance for East Central Utility District (Drainage Study) (2023)

As a subconsultant, META Engineering provided engineering design services for the East Central Utility District. META's role focused on the development of PS&E for the stormwater conveyance and drainage improvements.

The project scope included a full hydrologic analysis, open channel drainage design, and preparation of drainage easement documents. The drainage conveyance system was designed in accordance with Bexar County standards to effectively manage stormwater runoff, reduce localized flooding risks, and improve long-term resilience of community infrastructure. META's design also incorporated consideration for anticipated future development within the service area, ensuring that the system provides sustainable flood mitigation benefits over time.

META designed the improvements in accordance with FEMA floodplain management criteria and Bexar County drainage standards. The team also supported the Utility District in identifying permitting requirements and contributed to the preparation of documentation for environmental clearances and regulatory approvals, streamlining the project's readiness for funding and construction.

Project deliverables included:

- Comprehensive plans and profiles for the drainage channel.
- Detailed cross-section calculations and subdivision-wide drainage layout.
- Preparation of drainage easement documents to facilitate acquisition and right-of-way coordination.
- Development of proposed channel cross sections to mitigate flood risk.

Contact: Richard Gallegos, PE, Gallegos Engineering, Inc., rg@gallegoseng.com (210) 341-6200

SECTION 3 – TEAM'S SCOPE UNDERSTANDING, QUALIFICATIONS & EXPERIENCE

META Engineering understands that CFG-funded projects require not only sound technical design but also alignment with strict programmatic and regulatory requirements established by the US Department of Agriculture (USDA) and federal oversight entities such as HUD. Our team brings extensive experience delivering municipal infrastructure improvements within the framework of CFG funding, where cost-effectiveness, timely coordination, community input, and compliance with cross-cutting federal laws are essential. Our approach emphasizes:

- Collaboration with the City and Grant Administrator throughout the project lifecycle
- Value engineering and budget-conscious design, maximizing public benefit
- Lifecycle project support, from concept through construction closeout and grant audit readiness

META Engineering understands that all services must comply with the *CFG Guidelines*, including coordination with the City's designated grant administrator. META will work collaboratively to ensure that all engineering deliverables, site plans, cost estimates, and schedules, are fully supportive of the grant application and environmental review process.

CFG Funds Application Phase

Upon receipt of written authorization to proceed, META Engineering will initiate coordination with Live Oak City to define the specific scope of the proposed project. As part of the application support process, META will:

- Meet with City representatives to assess project needs, including site-specific evaluations, survey requirements, and feasibility comparisons with similar municipal projects.
- Conduct preliminary investigations, taking into account regulatory requirements, funding constraints, and site conditions.
- Develop conceptual designs including schematic layouts, sketches, and exhibits.
- Prepare cost estimates, summary tables, and supporting documentation for inclusion in the CFG funding application.

During this phase, META will:

- Conduct a joint site visit with City staff to review existing conditions.
- Collect and assess all available data, including relevant design, regulatory, operational, and maintenance considerations.
- Provide conceptual site layouts for proposed improvements.
- Deliver a preliminary implementation schedule.

Preliminary Design Phase

META will prepare preliminary design documents, including:

- Initial drawings and outline specifications.
- Itemized construction cost estimates based on current market data (e.g., area, volume, or unit cost).
- Projected construction timelines from notice to proceed through completion.

The preliminary design will be developed in compliance with applicable codes, ordinances, and regulations. As needed, META will perform:

- Topographic and utility surveys.
- Field data collection is necessary for design development.
- Recommendations regarding the need for additional services such as geotechnical borings, materials testing, or specialized studies.
- Coordination with external testing agencies or consultants on behalf of the City, as required.

Final Design Phase

Based on the approved preliminary plans, META will prepare detailed final design documents to define the scope and nature of the construction work. These will include:

- Construction drawings and technical specifications.
- Complete bid and contract documents suitable for public advertising.
- Design elements reflecting structural, mechanical, and material specifications in compliance with all applicable requirements.

During the final design phase, META will:

- Support the City in securing required approvals from relevant regulatory agencies.
- Provide updates on cost estimates to reflect changes in design, scope, or market pricing.
- Present the final design and cost projections to City staff for review and input.

Bid Preparation and Evaluation

META will assist the City with advertising, soliciting, and evaluating construction bids. Tasks will include:

- Preparation of bid packets and contract documentation.
- Assistance with bid advertisement in local newspapers (minimum two consecutive weeks).
- Oversight of bid opening, ensuring compliance with procurement timelines.
- Preparation of bid tabulations and eligibility screening.
- Verification of bidder and supplier eligibility.
- Review of submitted bids, including subcontractor and supplier qualifications.
- Recommendation to the City regarding contract award and approval.

META will also review and evaluate any proposed substitutions submitted by bidders and provide acceptance or rejection recommendations based on project requirements.

Construction Phase

META will provide construction phase services to monitor project execution, maintain quality control, and ensure compliance with design documents. These services include:

- Periodic site visits to assess construction progress and workmanship.
- Reporting to the City on construction status and any observed deficiencies.
- Review and approval of shop drawings, test results, and materials samples.
- Evaluation of substitute materials and equipment for compliance.
- Coordination and issuance of clarifications, instructions, and interpretations to the contractor as needed.

META will review contractor pay applications and submit written recommendations for payment based on site observations and performance to date.

META's role continues after construction with assistance during project closeout, including final inspections, warranty walkthroughs, punch list resolution, and support for documentation required by CFG for project closeout and audit compliance.

Additional construction phase support includes:

- Final inspection upon notice of substantial completion.
- Preparation of a punch list of corrective items prior to final acceptance.
- Follow-up inspection to confirm completion of punch list items.
- One on-site inspection during the warranty period to assess long-term performance.

META will not authorize change orders or modify project costs without prior written consent from the City of Edinburg.

Construction Phase Services: *META's PM has managed complex construction projects and developed traffic control plans for roadway and sidewalk construction.*

SECTION 3 - MANAGEMENT OF PROJECT

Project Management Plan:

Our Project Manager, Miguel Sanchez, PE, will be the City's primary contact. He will develop a Project Management Plan (PMP) outlining the team structure, key personnel contact details, project schedule, scope of services, and budgetary controls. To ensure efficient service delivery and streamlined subconsultant management, META has assembled a compact team specifically for this project. META will collaborate with TTL, Inc., who will oversee environmental studies, geotechnical analyses, and topographic surveys. META will manage the project overall, conduct utility coordination, as well as the design of streets, and any drainage system adjustments. We are aware that there may be specific issues that are better overseen at a support/technical level rather than at the management level and we are committed to providing our Design Manager John Salazar, PE, to fill in for all technical aspects.

Communication Plan

Communication and Collaboration with City Staff:

Miguel Sanchez, PE, MBA, will adhere to META's communication plan. He will start by conducting a Client Expectations Survey (CES) to establish a record for future project communications. The communication methods and forms to be used for managing the design and addressing potential public meeting needs for this project include:

Project Communication	Status Management
Project Status Calls	✓ Bi-weekly calls with the City's as scheduled ✓ Calls adhere to an agreed-upon time limit ✓ Minutes are prepared and sent to the City for review, comments, and approval
Daily Communications	✓ Conducted via email, telephone or via WebEx/MS Teams ✓ Internal team communications occur through email, phone calls, and face-to-face meetings ✓ Communications that could impact cost, schedule, or product delivery will include the City.
Face-to-Face Meetings:	✓ To address specific project issues or concerns ✓ Scheduling based on the availability of all necessary attendees ✓ Key staff members are available for meetings concerning their project tasks ✓ Team is adept at conducting virtual face-to-face meetings

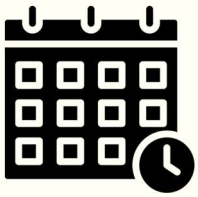
Project Deliverables

META excels at delivering infrastructure design projects on schedule through a combination of early meticulous planning, strategic resource management, and advanced project management techniques. META's project management techniques were utilized to complete projects with concurrent timelines. Listed below are examples of our firm's latest project where we have completed 100% deliverables on schedule (within 3-9 months) in the last 4 years:

For the City of Edinburg's infrastructure improvements project, META will provide plans, specifications and executed documents as determined by the Client, but typically include: Two sets of final plans and specifications during the bid process; Three sets of executed contract documents; and, One set of drawings of record. META follows the standard project implementation schedule for USDA-funded projects including specific milestone dates set forth by the funding agency.

Recent Projects Completed Within 3-9 Months	
Client	**Project Name**
City of Del Rio	✓ Strickland Rd Sidewalks and Roadway Rehab ✓ Griner St Sidewalks and Roadway Rehab (Downtown)
City of San Antonio	✓ Military Drive Pedestrian and Traffic Design
TxDOT Ft. Worth District	Traffic Design ✓ Southeast Connector Seg. 1 ✓ Southeast Connector Seg. 3 ✓ Southeast Connector Seg. 5 ✓ Southeast Connector Seg. 8
Gallegos Engineering	✓ Serene Park Street Design ✓ Serenity Pass Street Design ✓ Serenity Oaks Channel "A" and Detention Pond Design

Project Oversight and Quality Control:



META's Project Specific Quality Management Plan (PSQMP) is a critical component of our project schedule. Dr. Alberto Passos, PE, will be the quality manager to oversee the QA/QC efforts and ensure adherence to META's PSQMP. Quality assurance and control are prioritized in our workflow. We carefully review TxDOT requirements and checklists to maintain high standards. Our plan is in full alignment with TxDOT standards and is implemented in close collaboration with Live Oak City. Prior to each milestone, all administrative and technical items are thoroughly reviewed for accuracy and compliance by a seasoned senior engineer. Independent quality control reviews are conducted and documented using Bluebeam Sessions. Dr. Passos ensures that all comments are addressed and/or discussed prior to submitting deliverables at each milestone.

Availability

We staff each project with an appropriate level of experienced personnel, and ensure strong leadership to provide well-planned, reviewed, and coordinated results. All team members identified on the organizational chart will have the availability and capacity to meet the needs of the City's projects.

Within our WORK PLAN section is our proposed project schedule for typical CFG projects and can be updated based on project size, complexity and funding requirements.

Ability to Meet Schedules

Both Miguel and John are actively involved in all aspects of project execution, from initial planning through to final completion, providing consistent oversight, strategic guidance, and expert decision-making at every stage. To ensure the work is executed in a timely manner, detailed project schedules will be developed in Microsoft (MS) Project and include major and minor milestones. The schedule will be reviewed and discussed with the City to meet their needs and expectations. Weekly project meetings ensure that each member of the design team clearly understands the expectations as they pertain to the overall project schedule and project implications, should any deviations occur. In addition, each member will be committed to meeting the established schedule.

We identify critical path items first and continually monitor progress of all scheduled items. If a challenge develops, we identify it early and resolve it before it detrimentally impacts the schedule. The team's sole responsibility is tracking and accountability of schedule and cost issues. The assessment schedule prepared will show all key submittal dates in accordance with the proposed phasing.

Timely Completion of Designs:

META understands that the CFG of the USDA projects require on time completion for funding approval, META is dedicated to completing projects on time and within budget. To ensure that tasks and scope deliverables are executed and finalized according to schedule, META will implement a comprehensive project management plan, work breakdown structure, and project schedule.

Our approach includes:

- Create a milestone schedule for each team member to track progress.
- Follow the project work plan to meet all milestones.
- Share the proposed schedule with the entire design team.
- Conduct weekly project meetings with the design team and report progress to Live Oak City.
- Maintaining a list of action items to ensure the project stays on track.
- Anticipate conflicts and address potential design conflicts to avoid schedule delays.

Preliminary Engineering:

Data Collection: TTL's surveyor, Ray Weger, RPLS, will gather ROW maps, utility records, hydrologic/hydraulic studies, aerial imagery, and environmental assessments. Site visits will document topography, ROW limits, and existing utility locations, allowing for existing conditions analysis and alternative development. This information, combined with publicly available information, will allow us to get started on existing conditions analysis and the development of alternatives. Additional surveys will be conducted where necessary to finalize the base map for design, with a focus on cost-efficient data collection that meets CFG procurement standards.

Utility Coordination: META's Design Manager John Salazar, PE will conduct early utiltiy coordination which consist of coordinating with TTL to identify and map existing utilities. John will assess potential conflicts between streets, sidewalk design and existing utilities. A utility matrix will be developed to track and resolve conflicts before construction, ensuring a streamlined approval process and compliance with CFG program regulations. John will also oversee the plan design development during the PS&E phase.

Environmental: If necessary, our team member TTL will review other studies performed for projects in the vicinity to determine if environmental constraints are expected to be a major factor.

Geotechnical studies: If necessary, TTL's Amit Bakane, PE will obtain geotechnical data for the project at locations specified by the design team and will perform geotechnical investigations, including soil samling and testing , to assess soil properties, stability, and drainage characteristics. TTL will aslo analyze subsurface conditions to determine approapriate foundation design and potential challenges with any expansive soils. TTL will provide recommendations for structure foundations, pavement design, sidewalks, and traffic signal

foundations. All recommendations will align with CFG program specifications.

Intermediate and Final Design Phase:

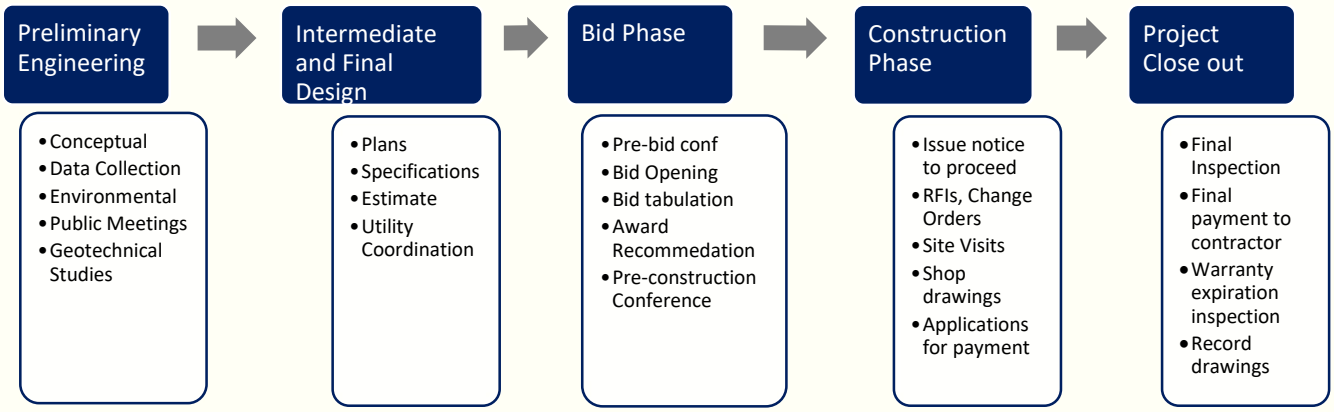
Plans, Specification and Estimate: META's design manager, John Salazar, PE and design engineer, Epi Ruiz, PE, CFM, will lead META's design team to ensure that the infrastructure designs adhere to:

- CFG Program Guidelines
- Americans with Disabilities Act (ADA) Standards
- Texas Water Development Board (TWDB) Regulations
- Texas Department of Licensing and Regulation (TDLR) Requirements
- Texas Commission on Environmental Quality (TCEQ) Guidelines
- Local City and Municipal Codes

During the design phase, the team will ensure that the proposed geometric alignments provide safe access to neighboring properties while facilitating the construction of necessary infrastructure. Plan sheets, typical sections, and cross-sections will be prepared and submitted at each project milestone. Drainage conditions will be analyzed to prevent localized flooding and ensure long-term sustainability.

Cost Estimation:

META will prepare construction cost estimates before each milestone, leveraging historical bid pricing to ensure compliance with CFG procurement rules.



Bid Phase:

During the bidding process, META personnel will be available to address any questions or concerns from contractors, ensuring clarity and facilitating a smooth procurement process. Once the contract is awarded, our team will organize bi-weekly progress meetings to track the project's status, identify potential issues, and keep the project on schedule. These meetings will offer a platform for real-time communication, promoting efficient problem-solving and collaboration.

Construction Phase:

TTL's Construction Services Manager, Steve Casanova, CET, will oversee construction observations, materials testing, and field/laboratory tests for soils, concrete, and structural verifications throughout the project. Steve's extensive experience in construction management ensures that all aspects of construction are monitored to meet the highest standards for quality and safety. META will provide comprehensive construction phase services as required by the City of Edinburg, ensuring a seamless transition from design to implementation.

In addition, META will handle all requests for information promptly, ensuring that contractors receive timely responses to maintain project momentum. The team will also coordinate and process any necessary change orders, review shop drawings, and recommend approval for monthly payment requests. META will work closely with the City of Edinburg staff to ensure the project is executed according to the plans and specifications, addressing any adjustments needed along the way. This thorough approach to construction management will ensure the project progresses smoothly, meets all quality standards, and is completed within the agreed-upon timeline and budget.

META Staff: Delivering Excellence Across 400+ End-to-End Roadway, Utility, Drainage and General Civil Engineering Projects

4. REFERENCES

Below, you'll find the most recent references for META Engineering, where both Project Manager Miguel Sanchez, PE and Design Manager John Salazar, PE, CFM worked with these clients:

Client:	Scope of Services:
Kiewit – Fort Worth Joe Chang, P.E. joe.chang@kiewit.com (303) 269-3121	From 2022–2024, META Engineering provided traffic control design for Kiewit on TxDOT's Southeast Connector, including detours, temporary signage, 3D retaining walls, ramp designs and QA/QC design review services.
Subconsultant to: Gallegos Engineering, Inc. Richard M. Gallegos, P.E. rg@gallegoseng.com (210) 641-0812 Client: Maxwell SUD Anthony Garza Anthony@maxwellsud.com (512) 357-6253	From 2021–Present, META Engineering provided engineering services to East Central Utilities Service District, and City of Maxwell's engineer (Gallegos Engineering) & private developers, providing site plan reviews, utility designs, roadway designs, TxDOT permit coordination, sight distance studies, grading reviews, drainage design, & floodplain studies.
City of Del Rio Greg Velazquez, PW Director gvelazquez@cityofdelrio.gov (830) 774-8535 (office)	Since 2023, META Engineering has served as prime contractor for the City of Del Rio, providing street & drainage design for the Griner & Strickland Street overlays, including PS&E development & coordination with utilities, public works, & TxDOT.
Kiewit – Fort Worth Louis Anderson, P.E. 1876LHA_hernanderson777@comcast.net (702) 703-4031	From 2022–2024, META Engineering provided Quality Assurance/Quality Control review for Kiewit on TxDOT's Southeast Connector, including detours, temporary signage, 3D retaining walls, ramp designs and traffic design services.
City of Del Rio Luis Mireles, Project Manager luis.mireles@cityofdelrio.gov (830) 774-8535 (office)	Since 2023, META Engineering has served as prime contractor for the City of Del Rio, providing street & drainage design for the Griner & Strickland Street overlays, including PS&E development & coordination with utilities, public works, & TxDOT.

SECTION 6 - PROFESSIONAL SERVICES AGREEMENT –

Statement of Agreement META Engineering, LLC affirms that it has thoroughly reviewed the City's Professional Services Agreement and acknowledges all terms and conditions contained therein. The firm confirms that it meets, and will maintain, all prerequisite insurance requirements specified in the Agreement. If selected, META Engineering agrees to enter into the Professional Services Agreement and proceed in full compliance with its provisions.

SECTION 7 - FIRM CONTACT INFORMATION

META Engineering's owners serve as hands-on project managers, ensuring direct accessibility and responsive communication throughout every assignment.

RFQ

Request for Qualifications
"Professional Engineering Services"
RFQ# 2026-7

Dear City of Edinburg,

The City of Edinburg is looking for the most qualified engineering firm to provide Professional Engineering Services for the City of Edinburg. Millennium Engineers Group, Inc. (MEG) is that firm. We believe that MEG is the right choice for the City of Edinburg based on the following:

History of Stability and Strong Texas Presence

MEG is a locally owned corporation that has never been sold, acquired, or merged with other entities. We are confident that the people and company you see today will be the people and company you see for the life of your projects. Furthermore, Mr. Raul Palma, P.E. CEO and Project Manager of MEG has 39 years of engineering experience in the State of Texas and is a former TxDOT Pharr Materials Engineer. MEG has offices in Pharr, Laredo, San Benito, Odessa, Houston, San Antonio, and Austin Texas with fully functional and accredited testing labs. MEG is stable and we have invested in the future. We are consistent and we are not going anywhere. We believe MEG has placed together a team that is the most highly qualified to perform the services requested by the City of Edinburg. Our firm is a certified Disadvantage Business Enterprise (DBE), Minority Business Enterprise (MBE) and Historically Underutilized Business (HUB).

Experienced Project Manager

As your project manager, I have spent over 39 years working on Texas projects including 21 years as the CEO and Chief Engineer of MEG completing various successful projects within all of Texas.

Pride in Execution

MEG is acutely aware of the financial and management challenges facing most entities these days.

We are committed to:

- Working to identify and implement projects in the most cost-effective manner.
- Communicating closely with the client to meet your requirements and schedule.
- Knowledge and geotechnical solutions for cost effective construction methods.
- Dedicated to quality: AASHTO and USACE accredited laboratory.
- The most AASHTO accreditations of any laboratory in Texas.

Our team is thrilled about the opportunity to serve the City of Edinburg and we are ready to start immediately upon selection. If you have any questions or would like to discuss our approach or team capabilities in greater detail, please contact me at any time at apalma@megengineers.com. Thank you for your consideration.

Respectfully,
MILLENNIUM ENGINEERS GROUP, INC. TBPELS Firm No.: F-3913

ABOUT MEG ENGINEERS

Government and municipal agencies, educational institutions, architects, engineers, real estate developers, constructors, and private sector clients. Our strength is our people; combining their experience and collaborating as a unit enables us to quickly identify our roles and deliver accurate cost-effective deliverables. Whether defining a new working relationship or continuing to the next project our mission remains the same: to achieve yours.

MEG Corporate Headquarters – Pharr, Texas

History

MEG was founded in 2001 by Mr. Raul Palma, P.E. on the principles of honesty, integrity, and service. The goal to provide innovative geotechnical and material testing services, continue to raise the level of quality in the local profession, and make a difference in the community. Today,MEG provides a full range of integrated geotechnical engineering and consulting services, construction material engineering and testing, environmental engineering, forensic testing, and consulting services. Our philosophy and practices have been positively reflected in both client and employee loyalty and contribute to a steady growth in a diversity of projects.

MEG is accredited by the American Association of State Highway and Transportation Officials (AASHTO) and the United States Army Corps of Engineers (USACE). MEG is audited by an independent AASHTO & USACE auditor, as part of our accreditation process.

MEG meets the requirements for ASTME329 Standard of Recommend Practice for Inspection and Testing Agencies, and maintains yearly proficiency testing samples to AASHTO, USACE, TxDOT, and TxAPA.

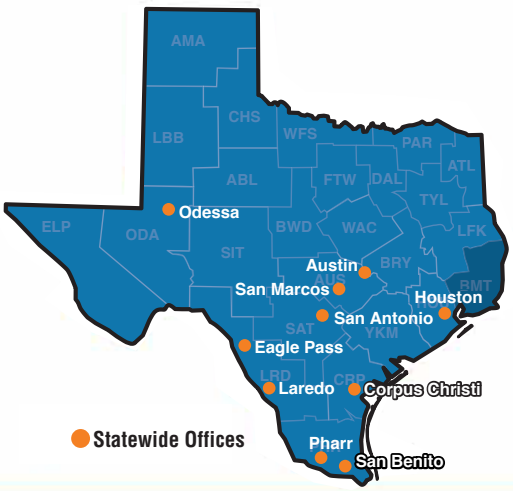
MEG COMPANY OBJECTIVE

MEG is a minority owned and operated business certified as:

- Historically Under-utilized Business (HUB)
- Small Business Enterprise (SBE)
- Minority Business Enterprise (MBE)
- Emerging Small Bus. Enterprise (ESBE)
- Hispanic American Bus. Enterprise (HABE)
- Disadvantaged Business Enterprise (DBE)



MEG has the most AASHTO accreditations of any laboratory in the State of Texas.

LABORATORY EQUIPMENT

MEG meets the requirements for ASTME329 Standard of Recommend Practice for Inspection and Testing Agencies, and maintains yearly proficiency testing samples to AASHTO, USACE, TxDOT, and TxAPA.

Our Project Team

MEG proposes to utilize the latest measurement techniques to effectively perform the services of this agreement with our current staff as proposed in our organizational chart. We understand that we need to respond quickly to some service requests, and we are practiced in having staff available on short notice, if necessary. Our current and projected workloads are such that we are confident of our ability to the City of Edinburg expectations in terms of having appropriate staff resources available when they are needed. The organization chart below reflects the staff we anticipate using for the proposed projects; however, we have additional personnel that can also be utilized if needed.

> "I count of the experience and expertise that Millennium Engineers provides- just as a good foundation is critical to a structure, a good geotechnical study is critical to a good foundation design."

RAUL PALMA P.E.

CHIEF GEOTECHNICAL ENGINEER

Phone: 956-300-2500
Email: rpalma@megengineers.com

PROFILE

Mr. Palma is a licensed Professional Engineer with over 43 years of experience in geotechnical engineering, construction materials testing, management, and engineering design of highways, streets, and utilities. Mr. Palma has directed and completed a wide variety of geotechnical projects throughout the Central Texas region. As Chief Geotechnical Engineer of the San Benito, Texas office he is responsible for overall operations management of the San Benito Office.

As geotechnical project manager, he is responsible for coordination and completion of geotechnical engineering projects. His experience includes subsurface explorations, laboratory testing, foundation investigation and design; slope stability assessments and remediation design, pre-load fill design; geotechnical plans and specifications preparation; and construction monitoring. Client relationships have included city and county agencies; engineering and architectural firms; municipal and utility districts, as well as private developers and constructors.

During Mr. Palma's employment with the Texas Department of Transportation (TxDOT), Mr. Palma gained an extensive background in the area of geotechnical and materials engineering serving as the District Materials Engineer for a centralized laboratory for TxDOT in the Pharr District located in Pharr, Texas. As the District Materials Engineer he was responsible for overseeing the testing and approval of materials for all construction projects in the Cameron, Hidalgo Starr, Zapata, Jim Hogg, Brooks, Willacy and Kennedy counties. At the end of his tenure with TxDOT, the Pharr District had a construction program of approximately $170 million dollars of construction per year. He oversaw all the geotechnical exploration and soil testing for all bridge and retaining wall structures in these same counties. Mr. Palma also served as the assistant to the State Concrete and Physical Testing Engineer at the Materials & Tests Division of TxDOT and during this period he gained extensive experience in concrete, concrete admixtures, reinforcing steel, and pre-stressed steel. Mr. Palma's extensive experience in the area of materials and geotechnical engineering gives our firm a unique ability to provide services of the highest professional caliber.

TO: Whom it may Concern

This is in reference to construction materials testing and geotechnical services performed for the City of Weslaco by MEG Engineers between the period of May of 2020 and May of 2022.

During this timeframe, MEG Engineers has met our expectations completing all work in a timely and professional manner. MEG has been very responsive to all our work requests and provided the services in timing and sequence with project expectations. As a matter of fact, due to the success of their work, the city has recently approved a one-year extension to their existing contract.

We are pleased to offer this letter of recommendation for their great work with the city.

If you have any questions or would like additional information concerning MEG's work with the City of Weslaco, please do not hesitate to contact me at (956)969-1533 or email me at aaldana@weslacotx.gov.

Sincerely,

Albert J. Aldana, P.E.
City Engineer

BROWNSVILLE
PUBLIC UTILITIES BOARD

January 7, 2020

RE: Letter of Recommendation – Millennium Engineers Group, Inc.

To Whom It May Concern:

On behalf of the Brownsville Public Utilities Board (BPUB) Special Projects Department and Water/Wastewater Engineering Department, the BPUB submits this letter of recommendation for Millennium Engineers Group, Inc. (MEG).

MEG has assisted the Special Projects department and the Water/Wastewater Engineering Department with geotechnical reports and materials testing services for the past several years. They have been involved with numerous projects such as Wastewater Lift Stations Rehabilitation projects and the Odor Control Improvement project. MEG is also one of our on-call material testing laboratory for all subdivision construction materials testing.
Currently, MEG is performing all material testing for the BPUB Annex Building project, an approximate 70,000 sf building project development currently under construction.
Millennium Engineers Group continues to provide accurate results in a timely manner, with the utmost professionalism and within budget.

The BPUB will continue to engage Millennium Engineers Group on future projects and confidently recommend MEG for your geotechnical and materials testing needs.

Sincerely,

Marie C. Leal, P.E.

CITY OF MISSION

"Home of the Grapefruit"

To Whom It May Concern,

I am writing this letter of recommendation for MEG Engineers.

MEG has been under contract with the City of Mission for the last four years and has provided exceptional Lab services in numerous subdivisions and projects throughout the City. They have always exhibited with integrity, ethics, reliability and fairness. Despite any troubles that could arise at the time of construction, MEG would and will deliver the testing and results on time and with quality. I believe you would be very pleased with their work, attention to detail and customer service.

Should you have any questions, please feel free to contact me at (956) 585-3275.

Sincerely,

Juan Pablo Terrazas, P.E., CPM

Re: Letter of Recommendation

To Whom It May Concern:

Raul Palma is being nominated for Engineer of the Year. I have had the pleasure of knowing Raul for many years. He has impressed me with his exceptional leadership, spirit, and commitment to this profession. His professional character has excelled in his field of engineering and has given back to his community in countless volunteer efforts. I can attest not only to Raul's ability to explain and instruct, but also to his deep commitment to helping others.

Considering his extensive knowledge in engineering and achievements, he has been named the Engineer of the Year by the local Engineer's Chapter and I highly recommend his naming as Engineer of the Year.

Please feel free to contact me if you have any questions at (956) 572-3191.

Sincerely,

Patrick McNulty

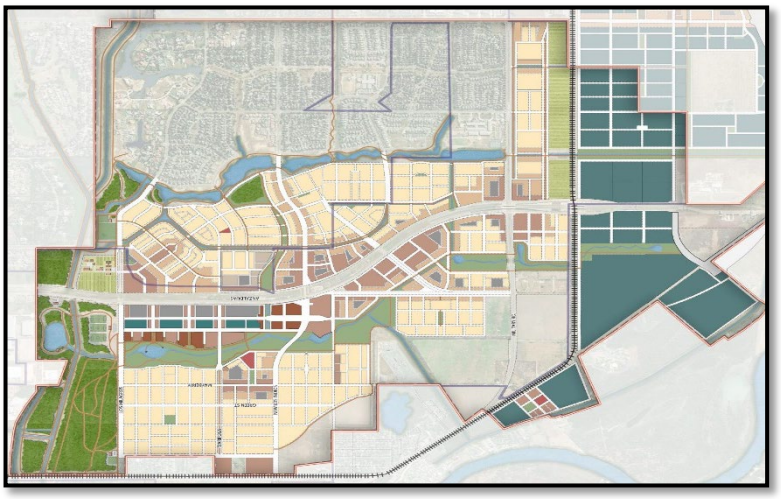
Relevant Projects

City of Mission - Public Safety Building



Construction of a new public service building development. It is also our understanding that the proposed public service building development will consist of a one (1) story structure. The site construction for the proposed structure is anticipated to be on a slab-on-grade or on-fill foundation provided expansive, soil-related movements will not impair the performance of the structure. The site also accommodates the construction of either a rigid or flexible pavement that will serve for light duty and/or heavy-duty traffic. Both flexible and rigid pavement types are viable and the selection on the type to be used will depend on the specific needs and criteria of project site

City of Edinburg – Downtown Parking Garage

Construction of a 3-level parking garage with an alternate to add a 4th level along with various add alternates to enhance the building including: first floor retail space over crawlspace; back of house receiving; elevator tower enhancements; thin-brick façade; parking guidance system; and retail restrooms. Work will include site work, selective demolition, concrete, masonry, metals, wood & plastics, thermal & moisture protection, openings, finishes, specialties, stationary loading dock equipment, electric traction elevators, fire suppression, MEP, communications, fire alarm system, exterior improvements, and utilities.

City of Mission - Los Milagros Pavement Recommendations

Performed Engineering and Construction Management and Administration of approximately 1.32 miles for the Pavement Rehabilitation Improvements by reclamation of existing asphaltic and sub-base and overlay of a new 2” asphaltic overlay of the residential streets within Los Milagros and Solera Subdivisions located in Mission, Texas.

City of Harlingen – Convention Center

New construction of a 25,000 SF standalone building consisting of five meeting rooms, reception/lobby, clinic, conference room, offices and support spaces.

Work included concrete, mansonry units, structural steel framing, modified bitumen roofing system, interior finishes, metal toilet compartments, appliances, wet fire sprinlker and standpipe system, MEP and other specified works.

City of Harlingen – Fire Station

Construction of a 10,234 SF fire station to include two bays, dorm rooms, training room, lobby, locker rooms, offices, fitness area, kitchen, vestibule, and other specified areas.

Work included concrete, cast stone masonry, structural steel framing, metal stairs, standing seam metal roof panels, metal wall panels, interior finishes, specialties, wet pipe sprinkler system, MEP, communications, fire alarm system, earthwork, and other specified works.

New Edinburg Arts, Culture & Events Center

13,500 s.f., ground-up foundation pad, two story Cultural Arts Center with Multi- Purpose events room, several conference rooms, exhibition spaces, multi-classroom settings for adults and children. Work will include site work, selective demolition, concrete, masonry, metals, wood & plastics, thermal & moisture protection, openings, finishes, specialties, stationary loading dock equipment, electric traction elevators, fire suppression, MEP, communications, fire alarm system, exterior improvements, and utilities.

INSURANCE COVERAGE & LEGAL

MEG does not have any key terms of our errors and omissions insurance coverage.

MEG maintains the insurance policies needed for this contract as for all additional contracts listed below.

2 million professional liability coverage
1 million commercial general liability coverage
1 million umbrella liability coverage

MEG is not debarred from doing business with any federal, state, or local agency.

MEG does not have any claims, judgments, and arbitration proceedings, suits pending or outstanding against itself or its officers

PROFESSIONAL SERVICES AGREEMENT

MEG has read and agrees with the Professional Services Agreement. MEG will meet the prerequisite insurance requirements, and, if selected, agrees to enter into such agreement.

Understanding the Project

The City of Edinburg's needs are specific to the services we provide, counting on the services we provide to be responsive, thorough, and precise. The projects need efficient communication, project management, and contract administration. At MEG, we consistently achieve this by:

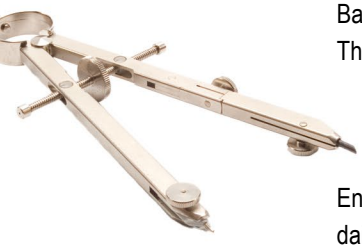
- Understanding the specific needs of our client
- Delivering on the expectations of our client
- Efficient Communication
- Extensive Employee Training and Management
- Proven Consistency, Low Employee Turnover
- Highest Quality Accreditations and Internal Management

Environmental SERVICES

PROFESSIONAL ENVIRONMENTAL SERVICES will encompass all related services to the City of Edinburg as listed in the qualifications.

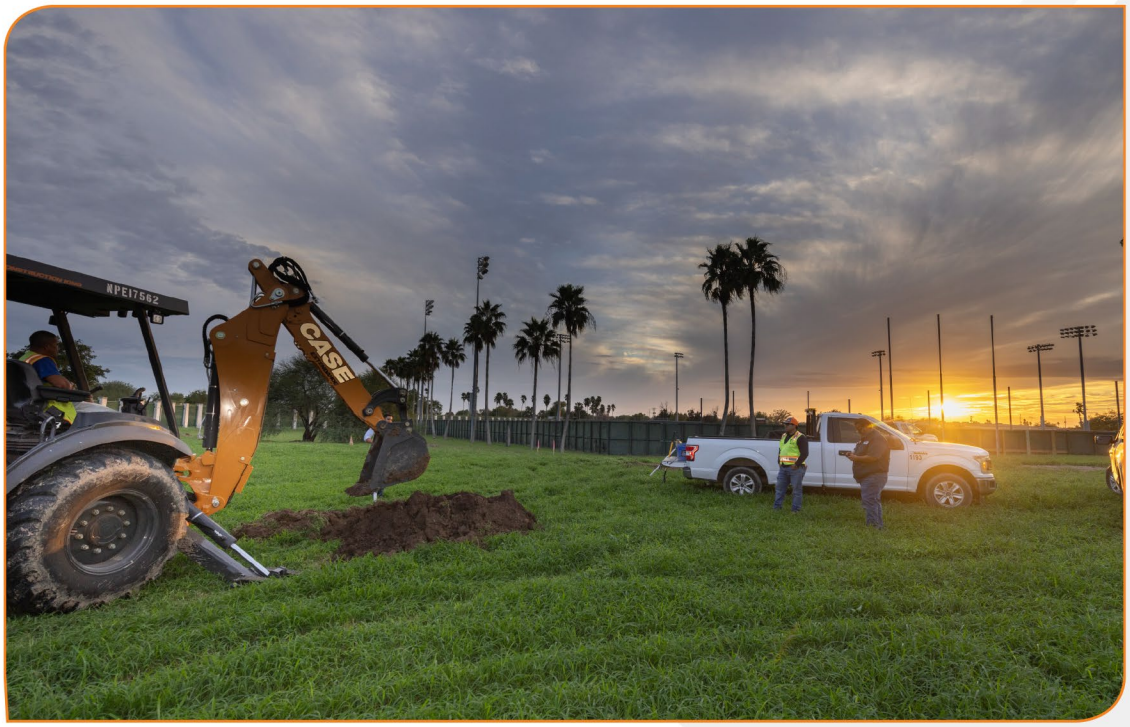
Our environmental services include:

- Due Diligence Services: Phase I Environmental Site Assessment (ESA) / ASTME 1527-13, Phase II and III ESA
- SWPPP Services: Compliance Inspections and Reporting
- Air Quality Monitoring
- Asbestos Sampling and Testing
- Hazardous Material Sampling and Testing
- Other



MEG has the ability to meet your schedule and deadline because of its thorough training and understanding of its CLIENTS needs, MEG's experience and resources, MEG's subcontractors' resources, and industry requirements. MEG has the philosophy of providing quality Environmental Engineering Services to all our clients in Texas. We believe that client satisfaction, reputable and prompt service, and staying in stride with the latest technologies and tools will give our firm a unique advantage in providing a service to you as our client. We believe that providing quality service is the key to our client's satisfaction and their inclination to consider our firm in future projects.

WORKLOAD CAPACITY



The scope of work to be performed under this contract is the scope of work that MEG performs daily for our clients in Texas. MEG has the necessary capacity to meet the needs of the City of Edinburg for Professional Services. MEG has the resources and experience to provide concurrent project construction services to an individual client for your detailed project scope of work. Our resources can be shifted for operations and our staff and inspectors are cross-trained for proper allocation of personnel for this specific reason.

Based on the current workload, resources, and staff of MEG it is estimated that current operations capacity is at 70%. There is currently no backlog with our testing Services. Our staffing plan is to never be above 85% capacity, so we are able to expedite services when needed to meet critical project schedules.

