Performed quality control reviews for the comprehensive water master plan for the City of DeSoto. Ian oversaw the use of hydraulic models to identify and evaluate potential modifications to the pressure plane delineations to mitigate existing pressure and booster pumping challenges. He also developed the plan replacing the Bolton Boone pressure tank system and consolidating pressure plane operation to a single pump station location within the north part of the system, saving both energy costs and reducing operational burden.

Hutto Wastewater Master Plan | Hutto, TX

Project Manager responsible for model development and load projections, hydraulic modeling, and capital planning for the Hutto Wastewater Collection System Master Plan project. This effort was broken into two main phases. The first phase involved quickly developing a hydraulic modeling tool that can be used to assess the impact of new and planned developments on the existing wastewater collection system, given known information about loadings and peaking factors in the system. Phase 1 services consisted of development of a wastewater collection system hydraulic model in InfoWorks ICM software. The model included all gravity pipes 10-inch and larger, significant lift station and force main facilities, and select smaller-diameter gravity pipes as necessary for network connectivity. Phase 2 was a comprehensive wastewater master plan that included development and load projections, facility performance testing, dry and wet weather model calibration, and development of wastewater capital improvements to address existing system issues and accommodate future growth.

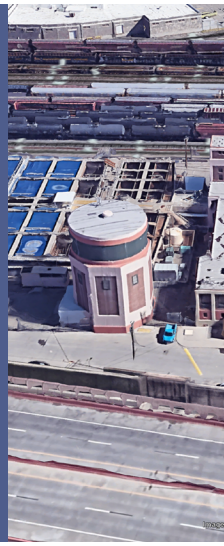
Dan Olson | PE

Potable/Non-Potable Reuse Lead

With over 16 years of experience, Dan has worked the entire water and wastewater spectrum, including water reuse. He applies technology to efficiently solve client concerns and deliver sustainable solutions. When it comes to treatment, he understands how every aspect of a plant works together and has provided designs for both conventional and advanced treatment plants. He looks for alternatives that optimize processes and are easy to operate and maintain. Dan's project management approach instills defined lines of communication to keep schedules on track. Dan knows that by keeping a project on schedule, he can maintain budgets and prevent costly delays. Additionally, Dan continually seeks out opportunities to continue learning about new methods and technologies. He then leverages this knowledge to add value and technical expertise to clients, delivering sound and cost-effective solutions.

Having supported the first of its kind microfiltration, reverse osmosis advanced purification WTP, Dan knows how to apply advanced technologies to solve drought and water resource challenges.

Education



Bachelor of Science in Environmental Engineering

Licenses

Professional Engineer, TX #115373

EPWU 10 MGD Advanced Purified Water Treatment Plant | El Paso, TX

Concept design and pilot testing lead for a 10 MGD Advanced Water Purification Facility (AWPF), which will take secondary effluent from the Roberto Bustamante WWTP in El Paso and treat it to potable water quality for distribution to the drinking water customers of the City of El Paso. This first-of-its-kind facility in the United States includes microfiltration (MF), reverse osmosis (RO), advanced oxidation with ultraviolet light reactors (UV) and hydrogen peroxide, granular activated carbon (GAC) contactors, and permeate stabilization with calcite contactors. This project included a Bureau of Reclamation Title XVI Feasibility Study to obtain funding for the construction of the full-scale plant. *(Previous Experience)*

EPWU Advanced Water Purification Facility Pilot Testing | El Paso, TX

El Paso Water Utilities (EPWU) pilot-tested an advanced water purification facility for direct- to-distribution water reuse. Mr. Olson designed the pilot plant and supervised construction, startup & commissioning of the facility, which operated for 9 months to collect pilot testing data for regulatory approval of the full-scale facility by the Texas Commission on Environmental Quality (TCEQ). In addition to the main treatment train, the pilot plant tested denitrification filters, ozone, and multiple stabilization techniques to oversee the new water supply is compatible with the existing water in the distribution system. The pilot testing included pipe loop testing for corrosion mitigation in the distribution system. *(Previous Experience)*

Ashley Pifer | PhD, PE
Water Quality/TCEQ Lead

Dr. Pifer's career is focused on helping water utilities produce and distribute high-quality drinking water. Her expertise in disinfectant residual, disinfection byproduct, nitrification, and corrosion management has been used in drinking water projects across the United States, from water quality studies to treatment process evaluations and design. She also assists drinking water utilities with preparations for compliance with the Lead and Copper Rule Revisions and develops distribution system monitoring plans to improve water quality and maintain regulatory compliance. She currently chairs the American Water Works Associations disinfection committee and is a nationally recognized expert on water treatment chemicals.

Ashley has successfully supported clients across Texas with addressing water quality concerns and meeting TCEQ standards.

Education
Ph.D., Civil Engineering

Bachelor of Science in Civil Engineering

Licenses
NCEES Certificate, #63431

Professional Engineer, TX #120866

Sherman Water Treatment Plant Expansion | Sherman, TX
Technical advisor for the multi-phased expansion of the Sherman WTP. Provided guidance and quality control reviews for a pilot study to assess chlorine dioxide and monochloramine to control membrane fouling. Served as quality control reviewer for the overall process design, with a focus on chemical feed and storage facilities.

Athens Water Treatment Optimization | Athens, TX
Technical specialist responsible for developing a sampling plan to help the City comply with the Long Term 2 Enhanced Surface Water Treatment Rule. She also developed monitoring plans for the Athens WTP and the City's drinking water distribution system.

Friendswood 2021 Water System Improvements | Friendswood, TX
Technical specialist responsible for evaluating the overall water quality for the City of Friendswood system. Responsibilities included updating the City's nitrification action plan and Revised Total Coliform Rule sample siting plan to represent water quality throughout the system.

Mountain Home Water Treatment Plant Improvements | Mountain Home, AR
Process engineer for the improvements to an 8 MGD drinking water treatment plant. Duties included hydraulic modeling, design of chemical generation, storage and feed facilities, a new rapid mix structure, and a new clearwell. During the current and future stages of this project, the existing chlorine gas disinfection system will be replaced with a sodium hypochlorite feed system, and a chlorine dioxide generator will be installed to provide chlorine dioxide for preoxidation and disinfection upstream of the filters.

Kirby has supported Texas utilities through a variety of funding opportunities and agencies, including TWDB, to help communities fund their critical treatment and infrastructure projects.

Kirby Young | GIT

Funding Support

Kirby's 7 years of experience involve working closely on funding pursuits with federal and state entities like the United States Environmental Protection Agency (EPA), United States Bureau of Reclamation (USBR), Texas Water Development Board (TWDB), Texas Commission on Environmental Quality (TCEQ), and the Texas State Soil and Water Conservation Board (TSSWCB). Kirby has managed both loan and grant funding opportunities for various types of water projects including water quality, water quantity, water treatment, and infrastructure improvements, among others. She has developed tools to expedite and streamline application processes for clients that also help to efficiently manage all required information and paperwork. She maintains consistent communication with the client, external consultants, and the applicable federal or state entity to oversee the funding process is as timely as possible. With a background in hydrology and water resources, Kirby combines this knowledge with her funding experience to assist clients with identifying, pursuing, and obtaining financial assistance that can help turn identified projects into reality.

Bay City Water System Evaluation | Bay City, TX

Funding specialist responsible for assisting with leading efforts to apply and eventually be approved for funding through the Texas Water Development Board's Drinking Water State Revolving Fund (DWSRF). Responsibilities included the completing and submitting the Project Information Forms and applications during two separate TWDB funding cycles to rehabilitate and expand Bay City's existing water production, treatment, and distribution systems. Also responsible for coordinating efforts between the Client, TWDB, Garver, and consultants to efficiently and effectively obtain all required information for the funding application.

Bay City Wastewater Treatment Plant Improvements | Bay City, TX

Funding specialist responsible for assisting with leading efforts to apply and eventually be approved for funding through the Texas Water Development Board's Clean Water State Revolving Fund (CWSRF). Responsibilities included completing and submitting successful application materials for funding through the CWSRF and additional funding through the United States Environmental Protection Agency's Water Infrastructure Finance and Innovation Act (WIFIA) Program to significantly rehabilitate, reconfigure, and augment Bay City's existing wastewater treatment plant. Also responsible for coordinating efforts between the Client, TWDB, EPA, Garver, and consultants to efficiently and effectively obtain all required information for the funding processes.

Jennifer brings a unique understanding of risk and has created risk management programs across her career that prevented delays, and costly mistakes.

Education

Master of Science, Industrial and Systems Engineering

Bachelor of Science, Engineering Psychology

Engineer Degree, Industrial and Systems Engineering

Licenses

Certified Systems Engineering Professional, #04073

Jennifer Russell | EISE, CSEP

Risk Management Lead

Jennifer has built her career around implementing systematic approaches to cross-discipline coordination to make projects seamless and successful. She understands that clear communication and ownership of roles and responsibilities is what sets up a project or success. As Garver's Program and Business Support Services Leader, Jennifer has several roles and responsibilities, all of which focus on optimizing project coordination, design, and delivery. She does this by establishing a process to move the project forward while breaking it down into pieces that are easily manageable and capable of meeting milestone goals.

Enid Kaw Lake Water Supply | Enid, OK

Systems engineering manager responsible for developing the Program Strategy Manual and Program Management Quality Plan defining the strategic management plan for the quality oversight, life cycle development, and communication for the five-year duration of the project. Responsibilities included developing the risk management strategy and managed risk register for Program and City issues. Additionally, responsible for developing Program processes and responsibilities that were integrated into the PMIS. Developed procurement support documents including the RFP for the design of a Design-Bid-Build and an RFQ and RFP for a Construction Manager At-Risk (CMAR). Developed Interface Management process, documenting over 800 programmatic interfaces across the Intake, pipeline, water treatment plant and distribution system connection. Interfaces include physical, functional, permit, operations and maintenance, and external coordination with utilities, and more. Managed selection and implementation of the Program Management Information System and the development of CAD Standards Manual. Managed interface verification process through 30% and into 60% design. Through interface verification process, identified needed City action of changing zoning to enable use of secured property for Program. Served as the Technical Review Committee Manager and Supported team in understanding and navigating the change in delivery method. Responsible for identifying individuals to provide quality assurance/quality review for all Phase 3 deliverables.

Wichita NWWF Northwest Water Treatment Facility Owners Representative | Wichita, KS

Program interface manager responsible for advising the Owner on cross-functional and cross-disciplinary issues that could have an impact on the delivery or operation of the future 120 MGD Northwest Water Treatment Plant. Provided recommendations on procurement documents, program management processes, decision management, and risk management.

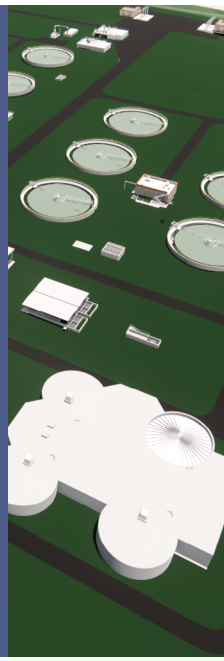
Susan's approach includes identifying environmental resources early and working with the project team to avoid impacts and delays.

Susan Chavez
Environmental Lead

Susan Chavez has more than 25 years of experience with environmental and planning projects and more than 18 years delivering environmental projects for TxDOT and municipalities. Susan has successfully led environmental tasks or managed work authorizations for projects in both urban and rural areas. She works collaboratively with project teams and clients to achieve successful results using her ability to recognize and provide input on strategies to mitigate and avoid potential project risks and issues.

Education
Master of Science, Environmental Management

Bachelor of Science, Wildlife and Fisheries Sciences



SAWS Sanitary Sewer Overflow & Reduction Program East Basin Package | San Antonio, TX

Environmental task lead responsible for managing the assessment of cultural resources and coordination with the Texas Historical Commission (THC) to meet regulatory requirements for sanitary sewer improvements. She worked with the team to perform desktop analysis of known historic and archeological sites, assessed conditions for possible sites, prepared exhibits and submitted a coordination package to the THC for concurrence to proceed with the project.

Pflugerville Wilbarger Regional Wastewater Treatment Facility | Pflugerville, TX

Environmental task lead responsible for developing the Environmental Information Document (EID) required by the Texas Water Development Board (TWDB) to satisfy environmental requirements for a new regional wastewater treatment facility. She managed the development of a wetland delineation that included a Nationwide Permit with Pre-Construction Notification approval from the U.S. Army Corps of Engineers. Susan developed the alternatives analysis and managed the team to complete assessments of threatened and endangered species, hazardous materials, social impacts, cultural investigations, and resource agency coordination. She coordinated with the design team for project information, managed the environmental schedule, and oversaw public involvement to complete the development of the EID.

Bay City Environmental Assessments | Bay City, TX

Senior environmental planner and task lead for two water plant facility projects with federal funding. Responsible for coordinating with the TWDB, preparing the Environmental Information Document, and coordinating with resource agencies. She managed the team to prepare for and conduct a public meeting for both facilities.

Anita Smith | APR

Public Outreach/Communications Lead

With 30 years of experience managing corporate reputations and building brands, Anita is the leader of Garver's Public Relations Team. Through creative and results-oriented approaches, Anita develops sound strategies that increase awareness and positively impact the bottom line. She is accredited in public relations (APR), which signifies a high level of specialized experience and indicates broad knowledge and professional judgment in the field. Anita's award-winning public relations and marketing campaigns have been recognized on local and national levels.

When utilizing federal funds and innovative solutions, having a public outreach specialist such as Anita is crucial to garnering the trust of the communities you serve.

Education
Bachelor of Arts, Journalism-Public Relations

Licenses
Accreditation in Public Relations

Enid Kaw Lake Water Supply | Enid, OK

Public outreach specialist for this $475M (full build out), brand new water supply program. It involves a new intake, 70 miles of transmission piping, and a new WTP. With the project covering significant area and affecting a large population, public outreach and communication is critical. Anita led the team charged with effectively communicating key project milestones through videos, articles, and media outreach, which resulted in positive print and TV news coverage about the project.

Garver Chain Reaction Challenge | Multiple Locations Nationwide

To celebrate Garver's 100th year, 100 schools received chain reaction STEM kits from the firm and were invited to compete in the Garver Chain Reaction Challenge. Anita managed all aspects of the campaign communications, including PR, stakeholder and school involvement, and media outreach across Garver's multistate footprint. Highlighting area schools and Garver's community engagement on a hyper-local level, the Garver Chain Reaction Challenge was featured in more than 100 earned TV, online, social, and print media reports. The communications campaign's success was celebrated on national levels with the PRSA Silver Anvil Award of Excellence and Best of Show in the SMPS Marketing Communications Awards.

#EndTheStreak SafetyHack | Austin, TX

Garver partnered with the Texas Department of Transportation for the #EndTheStreak SafetyHack Student Challenge, a hack-athon event focused on developing creative solutions to prevent fatalities on Texas roadways. Anita organized the day-long event where 60 high school students worked alongside engineers and other transportation professionals to develop and present innovative solutions to make Texas highways safer – from app development to engineering solutions to media campaigns. Anita led the Garver team that developed a high-impact event: from concept to execution to promotion.

Previous Edinburg Projects
| Edinburg Drainage Study

Garver performed a drainage study for the South Texas International Airport in Edinburg due to the recurring flooding of the runway causing airport closures. To solve these issues, Garver proposed various solutions to prevent submerged taxiway connectors and runway.

Isaac's role in this project

As part of the local team Isaac provided support for the drainage projects to help provide the responsiveness needed for this project.

Other Edinburg Projects

As a firm, Garver has also worked on another project for the city of Edinburg. In addition to the drainage project listed above, Garver also worked on a hangar project for the Department of Public Safety and the South Texas International Airport. This project included development of a new 20,000 square foot facility, civil improvements and access roads. It was performed independently from the proposed project team in this proposal.

Insurance Claims

Garver, LLC, similar to most companies, periodically engages in formal dispute resolution through the ordinary course of its business. The results of such dispute resolution, including litigation, often are subject to confidentiality provisions. Garver has no pending litigation matters that would have a material impact on the company's financial standing and/or performance on this project. Garver has had no major disputes, contract defaults, or liens in the last ten (10) years. If specific information involving any specific claim against Garver is needed, please contact Garver's General Counsel, Kurtis John, at 479-287-4678.

6 Professional Services Agreement

We acknowledge that our team has read the professional services agreement, and we plan to meet the prerequisite insurance requirements. If selected for this rotation list, we agree to the public service agreement as is written. Please reach out to us with any questions regarding the agreement and the mentioned insurance requirements.

Mr. Mardoqueo Hinojosa – City Engineer
City of Edinburg
C/o City Secretary Department (1st Floor)
415 W. University Dr.
Edinburg, Texas 78539

Re: ***Request for Qualifications – "Engineering Services Rotation for the City of Edinburg"***
RFQ No. 2024-9

Dear Mr. Hinojosa,
On behalf of the GDJ Team and as Legal Representative of GDJ Engineering LLC, who will be the prime consultant (executor of the contract), we enthusiastically submit this Statement of Qualifications to provide ***Professional Engineering Services*** to the City of Edinburg.

As you are aware, the City of Edinburg is a major retail and educational hub of the Rio Grande Valley connected to I-69C. Along with the commercial aspects of your infrastructure needs, the retail and residential aspects of the City of Edinburg are rapidly growing. All growth trends in the city indicate that there will be a need for transportation and drainage infrastructure upgrades to efficiently move heavy commercial traffic to stimulate the local economy, and expand local roads to ensure the safety of the traveling public.

GDJ has been in in existence since 2017 with three (3) principals consisting of Mrs. Lydia Macheska as President, Mr. Robert Macheska as Executive VP/COO and Mr. Christopher Rodriguez as Vice President. GDJ staff have been involved in project development, civil engineering, design, utility coordination, environmental analysis, and construction management in the Rio Grande Valley for over 20 years and has a combined experience of over 85 years. Key staff are native to the region, are completely familiar with the challenges posed by regional transportation and drainage issues and have developed comparable projects in the region and the state. Additionally, key staff have been intimately involved with all individual MPO's in the region, as well as the merging of the three MPO's into the current RGVMPO. In addition, we are headquartered in the City of Edinburg so we are completely invested in the City's economic growth and transportation needs.

For more than thirteen years, GDJ staff has served in an advisory position providing coordination services for various governmental entities at the local MPOs, including the City of Edinburg, the City of Mission, Hidalgo County, Hidalgo County RMA, Cameron County, and CCRMA. Duties included developing strategic plans, cost estimates, project concepts, and coordinating with staff and elected officials to prioritize local resources and ensure projects were properly programmed on the MPO planning documents.

The team understands local, state, and federal guidelines and requirements to expedite the project development. This includes the process of partnering with TxDOT to develop projects to a "Ready to Let" status where TxDOT will allow a project to utilize state and federal funds for design, Right-of-Way, construction, and construction engineering and Inspection. GDJ staff is also proficient with the coordination

of Economically Disadvantaged County or Advanced Funding Agreements with TxDOT to ensure the maximum reimbursement for project related expenses.

The GDJ Team is committed to providing excellent service to the City of Edinburg by providing accurate estimates to ensure expeditious and efficient project development. The team would use all available resources to ensure the project is shovel ready, constructed on time, within budget, and of the highest quality to maximize the benefit to the local taxpayer.

The GDJ Team also commits that all contents of this Statement of Qualifications (SOQ) are valid for at least 90 days beyond the July 16, 2024 deadline for submission. GDJ has read the sample Professional Services Agreement and the firm will meet the prerequisite insurance requirements, and, if selected, the firm agrees to enter into such agreement.

On behalf of the GDJ Team, I would again like to thank you for the opportunity to be of service to the citizens of the City of Edinburg and to help you meet our community's infrastructure needs. As legal representative of the GDJ Team, I am able execute any necessary contract documents with the City of Edinburg and serve as the authorized person to legally bind the GDJ Engineering Team to the representations put forth in this SOQ. Should you have any questions or require additional information, please do not hesitate to contact me, Robert Macheska, P.E. at (956) 603-2025.

Sincerely Yours,

Lydia Macheska

Firm Qualifications & Experience

GDJ Engineering, LLC (GDJ) is a diverse, multi-discipline engineering firm based in Edinburg, Texas at 2805 Fountain Plaza Blvd, Suite B. GDJ was formed in 2017 and currently consists of twelve (12) full time employees that possess experience and knowledge in a wide variety of fields including street infrastructure evaluation and improvements, pavement management and improvements, erosion and sediment control design, hydrologic analysis and design, transportation planning/evaluation, traffic engineering services, traffic signal design, highway/civil, structural/bridge, environmental engineering services, and construction management.

GDJ personnel have a combined experience of over 85 years. Our engineers, designers, and environmental scientists possess the knowledge for planning, design, environmental analysis, construction, and management of the transportation infrastructure critical to the growth of our region and the state. The GDJ team is equipped to work individually or in a team environment to establish concepts, set project goals, and deliver measurable results to every assignment. As project constraints and challenges arise, our staff thrives in bringing innovative ideas to the table for creating an opportunistic solution. We believe in a balanced design concept which meets the operational objectives, produces sustainability for tomorrow, context sensitive solutions and adherence to a time-sensitive budget. Achieving these results require empowering our staff to develop unique ideas which add value for our clients and maximize their investment. GDJ staff has developed projects with a variety of public entities including local cities, counties, Regional Mobility Authorities (RMAs), Metropolitan Planning Organizations (MPOs), and the Texas Department of Transportation (TxDOT). GDJ's managerial staff is pre-certified by TxDOT in a multitude of categories, brings over 45 years of development, design, environmental and construction experience, and has completed numerous transportation infrastructure projects.

For more than 13 years, GDJ staff has served in an advisory position providing coordination services for various governmental entities at the local MPOs, including the City of Mission, Hidalgo County, Hidalgo County RMA, Cameron County, Cameron County RMA, the City of Laredo, and Webb County. Duties included coordinating with staff and elected officials to prioritize local resources and assure projects were properly programmed on the MPO planning documents. In addition to preparing project fact (budget) sheets and project planning, GDJ staff is proficient in the coordination of Advanced Funding Agreements with TxDOT. These agreements are critical to ensure TxDOT review of engineering and environmental documents. Proper coordination by firm staff of advanced planning ensured local reimbursement for locally administered projects with state and federal funding. Additionally, an analysis of existing projects sometimes allowed for projects experiencing delays to be adjusted to allow "shovel ready" projects to be constructed. Expediting the letting of projects often results in a savings in construction cost due to avoidance of escalation.

It is GDJ's philosophy to provide the client with the most technically competent, timely and cost effective work product possible. GDJ believes in open communication with the client and understands that direct and constant lines of communication are imperative for a project's success; both in schedule and budget. The GDJ Project Management Team operates under a multi-faceted strategy to avoid unexpected cost escalations and overruns; as a result, projects bid out in the past 30 months have been consistently within +/- 5% of the engineers estimate for various clients. This has become especially important with current

supply chain shortages and recent escalation of oil and steel prices. The GDJ Team constantly monitors the latest bid prices through several sources: TxDOT 1 month rolling averages, CIVCAST, local county & city lettings to ensure the accuracy of our estimates.

Beginning with high quality survey and subsurface utility data, combined with extensive experience with field conditions a high-quality plan set is the first defense against these issues. During the project development process the team begins with a preliminary estimate for the purposes of budgeting funding needed from the Local Government and the RGVMPO. Through the schematic phase and the 30%, 60%, and 90% PS&E process the design team works closely with client to ensure the cost estimates for construction, right-of way, and any needed utility adjustments are as accurate as possible. This allows the GDJ Team to help maximize the amount of funding from the RGVMPO throughout the multi-year project development process and reduce the local governments cost.

The GDJ team will strive to provide the City of Edinburg with the quality of service the tax payers deserve. We are a completely local firm in the Rio Grande Valley and understand the area and the engineering needs of the city. In addition, GDJ has all of the latest design software and our team has unique experience with all oversight and auditing entities (TxDOT, FHWA, etc…), with several of our team members having firsthand work experience with said entities.

The GDJ team can meet any specification required and will not enter into any agreement without 100% confidence that the work product will exceed the city's expectations and requirements. GDJ has several projects that are in the process of completion and will be able to concentrate the majority of their time to the City of Edinburg. This will be accomplished with GDJ's team of qualified professionals that are amply prepared to provide the City of Edinburg with outstanding customer service and technical skills. The GDJ team has the proven knowledge and capabilities of providing superior engineering and environmental services to the City of Edinburg.

Mr. Robert Macheska P.E., C.F.M., is GDJ's Program Manager and COO of the company. Mr. Macheska has over 23 years of experience with nine years working directly with TxDOT and 14 years of private sector experience. He has worked on all aspects of project development, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management and design experience include contract administration, supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Mr. Macheska's private sector engineering consulting work has primarily consisted of managing TxDOT Local Government Project Procedures (LGPP) governed projects that have used funds from the Rio Grande Valley Metropolitan Planning Organization (RGVMPO) for Preliminary Engineering (PE), Right-of-Way (ROW), Utilities, PS&E, Construction Engineering, and Construction. He is also TxDOT LGPP Certified. Based on his current workload, Mr. Macheska will be able to assign approximately 40% of his time to these projects.

Mr. Christopher Rodriguez P.E., C.F.M. will serve as the TxDOT LGPP Certified Design Services and PS&E Manager and provide Hydrology & Hydraulic (H&H) support. Having previously worked for TxDOT and currently in the consulting engineering sector, this wide-range of experience has provided Mr. Rodriguez with excellent firsthand knowledge of the functionality of multiple government entities. He has experience on various aspects of transportation and drainage projects, from planning and PS&E preparation, H&H Design to construction phase services. His project management and design experience include supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Mr. Rodriguez has managed multiple concurrent design projects and production staff with numerous design groups under his direction. Mr. Rodriguez will be able to assign approximately 60% of his time to these projects.

Mr. Anthony Garza will serve as the MPO coordinator and project planning manager to assist with any needed coordination at the RGVMPO to accelerate the construction of the projects and source any additional state and or federal funds that may be needed for ROW, Construction Engineering, or Construction. Mr. Garza has over 16 years of experience and three years of construction management experience. He has served as the MPO representative for the City of Mission, Hidalgo County, Webb County, and Cameron County. Mr. Garza understands local, state, and federal guidelines and requirements to expedite the project development. This includes developing strategies to expedite the execution of Advanced Funding Agreements (AFA) with TxDOT to ensure review of environmental documents in a timely manner. Mr. Garza possesses a multi-disciplined approach and the necessary skills in project planning and development to successfully bring projects to a shovel ready status, leading to construction. Mr. Garza will be able to assign approximately 60% of his time to these projects.

Ms. Corina Argullin will serve as the Environmental Manager. Ms. Argullin has over 15 years of experience, with extensive knowledge of the NEPA process from planning through construction. She has completed over 28 NEPA clearances under the purview of TxDOT, 13 of which were FONSIs. She has experience in a variety of projects including maintenance/drainage, local/state road expansions, new location roadways, and pedestrian/shared use facilities. Ms. Argullin is proficient in all aspects of public involvement, NEPA documentation, agency coordination, and environmental permitting. Her management experience includes supervision of staff and sub-consultants, QA/QC, scheduling, and document review and preparation. She is LGPP and wetland delineation certified. Ms. Argullin understands that the environmental process is the critical path to project construction; therefore, it needs to be completed in a diligent and expeditious manner. Ms. Argullin will be able to assign approximately 65% of her time to these projects.

Mr. Eduardo Ramirez is GDJ's Construction Manager. Mr. Ramirez has over 25 years of experience in maintenance, construction inspection, and project management in various types of construction projects including, but no limited to road, drainage, structural-bridge and vertical construction projects. Mr. Ramirez is TxDOT pre-certified, field and laboratory certified and OSHA safety certified.

The GDJ Engineering Team has the abilities and qualifications to provide the City of Edinburg with the following professional engineering services:

Project Management & Planning Services

- Program & Project Management
- General Program Management (To Ensure Design/Construction Meets Requirements for Reimbursements on Reimbursable Funds Projects)
- Project Management of all Civil, Drainage, & Transportation Projects
- Planning Services

Civil Design Services

- Preliminary Engineering & Hydraulic Analysis
- Geometric Schematic & Typical Sections
- Utility Investigations & Analysis
- ROW Investigations
- Environmental Reports & Public Meetings
- Geotechnical Investigations
- Plans, Specifications & Estimates (PS&E)
- Geometric, Structural & Pavement Design
- Hydrologic & Hydraulic Design
- Environmental Design (SWPPP, EPIC Sheets)
- Traffic Design (Traffic Counts, Analysis of Traffic Movements)
- Design Packaging (Specifications, Construction Estimates, General Notes, Special Provisions)
- Bid Assistance
- Preparation of Bid Package, Bid Announcement, Review of Bidder Information, Bid Award

The GDJ Team members have developed multiple projects with governmental agencies including: City of Pharr, City of Mission, Cameron County, Cameron County Regional Mobility Authority (RMA), Hidalgo County, Hidalgo County RMA, Hidalgo County Drainage District #1 and TxDOT (Pharr and San Antonio Districts). In addition, our team members have directly coordinated with multiple regulatory agencies such as the TxDOT, U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, Texas Commission on Environmental Quality, Texas Historical Commission, and may others. Currently, the GDJ Team has no past or pending litigation against or involving its agents or employees with respect to any work we have performed.

The GDJ team has experience and understanding in the overall process from planning to construction, including the intricate technical details necessary for the successful completion of a project. The comprehensive project steps include evaluating the existing ROW and utilities, identifying environmental constraints, delineating drainage areas, evaluating and optimizing a drainage plan, developing preliminary plans and estimates for the proposed improvements, alternatives analyses, completing the environmental process, and finalizing the plans and estimates. The GDJ team is also prepared to complete any geotechnical studies associated with the project and is fully staffed to oversee the construction of the projects. The team will coordinate with the city throughout the entire process to ensure their needs and concerns are addressed.

The GDJ Team will assure the quality of deliverables, engineering services, and environmental services by implementing a proven project specific QA/QC work plan based on the following principles: Knowledge/Experience, Coordination/Communication, Constructability Review, Accuracy/ Completeness, and Thorough Design/Environmental Schedules.

The team has the experience and resources necessary to deliver projects with accelerated schedules, as necessary. Additionally, the team is TxDOT pre-certified in all categories associated with these efforts and can develop plans and environmental documentation in accordance with TxDOT/FHWA standards for review by these agencies. GDJ assures the city that all staff included in the proposal for this pursuit will have sufficient availability to complete projects on time and within the proposed budget. The overall commitment that the GDJ Team provides to our projects is unsurpassed. Our attention to detail and rapid response to issues is a staple of the GDJ Team Philosophy, as we have an excellent track record for successful projects and extremely satisfied clients.

As a local firm with staff from all areas of the Rio Grande Valley, the GDJ team is familiar with the City of Edinburg and its geographic attributes. The GDJ office is located just south of the Canton Road and McColl Road intersection within the city of Edinburg and the principals live within 10 miles of the office. As persons who both live and work in the area, city projects are of great interest to the team.

The GDJ Team is familiar with local, state, and federal requirements for projects that are constrained by a funding source/oversight agency. The coordination of these items early in project development can serve to accelerate the path to construction for the city and conserve local tax dollars. GDJ understands the importance and is highly experienced in keeping projects within their assigned budget. GDJ Staff uses a proven combination of planning, scheduling, and coordination to ensure projects adhere to the assigned budget. The team analyzes the existing funding and budget for the project and identifies any potential issues early in the process. The team would then coordinate with the city to discuss and address options and alternatives that would best suit the city's needs. GDJ creates realistic project and environmental schedules to ensure sufficient progress. These schedules are discussed with the city and TxDOT to agree upon major project milestones and document review/response times. If necessary, our planning department has experience in securing the necessary funding to successfully complete projects.

Advanced Project Development (APD)

The APD portion of the project involves conducting preliminary studies and research necessary to make informed decisions about the various aspects of the project. Route and design studies involve the development of different alternatives to achieve the desired result. These alternatives are compared to each other on the basis of various environmental, social, and economic as well as political factors and the alternative that results in the least amount of adverse effects and/or the greatest amount of benefit to the general public is selected as the preferred alternative.

There are several types of information that are gathered during this phase of project development and one of the first is surveying information. During the route study phase, only general surveying information is gathered. A land ownership map can be developed for use in placing alternative alignments and sporadic elevations can be obtained to determine the general lay of the land.

An aerial photograph of the project location can also be obtained for use during the public involvement phase. Once a preferred alternative is selected, then design surveys are completed and used for the design of the proposed facility. A digital terrain model is developed and topographic information is gathered on existing features.

The ROW information that is gathered during this phase will also be used during acquisition. Parcel sketches and a ROW map are developed by a registered public land surveyor and turned over to the acquiring agency only after an environmental clearance has been issued, in the case of state or federally funded projects, or after the city feels that a preferred alternative exists. The parcels are appraised and negotiations with the property owners begin.

Environmental information is also gathered during this portion of the project development process. Any "fatal flaws" such as cemeteries, parks, or hazardous material sites, are identified and mapped accordingly to attempt to avoid or minimize impacts. Also, any potentially occurring endangered species are identified and an evaluation is made whether potential habitat is present within the project. If so, each alternative's effects on that habitat are evaluated.

Roadway/Highway

The GDJ team has a thorough understanding of TxDOT Design Division's Operations and Procedures Manual (hereinafter referred to as the Design Manual). The Design Manual establishes the policies for operations and procedures for preliminary project planning and development; geometric design; base and pavement design; and preparing plans, specifications, and estimates. It is not all-inclusive and does not establish legal standards for design. It is used to supplement engineering experience, knowledge and judgment. AASHTO's manual, "A Policy on Geometric Design of Highways and Streets," is used by the team as a supplement to TxDOT's Design Manual for guidance in those areas not included or covered by the Design Manual.

Chapter 4 of the Design Manual provides the guidelines for preparation of resurfacing, restoration, and rehabilitation guidelines. Resurfacing, restoration, or rehabilitation (3R) guidelines are intended to preserve and extend the life of non-freeway classes of roadways. Projects prepared under the 3R guidelines may include safety enhancements, but safety may not be the reason for the initiation of a 3R project. However, if the existing roadway does not meet the minimum criteria under 3R guidelines, Part IV of the Design Manual should be used. Most preventive maintenance and off-system bridge replacement projects are prepared under 3R guidelines. Other improvements, which can be made under RRR guidelines, include minor widening, flattening of steep side slopes, removal of roadside obstructions, rehabilitation or replacement of bridge railings, and approach signing and delineation of bridges.

Environmental Analysis

The GDJ team is knowledgeable of the stringent federal/state rules and regulations required for transportation projects funded with federal money. NEPA requires the analysis of traffic noise, hazardous materials, community impacts, natural resources (i.e. biological, water, and farmland) air quality, cultural resources, and indirect/cumulative impacts. Each of these subjects require studious analysis and technical reporting in accordance with TxDOT guidelines. Early scoping and coordination with the team and stakeholders is critical to assess potential fatal flaws, environmental constraints, and minimize/avoid sensitive areas and species. It is critical to identify any long lead processes and complete early coordination for permitting to avoid delays to the schedule. Throughout the environmental process, public involvement such as public meetings, meetings with affected property owners, opportunity for public hearings, public hearings, noise workshops, and notices of availability may be required. Public Involvement hearings, public hearings, noise workshops, and notices of availability may be required. Public

Involvement has evolved since the COVID-19 pandemic; therefore, the team has adapted to utilizing multiple types of meeting methods that adhere to COVID rules and regulations. The team is experienced in both traditional and virtual PMs/PHs under the scope of TxDOT and FHWA.

The team has extensive experience in working closely with the TxDOT Pharr District and local government sponsors to ensure open communication and transparency. This ensures that the sponsor is included and aware of all activities throughout the process. Prior to preparation and submittal of any reports, the TxDOT Env Toolkit will be reviewed to ensure use of the latest forms, templates, and processes. The entire team has undergone TxDOT ECOS training, which ensures high quality documents, reduces comments, and expedites review. The team also has knowledge and experience in the timing and order of report submittals to maintain an optimum timeline. The team employs a multi-level QA/QC process in every step in the environmental process that ensures the highest quality documents are provided to TxDOT.

Geotechnical and Special Services

Geotechnical studies include slope stability analysis and the Texas Cone Penetrometer Test. These tests are used to design retaining wall structures or deep foundations for bridges. The location of the ground water elevation can also be determined during the Texas Cone Penetrometer Test.

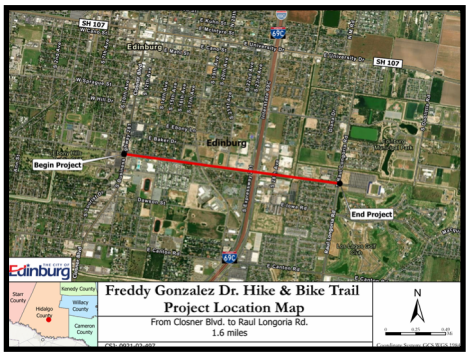
The GDJ Team is very familiar with the local geographic area as is evidenced by the list of projects presented in subsequent sections. All the task leaders have experience working with TxDOT's Pharr District and have gained a thorough understanding of the unique problems that we are faced with in the Rio Grande Valley. One such item is the lack of any appreciable relief in the topography of the area. This problem is less prominent towards the western part of the Hidalgo County, but it is a factor towards the middle and eastern portion of the county. The flat nature of the land causes runoff to drain slowly and usually requires the use of detention basins to prevent flooding problems from occurring. While drainage issues are a problem in some areas, one unique quality of Hidalgo County that is beneficial is the presence of large amounts of material suitable for use in highway construction.

Design and Plans, Specifications, and Estimate (PS&E)

Once a preferred alternative is selected and presented to the public, a design schematic is developed as a precursor to the development of the construction plans. The primary purpose of the Plans, Specifications, and Estimate (PS&E) is to provide a complete and accurate set of contract bid and construction documents. Accuracy is essential in that this will allow for (a) prospective bidders to prepare a cost-effective bid, (b) for construction of the project to be performed efficiently, and (c) for a record of "as-built" of proposed roadway improvements. These roadway projects may require the preparation of a PS&E package, which will be developed in accordance with applicable city and TxDOT specifications and requirements. Guidelines and requirements include the TxDOT "Operations & Procedures Manual" – Part IV (Urban Design Criteria) and Part V, (PS&E Submissions), the TxDOT "Bridge Design Guide" and "Bridge Detailer's Manual", the TxDOT "Hydraulic Design Manual", AASHTO "Roadside Design Guide" and Specifications for Streets and Bridges", EPA "Stormwater Management Requirements", the "Texas Manual of Uniform Traffic Control Devices" and the various City of Edinburg and/or TxDOT roadway, traffic, and bridge standards.

Preliminary reports might be required by TxDOT or FHWA such as bridge scour reports, preliminary bridge layout submittals and hydraulic reports. Preliminary meetings, such as a preliminary concept conference where all major stakeholders are invited, and the general purpose/need for the project is

discussed are important steps in developing the required design criteria. TxDOT "Operations/ Procedures Manual", Part IV (Urban) and AASHTO's "Policy on Geometric Design of Highways and Streets" are used to develop the final criteria. The design criteria is essentially refined from the APD stage and is based on ADT, terrain type, and design speed, from which are determined the cross-sectional geometrics such as lane width, medial type/width, shoulder width, bridge width, side slopes/ ditch section, obstruction clearance, and ROW width. The criteria for horizontal (max curve) and vertical (max grade) roadway alignment must also be determined.



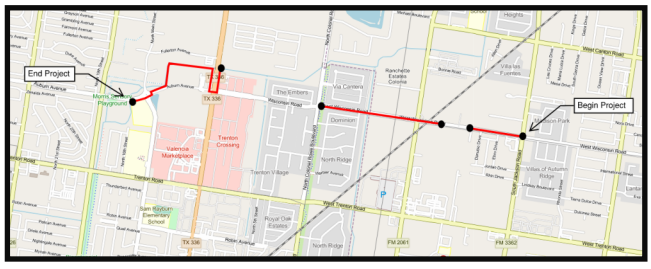
With respect to hydraulic design, a preliminary site evaluation, including identifying topo/existing ROW, drainage areas, primary/secondary drainage systems, FEMA flood plain requirements, and mitigation issues is conducted to determine possible solutions to the various design problems. GDJ will strive to gather data via on-site investigations to ensure PS&E production is based on accurate and thorough information. This assures sufficient identification of flow patterns, which produces accurate calculation of time of concentration and peak run-offs. The gathering of this on-site information guarantees accurate water surface elevations, as well as thorough knowledge of the flows of the outfall channels. These pro-active on-site investigations target flow obstructions such as channel and roadways, which alter natural drainage patterns which may require mitigation.

Early coordination of project outfall and crossing locations with respective controlling agencies will be essential in determining project drainage requirements. In accordance with the TxDOT "Hydraulic Manual", the existing and proposed sections will be checked for conveyance of the 100 year storm, culverts will be designed for 25 years and inlets/pipes for 2 years and 5 years, respectively. A drainage study will be performed to determine proposed roadway impacts, drainage areas, discharges, FEMA floodway requirements, mitigation issues, culvert locations and sizes, capacity of the existing and proposed structures, design frequency, flow, tailwater and headwater elevations for design and 100-year flood velocities, and anticipated overtopping of the roadway.

Traffic Control Plans (TCP) are included in projects where it is necessary to maintain traffic through the project during construction. Safety is the primary concern when it comes to the development of the TCP. The plans, specifications and estimates together constitute the bidding documents and are thoroughly reviewed for correctness and errors.

Recent Project Experience

PROJECT:	Freddy Gonzalez Dr. Hike & Bike Trail
LIMITS:	From Closner Blvd. to Raul Longoria Rd.
PROJECT MANAGER:	Robert Macheska, P.E., CFM
ENVIRONMENTAL LEAD:	Corina Argullin
CLIENT:	City of Edinburg
CLIENT REFERENCE:	Mardoqueo Hinojosa, P.E., CFM, City of Edinburg (956) 388-8211



PROJECT DESCRIPTION:

GDJ aided in the environmental analysis and document preparation. The scope of the project included providing a new shared-used path for pedestrians and bicyclists along the existing Freddy Gonzalez Dr. The purpose of the project is to improve multi-modal connectivity and access in the project area. Environmental documents included biological resources, section 4(f), water resources, historic resources and archeological resources. The project is anticipated to be environmentally cleared by August 2024.

PROJECT:	Jackson Hike & Bike Trail Phase II
LIMITS:	Jackson Rd. to Morris Trail
PROJECT MANAGER:	Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD:	Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD:	Corina Argullin
CLIENT:	City of McAllen
CLIENT REFERENCE:	Eduardo Mendoza, P.E. City Engineer, (956) 681-1150

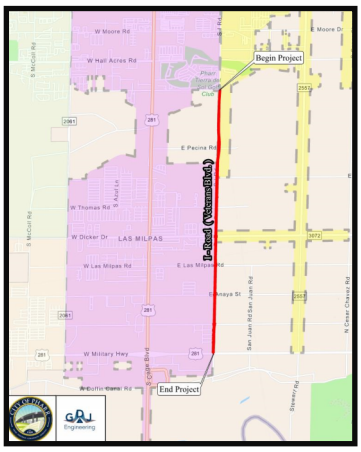
PROJECT DESCRIPTION:

The GDJ team is working with the City of McAllen to provide design, environmental, PS&E and construction management for phase II of the Jackson Hike and Bike Trail. The scope of the improvements include providing a 10-foot-wide shared use path and sidewalk. The purpose of the project is to improve multi-modal connectivity and access in the project area. Due to the urbanization and presence of utilities along the existing route, care was taken in the design process to minimize impacts to the properties and utilities. This project includes a pedestrian railroad crossing; therefore, engineers coordinated with the railroad companies to ensure their design standards were met. The project was allocated TASA funds that was set to expire; therefore, the team worked expeditiously with TxDOT to ensure the funding was not lost. Construction began February 2024.

PROJECT: Moore Road
LIMITS: From Jackson Rd. to I Rd.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of Pharr
CLIENT REFERENCE: Ambrosio Hernandez, City of Pharr Mayor (956) 402-4000

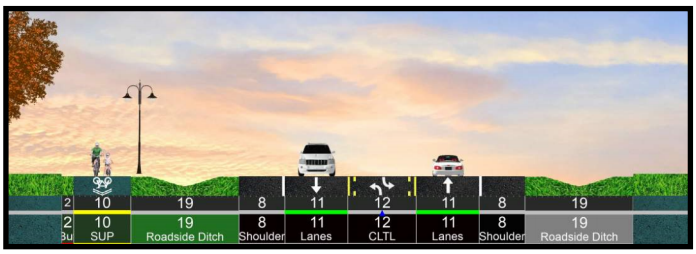
PROJECT DESCRIPTION:

GDJ staff worked on the project development, funding analysis, MPO coordination, schematic completion, environmental document preparation, utility coordination, drainage design and PS&E development. The project included a continuous left turn lane, shoulders, a sidewalk, and a shared-used path for pedestrians and bicyclists. A key challenge to this project was coordinating with the historic irrigation district and the Texas Historical Commission.



PROJECT: FM 1847
LIMITS: From Resaca Retreat Dr. to First St.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: CCRMA
CLIENT REFERENCE: Eric Davila, P.E., CFM (956) 621-5571

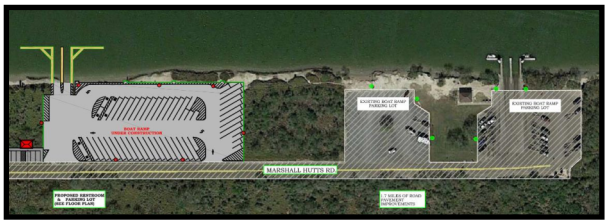
PROJECT DESCRIPTION:



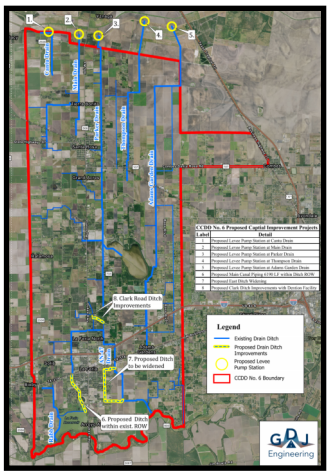
GDJ staff worked on the project development, funding analysis, MPO coordination, schematic completion, environmental document preparation, utility coordination, and PS&E development. The scope of the project included a new five-foot-wide sidewalk on the west side of the existing roadway. This project is currently under construction.

PROJECT: I Road
LIMITS: From Rancho Blanco Rd. to US 281
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of Pharr
CLIENT REFERENCE: Ambrosio Hernandez, City of Pharr Mayor (956) 402-4000

PROJECT DESCRIPTION:



GDJ staff worked on the project development, funding analysis, MPO coordination, schematic completion, environmental document preparation, utility coordination, drainage design and PS&E development. The project included a new shared-used path for pedestrians and bicyclists. A key challenge to this project was the crossing of the IBWC main floodway and Arroyo Colorado River. This required coordination with both the IBWC and USACE. The project is anticipated to begin construction by Fall 2024.



PROJECT: Adolph Thomae, Jr. Park
LIMITS: 37844 Marshall Hutts Rd., Rio Hondo, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
CLIENT: Cameron County
CLIENT REFERENCE: Joe Vega, Parks Director, (956) 247-3526

PROJECT DESCRIPTION:

GDJ was the project manager and lead engineer responsible for all design aspects of the Adolph Thomae, Jr. Park project. The scope of the project involved rehabilitation of the existing park roadway, construction of a new restroom facility, ADA compliant parking facility, and additional lighting at boat ramp locations. A construction estimate was developed to ensure that the project did not exceed the available TPWD grant funding. The restroom facility design required electrical, water supply, and incorporation of a sanitary aeration system that would have no impacts to the sensitive wildlife park area. The electrical design included special boat ramp lighting to minimize impacts to native wildlife and electrical poles designed to withstand the corrosive conditions of the Arroyo Colorado River. The project was completed in Spring 2021.

PROJECT: Capital Improvement Projects
LIMITS: CCDD #6, Santa Rosa & La Feria, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Cameron County Drainage District #6
CLIENT REFERENCE: Laura Hayle, President (956) 748-2102

PROJECT DESCRIPTION:

The GDJ team is working with the CCDD #6 to provide design, PS&E, environmental analysis/permitting, and construction management for several capital improvement projects. The team provided a preliminary engineering report and phase I environmental site assessments. The GDJ team is working with the IBWC on permitting upgraded pumps along the North Floodway.

PROJECT: San Jose Ranch Rd. Extension
LIMITS: From FM 509 to FM 1846
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Cameron County
CLIENT REFERENCE: Benjamin Worsham, P.E., County Engineer, (956) 233-6445

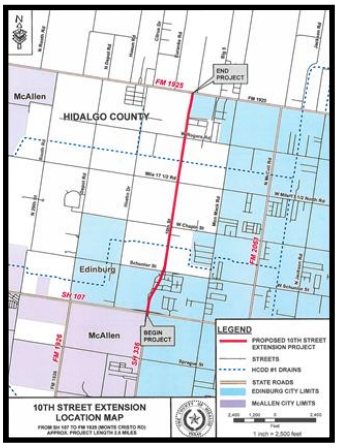
PROJECT DESCRIPTION:

Project Manager and lead design engineer responsible for all aspects of the project. The project consisted of constructing an 0.86 mile rural two-lane roadway on new location. The scope of the project included developing PS&E, a traffic control plan, pavement design, and drainage design. GJD coordinated with the drainage and irrigation districts to ensure there were no adverse impacts to their systems. The team coordinated and designed around major utilities including a high pressure gas line and transmission lines. Key GDJ staff were involved in all aspects of the project including funding coordination, agency permitting/coordination, environmental analysis, public involvement, plan and specification design, and construction management. Project specifications that adhered to TxDOT requirements were developed to provide the county with a high quality project. Construction was completed in 2023.

PROJECT: Rio Hondo City Park
LIMITS: Harris Dr., Rio Hondo, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of Rio Hondo
CLIENT REFERENCE: Ben Medina, City Administrator, (956) 748-2102

PROJECT DESCRIPTION:

The GDJ team is working with the City of Rio Hondo to provide design, PS&E and construction management at the existing boat ramp park. The scope of the improvements include providing walking trails, a kayak launch, restroom facilities, bird blinds, parking lot resurfacing, new RV parking, native landscaping and a new playground. The purpose of the project is to provide improvements that maximize the park space, while providing amenities unique to the area. Due to the location of the property, state and federal permits/approvals (i.e. TGLO & USACE) are required. Funds for this project are from a TPWD grant and a detailed budget was created to ensure the project would not exceed the funding. The project is currently under construction and is anticipated to be complete by December 2024.

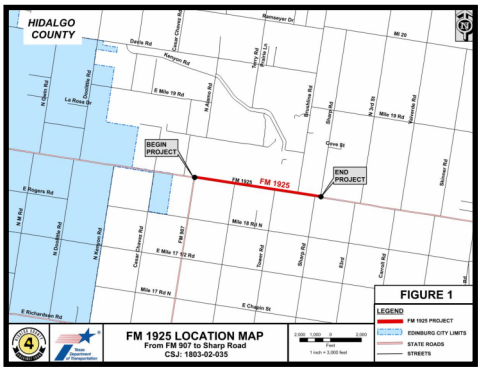


PROJECT: Lopezville Park
LIMITS: 507 W. Minnesota Rd., San Juan, TX
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County Pct. #2
CLIENT REFERENCE: Armando Garza, Hidalgo County Pct. #2 Chief of Staff, (956) 784-3510

PROJECT DESCRIPTION:

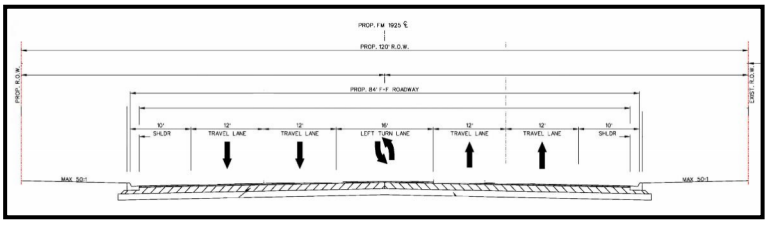
GDJ staff completed the schematic, environmental, utility coordination and PS&E on this project. The scope of the project involved providing improvements to an existing park. As part of the project, a new walking trail, a stock pond for fishing, repaved parking lot, lighting, benches, native landscape development, and other user amenities were included. The key challenges to this project was the existing historic irrigation district, TPWD pond stipulations, and transmission lines traversing the parkland. This project will begin construction in summer of 2024.

PROJECT: 10th Street Extension
LIMITS: From SH 107 to FM 1925
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County/City of Edinburg
CLIENT REFERENCE: Ellie Torres, Commissioner Pct. #4 (956) 383-3112



PROJECT DESCRIPTION:

GDJ staff completed the schematic, environmental, utility coordination and PS&E on this project. The scope of the project included widening the existing two lane road to four lanes on both new and existing location. A key challenge to this project was the undermining of the existing roadway base from surrounding farmland irrigation operations. Once the problem was identified, a French Drain system was designed to remove the penetrating waters prior to infiltration into the roadbed.



PROJECT: FM 1925
LIMITS: From Kenyon Rd. to FM 907 (Full PS&E), FM 907 to Sharp Rd. (Schem.)
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County/TxDOT
CLIENT REFERENCE: Ellie Torres, Commissioner Pct. #4 (956) 383-3112

PROJECT DESCRIPTION:

GDJ staff worked on the schematic, environmental, utility coordination, drainage design and PS&E development. A key challenge to this project was the gas line conflict with drainage design. This required the team to reroute the drainage away from the gas lines as well as coordinate the design and installation of a protective slab over the gas line.

Team Member Qualifications & Experience

Robert Macheska, P.E., C.F.M.

PROPOSED ROLE: **PRINCIPAL & PROJECT MANAGER**

GDJ Engineering

REGISTRATIONS
Professional Engineer
State of Texas
No. 93540

Certified Floodplain Manager
State of Texas
No. 2196-11N

LICENSED
20 Years

4 Years

EDUCATION
Bachelor of Science
Mechanical Engineering
University of Texas – Pan American

EXPERIENCE

Mr. Macheska has over 25 years of experience in the design and management of various public improvement projects. For the past 4 years Robert has served as Executive Vice President/COO for GDJ Engineering, LLC. He had previously worked for both the Texas Department of Transportation and L&G Engineering which provided him with excellent hands-on experience as to how multiple government entities function.

He has worked on all aspects of public works projects, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management and design experience includes contract administration, supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Robert's management approach is very proactive, and he constantly maintains open and effective lines of communications.

PROJECTS

SH 364 from SH 495 to FM 1924 in Mission, Texas
Project Manager responsible for all design aspects of the project. The project consisted of reconstructing and widening an existing 24' rural roadway to an urban five lane section for 2 miles at a construction cost of $6.8 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. Calculated all Times of Concentration, rainfall intensities, calculated hydraulic gradient, and design discharges. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts.

FM 681 from SH 107 to SH 364 in Mission, Texas
Project Manager responsible for all design aspects of the project. The project consisted of reconstructing and widening an existing 40' rural roadway to an urban divided highway for 2.7 miles at a construction cost of $16.8 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. Calculated all Times of Concentration, rainfall intensities, calculated hydraulic gradient, and design discharges. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts.

Civil Engineering
University of Texas A&M - Kingsville

EXPERIENCE

Mr. Rodriguez has over 20 years of experience in the design and management of various public improvement projects. For the past 4 years Chris has served as Vice President of Engineering for GDJ Engineering, LLC. He had previously worked for both the Texas Department of Transportation (San Benito Area Office) and L&G Engineering which provided him with excellent hands on experience as to how multiple government entities function. He has worked on multiple aspects of transportation and drainage projects, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management and design experience includes supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement. Chris has managed multiple concurrent design projects and production staff with numerous design groups under his direction.

PROJECTS

FM 681 from SH 107 to SH 364 in Mission, Texas
Deputy Project Manager responsible for all design aspects of the project. The project consisted of reconstructing and widening an existing 40' rural roadway to an urban divided highway for 2.7 miles at a construction cost of $16.8 million. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. Calculated all Times of Concentration, rainfall intensities, calculated hydraulic gradient, and design discharges. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts.

FM 493 from US 281 (Military) to Bus 83 in Donna, Texas
Deputy Project Manager responsible for all design aspects of the project. The project consisted of reconstructing and widening a 32' rural two lane roadway to a 44' rural roadway for 6.5 miles at a construction cost of $12 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections.

10th Street Ext from SH 107 to FM 1925 in Edinburg, Texas
Lead Engineer responsible for all design aspects of the project. The project consisted of reconstructing and widening an existing 24' discontinuous rural roadway to an urban five lane section for 2.5 miles at a construction cost of $11 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts.

EXPERIENCE

Eduardo Ramirez has 25 combined years of experience in maintenance, construction inspection, project management in road construction, drainage, structural-bridge, and vertical construction projects. Ramirez's relevant construction management and inspection experience and duties include, but are not limited to, the following:

- Make sure all work was done according to plans and specifications
- Pay all work that contractor performed that was approved.
- Perform all testing that was required by the specs.
- Agreeing and confirming Pay App from Owner
- Authorizing payments for Subcontractors, Vendors and Suppliers;
- Schedule delivery of suppliers;
- Schedule Subcontractors for their work;
- Approve all timesheets and equipment charges and run cost reports to make sure we are on budget;
- Track all materials that showed up;
- Approve pay apps for suppliers, vendors and subcontractors; among others.