Based on current and future assignments, it is estimated that during the duration of the project Millennium Engineers Group, Inc. will be operating at 80% of capacity. Engineers, Staff, and Inspectors will be able to complete the daily anticipated project tasks for this project along with current projects tasks. MEG is proficient in completing daily project tasks and expediting the testing and inspection results to the project team for the projects benefit. The project team included in this submittal that will be allocated to this project will devote the necessary time to meet your schedule and often will be various percentages of their time based on your program needs. Inspectors that are assigned to this project will devote 100% of their time to this project when required and additional inspector resources will be available on an as needed basis for this project will be devoted 20% to 50% of their time for additional services as needed.

PROJECT MANAGEMENT AND COORDINATION STATEMENTS

MEG utilizes a Management System, which facilitates the management of both the Construction Material Testing (CMT) and Geotechnical Engineering Testing (GEO) Departments. The system consolidates all aspects of the business workflow, from proposal to the final invoice. It allows an organization the ability to set up clients/projects, schedule work orders (dispatch requests), report and distribute pertinent data to clients via email or website, employ management tools for lab and field testing, and prepare invoices for each project that could be exported to the organization's accounting system. The system also gives the organization's clients the ability to retrieve reports from the customized reporting website.

Our team makes recommendation on the course of action to the Client when issues of potential delays or increased costs arise during the project. Close communication and coordination between the contractor, third parties involved in the project and our team will be a priority by our team for a successful project. Our team operates as a representative of the City of Edinburg and oversees the day-to-day construction activities of the prime contract assigned. Our team has extensive experience in administering construction contracts and overall management. Our team has experience on multiple projects performing Construction Engineering, Inspection and Construction Materials Testing services for numerous clients in Texas. Our scope of services includes but not limited to:

- Construction Administration Procedures
- Field Reports
- Monthly Progress Reports
- Progress Photos
- Project Progress Meetings
- Schedule Review
- Change Order Review
- Quality Control
- Safety and Health
- Submittal/ Shop Drawing Control
- Payment Application Review

> Millennium Engineers has always provided great, professional, friendly service. I highly recommend them.

PROJECT MANAGEMENT AND COORDINATION STATEMENTS

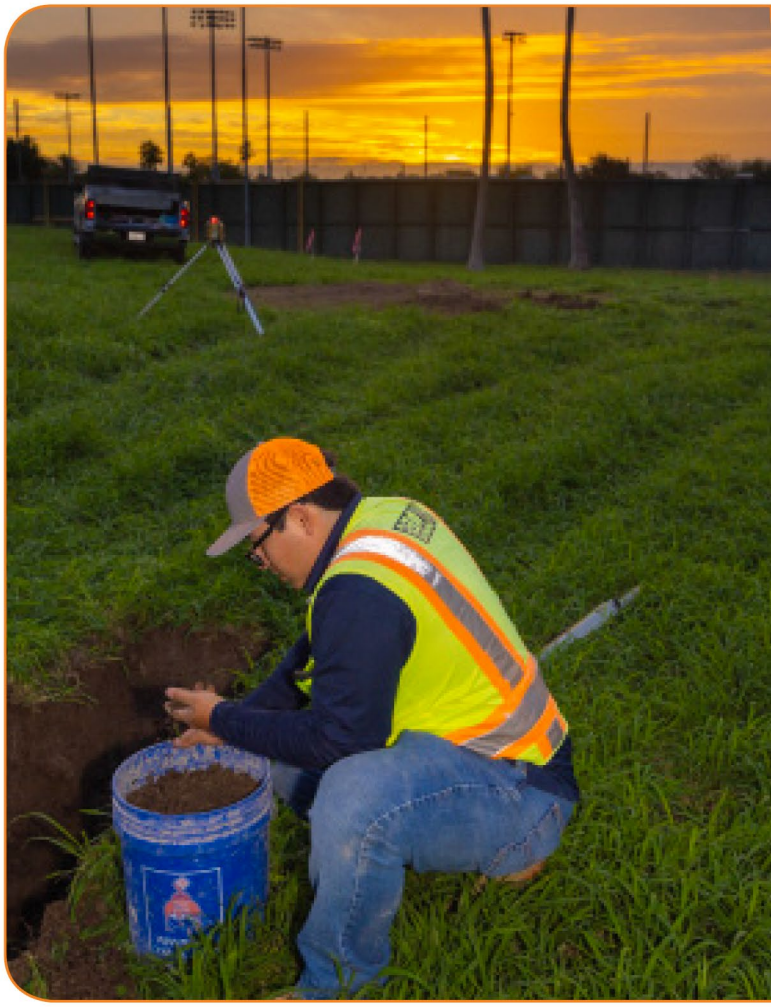
Construction Engineering and Management: MEG ensures that the project is completed on time, and on budget and within scope. This will be accomplished through review and tracking of baseline schedules and monthly updates, monthly pay estimates, change orders, plan quantities and overall project costs. We provide timely processing of contractor submittals, shop drawings, and Request for Information (RFIs). We will also work with the Engineer of Record (EOR) as needed regarding RFI's, potential design changes, or plan errors and omissions. We conduct regular progress meetings to promote partnering between all parties. We conduct pre-construction meeting with the contractor, Client, and other stakeholders prior to the start of the project. During this meeting, an escalation ladder is established to provide guidelines for resolution of construction issues.

Construction Administration and Inspection: MEG performs all necessary inspection to verify work is completed in accordance with plans and specifications. Daily Work Reports (DWR's) or other required reports will be completed to document construction progress and inspection activities as well as quantities for payment. Our inspectors inspect all construction activities daily, determine daily need for construction materials testing of work in progress and materials in use, traffic control devices on a daily basis for compliance with Traffic Control Plan and TMUTCD. SW3P inspections as per environmental requirements performed in accordance with subject guidelines.

Construction Materials Testing: MEG performs construction materials testing on all required construction activities and materials to ensure compliance with project plans and specifications in accordance with the City of Edinburg guidelines for sampling and testing. If independent assurance testing is required coordination with the third-party testing agency is scheduled at appropriate schedules and frequency.

Document Control: MEG ensures that all project progress and financial reporting is completed in accordance with contract requirements. We log all project correspondence, submittals, change orders, RFI's, shop drawings, pay estimates, MOH, etc. We also verify that the contractor is complying with Disadvantaged Business Enterprise (DBE), Equal Employment Opportunity (EEO) and Buy America guidelines. All DWR's, pay sheets and material test reports are reviewed for accuracy before submittal.

Close Out Procedures: Thorough and accurate records is maintained throughout. We generate a project specific close out checklist. The checklist is distributed to all parties at the beginning to resolve all discrepancies. The checklist allows for a guide during both construction and close out phases. Another part of quality program includes formal audits conducted at 30%, 60%, and 90% of construction completed.



Another tool that we use is performing thorough constructability reviews during the pre-construction phase. We review approved plans, specifications, general notes, TCP phasing, baseline schedule, etc. to identify potential plan errors, quantity discrepancies, utility conflicts, or potential maintenance issues. All findings during the constructability review are provided to the City of Edinburg for review and further discussion.

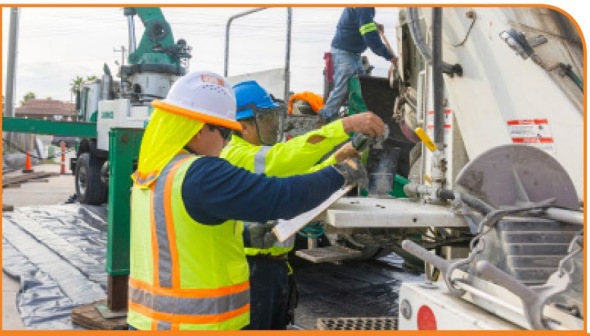
PROJECT COMMITMENT

MEG is committed to your projects, program, goals, and timelines for project schedule. We will provide the essential staff, equipment, and resources to be available and responsive daily to the City of Edinburg's needs based on your scope of services. Our offices are equipped and trained to provide the level of service and responsiveness required by the City of Edinburg. MEG has extensive local resources and expertise to complete large project programs. The key personnel presented in this Statement of Qualifications are committed to the City of Edinburg projects and will be available throughout the life of the project.

Project Communication

Communication is the key to all successful projects. The management of the testing and inspection program for the project will begin with the introduction of the project team members. Upon notification of award, our engineers and staff will meet with members of the project team who have an active role in the project. This is a critical phase in to communicate project information, goals, timelines, or potential conflicts.

Review of Construction Schedule



MEG will review the most up-to-date construction schedule by task after design documents are completed. The testing and inspection program can best support regulated testing and control final testing costs if we clearly understand the project testing requirements.

Construction Meetings

From the initiation of the project until the completion, we propose biweekly or monthly management meetings with the construction manager or his representative and other project team members. At these meetings it is necessary to review and discuss testing results, project progress, and project schedule.

Daily Communication

MEG on site representative will maintain daily communication with the contractor's superintendent, and the designated project team members in order to schedule the required services and to communicate inspection and test results. Our project manager will communicate the results of critical off-site testing and inspections to the designated project team representatives the same day testing is performed.

> MEG has been reliable and responsive to our testing needs. – Mr. Ariel Chávez II, PE/RPLS/ Director of Engineering Services

QUALITY ASSURANCE / QUALITY CONTROL

Internal Quality Management

Our firm follows a reporting structure that will best benefit our clients. Steps and processes are performed in every task of our services to give the client the best product possible. Our client first attitude, service approach, methodology of doing business, and internal quality control program allow us to continue providing services throughout the State of Texas building long term business relationships.

Reporting Structure

Reporting Structure starts within our management team. MEG is called for the requested services and to make the necessary arrangements to initiate the project. Our dispatcher will dispatch one of our highly trained technicians to the requested project site. At this point the technician will perform the requested task(s) and then complete his/her field-testing report. Field Testing reports are turned in daily and our project managers review the testing reports. The testing reports are then turned into our administrative staff and are typed for second review of the project managers. The reports are then reviewed and signed by the office engineer before they are sent to the client. The testing reports provided by MEG include all the necessary data that is often requested by the Owner and members of the design team.

Decision Making

Decision Making by MEG starts within our management team. The decisions made by our staff and key personnel come only after consulting with the principal engineer. Timing and scheduling are important factors of construction, and every decision made will consider the best interest of our client. Engineering Recommendations are only made by a Professional Engineer that is registered in the State of Texas.

Quality Control Plans

Quality Control is monitored by MEG in every aspect of our work. Our office maintains a quality control program that has been approved by the American Association of State Highway and Transportation Officials (AASHTO) and the State of Texas, Department of State Health Services Radiation Control Program. Quality control is monitored and documented by our (QA/QC) Manager and Radiation Safety Officer.

Reporting and Billing Quality Assurance

Quality assurance is maintained by MEG in every aspect of our administrative work. Our office maintains an internal quality control program that is used by our administrative staff to audit every process of our reporting and billing procedures. This quality assurance measure allows us to maintain the quality service that is essential to our client's business.

> "MEG provides excellent services in a timely and cost effective manner.– Mr. Alfonso Quintanilla, PE/RPLS/ Quintanilla, Headly, and Associates"

Texas Board of Professional Engineers and Land Surveyors

CERTIFICATE OF REGISTRATION

This acknowledges that

MILLENNIUM ENGINEERS GROUP INC

has fulfilled the requirements of the Texas Board of Professional Engineers and Land Surveyors to offer and perform engineering services in the state of Texas.

Registration Number
F-3913

Expiration Date
7/31/2028

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: **1742996684300**
Approval Date: **September 28, 2023**
Scheduled Expiration Date: **September 28, 2027**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

Millennium Engineers Group Inc

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **September 28, 2023**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day to day management, operational control, business location) provided in the submission of the business; application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

South Central Texas Regional Certification Agency of Bexar County, Texas hereby duly affirms that:

Millennium Engineers Group, Inc. DBA Millennium Engineers Group, Inc

has successfully met the established requirements of SCTRCA's Business Enterprise Certification Program to be certified as a

Pharr, TX 78577

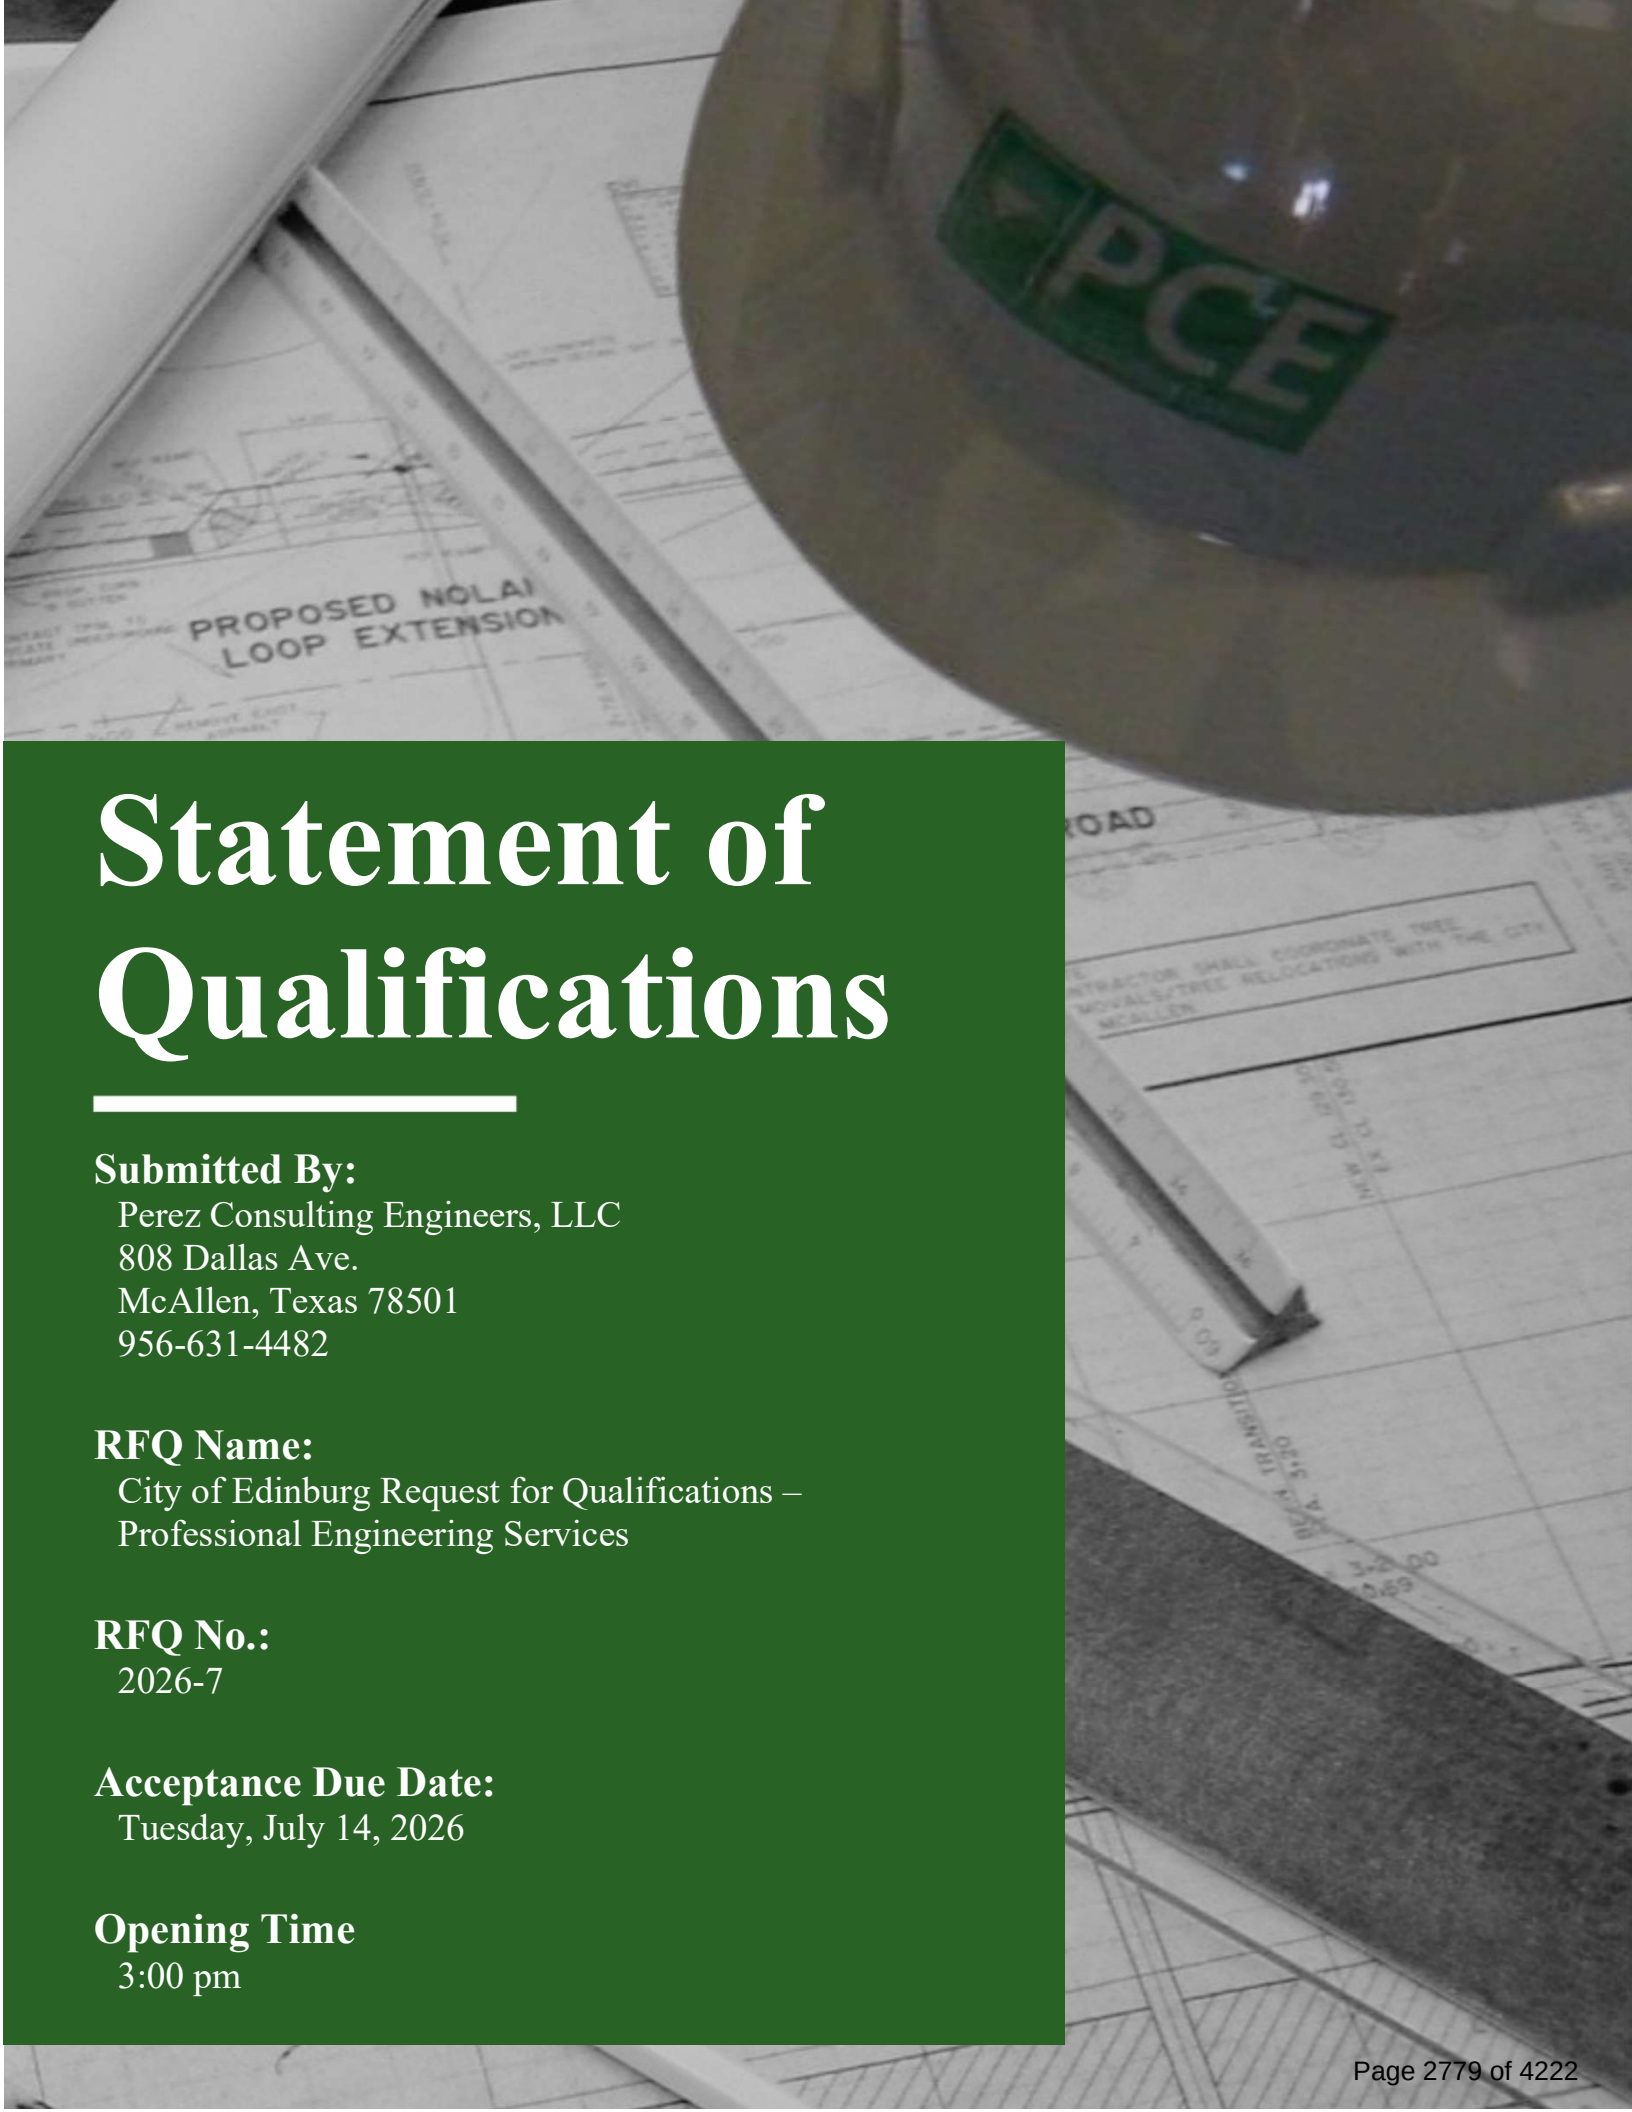
Re: Annual Update Affidavit (AUA)
Disadvantaged Business Enterprise (DBE)

Dear Raul Palma:

Upon review of the AUA and supporting documentation, TxDOT has determined that Millennium Engineers Group, Inc. continues to meet the eligibility requirements of the federal [DBE] program.

DBE certification does not expire, however, to remain certified it is incumbent on you to submit the AUA on or before your next certification anniversary date. A courtesy reminder will be sent from the Diversity Management System (DMS) in advance of the AUA due date.

Firms listed in the Texas Unified Certification Program (TUCP) directory located at https://txdot.txdotcms.com are currently certified DBE/ACDBEs. All DBEs certified pursuant to 49 CFR Part 26, are automatically certified in TxDOT's Small Business Enterprise (SBE) Program. TxDOT encourages you to utilize the TUCP directory as a marketing tool. In that respect you should periodically verify your firm's certification description and North American Industry Classification System (NAICS) code(s) closely describe the goods or services your firm provides.



Should your firm be awarded an opportunity to participate on a federally funded project, your firm must perform a commercially useful function (CUF). A DBE performs CUF when it is responsible for execution of the work of the contract and is carrying out its responsibilities by performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible, with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself.

For information on TxDOT's contracting and procurement opportunities visit https://www.txdot.gov.

Sincerely,

Michael D. Bryant
Director
Civil Rights Division

1. Transmittal Letter

1. TRANSMITTAL LETTER

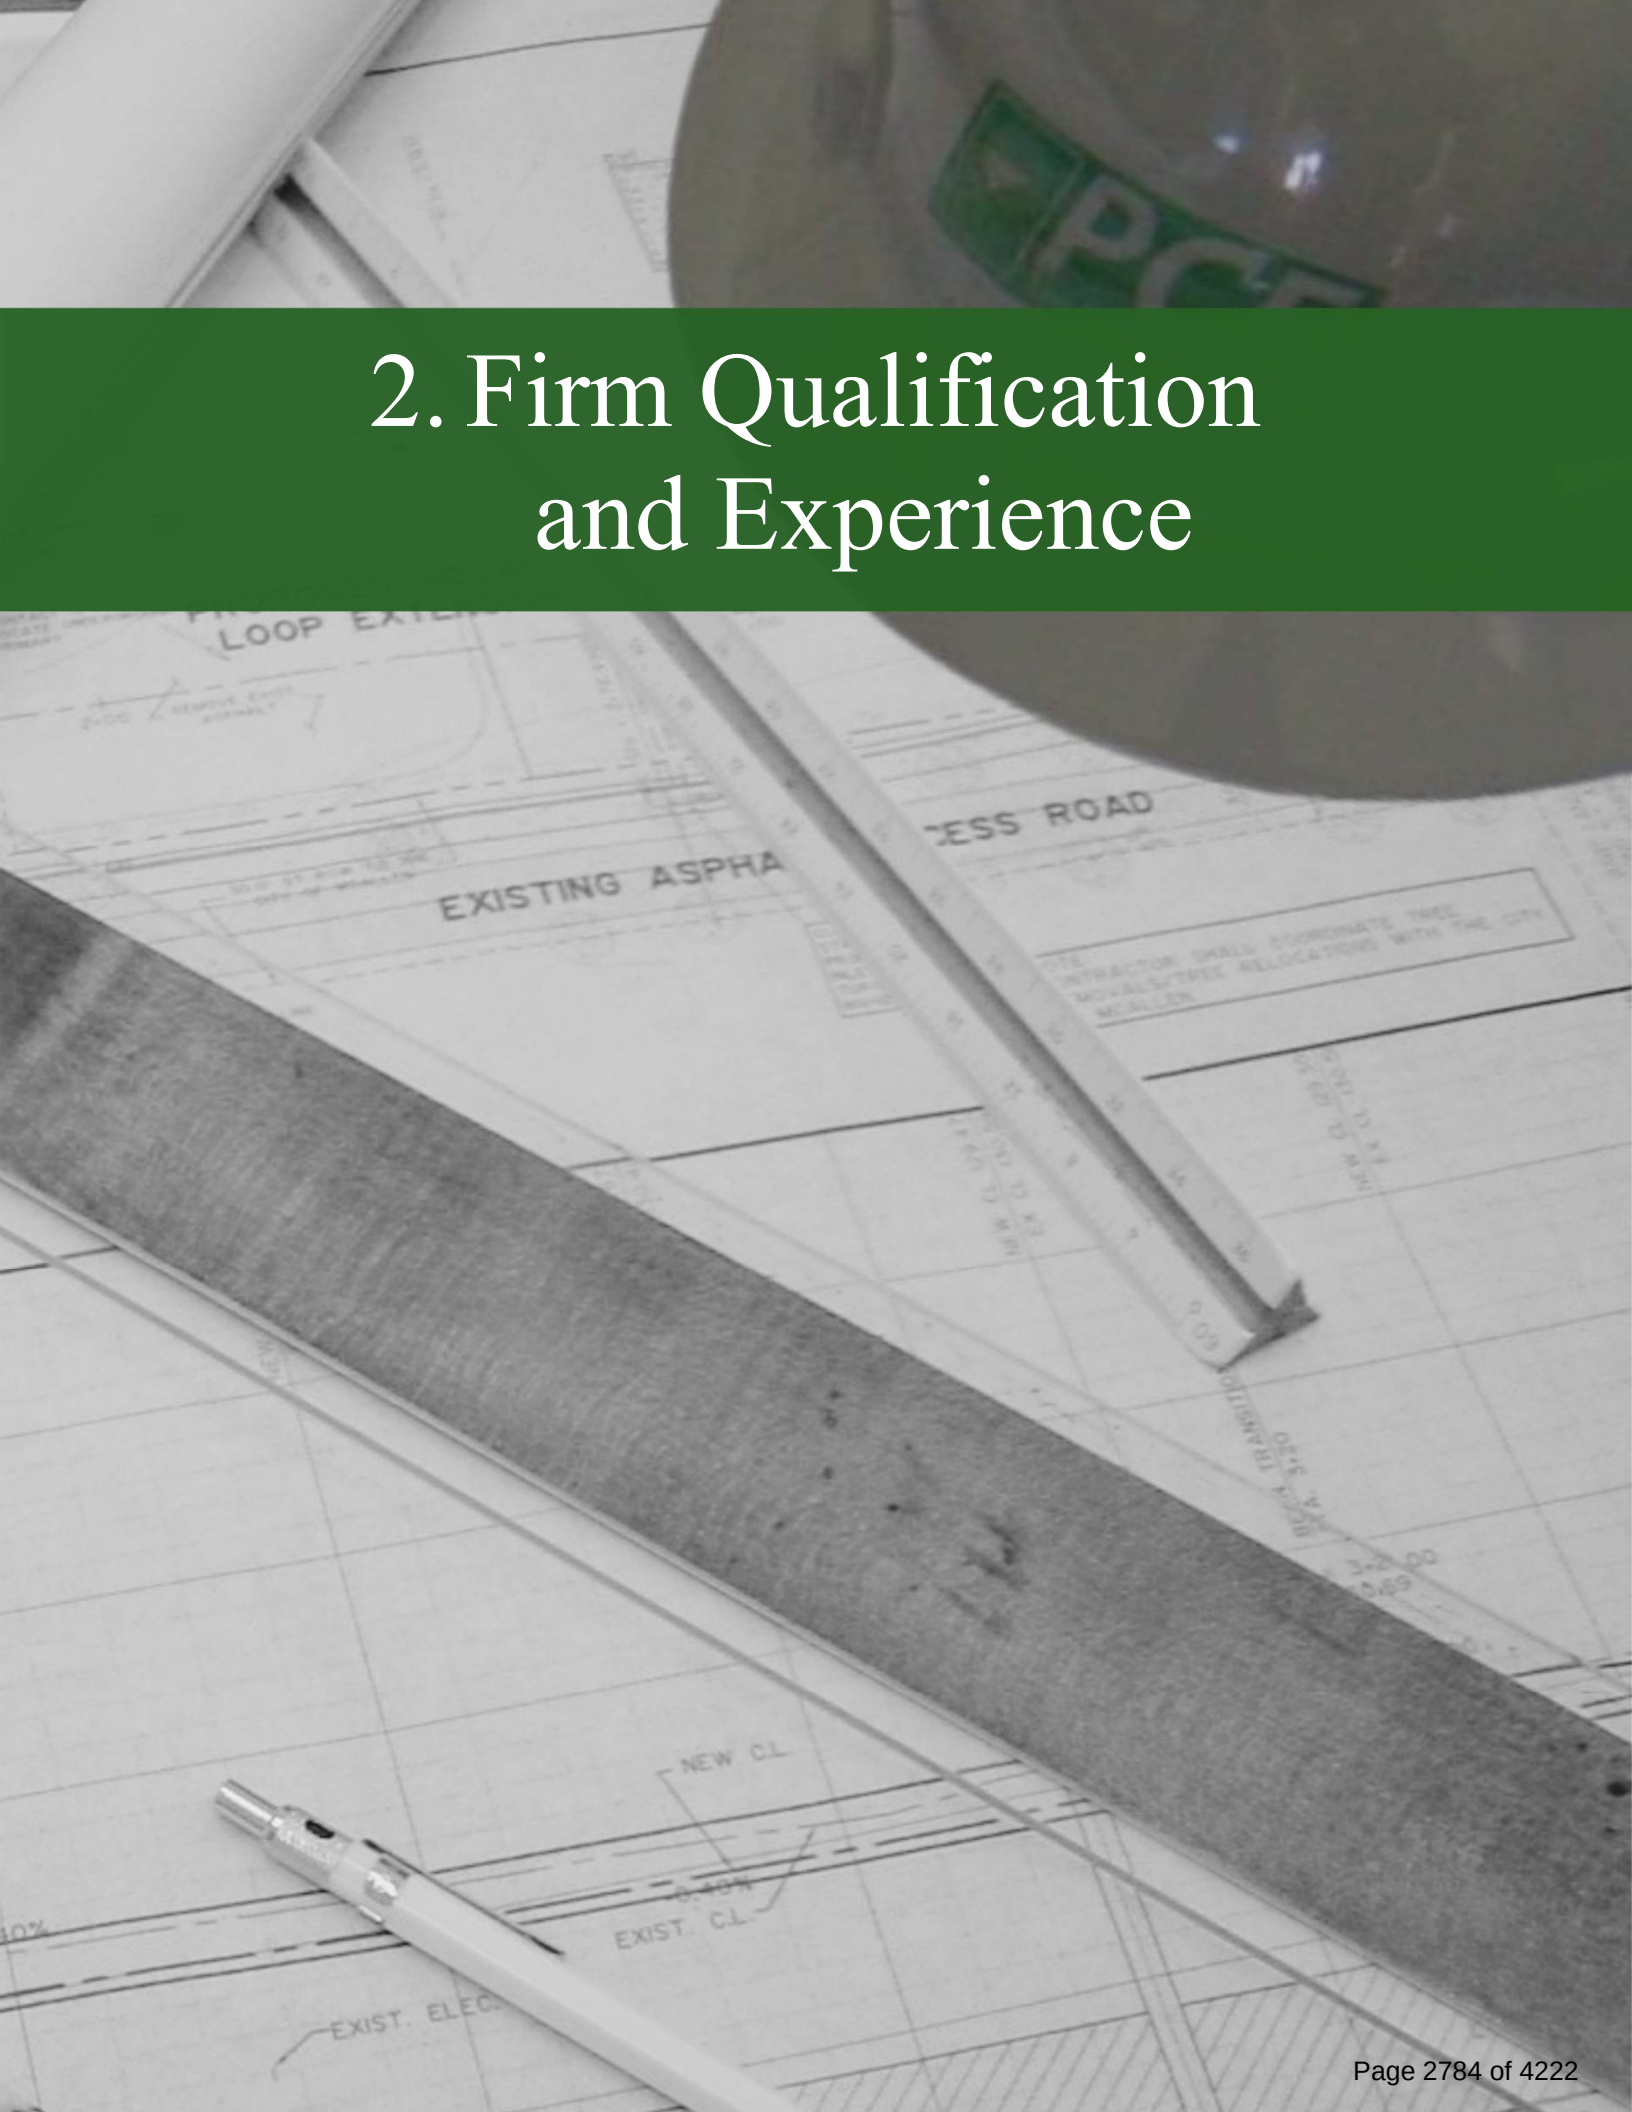
Perez Consulting Engineers (PCE) is pleased to submit our Statement of Qualifications for the City of Edinburg Professional Engineering Services RFQ. Having previously worked with various Municipalities, including the City of Edinburg, our company is familiar with the procedures for smooth project design and construction. This familiarity and knowledge can help provide insightful information that will offer improvement alternatives and achieve the desired goals.

All engineering operations and design workflows for this contract will be executed entirely at our established headquarters, located at 808 Dallas Avenue in McAllen, Texas. Any questions could be directed to our President, J. David Perez, P.E. via email at dp@perezce.com or Jorge D. Perez, P.E., R.P.L.S., Vice President via email at jdp@perezce.com. Both David and Jorge Perez are authorized to bind the firm to contract and can be reached at 956.631.4482.

As of the date of this submission, we acknowledge that no addenda have been issued for this solicitation.

PCE brings a deep, historical understanding of the distinct regional characteristics that impact civil infrastructure in the Rio Grande Valley. Since 1976, our firm has provided comprehensive site planning, site development, water and sanitary sewer design, drainage, flood control, and public works engineering. Our localized expertise spans the specific geological, hydrological, soil, and weather conditions that dictate successful project outcomes in this region.

Our structured design methodology relies on a "Total Consultation" approach. The PCE Design Team works in continuous synchronization with three dedicated PCE Professional Engineers to thoroughly evaluate design and construction alternatives. This rigorous engineer review process guarantees that highly analyzed; value-driven engineering considerations are integrated into every phase of the project.



Thank you for the opportunity to present our qualifications. We welcome the prospect of partnering with the City of Edinburg and wish to formally express our genuine commitment to delivering exceptional engineering services to your community.

Should you have any questions or require additional information, please contact us at 956.631.4482 or via the email addresses provide above.

Respectfully submitted,
Perez Consulting Engineers, LLC

J. David Perez, P.E.
President

2. Firm Qualification and Experience

2. FIRM QUALIFICATION AND EXPERIENCE

QUALIFICATIONS

CURRENT WORKLOAD

Perez Consulting Engineers is currently working in design of various civil engineering projects involving educational facility site plans, drainage systems, sanitary sewer collection systems, irrigation system improvements in the South Texas area. Collectively, these projects are approximately 80% complete. PCE's workload is such that it can assign a project engineer to start with the proposed projects as soon as awarded.

It is important that the City of Edinburg feel comfortable knowing that its needs will be met in a timely manner and within schedule. PCE has always been committed to providing our clients with high-level service that is both timely and will meet budgetary constraints.

PROJECT APPROACH

Perez Consulting Engineers, having previously done services for The City of Edinburg, has successfully demonstrated its' capability for fulfilling all scope of services required for the various anticipated projects, all within time and budget. With our familiarity with the City of Edinburg, Railroad Company, TxDOT, Irrigation and Drainage Districts' staff members and policies, we have the knowledge and experience in dealing with the proper key entities involved as stakeholders for such an engineering assignment. We eagerly await the opportunity to once more serve The City of Edinburg based on our merit, experience, and reputation as Civil Engineers.

Summary of Project Approach Tasks and Schedules:

The following provides a general outline of our approach to the various projects. Depending on each project's needs, PCE will conduct additional meetings and coordination as required. PCE's team includes three highly qualified Registered Professional Engineers and one Graduate Engineer who work collaboratively to deliver efficient, cost-effective solutions for the client.

Preliminary Phase

During this Phase of the Project, PCE will meet with the City of Edinburg Officials to clearly understand the anticipated goals and expectations such as the desired permissible levels of flood protection, budget, and schedules for the Project (s). PCE will:

- Meet with City of Edinburg Officials and other stakeholders at a Preliminary Design Conference to establish fundamental aspects, concepts and design criteria and goals of the project and to gather existing information including Drainage Maps and Studies, Drainage Master Plans, Topographic Maps and other related information relative to the Project.
- Request and receive any additional information such as right-of-way limitations for improvements, existing easements, geotechnical reports, and reports from the City.

- As required, along with City Staff, if applicable meet with the Drainage District, Texas Department of Transportation, City Utility Department, Irrigation District(s), Gas Company and other private and public institutions such as the School District and other utilities for coordination of possible conflicts, phasing of the project, permitting requirements and any other matter related to the anticipated design and construction.