RELEVANT PROJECTS

Mr. Ramirez has construction management and inspection experience on the following projects:

- SH 97 Atascosa and McMullen County – Rehab and widening of existing Roadway
- US 83 Zapata Bridge – New 4 Lane Bridge over Falcon Lake
- US 83 Roma – Widening of existing Roadway from 2 lane to 4 lane
- SH 130 Toll Road – New Expressway from Seguin to Austin with 3 Interchanges
- San Antonio Riverwalk Extension – Extend From McCollough to IH 35 with Retaining walls, Sidewalks and a Lock and Dam
- SH 181 Sinton Bypass – New Highway around the town Sinton from SH 188 to SH 77
- US 83 Harlingen to La Feria - Widening from 4 lane to 6 lane with overpasses and RW
- San Jose Ranch Road – Construction of a new Roadway that consists of Subgrade, Flexbase, Covert Structures and Irrigation Structures

Anthony Garza

PROPOSED ROLE: **AGENCY / MPO COORDINATION LEAD**

GDJ Engineering

REGISTRATIONS
Local Government Project Procedures Certified

CITY OF RESIDENCE
Harlingen

ROLE EXPERIENCE
19 Years

FIRM EXPERIENCE
4 Years

EDUCATION
Bachelor of Science
Biology
University of Texas A&M - Kingsville

EXPERIENCE

Mr. Garza has over 19 years of experience, and 4 years of Construction Management experience, in infrastructure development for public and private sector clients. He has an extensive knowledge of the federal and state environmental laws specifically with respect to roadway, infrastructure, and transportation planning coordinating environmental documents and programming state and federal funds for linear transportation projects. In this time Mr. Garza served as the representative for the City of Mission, Hidalgo County, Webb County, and Cameron County at the local Metropolitan Transportation Planning Organizations. Highlighting his skills in project planning and development. This required a multi-disciplinary approach to assure the proper coordination of advanced planning efforts to ensure local reimbursement for locally administered projects with state and federal funding.

PROJECTS

Hidalgo County MPO, Hidalgo County, Texas
Mr. Garza served as the Hidalgo County MPO TAC representative from April 2011 to May 2013 and from September 2017- October 2019. During this time his duties included coordinating with all precincts in Hidalgo County to assure their projects were properly programmed on the MPO planning documents. In addition to preparing project fact sheets and project planning and environmental documents Mr. Garza also provided project feasibility reports to determine if projects on the MPO Planning documents were "active" projects. Analysis of existing projects sometimes allowed for projects experiencing delays could be adjusted to allow "shovel ready" projects to be constructed. Expediting the letting of projects often results in a savings in construction cost due to avoidance of escalation.

Laredo Urban Transportation Study Metropolitan Transportation Planning Organization, Webb County, Texas
Mr. Garza served as an advisor to both the City of Laredo and Webb County at the previously named LUTSMPO from 2014 to 2017. During this time, he successfully coordinated a comprehensive audit of Proposition 1 & 7, Coordinated Border Infrastructure (CBI), and Category 7 funding and worked with the local governments to develop plans to fully fund the Loop 20 Expansion and the Hachar Reuthinger Parkway Projects for construction. During this time serving as the planning lead, he was able to secure over $325 million dollars in infrastructure funding within Webb County.

TxDOT Texas-Mexico Border Master Plan (Under HDR)
Served as a project manager for the subconsultant team in charge of performing data analysis and bridging the gap between project data and the wants and needs of the local governments and the final BTMP project selection criteria, scoring, and prioritization.

EXPERIENCE

Miss Argullin has over 15 years of experience in National Environmental Policy Act (NEPA) documentation and procedures. She has obtained environmental clearances on over 25 different projects, ranging from categorical exclusions to environmental assessments. She has an extensive knowledge of federal and state environmental laws, specifically regarding roadway and transportation planning. Ms. Argullin has experience in coordinating and completing all aspects of the NEPA process, from project scoping to environmental inspections. Her experience includes, but is not limited to environmental documentation, agency coordination, environmental permitting and public involvement.

PROJECTS

South Parallel Corridor from FM 1479 to FM 1577 in Cameron County, Texas

Oversaw NEPA clearance on an environmental assessment for a new location roadway for the county. She completed various technical reports and environmental assessment document for the project. Ms. Argullin prepared a mitigation plan and obtained two NWP#14 from USACE for multiple resaca crossings. She handled the logistics and prepared all documentation for multiple public meetings, meetings with affected property owners, and an opportunity for public hearing.

I Road from Rancho Blanco Rd. to US 281 in Hidalgo County, Texas

Oversaw the NEPA clearance of an open-ended D-listed categorical exclusion for a roadway widening with hike/bike trail for the city. She prepared various environmental technical reports, obtained a NWP #14, submitted an IBWC license application, and oversaw the cultural resources team. Mr. Argullin coordinated logistics and prepared documents for a public meeting. She prepared all meeting materials.

Nolana Loop from FM 1426 to FM 88 in Hidalgo County, Texas

Oversaw the NEPA clearance on an environmental assessment for a roadway on existing and new location for the county. The project consisted of reconstructing and widening an existing two-lane rural roadway to a four-lane urban roadway. Ms. Argullin prepared the classification letter, various technical reports, agency coordination, and environmental assessment document. She handled the logistics and meeting materials for a public meeting and a public hearing.

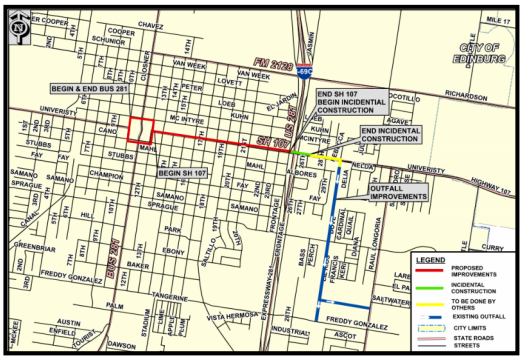
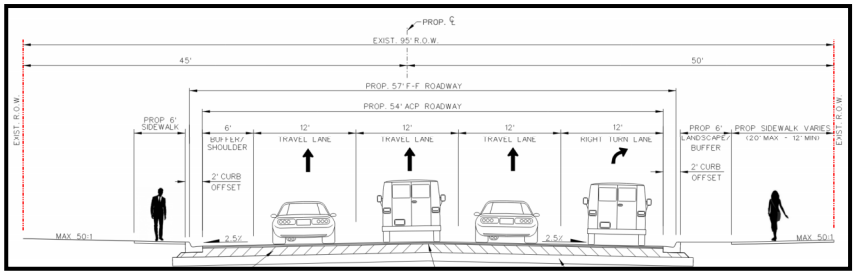
PAST PROJECTS WITH THE CITY OF EDINBURG



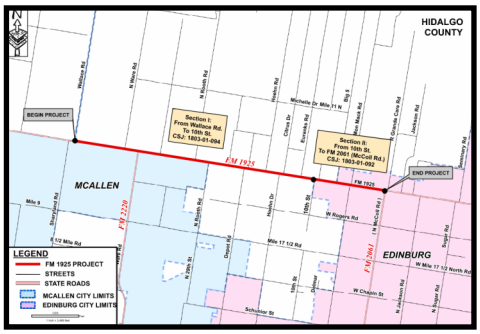
PROJECT: Freddy Gonzalez Dr. Hike & Bike Trail
LIMITS: From Closner Blvd. to Raul Longoria Rd.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: City of Edinburg
CLIENT REFERENCE: Mardoqueo Hinojosa, P.E., CFM, City of Edinburg (956) 388-8211

PROJECT DESCRIPTION:



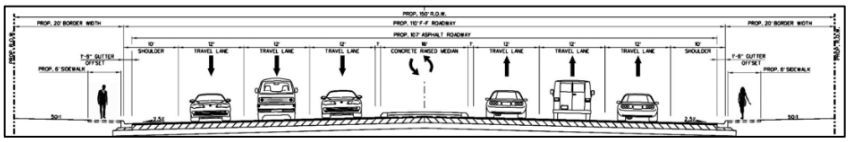
GDJ aided in project development, funding analysis, MPO coordination, and environmental document preparation. The project included providing a new shared-used path for pedestrians and bicyclists along the existing Freddy Gonzalez Dr. The purpose of the project is to improve multi-modal connectivity and access in the project area. The project is anticipated to be environmentally cleared in July 2024.

PROJECT: SH 107
LIMITS: From BUS 281 to I-69C
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County (ICA with Edinburg)



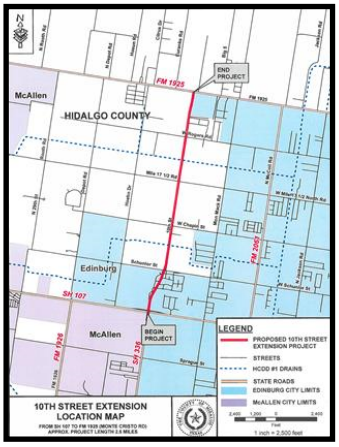
PROJECT DESCRIPTION:

GDJ staff worked on the project development and funding, schematic completion, and environmental document preparation. The project included converting the existing roadway to a one-way traffic operations, reconstructing SH 107 within existing ROW, removing/replacing the existing storm drain system, and improving the existing drainage ditch.



PAST PROJECTS WITH THE CITY OF EDINBURG

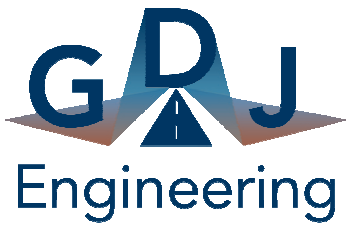
PROJECT: FM 1925
LIMITS: From Wallace Rd. to McColl Rd.
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County (ICA with Edinburg)



PROJECT DESCRIPTION:

GDJ staff worked on the project development and funding, schematic completion, environmental document preparation, utility coordination, drainage design and PS&E development. The project included widening and reconstructing the existing roadway to six lanes with a median and correcting the misaligned intersection at Mon Mack Rd.

PROJECT: 10th Street Extension
LIMITS: From SH 107 to FM 1925
PROJECT MANAGER: Robert Macheska, P.E., CFM
ENGINEERING DESIGN LEAD: Christopher Rodriguez, P.E., CFM
ENVIRONMENTAL LEAD: Corina Argullin
CLIENT: Hidalgo County (ICA with Edinburg)



PROJECT DESCRIPTION:

GDJ staff completed the project development and funding, schematic, environmental, utility coordination and PS&E on this project. A key challenge to this project was the undermining of the existing roadway base from surrounding farm land irrigation operations. Once we identified the problem we designed a French drain system to remove the penetrating waters prior to infiltration into the roadbed.

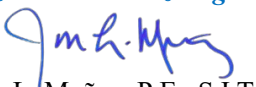
Re: REQUEST FOR PROPOSALS FOR ENGINEERING SERVICES RFP #2024-9

Dear: Mr. Mardoqueo Hinojosa,

Guzman & Munoz Engineering and Surveying, Inc. (GMES) is pleased to submit this proposal for Civil Engineering services to the City of Edinburg in accordance with the referenced REQUEST FOR PROPOSALS FOR ENGINEERING SERVICES RFP #2024-09. One (1) electronic copy of our Statement of Qualifications has been sent to the City of Edinburg.

Our firm is skilled in managing, directing, and coordinating engineering design efforts on assigned projects along with acquiring approval and permits from all outside agencies and utilities as required for each project. We are a full-service firm providing our own survey crews, lidar data collection, engineering, construction management, and over 9 staff engineers to provide the resources necessary to meet the City of Edinburg schedule.

GMES has completed a rotation for the City of Edinburg over the last 5 years.



Our staff comprises approximately 25 employees, including engineers, surveyors, planners, project managers, technicians, management, and related support personnel. Furthermore, our state-of-the-art data systems serve to standardize and facilitate data storage, retrieval, and communication, resulting in improved performance for the City of Edinburg.

GMES brings the talent and depth of registered Professional Engineers, Engineers-in-Training (EITs), Registered Professional Land Surveyors, Construction Managers, and Inspectors, as well as full-time survey crews and various drafting technicians and management and related support personnel. Additionally, the Project Team is very familiar with federal guidelines and requirements (i.e., TXDOT, TWDB, TCDBG, TDEM, TCHCA, TCEQ, USDA, GLO, and USACE). GMES is a firm in the Rio Grande Valley with an office in Mercedes. The official contact's name and address for the firm are:

Jose L. Muñoz, P.E., S.I.T., President – Senior Project Manager

INTRODUCTION / SCOPE OF SERVICES

The team at (GMES) brings extensive capabilities in professional services for all disciplines of consulting, engineering, surveying, design, construction management, inspection, and construction (design/build), as well as project management through the experience of over 50 years in the Rio Grande Valley. GMES' staff experience in research and planning adds to the analytical and project scheduling expertise vital to timely and cost-effective project completion to meet the requirements and necessities of the City of Edinburg in its application and project implementation of a contract **City of Edinburg Request for Proposals For Engineering Services RFP #2024-09.**

SCOPE OF SERVICES

ENGINEERING/ARCHITECTURAL/SURVEYING SERVICES

- Identify design criteria
- Provide design alternatives with cost analysis
- Prepare Plans, Specifications, and Estimates (PS&E)
  (Construction plans may require consideration of pavement design, structural design, hydrology/hydraulic engineering, utility coordination, geometric alignment, street lighting, traffic control, and construction phasing and erosion.)
- Prepare the bid packet and assistance provided during the bid process.

SURVEYING SERVICES

- Prepare boundary and topographical surveys
- Prepare ROW strip maps and parcel maps
- Produce Environmental Assessments
- Obtain necessary permits

CONSTRUCTION ADMINISTRATION

- Provide construction administration
- Prepare Asbuilt Construction Plans

FIELD TESTING AND INSPECTIONS

- Conduct field testing and inspections as may be required

SPECIAL SERVICES

- Provide special services as may be required

WORK PERFORMANCE

Throughout many years of service to the RGV and the regional area, GMES has provided engineering and surveying services to many communities. The scope of work has included the development of preliminary and final plans and specifications (PS&E), bid package preparation, construction administration, construction (design/build), field inspections, preparation of environmental documents, and project management.

GMES has a proven track record with the various municipalities within the Rio Grande Valley, TxDOT, and has prior working experience with entities such as Texas Gas Services, American Electric & Power, just to mention a very few. We have built solid working relationships with these agencies on past projects throughout the Rio Grande Valley.

GMES understands the scope and can fully provide and administer the required services from design through construction.

STEPS TO ENSURE EXCELLENT PROJECT MANAGEMENT AND BUDGET PERFORMANCE

GMES will use a management-by-objectives approach to performing the scope of work. This disciplined approach ensures senior management oversight, frequent status updates, adequate resource allocation, and close communication with the City of Edinburg staff and respective agencies and contractors associated with the project(s). The different tasks to be performed on a project can be divided into the following phases. All phases are closely coordinated with the designated City of Edinburg representative(s).

PHASE I – STUDY AND REPORT PHASE – *if required.*

1. Upon selection, set up a project startup meeting with the City of Edinburg staff to review the project requirements and gather all pertinent data and history.
2. Perform field reconnaissance of project area and surveying and physical structures of the area.
3. Contact all appropriate state, federal and local agencies for permit process, time schedule, and construction requirements.
4. Request Title Reports on affected properties from the Title Company if needed.
5. Contact utility companies for subsurface locations of their utilities.
6. Prepare a working sketch to submit to the City of Edinburg for acknowledgment to proceed and to get their input.
7. Furnish and submit on behalf of the City of Edinburg the engineering data necessary for applications for routine permits by local, state, and federal authorities (as identified from detailed applications and supporting documents for government grants in aid or for planning advances.

PHASE II – PRELIMINARY PHASE

1. Meet with the City of Edinburg's representatives and relevant parties to gather information and coordinate the project.
2. Perform boundary and topographic surveys of the project area(s).
3. Conduct a survey of existing utilities that may be affected.
4. Develop preliminary construction plans/profiles of the project, if requested by the City of Edinburg.
5. Submit a preliminary surveying plan to the City of Edinburg and other affected entities for preliminary approval of proposed improvements, to receive additional input.
6. Prepare survey documents and meet with the City of Edinburg representatives.

PHASE III – DESIGN PHASE

1. Perform any additional detailed topographical field surveys to collect additional information required in the project.
2. Perform detailed surveys of existing underground, surface, and overhead utilities within the City of Edinburg.
3. Consult with the utility companies for their consideration of all utility data found. Provide a Survey plat to the utility companies involved, if requested.
4. Prepare detailed specifications and contract drawings for construction.
5. Prepare detailed cost estimates and proposals, which shall include summaries of bid items and quantities based on the unit price system of bidding, if requested.
6. Furnish the necessary copies of the approved plans, specifications, and proposals to the City of Edinburg.

PHASE IV – BIDDING/NEGOTIATING PHASE

1. Assist the City of Edinburg in the advertisement of any Project for bids, if requested.
2. Assist the City of Edinburg in opening and tabulating bids, if requested.
3. Analyze the bids and make recommendations for the award of the construction contract, if requested.
4. Assist in the preparation of formal Contract Documents, if requested.

PHASE V – CONSTRUCTION

1. Provide contract administration supervision, if requested.
2. Provide periodic construction supervision or full-time inspection, if requested.
3. Review shop drawings/submittals, if requested.
4. Prepare change orders due to unforeseen conditions encountered, if requested.
5. Prepare monthly estimates of work performed by the Contractor, if requested.
6. Determine and authorize testing frequency of various building components.
7. Prepare record documents, if requested
8. Coordinate approval and certificate of completion, if requested.
9. Provide final project close-out, if requested.
10. Prepare O&M for the project and train personnel, if requested.

Use of the above project performance has proven successful and will be used accordingly as tools for instruments of service for all projects assigned to GMES to ensure all aspects of the required scope of services are met. The Team will furnish a Document Control Specialist who will ensure that every aspect of the project is well documented and recorded and that appropriate files are kept.

QUALITY ASSURANCE/QUALITY CONTROL DURING CONSTRUCTION

Meetings will be held on a frequent basis to address any contingencies that may arise during the projects and/or resolve any issues within the project team. Meeting minutes will be developed during all project meetings.

MEETINGS TO BE HELD:

- **DAILY MEETINGS WITH**: Superintendent, Subcontractor Foremen, Vendors, Client Field Representatives, Safety Officer, QA/QC Officer, and required testing authority.
- **WEEKLY MEETINGS WITH:** Project Manager, Superintendent, Scheduler specific design leads, Construction Coordinator, Safety Officer, QA/QC Officer, Contractor Foreman, and the Client Field Representative.
- **MONTHLY PROGRESS AND PERFORMANCE UPDATE MEETINGS WITH:** Client Representative(s), Design Team Leads, Project Manager, Job Superintendent, Project Scheduler, and Contractor Representative(s).

GMES WILL ALSO DO THE FOLLOWING TO ASSIST IN THE MONITORING OF THE BUDGET, SCHEDULE, AND SCOPE OF ANY PROJECT:

1) Daily inspection reports will be kept and logged at the site and then turned in at the weekly meetings. This will include inspections of equipment as well.
2) Submittal registers and weekly logs of submittals along with delivery logs will be utilized by the Project Manager, job Superintendent, and Construction Manager and his staff to track and control approved material/equipment contingencies and requirements.
3) RFI logs and inspection logs will be used to manage/control and resolve design and quality of construction issues as they occur.
4) The project schedule will be managed by the Project Scheduler and overseen by the Project Manager.

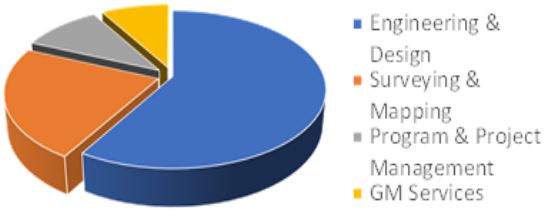
GUZMAN AND MUÑOZ ENGINEERING AND SURVEYING, INC. ~ HISTORY

Guzman Muñoz Engineering and Surveying, Inc. (GMES) (DBE) (HUB) has fulfilled the requirements of the Texas Board of Professional Engineers to offer and perform engineering services in the State of Texas. Firm Registration No. F-8017, expiration date of 7/31/2024. GMES has been providing consulting engineering services in the Rio Grande Valley Region, with widespread projects in Cameron, Hidalgo, Starr, Willacy, and Zavala County areas, since 1973. The firm is a well-established corporation.

Additionally, GMES has immeasurable experience with various governmental regulations, appropriate codes, guidelines, and professional standards and policies (i.e., FAA, TxDOT, FHA, TWDB, TCEQ, TDRA, TxCDBG, TNRCC, FEMA, local government entities and school districts). Similarly, GMES has extensive experience with both utility and infrastructure improvement projects, and we continue to retain excellent working relationships with municipal, governmental, and various utility agencies and their staff across the State and the Rio Grande Valley



PROJECT SPECIALIZATION

Our firm specializes in a broad range of engineering, surveying, and construction-related projects including public works improvement projects in the areas of street improvements, drainage improvements, water and wastewater plants, water distribution and wastewater collection systems, and various surveying projects. **We have expanded our services to include design/build construction.**

GMES has also provided engineering and surveying staff support to various municipalities in regard to R.O.W. acquisition, mapping, and surveying. Our list of clients includes nonprofit agencies, housing authorities, municipalities, counties, political subdivisions, governmental agencies (including various school districts), airports, and private developers. We are very familiar with the economic constraints that are associated with a limited budget. With that in mind, you can rest assured that economic limitations will play an important factor in providing engineering support and advice on any of your projects or program. All of these skill sets are directly applicable for the successful execution of any project assigned to GMES as necessary to complete all projects per your ***City of Edinburg Request for Proposals For Engineering Services RFP #2024-09 RFQ.*** GMES brings the talent and depth of approximately 23 employees that includes engineers, surveyors, an environmentalist, planners, technicians, management, and related support personnel. Respectively, the experience of GMES' staff in construction management and the construction industry, knowledge of the funding criteria, and project inspection add to the analytical and project scheduling expertise that is vital to timely and cost-effective project completion.

RESOURCE UTILIZATION PLAN

The staff assigned is currently operating under an average workload of 60%. Additional staff will be added to work on any assigned project(s) should the volume of work for the City of Edinburg grow to be more than can be effectively processed by the existing staff or should the volume of other work for the Project Team grow to the point of affecting the performance of the work for the City of Edinburg.

EQUIPMENT AND AVAILABLE RESOURCES

GMES owns & operates a DJI Matrice 300 RTK, a quad-copter remote control drone that utilizes photogrammetry & LIDAR to produce detailed and accurate orthomosaic maps with high-precision elevation and coordinate data.

Guzman and Muñoz Engineering and Surveying, Inc. uses the latest computer hardware and software technology. Presently, GMES is using AutoCAD Civil 3D 2017 software on all projects. This allows GMES to complete plans/specifications on time, with accuracy, and within budget. We currently have twenty-three (23) PC workstations for drafting and design, administrative day-to-day tasks, 2 iMacs, and one assigned PC station for downloading daily survey field data. GMES also has 4 servers on-site to provide file storage and host applications.

GMES has up-to-date technology and networked computer systems, CADD and aerial mapping software, and GPS surveying equipment. These resources place GMES in a leadership position to perform large engineering and/or survey and topography base projects. GMES is a **"Total Systems"** engineering firm.

We currently have a fleet of late-model vehicles to ensure maximum reliability for any ongoing project. We strive to provide the best delivery time in the industry. This can only be accomplished through qualified personnel, up-to-date office/field equipment / reliable transportation to complete the job accurately, precisely, and on time.

FAMILIARITY WITH GEOGRAPHIC AREA

GMES has been providing engineering services in South Texas since 1973, a period of over 50 years. Furthermore, GMES has provided quality services for various counties and municipalities for the past several years and is currently providing services for various local and government-funded projects.

GMES is familiar with the City of Edinburg needs and requirements. Our firm has vast **hands-on knowledge and experience** and is skilled in projects associated with compliance with the Texas State and County Regulatory Codes of Ordinances for zoning, site plan, subdivision, and water quality. We are also familiar with pertinent construction materials, vendor facilities, and standard practices.

WORKLOAD STATUS

There are no potential conflicts with current work at this time. Our GMES TEAM is currently **operating under an average workload of 60%**. This will allow the team to **immediately commence** on any engineering/surveying project requested/awarded to us. Additional staff will be added to work on any assigned project(s) should the volume of work grow to be more than can be effectively processed by the existing staff or should the volume of other work for the GMES TEAM grow to the point of affecting the performance of the work for our clients.

PRINCIPAL OF THE FIRM

Our firm is comprised of a multi-disciplined team of professionals and well-trained technicians. The **Principal-In-Charge and President of the Corporation is Mr. José L. Muñoz, P.E., S.I.T.** Mr. Muñoz has over 40 years of experience in the design and project management of **Civil Engineering** projects. Mr. Munoz is also a **Land Surveyor in Training** and takes a direct hands-on approach to all the work GMES is committed to completing.

Mr. Munoz has extensive experience in Project Management of public infrastructure projects and municipal planning. He has successfully managed engineering projects funded by the Texas Water Development Board (TWDB) and other state and federal agencies including street and drainage, water and wastewater treatment plant planning, and design for projects. Mr. Munoz has designed or is in the process of developing planning documents, such as Environmental Information Documents, Preliminary Engineering Reports, Funding Agency Applications, and Plans, Specifications, and Cost Estimates (PS&E) for the following projects:

- City of Raymondville Waterlines & Elevated Storage Tanks
- City of Raymondville City Engineer
- City of Raymondville COVID-19 PD Remodel
- City of Raymondville TDA Sanitary Manholes Rehabilitation Project
- City of Raymondville Drainage Improvements (TDA Funded)
- City of Raymondville TWDB Applications
- 2021 - City of Rio Hondo CDBG Street Improvements
- 2020 - Willacy County CDBG-MIT Application
- 2020 – City of Raymondville CDBG-MIT Application
- 2018 - Willacy County - CDBG Street Projects
- City of Edinburg Owassa Rd Sanitary Sewer Lines
- City of Edinburg Pre Disaster Mitigation Program 2019
- City of Edinburg On-Call Engineer
- City of Lyford TDA Wastewater Treatment Plant Rehabilitation
- City of Los Fresnos TWDB/DWSRF Water Distribution System Improvements & Rehabilitation Project
- City of Los Fresnos WTP EPA Vulnerability Assessment
- Willacy County TWDB Applications
- Willacy County – FEMA WCY005C – Street and Drainage Improvements
- Willacy County - TDA La Sara & La Rosita – Street Improvements & Drainage
- Willacy County Pct. 4 Street Improvements
- Willacy County GLO Disaster Recovery (DRS-210204) Street Drainage Improvements
- GLO Disaster Recovery Round 2: Willacy County PCT 4 Drainage and Pavement
- Improvements for Sebastian, Lyford, La Sara and San Perlita
- City of Edinburg Pre-Disaster Mitigation Program Year 2019
- City of Edinburg-On call engineer
- HCCID #9 Mercedes Fedex WaterLine Relocation
- Harlingen Medical Center - Proposed parking lot Feasibility Assessment
- Harlingen Medical Center Additional Topo of Existing Parking Lot
- IBWC Arcadia US Inc Weslacoto Los Indios Levee Rehabilitation
- IBWC Falcon Dam Admin Office – Design Build
- Mercedes Builders Construction Services for cleanup of Los Posos Land
- Cameron County Old Alice Rd
- City of Lyford TDA Wastewater Treatment Plant Rehabilitation
- City of Los Fresnos Update to Tx Water Conservation Plan & Drought Plan
- City of Los Fresnos TWDB DWSRF Water Distribution System Improvements & Rehabilitation Project
- City of Los Fresnos TWDB CWSRF 2020 Application
- City of Raymondville-City Engineer TDA - 2019
- City of Raymondville – Sewer Line Repair
- City of Raymondville TDA Sanitary Manholes Rehabilitation Project
- City of Raymondville TWDB Rehab of existing Brick Manholes
- City of Raymondville WWT Plant Permit Renewal
- City of Raymondville Water Conservation & Drought Plan
- City of Raymondville Splash Park
- City of Raymondville City Engineer
- City of Raymondville Water Tank Rehab
- City of Raymondville Stake out City Cemetery-Phase 2
- City of Raymondville - City engineer Washington Street Ditch
- City of Raymondville - City engineer Alley ROW behind Stripes
- City of Raymondville – 2019 Floods TX (GLO)
- Willacy County – FEMA WCY005C – Street and Drainage Improvements
- Sonoma Housing, Vermillion Apts
- Patel Subdivision
- Willacy County - TDA La Sara & La Rosita - Street Improvements & Drainage
- Willacy County - CDBG. Street Projects
- Willacy County Pct. 4 Street Improvements
- Willacy County GLO Disaster Recovery (DRS-210204) Street Drainage Improvements
- Willacy County PCT 4 GLO Disaster Recovery Round 2 Drainage and Pavement Improvements for Sebastian, Lyford, La Sara and San Perlita
- Willacy County Appraisal District – Assessment Study, Design and
- Willacy County Administration Building Remodel – Entire Structure
- Willacy County Federal Prison - Federal Prison Remediation Project
- Willacy County La Sara Street Improvements
- Willacy County Pct #3 Dahila Road Rehab
- Weslaco ISD Margo Parking Lot (Drainage Improvements)
- Weslaco KMC Engineering Assessment for installation of Uroview FO machine
- Weslaco Knapp Medical Center Topo of parking area & as-builts
- Weslaco Knapp Medical Center Eng. & Arch. Assess for segregated compounding area
- Weslaco Surya LTD Engineer Design Construction Phase Srvcs – Rangila Subdivision
- Werner Ellen Investments / El Clavo Harlingen Westway Subd. Phase II Const. Documents & Requirements

GMES KEY STAFF

The PROJECT DIRECTOR for all work assigned will be
JOSE L. MUÑOZ, P.E., S.I.T., PRESIDENT

Our firm is comprised of a multi-disciplined team of professionals and well-trained technicians. The **Principal-In-Charge and President of the Corporation is Mr. José L. Muñoz, P.E., S.I.T.** Mr. Muñoz has over 40 years of experience in the design and project management of **Civil Engineering** projects. Mr. Munoz is also a **Land Surveyor in Training** and **takes a direct hands-on approach to all the work GMES is committed to completing.**

Mr. Munoz has extensive experience in Project Management of public infrastructure projects and municipal planning. He has successfully managed engineering projects funded by the GLO's CDBG-MIT program and other state and federal agencies including street and drainage, water and wastewater treatment plant planning and design for projects. Mr. Munoz has designed or is in the process of developing planning documents, such as Environmental Information Documents, Preliminary Engineering Reports, Funding Agency Applications, and Plans, Specifications, and Cost Estimates (PS&E) for numerous projects.

CARLOS AGUILAR, P.E., R.P.L.S., PROJECT SURVEYOR

Mr. Aguilar has provided professional surveying services since 1992. His experience includes numerous street and drainage projects and numerous subdivision design and construction projects for Cameron County and Hidalgo County as well as various cities throughout the Rio Grande Valley. He has provided a broad range of surveying practices, including right-of-way strip maps, title research, establishing boundary locations, topography, construction staking, and land development projects throughout his career.

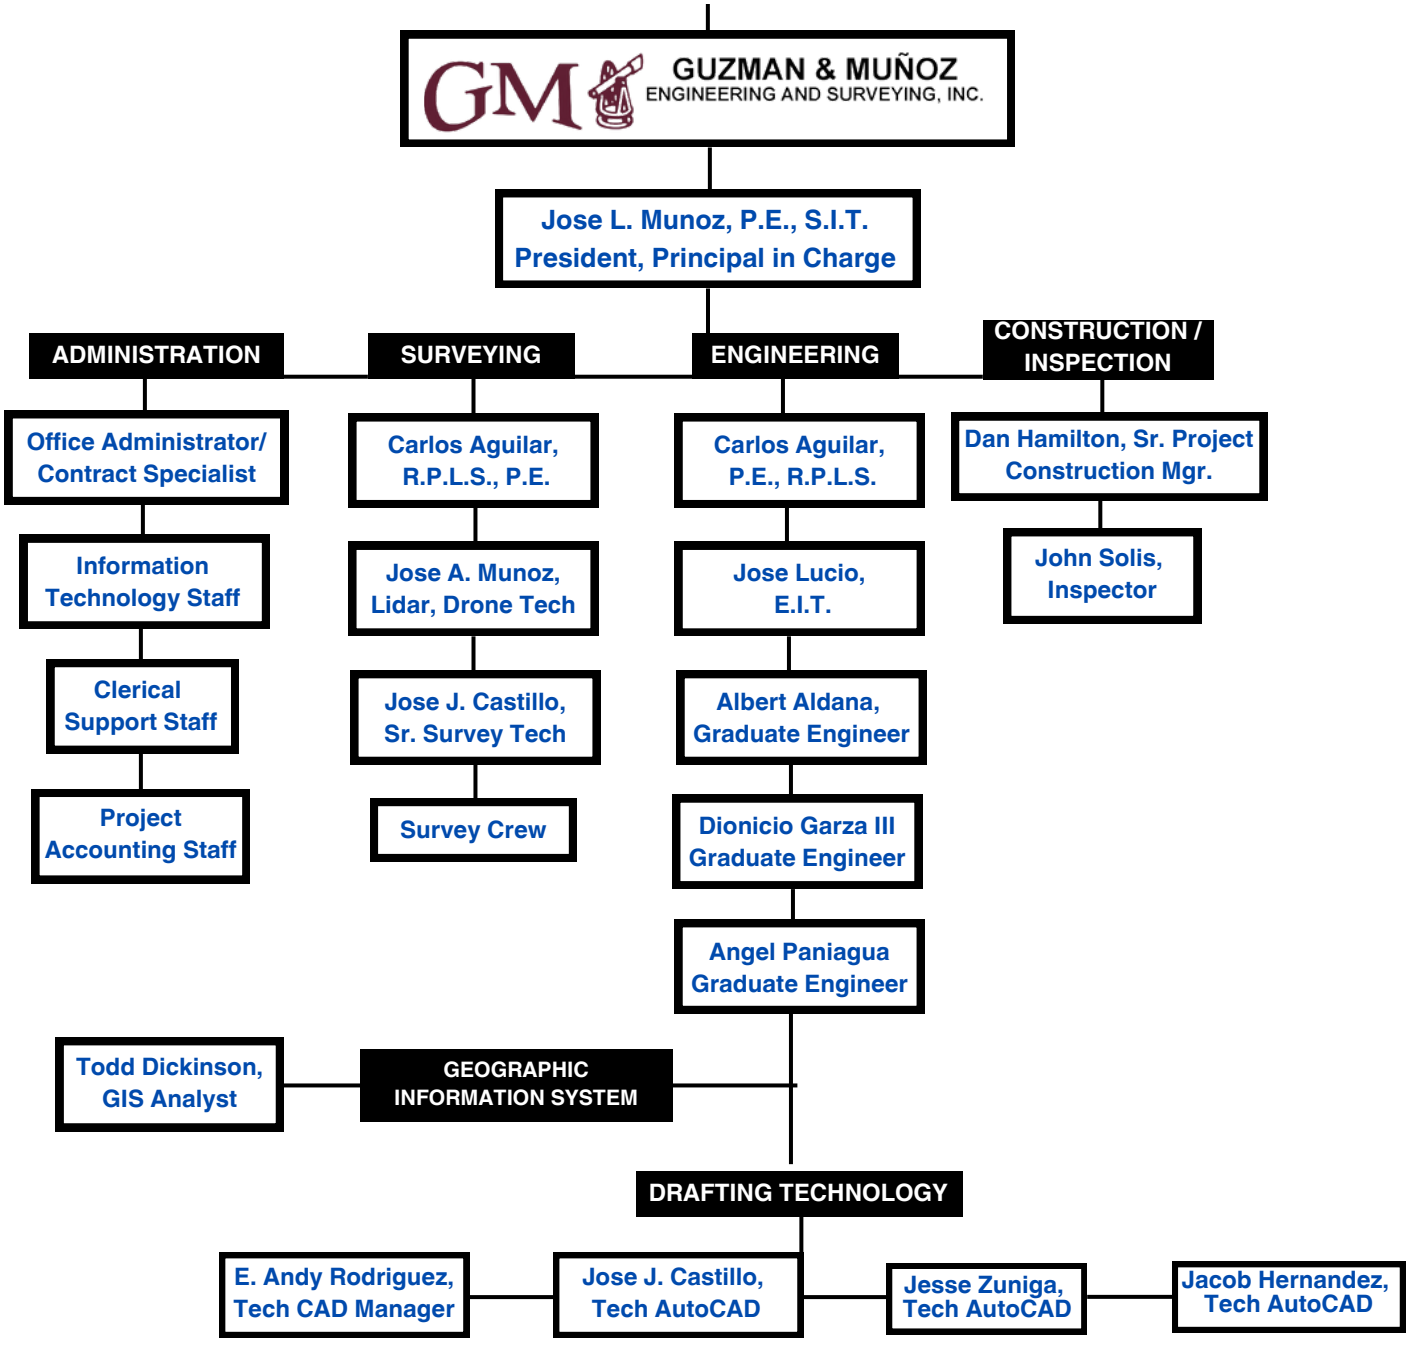
PERSONNEL & STAFFING

DAN HAMILTON, SENIOR PROJECT MANAGER CONSTRUCTION DIVISION
EDUCATION: B.S. Industrial Construction Technologies Since 1986
EXPERIENCE: Mr. Hamilton has 45 years of construction and engineering related experience, covering a broad range of construction projects and practices, managing project progress and contract conformance. GEO Tech testing, Stockpile management and tracking, Concrete Design, Testing, Quality Control, and Stockpile Management Regimens.

TODD DICKISON, GIS ANALYST
EDUCATION: B.A. English, Data Analytics Certification
EXPERIENCE: Mr. Dickison has over 30 years of experience in IT, primarily as a database administrator and backend support.

JOSE LUCIO, EIT
EDUCATION: B.S. Civil Engineering 2020
A.E.S. Engineering and Science 2015
EXPERIENCE: Mr. Lucio is a Graduate Civil Engineer who has experience in construction, with exceptional attention to construction, inspection, surveying, and quality control. Mr. Lucio is a motivated individual who consistently is exploring new areas to expand his knowledge and abilities. Mr. Lucio's eagerness to contribute to team success through hard work, attention to detail, and excellent organizational skills, add to the efficiency of each project he undertakes.

ALBERT J. ALDANA II, GRADUATE ENGINEER
EDUCATION: B.S. Civil Engineering 2022
EXPERIENCE: Mr. Albert Aldana is a Graduate Engineer offering 10 years of experience in the Civil Engineering Field. Mr. Aldana is adept in traffic engineering projects consisting of traffic signal design, signal timing, and signal warrant studies. Highly proficient in both MicroStation and AutoCAD, Mr. Aldana has experience in drainage and utility design.



ANGEL PANIAGUA, GRADUATE ENGINEER
EDUCATION: B.S. Civil Engineering 2023
EXPERIENCE: Mr. Angel Paniagua is a Graduate civil engineer-in-training with 2 years of experience in the field. Adept in supervising construction process as well as preparing cost estimates. Highly motivated to learn more about the field, particularly in the firm's specialties such as wastewater management and drainage design.

DIONICIO GARZA III, GRADUATE ENGINEER
EDUCATION: B.S. Civil Engineering 2023
EXPERIENCE: Mr. Dionicio Garza is a Graduate civil engineer-in-training with 2 years of experience in the field. Adept in supervising construction process as well as preparing cost estimates. Highly motivated to learn more about the field, particularly in the firm's specialties such as wastewater management and drainage design.

PROFESSIONAL SUMMARY

Mr. Muñoz has 40 years of engineering and surveying experience with various engineering firms in Texas and California. He has designed and constructed engineering projects in various areas of civil engineering. He is currently managing facility planning, design, and construction of several infrastructure improvement projects in the Rio Grande Valley. Mr. Muñoz has the experience and is familiar with local municipal and state regulations required for the design and construction and survey of various disciplined projects. Responsible for management and oversight of the day-to-day activities, project controls, coordination, and scheduling for all phases of engineering, surveying, and construction projects. Mr. Munoz is also a Land Surveyor-In-Training and takes a direct hands-on approach to all the work GMES is committed to completing.

Capabilities

Recruiting, Hiring, and Placement of Professional Resources, Professional Career Development Leadership, Operations Management, Program Management, Project Management, Personnel Management, Project Controls, Business Analysis, and Process Mapping, Business Development, Marketing and Sales, Federal Procurement, SF330 Proposal Development, and Corporate Trainer, Team Building, Storm Water Quality, Custom Application Development.

Tools

MS Office Suite including Excel, Word, PowerPoint, Access, Visio, MS SharePoint, ESRI ArcGIS Desktop and Server, SQL Server, and Oracle

PROJECT HIGHLIGHTS

Mr. Munoz has extensive experience in Project Management of public infrastructure projects and municipal planning. He has successfully managed engineering projects funded by the Texas Water Development Board (TWDB) and other state and federal agencies including street and drainage, water and wastewater treatment plant planning, and design for projects. NOTE: GUZMAN & MUNOZ ENGINEERING AND SURVEYING, INC. PERFORMED SURVEYING SERVICES FOR MOST OF THE PROJECTS LISTED ON THIS RESUME

Carlos C. Aguilar, P.E., R.P.L.S.

Project Surveyor / Engineer

Education

1974 BS Engineering
Texas A&M Kingsville

Occupational License

RPLS 4997
PE 47469

Total Years of Experience

Civil 42, Surveying 31

PROFESSIONAL SUMMARY

Mr. Aguilar has 31 years of experience covering a broad range of Surveying practices, including Right of Way Strip Maps, Title Research, establishing Boundary Locations, Topography, Construction Staking, and Land Development projects.

CAPABILITIES

Experience includes the ***management and coordination*** of multiple Field crews working simultaneously throughout South Texas including the Rio Grande Valley on projects that include: property boundary surveys (metes and bounds) including finding and/or marking corners, platting and line staking, subdivision design, and layout, topographic surveys, F.E.M.A. floodplain certificates, site plan development and construction stakeout, job bidding (Opinion of Probable Cost), deed and title research, assist with surveys boundary disputes and boundary agreements between clients and adjoiners, property chain of title, Senior Rule (Junior/Senior property rights), condominium surveys, oil, and gas proposed well location surveys, and right-of-way surveys.

TxDOT Pre-Certified (Sequence No.) in the following TxDOT categories:15.1.1 Survey; 15.1.2 Parcel Plats; 15.1.3 Legal Description

PROJECT/PROGRAM HIGHLIGHTS

Mr. Aguilars' Surveying & Engineering career experience includes the following:

Performing American Land Title Association surveys, residential and commercial mortgage surveys for buyers, title companies, and banks; topographic surveys for proposed development (including associating with governmental agencies and/or biologists such as the US Corp of Engineers for surveying determined wetland delineations); construction staking; as-built surveys; large boundary surveys, route surveys (for right-of-way acquisition purposes); littoral surveys along the Gulf of Mexico and Laguna Madre; riparian surveys; platting of property; perform narrative metes and bounds descriptions for land surveys, easements, right-of-way acquisitions, and leases; office and field experience with Global Positioning System; perform State Plane Coordinate surveys; latitude and longitude tabulations; hands-on and technical work on all the above, including drafting, analyzing boundary control and computations and mapping. Gained experience on surveys for oil and gas industry; ability to oversee all office and field work pertaining to land surveying and drafting; client communication skills; analyze and interpret deeds, and research for deeds; obtained experience in assisting in coastal land development; project advisor for subdivision platting; and possibly other learned experiences that come with the profession. Industries served with the surveying profession: Civil Engineering, Construction, Real Estate, Abstract and Title Insurance, Architectural, Oil and Gas, Insurance, Utility Companies, and Local Governments.

Dan Hamilton, Senior Project Manager Construction Division

Education
B.S. Industrial Construction Technologies
Texas State University

Professional Certifications
OSHA 10 Hour #001451479
OSHA 30 Hour#2560063417

Total Years of Experience
45

PROFESSIONAL SUMMARY

Mr. Hamilton has 45 years of construction and engineering related experience, covering a broad range of construction projects and practices, managing project progress and contract conformance. GEO Tech testing, Stockpile management and tracking, Concrete Design, Testing, Quality Control, and Stockpile Management Regimens.

CAPABILITIES

Experience includes project coordination and performance in multiple, private, public and government sector projects. Obtaining and reviewing building and construction permits, including demolition permits, Hazardous material abatement permits, E.P.A. & SWP3 plans, and energy compliance reports. Securing and managing ADA reviews/compliance. Provide management of job cost accounting, job budget review, planning, and tracking. Participate in Hiring, documenting, training, scheduling, and supervision of project specific employees on the project. Team Building.

Government Agency Experiences: US International Boundaries & Water Commission (USIBWC), US Army Corps of Engineers (USACE) and General Administrative Service Administration (GSA)

Security Clearances: *DHS Favorable Suitability, and Texas Board of Prisons Specific Access Contractor Clearance.*

PROJECT/PROGRAM HIGHLIGHTS

His portfolio of projects consists of a broad range of work in private, public, and government sectors. They typically ranged in dollar size from $300,000 to $8,000,000 and reached as high as $150,000,000. They consisted of Design & Construction Management services, heavy Civil earthwork and/or Vertical Construction on new Office buildings, Shopping Malls/Strip Centers, Leasehold Improvements, School projects, Airport taxi way improvements, Municipal facilities and Office remodels, IBWC Levee drainage & renovation projects, IBWC Dam repairs, Public Works road and drainage projects, Municipal Fire Stations and Police Stations, Sewer Treatment plants, Prison Facility repairs and renovations, Ports of Entry Security Upgrades (USACE, GSA, IBWC), FEMA Safe Room projects, and municipal parks, etc.

Todd Dickison, GIS Analyst

Education
B.A. English Literature
Data Analysis Certificate
University of North Texas

Total Years of Experience	Years with GMES Firm
6	<1

PROFESSIONAL SUMMARY

Mr. Dickinson has over 30 years of experience in data analysis, GIS, and IT consulting services. He has utilized GIS tools to conducted spatial analysis, deriving insights and effectively visualize findings for stakeholders. His experience also encompasses the design and support of backend databases used in ERP, CRM, and business intelligence software implementations for Fortune 500 companies and small businesses. He has held diverse roles such as application programmer, data analyst, technical lead, dba and project manager.

CAPABILITIES

Proficient in Esri's software suite, from ArcMap to ArcGIS Enterprise and cloud solutions. Skilled in leveraging the capabilities of Esri tools for spatial analysis, data management, and enterprise GIS deployment. Uses strong Python and SQL skills to develop data pipelines. Extensive experience in developing data models using multiple relational database management systems (RDBMS).

PROJECT/PROGRAM HIGHLIGHTS

He utilized the ArcGIS Pro Hydrology toolset to model water flow under various conditions, aiding Willacy County in developing effective flood mitigation strategies. For Raymondville, he designed a data model in ArcGIS to manage cad data for the assets from Raymondville’s sewer system, enabling the creation of GIS maps that displayed these results for improved planning. He has employed high-resolution lidar to develop accurate GIS maps that captured detailed elevation data that may be used for residential development.

Jose Lucio, EIT #78863

Education

B.S. Civil Engineering
University of Texas, Rio Grande Valley
Associates Science and Engineering
South Texas College

Total Years of Experience
2

Years with GMES Firm
1

PROFESSIONAL SUMMARY

Mr. Jose Lucio is a Civil Engineer-in-Training who has experience in design & construction, with exceptional attention to construction inspection, surveying, and quality control. Mr. Lucio is a motivated individual who is consistently exploring new areas to expand his knowledge and abilities. Mr. Lucio's eagerness to contribute to team success through hard work, attention to detail, and excellent organizational skills, add to the efficiency of each project he undertakes.

GMES Experience

- **P889-02 Veterans Blvd. Drainage, Edinburg, TX**
  - Road & Storm Improvements Design
  - Construction Management, Change Orders, RFI's, Pay Apps.
  - Inspection of Field Activities
  - Quality Control of Material Submittals, Test Reports.
- **P943 Costa Azul Subdivision, South Padre Island, TX**
  - Plating Subdivision
  - Drainage, Grading, Paving, Utilities Design
- **P925 Woodcrest Apartments, Odessa, TX**
  - Plating Subdivision
  - Drainage, Grading, Paving, Utilities Design
  - SWPPP
- **P930 Jackson St. Apartments, McAllen, TX**
  - Platting Subdivision
  - Drainage, Grading, Paving, Utilities Design
- **P959 Weslaco East ISD, Weslaco, TX**
  - Ditch Drainage Improvements
- **P966 FRA Improvements, Harlingen, TX**
  - Drainage, Grading, Paving Design
  - Construction Management, Change Orders, RFI's, Pay Apps.
  - Field Inspection/Reports of Construction Activities.
  - Quality Control of Material Submittals, Test Reports.
- **P937 Tax Office, Brownsville, TX**
  - Inspection of Field Activities
  - Quality Control of Material Submittals, Test Reports.
- **P929-01 Price Lofts Subdivision, Brownsville, TX**
  - Inspection of Field Activities
  - Quality Control of Material Submittals, Test Reports.

Prior Experience

2021-2022 **Field Engineer** -Robinson Construction

- Nestle Purina Pet Care Expansion
  - Assist Surveying with The Layout of Points, Elevations, and Dimensions for The Project
  - Quality Control of Testing Procedures, and Materials.
  - Inspections of Field Activities
  - Overview of the Project to Ensure It's Built to The Drawing's Specifications.
  - Assist In Communication with Suppliers and Subcontractors
  - Material Receipts/Inventory
  - Scheduling

- Construction Safety Inspector

➢ Patrick Airforce Base
- Inspection of Field Activities
- Quality Control of Testing Procedures, and Materials
- Construction Safety Inspector

Total Years of Experience

11

Years with GMES Firm

2

PROFESSIONAL SUMMARY

Graduate Engineer offering 10 years of experience in the Civil Engineering Field. Adept in traffic engineering projects consisting of traffic signal design, signal timing, and signal warrant studies. Highly proficient in both MicroStation and AutoCAD. Experience in drainage and utility design.

Traffic Engineering Studies

- **Traffic Impact Studies:** performed traffic impact analysis to determine the vehicular impacts because of planned development in the Cities of Brownsville, Harlingen, Edinburg, McAllen, Pharr, San Benito, and Weslaco, Texas.
- **Traffic Engineering Studies:** prepared traffic engineering studies to determine the appropriate traffic controls for Cities and TxDOT.

Traffic Engineering Design

- **Traffic Signal Design:** prepared the design of traffic signals in urbanized settings for the Cities of Brownsville, Edinburg, Pharr, McAllen, and San Juan. Designs included traffic signal timing plans.
- **Signing & Pavement Markings Design:** prepared the design of signing and pavement markings for urban multi-lane arterials, divided highways, frontage roads, and railroad crossings.

Prior Research/Work Experience

Seven Traffic Signals PS&E Project for the City of Brownsville, TX – prepared plans and estimates for sidewalks, ADA-compliant wheelchair ramps, and crosswalks traffic signal improvements. The project was let by TxDOT and prepared DCIS estimate in accordance with Pharr District requirements.

Traffic Signal Designs for the City of Brownsville, TX – prepared plans and estimates for traffic signal improvements at the intersections of SH 48 at Zena Dr and Austin Rd. Prepared plans, specifications, and estimates for TxDOT letting.

Pharr Bike Lane Project, TX – worked on developing plans, specifications, and estimates for proposed bike lanes on Cage Blvd between US 281 and FM 495 and on FM 495 between Veterans Blvd and Jackson Rd. Plans prepared for TxDOT.

Rio Grande LNG & Rio Bravo Pipeline TIAs – collected traffic data and performed traffic impact analysis for proposed LNG on SH 48 south of SH100. Provided recommendations for mitigating improvements.

Computer Skills

Proficient in MicroStation & AutoCAD
Proficient in SignCAD
Proficient in SYNCHRO
Proficient in the Development of Plans, Specifications & Estimate (PS&E)

Areas of Experience

Traffic Signal Design
Traffic Signal Timing/Coordination
Traffic Signal Warrant Studies
Flashing Beacon Design
ADA Sidewalk & Curb Ramp Design

Areas of Experience cont.

Pedestrian Safety Studies
Signing & Pavement Markings Design
Safety Improvement Studies
Traffic Engineering Studies Traffic Impact Studies Proficient in traffic studies

Years with GMES Firm
<1

PROFESSIONAL SUMMARY

Graduate civil engineer-in-training with 2 years of experience in the field. Adept in supervising construction process as well as preparing cost estimates. Highly motivated to learn more about the field, particularly in the firm's specialties such as wastewater management and drainage design.

GMES Experience

- P913-08 Sebastian Drainage Improvements
  - Quantity checks for cost estimation.
- P965-04 Raymondville Cemetery
  - Quantity checks for cost estimation.
- P965-08 Raymondville WC & DC
  - Preliminary research for preparation of water conservation and drought contingency plans of Raymondville.
- P953 DR 18 – Heywood Improvements
  - Preliminary design for drainage improvements.

Computer Skills

- Microsoft Office (Excel, Word, PowerPoint, Outlook)
- Revit
- ArcGIS Pro
- AutoCAD

Prior Experience

2022 – 2024 **Engineer** – Ideas Construction

- McAllen Creative Incubator Remodel
  - Prepared cost estimates and ordered material for construction.
  - Preliminary construction scheduling and allocation of resources / labor.
  - Supervise and ensure delivery of materials.
- McAllen Triplex Remodel
  - Construction plans including basic mechanical and electrical layouts for city approval.
  - Field visits to coordinate with city inspector to ensure construction is up to code.
  - Prepared cost estimates and ordered material for construction.

Dionicio Garza III, EIT #80097

Education
B.S. Civil Engineering
UTRGV

Total Years of Experience
<1
Years with GMES Firm
<1

PROFESSIONAL SUMMARY

Mr. Dionicio Garza is a Civil Engineer-in-Training who has experience in Land Surveying and Construction Staking. Has a proactive attitude towards personal and professional development. His enthusiasm for expanding his knowledge and skills is to contribute to team success.

Prior Experience

2023-2024 Instrument Man/ Surveyor 1- SAMES Inc.

- Oversee local and out of state Staking Projects
- Providing continuous contact with clients to obtain the necessary documentation and ensure the team has provided high-quality service and deliverable.
- Perform quality control of survey and staking documents, including survey plans, descriptions, and Exhibits.
- Meet with the department to discuss and plan present and future projects and projections.
- Prepare and review CAD work.
- Operate surveying instrument and data collector (Trimble TSC7). Produced field calculations and sketched surveying jobs.
- • Maintain appropriate field procedures; records all field data, information; provides guidance and direction to the Rodmen; performs survey tasks as per the direction of the Party Chief.

Work Experience

Drainage system survey For Los Fresno, TX – coordinated a survey crew to collect all the storm structures for the city of Los Fresno and process the data for deliverable the client requested.

Staking and quality control For SpaceX – coordinated multiple Staking and quality control projects in SpaceX. That required a daily exhibit of progress and weekly overall exhibit of progress.

CERTIFICATIONS/FINANCES & INSURANCE

LICENSES:

Guzman Muñoz Engineering and Surveying, Inc. (GMES) (DBE) (HUB) has fulfilled the requirements of the Texas Board of Professional Engineers to offer and perform engineering and surveying services in the State of Texas. TBPE Registration No. F-8017, expiration date of 7/31/2023; TBPLS Registration No. 10087700, expiration date of 12/31/23.

FINANCIAL STABILITY

GMES has been in business for over 49 years, is well-established, and is financially stable. The firm is able to facilitate and manage the risks that may be associated with any project assigned to the firm.

BANKING INFORMATION

GMES banks with PNC Bank. Contact Person: Maria Gonzales, Phone# (956) 365-6401

LITIGATION

GMES has never been in litigation or arbitration for any past or current projects. GMES has successfully completed its projects without major delays and without claims. ***GMES has never been terminated from any assignments for non-performance.***

AFFIRMATIVE ACTION/DRUG-FREE

Guzman & Munoz Engineering and Surveying, Inc. is a registered Historically Underutilized Business (HUB) by the State of Texas Historically Underutilized Business Certification and Compliance Program as well as certified by TxDOT as a Disadvantaged Business Enterprise. It is the policy of the company to promote Affirmative Action and provide equal opportunity to all employees and applicants for employment; and administer all terms, conditions, and privileges of employment in a manner that does not discriminate on the basis of race, color, creed, ancestry, national origin, sex, age, marital status, liability for service in the armed forces of the United States, or because of physical or mental handicap in regard to any position for which the employee or applicant is qualified for and under consideration at GMES. GMES is committed to providing a safe and drug-free work environment and to fostering the health and well-being of its employees.

CHAPTER 2252, TEXAS GOVERNMENT CODE

In accordance with Chapter 2252 of the Texas Government Code, GMES hereby certifies that GMES does not engage in business with Iran, Sudan, or any foreign terrorist organization, and GMES is not listed by the Texas Comptroller as a terrorist organization.

CHAPTER 2271, TEXAS GOVERNMENT CODE

GMES certifies that GMES does not boycott Israel and will not boycott Israel during the term of the contract resulting from this solicitation.

CHAPTER 2274, TEXAS GOVERNMENT CODE

GMES verifies that GMES does not, and will not for the duration of the contract, have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association or (2) the verification required by Section 2274.002 of the Texas Government Code does not apply to the contract.

INSURANCE AND BONDING INFORMATION

Transmittal Letter

July 16, 2024

City of Edinburg
Mr. Mardoqueo Hinojosa, PE
City Engineer
415 W. University Drive
Edinburg, TX 78539

RE: Request for Qualifications for Engineering Services Rotation – RFQ No. 2024-9

Dear Mr. Hinojosa and Members of the Evaluation Committee:

Halff is proud to serve as a partner with the City of Edinburg (City) to provide professional engineering services for various tasks on an "as needed" basis. We understand the importance of these projects for the City, and we are committed to continuing our support to the City, providing successful execution of your projects and meeting your goals. Our qualifications reflect our interest and ability to provide the City with quality engineering services.

- **Familiarity with the City of Edinburg.** Halff can provide the City with a highly qualified staff with recent and relevant experience who can provide all necessary engineering services outlined in this Request for Qualifications (RFQ). We'll use our knowledge of the City, acquired through previous projects and our current involvement in the **Sugar Road** project, to support the design and management of any construction projects granted through this RFQ. Project Manager, **Raul Garcia, Jr., PE, CFM,** along with **17 individuals** in our McAllen office, are proud residents of Edinburg and are familiar with the needs of the area.
- **Why Halff.** The Halff team possesses extensive experience in every requested service by the City. Our team has a track record of project **change orders being less than 5 percent of construction bid amounts**. Halff has experience providing construction and project management services, including constructability reviews, contract administration, cost estimating and analysis, quality control/quality assurance, scheduling and cost control, and start-up operations. Our experience encompasses horizontal projects such as roadways, drainage and utilities, as well as vertical projects such as buildings and bridges, and we have the local resources to design every aspect of these projects.