- Prepare a Preliminary Engineering Report including related Hydraulic and Hydrological calculations, contributing drainage areas, proposed improvement alignment(s), design criteria, as well as recommendations and cost estimates for the proposed improvements and other options as applicable.

- After City Staff review of the Report, prepare preliminary layout plans based on the approved preferences and options and submit to City of Edinburg staff for review and approval.

Design Phase

- Based on the City of Edinburg's approved option, PCE will conduct detailed engineering and topographical ground surveys, public and private utility locations from field data and record, land acquisition surveys (if required), all performed with adequate information to prepare a detailed digital Base Map to be used for the preparation of plans.
- Prepare Final Plans and Specifications of the approved work.
- Prepare and submit regulatory permits as required, such as Texas Department of Transportation, Railroad, Drainage District, etc.
- Prepare Construction Specifications, Contract and Bidding Documents

Bidding Phase

- Assist the City in scheduling and conducting a Pre-Bid Conference with prospective bidders
- Assist the City staff with the bidding process, including replying to any bidder questions and conducting the bid opening.
- Prepare Bid Tabulations and analyze, study, and evaluate the bids and bidder's qualifications received to ensure their accuracy and prepare a "Letter of Recommendation" to the City Commission for consideration to consider award of the Project.

Construction Phase

- Conduct Pre-construction conference with the Contractor, Engineering, Utility, and Public Works Departments, and any other stakeholders such as gas company, drainage district officials, Texas Department of Transportation, Telephone Company and other affected utilities or institutions.
- Perform periodic site visits to assure that the project is proceeding in accordance with the plans and specifications and in the schedule specified.
- Along with the City Staff, conduct regular scheduled progress meetings with the contractor and other City Departments and stakeholders.
- Assist the City staff with all Request for Information (RFI's) from the Contractor, if any.

- Assist the City in the preparation of Change Orders (if any).
- Assist the City of Edinburg Staff with review of periodic and final estimates and general representation for the construction of the project.
- Assist City of Edinburg staff with the project closeout.

Throughout all the different Phases of the Project, PCE will conduct regular monthly (or bi-weekly) progress meetings with the City of Edinburg Officials, Staff and Stakeholders as required to assure that the designs and preparation of the plans are meeting the City's expectations and schedules and during the Construction Phase, to ensure that all the construction is being conducted in accordance with the Plans and Specifications. In the Progress Meetings, PCE may also include other entities, such as the Texas Department of Transportation, Drainage District, etc., as well as other regulatory agencies and interested parties to make certain that all aspects and conflicts (if any) of the project are being discussed and resolved.

We understand that the growth of the City of Edinburg calls for some projects to be on **FAST-TRACK ENGINEERING** and **CONSTRUCTION SCHEDULES** and it will be implemented as needed to provide timely delivery of submittals and completion of all the Tasks. PCE is cognizant of deadlines and schedules. PCE will incorporate in their plans and Contract Documents, Construction Phasing Schedules and **CONSTRUCTION METHODS** to expedite Construction. PCE's commitment to The City of Edinburg is to PARTNER with CITY STAFF to assure timely and **QUALITY** results.

Throughout the Preliminary, Design and Construction phases of the project, PCE will conduct bi-weekly (or more frequent) progress meetings with the City of Edinburg's Officials to assure that the designs and preparation of the plans are proceeding to the City's expectations. PCE will also meet with other entities, such as drainage district officials, irrigation district officials, and other interested parties to ensure all aspects of the project are taken care of.

As a client-oriented firm, we are committed in providing careful and full attention to each of our client's needs and expectations. We have earned the trust and respect of clients which we have worked for in the past and invite you to contact these clients. We are proud that the greater part of our work is repeat business and from satisfied clients or because of referrals of these clients.

All work will be performed at the 808 Dallas office. It is important to us that The City knows that the Projects will be completed in a timely manner and within schedule. Our workload is such that it can assign a project engineer to start with the proposed projects as soon as awarded. Our company will add more personnel as workload increases.

PROJECT EXPERIENCE

Bentsen Road Paving & Drainage – Multiple Phases - This project has been designed in multiple phases. Phase 1 and 2 originally included the reconstruction of 3.8 miles of Bentsen Road from a 20-foot-wide rural highway section to a 65-foot-wide urban major arterial roadway from U.S. Expressway 83 to 3 Mile Line (Buddy Owens).

Civil Engineering Services included an engineering study and a report with special emphasis for storm drainage impacts to the Mission Lateral, Northwest McAllen Lateral and the Rado Drain. The Project required coordination efforts with Hidalgo County Irrigation District No. 1, Hidalgo County Drainage District No. 1, Texas Department of Transportation (TxDOT), Union Pacific Railroad, and other municipal and public utility companies. Services also included alignment studies, proposed right-of-way widths, typical roadway section designs, drainage design, surveying coordination, utility adjustments, culvert expansion at the Rado Drain and the preparation of plans, specifications and construction estimates (PS&E). The final Construction Cost for the Phase 1 work was under budget at $5.8 million dollars.

Phase 3's proposed project is approximately two miles and extends from Auburn Ave. to Buddy Owens. The proposed project will widen the existing two-lane rural roadway from an average of an 80-ft ROW to a 100-ft ROW Major Collector. The proposed roadway will include the addition of two northbound lanes, two southbound lanes, and a continuous left turn lane with curb, gutter, and an underground drainage system to improve drainage of Bentsen Road. PCE is working closely with the City of McAllen Engineering Department and TxDOT in the design of the project.

City of Edinburg Stadium and Dawson Drive Drainage Project - Perez Consulting Engineers was selected to perform a detailed Hydrologic and Hydraulics (H&H) study and report to determine causes of local flooding in the Stadium and Dawson Drive vicinity of the City of Edinburg.

To aid in the analysis of the specific identified targeted areas of concern, PCE performed a detailed watershed analysis with the aid of an aerial survey implementing *Laser Imaging Detection and Ranging Technology (LIDAR)* for the designated area to provide a clear understanding of the drainage pattern characteristics. The work will require coordination of the Edinburg School District as well as the Hidalgo County Drainage District No. 1

PCE is using its findings to develop plans and specifications to provide solutions and alternate solutions for drainage deficiencies within the study area.

Drainage Utility Projects – Balboa Acres; San Juan, Texas - The City of McAllen contracted PCE for the preparation of Engineering Studies to determine various options to mitigate/alleviate the damage caused by periodic flooding from storm water to the Balboa Acres vicinity.

The engineering services were divided into four main tasks for the Balboa Acres vicinity of the City, generally bound by the Hackney floodway to the north, S. Ware Rd. to the west, Sarah Ave. to the south, and S. 23rd St.

Task 1. Hydraulics and Hydrology (H&H) studies of the Balboa Acres general boundaries based on existing topographic information of the existing storm sewer system as furnished by the City of McAllen's Engineering Department to determine storm sewer hydrology and examine flow capacities of the existing storm sewer infrastructure and to suggest and recommend storm sewer system improvements to mitigate flooding. In addition, a new aerial survey was conducted to establish existing drainage patterns and for delineation of drainage areas.

Task 2. Plans and Specifications for an "Emergency Storm Sewer Interconnect-Bypass System" along Sarah Ave which provided provisions for storm waters diverted from flooded areas within Balboa Aces towards the south with backflow prevention provisions.

Task 3. Prepared Plans and Specifications for the rehabilitation and addition of a new storm water pump and controls for the existing "Balboa Acres Storm Sewer Lift Station."

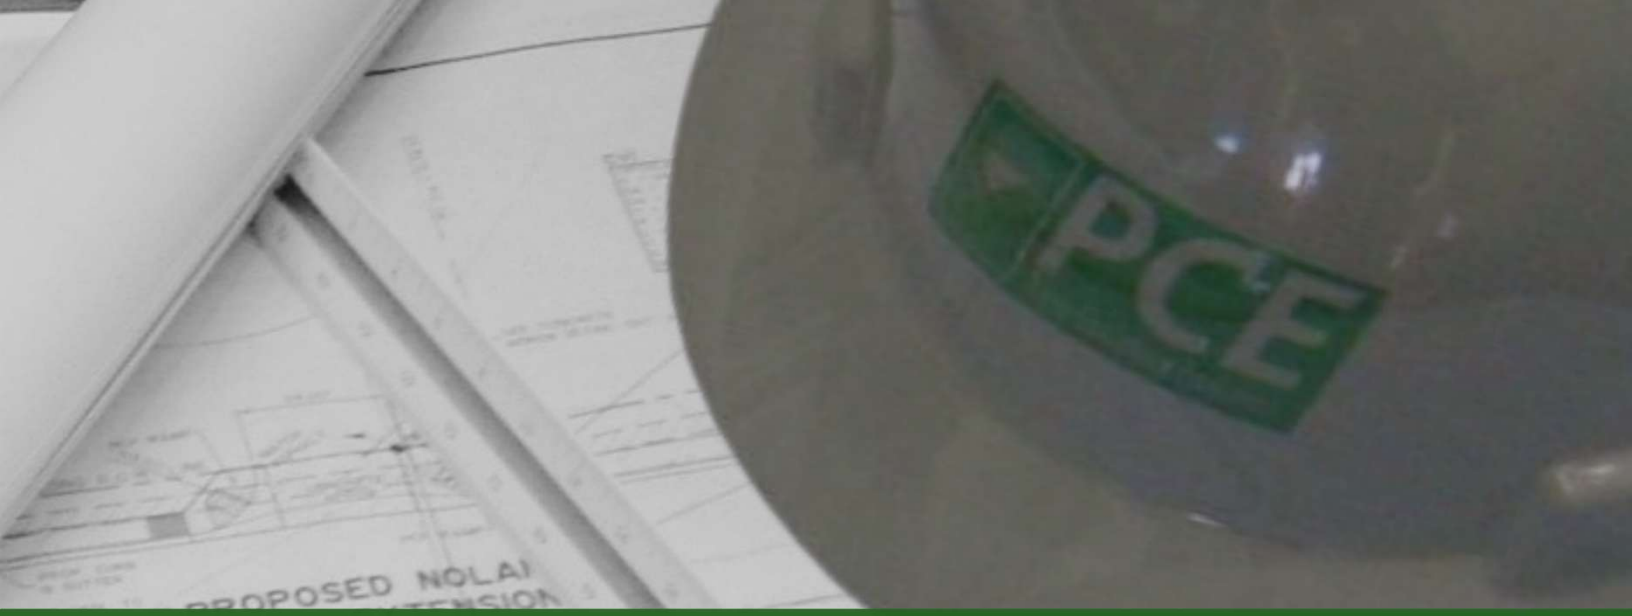
Task 4. Preparation of Plans and Specifications for the reconstruction of the "Balboa Acres Gravity Gate Structure' based on existing City of McAllen Engineering Schematic Designs.

Tasks 3 & 4 are under construction as they were put on hold until funds were available to construct the project.

East San Juan Water Improvements: San Juan, Texas PCE assisted the City of San Juan with engineering design and procurement for construction services in connection to the installation of a main water transmission line at the Cesar Chavez and US Expressway 83 intersection.

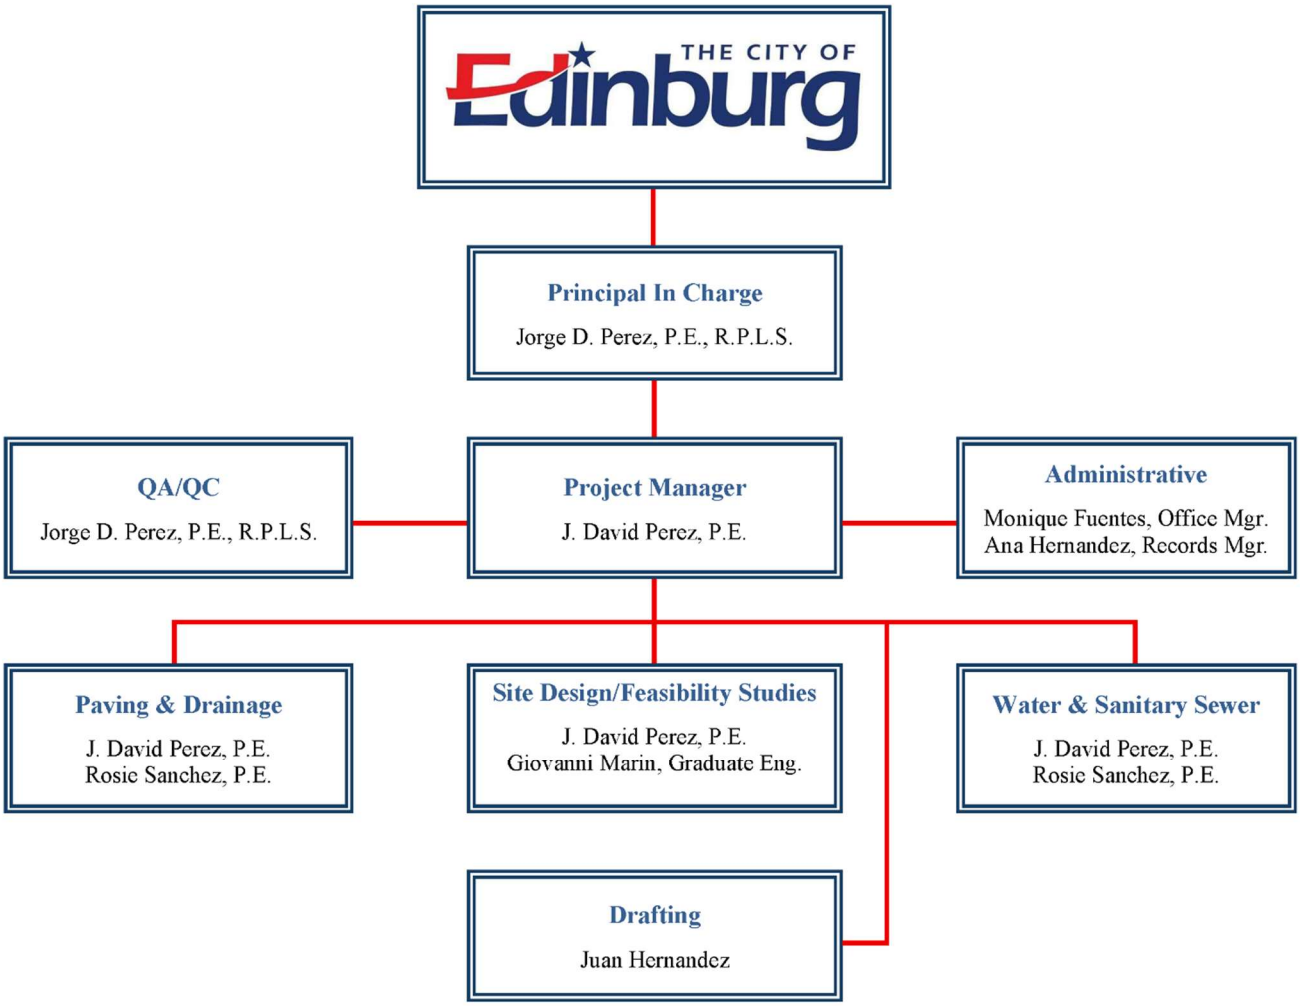
The project's objective was to open cut the west turn-around under the U.S. Expressway 83 overpass at Cesar Chavez in San Juan, TX, to install the water main of the size and class specified in the plans from the southwest corner to the northeast corner of the referenced intersection. From the northwest intersection at said location, the water main will head west for approximately 1,900 linear feet along the north side of the West Bound Frontage Road to connect with an existing water main owned and operated by the City of San Juan.

PCE worked with the Texas Department of Transportation (TxDOT) Pharr Area Office to obtain approval for the open cut request. Some of the main features consist of constructing two cast-in-place reinforced concrete conflict boxes, removal of 1-1/2" of existing asphalt surface pavement to the limits specified in the plans. Re-surface with 1-1/2" compacted TxDOT Item 340 Type D Fine Surface Dense Graded Hot Mix Asphalt Pavement.



16th & Beech Sanitary Sewer Improvements Project; McAllen, Texas - Design of a 6,500 l.f. 30-inch diameter sanitary sewer outfall for the McAllen Public Utility (MPU), McAllen, Texas for the purpose of the abandonment of an existing sanitary sewer lift station constructed in 1927. The new outfall line followed the same alignment as the old existing 24" clay receiving line constructed in the 1950's and found in poor condition.

The construction of this new 30-inch PVC sanitary sewer main was part of the MPU's Master Plan and has eliminated a 4.5 MGD lift station with the construction of this new gravity line, open cut with trench depths up to 30 feet for the contract bid price of $ 4.2M.



The construction of this outfall included a 675 ft. long 26 ft. deep Microtunnel with a 30-inch Hobas tunnel pipe constructed through contaminated areas. The new gravity line alignment went along existing dedicated city streets and through existing commercial and residential areas. Public and private utility adjustments were included at conflict locations. The Project was completed on time and below the original contract amount for a savings of $85,000.

Texas 2015 Floods Disaster Recovery Appropriation - CDBG DR 4245 - City of Lyford Drainage Improvement Projects. These grant applications were recently approved and awarded during the spring of 2018 by the GLO and consists of two (2) drainage projects. Project one focus on addressing drainage deficiency in a previously identified area by the owner and currently is under preliminary design. Estimated budget is $400,000.00 including construction costs and professional fees. The second project is in early stages involving acquisition. Project two focuses in a larger area drainage area and involves construction of a regional detention basin and regional drainage pump station. The estimated budget is $1,000,000.00 including construction and professional fees.

3. Team Member Qualifications and Experience

3. TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

PCE has always been committed to the *"Collaborative Engineering Design Approach"*; that is, we combine the unique individual talents and experience of each member of our Professional Engineering Staff and the City Staff to every design Project to provide the client with the best alternative for his Project and expectations.

Professional Engineers:
J. David Perez, P.E., President
Jorge D. Perez, P.E., R.P.L.S., Senior Engineer and Vice President (PCE)
Rosie Sanchez, P.E., Project Engineer

Registered Professional Land Surveyor:
Jorge D. Perez, P.E., R.P.L.S.

Graduate Engineer:

Biographic Summaries
PCE employees are individuals with diverse, yet complementary, professional backgrounds. Most of our skilled employees have grown with PCE in their careers knowing the commitment to quality that makes this firm prominent and successful. Our firm currently employs Three (3) Professional Engineers, One (1) Graduate Engineer, One (1) Civil CAD/Designer Technician, and Two (2) Administrative/Clerical positions. PCE also employs a part-time EIT to help with workload.

Our Senior Engineer and Principal in Charge, **Mr. Jorge D. Perez, P.E., R.P.L.S.,** has over 50 years of experience working with Local, State, and Federal Agencies. His expertise ranges from Drainage Systems, Pump Stations, Land Development and Municipal Waterworks to Transportation and Public Works. Mr. Perez holds a Bachelor of Science in Civil Engineering from The University of Texas at Austin and is a Registered Professional Engineer and a Registered Professional Land Surveyor in the State of Texas. (See Attached Resume)

Perez Consulting Engineers, LLC also employs two other well-qualified Engineers who have experience in Site Development, Municipal Waterworks, Educational, Aviation, Paving & Drainage, and Transportation Projects.

Mr. J. David Perez. P.E. joined the PCE team in March of 2002. He brings extensive experience in Site Development, Aviation, Municipal Wastewater Treatment and Transportation. As a Project Manager for PCE, Mr. Perez has worked on numerous Educational, Paving & Drainage and Municipal Waterworks projects in this area and has previously worked on Aviation related Projects at the DFW, Laredo, and other County Airports. Mr. Perez holds a Bachelor of Science in Civil Engineering from Texas Tech University. He is a Professional Engineer Licensed in the State of Texas. (See Attached Resume)

Ms. Rosie Sanchez, P.E., joined Perez Consulting Engineers, LLC in July of 2018. She has vast experience in Drainage and Water related projects. As a Graduate Engineer, an Engineer in Training, and now a Professional Engineer for PCE, Ms. Sanchez has worked on numerous projects in Paving & Drainage, Municipal Waterworks, Site Development, and Aviation. (See Attached Resume)

J. David Perez, P.E.

President, Perez Consulting Engineers

Years Experience: With This Firm: 24 With Other Firm: 6.5
Education: B.S., Civil Engineering, Texas Tech University, 1995
Registration: Registered Professional Engineer, Texas # 89429

PROFESSIONAL EXPERIENCE

2002-Present: Perez Consulting Engineers, L.L.C., McAllen, Texas
1996 - 2002: Freese and Nichols, Inc., Fort Worth, Texas

Mr. J. David Perez P.E. joined Perez Consulting Engineers (PCE) in March of 2002. He brings extensive experience in Site Development, Transportation, Municipal Wastewater Treatment and Aviation. As a Project Manager for PCE, Mr. Perez has worked on numerous projects such as Paving & Drainage, Municipal Waterworks and Educational Site Development. In addition, he has previously worked on Aviation related Projects at the DFW and other County Airports.

PROJECTS WITH PCE

- **Bentsen Road (5 Mile Line to 3 Mile Line) McAllen, Texas -** Design engineer for the proposed project which will widen the existing two-lane rural roadway from an average of an 80-ft ROW to a 100-ft ROW Major Collector. The proposed roadway will include the addition of two northbound lanes, two southbound lanes, and a continuous left turn lane with curb, gutter, and an underground drainage system to improve drainage of Bentsen Road. PCE is working closely with the City of McAllen Engineering Department and TxDOT in the design of the project.

- **City of McAllen Drainage Bond 2018 – Group E Projects; McAllen, Texas** – Project Engineer for Group E1 - E7, including Northwest Blueline Regrade, Marigold Ave. Drainage Improvements, N. 12th St. at Esperanza Ave. Drainage Improvements, Harvey Ave. at N. Main St. Drainage Improvements, Iris, Ave. at Cynthia Ave. Drainage Improvements, and East Tamarack Ave. Drainage Improvements. Plans, Specifications, and/or reports were completed for each phase.

  E1 Project included design for new storm sewer, utility relocations and coordination, street paving, traffic control, and channel earthwork along Auburn and Future 33rd Street. The new storm sewer system was designed to alleviate flooding problems along Auburn Avenue west of 29th Street.

  Mr. Perez helped design the additional engineering services which were included by the City of McAllen to minimize flooding along the future 33rd Street north of Auburn Ave to the Ware Ridge Subdivision.

- **San Juan Paving Improvements Phase I; San Juan, Texas -** Rehabilitation of 26 streets to reach new City Standards. Project included extensive coordination by PCE with the City of San Juan to determine the best method for value. Procurement Documents drafted using two methods. The first being the standard Rehabilitation method, most common utilized. The second was an Alternate method utilizing soil stabilizer method, open to any supplier.

- **City of Edinburg Stadium and Dawson Road Drainage; - Edinburg, Texas –** Perez Consulting Engineers was selected to perform a detailed Hydrologic and Hydraulics (H&H) study and report to determine causes of local flooding in the Stadium and Dawson Drive vicinity of the City of Edinburg.

PCE will use the data from our report to design plans to alleviate the flooding in the area. The work will require coordination of the City of Edinburg, Edinburg School District as well as the Hidalgo County Drainage District No. 1.

- **MIA Runway 14-32/Taxiway A Safety Improvements (Hydrologic and Hydraulics Report); McAllen, Texas** – Perez Consulting Engineers (PCE) to perform a comprehensive hydraulic and hydrologic (H&H) study to provide general recommendations for the design of storm drainage facilities within the MIA and on the 10th Street and 23 rd. Street Main Drain adjacent to the McAllen International Airport (MIA) property. With the Results of the H&H, the design engineer will be able to design the proposed facilities appropriately.

- **Bentsen Road (U.S. Expressway 83 to F.M. 495); McAllen, Texas** - Design engineer for 1.75 miles by 65 feet wide of new roadway from U.S. Expressway 83 to F.M. 495 (Pecan Blvd.) including storm drainage, striping and signage, railroad crossing, Storm Water Pollution Prevention Plan, retaining wall design and traffic control.

- **Bentsen Road (F.M. 495 to 3 Mile); McAllen, Texas -** Design Engineer for 2 miles by 65' wide of new roadway from F.M. 495 (Pecan Blvd.) to 3 Mile Line (Buddy Owens) including storm drainage design, irrigation siphon at Daffodil Ave, signage and striping, and a drainage feasibility study.

- **Pin Oak Road; Edinburg, Texas** - Design Engineer for ½ mile of 44-foot-wide new roadway from U.S. 107 to Sprague Ave. Project included paving, drainage, traffic signal and marking & signage plan.

- **City of McAllen Bentsen Road Lift Station, Sanitary Sewer and Waterline Improvements from Expressway 83 to Nolana Avenue; McAllen, Texas-** Design engineer for this $8 Million Dollar project including an 8 MGD fourplex Lift Station with control building, 5,100 feet of 18" force main, 15,000 feet of 16" waterline including appurtenances, 9,195 feet of 30 inch sanitary sewer gravity line ranging from 15'-42' deep, 3,605 feet of 24" gravity sanitary sewer line, 1,800 feet of 18" gravity sanitary sewer line, 7,500 feet of 8"-12" sanitary sewer service line. This project included all existing utility relocations, right-of-way acquisition, TXDOT permitting, deep bores, railroad permit, and traffic control.

- **City of McAllen Bentsen Road Sewer Laterals; McAllen. Texas -** Design Engineer and Project Manager for this $1.5 Million Dollar project including sanitary sewer laterals serving the Bentsen Road service area. The project consisted of 8,700 feet of 12" gravity line, 1,325 feet of 15" gravity line, 1,515 feet of 8" gravity line (all ranging from 10 to 22 feet), boring and jacking, directional drilling, irrigation line relocation and pavement repair. This project also included easement acquisition and TxDOT permitting.

- **City of McAllen Manhole Rehabilitation Project; McAllen, Texas -** Design engineer for the rehabilitation of 27 sanitary sewer manholes along the center of 2nd Street, and Trenton Road. This project included rehabilitating deteriorating concrete manholes by inserting fiberglass liners and new concrete bases.

PROFESSIONAL EXPERIENCE

2001 – Present: **PCE- Perez Consulting Engineers**
1994 - 2000: **Perez/Freese and Nichols, L.L.C.**
1991 - 1994: **PCE - Perez Consulting Engineers**
1972 - 1991: **S.A. Garza Engineers, Inc.**

Jorge D Perez, P.E. has had over 50 years of experience in working with local, state and federal agencies such as the Department of Commerce (Economic Development Agency), H.U.D., Environmental Protection Agency (EPA), Texas Department of Commerce and Community Affairs Block Grants, U.S. Corps of Engineers, Texas Water Commission, Texas Water Development Board, Texas Community Development and Texas Department of Health.

PROJECTS WITH PCE

- **San Juan Paving Improvements Phase I; San Juan, Texas -** Rehabilitation of 26 streets to reach new City Standards. Project included extensive coordination by PCE with the City of San Juan to determine the best method for value.

- **San Juan Subdivision Plans Review; San Juan, Texas -** The Engineer performed review of subdivision plats and engineering plans for infrastructure improvements including paving, drainage, water and sanitary sewer. Engineer also performed periodic visits to assure compliance with the City of San Juan Standard Subdivision Development Guidelines.

- **San Juan City Engineer -** Assisted the City of San Juan Staff in the development of the "Standard Design Guide for Public Infrastructure Improvements" to standardize construction of public works within the City of San Juan. These Standards were implemented by City Ordinance in September 2016.

- **Bentsen Road Reconstruction Project; McAllen, Texas** - This project included the reconstruction of Bentsen Road from a 20 feet wide section to a 65 feet wide urban arterial for 3.8 miles from U.S. 83 to 3 Mile Line (Buddy Owens). Services include feasibility study, drainage study and report, alignment analysis along with associated public meetings, R.O.W. map, and preparation of Plans, Specifications and Estimate (PS&E) including preliminary cost estimates, utility investigations, field surveying, roadway design, and drainage design.

- **S. Bicentennial Blvd; McAllen, Texas** - This project included preparation of plans/specifications for 1500 L.F. of 65 FT. roadway. Also included was storm drainage connecting TxDOT's S. Bicentennial

Blvd. Project and overpass to Wichita Street. Plans included transitions to McAllen-Miller International Airport's main entrance. Total project cost was $881,000.

- **South Sugar Road Paving Project; Edinburg, Texas** - This project included the paving and drainage improvements of South Sugar Road from S.H. 107, southerly to Canton Road in Edinburg, Texas.

- **William Cannon Drive; Austin, Texas** - This project is located on the south area of Austin from Interstate Highway 35 westerly 2 miles. This included the preparation of a preliminary report with an in-depth study of Right-of-Ways, alignment, traffic considerations, at-grade railroad crossing, lighting and irrigation for landscaped medians. Services included preliminary route surveying, right-of-way surveys and document preparation, preparation of alignment surveys, plan and profile plans, drainage plans with drainage area maps, lighting studies, spacing analysis, super elevations, irrigation connections for landscape medians, traffic channel studies, water and wastewater utility adjustments, preparation of steel bores for future utility line crossings and traffic signal conduit preparation.

- **Idela Water Mains Improvement, McAllen, Texas** – Waterline improvements for Idela Subdivision consisting of disconnecting and abandoning existing waterline and replacing with new 8" water loop to serve existing subdivision.

- **Relocation of Water Lines - F.M. 495 - Ware Road to 23rd. Street and South 23rd Street at North Levee. (1996); McAllen, Texas -** Relocation of water lines in connection with the reconstruction and widening of F.M. 495 (Pecan Blvd.) from Ware Road to 23rd Street. Also included was the re-grading of highway cross-sections at the North Floodway Levee on South 23rd Street. In addition, this included 1,900 l.f. 8" PVC water lines, road bores with associated valves, tie-ins and 250 l.f. of 12" PVC water lines at South 23rd.

- **South 10th/Service Center Sanitary Sewer Line Relocations (1998-99); McAllen, Texas -** Relocation and re-construction of existing sanitary sewer lines along the east side of South 10th street between Toronto Avenue and Wichita, and along Wichita Avenue, westerly to the McAllen-Miller International Airport at the new S. Bicentennial Blvd. Project included replacement of existing sanitary sewer lines and abandonment of existing sanitary lift station at the Public Works Service Center with 3250 l.f. of 30", 1380 l.f. of 24", 1600 l.f. of 15" and 100 l.f. of 10" sanitary sewer lines. Also included were all appurtenances and three road bores across S. 10th Street. Total Project Cost is $560,000.

- **30" Sanitary Sewer Outfall Mains, Main Lift Station and 16" Water Line – Bentsen Road; McAllen, Texas –** The project consisted of preparation of plans and specifications for the construction of a 30" sanitary sewer main outfall line and a 16" water transmission line along Bentsen Road from U.S. Expressway 83 to Nolana Avenue. The project also included the construction of a main lift station with an ultimate capacity of 8MGD. The sanitary sewer lines were constructed using the open-cut method with depths ranging from 20 to 45 feet. Ground water was encountered at various locations and mitigated with strategic placing of well points. Construction of the sewer line eliminated two lift stations in the vicinity of Daffodil Avenue. This project provided sanitary sewer service to the western-central parts of McAllen.

- **Arthur Terrace, City of McAllen -** Prepared plans and specifications for the replacement of 820 l.f. 8" PVC Sanitary Sewer Main at Arthur Terrace Subdivision from 36th street to 33rd street along the projection of Gull Avenue.

- **Cameron Park Colonia, Public Utilities Board; Brownsville, Texas -** Perez Consulting Engineers was involved with a joint venture engineering project with Gonzalez Engineering and Surveying Co. of Brownsville, Texas for the design of water and sanitary sewer service for Cameron Park Colonia. The $5.5 Million Project Cost funded in part by the Texas Water Development Board through its Economically Distressed Areas Program (EDAP) Phase II, the Environmental Protection Agency, and the Public Utilities Board of Brownsville. Work included the preparation of an Engineering Design Report, Plans and Specifications for Water and Wastewater lines within the Colonia. This project provided both water and wastewater service to one of the Texas-Mexican Border's largest Colonias.

- **Regional Solid Waste Master Plan; Lower Rio Grande Valley -** Conducted the first Regional Solid Waste Master Plan for Hidalgo, Cameron and Willacy Counties of the Lower Rio Grande Valley. The Master Plan addressed the lack of solid waste management especially in the Colonias. City and colonia leaders were consulted, and various neighborhood meetings were conducted at strategic colonias during the study period to determine particular needs and to inform residents about recycling methods and encouraging the limiting of solid waste volume into landfills. A "Pay-Per-Bag" solid waste collection pilot program was initiated in the South Tower Road Colonia where 5-gallon special coded bags were sold for $ 1.00 for disposal of household waste. The pilot program was implemented to encourage recycling materials such as metals, glass and paper to minimize solid waste volumes going into landfills.

- **City of Edinburg EPA 201 Wastewater Project; Edinburg, Texas -** A $7 Million project funded in part by the Environmental Protection Agency through the Texas Water Development Board. Work included the preparation of a Facilities Plan, Design of Wastewater Collection Improvements, Lift Station Design (4) and design of 1.7 MGD Sewer Treatment Plant. The project provided gravity sanitary sewer service especially for the south and east portions of the City of Edinburg service area. The construction of the line eliminated various lift stations.

B. LIST OF PAST PROJECTS - CITY OF EDINBURG

City of Edinburg Stadium and Dawson Road Drainage; - Edinburg, Texas – Perez Consulting Engineers was selected to perform a detailed Hydrologic and Hydraulics (H&H) study and report to determine causes of local flooding in the Stadium and Dawson Drive vicinity of the City of Edinburg. The work required coordination of the City of Edinburg, Edinburg School District as well as the Hidalgo County Drainage District No. 1

North Water Booster Station Emergency Power Generator Improvements - Jorge D. Perez prepared plans and specifications for the installation of an Emergency Electric Power Generator for the Edinburg North Water Booster Pump Station capable of providing power to 4-100 hp high-pressure potable water pumps and providing pump controls for Pump No. 4.

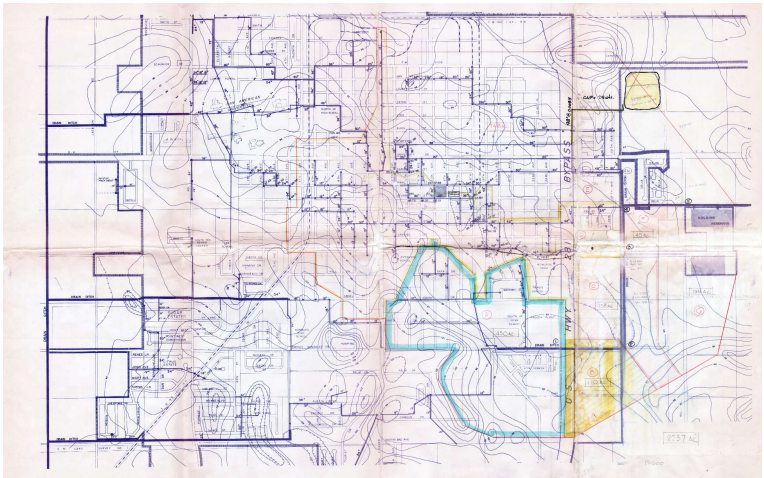
Jackson Point Subdivision Sewer Improvements - Jorge D. Perez prepared plans and specifications for the installation of an 8-inch sanitary sewer line and 4-inch services along Roy Drive to serve Lots 1-10 of the Jackson Point Subdivision, located on the southwest corner of Mile 17 ½ Road and North Jackson Road. The preparations of the engineering plans were based on a topographic survey of the site as prepared by the City of Edinburg's surveyor.

Pin Oak Road - J. David Perez was the design Engineer for ½ mile of 44-foot-wide new roadway from U.S. 107 to Sprague Ave. Project included paving, drainage, traffic signal and marking & signage plan.

"I" Road Spur (U.S. 281 to "I" Road) - Design Engineer for a 41-foot-wide roadway from U.S. 281 to "I" Road including drainage, striping and signage for the Texas Department of Transportation and the City of Edinburg.

City of Edinburg EPA 201 Wastewater Project - A $7 Million project funded in part by the Environmental Protection Agency through the Texas Water Development Board. Work included the preparation of a Facilities Plan, Design of Wastewater Collection Improvements, Lift Station Design (4) and design of 1.7 MGD Sewer Treatment Plant. The projected provided gravity sanitary sewer service especially for the south and east portions of the City of Edinburg service area. The construction of the line eliminated various lift stations.

South Sugar Road Paving Project- This project included the paving and drainage improvements of South Sugar Road from S.H. 107, southerly to Canton Road in Edinburg, Texas



Two major storm water detention facilities - Jorge D. Perez was part of a design team for the San Juan Road Holding Pond and Control/Pump Structure that accommodated drainage for the southeast quadrant of Edinburg, and the Northeast Ponds which regulates flows out of the University of Texas Pan American and adjacent areas. (With another company)

LIST OF PAST PROJECTS – WITHIN THE CITY OF EDINBURG

Mr. Jorge D. Perez, P.E. while managing the Edinburg office of S.A. Garza Engineers from 1976 to 1991 was responsible for the design and construction of two major storm sewer facilities in the city of Edinburg. These projects included the following:

- 1983: Engineering study, design and construction of the drainage pump station to the "Northwest Holding Ponds" designed to minimize flooding within the drainage basin that included the downtown and courthouse square in Edinburg. The City, through the EDC, funding construction of two 20-acre ponds at the intersection of N. Sugar Rd. and Chapin Rd. Since the city's N.W. main 72" outfall was limited to a 18" outfall at the N. main ditch, it became necessary to construct the ponds and pump station with backflow valves to allow the pumps to provide full capacity of the 72" storm main by installing two 17,500 g.p.m. pumps driven by diesel power. This system allowed the full flow to be lifted into the two 20 acre-ponds and later discharged into the storm system after waters subsided.

- 1983-84: Similarly, Jorge D. Perez, P.E. prepared an engineering report, design and construction documents for improvements to drainage for the east section of Edinburg draining into the E**ast Edinburg ditch** with a **drainage area of 2,237 acres** and implementing the "Stormwater Detention Ponds" (San Juan Holding Ponds and now the Birding Center Ponds) with the construction of diesel driven storm sewer pumps, radial gates and backflow sluice gates, capable to prevent storm sewer back-up from the East Edinburg Ditch's downstream areas east of Raul Longoria Road.

RE: RFQ No 2026-7 PROFESSIONAL ENGINEERING SERVICES

Dear City Engineer:

Quintanilla, Headley and Associates, Inc. appreciates the opportunity to submit our Statement of Qualifications for the above mentioned project.

Quintanilla, Headley & Associates, Inc. realizes the City requires a strong project team that is ready to meet the demands associated with its' projects. Our firm provides engineering and land surveying services to both public works and private developers and is ready and willing to commence work for the City of Edinburg. We look forward to working with you.

In order to ensure the success of every project, the firm will

- Conduct business with respect and integrity
- Follow the ethics of our profession
- Strive to meet and exceed the expectations of the County

Should you have any questions, please feel free to call me at (956) 381-6480 or email me at alfonsoq@qha-eng.com.

Respectfully,

Alfonso Quintanilla, P.E., R.P.L.S.

Firm Philosophy

Our firm provides cost effective land surveying and engineering services based on our resources, experience and knowledge. We offer the best of technical performance, high standard of professionalism and integrity to the project.

Firm History

Quintanilla, Headley & Associates, Inc.

Founded in 1986, QHA provides a wide range of engineering and land surveying services throughout the Rio Grande Valley. QHA specializes in land surveying projects for right of way mapping, survey parcels, metes, and bounds descriptions, and topographic surveying. QHA uses the latest equipment and software to ensure we provide the most accurate field data.

QHA is managed by professional individuals who are registered with the Texas Board of Professional Engineers and the Texas Board of Professional Land Surveying. QHA is a certified as a Historically Underutilized Business (HUB).

Firm Capabilities

Our project management objectives are to deliver a final plan on schedule, on budget and one that fits the needs of our clients.

Management and Organizational Approach

Our firm is located in the heart of Hidalgo County. We are very familiar with the geographies of this area. We have a long and successful relationship with the Hidalgo County staff as we have provided them with professional engineering services for a large number of developments throughout the city for the past 25 years. We have a great amount of records and data of the County's existing infrastructure.

QHA understands the County's need to constantly improve on the existing infrastructure for the people of Hidalgo County. We will provide the County with alternatives of the most cost effective systems and design. We understand the requirements of the utility companies and drainage and irrigation districts and we will design all projects in compliance.

Our firm provides full professional engineering, surveying, management, and inspection services. We use the latest equipment for field data collection and engineering design. This gives us the ability to expedite the design of the project and provide an efficient design.

Our principal, Mr. Alfonso Quintanilla is a Licensed Professional Engineer and a Registered Professional Land Surveyor. He will be the principal assigned to this project. Should the project require the acquisition of easements, Mr. Quintanilla has prepared hundreds of survey parcels with metes and bounds descriptions. This is a unique qualification that our firm provides.

Our firm ensures a successful partnership that will meet and exceed the County of Hidalgo's expectations. We will specifically become familiarized with a project by conducting field visits and gathering all information needed to properly design and execute all phases. Our project management objectives are to deliver a final plan on schedule, on budget, and personalized to meet the County's needs.

President

Summary

Mr. Quintanilla has been a licensed professional engineer since 2005. Since then, he has managed and performed numerous civil engineering designs in the areas of roadway design, drainage system design, wastewater collection design, water distribution system design, storm sewer design, drainage studies, and utility coordination. He has performed several engineering projects for City of Edinburg, City of Alamo and Hidalgo County in the past 19 years and has completed all projects on time and within budget.

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: **1742648167100**
Approval Date: **June 27, 2024**
Scheduled Expiration Date: **June 27, 2028**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

QUINTANILLA, HEADLEY AND ASSOCIATES, INC

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **June 27, 2024**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day to day management, operational control, business location) provided in the submission of the business; application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

July 14th, 2026

Mardoqueo Hinojosa, P.E.
Engineering Director / City Engineer
City of Edinburg
415 W. University Drive
Edinburg, TX 78539

Re: RFQ 2026-7 – Request for Qualifications – Professional Engineering Services

Dear Mr. Hinojosa,

Rio Delta Engineering is pleased to submit our Statement of Qualifications for consideration in response to RFQ 2026-7 – Request for Qualifications – Professional Engineering Services. We appreciate the opportunity to be considered for inclusion on the City of Edinburg's rotation list of qualified engineering firms and look forward to continuing our partnership with the city.

Our main office is located at 921 S. 10th Avenue, Edinburg, Texas 78539. As a locally owned and operated engineering and surveying firm, we are committed to providing responsive, high-quality professional services that support the City's continued growth and infrastructure improvements. Our team takes pride in delivering practical, cost-effective solutions while maintaining the level of accessibility and responsiveness that only a local firm can provide.

Rio Delta Engineering has successfully completed numerous infrastructure and municipal projects for the City of Edinburg and throughout Hidalgo and Starr Counties. Our experienced staff provides a comprehensive range of professional services, including planning, civil engineering design, utility design, construction management, project management, construction administration, engineering review, cost estimating, utility coordination, land and topographic surveying, drainage analysis, environmental considerations, permitting assistance, and related engineering support services. We possess the technical expertise, personnel, and resources necessary to successfully deliver projects of varying size and complexity while meeting aggressive schedules and project deadlines.

Our philosophy is centered on collaboration, communication, and client service. We strive to become a trusted extension of our clients' teams by providing innovative engineering solutions, maintaining open communication throughout every phase of a project, and delivering quality work that is completed on time and within budget. We remain committed to utilizing the latest technology and industry best practices to achieve successful project outcomes for the city and its residents.

We sincerely appreciate your consideration of our qualifications and welcome the opportunity to continue serving the City of Edinburg. Should you have any questions regarding our Statement of Qualifications or require additional information, please do not hesitate to contact me at (956) 380-5152, by cell at (956) 263-0934, or by email at ivan@riodeltaengineering.com.

Thank you for your time and consideration. We look forward to the opportunity to continue partnering with the City of Edinburg.

Sincerely,

Ivan Garcia, P.E., RPLS, C.F.M.
Principal
Rio Delta Engineering

SECTION II: Firm Information

Fax: (956) 263-1112

Submittal for: Main Office

Rio Delta Engineering is an engineering firm offering general civil engineering and surveying services in the Lower Rio Grande Valley and South Texas. Our staff has a variety of background experiences ranging from structural adhesives sales to general contracting and oilfield fracking. This varied experience, coupled with our education in Agricultural and Civil Engineering, allows us to apply common sense and a practical approach to our civil engineering services. We've all heard a contractor say" Sure, everything fits fine on paper, but…" when they encounter a design issue that just doesn't work as well in the ground as it does on the plan. At Rio Delta Engineering, our objective is to deliver a civil engineering project to our client that is practical, cost effective, and buildable within the allotted budget and time frame. Our experience on both sides of the project "table" allows us to communicate clearly to everyone involved with a project the objectives of our plans and designs, from the contractor to the system operator, to the Board or Council member, and on up to the funding agencies.

Names, Position, Phone and Fax Numbers of Contact Person:

Depending on the locality of the project, the local office has taken the lead on the project. In this instance, the Edinburg office managed by **Ivan Garcia, P.E., R.P.L.S.**, would be the lead surveyor on any projects. Ivan would provide project management, survey services coordination and supervision. Ivan would also be primarily responsible for on-site inspections and would be the direct contact with the Owner.

Office Number: (956) 380-5152
Mobile Number: (956) 263-0934
Fax Number: (956) 380-5083
E-mail: ivan@riodeltaengineering.com

At Rio Delta Engineering, our objective is to provide quality engineering and surveying services to our client in a timely, professional manner. Our experience in working with a variety of clients, including private developers, municipalities, county agencies, and state agencies has shown us that listening to

the client and understanding his needs is the most important step in the completion of a successful project. To this end, we make it a practice to establish clear and open channels of communication with our clients.

Our firm has completed a variety of different types of projects in South Texas since the company's inception in 2005. The projects range from land development and roadway design, to site-civil for educational institutions, commercial development, sanitary sewer treatment and collection systems, and water treatment and distribution systems. Rio Delta Engineering has completed and is currently working on, numerous Federally and State funded projects for Starr County, Rio Grande City, Union Water Supply Corporation, North Alamo Water Supply Corporation, the City of Escobares, and the City of Roma. These projects include projects funded by the Texas Department of Rural Affairs (TDRA), the Texas Department of Agriculture (TDA), the Texas Department of Transportation (TxDOT), the Texas Water Development Board (TWDB), The Border Environment Cooperation Commission (BECC, EPA-NADBANK), the US Economic Development Agency (EDA), and the United States Department of Agriculture (USDA). The projects include roadway paving projects, extension of sanitary sewer, water distribution system improvements, wastewater treatment plant rehabilitation and new construction, and storm drainage improvements.

Rio Delta Engineering offers professional land surveying services using state-of-the-art technology and equipment. We have an in-house Registered Professional Land Surveyor (RPLS) and can provide prompt responses and full surveying services as may be needed. Some of our deliverables are ALTA, title and boundary surveys, parcel/right-of-way maps for acquisition, appraisals, and condemnation proceedings, metes and bounds/legal descriptions, construction staking for survey alignments of roadways and/or utilities including the establishments of rights-of-way, easements, baselines and legal descriptions, as-built survey, design and construction survey, topographical survey, drone-surveying for aerial photogrammetry and mapping, horizontal and vertical control points (benchmarks) and maps, construction staking, and virtually any surveying and mapping applications our clients have required for their projects.

We also coordinate and perform all surveying activities related to utility conflicts, easement/right-of-way issues, permits, and have experience working with the Hidalgo County Drainage District No. 1, TxDOT, Texas Gas Service, AEP, Spectrum, AT&T, Irrigation Districts, and Magic Valley Electric Coop.

In addition, we have an in-house GIS specialist who plans, develops, and implements systems and databases for storing and accessing geospatial data. We have the capability to create maps and graphs using GIS software and related equipment.

Our approach to projects entails a hefty combination of the latest CADD and GPS technology and equipment, creativity, and an innovative approach towards the problem at hand. By using smartphones and tablets we have implemented an effective line of real time and direct communication within our company and with our clients. We can read and reply to emails immediately, upload/view reports, schedules and photos, have remote access to drawings, budgets, set up meetings, and have live videoconferences to bring solutions and answers to our clients in real time. We also coordinate and perform all surveying activities related to utility conflicts, easement/right-of-way issues, permits, and have experience working with the Hidalgo County Drainage District No. 1, TxDOT, Texas Gas Service, AEP, Spectrum, AT&T, Irrigation Districts, and Magic Valley Electric Coop.

During our 21-year existence, Rio Delta Engineering has dealt with City, County, and State agencies to complete our projects. We can work with any person or entity necessary to move projects forward to successful completion in a timely manner.

Capacity to Perform

We are very familiar with the Hidalgo County design standards and guidelines, as well as County, State, and Federal regulations, policies and procedures to bring projects to completion while complying with any applicable regulations.

We are a local firm with offices in Edinburg and Rio Grande City. We offer our clients the whole range of surveying services while maintaining the local everyday type of availability and service required by our clients. We have an in-house Registered Professional Land Surveyor (RPLS) and can provide prompt responses and full surveying services as may be needed.

We are confident that, if given the opportunity, we can provide a broad scope of expert surveying services, and with the help of our qualified staff we are sure we can become an essential asset for the County.

Familiarity with the Geographical Area

In this instance, the Edinburg's local office has taken the lead on the project. We are very familiar with the issues at hand and have worked on similar projects within Hidalgo and Starr Counties.

Current Workload

Rio Delta Engineering has the capacity to take on any project, large or small. Our current workload is such that we can begin work on any project immediately. We have the equipment and office space available with which to expand our personnel and operations as may be required.

Affirmative Action Program/Equal Employment Opportunity Affirmative Action/Program Statement of Policy:

It is the policy of Rio Delta Engineering to provide equal employment opportunity in full compliance with the Civil Rights Act of 1964, as amended, the Age Discrimination in Employment Act of 1973, the Veterans Readjustment Act of 1974, and the Presidential Executive Orders of Federal Contract Compliance Programs. This provides for equal employment without regard to race, color, religion, sex, national origin, marital status, age, disability, or veterans status.

b. Personnel and Staffing

Names of Principals in The Firm:

Rio Delta Engineering Principals	Titles
Jose Ivan Garcia, P.E., R.P.L.S., CFM	Principal
Julio A. González, Graduate Engineer, CFM	Principal

Key Personnel's Professional Background, Caliber and Availability

One of our key personnel is **Ivan Garcia, P.E., R.P.L.S.,** who has accumulated over 15 years of experience in the civil engineering and surveying field ranging from supervising construction and design of municipal utilities, drainage, and roadway projects, to managing construction projects for the City of Edinburg, the City of Rio Grande City, Hidalgo County, Starr County, Edinburg CISD and Rio Grande CISD, Union Water Supply Corporation, and North Alamo Water Supply Corporation. Because of his extensive background, Ivan possesses unique expertise that will contribute to the project's success. Ivan would be the surveyor out of our local Edinburg office and would provide primary project management and surveying services coordination and supervision. Ivan would also be the direct contact with the Owner.

In the event that one or more key personnel are not available for any reason during the performance period, we have professional relationships with other local surveying firms that would allow us to immediately team up with other experienced and fully qualified professional surveyors and their staff in order to cover for any key personnel that might not be available.

Organizational Chart and Summary of Work to be Performed by each Staff Member

- Ivan Garcia, P.E., RPLS, CFM – Principal
  As the lead surveyor, Ivan would provide primary project management and surveying services coordination and supervision. He would also be primarily responsible for on-site inspections and would be the direct contact with the Owner.

- Julio Gonzalez, Graduate Engineer, CFM – Principal
  Julio would provide survey supervision and inspection and construction management support from the Rio Grande City office and Edinburg office. He would also coordinate survey support for the project

- Gilbert J. Guerra, P.E. -Senior Project Manager
  Gilbert would provide surveying, construction supervision and management support. He would be the secondary contact with the Owner.

- Edwin Pena, Graduate Engineer
  Edwin would provide surveying supervision and inspection support from the Edinburg office.

- Norberto Lopez III, Graduate Engineer
  Norberto would provide inspection support.

- Rusbel Peña, E.I.T.
  Rusbel would also provide design, surveying and construction supervision and inspection support from the Edinburg office.

- Roberto Salinas and David Rodriguez, Survey Crew
  As field data collection specialists, Roberto and David would provide field data collection services and construction staking services, for design and construction phases, respectively.

Administrative Staff	3
Total Personnel	**23**

Team Member Qualifications and Experience (Resumes)

Jose Ivan Garcia, P.E., R.P.L.S.
Principal, Rio Delta Engineering

Education:

Texas A&M University Kingsville, TX, BS Civil Engineering, December 2008

Licensure & Certifications:

Licensed Texas Board of Professional Engineers, December 2013, P.E.#115662

Texas Board of Professional Land Surveying, May 2014, R.P.L.S. #6496

American Institute of Constructors, March 2012, Associate Contractor (AC)

Work Experience:

May 2009 – Present — **Rio Delta Engineering**
Duties: Partner, Civil Engineer, RPLS, Project Manager

- Manages the day-to-day operations of the Edinburg office.
- Supervises the engineering and surveying staff and all engineering design and surveying services.
- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project management for clients, as may be required.
- Attend public meetings to present projects for consideration and approval when required and to provide project updates when necessary.
- Coordinates with City, County, and State agencies on behalf of client throughout the course of completing a project.

Summer 2008 — **Texas Department of Transportation, Pharr, TX 78577**
Duties: Engineering Technician Internship

- Assisted Civil Engineer in application of principles, methods, and techniques of civil engineering technology on the planning and construction of US 83 “Arroyo Roma” bridge, FM 650 “Los Negros Creek” bridge and Garcia St. relocation of utilities in the city of Roma, Texas.

Feb 2006 – Dec 2006 — **CRC Engineering, Inc., McAllen, TX 78504**

Duties: CADD Technician

- Designed and prepared detailed electronic (CAD) working plans for complex projects from observation, measurements, sketches, specifications, and standard layouts provided by customers, consultants, and/or departmental contacts.
- Revised computer-aided designs and plans to comply with modified specifications made during actual construction.

Gilbert J. Guerra, P.E.
Senior Project Manager, Rio Delta Engineering

Education:
Texas A&M University, College Station, TX, BS Agricultural Engineering, May 1985

Licensure & Certifications:
Licensed by the Texas Board of Professional Engineers, July 2002, P.E. #90156
Licensed by the Alabama Board of Professional Engineers, February 2008, P.E. #29229

Military Service:
United States Marine Corps, 1976-1982, Honorable Discharge, E-5

Work Experience:

Jul 2005 – Present — **Gilbert J. Guerra Engineering, LLC dba Rio Delta Engineering**
Duties: Owner, President, Civil Engineer, Project Manager

- Supervises the engineering and drafting staff and all engineering design.
- Coordinates with City, County, and State agencies on behalf of the client throughout the course of completing a project.
- Consultant for Rio Grande City (8yrs)
- Consultant for Union Water Supply Corporation (7yrs)

Feb 2004 – Jun 2005 — **Rio Delta Engineering & Surveying**
Duties: Vice President, Resident Engineer

- Supervised the engineering and drafting staff and all engineering design.
- Coordinated with City, County, and State agencies on behalf of the client throughout the course of completing a project.

Aug 1996 – Feb 2004: — **J.E. Saenz & Associates, Inc., Edinburg, TX**
Duties: Director of Engineering

- Supervised the engineering and drafting staff and all engineering design.
- Coordinated with City, County, and State agencies on behalf of the client throughout the course of completing a project.
- Provided construction management and supervision on City construction projects.
- Provided field engineering services for the City on projects undertaken by City utility and street paving crews.
- Conducted weekly construction progress meetings for City construction projects on behalf of the City.
- Provided engineering reports, certifications, design and permitting services to the City for City construction projects.
- Provided engineering liaison services for TxDOT paving projects, School District projects, and UTPA projects on behalf of the

Julio A. Gonzalez, Graduate Engineer,CFM
Principal, Rio Delta Engineering

Education:

Texas A & M University Kingsville, BS Civil Engineering, December 2010

South Texas College, Associate of Mathematics and Science, May 2008

Work Experience:

July 2011 – Present
Duties:

Rio Delta Engineering
Graduate Engineer, Partner, Project Manager

- Manages day-to-day operations of the Rio Grande City office.
- Supervises the engineering and surveying staff and all engineering
  design and survey services in the Rio Grande City office.
- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project management for clients, as may be required.
- Attend public meetings to present projects for consideration and approval when required and to provide project updates when necessary.
- Coordinates with City, County, and State agencies on behalf of client throughout the course of completing a project.

Jan 2005 – Dec 2008
Duties:

Construcciones en General, Camargo, Tamaulipas
Project Manager

- Supervised site work for paving as well as sewer build outs.
- Prepared bid proposal for project bidding.
- Managed budget and expenses.

Jun 2004 – Dec 2004
Duties:

COMAPA, Camargo, Tamaulipas
Technician

- Performed analysis of potable system and wrote reports on improvements.
- Developed a computerized tracking system to keep records of gage pressures and water pH.

Norberto Lopez, Graduate Engineer, Surveyor -In-Training

Education:

University of Texas, Rio Grande Valley, BS Civil Engineering, May 2017

Work Experience:

March 2018 – Present — Rio Delta Engineering

Duties: **Graduate Engineer**

- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project management and inspection for clients, as may be required.
- Attend public meetings in order to present projects for consideration and approval when required and to provide project updates when necessary.

Edwin Pena, Graduate Engineer

SECTION III: Firms Experience and Qualifications

a.Competency

Professional Engineering Competency

Rio Delta Engineering provides comprehensive professional engineering services to municipalities, counties, utility districts, developers, and public agencies throughout South Texas. Our multidisciplinary team possesses extensive experience in planning, design, permitting, construction administration, project management, and infrastructure improvements for a wide variety of public works and capital improvement projects.

Our engineering expertise includes water distribution systems, wastewater collection systems, lift stations, roadway and pavement design, drainage and stormwater management, subdivision infrastructure, utility coordination, land development, and construction administration. We work closely with our clients to develop practical, cost-effective engineering solutions that meet project objectives while complying with all applicable local, state, and federal regulations.

As a full-service engineering firm, Rio Delta Engineering also offers in-house land surveying, GIS mapping, and utility coordination services. This integrated approach allows our team to efficiently manage projects from initial planning and field investigations through final design, bidding, construction, and project closeout while maintaining consistent communication and quality throughout every phase.

Our experienced staff regularly coordinates with regulatory agencies and utility providers including TxDOT, Hidalgo County Drainage District No. 1, Texas Gas Service, AEP Texas, Spectrum, AT&T, irrigation districts, and other public and private utility providers to successfully resolve permitting, utility conflicts, easement requirements, and right-of-way issues.

To support our engineering services, Rio Delta Engineering utilizes advanced engineering software, GPS technology, GIS mapping systems, drone surveying, and modern data collection equipment to provide accurate, efficient, and reliable project deliverables that meet today's engineering standards.

Capacity to Perform

Rio Delta Engineering possesses the professional staff, technical expertise, and organizational resources necessary to successfully perform multiple engineering assignments while maintaining exceptional quality, responsiveness, and client service.

Our team includes licensed Professional Engineers, a Registered Professional Land Surveyor, Graduate Engineers, Engineering Designers, CAD Technicians, GIS specialists, survey crews, and experienced administrative personnel who work collaboratively to deliver projects from planning and design through construction and project completion.

As a locally owned engineering firm with offices in Edinburg and Rio Grande City, we provide our clients with direct access to our principals and project managers, allowing for rapid response, timely decision-making, and consistent communication throughout every phase of a project. Our local presence enables us to attend meetings on short notice, perform field investigations promptly, and maintain close coordination with City staff and project stakeholders.

Rio Delta Engineering has the capacity to undertake projects of varying size and complexity while meeting aggressive schedules and maintaining the highest standards of excellence in engineering. Our commitment to responsive service, practical design solutions, and sound project management allows us to consistently deliver projects on time and within budget.

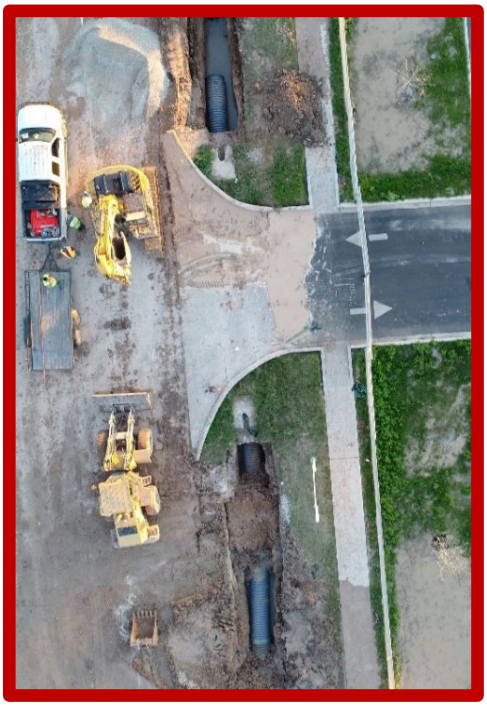
Familiarity with the Geographical Area

Rio Delta Engineering has extensive experience providing professional engineering services throughout the Lower Rio Grande Valley, including Hidalgo County, Starr County, Cameron County, and surrounding communities. Our headquarters in Edinburg provides us with a unique understanding of the region's infrastructure, development patterns, permitting requirements, utility systems, drainage challenges, and regulatory environment.

Our team has successfully completed numerous municipal, county, utility, and private development projects throughout the area, giving us firsthand knowledge of local design standards, construction practices, utility coordination requirements, and agency review processes. This familiarity enables us to efficiently navigate project development, minimize delays, and provide practical engineering solutions that address the unique needs of the communities we serve.

Because of our established relationships with local municipalities, utility providers, regulatory agencies, and contractors, Rio Delta Engineering can respond quickly to project needs and maintain effective communication throughout the life of every project.

Client Service Philosophy



At Rio Delta Engineering, our objective is to provide high-quality professional engineering services in a timely, responsive, and professional manner. We believe that successful projects begin with understanding our clients' goals and maintaining open communication throughout every phase of the project.

Our experience working with municipalities, counties, utility districts, state agencies, and private developers has reinforced the importance of collaboration, accountability, and proactive communication. We strive to become a trusted extension of our clients' teams by delivering practical engineering solutions, providing responsive service, and maintaining the highest standards of technical excellence.

From project initiation through construction completion, our approach emphasizes quality, innovation, regulatory compliance, and client satisfaction. Every assignment receives direct involvement from experienced professionals who are committed to delivering successful projects that serve our clients and the communities in which they live.

b. Experience and Recent Projects

1. City of Edinburg – Northeast Doolittle Road Area Drainage

This project consisted of the construction of various drainage improvements, including, but not limited to, approximately 2,200 L.F. of 36" and 24" storm drain gravity lines, 2,800 L.F. of excavation/fill and re-grading of roadside ditch, and related improvements to alleviate flooding along Doolittle Road between Rogers Road and Russell Road. The improvements were completed at a cost of approximately $387,000 and have been fully operational since March 2019. Rio Delta Engineering was responsible for all design and construction surveying services required for this project.

Contact: **Mardoqueo Hinojosa, P.E., CFM, CPM**
City of Edinburg
(956) 388-8211
415 W. University Dr.
Edinburg, Texas 78541

2. City of Roma, Efren Ramirez Paving and Drainage Paving Improvements

This project consists of widening and paving approximately 2,315 lf of Efren Ramirez Street in Roma, Texas. The work involved includes installing approximately 5,630 lf of drainage improvements and constructing a new 37' B-B street section with curb and gutter. The total cost of this project is estimated to be approximately $1,921,769.00 including environmental assessment, R.O.W. acquisition, engineering, testing, inspection, and construction management. The funding for this project will be
provided by the United States Department of Agriculture. All funding applications, environmental investigations, and engineering design have been completed. The R.O.W. acquisition is also in the final phases of completion. The project is scheduled to be put out for bid within the next few months. Rio Delta Engineering was responsible for preliminary engineering reports, environmental investigation, engineering design, and surveying services for design and R.O.W. acquisition. We will also be responsible for bidding, construction inspection, testing, and project management.

City Manager, City of Roma
(956) 849-1411
P.O. Box 947
Roma, Texas 78584-0947

3. North Alamo Regional Wastewater Treatment Plant and Collection System

This project consisted of constructing a new 0.5 mgd activated sludge wastewater treatment plant for North Alamo WSC. The plant is the first phase of what will ultimately be a 20-mgd plant located at the intersection of Minnesota and Goolie roads in Hidalgo County. This initial phase cost $13 million, including planning, acquisition, design, testing, permitting, and construction management. This project was funded jointly by the Texas Water Development Board (TWDB), the Border Environmental Cooperation Commission (BECC/NADBANK), and the Texas Department of Agriculture (TDA). The collection system consisted of approximately 32,000 linear feet of gravity sanitary sewer lines, approximately 15,000 linear feet of force main lines, and four sanitary sewer lift stations. This project provides sanitary sewer service to 471 families in six Colonias and will establish the backbone for future expansion and connections within the projected 50 square-mile service area. On this project we coordinated and performed all surveying activities related to utility design, construction staking, as-builts, horizontal and vertical control establishment and verification, conflicts, easement/right-of-way issues, permits, with TxDOT, Hidalgo County Irrigation District #2, Donna Irrigation District, Hidalgo County Drainage District No. 1, Texas Gas Service, AEP, Spectrum, and AT&T.

Steven Sanchez
General Manager, North Alamo WSC
(956) 383-1618
420 S. Doolittle Road
Edinburg, Texas 78542

4. Starr County, Disaster Recovery 2.2, General Land Office (GLO) Paving and Drainage Improvements

This project consisted of providing paving and drainage improvements at various locations in Starr County. The work included constructing paving and drainage improvements for one street in Pct #4, constructing paving and drainage improvements including a 1.5-acre detention pond in Pct #3, and constructing a pilot channel for approximately 1.5 miles of Los Morenos Creek in Pcts #1 and 2. The total cost of this project was approximately $1,100,000.00, including R.O.W. acquisition, engineering, testing, inspection, and construction management. The funding for this project was provided by the Disaster Recovery Fund 2.2 administered by the Texas General Land Office. All work has been completed except for the pilot channel for Los Morenos Creek. Negotiations for the acquisition of R.O.W. for these proposed improvements have been onerous due to the lack of clear title for most of the properties in this area. This area is in “undivided” Porciones. The project will have to be closed out by the end of the year with whatever progress has been accomplished at that time. Rio Delta Engineering was responsible for all design, bidding, testing, surveying services for appraisal and acquisition activities, and construction management.

5. Union Water Supply Corporation (UWSC) Water System Improvements

This project was split up into two contracts. The first consisted of the installation of approximately 27,000 linear feet of new water distribution lines ranging in size from eight inches to sixteen inches, the installation of two altitude valves for two existing elevated water storage tanks, and approximately 240 service reconnections. This project provided an upgrade to a distribution system that consisted mainly of six-inch lines. The water line improvements have been completed at a cost of approximately $1,527,000.00 and is fully operational. The second contract consisted of replacing approximately 1,900 old meters with new electronic meters and a remote read system at a cost of approximately $937,889.00. The total cost of this project is approximately $2,950,000.00, including engineering, testing, inspection, and construction management. This system is in place and working and has enabled UWSC to read all the meters from the office. Meter reading used to take two people two weeks to complete because of interruptions to the process during service calls. Water loss has been greatly reduced, and labor costs associated with the meter reading have decreased markedly since the new system has been in place. Both projects were funded by TWDB. Rio Delta Engineering was responsible for all planning, funding applications, design, permitting, land surveying for easement, right-of-way and parcel acquisition, bidding, and construction management.

   Former District Architect
   Edinburg Consolidated Independent School District (ECISD)

   Back in 2019 our firm completed surveys, design, plans and specifications for a new band practice field, which included the installation of artificial turf and site drainage improvements within Robert Vela Highschool. This project was bid out but never awarded and canceled due to insufficiency of funds to complete the project and start of the COVID pandemic. Mr. Estrada was the District Architect at the time.

SECTION IV: Scope of Services

A.List of Services

Rio Delta Engineering provides a comprehensive range of professional engineering, surveying, and construction administration services to municipalities, counties, utility districts, developers, and public agencies throughout South Texas. Our multidisciplinary team has the technical expertise, personnel, and resources necessary to successfully deliver projects from planning and design through construction and project closeout.

Our professional services include, but are not limited to:

Civil Engineering

- Municipal infrastructure planning and design
- Engineering studies and feasibility analyses
- Capital Improvement Program (CIP) support
- Utility coordination
- Cost estimating and budgeting
- Project management

Water & Wastewater Systems

- Water distribution system design
- Wastewater collection system design
- Lift station design and rehabilitation
- Waterline and sanitary sewer improvements
- Utility extensions and replacements
- Hydraulic analysis

Roadway & Transportation

- Roadway design and reconstruction
- Change order evaluation
- Final inspections
- Record drawings (As-Builts)
- Street improvements
- Pavement rehabilitation
- Sidewalk and ADA improvements
- Traffic circulation improvements
- Construction plans and specifications

Drainage & Stormwater

- Storm drainage system design
- Detention and retention facilities
- Drainage studies
- Flood mitigation improvements
- Hydraulic and hydrologic analysis
- Erosion control measures

Construction Administration

- Construction observation
- Resident project representation
- Shop drawing and submittal review
- Requests for Information (RFI) responses
- Pay application review

Surveying & Geospatial Services

Rio Delta Engineering maintains an in-house Registered Professional Land Surveyor (RPLS) and provides a full range of professional surveying and mapping services that support engineering design and construction.

B. Narrative

Experience & Commitment

For more than 20 years, Rio Delta Engineering has successfully partnered with municipalities, counties, utility districts, school districts, developers, and state agencies throughout South Texas. Our experience working with City, County, State, and Federal agencies has provided our team with a comprehensive understanding of regulatory requirements, funding agency procedures, utility coordination, permitting, and construction administration.

Our commitment is to deliver practical, innovative, and cost-effective engineering solutions while maintaining the highest standards of professionalism, responsiveness, and client service. We understand the importance of completing projects on schedule, within budget, and in full compliance with applicable regulations, and we remain dedicated to becoming a trusted engineering partner for the City of Edinburg.

Project Approach

Our Approach to Successful Project Delivery

Rio Delta Engineering is committed to delivering responsive, practical, and cost-effective engineering solutions through a collaborative project management approach. Our team works closely with City staff, regulatory agencies, utility providers, and project stakeholders throughout every phase of project development to ensure successful project delivery while maintaining quality, schedule, and budget
objectives. Our approach emphasizes proactive communication, technical excellence, regulatory compliance, and timely decision-making to minimize project risks and maximize project success.

Planning & Preliminary Engineering

During the planning and preliminary design phase, Rio Delta Engineering will:

- Conduct project kickoff and coordination meetings with City staff, regulatory agencies, utility providers, and other project stakeholders.
- Review available project information, existing infrastructure, utility records, surveys, and applicable design standards.
- Perform site investigations, engineering evaluations, and field verification as necessary.
- Prepare preliminary engineering studies, conceptual layouts, and alternative analyses to support project development.
- Coordinate with utility companies, drainage districts, TxDOT, irrigation districts, and permitting agencies to identify potential conflicts and project requirements.
- Perform topographic surveys, boundary surveys, easement exhibits, and right-of-way mapping as required to support engineering design.
- Develop preliminary cost estimates and project schedules for budgeting and planning purposes.

Engineering Design

Upon approval of the preliminary concepts, our engineering team will:

- Prepare complete engineering plans, specifications, and construction documents.
- Design water, wastewater, roadway, drainage, and utility infrastructure in accordance with applicable local, state, and federal standards.
- Coordinate utility relocations, easement requirements, and permitting activities.
- Prepare engineer's opinions of probable construction cost.
- Provide quality assurance and quality control reviews prior to project submittals.
- Coordinate with City staff throughout the review process and promptly address review comments.

Construction Phase Services

During construction, Rio Delta Engineering will provide comprehensive engineering support including:

- Construction administration services.
- Construction observation and field inspections.
- Review of shop drawings and material submittals.
- Responses to Requests for Information (RFIs).
- Review and evaluation of contractor pay applications.
- Evaluation of change orders and contract modifications.
- Coordination meetings with contractors, utility providers, and City representatives.
- Construction staking coordination and survey support as required.
- Preparation of record drawings (As-Builts) upon project completion.
- Final project inspections and project closeout assistance.

Technology & Project Delivery

Rio Delta Engineering utilizes the latest engineering and surveying technologies to improve project efficiency, accuracy, and collaboration.

Our engineering team uses **AutoCAD Civil 3D** as its primary design platform and has the capability to provide deliverables in multiple electronic formats to meet client requirements. Our integrated engineering, surveying, GIS, and CAD teams work collaboratively between our Edinburg and Rio Grande City offices, allowing us to efficiently allocate resources and maintain project schedules. Through advanced GPS equipment, drone technology, GIS mapping, cloud-based collaboration tools, and digital project management systems, Rio Delta Engineering delivers

accurate, timely, and cost-effective engineering solutions while maintaining clear communication with our clients throughout every phase of the project.

Ability to Commence Services

Rio Delta Engineering has the professional staff, technical resources, and organizational capacity to begin work immediately upon execution of a professional services agreement.
Our current workload allows us to dedicate experienced engineering, surveying, and project management personnel to new assignments while maintaining the responsiveness and level of service our clients expect. Because our principals remain actively involved in every project, we are able to make timely decisions, respond quickly to client requests, and maintain project momentum from project initiation through completion. Whether the assignment involves planning, design, construction administration, surveying, or project management, Rio Delta Engineering has the personnel, equipment, and experience necessary to successfully meet project schedules and deliver high-quality professional engineering services.

Legal Documents

Insurance:
General Liability ($2,000,000.00)
Professional Liability ($2,000,000.00)
Umbrella/Excess Liability ($1,000,000.00)
Commercial Auto ($1,000,000.00)
Workers Compensation ($500,000.00)

Pending Litigation:

Rio Delta Engineering is not currently under any type of legal litigation related to any professional services rendered by the firm.

Professional Services Agreement:

The Professional Services agreement has been read, and we will meet the pre-requisite insurance requirements. If selected, we agree to enter into such agreement.

Statement of Conflicts:

No potential conflicts of interest are identified.

RE: RFQ 2026-7, Professional Engineering Services

To Whom It May Concern:

Rummel, Klepper & Kahl, LLP (RK&K) is pleased to submit this Statement of Qualifications and express our strong interest in partnering with the City of Edinburg. Since our founding in 1923, RK&K has provided planning, engineering, environmental, and construction phase services to state departments of transportation, municipalities, and other public agencies. From a single office with two employees, RK&K has grown into a nationally recognized firm of more than 2,000 professionals operating from over 40 offices across 13 states and the District of Columbia.

What has not changed over the past century is our commitment to responsive client service and technical excellence. Our one-profit-center business model allows us to quickly mobilize the right resources from across the firm to meet our clients' needs, regardless of project size or complexity. To better serve Texas communities, RK&K established offices in Austin in 2019 and McAllen in 2025, reinforcing our long-term commitment to the Rio Grande Valley.

In the last two years alone, RK&K has delivered more than 9,000 assignments under over 240 on-call contracts for municipalities and public agencies. In Texas, our team provides transportation planning, environmental services, schematic development, plans, specifications, and estimates (PS&E) preparation, traffic engineering, construction phase services, and toll operations. Backed by nearly 250 years of combined Texas experience, our leadership team brings deep technical expertise, local knowledge, and a proven history of successfully delivering projects throughout the state.

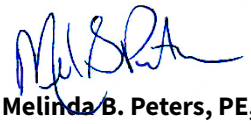
Our team will be led by Mike Miranda, PE, PTOE, who will serve as the City's primary point of contact. A Rio Grande Valley resident for nearly 35 years, Mike offers a unique blend of municipal, state, and private-sector experience. During 12 years in public service with the City of McAllen and the TxDOT Pharr District, he developed extensive knowledge of local infrastructure challenges and built strong relationships with agencies and stakeholders throughout the region. Over the past seven years in private consulting, he has continued to provide high-quality engineering solutions to public sector clients. Mike also serves on the national committee that works with the Federal Highway Administration to develop and update the Manual on Uniform Traffic Control Devices, helping shape traffic engineering standards nationwide. Mike's combination of local experience, technical expertise, and national leadership is a significant asset to the City of Edinburg. Supported by RK&K's extensive resources and multidisciplinary expertise, he will lead a team that serves as a trusted extension of City staff, delivering practical, responsive, and cost-effective solutions that support the City's goals and enhance quality of life for its residents.

As an authorized representative of RK&K and a licensed Professional Engineer in Texas (PE No. 133328), I have the authority to negotiate and contractually bind the firm.

Thank you for your consideration. We appreciate the opportunity to present our qualifications and look forward to discussing how RK&K can support the City of Edinburg's continued growth and success.

Respectfully Submitted,

RK&K



Melinda B. Peters, PE, CCM | Partner

FIRM
QUALIFICATIONS & EXPERIENCE

RESPONSIVE PEOPLE | CREATIVE SOLUTIONS

RK&K has been a trusted planning, engineering, and construction inspection/management consultant since 1923, delivering innovative, community-focused solutions to complex infrastructure challenges across the United States. Guided by our principle of "Responsive People | Creative Solutions," our teams deliver thoughtful, efficient solutions that address immediate project goals while positioning our clients and communities for long-term success.

With more than 2,000 professionals in over 40 offices, including in McAllen and Austin, we combine the depth and resources of a national firm with the responsiveness and personal attention of a local partner, allowing us to consistently deliver successful projects on time and within budget. Our track record of providing quality services and meeting client objectives and has repeatedly earned us a spot on Engineering News-Record's Top 500 Design Firms list.

> RK&K's Texas leadership team brings more than 250 years of multi-discipline experience spanning the full project lifecycle.