Point of Contact Information

Physical Address: 5000 West Military Highway, Suite 100, McAllen, TX 78503
Mobile: 956.458.2343 | **Office:** 956.445.5235 | **Email:** rgarcia@halff.com | **Fax:** 956.664.0280

We appreciate the opportunity to continue our relationship with the City of Edinburg. As your Project Manager, **I will be your primary point of contact** for all correspondence and communication pertaining to this RFQ. **I am an officer of the firm and am authorized to bind the firm in professional service contracts**. Please do not hesitate to contact me with any questions about our team or qualifications.

Sincerely,

Raul Garcia, Jr., PE, CFM | Project Manager

Firm Qualifications and Experience

FIRM INFORMATION

COMPANY PROFILE

Halff is an employee-owned, full-service engineering firm headquartered in Richardson, Texas. The firm provides services throughout the Southeast from 33 offices in Texas, Arkansas, Oklahoma, Louisiana, and Florida. Halff is ranked #87 in *Engineering News-Record* magazine's list of the top 500 design firms in the United States. The firm was founded in Dallas in 1950 by Albert H. Halff, Ph.D.-Eng., PE. Today, Halff preserves Dr. Halff's legacy of integrity, dedication to client service, and commitment to quality. We are a progressive firm committed to providing value with creative solutions to design challenges.

Our people are individuals with diverse, yet complementary, professional backgrounds. Most of our professional staff began their careers with Halff directly after college and have grown in their careers knowing that our commitment to quality is the cornerstone of the firm. We know this attribute, more than any other, allows us to maintain a loyal client base. We are members of a company built on integrity, technical knowledge and commitment to client service.

Halff by the Numbers

Areas of Specialization

Halff's areas of specialization include the following:

- Broadband
- Construction Services
- Energy
- Environmental
- Flood Infrastructure Design
- Geographic Information Systems
- Geospatial
- Intelligent Transportation Systems (ITS)
- Information and Communications Technology (ICT)
- Land Development
- Landscape Architecture
- Local Infrastructure
- MEP Engineering
- Planning
- Resilience
- Right of Way (ROW)
- Structural Engineering
- SUE/Utility Coordination
- Surveying
- Transportation
- Water Conveyance and Pumps
- Water/Wastewater Treatment
- Watershed Plans and Studies

OFFICE LOCATION WHERE THE WORK WILL BE PERFORMED

These projects will be managed from our McAllen office with support from our Brownsville, San Antonio, and Austin offices. Our McAllen office has 71 professionals ready and available to serve the City of Edinburg. We have the depth of resources to provide unmatched service for the City.

HALFF'S UNIQUE QUALIFICATIONS

Halff understands there are many important qualifications to selecting a qualified engineering firm. Halff has assembled a highly-qualified team with a proven history of working together and specialized experience in all aspects of the anticipated project. Our team is committed to the success of the project and will apply our knowledge and experience to:

- Be available and immediately responsive
- Listen to and understand your objectives, goals, and constraints
- Understand the regulatory and permitting requirements associated with the project
- Provide varying options for each design problem to enable the selection of solutions thst best fit your needs

These factors will contribute to a successful project that meets your needs, goals, milestones, budget, and schedule.

Halff prides itself in acting as a trusted advisor to our clients and building relationships that make the project process run smoothly, resulting in successful completion that frequently exceeds client expectations and goals.

We have the capacity and capabilities to meet the City's engineering needs. Our team was strategically assembled to deliver the skillset needed across a variety of services, encompassing project approach and construction management plan development as well as the project close-out phase.

APPROACH TO HANDLING PART-TIME STAFFING NEEDS FOR SMALLER ASSIGNMENTS

Halff's approach to mentoring and training staff is one that challenges the staff to be independent and allows them to gain broad experience in projects and responsibilities. This is important because we can assign any task to our engineers, small or large, and they are able to carry out that task without major supervision. **In this manner, we can handle many smaller assignments successfully while only needing minimal oversight from the project manager, Raul Garcia Jr., PE.**

The key to completing a dedicated and accelerated project on time is establishing a realistic schedule everyone agrees to. Halff will prepare a detailed schedule early in the project, get "buy-in" from all parties, and keep the City informed throughout the project. **Our record of successful project management is one of the key qualifications we offer to the City.** We routinely meet project deadlines and stay within our budgets, largely attributable to the quality of the Project Managers and Designers we have on the project team. We stay in constant contact with the City's Project Manager and document all City staff input, making certain that Halff's designs meet the City's needs and expectations. This level of management and documentation results in complete, thorough, cost-effective designs that minimize unforeseen circumstances during construction.

Experience within the Past Two (2) Years with Other Governmental Agencies

Our ability to maintain the work schedule is part of what will create successful projects/tasks. Halff has a reputation for meeting the schedules that have been established by the project's owners.

Our Purpose

We improve lives and communities by turning ideas into reality.

Our key to successful project execution is developing the project schedule up front and identifying the required staffing levels. An integral part of developing the schedule is continued involvement with both the client and relevant regulatory agencies.

Our technique includes using partnering sessions at the beginning of the project and obtaining commitments from project partners to expedite the decision-making and review process.

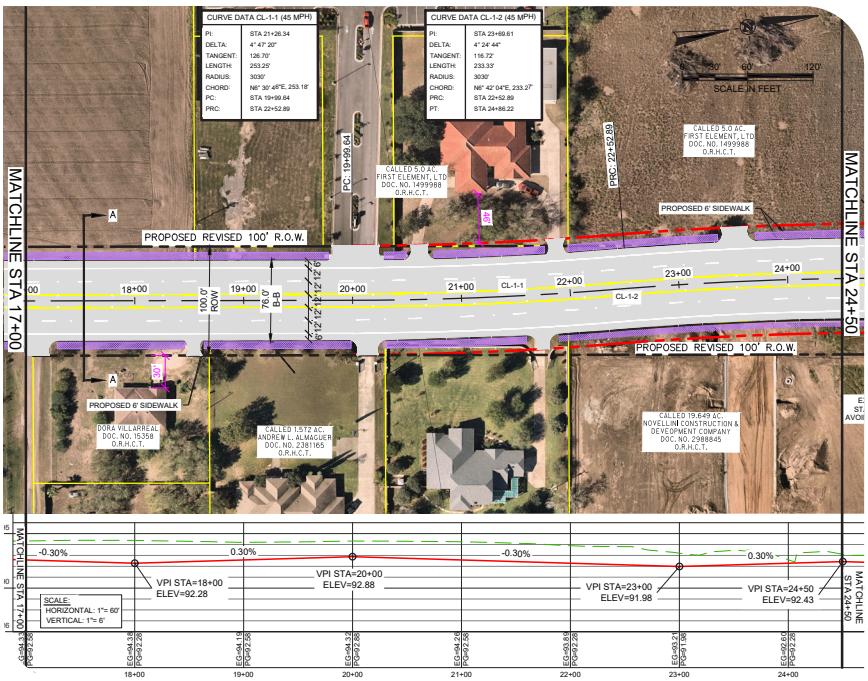
A few projects that demonstrate our ability to deliver projects on time within the past two years include:

- **City of McAllen, Bicentennial Boulevard | McAllen, TX.**
  This project was scheduled to be completed in June of 2021 and was completed in February of 2021. Successful project management allowed this project to be completed **four months sooner** than anticipated.
- **Harris County Drainage District No. 1, 2018 Drainage Bond Project No. 24 | Harris County, TX.**
  This project had multiple phases that were completed on time. The County Commissioner desired that this project went underway as soon as possible. Successful project management and utilizing our in-house staff to fast-track this project resulted in being **bid three months early** and was completed **within the expected time frame**.
- **Rio Grande City, Street Improvements | Rio Grande City, TX.**
  The project, scheduled for completion in September 2023, was successfully finished on time. Successful project management allowed for this project to be completed **within the expected time frame.**

ON TIME
ON BUDGET

Bicentennial Boulevard | McAllen, TX

PAST PROJECT EXPERIENCE WITH THE CITY



Halff has been in Hidalgo County since 1993 and in Texas since 1950. Our experienced team brings many years of combined experience of design in their fields and has overseen the construction of many projects in the Rio Grande Valley. We have a long-standing relationship with the City of Edinburg. As a firm, **Halff has completed over 35 projects with the City**. A few of those related projects are highlighted below:

Sugar Road Schematic Alignment, Surveying, and ROW Acquisition Services

City of Edinburg | Edinburg, TX

The Sugar Road schematic alignment project consisted of the layout for the proposed widening of Sugar Road from Chapin Road to Monte Cristo Road. Halff provided surveying services, including locating all surface improvements within the ROW, establishing horizontal and vertical control for design, and supplemental topography inside the ROW. Texas State Plane Coordinate System was utilized for control to allow for easily transferable data to the City. The schematic went through several iterations with City staff to determine the most cost-efficient location for widening. A final schematic layout was provided to the City of Edinburg for future budgeting purposes. Parcel surveys were also prepared for approximately 65 parcels to allow for the acquisition of additional ROW.

Halff is also providing the acquisition services for this project and working with appraisals to acquire the additional ROW. The future widening of Sugar Road will alleviate additional traffic generated from the University of Texas Rio Grande Valley, as this is a major arterial roadway to the campus.

Completed: Est. November 2024

Scope: Schematic Design, Survey, ROW

Project Team: Raul Garcia, Jr. PE, CFM; Robert Saenz, PE, CFM, PMP, DBIA, LGPP

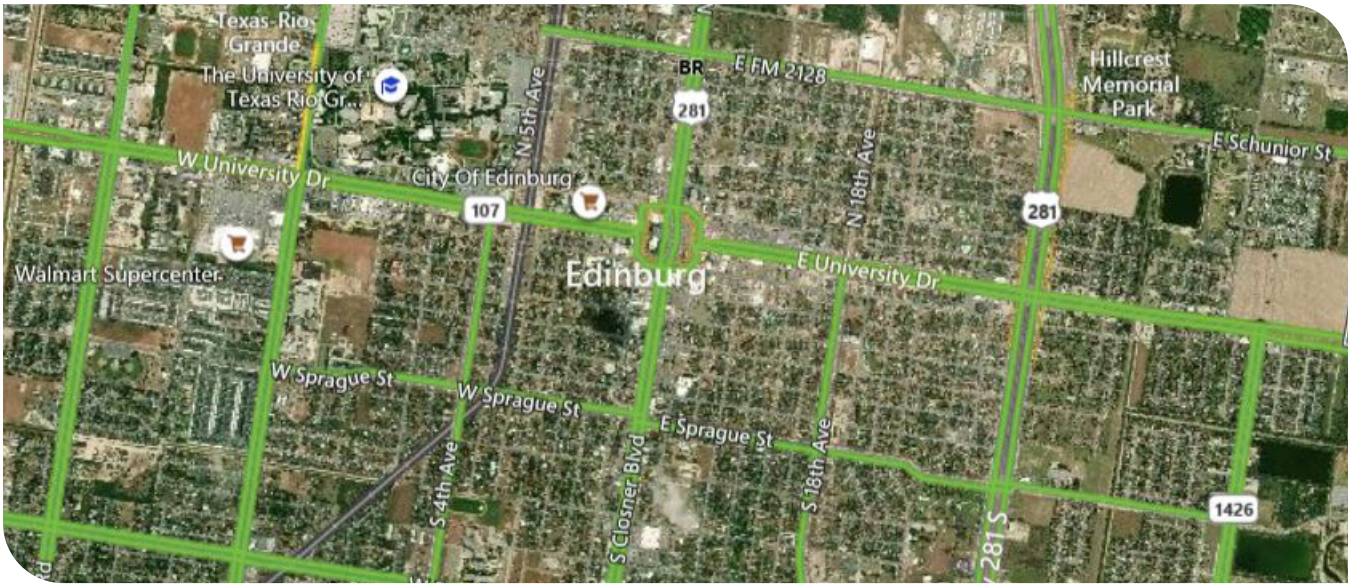
U.S. Highway North 281 Water Distribution System Improvements

City of Edinburg | Edinburg, TX

The project consists of water distribution system improvements along Highway 281, between SH 186 and FM 490. This project was triggered by a TxDOT project along Highway 281 that forces the removal of existing water lines that were conflicting with the proposed highway improvements. The distribution system improvements consists of removing existing PVC (approximately 27,000-lf) and AC lines (approximately 9,500-lf), and replacing them with approximately 45,000-lf of 8-inch, and approximately 17,500-lf of PVC lines with all its pertaining valves, fire hydrants, service connections, etc. The project also consists of the design of a new pump station for the City of Edinburg to service the communities in the same vicinity. The pump station consists of a ground storage tank, and a pre-fabricated building purposed for housing the booster pumps that would feed a proposed elevated storage tank to be designed by others.

Completed: June 2023



Scope: Water Line Improvements/ Replacement, TxDOT Coordination

Project Team: Raul Garcia, Jr. PE, CFM; Robert Saenz, PE, CFM, PMP, DBIA, LGPP; Gabriel Benavides, Jr. PE; Mark Cantu, EIT

Various Right of Way Acquisition Projects

City of Edinburg | Edinburg, TX

Our Halff team including Jody Gafford and Lorena Corpus has provided/ is providing right of way (ROW) acquisition services on an “as needed” basis for the City of Edinburg. The required services include, but are not limited to, appraisal review, negotiation, title coordination, project management, and administrative services. Projects under this on-call contract include:

SUGAR ROAD

Project consisted of the acquisition of approximately 60 parcels for the Sugar Road widening in Edinburg, Texas. Services include Negotiation, Title, Curative, and Closing support. Services for this project are ongoing.

CHAPIN ROAD

Project consisted of acquiring of 1 parcel for bridge improvements in Edinburg, Texas. Services included Negotiation, Title Curative, and Closing Support. Services were completed in 2019.

ALBERTA ROAD

Project consisted of the acquisition of 1 parcel for the expansion of Lift Station 42 in Edinburg, Texas. Services included Negotiation, Title Curative, and Closing Support. Services were completed in 2019.

CANTON ROAD

Project consisted of acquiring of one parcel for drainage improvements in Edinburg, Texas. Services included Negotiation, Title Curative, and Closing Support. Services were completed in August 2020.

Completed: Various Dates

Scope: ROW Services - Negotiation, Title Curative, Closing

Project Team:
Raul Garcia Jr., PE, CFM

SIMILAR PROJECT EXPERIENCE

On-Call Engineering Services

City of Bulverde | Bulverde, TX

As the City Engineering Consultant for Bulverde, Halff uses our full range of technical skills to provide comprehensive engineering services for the City's municipal engineering needs. Most work is done on a time/materials basis with an approved fee schedule. The primary service performed is the development of reviews, including drainage/stormwater management plans, plat reviews, traffic impact analysis (TIA) reviews, and construction plan reviews. Drainage plan reviews include a review of detention calculations, as well as complex hydrologic and hydraulic model reviews. Halff has also provided street maintenance inspections, developed a three-year Street Maintenance Plan, and created a work plan including specifications and bid packages. Halff's engineers also routinely perform infrastructure **construction inspections** for City facilities that private developers are building.

Halff also extended our design services into the design of the Police Headquarters where we provided MEP, civil, and surveying services.

Additionally, the Halff team provides **land development construction observations** for QA/QC on roadway, drainage, and utility construction projects in the City. These include a review of **construction documents** to verify the contractor's compliance with the design, overseeing field material testing, logging and recording all inspection reports, and running pre-construction meetings and final walkthroughs. Additional inspection responsibilities include SWPPP inspections, lime treatment of subgrade, base material placement and compaction, asphalt, rebar, and form inspection, concrete inspections, trench backfill and compaction, traffic control, and tree protection.

Completed: Ongoing

Scope: H&H Analysis, Transportation/Traffic Analysis, Planning and Design, Floodplain Development Permit Review, Reviews (Drainage, Site Plan), Value Engineering, Survey, Bid Assistance Services, Construction Administration and Inspection, Stormwater Management Inspection and Design, Public Outreach

Project Team: Marcos Diaz, PE, LGPP, Josh Logan, PE, CFM; Cameron Vester, PE; Alex Reyna, Jr., PE, LGPP

Anzalduas LPOE North-Bound Lanes Expansion

City of McAllen | McAllen, TX

Halff provided civil, structural, and electrical design as the Engineer of Record for the renovations at the Anzalduas Land Port of Entry (LPOE) in McAllen, Texas. The project was designed for the City of McAllen, General Services Administration (GSA), US Customs and Border Protection (CBP), and the Anzalduas International Bridge Board while complying with P130 US Customs and Border Protection Design Standard for US LPOE.

The project scope included surveying for design, establishing control points, and correcting the drainage at the inbound Primary Inspection Lane 1 and the Inbound Secondary Inspection Area. 12,000-lf of the concrete curb was installed, along with 3,000-lf of speed bumps. Halff also provided services for two additional northbound pre-inspection canopies and additional inspection booths with canopies for the two additional lanes. Primary inspection components included LPR and RPM systems that were designed with required conduits and foundations. Wastewater services were provided to capture condensate lines discharge of existing and proposed AC units located on booths.

Approximately 32,800-sf of paving improvements were provided for the two additional inspection lanes and 1 by-pass lane. Signage and striping were also included to match the existing LPOE design and current standards. Removal of two existing high mast illumination poles was required to accommodate improvements. The two poles were relocated with new foundations and installed west of inspection lanes. The storm water for the proposed improvements and surface flow into a proposed swale that connects to an existing drain ditch and detention facility within the LPOE property and ultimately outfalls to the City of McAllen drainage system.

Bidding and Construction Administration Services included preparation of the bid set, development of Addenda, responding to bid questions, attending the prebid conference, and a bid analysis for TxDOT. The Halff team also attended daily site visits, monthly Owner/Engineer/Contractor progress meetings, performed submittal reviews, responded to Requests for Information (RFIs), reviewed pay applications, and performed closeout procedures.

Bicentennial Boulevard Extension

City of McAllen | McAllen, TX

This project extended Bicentennial Boulevard from Trenton Road 2.86 miles north to SH 107. **Halff developed both the construction documents and technical specifications for the project**. This project aimed to provide traffic mobility and connectivity from McAllen-Miller International Airport to SH 107. This project involved the **construction of a new four-lane undivided urban roadway**, stormwater collection system, potable water, sanitary sewer, non-potable irrigation, and a noise attenuation barrier. The project was led by the City of McAllen and overseen by the Texas Department of Transportation (TxDOT) Pharr District.

Halff reviewed the contractor's bids during the bidding phase and developed the bid summaries for the City. Once under construction, Halff was responsible for running the Owner/Engineer/Contractor monthly meetings, reviewing submittals, addressing RFIs, reviewing the monthly application for payments, processing change orders, reviewing TxDOT material on hand summaries, reviewing TxDOT Buy America forms, and performing monthly site visits. Halff also assisted the City during the closeout by conducting a final punch list of pending items and preparing the final reconciliation change order and record drawings.

Completed: February 2022

Scope: Environmental, Survey, Utility Coordination, Civil Engineering Design, Structural Design, Landscape Architecture, Bidding, Permitting, Construction Administration

Project Team: Raul Garcia, Jr. PE, CFM; Marcos Diaz, PE, LGPP; Robert Saenz, PE, CFM, PMP, DBIA, LGPP; Mark Cantu, EIT; Benjamin Luna, PE, LGPP

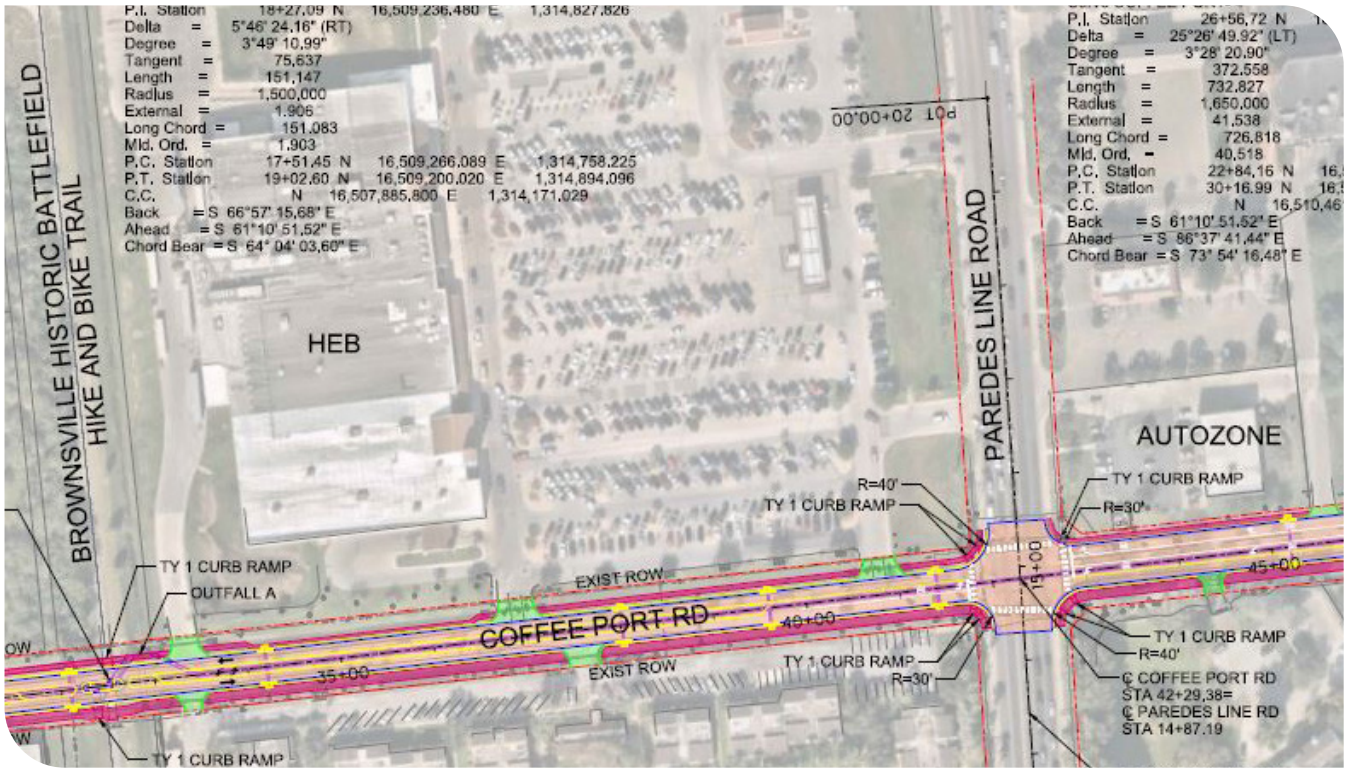
Sprague Road Interceptor Sewer

McAllen Public Utility | McAllen, TX

Halff was involved in the Sprague Road Interceptor, a deep, gravity wastewater line and is the first phase of an overall project to serve the subdivisions and Colonias within the project area. Before starting the design, Halff developed an Engineering Feasibility Report for the Interceptor and a separate PER for the proposed lateral trunk lines. Halff helped prepare and submit an application for MPU to request funds under the TWDB's Economically Distressed Area Program. The design of the collection system began when both reports were approved. Halff ran a model of the sewer interceptor using Bentley SewerCAD to calculate the hydraulic grade line. Coordination with local regulatory agencies was critical to provide a smooth and successful project, including the City of McAllen, McAllen Public Utility, TxDOT, Hidalgo County Drainage District, United Irrigation District, Texas Gas Service, AEP, and other franchise utility companies.

To the extent possible, existing available rights of way will be utilized for the proposed alignment to minimize land acquisition costs. The overall service area is approximately 17,707 acres and encompasses all of the subdivisions within the planning area. Construction of this interceptor line is the first phase of servicing this area with wastewater collection and treatment services. This interceptor main is considered the first phase of the project and will be sized to serve all of the existing and future connections in the service area south of Mile 8 Road. The gravity interceptor varies from 18-inch to 48-inch diameter pipe. Once this interceptor main is constructed, branch mains and collection systems will be designed and constructed to provide the necessary first-time wastewater collection and treatment services to The Colonias and other subdivisions in this area.

Completed: March 2021



Scope: Surveying, Environmental, Civil Engineering

2020 CIP Street Improvements

City of Brownsville | Brownsville, TX

Built in the 1940s as a two-lane rural cross-section, concrete panel roadway, this two-mile section of pavement has taken on numerous asphalt overlays and shoulder widenings and is considered an important East-West neighborhood collector for the residents and businesses of North Brownsville.

The current design parameters include reconstructing the entire roadway bed and developing a roadway section that incorporates curb and gutter with a wider width for three to four travel lanes, including sidewalks and a multi-use path. This approximately $13.5M project includes the necessary enclosed stormwater system. The relocation and up-sizing of water distribution and wastewater collection pipelines will also be included as part of this Joint-Bid Contract. All improvements are proposed to remain within the existing 80 feet of ROW. This project was part of the General Engineering Services On-Call contract.

Completed: Design in Progress

Scope: Surveying, Engineering Design, Bidding, Construction Phase Services

Project Team:
John Clint, PE; Marcos Diaz, PE, LGPP

City of Alton Master Drainage Plan

City of Alton | Alton, TX

The City of Alton took a proactive approach to planning future drainage improvements and requested planning funds from the Texas Water Development Board (TWDB) to prepare a master drainage study to identify areas with high risk of flooding and develop a comprehensive evaluation of the existing drainage conditions throughout the City. The Halff team collected a comprehensive inventory of existing drainage data and developed accurate flood modeling simulations using InfoWorks ICM (Integrated Catchment Modeling), a software tool that helps engineers verify flood prone areas and evaluate improvements to incorporate into the City's drainage Capital Improvement Project (CIP) plan.

Halff analyzed the entire City drainage system within a single model, including hydrology, channel flow, pipe flow, and overland flow. Flood simulations included 2D analysis of how overbank spills could be conveyed over flat terrain and identifying realistic flow paths and ponding locations. Halff developed conceptual alternatives for five different flood-prone areas identified through the existing conditions model and confirmed by the City of Alton staff. These alternatives were evaluated within the model, and cost estimates were derived for prioritization within the City's drainage CIP.

During the development of the project, the City of Alton endured a significant storm event that compared to a 25-year storm, and Halff's models accurately simulated the storm and flooding conditions, giving the City of Alton further confidence in the models and the viability of the proposed drainage CIP projects. The highest priority project was later awarded construction funding by the TWDB in the 2019 CWSRF program.

Completed: November 2018

Scope: H&H Analysis, Drainage Improvements, Floodplain Mapping, InfoWorks ICM, 2D Modeling, GIS Inventory and Database Development, Alternatives Analysis, Cost Estimating, CIP Prioritization, Agency Coordination

Project Team: Raul Garcia, Jr. PE, CFM; Kristina Leal, PE, CFM; Marcos Diaz, PE, LGPP

City of Schertz On-Call Engineering Services

City of Schertz | Schertz, TX

Since October 2019, the Halff has been utilized for a varied rotation of tasks due to the diverse skill sets offered by the team. Smaller, fast-paced work orders include preparation of CLOMRs, an Atlas 14 Update for the City and its ETJ, as well as entrance signage enhancements to the IH-35 NEX project within the Schertz city limits. The contract is also used for construction inspection services under hourly not-to-exceed work authorizations. Two large roadway and utility projects were assigned based on our ability to perform the design on an accelerated schedule.

Lookout Road (Under Construction)
A complete reconstruction of Lookout Parkway from Doerr Lane to Schertz Parkway (0.9 miles) was designed along with the up-sizing of an existing wastewater to 18" wastewater line (3,400 LF) for the North portion of the Tri-County Industrial Zone. This project was performed in two Cities (Schertz and Selma) under an Interlocal Agreement (ILA) which required close coordination of Industrial traffic from both cities and Residential/Retail traffic from Selma. Additionally, the project included the traffic circulation study for this highly traveled Industrial intersection along with the necessary design for newly warranted and installed traffic signal improvements.

Schertz FM 1518 Utility Relocations (Under Construction)
Joint-bid project with TxDOT that widens FM 1518 from FM 78 to IH-10 E, design includes 27,045 feet of waterline (6-inch to 12-inch diameter) and 2,768 feet of wastewater lines (8-inch to 10-inch diameter). The Public Works team has been successful with coordinating necessary improvements for the abutting JBSA Randolph and necessary water and wastewater connections to the federal facility.

Tri-County Parkway (Completed)
Project consisted of reconstruction of Tri-County Parkway from Corridor Parkway to FM 3009 to include full depth reconstruction of 42-foot flexible pavement section and a section of Lookout Rd as well as up-sizing and replacing the existing 8-inch sewer line to an 18-inch sewer line.

Completed: Ongoing

Scope: Roadway Reconstruction, Traffic Signal, Sewer Rehabilitation, Survey, SUE, Construction Administration

Raul currently serves as a Senior Project Manager and Lead Design Engineer for multiple projects in the McAllen office. He has provided land development and site work engineering for several offices, warehouse, commercial, and mixed-use developments. Raul also has experience serving as the lead engineer for multiple clients including architects, public entities, and private developers.

REPRESENTATIVE PROJECT EXPERIENCE

City of Edinburg, Sugar Road Schematic Alignment, Surveying, and ROW Acquisition Services, Edinburg, TX.

Project Manager responsible for the oversight of this project which consisted of the layout for the proposed widening of Sugar Road from Chapin Road to Monte Cristo Road. Halff worked with City staff to create several iterations of schematics to determine the most cost efficient location for widening. Other services provided included ROW acquisition and surveying.

City of Edinburg, U.S. Highway North 281 Water Distribution System Improvements, Edinburg, TX.

Team Leader responsible for the water distribution system improvements along highway 281, between SH 186 and FM 490. This project was triggered by a TxDOT project along Highway 281 that forces the removal of existing water lines conflicting with proposed highway improvements. The distribution system improvements consists of removing existing PVC (approximately 27,000-lf) and AC lines (approximately 9,500-lf), and replacing them with approximately 45,000-lf of 8-inch and approximately 17,500-lf of PVC lines with all its pertaining valves, fire hydrants, service connections, etc. The project also consists of the design of a new pump station for the City to service the communities in the same vicinity. The pump station consists of a ground storage tank, and a pre-fabricated building housing the booster pumps that would feed a proposed elevated storage tank to be designed by others.

McAllen Foreign Trade Zone, Warehouse Development, McAllen, TX.

Project Manager for this project consisting of a 6.70-acre site that will be utilized for a warehouse development. The planning phase for this project consisted of coordination with the owner, the City of McAllen, Hidalgo Drainage District, and Hidalgo County in order to optimize the most efficient warehouse design that will accommodate for the storm runoff provided by the proposed development into the adjacent drainage ditch. Data acquisition and topographic surveying were conducted to identify existing conditions and issues of concern to proceed into design phase. Paving improvements included 13,610 square yards of new concrete pavement and 4,190 square yards of new asphalt pavement.

Mark is a Graduate Civil Engineer with experience in the public and private sectors. He has worked on several projects that have included drainage improvements, flood assessments, and roadway design for a multitude of clients.

- **City of Edinburg, U.S. Highway North 281 Water Distribution System Improvements, Edinburg, TX.** Project Designer responsible for the design of the waterline and water distribution system improvements along Highway 281, between SH 186 and FM 490. This project was triggered by a TxDOT project along Highway 281 that forces the removal of existing water lines conflicting with proposed highway improvements.
- **City of McAllen, Daffodil Avenue Roadway Improvements, McAllen, TX.** Lead Engineer responsible for civil engineering tasks for the expansion of Daffodil Avenue from a two-lane collector to a four-lane minor arterial. This project will include approximately one mile of roadway improvements from Taylor Road to North Ware Road.
- **City of McAllen, Bicentennial Boulevard, McAllen, TX.** Project Engineer for this project which consists of a 2.86-mile extension of Bicentennial Boulevard from Trenton Road to SH 107 and involved the construction of a new four-lane undivided urban roadway. Construction documents and technical specifications were developed for the project.

Cameron Vester, PE

ROLE
Structural Engineering (Improvements and Design)

EXPERIENCE
14 Years

EDUCATION
MS, Civil Engineering, Rice University
BS, Civil Engineering, Rice University

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #128858

Cameron has structural experience designing and managing various projects. These projects include industrial, commercial, municipal, bridge, landscape and civil structures for private, federal and municipal clients. His design experience includes the use of a wide variety of construction materials including reinforced concrete, structural steel, reinforced masonry, light gage metal framing and timber. He also has an extensive knowledge in 3-dimensional technologies and design methods allowing for reduced construction errors and improved field accuracy.

- **City of McAllen, 2018 Bond Drainage Projects, McAllen, TX.** Project Manager and Design Engineer for channel rehab project. The channel rehab includes four crossings consisting of three, three-barrel RCB culverts and one prefabricated pedestrian crossing.Halff is assisting the City of McAllen with revamping four vehicular bridges crossing the Bicentennial Blueline Ditch along Bicentennial Boulevard.
- **North Texas Municipal Water District, Water Systems Center, Wylie, TX.** Engineer responsible for the analysis and design of a new Water Operations Facility located adjacent to the District's existing Wylie Plant. The project includes the design of a 12,319-sf Water Operations Building.

Josh Logan, PE, CFM

ROLE
Hydrology and Hydraulics

EXPERIENCE
23 Years

EDUCATION
ME, Civil and Environmental Engineering, Cornell University

BS, Civil Engineering, Texas A&M University

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #10005
Certified Floodplain Manager: Texas #3758-19N

Josh works on a wide variety of projects including large-scale H&H studies, land development, Master Drainage Plans, utility rehabilitation and relocation, erosion control design, and transportation projects, though his primary focus is in flood mitigation analysis and drainage infrastructure design. He manages the planning, detailed design and PS&E preparation, and construction management phases of several capital improvement projects.

- **City of Alton, Master Drainage Plan, Alton, TX.** Task Leader responsible for overseeing team's H&H analysis to identify flood risk and develop proposed Capital Improvements for the City of Alton, Hidalgo County, Texas using funds from the TWDB's Clean Water State Revolving Funds (CWSRF) program. Team developed a 2D H&H model to simulate the existing and proposed flood risk across the City of Alton ETJ using Infoworks ICM.
- **City of Harlingen, American Rescue Plan of 2021, Harlingen, TX.** H&H QA/QC Manager responsible for the development of a 2-D stormwater runoff model for an approximately 1.4 square mile area to analyze existing and proposed conditions using XPSWM software. The analysis included the development of three possible detention pond options to mitigate flood risk in the surrounding area.

Elmer Hinojosa, PE

ROLE
Hydrology and Hydraulics

EXPERIENCE
5 Years

EDUCATION
BS, Civil Engineering, University of Texas Rio Grande Valley

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #149283

Elmer currently serves as a Water Resources engineering for the McAllen office. He has been involved in different hydrologic and hydraulic studies, master drainage plans, and design level modeling projects. His modeling experience includes hydrologic modeling, 1D/2D open-channel modeling, and 1D/2D urban drainage modeling.

- **City of McAllen, Master Drainage Plan Update, McAllen, TX.** Project Manager for the project that includes, but is not limited to, data collection, hydrologic and hydraulic analysis using HEC-1/HEC HMS software or other methods acceptable to the City, flood hazard assessments, and stakeholder engagement. Additional tasks include survey and field investigation of existing infrastructure and prioritization of identified problems based on the potential for successful flood mitigation.
- **Hidalgo County Drainage District No. 1, Delta Region Flood Mitigation, Hidalgo County, TX.** Engineer responsible for the comprehensive 1D/2D flood modeling evaluation of existing drainage conditions and proposed flood mitigation solutions for the towns of Edcouch, Elsa and La Villa in Hidalgo County. This analysis follows a 50-year flood that occurred in June 2019. Analyzed entire drainage system, including 50 miles of open channels and 70 culvert crossings within a 50 sq mi drainage area.

Chris Caron, PE

ROLE
Transportation Evaluation

EXPERIENCE
35 Years

EDUCATION
BS, Civil Engineering, Texas A&M University
BA, Mathematics, Southwestern University

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #80168

Chris worked for more than 30 years at TxDOT serving in a variety of positions before retiring as the Corpus Christi (CRP) District Engineer. During his time at TxDOT, Chris has worked on an array of different types of projects in both urban and rural areas from maritime to freeway upgrades to environmental remediation to construction of large segmental bridges.

- **City of Corpus Christi, Waldron Road, Corpus Christi, TX.** Provided surveying, engineering, bidding and construction administration services for this concrete panel replacement project for Waldron Road (SPID to Purdue) in the Flour Bluff area of Corpus Christi.
- **City of Corpus Christi, Waldron Road, Corpus Christi, TX.** Provided complete reconstruction of Wildcat Drive, including full depth pavement replacement, selective storm sewer and inlet improvements, pipe-bursting of existing wastewater lines, gas line replacement, and waterline replacement. Coordination with the City of Corpus Christi and Calallen High School was a priority as the roadway is a primary collector for school buses to and from the high school.

Alex Reyna, Jr., PE, LGPP

ROLE
Traffic Engineering Services and Traffic Signal Design

EXPERIENCE
20 Years

EDUCATION
BS, Civil Engineering, University of Texas at San Antonio

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #101243
Local Government Project Procedures (LGPP)

Alex has experience in a wide variety of traffic engineering work, such as traffic impact analyses, signal warrant studies and design, signal timing, microscopic traffic simulation modeling, and signing and pavement marking plans. He has worked for various Central Texas clients, including the Central Texas Regional Mobility Authority (CTMRA) General Engineering Consultant (GEC) Team. He managed multiple consultants for the MoPac Express Lanes construction and Toll Operations Plan. As part of the GEC team, Alex assisted with traffic operations issues, such as creating the Traffic Management Center and connecting every camera along CTRMA's facilities.

- **City of Pflugerville, Traffic Signal Management, Pflugerville, TX.** Task Leader responsible fro projects traffic signal design and intersection studies that required a detailed field inventory, coordination with City, traffic signal plans, signal layout sheets, elevation sheets, quantity estimates and pavement marking plans for the intersection of Weiss Lane and Pleasanton Parkway. Additionally, an intersection traffic study was performed at Heatherwilde Boulevard and Settlers Valley Drive, which included data collection; field observation; intersection analysis; and traffic signal warrants. Synchro traffic analysis software was used to address concerns expressed by City Staff.

© Halff - 2024 | Confidential - Do Not Disclose

Samantha Kaschel, LGPP

ROLE
Environmental Engineering Services

EXPERIENCE
11 Years

EDUCATION
BS, Environmental Studies, Austin College

REGISTRATIONS | CERTIFICATIONS
Local Government Project Procedures (LGPP)

Samantha has spent her entire career at Halff in environmental consulting and manages a team of natural resources, cultural resources, and NEPA professionals. She has worked directly with local governments and Texas Department of Transportation (TxDOT) districts statewide to scope projects, identify critical path items, develop milestone schedules, effectively supervise technical specialists, and implement QA/QC procedures to deliver quality documentation. She has successfully completed NEPA documentation (CEs and EAs) for transportation projects on behalf of FHWA, TxDOT, and other transportation agencies.

- **City of McAllen, Bicentennial Boulevard, McAllen, TX.** Environmental Project Manager responsible for evaluating the extension of Bicentennial Boulevard on new location for a distance of approximately 2.86-miles, from SH 107 to Trenton Road. Guided the City of McAllen through the NEPA process and partnered with TxDOT to so that appropriate NEPA documentation was produced.
- **TxDOT Pharr District, SH 68 Projects, Hidalgo County, TX.** Environmental Scientist for the project that involves the construction of SH 68 on new location for a distance of approximately 22 miles, from I-2/US 83 to I-69/US 281. Involvement includes assessments for and preparation of Final Environmental Impact Statement sections for hazardous materials, community impacts, noise impacts and air impacts.

Roxxie De La Cruz, PE

ROLE
Civil Engineering

EXPERIENCE
9 Years

EDUCATION
BS, Civil Engineering, University of Texas Rio Grande Valley

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #137892

Roxxie has engaged in the development of engineering Stormwater Pollution Prevention Plans (SWPPP), cost estimates, drainage reports, subdivision plats, and the development of construction/design plans and specifications for civil projects involving sanitary sewer and water, drainage, erosion control, paving and dimension, and utility relocations. Roxxie has taken on the role of assisting in construction administration tasks when required by the client, as well as attended construction meetings and site visits.

- **City of McAllen, Bicentennial Boulevard, McAllen, TX.** Engineer responsible for the design of a 2.75-mile extension to Bicentennial Boulevard from Trenton Road to SH 107. Coordination with the client, several City of McAllen's departments, McAllen Public Utility, TxDOT, and Hidalgo County Drainage District was required during the planning and design phase. The planning phase consisted of providing preliminary horizontal & vertical alignment and drainage design of the road for discussion among all entities.
- **Cameron County, Isla Blanca Park Gulf Side Improvements, South Padre Island, TX.** Engineer responsible for assisting with the preliminary design for the proposed site. In 2016, the County started a park master planning process that would refurbish, re-energize, and re-brand the Park on the southern tip of South Padre Island.

Gabriel Benavides, Jr., PE

ROLE
Mechanical, Electrical, Plumbing (MEP) Engineering Services

EXPERIENCE
17 Years

EDUCATION
BS, Electrical Engineering, University of Texas - Rio Grande Valley

REGISTRATIONS | CERTIFICATIONS
Professional Engineer: Texas #119255

Gabriel has been involved in electrical engineering design, construction management, and project management for municipalities, government, and commercial facilities. He has acquired extensive experience in power system design and construction administration for building large water and wastewater facilities. Gabriel has a proven track record of verifying compliance with industry standards and incorporating considerations of reliability, redundancy, energy efficiency, and climate consciousness into his designs.

- **Hidalgo County Commissioner's Court, Hidalgo County Courthouse, Hidalgo County, TX.** QA/QC Manager responsible for MEP design, electrical, and ICT systems. This new high-rise building consisted of a 7-story, 368,000-sf building design to accommodate district and County courtrooms, one court of appeals, district and County clerks, jury services, public defender and indigent defense, Hidalgo County Bar Association, detention spaces and holding area, and a shell space for six additional future courts.
- **Brownsville Public Utilities Board (BPUB), Annex Building, Brownsville, TX.** MEP/ICT Project Manager responsible for the planning, coordination, and design of the project. The new 3-story, 63,000-sf building provided office space to four utility departments: accounting, engineering, information technology (IT), and supervisory control and data acquisition (SCADA).

Michael Hammack

ROLE
Subsurface Utility Engineering (SUE)

EXPERIENCE
24 Years

EDUCATION
High School Diploma, Taylor High School

Mike is the SUE Field Manager overseeing all local SUE efforts. He has experience in designating utilities using all types of geophysical prospecting equipment, locating utilities using non- destructive vacuum excavation, plan review, records requests, estimating, preparing SUE proposals and deliverables, and QA/QC. Mike is cross trained in survey, inspection, and CADD, providing a streamlined approach and cost savings to his clients, and he is willing to get his hands dirty to solve problems.

- **TxDOT Pharr District, FM 510 SUE, Cameron County, TX.** SUE/Utility Coordinator for responsible SUE Levels A through D along FM 510 from FM 1847 to FM 2480 in Cameron County.
- **TxDOT Corpus Christi District, FM 893 SUE, San Patricio County, TX.** SUE/Utility Coordinator responsible SUE Levels A through D along 1.6 miles of FM 893, west of CR 79 to Westwood Drive in San Patricio County.
- **TxDOT Houston District, SH 105 (Conroe to FM 149), Cleveland, TX.** SUE/Utility Coordinator responsible for roadway improvements along SH 105 from 10th Street to 2,000 feet east of Scott Road in Montgomery County. Services included Level C/D SUE services for 275,000-lf of utilities; Level B SUE (3D) services for 700,000-lf of utilities; Level A SUE services for 120 test holes; conflict analysis on existing and proposed facilities; coordination and oversight of subconsultant utility coordination, survey, and SUE; and review of relocation plans for compliance with the UAR.

INSURANCE CLAIMS AGAINST THE FIRM WITHIN THE PAST FIVE (5) YEARS

Response

Halff Associates, Inc. (Halff) employs more than 1,500 people in 33 office locations (Texas, Florida, Oklahoma, Arkansas, and Louisiana) and is engaged in roughly 4,900 active projects at any given time. Accordingly, on rare occasions, Halff finds itself as a named defendant in a lawsuit or as a participant in other dispute resolution proceedings related to professional services and/or business in general insurance. Halff is a privately-held corporation and statements regarding litigation and claims, on the advice of Halff's legal counsel and Halff's insurance carriers, must remain confidential. Further, it is important to note that confidentiality requirements are often specifically addressed in settlement release documents or employee-employer privacy restrictions or pursuant to contract requirements. Due to these circumstances, Halff can only release this confidential information under specific request and with the dual understandings: (a) that any such information is and shall remain privileged and confidential, coupled with the further understanding, (b) that any such disclosure by Halff could only be provided if such confidentiality were strenuously protected by both the City of Edinburg (City) and Halff. Notwithstanding the foregoing, Halff may still be prohibited from disclosing information. Further, as this information would provide Halff's competitors with information that would not normally be shared, and such disclosure would create a competitive advantage for such competitors, Halff and City agree that any and all relevant protections (exclusions) under the Texas Open Records Act and the Freedom of Information Act (FOIA) are applicable. Further, Halff can and does affirm that Halff has never been adverse to the City of Edinburg (City) in any litigation or claims during the last ten (10) years. Halff can and does affirm, however, that there are no significant prior or ongoing matters that would adversely affect Halff's ability to fully perform its obligations on this or any other project. Halff and its legal counsel and insurers will consider requests for specific information regarding litigation, therefore please direct any such questions through our General Counsel, Mrs. Jill Martin, at jmartin@halff.com or 214.346.6365.

Required Forms

CONFLICT OF INTEREST FORM

CONFLICT OF INTEREST
DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____

GENERAL QUESTIONNAIRE

COMPANY PROVIDING PROPOSAL GENERAL QUESTIONNAIRE

1 Name/Name of Agency/Company: Halff Associates, Inc.
(Full, correct legal name)

- Address: 5000 W. Military Highway, Suite 100, McAllen, Texas 78503
- Telephone/Fax: Telephone: 956.664.0286 | Fax: 956.664.0282
- Email address: mdiaz@halff.com

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?

3.

Yes____ No_X_

3. Is your Company authorized and/or licensed to do business in Texas?
Yes_X_ No____

4. Where is the Company's corporate headquarters located? Richardson, Texas

5. a. Does the Company have an office located in Edinburg, Texas?

4.

Yes____ No_X_

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office?

_____ (years) _____ (months)

c. State the number of full-time employees at the Edinburg office. _____

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity?
Yes____ No_X_

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. _____

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Marcos Diaz, PE, LGPP
Address: 5000 W. Military Highway, Suite 100, McAllen, Texas 78503
Telephone: 956.664.0286
Fax: 956.664.0282
Email: mdiaz@halff.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (X).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture.

9. Bankruptcy Information

Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (X)
If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets.

10. Provide any other names under which your business has operated within the last 10 years.
N/A

LITIGATION DISCLOSURE FORM

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES NO

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES NO

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES NO

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Marcos Diaz, PE, LGPP, the undersigned representative of

Halff Associates, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

I, Marcos Diaz, PE, LGPP, the undersigned representative of

Halff Associates, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

Mardoqueo Hinojosa
City Engineer of Edinburg
415 W. University Drive
Edinburg, Texas 78539

Dear Mr. Hinojosa,

We are thrilled about the opportunity to provide Civil Engineering services to the City of Edinburg and showcase our unique qualifications, approach, and dedication to service. Our qualifications include a deep pool of local resources, over 20 years of service history in Texas, and expertise in municipal infrastructure engineering.

We are confident in our ability to provide the City of Edinburg with excellent service and responsiveness. Our longstanding presence in the Rio Grande Valley is crucial for understanding Edinburg's needs. The diverse experiences of our staff, beyond the Rio Grande Valley, can bring innovative perspectives to provide cost-effective solutions to the needs of the city.

HCE is a licensed professional engineering firm in the State of Texas, registered under Firm No. 21173. Our reputation and work ethic are exemplified by the strong personal connections we strive to maintain with City staff and elected officials. We are eager to strengthen the trust of the City of Edinburg; collaborating with your team to plan for Edinburg's future is an excellent way to enhance our longstanding partnership!

Please do not hesitate to reach out if you have any inquiries or need additional information. Our officers have signed below, affirming our commitment to the City of Edinburg and its community.

Sincerely,

Hilario Ortiz, Jr.
President

Firm History

Established in 2007, HCE derived from the humble beginnings of an environmental service firm with the intent of delivering innovative design solutions. In 2019 HCE became an S-Corporation as LEMC, Inc. HCE is proud to play a role in supporting growth and expansion while carefully preserving natural resources for future generations. Through vision, process and collaboration, we bring a creative approach to engineering design for public and private clients throughout the Rio Grande Valley and the North Texas region. HCE is dedicated to their work and performance and ensures they work adequately and efficiently when commencing a project.

Competency

HCE is familiar with the culture, history and topography of the Rio Grande Velley. Having worked in the area for the life of the company, we are familiar with the dynamic nature of the City of Edinburg's needs. Our experience with planning and development, has prepared us for the necessary reporting and documentation associated with these types of projects.

Experience

HCE's experience and familiarity with master planning, land development, and land-use projects allow for us to communicate the vision of the city to the general public and staff. HCE engineers primarily use AUTODESK CIVIL 3D, while our other designers use a multitude of other rendering platforms ranging from Adobe Creative Cloud to Lumion. Our different software platforms allow us to create a variety of two-dimensional and three-dimensional plans, maps, images, and more.

HCE is knowledgeable in the design requirements of the Texas Department of Transportation (TxDOT), Texas Department of Agriculture (TDA), Texas General Land Office (GLO), Army Corp of Engineers, Texas Commission on Environmental Quality (TCEQ), US Environmental Protection Agency (EPA), Texas Water Development Board (TWDB), Texas Railroad Commission (TRC), Federal Highway Administration, Texas Department of Housing and Community Affairs (TDHCA), US Department of Housing and Urban Development (HUD), and other county, state, and federal laws with regard to engineering, planning and design.

Below are samples in which HCE has provided, or is currently providing, design and planning management services.

Tulip (ML06m) Drainage improvements – Mission, Texas

Following a city-wide analysis of existing flooding problems within the City of Mission, HCE was awarded a drainage area within the study to further evaluate and prepare construction plans, to alleviate the drainage issues within existing neighborhoods. HCE analyzed the existing flood model and completed construction plans for the upsizing of existing storm sewer infrastructure. The project was on schedule and under budget. The city was able to overlay the streets within the project area.

Construction Cost: $1.8M – Construction Dates: Completed
Contact: Juan Pablo Terrazas, PE, City of Mission, Assistant City Manager (956) 585-3275

San Benito Drainage Study – San Benito, Texas

HCE was tasked by the City of San Benito to evaluate an existing drainage system, currently believed to be the cause of flooding events in the vicinity of Jay Street and South Sam Houston. HCE employed the use of a tract camera to CCTV the existing line and identify any potential blocks or damage to the existing system. HCE is currently preparing recommendations and cost estimates to address the potential causes of the flooding.

Construction Cost: $TBD – Construction Dates: TBD
Contact: Fred Sandoval, City of San Benito, City Manager (956) 361-3804

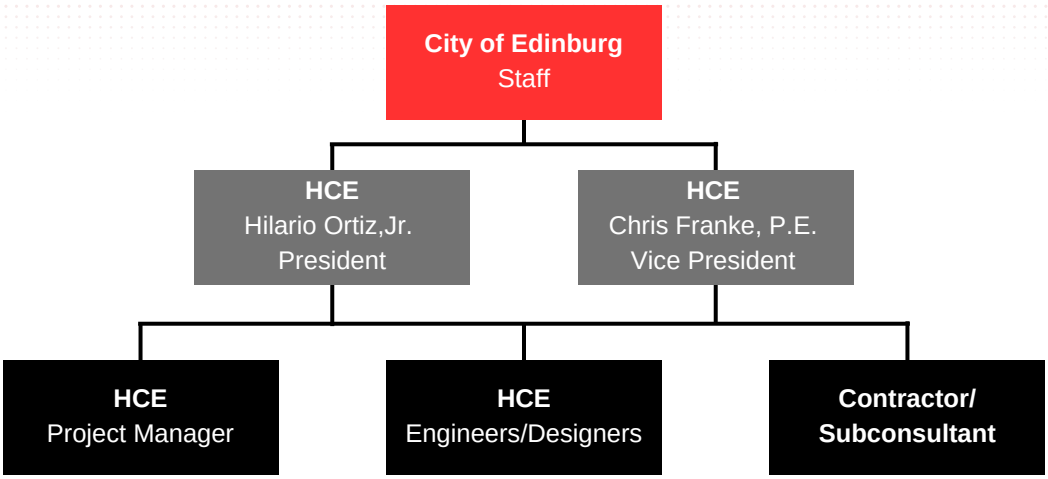
Willacy County Subdivision/Building Permit Review

HCE has provided the Willacy County Development Services department with assistance in reviewing Subdivisions and Building Permits as they relate to civil construction for the past two and a half years. In tandem with the county inspector HCE reviews about thirty permits and ten subdivisions per year. The largely rural county has continued to experience a growth in development in the non-incorporated areas. HCE also provides consulting services to various engineering tasks as requested by the county. In preparation for the impending growth HCE is working with county officials to update and create policies that promote growth while preparing infrastructure for a more populated Willacy County of the future.

Contract: 3 Years with annual renewals.
Contact: Robert Salinas, Code Enforcement (956) 746-5708

The Crossing at Bentsen Palm Multi-Family Subdivision - Palmview

HCE has just completed a 34 Lot four-plex development at the southwest corner of IH-2 and Bentsen Palm Road in the City of Palmview. HCE has an unwritten policy of not doing private developments in communities we serve as city engineers or reviewing engineers; however, we continue to provide our services in adjacent communities to understand the process and challenges met by firms that do work in the communities we do serve. By keeping a pulse on design and construction practices we can better serve our municipal clients.



Construction Cost: 2 million
Construction Dates: January 2024- Current
Contact Leonel Cantu, LAC Enterprises (956) 739-0830

City of San Benito – Lift Station Improvement Projects.

Construction Cost: $350K – Construction Dates: July 2021- March 2022
Contact: Fred Sandoval City of San Benito, City Manager (956) 361-3800

The City of San Benito was met by the challenge of improving various lift stations in order to meet compliance letters issued by the Texas Commission on Environmental Quality (TCEQ). HCE assisted the city to rehabilitate the San Jose Road and Rose Street Lift Stations. Through a collaborative effort with Southern Trenchless Solutions, HCE was able to meet the TCEQ Compliance deadlines and budget constraints by using the Buy Board method of project delivery.

Personnel and Staffing

The city staff will have access to the HCE staff during normal operating hours and will have access to the principal, engineers, and other support staff at any time needed. HCE is a small local firm that strives to provide quality over quantity and as such we will make ourselves available to your projects' needs.

Growth clearly dominates the conversation statewide, and HCE has the working knowledge to provide the expertise that benefits the city and serve its individual needs.

Office Locations

The impacts of a global pandemic have caused HCE to transition all staff to work virtually from their homes. This has proven to be beneficial to our staff and has provided some stability in uncertain economic times. Our basis of operation is the Dallas Fort Worth Metroplex. We maintain a small office in Mission, Texas as our operating base for the Rio Grande Valley.

EXPERIENCE

2010 – Present
HCE – Mansfield, Texas. President and part owner, managing, planning, coordinating, and supervising the work of paraprofessional, sub- consultants, and professional engineering staff engaged in construction administration, engineering studies, surveying, and similar engineering projects.

2008 – 2010
Guzman and Munoz Engineering and Surveying, Inc. Harlingen, Texas Under the direction of the engineer, I plan, coordinate, and supervise the work of paraprofessional and professional engineering staff engaged in construction administration, municipal engineering studies, surveying, roadway or flood control design, and similar engineering projects.

2003 – 2007
AGH Engineering and Surveying - Brownsville, Texas; Operations Manager Under the direction of the engineer. Planned, coordinated, and supervised the work of paraprofessional and professional engineering staff engaged in construction administration, municipal engineering studies, surveying, residential/commercial development and similar engineering projects.

2000 – 2003
Halff Associates Inc. - Mc Allen, Texas; Project Coordinator Prepared and supervised the preparation of survey maps and sketches from field notes, maps, and records; prepared plans, profiles, and cross-sections, using AutoCad and Microstation; prepared change orders and as-built plans; for a variety of land development projects throughout the Rio Grande Valley and northern Mexico.

1998 – 2000
Brockette Davis Drake Consultants - Dallas, Texas; Senior Engineering Technician. Prepared and supervised the preparation of survey maps and sketches from field notes, maps, and records; prepared plans, profiles, and cross-sections, using AutoCad; prepared change orders and as-built plans; for a variety of land development projects in the Dallas Metroplex.

1995 – 1998
Turner Collie and Braden Inc. - Austin, Texas; Engineering Technician.

Chris Franke, P.E.

VICE PRESIDENT

Mr. Franke brings active management, design, estimating and coordination experience to your projects. He has provided project management and design for many civil engineering projects of both public and private infrastructure serving municipalities and private developers throughout Texas. His design experience includes bridge and culvert projects, floodplain and flood way mapping, floodplain reclamation, highways, streets and thoroughfares, water distribution and sewage collection, water treatment plants, and extensive site development and layout design. Mr. Franke is licensed to practice civil engineering in the State of Texas.

EXPERIENCE

Present

HCE – Midlothian, TX. Vice President and part owner, leading and managing the entire project delivery process from conceptual design to final inspection. Responsible for design, production and management of public and private projects across Texas.

2016 – 2018

Bannister Engineering – Mansfield, TX. – Managed numerous commercial land development projects throughout Texas, and teaching younger engineers. Served as city engineer for the City of Hutchins and the City of Keene. Assisted the City of Balch Springs EDC with attracting commercial development through floodplain reclamation and roadway infrastructure improvements.

2008 – 2016

Baird, Hampton & Brown – Grapevine, TX. Performed as designer, drafter, and project manager for commercial site development projects and municipal improvements. Learned hydrology and hydraulic design, and completed FEMA floodplain mapping for the City of Bridgeport, TX. Assisted in numerous projects for the City of Fort Worth including sanitary sewer point repair, regional detention basins, and roadway reconstruction projects. Served as city engineer for the City of Bridgeport and the Town of Edgecliff Village.

2004 – 2008

RBA – Cedar Hill, TX. Began career as an intern learning basic drafting, surveying, construction observation and inspection, and project coordination. Provided support for numerous municipal and private developments within the DFW metroplex.