Our work in the last two years has run the gamut from environmental and planning services to transportation design, construction administration and management, and toll operations. These services have been delivered through on-call contracts similar to this one, as well as through project-specific agreements.

RK&K has identified the following core services as the areas where our Texas team can provide the greatest value to the City.

These selected services leverage our deep local experience, specialized technical capabilities, and successful track record delivering similar projects for governmental agencies in Texas and across the US.

RK&K's relevant qualifications and experience for each are described in the following pages.

STREET INFRASTRUCTURE EVALUATION & IMPROVEMENTS

STRUCTURAL ENGINEERING (IMPROVEMENTS & DESIGN)

HYDROLOGY & HYDRAULICS

TRAFFIC ENGINEERING

TRAFFIC SIGNAL DESIGN

ENVIRONMENTAL ENGINEERING

STREET INFRASTRUCTURE EVALUATION & IMPROVEMENTS

Street and roadway design is at the core of RK&K's business. Having delivered hundreds of roadway projects in the past two years, our team brings proven expertise in all phases of street and roadway design—including concept development, alternatives analyses, cost estimating, traffic modeling, operational analyses, schematic design, final design (preparation of PS&E), utility coordination, and construction support. We design safe, efficient, and cost-effective roadway, drainage, traffic, pedestrian, and bicycle improvements that enhance mobility while balancing operational, environmental, and community needs. All work is performed in accordance with applicable local, state, and federal standards.

PROJECT SPOTLIGHT

STREET INFRASTRUCTURE PROJECTS
Montgomery County, MD

For nearly 30 years, RK&K has been a trusted engineering partner to Montgomery County, MD, supporting a task order-based program through seven consecutive contracts and more than 150 assignments, including numerous projects completed within the past two years. Our team has provided planning, design, and construction support for projects ranging from roadway, intersection, drainage, and multimodal improvements to complex transportation infrastructure initiatives.

This long-standing partnership reflects RK&K's ability to deliver dependable, scalable engineering services while helping clients advance transportation, safety, and infrastructure priorities as needs arise.

Representative assignments include the East Gude Drive Roadway Improvements project, where RK&K provided preliminary and final engineering, intersection upgrades, ADA-compliant pedestrian facilities, drainage improvements, and construction-phase services through project completion in 2024, as well as numerous corridor and intersection improvement projects delivered under on-call task orders.

RK&K provided design and construction-phase services for the East Gude Drive Roadway Improvement project.

RK&K provided design and construction-phase services for the East Gude Drive Roadway Improvement project.

STRUCTURAL ENGINEERING (IMPROVEMENTS & DESIGN)

RK&K's structural engineers provide comprehensive services for bridges, retaining walls, culverts, drainage structures, utility tunnels, and other critical infrastructure—from planning and feasibility studies through final design, inspection, and construction support. Since our founding, we have designed more than 1,000 bridges and structures, including approximately 30 completed within the past two years.

Our team delivers practical, cost-effective, and context-sensitive solutions that balance constructability, aesthetics, environmental considerations, and long-term performance. We have experience with projects ranging from single-span crossings to complex multi-span bridges and routinely address structural repairs, inspections, hydraulic considerations, right-of-way impacts, and stakeholder-driven design requirements.

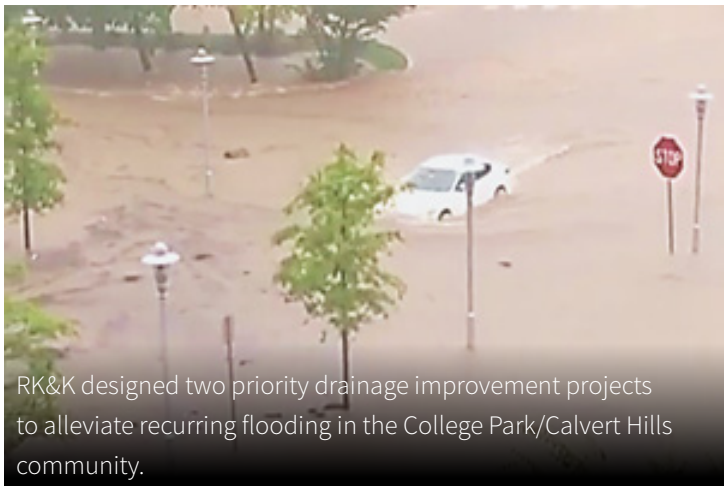
RK&K also maintains a team of NHI-certified bridge inspectors experienced in evaluating bridges, tunnels, retaining walls, stormwater structures, parking garages, and ancillary transportation assets in accordance with National Bridge Inspection Standards. Through every phase of project delivery, we emphasize collaboration, quality, and regulatory compliance to deliver safe, durable infrastructure that meets owner objectives and community needs.

PROJECT SPOTLIGHT

FRANCIS SCOTT KEY BRIDGE RECONSTRUCTION
Maryland Transportation Authority (MDTA)

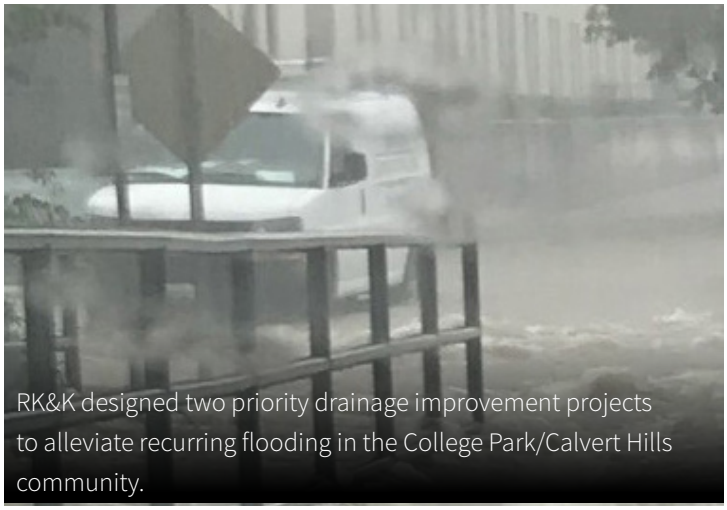
Following the collapse of Baltimore's Francis Scott Key Bridge in March 2024, Maryland turned to RK&K to help advance recovery and replacement efforts for this critical transportation link. Our team provided expedited environmental studies and permitting support for both debris removal and bridge replacement, while also leading public involvement, stakeholder outreach, and agency coordination. Due to the scale and urgency of the project, the replacement bridge was divided into three design sections, with RK&K selected to lead the design of one segment. We are honored to support MDTA in rebuilding this iconic structure and restoring a vital connection for the region.

RK&K is honored to be one of three teams selected to design and construct a segment of the replacement Francis Scott Key Bridge.



HYDRAULICS & HYDROLOGY (H&H)

RK&K provides comprehensive hydrology, hydraulics, drainage, and flood mitigation services backed by a multidisciplinary team of engineers, hydrogeologists, and environmental scientists. Over the past two years alone, we have completed more than 50 H&H studies, drainage designs, and floodplain analyses for transportation and infrastructure projects.



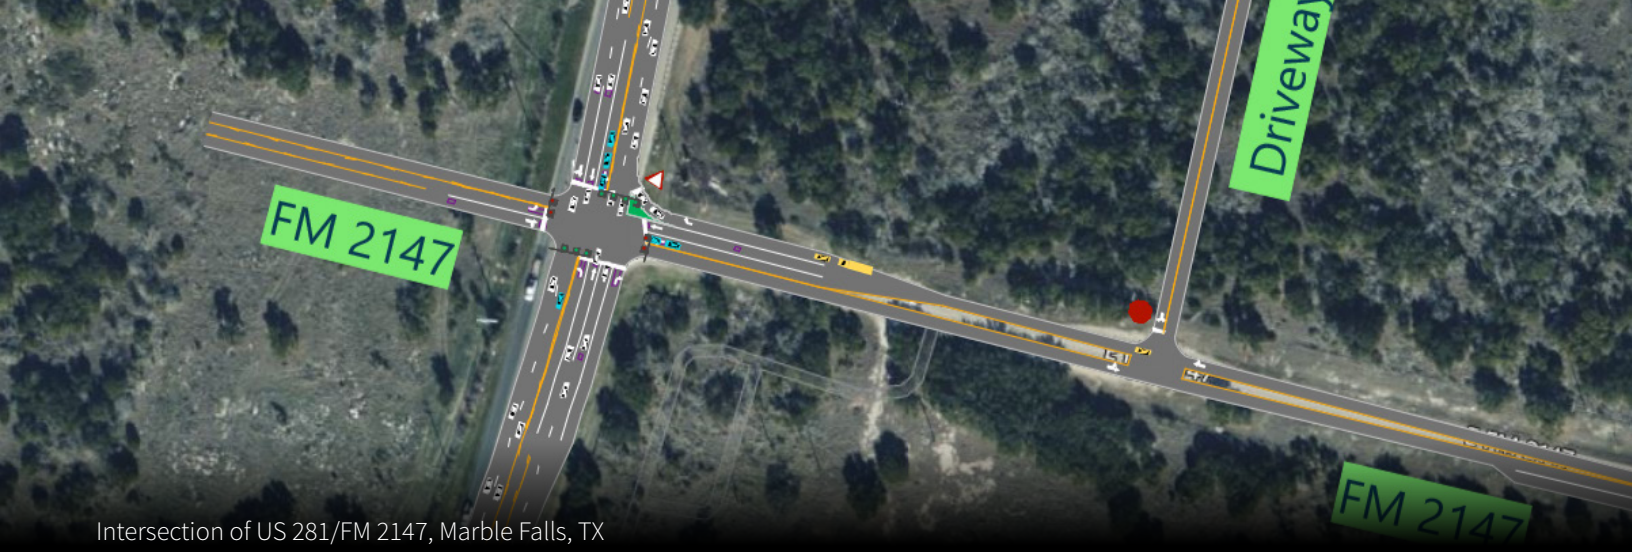
H&H Studies. RK&K performs advanced 1D and 2D H&H modeling using industry-leading tools such as HEC-RAS, HEC-HMS, and TUFLOW. Our services include floodplain analysis, watershed modeling, drainage evaluations, and stormwater management assessments that support informed, data-driven decisions.

Drainage Design. From planning through final design, RK&K develops efficient, constructible drainage solutions that optimize system performance while minimizing impacts. Our experience spans urban and rural settings and includes storm sewer systems, culverts, conveyance systems, and stormwater management facilities designed in accordance with local and state requirements.

Flood Control & Mitigation. RK&K helps communities improve resilience through floodplain management, stormwater conveyance and treatment, stream restoration, and innovative BMP implementation. Our team routinely performs floodplain analyses and develops FEMA Letters of Map Revision (LOMR) and LOMR applications, delivering practical solutions that reduce flood risk while protecting critical infrastructure and natural resources.

RK&K designed two priority drainage improvement projects to alleviate recurring flooding in the College Park/Calvert Hills community.

RK&K designed two priority drainage improvement projects to alleviate recurring flooding in the College Park/Calvert Hills community.



PROJECT
SPOTLIGHT

COLLEGE PARK/CALVERT HILLS FLOODING FEASIBILITY STUDY & DRAINAGE IMPROVEMENTS
Prince George's County, MD

Located just south of the University of Maryland, the College Park/Calvert Hills corridor has experienced recurring flooding due to rapid development, increased impervious surfaces, and backwater impacts from Paint Branch. These flooding events have resulted in road closures and damage to businesses and residential properties.

RK&K conducted a comprehensive flood mitigation study of the nearly one-square-mile watershed, evaluating drainage system performance, hydraulic connectivity, and environmentally beneficial improvement alternatives using advanced H&H modeling tools.

The study identified multiple flood reduction solutions, four of which advanced to final design. RK&K completed final design for two priority drainage improvement projects and continues to provide construction phase services to help reduce flooding risks and enhance community resilience.

Intersection of US 281/FM 2147, Marble Falls, TX

TRAFFIC ENGINEERING

RK&K provides a comprehensive suite of traffic engineering services that deliver safe, efficient, and context-sensitive transportation solutions. Over the past two years, RK&K has completed thousands of traffic engineering assignments, supporting clients with planning, analysis, design, and implementation services across diverse transportation systems.

Traffic Operations & Analysis: RK&K evaluates the performance of intersections, interchanges, and roadway networks through traffic studies, operational analyses, capacity assessments, crash evaluations, travel forecasting, and simulation modeling to identify practical mobility improvements.

Safety, Access & Innovative Intersection Improvements: RK&K develops data-driven solutions that enhance safety and mobility for all roadway users. Our experience includes access management, intersection control evaluations, signal warrant analyses, roundabouts, reduced conflict intersections, median U-turns, pedestrian and bicycle accommodations, traffic calming measures, and corridor-wide safety enhancements.

Traffic Design & Construction Support: RK&K delivers traffic engineering design services from concept through construction, including signing and pavement marking plans, traffic signal improvements, traffic control plans, traffic control staging, ITS coordination, lighting coordination, and construction-phase support.

PROJECT SPOTLIGHT

TRAFFIC ENGINEERING AND ITS IDIQ

TxDOT Austin District

RK&K has successfully delivered more than 60 on-call traffic engineering assignments for the TxDOT Austin District, providing expertise in traffic impact analysis (TIA) reviews, Synchro and VISSIM modeling, sight distance evaluations, signal warrant analyses, and signal timing optimization. Our team conducts comprehensive peer reviews of developer-submitted TIAs, validates safe access and driveway locations, and evaluates the effectiveness of proposed mitigation measures.

RK&K serves as a trusted advisor in reviewing and coordinating new traffic signals with local agencies and TxDOT, while actively participating in weekly district traffic signal committee meetings to support stakeholder alignment and decision-making. The team has also played a key role in implementing TxDOT's Intersection Control Evaluation (ICE) process, completing numerous evaluations throughout the district.

A notable example is the US 281 corridor, where RK&K conducted Stage 1 and Stage 2 ICE evaluations for multiple intersections, including US 281/FM 2147. These analyses helped establish preferred intersection configurations along a rapidly developing corridor, supporting safer and more efficient operations as future growth occurs.

TRAFFIC SIGNAL DESIGN

RK&K provides comprehensive traffic signal design, modification, and upgrade services that improve safety, visibility, and operational efficiency for motorists, pedestrians, and bicyclists. Our designs balance agency standards, ADA requirements, existing infrastructure, constructability, maintenance, and future system needs. Since our inception, RK&K has designed hundreds of traffic signals, including approximately 500 during the past two years.

Signal Operations & Justification Support: RK&K supports project development with signal warrant analyses, phasing evaluations, clearance interval and preemption calculations, detection strategies, pedestrian accommodations, and signal timing recommendations. Our work is developed in accordance with applicable TMUTCD, TxDOT, and local agency requirements.

Signal Design, Replacements & Upgrades: RK&K prepares complete signal plans for new and existing intersections, including signal replacements, mast arm upgrades, signal head placement, controller cabinets, conduit and wiring systems, detection, accessible pedestrian signals, pedestrian push buttons, signing and pavement markings, phasing diagrams, and timing plans.

ITS, Communications & Construction Coordination: RK&K integrates traffic signal improvements with ITS and communications infrastructure, including fiber networks, CCTV, video detection, lighting enhancements, and corridor-wide signal systems. Our approach emphasizes system compatibility, maintainability, scalability, and seamless coordination with construction phasing and traffic control requirements.

RK&K is advancing Henrico County's transportation network through upgrades at more than 120 signalized intersections.

PROJECT SPOTLIGHT

ADVANCED TRAFFIC MANAGEMENT SYSTEM (ATMS) PHASE 2 IMPROVEMENTS

Henrico County, VA

RK&K is leading the design of a major traffic signal modernization program for Henrico County, advancing the County's transportation infrastructure through upgrades at more than 120 signalized intersections. The project includes TS-2 cabinet conversions, uninterruptible power supply installations, video detection systems, fiber optic communications infrastructure, electrical service upgrades, and the replacement of aging span-wire signals with modern mast arm installations.

RK&K's services include field inventory, condition assessments, GIS-based data collection, environmental compliance, utility coordination, final design, and construction support. The RK&K team also developed the County's transition strategy from leased communications lines to a fiber optic network, improving reliability while reducing long-term operating costs.

During implementation, RK&K provides signal turn-on support, timing verification, communications testing, and staff training on signal operations, fiber communications, and detection technologies. This project demonstrates RK&K's ability to deliver complex traffic signal and ITS design solutions that improve safety, reliability, and operational performance.

Intersection of Ronald Reagan Boulevard and RM 2338, Williamson County, TX

ENVIRONMENTAL ENGINEERING

RK&K's full-service environmental team includes more than 120 planners, scientists, biologists, historians, archaeologists, noise analysts, and air quality specialists. Over the course of the past two years, RK&K has secured environmental clearance and/or secured required environmental permits for dozens of projects of varying sizes, scopes and complexities.

Environmental Planning & NEPA Compliance: RK&K prepares environmental documentation and technical studies for federally, state, and locally funded projects, including categorical exclusions, environmental assessments, environmental impact statements, re-evaluations, and due diligence studies. Our team is experienced in meeting TxDOT requirements and coordinating complex environmental review processes.

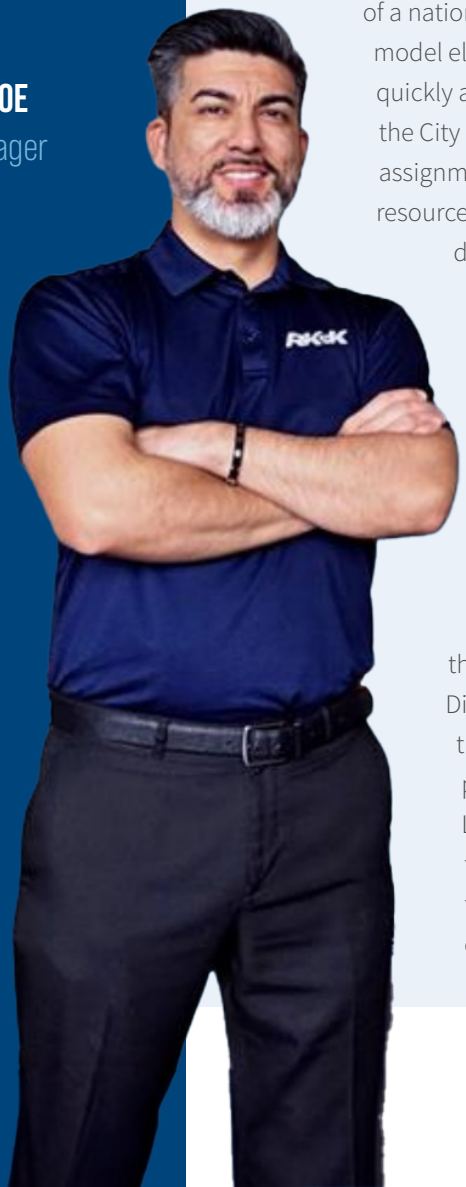
Permitting & Natural Resource Services: RK&K regularly performs wetland delineations, jurisdictional waters determinations, threatened and endangered species assessments, biological assessments, habitat evaluations, mitigation planning, and permit applications, including Section 404 and Texas Antiquities Code compliance.

Technical Studies & Regulatory Coordination: Our specialists conduct noise, air quality, and other environmental analyses while working with regulatory agencies to secure approvals and minimize project risks. We emphasize practical solutions that balance environmental stewardship with project objectives.

Public Outreach & Stakeholder Engagement: RK&K helps build public consensus through open houses, public meetings, and hearings, supported by clear, visually compelling presentations, graphical exhibits, and communication materials that effectively engage stakeholders and decision-makers.

PROJECT SPOTLIGHT

RONALD REAGAN BOULEVARD, SEGMENT D1
Williamson County, TX



RK&K served as the prime consultant for the upgrade of Ronald Reagan Boulevard from a two-lane roadway to a four-lane divided arterial, supporting future conversion to a freeway facility. The team successfully advanced the design while adapting to ongoing land use and development changes throughout the corridor.

For this locally funded project, RK&K conducted comprehensive environmental due diligence investigations in accordance with Williamson County requirements, including studies related to Section 404 permitting, threatened and endangered species, cultural resources, and hazardous materials. The team prepared technical reports, coordinated with resource agencies, and documented environmental commitments and permit needs.

Because the project intersects TxDOT's RM 2338, environmental clearance was also required for work within TxDOT right-of-way. RK&K prepared all investigations, technical studies, and documentation necessary to secure a TxDOT categorical exclusion, resulting in environmental clearance for all project elements. The project has since advanced to construction bidding.

> Having spent 12 years serving communities in the Rio Grande Valley and South Texas, I understand the challenges local agencies face and the importance of having a consultant who is responsive, accountable, and invested in your success.
>
> I am excited about the opportunity to partner with the City of Edinburg and am committed to earning your trust through every task assignment, no matter the size.

MIKE MIRANDA, PE, PTOE
Proposed Project Manager

UNIQUENESS TO BEST PERFORM THESE SERVICES

As outlined below, RK&K's team offers several unique benefits which make us best suited to perform these services for the City.

Extensive Track Record Managing Municipal On-Call Contracts. While RK&K is recognized for delivering some of the nation's most complex infrastructure projects, we are equally valued for our ability to execute on-call contracts efficiently and reliably. In the last two years alone, RK&K has completed more than 9,000 assignments through more than 240 municipal on-call contracts, demonstrating a proven ability to provide responsive, high-quality services to public sector clients. Our scalable, multidisciplinary teams adapt to changing priorities and workloads, allowing us to quickly provide the right expertise for a single task, a dedicated project team, or multiple concurrent assignments.

Seamless Access to Firmwide Resources. RK&K combines the responsiveness of a trusted local partner with the depth and capabilities of a national infrastructure firm. Our unique one-profit-center business model eliminates internal competition for resources, allowing us to quickly assemble the right team, regardless of office location, to meet the City of Edinburg's needs. Whether responding to a specialized assignment or an accelerated schedule requiring additional resources, RK&K can seamlessly deploy staff from across the firm to deliver timely, effective solutions.

Local Knowledge and Owner-Side Perspective. With offices in McAllen and Austin, deep knowledge of Texas transportation and infrastructure programs, and more than 250 years of combined experience among our Texas leadership team, RK&K understands the unique challenges and opportunities facing Rio Grande Valley communities. Proposed Project Manager Mike Miranda further strengthens our team through his 12 years of public sector experience, including nine years with the City of McAllen and three years with the TxDOT Pharr District. Having worked on the owner side, Mike understands the realities of budget constraints, competing priorities, public accountability, and the need for practical solutions. Leveraging strong relationships throughout the region and the full resources of RK&K, he provides responsive, owner focused leadership that helps the City efficiently navigate challenges and advance its goals.

OFFICE PROVIDING SERVICES AND APPROACH TO HANDLING PART-TIME STAFFING NEEDS FOR SMALLER ASSIGNMENTS

RK&K will manage this contract from our McAllen office, located less than 15 minutes from the City of Edinburg. Day-to-day services will be delivered by our local team, supported by staff from across the firm. Through RK&K's unique one-profit-center business model, our project manager, Mike Miranda, can seamlessly access additional resources whenever needed, ensuring the City receives responsive service.

RK&K has a successful track record of handling part-time staffing needs for smaller assignments under on-call contracts. We understand that staffing needs can fluctuate from a single specialist needed a few hours each week to multiple professionals supporting simultaneous initiatives. By leveraging our multi-disciplinary staff and firmwide resources, we can quickly identify and deploy the right staff for each assignment. Our project managers also use RK&K's internal workload forecasting tools to proactively manage resources and maintain staff availability, ensuring we can respond quickly to upcoming needs.

RK&K will manage this contract from our McAllen office, located less than 15 minutes from the City of Edinburg.

Day-to-day services will be delivered by our local team in Texas, supported by staff from across the firm.

RK&K McAllen, TX

TEAM MEMBER QUALIFICATIONS & EXPERIENCE

RK&K's team combines experienced local leadership and specialized technical experts—backed by firmwide resources—to deliver responsive, high-quality service across all requested disciplines.

Stacey Benningfield
Director-In-Charge

Mike Miranda, PE, PTOE
Project Manager

Ed Pensock, PE
Michael Chacon, PE
QA/QC and Senior Advisors

MIKE MIRANDA, PE, PTOE

Project Manager; Task Lead, Traffic

Years of Experience: 19 (1 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (TX, 110127); Professional Traffic Operations Engineer (3264)

Mike offers a rare combination of public sector insight and private-sector delivery experience, bringing more than 19 years of traffic engineering and transportation operations expertise to the team. During 12 years in public service, he held key traffic engineering leadership roles with the City of McAllen and TxDOT's Pharr District, where he managed traffic operations, reviewed development-related transportation impacts, supported signal design and optimization efforts, and served as a trusted advisor on planning and growth initiatives. As the City's traffic subject matter expert, he collaborated with developers, elected officials, and municipal staff to advance safe and efficient solutions.

Over the past seven years in the private sector, Mike has delivered complex traffic engineering projects via various local on-call contracts while maintaining strong working relationships with transportation leaders and stakeholders throughout the Rio Grande Valley.

Mike's industry leadership extends nationally through more than a decade of service on the National Committee on Uniform Traffic Control Devices, where he works alongside FHWA and transportation professionals from across the country to help shape future editions of the MUTCD and influence traffic control standards at both the national and state levels.

Hidalgo County | New County Courthouse - Traffic Analysis, Edinburg, TX: As project manager, Mike led the completion of a traffic analysis for the new courthouse. The analysis included the collection of updated traffic volume data, analysis of eight existing traffic signals along TxDOT roads, future traffic volume projections, future traffic signal operations and level of service using Synchro software, existing and future parking requirements, and recommendations on driveway treatments and other proposed safety and mobility enhancements. Mike coordinated with staff from the County, the City of Edinburg, and TxDOT during the completion of the traffic analysis.

City of Pharr | New Traffic Signal Design – Intersection of N. Sugar Road & W. Minnesota Road, Pharr, TX: Served as project manager for the preparation of PS&E documents for a new traffic signal installation. Under the City's on-call contract, he provided technical oversight of the design team, coordinated with City staff throughout project development, and ensured the signal design accommodated future roadway widening and incorporated appropriate operational, detection, and pedestrian features.

City of Pharr | Traffic Signal Warrant Analysis – Intersection of N. Sugar Road & W. Minnesota Road, Pharr, TX: Served as project manager for a traffic signal warrant analysis under the City's on-call contract, coordinating traffic data collection, crash history review, and TMUTCD warrant evaluations. Prepared the technical memorandum and recommended signal installation after determining that multiple signal warrants were satisfied.

City of McAllen | Speed Zone Studies, McAllen, TX: As project manager, Mike led more than 40 speed zone studies throughout McAllen on both municipal- and state-maintained roadways. He coordinated traffic and speed data collection, performed 85th-percentile speed analyses, and prepared documentation in accordance with TxDOT's Procedures for Establishing Speed Zones Manual. When studies supported speed limit changes, Mike guided the approval process through City ordinance revisions or Texas Transportation Commission Minute Orders.

City of McAllen | Signalized Intersection Improvements, McAllen, TX: As project manager, Mike led the design of signalized intersection improvements at more than 10 locations throughout McAllen. Projects primarily involved roadway widening to add dedicated turn lanes and improve traffic operations, along with associated drainage, pedestrian, utility, signing, and pavement marking improvements. These enhancements increased intersection capacity while improving safety by reducing turning conflicts and keeping stopped vehicles clear of through traffic.

STACEY BENNINGFIELD

Director-In-Charge

Years of Experience: 45 (3 with RK&K)

As RK&K's Texas Transportation Director, Stacey is responsible for the strategic direction of the firm's Texas transportation practice. She provides staff and project oversight and bears ultimate responsibility for project delivery and client satisfaction. Stacey has more than 45 years of transportation planning and project delivery experience, specializing in environmental studies and documentation. Her TxDOT career included serving as the Environmental Coordinator for the 11-county Austin District, Environmental Program Manager for the Turnpike Division, and Assistant to the Director of Environmental Affairs. She has secured environmental clearances and permits for hundreds of transportation projects across Texas, either through direct project involvement or oversight of multidisciplinary teams. Stacey possesses extensive knowledge of the transportation project development process and the state and federal laws, regulations, and policies that govern it.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: Stacey served as director-in-charge for this arterial roadway expansion project, which widened the existing facility from two to four lanes between RM 2338 and CR 245. Under her oversight, RK&K conducted field investigations, prepared required environmental documentation, performed traffic analyses, and developed roadway design and PS&E documents for bidding and construction.

City of Round Rock | Kenney Fort Boulevard Segments 2 & 3, Williamson County, TX: Stacey served as project manager and environmental task lead for this new-location six-lane arterial facility. She prepared the Environmental Assessment (FONSI approved May 21, 2021), led public involvement and agency coordination efforts, secured environmental permits, and oversaw development of the project schematic and PS&E documents.

Cameron County Regional Mobility Authority | South Padre Island Second Access from SH 100 to Park Road 100, Cameron County, TX: Stacey served as environmental task lead for this high-profile project spanning the environmentally sensitive Lower Laguna Madre. She directed public meetings, agency coordination, and preparation of the Draft Environmental Impact Statement, while coordinating extensively with the USACEs, National Marine Fisheries Service, and U.S. Fish and Wildlife Service.

Cameron County Regional Mobility Authority | SH 550 Environmental Assessment Re-evaluation, Cameron County, TX: Stacey served as environmental task lead responsible for preparing an Environmental Assessment re-evaluation to assess the impacts of tolling. Key issues included environmental justice considerations and impacts to jurisdictional waters. As agent for the Cameron County Regional Mobility Authority, she successfully negotiated an Individual Section 404 Permit and associated mitigation requirements.

TxDOT Turnpike Division | Central Texas Turnpike Project (CTTP), Williamson, Travis, Caldwell & Guadalupe Counties, TX: As environmental program manager for the TxDOT Turnpike Division, Stacey was responsible for environmental documentation, agency coordination, and permitting for all four components of the CTTP: SH 130, SH 45 North, Loop 1 North Extension, and US 183A. Each project required preparation of an Environmental Impact Statement and ultimately received a Record of Decision in accordance with NEPA.

ED PENSOCK, PE

QA/QC and Senior Advisor

Years of Experience: 43 (6 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (TX, 66114)

Ed is a transportation advisor and QA/QC lead in RK&K's Austin office responsible for providing quality reviews of project deliverables. He has extensive experience in planning, feasibility, design, right-of-way acquisition, construction, operations, and maintenance across a broad range of highway, toll road, and other projects. As a former Division Director for TxDOT, Ed directed alternative delivery projects with over $12 billion under construction and a total program portfolio of over $20 billion. He also helped develop and implement TxDOT's Innovative Delivery Program for infrastructure, the two-phase best-value procurement process, and the internal design-build training curriculum. Ed's leadership experience includes managing design-build and design-bid-build projects, encompassing schematic design and PS&E preparations.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: Ed provided quality oversight and design support on this project, including constructability analysis and brainstorming technical solutions. He also assisted in handling sensitive environmental elements of the project.

TxDOT | FM 734 Parmer Lane, Williamson County, TX: As lead design engineer, Ed developed all roadway geometrics and hydraulic/hydrologic designs for the extension of FM 734 from RM 620 (now SH 45 North) to FM 1431. This project included sensitive environmental analysis and archaeological attention to the bridge crossing of Lake Ganzert including mitigating any impacts to the SCS Reservoir Site 7. The location was a known habitat for historic indigenous peoples.

Texas Turnpike Authority/TxDOT | US 183A, Williamson County, TX: As director of planning and design, Ed oversaw the development of the original engineered schematic and assisted in the preparation of the Environmental Impact Statement. He also oversaw the preparation of preliminary and intermediate traffic and revenue studies.

TxDOT | Energy Sector Roadway Repair Project (ESRP) Design-Build Contract, Numerous Locations in South TX: As division director/procurement manager, Ed oversaw the development of design-build documents and the procurement. He also directed the proposal evaluation and recommended award of the project. This innovative use of the design-build business model allowed TxDOT to maximize available funds to rebuild numerous farm-to-market roadways in south Texas. These roadways had suffered severe damage from extensive oil field traffic. Design-build teams bid the project based on a set dollar amount. Competition was best value determination centered around the proposer that could rebuild the most roadways.

TxDOT/Travis County | US 183 Improvements - Value Engineering Study (I-35 to the Colorado River): Ed provided owners oversight to the week-long value engineering study. He procured the VE facilitator and identified subject matter experts to analyze the planned highway improvements to a controlled access facility. This included geotechnical, structural, construction, hydraulic, and traffic engineering experts. Hazardous material contamination and constructability factors were also considered. Ed supported the subject matter expert staff and provided overall departmental engineering expertise. The value engineering team made recommendations on project scope, pavement design, bridge types, and cost.

MICHAEL CHACON, PE

QA/QC and Senior Advisor

Years of Experience: 32 (1 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (TX, 86215)

Michael brings deep expertise in transportation engineering and a strong history of success across civil engineering and transportation sectors. Prior to joining RK&K, he led the TxDOT Traffic Safety Division as the State Safety and Traffic Engineer, managing all operational functions and guiding a team of 175 professionals. His responsibilities included the development and administration of policies, guidelines, and programs for TxDOT. He has strong operations and professional leadership skills and specialized expertise in traffic operations, traffic engineering, roadway safety, crash data analysis, intelligent Transportation Systems (ITS), behavioral traffic safety, and strategic oversight of the Texas Highway Safety Program.

Michael has contributed at the national level as Texas' voting member of the American Association of State Highway and Transportation Officials Committee on Traffic Engineering. He also served on the National Committee on Uniform Traffic Control Devices (NCUTCD), collaborating with the Federal Highway Administration to shape new editions of the Manual on Uniform Traffic Control Devices. Through this work, Michael has influenced traffic standards nationwide, including those adopted in the Texas MUTCD.

Delaware Department of Transportation | ITMS Design Services, Statewide, DE: Technical Advisor supporting the development of DelDOT's Transportation Systems Management and Operations (TSMO) Strategic Plan, including multimodal, intermodal, and cross-jurisdictional strategies to improve the safety, reliability, security, and efficiency of the transportation system.

Delaware River Joint Toll Bridge Commission | Hard AET Preliminary Design, DE: Technical Advisor supporting the Hard All-Electronic Tolling (AET) program across seven legacy toll bridges. Responsibilities include advising on the transition to highway-speed electronic toll collection and leading roadway signing design efforts associated with toll plaza removal and open-road tolling implementation.

Washington State Department of Transportation | Speed Camera Program Support, Olympia, WA: Conducted a detailed review of WSDOT's 2025 Work Zone Speed Camera Program, providing technical comments and recommendations to support program refinement and regulatory compliance.

Pennsylvania Department of Transportation | E05869 – HSTO Traffic Safety and Engineering Open-End (2024), Task: E05869 WO#2 2025 ASBE Support, Statewide, PA: Conducted a comprehensive review of Pennsylvania's 2024 Automated School Bus Enforcement (ASBE) Annual Report, providing detailed comments and recommendations to improve clarity, accuracy, and alignment with program objectives.

Indiana Department of Transportation | Work Zone Safety & Mobility Support, Indianapolis, IN: Reviewing and updating INDOT's Work Zone Safety and Mobility Policies and Procedures to ensure compliance with FHWA regulations under 23 CFR Part 630, Subparts J and K, including revisions to TCDV, TCCO, TCLC, and TCCB standard sheets.

TxDOT | Development of Statewide Traffic Engineering Standards, Manuals, & Policies, Statewide, TX: As the State Traffic Engineer and Safety Engineer, Michael served as Director of TxDOT's Traffic Safety Division, where he provided strategic leadership in traffic engineering, operations, and safety. In this role, he oversaw the development and administration of statewide policies, guidelines, and programs that shaped Texas's transportation safety framework. His responsibilities included leading the development, revision, and implementation of the 2011 and 2026 editions of the Texas Manual on Uniform Traffic Control Devices and managing more than 300 state-issued traffic engineering standards.

LAURA FULLER, PE, RAS

Task Lead, Roadway

Years of Experience: 28 (1 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (TX, 92927); Registered Accessibility Specialist (TX, 1256)

Laura has extensive experience in both urban and rural roadway design, utility coordination, traffic control plans (TCP), and CE&I inspection and management. She began her career working with a contractor before transitioning into design. Laura has contributed to projects of varying size and complexity, including sidewalk improvements, mill and overlay, turn lane widenings, intersection safety modifications, multi-level interchanges, and freeway widenings. Her diverse experience with clients across Texas, combined with her construction background, provides Laura with unique insight into multidisciplinary coordination and the full project life cycle across all phases of development. As a Registered Accessibility Specialist (RAS) for 15 years, she has also performed pedestrian safety inspections.

TxDOT Fort Worth District | US 287/US 81 at Harmon Road, Fort Worth, TX: Laura served as project manager for an urban freeway widening project that included frontage road reconstruction and intersection safety improvements. The project involved realigning three ramps, adding mainlane auxiliary lanes, and constructing two underpass bridges for the Harmon Road and North Tarrant Parkway intersection realignment. Laura worked closely with the City of Fort Worth and multiple developers to establish safe access points for new developments. She performed intersection safety analyses at all intersections and median-opening driveways and developed alternative access solutions for two developers seeking conflicting access points at the same location with sight-distance constraints. Laura shifted these access points to a planned signalized intersection, preserving access while improving safety.

TxDOT Fort Worth District | FM 1220 from West Bailey Boswell Road to Azle Avenue, Fort Worth, TX: Laura served as project manager for the design of a four-mile 3R safety improvement project. The project converted a four-lane roadway with a two-way left-turn lane into a raised median with dedicated left-turn lanes. Due to increased traffic from nearby residential and commercial development, the corridor experienced growing safety concerns. Laura evaluated access at each median opening to balance safety and business accessibility. She identified sight-distance issues at several intersections caused by trees, fences, and signs and coordinated with TxDOT to remove these obstructions and reduce crash potential. To meet funding and letting requirements, the schematic and PS&E were developed concurrently, accelerating project delivery. Construction was also phased in one-mile segments to minimize traveler impacts.

TxDOT Houston District | FM 1092 at Cartwright, FM 1092 at Lexington, SH 6 at FM 1092, & SH 6 at Glenn Lakes, Houston, TX: As project engineer, Laura developed conceptual designs for safety and mobility improvements at four intersections. She collaborated with the roadway safety engineer to evaluate and refine multiple alternatives. Based on traffic modeling, turn-lane storage lengths were increased, lane configurations modified, and signal timing adjusted. At SH 6 and FM 1092, heavy turning volumes required a triple left-turn lane, prompting Laura to design widening improvements along SH 6. She also modified pedestrian crossings to accommodate the added lanes and reviewed pedestrian access at each intersection to ensure safe crossings throughout the corridor.

BOB BAKER, PE

Roadway Support

Years of Experience: 36 (1 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (TX, 99726)

Bob has more than three decades of experience focused on both rural/urban roadway and interstate system projects, including all phases of project development from planning to schematic, final design/PS&E and construction. He brings a proven track record managing multidisciplinary teams delivering projects both large and small in both rural and urban environments. His expertise also includes ensuring compliance with AASHTO and PROWAG standards, preparing client submittals, and comment resolution. Bob collaborates across all disciplines, including traffic control, drainage, structures, signing and pavement markings, and SWP3. He conducts quality and constructability reviews at each milestone, as well as interim and over-the-shoulder checks throughout the design and construction process.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: Bob served as project manager for this 2.5-mile rural arterial roadway project, which includes the construction of two westbound frontage roads, intersection improvements, roadway safety enhancements, and a new 360-foot, three-span concrete bridge at RM 2338. The project is located within the Edwards Aquifer Contributing Zone and requires coordination with TxDOT and the Texas Commission on Environmental Quality. Bob led coordination with the GEC, Williamson County, adjacent segment design teams, stakeholders, and TxDOT, while overseeing roadway design, project delivery, and bid-phase and construction-phase services.

TxDOT Dallas District | BUS 287 (Ennis Avenue) Grade Separation at Union Pacific Railroad (UPRR), Ennis, TX: Bob served as roadway lead for the 0.5-mile reconstruction of BUS 287, including grade-separated underpasses at the UPRR and E. Main Street. He led roadway design efforts and constructability reviews, optimizing roadway and drainage improvements to reduce construction complexity and costs. Bob managed traffic control and construction phasing, working closely with TxDOT and the City of Ennis to implement a full closure of Ennis Avenue between E. Main Street and Breckenridge Street. He supported stakeholder coordination, maintained business access throughout construction, and developed a cost-effective detour strategy utilizing existing on-system roadways to improve safety and accelerate project delivery.

TxDOT | FM 734 PS&E, Austin, TX: As deputy project manager, Bob helped lead the widening of 4.2 miles of FM 734 (Parmer Lane) from a four-lane roadway to a six-lane divided urban thoroughfare. He managed roadway design, OpenRoads corridor modeling, multidisciplinary coordination, stakeholder engagement, constructability reviews, and quality control throughout project development.

Williamson County | Bagdad Road at CR 278, Cedar Park, TX: Bob served as roadway task lead for the design of improvements to Bagdad Road and River Ranch County Park Road. He was responsible for developing roadway plans and managing the design team for the reconstruction of approximately 2,000 feet of Bagdad Road and construction of approximately 2,500 feet of new roadway providing access to River Ranch County Park. The project included roadway reconstruction, turn lanes, acceleration lanes, shared-use paths, and the extension of CR 278 into the park. Bob oversaw roadway geometric design and plan production to enhance access, safety, and multimodal connectivity within the corridor.

MIGUEL MENDEZ, EIT

Roadway Support

Years of Experience: 5 (2 with RK&K)

Education: BS, Mechanical Engineering

Registration: Engineer-In-Training (TX, 77762)

Miguel has experience developing engineering reports, cost estimates, plats, and submittals for roadway design projects in Texas, all in adherence with client standards and within project timelines. Miguel's background also includes hydrology studies, utility design, and coordination with agencies and consultants to deliver complete, accurate plan sets.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: Miguel supported the planning, environmental documentation, and roadway design services for the Ronald Reagan corridor from RM 2338 (Williams Drive) to CR 275. This project involved upgrading the existing two-lane roadway to a four-lane divided arterial, including a grade separation at RM 2338.

West Virginia Division of Highways | WV Route 9 and County Routes 1, 9/21 & 9/30 Roundabout, Martinsburg, WV: Miguel assisted with developing roadway engineering models to accommodate overlay limits, full-depth pavement requirements, and right-of-way constraints. He utilized CAD software to troubleshoot design templates, integrating curb drains and roadway widening requirements into the existing model. This design-build roundabout project was located on Route 9 in West Virginia and included an extension of the access road crossing as part of a roadway widening effort to meet updated design criteria.

Virginia Department of Transportation | Route 58 Vesta Section Design-Build, Patrick County, VA: Miguel helped develop 3D models for crossroad connections, precisely adjusting end conditions to ensure seamless transitions between proposed and existing roadway surfaces. The Route 58 Vesta Project is a major design-build transportation improvement initiative involving the widening of approximately 4.5 miles of an existing two-lane roadway into a four-lane divided highway. The project also includes the replacement of the existing Dan River Bridge with new structures to enhance safety and improve traffic flow.

NIKHIL REDDY GAVINI, EIT, CMIT

Roadway Support

Years of Experience: 2 (1 with RK&K)

Education: MS, Civil Engineering; BS, Civil Engineering

Registration: Engineer-In-Training (TX, 82607)

Nikhil is a roadway engineering professional with experience supporting transportation planning, environmental documentation, roadway design, pavement evaluation, and construction quality assurance for state clients. His project experience includes corridor improvement and highway widening projects for TxDOT and the Virginia Department of Transportation, where he has contributed to roadway design development, maintenance of traffic coordination, cross sections, alignments, traffic control plans, and cost estimates using OpenRoads Designer and MicroStation.

Nikhil also brings extensive field experience supporting pavement evaluation, geotechnical investigations, and asphalt quality assurance, providing him with a strong understanding of constructability, roadway materials, and project delivery. His combination of design support, field engineering, and quality management experience enables him to effectively contribute to complex roadway and transportation infrastructure projects.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: Nikhil supported the planning, environmental documentation, and roadway design services for the Ronald Reagan corridor from RM 2338 (Williams Drive) to CR 275. This project involved upgrading the existing two-lane roadway to a four-lane divided arterial, including a grade separation at RM 2338.

Virginia Department of Transportation | Route 58 Vesta Section Design-Build, Patrick County, VA: Nikhil is supporting the roadway design efforts for this 4.5 miles of an existing two-lane roadway into a four-lane divided highway. The project also includes the replacement of the existing Dan River Bridge with new structures to enhance safety and improve traffic flow.

TxDOT | Material Testing Contract, San Antonio District, TX: Nikhil served as the QA representative for hot mix asphalt production, ensuring compliance with TxDOT specifications during continuous plant operations. Reviewed HMA production test data, coordinated with contractors and TxDOT inspectors, supported corrective actions when needed, and managed documentation and billing verification to maintain contract compliance and accurate invoicing.

TxDOT | Maintenance Projects, Various Locations, TX: Nikhil supported numerous pavement evaluation and maintenance projects for TxDOT, coordinating field operations and conducting DCP testing, soil sampling, GPR reviews, and pavement assessments. Managed traffic control, coring, and CPT activities while collaborating with TxDOT staff and design teams to support roadway investigations, field data collection, and project delivery.

JOHN DEWITT, PE

Constructability Reviews

Years of Experience: 43 (1 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (TX, 63514)

John brings more than 41 years of TxDOT experience spanning planning, design, construction, and maintenance, providing a unique perspective on project constructability and risk management. As Director of Transportation Planning & Development for TxDOT's San Angelo District for 28 years, he led the development and delivery of more than $2 billion in transportation improvements across 15 counties.

Having served in leadership roles including Transportation Planning and Development (TP&D) Director, Interim Director of Construction, Area Engineer, and District Design Engineer, John understands every phase of project delivery and how design decisions affect construction outcomes. His experience enables him to identify potential issues early, improve constructability, minimize construction impacts, and support efficient project delivery.

John's extensive background with interstate, roadway, and bridge projects, combined with his deep knowledge of TxDOT standards and procedures, makes him a valuable resource for constructability reviews, contractor coordination, risk mitigation, and successful project execution. He is also the recipient of the 2019 DeWitt C. Greer Award, recognizing outstanding contributions to transportation in Texas.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: John performed constructability reviews for the Ronald Reagan corridor from RM 2338 (Williams Drive) to CR 275. This project involved upgrading the existing two-lane roadway to a four-lane divided arterial, including a grade separation at RM 2338.

TxDOT San Angelo District | US 67 – Houston Harte Freeway Corridor, San Angelo, TX: As director of transportation planning and development, John managed planning and design efforts for five project segments that converted an urban arterial corridor into a freeway. The project included multiple interchanges, 16 new bridges, bridge-class culverts, grading, drainage, base, asphalt concrete pavement (ACP), signage, and pavement markings. His oversight provided valuable constructability insight into phased freeway construction, bridge coordination, traffic management, and corridor-wide project delivery.

TxDOT San Angelo District | Construction of Interchange at SH 158 and SH 137, Glasscock County, TX: John served as director of transportation planning and development for the construction of a new grade-separated interchange at SH 158 and SH 137. The project included bridge construction, bridge approaches, grading, flex base, surface treatment, asphalt concrete base, signage, pavement markings, and a significant continuously reinforced concrete pavement component on SH 137. His involvement provided key constructability and construction coordination experience for complex interchange work.

TxDOT San Angelo District | Loop 306, San Angelo, TX: This project converted three segments of a two-lane rural roadway into a four-lane divided highway with grade separations. Work included roadway widening and reconstruction, interchanges, a river crossing, seven bridges, bridge-class culverts, grading, flex base, asphalt concrete base, signage, and pavement markings. The project required careful coordination of multiple structures and phased construction activities.

TxDOT San Angelo District | US 90 Widening and Reconstruction, Val Verde County, TX: This project included the stack-flip reconstruction of the US 90 bridge over a railroad. Scope included full-depth pavement rehabilitation, flex base, two-course surface treatment, pavement markings, signage, and culverts. The project presented significant constructability challenges associated with maintaining traffic and coordinating structural improvements.

MATT SLAGEL, PE, DBIA

Task Lead, Drainage

Years of Experience: 21 (12 with RK&K)

Education: MS, Environmental Engineering & Science; BS, Environmental Science

Registration: Professional Engineer (TX, 156062); Certified Design-Build Professional

Matt has experience in various water resources design and planning projects requiring H&H applications. He has prepared plans, reports, and design recommendations for numerous transportation and environmental development projects, including minor arterial roadways, collector roadways, and major interstate highway drainage; new and retrofit stormwater and management facilities; and cost benefit analyses.

Matt has also led multiple large-scale alternative delivery projects that required comprehensive program planning, schedule driven project delivery, and cost-benefit driven alternatives analyses. He is particularly skilled in managing complex drainage challenges, especially in areas with flat terrain, little relief, and a history of local flooding during storm events. His experience spans a diverse set of clients across multiple states.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: Matt performed quality control reviews for all drainage elements of the PS&E for this 2.5-mile arterial project.

Prince George's County, MD | College Park/Calvert Hills Drainage Improvements, Prince George's County, MD: Matt served as the water resources engineer and Project Manager for improvements that included culvert upgrades, channel capacity enhancements, storm drain system upgrades, and implementation of an underground detention vault. He was responsible for all water resources engineering activities, including upsizing culverts within County rights-of-way to reduce nuisance flooding along roadways and adjacent properties. Matt led the H&H analysis using PCSWMM's dual-drainage modeling approach, allowing efficient evaluation and comparison of alternatives on a project-wide scale. Additional responsibilities included project management, subconsultant coordination, and permitting.

Maryland Department of Transportation State Highway Administration | US 50 to East of Holly Road Design-Build, Caroline, Queen Anne's, and Talbot Counties, MD: Matt served as water resources design lead for this $105 million, 10-mile roadway dualization project. The project converted an existing two-lane roadway into a four-lane divided highway and included utility coordination, drainage improvements, stormwater management, and erosion and sediment control. Water resources efforts included the design and construction oversight of more than seven miles of stormwater management facilities and seven miles of drainage ditches. Key challenges included extremely flat terrain and an aggressive design schedule, both of which were successfully managed throughout project delivery.

West Virginia Division of Highways | Inwood Bypass, Berkeley County, WV: As project engineer, Matt was responsible for preparing contract plans and specifications for stormwater management and drainage features associated with the reconstruction and widening of WV 51 and US 11, as well as construction of approximately 1.49 miles of new bypass roadway. His work included the design of 11 stormwater management facilities featuring bioretention and infiltration BMPs, open and closed drainage systems, roadway cross sections, roadside grading, ditch design, storm drain profiles, and construction details.

MAX DEYOUNG, EIT

SWM/Sediment Control

Years of Experience: 6 (5 with RK&K)

Education: BS, Civil and Environmental Engineering

Registration: Engineer-In-Training (MD, 55280)

Max has experience in all aspects of water resources engineering, with a focus on stormwater management, drainage design, and erosion and sediment control. His expertise includes surface water hydrology, open-channel analysis, storm drain analysis and design, and H&H modeling. He has supported the analysis and design of large-scale drainage systems, stormwater management facilities, and sediment and erosion control measures, while also conducting field investigations and site assessments.

Virginia Department of Transportation | I-81 Roanoke Design-Build Exit 143 to Exit 150 Improvements, Roanoke and Botetourt, VA: Max provided water resources engineering services for four miles of I-81 roadway widening, including the design of storm drains, culverts, roadside ditches, erosion and sediment control measures, and five stormwater management facilities. He developed drainage and sediment control plans to accommodate complex phased maintenance-of-traffic requirements and collaborated closely with the contractor to address constructability and temporary drainage needs.

West Virginia Division of Highways | Mt. View to Gilbert Creek Design, Gilbert, WV: Max provided water resources engineering services, including drainage design and erosion and sediment control for roadway improvements along Gilbert Creek Road. He designed erosion and sediment control measures for extensive tree clearing and earthwork operations, as well as roadside ditches and culverts to minimize impacts on adjacent residential properties. His designs addressed steep terrain, limited access, and highly erodible soils while supporting safe construction sequencing and long-term drainage performance.

Fairfax County, VA | Pleasant Valley Road Walkway Improvements, Fairfax, VA: Max analyzed and upgraded existing drainage infrastructure along approximately one mile of roadway improvements, including culverts, roadside ditches, and storm sewer systems. He designed an underground stormwater management detention facility, conducted field investigations, and reviewed geotechnical and survey data to support facility sizing and design. His work improved stormwater management, reduced downstream impacts, and enhanced corridor resilience.

Virginia Department of Transportation | Richmond Highway Corridor Improvements, US 1 Widening, Fairfax County, VA: Max provided water resources engineering services, including storm drain design and erosion and sediment control for roadway widening and multimodal improvements along US Route 1. He analyzed existing drainage systems, identified capacity constraints, and developed solutions that improved drainage performance while minimizing impacts to utilities and existing right-of-way. His efforts supported a constructable and maintainable drainage system within a constrained urban corridor.

CHRIS HERNANDEZ-HERRERA

SWM/Sediment Control

Years of Experience: 2 (2 with RK&K)

Education: BS, Civil Engineering (minor Green Engineering)

Chris specializes in stormwater management, drainage design, and erosion and sediment control for transportation and infrastructure projects. His experience includes surface water hydrology, open-channel analysis, storm drain system analysis and design, and H&H modeling. He has supported the planning, analysis, and design of large-scale drainage systems, stormwater management facilities, and erosion and sediment control measures to meet both regulatory requirements and project performance goals.

Chris is experienced in performing H&H analyses, developing drainage and stormwater management solutions, and conducting field reconnaissance to evaluate existing conditions and identify project constraints. His technical expertise helps deliver practical, resilient designs that improve stormwater conveyance, minimize erosion impacts, and support long-term infrastructure performance.

West Virginia Division of Highways | WV Route 9 and County Routes 1, 9/21 & 9/30 Roundabout, Martinsburg, WV: As a water resources engineer, Chris conducted hydrologic analyses by evaluating soil types and land-use characteristics to determine runoff coefficients, curve numbers, time of concentration, and detention requirements for stormwater modeling. He evaluated hydraulic conditions under existing and proposed scenarios and designed stormwater management facilities, including outlet structures with weirs and risers to control discharge rates. Chris also developed stormwater facility profiles to define facility geometry, water surface elevations, and utility conflicts, ensuring practical and constructible drainage solutions.

Virginia Department of Transportation | I-81 Roanoke Design-Build Exit 143 to Exit 150 Improvements, Roanoke and Botetourt, VA: Chris served as a water resources engineer for this roadway widening project, performing H&H analyses for multiple watersheds. He supported the design of storm drain systems, culverts, open channels, detention facilities, and outlet control structures. Chris also developed erosion and sediment control measures for multiple construction phases, including sediment traps, sediment basins, inlet protection, channel stabilization, and temporary drainage systems. He prepared drainage reports, coordinated environmental permitting efforts, and reviewed contractor shop drawings to support constructability and compliance with Virginia Department of Transportation requirements.

City of Richmond, VA | Worthington Farms Drainage Improvements, Richmond, VA: Chris served as the water resources engineer responsible for addressing stormwater management and flooding concerns. He evaluated and designed alternatives to improve system performance, including increasing storm drain capacity, optimizing inlet placement, enhancing natural drainage channels, and incorporating green infrastructure solutions. His work focused on reducing flooding risks and improving stormwater conveyance throughout the project area.

Fairfax County, VA | Route 1 (Richmond Highway) Bus Rapid Transit System, Fairfax, VA: Chris was responsible for stormwater management analyses and the design of flood-control facilities along 7.4 miles of roadway improvements. He applied local stormwater regulations, Virginia Department of Transportation design criteria, and Virginia Department of Environmental Quality requirements to develop detention basins, retention ponds, bioretention facilities, and natural channel improvements. His designs reduced flood risk, improved water quality, and supported corridor-wide stormwater management objectives.

JASON COLEMAN, PE, CFM

H&H

Years of Experience: 24 (11 with RK&K)

Education: MS, Environmental Engineering & Science; BS, Civil & Environmental Engineering

Registration: Professional Engineer (TX, 142285); Certified Floodplain Manager

Jason specializes in hydrology and hydraulics, with extensive experience performing watershed studies, flood analyses, stormwater management evaluations, and hydraulic modeling for transportation, water resources, and ecosystem restoration projects. He is highly skilled in 1D and 2D hydraulic modeling, floodplain and floodway delineation, bridge hydraulics, FEMA mapping, dam breach analysis, levee evaluations, and drainage system design. Throughout his career, Jason has been responsible for the H&H analysis of complex watershed and riverine systems, development of flood hazard mapping, preparation of FEMA map revisions, and design of stormwater management and drainage improvements. His expertise in hydrologic modeling, hydraulic analysis, and regulatory compliance enables him to develop practical solutions that reduce flood risk, improve system performance, and support long-term infrastructure resilience.

West Virginia Division of Highways | Route 93 Scherr Overpass, Grant County, WV: Jason served as the hydraulic engineer for the H&H analysis supporting replacement of the Scherr Road bridge over Elklick Run. Jason estimated peak discharges, performed bridge hydraulic analyses to determine water surface elevations under existing and proposed conditions, and evaluated complex flood flow patterns influenced by the stream channel, valley alignment, and roadway embankment. He also completed a scour analysis.

West Virginia Division of Highways | Mt. View to Gilbert Creek Design, Gilbert, WV: Jason provided technical oversight for a hydraulic study supporting a design-build roadway improvement project along Gilbert Creek Road. The study evaluated approximately two miles of stream corridor and 10 bridge structures. Jason also supported FEMA coordination and preparation of a Conditional Letter of Map Revision for the project.

Maryland Department of Transportation State Highway Administration | MD 5 from MD 471 to MD 246 – Stream Stabilization, St. Mary's County, MD: As project engineer, Jason performed geomorphic assessments, hydrologic studies, and 1D and 2D hydraulic modeling to support restoration of approximately 3,000 feet of the St. Mary's River in conjunction with a bridge replacement project. He recommended bridge alignment improvements to increase hydraulic capacity, reduce scour potential, and improve long-term channel stability. The project incorporated an integrated stream and wetland floodplain system designed to improve bridge hydraulics and reduce maintenance requirements.

Anne Arundel County, MD | Furnace Creek Stream Restoration, Glen Burnie, MD: As lead engineer, Jason directed H&H analyses, 2D hydrodynamic modeling, floodplain studies, and restoration design for approximately 4,300 feet of stream restoration and 5.9 acres of riparian wetland creation. He utilized TUFLOW 2D modeling to evaluate stream stability, floodplain performance, and restoration alternatives. His responsibilities included FEMA Conditional Letter of Map Revision/Letter of Map Revision coordination, floodplain analysis, construction document preparation, permitting, and construction-phase services.

SHUANGSHUANG FAN

H&H

Years of Experience: 4 (1 with RK&K)

Education: MS, Civil Engineering; BS, Hydraulic and Hydropower Engineering

Shuangshuang is a water resources engineer with a focus on stormwater management, condition assessment, and capital improvement projects. Her project experience includes floodplain delineation, H&H modeling, drainage design, stream restoration, and multi-beneficial flood mitigation projects. Shuangshuang has worked extensively with modeling and design software such as HEC-RAS, SWMM, StormCAD, ArcGIS, and FLO-2D, with additional skills in Civil 3D and Microsoft Office. She has supported permitting, design reports, master plans, and construction observation for municipalities and regional flood districts. Shuangshuang holds PACP/LACP/MACP and OSHA 10-hr certifications and has passed the Principles and Practice of Engineering (PE) exam.

Mile High Flood District | Sand Creek Flood Hazard Area Delineation, Denver, CO: As project engineer, Shuangshuang updated hydrology for Sand Creek as part of the master drainage plan and flood hazard area delineation studies. She integrated more than 10 Mile High Flood District hydrology models, performed flood frequency analyses, validated watershed hydrology, and supported the development of flood resiliency and stream health alternatives for a 181-square-mile watershed.

City of Greeley | Greeley Downtown Master Plan, Greeley, CO: As a design engineer, Shuangshuang performed H&H analyses using FLO-2D and EPA-SWMM to evaluate flooding and stormwater system capacity within the North Greeley and Downtown Basins. She analyzed outfall systems, assessed conveyance deficiencies, developed phased drainage improvement concepts, and prepared planning-level recommendations to reduce flood risk and improve stormwater infrastructure performance.

Mile High Flood District | Willow Creek Tributaries Master Drainage Plan & Flood Hazard Area Delineation, Centennial, CO: As project engineer, Shuangshuang developed updated hydrologic models and runoff scenarios for five Willow Creek tributaries. She supported flood hazard analyses, stream health evaluations, and resiliency planning through the development of water quality, annual, and historic hydrologic conditions used to assess future drainage and flood mitigation alternatives.

City and County of Broomfield | Broomfield Heights Pedestrian & Flood Improvements, Broomfield, CO: Shuangshuang supported floodplain delineation, H&H analyses, drainage design, and plan development for a corridor improvement project focused on reducing flood risk within one of Broomfield's most flood-prone neighborhoods. The project improved floodwater conveyance, enhanced stormwater management, and reduced risks to residential properties while integrating roadway, pedestrian, and bicycle improvements.

City and County of Denver | 48th Avenue Corridor Improvements, Denver, CO: Shuangshuang assisted with floodplain delineation, H&H analyses, drainage evaluations, and report preparation for a greenway corridor project designed to reduce flooding while enhancing community connectivity. Her work supported development of a stormwater management strategy that improved flood conveyance and helped mitigate widespread flooding issues within the Globeville community.

BRIAN HEPTING, PE

Task Lead, Structures

Years of Experience: 34 (33 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (TX. 135742)

Brian has experience in structural and foundation design and analysis, preservation and rehabilitation design, and structural condition inspection and rating (using LARS) for a variety of structures. He prepares contract PS&Es for state, county, and local bridge projects involving state and federally funded assignments and provides construction support, including shop and working drawing reviews.

His experience includes bridge design and repair over highways, waterways, and railroads; deck and superstructure replacements; overlays; widenings; foundations; box and pipe culverts; and retaining walls using conventional and accelerated bridge construction (ABC) methods. He has supervised destructive and non-destructive testing, responded to emergency events on a 24/7 basis, and performed life-cycle cost analyses.

Brian manages multiple concurrent multidisciplinary assignments and has led constructability reviews, prepared cost estimates, managed alternate delivery projects, and overseen on-site staff.

City of Baltimore, MD | Reconstruction of Central Avenue, Baltimore, MD: Brian served as project manager for the type, size, and location design of the replacement of the existing Central Avenue Drain. Responsibilities included preliminary design of the "jumper" bridge option, including H-pile sizing and spacing, prestressed concrete plank beam sizing, typical sections, and construction sequencing for staged removal of portions of the existing arch and construction of the new bridge. He also conducted a preliminary review of numerous utility crossings and conflicts.

Baltimore County, MD | Minor Bridge Inspection Program, Baltimore County, MD: Brian led the inspection and reporting of 205 small bridges, including pedestrian structures, throughout Baltimore County. Work included post-flood inspections at locations with known scour concerns. He oversaw structural analyses and load ratings for deteriorated and previously unrated structures and performed quality control reviews of detailed inspection reports. Additional tasks included documenting conditions, providing photographs, identifying repairs and cost estimates, updating SI&A data, and presenting sounding results.

Washington County, MD | Professional Boulevard Bridge & Extension, Washington County, MD: Brian served as contract manager for the development of two contract packages for a new roadway extension and bridge crossing of Antietam Creek. The selected bridge featured haunched steel girders and aesthetic railings, along with sidewalks and an overlook area for pedestrians. The roadway includes a four-lane undivided urban arterial, shared-use path, and bioswales.

City of Richmond, VA | Manchester Bridge Structural Inspection, Analysis, & Rehabilitation, Richmond, VA: Brian served as structural engineer for the inspection, analysis, and rehabilitation of the Manchester Bridge carrying Route 60 over the James River, CSX, and Norfolk Southern rail lines. The bridge included pin-and-hanger assemblies in three mainline spans and two ramp spans. Services included railroad coordination, paint assessment, NDE of pin-and-hanger assemblies, condition inspection reporting, repair design for expansion joints, concrete and steel repairs, deck patching, installation of a pin-and-hanger suspender system, and construction-phase support.

CHRISTINE SZYMPRUCH, PE

Bridge/Culvert Design

Years of Experience: 30 (26 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (MD, VA, DC)

Christine specializes in bridge and culvert design, rehabilitation, inspection, and structural analysis. She has extensive experience designing new bridges and culverts, evaluating existing structures, and developing repair and rehabilitation solutions for concrete and steel transportation structures. Her expertise includes bridge inspections, condition assessments, structural calculations, plan development, specifications, shop drawing reviews, and construction-phase services. Christine has successfully guided bridge and culvert projects from preliminary design through final construction while providing clients with practical, cost-effective solutions that enhance safety, durability, and long-term performance.

Morgan State University | O'Connell Hall Pedestrian Bridge, Baltimore, MD: Christine served as project manager for the design of a 250-foot pedestrian bridge connecting O'Connell Hall to Morgan State University's campus road network across Herring Run. The bridge includes concrete abutments and piers strategically located outside the 100-year floodplain. She guided the project through schematic design and coordinated structural design development.

Virginia Passenger Rail Authority | Project Management Support Services, Long Bridge Project, Arlington, VA: Christine developed inspection, maintenance, and access requirements for a proposed bicycle and pedestrian bridge adjacent to the new Long Bridge over the Potomac River. Her work included coordination with multiple agencies and development of long-term maintenance and inspection strategies supporting a major rail and bridge infrastructure program.

City of Baltimore | Harford Road Bridge over Herring Run (#1288), Baltimore, MD: As construction project supervisor, Christine supported the replacement of a three-span concrete-filled arch bridge with a new three-span prestressed concrete girder bridge founded on cantilever abutments and wall piers. The $18.9 million project also included storm drainage improvements, retaining walls, utility relocations, and a precast concrete pedestrian underpass. She coordinated field activities, RFIs, shop drawings, contractor communications, and project documentation.

Maryland Transportation Authority | Superstructure Replacement of I-895 over Patapsco River Flats, Baltimore, MD: Christine served as senior structural and bridge engineer for the rehabilitation and replacement design of the I-895 bridge superstructure. She oversaw evaluation of concrete and steel superstructure alternatives and subsequent design of a lightweight concrete-filled grid deck supported on steel girders. The project included bridge rehabilitation while maintaining traffic and minimizing impacts to environmentally sensitive areas.

Concrete General | SHA MD 32/Linden Church Road Interchange Design-Build, Howard County, MD: Christine served as project engineer for the design-build delivery of a new two-span continuous steel girder bridge carrying Linden Church Road over existing and future widened MD 32. Her responsibilities included design of the steel multi-girder superstructure, load rating analysis, reinforced-concrete piers, pile-supported abutments, and condition assessments of existing reinforced concrete and corrugated metal pipe culverts within the corridor.

EDGAR LORETE, PE

Retaining Walls

Years of Experience: 18 (11 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (MD)

Edgar brings extensive experience in the analysis and design of transportation structures. His expertise includes the design of retaining walls, bridges, culverts, and sign structures, with a particular emphasis on developing practical and cost-effective retaining wall solutions for complex roadway and site constraints.

Edgar has managed and designed a wide range of retaining wall systems, supporting roadway widening, bridge approaches, grade separations, and corridor improvement projects. His experience also includes the design of new prestressed concrete and steel girder bridges, bridge widenings and redeckings, culvert replacements, and rehabilitation of existing transportation structures. In addition, he has performed structural evaluations and field inspections to assess existing conditions and develop maintenance, rehabilitation, and replacement recommendations.

Maryland Department of Transportation State Highway Administration | On-Site Engineering Services - BCS 2009-03C, Baltimore, MD: Edgar served as an on-site consultant engineer for multiple highway structure assignments, including the MD 254 over Neale Sound bridge replacement, which included full-height cantilever abutments, pile-supported substructures, and two additional retaining walls. He also performed abutment and wingwall design for the MD 364 over Dividing Creek bridge replacement, including concrete design and pile capacity computations.

Maryland Department of Transportation State Highway Administration | US 13 Salisbury Bypass Design-Build (WI2145180), Salisbury, MD: Edgar served as design engineer for the rehabilitation of five dual bridges, including barrier and joint modifications, deck overlays, substructure modifications, and superstructure replacements. His work included steel girder design, plan preparation, detail development, geometry calculations, and coordination with the contractor to integrate existing and proposed bridge components.

City of Wilmington, DE | South Wilmington Combined Sewer Separation, City of Wilmington, DE: Edgar served as structural engineer responsible for the structural design of drainage structures, including non-typical utility vaults, manholes, and junction boxes. He coordinated with multiple disciplines to develop contract plans and details for a sewer separation project involving more than 14,000 linear feet of combined sewer separation and new storm drain infrastructure.

Maryland Transportation Authority | Physical On-Site Condition Inspection of MDTA Facilities (AE-2481-000-001/2/6), Statewide, MD: Edgar served as an inspection team member for annual NBIS bridge inspections of Maryland Transportation Authority facilities, including I-95 and the Chesapeake Bay Bridge. His responsibilities included performing bridge inspections, preparing reports in Maryland Transportation Authority's bridge management system, and inspecting trusses, steel girders, prestressed concrete girders, and sign structures using various snooper equipment.

JESSICA JIA, PE, PTOE, RSP$_1$

Traffic Warrant Studies/Signal Design

Years of Experience: 20 (1 with RK&K)

Education: MS, Transportation Planning & Management; BS, Economics

Registration: Professional Engineer (TX, 122913)

Jessica brings extensive experience in traffic modeling, operational analysis, and transportation planning. With more than 16 years of experience, she has led and supported complex traffic studies involving corridor operations, traffic forecasting, microsimulation modeling, signal timing optimization, traffic impact analyses, and multimodal transportation improvements. Jessica is highly proficient in Synchro, Vissim, and other traffic analysis tools, using data-driven modeling techniques to evaluate existing conditions, forecast future operations, quantify mobility improvements, and support transportation investment decisions.

Throughout her career, Jessica has managed and delivered traffic modeling efforts for corridor studies, freeway and interchange evaluations, traffic signal optimization projects, safety improvement initiatives, and transportation planning studies for local agencies, counties, metropolitan planning organizations, and TxDOT. Her experience includes developing and calibrating traffic models, analyzing intersection and corridor performance, evaluating operational alternatives, conducting capacity and level of service analyses, and translating technical findings into actionable recommendations for decision-makers.

Williamson County | Ronald Reagan Boulevard, Section D1, Williamson County, TX: Jessica served as the traffic design lead for the project and designed traffic signals at Ronald Reagan and Parmer Ranch and Ronald Reagan at CR 245. She produced the complete traffic signal PS&E plans including pole/arm layouts, cabinet location, conduit and pull box routing, detection layouts, signing/pavement markings, and quantities/cost estimates. She led coordination with electric, telecommunications, and other utility owners to confirm service points, meter locations, conduit routing, and conflict resolution to reduce relocations and construction risk. Jessica also facilitated coordination and alignment among Williamson County, TxDOT, and the City of Georgetown to ensure design compliance and a seamless transition to ongoing operations and maintenance.

TxDOT | Traffic Engineering and ITS for Austin District, Austin, TX: Jessica serves as task leader for the TIA reviews and traffic operations evaluations, with a focus on identifying mitigation strategies and conducting feasibility studies for roundabouts and signals. She also oversees the signal warrant analysis and recommendation presentation to the District traffic signal committee. To date, Jessica has led and assisted on more than 40 TIA review assessments, signal timing reviews, signal justification studies, intersection control evaluations, and plan reviews.

City of Bellaire | Bellaire Boulevard Signal Timing Improvement Project, Houston, TX: Jessica served as task leader for traffic modeling, signal timing analysis, and simulation efforts along Bellaire Boulevard. She evaluated full-day turning movement data, origin-destination patterns, and field observations to develop optimized signal timing, progression, and coordination strategies. Through data-driven traffic modeling and operational analysis, the project achieved an approximately 16% reduction in corridor delay and improved overall traffic progression.

TxDOT | FM 1593 Corridor Traffic Analysis & Improvement Study, Yoakum, TX: Jessica served as deputy project manager and led traffic modeling and operational analysis efforts for this corridor study serving a major industrial development. She directed data collection, development of traffic models, traffic operations analyses, and evaluation of improvement alternatives. Her work included assessing peak-period traffic impacts associated with shift changes, identifying operational deficiencies, quantifying improvement benefits, and presenting recommendations to stakeholders.

MONISHA SANAMPURI, EIT

Traffic Warrant Studies/Signal Design

Years of Experience: 3 (1 with RK&K)

Education: MS, Civil Engineering; BS, Civil Engineering

Registration: Engineer-In-Training (TX, 84716)

Monisha has experience in traffic modeling, traffic analysis, traffic signal design, ITS, signing, illumination, and temporary traffic control for TxDOT and City of San Antonio projects. She supports transportation planning and operational analyses through the evaluation of traffic data, traffic impact assessments, and corridor operations studies. Monisha is proficient in OpenRoads Designer, GEOPAK, MicroStation, GuideSIGN, and Bluebeam and applies these tools to support transportation design, traffic engineering analyses, and PS&E development. Based in RK&K's Austin office, Monisha contributes to traffic modeling, TIAs, traffic operations evaluations, signal design, ITS planning, and signing and pavement marking design to improve mobility, safety, and overall transportation system performance.

TxDOT | Schulenburg Traffic Analysis, Schulenburg, TX: Monisha supported traffic operations analyses for roadway improvement projects by organizing, compiling, and evaluating traffic data used for operational assessments and project decision-making. She assisted with traffic-related data management, project documentation, and transportation analysis tasks, gaining experience in traffic engineering workflows, operational evaluations, and multidisciplinary project coordination.

TxDOT | Bryan District Speed Studies, Bryan District, TX: Monisha supported traffic engineering studies and speed limit evaluations by collecting, compiling, and analyzing crash data from the Crash Records Information System database. Her work involved organizing traffic and safety data used to support engineering analyses, operational assessments, and corridor-level transportation studies throughout the Bryan District.

City of San Antonio | Zarzamora Signal Design Project, San Antonio, TX: Monisha supported traffic signal improvements for three signalized intersections and one pedestrian hybrid beacon along the Zarzamora corridor. She assisted with preparation of signal layouts, quantity calculations, elevation views, and PS&E development using GEOPAK. Through coordination with multidisciplinary design teams, she contributed to projects aimed at improving corridor operations, mobility, and roadway safety.

LTRA | IH 410–US 281 ITS Corridor Improvements, San Antonio, TX: Monisha supported ITS improvements designed to enhance traffic operations, communications, and corridor monitoring. Her responsibilities included development of ITS layouts, conduit routing, fiber optic network layouts, and ground box plans using MicroStation. She coordinated with TxDOT and project stakeholders to address utility conflicts and support infrastructure improvements that improve traffic management and system performance.

TxDOT | US 90 Illumination & Signing Improvements, TX: Monisha supported transportation infrastructure improvements focused on enhancing roadway visibility, driver guidance, and operational safety. She prepared signing layouts using GuideSIGN, assisted with illumination design development, supported plan production in MicroStation, and contributed to quantity calculations and PS&E package preparation.

TxDOT | IH 610 Guide Sign Improvements, Houston, TX: Monisha assisted with guide sign layout development and PS&E production for improvements along IH 610.

LARRY PICASSO, PE, PTOE

Traffic Signal Timing

Years of Experience: 13 (1 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (TX, 128068)

Larry brings more than 13 years of experience in traffic engineering, with specialized expertise in traffic signal timing, signal operations, traffic signal design, traffic studies, and transportation project delivery. His experience includes developing and implementing signal timing improvements, evaluating corridor and intersection operations, preparing traffic signal, signing, pavement marking, and illumination plans, and supporting projects from planning through final construction. Larry has managed traffic engineering programs and on-call contracts for multiple Texas agencies and municipalities, providing technical leadership in traffic operations, PS&E development, project scoping, utility coordination, and construction support.

Prior to joining RK&K, Larry served as project manager for traffic engineering on-call contracts for the Cities of San Antonio, Boerne, New Braunfels, Seguin, and Bee Cave, and as project manager and deputy project manager for Bexar County. In these roles, he led traffic operations studies, signal timing evaluations, traffic signal design efforts, and mobility improvement projects throughout the San Antonio region. He also oversaw traffic-related tasks for the City of San Antonio's 2022–2027 Bond Program.

TxDOT | Traffic Engineering and ITS for Austin District, Austin, TX: Larry provided design and project management support on this on-call contract for traffic engineering services for the Austin District. Tasks include traffic engineering studies, traffic signal design, signing, pavement markings, illumination design, pedestrian circulation studies, corridor analysis, railroad replanking, ADA related improvements, and data collection. Most recently, Larry has provided support for the review of traffic impact analyses.

Bexar County | Traffic Signal Inventory Log & Timing Analysis (Phases I–VIII), Bexar County, TX: Following implementation of the County's ATMS, Larry led the development of a comprehensive inventory and operational assessment of the 24 traffic signals maintained by Bexar County. He evaluated existing signal hardware, software, communications systems, intersection geometrics, ADA/TAS compliance, crash history, and signal phasing. Larry developed optimized traffic signal timing plans using Synchro, identified infrastructure upgrades, prepared implementation procedures, and recommended cost-effective operational improvements to enhance safety and efficiency throughout the County.

Bexar County | ATMS Planning & Implementation, Bexar County, TX: Larry worked closely with County staff to develop the software platform, communications network, and traffic signal hardware and software upgrades required to establish a sustainable traffic management system. His responsibilities included evaluating communications alternatives, assessing connectivity requirements, analyzing existing infrastructure, and developing recommendations that improved the County's ability to monitor, manage, and optimize signal operations.

City of New Braunfels | On-Call Engineering Services, New Braunfels, TX: As project manager for the City's on-call engineering services contract, Larry directed traffic engineering studies, traffic signal timing and design projects, intersection analyses, ITS planning and design, traffic control plans, signing and pavement marking improvements, and traffic impact assessments. He regularly presented findings and recommendations to the Transportation and Traffic Advisory Board and served as a trusted advisor to City staff on traffic operations and mobility improvements.