Project Role:
Project Manager

Education:
Bachelors of Science, 2008
University of Texas-Arlington

Registrations/Certifications:
Professional Engineer, Texas
No. 114273

Professional Affiliations:
American Society of Civil Engineers, Texas Society of Professional Engineers

Years of Experience:
20

Jared Stroebel, P.E.

PROJECT ENGINEER

Mr. Stroebel brings 7 years of experience in drafting, designing, cost projections and project coordination for both private and public infrastructure. He has assisted in the design and project coordination of land development projects for both residential and commercial sites. His design experience includes providing cost estimates, site layouts, water and sewage collection systems, storm drainage systems, and streets and thoroughfares. Mr. Stroebel IS A Texas Licensed Professional Engineer.

EXPERIENCE

Present

HCE – Mansfield, TX. Professional Engineer managing, designing, and drafting for multiple single-family and commercial development projects. Assist with entire project delivery process from initial site layout design to final inspection. Design elements include streets and thoroughfares, water, sanitary sewer, and storm drainage infrastructure, including hydraulic calculations.

2017-2020

Bannister Engineering – Mansfield, TX. Designed and drafted for multiple single-family and commercial projects under the supervision of professional engineers. Assisted with project coordination, site layout design, and cost projections. Design elements included streets and thoroughfares, water, sanitary sewer and storm drainage infrastructure, including hydraulic calculations and pond design associated with the Rational Method.

2015-2017

Assistant Worker for Texas A&M AgriLife Extension – College Station, TX. Tested multiple small-grain crops to improve planting methods to improve yield. Planted, fertilized, and harvested crops. Assisted with repairs of planting equipment as needed.

Project Role:
Project Engineer

Education:
Tarleton State University (2013-2014)
Bachelor of Science, Texas A&M University (2014-2017)

Registrations/Certifications:
Professional Engineer, Texas, No. 141736

Years of Experience:
7

John Kennedy

PROJECT ENGINEER

Mr. Kennedy began his career in 2001 as a rodman on a field survey crew and progressed into the role of field operations manager. Since that time, John has earned a degree in civil engineering and worked for several engineering firms. John has over 20 years of relevant experience including site planning, grading, drainage, roadway, water, sanitary sewer, and erosion.

EXPERIENCE

2022- Present

HCE – Mansfield, Texas

Manage, coordinate, and design commercial and residential developments throughout the State of Texas.

2017-2021

Bannister Engineering, L.L.C. - Mansfield, Texas; Senior Team Leader

Under the direction of the engineer. Planned, coordinated, and supervised the work of junior staff engaged in plan production and project design ensuring project submittal deadlines and client expectations are met.

2015-2017

Salcedo Group, Inc. – Grand Prairie, Texas; Graduate Engineer

Under the direction of the engineer. Planned,coordinated, and designed commercial projects and residential developments for clients, developers, and municipalities.

2001-2011

Hudson Site Control, L.L.C. - Mansfield, Texas; Field Operation Manager

Supervised and coordinated the daily operations of field crews engaged in topographical, site control, construction staking, an as-built surveys.

Project Role:
Project Engineer

Education:
B.S.-Civil Engineering, University of Texas at Arlington (UTA), 2014 - Cum Laude)

Years of Experience:
23

Landrey Edwards, L.I.

PROJECT DESIGNER

Miss Edwards brings 6 years of experience in drafting, designing, landscape and irrigation for both private and public infrastructure. She has assisted in the design and project coordination of land development projects for both residential and commercial sites. Her design experience includes landscape, irrigation, three dimensional renderings and two-dimensional renderings. Miss Edwards is A Texas Licensed Irrigator.

EXPERIENCE

2022-Present

HCE – Mansfield, TX. Professional Engineer managing, designing, and drafting for multiple single-family and commercial development projects. Assist with entire project delivery process from initial site layout design to final inspection. Design elements include streets and thoroughfares, water, sanitary sewer, and storm drainage infrastructure, including hydraulic calculations.

2021-2022

Studio 13 Design Group – Lewisville, TX. Designed and drafted for single-family projects under the supervision of licensed Landscape Architects. Assisted with project coordination, landscape design, and irrigation design.

2020-2021

MMA – Arlington, TX. Designed and drafted for multiple-family and commercial projects under the supervision of licensed Landscape Architects. Assisted with project coordination, landscape design, and irrigation design. Was heavily involved in rendering plans and sites in both two dimension and three dimension.

2018-2020

Bannister Engineering - Mansfield, TX. Designed and drafted for multiple single-family and commercial projects under the supervision of licensed Landscape Architects. Assisted with project coordination, landscape design, and irrigation design.

Project Role:
Project Engineer

Education:
Bachelors of Landscape Architecture from Texas Tech University (2016-2020)

TBPELS FIRM NO. F-1295

July 15, 2024

Mr. Mardoqueo Hinojosa, P.E., City Engineer
City of Edinburg
415 W. University Drive
Edinburg, Texas 78539

Re: RFQ No. 2024-9 Engineering Services Rotation

Dear Mr. Hinojosa,

Javier Hinojosa Engineering (JHE) thank you for the invitation to be considered for providing Engineering Services required by the City of Edinburg. This submittal responds to your request for proposals due July 16, 2024.

We have assembled a project team and approach that will bring the proper focus and sensitivity to the Engineering services you require. Our approach will:

Incorporate an "in-depth" look at the project with respect to the goals of achieving proper approaches in the project area.

Provided a project team whose experience genuinely affords the ability to develop innovative approaches to the project.

Provide the City with the type of coordination and personal services that allows for quick responses to requests and timely solutions to problems that might arise.

Provide the City with personnel who are dedicated to the assigned project. This will ensure a high level of project involvement and personal concern with the timely and successful completion of services.

Principals in our firms will be involved in every phase of the project. Follow-through is a particular element that characterizes Javier Hinojosa Engineering.

Provide the City with a project team that has successfully completed other similar projects and has worked well with your staff in previous matters.

Mr. Javier Hinojosa, P.E., will serve as Project Manager for this assignment. Mr. Hinojosa is extremely familiar with the City's needs for this project. Mr. Hinojosa has over 39 years of experience in Civil Engineering and will be responsible in the day to day activities of the Project to its completion. Mr. Hinojosa is extremely familiar with the City of Edinburg. The following is his contact information:

Javier Hinojosa, P.E., Owner
Javier Hinojosa Engineering
416 E. Dove Avenue
McAllen, Texas 78504
Ofc: 956-668-1588
Cell: 956-624-7006
E-mail: javier@javierhinojosaeng.com

JHE's basis for rating performance on a project begins with client satisfaction. If the client is satisfied at the completion of the job, then JHE has performed well. For the client to be satisfied we expect all aspects of the project to be completed on time, within the budget allocated and with a minimum of effort on the part of the client. We would welcome the opportunity to be considered for these challenging projects and look forward to talking with you in more detail about our proposal.

Sincerely,

JAVIER HINOJOSA ENGINEERNG

Javier Hinojosa, P.E.

FIRM QUALIFICATION AND EXPERIENCE

HISTORY OF FIRM

Name of Firm: Javier Hinojosa Engineering
416 E. Dove Avenue
McAllen, Texas 78504
Phone: (956) 668-1588
E-Mail: javier@javierhinojosaeng.com

Year Firm Established: 1996

Contact Person: Javier Hinojosa, P.E.

Principal: Javier Hinojosa, P.E., Owner

Texas Registration No.: 74808

Type of Organization: Sole Proprietorship

Background: Javier Hinojosa Engineering (JHE) is a Civil Engineering Company that specializes in infrastructure improvements. JHE provides clients design in water distribution systems, sanitary sewer systems, storm drainage systems, street designs, parking lot designs, surveys and land development. A further description of our services is included within this package.

History of Engineering Certification: Mr. Hinojosa received his Engineering Registration from the State of Texas on March 19, 1993. The firm of Javier Hinojosa Engineering (Registration No. F-001295) has been registered with the State of Texas since September 22, 2000.

Ability to commence services immediately after successfully negotiating a contract: Javier Hinojosa Engineering can begin work immediately.

Familiarity with geographical area: Javier Hinojosa Engineering is extremely familiar with the Edinburg area. Mr. Hinojosa has over 39 years of experience in this area.

Javier Hinojosa Engineering is an Equal Opportunity Employer.

MANAGEMENT AND ORGANIZATIONAL APPROACH

JAVIER HINOJOSA ENGINEERING (JHE) recognizes the need for economical, technically innovative and efficient facilities for construction projects. These needs can only be met by a team which provides the necessary Engineering experience, expertise, technology, planning, and understanding of the client's objectives. In addition, the team must have a project approach which effectively applies all available resources to satisfy the project requirements. JHE has the project team and project approach for the successful performance of this work. The JHE project approach outlined here combines experience and technical expertise in order to ensure the constructibility and cost effective construction of the project. The team assembled here possesses all of the necessary qualifications to achieve and integrated approach to your project. Mr. Javier Hinojosa, P.E. will provide the single point of accountability and project management control that will coordinate, direct, and focus the combined efforts of the project team. This organization of the project helps the Owner in several ways: it creates clear line of responsibilities; it establishes the best framework for communication between the team and the client; and it ensures the achievement of a rigorous schedule.

The experience represented and organized here is backed by dozens of successful Civil Engineering projects. In every organizational category, key individuals who have worked on these projects are committed to this project. No one on the Project Team will be "training" on your job; each member of the team has a background and experience in similar recent projects. Mr. Javier Hinojosa, P.E. will provide the single point of accountability and project management for the team but also will provide expertise in project administration and construction phase services for the entire assignment.

PROJECT ORGANIZATION

JHE proposed to use the principal project staff members of the firm. The duties and responsibilities of the key staff members are described in the resumes describing the related experience of each project team member. The principal staff members have been chosen to assure that this project benefits from the best staff capabilities and experience available within the firm. The individuals chosen have the technical capabilities and experience required by this project, the ability to produce responsive engineering designs within the budgetary and time requirements of the client, and the ability to effectively work with the client's staff. The Project Manager, Mr. Javier Hinojosa, is responsible for primary project execution, providing overall coordination with the client, supervising and directing the Project Team, and reviewing and approving work on the project. Mr. Hinojosa has more than 39 years of experience in Civil Engineering. He is experienced in planning, design, and construction phase services for the projects similar in size and scope to the proposed projects. Mr. Hinojosa will provide technical direction and quality assurance on the project and will be responsible for ensuring that the design incorporates all current, appropriate technology, and is technically efficient, complete, and constructible.

During each phase of this work, JHE will meet with the client staff to review the project progress, discuss alternative approaches, receive and incorporate staff comments,

and coordinate the Engineer design to produce the desired results. Presentations of the work will be made at appropriate points in the project schedule.

JHE's philosophy is to provide our clients with designs that are cost-effective in terms of engineering, construction, and operations and maintenance. The firm emphasizes complete analysis of design considerations, application of the most appropriate technology, comprehensive cost effectiveness assessments, and quality assurance. Mr. Hinojosa has accomplished numerous Civil Engineering Projects in Hidalgo County in recent years. In approaching this project, JHE will use a systematic development with each task serving as a building block for later stages of the project. The specific project tasks follow in this proposal for your review. These specific tasks include:

I. PROJECT ORIENTATION AND STARTUP

We propose that an initial project orientation meeting be scheduled so that both the Owner and our firm may have a clear understanding of the design and construction process, parameters to be used and the final product desired.

II. SURVEY

Topographic information will be developed by field survey. Record plans will be reviewed and confirmed. Soil boring information will be obtained during this task for use in design if necessary. Underground utilities will be located through contracts with the appropriate representatives.

III. PRELIMINARY DESIGN

Preliminary plans will be developed using the information secured from ongoing field surveys and review of record plans. A preliminary design will be accomplished. Preliminary cost estimates will be developed. During and at the completion of this task, we intent to meet with the Owner to obtain input and to provide guidance in developing recommended solutions.

IV. PRELIMINARY PLANS AND ESTIMATES

The preliminary set of plans which will result from Task IV along with cost estimates will be reviewed with the Owner for input and guidance.

VI. FINAL PLANS & SPECIFICATIONS

Final plans, specifications and estimates will be prepared. The output of this task will be the documents necessary for bidding and constructing this project. These documents will be developed to meet the Owner's requirements for the project.

VII. CONSTRUCTION

During this task we will observe ongoing work, coordinate construction with Owner and Contractor personnel and certify periodic payment requests from the Contractor. Upon completion, a final inspection will be scheduled with the Contractor and Owner. The outcome of this final inspection will be a Certificate of Completion or a punch list of items for the Contractor the complete. Upon final completion of the punch list, a Certificate of Completion will be issued.

JAVIER HINOJOSA ENGINEERING

PROJECT EXPERIENCE

1. **Project Name:** Hidalgo County Bond Referendum Project No. 2
   3 ¾ Mile Road and Schuerbach Road
   Project Location: Hidalgo County Precinct No. 3
   Owner: Hidalgo County
   Contact: Mr. Raul Sesin, P.E., General Manager
   Address: Hidalgo County Drainage District No. 1
   Telephone: 956-292-7080
   Construction Cost: $1,236,975.00
   Type of Construction: Construction of new drainage ditch facility
   Completion Date: 2022
   Professional Services Provided: Provided construction design plans and specifications for construction of a new drainage ditch facility. Also provided inspection and construction management services.
   Name of Project Manager: Javier Hinojosa, P.E.

2. **Project Name:** City of Hidalgo Old Townsite Drainage Improvements
   Project Location: Hidalgo, Texas
   Owner: City of Hidalgo
   Contact: Mr. Julian Gonzalez
   Address: 704 E. Ramon Ayala Dr.
   Hidalgo, Texas 78557
   Telephone: 956-843-2286
   Construction Cost: $961,000.00
   Type of Construction: Construction of drainage improvements within the Old Townsite of the City of Hidalgo.
   Completion Date: January 2021
   Professional Services Provided: Provided construction design plans and specifications for construction of drainage improvements. Also provided inspection and construction management services.
   Name of Project Manager: Javier Hinojosa, P.E.

3. **Project Name:** Mile 5 ½ West Paving Improvements
   (Mile 10 North to Mile 11 ½ North)
   Project Location: Hidalgo County Precinct No. 1
   Owner: Hidalgo County
   Contact: Commissioner David Fuentes
   Address: 1902 Joe Stephens Avenue, Ste. 101
   Weslaco, TX 78596
   Telephone: 956-968-8733

Construction Cost: $700,000.00
Type of Construction: Reconstruction of an existing County roadway with new paving and drainage improvements.
Completion Date: February 28, 2022.
Professional Services Provided: Provided construction design plans and specifications for reconstruction of a county roadway. Also provided inspection and construction management services.
Name of Project Manager: Javier Hinojosa, P.E.

4. **Project Name:** McAllen ISD Paving Improvements
Project Location: McAllen, Texas
Owner: McAllen ISD
Contact: Mr. Ruben Treviño, Exec. Director of Facilities/Maintenance/Operations
Address: 4309 Warrior Drive, Suite B
McAllen, TX 78501
Telephone: 956-632-3200
Construction Cost: $826,335.00
Type of Construction: Paving Improvements at James "Nikki" Rowe High School, Travis Middle School, Alvarez Elementary School, McAllen Memorial High School, Lamar Academy and Rayburn Elementary School.
Completion Date: August 25, 2022
Professional Services Provided: Design of paving improvements for James "Nikki" Rowe High School, Travis Middle School, Alvarez Elementary School, McAllen Memorial High School, Lamar Academy and Rayburn Elementary School.
Name of Project Manager: Javier Hinojosa, P.E.

5. **Project Name:** City of Alton 2023 Street Improvements
Taurus Estates Subdivision
Project Location: Alton, Texas
Owner: City of Alton
Contact: Mr. Jeff Underwood, City Manager
Address: City of Alton
509 S. Alton Blvd.
Alton, Texas 78573
Telephone: (956) 432-0760
Construction Cost: $185,000.00
Completion Date: March 21, 2024
Professional Services Provided: Design of paving improvements for the Taurus Estates Subdivision.
Name of Project Manager: Javier Hinojosa, P.E.

TEAM MEMBER QUALIFICATIONS
AND
EXPERICENCE

KEY MEMBERS
PROJECT ASSIGNMENTS, LINES OF AUTHORITY
AND COMMUNICATION FOR PRINCIPALS

1. Javier Hinojosa, P.E., Owner: Mr. Hinojosa will be the Project Engineer for each assigned project. Mr. Hinojosa will be the primary point of contact for the City. Mr. Hinojosa will be involved with each assigned project from start of design services to completion of construction.

2. Gilbert Teegardin, Project Manager: Mr. Teegardin will be the Project Manager for each assigned project. Mr. Teegardin will coordinate day to day activities for Engineering services related to each assigned project. Mr. Teegardin will work closely with City staff to coordinate all activities within the City.

3. Daniel Lopez, Survey Technician/ Construction Inspector: Mr. Lopez will be providing services related to acquisition of field data for the preparation of the final Engineering construction documents. Mr. Lopez will also assist during the construction phase with periodic inspection of each assigned project .

4. Carlos Vasquez, RPLS (CVQ Land Surveyors, LLC): Mr. Vasquez will be responsible for boundary surveys and metes and bounds descriptions as needed or required by the City.

Javier Hinojosa, P.E.
Principal

Education	Mission High School, 1980 Bachelor of Science in Civil Engineering, 1985 Texas A & M University
Registration	Registered Professional Engineer No. 74808 State of Texas
Experience	Javier Hinojosa Engineering January 1996 - Present L.L. Rodriguez and Associates, Inc. 1985 - 1995 Director of Engineering
Affiliations	Texas Society of Professional Engineers

Noteworthy projects reflecting experience include the following:

City of Mission Drainage Improvements
Client: City of Mission
Project Engineer for the preparation of construction plans and specifications for drainage improvements within the City of Mission including Stewart Road, 1st Street, Dunlap Avenue and Citriana Avenue.

City of Mission Bryan Road (FM 396) Water and Sewer Relocations
Client: City of Mission
Project Engineer for the preparation of construction plans and specifications for water and sanitary sewer improvements along South Bryan Road in conjunction with the widening of this road by TxDOT.

City of Mission Year 2016 Street Improvements
Client: City of Mission
Project Engineer for the preparation of construction plans and specifications for street improvements within the City of Mission.

Mission Event Center
Client: City of Mission
Project Engineer for design and construction phase services for a 30 acre multi-use subdivision located in the City of Mission including design services for water, sanitary sewer, storm drainage and paving improvements.

City of Mission Keralum Avenue Drainage Improvements
Client: City of Mission
Project Engineer for design and construction phase services for storm drainage improvements along Keralum Avenue from 1st Street to 15th Street within the City of Mission, Texas. Project involved construction of drainage improvements with the established townsite of Mission and involved special design considerations involving existing utilities.

Bentsen Palm Drive Drainage Outfall
Client: Hidalgo County Precinct No. 3
Project Engineer for the preparation of construction plans and specifications for the

drainage improvements of Bentsen Palm Drive from the County's Main Drain north to Mile 3.

Colonia Access Program Paving and Drainage Improvements
Client: Hidalgo County Precinct No. 3
Project Engineer for the preparation of construction plans and specifications for the paving and drainage improvements of numerous subdivisions (colonias) within the Hidalgo County Precinct No. 3 areas.

City of Mission Commerce Street Drainage Improvements
Client: City of Mission
Project Engineer for design and construction phase services for storm drainage improvements for Commerce Street within the City of Mission, Texas. Project involved replacement of existing drainage improvements to correct ongoing drainage issues in the area.

City of Mission Perkins Avenue Drainage Improvements
Client: City of Mission
Project Engineer for design and construction phase services for storm drainage improvements for Perkins Avenue from 11th Street to 15th Street, 12th Street from Perkins Avenue to Conway Avenue and 15th Street from Perkins Avenue to Perkins Avenue within the City of Mission, Texas. Project involved construction of drainage improvements within the established townsite of Mission and involved special design considerations involving existing utilities.

City of Mission Glasscock Road Drainage Improvements
Client: City of Mission
Project Engineer for design and construction phase services for storm drainage improvements for Glasscock Road from the Hidalgo County Irrigation District No. 1 Main Canal to the Mission Lateral Drain Ditch. Project involved construction of a drain line crossing under the main canal and discharging into the Mission Lateral to provide an alternate outfall for the area.

City of Mission Melba Carter Drainage Ditch Improvements
Client: City of Mission
Project Engineer for design and construction phase services for storm drainage improvements for the Melba Carter Drain Ditch including widening of the ditch section, improvements to the road crossings and elimination of the levee to allow for a free flowing ditch into the Mission Inlet.

Peñitas Drain
Client: Hidalgo County Precinct No. 3
Project Engineer for design and construction phase services for storm drainage improvements located within the City of Peñitas and Hidalgo County Precinct No. 3. This project was funded through the General Land Office as part of the Hurricane Dolly Disaster Relief Fund. Project involved drainage improvements to existing subdivisions, construction of a drain ditch and 8' X 6' concrete boxes. Special design features were necessary for the boxes as they crossed under an existing Irrigation District canal and across U.S. Highway 83.

Renaissance Center Subdivision
Client: City of McAllen/Doctors Hospital at Renaissance
Project Engineer for design and construction phase services for a 50 acre multi-use subdivision located in the City of McAllen including design services for water, sanitary sewer, storm drainage and paving improvements

Pharr Produce District Subdivision Phase
Client: City of Pharr
Project Engineer for design and construction phase services for 100 acre Industrial Park located in the City of Pharr including design services for water, sanitary sewer, lift station, storm drainage and concrete paving improvements

Residential Land Development
Client: Various
Project Engineer for design and construction of numerous residential developments in the Mission, McAllen, Edinburg and Pharr areas including the following:

- Trinity Oaks Subdivision – McAllen, Texas
- Cielo Vista Subdivision – McAllen, Texas
- The Estates at Sharyland - Palmhurst, Texas
- Summer Breeze Subdivision – Mission, Texas
- The Oaks at Cimarron – Mission, Texas
- The Legends at Cimarron – Mission, Texas
- Westover Park Subdivision – Mission, Texas
- Shary Crossing Subdivision – Mission, Texas
- Redstone Estates Subdivision – Mission, Texas
- Lakeview at Palmshores Subdivision, - La Joya, Texas
- Heritage Park Subdivision - Mission, Texas
- Tower Landing Subdivision - Alamo, Texas
- Tiffaney Estates Subdivision - McAllen, Texas
- Hunter's Cove Subdivision - McAllen, Texas
- Malmaison Luxe at Trinity Oaks Subdivision - Mission, Texas
- Autumn Ridge Estates - Edinburg, Texas
- Schunior Village Subdivision – Edinburg, Texas
- Villa Cantera Subdivision – McAllen, Texas
- Bentley Estates Subdivision – Edinburg, Texas
- Meadow Ridge Subdivision – Edinburg,Texas

RE: Professional Engineering Services Rotation RFQ // #2024-9

Dear Members of the Selection Committee:

With more than 100,000 residents, the City of Edinburg (City) is a diverse and fast-growing community in the Lower Rio Grande Valley (LRGV). Through RFQ #2024-9, we understand the City is seeking professional engineering services firms to assist with capital improvement projects targeted to help maintain and improve the City's infrastructure, assets, and amenities. With more than 41 years of experience in Texas helping city and county agencies proactively improve and install new infrastructure to accommodate growth, KCI Technologies, Inc. (KCI) is well positioned to help the City develop comprehensive, efficient, and environmentally conscious solutions.

We understand "good things are happening in Edinburg" and want to help shape the future of this growing community while also maintaining its hometown character. KCI is committed to partnering with the City to achieve these goals on time and within budget as we have countless other times for the City and other municipalities.

/ 210.414.2911 (cell)
dawn.green@kci.com

After working on previous City projects, KCI's key personnel have cultivated relationships with City staff and are familiar with the City's engineering standards manual, standard operating procedures, and preferences. ***What does this mean for you?*** We know who to contact and what it takes to get projects across the finish line. We take pride in meeting client milestone schedules and delivering documents that require minimal comments. Additionally, we understand how to coordinate with multiple agencies and stakeholders and the potential risks associated with delivering a project.

KCI wishes to be considered for the following categories:

- Street Infrastructure Evaluation and Improvements
- Pavement Management and Improvements
- Utility Infrastructure Evaluation and Improvements
- Erosion and Sediment Control Design
- Water and Wastewater Evaluation and Improvements
- Hydrology & Hydraulics
- Transportation Evaluation
- Traffic Engineering Services
- Traffic Signal Design
- Environmental Engineering Services
- Civil Engineering
- Mechanical, Electrical & Plumbing (MEP) Engineering Services

KCI acknowledges there have been no addendum issued for this RFQ and the firm does not have any exceptions to the specifications/requirements. We look forward to your favorable review of the attached. Please contact me or project manager, Oscar Garza, PE, SIT if you have any questions or need additional information.

Sincerely,

Dawn Green

FIRM QUALIFICATIONS AND EXPERIENCE

EXECUTIVE SUMMARY

With a unique mix of urban, suburban, and rural environments, residents of Edinburg desire to have a vibrant and safe community with increased mobility options, improvements to neighborhood and city streets, and effective drainage solutions. The attached statement of qualifications provides a summary of KCI's experience delivering similar projects **on time and budget** for governmental agencies, an overview of the key staff assigned to the work, and references who will attest to our ability to provide the required professional engineering services for this contract. Within Section 4, we have confirmed our ability to meet the minimum insurance requirements. Section 5 indicates our commitment to enter into the agreement and the required forms are included within Section 6.

VENDOR HISTORY

For more than 41 years, KCI has served municipalities across Texas to help them improve the safety, maintenance, and efficiency of their roadways, drainage facilities, and utilities, and develop new and maintain existing buildings and HVAC equipment. KCI staff have completed more than 100 projects in Hidalgo County including several private and public-sector CIP projects in Edinburg, some of which are detailed within this statement of qualifications. We will build on the lessons learned from this experience to successfully deliver projects under this contract for the City of Edinburg.

Firm Background Information

With revenues of $467 million in 2023, the *Engineering News-Record* has consistently placed KCI among the top 100 consulting engineering firms in the country. KCI is a 100-percent employee-owned engineering, consulting, and construction firm serving clients throughout the United States. We have 10 offices in Texas including Mission, Harlingen, Laredo, Houston (two office locations), San Antonio, Austin, College Station, and Dallas (two office locations).

Firm Qualification and Experience

KCI is a highly qualified firm registered and licensed to practice engineering and perform survey services in Texas (TBPELS F-10573 and 10194365). KCI has experience in the following areas:

- Street Infrastructure Evaluation and Improvements
- Pavement Management and Improvements
- Utility Infrastructure Evaluation and Improvements

WHY KCI?

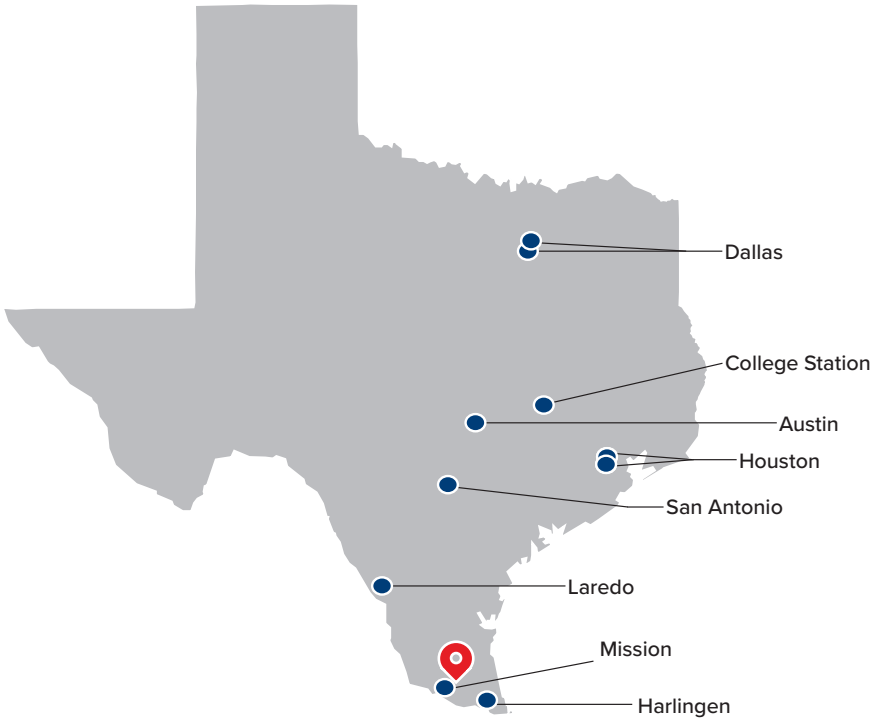
CONTINUITY AND FAMILIARITY

Through previous experience, KCI has developed a thorough understanding of the City's standards, procedures, and preferences. This means KCI has the right staff in place to successfully deliver projects efficiently, providing cost and time savings to the City!

COMPLEMENTARY SERVICES

KCI is a large, agile firm offering a vast array of services including niche solutions. From its office in Mission, KCI is able to provide services for many of the specialty categories identified within the RFQ. We have a deep bench of resources available to begin work upon notice to proceed and transition between projects and task orders.

TXDOT AND JOINT-BID EXPERIENCE



Over the last 41 years, KCI has completed work in all 25 TxDOT districts and KCI staff have completed 200+ projects for/with the Pharr District. We can help the City avoid pitfalls and potential risks associated with joint-bid and advanced funding agreement projects. We can support the City as it navigates the administrative tasks, project reviews, establishing financial processes, and maintaining day-to-day project operations.

COMMITMENT TO COMMUNITY

KCI takes pride in actively improving the communities where we work, live, and play. For LRGV-area communities, KCI has hosted student groups for job shadowing events, participated in mentorship programs, sponsored youth sports teams, offered internships for high school students, donated holiday gifts, participates in back to school drives, and the Adopt a Beach program.

- Erosion and Sediment Control Design
- Water and Wastewater Evaluation and Improvements
- Hydrology & Hydraulics
- Transportation Evaluation
- Traffic Engineering Services
- Traffic Signal Design
- Environmental Engineering Services
- Civil Engineering
- MEP Engineering Services

With decades of experience supporting the categories listed above, KCI has successfully assisted city, county, and state agencies with developing infrastructure plans and providing engineering documents to support assets and amenities. We have served as the lead engineer for numerous on-call services contracts as well as project specific assignments for 13 counties including Hidalgo County, state and federal agencies, and local municipalities.

Uniqueness to Perform these Services

Our service history includes route and design studies; roadway reconstruction, widening, and new roadways; and drainage, intersection layouts, MEP, and utilities coordination and design. As a life-long resident, entrepreneur, and family man of Hidalgo County, **OSCAR GARZA, PE, SIT,** has an intimate knowledge and vested interest in the existing infrastructure condition and the needs to support the exponential growth the LRGV is experiencing. His technical background, local experience, and knowledge of agency funding mechanisms make him a vital asset to the City and it's infrastructure program.

Having grown up in the city of Donna, Project Principal **DAWN GREEN, PE** also brings knowledge and familiarity with the City. Ms. Green often travels to visit family in the area and has a vested interest in the planned infrastructure improvements for the community.

In addition, our staff has a clear understanding of the appropriate federal, state and local government regulations, codes, guidelines, and professional standards. We have prior experience working with the International Boundary and Water Commission, various Hidalgo County Irrigation Districts, TxDOT Pharr District, Hidalgo County Drainage District No. 1 (HCDD1), Hidalgo County Regional Mobility Authority, Cameron County, and local school districts and municipalities. We are committed to maintaining communication with each stakeholder to provide a successful project outcome.

Our firm has a staff of 200 employees located in Texas including professional engineers, technicians, land surveyors, construction managers, construction inspectors, utility coordinators and designers, mechanical, electrical, and civil engineers, plumbing designers, GIS specialists, and support staff. Through this wealth of resources, KCI has the opportunity to provide professional engineering services for the City

SIMILAR EXPERIENCE (PARTIAL LIST)

- Alberta Road PS&E for Roadway Improvements Segments 1 and 2, Edinburg, TX
- Brennaaleen Drainage, Edinburg, TX
- US 281 Rural Expressway Facility, Edinburg, TX
- Highway Safety Improvement Program - Traffic and Safety Studies (Hidalgo County Precinct 3), Hidalgo County, TX
- Mile 1 East, Mercedes, TX
- Faysville Drain, Hidalgo County, TX
- SH 48 Rehabilitation, Brownsville, TX
- SH 107, Hidalgo County, TX
- FM 681 Reconstruction and Widening, Pharr District, TX

and will use this experience and knowledge gained to successfully execute any project awarded. You will discover throughout this response our ability to become a reliable partner to the City through our experience, qualifications, past performance, capacity, and resources.

Office location that will be providing the services

Our Mission Office, located at 2610 North Shary Road, will be responsible for the services provided under this contract with support from staff in Harlingen, Laredo, San Antonio, Houston, and Dallas. We are confident that our intimate knowledge of the region and community will be an asset to the City. Exhibit 1 on the following page shows the various services we provide.

Approach to handling part-time staffing needs for smaller assignments

KCI has the resources to adequately staff both large and smaller assignments. Staffing needs are addressed during our weekly scheduling meetings. Mr. Garza will meet with his team every Monday to discuss project schedules and staffing needs. During this meeting a two-week staffing plan is discussed and coordinated based on fluctuating project needs. Mr. Garza and his staff use P6 and Microsoft Project to track and monitor project schedules, budgets, and staffing. All project managers and project engineers are required to keep up-to-date individual project schedules for each of their assigned projects. During the staffing meeting projects are discussed and schedules are updated individually. During the meetings, projects are prioritized and those projects requiring the most attention or with a rapidly approaching deadline will be staffed first. Essentially, these are working meetings where discussions are constantly flowing and evolving until a solid work plan is set in place and a framework developed for the two-week workload projection schedule.

KCI CLIENTS WITHIN THE LOWER RIO GRANDE VALLEY

City of Edinburg
HCDD1
Hidalgo County
TxDOT Pharr District
City of Pharr
City of Brownsville
City of Mercedes
HCA Gulf Coast Division
City of McAllen

During these meetings particular attention is also paid to individual staff utilization. With input from Mr. Garza, annual targets are established for each staff member's utilization percentage (project chargeable time vs. non-chargeable time). These target percentages are compared with actual efforts on a weekly basis and also discussed during the scheduling meetings. This is important because it ensures that staff members aren't being under- or over-utilized and also provides a solid foundation for determining future staffing needs within the group. Having the ability to review and compare targets that have been established using historical group data along with the actual workload and staffing usage provides the opportunity to react to staffing needs in a quicker and more proactive way.

Should one or more key personnel not be available to complete the assigned project, we will re-allocate project responsibilities immediately to the design team or pull from additional personnel within KCI. Many of our project engineers and technicians have overlapping skill sets that can be allocated based on project requirements. Each dedicated employee can work overtime as necessary to maintain the project's schedule.

We are confident we have the staff available to respond to any size project assignment avoiding potential conflicts with current workloads. In the unlikely event we do not have the staff required, we will also hire additional part-time and/or full-time employees as needed to satisfy the project's goals.

EXHIBIT 1: SERVICE CAPABILITIES (PARTIAL LIST)

STREET INFRASTRUCTURE EVALUATION AND IMPROVEMENTS AND TRANSPORTATION EVALUATION

- Access studies
- Alternative analysis
- Bicycle facility design
- Constructability reviews
- Evaluation of alternatives
- Feasibility studies
- Roadway capacity analysis
- Roadway improvement studies and design
- Interstate guide sign design
- Plans, Specifications, and Estimates
- Parking studies and facility design
- Public involvement
- Railroad-highway grade crossing
- Roadway alignment studies and design
- Roadway lighting design
- Schematic design

PAVEMENT MANAGEMENT AND IMPROVEMENTS

- Pavement inventory and condition assessment
- Visual and automated inspections
- Maintenance and rehabilitation optimization
- Pavement management system implementation
- Capital improvement planning
- Pavement image viewer dashboard
- Right-of-way assets inventory and condition assessment
- Pavement condition data integration
- GIS-based dashboards/web platforms
- Data collection and processing

UTILITY INFRASTRUCTURE EVALUATION AND IMPROVEMENTS

- Utility design
- Feasibility and strategic studies
- Plans, specifications and estimates
- Subsurface Utility Engineering (SUE)
- Permitting
- Right-of-way determination and negotiations
- Utility Coordination
- Manhole inspections
- Structural assessments
- As-built documentation

ENVIRONMENTAL ENGINEERING AND EROSION AND SEDIMENT CONTROL DESIGN

- Environmental impact statements
- Environmental documents
- Wetland delineation
- Traffic noise analysis
- Air quality analysis
- GIS mapping
- Watershed and ecological assessments
- Water quality and aquatic resource analyses
- TMDL analysis and management
- Erosion and sediment control
- NPDES permitting and regulatory compliance
- Closed storm drain design and inspection
- Stormwater management/erosion and sediment control review services
- Environmental and post-construction monitoring

WATER AND WASTEWATER EVALUATION AND IMPROVEMENTS

- Feasibility studies
- Asset management
- Rehabilitation of water and sewer conveyance system
- Design of water and wastewater pumping facilities
- Design of water storage facilities
- Diver inspection of underwater structures
- Evaluation and design of reclaimed water system
- Federal and state permitting

HYDROLOGY & HYDRAULICS

- FEMA/floodplain studies
- Watershed assessments
- Wetlands analysis, creation, restoration and enhancement design
- TMDL analysis and management
- H&H analysis
- Stormwater management, best management practices (BMPs)
- Bridge scour analysis

TRAFFIC ENGINEERING SERVICES

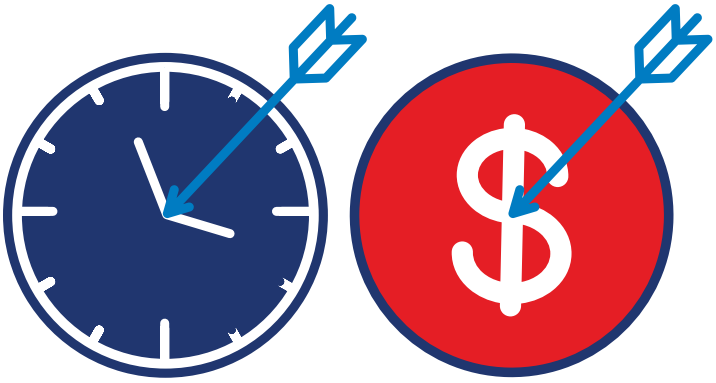
- Traffic impact studies
- Corridor studies
- Capacity analyses
- Route and interstate signing
- Roadway and pedestrian lighting
- Intelligent transportation systems (ITS)
- Transportation system management
- Traffic command and control systems
- Pavement markings

TRAFFIC SIGNAL DESIGN

- Operational control of traffic
- Signal system surveys
- Signal timing optimization
- Traffic command and control systems
- Traffic surveillance and control systems

CIVIL ENGINEERING

- Feasibility studies and site assessments
- Master planning and concept plans
- Playground and recreation design
- Grading plans
- Permit processing
- Special exceptions and variance requests
- Due diligence and ADA upgrades
- Athletic field design
- Irrigation design
- Value engineering
- Specification development
- As-built plans
- Sustainability design (LEED, Envision)



MECHANICAL ENGINEERING

- Heating, ventilating, and air conditioning
- Plumbing and process piping
- Commissioning and retro-commissioning
- Refrigeration
- Energy management and conservation
- Utility analysis and design
- Building management and system controls
- Material handling and process control
- Smoke control systems
- Facility assessments
- Code compliance
- Green build design

ELECTRICAL ENGINEERING SERVICES

- Normal/emergency/standby/critical power distribution systems
- Automation, control and instrumentation
- Sidewalk and pedestrian safety lighting
- Highway, street and tunnel lighting
- Interior and exterior building lighting
- Specialty lighting
- Low/medium voltage substations
- Security, access control and intrusion detection
- Renewable energy systems
- Data, audio/visual and wireless networking systems
- Communications and telecommunication systems
- Grounding systems
- Lightning protection systems
- Power studies: short circuit, protective device coordination, Arc Flash, load flow, and harmonic studies

ON TIME AND ON BUDGET DELIVERY

Our hands-on approach equips KCI with the appropriate resources to meet project schedules. We understand that delivering on-time projects to the City is of the utmost importance and the key to achieving this success is preparation and adherence to all established milestones. We understand that schedules are "lost" a day at a time; our monitoring program will prevent that from occurring. KCI will prepare a detailed Critical Path Method (CPM) schedule for projects issued under this contract and will address schedule issues during the scoping meeting. Preparaing a detailed CPM schedule helps to confirm all tasks are defined and their interdependence is understood. We will work closely with the designated primary point of contact from the City while developing and maintaining your project's schedule. Adherence to the schedule is critical to evaluating performance and will be a main topic at KCI's internal production meetings. We understand that delays are to be expected; however, we believe that building a project delivery schedule that accounts for the unforeseen is imperative to keeping a project on schedule and meeting milestone dates.

Our highly qualified Project Manager and lifelong Hidalgo County resident, Mr. Garza, can anticipate potential design delay issues and proactively adjust resources to maintain project schedules. He will use project controls to shift resources, respond to schedule changes, and respond early to tasks that threaten the schedule. Should schedule delays occur, he will redirect the necessary resources to maintain the agreed upon schedule. Any delays will be immediately communicated to the City's representative. KCI is committed to maintaining the project's schedule including working extended hours and/or on weekends as needed.

When it comes to maintaining the project budget, we understand that the success of this begins with developing an accurate budget. We will perform a site visit, verify we have a complete understanding of the project scope, and confirm all parties have a clear understanding of the project budget. The goal is to avoid project overruns and the need for supplementals.

As illustrated in the table below, KCI has a long history of implementing the above approach to meet project schedules and budgets.

PROJECT	ORIGINAL SCHEDULE	FINAL SCHEDULE	ORIGINAL BUDGET	FINAL BUDGET
Brenaaleen Drainage Edinburg, TX	03/2023 to 08/2023	03/2023 to 12/2023*	$56,033	$67,082*
Stage Coach Trail Brownsville, TX	07/2022 to 02/2023	07/2022 to 06/2023**	$166,707	$166,707**
Alley Rehab McAllen, TX	08/2023 to 8/2024	08/2023 to 07/2024	$179,620	$179,620
Traffic Signal Improvements Brownsville, TX	9/2022 to 2/2023	9/2022 to 2/2023*	$63,764	$78,164*

*Additional scope required of project **Additional scope added by the client

TEAMING PARTNERS

KCI is committed to working with HUB firms to execute all projects issued under this contract. Although we have not formally added any consultants to our team, we have existing relationships with local HUB Firms Millennium Engineers Group, Inc., R.O.W. Surveying Services, LLC, and M2 Engineering, PLLC.

RELEVANT EXPERIENCE

KCI is confident we have the experience and expertise required to provide services to support the categories identified previously in our submission. The chart below is a sampling of similar projects within Texas.

EXPERIENCE AND RECENT PROJECTS

A sampling of the firm's relevant experience for governmental agencies within the past two years is provided on the following pages.

Roadway | H&H Analysis | Drainage | Traffic Eng. & Design | Pavement Management | Utilities | Water / Wastewater

Erosion & Sediment | MEP | Civil | Environmental Eng. | Federal Funding | State Funding | City/County Funding

ALBERTA ROAD

CITY OF EDINBURG // EDINBURG, TX

KCI is providing PS&E to reconstruct and widen a two-lane rural roadway segment to an urban boulevard curb and gutter section that includes four through lanes with a raised median, pedestrian and bicycle facilities, and a closed system storm sewer. Plans include typical sections, earthwork, general notes, roadway and storm sewer plan and profile sheets, outfall plan and profile, traffic control layouts and details, intersection improvements, traffic signal design, signing, and pavement markings and details, environmental permits, and SWPPP layouts.

This project is fiscally constrained under the City of Edinburg bond program, requiring a considerable value engineering effort pre-bid and post-award in partnership with the successful contractor. Value engineering measures incorporated into this project have resulted in decreased lane width, which lowered roadway costs by avoiding the removal and replacement of eight traffic signal poles and a signal controller. Consolidation of pedestrian and bicycle facilities have decreased the roadway width (on-street bicycle facilities) to minimize conflict with compensable utilities and reduce impervious area. This reduced the design peak flow to our storm drain system and outfall structure, reducing pipe sizes and the number of curb inlets.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Carlos Juarez, PE // Desiree Banda // Grant Martinez, PE

FAYSVILLE DRAIN

HIDALGO COUNTY DRAINAGE DISTRICT NO. 1 // HIDALGO COUNTY, TX

This project, which was part of the 2018 Hidalgo County Drainage District Bond Program, will alleviate flooding in Faysville and the surrounding areas west of US 83. We performed hydrologic analysis and hydraulic design, authored a drainage report, performed preliminary and final design, and produced final PS&E. In addition, we will also provide construction-phase services.

The existing hydraulics and hydrology condition was analyzed using WMS, HEC-HMS, and the Rain on 2D Mesh component within HEC-RAS. The final design of the Faysville Drain segment was determined iteratively by producing proposed hydraulic models in HEC-RAS and comparing the hydraulic performance under 2D-unsteady state conditions.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Carlos Juarez, PE // Desiree Banda // Grant Martinez, PE // Glenn Graham, PE

HIGHWAY SAFETY IMPROVEMENT PROGRAM

HIDALGO COUNTY // HIDALGO COUNTY, TX

Under an on-call contract with the Hidalgo County, KCI provided traffic and safety studies in support of the submission of 13 project locations within Precinct 3. KCI identified the projects for consideration of funding via applicable programs and submit existing and proposed safety performance measures, preliminary proposed layouts, and preliminary construction cost estimates.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Diego Leyva, PE, PTOE // Desiree Banda

US 77 UTILITY COORDINATION

TxDOT PHARR DISTRICT // KENEDY COUNTY, TX

This TxDOT project is for the expansion of US Highway 77 South from Kingsville to Raymondville to accommodate the continued area growth. KCI provided utility coordination and Levels A, B, C, and D SUE for this project. Levels C and D were performed first to allow for determination of locations for Level A test holes. The survey work was in conjunction with the SUE.

PARTICIPATING PERSONNEL: Scott Stockburger, PE

US 281

TxDOT PHARR DISTRICT // EDINBURG, TX

KCI is assisting with the PS&E and related documents for the Rural Expressway Facility on US 281 from 0.69 miles south of SH 186 to 0.34 miles north of FM 470 in Hidalgo County. We are managing a team of subconsultants to complete the roadway and bridge design, H&H design, traffic signal design, survey, and geotechnical data collection.

KCI is performing data collection and field reconnaissance. We are also providing technical assistance for the social, economic, and environmental studies and public involvement.

Using Bentley's OpenRoads 3D Design technology, we will prepare the roadway design including typical sections, mainlane and frontage roads, interchange, cross streets, cut and fill quantities, pavement design, and pedestrian and bicycle facilities. We are conducting field inspection to observe current drainage conditions at the outfall channels, cross drainage structures, drainage easements, the tributary channel, and adjoining land development projects. KCI is conducting a hydrologic study including calculation of discharges and comparison of calculated discharges to the effective FEMA flows.

We are performing a hydraulic design and analysis using HEC-RAS. We are quantifying impacts, beneficial or adverse, in terms of increases in peak flow rates and water surface elevations. We are designing and analyzing storm drains, cross-drainage structures, and temporary drainage facilities. We will develop the PS&E for the hydraulics. Additional services include signing, pavement markings, signalization, utility engineering, retaining walls, and TCPs.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Carlos Juarez, PE // Desiree Banda // Grant Martinez, PE // Glenn Graham, PE

MILE 1 EAST IMPROVEMENTS

CITY OF MERCEDES // MERCEDES, TX

KCI provided S&E review for the reconstruction of this 1.4-mile corridor, which runs from BUS 83 (south end) to the Mile 8 North (north end) and consisted of urban and rural roadways. Design for the urban section of the roadway consisted of the reconstruction and widening the existing roadway to consist of two 12-foot wide travel lanes (one lane in each direction), a 16-foot continuous left turn lane, two 10.5-foot shoulders, and a 6-foot-wide sidewalk on each side of the roadway. We completed the design for the construction of a storm sewer system including multiple drainage inlets along the roadway.

Proposed improvement for the rural section consisted of the reconstruction and widening of the existing roadway to include two 12-foot travel lanes (one in each direction), and a 12-foot continuous left turn lane. The storm water design for this section consisted of conveying the existing outfalls via roadside ditches. The project corridor included several utility conflicts. We used an avoid, minimize, accommodate approach for all utilities in the corridor.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Carlos Juarez, PE // Desiree Banda // Grant Martinez, PE

BRENNAALEEN DRAINAGE IMPROVEMENTS

CITY OF EDINBURG // EDINBURG, TX

The purpose of the drainage project is to alleviate flooding in Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions by creating additional detention volume. The project will be carried out in two phases. Phase I will involve the construction of a 120 LF bore and a 36-inch storm sewer connection leading to the proposed detention pond. The pond will discharge into the drainage canal near Freddy Gonzalez Drive. To adequately convey stormwater from the Greenbriar Subdivision and mitigate flooding, a 15-foot drainage easement will be obtained. During Phase II, the paving on Cedar Street, extending from Freddy Gonzalez north to the cul-de-sac, and Cynthia Drive, from Freddy Gonzalez Drive to north to Cedar Street, will be reclaimed.

Additionally, the drainage infrastructure in Cedar Heights and Greenbriar Subdivisions will be replaced with new infrastructure. These improvements will enhance the capacity of the drainage system, thereby reducing the risk of flooding. A survey was conducted by a previous firm; however, some of the data required verification, thus necessitating field visits. These visits proved to be pivotal in redesigning the drainage system. Throughout the process, the residents' property was taken into consideration, and the design was modified accordingly while maintaining its efficiency. Coordination with the City of Edinburg was imperative to meet design criteria and ensure timely completion.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Carlos Juarez, PE // Desiree Banda

STAGECOACH TRAIL

CITY OF BROWNSVILLE // BROWNSVILLE, TX

The Stagecoach Trail was renovated using Capital Improvements Project funds. This project involved long-term investments in the City's infrastructure and facilities to enhance its residents' overall quality of life. KCI provided the PS&E for various improvements such as drainage and roadway enhancements, construction of sidewalks, and shared-use paths.

KCI was also responsible for roadway and drainage upgrades to Morrison Road, located at the junction of Stagecoach Trail. These improvements included

the installation of new drainage structures and new pavement. The enhancements to Morrison Road further enhanced the safety and accessibility of the trail. Overall, this project represented a significant investment in the City's future. The improvements to Stagecoach Trail and Morrison Road will enhance the community's quality of life and provide residents and visitors with a safe, enjoyable recreational area.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Carlos Juarez, PE // Desiree Banda // Grant Martinez, PE

NORTH MAIN DRAIN PHASE III

HIDALGO COUNTY // EDINBURG, TX

KCI provided design survey services for the PS&E drainage design for the North Main Drain III Phase I Project. KCI completed research, field work, analysis, computation, and documentation necessary to complete a detailed topographic survey of the project site. Utilizing GPS, digital levels, and conventional survey equipment we located cross-sections, horizontal and vertical locations of utilities and improvements, and details of bridges and structures. We also reviewed right-of-way maps and established control points. KCI completed right of entry, right-of-way research, and deed and plat research.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT

MCDAVITT BOULEVARD & OAK STREET / ROOSEVELT STREET TRAFFIC SIGNAL

CITY OF BROWNSVILLE // BROWNSVILLE, TX

For this project, two offset three-leg signalized intersections were reconfigured and combined to function as a four-leg signalized intersection. KCI's scope included utility coordination, identifying existing traffic signal inventory, existing pedestrian facility assessment, and designing new pedestrian facilities, pavement markings, and the new signalized intersection with new electrical service, TS-2 signal controller, and pedestrian poles and signal heads.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Carlos Juarez, PE // Desiree Banda // Diego Leyva, PE, PTOE, RSP1

NORTH BRIDGE AVENUE TRAFFIC IMPACT ANALYSIS

CITY OF BROWNSVILLE // BROWNSVILLE, TX

The design aimed at salvaging as much of the existing traffic signal inventory as possible to optimize project value (keeping construction cost to a minimum) and to minimize or eliminate construction activities that require lane shifts and/or lane closures. The final design utilized the existing traffic signal poles, existing mast arms, and required only one new clamp on mast arm; which allowed KCI to reduce the construction cost estimate by 40%. Further, by utilizing the existing poles, KCI avoided drilled shaft construction and lane closures for construction staging, reducing impact to operation of the corridor and existing intersection. The purpose of this project is to develop a commercial subdivision with retail lease spaces and restaurants.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Diego Leyva, PE, PTOE, RSP1

ALLEY REHABILITATION

CITY OF McALLEN // McALLEN, TX

The primary objective of this project was the rehabilitation of alleys in subpar conditions while prioritizing the mitigation of utility conflicts and enhancing drainage efficiency. KCI orchestrated the design of horizontal alignment, vertical alignment, pavement, and driveways for 26 alleys within the City of McAllen utilizing OpenRoads Designer software. Conducting a comprehensive topographic survey proved instrumental, facilitating the precise identification and resolution of utility conflicts by developing a utility conflict matrix. This survey also provided terrain elevations from which we created a digital terrain model essential for the drainage design process. To optimize drainage performance, we implemented an inverted crown typical section while maintaining minimal profile cross slopes to ensure a steady flow across the entirety of the alleys. Lastly, we estimated the construction costs for each alley, ensuring adherence to the City's budgetary constraints while incorporating a 20% contingency provision.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Carlos Juarez, PE // Desiree Banda // Grant Martinez, PE

PAVEMENT ASSESSMENT

CITY OF KYLE // KYLE, TX

In 2015, the City of Kyle selected KCI to provide a comprehensive street condition assessment for the City's 360 lane miles of asphalt streets and implement a Pavement Management System (PMS) using the PAVER™ software. KCI was again hired in 2023 to perform a City-wide automated pavement distress survey focusing on existing pavement conditions and curbs, documenting all existing distress types, severity, and extent, and determining a condition score for approximately 184 centerline miles (375 lane miles) of asphalt streets.

The assessment included the city's pavement conditions and right-of-way assets such as sidewalks, streetlights, PEC electric meters, signs, and supports. The survey was conducted using automated LCMS technology and involved capturing images to document existing cracking, pavement undulations, and minor failures. KCI then provided the City with Overall Condition Index (OCI) for all documented streets to allow for future planning and rehabilitation purposes. OCI was determined to describe the surface ratings to assess the extent, severity, or type of conditions that affect scoring. The asset database included pavement condition, ride score, and other pertinent data from block to block. The pavement and ROW asset database, provided via a geodatabase format, was incorporated into the City's GIS system and Cartegraph OMS. KCI provided the City Council members with an executive summary of the current pavement conditions analytics, budget scenarios, and a multi-year plan. This was done to assist in justifying the budget requirements for pavement maintenance and rehabilitation. The final report will include all data and findings, recommendations for rehabilitation, and estimated pavement life of all identified sections.

PARTICIPATING PERSONNEL: Frank Jaster, PE

YOUTH VILLAGE MEP RENOVATION

HARRIS COUNTY // SEABROOK, TX

Harris County Youth Village is a youth education facility in Seabrook. This project involves renovating multiple buildings on their campus, including the central plant, gym building, trades building, administrative building, classroom building, and girls dormitory. KCI is providing MEP, civil, and structural services for the replacement of HVAC systems and relocation and replacement of electrical systems.

PARTICIPATING PERSONNEL: Chris Clements, PE, LEED AP

McALLEN DATA CENTER

MDC // McALLEN, TX

KCI is providing MEP engineering design services for this addition, which includes a new data center in an existing space with associated UPS, CRAC units, and distribution serving a newly-formed IT room. KCI will work with client on specifications and engineering needed to serve an A and B side at 400 kW per side.

PARTICIPATING PERSONNEL: Chris Clements, PE, LEED AP

PARKING LOT DRAINAGE IMPROVEMENTS

TxDOT PHARR DISTRICT // PHARR DISTRICT, TX

KCI provided grading, drainage, site lighting, and pavement design services for the Parking Lot at the Pharr District HQ. The work focused on the removal and re-design of failed asphalt concrete pavement, structural slabs, and foundations in the parking lot area within an existing 26-acre site, which previously contained a commercial business. A new pavement design, drainage features, and a parking lot layout was provided in the design documents for TxDOT's use in bidding the project. KCI's scope also included topographical survey and a geotechnical assessment.

Through owner-driven needs for the growth of the HQ, TxDOT has continually re-engaged KCI through separate task orders for assistance with changing the design layout of the parking lot and associated appurtenances. Each design has cycles that lasted 2.5 months with 50% to 95% and 100% review cycles.

PARTICIPATING PERSONNEL: Chris Clements, PE, LEED AP // David Russell, PE

PNC BANK

PNC BANK // McALLEN, TX

KCI provided MEP services for a building renovation at the existing PNC bank located in McAllen, TX. Renovations included adding supplemental HVAC to conference and IDF rooms, refreshing the lighting to LED's with a modern architectural aesthetic. UPS and emergency power considerations and planning were needed to maintain critical back up to the key rooms within the renovated space.

PARTICIPATING PERSONNEL: Chris Clements, PE, LEED AP

CRANE AND VEHICLE STORAGE BUILDINGS

ONEGAS // HARLINGEN, TX

KCI is providing MEP services to assist OneGas in building a new crane building and Picarro vehicle storage building at their existing site in Harlingen, TX. The crane building will house a 2-ton crane, warehouse storage, restroom, and overhead doors in and out. The Picarro vehicle storage building will be used to house gas detection trucks. No maintenance of these vehicles will take place in the garage. Additionally, there will be some site lighting modifications and new electronic gates.

PARTICIPATING PERSONNEL: Chris Clements, PE, LEED AP

TAB 3

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Team Member Qualifications and Experience

Mr. Garza will serve as KCI's Project Manager for this contract. He will be supported by Dawn Green, PE, Project Principal. They have reviewed the documents associated with RFQ #2024-9 and have assembled an internal project team with the required professional licenses, background, training, availability, and qualifications to complete assigned projects under each specialized category.

Mr. Garza has practical experience designing and managing projects for the City and throughout Hidalgo County. Within the past five years he has designed and/or managed projects totaling more than $500M. Mr. Garza is a "hands on" Project Manager who personally embeds himself in the heavy lifting of the design and development of all aspects of projects assuring the overall progress is taking strides toward successful completion (submitting quality deliverables on time and within budget). By taking a more involved role in the design process, Mr. Garza can anticipate any potential design delay issues and proactively adjust resources to maintain project schedules. Furthermore, his vast practical experience in every component of project development allows him to immediately fulfill any design or construction project role as needed. He is well accomplished at directing complete design and construction teams for similar maintenance, reconstruction, widening, and new location projects. He is skilled at time and budget management, incorporating public stakeholder concerns, project team leadership, and construction administration. Mr. Garza will monitor project development using project controls to shift resources and maintain the project schedule. He will review monthly billing reports showing itemized work in progress, overall budget, dollars spent, and remaining budget. He will use these reports to assess immediate and future staffing needs and to develop client specific progress reports. He will rely on his project management experience to lead the design team through proactive communication, personal involvement, and delegation.

While working at TxDOT, Mr. Garza provided oversight and aided in quality assurance for several state and federal program projects. This provided him with a thorough understanding of state and federal obligations of the local agencies on these types of projects as well as the key high-risk issues that local agencies need to be aware of to deliver a successful project.

Our motivated and experienced team understands that time is of the essence to design and construct awarded projects. Mr. Garza and Ms. Green will provide project management and team leadership to accomplish the project's objectives while complying with the City's standards and requirements. Ms. Green will support Mr. Garza by verifying he has the technical resources needed to complete the requirements of each assignment within the City's expected schedule.

TEAM ORGANIZATION CHART

KCI has the experience and personnel required to assist the City with all facets of infrastructure projects for residents, businesses, and surrounding jurisdictions. Below is an organizational chart showcasing KCI's ability to handle all of the tasks proposed under this contract per category.

THE CITY OF Edinburg

Oscar Garza, PE,SIT*
Project Manager

Dawn Green, PE*
Project Principal

Desiree Banda, EIT*
Deputy Project Manager

ENGINEERING DESIGN

Street Infrastructure Evaluation and Improvements
Carlos Juarez, PE

Pavement Management and Improvements
Frank Jaster, PE

Utility Infrastructure Evaluation and Improvements
Scott Stockburger, PE

Erosion and Sediment Control Design (SWPPP)
Grant Martinez, PE

Water and Wastewater Evaluation and Improvements
David Russell, PE

Hydrology & Hydraulics
Grant Martinez, PE

Transportation Evaluation
Glenn Graham, PE

Traffic Engineering Services
Diego Leyva, PE, PTOE, RSP1

Traffic Signal Design
Diego Leyva, PE, PTOE, RSP1

Environmental Engineering Services
Robb Fishman, AICP, REM

Civil Engineering
Edward Ochoa, PE, RPLS

MEP Engineering Services
Chris Clements, PE, LEED AP

KCI has more than 200 Texas employees available to support the task leaders identified for each service category above.

DAWN GREEN, PE
Project Principal

BS in Civil Engineering, Texas A&M University // PE #79721 // 33 Years' Experience

Ms. Green's 33 years of experience includes project management and design of a wide variety of engineering assignments, primarily focusing on large municipal projects involving roadway, drainage, water, and wastewater system design. She also works with entities to help acquire funding for projects. In her role as Vice President of KCI, she helps leverage the opportunities and growth for KCI throughout Texas.

As Project Principal, Ms. Green is responsible for providing resources to the team to allow for the successful delivery of projects to the City. She will interface with the City as another line of communication to confirm KCI's understanding of the City's needs and assist in achieving the project goals. She will monitor contract compliance and serve as the senior executive for resolution of any issues that may be escalated. Her relevant experience includes:

Advanced Transportation District Program, City of San Antonio. Project Manager. The project included scoping, preparing cost estimates, and construction drawings for sidewalk replacement projects throughout the City of San Antonio. Ms. Green's responsibilities included site visits, preliminary analysis, identifying environmental constraints, identifying utility conflicts, and preparing construction drawings. The program also included bid preparation and advertisement, construction inspection and administration, and contract closeout. Ms. Green was responsible for coordinating with the contractor and citizens to provide information on the project areas.

Bulverde Road Improvements, Bexar County. Principal in Charge. Ms. Green managed this one-mile, $6M roadway reconstruction project in northern Bexar County. The project included roadway reconstruction and drainage improvements and developing roadway and drainage design alternatives, traffic study, geotechnical investigation, preliminary structural design, SUE, environmental permitting, and survey.

OSCAR GARZA, PE, SIT
Project Manager

BS in Civil Engineering, University of Texas, San Antonio // PE #122125; SIT #110657 // 13 Years' Experience

Mr. Garza is personally invested in this region's infrastructure as a Hidalgo County resident, business owner, Board Member of the Hidalgo County Irrigation District #6 and Office Manager of KCI's Mission office. He has amassed practical and proven project methodology to solve unique design issues and challenging project schedules. His key strengths include project management, agency coordination, project scoping, scheduling, budgeting, cost control, design processes and problem resolutions. His background includes H&H; drainage, roadway, and traffic design; and construction engineering and inspection. He is proficient in legacy GeoPAK (2D Design) and SS3 and newer 3D Modeling and Design. Prior to joining KCI, Mr. Garza worked for the TxDOT Pharr District. His relevant experience includes:

Alberta Road, City of Edinburg. Project Manager. KCI is providing PS&E to reconstruct and widen a two-lane rural roadway segment to an urban boulevard curb and gutter section that includes four through lanes with a raised median, pedestrian and bicycle facilities, and a closed system storm sewer.

US 281 Rural Expressway Facility, TxDOT Pharr District. Project Manager. PS&E for improvements to US 281. The project limits are from 0.60 miles south of SH 186 to 0.34 miles north of FM 490 in Hidalgo County. Mr. Garza is overseeing the roadway design, TCP, and drainage design.

FM 681, TXDOT Pharr District. Project Manager. PS&E for a full depth reconstruction and widening of the roadway consisting of grading, lime treatment, subgrade, flexible base, asphalt concrete pavement, drainage improvements, retrofit concrete rail at existing bridge structures, metal beam guard fence, traffic signals, signing, and pavement markings.

Faysville Drain, Hidalgo County Drainage District No. 1. Project Manager. This project involved performing hydrologic analysis and hydraulic design, authoring a drainage report, performing final preliminary and final design, producing final PS&E, and providing construction phase services.

Mile 1 East Improvements, City of Mercedes. Project Manager. S&E review and PS&E services for the reconstruction of Mile 1 East. This 1.4-mile corridor runs from BUS 83 (south end) to the Mile 8 North (north end) and consists of urban and rural roadways. This project is a local let project in Hidalgo County funded by federal, state, and city monies. KCI is involved in developing the Advanced Funding Agreement between the Rio Grande Valley Metropolitan Planning Organization, TxDOT, City of Mercedes, and Hidalgo County.

Highway Safety Improvement Program - Traffic and Safety Studies, Hidalgo County. Project Manager. KCI provided traffic and safety studies in support of the submission of 13 project locations within Precinct 3. KCI identified the projects for consideration of funding via applicable programs and submit existing and proposed safety performance measures, preliminary proposed layouts, and preliminary construction cost estimates.

DESIREE BANDA

Deputy Project Manager

9 Years' Experience

Ms. Banda has over nine years of civil engineering experience. She has designed and drafted drainage and roadway systems, including roadway medians and pavement grading for various cities. She prepared civil site plans and converted topographic data into CAD drawings. Fluent in both English and Spanish, she is approachable, has strong presentation skills, and is a creative problem solver. She is proficient with AutoCAD Civil 3D, MicroStation, and Microsoft Office Suite. Ms. Banda is intimately familiar with the City of Edinburg, as evidenced by her experience below:

Brennaaleen Drainage Improvements, City of Edinburg, Engineer-in-Training. The drainage project aims to alleviate flooding in Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions by creating additional detention volume. The project will be carried out in two phases. Phase I will involve the construction of a 120 LF bore and a 36-inch storm sewer connection leading to the proposed detention pond. The pond will discharge into the drainage canal near Freddy Gonzalez Drive. To adequately convey stormwater from the Greenbriar Subdivision and mitigate flooding, a 15-foot drainage easement will be obtained. During Phase II, the paving on Cedar Street, extending from Freddy Gonzalez north to the cul-de-sac, and Cynthia Drive, from Freddy Gonzalez Drive to north to Cedar Street, will be reclaimed. Additionally, the drainage infrastructure in Cedar Heights and Greenbriar subdivisions will be replaced with new infrastructure. These improvements will enhance the drainage system's capacity, thereby reducing the risk of flooding. Another firm conducted a survey; however, some of the data required verification, thus necessitating field visits. These visits proved to be pivotal in redesigning the drainage system. The residents' property was considered throughout the process, and the design was modified accordingly while maintaining efficiency. Coordination with the City of Edinburg was imperative to meet design criteria and help ensure timely completion.

Alberta Road, City of Edinburg. Transportation Engineer. KCI is providing PS&E to reconstruct and widen a two-lane rural roadway segment to an urban boulevard curb and gutter section that includes four through lanes with a raised median, pedestrian and bicycle facilities, and a closed system storm sewer. This project is fiscally constrained under the City of Edinburg bond program, requiring a considerable value engineering effort pre-bid and post-award in partnership with the successful contractor. Value engineering measures incorporated into this project have resulted in decreased lane width, which lowered roadway costs by avoiding the removal and replacement of eight traffic signal poles and a signal controller.

CARLOS JUAREZ, PE

Street Infrastructure Evaluation and Improvements

BS in Civil Engineering, Texas A&M University, Kingsville // PE #122006 // 14 Years' Experience

Mr. Juarez has 14 years of experience in the industry and has completed schematic and PS&E for many transportation design projects. He has an expertise in completing complicated roadway design for PS&E projects. Mr. Juarez has comprehensive experience in transportation and drainage engineering including developing complete PS&E. He has comprehensive experience in transportation and drainage engineering including developing complete PS&E. He has completed drainage studies and designs for rural and

complex roadway systems. He has used Watershed Modeling System software to delineate watersheds and perform hydraulic analysis. He is also experienced in HY-8 to design and analyze culverts. His relevant experience includes:

Alberta Road, City of Edinburg. Project Engineer. KCI is providing PS&E to reconstruct and widen a two-lane rural roadway segment to an urban boulevard curb and gutter section that includes four through lanes with a raised median, pedestrian and bicycle facilities, and a closed system storm sewer.

SH 107, TxDOT Pharr District. Project Engineer. Mr. Juarez is managing the PS&E for the reconstruction of SH 107 from a two-lane rural roadway with eight-foot shoulders from FM 1425 to the IBWC Floodway East Levee. The project included 10 existing culverts. Existing culverts were analyzed using HY-8 to determine discharge, headwater, and velocity. The culvert layouts were developed for the project.

SH 27, TxDOT San Antonio District. Project Engineer. Mr. Juarez provided preliminary engineering services for 14.42 miles of SH 27 for improvements between Spur 100 and Pankratz Road. The drainage elements included preliminary ditch layouts and cross-section development. Mr. Juarez ensured sidewalk and ditch sections fit within existing ROW and looked at potential new ROW areas for proper sidewalk and ditch placement.

Faysville Drain, Hidalgo County Drainage District No. 1. Project Engineer. Mr. Juarez used HEC-RAS to develop the drainage model for project. LiDAR and field survey data was analyzed to create new ditch cross-sections. He also developed PS&E for drainage ditch widening project.

FRANK JASTER, PE

Pavement Management and Improvements

BS in Civil Engineering, Texas A&M University // PE #60985 // 43 Years' Experience

Mr. Jaster has provided numerous pavement forensic investigations within much of south, west, and east Texas. The age of the various pavements investigated ranges from newly constructed pavements to pavements more than 20 years old. The pavements ranged from parking lots to major interstate highways, city streets, private drives, and racetracks. Also, Mr. Jaster served on a City of San Antonio Pavement Failure Task Force.

Mr. Jaster has designed many pavements throughout the South Central Texas areas, including runways for Los Cuerños Ranch and 74-Ranch. He has designed pavements for TxDOT, the cities of San Antonio and New Braunfels, Bexar, and surrounding counties, and various projects for parking lots and driveways. Mr. Jaster has also prepared numerous pavement designs, including private drives, parking lots, city streets, TxDOT roadways, private runways, and US Air Force Base runways/taxiways. He also participated in the specification amendments for the City of San Antonio and has written the civil specifications for numerous US Army Corps of Engineer projects.

2015 Pavement Evaluation & Assessment, City of Kyle. Pavement Design Engineer. Mr. Jaster provided a comprehensive street condition assessment for the City's 124-lane miles of asphalt streets. The team conducted a semi-automated pavement distress survey focusing on existing pavement conditions and documenting all existing cracking, pavement undulations, and minor failures. The team processed the data and downloaded the PCI and IRI scores into Street Saver®, which was utilized to prepare report charts and maps. This report included a summary of all findings, color-coded maps based upon PCI and IRI scores, and a ranking of the lowest scores, including corrective measures (i.e., total reconstruction, rehabilitation, resurfacing, crack sealing, etc.), and a detailed cost estimate for diverse options for correction. KCI also joined City staff in presenting the report to their City Council and Mayor.

2023 Pavement Evaluation & Assessment, City of Kyle. Pavement Design Engineer. Mr. Jaster used automated LCMS technology to survey the city's pavement conditions and right-of-way assets, documenting pavement distresses and providing an Overall Condition Index (OCI) for future planning and rehabilitation efforts. Asset inventory and conditions data was stored in the PAVER™ and Cartegraph OMS database and provided to the City in shape file format. The team also configured the Asset Condition Manager and Scenario Builder for conditions analysis, deterioration curves development, and maintenance and rehabilitation planning.

Hausman Road, Loop 1604 to IH 10, City of San Antonio. Pavement Design Manager. Mr. Jaster served as the Pavement Design Engineer for the Hausman Road Schematic. His team consisted of traffic, drainage, geotechnical, and subsurface utility engineers who studied the Hausman Road Corridor and developed a schematic design for roadway reconstruction and widening. The design incorporated Low Impact Development (LID) design elements that satisfied the TCEQ requirements for development over the Edwards Aquifer Recharge and Contributing Zones.

Blanco Road: Hildebrand to Jackson Keller, City of San Antonio. Pavement Design Engineer. Mr. Jaster served as the pavement design engineer for this 2.5-mile section of Blanco Road. In developing the recommendations for improvements and existing land use, he evaluated driveway locations, utilities, construction impacts to property owners, construction costs, existing roadway geometrics, and the need for ROW acquisition.

SCOTT STOCKBURGER, PE

Utility Infrastructure Evaluation and Improvements

BS in Civil Engineering, Texas A&M University // PE #80299 // 35 Years' Experience

Mr. Stockburger is a transportation engineer with 35 years of experience focused on utility design, coordination, and relocation. He is also an expert in highway design and construction, which enables him to understand and mitigate various conflicts on complex projects. He has managed complex projects involving large groups of technical employees and consultants, as well as multiple project phases from schematics and PS&E stages through construction. He is knowledgeable and compliant with applicable rules, regulations, plans and specifications. He has extensive knowledge of the TxDOT Utility Accommodation Rules (UAR); Code of Federal Regulations (CFR); ROW policies and procedures; and utility agreements including preparation, contracts, conflict analysis and corridor planning. His relevant experience includes:

US 77 Utility Coordination, TxDOT Pharr District. SUE Manager. Mr. Stockburger provided oversight for the utility coordination and QL A, B, C, and D SUE for this project Levels C and D were performed first to allow for determination of locations for Level A test holes.

FM 3248, TxDOT Pharr District. SUE Manager. As a subconsultant, KCI provided QL-A, -B, -C, and -D SUE services to map existing utilities present along FM 3248 to facilitate PS&E design and identify conflicts within the proposed project limits.

SH 48, TxDOT Pharr District. SUE Manager. Mr. Stockburger managed the team responsible for level B and C SUE work to support schematic design for the rehabilitation of SH 48 from FM 511 to SH 4.

Mile 1 East Improvements, City of Mercedes. SUE Technician. This project included S&E review for the reconstruction of Mile 1 East for the City of Mercedes. This 1.40-mile corridor runs from BUS 83 (south end) to the Mile 8 North (north end) and consisted of urban and rural roadways. This project was a local let project in Hidalgo County funded by federal, state, and city monies. KCI developed the Advanced Funding Agreement between the RGV MPO, TxDOT, City of Mercedes, and Hidalgo County.

GRANT MARTINEZ, PE

Erosion and Sediment Control Design (SWPPP) | Hydraulics & Hydrology

BS in Civil Engineering, University of Texas at Rio Grande Valley // PE #146525 // 6 Years' Experience

Mr. Martinez has over six years of experience working on various transportation projects. His experience involves extensive coordination of roadway design, hydrologic analysis, storm system/detention design, and utility coordination/design. He is familiar with GeoPAK, MicroStation, AutoCAD Civil 3-D, ArcGis, and HEC-RAS software.

Alberta Road, City of Edinburg. Project Engineer. KCI is providing PS&E to reconstruct and widen a two-lane rural roadway segment to an urban boulevard curb and gutter section that includes four through lanes with a raised median, pedestrian and bicycle facilities, and a closed system storm sewer. Plans included typical sections, earthwork, general notes, roadway and storm sewer plan and profile sheets, outfall plan and profile, traffic control layouts and details, intersection improvements, traffic signal design, signing, and pavement markings and details, environmental permits, and SWPPP layouts.

Alley Rehabilitation, City of McAllen. Project Engineer. The primary objective of this project was the rehabilitation of alleys in subpar conditions while prioritizing the mitigation of utility conflicts and enhancing drainage efficiency. KCI orchestrated the design of horizontal alignment, vertical alignment, pavement, and driveways for 26 alleys within the City of McAllen utilizing OpenRoads Designer software. Conducting a comprehensive topographic survey proved instrumental, facilitating the precise identification and resolution of utility conflicts by developing a utility conflict matrix. This survey also provided terrain elevations from which we created a digital terrain model essential for the drainage design process. To optimize drainage performance, we implemented an inverted crown typical section while maintaining minimal profile cross slopes to ensure a steady flow across the entirety of the alleys. Lastly, we estimated the construction costs for each alley, ensuring adherence to the City's budgetary constraints while incorporating a 20% contingency provision.

Mile 1 East Improvements, City of Mercedes. Project Engineer. This project included S&E review for the reconstruction of Mile 1 East for the City of Mercedes. This 1.40-mile corridor runs from BUS 83 (south end) to the Mile 8 North (north end) and consisted of urban and rural roadways. This project was a local let project in Hidalgo County funded by federal, state, and city monies. KCI developed the Advanced Funding Agreement between the RGV MPO, TxDOT, City of Mercedes, and Hidalgo County. Mr. Martinez supported the S&E review and PS&E services.

US 281 Segment 1: SH 186 to FM 490, TxDOT Pharr District. Project Engineer. This project is for proposed improvements to US 281 in Hidalgo County. KCI is responsible for directing and coordinating all activities associated with the project to comply with state and federal policies and procedures, and to deliver the work on the established timeline.

DAVID RUSSELL, PE

Water and Wastewater Evaluation and Improvements

BS in Civil Engineering, University of Texas at San Antonio // PE #123318 // 13 Years' Experience

Mr. Russell is a project manager with 13 years of experience. His passion for the work, ability to collaboratively partner with his clients, and desire to lead a team has propelled his career forward in just a few short years. He offers diverse expertise in all phases of the project lifecycle from inception to completion including design, planning, assessing utility conflicts, and construction oversight. Mr. Russell has provided consulting services on various general civil and utility infrastructure projects for state, county, and city agencies across the state of Texas. His relevant experience includes:

Roosevelt Avenue: South St. Mary's Street/UPRR Underpass to Steves Avenue, San Antonio Water System (SAWS). Project Manager. Mr. Russell is the design lead for water and sanitary sewer adjustments and utility relocations. The project replaces 1,600 LF of 12-inch, 8-inch and 6-inch water mains. The work also includes replacement of fire hydrants, water valves, and service connections. KCI is also evaluating the impact against the sanitary sewer main alignment and minimizing the work to only adjust cleanouts to final elevation of the proposed sidewalk improvements

Judson Road Water Infrastructure Improvements, SAWS. Project Manager. Mr. Russell managed the planning, design, and bidding phase services for a new 2,000 LF of 16-inch HDPE water main for the SAWS Northeast Service Center. A duplex lift station with grinder pumps was also designed and 4,500 LF of 3-inch HDPE sanitary sewer force main along CoSA and TxDOT's ROW. Design included HDPE to ductile iron pipe connections, new fire hydrants, and service connections. The force main construction was completed using open trench and trenchless methods. Subsurface utility exploration located two 12-inch steel high pressure gas mains adjacent to the proposed water main alignment. Coordination and permitting with the CoSA and TxDOT was required. Mr. Russell provided oversight construction phase services.

2018 Dead End Mains, SAWS. Project Engineer. KCI provided planning/design services for the elimination program, including a concept report to establish means for organizing/categorizing the first 190 priority dead ends. Part of this effort was to identify the initial group of projects to meet cost constraints. Group 1 was fast-tracked to meet a January 2019 deadline. The design included 1,500 LF of 8-inch to 16-inch water mains at 10 locations. Mr. Russell designed the water system improvements and assisted the design team with accurate construction documents for bidding.

GLENN GRAHAM, PE

Transportation Evaluation

BS in Civil Engineering, Texas A&M University // PE # 72761 // 35 Years' Experience

Mr. Graham's background includes planning, design, and management of a wide range of transportation projects. His experience includes program management, feasibility studies, route location studies, environmental studies, traffic engineering, transportation planning, travel demand modeling, schematic design, final design, and preparation of PS&E for major roadway projects throughout Texas. He has managed and supported several significant program management projects. He has also led many workshops and public meetings requiring him to present the technical findings of transportation studies. Mr. Graham has experience managing indefinite delivery contracts for multiple TxDOT districts, and was responsible for managing over 25 work authorizations for the Lufkin District that ranged in scope from traffic and feasibility studies, to schematic design and plans, specifications, and estimates of urban streets and rural highways. He has also managed two indefinite delivery environmental planning contracts for the TxDOT Houston District. In recent years, his focus has been on program management for toll road and county-wide bond programs. His relevant experience includes:

SH 302, TxDOT Odessa District. Project Manager. Schematic design for widening of an urban corridor along SH 302 for existing rural two-lane highway in Winkler County. Mr. Graham managed the team responsible for conceptual designs and executing the evaluation of alternatives (transportation evaluation) against the purposed and need of the project.

FM 2920 from North Willow Street to IH 45, TxDOT Houston District. Project Manager. Mr. Graham managed the schematic and environmental design and alternatives analysis for the project. He assembled and managed the team of subproviders and developed the WA scope and fee and proposed schedule. He prepared the Project Management Plan (PMP) including the QA/QC plan. His team prepared the schematic design using OpenRoads in a 3D design environment.

DIEGO LEYVA, PE, PTOE, RSP1

Traffic Engineering Services | Traffic Signal Design

BS in Civil Engineering, Texas A&M University // PE #123378; PTOE #4193; RSP1 #1055 // 13 Years' Experience

Mr. Leyva has over 13 years of experience in transportation and traffic operations, including sign and pavement markings, traffic control plans, traffic signal design, illumination design, intelligent transportation system (ITS), traffic impact analysis, traffic operations studies, traffic signal timing, traffic signal warrant analysis, roadway plan and profile, storm sewer design, utility design, plats, public improvement plans, right of way permits, and vision zero. Mr. Leyva has designed over 120 new or modified traffic signals, designed over 200 miles of sign and pavement markings, developed over 100 traffic studies for various clients, reviewed over 500 plats, reviewed over 70 public improvement plans, and reviewed over 50 bond capital improvement projects.

Brownsville Traffic Signal Design, City of Brownsville. Traffic Engineer. KCI provided traffic signal design and traffic engineering services at three locations for the City of Brownsville. The project included design survey and design of three fully actuated traffic signals. Mr. Leyva worked on the traffic signal design, ADA curb ramp design, and sign and pavement marking layouts for the intersections of US 281 at Calle Pluton, FM 1419 at FM 511, and FM 1847 AT Main St. The signal design included mast arm signals and span wire signals.

Highway Safety Improvement Program, Hidalgo County. Traffic Engineer. KCI provided professional engineering services for roadway design, traffic design, utility coordination, environmental documentation, and construction phase services necessary to support the design process for six roadway projects in Hidalgo County. Mr. Leyva worked on the design of three projects. The projects included signal design, illumination design, sign and pavement markings. The project locations included the intersections of Mile 2 at Minnesota Road, Mile 3 at Western Road, Mile 4 at Texan Road, Mile 8 at Texan Road, Mile 5 at Western Road, and Mile 4 at Trosper Road.

ROBB FISHMAN, AICP, REM

Environmental Engineering Services

MA in Project Management, University of Houston; BA in Civil Geology, Humboldt State University // AICP #015190; REM #9967 // 38 Years' Experience

Mr. Fishman has an extensive background in the National Environmental Policy Act (NEPA) and environmental studies supporting NEPA. He is results-driven Senior Project Manager and offers 38+ years of experience in diverse settings involving a wide range of concurrent environmental issues at multiple sites. His responsibilities include management and supervision in the preparation and review of environmental documents, coordination with federal, state, and local regulatory agencies, appearances at public forums, environmental documentation support and regulatory compliance efforts. Mr. Fishman has utilized his training, field experience, and knowledge of NEPA and Council on Environmental Quality (CEQ) regulations to implement the procedural provisions of NEPA, as well as, the environmental guidelines and procedures established by federal agencies which have included the Federal Highway Administration (FHWA)/including TxDOT, Federal Aviation Administration (FAA), Federal Transit Administration (FTA), Federal Railroad Administration (FRA), etc.

Statewide IDIQ Environmental Services (2004-2023), TxDOT. Project Manager. Mr. Fishman's responsibilities also included environmental documentation; permit preparation, data collection, analysis, mitigation, monitoring, and public involvement for highway projects located throughout the state of Texas. The environmental documentation included preparing EISs, EAs, or CEs; community impact assessments; noise analysis; air quality analysis; water quality impacts; permitting issues; wetland determinations/delineations; water body modifications; wildlife resources and endangered/threatened species; floodplain impacts; coastal resource issues; historic and archeological preservation; hazardous materials; secondary and cumulative impacts; and section 4(f) issues.

IDIQ Environmental Services (2015-2021), TxDOT Houston District. Project Manager. Mr. Fishman's responsibilities also included environmental documentation; permit preparation, data collection, analysis, mitigation, monitoring, and public involvement for highway projects located throughout the state of Texas. The environmental documentation included preparing EISs, EAs, or CEs; community impact assessments; noise analysis; air quality analysis; water quality impacts; permitting issues; wetland determinations/delineations; water body modifications; wildlife resources and endangered/threatened species; floodplain impacts; coastal resource issues; historic and archeological preservation; hazardous materials; secondary and cumulative impacts; and section 4(f) issues.

EDWARD OCHOA, PE, SIT, CFM

Civil Engineering

BS in Agricultural Engineering, Texas A&M University // PE #92956; SIT #6741; CFM #3133-16N // 25 Years' Experience

Mr. Ochoa has more than 25 years of experience working on a wide variety of land development, municipal and transportation projects. His experience involves coordination with City/County staff and includes master planning, feasibility studies, platting, roadway design, hydrologic analysis, storm drainage/ detention pond design, utility design and coordination, SWPPP, grading, and a variety of civil site improvements projects. Mr. Ochoa's municipal and transportation experience include highway and overpass design, airport runway design, urban roadway design, roadway widening projects and sidewalk improvement projects, which include driveway design and coordination, acceleration and deceleration lanes, meeting ADA accessibility standards, access management and right-of-way coordination. He is also experienced in coordinating and preparing a variety of surveys and easements in urban, institutional and rural settings. As a Certified Floodplain Manager, Mr. Ochoa has years of experience with FEMA elevation certificates and preparing floodplain development permits.

World Trade Bridge FAST Lanes Relocation, City of Laredo. Project Manager. KCI provided the civil engineering, surveying design, and plan development for the relocated FAST Lanes on the bridge site. The included plan development and design for the installation of Weigh-In-Motion (WIM) on the existing exit booths. Civil engineering consisted of roadway design, storm drainage, traffic control, complex construction phasing, dry utilities design,utility coordination and

surveying. A hydrologic analysis was conducted using the TR-55 method and the use of alternative detention concepts while following the guidelines of EPA's EISA Section 438 Technical Manual. Mr. Ochoa provided the surveying, civil engineering design, and plan development for the relocated FAST Lanes on the bridge property.

The New Trade Center Master Plan, City of Laredo. Project Manager. KCI provided the engineering services for over 150 acres of master-planned industrial development. Included was a hydrologic analysis of four drainage areas in pre-and post-development conditions, along with channel, detention basin and storm drainage system designs. The project also included platting, surveying, roadway, water, sanitary sewer, dry utilities design, bidding and awarding, construction staking, construction oversight, and project closeout. The surveying aspect of KCI's work included conducting a boundary and topographic survey for each phase, conducting utility surveys, preparing easements and plats of record for the property, and providing construction control and staking.

Various CDBG Street Improvements Projects, Jim Hogg County. Project Manager. KCI provided assistance with the planning of street rehabilitation work, along with grant application assistance for three CDBG grant applications. This was followed by the engineering, construction plans, and specifications for eight city blocks in Hebbronville, including roadway design, storm drainage, survey coordination, project bidding and awarding, construction oversight, and project closeout. Mr. Ochoa provided assistance with the planning of street rehabilitation work, along with grant application assistance for three CDBG grant applications.

CHRIS CLEMENTS, PE, LEED AP

MEP Engineering Services

BS in Electrical Engineering, The University of Texas at Austin // PE #111339 // 18 Years' Experience

Mr. Clements is the regional practice leader for the MEP practice where he is responsible for the management and senior project oversight of all projects from the conceptual phase through construction and commissioning. He has performed extensive field surveys, system analyses, energy studies, and cost estimating services for a variety of public and municipal entities. His relevant experience includes:

HVAC Upgrades, TxDOT Pharr District. Principal-in-Charge. Provided oversight for this project, which involves replacing the aging HVAC equipment at the Pharr Headquarters to improve energy efficiency and reliability, restore desired building pressurizations, and align owner changes to the use of the space.

McAllen Data Center, Bud Griffin & Associates, Inc. Project Manager. KCI provided MEP engineering design services for this addition, which included a new data center in an existing space with associated UPS, CRAC units, and distribution serving a newly-formed IT room. KCI worked with the client on specifications and engineering needed to serve an A and B side at 400kW per side.

Youth Village MEP Renovation, Harris County. Principal-in-Charge. This project will renovate multiple buildings on their campus, including the central plant, gym building, trades building, administrative building, classroom building, and girls dormitory. KCI is providing MEP, civil, and structural engineering services for the replacement of HVAC systems and relocation and replacement of electrical systems.

Gardener Betts/ISC Building MEP Renovation, Travis County. Principal-in-Charge. Following the completion of a physical assessment, KCI is coordinating with a subconsultant to design replacement of various roofing and envelope items.

REFERENCES

REFERENCES

The KCI team is dedicated to providing quality, responsive services to the City. At KCI, we feel that the best measure of our performance is client satisfaction and our relationship with our clients. The client references below can attest to the performance of KCI and our key personnel. We encourage the City to discuss with these clients the capabilities of our firm and proposed staff members.

MAYOR OSCAR MONTOYA

City of Mercedes

956.565.3114 // mayor.montoya@cityofmercedes.com

Project name and brief description: Mile 1 East Improvements - This project included S&E review and PS&E services for the reconstruction of Mile 1 East for the City of Mercedes. This 1.40 mile corridor runs from BUS 83 (south end) to the Mile 8 North (north end) and consists of urban and rural roadways.

Role: Oscar Garza - Project Manager; Carlos Juarez - Project Engineer; Scott Stockburger - SUE Manager

PETE ALVAREZ

TxDOT Pharr District

956.702.6100 // pedro.alvarez@txdot.gov

Project name and brief description: US 281 Rural Expressway Facility - KCI is assisting with the PS&E and related documents for the Rural Expressway Facility on US 281 from 0.69 miles south of SH 186 to 0.34 miles north of FM 470 in Hidalgo County. We are managing a team of subconsultants to complete the roadway and bridge design, H&H design, traffic signal design, survey, and geotechnical data collection.

Role: Oscar Garza - Project Manager; Carlos Juarez - Project Engineer

COMMISSIONER EVERARDO "EVER" VILLARREAL

Hidalgo County Commissioner Precinct 3

956.585.4509 // everardo.villarreal@co.hidalgo.tx.us

Project name and brief description: Highway Safety Improvement Program - KCI provided traffic and safety studies in support of the submission of 13 project locations within Precinct 3. KCI identified the projects for consideration of funding via applicable programs and submit existing and proposed safety performance measures, preliminary proposed layouts, and preliminary construction cost estimates.

Role: Oscar Garza - Project Manager; Carlos Juarez - Project Engineer; Diego Leyva - Traffic Engineer

COMMISSIONER ELLIE TORRES

Hidalgo County Commissioner Precinct 4

956.381.0981 // ellie.torres@co.hidalgo.tx.us

Project name and brief description: Faysville Drain - This project, part of the 2018 Hidalgo County Drainage District Bond Program, specifically aims at elevating flooding in Faysville and the surrounding residential areas West of US 83. We are performing hydrologic analysis and hydraulic design, authoring a Drainage Report, performing final preliminary and final design,producing final PS&E, and providing construction phase services.

Role: Oscar Garza - Project Manager; Carlos Juarez - Project Engineer

CITY ENGINEER CARLOS LASTRA, PE

City of Brownsville

956-547-6812 // carlos.lastra@brownsvilletx.gov

Project name and brief description: Stagecoach Trail - KCI provided the PS&E for various improvements such as drainage and roadway enhancements, construction of sidewalks, and shared-use paths. The Stagecoach Trail was renovated using Capital Improvements Project funds. This project involved long-term investments in the City's infrastructure and facilities to enhance its residents' overall quality of life.

Role: Oscar Garza - Project Manager; Carlos Juarez - Project Engineer

PAST PROJECTS WITH THE CITY OF EDINBURG

KCI is proud to be a local LRGV engineering firm. We have had the opportunity to work throughout the region for the City of Edinburg, TxDOT Pharr District, Hidalgo County, City of Mercedes, and HCDD1. Our recent successful project experience has provided us with an understanding of the region's topography, stakeholders, history, and specific needs. We understand it is imperative to take these issues into consideration when developing project scopes.

From our prior experience working within the region, we have learned that developing individual scopes tailored to the project surroundings helps mitigate these obstacles. Our existing relationships with the City, Hidalgo County, TxDOT Pharr District, International Boundary Water Commission, Irrigation and Drainage Districts, Federal Emergency Management Agency, school districts, neighboring municipalities, Texas Parks and Wildlife, US Army Corps of Engineers, and

National Fish and Wildlife Service will help facilitate efficient and effective public outreach and local stakeholder coordination resulting in projects that are delivered on time and budget to the City of Edinburg.

Recently for the City, KCI provided PS&E services for Alberta Road to reconstruct and widen the roadway from a two-lane rural segment to an urban boulevard curb and gutter section that includes four through lanes with a raised median, pedestrian and bicycle facilities, and a closed system storm sewer. This experience has provided us with intimate knowledge of the City of Edinburg's standards, guidelines, and preferences. In addition, we have built relationships with Cities public works team that we will capitalize on to move swiftly and efficiently through the project scoping, negotiation, and project development phases. Below is a list of our proposed key personnel who have previously worked with the City before.

KEY PERSONNEL	ROLE	CITY PROJECTS
Oscar Garza, PE, SIT	Project Manager	Alberta Road Segment 1 Roadway Improvements Alberta Road Segment 2 Roadway Improvements Brennaaleen Drainage US 281 Segment 1 (water distribution) Escondido Subdivision La Sienna Subdivision - Traffic Analysis
Desiree Banda	Deputy Project Manager	Alberta Road Segment 1 Roadway Improvements Alberta Road Segment 2 Roadway Improvements Brennaaleen Drainage
Carlos Juarez, PE	Street Infrastructure Evaluation and Improvements	Alberta Road Segment 1 Roadway Improvements Alberta Road Segment 2 Roadway Improvements Brennaaleen Drainage US 281 Segment 1 (water distribution) Escondido Subdivision
Grant Martinez, PE	Erosion and Sediment Control Design (SWPPP) Hydrology & Hydraulics	Alberta Road Segment 1 Roadway Improvements Alberta Road Segment 2 Roadway Improvements Brennaaleen Drainage
Glenn Graham, PE	Transportation Evaluation	US 281 Segment 1: SH 186 to FM 490

REQUIRED FORMS

CONFLICT OF INTEREST FORM

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

N/A

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST DISCLOSURE

CONFLICT OF INTEREST

DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

CONFLICT OF INTEREST DISCLOSURE

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

LITIGATION DISCLOSURE FORM

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One (YES) NO

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One (YES) NO

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

LITIGATION DISCLOSURE FORM

Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

To date, KCI has knowledge of three circumstances in which our contract was terminated for convenience. One contract was terminated because the owner's right-of-way (ROW) requirements did not align with the design requirements. The owner and KCI separated without formal dispute, and the owner proceeded with the project with a different consultant. A second contract was terminated shortly after KCI acquired a firm in litigation. The last known instance of contract termination occurred when the owner discontinued the project due to changes in Federal regulations related to compliance with the Clean Water Act, which required additional work that would increase both design and construction costs.

LITIGATION DISCLOSURE FORM

10 YEAR LITIGATION SUMMARY – OPEN AND CLOSED – PROFESSIONAL

- **Core Logistic Services, LLC vs. LaSalle County / Don Durden, Inc., DBA Civil Engineering Consultants (CEC)**
  Jurisdiction: LaSalle County, Texas
  Opened: September 2014
  Closed: September 19, 2017 – Motion for Summary Judgment granted

  This was a breach of contract between the owner, La Salle County, and its contractor, Core Logistics. Core Logistics attempted to join CEC claiming CEC tortiously interfered with Core's ability to be paid by the County.

- **ICG 16th Street Associates LLC Asserts Claim against KCI Technologies, Inc.**
  Case No: 17-CV-1070 (CRC)
  Jurisdiction: U.S. District Court, District of Columbia
  Opened: January 2015
  Closed: August 2020 – Settled

  This was a property claim dispute in which ICG alleged that a neighboring property (owned by an affiliate of ICG) was encroaching onto their property by more than the original KCI prepared survey showed. ICG claimed there was a defect caused by an error in the survey done by KCI.

- **SummitIG, LLC vs. PEI Engineering & Construction, LLC (PEI) / KCI Technologies, Inc. [KCI Technologies named, but should be KCI Construction Services LLC]**
  Case No: 101283
  Jurisdiction: Circuit Court for the County of Loudoun, Virginia
  Opened: May 2016
  Closed: September 2019

  This was a property damage claim filed by SummitIG, a public service company providing telecommunications services throughout Virginia. PEI, a subcontractor to KCI, damaged SummitIG's conduit and fiber while performing excavation services. PEI claimed the plaintiff, SummitIG, was responsible for incorrectly marking SummitIG's facilities location.

- **The Helga R. Shay Revocable Trust, etc., PLTIF vs. March-Westin Company, Inc. / DFTS / KCI Technologies, Inc. / et al**
  Case No: 18-C-64
  Jurisdiction: Monongalia County, Circuit County, West Virginia
  Opened: July 2018
  Closed: August 2019– Settled

  WVU College Park project was a fast-paced multi-building student housing project. Retaining wall on site had slipped and caused impact to properties below the wall. KCI did not design the retaining wall and was not the geotechnical engineer. KCI also did not approve the retaining wall shop drawings/calculations.

As of May 2024

LITIGATION DISCLOSURE FORM

- **Alexander D. Kunkel vs. Alexander D. Kunkel vs. J.D. Eckman, Inc. / Ford Motor Company / Meaghan Peltier / Robert Talia / Established Traffic Control, Inc. / KCI Technologies, Inc. / Brian Leslie Watkins, PE / Pennsylvania Department of Transportation (PENNDOT) / Bridgestone Americas, Inc.**
  Case No: 2020-00200
  Jurisdiction: Court of Common Pleas Philadelphia County
  Opened: November 2018
  Closed: Ongoing

  Plaintiff was a passenger in a car with six other occupants and half of the passengers were not wearing seatbelts. The driver wrecked the vehicle which overturned and landed on the roof. The plaintiff received multiple injuries including permanent paralysis from the waist down. The accident occurred in a traffic work zone designed by KCI. The driver plead guilty to recklessly endangering another person in addition to other related offenses. KCI was a sub consultant to URS Corporation (now AECOM) for this project.

- **Jesco, Inc. vs. KCI Technologies, Inc.**
  Case No: C-08-CV-18-001151
  Jurisdiction: Circuit Court for Charles County, Maryland
  Opened: November 2018
  Closed: February 2021 – Settled

  Jesco entered into an agreement to purchase a property with the intent of constructing a two-story commercial building, parking areas, and access roads. KCI performed limited geotechnical investigations for Jesco. Based on KCI's findings, Jesco purchased the property. Jesco claimed there were defects and faults in the report and that Jesco incurred losses, costs and expenses as a result.

- **Chasity Jackson & Chris Jackson, et al vs. Metropolitan Government of Nashville & Davidson County, Tennessee / KCI Technologies, Inc. / Stansell Electric Company**
  Case No: 19C-725
  Jurisdiction: Circuit Court of Davidson County Twentieth Judicial District of Tennessee, Twentieth Judicial District of Tennessee
  Opened: February 2020
  Closed: November 2020 – Settled

  Chasity Jackson passed through an intersection and her car ran over the edge of a concrete median that had been recently constructed. The island was alleged to not have been constructed in accordance with KCI's design.

- **George Powell vs. City of San Marcos / 2202 Hunter Road Inv. LP / Don Durden, Inc., DBA Civil Engineering Consultants (CEC)**
  Case No: 19-3078
  Jurisdiction: San Marcos, Texas
  Opened: April 2020
  Closed: December 2022 – Settled

As of May 2024

LITIGATION DISCLOSURE FORM

This claim alleged negligence on the part of CEC as well as the other defendants. Plaintiff claimed the design of a detention pond caused flooding and damage to his property.

- **Jennifer Nicole Moon, Individually and as Administrator of the Estate of Gregory Moon, Deceased, et al vs. Pittman Construction Company / Middle Georgia Paving, Inc / KCI Technologies, Inc. / Georgia Department of Transportation**
  Case No: 20CV0399
  Jurisdiction: Superior Court of Jackson County, Georgia
  Opened: June 2020
  Closed: November 2021 – Settled

  The claim alleged wrongful death of Gregory Moon who was driving his motorcycle through a construction zone in the early morning of June 7, 2018. When attempting to change lanes, Mr. Moon's motorcycle allegedly hit steep uneven pavement causing him to lose control. Mr. Moon later succumbed to his injuries. KCI was hired by GDOT to perform inspection and supervisory work on this paving project.

- **Ronald Thomas and Tamara Thomas vs. South Carolina Department of Transportation, et al**
  Case No: 2019CP3201072
  Jurisdiction: State of South Carolina, County of Lexington
  Opened: November 2020
  Closed: January 2021 – Dismissed

  The claim alleged personal injury resulting from a failure to maintain the project site in a safe condition. The Plaintiffs were driving their motorcycle in a construction zone on May 19, 2017. The allegation was that while changing lanes, the Plaintiffs struck uneven paymentcausing them to lose control of the motorcycle and wreck. KCI was hired by SCDOT to perform inspection services.

- **Susan Galloway, Personal Representative of the Estate of William Andrew Galloway, Deceased vs. Blythe Construction, Inc. / Stay Alert Safety Services, Inc. / South Carolina Department of Transportation / KCI Technologies, Inc. / Infrastructure Consulting & Engineering**
  Case No: 2019-CP-42-04336
  Jurisdiction: State of South Carolina, County of Spartanburg
  Opened: December 2020
  Closed: January 2023 – Dismissed

  The claim was based on a fatal car accident that occurred on December14, 2017. The claim alleged that due to limited visibility created by the contours of the road and lack of signage warning of a construction zone, Mr. Galloway was unaware that traffic was stopped ahead and was, therefore, unable to stop to avoid colliding with a stopped vehicle directly ahead of him. KCI was hired by SCDOT to perform inspection services.

- **Edward Zambito and Linda Zambito, both Individually and as the Co-Executors of the**

As of May 2024

LITIGATION DISCLOSURE FORM

Estate of Allie Rose Zambito, Deceased vs. A-Del Construction Co, Inc. / Jonas Stoltzfus t/a Stoltzfus Meats & Deli / Neal Toros / KCI Technologies, Inc.
Case No: 210600429
Jurisdiction: Court of Common Pleas Philadelphia County
Opened: November 2021
Closed: August 2023 – Dismissed

The claim was based on a fatal accident that occurred when a pedestrian was attempting to cross at an intersection under construction in the evening on June 21, 2019. The intersection did not have a sidewalk and construction barriers were in place. KCI was hired by DelDOT to perform inspection services.

- **Shelton Powell v. Sheldon Miner / Mumford and Miller Concrete, Inc. / KCI Technologies, Inc.**
  Case No: N20C-12-149 MMJ
  Jurisdiction: In the Superior Court of the State of Delaware
  Opened: November 2021
  Closed: July 2023 – Motion for Summary Judgment granted

  Plaintiff was a passenger in a vehicle traveling through a construction zone on December 17, 2019. The vehicle allegedly drove through mud on the road causing the vehicle to crash, thereby, injuring the passenger. KCI was hired by DelDOT to perform inspection services.

- **Richard A. Brinkley v. Sheldon Miner / KCI Technologies, Inc.**
  Case No: N21C-11-115 VLM
  Jurisdiction: In the Superior Court of the State of Delaware
  Opened: April 2022
  Closed: June 2023 – Dismissed

  Plaintiff was an employee of Mumford and Miller Concrete, Inc., working at a project site when he was allegedly struck by a vehicle driven negligently by Sheldon Miner on December 17, 2019. KCI was hired by DelDOT to perform inspection services.

- **UC Athletic, LLC v. McMillan Pazdan Smith, LLC / KCI Associates of North Carolina, P.A.**
  Case No: 2021-CP-46-02683
  Jurisdiction: State of South Carolina, County of York
  Opened: September 2022
  Closed: Ongoing

  Plaintiff is a developer who hired the architect, McMillan Pazdan Smith who contracted with KCI for certain structural design services. UCA alleges a breach of duty of care and implied warranty against KCI.

- **Arthur Lee Adams, Jr. as Personal Representative of the Estate of Pamela Adams Powell v. SC DOT / Zachary Construction Corp. / Michael Baker International, Inc. / KCI / et al.**

As of May 2024

LITIGATION DISCLOSURE FORM

Case No: C.A. No: 2022-CP-32-00121
Jurisdiction: State of South Carolina, County of Lexington
Opened: February 2023
Closed: April 2024 - Settled

This litigation involves a fatality on I-20 of when a car was traveling on the shoulder of the highway as part of the maintenance of traffic pattern and a tree fell on the decedent's car during a high wind event. The accident occurred within the limits of the I-20 widening project and KCI was providing construction engineering and inspection services.

- **Victor Hans Santillana v. State of Florida Department of Transportation / Asphalt Group, Inc. / KCI Technologies, Inc.**
  Case No: 2023-CA-000688-0001-XX
  Jurisdiction: Circuit Court of the 20th Judicial Circuit, Collier County, Florida
  Opened: September 2023
  Closed: March 2024 – Settled

  Plaintiff crashed his motorcycle as he changed lanes from one lane that had been milled for repaving and the other lane that had not yet been milled. KCI was performing inspection services on behalf of the Florida Department of Transportation for the repaving project.

- **Novanetto, LLC dba Prose Nails Riverwalk / Dolores Novak / Andrea Fascinetto v. R Jordan Design Group, LLC dba The Jordan Group / KCI Technologies, Inc. / Jack Laurence Corporation**
  Case No: 2023CI21293
  Jurisdiction: 57th District Court, Bexar County, Texas
  Opened: October 2023
  Closed: Ongoing

  Plaintiff is a tenant of a building and hired an interior design firm for the design of the leased space where a nail salon was to be located. The interior design firm subcontracted with KCI for certain mechanical engineering and design services. Plaintiff alleges negligence in the provision of mechanical engineering duties.

- **Estate of Widmann, Jr. and David J. Widmann, Sr. v. Rondell Bradley / PennDOT / Bristol Township / URS Corporation / AECOM Technical Services, Inc. / KCI Technologies, Inc.**
  Case No: 2022-05562
  Jurisdiction: Court of Common Pleas of Buck County, Pennsylvania
  Opened: December 2023
  Closed: Ongoing

  This litigation involves a 2022 motorcycle accident on Bristol Pike in Bristol, PA. The accident occurred when the driver of an SUV turned left over double solid yellow lines and contrary to posted no-left turn signs and struck the motorcycle traveling toward him. Bristol Pike underwent reconstruction in the vicinity of the accident between 2013 and 2016, and KCI was a subconsultant to URS Corporation (now AECOM) as part of the design of that project.

As of May 2024

LITIGATION DISCLOSURE FORM

- **Matthew P. Pinckney v. Tommy W. Welch dba Tommy Welch Livestock / Tommy Bradley Welch dba TBW Cattle / Cary A. Fields / South Carolina Department of Transportation / Blythe Construction, Inc. / Zachry Construction Corporation / Blythe Construction Inc. - Zachry Construction Corporation, a Joint Venture / KCI Technologies, Inc. / Infrastructure, Consulting & Engineering, PLLC / Johnson, Mirmiran and Thompson, Inc.**
  Case No: 2023-CP-11-00031
  Jurisdiction: State of South Carolina, Court of Common Pleas for the Seventh Judicial Circuit
  Opened: February 2024
  Closed: Ongoing

  The litigation is based on a car crash that occurred on March 3, 2021, whereby Plaintiff was stopped in traffic and struck from behind by a tractor trailer within the construction zone of the I-85 widening project. KCI was performing inspection services under a contract with South Carolina Department of Transportation.

SENATE BILL 19 VERIFICATION

SENATE BILL 19 VERIFICATION

I, Dawn Green, PE, the undersigned representative of

KCI Technologies, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) "Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.

2) "Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.

3) "Discriminate against a firearm entity or firearm trade association":

a) means, with respect to the entity or association, to:

i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;

ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or

iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and

b) does not include:

(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and

(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:

(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

SENATE BILL 19 VERIFICATION

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*

   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*

   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earnings inures to the benefit of any private shareholder or individual;*

   b) *has two or more firearm entities as members; and*

   c) *is exempt from federal income taxation under Section 50l(a), Internal Revenue Code of 1986, as an organization described by Section 50l(c) of that code.*

Firm No. F-4105

Submitted to City of Edinburg:
Opening Date: July 16, 2024,
Opening Time: 3:00 p.m.

UNDERSTANDING OF THE PROJECT

City of Edinburg is seeking to contract with a competent engineering firm, registered and licensed in the State of Texas with experience in the following areas:

- *Roadway, Bridge and General Design and Construction*

Specifically the City of Edinburg, through this RFQ, seeks to engage in a contract with a qualified firm to perform services for Engineering Services for a term of two (2) years.

L&G Engineering (L&G) expects the majority of the proposed work to involve transportation related projects; developing some projects from "cradle to grave" and completing others that have been started.

We understand that the type of funds used on each specific project will dictate a large amount of the project's constraints such as specifications, design requirements, and the amount of resource agency coordination necessary. Regardless of the type of funding for a particular project, the following four types of engineering services will generally be required.

- ***Advanced Project Development (APD)***
  - Route and Design Studies
  - Social, Economic, Environmental Studies, and Public Involvement
  - Right of Way Maps and Data and Design Surveying
  - Compensable Utilities (Utility Exhibits & Adjustments)
- ***ROW Acquisition / Design and Plans, Specifications, and Estimate (PS&E)***
  - Right of Way Acquisition (As Needed)
  - Roadway Design & Bridge Design
  - Drainage & Hydraulic Reports
  - Traffic Control Plan/Signing, Markings and Signalization
  - Plans, Specifications, and Estimates and Bid Preparation
- ***Construction Contract Management & Inspection***
  - Construction Materials Engineering and Testing
  - Design for New Construction and Alterations/Renovations
  - Needs Assessment and ADA compliance
  - Code Analysis and Cost Estimating
- ***Geotechnical and Special Services***
  - Soil and Foundation studies
  - Pavement Design
  - Water & Solid Waste Retention/Disposal

Advanced Project Development (APD)

The APD portion of the project involves conducting the preliminary studies and research necessary to make informed decisions about the various aspects of the project. Route and design studies involve the development of different alternatives to achieve the desired result. These alternatives are compared to each other within a matrix on the basis of various environmental, social, and economic as well as political factors and the alternative that results in the least amount of adverse effects and/or the greatest amount of benefit to the general public is selected as the preferred alternative.

There are several types of information gathered during this phase of project development and one of the first is surveying information. During the route study phase, only general surveying information is gathered. A land ownership map can be developed for use in placing alternative alignments and sporadic elevations can be obtained to determine the general lay of the land. An aerial photograph of the project location can also be obtained for use during the public involvement phase. Once a preferred alternative is selected, then design surveys are completed and used for the design of the proposed facility. A digital terrain model is developed and topographic information is gathered on existing features.

The Right of Way information that is gathered during this phase will also be used during the acquisition of ROW. Parcel sketches and ROW map are developed by a registered public land surveyor and turned

over to the acquiring agency only after a FONSI has been issued, in the case of state or federally funded projects, or after the City feels that a preferred alternative exists. The parcels are appraised and negotiations with the property owners begin.

Environmental information is also gathered during this portion of the project. Any "fatal flaws" such as cemeteries, parks, or hazardous material dump sites, that might exist within the project limits are identified and mapped accordingly to attempt to avoid affecting them. Also, any potentially occurring endangered species are identified and an evaluation is made whether any habitat is present within the project. If so, each alternative's effects on that habitat are evaluated. Also, noise and air quality analyses are performed on a qualitative basis for each alternative and the project's effect on the social environment is also evaluated. All of this is used to help select the preferred alternative.

ROW Acquisition / Design and Plans, Specifications, and Estimate (PS&E)

Once a preferred alternative is selected and presented at a public hearing, then a design schematic is developed as a precursor to the development of the construction plans. The primary purpose of the Plans, Specifications, and Estimate (PS&E) is to provide a complete and accurate set of contract bid and construction documents. Accuracy is essential in that this will allow for (a) prospective bidders to prepare a cost-effective bid, (b) for construction of the project to be performed efficiently, and (c) for a record of "as-built" of proposed roadway improvements.

Some of the projects may require additional Right of Way based on the typical section being proposed. Our Right of Way (ROW) Section will provide comprehensive acquisition provider services. Services include right of way map and field note review, coordination of parcel identification, appraisals and appraisal review, negotiations, title curative matters, closing services, relocation assistance of residential and business displacements, condemnation support and project administration. All ROW Acquisition services will be done in accordance with Titles II & III of the Federal Uniform Act as amended. Records of this process will be kept in an organized fashion so that the Federal Highway Administration (FHWA) can conduct an audit to determine Uniform Act compliance, if necessary.

These roadway projects may require the preparation of a PS&E package, which will be developed in accordance with applicable City, County and TxDOT specifications and requirements. Guidelines and requirements include the **TxDOT "Roadway Design Manual**, the **TxDOT "Bridge Design Guide"** and **"Bridge Detailer's Manual", the TxDOT "Hydraulic Design Manual", AASHTO "Roadside Design Guide"** and **Specifications for Streets and Bridges", EPA "Stormwater Management Requirements, TxDOT Project Development Process Manual (PDP)"**, the **"Texas Manual of Uniform Traffic Control Devices"** and the various City of Edinburg and/or TxDOT roadway, traffic, and bridge CADD standards.

Preliminary reports might be required by TxDOT or FHWA such as bridge scour reports, preliminary bridge layout submittals and hydraulic reports. Preliminary meetings, such as a preliminary concept conference where all major stakeholders are invited, and the general purpose/need for the project is discussed are important steps in developing the required design criteria. TxDOT "PDP" and AASHTO's "Policy on Geometric Design of Highways and Streets" are used to develop the final criteria. The design criteria is essentially refined from the APD stage and is based on ADT, terrain type, and design speed, from which are determined the cross-sectional geometrics such as lane width, medial type/width, shoulder width, bridge width, side slopes/ditch section, obstruction clearance, and ROW width. The criteria for horizontal (max curve) and vertical (max grade) roadway alignment must also be determined.

With respect to hydraulic design, a preliminary site evaluation, including identifying topo/existing ROW, drainage areas, primary/secondary drainage systems, FEMA flood plain requirements, and mitigation issues is conducted to determine possible solutions to the various design problems. We will strive to gather data via on-site investigations to ensure PS&E production is based on accurate and thorough information. This assures sufficient identification of flow patterns, which produces accurate calculation of time of concentration and peak run-offs. The gathering of this on-site information

guarantees accurate water surface elevations, as well as thorough knowledge of the flows of the outfall channels. These pro-active on-site investigations target flow obstructions such as channel and roadways, which alter natural drainage patterns which may require mitigation.

Early coordination of project outfall and crossing locations with respective controlling agencies will be essential in determining each project's drainage requirements. In accordance with the TxDOT "Hydraulic Manual", the existing and proposed sections will be checked for conveyance of the 100 year storm, culverts will be designed for 25 years and inlets and pipes for 2 years and 5 years respectively, depending on the functional classification of the roadway facility. A drainage study will be performed to determine proposed roadway impacts, drainage areas, discharges, FEMA floodway requirements, mitigation issues, culvert locations and sizes, capacity of the existing and proposed structures, design frequency, flow, tail water and headwater elevations for design and 100-year flood velocities, and anticipated overtopping of the roadway.

Traffic Control Plan (TCP) documents are included in projects where it is necessary to maintain traffic through the project during construction. Safety is the primary concern when it comes to the development of the TCP. The plans, specifications and estimates together constitute the bidding documents and are thoroughly reviewed for correctness and errors.