City of San Antonio | On-Call Traffic Engineering Services, San Antonio, TX: Larry served as project manager for this citywide traffic engineering on-call contract, overseeing multiple traffic signal and ITS assignments throughout San Antonio.

SHEILA MENDOZA

Traffic Signal Timing

Years of Experience: 2 (1 with RK&K)

Education: BS, Civil Engineering; AS, Engineering; AS, Interdisciplinary Studies

Sheila supports traffic engineering, traffic operations, and traffic signal projects throughout the region. She has experience using transportation design and analysis software, including OpenRoads Designer, AutoCAD, and SignCAD, to support roadway and traffic engineering assignments. Her experience includes TIA reviews, traffic operations evaluations, traffic signal-related studies, and transportation design support. Sheila contributes to the evaluation of traffic conditions and operational performance by reviewing TIAs and assisting with traffic engineering assessments for the TxDOT Austin District.

TxDOT | New Traffic Signal Design & Improvements, Hidalgo, Cameron, and Starr Counties, TX: Sheila served as engineering support for the design of seven new traffic signals and improvements to one existing traffic signal. Provided support in the preparation of PS&E documents. Assisted in the development of existing conditions, proposed layout plans, and proposed signing and pavement marking plans.

Delaware Department of Transportation | Signal Retiming Program, Statewide, DE: Sheila supported the project by calculating critical movement summation values, evaluating intersection capacity and level of service, analyzing existing signal timing plans, and modeling current conditions in Synchro and SimTraffic.

Washington State Department of Transportation | Speed Camera Program, Statewide, WA: Sheila supported the WSDOT Speed Camera Program by collecting and analyzing traffic speed data from highway locations throughout Washington. Used Iteris ClearGuide to obtain vehicle speed metrics, compile monthly datasets, and compare conditions before deployment, during deployment, and when cameras were inactive. Through trend analysis and data visualization, helped evaluate the effectiveness of the speed camera program in reducing speeding and improving driver compliance.

Pennsylvania Department of Transportation | I-95C, Bensalem, PA: Sheila supported the guide sign design effort by updating roadway signage to comply with current Pennsylvania Department of Transportation, MUTCD, and federal standards. Developed sign layouts using GuideSIGN and MicroStation V8i, performed quality checks on sign content and placement, and assisted the project team in advancing design deliverables through multiple project phases.

ISELA CANTU

Traffic Signal Timing

Years of Experience: 3 (1 with RK&K)

Education: BS, Civil Engineering; AS, Engineering

Isela supports traffic signal timing, traffic signal design, traffic operations, and roadway safety initiatives. Working closely with senior traffic engineers, she assists with signal design development, traffic control evaluations, and operational analyses aimed at improving intersection performance and roadway efficiency. Isela brings a strong foundation in civil and transportation engineering, with experience applying roadway design standards, traffic operations principles, and safety-focused engineering practices. She thrives using data-driven analysis and innovative transportation solutions to optimize traffic signal performance, enhance mobility, and improve safety for all roadway users.

TxDOT | Toll 365, Mission–Pharr, TX: As project engineer, Isela supported the development of this approximately 12-mile, $281.7 million transportation project extending from Conway Avenue to US 281 in the Rio Grande Valley. She worked as part of a multidisciplinary team delivering a major regional mobility improvement project, gaining experience in transportation design, traffic operations, and roadway improvements. Through her involvement in project coordination and engineering design activities, Isela strengthened her understanding of traffic engineering principles and the integration of roadway infrastructure improvements that support efficient traffic flow and overall transportation system performance.

Tennessee Department of Transportation | I-24 Southeast Choice Lanes, Nashville, TN: This Public-Private Partnership project will improve travel time reliability and regional connectivity along approximately 26 miles of I-24 between I-40 near downtown Nashville and I-840 near Murfreesboro. During the pursuit phase, Isela assisted with the conceptual development of maintenance of traffic plans. Her responsibilities included developing maintenance of traffic roll plots and typical sections using Bentley OpenRoads software. She was also responsible for performing quantity estimates to support the development of project cost estimates.

Delaware Department of Transportation | Signal Retiming at U.S. Route 9 Corridor, Sussex County, DE: Isela supported signal retiming efforts for a nine-intersection coordinated corridor maintained by the Delaware Department of Transportation. Conducted critical movement summation and level of service analyses, evaluated existing signal timing plans, and developed proposed timing improvements using Synchro and SimTraffic. Assisted in optimizing traffic progression, reducing corridor delay, and improving operational efficiency through data-driven signal timing strategies.

JESSICA KESSINGER, PE

Traffic Modeling

Years of Experience: 21 (1 with RK&K)

Education: MS, Civil Engineering; BS, Civil Engineering

Registration: Professional Engineer (TX, 118217)

Jessica has 21 years of experience in traffic engineering, transportation planning, and project management, with extensive experience leading traffic studies, operational analyses, corridor evaluations, and transportation improvement projects for state and local agencies. Her expertise includes traffic forecasting, intersection and corridor operations analysis, traffic signal design, access management evaluations, managed lane assessments, and microsimulation modeling using Vissim. Jessica has served as traffic task lead and project manager on major transportation initiatives throughout Texas and nationwide, supporting feasibility studies, schematic development, PS&E preparation, airport access planning, downtown mobility studies, and complex highway corridor improvements. She has developed and reviewed traffic analyses, prepared operational recommendations, coordinated multidisciplinary teams, and provided technical leadership to help agencies improve safety, mobility, and system performance while advancing projects from planning through implementation.

TxDOT | IH 10 (Loop 1604 to Graytown Road), San Antonio, TX: Jessica served as traffic task lead for this corridor improvement project. She developed traffic projections, performed Vissim microsimulation analyses, prepared the Interchange Access Justification Report for FHWA acceptance, and coordinated with the design team through schematic development. She also prepared permanent and temporary traffic signal plans for the IH 10 and FM 1516 intersection, including signal layout, phasing, detection, temporary signalization, and construction staging coordination.

Central Texas Regional Mobility Authority | General Engineering Consultant, Austin, TX: Jessica served as project manager and traffic lead, overseeing traffic engineering and corridor planning efforts across multiple major corridor projects. She performed Vissim traffic analyses for 183 North, MoPac North, MoPac South, and SH 45 Southwest, supporting operational evaluations, planning studies, schematic design, and transportation decision-making. She also managed traffic studies, consultant reviews, and multidisciplinary coordination activities.

City of San Marcos | Downtown Two-Way Conversion Study, San Marcos, TX: Jessica served as traffic lead for the evaluation of converting Guadalupe Street and LBJ Drive from one-way to two-way operation. She led traffic operations analyses of multiple geometric and multimodal alternatives and used Vissim microsimulation to evaluate operational impacts, compare alternatives, and support the City's mobility and transportation investment decisions.

TxDOT | I-35 Mobility35 Program – North 16-Mile Comprehensive Project, Austin, TX: Jessica served as project manager and led traffic analysis efforts for the corridor from US 183 to RM 1431. Her responsibilities included developing traffic projections, coordinating corridor-wide transportation assumptions, performing Vissim microsimulation analyses, preparing the Interchange Access Justification Report , and supporting schematic design development through close coordination with the project design team.

TxDOT | I-35 Feasibility Study, Austin, TX: Jessica served as traffic task lead for the 10-mile corridor study from RM 1431 to SH 95. She developed existing and future-year traffic analyses and performed Vissim microsimulation to evaluate corridor operations and compare interchange improvement alternatives, including innovative intersection and interchange concepts. She also prepared the traffic report documenting methodologies, findings, and operational recommendations.

MAHMOOD SHEHATA, PE

ITS

Years of Experience: 25 (16 with RK&K)

Education: BS, Civil Engineering

Registration: Professional Engineer (TX, 143317)

Mahmood is a nationally recognized transportation professional with more than 25 years of experience leading traffic engineering, traffic modeling, and ITS projects for state, regional, and local agencies across Texas, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, Washington, D.C., North Carolina, and Washington State. His expertise is centered on the application of data-driven traffic modeling and operational analysis to improve mobility, safety, and system performance.

Mahmood has led complex traffic forecasting, corridor operations studies, traffic simulation analyses, signal warrant evaluations, and ITS planning efforts, including the development of Concepts of Operations, traffic management strategies, and operational improvement programs. He has extensive experience using VISSIM, CORSIM, Synchro/SimTraffic, SIDRA, Highway Capacity Software, ArcGIS, AutoCAD, and MicroStation to evaluate transportation networks, test alternatives, and support investment decisions.

TxDOT | Traffic Engineering and ITS for Austin District, TX: Mahmood serves as project manager and lead traffic engineer for this five-year traffic engineering and ITS IDIQ contract. He leads a multidisciplinary team performing traffic engineering studies and operational evaluations, including traffic signal timing reviews, signal studies, capacity analyses, traffic projections, intersection control evaluations, and Synchro modeling. He has led the development of innovative intersection concepts and operational strategies to address future congestion and mobility needs throughout the Austin District while ensuring quality, schedule, and budget compliance.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: Mahmood served as traffic engineering technical advisor and provided leadership for traffic signal design, signing and pavement marking design, and intersection operations analyses. He guided the development of traffic engineering studies evaluating both signalized and unsignalized intersections, considering interim arterial operations and the ultimate freeway frontage road configuration. His role included oversight of traffic signal plans, corridor operations strategies, and long-term transportation systems planning.

Pennsylvania Department of Transportation | US 30 Advance ITS Improvements, Full Design-Build, Chester County, PA: Mahmood served as quality control manager and its engineer for this major ITS deployment project. The project included installation of dynamic message signs, CCTV cameras, Bluetooth travel-time sensors, new fiber-optic communications infrastructure, and upgrades to 81 traffic signals for integration into the statewide Unified Command and Control System. Mahmood led signal integration, communications deployment, operational scenario development, and traffic signal timing optimization using Synchro to support incident management and corridor operations.

Pennsylvania Department of Transportation | District 6-0, I-76 Integrated Corridor Management Project, Montgomery & Philadelphia Counties, PA: Mahmood served as lead traffic engineer for this advanced traffic management initiative. He led ITS systems engineering, VISSIM-based operational analyses, and deployment planning for a variety of innovative mobility strategies, including variable speed limits, integrated corridor management, hard shoulder running, and multimodal coordination with SEPTA and parallel arterial networks. The project focused on improving traffic flow and system reliability along a critical urban freeway corridor.

DIEGO ROBALINO MUNOZ, EIT

Signing & Pavement Markings

Years of Experience: 2 (2 with RK&K)

Education: MS, Transportation Engineering; BS, Civil Engineering

Registration: Engineer-In-Training (TX, 83588)

Diego is a traffic engineer with experience in traffic operations, traffic warrant studies, traffic signal design, capacity analysis, and transportation planning. Based in RK&K's Austin office, he has supported the evaluation and design of signalized intersections through traffic data analysis, operational assessments, and signalization recommendations. His expertise includes traffic forecasting, corridor and intersection studies, ITS, signing and pavement marking design, and both microsimulation and macroscopic modeling of transportation networks. Diego applies a comprehensive understanding of traffic operations and signal systems to develop solutions that improve safety, mobility, and overall transportation system performance.

TxDOT | Traffic Engineering and ITS for Austin District, Austin, TX: As a traffic engineer, Diego conducted TIA reviews, capacity analyses, traffic operations evaluations, and traffic signal warrant analyses for projects throughout the Austin District. His responsibilities included evaluating operational impacts from proposed developments, identifying mitigation measures, performing roundabout feasibility studies, and reviewing traffic signal warrant analyses to support transportation decision-making.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: Diego supported the traffic engineering team by developing pavement marking and signing designs for the upgrade of Ronald Reagan Boulevard from a two-lane roadway to a four-lane divided arterial. His work included signing layout, pavement marking design, and coordination of transportation improvements as part of the PS&E development process.

City of Aberdeen | On-Call Traffic Engineering Study Services, Aberdeen, MD: Diego assisted with a traffic impact study for a proposed recreational facility. His responsibilities included trip generation, trip distribution, Synchro modeling, operational evaluations, and capacity analyses to assess traffic impacts and support project recommendations.

Pennsylvania Turnpike Commission | PTC I-95/I-276 ITS, Signing and Lighting Design – Work Order 4, Level Corner, PA: Diego supported traffic engineering efforts for the I-95/I-276 interchange project by assisting with signing and pavement marking layouts, as well as ITS quantity calculations and cost estimates.

JAMES LOWE

Task Lead, Environmental; Biological Investigations; WOTUS/Permitting

Years of Experience: 30 (1 with RK&K)

Education: BS, Environmental Science

James has 30 years of experience performing environmental studies for transportation projects through NEPA, county environmental due diligence, and municipal procedures to clear projects for construction. He is a former TxDOT environmental specialist and has held leadership roles managing teams responsible for delivering corridor plans, environmental/schematic, and PS&E projects. James has prepared categorical exclusions (CE), environmental assessments (EA), and environmental impact statement (EIS) NEPA documents. James also served as environmental manager for the TxDOT Austin District's Mobility 35 Program projects, including Capital Express South and Central projects, leading the preparation of NEPA documents. Additionally, James has delivered environmental due diligence for Williamson County's Corridor C project and has experience coordinating with agencies such as USACE, USFWS, TCEQ, THC and TPWD.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: James served as the environmental task manager responsible for conducting and/or coordinating environmental due diligence investigations for the widening of 1.5 miles of Ronald Reagan Boulevard. Due diligence documentation consisted of hazardous materials site assessment, cultural resources survey, waters and wetlands delineation, and endangered species analysis. The project intersects RM 2338 and required coordination with TxDOT Austin District on environmental documents for review.

TxDOT Corpus Christi District | US 281 at Premont 0.5 miles north of FM 1538 to 1.0-mile north of CR 431, Jim Wells County, TX: James served as the environmental task manager for the preparation of an Environmental Assessment in support of the schematic developed for the new location access-controlled relief route around the City of Premont to meet Interstate standards. The project initially faced public opposition from the citizens of Premont. This opposition was overcome through a robust community impact assessment that involved stakeholder and open house meetings to develop a favorable option for all. The resulting proposed design received support from the public and stakeholders and a FONSI was issued for the build alternative.

TxDOT Austin District | I-35 South Capital Express Project US 290/SH 71 to SH 45 SE, Travis County, TX: James served as the environmental task manager/deputy project manager for the preparation of the Environmental Assessment and NEPA documents for the proposed roadway improvements of an eight-mile-long section of I-35, including the addition of express lanes, direct access ramps, transit access and in-line stations, and bicyclist and pedestrian improvements. James prepared and coordinated the preparation of NEPA technical reports, including biological, water resources, traffic noise, air, cultural, indirect and cumulative impacts, and community impact technical reports. He also coordinated the planning and conducted two separate public meetings for the project.

TxDOT Austin District | I-35 Rundberg Lane to US 290, Travis County, TX: James served as the environmental task manager for the preparation of an Environmental Assessment/FONSI for the proposed roadway and mobility improvements that included direct connectors at US 183 and I-35, collector-distributor lanes, and sidewalk improvements. James prepared the EA and conducted the public hearing resulting in a FONSI. James prepared and coordinated the preparation of NEPA technical reports, including biological, water resources, traffic noise, air quality, cultural resources, indirect and cumulative impacts, and community impacts.

MIKE WALKER

Environmental Studies & Documentation; Public Involvement

Years of Experience: 40 (2 with RK&K)

Education: BA, Urban and Regional Planning

Mike brings extensive transportation and environmental planning experience, including 28 years with TxDOT and more than a decade in the private sector. For much of his TxDOT career, he served as the Environmental Coordinator for the Austin District, overseeing environmental compliance and project delivery across an 11-county region. In this role, he managed environmental studies, agency coordination, permitting, public involvement, and environmental documentation necessary to advance transportation projects from planning through environmental clearance.

Mike has extensive experience preparing and reviewing Environmental Impact Statements (EISs), Environmental Assessments (EAs), Categorical Exclusions (CEs), Section 4(f)/6(f) evaluations, environmental re-evaluations, and permit applications. He is highly experienced in public involvement, including planning and facilitating public meetings and hearings, coordinating with stakeholders and regulatory agencies, and preparing public engagement documentation. Mike possesses in-depth knowledge of NEPA and related state and federal environmental regulations and has successfully guided hundreds of transportation projects through the environmental review and clearance process.

TxDOT | SH 45 Southwest, Travis & Hays Counties, TX: As Austin District environmental coordinator, Mike was heavily involved in the development of this highly controversial new-location toll road project. He reviewed and provided input on the Environmental Impact Study and participated in project management meetings, agency coordination meetings, stakeholder workshops, public meetings, and the public hearing process. His involvement required extensive environmental coordination, regulatory compliance, and public engagement over multiple phases of project development.

TxDOT / Central Texas Regional Mobility Authority (CTRMA) | Loop 1 Mobility Improvement Project, Travis County, TX: As District environmental coordinator, Mike oversaw preparation of the Environmental Assessment for capacity improvements along Loop 1 between Cesar Chavez Street and US 183. The project required extensive public involvement, including stakeholder meetings, neighborhood outreach, noise wall workshops, public meetings, and a public hearing. Mike also coordinated environmental review activities and agency involvement throughout project development.

TxDOT | I-35 (Loop 82 to SH 123) – San Marcos River Crossing Improvements, Hays County, TX: Mike served as TxDOT environmental manager for this interstate widening project, which included reconstruction of the I-35 bridge over the San Marcos River. He managed preparation of the Environmental Assessment and biological assessment, addressing impacts to federally protected aquatic species, and participated in Section 7 consultation under the Endangered Species Act.

TxDOT | RM 1626 (FM 2770 to RM 967), Hays County, TX: Mike served as TxDOT environmental manager for this roadway widening project. He managed preparation of the Environmental Assessment, biological assessment, Water Pollution Abatement Plan, and geologic assessment required under the Edwards Aquifer Rules. The project involved significant environmental documentation, agency coordination, and regulatory compliance efforts.

TxDOT | US 183 (RM 620 to SH 71), Travis & Williamson Counties, TX: As environmental supervisor, Mike managed environmental compliance activities for upgrades to this controlled-access freeway corridor. His responsibilities included overseeing multiple Environmental Impact Statement reevaluations, supervising preparation of biological assessments, coordinating multiple Water Pollution Abatement Plans, and ensuring compliance with environmental clearance requirements over several phases of project development.

DANIEL MACKENZIE

Biological Investigations; WOTUS/Permitting

Years of Experience: 3 (1 with RK&K)

Education: BS, Ecological Restoration (minor Park & Natural Resource Management)

Daniel is an Environmental Scientist with experience in biological investigations, wetland delineations, Waters of the United States (WOTUS) evaluations, environmental permitting, and NEPA documentation. His expertise includes conducting wetland delineations in accordance with USACE protocols, preparing Water Features Delineation Reports, performing GIS analyses, and supporting Section 404 Clean Water Act compliance and permitting efforts. He has also conducted aquatic resource surveys, sediment and water quality investigations, and natural resource assessments for transportation and infrastructure projects.

Prior to joining RK&K, Daniel supported environmental assessments and permitting efforts in coordination with the USACE Galveston District and various federal, state, and local agencies. At RK&K, he assists with wetland delineations, WOTUS determinations, due diligence investigations, environmental documentation, and permitting support across Texas and the Southeast. His experience includes biological field investigations, aquatic vegetation surveys, environmental clearance documentation, and regulatory compliance for transportation, dredging, and infrastructure projects.

Williamson County | Wyoming Springs Extension – Williamson County 2024 Bond Program, Round Rock, TX: As environmental scientist, Daniel leads environmental due diligence efforts and conducted a formal wetland delineation for the Wyoming Springs Drive Extension project. He performed field investigations in accordance with USACE and Great Plains Region protocols, collected GPS-based wetland data, and is preparing the Water Features Delineation Report. His responsibilities also include GIS analysis, evaluation of water resources and karst features, preparation of environmental documentation supporting Section 404 Clean Water Act compliance, and coordination with TxDOT for environmental clearance.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: As environmental planner, Daniel was responsible for environmental due diligence investigations associated with the widening of Ronald Reagan Boulevard. His work included QA/QC of the Water Features Delineation Report, incorporation of updated WOTUS regulations into the final Due Diligence Report, and coordination with the TxDOT Austin District regarding environmental documentation and review requirements.

TxDOT | FM 529 Detention Pond, Cypress, TX: As environmental planner, Daniel supported environmental clearance for a proposed detention pond project by conducting QA/QC reviews of the Water Features Delineation Report. He applied his wetland delineation expertise to verify compliance with TxDOT and USACE requirements and assisted in completion of the environmental documentation necessary for project clearance.

TxDOT | SH 99 Segment G from East of IH 45 to West of IH 45, Harris County, TX: As environmental planner, Daniel performed QA/QC reviews of environmental documentation and Water Features Delineation Reports in support of environmental clearance for the SH 99 widening project. His responsibilities included ensuring compliance with TxDOT and USACE requirements, applying WOTUS evaluation experience, and supporting public involvement efforts associated with project development.

Tennessee Department of Transportation | I-40 Pavement Rehabilitation, Shelby County Design Phase, Shelby County, TN: Daniel conducted a formal wetland delineation along approximately 2.9 miles of I-40.

KAREN HUTCHINS-KEIM, PHD, RPA

Cultural Resources

Years of Experience: 19 (9 with RK&K)

Education: PhD, Archaeology; BA, History

Registration: Register of Professional Archaeologists

Karen brings supervisory experience focused on architectural and archaeological resources management. She is a Secretary of the Interior's (SOI)-qualified archaeologist with experience supervising all phases of archaeological work, archival research, management summary, and technical report writing. Her experience includes the management of large scale architectural and archaeological resource survey projects. She oversees contract management, including scope and budget development and adherence, sub-contractor coordination and technical oversight, invoice preparation, and staff and field crew management. She also has experience with Section 106 of the National Historic Preservation Act (NHPA) and Maryland Historic Trust Act of 1985, consulting parties' coordination, Section 106 agreement documents, plans for creative mitigation for adverse impacts to historic properties, NEPA, Section 4(f), ArcGIS geospatial analysis, and Microsoft Access database creation.

Maryland Department of Transportation State Highway Administration | BCS 2021-20A Cultural Resources Services, Statewide, Maryland: Karen serves as contract liaison, project manager, and principal investigator for this five-year statewide cultural resources on-call contract. She manages cultural resources identification, evaluation, and treatment services supporting compliance with state and federal regulations, including Phase I and II archaeological investigations, architectural surveys, National Register evaluations, and cultural resources compliance documentation.

Maryland Department of Transportation State Highway Administration | I-495 & I-270 Managed Lanes Study Cultural Resources, Montgomery & Prince George's Counties, MD: Karen served as project archaeologist and author supporting the Environmental Impact Statement and Section 106 process for this major transportation program. She led archaeological gap analyses, assessments of future survey needs, archaeological permitting, preparation of cultural resources technical reports, NEPA documentation, and coordination of Section 106 consulting parties and meetings.

Maryland Transportation Authority | Bay Crossing Study, Stevensville, MD: As cultural resources technical lead, Karen managed archaeological and architectural resource surveys, identification efforts, and evaluations supporting a new Chesapeake Bay crossing study. She co-authored gap analyses and cultural resources reports for the Environmental Impact Study, led identification of five new archaeological sites, and supported compliance with NEPA and Section 106 of the NHPA.

Tennessee Department of Transportation | Archaeology On-Call, Statewide, TN: Karen serves as project manager and archaeological laboratory manager for the Tennessee Department of Transportation's five-year statewide on-call archaeological contract. She oversees archaeological surveys, evaluations, testing, data recovery investigations, Section 106 compliance, archival research, geomorphological analyses, ground-penetrating radar investigations, artifact analysis, and reporting supporting transportation project development throughout Tennessee.

West Virginia Division of Highways | Phase III Archaeological Study Black Betsy, Putnam County, WV: Karen served as principal investigator and archaeological laboratory manager responsible for managing field investigations, laboratory analysis, artifact processing, radiocarbon dating, technical reporting, and QA/QC. The project included excavation of 170 archaeological features and recovery of more than 20,000 artifacts, resulting in one of the most substantial prehistoric archaeological investigations in the region.

CHRISTINA BURNS

Hazardous Materials

Years of Experience: 9 (3 with RK&K)

Education: BS, Environmental Science

Christina is an environmental planner with specialized experience in hazardous materials assessment, remediation, environmental due diligence, and regulatory compliance. Prior to joining RK&K, she managed the investigation, remediation, and closure of hazardous waste sites throughout Texas, supporting hundreds of soil and groundwater cleanup projects under the Texas Industrial and Hazardous Waste Corrective Action Program, Voluntary Cleanup Program, Innocent Owner/Operator Program, and Leaking Petroleum Storage Tank Cleanup Program. Her experience includes environmental site assessments, soil and groundwater data evaluation, risk-based corrective action, regulatory review, technical reporting, and project closure in accordance with 30 Texas Administrative Code (TAC) Chapter 350.

Christina supports environmental reviews, due diligence investigations, and NEPA documentation. Her responsibilities include conducting hazardous materials desktop assessments, evaluating potential environmental liabilities and contamination risks, documenting existing conditions and potential impacts, and preparing technical reports that support environmental clearance and project development.

Williamson County | Wyoming Springs Extension – Williamson County 2024 Bond Program, Round Rock, TX: Christina conducted a comprehensive desktop environmental review and prepared a constraints map evaluating community resources, cultural resources, hazardous materials, wetlands, waters, aquifer and karst features, and threatened and endangered species. She also completed a Phase I Environmental Site Assessment, including a regulatory database review, historical records research, aerial photograph analysis, and site reconnaissance. No recognized environmental conditions were identified within the project corridor.

Williamson County | Ronald Reagan Boulevard, Segment D1, Williamson County, TX: Christina provided hazardous materials support for the roadway expansion project by conducting a Phase I Environmental Site Assessment for newly acquired right-of-way. Her work included regulatory database research, historical records review, aerial photograph interpretation, and field reconnaissance. She also authored the Environmental Due Diligence Report evaluating hazardous materials and other environmental resources associated with the roadway improvements.

TxDOT | FM 529 Detention Pond, Cypress, TX: As environmental planner, Christina supported environmental clearance efforts for the proposed detention pond project. She completed environmental desktop reviews and contributed to environmental documentation required for project approval. Although primarily focused on environmental clearance, the work included review of environmental resource constraints as part of the overall due diligence process.

Austin Transit Partnership | NEPA Review, Austin, TX: Christina supported the Federal Transit Administration's NEPA review process for the Austin Light Rail Project by reviewing environmental technical reports (including the hazardous materials report) and Environmental Impact Statement chapters and preparing technical comments. Her work included evaluation of environmental documentation and technical resource reports for compliance with federal environmental requirements and environmental risk considerations.

Maryland Transportation Authority | Francis Scott Key Replacement, Dundalk, MD: Christina served as environmental planner for the emergency debris removal and bridge replacement efforts following the Francis Scott Key Bridge collapse. She was responsible for hazardous materials data collection, historical site research, and documentation of existing hazardous materials conditions within the project area.

REFERENCES

While RK&K has not yet had the opportunity to serve the City of Edinburg, the references provided below can speak to our performance on similar assignments, including our responsiveness, commitment to client service, ability to meet project schedules and budgets, and the quality of our deliverables. We encourage you to contact these clients directly to discuss their experience working with RK&K.

Scott Cunningham
Traffic Operations Engineer,
TxDOT Austin District

512.698.0549
scott.cunningham@txdot.gov

RK&K has delivered more than 60 on-call traffic engineering assignments for the TxDOT Austin District, providing TIA reviews, traffic operations modeling, access evaluations, signal studies, and timing optimization to support safe and efficient transportation systems.

Robert Daigh, PE
Senior Director of Infrastructure,
Williamson County, TX

512.943.3330
bdaigh@wilco.org

As prime consultant, RK&K provided environmental services for the widening of Ronald Reagan Boulevard from a two-lane roadway to a four-lane divided arterial, completing environmental studies, agency coordination, permitting support, and documentation.

Sharon Smidler, PE
Transportation Development Division
Director, Henrico County, VA

804. 501.4621
smi20@henrico.us

RK&K is leading the design of a major traffic signal modernization program for Henrico County, advancing the County's transportation infrastructure through upgrades at more than 120 signalized intersections.

INSURANCE

RK&K maintains professional liability insurance well in excess of the City of Edinburg's minimum requirements. This includes expanded pollution coverage (HAZMAT) as an endorsement to the RK&K basic practice policy. This insurance provides coverage for damages due to errors or omissions by RK&K in the performance of these services.

RK&K also maintains Comprehensive General Liability Insurance, Comprehensive Automobile Liability Insurance, and Workman's Compensation Insurance with the Carriers and in the amounts shown on the sample insurance certificate, included on the following page. We understand that, once selected for a contract, RK&K's policy must name the City of Edinburg as an Additional Insured.

A list of insurance claims filed against the firm in the last five years is also included at the end of this submittal.

PROFESSIONAL SERVICES AGREEMENT

RK&K has reviewed the Professional Services Agreement and provided a list of proposed exceptions for consideration, as required. We look forward to discussing these items during the negotiation process and working collaboratively toward a mutually acceptable agreement. As noted previously, RK&K is aware of and will satisfy the required insurance requirements.

PROPOSED EXCEPTIONS

Page 10, Section X, Indemnification, A

Proposed language: To the maximum extent allowed by law, Consultant agrees to and shall indemnify **and** hold harmless, ~~and defend~~ City, its officers, ~~agents,~~ and employees from any all **third-party** claims, losses, causes of action and damages, suits and liability of every kind, including all **reasonable** expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, ~~arising out of or directly connected with~~ **to the extent caused by** the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

Page 10, Section X, Indemnification, B

Proposed language: Consultant agrees to assist City in defense of claims or litigation brought against the City related to ~~this project, including any claims related to~~ design or any other services provided by consultant regarding this agreement.

Page 10, Section XI, Limitation of Liability, A

Proposed language: ~~Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not~~ **Neither party will** be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if ~~City~~ **the party** has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

CONTACT INFORMATION

If you have any questions or require additional information, please contact us using the information provided below.

RK&K is excited about the opportunity to serve the City of Edinburg through this contract. We believe this partnership will allow us to demonstrate the qualities that have consistently earned RK&K recognition as a leading engineering consultant, as well as the trust of clients who repeatedly select us for their most important projects.

Through technical strength, proactive communication, and a commitment to delivering measurable results, we strive to be more than a consultant—we strive to be the City of Edinburg's trusted advisor and long-term partner.

RE: Request for Statement of Qualifications for Professional Engineering Services.
Solicitation Number: RFQ-2026-7

To whom it may concern,

We are pleased to submit our Statement of Qualifications to the City of Edinburg for Professional Engineering Services. **S2 Engineering, PLLC** is a civil engineering and land surveying consulting firm established in 2021 and headquartered in Mission, Texas. Our firm is led by Jose Noe Saldivar, P.E., C.F.M., who brings more than 29 years of progressive experience in land development, transportation, drainage planning and design, utility infrastructure, and municipal engineering. His extensive knowledge of regional infrastructure, regulatory requirements, and coordination with local agencies enables our team to successfully deliver projects from planning through construction.

S2 Engineering provides comprehensive civil engineering services supported by an experienced team of professional engineers, registered professional land surveyors, graduate engineers, and technical staff. Our multidisciplinary team has experience in roadway design, drainage and stormwater management, water and wastewater infrastructure, subdivision development, site development, utility coordination, construction administration, and land surveying. This diverse expertise allows us to efficiently deliver projects while maintaining a high standard of technical quality and client service.

Our team possesses strong experience navigating local requirements within the City of Edinburg and its Extraterritorial Jurisdiction (ETJ), including coordination with utility providers, drainage districts, and other regulatory agencies. We regularly navigate through and/or apply local design criteria, permitting requirements, subdivision regulations, right-of-way dedication, utility coordination, and applicable state and local standards.

At S2 Engineering, we are committed to providing responsive, dependable, and high-quality professional engineering services. We understand the importance of collaboration and are dedicated to building long-term relationships by consistently exceeding client expectations.

Enclosed within this Statement of Qualifications is detailed information regarding our team's experience, technical capabilities, and representative projects that demonstrate our commitment to excellence and service to the communities we support.

Should you have any questions or require additional information, please do not hesitate to contact Mr. Jose Noe Saldivar, President, at (956) 403-9787 or via email at s2engineering.ns@gmail.com

We appreciate the opportunity to be considered for this solicitation and look forward to the possibility of working together.

Sincerely,

S2 Engineering, PLLC

PROFILE OF
Engineering Services

S2 Engineering, PLLC is licensed by the Texas Board of Professional Engineers and Land Surveyors to provide engineering and surveying services in the State of Texas (TBPE Firm No. F-22858; TBLS Firm No. 10194796). The firm offers a comprehensive range of professional engineering services to support public and private development projects throughout the Lower Rio Grande Valley. Our experience includes roadway design, drainage and stormwater management, water and wastewater infrastructure, subdivision and land development, site development, utility coordination, construction administration, and land surveying services that support the planning, design, and implementation of engineering projects.

S2 Engineering has developed strong working relationships with local agencies, county precincts, municipalities, and private entities, and has been selected to provide on-call engineering services for certain public entities, reflecting our reliability, responsiveness, and consistent delivery of quality work.

Our engineering services include the following:

- Hydrologic & Hydraulic Modeling & Design
- HEC-RMS
- HEC-RAS
- Site Planning & Land Development
- Stormwater Drainage Design
- Roadway Hydraulic Design

- Utility Engineering
- Route Studies & Schematic Design
- Street, Roadway & Highway Design
- Traffic Control Planning
- Construction Management
- Preparation of Plans, Specifications, and Estimates (PS&E)

Supporting Services:

- Mapping / GIS
- Surveying
- Construction Staking
- Project/Utility Coordination

BELOW IS A LIST OF REPRESENTATIVE AND MOST RECENT PROJECTS OUR FIRM DELIVERED OR IS CURRENTLY DESIGNING:

DRAINAGE PROJECTS

2018 BOND REFERENDUM PROJECT No. 35 – SOUTHWEST WESLACO PHASE III IBWC STRUCTURE No. 105 AL (2023)

S2 Engineering provided PS&E of the IBWC structure which the design consisted of a reinforced concrete gatewell equipped with a sluice gate for flow regulation, reinforced concrete box culverts, hydraulic transitions, riprap-lined channels, energy dissipation structures, roadway reconstruction, and permanent pumping facilities to maintain drainage during high tailwater events. Hydraulic analyses were performed to evaluate system performance, determine structure sizing, and ensure compatibility with existing drainage infrastructure and IBWC requirements.

2023 BOND PROJECT No. 8.5 -LA VILLA/EDCOUCH/ELSA PHASE II IBWC STRUCTURE No. 604 AL (2024)

S2 Engineering provided PS&E of the IBWC structure which the design consisted of a reinforced concrete gatewell equipped with a sluice gate for flow regulation, reinforced concrete box culverts, hydraulic transitions, riprap-lined channels, energy dissipation structures, roadway reconstruction, and permanent pumping facilities to maintain drainage during high tailwater events. Hydraulic

analyses were performed to evaluate system performance, determine structure sizing, and ensure compatibility with existing drainage infrastructure and IBWC requirements.

2023 BOND PROJECT 15-1 PD - LATERAL EXTENSION 2 (2026)

S2 Engineering provided professional engineering services for the extension of PD Lateral Drain, a regional drainage improvement project designed to increase stormwater conveyance capacity and improve drainage infrastructure within a developing corridor. The project consisted of widening the drainage channel approximately 3,000 linear feet while maintaining hydraulic continuity with the existing drainage network, accommodating culvert crossings along the existing roadways, and relocating an irrigation canal along with improving the configuration of the existing system.

2023 DRAINAGE BOND PROJECT 23 – DONNA NORTH LATERAL EXTENSION (2026)

S2 Engineering provided professional engineering services for the design of Drainage Bond Project No. 23 – Lateral Extension, a regional drainage improvement project developed to increase stormwater conveyance capacity and improve the performance of an existing drainage channel within a rapidly developing area. The project included approximately 1,600 linear feet of ditch widening and channel improvements, replacement and extension of drainage infrastructure, and relocation of existing irrigation facilities to accommodate the proposed improvements.

2023 BOND PROJECT No. 19 – SOUTH ABRAM LATERAL DRAIN (2024)

S2 Engineering provided professional engineering services for the design of a comprehensive storm drainage improvement project in Precinct 3. The project was developed to alleviate localized flooding, improve roadway drainage, and increase the capacity of the existing stormwater collection system.

The project included the design of a new underground storm sewer system utilizing pipes, curb inlets, junction structures, storm manholes, culvert crossings, and outfall improvements. Additional improvements included roadway drainage enhancements, ditch regrading, riprap-lined erosion protection, pavement restoration, utility adjustments, and coordination of trenchless crossings where required to minimize impacts to existing infrastructure.

2023 BOND PROJECT No. 8.3 - LA VILLA/EDCOUCH/ELSA PHASE II DRAINAGE IMPROVEMENTS (2024)

Engineering services included topographic surveying, hydrologic and hydraulic analyses, open channel design, and preparation of Plans, Specifications, and Estimates (PS&E). The project incorporated reinforced concrete pipe crossings, drainage structures, sluice gates, siphons, culvert installations, maintenance benches, roadway crossings, riprap-lined erosion protection, and utility relocations to provide a complete and resilient drainage system. The design also included channel

grading, embankment stabilization, erosion control measures, and improvements necessary to facilitate long-term maintenance and operation of the drainage corridor.