Construction Contract Management, Inspection & Material Testing

Construction contract management involves the inspection of construction methods and materials to ensure compliance with the plans and specifications. Construction inspection is a vitally important part of the project. A daily presence at the job site and constant communication with the Contractor as well as adequate amounts of CMT are key elements to a successful construction contract management program and successful construction of a project. There are several different tests that are needed to ensure proper construction methods and materials are being used. The most common is the Moisture-Density test, or Proctor Test. This test determines the moisture density curve of a material used to establish maximum density at a given optimum moisture condition. This is used in tandem with Field Density testing for roadbed materials typically completed through use of Nuclear Density Machine. ACP and concrete testing for quality assurance are equally important as well. Density testing and ACP testing allows for establishment of ACP rolling patterns and confirmation of compaction requirements. Other tests that are most typical in construction include, but are not limited to, the determination of Atterberg Limits, Sieve Analyses, Extraction/Sieve Analysis/Asphalt Content, Concrete Compression Tests, and Concrete Slump Tests.

Geotechnical and Special Services

Geotechnical drilling is typically completed through our in-house drilling rigs and we have capabilities for both Texas Cone Penetrometer (TCP) and Standard Penetration Testing (SPT) testing. We are familiar with all current test procedures for laboratory testing of materials from ASTM and TxDOT and our laboratory is accredited by AASHTO/AMRL. Our Geotechnical engineering services include, but are not limited to, foundation analysis and design (bearing capacity, settlement, deep foundations, etc.), earth structure analysis, slope and global stability analysis, retention systems analysis, soil stabilization, pavement analysis and design. We are very familiar with the local geographic area. All of our task leaders have worked for TxDOT Pharr District and have gained a thorough understanding of the unique problems that we are faced with in City of Edinburg.

L&G Engineering (L&G) has read the Professional Service Agreement and meets all the prerequisite insurance requirement.

FIRM INFORMATION

L&G Consulting Engineers, Inc. dba L&G Engineering (L&G) is a transportation engineering consulting firm, established in 2001 with two offices in the Rio Grande Valley. L&G was established to provide clients with the highest quality of engineering services. The administration office is located in Mercedes and the engineering office is in Mission, Hidalgo County, Texas. Since its inception, L&G has contracted projects with a variety of private and public entities including, but not limited to cities and counties in the Rio Grande Valley and South Texas, the Federal Highway Administration (FHWA) and the Texas Department of Transportation (TxDOT) in the Pharr and San Antonio Districts. L&G provides a wide range of professional services which include transportation planning and feasibility studies, environmental documentation and public involvement, roadway schematics and design, bridge and structural design; hydraulic and hydrologic engineering, and geotechnical and right of way acquisition services. L&G professional and production staff have valuable experience in providing Transportation Engineering Services and are pre-certified by TxDOT, is registered with the Texas Board of Professional Engineers and is certified as a Historically Underutilized Business (HUB). L&G is local and the production staff consists of eleven (11) multi-disciplined Professional Engineers, five (5) Engineers in Training (EIT)/Graduate Engineers, two (2) Environmental Specialists, seven (7) Right-of-Way Acquisition Service Providers, one (1) Utility Coordination Specialists, two (2) GIS Analysts, and twenty three (23) Engineering Support Technicians, two (2) Geotechnical & CMT Laboratory Managers and five (5) Geotechnical & CMT Support Technicians. Additional administrative support staff consists of one (1) contract manager and four (4) administrative assistants. L&G's managerial staff is pre-certified by TxDOT and have TxDOT's Certification in Local Government Project Procdures.

Texas Board of Professional Engineers
CERTIFICATE OF REGISTRATION

L & G Consulting Engineers Inc
DBA L & G Engineering

HUB
L & G CONSULTING ENGINEERS, INC.

L&G Right of Way (ROW) Division:

The ROW section (L&G ROW) provides comprehensive acquisition provider services. Services include right of way map and field note review, coordination of parcel identification, appraisals and appraisal review, negotiations, title curative matters, closing services, relocation assistance of residential and business displacements, condemnation support and project administration. The ROW staff has been contracted to acquire over 900 parcels in the last twenty (21) years. In every project that L&G has worked on, ROW acquisition has always been a critical path and L&G has developed plans to expedite the acquisition process to meet the project schedule. L&G's ROW staff has worked with numerous appraisers and review appraisers, both local as well as outside the Rio Grande Valley. In addition, L&G has worked with various title companies in order to provide timely closings.

L&G Utility Specialty Division:

The Utility Specialty Group (L&G Utility) provides utility location and coordination services. L&G understands that utility impacts and adjustments are frequently required for civil type projects. Our in-house utility group provides our Clients with utility company coordination, documentation and record keeping (project utility binder). L&G is also very knowledgeable in the process contained in the TxDOT Utility Accommodation Policy especially as it relates to the Compensable Utility Process. L&G Utility Coordinators work closely with the L&G design groups on all projects to ensure the best paths (least impacted areas) are being utilized.

L&G Environmental Division:

The Environmental Division (L&G Env.) consists of environmental scientists and GIS analysts tasked with assessing a project's impact on environmental issues, documenting such impacts in Technical Reports and summarizing all issues in an Administratively Complete Document. These reports assess environmental issues such as air/noise, water resources including wetlands, biological and cultural resources, hazardous materials, community and indirect/cumulative impacts. In addition, this division conducts ASTM Phase I Environmental Site Assessments, Phase

L&G Engineering

II Subsurface Investigations and develops remediation plans and oversees Phase III Remediation on sites and properties. They develop environmental constraint maps and matrices, conduct bird surveys, wetland delineations and environmental permitting. This division is well versed in coordination with resource agencies on the development of mitigation plans with special emphasis on wetlands, threatened/endangered species and habitat restoration. This division oversees the organizing, scheduling, and coordinating of Public Involvement activities associated with all projects.

L&G Engineering Laboratory Division:

L&G Engineering Laboratory is a Construction Materials Testing (CMT) Laboratory and Geotechnical Engineering branch of L&G (L&G Lab). L&G Lab has a wealth of experience in providing CMT and Geotechnical Engineering services for projects of various scopes including but not limited to Transportation Projects (Highways and Bridges), Municipal Projects (Solid Waste Facilities, Water and Wastewater Treatment Plants, Storage Tanks), Structural Projects (School Building Facilities, Retaining Walls, Commercial Buildings), and Geotechnical Projects (Levee Rehabilitation and Reconstruction, Foundation Design, Pavement Design). L&G Lab provides a fleet of three (3) fully functional drilling rigs and support trucks in-house to provide our Clients with a total package Geotechnical Consultant.

SCOPE OF SERVICES

What Can L&G Do For You?

The L&G Team is extremely familiar with providing the services outlined on various and multi-faceted projects (especially those dealing with Transportation, Utilities, Drainage, Environmental, Strucutral, Geotechnical, and Construction Phase Services).

Project Management & Planning Services

- Program & Project Management
  - General Program Management (To Ensure Design/Construction Meets Requirements for Reimbursements on Reimbursable Funds Projects)
  - Project Management of all Civil & Transportation Projects
- Planning Services
  - Infrastructure Improvement Plans, Project Need Evaluations & Assessments, Pavement Management Plans

Civil Design Services

- Preliminary Engineering
  - Geometric Schematic & Typical Sections
  - Utility Investigations & Analysis (L&G has an in-house Utility Specialty Group)
  - ROW Investigations (L&G has an in-house ROW Acquisition Group)
  - Environmental Reports & Public Meetings (L&G has an in-house Environmental Group)
  - Geotechnical Investigations (L&G has an in-house Geotechnical Group – L&G Lab)
- Plans, Specifications & Estimates (PS&E)
  - Geometric Design (Horizontal & Vertical Alignments, Plans & Profiles (P&P), Layouts)
  - Hydrologic & Hydraulic Design (Drainage Area, Hydraulic Master Plans, Channel Analyses)
  - Structural Design (Bridge Design & Details, Specialty Structural Design)
  - Pavement Design (Flexible & Rigid Pavements, Pavement Structure Analyses)
  - Environmental Design (SWPPP, EPIC Sheets)
  - Traffic Design (Traffic Counts, Analysis of Traffic Movements)
  - Design Packaging (Specifications, Construction Estimates, General Notes, Special Provisions)
- Bid Assistance
  - Preparation of Bid Package, Bid Announcement, Review of Bidder Information, Bid Award

Civil Construction Services

- Construction Management & Inspection
  - Construction Management Team will Ensure All Construction Activities are completed On Time, On Budget and In Accordance with the Specifications & Contract Documents.
- Construction Material Testing (L&G has an in-house CMT Group – L&G Lab)
  - Testing of Soils, Concrete, ACP, Masonry & All Other Building Materials for Adherence to Specification and Contract Documents

FIRM EXPERINCE AND QUALIFICATIONS

L&G's staff has completed numerous transportation infrastructure projects for TxDOT in the Cities of Mission, Pharr, McAllen, Hidalgo, Palmview, San Benito, Harlingen, HCRMA, CCRMA, and the Counties of Hidalgo, Starr, Willacy and Cameron. As such, L&G is fully cognizant of all applicable Federal, State and local codes, ordinances, regulations and standards relating to transportation and infrastructure engineering. L&G prides itself in the ability to provide personalized quality-assured service and timely response to each project.

PROJECT DESCRIPTION: Schematic, Environmental, PS&E, ROW, Construction Mgmt.
PERSONNEL: J. Garza, A. Sandoval, D. Tijerina, J. Madrigal, V. Garcia, L. Gonzalez, R. Gallaga

PROJECT: FM 1925
LIMITS: From Kenyon Rd. to FM 907 (Full PS&E), FM 907 to Sharp Rd. (Schematic)
CLIENT: Hidalgo County, Pct. 4
CLIENT REFERENCE: Ellie Torres, Commissioner Pct. #4 (Current) (956) 383-3112
PROJECT DESCRIPTION: Completed Schematic, Environmental, PS&E, ROW Determination
PERSONNEL: J. Garza, B. Badiozzamani, V. Garcia, J. Sinclair

L&G Engineering

PROJECT: Inspiration Rd.
LIMITS: From US 83 Expressway to Mile 3
CLIENT: City of Mission
CLIENT REFERENCE: JP Terrazas - City of Mission Engineer (956) 580-8662
PROJECT DESCRIPTION: Completed Schematic, Environmental, PS&E, ROW Determination
PERSONNEL: J. Garza, A. Sandoval, D. Tijerina, V. Garcia

PROJECT: Regional Linear Park Project
LIMITS: S. San Antonio Ave. (San Juan) to 2nd Street to Hall Acres Rd
CLIENT: Hidalgo County Pct. 2
CLIENT REFERENCE: Eduardo "Eddie" Cantu, Commissioner Pct. 2, (956) 787-1891
PROJECT DESCRIPTION: Schematic, Environmental, ROW, PS&E, Construction Management
PERSONNEL: J. Garza, B. Badiozzamani, D. Saenz, J. Sinclair, V. Garcia, R. Gallaga, L. Gonzalez

PROJECT: Anzalduas Road Extension
LIMITS: From International Bridge, North to Expressway 83
CLIENT: Mission Redevelopment Authority
CLIENT REFERENCE: Mr. Pete Alvarez, P.E., TxDOT District Engineer, - (956) 702-6100
PROJECT DESCRIPTION: Completed PS&E, including Bridge Design and Lighting
PERSONNEL: J. Garza, B. Badiozzamani, A. Sandoval, D. Tijerina, D. Saenz

PROJECT: Mission Lateral Project
CLIENT: Hidalgo County Drainage District No. 1
CLIENT REFERENCE: Raul Sesin, P.E., CFM. General Manager, (956) 292-7080
PROJECT DESCRIPTION: Professional Eng. Services – PS&E
PERSONNEL: J. Garza, B. Badiozzamani, A. Sandoval, D. Tijerina

JACINTO GARZA, P.E

EDUCATION

Texas A&I University, Bachelor of Science in Civil Engineering, 1984

PROFESSIONAL REGISTRATION

Professional Engineer, State of Texas, 1991, #68941

PROFESSIONAL ASSOCIATIONS & CERTIFICATIONS

TxDOT Certification in Local Government Project Procedures

PROFESSIONAL EXPERIENCE

President/CEO L&G Engineering	2001 – Present
City of Mission Transportation Consultant	2001 - 2018
City of Mission RGVMPO Technical Representative	2001 – Present
City of Harlingen Transportation Consultant	1999 - 2008
Cities of Harlingen/San Benito RGVMPO Technical Representative	1997 – 2005
Hidalgo County RGVMPO Technical Representative	1999 - Present
City Engineer - City of Harlingen	1997 - 2000
Area Engineer - TxDOT Raymondville, Texas	1996 - 1997
Associate Area Engineer - TxDOT Pharr Area Office Pharr, Texas	1993 – 1996
Surveying Coordinator - TxDOT Pharr District	1988 - 1997

EXPERIENCE

Mr. Garza has over 35 years of engineering experience on transportation related projects. He spent his early years at TxDOT working in different capacities in the Pharr and Houston Districts. After serving as a city engineer for the City of Harlingen, Mr. Garza established L&G Consulting Engineers, Inc. in 2001 to provide clients the highest quality of engineering services. As CEO/President, Mr. Garza oversees all administrative, engineering and laboratory operations of the company. He is responsible for meeting with current and potential clients to provide progress reports on ongoing projects and to solicit new projects. As a Technical Representative in the RGVMPO, he provides input on upcoming projects in the metropolitan transportation plan and educates his clients on upcoming project funding. Mr. Garza attends city and county commissioner's courts to address any questions on projects. He meets with project stakeholders and is involved in the public involvement process of the projects.

L&G Engineering

ARMANDO J. SANDOVAL, P.E.

EDUCATION

University of Texas at Austin, Bachelor of Science in Civil Engineering, 1991

PROFESSIONAL REGISTRATION

Professional Engineer in the State of Texas since 1997, Serial No. 82753

PROFESSIONAL EXPERIENCE

Vice-President/Senior Project Engineer, L&G Engineering	2001- Present
Senior Project Engineer, TEDSI Infrastructure Group	1999 – 2001
Bridge Design Engineer, TxDOT Pharr District	1993-1999
Bridge Designer, TxDOT Houston District	1991-1993

EXPERIENCE

Mr. Sandoval has *over 28 years of transportation engineering experience* on transportation related projects. As ***Vice-President/Senior Project Engineer*** with L&G Engineering, Mr. Sandoval is responsible for overseeing the design and plan development of hydraulic, and roadway projects in South Texas.

IN THE AREA OF DESIGN

ROADWAY DESIGN: Mr. Sandoval has completed and overseen the completion of several roadway projects in the Pharr District. He utilized GEOPAK to develop alignments and cross-sections. He also coordinated with various different entities to ensure timely project completion and ensured accurate and complete PS&E packages were submitted to the Design Division for processing.

HYDRAULIC DESIGN:

Mr. Sandoval has *developed hydrologic studies for more than 20 years* including rainfall runoff determination, reservoir and channel routing, designed and/or analyzed the hydraulics on several open channels, storm drain systems and culverts.

Mr. Sandoval has also managed and overseen the design of several major transportation projects in South Texas including US83 and I2 projects which required detention analysis in addition to storm drain design. Mr. Sandoval has performed bridge hydraulics including slope-conveyance and backwater calculations for scour analyses and sizing of bridges for several major and minor crossings. Mr. Sandoval has also performed culvert hydraulic analyses and designs based on traditional energy methods as well as storm sewer designs for several roadway projects.

Mr. Sandoval is currently overseeing the development of hydraulic design for the Mission Lateral Project in Hidalgo County. The project is part of the recent Bond projects that are being designed to mitigate flooding throughout Hidalgo County and require the design and analysis of very large watersheds using the latest HEC software.

Mr. Sandoval is also currently overseeing the hydraulic design for the I2/I69C Interchange project in Hidalgo County. This project is unique in that it is one of the first projects that TxDOT is incorporating detention ponds into the project. Mr. Sandoval also has extensive experience using ESRI software to delineate watershed basins based on any type of digital elevation data, including high resolution LiDAR data. He has developed proprietary algorithms to expedite not only the delineation, but also the characterization of watersheds based on various GIS data that is readily available or relatively easy to obtain.

BEHROOZ BADIOZZAMANI, P.E.

EDUCATION

University of Texas at Austin, Bachelor of Science in Civil Engineering, 1976
Texas A&I, Master of Science in Civil Engineering, 1979

PROFESSIONAL REGISTRATION

Professional Engineer in the State of Texas since 1983, Serial No. 53972

PROFESSIONAL ASSOCIATIONS & CERTIFICATIONS

TxDOT Certification in Local Government Project Procedures

PROFESSIONAL EXPERIENCE

Executive Vice President of Engineering Operations– L&G Engineering	2008 – Present
Deputy District Engineer – TxDOT Pharr District Office	1993 – 2008
Director of Transportation Planning & Development / Deputy District Engineer	1999 – 2008
Supervising Resident Engineer – TxDOT Pharr Area Office	1990 – 1993
District Design Engineer – TxDOT Pharr District	1987 – 1990
Assistant District Design Engineer – TxDOT Pharr District	1985 – 1987
District Bridge Engineer – TxDOT Pharr District	1983 – 1985
Engineering Assistant (District Design Section) – TxDOT Pharr District	1980 – 1983
Recipient of the TxDOT Luther DeBerry Award	2004

EXPERIENCE

Mr. Badiozzamani has *over 40 years of transportation engineering experience* on transportation related projects. He spent 28 years with TxDOT and 15 years with L&G Engineering. Mr. Badiozzamani served in many capacities with TxDOT as well as Deputy District Engineer for fifteen years. He is also the recipient of the TxDOT Luther DeBerry Award for outstanding contributions toward transportation in the State of Texas in 2004. As Executive Vice President of Engineering Operations with L&G Engineering, Mr. Badiozzamani is responsible for ensuring that all deliverables related to financing, design, ROW, environmental and construction are met and in a timely manner. In addition, he is responsible for QC/QA for all deliverables to clients.

IN THE AREA OF ROW MAPPING & ACQUISITION

As Executive Vice President of Engineering Operations with L&G Engineering, Mr. Badiozzamani oversees the ROW Administrator and staff with a heavy work load to ensure all ROW Acquisitions are conducted in a timely manner, follow Title II and III of the Uniform Act and Uniform Relocation and Real Property Acquisition Policies and are within budget.

IN THE AREA OF ROADWAY DESIGN

As Executive Vice President of Engineering Operations with L&G Engineering, Mr. Badiozzamani oversees the engineering groups responsible for the plans, specifications and estimates for L&G projects. He is responsible for the QC/QA of all design work and ensures the projects receive bids for construction and within budget.

IN THE AREA OF STRUCTURAL DESIGN

As Executive Vice President of Engineering Operations with L&G Engineering, Mr. Badiozzamani oversees the engineering group responsible for the design of bridges for L&G projects. He was responsible for the QC/QA of the bridge layouts and designs of bridge class structures.

IN THE AREA OF GEOTECHNICAL ENGINEERING

As Executive Vice President of Engineering Operations with L&G Engineering, Mr. Badiozzamani oversees the geotechnical testing and design for structures and retaining walls for L&G projects.

CERTIFICATE OF REGISTRATION

This acknowledges that

L & G Consulting Engineers Inc

L & G Engineering

has fulfilled the requirements of the Texas Board of Professional Engineers and Land Surveyors to offer and perform engineering services in the state of Texas.

Registration Number
F-4105

Expiration Date
8/31/2024

The Texas Comptroller of Public Accounts (CPA) administers the Statewide Historically Underutilized Business (HUB) Program for the State of Texas, which includes certifying minority, woman, and service disabled veteran-owned businesses as HUBs and facilitates the use of HUBs in state procurement and provides them with information on the state's procurement process.

We are pleased to inform you that your application for certification/re-certification as a HUB has been approved. Your company's profile is listed in the State of Texas HUB Directory and may be viewed online at https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp. Provided that your company continues to meet HUB eligibility requirements, the attached HUB certificate is valid for the time period specified.

You must notify the HUB Program in writing of any changes affecting your company's compliance with the HUB eligibility requirements, including changes in ownership, day-to-day management, control and/or principal place of business. *Note: Any changes made to your company's information may require the HUB Program to re-evaluate your company's eligibility.*

Please visit our website at http://comptroller.texas.gov/procurement/prog/hub/ and reference our publications (i.e. Grow Your Business pamphlet, HUB Brochure and Vendor Guide) providing addition information on state procurement resources that can increase your company's chances of doing business with the state.

Thank you for your participation in the HUB Program! If you have any questions, you may contact a HUB Program representative at 512-463-5872 or toll-free in Texas at 1-888-863-5881.

Texas Historically Underutilized Business (HUB) Certificate

HUB
Statewide Historically Underutilized Business Program

Certificate/VID Number:	**1743007928900**
File/Vendor Number:	**006240**
Approval Date:	**07-APR-2021**
Scheduled Expiration Date:	**07-APR-2025**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

L & G CONSULTING ENGINEERS, INC.

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed 09-APR-2021, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day-to-day management, operational control, business location) provided in the submission of the business' application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

Rev. 06/19

TEXAS Health and Human Services | Texas Department of State Health Services

RADIOACTIVE MATERIAL LICENSE

Pursuant to the Texas Radiation Control Act and Texas Department of State Health Services (Agency) regulations on radiation, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess and transfer radioactive material listed below; and to use such radioactive material for the purpose(s) and at the place(s) designated below. This license is subject to all applicable rules, regulations and orders of the Agency now or hereafter in effect and to any conditions specified below.

LICENSEE			
1. Name	L&G CONSULTING ENGINEERS INC DBA L&G ENGINEERING ATTN ELOY CASARES	3. License Number	L06671
2. Address	2100 W EXPRESSWAY 83 MERCEDES TX 78570	4. Expiration Date	October 31, 2024
		Amendment Number	02

This license is amended in accordance with correspondence dated January 8, 2020.

5. Radioisotope	6. Form of Material	7. Maximum Activity	8. Authorized Use
A. Americium-241/Beryllium	A. Sealed source (QSA Model AMN.V997; EZ Model Am1.NO2)	A. 1 source not to exceed 44 millicuries	A. Measurement of physical properties using Humboldt Scientific Inc. (HSI) Model 5001 moisture/density gauge.
B. Americium-241/Beryllium	B. Sealed source (QSA Model AMN.V997; EZ Model Am1.NO2)	B. **5 sources** not to exceed 44 millicuries each	B. Measurement of physical properties using Instrotek, Inc. Model 3500 moisture/density gauge.
C. Cesium-137	C. Sealed source (QSA Model CDC.805; EZ Model HEG-137)	C. 1 source not to exceed 11 millicuries	C. Measurement of physical properties using HSI Model 5001 moisture/density gauge.
D. Cesium-137	D. Sealed source (QSA Model CDC.805; EZ Model HEG-137)	D. **5 sources** not to exceed 11 millicuries each	D. Measurement of physical properties using Instrotek, Inc. Model 3500 moisture/density gauge.

RADIOACTIVE MATERIAL LICENSE

LICENSE NUMBER	AMENDMENT NUMBER
L06671	02

9. A. Radioactive material shall be stored and used at:

Site Number	Location
000	Mercedes – 2100 West Expressway 83 (Main Site)
001	Mission – 900 South Stewart Road, Suites 6 and 7

B. The authorized place of use is at temporary sites, in areas not under exclusive Federal jurisdiction, throughout Texas. The licensee is authorized to store radioactive material at a temporary site up to 90 days in any twelve-month period.

10. This license is issued in accordance with Title 25 Texas Administrative Code §289.252(e), "General requirements for the issuance of specific licenses."

11. The individual designated to perform the functions of Radiation Safety Officer (RSO) for activities covered by this license is Eloy Casares.

12. Radioactive material shall only be used by individuals who have successfully completed the training described in the letter dated October 3, 2014.

13. Sealed sources or source rods containing radioactive material shall not be opened or sources removed or detached from source rods or gauges by the licensee, except as specifically authorized.

14. The licensee shall conduct at intervals not to exceed six-month visual inspections and operational checks of all gauges to ensure that the equipment is in good working condition, the sources are adequately shielded, and required labeling is present and legible. A record of each inspection shall be maintained for inspection by the Agency for three years and shall include the date of the inspection, name and signature of the individual performing the inspections, equipment involved, any problems found, and what, if any, corrective action was taken.

15. Any cleaning, maintenance or repair of the gauges that requires detaching the source or source rod from the gauge shall be performed only by the manufacturer or other persons specifically licensed by the Agency, the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.

RADIOACTIVE MATERIAL LICENSE

LICENSE NUMBER	AMENDMENT NUMBER
L06671	02

16. Except as specifically provided otherwise by this license, the licensee shall possess and use the radioactive material authorized by this license in accordance with statements, representations, and procedures contained in the following:

Application dated September 12, 2014, and
Letter dated October 3, 2014.

Title 25 TAC §289 shall prevail over statements contained in the above documents unless such statements are more restrictive than the regulations.

VJD:vjd

FOR THE DEPARTMENT OF STATE HEALTH SERVICES

Date January 10, 2020

Shawn Garza, Program Coordinator
Industrial Licensing Program

USACE CERTIFICATE
OF
LABORATORY VALIDATION

L&G Consulting Engineers, Inc.

2100 W. Expressway 83
Mercedes, TX,
Eloy Casares
(956) 565-0760

has demonstrated, by abbreviated audit of its AASHTO accreditation, or by inspection of required records, equipment, procedures, facilities, and/or final reports, its proficiency to perform testing of construction materials, as established by the quality standards of AASHTO R 18 guidance and the requirements of the applicable ASTM standards.

THIS USACE CERTIFICATE OF LABORATORY VALIDATION IS ACCURATE AS OF ITS DATE AND TIME OF GENERATION:

27 FEB 2023 AT 08:16 HOURS

ALL METHODS LISTED ON THIS CERTIFICATE OF VALIDATION WILL EXPIRE ON 02/23/2025

PLEASE CONFIRM THE CURRENT VALIDATION STATUS OF THIS LABORATORY USING THE SEARCH FEATURE ON OUR PUBLIC WEBSITE: https://mtc.erdc.dren.mil

L&G Consulting Engineers: Active/Open Claims –July 12, 2024

Coverage: Professional

1. Claim #GC031194; Insured: L&G Consulting Engineers, Inc.; Claimant: Hidalgo County (365 Tollway)
- *Potential claim arising from termination of contract : Insurer: Great Midwest*

2. Claim No.: GC031167 Claimants: Raul A. Macias and Erika Castillo Insured: L&G Engineering Laboratory LLC (Mile 6)
- *Lawsuit C486621 – Roadway was elevated, using unstable surface materials which caused a motor vehicle accident in which plaintiff was killed : Insurer: Great Midwest*

3. Claim No.: GC024164/CG0630229 Claimant: Michael Baker International, Inc. Insured: L&G Consulting Engineers Inc.(Interchange)
- *Notice of Default/Demand Indemnification from DPVJ to Michael Baker for part of design work on project : Insurer: Great Midwest*

4. Claim No.: GC029343 Claimant: Troy Hack Heirs Insured: L&G Consulting Engineers Inc.(Courthouse Project)
- *Allege negligence in connection with pedestrian crosswalk accident which led to T. Hack's death. Stowers Demand. : Insurer: Great Midwest*

City of Edinburg
415 W. University Drive
Edinburg, TX 78541

Re: Request for Sealed Qualifications for Engineering Services Rotation 2024-9

LeFevre Engineering, PLLC (LE) is pleased to submit our Statement of Qualifications.

LE is a multidisciplinary engineering firm licensed by the Texas Board of Professional Engineers (TBPE F-23093) with our main office located in Port Mansfield, Texas. Your point of contact is Richard LeFevre, BS, MS, CFM, PE (No. 102200), a licensed civil and environmental engineer and certified flood plain administrator. LeFevre Engineering is at 50% current capacity and is currently available to perform services for the City of Edinburg.

LeFevre Engineering strives to maintain an experienced, licensed engineer that will be your point of contact and attend all project and status meetings. Mr. LeFevre has over twenty-two (22) years of experience serving communities throughout South Texas and will serve as the design engineer and inspector, therefore alleviating the need for unnecessary time waiting for an "engineer or other consultant" who may not be authorized or available to approve the changes, resulting in idle time and delays during construction.

The City of Edinburg will always have Mr. LeFevre as your point of contact and will service all your needs that pertain to engineering, environmental issues, drainage, streets, plating, reviews, and the general needs of the projects for FY2024-2025. Additionally, Mr. LeFevre is a Certified Floodplain Administrator therefore knowledgeable in all aspects of design with regards to drainage and floodplain management and how it affects current proposed projects.

Mr. LeFevre and LE is providing or has provided city engineering and floodplain administrator services for:

- ✓ ***City of McAllen***
- ✓ ***City of Alton***
- ✓ ***City of Penitas***
- ✓ ***City of Mercedes***
- ✓ ***City of Weslaco***
- ✓ ***City of Donna***

LeFevre Engineering has not been involved and/or participated in substandard work or has violated any ethics in the past five (5) years.

At this time there has been no addendums issued in reference to this RFQ.

We appreciate your consideration regarding this proposal, and we express great interest in providing engineering services to the City of Edinburg. Please call if you have any questions or desire additional information.

LeFevre Engineering, PLLC is Pre-TxDOT Certified with regards to roadway design and construction, utilities relocation, drainage, and environmental requirements for projects.

Respectfully,

Richard LeFevre, P.E., CFM
President

FIRM'S PHILOSOPHY

Our philosophy begins with as experienced and proven Engineer-in-Charge who is committed to the client's satisfaction by providing responsive and practical project solutions. LeFevre Engineering strives to exceed the industry standards and the client's expectations. The attention to details throughout the project lifecycle, design, and careful planning by the team ensures the high-quality of service we are committed to providing for the client is fully satisfied. We prioritize understanding the vision and unique needs of our clients as well as the general public. Conducting our business with transparency, integrity and compliance with legal and regulatory requirements.

Our goal is to build a long-term relationship with our clients, while upholding ethical standards in all dealings is fundamental. Mr. LeFevre is the type of engineer that is familiar with the requirements for municipalities and public infrastructure projects because of his 20+ years of experience working with municipalities throughout South Texas. Mr. LeFevre believes that the engineer should be a functioning part of the project throughout the entire project. Rarely do you find a president of a firm that is the project design engineer and the inspector of the project. While working with larger firms and through his experience, we have noticed that many firms provide a "firm representative", which may or may not always be a licensed engineer.

During the selection process, many firms promise these engineer's will be present and "accessible" to the client. Many project managers may have their respective talents but are not licensed engineers and are utilized as a means of cutting costs for the firm. Far too often, due to large turnover rates, project managers do not have any authority to provide the needed changes "on the spot" and are further governed by a bureaucracy for final approval. As a result, they or are very limited in the construction activities and inspection and it creates the possibility of a delay in construction. Mr. LeFevre believes, to ensure success, the design engineer should be an integral part on behalf of the City in ALL aspects of the project.

FIRM INFORMATION

LeFevre Engineering, PLLC is a registered **Historically Underutilized Business (HUB)** by the State of Texas Historically Underutilized Business Certification and a **Disadvantaged Business Enterprise (DBE)** under the Texas Department of Transportation Compliance Program. It is the policy of the company to promote affirmative action and to provide equal opportunity to all employees and applicants for employment; and to administer all terms, conditions, and privileges of employment in a manner which does not discriminate on the basis of race, color, creed, ancestry, national origin, sex, age, marital status, liability for service in the armed forces of the United States, or because of physical or mental handicap in regard to any position for which the employee or applicant is qualified.

LEFEVRE ENGINEERING
TEXAS REGISTERED ENGINEERING FIRM NO. 23093

WHO WE ARE

LeFevre Engineering, PLLC, has the experience and expertise to provide professional engineering services in most of the disciplines needed by municipalities. LEFEVRE ENGINEERING, PLLC, formerly LeFevre Engineering, LLC, is owned and operated by Mr. Richard LeFevre, PE, CFM, and is a registered engineering firm licensed to practice in the State of Texas by the Texas Board of Professional Engineers under the firm number F-23093, also a Certified Floodplain Administrator and is located in South Texas. LeFevre Engineering, LLC was founded in 2008 and was restructured as a professional limited company in 2022. LEFEVRE ENGINEERING, PLLC is a **Professional Limited Liability Corporation**. Our clients will have access to the same LeFevre Engineering PLLC staff at nearly all hours of the day and will have access to the principal, engineers, and other support staff. The city of Edinburg will have access to the same staff throughout the entire project as we have no turnover, unlike larger firms. We will be available for unexpected meetings or construction concerns as you will find when speaking to our references and because we are a local firm.

- **Civil Engineering**
- **MEP**
- **Structural**
- **Environmental Engineering**
- **Planning**
- **Management Consulting**
- **Project Management**
- **Construction Management**

Our proven experience transcends the line between planning, design, and construction with various municipal projects in South Texas. LeFevre Engineering has proven its ability to design and provide construction phase services for the Hidalgo County, Urban County Federal Program, City of Combes, McAllen PUB, City of Mercedes, City of Alton, and Progreso International Bridge involving many different funding requirements and engineering requirements for public entities.

For our firm, it is important for clients to have access to their project engineer during all phases of the projects. Far too often, larger engineering and consulting firms have large turnover which does not allow engineers to become “engaged” in the project as they have no opportunity to “develop” a working relationship with those officials necessary to develop the project. Historically, based on our experience, a client may not interact with an engineer until the project is either completed or there is a problem. We take pride in saying that the City of Edinburg will see the lead project engineer, Mr. LeFevre, will spearhead a project from the beginning through final completion.

Firm Qualification and Experience

Our extensive experience with state and municipal requirements with design and construction of public infrastructure will provide a vital component in the success for the City of Edinburg and their infrastructure requirements for projects if needed. It furthermore shows our success to successful and affordable projects for our clients. As part of our objectives we have experience with municipalities with fixed budgets and have completed projects by providing fair and accurate cost estimates, reasonable construction scheduling, value engineering, assistance with bidding, recommendations and awarding, assistance with contract requirements for the contractor, reviewing and recommending contractor pay requests, and all other aspects needed for the City of Edinburg to be successful in design and construction of their proposed projects.

LEFEVRE ENGINEERING, PLLC. Staff have managed and designed public projects utilizing funding for the following agencies:

- ✓ **Texas Water Development Board**
- ✓ **Texas Department of Transportation**
- ✓ **General Services Administration (GSA)**
- ✓ **Federal Motor Carrier and Safety Administration (FMCSA)**
- ✓ **Environmental Protection Agency (EPA)**
- ✓ **Federal Emergency Management Agency**
- ✓ **Texas Water Development Board (TWDB)**
- ✓ **Border Environment Cooperation Commission**
- ✓ **US Department of Housing & Urban Development (HUD)**
- ✓ **US Department of Agriculture Rural Development (USDA)**
- ✓ **Texas Commission on Environmental Quality**

Firm Qualification and Experience

LEFEVRE ENGINEERING, PLLC has more than twenty years of combined experience and talent with proven engineering and support staff with the ability to multi-task and keep proposed projects on time and within budget. LeFevre Engineering, PLLC is a registered Historically Underutilized Business (HUB) by the State of Texas Historically Underutilized Business Certification and a Disadvantaged Business Enterprise (DBE) under the Texas Department of Transportation Compliance Program. LeFevre Engineering has developed a unique expertise and knowledge with public entities, such as the City of Edinburg, based on our previous work with the City and we have primarily worked with municipalities with relation to road design, drainage, water and wastewater design, environmental mitigation, permitting, construction phase engineering, inspection and project management utilizing local, state, and federal funding programs unmatched by many engineering firms in the RGV and South Texas.

Our firm understands the requirements for the City of Edinburg proposed projects and requests that we be considered for the following projects:

- ✓ **New and Rehabilitation Design of Roads.**
- ✓ **TXDOT design, route studies, permitting, and construction requirements for the City of Edinburg and TXDOT projects.**
- ✓ **Design of all aspects of Drainage, including detention, retention, swales, driveways, piping and culverts, and drainage requirements for the City of Edinburg.**
- ✓ **Design and construction of utility relocations, including water, booster stations, wastewater lift stations, sewer piping and manholes, water and sewage treatment plants.**
- ✓ **Master Planning**
- ✓ **Planning; Preliminary and Final Engineering Reports, Engineer's Estimates**
- ✓ **Water Planning, Pressure Plane Studies and Design Street Rehabilitation and New Construction.**

OUR EXPERTISE EXTENDS TO THE FOLLOWING:

- Civil Engineering
- MEP
- Structural
- Environmental Engineering
- Project Management
- Floodplain Administrator
- Social, Economic, Environmental Studies, Easements & ROW Maps
- Water Plants – Pumps, Piping, Disinfection, and Controls
- Project Development & Planning
- Facility Analysis & Master Planning
- Wastewater Collection Systems – New and Rehabilitations
- Lift Stations – New and Rehabilitations
- Wastewater Treatment Plants – New, Expansions, and Rehabilitations
- Wastewater Treatment Plant Permitting – New, Amendments, and Renewals
- Streets – New and Rehabilitation
- On-Site Sewer Systems – Design and Permitting
- Storm Drainage Pipes, Ditches, and Detention/Retention
- Drainage Design & Reports
- Engineering Studies and Plans
- Utility System Mapping
- Bond Applications and Reports
- On-site Construction Observation

ORGANIZATIONAL APPROACH

The firm's goal is to establish a long-term relationship with the clients by providing a highly competent service with integrity and concern for the client as well as the general public. We pride ourselves on our ability to design for ease of operation and maintenance and always strive to keep in mind the desires and capabilities of the client.

1.STUDY AND REPORT »

Consult with the City to define its needs, review existing available data, and establish required additional data.

Provide general economic analysis of the City's requirements as a allocation for expenditures, comparison of existing cost estimates, and/ or a statement of "not-to-exceed" values.

Meet with the City to review the established data and engineer's recommendations and opinions to solidify the project, responsibilities, and tentative schedules.

2. PRELIMINARY DESIGN »

Prepare preliminary design documents consisting of but not limited to, design premise which includes final design criteria, preliminary design drawings, outlines of specifications, and a detailed written description of the project and projections of goals.

Advise the City of additional data required, services which need to be accomplished, or final criteria definitions which must be established.

Review all facets of the Preliminary Design, probable project costs for the City, and modify the Design Premise for its final form.

3. FINAL DESIGN »

Based on the City's acceptance of the Preliminary Design and resulting Design Premise or criteria, prepare the Final Design, Plans, and Specifications.

Submit the Final Design, Specifications to the proper reviewing authorities.
Prepare and review with the City and their legal counsel, and/or other advisors all contract related documents, forms, and conditions.

Present and review all Design Plans, Specifications, and applicable Code Compliance requirements with the City, their advisors, and/or their third-party review representative.

ORGANIZATIONAL APPROACH

4.BIDDING AND NEGOTIATION »

Completed and approved construction plans, specifications, and applicable contract documents for distribution to prospective bidders.

Assist the City with the distribution of bid packages and respective adverting for bids.

Assist the City in the opening and tabulation of bids.

Analyze the bids and make recommendations for the award of the construction contract.

Assist in the preparation of formal contract documents.

5. CONSTRUCTION

Conduct inspection of the construction or project site at appropriate or predetermined intervals by the professional engineer or qualified staff member. To determine the project progress compliance with intent of design and contract documents.

Act as the City's representative, per the city's direction in all matters pertaining to the contractor and consult with or advise the City relative to the contract and project matters.

Review and take appropriate action to contractor's change orders due to unexpected conditions, submittals, shop drawings, and/or requests for payment.

Conduct a final inspection and certify completion of all project work and support documentation in accordance with the contract and applicable codes.

LeFevre Engineering exclusive experience with municipalities and familiarity with water, wastewater and roads infrastructure allows for projects to be completed "turn-key", completed on time, and within budget.

Resumes & Key Personnel

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

LE is currently staffed with project engineers, inspectors, designers, drafting technicians, and supporting staff needed to spearhead and complete any and all projects awarded to LeFevre Engineering, PLLC. The principal contact and authorized representative for all work associated with the City of Edinburg will be **Mr. Richard LeFevre, PE, CFM**. Mr. LeFevre is authorized by the Texas Board of Professional Engineers to practice in Environmental Engineering and Civil Engineering License No. 102200. Mr. LeFevre has more than twenty-four (24) years of extensive experience in federal, state, and local requirements for funding applications, design, environmental assessments, permits, project management, construction phase engineering, and project inspection and has successfully designed all types of infrastructure projects for Edinburg. Mr. LeFevre's expertise and knowledge in coordination of road and drainage, utilities and relocations, construction management, third party management, permitting, and planning is unmatched by many engineers in the valley that are not accustomed to designing infrastructure projects in the City of Edinburg. Mr. LeFevre will serve as the primary point of contact for contractual negotiations, development of scope, preliminary cost estimates and planning, design, and construction management.

Mr. Israel Gaona, PE, CFM will is a licensed engineer and will provide design and construction management of all LE projects under the supervision of Mr. LeFevre. Mr. Gaona is licensed to practice civil engineering by the Texas Board of Professional Engineers License No. 136995. Mr. Gaona has project experience with Design and Construction Phase Engineering for roads, drainage, subdivision reviews, utilities, for past projects design and managed by LeFevre Engineering.

Mr. Manuel Garza will perform as a project inspector for all needed services. Mr. Garza served as a city inspector previously with the City of McAllen and Inspector for the City of Alton, Texas. Mr. Garza has more than thirty (30) years' experience in public infrastructure projects. Mr. Garza is familiar with Edinburg projects and recognizes the requirements as an inspector for the city in required projects.

WESLEY RICHARD LEFEVRE, PE, CFM
PRESIDENT/PROJECT ENGINEER

Mr. LeFevre has extensive experience in design and project management of public and private infrastructure projects. Mr. LeFevre has successfully designed and managed projects for municipalities in the South Texas and the Rio Grande Valley for the past 16 years. Mr. LeFevre is licensed to practice in civil and environmental engineering fields in the State of Texas.

EXPERIENCE

2021-Present

LeFevre Engineering, P.LLC. LeFevre Engineering was created as a professional limited liability company and Mr. LeFevre is responsible for supervision of day-to-day activities, project control, coordination and scheduling during all phases of engineering and surveying projects.

2010 – 2021

LeFevre Engineering, LLC. Responsible for supervision of day-to-day activities, project control, coordination and scheduling during all phases of engineering and surveying projects.

2006 – 2010

Guzman & Munoz Engineering and Surveying, Inc., - McAllen, TX. - Served as Project Engineer and Principal for the McAllen office, specializing in Civil and Environmental aspects of all projects.

2004 – 2006

Turner Collie & Braden Inc. – Pharr, TX. Served as Environmental Specialist and Project Manager for regional offices in South Texas for Texas Water Development Board-Economically Distressed Areas Program (TWDB-EDAP), Border Environment Cooperation Commission (BECC), and North American Development Bank (NADBank) projects.

2001 – 2004

Texas Engineering Extension Service-Texas A&M University Frank M. Tejeda Center for Excellence in Environmental Operations – Mercedes, TX. Coordinated and provided outreach, technical assistance and technical and professional education at the local level to improve the delivery of water, wastewater, solid waste and other environmental systems to residents. Conducted on-site assessments of utility management and operation and analyzed the results of assessments performed by others. Used the results of these assessments to design tailored assistance mechanisms.

Project Role:
Principal/Project Engineer

Education:
Bachelors of Science, 1993
Hardin-Simmons University

Masters of Science, 2000
Texas A&M University at Corpus Christi

Registrations/Certifications:
Professional Engineer, Texas, No. 102200
Certified Floodplain Manager - Texas

Texas Teaching Certificate:
Licensed in Secondary Science

Professional Affiliations:
American Society Civil Engineers,

Texas Society of Professional Engineers

Years of Experience:
20+

2001

Environmental Investigator Texas Commission on Environmental Quality (TCEQ). Knowledge in Texas Administrative Codes and Code of Federal Regulations associated with compliance in industrial hazardous waste, wastewater, water, petroleum storage tanks, and municipal solid waste. Performed routine work in the fields of waste pollution. Conducted routine investigations, surveyed and performed follow-up inspections, prepared technical reports, made recommendations regarding findings and drafted.

ISRAEL GAONA, P.E., CFM
ENGINEER – QA/CC

Mr. Gaona has experience in design and project management of public and private infrastructure projects as well as construction management experience in the renewables industry. Mr. Gaona has designed multiple water, wastewater and storm water municipal projects as well as managed heavy-civil construction projects in South Texas. Mr. Gaona is a Professional Engineer and a Certified Floodplain Manager in the State of Texas.

EXPERIENCE

2019-PRESENT

SOTEX Engineering, LLC. – Currently serves as President and owner of SOTEX Engineering, LLC. Mr. Gaona oversees all aspects of civil engineering design and construction projects.

2018-2019

LEMC, LLC. – Served as a Project Engineer responsible for the design and project management of public and private infrastructure projects.

2016 – 2018

E.ON Climate & Renewables North America – Willacy & Kenedy County, Texas - Served as Civil Field Engineer for the construction of multiple large scale wind farms in Raymondville and Sarita, Texas overseeing the quality of construction work performed on all infrastructure installed. Supervise day-to-day operations of multiple contractors.

2014 – 2016

City of Weslaco – Weslaco, TX. Served as Engineer II for the City of Weslaco working on design and project management on all public improvement projects. Conducted on-site field inspections of infrastructure improvements. Performed water, wastewater and storm water construction plan reviews and subdivision reviews.

2013

Texas Department of Transportation – San Benito, TX. Served as Summer Engineering Technician. Conducted on-site field inspections for roadway improvements, bridge construction and utility installations for state road improvement projects.

Project Role:

Consultant

Education:

Bachelors of Science in Civil Engineering - 2014
Texas A&M University - Kingsville

Registrations/Certifications:

Professional Engineer - Texas, No. 136995

Certified Floodplain Manager – Texas No. 2893-15N

Professional Affiliations:

American Society of Civil Engineers,
Texas Floodplain Managers Association

Years of Experience:

10+

Municipal & Governmental Projects

CITY OF SAN JUAN – ENVIRONMENTAL PROTECTION AGENCY LIFT STATION NO. 6 DEMOLITION & CONSTRUCTION OF A NEW 2.2 MGD LIFT STATION

CURRENTLY UNDER CONTRACT

Mr. LeFevre provides preliminary planning, preliminary engineering reports, regulatory permitting, environmental information document, and lift station engineering design as part of TRIMAD Consulting, LLC, design team. Construction estimates for this project are estimated at $3.4M for the lift station replacement and is being funded as a Direct Congressional Spending provided by Congressman Vicente Gonzalez. The project is being overseen by the Environmental Protection Agency (EPA) and is currently in the final design stage of the project. The project consists of demolition of existing Lift Station No. 6; installation of approximately 2200 LF of 24" sewer pipe, installation of three (3) new manholes, and construction of a new 2.2 MGD lift station. Mr. LeFevre is providing the design of a Quad-plex lift station with a 20' wet well, and controls. The current lift station is undersized and dilapidated and needs to be replaced. Project Contact: Ric Salazar, PE, TRIMAD Consulting, LLC; 956-497-5355; Engineer's Estimate: $3.4 million

Project Objectives

- Lift Station Pump Sizing & Capacity.
- Environmental Information Document & Public Hearing approved by EPA.
- Plans and Specifications to be approved by TCEQ

CITY OF ALAMO – MORNINGSIDE LIFT STATION, ALAMO, TX

CURRENTLY UNDER CONTRACT

Mr. LeFevre provided Lift Station Design for Morningside Wastwater Improvements project in association with TRIMAD Consulting, LLC for a 1.0M New Lift Station. LE analyzed the project area and designed the lift station based on existing and proposed construction. Mr. LeFevre provided Engineer with preliminary engineering report required by the Texas Commission on Environmental Quality. The project is currently at pre-construction phase and has been awarded to a Contractor.

Project Contact; Bobby Salinas, City Manager, 956-867-5360

Engineer's Estimate: $1.0 million Contract Award Amount: $995K

Project Objectives

- Utility & Easement Acquisition and Survey
- Engineering Feasibility Study.
- Preliminary Engineering & Estimates
- Coordination with Owner of Sewer System: McAllen Public Utilities Board
- Environmental Information Document & Public Hearing approved by EPA
- Sewer Design for 3 new lift stations, 1 rehabilitation of existing lift station, installation of approximately 5 miles of 15" sewer line in TXDOT ROW.
- Plans and Specifications to be approved by TCEQ, TWDB, City of Alton and McAllen Public Utilities
- Bidding & Awarding of Project
- Project Management & Construction Phase Engineering
- Inspection
- Project Clouse out

CITY OF COMBES – CROSSWIND LANDING PUBLIC PARK & COMERCIAL DEVELOPMENT – UTILITIES & DRAINAGE LOVE'S TRUCK STOP FY 2022-2023

LeFevre Engineering, PLLC provided City of Combes with environmental services, park and subdivision planning, Water and Wastewater Infrastructure Design, Road and Drainage Design, Planning, Construction Phase Engineering, and Inspection for Crosswind Landing Development and Loves Truck Stop Water & Sewer Improvements located in Combes, Texas: The City of Combes utilized $11M in Public Bonds Issuance in the development of the proposed development to include ten (10) commercial lots for restaurants, hotels, and retail development along I-69 Corridor. LeFevre provided drainage and detention for a Love's Gas Stop located adjacent to the development, including over 2000 linear feet of water and sewer infrastructure for the Love's and the Development. LeFevre Engineering is working with the City and the Drainage District for design and construction of a walking trail and park for the City of Combes. Additionally, a 10,000 SF wellness center will provide offices, work out facilities, two (2) Gyms for youth and adult volleyball and basketball, and conference availabilities for corporate and local events.

Project Contact: Commissioner Ann Forbes, 956-423-3515; **Engineer's Estimate for Utilities: $754,600 Contract Bid Amount: $700,003**

Project Objectives

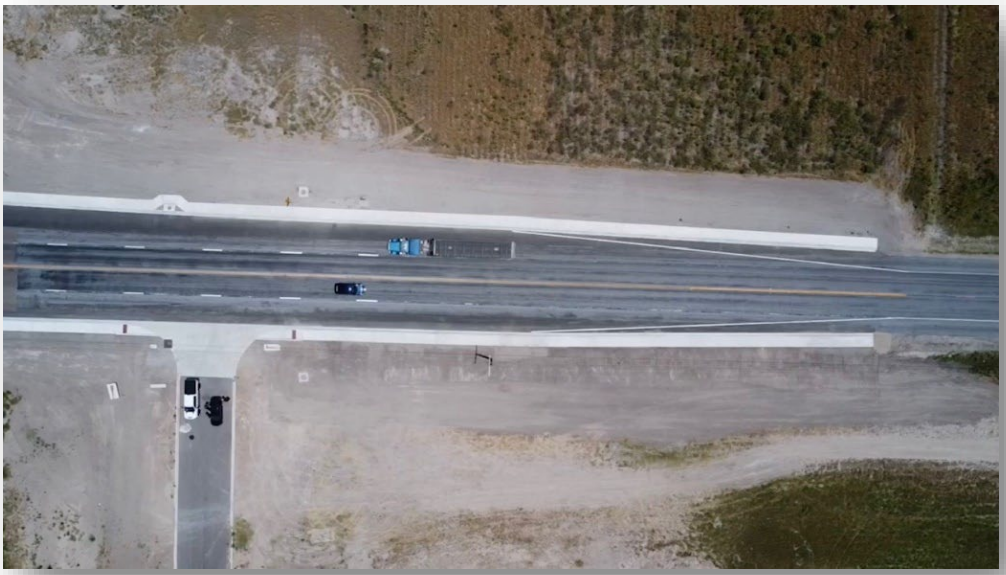
- Planning for Park and Utilities
- Survey & Topography
- Project Estimates
- Geotechnical Testing & Evaluation
- Accelerated Schedule for Love's Development & Construction
- Drainage District No. 5 approval for pass-through drainage system
- ROW Planning and Utility Easement Surveys and Acquisition

- TXDOT ROW acquisition
- TXDOT PS&E – TXDOT Road Design Approval
- Drainage Design
- Wastewater Design
- Water Design
- Construction Phase Engineering
- Inspection
- Project Management
- Closure

COMBES, TX – TXDOT FM 508 WIDENING & DRAINAGE PROJECT FY 2022-2023

LeFevre Engineering, PLLC provided City of Combes with Environmental, Preliminary & Final Design, Construction Phase Engineering, and Inspection for the construction of the City of Combes FM 508 Widening Project. As a result of new commercial and residential growth demands of the I-69 corridor located through the City, the City has taken the proactive approach of providing a wellness center, walking trail, park, retail and commercial development, Love's Fast Shop, adjacent to I-69. The existing TxDOT road is a rural 2-Lane section that has outgrown its functionality and the City is proposing to construct a 1,500 LF section of a 4-lane rural road to accommodate the new growth. This includes a 200 LF transition zone back to a 2-Lane highway. The project includes coordinating with the proposed commercial companies and TxDOT with the conceptual and final design of the road.

LeFevre Engineering was asked to provide these services, and the project is complete and approved by TxDOT.



Project Contact; Hector Siller, PE, TXDOT; Engineer's Estimate
TXDOT PIF: $663,000
Actual Award of Contract: $408,000

Project Objectives

- Survey & Topography
- Geotechnical Testing & Evaluation

- Project Information Forms (TXDOT)
- Environmental (Categorical Exclusion)
- Drainage District No. 5 & TXDOT approval for pass-through drainage system
- Local Project Representative Certified Project Manager
- TXDOT PS&E – TXDOT Road Design Approval
- Drainage Design
- TXDOT Construction Phase Engineering
- Inspection
- Project Management
- Closure

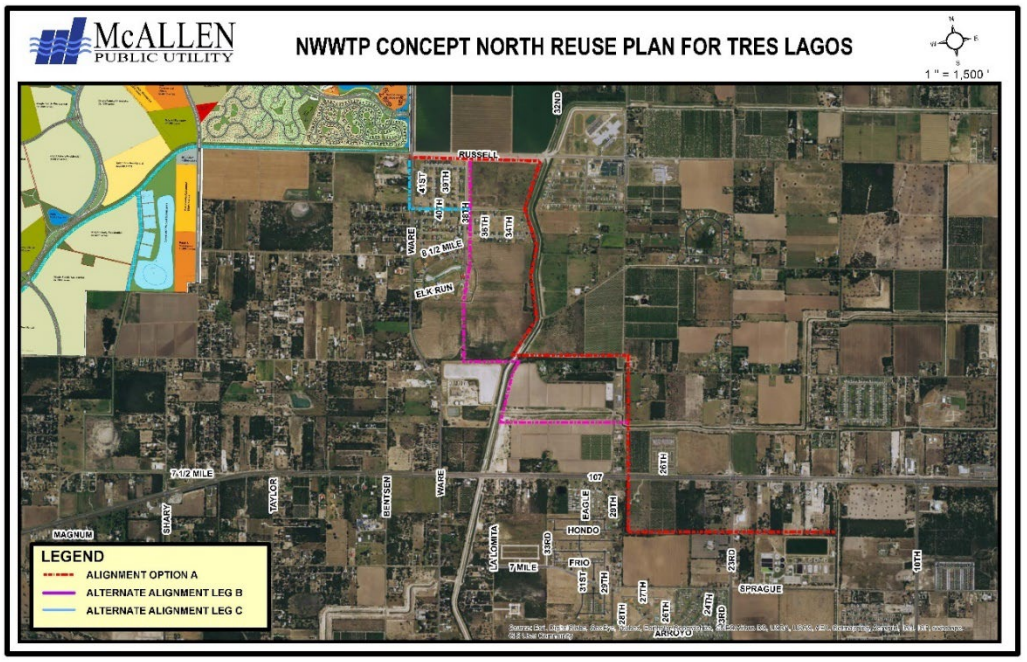
PROGRESO INTERNATIONAL BRIDGE FMCSA INSPECTION STATION DESIGN FY 2022

As the prime designer for the Progreso International Bridge, LeFevre Engineering provided engineering planning, preliminary design, federal and local agency coordination for design, and is to provide construction phase engineering, inspection, and project management for a two-bay inspection station, including underground inspection pits, catwalks for overhead inspections, metal canopy for both bays, parking, 8800 cy of 14" concrete/steel reinforced driveways and roads, administration building coordination designed by architect, for the Owners of the Progreso Bridge, General Services Administration (GSA) and the Federal Motor & Carrier Services Administration (FMCSA) for the use by US Border Patrol & US Immigrant & Customs Administration (ICE) agents for vehicular inspections of commercial trucks. The overall cost estimate of the project is $9M for construction.

Bridge Administration is waiting on approval and notice to proceed from the General Services Administration. Included in the design was a new lift station for industrial site development to be utilized by the FMCSA inspection station. New 10" waterline was designed and installed which included over 15 fire hydrants. The Gravity Sewer System was designed and installed for the industrial park and for use by the FMCSA.

Project Contact Owner Bobby Sparks 956-650-0617

FMCSA Inspection Station Estimate: $6.200 million



Project Objectives

- Assisted Bridge Owner with planning location based on Federal Law Enforcement requirements.
- Survey and Topography
- Preliminary Engineering & Estimates
- Geotechnical Testing & Evaluation
- Structural Engineering
- MEP
- Planning & Design based on Federal Motor & Carrier Safety Administration, Immigration and Customs Enforcement, US Border Patrol & Safety, General Services Administration Requirements.
- Drainage District No. 5 approval for pass-through drainage system
- Offsite Water & Sewer Design for Military Highway Water Supply Corporation
- Drainage Design
- Wastewater Design

- Water Design

McAllen Public Utilities Board – TWDB Tres Lagos Wastewater Reuse Project & 29th street Sports Complex Wastewater Reuse Project FY 2017

LeFevre Engineering provided environmental, design, and construction phase services for McAllen PUB wastewater reuse project located in the Tres Lagos Development and the 29th Street Sports Complex owned by the City of McAllen. Mr. LeFevre provided design for undersized and inadequate water lines and replaced them with 16-inch PVC wastewater reuse line. There were approximately 60-70 fire hydrants and 1500 linear feet of 12-ince bore construction with 24-inch steel casing installed. This project will benefit the entire area of Tres Lagos by improved facilities and the deletion of asbestos water lines currently being used. McAllen PUB, through funding from the Texas Water Development Board, in order to improve the quality of the Treated Effluent Discharge from Type II to Type I and make it usable for reuse, obtained funding to provide Tres Lagos Development and a public Sports Complex with reuse water for irrigation.