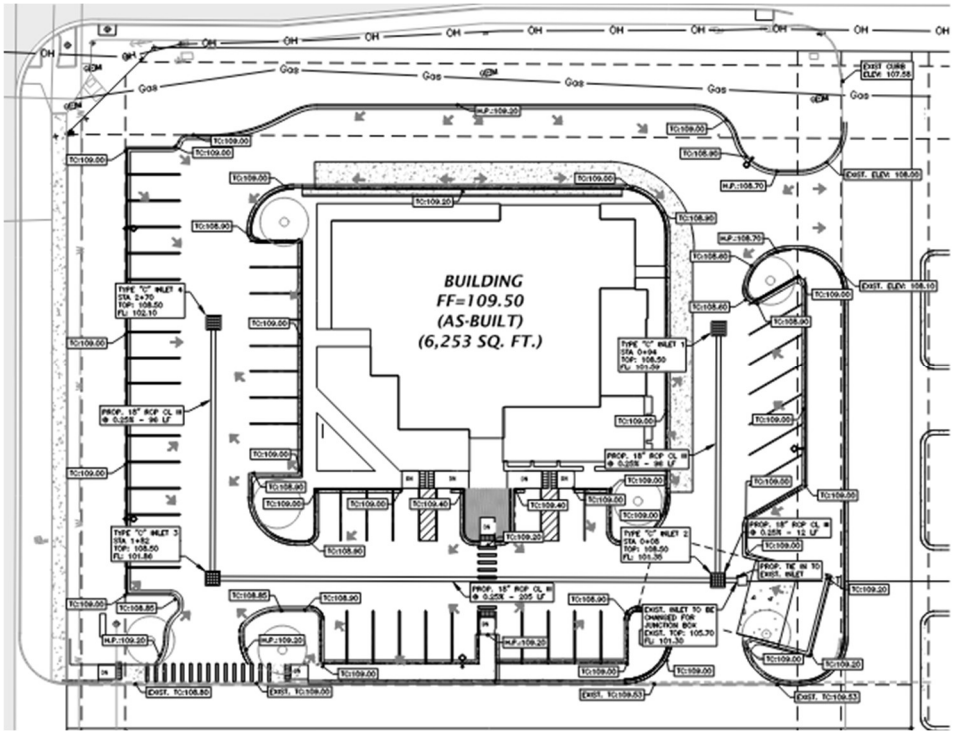
2023 BOND PROJECT No. 8.4 - LA VILLA/EDCOUCH/ELSA PHASE II DRAINAGE IMPROVEMENTS (2024)

Engineering services included topographic surveying, hydrologic and hydraulic analyses, open channel design, and preparation of Plans, Specifications, and Estimates (PS&E). The project incorporated reinforced concrete pipe crossings, drainage structures, sluice gates, siphons, culvert installations, maintenance benches, roadway crossings, riprap-lined erosion protection, and utility relocations to provide a complete and resilient drainage system. The design also included channel grading, embankment stabilization, erosion control measures, and improvements necessary to facilitate long-term maintenance and operation of the drainage corridor.

2023 BOND PROJECT No. 8.2 -LA VILLA/EDCOUCH/ELSA PHASE II IBWC STRUCTURE No. 603 AL (2024)

S2 Engineering provided PS&E of the IBWC structure which the design consisted of a reinforced concrete gatewell equipped with a sluice gate for flow regulation, reinforced concrete box culverts, hydraulic transitions, riprap-lined channels, energy dissipation structures, roadway reconstruction, and permanent pumping facilities to maintain drainage during high tailwater events. Hydraulic analyses were performed to evaluate system performance, determine structure sizing, and ensure compatibility with existing drainage infrastructure and IBWC requirements.

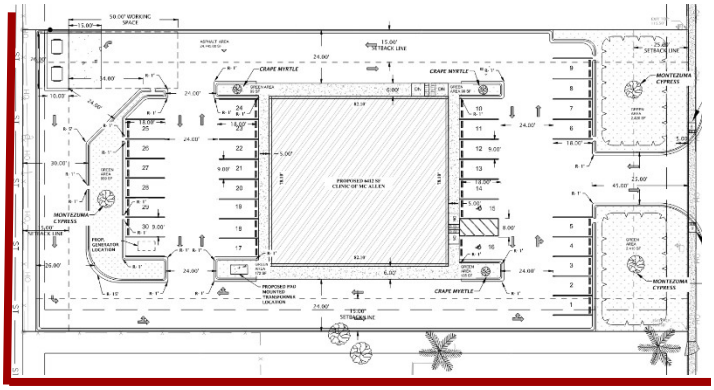
2018 BOND PROJECT No. 35- SOUTHWEST WESLACO DRAINAGE IMPROVEMENTS PH III (2025)



Engineering services included topographic surveying, hydrologic and hydraulic analyses, stormwater modeling, and preparation of Plans, Specifications, and Estimates (PS&E). The project consisted of widening and regrading the existing drainage channel, improving channel geometry, designing of a detention pond, constructing roadway drainage crossings, stabilizing channel slopes, and incorporating erosion control measures to enhance long-term channel performance. Additional improvements included utility coordination, roadway drainage modifications, and channel transitions to integrate the project with existing and proposed regional drainage infrastructure.

SITE PLANS

REYNA'S BBQ MCALLEN (2023)

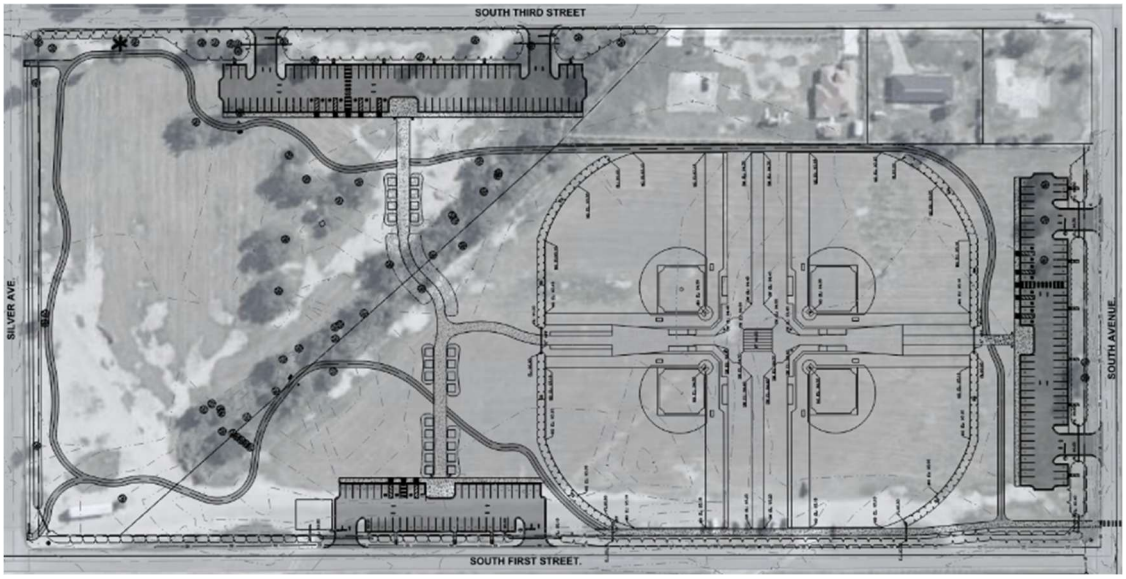


S2 Engineering provided comprehensive civil engineering design services for the development of Reyna's BBQ, a new commercial restaurant located at the intersection of Wisconsin Road and North 10th Street in the City of McAllen. The project included the preparation of complete Plans, Specifications, and Estimates (PS&E) and coordination with the City throughout the site development process.

Engineering services included site grading and drainage design, parking lot and internal circulation layout, ADA-compliant pedestrian facilities, pavement design, utility coordination, water and sanitary sewer service design, storm sewer improvements, erosion control measures, and construction details. The project also incorporated fire lane design, landscape coordination, accessible parking, and driveway improvements to provide safe vehicular and pedestrian access while meeting all applicable City of McAllen development standards.

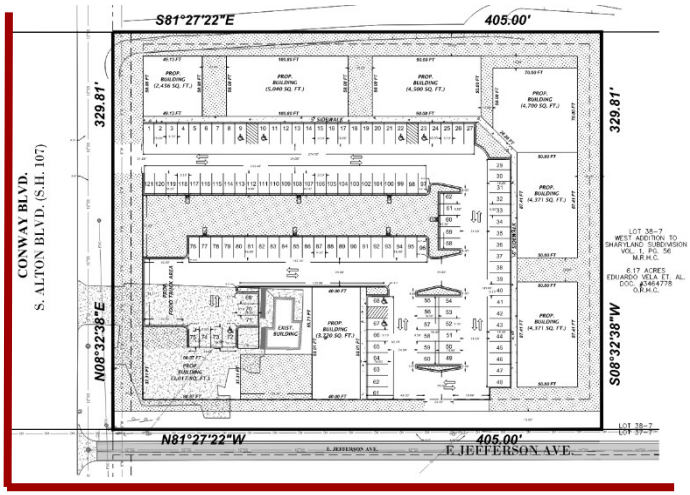
CITY OF MCALLEN HEALTH CLINIC (2024)

S2 Engineering provided professional civil engineering services for the development of a new 6,400-square-foot City of McAllen Health Clinic. The project included the preparation of comprehensive civil site plans to support construction of the medical facility and associated site improvements while ensuring compliance with applicable City of McAllen development standards.



Engineering services included site layout, grading and drainage design, stormwater management, utility design and coordination, pavement and parking lot design, ADA accessibility improvements, erosion control measures, and preparation of Plans, Specifications, and Estimates (PS&E). The project also incorporated fire lane access, landscaping coordination, pavement markings, signage, and utility service connections to provide a fully functional healthcare facility.

CITY OF DONNA SPORTS MEMORIAL PARK (2024)



S2 Engineering provided professional civil engineering services for the design of a multi-use community park and recreational complex developed to enhance public recreation and improve community amenities. The project included the development of baseball and softball fields, parking facilities, hike-and-bike trails, pedestrian sidewalks, recreational open space, site access, and supporting infrastructure.

Engineering services included site planning, topographic surveying, grading and drainage design, stormwater management, utility design and coordination, water distribution, sanitary sewer, pavement design, parking lot layout, ADA accessibility improvements, pedestrian trail design, and preparation of Plans, Specifications, and Estimates (PS&E). Additional improvements included sports field grading, irrigation coordination, landscaping, site lighting coordination, erosion and sediment control measures, and roadway access improvements to provide a safe, functional, and sustainable recreational facility.

TEXAS STAR PLAZA (2026)

S2 Engineering provided professional civil engineering services for the design of a multi-building commercial retail development consisting of approximately 30,000 square feet of commercial space. The project included the development of multiple retail pad sites, internal circulation, parking facilities, utility infrastructure, and stormwater management improvements designed to support phased commercial development while ensuring compliance with applicable City of Alton development standards.

Engineering services included site planning, topographic surveying, grading and drainage design, stormwater management, utility design and coordination, water distribution, sanitary sewer, pavement design, parking lot layout, fire lane design, ADA accessibility improvements, erosion control, and preparation of Plans, Specifications, and Estimates (PS&E). The project also incorporated detention and drainage improvements, landscaping coordination, pavement markings, signage, and utility service connections to create a fully integrated commercial development.

ROAD IMPROVEMENTS

CITY OF MERCEDES STREET IMPROVEMENTS PROJECT (2026)

S2 Engineering is providing professional engineering services for the rehabilitation of four (4) existing roadway segments within the City of Mercedes, encompassing approximately 3,360 linear feet of street improvements. The project includes the preparation of complete Plans, Specifications, and Estimates (PS&E), quantity calculations, cost estimates, and bidding documents for construction. Proposed improvements consist of localized full-depth pavement repairs, application of asphalt tack coat, and placement of a 2-inch Hot Mix Asphalt (HMA) overlay to restore pavement structural capacity, improve ride quality, and extend the service life of the existing roadways. The project is being developed in accordance with applicable City standards and engineering best practices to facilitate a successful public bidding and construction process.

LAND DEVELOPMENT

S2 Engineering has extensive experience providing professional engineering and land surveying services for residential, commercial, and mixed-use subdivision developments throughout the Rio Grande Valley. Our team has successfully delivered projects for municipalities, counties, utility providers, and private developers, providing comprehensive services from initial feasibility through final construction.

Services include boundary and topographic surveying, subdivision platting, roadway and drainage design, water and sanitary sewer design, detention and stormwater management, utility coordination, floodplain evaluations, erosion and sedimentation control, permitting, agency coordination, and the preparation of complete Plans, Specifications, and Estimates (PS&E). S2 Engineering also provides construction administration support, record drawings, and coordination through the plat approval and development process to ensure compliance with local, state, and regulatory requirements.

Below is a list of subdivision developments that out team has completed or is currently designing:

- Acres of Santa Cruz Ph. 3
- Acres of Santa Cruz Ph. 4
- Arnold Galvan Jr
- Bellwood Manor
- Descanso
- DLG
- El Coyote
- Gardens at Villa Verde Ph 1
- Gardens at Villa Verde Ph 2
- J&A Ranch
- La Mansion Health Clinic
- Lockhouse Storage
- Los Amigos Ph 3
- Los Naranjos Estates
- Mcallen Oaks
- Oti subdivision no. 1
- Oti subdivision no. 2
- Oti subdivision no. 3
- Palmer Pavilion
- Pulido's
- RBR no. 5
- RBR no. 7
- RBR no. 8
- Big D industrial park
- Bright Woods
- Christian's Manor
- Corona De Cristo
- Rio Meadows
- Salazar Seminary
- Salida del Sol Ph IX
- Santa Barbara
- Santa Cruz Ranches no. 5
- Santa Cruz Ranches no. 6
- Shopes at Closner
- Sunshine Estates No. 2
- T&O Ranch No. 3
- T&O Ranch No. 4
- T&O Ranch No. 5
- Tars No. 1
- Tars No. 2
- Texas Star Plaza
- Treasure Hills Estates
- Uri Estates
- Venecia
- Vista Bonita No. 16
- Westwood villas

The projects presented herein demonstrate S2 Engineering's commitment to delivering innovative, practical, and cost-effective engineering solutions for public agencies and private clients throughout the Rio Grande Valley. We remain committed to producing high-quality deliverables, maintaining responsive communication, and building lasting partnerships by consistently delivering projects on schedule, within budget, and in full compliance with applicable local, state, and federal standards.

PROJECT APPROACH
PROPOSED METHODOLOGY

S2 Engineering, PLLC understands the importance of a clear process, open communication, and technical excellence in delivering successful projects. Our structured approach ensures that each phase is completed efficiently, on schedule, and in full compliance with regulatory requirements and client goals.

OUR PROVEN METHODOLOGY

1 PROJECT INITIATION
We meet with the client to understand project objectives, scope, schedule, and budget. We identify key stakeholders and establish communication protocols.

2 DATA COLLECTION & EVALUATION
We gather existing data, perform field investigations and surveys, and review applicable plans, reports, and regulatory requirements.

3 ANALYSIS & PLANNING
Our team evaluates alternatives, identifies constraints and opportunities, and develops a plan that meets the project objectives and regulatory standards.

4 DESIGN & DEVELOPMENT
We prepare plans, specifications, and estimates using industry-leading software and QA/QC procedures to ensure accuracy and constructability.

5 PERMITTING & COORDINATION
We coordinate with regulatory agencies and utility providers to obtain necessary approvals and address comments promptly.

6 CONSTRUCTION SUPPORT
We provide bidding assistance, respond to RFIs, review shop drawings, and perform site observations to support successful project delivery.

OUR COMMITMENT TO YOU

We are committed to providing responsive service, practical solutions, and high-quality deliverables. Our goal is to build long-term relationships by exceeding expectations and delivering results that make a difference in our clients' communities.

- Clear & consistent communication
- Strong project management
- Attention to detail
- Cost-effective solutions
- Timely delivery
- Quality assurance
- Regulatory compliance
- Client-focused service

PROGRESSIVE ENGINEERING

WITH EXPERIENCE

S2 Engineering, PLLC,

has a team of qualified personnel providing a combination of backgrounds in design engineering, land surveying and construction. Our President and Senior Project Manager, Mr. Saldivar, is a licensed professional engineer who has more than 29 years of progressive engineering experience in the Lower Rio Grande Valley. He has provided engineering design services for Cities, Counties, Federal entities, and private clients. Our firm's current workload enables Mr. Saldivar to be involved in all project development, from inception through final construction.

BELOW IS A LIST OF REPRESENTATIVE PROJECTS OUR TEAM HAS BEEN INVOLVED IN:

Drainage Projects

Weslaco Drain Improvements, Weslaco, TX (2021)
Proposed USIBWC permanent pump and gate structure, with a reinforced concrete box outfalling to the Main Floodway. The improvements benefit an area of approximately 4,014 acres. This project required close coordination with the USIBWC and six other local and federal government entities, to obtain clearance for a new structure license.

Anaquitas USIBWC Drain Structure, Mercedes, TX (2021)
Proposed USIBWC gate structure, with two reinforced concrete boxes outfalling to the Main Floodway. The improvements benefit an area of approximately 3,840 acres. This project required close coordination with the USIBWC and six other local and federal government entities, to obtain clearance for a new structure license.

K-07-02 Drain Improvements, Pharr/San Juan, TX (2021)
Ditch design, consisting of ditch widening and regrading. The existing ditch width was increased to 125 LF, providing additional capacity for stormwater.

Tierra Dorada Drain Improvements, Hidalgo, County, TX (2021)
Design and sizing of three new culvert road crossings. Two of the culvert crossings are under Shuerbach Rd and Moorefield Rd. The last crossing connects the Tierra Dorada Drain to the Perezville Drain.

J-08 Drain – McColl Rd. Culvert Crossing, Edinburg, TX (2021)
Design and sizing of a culvert crossing under McColl Road (FM 2061), calculating the appropriate tailwater elevation. This project required coordination with TxDOT for the design and traffic control plan.

Ditch 47 & Ditch 350 Improvements, Hidalgo County, TX (2020)
Design and sizing of three culvert road crossings and one culvert irrigation canal crossing. The three culvert crossings are under Mile 6 1/2, Mile 10 N., and Mile 9 N.

Chaparral Drain Extension, Donna, TX (2019)
Ditch design, consisting of ditch widening and regrading Design and sizing of a new culvert.

North San Juan Drainage Lateral, San Juan, TX (2003)
Survey work and hydraulic study for ditch design. Proposed drainage structures and upsizing the irrigation owned drainage ditch from FM 495, north to its outfall near Canton Road.

TxDOT Projects

US 277 / Maverick County, TxDOT-Laredo District (2006)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. System outfalls into Canyon Grande Creek. Preparation of all Hydraulic Sheets.

US 83/359, Webb County, TX (2005)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. System outfalls into Chacon Creek. Preparation of all Hydraulic Sheets.

SH 345, Cameron County, TX (2004)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. System outfalls into a Resaca. Irrigation crossing design. Preparation of all Hydraulic Sheets.

US 83 Arroyo Roma Creek, TX (2004)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. System outfalls into San Casimiro Creek. Preparation of all Hydraulic Sheets.

North I Road, Pharr, TX (2002)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. Illumination, signing and pavement marking design. Preparation of all Hydraulic Sheets.

MEET

THE S2 TEAM

JOSE NOE SALDIVAR, P.E., C.F.M.

Title
President/Senior Project Manager

Years of Experience
29

Education

Technological Institute of Ciudad Victoria, Mexico
Bachelor's in Civil Engineering

Training/Certifications
Professional Engineer: Texas/94076
Certified Floodplain Manager
(CFM)/3340-17N
TxDOT Pre-Certifications:
3.4.1 Minor Bridge Layouts
4.2.1 Major Roadway Design
8.1.1 Signing, Pavement Marking & Channelization
10.1.1 Hydrologic Studies
10.2.1 Basic Hydraulic Design

Areas of Expertise
•PS&E • Hydraulic Design • Hydrologic Studies • FEMA Requirements, Coordination & Funding • Minor Bridge Design • Major Roadway Design

Mr. Saldivar is responsible for the overall project administration and management of S2 Engineering's services, including direct coordination with clients, agencies, and key stakeholders to ensure project objectives are met efficiently and effectively. As Senior Project Manager, he oversees project planning, design coordination, and execution, ensuring that all components of a project are aligned from initial concept through final delivery. The success of each project is driven by a strong foundation in engineering design, supported by in-house surveying and drafting capabilities. S2 Engineering emphasizes practical, cost-effective design solutions that consider constructability, regulatory requirements, and long-term performance. These efforts are supported by the firm's ability to provide accurate survey data, detailed exhibits, and high-quality construction documents. In-house drafting services utilize industry-standard software, including AutoCAD Civil 3D and MicroStation, to produce precise plans and supporting documentation for permitting, bidding, and construction. Throughout the project lifecycle, revisions and updates are carefully managed through a structured document control process to ensure consistency, accuracy, and timely delivery.

TEAM MEMBERS QUALIFICATIONS AND EXPERIENCE

S2 Engineering's goal is to establish long-term relationships with our clients by performing a highly competent service with quality and concern for the client, as well as our local communities. This is successfully done by the technical abilities, project management skills and commitment of the project team members. The resumes of key professional and technical staff are presented individually on the following pages.

Summary

Mr. Saldívar has over 24 years of progressive experience in transportation and drainage planning and design. He has served in key roles as both Project Manager and Surveying Manager for multiple engineering firms, in addition to 14 years of service with the Hidalgo County Drainage District No. 1. His experience includes route studies, planning, and the preparation of plans, specifications, and estimates (PS&E), as well as utility coordination and relocation, roadway geometrics, signage and pavement markings, and hydraulic design.

Mr. Saldívar has contributed to numerous engineering projects involving roadway development, storm drainage systems, traffic control planning, and bridge layout. His expertise includes hydraulic analysis and the preparation of drainage reports and supporting data, including evaluation of drainage areas, discharge calculations, FEMA floodplain and floodway requirements, and the design of culverts and bridge crossings. He is experienced in determining design flows, tailwater and headwater conditions, and evaluating potential overtopping scenarios.

He is proficient in industry-standard software including WinStorm, HEC-RAS, TR-55, HY-8, GEOPAK, and AutoCAD. Additionally, he has performed scour analyses and prepared Storm Water Pollution Prevention Plans (SW3Ps) to support regulatory compliance and minimize sediment transport impacts to drainage infrastructure.

Project Experience

2018 Drainage Bond Program, Hidalgo County, TX (Project Manager)

Mr. Saldívar served as Project Manager for the Hidalgo County 2018 Drainage Bond Program, overseeing the coordination and management of seventeen (17) consulting firms on countywide drainage improvement projects. The program includes a total of thirty-seven (37) projects aimed at reducing flood risk and improving drainage conditions for more than 69,000 structures, protecting over $5.5 billion in assessed property value.

His responsibilities included program-level oversight, consultant coordination, and review and approval of all hydrologic and hydraulic (H&H) analyses and deliverables. Mr. Saldívar also led coordination efforts with the United States International Boundary and Water Commission (USIBWC) for ten (10) projects requiring environmental clearance and permitting for outfalls into the USIBWC Floodway. His leadership ensured regulatory compliance, technical accuracy, and timely advancement of projects across the program.

Drainage Projects

Role: Project Engineer

- Anaquitas Drain
- Chaparral Drain Extension
- Delta Regional Water Mgmt.
- Ditch 47 & Ditch 350
- J-08 Drain
- K-07-02 Drain Improvements
- North San Juan Drainage Lateral
- Tierra Dorada Drain Improvements
- Weslaco Drain Improvements

TxDOT Projects

Role: Project Engineer

- US 277 / Maverick County
- US 83 / 359
- SH 345
- US 83 Arroyo
- Roma Creek

OSCAR HERNANDEZ , R.P.L.S.

Title
Registered Professional Land Surveyor (RPLS)

Years of Experience
43

Education
Harlingen High School

TxDOT PRE-CERTIFICATIONS:
Sequence No. 6344 Pre-certified in:
15.1.1 Survey
15.1.2 Parcel Plats
15.1.3 Legal Descriptions
15.1.4 Right of Way Maps
15.2.1 Design and Construction Survey

Areas of Expertise

- TxDOT Design Surveys
- ALTA/NSPS Survey & Commercial Land Development Support
- Right-of-Way Mapping & Parcel Aquisition Coordination
- Survey Project Management, QA/QC & Final Certification
- Coordination with Municipalities, Counties & Regulatory Agencies

Summary:

Mr. Hernandez has 43 years of surveying in South Texas from San Antonio south to Brownville and from Corpus Christi west to Laredo to good use. Mr. Hernandez's areas of experience and certifications are listed below:

Personal Experience:

SAMES, INC (JUNE 2021 – OCTOBER 2022)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects.
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity.
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

COBBFENDLEY (AUGUST 2019 – JUNE 2021)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high- performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department

TxDOT DISTRICTS:

Pharr District – US 281 from FM 506 to FM 509 (Design Survey)

- Laredo District – US 83 – from San Ygnacio, Texas to the Zapata/Webb County line (Design Survey)
- Beaumont District – FM 3180 from IH-10 to m 565 (Design Survey), IH-10 ¾ mile on each side of FM 3180 (Design Survey)
- Yoakum District – FM 80and FM 121 Rural (Design Survey) for culvert extensions
- Waco District – SH 190 6.7 miles (Design Survey) for widening inter lanes and ramp reversals
- San Antonio District – Intersection of SH 16 and Loop 1604 (Design Survey)

DRAINAGE PROJECTS (DESIGN TECHNITIAN)

- HWY 107 Drainage Improvements -Mercedes Lateral Widening
- Mile 3 Outfall to Bell RDF
- Trenton Drain Phase III

PRECINCT 4 PROJECTS (DESIGN TECHNITIAN)

- Hidalgo Surplus County
- San Carlos -Maintenance Shop Civil Plans
- Owassa Rd and Roosevelt Rd Connection

SAN ANTONIO WATER SYSTEM

- Central Basin: Locating Sanitary Sewer Manholes with GPS and measuring depths, Design Survey for 30 % Design
- Vista Ridge: Creating Metes and Bounds for Easements for construction of distribution water line
- East Sewer Shed: Creating Metes and Bounds for Construction Easement along existing Sanitary Sewer line

CITY OF SAN ANTONIO

- Alley Rehabilitation Design Survey throughout the City Boundary and Improvement Survey:
  - Huantes Property on Guadalupe Street,
  - Las Palmas Property on Commerce Street
  - St Marys Property on Culebra Street

- Sidewalk Construction Project (Design Survey):
  - Martin Luther King Drive Indiana Street
  - Aransas Avenue
  - Porter Street
  - Delmar Street
  - New Braunsfels Avenue

SURVEYS

- Agua Dental, Borwnsville, TX
- Calli Village Townhomes, Borwnsville TX
- Sunshine Village Apartments, Harlingen, TX
- Whataburger, Port Isabel, TX

RMA

- Evans Road from TCP Parkway to Hanging Oak Design Survey
- Blando Road from Wildrness Oak to 3.7 Miles North (Design Survey)

Bexar County

- Pearsall Road (Design Survey) elevating road and bridge

BAIN MEDINA BAIN (NOVEMBER 2018 – AUGUST 2019)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

GUZMAN AND MUNOZ SURVEY MANAGER (SEPTEMBER 2018 – NOVEMBER 2018)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

GONZALEZ DE LA GARZA / SURVEY MANAGER (JULY 2013 – MARCH 2018)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.

- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

PARTNER / REO ENGINEERING AND SURVEYING (APRIL 2000 - AUGUST 2002)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

CARTER AND BURGESS BROWNSVILLE (SEPTEMBER 1997 - APRIL 2000)

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

RESTITUTO A. ASCANO III, R.P.L.S.

Title

Registered Professional Land Surveyor (RPLS)
Graduate Engineer

Years of Experience

46 years

Education

Mapua Institute of Technology
Bachelor's in Civil Engineering
Manila, Philippines

Areas of Expertise

- Boundary Resolution & Title Analysis
- Right-of-Way Mapping & Parcel Acquisition for TxDOT and Local Projects
- ALTA/NSPS Surveys for Commercial and Mixed-Use Developments
- Preparation of Easements & Legal Descriptions for Utility and Drainage Infrastructure
- Oversight of Topographic & Control Surveys for Site Development
- Coordination with Municipalities, Counties, Drainage Districts & Utility Providers
- Survey Project Management, QA/QC & Professional Certification

TEAM MEMBERS QUALIFICATIONS AND EXPERIENCE

Summary:

Mr. Ascano is a Registered Professional Land Surveyor with over 40 years of experience providing surveying services in support of public infrastructure and private land development projects. His experience includes subdivision platting, boundary resolution, right-of-way mapping, and preparation of metes and bounds descriptions in accordance with applicable local, state, and agency requirements. He has extensive experience working in coordination with municipalities, utility providers, and regulatory agencies to support timely project delivery.

Professional Experience:

J.A. Garza & Associates – Project Manager (2012–2014)

- Prepared subdivision plats and survey deliverables for development projects
- Performed boundary analysis, survey control verification, and data processing
- Conducted title research and evaluated easements affecting property development
- Prepared metes and bounds descriptions for plats, easements, and ROW documents

Aranda & Associates – Project Manager / Team Leader (2000–2010)

- Managed survey teams supporting land development and public infrastructure projects
- Coordinated preparation of plats, boundary surveys, and mapping deliverables
- Conducted comprehensive research of deeds, plats, and title records
- Processed field survey data and ensured accuracy of final mapping products
- Prepared legal descriptions and survey reports in accordance with project requirements. Maintained project schedules and ensured timely delivery of survey services

LMS Resources – GIS Technician (2010–2011)

- Converted AutoCAD survey files into GIS databases for infrastructure mapping
- Developed pipeline and mapping datasets using survey and historical data
- Supported integration of survey data into GIS systems for client and municipal use

Bakal De Pamplona - Buisness Owner - Manila Philippines (1997–1995)

- Managed daily business operations, including budgeting, procurement, and personnel oversight
- Coordinated supply logistics and vendor relationships to ensure timely delivery of materials
- Developed organizational and financial management skills applicable to project planning and resource allocation
- Strengthened leadership, decision-making, and client service capabilities

RRJ Construction – Project Engineer (1981–1990)

- Managed project schedules, coordinated construction activities, and resolved field issues to maintain project timelines
- Coordinated with clients, contractors, and multidisciplinary teams to align project objectives
- Developed project specifications and contributed to continuous improvement efforts to optimize efficiency and reduce costs

JC Arches Home Development – Draftsman (1978–1980)

- Prepared detailed engineering drawings based on design specifications and client requirements
- Coordinated preparation of as-built drawings to reflect accurate field conditions
- Interpreted design details and translated them into precise drafting deliverables
- Developed quantity take-offs and bills of materials to support construction and procurement

JUANITO T. MEDRANO

Title
Graduate Engineer

Years of Experience
44 years

Education

University of Nueva Caceres
Naga City, Philippines (1979-1982)
Bachelor's in Civil Engineering

Areas of Expertise

- Survey Data Processing & Analysis
- Easement Documentation & Legal Descriptions
- Topographic Surface Development
- Right-of-Way Mapping & Parcel Exhibits
- AutoCAD Civil 3D Drafting & Design

Summary:

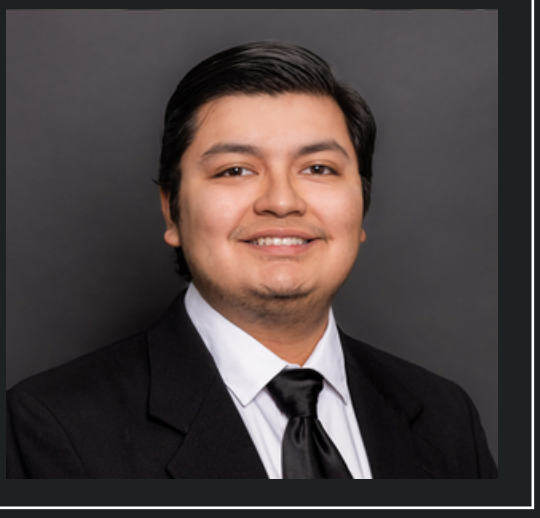
Mr. Medrano is a Graduate Engineer and Surveying Technician with over 40 years of experience supporting land surveying, right-of-way mapping, and infrastructure projects. His background includes drafting, field coordination, boundary research, and survey data processing for both public and private developments. He has extensive experience supporting subdivision and roadway projects through preparation of survey exhibits, right-of-way mapping, and coordination between field and office operations. Mr. Medrano brings a high level of accuracy, efficiency, and reliability to projects.

Professional Experience:

S2 Engineering PLLC – Graduate Engineer / Surveying Technician (June 2023 – Present)

- Prepares drafting exhibits for surveying and right-of-way mapping
- Supports development of survey base maps and project deliverables
- Assists with coordination between field data collection and office production

Aranda & Associates – Land Surveyor / Draftsman (November 1999 – December 2017)



- Supervised staff involved in data collection for survey projects
- Conducted research of parent tracts and adjoining property ownership
- Processed and analyzed field survey data to produce survey plats and mapping exhibits
- Supported preparation of boundary surveys and land development documents

Nesma & Al Fadl Contracting Co. Ltd – Civil Engineer / Site Engineer (May 1992 – May 1994)

- Supervised construction of residential and roadway infrastructure projects
- Oversaw field activities to ensure compliance with plans and specifications
- Coordinated construction efforts for large-scale infrastructure developments

Technical Proficiency

- AutoCAD
- Civil 3D
- Microstation
- Microsoft Office 55+ WPM

LUIS ROBERTO MARTÍNEZ IBARRA, S.I.T.

Title
Graduate Engineer / Surveyor in Training

Years of Experience
6 years

Education
The University of Texas Rio Grande Valley, Edinburg, TX Bachelor of Science in Civil Engineering

Areas of Expertise

- Survey Data Processing & Analysis
- Easement Documentation & Legal Descriptions
- Topographic Surface Development
- Right-of-Way Mapping & Parcel Exhibits
- AutoCAD Civil 3D Drafting & Design
- Coordination with Field Survey & Engineering Teams
- Quality Control of Survey Deliverables

Summary:

Mr. Martinez is a Surveyor-in-Training (S.I.T.) with six years of experience supporting surveying and engineering projects across the Rio Grande Valley. He plays a key role in both field and office operations, specializing in survey data processing, analysis, and the preparation of accurate deliverables to support land development and infrastructure projects. His experience includes easement documentation, legal descriptions, right-of-way mapping, and the preparation of parcel exhibits, as well as drafting survey products using AutoCAD Civil 3D. Mr. Martinez regularly coordinates with field crews and engineering teams to ensure data accuracy and project efficiency, while maintaining quality control standards for survey deliverables. His combined technical knowledge and attention to detail make him an integral part of the project team from data collection through final deliverables.

Professional Experience:

Professional Experience:

S2 Engineering, PLLC – Graduate Engineer / Surveyor-in-Training (2020–Present)

- Assisted in the preparation of subdivision plats and land development plans
- Supported drainage and utility layout design for residential subdivisions
- Prepared drafting and design documents using AutoCAD Civil 3D
- Assisted in the development of drainage reports and supporting calculations
- Coordinated with municipalities and utility providers for project approvals
- Supported preparation of right-of-way exhibits and mapping deliverables

Additional Experience (Engineering & Survey Support):

- Assisted with preparation of construction plans and design details
- Supported project coordination and document preparation for submittals
- Contributed to quality control of engineering and survey deliverables

Technical Proficiency

- AutoCAD
- Civil 3D
- Microstation
- Microsoft Office 55+ WPM

ALEX IVAN SALDIVAR SALAZAR

Title
Graduate Engineer

Years of Experience
26 years

Education

Technological Institute of Ciudad Victoria, Mexico
Bachelor's in Civil Engineering

Areas of Expertise

- Topographic Surface Developmement & Mapping
- Survey Data Integration & Plan Coordination
- Topographic Collector
- AutoCAD Civil 3D Design & Plan Production
- Utility Infrastructure Layouts
- Stormwater Design Analysis & Design
- Subdivision Planning Design

Summary:

Mr. Saldivar is a Graduate Engineer with over 26 years of experience supporting municipal infrastructure, land development, and surveying-related projects. His background includes preparation of engineering plans, topographic mapping, subdivision planning, and field data collection using GPS technologies. He has extensive experience working with municipal agencies on public works projects, including roadway, drainage, and utility infrastructure. Mr. Saldivar brings strong technical expertise and practical field experience to support project delivery.

Professional Experience:

S2 Engineering PLLC – Graduate Engineer (June 2025 – Present)

- Assists in preparation of subdivision construction plans and design documents
- Supports construction staking, survey analysis, and plat preparation
- Coordinates with project teams to support timely project delivery
- Assists with project management and technical documentation

Project Engineer / Survey Support (Independent & Recent Work) (2022 – 2025)

- Prepares engineering plans and supports measurement of urban and rural properties using GPS
- Assists in development of municipal, federal, and state project documentation
- Supports plan preparation, cost estimating, and technical reporting

Presidencia Municipal de Jiménez, Tamaulipas – Public Works Department (2005 – 2021) Sub Director / Supervisor / Auxiliary Roles

- Prepared engineering plans for municipal, state, and federal infrastructure projects
- Supervised construction activities, including roadway and public works improvements
- Developed cost estimates, budgets, and technical project documentation
- Prepared construction plans, reports, and project schedules
- Conducted field measurements and data collection using GPS equipment
- Coordinated project execution with municipal leadership and stakeholders

Los Fresnos Construction (USA) – General Support (2008)

- Assisted with preparation of plans and supervision of construction activities
- Supported field operations and coordination of construction crews

Additional Experience

- Technical Assistant – Supported engineering-related tasks and documentation
- Private Sector Roles – Experience in administration, project coordination, and operations

Technical Proficiency

- AutoCAD
- Civil 3D

JESUS ALEJANDRO RODRIGUEZ SALDIVAR

Title
Graduate Engineer

Years of Experience
13 years

Education

Technological Institute of Ciudad Victoria, Mexico
Bachelor's in Civil Engineering

Areas of Expertise

- Topographic Surface Developmement & Mapping
- Survey Data Integration & Plan Coordination
- AutoCAD Civil 3D Design & Plan Production
- Utility Infrastructure Layouts
- Stormwater Design Analysis & Design
- Subdivision Planning Design

Summary:

Mr. Rodriguez is a Graduate Engineer with 10 years of experience supporting land development, surveying, and construction-related projects. His background includes preparation of subdivision construction plans, survey data analysis, and topographic reporting. He has experience working on both public and private sector projects, including property assessments, boundary documentation, and field coordination. Mr. Rodriguez brings strong technical capabilities and adaptability to support project delivery.

Professional Experience:

S2 Engineering PLLC – Graduate Engineer (October 2024 – Present)
- Assists in preparation of subdivision construction plans and design documents
- Supports construction staking, survey analysis, and plat preparation
- Coordinates with project teams to support timely project delivery
- Assists with project management and technical documentation

Office of the Attorney General, State of Tamaulipas – Expert Witness (October 2018 – April 2024)
- Prepared appraisal reports for damages to real estate and personal property
- Developed topographic reports for land boundaries, encroachments, and disputes
- Provided technical analysis related to property conditions and land use

Secretary of Communications and Transport – Construction Resident Assistant (April 2014 – June 2018)
- Assisted in preparation of reports related to property damages and land conditions
- Supported development of topographic and boundary-related documentation
- Coordinated with field teams and project stakeholders

Municipality of Santander Jiménez – Assistant to Director of Rural Development and Tourism (April 2013 – June 2014)
- Supported project management activities including field coordination and data entry
- Assisted in planning and administrative tasks for public sector projects

Technical Proficiency
- AutoCAD
- Civil 3D
- DJI (Drone Operations)
- Microsoft Office Suite

ALEXIS JAZMIN RODRIGUEZ

Title
Graduate Engineer

Years of Experience
6 years

Education
The University of Texas Rio Grande Valley, Edinburg, TX Bachelor of Science in Civil Engineering

Areas of Expertise

- Topographic Surface Developmement & Mapping
- Survey Data Integration & Plan Coordination
- AutoCAD Civil 3D Design & Plan Production
- Utility Infrastructure Layouts
- Stormwater Design Analysis & Design
- Subdivision Planning Design

Summary:

Ms. Rodriguez has experience in land surveying, subdivision development, and public infrastructure projects throughout Hidalgo County and surrounding jurisdictions. Her background includes preparation of subdivision plats, base maps, and survey-supported design documents, as well as processing and integration of field survey data for land development projects.