As part of the improvements project, LeFevre Engineering also provided construction phase services, and inspection of approximately thirty-seven thousand five hundred (37,500) linear feet of pressurized pipe constructed of PVC to distribute the treated effluent to the Tres Lagos Master Planned Community, which includes a new Texas A&M University Campus, and to the proposed 29th Street Sports Complex that will be used as public parks for baseball, softball, soccer, playgrounds, etc. The primary use of the treated effluent will be used for irrigation purposes to the proposed facilities.

Mr. LeFevre provided an Environmental Assessment (EID) and coordination with the Texas Commission on Environmental Quality (TCEQ) for the proposed wastewater collection improvements project.

Project Contact: Carlos Gonzalez, PE, 956-467-8887; Engineering Estimate: $3.209 million Contract Awarded Bid: $2.769 million

Project Objectives

- Utility & Easement Acquisition and Survey
- Engineering Feasibility Study.
- Preliminary Engineering & Estimates
- Environmental Information Document & Public Hearing approved by EPA
- Water Hydraulics and Design of 16 inch re-usable water line
- Plans and Specifications to be approved by TCEQ, TWDB and McAllen PUB
- Bidding & Awarding of Project
- Project Management & Construction Phase Engineering
- Inspection
- Project Clouse out

HIDALGO COUNTY URBAN COUNTY- EAST LATERAL DRAINAGE PROJECT- CONSTRUCTION MANAGEMENT PHASE 1-3 PROJECT START DATE: AUGUST 2015 PROJECT COMPLETION: NOVEMBER 2017

Mr. LeFevre provided construction phase engineering & **construction management services** for the Delta Connector/East Lateral drainage improvements project. The proposed drainage ditch is to aid the drainage areas from the main canal located by Mile 19 ½ Rd. to Mile 12 ½ Rd. Mr. LeFevre provided construction project status reports by collecting, analyzing and summarizing information occurring on jobsite by contractor and sub-contractors. Mr. LeFevre was responsible for developing project objectives by reviewing project proposals and plans, conferring with land owners, project engineer and contractors. *Project was funding by Hidalgo County Urban County through a combination of EPA and HUD grants and the Texas General Land Office as a mitigation project for flooding in the area. Construction Cost: $13 Million* ***:***

LeFevre Engineering did not design or provide estimates for this project. Project Contact: Former Director Hidalgo Co. Urban County; P.R. Avila, 956-472-3636

Project Objectives

- 3rd Party Construction Phase Engineering
- Landowner Coordination for Hidalgo County
- Review and Recommendation of any and all change orders, contractor pay requests, and adjustments.
- Environmental Compliance
- Assisted Primer Engineer & Owner with Bidding & Awarding of Project
- Project Management & Scheduling Updates to County Commissioners
- Inspection
- Project Clouse out

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

LeFevre Engineering PLLC.

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

NONE

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

SENATE BILL 19 VERIFICATION

I, Richard LeFevre, the undersigned representative of

LeFevre Engineering PLLC., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

Executive Compensation

In your business or organization's preceding completed fiscal year, did your business or organization (the legal entity to which this specific SAM record, represented by a Unique Entity ID, belongs) receive both of the following: 1. 80 percent or more of your annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements and 2. $25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements?

No

Does the public have access to information about the compensation of the senior executives in your business or organization (the legal entity to which this specific SAM record, represented by a Unique Entity ID, belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986?

Not Selected

Proceedings Questions

Is your business or organization, as represented by the Unique Entity ID on this entity registration, responding to a Federal procurement opportunity that contains the provision at FAR 52.209-7, subject to the clause in FAR 52.209-9 in a current Federal contract, or applying for a Federal grant opportunity which contains the award term and condition described in 2 C.F.R. 200 Appendix XII?

No

Does your business or organization, as represented by the Unique Entity ID on this specific SAM record, have current active Federal contracts and/or grants with total value (including any exercised/unexercised options) greater than $10,000,000?

Not Selected

Within the last five years, had the business or organization (represented by the Unique Entity ID on this specific SAM record) and/or any of its principals, in connection with the award to or performance by the business or organization of a Federal contract or grant, been the subject of a Federal or State (1) criminal proceeding resulting in a conviction or other acknowledgment of fault; (2) civil proceeding resulting in a finding of fault with a monetary fine, penalty, reimbursement, restitution, and/or damages greater than $5,000, or other acknowledgment of fault; and/or (3) administrative proceeding resulting in a finding of fault with either a monetary fine or penalty greater than $5,000 or reimbursement, restitution, or damages greater than $100,000, or other acknowledgment of fault?

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: **1873707039300**
Approval Date: **November 21, 2022**
Scheduled Expiration Date: **November 21, 2026**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

LeFevre Engineering, PLLC

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **November 21, 2022**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day to day management, operational control, business location) provided in the submission of the business; application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

Wesley Richard LeFevre, President
LeFevre Engineering, PLLC
818 Mansfield Rd
Suite 182
Port Mansfield, TX 78598

Re: Annual Update Affidavit (AUA) Disadvantaged Business Enterprise (DBE)

Dear Wesley Richard LeFevre:

Upon review of the AUA and supporting documentation, TxDOT has determined that LeFevre Engineering, PLLC continues to meet the eligibility requirements of the federal [DBE] program.

DBE/ACDBE certification does not expire, however, to remain certified it is incumbent on you to submit the AUA on or before your next certification anniversary date. A courtesy reminder will be sent from the Diversity Management System (DMS) in advance of the AUA due date.

Firms listed in the Texas Unified Certification Program (TUCP) directory located at https://txdot.txdotcms.com are currently certified DBE/ACDBEs. All DBEs certified pursuant to 49 CFR Part 26, are automatically certified in TxDOT's Small Business Enterprise (SBE) Program. TxDOT encourages you to utilize the TUCP directory as a marketing tool. In that respect you should periodically verify your firm's certification description and North American Industry Classification System (NAICS) code(s) closely describe the goods or services your firm provides.

Should your firm be awarded an opportunity to participate on a federally funded project, your firm must perform a commercially useful function (CUF). A DBE performs CUF when it is responsible for execution of the work of the contract and is carrying out its responsibilities by performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible, with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself.

For information on TxDOT's contracting and procurement opportunities visit https://www.txdot.gov.

Sincerely,

Michael D. Bryant Director
Civil Rights Division

Engineering, PLLC

July 16, 2024

Mardoqueo Hinojosa, P.E.
City Engineer
415 W. University Drive
Edinburg, TX 78539

Re: City of Edinburg: Engineering Services Rotation Project No.: 2024-9

Mr. Hinojosa,

M2E is pleased to present this statement of qualifications for the Engineering Services Rotation Project No. 2024-9 in the City of Edinburg. Our team compromises highly qualified local experts with a proven track record in local community and City improvements. We are committed to collaborating with you to ensure capital improvement projects and city programs/projects meet the City of Edinburg's standards and needs.

M2E TEAM. M2 Engineering, PLLC (M2E) is a local Historically Underutilized Business (HUB)/Minority Business Enterprise (MBE)multidisciplinary engineering and management firm licensed by the Texas Board of Professional Engineers (TBPE F-19545) located in Mission, Texas. M2E has assembled a highly qualified team with a proven history of working together and specialized experience in all aspects local community and city improvement projects. The principal contact authorized to conduct final contract negotiations on behalf of M2E will be president Mr. Emigdio "Milo" Salinas, PE.

M2E RELATIONS. M2E's existing knowledge and its commitment to continuous local community improvements is an essential part of what sets M2E apart from other firms. M2E is unique with one underlying fundamental value; it's commitment to establishing relationships that translate to meeting the needs of each clients' unique needs. M2E's accomplishments are a direct result of its effort, dedication and commitment to the high standards set forth by M2E and its team. Our team provides tailored Civil Engineering solutions for the development of new construction, utilities, drainage, water & wastewater, planning, and detailed construction management services.

M2E is pleased to have been given the opportunity to submit the Request for Qualifications (RFQ) "Architectural & Engineering Services" to the City of Edinburg. If given the opportunity, the City of Edinburg will allow M2E to tailor project solutions that contain fundamental elements catered to meet the needs of each individual project. If you have any questions or concerns, please do not hesitate to call me at 956.227.537 or email me at milo@m2-engineers.com.

Thank you for your consideration,

Emigdio "Milo" Salinas, P.E.
President
M2 Engineering, PLLC

SECTION 2

2.1 EXPERIENCE OF THE FIRM/COMPANY INFORMATION

M2
Engineering, PLLC

M2E is a full-service engineering firm dedicated to designing and building solutions for people. Since 2018, we've been transforming ideas into reality, improving lives and communities. M2E is a **Professional Limited Liability Corporation (PLLC), Historically Underutilized Business (HUB) & Minority Business Enterprise (MBE)** operated by Mr. Emigdio "Milo" Salinas, P.E. whom is actively the President of the firm . M2E is a registered engineering firm licensed to practice in the State of Texas by the Texas Board of Professional Engineers under the firm number F-19545. It is comprised of professional engineers, project manager, designers, and construction inspectors; a team committed to deliver smart solutions tailored to our clients' needs. M2E focuses on our clients' success, no matter the project's size or scope.

M2E is a multi-disciplinary firm qualified to provide, but not limited to the following services:

- Civil Engineering
- Planning
- Management Consulting
- Project Management
- Construction Management
- Quality Assurance & Quality Control (QA/QC)
- Construction Engineering Inspection (CEI)

M2E is located at:

1810 E. Griffin Parkway
Mission, Texas 78572

Key Personnel Contact for all projects associated with City of Edinburg:

Emigdio, "Milo" Salinas, P.E., President
m: 956-227-5327 o: 956-600-8628
milo@m2-engineers.com

M2E understands there are many important considerations to selecting a qualified engineering firm. Our team is committed to the success and continued improvements of the City of Edinburg and will apply our knowledge and expertise to being immediately accessible and available, understanding your goals and challenges, and providing varying options for each unique projects' needs enabling the selection of solutions to be unique to the needs of the City of Edinburg.

2.2 FIRM BIO

M2E is an innovative, multi-discipline engineering firm specializing in civil engineering, water resources, project management, and construction management particularly for municipalities and counties. Even though M2E originated in 2018, the President of the firm, Mr. Salinas has over eighteen (18) years of experience. Mr. Salinas and M2E have actively continued to provide high-quality services for local municipal, industrial, institutional, commercial, and governmental agencies on numerous state, federal, and county funded projects. Mr. Salinas has extensive experience in federal, state, and local requirements for funding applications, civil engineering design, environmental assessments, permits, project management, construction phase engineering, and project inspection. Furthermore, Mr. Salinas has successfully managed drainage projects, roadway, water and wastewater infrastructure projects, capital improvements plans, and master plans.

M2E's UNIQUE QUALIFICATIONS

M2E's existing knowledge of the City of Edinburg's engineering requirements/needs highlights the ability to providing the best quality professional engineering services. M2E practices efficiency in every aspect of the project. With respect to the city's financial resources, M2E offers innovative techniques that value time, providing a prompt and responsive service. At M2E, we pride ourselves on accessibility. Clients can reach us at almost any time, with direct access to our Principal Owner/Engineer, Emigdio "Milo" Salinas, P.E., and our support staff. Mr. Salinas has devoted his career to providing top-notch engineering services to municipalities, counties, and school districts across the Rio Grande Valley and South Texas. Our expertise spans civil engineering, including roadway design, drainage design, parking lot improvements, and new construction. M2E's team is experienced in serving state, county, and municipal agencies throughout Texas. Mr. Salinas actively oversees daily operations, supported by a skilled team of project managers, engineers, and technicians.

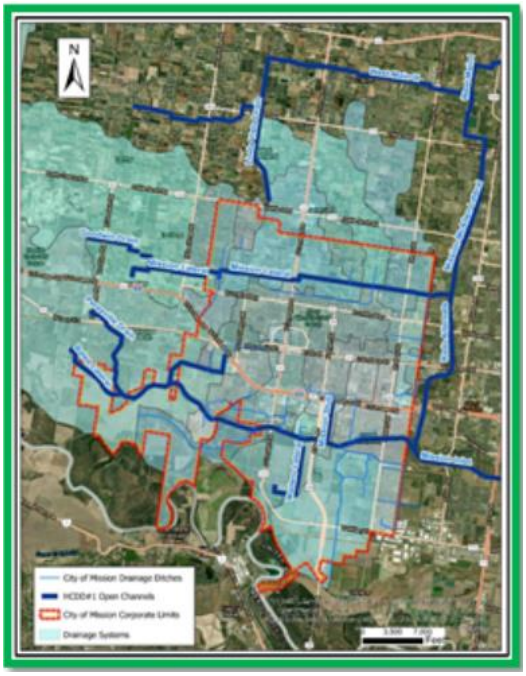
SECTION 3

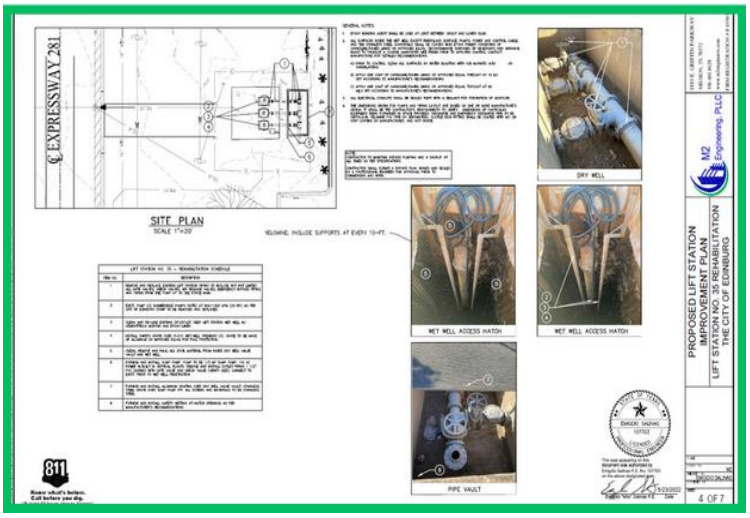
3.1 PAST PROJECTS/ASSESSMENTS EXPERIENCE OF PROJECT TEAM



President of M2E, Mr. Emigdio “Milo” Salinas while with other firms and with M2E has developed a unique expertise and knowledge with public entities, with relation to planning, design, and project management utilizing local, state, and federal funding programs unmatched by many engineering firms in the Rio Grande Valley and South Texas. He has managed and designed both City, Utility Districts and County projects utilizing funding programs such as the Texas Water Development Board (TWDB), Texas General Land Office (GLO), US Department of Housing & Urban Development (HUD), Texas Department of Rural Affairs (TDRA) now the Texas Department of Agriculture (TDA), US Department of Agriculture (USDA) and other state, local, and federal programs.

In addition, his governmental experience transcends the line between planning, design, and construction with various projects in public works projects such as roadway design, drainage design, environmental assessments, and general new construction which are all vital to educational facilities.

Below are projects specifically related to the experience necessary which Mr. Emigdio “Milo” Salinas, directly provided designing services, planning services and project management while with other firms and with M2E.



CITY OF MISSION – MASTER DRAINAGE PLAN 2020

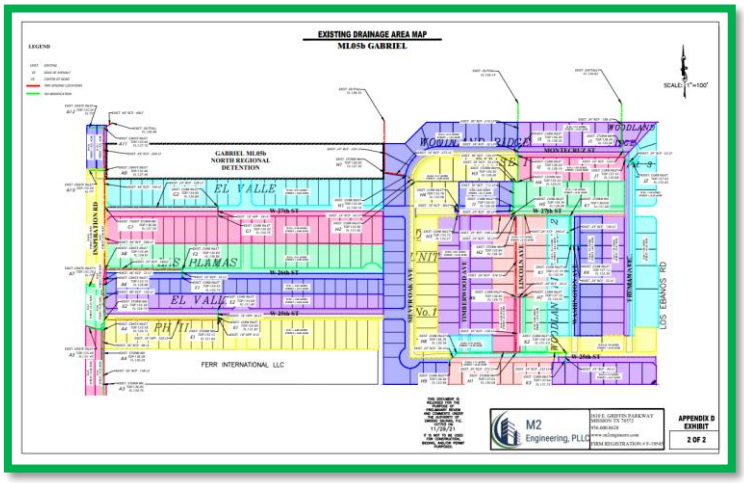
M2E assisted CSE Civil Systems Engineering, Inc. in preparing a Master Drainage Study to provide the City of Mission a planning too to guide and prioritize future capital expenditures for the City’s drainage system, open ditches and storm sewers. Detailed hydrologic and hydraulic modeling analyses were performed in developing the master drainage plan, US Army Corps of Engineers hydrologic modeling program, HEC-HMS, was utilized to generate hydrographs for multiple storm events. The HEC-RAS hydraulic modeling program was used to analyze water surface profiles for the existing and proposed drainage ditches that informed the FEMA Hazard Mitigation Grant Program Application for select areas. Innovyze XPSWMM 2D hydrodynamic modeling program was used to perform a comprehensive area wide 2-D integrated analysis of all drainage systems.

Project Contact: Juan Pablo Terrazas, PE, City Engineer

CITY OF EDINBURG – LIFT STATION NO. 35 REHABILITATION IMPROVEMENTS

M2 Engineering, PLLC provided The City of Edinburg with professional engineering services for the Lift Station No. 35 Rehabilitation Improvements Project. The project consists of providing Construction Plans and Specifications for the rehabilitation of Lift Station No. 35, which is located at 8420 N. Expressway 281 (I69). The three (3) – 20 Horsepower Lift Station Rehab consists of replacement of the following: Wet Well Discharge Piping, Dry Well Discharge Piping, Check Valves, Gate Valves, Fittings, Re-Lining of the Wet Well with two-part component (cementitious material and epoxy coating), Pump Supports, Bypass Pumping Plan, Traffic Control Plan, and acquiring a TxDOT Permit prior to the start of construction. Project to start construction, August of **2022.**

Construction Cost: $ 800K
Contact: Gerardo Carmona, P.E., Director of Utilities, City of Edinburg



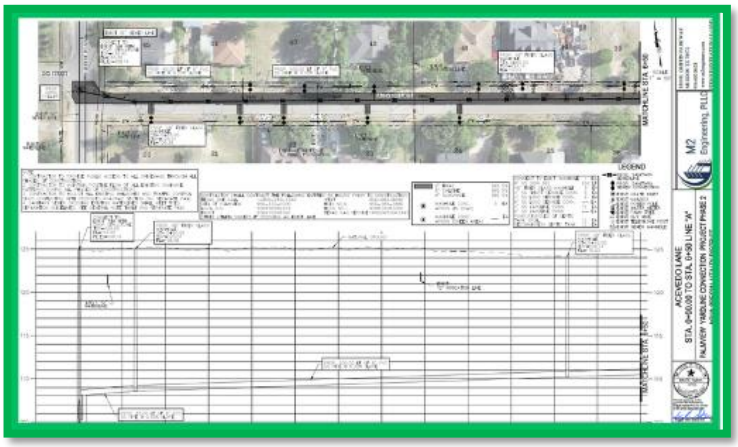
AGUA SUD – HAVANA WATER TREATMENT PLANT IMPROVEMENTS FILTERS & BLOWERS

Mr. Salinas as the project engineer provided engineering design which consisted of replacing and retrofitting the existing filters to use Air Scour which will include but not be limited to the following: new fabricated stainless steel filter tank cells, valve replacement, new media, underdrains, two (2) new air scour blowers, air scour piping/valves, replacement of hand valves with pneumatic actuated valves, new ductile iron filter gallery piping, electrical, actuator valve control panel, two (2) VFD's for high service pumps, painting, including offsite disposal of existing material in accordance with TCEQ requirements.

Project Cost: $1.1M
Contact: Roberto Salinas, P.E.; Agua SUD General Manager

CITY OF MISSION – GABRIEL DRAINAGE IMPROVEMENTS PROJECT

M2E, as the project engineer, is currently providing drainage design, Hydrologic & Hydraulic Report, Utility Coordination & Surveying. Project will consist of over 5,000 linear feet of storm sewer pipe upgrading and new extensions. The proposed project will alleviate over 100 acres of land which is located by North Inspiration Road and 495 Road. The area will ultimately drain into the Mission Lateral Drainage Ditch.



Construction Cost: $1.7 M
Contact: Juan Pablo "JP" Terrazas, P.E.; City of Mission

TEXAS DEPARTMENT OF TRANSPORTATION (TXDOT) & CITY OF MERCEDES – MILE 1 EAST (BUSINESS 83 – MILE 8)

M2E will be providing roadway and drainage infrastructures for Mile 1 East in City of Mercedes. The proposed Roadway Typical Section width will be from an existing 24' E-E to a 64' F-F with 12' travel lanes, 16' continuous left turn lane, and 10.5' shoulders. The total length of the project consists of 1.40 Miles, crossing to major roadways, Business 83 and Interstate 2 (I-2). The project will consist of two major drainage outfalls that have a total length of over 5,000 linear feet in drainage ditch and Reinforce Concrete Boxes.

Construction Cost: 13M
Contact: Jose Figueroa, City of Mercedes

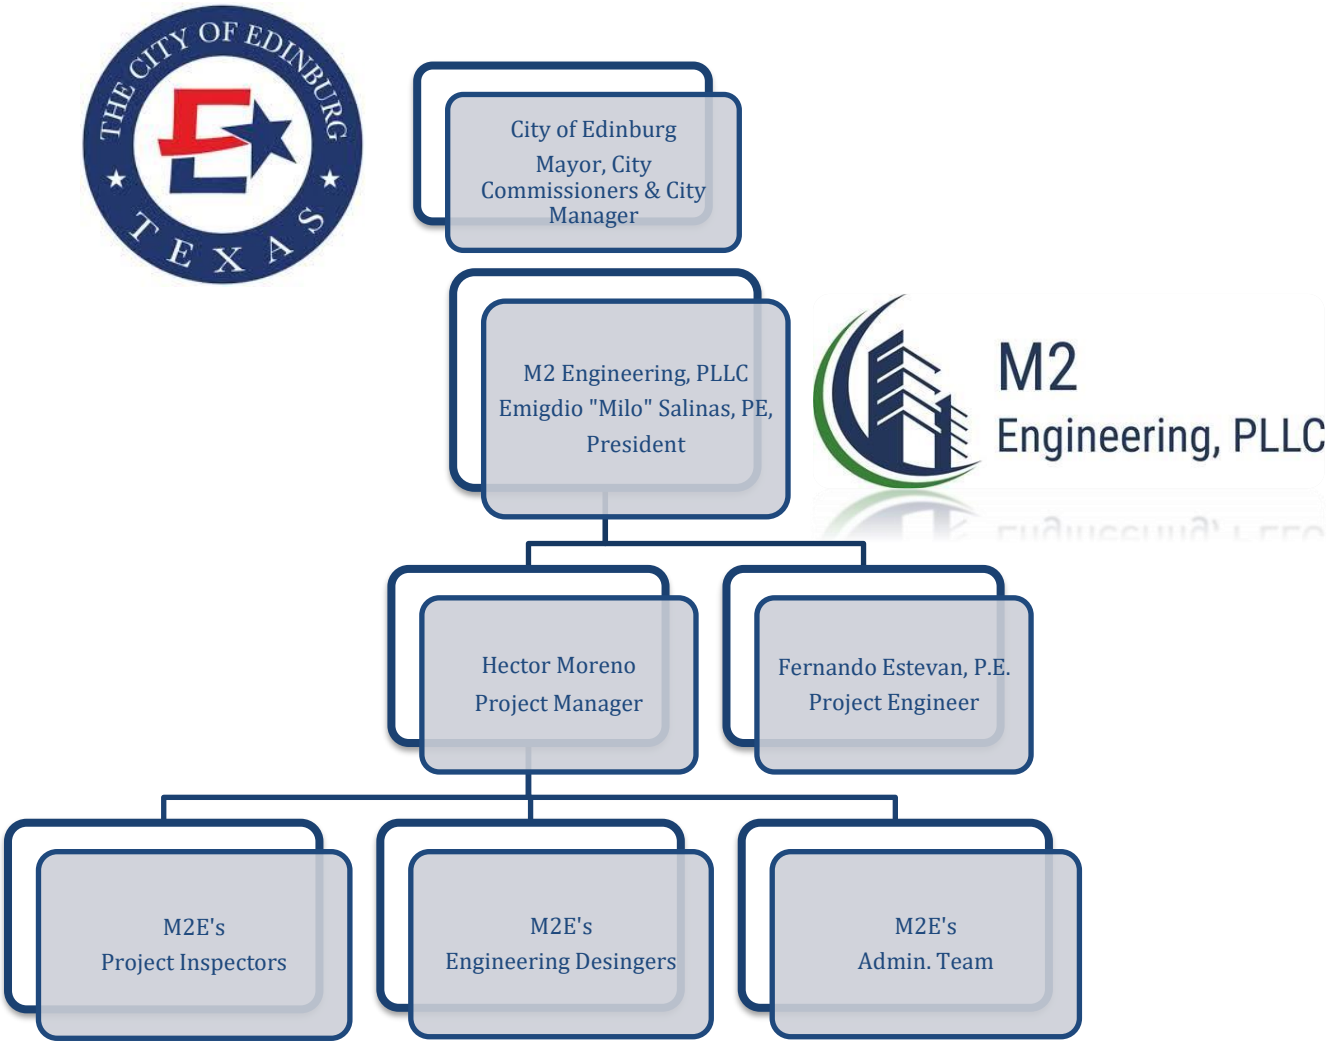
AGUA SUD & NORTH AMERICAN DEVELOPMENT BANK (NADB) – PALMVIEW COLLECTION SYSTEM PH II PROJECT

M2E, as the project engineer, provided Agua SUD with civil engineering services to furnish additional wastewater collection system areas in Palmview, Texas, which consisted of approximately 10,200 linear feet of sewer mains, and approximately 176 service connections, which also included disconnecting, pumping spoil material, dispose of spoil material, and decommission of the existing septic tanks and/or cesspools, and installing lateral yard line service connections within the residential properties to the wastewater collection system service connections. This project is funded North American Development Bank (NADB), and currently under construction, and managed by others. This particular project developed due to the previous phase being under budget. M2E coordinated with NADB, and assisted in re-purposing left over funds for this additional Phase.

Total Estimated Construction Cost: $2.2 M

Contact: Roberto Salinas, P.E.; Agua SUD

MCALLEN PUBLIC UTILITY – HOUSTON AVE. 12-INCH WATER LINE IMPROVEMENTS PROJECT



M2 Engineering, PLLC is currently providing McAllen Public Utilities with design services for the Houston Ave. 12-Inch Waterline Improvements Project which will consist of approximate 5,000 LF of waterline thru the McAllen Downtown area. Project waterline alignment will have major crossings such as 10th Street, Bicentennial Blvd., Main Street and many more which will entail major coordination with TxDOT, TCEQ, City of McAllen, etc. M2E additionally will provide Construction Engineering Inspection (CEI) for the project. Currently under design.

Total Construction Cost: $1.3 M

Mr. Salinas has over 18 years of experience in water resources, drainage infrastructure, land development, sanitary sewer, water, and street design. He has designed, and construction managed residential, commercial and municipal projects in various areas in Texas. Mr. Salinas is bilingual in English and Spanish.

EXPERIENCE

2018 – Present

M2 Engineering, PLLC

Design and construction management for civil engineering projects. Responsible for planning, coordinating, designing and managing construction for municipal, industrial, land development and residential projects. As President of the firm additional responsibilities include supervision of day-to-day activities, project control, coordination and scheduling during all phases of engineering and surveying projects.

2011 – 2018

LeFevre Engineering & Management Consulting, LLC

Vice President; responsible for design and construction management for water and wastewater municipal infrastructure. Responsible for planning, coordinating, designing and managing construction for municipal, industrial, land development and residential projects.

.

PROJECT ROLE

President,
M2 Engineering, PLLC.

EDUCATION

BS, Civil Engineer,
Texas A & M University - Kingsville, Tx 2006

REGISTRATIONS/ CERTIFICATIONS:

Professional Engineer,
Texas, No. 107703

PROFESSIONAL AFFILIATION

2004 - Present
Memeber of ASCE (American Society of Civil Engineers)
2005-2006
Member of CEHS (Civil Engineering Honors Society)

YEARS OF EXPERIENCE:

18 Years

2009 – 2011

Guzman and Munoz Engineering and Surveying, Inc.

Provide design and construction management for water and wastewater municipal infrastructures. Responsible for pay request, change orders, project status reports, inspections, construction testing, project status meetings, interacting with client and contractors. Project Engineer/Inspector for Zavala County WCID#1 Wastewater Improvements Project, which includes the infrastructure of a wastewater collections system and wastewater treatment plant for the City of La Pryor.

2007 – 2009

Halff Associates, Inc., McAllen, TX

Provided design for land development that included commercial, industrial and residential sites. Experience with water and wastewater developments with residential, industrial, commercial and treatment facilities. Designing of drawings which included the design of water, sanitary sewer, drainage, paving & dimensional control, grading and erosion control. Programs used included Microstation V8 and Geopak.Engineering calculations included sizing water and wastewater developments, drainage pipes, flumes, drainage ditches or canals, hydraulic calculations, earthwork calculations, drainage statements, probable construction cost, paving sections (with Geotech Reports) and other engineering procedures.

2006 – 2007

Fugro McClelland Marine Geosciences,Houston, TX

Developed analysis for foundations on offshore platforms. Developed preliminary and final reports & provided boring logs & pile design working with a company owned program STRENGTH. During drilling operations, two shifts were required whereas Mr. Salinas was one of the Engineers in charge, & required to oversee soil lab testing, input data for boring logs, and submit to data to the Fugro Houston Office.

Fernando Estevan, P. E. , CFM

M2 Engineering, PLLC

EMPLOYMENT / EXPERIENCE

Project Engineer for M2 Engineering, PLLC
Mission, Texas
[Jan. 2020 - Present]

- Utilize AutoCAD and Civil 3D to develop and update engineering plans,profiles, sections, and details for land development projects. Prepared construction documents for permitting and issuance, and coordinated the design team as Project Engineer ensuring compliance with relevant regulations and client satisfaction.
- Performed hydro logic and hydraulic analysis for TxDOT and County Bond Projects utilizing Civil Geo, HEC-RAS and HEC-HMS to adequately design the drainage improvements
- Lead Drone Aerial Surveying pilot
- M2E is a multi-disciplinary firm with special interest in water resources, drainage infrastructure, land development, sanitary sewer, water and street design. Have designed and construction managed residential, commercial and municipal projects.
- Coordinated with clients and regulatory entities as the main point of contact for various engineering projects, ensuring timely delivery and compliance with project specs and regulations.

Project Manager at Lemar Design and Construction, LLC
McAllen, Texas
[May 2016] - [Present]

- Managed the design and construction of residential and commercial projects, ensuring timely completion, quality control,and budget adherence.
- Coordinated with architects, engineers, subcontractors, and clients to develop project plans, schedules, and specs.
- Oversaw project teams, providing direction to ensure efficient allocation of resources
- Conducted site visits and inspections to monitor construction progress, identify potential issues, and implement corrective actions as needed.
- Gained an understanding of the overall civil engineering process, from design and permitting to construction.

[Jan. 2020 - Present]

- Utilize AutoCAD and Civil 3D to develop and update engineering plans,profiles, sections, and details for land development projects. Prepared construction documents for permitting and issuance, and coordinated the design team as Project Engineer ensuring compliance with relevant regulations and client satisfaction.
- Performed hydro logic and hydraulic analysis for TxDOT and County Bond Projects utilizing HEC-RAS and HEC-HMS to adequately design the drainage improvements
- Lead Drone Aerial Surveying pilot
- M2E is a multi-disciplinary firm with special interest in water resources, drainage infrastructure, land development, sanitary sewer, water and street design. Have designed and construction managed residential, commercial and municipal projects.
- Coordinated with clients and regulatory entities as the main point of contact for various engineering projects, ensuring timely delivery and compliance with project specs and regulations.

Project Engineer at KCI Technologies, Inc
[Jan 2020 - April 2020]

- ·Performed engineering duties in planning,designing, and overseeing projects throughout design for public infrastructure projects with Texas Department of Transportation.
- ·Conducted meetings with state staff, design team, and public regarding proposed improvements.
- ·Construction Manager/Project Manager;responsible conducting meetings, tracking construction schedule, conferring with landowners, County/City and State personnel, project engineers and contractors.

Office Contact: (956)600-8628

PROJECT ROLE

Project Engineer at M2 Engineering, PLLC.

EDUCATION

BS, Civil Engineering, University of Texas Rio Grande Valley -Edinburg, Tx 2015

PROFESSIONAL ORGANIZATIONS AND AFFILIATIONS

Planning and Zoning Board Commission - City of Mission
American Society of Civil Engineers (ASCE)

YEARS OF EXPERIENCE:

10 Years

Project Engineer at KCI Technologies, Inc
[Jan 2020 - April 2020]

- ·Performed engineering duties in planning,designing, and overseeing projects throughout design for public infrastructure projects with Texas Department of Transportation.
- ·Conducted meetings with state staff, design team, and public regarding proposed improvements.
- ·Construction Manager/Project Manager;responsible conducting meetings, tracking construction schedule, conferring with landowners, County/City and State personnel, project engineers and contractors.

Project Engineer at Landtech, Inc.
[Sept. 2018 - Jan. 2020]

- ·Performed engineering duties in planning,designing, and overseeing projects throughout design for public infrastructure projects with Texas Department of Transportation.
- ·Conducted meetings with state staff, design team, and public regarding proposed improvements.
- ·Construction Manager/Project Manager;responsible conducting meetings, tracking construction schedule, conferring with landowners, County/City and State personnel, project engineers and contractors.
- ·Company was bought out by KCI Technologies,Inc and continued project tasks and responsibilities.

Graduate Project Engineer / Engineering Intern at LeFevre Engineering & Management Consulting, LLC
[Jan. 2016 - Aug. 2018]
[June 2015 - Dec. 2015]

- ·Conducted construction inspections, reviewed contractor pay requests, cost estimates and change orders.
- ·Construction Manager/Project Manager;responsible conducting meetings, tracking construction schedule, conferring with landowners, County/City personnel, project engineers and contractors.
- ·Provided & developed cost estimates, project budgets, construction schedules, design engineering services contracts, and work authorizations to clients.
- ·Developed and assisted with hydraulic calculations, drainage reports, Environmental PhaseI Assessments, Environmental Information Documents (EID), and engineering feasibility reports for County,City and agencies such as Texas Water Development Board (TWDB) & USDA.
- ·Attend City/County commission meetings to report status and answer questions of projects.
- ·Performed Statement of Qualifications (SOQ) for County, City, and other municipalities when request for Qualifications advertised.

.

Daniel Izaguirre

M2 Engineering, PLLC

CONTACT DETAILS
Email Address:
daniel@m2-engineers.com
Office Contact: (956)600-8628

Mr. Izaguirre has 22 years of experience as a Drafter assembling subdivision designs and preliminary designs. He completed engineering reports outlining the description of water services and sewer lines within the development in English and Spanish. He has drafted plans and profiles for Hidalgo County projects. Mr. Izaguirre has done water layout and sanitary collection system layouts which involved layout design and drawing details. He has completed paved layout consisting of calculating grades, storm sewer flows, calculating inlets and manhole locations.

Drainage District No.1. Hidalgo County, McAllen,Texas – Served as a Drafter responsible for working on structural inspections.

IBWC, Hidalgo Protective Levee I, Hidalgo County,Hidalgo, Texas – Served as a CAD Technician: Project was the rehabilitation of Hidalgo Protective Levee (Phase I). Responsible for project creating sheets and do redlines for the engineer charge of the project. Sheets consist of Project Layout, Alignment Data, Alignment Data, Plan and Profile, Flood wall Plan and Profiles and Details.

IBWC, Rehabilitation of Hidalgo Protective Levee II,Hidalgo County, Hidalgo, Texas – Served as a CAD Technician: Project was the rehabilitation of Hidalgo Protective Levee (Phase II). Responsible for project creating sheets and do redlines for the engineer in charge of the project. Sheets consist of Project Layout,Alignment Data, Alignment Data, Plan and Profile, Flood wall Plan and Profiles and Details.

IBC, Donna-Rio Bravo International Bridge, Hidalgo County,Donna, Texas – Served as a CAD Technician: Project was the Construction of the Donna-Rio Bravo International Crossing.Responsible for project creating sheets, calculating sanitary sewer flows and do redlines for the engineer in charge of the project. Sheets consist of Project Layout, Plan and Profile,

PROJECT ROLE
Senior Designer

EDUCATION
Associate's Degree
Architecture Drafting and Design, High Tech Institute, Phoenix, Arizona 2002,

PROFICIENT IN SYSTEMS:
Auto CAD
Microstation V8, V8i
AutoCAD Civil D3 2009
Adobe Professional
Microsoft Visual Studio C++

YEARS OF EXPERIENCE:
22 Years

HCDD#1 Raymondville Drain,Hidalgo County – Served as a CAD Technician: Project was the Construction of the Raymondville Drain Ditch. Responsible for Project creating sheets and do redlines for the engineering charge of the project. Sheets consist of Project Location Map, Project Layout,Exhibit Maps.

IBWC South Bay International Wastewater Treatment Plan, San Diego County,California. – Served as a CAD Technician: Project was the Construction of the Secondary Treatment Plan.Responsible for the project doing redlines for the engineer in charge of the project.Redlines consist of Civil Plans

HCDD#1 Rehabilitation Improvements and Repairs for Various Weirs Phase I/II,North Main Drain and South Main Drain, Hidalgo County and Willacy County, Texas. – Served as a CAD Technician: Project was the rehabilitation improvements and repairs for various weirs. Responsible for Project creating sheets and do redlines for the engineer in charge of the project. Sheets consist of Project Layout, Project Location Map, Plan and Profiles, Cross Sections,Details Sheets.

IBWC Lower Rio Grande Flood Control System,Hidalgo County, Cameron County, Willacy County, Texas. –Served as a CAD Technician: Project was the rehabilitation improvement of the Lower Rio Grande Flood Control System.Responsible for creating sheets and do redlines for the engineering charge of the project.Sheets consist of Cross Sections, 3D Models and Borehole Location Maps.

IBWC Upper Rio Grande Flood Control System, Hudspeth County, Dona Ana County, New Mexico –Served as a CAD Technician: Project was the rehabilitation improvements of the Upper Rio Grande Flood Control System.Responsible for creating sheets and do redlines for the engineer in charge of the project. Sheets consist of Cross Sections,3D Models and Borehole Location Maps.

IBWC US River Levee and Cibolo Creek North Levee, Presidio County,Presidio, Texas – Servedas a CAD Technician: Project was the Emergency Remediation for the US River Levee and Cibolo Creek North Levee. Responsible for project creating sheets and do redlines for the engineer in charge of the project.Sheets consist of Project Layout,Alignment Data, Plan and Profiles.

IBWC Arroyo Colorado North Levee, Hidalgo County, Texas – Served as a CAD Technician: Project was the rehabilitation of Arroyo Colorado North Levee Reach. Responsible for project creating sheets and do redlines for the engineer in charge the project.Sheets consist of Project Layout,Alignment Data, and Plan and Profile.

IBWC IBWC Arroyo Colorado Floodway South Levee, Hidalgo County and Cameron County, Texas –Served as a CAD Technician: Project was the Replacement and Construction of Structure No. 172 and No.413. Responsible for project creating sheets and do redlines for the engineer in charge of the project.Sheets consist of Project layout, Plan and Profile.

EMPLOYMENT / EXPERIENCE

Senior Technician Designer for M2 Engineering, PLLC [2019 - Present]

Receptionist for Alfredo Gonzalez Texas State Veterans Home [2018-2021]

Drafter at S & B Infrastructure, Ltd. [2007-2018]

Drafter at Quintanilla, Headley & Associates [2002-2007]

Team Leader, Assistant Manager Whataburger, Inc. [1999-2002]

3.1. PROJECT EXPERIENCE OF PROJECT TEAM

President of M2E, Mr. Emigdio “Milo” Salinas, has developed a unique expertise and knowledge with public entities, with relation to planning, design, and project management utilizing local, state, and federal funding programs unmatched by many engineering firms in the Rio Grande Valley and South Texas. He has managed and designed both City, Utility Districts and County projects utilizing funding programs such as the Texas Water Development Board (TWDB), Texas General Land Office (GLO), US Department of Housing & Urban Development (HUD), Texas Department of Rural Affairs (TDRA) now the Texas Department of Agriculture (TDA), US Department of Agriculture (USDA) North American Development Board (NADB) and other state, local, and federal programs.

In addition, his governmental experience transcends the line between planning, design, and construction with various projects in public works projects such as drainage, environmental assessments, and other general construction projects from plannning to construction.

Below are projects specifically related to the experience necessary which Mr. Emigdio “Milo” Salinas directly provided services; planning services,construction management with M2E, and while working for other previous firms:

SECTION 6

6.1 TECHNICAL APPROACH

M2E utilizes all of the latest's engineering technology and stays current with new products in order to devolved & prepare a quality service Edinburg Consolidated Independent School District will approve and recognize. By having the latest engineering programs, M2E will meet the school districts design schedule requirements. Our extensive experience in public infrastructure projects provides a vital component in the success by managing projects without any major delays. We believe M2E's engineering team; can provide Edinburg Consolidated Independent School District a high quality product that will benefit the future growth of the District in pursuing excellence and success.

We have learned that communication is the key to managing projects effectively to ensure work is of the highest quality and is completed on time and within budget. At the beginning of each project, we clearly establish construction work schedules; identify key activities, completion dates and team procedures for communication, information distribution and reporting. On a monthly or bi-weekly basis, we will circulate a project status brief to Edinburg Consolidated Independent School District to update progress on the work. M2E will engage with a team to follow through to achieve goals through organization, prioritization, and time management. The project status brief describes all on-going construction activities that have been completed and what construction activity needs to subsequent in order to achieve project objectives on time.

Services to be provided by M2E to Edinburg Consolidated Independent School District include, but not limited to:

Renovations & Additions
Easements
Utility Adjustments
Erosion and Sediment Control Design
TCEQ Coordination
Utility Infrastructure Evaluation & Improvements
Plans and Specifications
Bid Preparation
Construction Management
Drainage Design
Environmental Information Documents
Field Investigation and Data Collection
Feasibility Evaluation & Alternative Analysis
Utility Coordination
Attend Board Meetings
Design Development & Cost Estimating
Project Development
Facility Analysis & Master Planning
Roadway & Drainage Design
Plans, Specifications & Estimates (PS&E) Prep

These aforementioned phases and more will be used to help assure the City of Edinburg success for projects. M2E anticipates challenges and plans for them utilizing effective problem-solving models. By recognizing constraints, identifying and developing courses of action, analyzing each to determine its fit within requirements and preparing design parameters are actions needed provide the most effective & finest service without delays to the City of Edinburg's and its community.

M2E current workload is currently at a 45% capacity and has the capacity & key personnel to fulfill the professional engineering services requirements to City of Edinburg and is prepared to commence upon selection.

6.2 PERSONNEL EFFORT/METHODOLOGY

All work provided by M2E shall be developed in accordance with the City of Edinburg and any other applicable design standards and in a format acceptable to the owner and reviewing/funding agencies. Our systems and structures do this with the purpose to engage our staff and affiliated community stakeholders to create and maintain a shared vision that is clear, specific and operational.

Typical Project Personnel Effort are as follows:

Task 1 – Planning, Data Collection, Study and Report Phase

1. Set-up a project startup meeting with the Owner's staff to review the project requirements and gather all pertinent data.
2. Determine all data collection needed for the proposed project needs, and collect as needed such as: Mapping, Survey Topography, GIS Mapping, and previous experienced data available.
3. Determine several alternatives for feasible approach.
4. Perform reconnaissance of project area and gather engineering and physical data.
5. Contact all appropriate state, federal and local agencies for permit process, time schedule and other requirements needed.
6. Determine feasible process, by performing a Preliminary Engineering Feasibility Report to develop a final approach to achieve the project needs.
7. Assist, if needed, with State or Federal funding applications to fund the proposed project.

Task 2 – Environmental Information Document (EID) (If needed)

1. State and Federal Agency Coordination if required.
2. Environmental Information Document (EID), as per funding agency requirements. Provide alternative to the Proposed Action, Project Description, Environmental Impacts, and Appendices.
3. Acquire Environmental Clearance by Funding Agency, if needed.

Task 3 – Preliminary Phase

1. Meet with the Owner's personnel and relevant parties to gather information and coordinate the project.
2. Consult with sub-consultant regarding engineering requirements for boundary and topographic survey of project area.
3. Consult with sub-consultant regarding Land Parcels, Right-of-Ways, etc., that will be needed for the execution of the proposed project and authorize Engineer and its sub-consultant to proceed with all collection of data and survey needed for purchase or exchange of property in association with the Owner, staff, legal department necessary for the acquisition of the proposed properties and/or Row's.
4. Determine Vertical Points needed and elevations that will be utilized for design. Survey the number of parcels needed for the proposed alignment.
5. Survey Hydro-excavation Points needed for design of the project (if needed).
6. Initiate state and local permits needed for design and construction.
7. Analyze the survey of existing utilities that will be affected by any excavation.
8. Coordinate with owner for soils investigation if deemed necessary and provide documentation of needed geotechnical information for generating reports to be utilized for design.
9. Develop preliminary construction plans/profile of project.
10. Submit preliminary engineering plans and profiles to the Owner and other affected entities for preliminary approval of proposed improvements.
11. Prepare engineering report(s), plans, and cost estimates to the Owner for consideration.

Task 4 – Design Phase

1. Analyze detailed surveys of existing underground and overhead utilities within the project.
2. Consult with the utility companies for their consideration of all utility data found. Provide construction plans to the utility companies
3. Provide design for the proposed project utilizing submittals in 30%, 60%, 90%, and Final Plans.
4. Prepare detailed specifications and contract drawings for construction of the proposed project in coordination with City of Edinburg Utilities Department staff and legal requirements associated with construction of the project.
5. Prepare detailed cost estimates and proposals, which will include bid items and quantities based on unit price system of bidding.
6. Furnish the necessary copies of the approved plans, specifications and proposals to the Owner.

Task 5 – Bidding/Negotiating Phase

1. Assist the Owner in the advertisement of project for bids.
2. Assist the Owner with any addendum required during the bidding process.
3. Assist the Owner in the opening and tabulation of bids.
4. Analyze the bids and make recommendations for the award of the construction contract.
5. Assist in the preparation of formal Contract Documents with the Owner.

Task 6 – Construction

1. Provide periodic construction supervision by a licensed Engineer and/or full-time Resident Project Representative.
2. Review shop drawings/submittals.
3. Prepare change orders due to unexpected conditions encountered.
4. Prepare monthly estimates of work performed by Contractor.
5. Assist with pay requests.

Task 7 – Project Closeout

1. Provide final project close-out.
2. Prepare record documents
3. Project Warranty documents

6.3 VITAL COMPONENTS

Our extensive experience in public infrastructure projects provides a vital component in the success by managing projects without any major delays. We believe M2E's has established an engineering team that can provide the City of Edinburg with a high-quality product that will benefit the future growth of the school district in pursuing excellence and success.

We have learned that communication is the key to managing projects effectively to ensure work is of the highest quality and is completed on time and within budget. At the beginning of each project, we clearly establish construction work schedules, identify key activities, completion dates and team procedures for communication, information distribution and reporting. On a monthly or bi-weekly basis, we will circulate a project status brief to the City of Edinubrg to update progress on the work. M2E will engage with a team to follow through to achieve goals through organization, prioritization, and time management. The project status brief describes all on-going construction activities that have been completed and what construction activity needs to subsequent in order to achieve project objectives on-time.

6.4 QUALITY ASSURANCE

Our extensive experience in public infrastructure projects provides a vital component in the success by managing projects without any major delays but we believe M2E's engineering team; can provide Edinburg Consolidated Independent School District a high quality product that will benefit the future growth of the District in pursuing excellence and success by M2E quality assurance program. M2E hands on approach and understanding that delivering on-time projects to the District is key but also upmost importance is quality, and the only way to deliver quality is by implementing QAQC guide/program to ensure the highest product to Edinburg Consolidated Independent School District.

This quality assurance program helps detect design errors prior to finalizing construction plans and guaranteeing compliance with Edinburg Consolidated Independent School District project requirements. This program goes to a vary of steps before design plans are considered 100%, such as Project Engineer performing 1st step check/reviewing, Project Manager performing 2nd step known as back checking/reviewing, 3rd step design engineer if in agreement with possible mark-ups will correct design plans, and 4th step & final step will be the sealing engineer performing as the verifier and confirm all corrections have been incorporated or otherwise addressed. M2E's QAQC program is key to ensure the product provided to District each and every time is to its highest potential.

As previous mentioned, communication is the key to managing projects effectively and ensure work is of the highest quality and completed within time allowable as in during the construction phase and design phase. In order for QAQC program operate to its fullest potential, a design schedule is devolved with key milestones and deliverables.

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____

_____

_____

Date: 7/16/24

Company/Vendor Name: M2 Engineering, PLLC.

Printed Name and Title: Emigdio Salinas, P. E.

Authorized Signatory:

COMPANY PROVIDING PROPOSAL GENERAL QUESTIONNAIRE

1 Name/Name of Agency/Company: M2 Engineering, PLLC.
(Full, correct legal name)

- Address: 1810 E. Griffin Parkway, Mission TX 78572
- Telephone/Fax: (956)600-8628
- Email address: milo@m2-engineers.com

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?

3. Yes____ No✓

3. Is your Company authorized and/or licensed to do business in Texas?
Yes✓ No____

4. Where is the Company's corporate headquarters located? 1810 E. Griffin Parkway, Mission TX 78572

5. a. Does the Company have an office located in Edinburg, Texas?

4. Yes____ No✓

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office?

_____ (years) _____ (months)

c. State the number of full-time employees at the Edinburg office. _____

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity?
Yes____ No✓

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. _____

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Emigdio "Milo" Salinas
Address: 1810 E Griffin Parkway Mission, TX 78572
Telephone: (956)600-8628
Fax: _____
Email: milo@m2-engineers.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (✓).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture.

9. Bankruptcy Information

Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (✓)
If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets.

10. Provide any other names under which your business has operated within the last 10 years.

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES NO

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES NO

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES NO

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Emigdio Salinas, the undersigned representative of

M2 Engineering, PLLC., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, Emigdio Salinas P.E., the undersigned representative of

M2 Engineering, PLLC., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

M2 Engineering, PLLC.

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

None

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☑ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☑ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

Transmittal Letter

July 15, 2024

Mr. Mardoqueo Hinojosa, P.E., C.F.M., C.P.M.
City Engineer
City of Edinburg
415 W. University Drive
Edinburg, Texas 78541

Ref: Request for Qualifications for Engineering Services Rotation
RFQ No. 2024-9

Dear Mr. Hinojosa,

The management and professional staff of **Melden & Hunt, Inc.** would like to present you with our Statement of Qualifications to provide Professional Engineering Services to the City of Edinburg. Our objective in submitting this Statement of Qualifications is to show you that our firm should be selected as a consultant for your professional service needs.

Melden & Hunt, Inc. has a proven track record of delivering top-quality water, utility and roadway infrastructure projects on schedule, within budget, and tailored to the unique needs of each client. As a multi-disciplinary consulting firm, we specialize in civil engineering and land surveying services. Our clients include federal and state government agencies, local municipalities, school districts, irrigation districts, water utility districts, gas companies, and numerous private sector developers throughout the South Texas region.

We are proud to offer our clients unparalleled expertise and a diverse range of professional talent, difficult to match anywhere. Our team includes over 60 engineers, surveyors, project managers, field inspectors, CADD designers, survey technicians, and administrative support personnel based in our Edinburg office. Given our current workload, we are well-positioned to provide the City of Edinburg with the resources needed to rapidly deploy and meet an aggressive project schedule for engineering rotation needs.

At Melden & Hunt, Inc., we prioritize effective communication. We emphasize close coordination with our clients to ensure their objectives are met. This process typically involves comprehensive information gathering and client involvement at all levels, from operations to management. We then evaluate and select the best systems, considering the unique conditions of each client and project, along with technical, economic, environmental, and political concerns.

Selecting Melden & Hunt, Inc. offers the City of Edinburg several distinct advantages:

- A firm with tremendous engineering experience.
- A firm with the capability to perform all aspects of municipal projects.
- A firm with a strong reputation, professional integrity and competence.
- A firm with the professional background and understanding of working with the City.

- A firm with the technical resources and expertise to meet an aggressive project schedule.
- A firm who is truly local and is extremely familiar with the geographical area.
- A firm with an intensive focus on maintaining a valuable relationship with the City.

We look forward to the opportunity to working with the City of Edinburg, once again. If our firm is selected, I will serve as your Project Principal/Chief Project Engineer. All project coordination and related functions will be managed through my office and staff. My personal relationship with you and your team, combined with the full resources and talents of Melden & Hunt, Inc., will ensure timely project progress and success.

For specific communication for this RFQ, contracting details, or contract binding please feel free to reach out to myself or Mike L. Hernandez, Vice-President, his contact details are below. We are both authorized agents of the firm, empowered to respond to RFQs, negotiate and bind contracts. Also, please note that we have not received any addendums to this RFQ.

In closing, I would like to thank you for the opportunity to submit this qualification packet. We are excited about the City's upcoming award of engineering services rotation contracts. And I am confident that Melden & Hunt, Inc. can provide the engineering services that will best meet your needs and exceed your expectations. If you have any questions or comments, please feel free to contact me at 956.381.0981.

Sincerely,

Ruben James De Jesus, P.E., R.P.L.S.
Vice-President

Firm Information, Qualifications & Experience Continued

Melden & Hunt, Inc. (MHI) was established in 1947 and has provided engineering and surveying services throughout the Rio Grande Valley-South Texas area for 77-years. Melden & Hunt, Inc. is one of the largest local engineering consulting firms in the Rio Grande Valley. Our clients have the benefit of decades of engineering surveying experience in a wide range of technical disciplines. Since MHI clients generally have distinct needs, we offer a wide range of engineering services including highway, right-of-way, waterworks, environmental, drainage, irrigation and structural engineering, surveying, street, bridge, utilities, water and wastewater treatment plant design.

Melden & Hunt, Inc. has assembled a project team of engineering and surveying professionals with the proven experience to efficiently and successfully complete and submit the services requested by the City of Edinburg. These representatives are all full-time members of Melden & Hunt, Inc. staff. Not only does this team bring to the project the professional background for completing projects of your nature, but this team also possesses the relationship and experience of working with TXDOT, HCID No. 1, HCDD No. 1, Texas Gas Service, American Electric Power, Time Warner Cable, AT&T and other utilities that impact your projects. Our team of professionals will work out of our Edinburg office to serve as our base of operations and will actively participate in any questions and/or consultation requested by the City of Edinburg.

With a well-equipped office in ***Edinburg, Texas*** this permits us to respond to the City's needs quickly, and easily access any area in the city limits within minutes. And due to our staffing size of over 60 professionals, and our typical workload, along with Mr. Ruben James De Jesus, P.E., R.P.L.S., Vice-President as the City's Project Principal we are ***not concerned about handling any part-time staffing needs for smaller projects, as your assigned team is all full-time. And our volume of projects is set low enough to be able to handle rotation services to clients like the City of Edinburg.***

Firm Information, Qualifications & Experience Continued

Since Melden & Hunt, Inc. clients generally have distinct needs, we offer a wide range of engineering and surveying services listed below, but not limited to:

Civil Engineering	Land Planning	Water & Wastewater
Bridges	Commercial Development	Odor Control
Capital Improvements Planning	Commercial Facilities	Pumping Facilities
Drainage & Storm Sewer	Industrial Development	Sewer System Evaluation
Environmental Site Assessments	Industrial Facilities	Sewer System Rehabilitation
Feasibility Studies	Institutional Facilities	Water System Evaluation
Irrigation	Multi-Use Development	Water System Rehabilitation
Park Planning & Design	Master Planning	Wastewater Treatment Plants
Paving Design	Residential Development	Wastewater Collection Systems
Roads & Streets	Zoning	Water Treatment Plants
Sanitary Sewer		Water Distribution Systems
Site Grading and Drainage		
Site Planning		
Structural Inspections		
Transportation	**Environmental**	**Surveying & Mapping**
Bicycle & Pedestrian Facility Development	Assessments & Audits	As-Built Survey
Minor Roadway Design	Corrective Action	ALTA Survey
Major Roadway Design	Environmental Protection Plans	Boundary Survey
Minor Bridge Design	Geotechnical Investigations	Construction Staking
Roadway Construction Management	Litigation Assistance/Support	Design & Construction Survey
Roadway Construction Inspection	Natural Resource Management	Geographic Information Systems
Traffic Engineering Studies	Pollution Prevention Plans	Horizontal & Vertical Control-Aerial Mapping
Transportation Planning & Design	Recycling & Resource Reuse	Improvement Plats
	Regulatory Compliance	Investigative Survey
	Site Investigations Ph. I & II ESA	Land Title Survey
	Sediment Detention Control	Legal Descriptions
	Solid Waste Management	Loan Plats
	Soil/Water Sampling Plans	Location Survey
		Metes and Bounds Descriptions
		Parcel Plat Surveys
		Parcel Sketches
		Realtime & Static GPS
		Ranch Surveys
		Right-of-Way Survey
		Route Survey
		Standard Survey
		Topographic Survey

As you can see, Melden & Hunt, Inc. is a diversified company with a broad range and depth of expertise in a variety of specialty areas that give us major project capabilities. Unlike many, Melden & Hunt, Inc. has the flexibility to adapt our resources from large multi-million-dollar projects to typical day-to-day engineering and surveying

With the depth and resources of a large local firm, complemented by our close-knit team of experienced professionals, Melden & Hunt, Inc. is highly regarded by its clients and among its peers in the civil engineering and surveying field as one of the finest.

Firm Information, Qualifications & Experience Continued

Melden & Hunt, Inc. uses the latest technology and equipment to accomplish its project work. Our staff is each provided a computer and has access to the information technology network to conduct ongoing business. Our computers are upgraded to the latest current standards in technology on an annual basis. In addition, Melden & Hunt, Inc. owns much of the equipment that is required to do fieldwork projects. However, we do have vendors with which we have established long term relationships that routinely supply equipment that either we do not own or that is required to meet an unusually restrictive schedule.

Melden & Hunt, Inc. maintains an extensive CADD and GPS System with dedicated workstations used to produce all of our design work. We maintain Autodesk Civil 3D, Bentley WaterCAD, Bentley SewerCAD, Bentley MicroStation and ESRI ARCView licenses. CAD applications are supported MS Windows (all versions) and can be easily upgraded to any platform. Our office is networked through high-speed communication lines that allow integrated file sharing, plotting and data management.

With internet access at your fingertips, Smartphone's and iPad's have opened a new and exciting opportunity for cost effective communication. Melden & Hunt's web site (WWW.MELDENANDHUNT.COM) will serve as a communication hub for the City of Edinburg. The site will allow representatives of the city to communicate with Melden & Hunt, Inc., download or view reports, drawings, schedules, project photos, budgets, schedule project meetings to name a few. We have effectively used our web site for clients such as City of Mission, City of Hidalgo, City of Elsa, North Alamo Water Supply Corporation, Texas Gas Service and others.

The following displays Melden & Hunt's equipment resources, and it is safe to say that this equipment allows us to get the job done professionally and effectively:

Computer Hardware

We have 15 CAD setups which include:
Dual 20" Monitors
Computer Software
Windows Professional 64 Bit
Microsoft Office 365 64 Bit
AutoDesk Civil 3D 2020 64 Bit
Bentley WaterCad
Bentley SewerCad
Bentley MicroStation
ESRI Arcview
Trimble Business Center

Firm Information, Qualifications & Experience Continued

At Melden & Hunt, Inc., we believe that any proposed infrastructure project must be constructed so as to assure the most efficient utilization of resources such as, money, materials, energy, and work force in meeting the project goals. Melden & Hunt, Inc. uses a team of experienced professionals working under the direction of a Project Manager. Melden & Hunt, Inc. fully expects to coordinate and communicate its activities on the project with the City of Edinburg to ensure the requirements of the project are met now and in future development, and to assure the City that project completion will be on a cost effective and timely basis. Each phase of the project will require detailed analysis to effectively engineer solutions for the proposed improvements. Alternatives will be developed which take advantage of specific strengths and minimize problem areas.

After the City staff input, the best alternative will be selected and developed into plans and specifications. Melden & Hunt, Inc. will work closely with the City of Edinburg in coordination of project design to meet their standards.

Melden & Hunt, Inc. has completed many rural utility projects and is experienced in the necessary coordination between the governmental entities, affected property owners, utilities, cable companies, telephone companies, power companies, and the Texas Department of Transportation, drainage and irrigation districts. A successful project depends on the entire engineer's attention to detail to assure project goals are achieved and citizen's needs are met.

Therefore, Melden & Hunt, Inc. has developed a Work Program that takes advantage of our experience with existing conditions, recent improvements, and familiarization with the project area.

The Work Program is as follows:

I. ANALYSIS

A. Utility Staff Coordination and Input
B. Existing Conditions Research
C. Future Improvements Consideration
D. Concept

II. ALTERNATIVE DESIGN

A. Preliminary Field Work
B. Development of Alternatives
C. Utility Staff Review
D. Cost Guidelines

III. FINAL DESIGN

A. Construction Documents (Plans, Specifications, Estimates)
B. Permits and Approvals
C. Right-of-Way Plats and Descriptions

IV. CONSTRUCTION ADMINISTRATION

A. Routine Inspection
B. "As-Built" Drawings

Firm Information, Qualifications & Experience Continued

Melden & Hunt, Inc. believes this project should be conducted in four distinct phases: **Phase 1** - Preliminary Design, **Phase 2** – Final Design, **Phase 3** - Construction and **Phase 4** - Post Construction.

The following is an outline of the scope of work that we will perform on this project:

Phase 1 - Preliminary Design

The purpose of preliminary design is to establish current and future infrastructure requirements. During this phase we can help the City establish various alternatives and plans for meeting existing and anticipated needs within the scope of the project. Melden & Hunt, Inc. will work closely with staff in this planning effort, which will culminate in the preparation of a preliminary design report summarizing and presenting the selective alternative in detail.

Phase 2 – Design

The purpose of this phase of the project is to prepare the necessary construction drawings and specifications, bidding documents, cost estimates and schedules required constructing the proposed improvements. Further, Melden & Hunt, Inc. will assist the City in bid analysis and make recommendations regarding the bid award. We will use computer-aided drafting and design throughout the project.

Phase 3 – Construction

The firm will provide conventional services during each construction contract comprising the project. The services will include general services during construction, resident project representation (if requested), and preparation of record drawings. General services during construction will include but not necessarily be limited to:

1. Notice to Proceed.
2. Conduct pre-construction meetings.
3. Regular inspections to review the progress and character of the work being accomplished.
4. Provide for testing of construction materials.
5. Review periodic payment estimates of the contractor for completed work.
6. Review and approve shop drawings and any necessary change orders.
7. Provide interpretation of the plans and specifications and contract requirements required.
8. Provide guidance to onsite representatives observing the daily progress and construction activities.
9. Conduct regular progress review meetings with contractor and owner.
10. Provide as built or as constructed drawings of the complete facilities.
11. Provide any other related services associated with the engineers' design as applied to construction progress and as required by the owner.

Phase 4 - Post Construction

Upon acceptance of the construction contracts, Melden & Hunt, Inc. will provide all professional services necessary to assist the City of Edinburg with placing the industrial park in operation. We will assist the City in evaluating the performance of the facilities and will represent the City in warranty disputes.

Wastewater Water Treatment Plant Lift Station and Headworks Structure Phase II
Wastewater Water Treatment Plant Carousel, Clarifiers, UV System and Belt Press III

Services Performed: Planning, Design, Bidding, and Construction Administration

Project Funding:	Phase II – TWDB - CWSRF
	Phase III – Self-funded
Total Project Cost:	Phase II - $5,850,000
	Phase III - $14,322,900
Project Date:	Phase II –August 2008 thru December 2011
	Phase III – February 2010 thru October 2013

Project Description Phase II: This project provided for certain improvements to the wastewater treatment plant, The project included construction of a new plant lift station, new headworks station (screening, degritting, flow division, flow measurement functions), and other miscellaneous appurtenances and yard piping necessary to connect to existing treatment facilities. The construction cost was $5,386,537. (Finalized and Constructed)

Project Description Phase III: This project provided for a 5.6 MGD expansion to the treatment capacity of the plant. The project included the construction of a carrousel aeration basin, two clarifiers, a return and waste activated sludge pumps station, parshall flume flow measurement, ultraviolet light disinfection system, post aeration system, solids processing building with a 2-meter belt filter press, and other miscellaneous improvements necessary to consolidate the existing plant with the new additions. The construction cost was $13,336,000. (Finalized and Constructed)

Team Member Qualifications & Experience

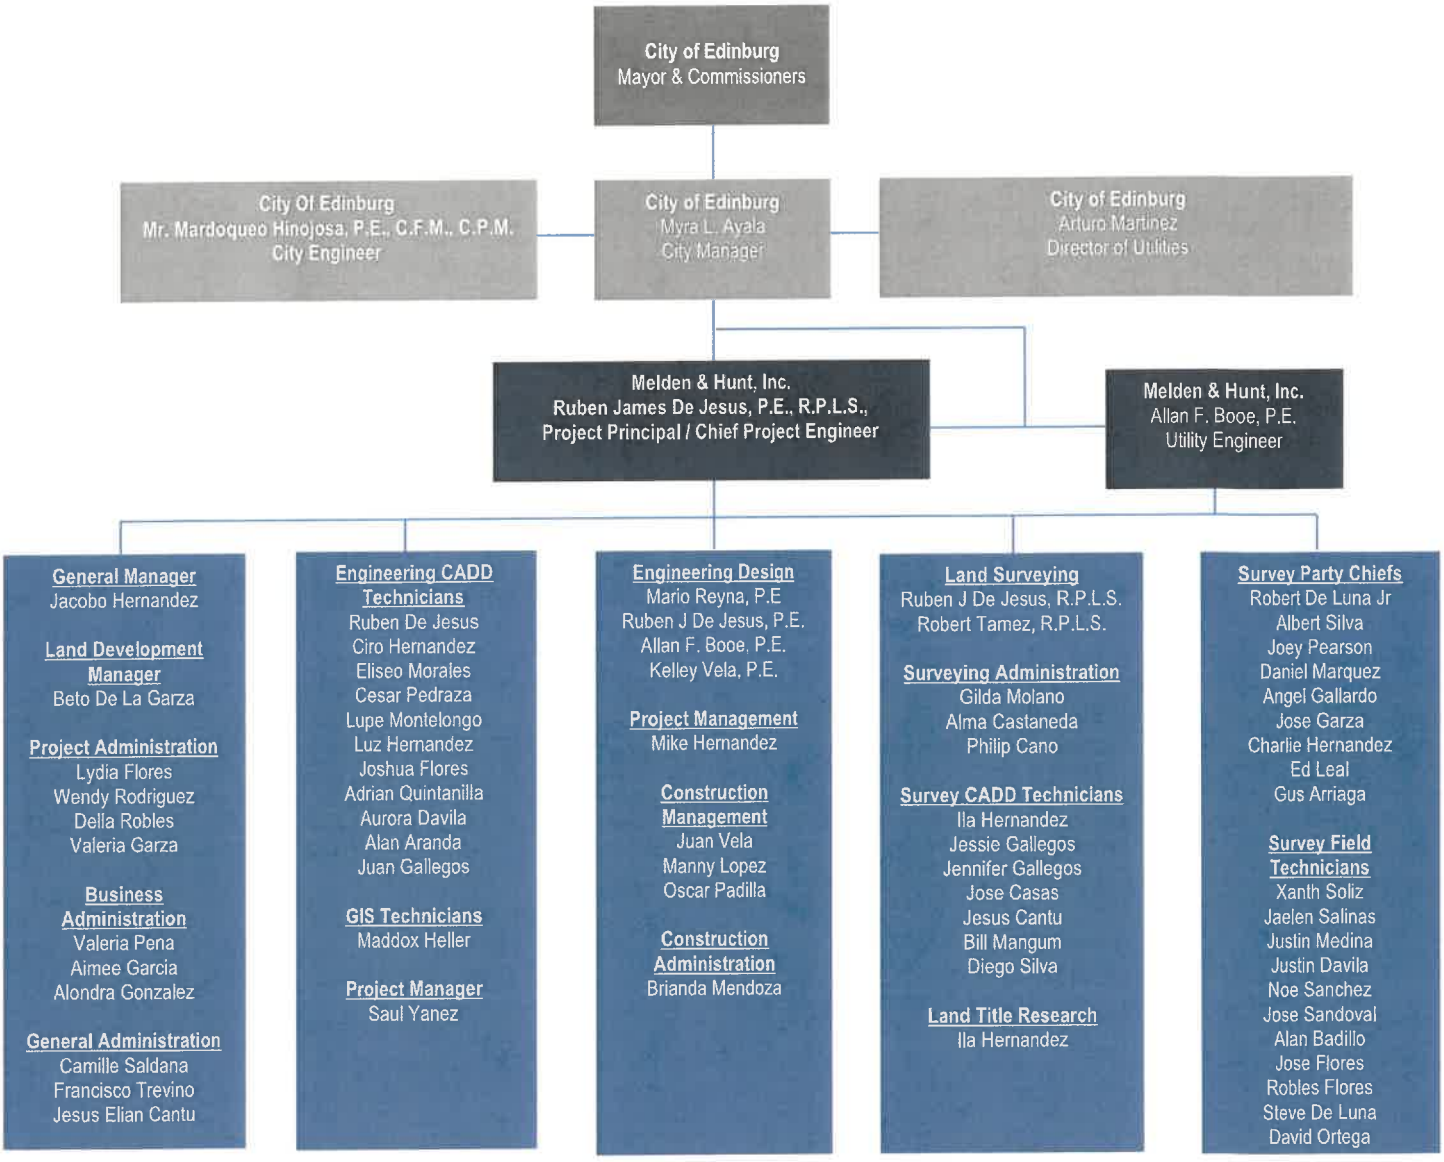
OUR INSIGHT. YOUR SUCCESS.

Melden & Hunt, Inc. has assembled a team of professionals who have the requisite interest, skills, and time to ensure timely and successful completion of your engineering projects with the highest quality. Melden & Hunt, Inc. can assure the City of Edinburg that key personnel indicated in this qualification statement will maintain their role from start to finish.

Melden & Hunt has a very flexible team with a lot of depth. We will draw on our team's resources to provide the staff described plus any additional resources required for completing any assignment issued to us. Our workload capacity far exceeds the project requirements and Melden & Hunt, Inc. typically operates at around 65%-70% of our total workload capacity. The workload backlog varies from month to month but Melden & Hunt, Inc. has plenty of capacity to get the job done. Your projects will be adsorbed in our normal business cycle and will not have a measurable impact on our percentage of capacity (65%-70%) throughout the duration of a one- or two-year contract. While we enjoy a healthy backlog of work; moreover, we have more than enough capacity to complete this project on time and still meet any existing or unknown future assignments.

Further, we want the City of Edinburg to understand that the high quality of Melden & Hunt's work depends directly on the competence and capabilities of individual professionals and the blending of their talents to meet specific project requirements. The level of capability of this company allows us to complete the work correctly the first time and maintain schedule and budget by avoiding costly and time-consuming re-evaluations to mitigate omissions or oversights.

As mentioned, Melden & Hunt, Inc. has 60 full time professionals in our Edinburg and Rio Grande City office to actively participate in any questions and/or consultation requested by the City. Consequently, Melden & Hunt, Inc. has the personnel to assure that adequate replacements are available during periods of sickness, attrition, or increased workload.



As mentioned, Melden & Hunt, Inc. will perform the majority of all engineering tasks requested by the city and will work out of our Edinburg office. Should the City of Edinburg feel the need for the use of the mentioned sub-consultant we will utilize them at your request. For now, all civil engineering task will be performed by Melden & Hunt, Inc. and our workload capacity far exceeds the project requirements.

Team Member Qualifications & Experience

Our proposed Project Organization is shown below. Our team is led by Ruben James De Jesus, P.E., R.P.L.S., and **Project Principal/Chief Project Engineer**. Mr. De Jesus is one of the most seasoned engineers in the Rio Grande Valley with over 12 years of engineering and surveying experience. The given organizational chart shows other key professionals that will have responsibility for individual project tasks. All of these individuals will report up through Mr. De Jesus who will hold management and decision-making responsibility for this project. As mentioned before, Mr. De Jesus will be responsible for committing the human and equipment resources required to successfully meet the city's schedule and needs.

Organizational Chart:

Mr. De Jesus, started his civi engineering career at Melden & Hunt, Inc. after graduating from the University of Texas at Pan American. He has designed and managed many types of Civil Engineering projects and has extensive background in surveying. He has been responsible for studies, designs and management of public and private sector projects throughout the South Texas region. He is proficient in scheduling and coordinating large public and private projects and has worked on a wide range of federal, state and local infrastructure projects.

As a Lead Engineer, Mr. De Jesus will develop a work plan and be responsible for scheduling and performance of all work associated with this proposed project. He will function as an extension of your staff to exceed your performance objectives and to respond to your needs on short notices. He is also committed to engaging all the necessary resources to expedite this proposed project. He will work out of our Edinburg office to serve as our base of operations and will actively participate in any questions and/or consultation requested by the District.

Mr. Booe, has extensive experience in the design, maintenance, and operation of water and wastewater treatment plants and their related appurtenances. He specializes in the engineering design and management of Melden & Hunt's water and wastewater utility projects.

What is more, he has over forty-five (45) years of engineering experience primarily with treatment plants, water distribution and sewer collection systems.

He served as Utilities Director for McAllen Public Utility for four (4) years. He has been the chief engineer on the design and construction of numerous water and wastewater treatment plant projects throughout his career including Mission's North Water Treatment Plant, Edinburg's West Water Treatment Plant, North Alamo's Delta Regional Water Treatment Plant, Mission's Wastewater Treatment Plant, Hidalgo's Wastewater Treatment Plant, Rio Grande City Wastewater Treatment Plant, Elsa's Wastewater Treatment Plant and North Alamo's Wastewater Treatment Plant. His experience includes a wide variety of projects including rehabilitation, expansion and new construction.

More important, Mr. Booe has been successful in obtain funding for many of these projects using the Texas Water Development Board and USDA Rural Development.

Mr. Hernandez's professional career started with Melden & Hunt, Inc. as a project manger twenty-two years ago. He is responsible for the supervision of water, wastewater, irrigation, and various other civil design projects. His primary focus is to provide the utmost satisfaction to the client, ensuring projects are complete with the allocated period or time and within the budget that has been assigned.

He operated under a certain degree of automy using engineering staff and resources allocated to him to provide top quality service to the client.

Mr. Hernandez's water and wastewater project managment experience has been with the North Alamo Water Supply Corporation where he was part of a design team preparing plans and specifications for the expansion to the Delta Regional Water Treatment Plant and Water Distribution System, Victorias Road Water Treatment Plant, North Weslaco EDAP Colonias Sewer Treatment Plant and Collection System. In addtion, he was part of a second design team who worked on the expansion to City of Mission Sewer Treatment Plant.

Mr. Montelongo has over 45 years of diversified engineering experience. His career has touched virtually every facet of water and wastewater systems, land development, surveying, transportation and public works projects. His experience includes design and construction inspection, administration and documentation. He is proficient in scheduling and coordinating public and private project and has worked with a wide range of federal, state and local infrastructure projects. In addition, he assists project engineers administer projects during the design, bid and construction. He makes review of all shop drawing and works with the contractors on the interpretation of drawings.

Furthermore, Mr. Montelongo is particularly strong in his knowledge of electrical, instrumentation, and control systems. In addition to his talents as a design and construction inspector, Mr. Montelongo is also a certified water and wastewater treatment plant operator, so his vision and efforts are consistent with operating personnel.

OUR INSIGHT. YOUR SUCCESS.

Melden & Hunt, Inc. has always respected and valued our relationships with our clients. Our founders, Charles Melden and Raymond Hunt, believed in "firm but fair" dealings with our clients by recognizing their needs and resource constraints. This philosophy continues today. Furthermore, Melden & Hunt, Inc. is proud of the fact that a large percentage of our work is repeat business from satisfied clients. This reflects our philosophy of keeping our clients satisfied with the quality of our work and our responsiveness to their individual needs.

For this proposal we encourage you contact our clients and ask them how they feel about our performance.

Military Parkway Roadway and Drainage Improvement Project - City of Mission & Hidalgo County

Client: City of Mission & Hidalgo County
Contact Person: Mike Perez, City Manager
Telephone: 956.580.8650
Location: Mission, Texas

Professional Services: Planning, Environmental, Right-of-Way Acquisition, Surveying, Design Phase Service, Bid Phase Services, Construction Administration and Inspection.

Melden & Hunt, Inc. was hired by the City of Mission to plan, design and construct Military Parkway being a 3.5-mile, 150.0-foot road right-of-way located south of Mission beginning on Bates Road and ending on Inspiration Road. Total Cost for the project amounted to approximately $2 million.

As part of Bentsen Palm Development, Military Parkway was also created for the initial corridor of the Hidalgo County Southwest Loop for which it has been adopted by the Hidalgo County Metropolitan Planning Organization.

The project consisted of designing and constructing a 4-lane divided highway to serve as major east-west thoroughfare in the City of Mission, as well as access to the Anzalduas International Bridge. Currently the north bound lane is constructed and being used as a 2-lane rural roadway. The south bound lane will be constructed during the construction of the Southwest Loop. Upon the full completion of Military Parkway, the road will consist of four 12-foot lanes, two 10-foot shoulders, two 4-foot shoulders and two 20-foot bar ditches for drainage, with a 34-foot median. Drainage improvements include the installation of storm sewer lines and drainage channels adjacent to the roadway pavement. Other improvements included the installation of sidewalks and landscaping, asphalt pavement markings, signage, waterline and irrigation utility relocates.

A key component to the success of the project included extensive coordination with the City of Mission Public Works Department, City of Mission Utility Department, Hidalgo County Precinct No. 3, Texas Department of Transportation, United Irrigation District, Texas Gas Company, and Magic Valley Electric Cooperative. This roadway is open for public use.

North Alamo Water Supply Corporation – La Feria Water Well Project

Client: North Alamo Water Supply Corporation
Contact Person: Steve Sanchez, General Manager
Telephone: 956-383-1618
Location: La Feria, TX

Melden & Hunt Inc. has been contracted to plan, design, and construct a water supply project which included the construction of one public water well, a ground storage tank, and two high service pumps. Ancillary facilities included as part of the water supply project included a pump building, disinfectant feed systems, electrical, instrumentation and control. This project also required all site development work such as fencing, paving, grading, drainage, and landscaping.

Moreover, Melden & Hunt, Inc. collaborates with hydrogeologist Kevin Spencer on this project to design the municipal well. Together, we possess a wealth of expertise beneficial for the construction of municipal wells in the North Alamo service area. The estimated cost for this project is $1,200,000.

City of McAllen - McAllen Public Utility – 8.25 MGD Water Treatment Plant

Client: McAllen Public Utilities
Contact Person: Mark Vega, P.E., General Manager
Telephone: 956-681-1630
Location: McAllen, Texas

Melden and Hunt, Inc. was subcontracted for the construction of McAllen's new Northwest Water Treatment Plant. Melden and Hunt, Inc.'s role in this contract included the development, design, bidding, and construction administration for the construction of City of McAllen's 8.25- MGD Northwest Water Treatment Plant. The raw water facilities constructed included a canal intake, raw water piping, and a 200-million-gallon storage reservoir with intake structure. The main plant facilities constructed included a low lift pump station, a flocculation/sedimentation basin with chlorine dioxide disinfection chamber, dual-media filters, a transfer pump station, and associated yard piping. Sludge handling facilities that were constructed included a backwash equalization basin, a plate settler, lagoons, and a decant pump station. Ancillary facilities work included a chemical building and chemical feed systems, an electrical building, an operations building, grading, paving and drainage, and landscaping.

Insurance

OUR INSIGHT. YOUR SUCCESS.

Melden & Hunt, Inc. has not been involved in any litigation, arbitration, administrative action related to past or current performance, or the subject of any professional censure or licensure suspension. There have been no insurance claims in the past 5 years. Notably, Melden & Hunt, Inc. has never been terminated from an assignment for non-performance or unsatisfactory work.

Plus, we maintain an outstanding performance record with our clients, maintain all required insurance, and have a bonding capacity to meet any project. For the City's projects, Melden & Hunt, Inc. will sign and administer all contracts as needed, as well as meet all insurance requirements.

The city of Edinburg will be named as Additional Insured, as per requirements, at the time of contracting. And we will furnish updated certificates of insurance with the Additional Insured added and any proof of payment of insurance premiums as requested and required by contract.

The following pages are copies of our insurance certificates for your review:

Professional Services Agreement

OUR INSIGHT. YOUR SUCCESS.

Melden & Hunt, Inc. has read the enclosed Services Agreement within the RFQ packet and will execute the proposed agreement upon receiving a work order. Melden & Hunt, Inc. commits to all required insurances, and we have a bonding capacity to meet any project. Melden & Hunt, Inc. will sign and administer all contracts, as needed.

Further, Melden & Hunt, Inc. has always been proud of its strength and ability to perform complex tasks. The overall entrepreneurial spirit of this company has been characterized by the ability and will to think differently and to find better, more future-oriented ways to generate value.

Melden & Hunt, Inc. reports good earnings for 2023. Along with many exciting projects, a solid financial position, and prospects for the future we have no doubt that 2024 will be the same.

It is important for the City of Edinburg to realize that Melden & Hunt, Inc. carefully manages its workload to minimize financial risk, never undertaking a contract without the proper resources to guarantee its absolute success; the firm is always investing in and maintaining its capital resources to keep up with the demands of its clients and the ever-changing world.

Melden & Hunt's business model has been to pursue work experience spanning nearly every conceivable sector of civil engineering and land surveying, and this unique diversity ensures our strength.

Melden & Hunt, Inc. is well positioned for future growth and together with our experience and committed employees; this will give Melden & Hunt, Inc. an excellent opportunity to take on new challenges. That is why Melden & Hunt, Inc. wants for the City of Edinburg to rely on our firm for its engineering and surveying needs.

Date: 7.15.24

City of Edinburg
15 W. University Drive
c/o City Secretary Department (1st Floor)
RFQ No. 2024-9 Engineering Services

In response to the City of Edinburg's request for a Statement of Qualifications, I am submitting the attached for consideration to provide structural engineering services on a rotational basis.

Included with this application letter is Mendoza Engineering's Statement of Qualifications in which are listed various projects completed by this firm. Projects have been listed by type. Details about the scope, size and cost for the projects can be provided upon request.

I have had the opportunity to work for profit and non-profit agencies, school districts, city entities and privately funded clients.

I recently renewed the firm's HUB certification with the intention of procuring government-related work.

A current project that my firm is working on for The City of Edinburg is the improvements to Freddy Gonzalez Blvd- primarily retaining wall designs. I would welcome more opportunities for work with the City of Edinburg as I relocated my office to the City of Edinburg in February of 2020.

I have reviewed the requirements and The City of Edinburg's Professional Services Agreement: work plans, monthly progress, providing invoice and making changes with no additional fees and am confident that I would be a strong, dependable, and knowledgeable choice for this role.

I appreciate the consideration for this role.

Sincerely,

George Mendoza, P.E.

CONFLICT OF INTEREST
DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, George Mendoza, P.E., the undersigned representative of

Mendoza Engineering, PLLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, George Mendoza, P.E., the undersigned representative of Mendoza Engineering, PLLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

RFQ

Request for Qualifications
"Engineering Services Rotation"
RFQ# 2024-9

Dear Mardoqueo Hinojosa,

The City of Edinburg is looking for the most qualified engineering firm to work various projects to provide Engineering Services Rotation for the Scopes of Pavement Management Services and Environmental Engineering for the City of Edinburg. Millennium Engineers Group, Inc. (MEG) is that firm. We believe that MEG is the right choice for the City of Edinburg based on the following:

History of Stability and Strong Texas Presence

MEG is locally owned corporation that has never been sold, acquired, or merged with other entities. We are confident that the people and company you see in today will be the people and company you see for the life of your projects. Furthermore, Mr. Raul Palma, P.E. CEO and Project Manager of MEG has 39 years of engineering experience in the Texas and is the former TxDOT Pharr Materials Engineer. MEG has offices in Pharr, Laredo, San Benito, Odessa, Houston, San Antonio, and Austin Texas with fully functional and accredited testing labs. MEG is stable and we have invested in the future. We are consistent and we are not going anywhere. We believe MEG has placed together a team that is the most highly qualified to perform the services requested by the City of Edinburg. Our firm is a certified Disadvantage Business Enterprise (DBE), Minority Business Enterprise (MBE) and Historically Underutilized Business (HUB).

Experienced Project Manager

As your project manager, I have spent over 39 years working on Texas projects including 21 years as the CEO and chief engineer of MEG completing various successful projects within all of Texas

Pride in Execution

MEG is acutely aware of the financial and management challenges facing most entities these days.

We are committed to:

- Working to identify and implement projects in the most cost-effective manner.
- Communicating closely with the client to meet your requirements and schedule
- Knowledge and geotechnical solutions for cost effective construction methods.
- Dedicated to quality: AASHTO and USACE accredited laboratory.
- The most AASHTO accreditations of any laboratory in Texas

Our team is thrilled about the opportunity to serve the City of Edinburg and is ready to start immediately upon selection. If you have any questions or would like to discuss our approach or team capabilities in greater detail, please contact me at any time at apalma@megengineers.com. Thank you for your consideration.

Respectfully,
MILLENNIUM ENGINEERS GROUP, INC TBPELS Firm No.: F-3913

ABOUT MEG ENGINEERS

Government and municipal agencies, educational institutions, architects, engineers, real estate developers, constructors, and private sector clients. Our strength is our people; combining their experience and collaborating as a unit enables us to quickly identify our roles and deliver accurate cost-effective deliverables. Whether defining a new working relationship or continuing to the next project our mission remains the same: to achieve yours.

MEG Corporate Headquarters – Pharr, Texas

History

MEG was founded in 2001 by Mr. Raul Palma, P.E. on the principles of honesty, integrity, and service. The goal to provide innovative geotechnical and material testing services, continue to raise the level of quality in the local profession, and make a difference in the community. Today,MEG provides a full range of integrated geotechnical engineering and consulting services, construction material engineering and testing, environmental engineering, forensic testing, and consulting services. Our philosophy and practices have been positively reflected in both client and employee loyalty and contribute to a steady growth in a diversity of projects.

MEG is accredited by the American Association of State Highway and Transportation Officials (AASHTO) and the United States Army Corps of Engineers (USACE). MEG is audited by and independent AASHTO & USACE auditor, as part of our accreditation process.

MEG meets the requirements for ASTME329 Standard of Recommend Practice for Inspection and Testing Agencies, and maintains yearly proficiency testing samples to AASHTO, USACE, TxDOT, and TxAPA.

Our Project Team

MEG proposes to utilize the latest measurement techniques to effectively perform the services of this agreement with our current staff as proposed in our organizational chart. We understand that we need to respond quickly to some service requests, and we are practiced in having staff available on short notice, if necessary. Our current and projected workloads are such that we are confident of our ability to the City of Edinburg expectations in terms of having appropriate staff resources available when they are needed. The organization chart below reflects the staff we anticipate using for the proposed projects; however, we have additional personnel that can also be utilized if needed.

> "I count of the experience and expertise that Millennium Engineers provides- just as a good foundation is critical to a structure, a good geotechnical study is critical to a good foundation design."

PROFILE

Mr. Palma serves as office manager of MEG's Pharr, Texas office. He has over 17 years' experience in the engineering industry and vast knowledge in geotechnical engineering and construction materials testing in the Texas. Geotechnical projects that Mr. Palma has been involved with including mixed-use developments, urban mid-rise buildings, educational facilities, airport facilities, parking garages, commercial low-rise to mid-rise buildings, water and wastewater treatment facilities, elevated water towers, industrial facilities, multi-family developments, churches, residential subdivisions, and general retail centers. Pavement design projects that Mr. Palma has been involved with include highways, industrial parks, heavy-duty brick paving, freight centers and industrial applications.

As President, Mr. Palma's responsibilities include coordination of field personnel, communication with the client, generation of geotechnical engineering reports, evaluating laboratory soil testing, and scheduling and managing field personnel. Palma's responsibilities as a Construction Materials Engineer include coordination of field personnel, communication with the client, generation of daily logs and weekly status reports, training of technicians, evaluating laboratory and field construction materials testing data, and scheduling and managing field personnel.

RAUL PALMA P.E.

CHIEF GEOTECHNICAL ENGINEER

Phone: 956-300-2500
Email: rpalma@megengineers.com

PROFILE

Mr. Palma is a licensed Professional Engineer with over 39 years of experience in geotechnical engineering, construction materials testing, management, and engineering design of highways, streets, and utilities. Mr. Palma has directed and completed a wide variety of geotechnical projects throughout the Central Texas region. As Chief Geotechnical Engineer of the San Benito, Texas office he is responsible for overall operations management of the San Benito Office.

As geotechnical project manager, he is responsible for coordination and completion of geotechnical engineering projects. His experience includes subsurface explorations, laboratory testing, foundation investigation and design; slope stability assessments and remediation design, pre-load fill design; geotechnical plans and specifications preparation; and construction monitoring. Client relationships have included city and county agencies; engineering and architectural firms; municipal and utility districts, as well as private developers and constructors.

During Mr. Palma's employment with the Texas Department of Transportation (TxDOT), Mr. Palma gained an extensive background in the area of geotechnical and materials engineering serving as the District Materials Engineer for a centralized laboratory for TxDOT in the Pharr District located in Pharr, Texas. As the District Materials Engineer he was responsible for overseeing the testing and approval of materials for all construction projects in the Cameron, Hidalgo Starr, Zapata, Jim Hogg, Brooks, Willacy and Kennedy counties. At the end of his tenure with TxDOT, the Pharr District had a construction program of approximately $170 million dollars of construction per year. He oversaw all the geotechnical exploration and soil testing for all bridge and retaining wall structures in these same counties. Mr. Palma also served as the assistant to the State Concrete and Physical Testing Engineer at the Materials & Tests Division of TxDOT and during this period he gained extensive experience in concrete, concrete admixtures, reinforcing steel, and pre-stressed steel. Mr. Palma's extensive experience in the area of materials and geotechnical engineering gives our firm a unique ability to provide services of the highest professional caliber.

June 9, 2022

TO: Whom it may Concern

This is in reference to construction materials testing and geotechnical services performed for the City of Weslaco by MEG Engineers between the period of May of 2020 and May of 2022.

During this timeframe, MEG Engineers has met our expectations completing all work in a timely and professional manner. MEG has been very responsive to all our work requests and provided the services in timing and sequence with project expectations. As a matter of fact, due to the success of their work, the city has recently approved a one-year extension to their existing contract.

We are pleased to offer this letter of recommendation for their great work with the city.

If you have any questions or would like additional information concerning MEG's work with the City of Weslaco, please do not hesitate to contact me at (956)969-1533 or email me at aaldana@weslacotx.gov.

Sincerely,

Albert J. Aldana, P.E.
City Engineer

BROWNSVILLE
PUBLIC UTILITIES BOARD

January 7, 2020

RE: Letter of Recommendation – Millennium Engineers Group, Inc.

To Whom It May Concern:

On behalf of the Brownsville Public Utilities Board (BPUB) Special Projects Department and Water/Wastewater Engineering Department, the BPUB submits this letter of recommendation for Millennium Engineers Group, Inc. (MEG).

MEG has assisted the Special Projects department and the Water/Wastewater Engineering Department with geotechnical reports and materials testing services for the past several years. They have been involved with numerous projects such as Wastewater Lift Stations Rehabilitation projects and the Odor Control Improvement project. MEG is also one of our on-call material testing laboratory for all subdivision construction materials testing.
Currently, MEG is performing all material testing for the BPUB Annex Building project, an approximate 70,000 sf building project development currently under construction.
Millennium Engineers Group continues to provide accurate results in a timely manner, with the utmost professionalism and within budget.

The BPUB will continue to engage Millennium Engineers Group on future projects and confidently recommend MEG for your geotechnical and materials testing needs.

Sincerely,

Marie C. Leal, P.E.

Re: Letter of Recommendation

Dear Mr. Palma,

I would like to take this opportunity to express to you Alton's satisfaction and appreciation with the work product and professionalism exhibited by your company's employees since the outset of the engagement of your firm. The professionalism and dedication to their trade, your staff has shown, sets Millennium Engineers Group apart from the competition.

The City of Alton has enjoyed its relationship with MEG Engineers and looks forward to working with your company in the future.

If we may be of service to you in anyway, please do not hesitate to contact me at (956) 432-0760.

CITY OF MISSION

"Home of the Grapefruit"

June 16, 2022

To Whom It May Concern,

I am writing this letter of recommendation for MEG Engineers.

MEG has been under contract with the City of Mission for the last four years and has provided exceptional Lab services in numerous subdivisions and projects throughout the City. They have always exhibited with integrity, ethics, reliability and fairness. Despite any troubles that could arise at the time of construction, MEG would and will deliver the testing and results on time and with quality. I believe you would be very pleased with their work, attention to detail and customer service.

Should you have any questions, please feel free to contact me at (956) 585-3275.

Sincerely,

Juan Pablo Terrazas, P.E., CPM
Assistant City Manager/City Engineer City of Mission

Re: Millennium Engineers Group, Inc.

Our City has contracted Millennium Engineers Group, Inc. to perform Construction Material Testing and Geotechnical Engineering On-Call Services for the past three years. Mr. Andres Palma and his firm are very professional and have an excellent service response. We are very satisfied with their work. They have a great attitude and carry out their project deliverables within budget and schedule. We were very pleased with the work his firm has done on the numerous project they have work on for the City of Pharr.

I would give Millennium Engineers Group, Inc. and his team my highest recommendation.

Sincerely,

Omar Anzaldua Jr., PE, CFM, PMP, CCM | City Engineer
City of Pharr
956-402-4000, ext 1414

June 10, 2022

Re: Letter of Recommendation

To Whom It May Concern:

Raul Palma is being nominated for Engineer of the Year. I have had the pleasure of knowing Raul for many years. He has impressed me with his exceptional leadership, spirit, and commitment to this profession. His professional character has excelled in his field of engineering and has given back to his community in countless volunteer efforts. I can attest not only to Raul's ability to explain and instruct, but also to his deep commitment to helping others.

Considering his extensive knowledge in engineering and achievements, he has been named the Engineer of the Year by the local Engineer's Chapter and I highly recommend his naming as Engineer of the Year.

Please feel free to contact me if you have any questions at (956) 572-3191.

Sincerely,

Patrick McNulty

To whom it may concern:

Melden & Hunt has contracted MEG Engineers to perform Construction Material Testing and Geotechnical Engineering Services for the past decade. Mr. Andres Palma, PE and his firm are very professional and have an excellent service response. We are very satisfied with their work and have recommended them on many occasions. They have a great attitude and carry out their project deliverables within budget and schedule. We were very pleased with the work his firm has done on the numerous projects they have work on in South Texas.

I would give MEG Engineers, Andres Palma, PE and his team my highest recommendation.

Mario A. Reyna, PE

INSURANCE COVERAGE & LEGAL

MEG does not have any key terms of our errors and omissions insurance coverage.

MEG maintains the insurance policies needed for this contract as for all additional contracts listed below.

2 million professional liability coverage
1 million commercial general liability coverage
1 million umbrella liability coverage

MEG does not have any claims, judgments, and arbitration proceedings, suits pending or outstanding against itself or its officers. MEG audited financial statements are available upon request.

MEG meets the legal requirements of this request for qualifications as well as all the requirements required by the State of Texas and the Texas Board of Professional Engineers.

MEG is a professional engineering firm registered in the State of Texas that has complied with all of its obligations, certifications, accreditations, licenses, and procedures required to operate in the State of Texas and be accredited by USACE and AASHTO.

PROFESSIONAL SERVICES AGREEMENT

MEG has read and agrees with the Professional Services Agreement. MEG will meet the prerequisite insurance requirements, and, if selected, agrees to enter into such agreement.

WHAT WE DO?

Our Services

Environmental Services

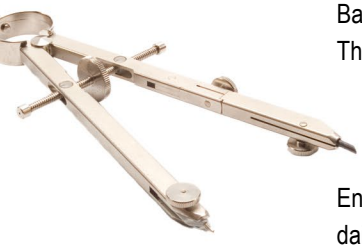
The City of Edinburg needs are specific to the services we provide, counting on the services we provide to be responsive, thorough, and precise. The projects need efficient communication, project management, and contract administration. At MEG we consistently achieve this by:

- Conducting initial discussions with the Owner and Design team for specific project requirements, project schedule, design requirements, and any additional information that will be beneficial to the Owner.
- Conducting a review of local geology at the project location.
- Conducting field soil exploration and testing services.
- Conducting the geotechnical laboratory testing program to meet the project requirements.
- Discussion with the Owner and Design team prior to report preparation to include updated project changes, requirements, or additional geotechnical options.
- Prepare precise, innovative, cost-effective geotechnical engineering recommendations for all aspects of the project.
- Discussion after the geotechnical report submittal with the Owner and the Design team to support implementation of geotechnical recommendations that will be beneficial to the owner.

PROFESSIONAL ENVIRONMENTAL SERVICES will encompass all related services to the City of Edinburg as listed in the qualifications.

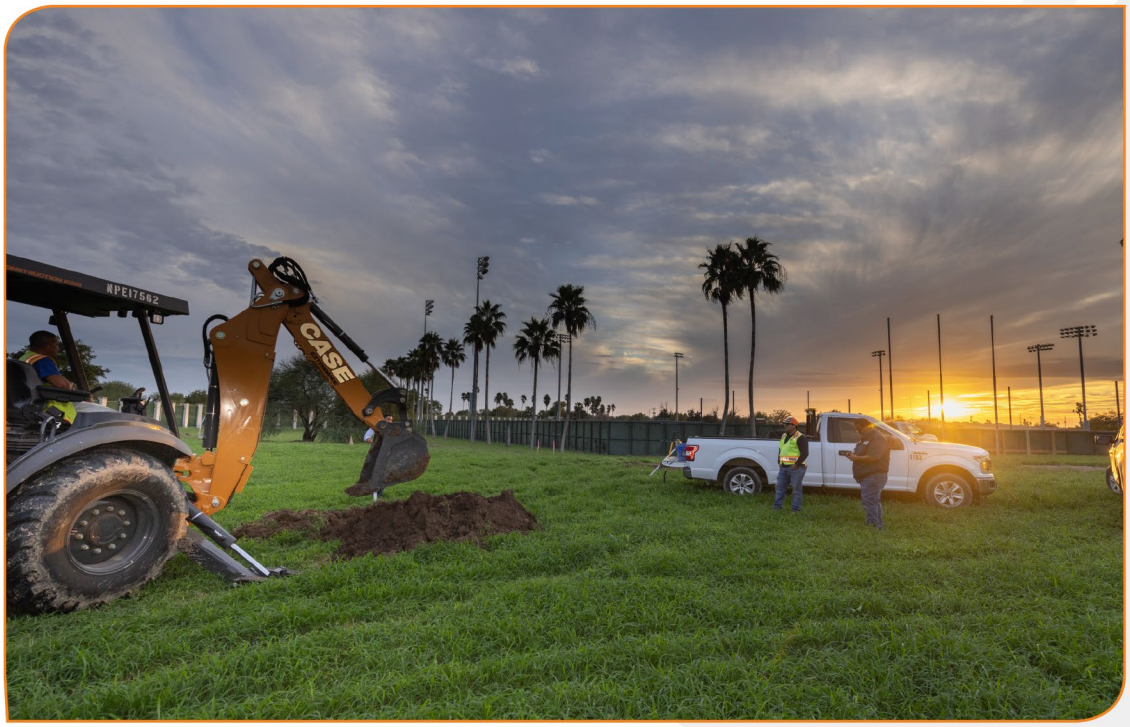
Our environmental services include:

- Due Diligence Services: Phase I Environmental Site Assessment (ESA) / ASTM E 1527-13, Phase II and III ESA
- SWPPP Services: Compliance Inspections and Reporting
- Air Quality Monitoring
- Asbestos Sampling and Testing
- Other Hazardous Material Sampling and Testing



> **MEG Engineers are a knowledgeable, professional and dependable team that has met all of our complex construction project needs.**
> ***– Marie Leal, PE, Brownsville PUB***

WORKLOAD CAPACITY



The scope of work to be performed under this contract is the scope of work that MEG performs daily for our clients in Texas. MEG has the necessary capacity to meet the City of Edinburg needs for Professional Services. MEG has the resources and experience to provide concurrent project construction services to an individual client for your detailed project scope of work. Our resources can be shifted for operations and our staff and inspectors are cross-trained for proper allocation of personnel for this specific reason.

Based on the current workload, resources, and staff of MEG it is estimated that current operations capacity is at 70%. There is currently no backlog with our testing Services. Our staffing plan is to never be above 85% capacity, so we are able to expedite services when needed to meet critical project schedules.

Based on current and future assignments, it is estimated that during the duration of the project Millennium Engineers Group, Inc. will be operating at 80% of capacity. Engineers, Staff, and Inspectors will be able to complete the daily anticipated project tasks for this project along with current projects tasks. MEG is proficient in completing daily project tasks and expediting the testing and inspection results to the project team for the projects benefit. The project team included in this submittal that will be allocated to this project will devote the necessary time to meet your schedule and often will be various percentages of their time based on your program needs. Inspectors that are assigned to this project will devote 100% of their time to this project when required and additional inspector resources will be available on an as needed basis for this project will be devoted 20% to 50% of their time for additional services as needed.

PROJECT MANAGEMENT AND COORDINATION STATEMENTS

MEG utilizes a Management System, which facilitates the management of both the Construction Material Testing (CMT) and Geotechnical Engineering Testing (GEO) Departments. The system consolidates all aspects of the business workflow, from proposal to the final invoice. It allows an organization the ability to set up clients/projects, schedule work orders (dispatch requests), report and distribute pertinent data to clients via email or website, employ management tools for lab and field testing, and prepare invoices for each project that could be exported to the organization's accounting system. The system also gives the organization's clients the ability to retrieve reports from the customized reporting website.

Our team makes recommendation on the course of action to the Client when issues of potential delays or increased costs arise during the project. Close communication and coordination between the contractor, third parties involved in the project and our team will be a priority by our team for a successful project. Our team operate as a representative of the City of Edinburg and oversee the day-to-day construction activities of the prime contract assigned. Our team has extensive experience in administering construction contracts and overall management. Our team has experience on multiple projects performing Construction Engineering, Inspection and Construction Materials Testing services for numerous clients in Texas. Our scope of services includes but not limited to:

- Construction Administration Procedures
- Field Reports
- Monthly Progress Reports
- Progress Photos
- Project Progress Meetings
- Schedule Review
- Change Order Review-
- Quality Control
- Safety and Health
- Submittal/ Shop Drawing Control
- Payment Application Review

> Millennium Engineers has always provided great, professional, friendly service. I highly recommend them.

PROJECT MANAGEMENT AND COORDINATION STATEMENTS

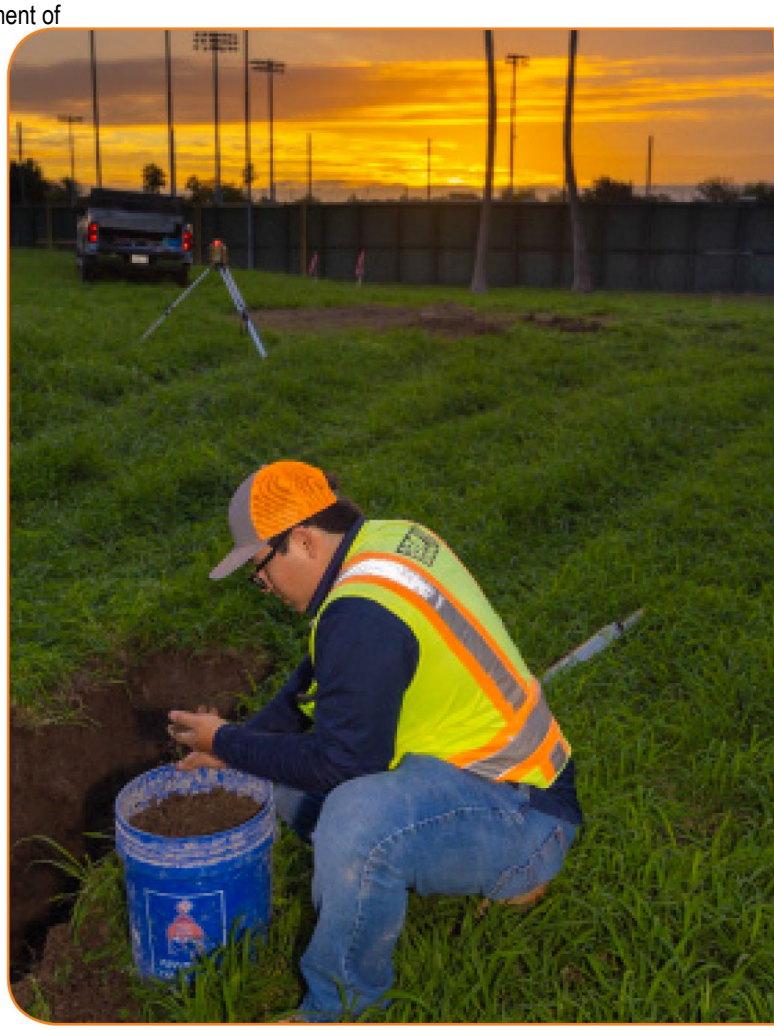
Construction Engineering and Management: MEG ensures that the project is completed on time, and on budget and within scope. This will be accomplished through review and tracking of baseline schedules and monthly updates, monthly pay estimates, change orders, plan quantities and overall project costs. We provide timely processing of contractor submittals, shop drawings, and Request for Information (RFIs). We will also work with the Engineer of Record (EOR) as needed regarding RFI's, potential design changes, or plan errors and omissions. We conduct regular progress meetings to promote partnering between all parties. We conduct pre-construction meeting with the contractor, Client, and other stakeholders prior to the start of the project. During this meeting, an escalation ladder is established to provide guidelines for resolution of construction issues.

Construction Administration and Inspection: MEG performs all necessary inspection to verify work is completed in accordance with plans and specifications. Daily Work Reports (DWR's) or other required reports will be completed to document construction progress and inspection activities as well as quantities for payment. Our inspectors inspect all construction activities daily, determine daily need for construction materials testing of work in progress and materials in use, traffic control devices on a daily basis for compliance with Traffic Control Plan and TMUTCD. SW3P inspections as per environmental requirements performed in accordance with subject guidelines.

Construction Materials Testing: MEG performs construction materials testing on all required construction activities and materials to ensure compliance with project plans and specifications in accordance with the City of Edinburg guidelines for sampling and testing. If independent assurance testing is required coordination with the third-party testing agency is scheduled at appropriate schedules and frequency.

Document Control: MEG ensure that all project progress and financial reporting is completed in accordance with contract requirements. We log all project correspondence, submittals, change orders, RFI's, shop drawings, pay estimates, MOH, etc. We also verify that the contractor is complying with Disadvantaged Business Enterprise (DBE), Equal Employment (EEO) and Buy America guidelines. All DWR's, pay sheets and material test reports are reviewed for accuracy before submittal.

Close Out Procedures: Thorough and accurate records is maintained throughout. We generate a project specific close out checklist. The checklist is distributed to all parties at the beginning to resolve all discrepancies. The checklist allows for a guide during both construction and close out phases. Another part of quality program includes formal audits conducted at 30%, 60%, and 90% of construction completed.



Another tool that we use is performing thorough constructability reviews during the pre-construction phase. We review approved plans, specifications, general notes, TCP phasing, baseline schedule, etc. to identify potential plan errors, quantity discrepancies, utility conflicts, or potential maintenance issues. All findings during the constructability review are provided to the City of Edinburg for review and further discussion.

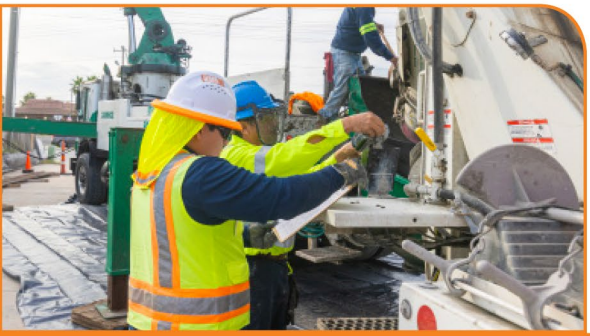
PROJECT COMMITMENT

MEG is committed to your projects, program, goals, and timelines for project schedule. We will provide the essential staff, equipment, and resources to be available and responsive daily to the City of Edinburg needs based on the district scope of services. Our offices are equipped and trained to provide the level of service and responsiveness required by the City of Edinburg. MEG has extensive local resources and expertise to complete large project programs. The key personnel presented in this Statement of Qualifications are committed to the City of Edinburg projects and will be available throughout the life of the project.

Project Communication

Communication is the key to all successful projects. The management of the testing and inspection program for the project will begin with the introduction of the project team members. Upon notification of award, our engineers and staff will meet with members of the project team who have an active role in the project. This is a critical phase in to communicate project information, goals, timelines, or potential conflicts.

Review of Construction Schedule



MEG will review the most up-to-date construction schedule by task after design documents are completed. The testing and inspection program can best support regulated testing and control final testing costs if we clearly understand the project testing requirements.

Construction Meetings

From the initiation of the project until the completion, we propose biweekly or monthly management meetings with the construction manager or his representative and other project team members. At these meetings it is necessary, to review and discuss testing results, project progress, and project schedule.

Daily Communication

MEG on site representative will maintain daily communication with the contractor's superintendent, and the designated project team members in order to schedule the required services and to communicate inspection and test results. Our project manager will communicate the results of critical off-site testing and inspections to the designated project team representatives the same day testing is performed.

> MEG has been reliable and responsive to our testing needs. – Mr. Ariel Chávez II, PE/RPLS/ Director of Engineering Services

QUALITY ASSURANCE / QUALITY CONTROL

Internal Quality Management

Our firm follows a reporting structure that will best benefit our clients. Steps and processes are performed in every task of our services to give the client the best product possible. Our client first attitude, service approach, methodology of doing business, and internal quality control program allow us to continue providing services throughout the State of Texas building long term business relationships.

Reporting Structure

Reporting Structure starts within our management team. MEG is called for the requested services and to make the necessary arrangements to initiate the project. Our dispatcher will dispatch one of our highly trained technicians to the requested project site. At this point the technician will perform the requested task(s) and then complete his/her field-testing report. Field Testing reports are turned in daily and our project managers review the testing reports. The testing reports and then turned into our administrative staff and are typed for second review of the project managers. The reports are then reviewed and signed by the office engineer before they are sent to the client. The testing reports provided by MEG include all the necessary data that is often requested by the Owner and members of the design team.

Decision Making

Decision Making by MEG starts within our management team. The decisions made by our staff and key personnel come only after consulting with the principal engineer. Timing and scheduling are important factors of construction, and every decision made will consider the best interest of our client. Engineering Recommendations are only made by a Professional Engineer that is registered in the State of Texas.

Quality Control Plans

Quality Control is monitored by MEG in every aspect of our work. Our office maintains a quality control program that has been approved by the American Association of State Highway and Transportation Officials (AASHTO) and the State of Texas, Department of State Health Services Radiation Control Program. Quality control is monitored and documented by our (QA/QC) Manager and Radiation Safety Officer.

Reporting and Billing Quality Assurance

Quality assurance is maintained by MEG in every aspect of our administrative work. Our office maintains an internal quality control program that is used by our administrative staff to audit every process of our reporting and billing procedures. This quality assurance measure allows us to maintain the quality service that is essential to our client's business.

> "MEG provides excellent services in a timely and cost effective manner.– Mr. Alfonso Quintanilla, PE/RPLS/ Quintanilla, Headly, and Associates"

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: **1742996684300**
Approval Date: **September 28, 2023**
Scheduled Expiration Date: **September 28, 2027**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

Millennium Engineers Group Inc

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **September 28, 2023**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day to day management, operational control, business location) provided in the submission of the business; application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

SOUTH CENTRAL TEXAS REGIONAL CERTIFICATION AGENCY

Your unified certification source
www.sctrca.org

June 2, 2023

Raul Palma
Millennium Engineers Group, Inc.
PO Box 4569
Edinburg, TX 78540

Dear Raul Palma:

We are pleased to inform you that your application for certification in our Small, Minority, Woman and Veteran Business Enterprise (S/M/W/V) Program has been approved. Your firm met the requirements of the SCTRCA Policy and Procedure Manual and is currently certified as a:

***ESBE HABE MBE SBE**

Certification Number: **223066103**
Certification Expiration: **June 2, 2025**

Providing the following products or services:
NAICS 541330: CIVIL ENGINEERING SERVICES
NAICS 541370: LAND SURVEYING SERVICES
NAICS 541380: GEOTECHNICAL TESTING LABORATORIES OR SERVICES
NAICS 541990: ALL OTHER PROFESSIONAL, SCIENTIFIC, AND TECHNICAL SERVICES

On the two year anniversary date of your certification, you are required to provide a renewal application affirming that no changes have occured affecting your certification status. The SCTRCA will send you a Certification Renewal reminder **sixty (60) days** prior to your expiration date. The SCTRCA will no longer include a certificate upon certification renewals. **Your expiration date is June 2, 2025.**

Please notify this office within **thirty (30) days** of any changes affecting the size, ownership, control requirements, or any material change in the information provided in the submission of the certification application. Thank you in advance.

Sincerely,

Sandra Ramos

Sandra Ramos
Executive Director

Texas Board of Professional Engineers and Land Surveyors

CERTIFICATE OF REGISTRATION

This acknowledges that

MILLENNIUM ENGINEERS GROUP INC

has fulfilled the requirements of the Texas Board of Professional Engineers and Land Surveyors to offer and perform engineering services in the state of Texas.

Registration Number
F-3913

Re: NorrisLeal, LLC Statement of Qualifications
Request for Qualifications 2024-9 – Engineering Services Rotation

Dear Mr. Mardoqueo,

NorrisLeal, LLC, is pleased to submit our qualifications in response to your Request for Qualifications (RFQ) for engineering services rotation.

With a strong commitment to excellence and a proven track record in providing engineering services, NorrisLeal is well-equipped to meet the needs of the City of Edinburg. Our team of Texas Licensed Professionals boasts superior background, training, and qualifications aligned with the requirements of the RFQ. We are eager to collaborate with the Department of Engineering on various capital improvement projects and city programs throughout the proposed contract term from 10.01.2024 to 09.30.2026.

It is worth mentioning that NorrisLeal has a longstanding relationship with the City of Edinburg, particularly with the engineering department. We value the partnership we have built over the years and are enthusiastic about the prospect of contributing to the continued growth and success of the City.

We understand the importance of all engineering services in overseeing the design, management, and contractual aspects of construction projects. Our approach involves a commitment to delivering high-quality results within the defined time period.

NorrisLeal, LLC Contact: Jesus Leal. We look forward to working with the City of Edinburg team. Should you have any questions do not hesitate to contact me at 956.535.1453. Thank you in advance for your consideration.

NorrisLeal, LLC

2.0 NORRISLEAL QUALIFICATIONS AND EXPERIENCE

2.0 NorrisLeal Qualifications and Experience

NorrisLeal LLC (NL) is a distinguished privately-owned engineering, design, and construction management firm specializing in the comprehensive development of water and wastewater infrastructure projects. Our capabilities extend across various tasks, encompassing conceptualization, environmental assessments, planning studies, design criteria, development, bid specifications, budgets, financing options, and construction and operation management. With a seasoned team representing diverse disciplines, including civil, environmental, structural, electrical, and mechanical engineering, as well as hydrology/hydraulics, we have amassed nearly 40 years of experience. Formerly operating as NRS Consulting Engineers and now as NorrisLeal, we have successfully managed over 700 technically unique public works projects, catering to municipalities, water utilities, water supply corporations, irrigation districts, drainage districts, and regional water authorities.

NorrisLeal is prepared to provide comprehensive services for the City of Edinburg, including field investigation and data collection, feasibility evaluation and alternatives analysis, design development and cost estimating, and preparation of plans, specifications, and estimates. We offer thorough review and checking of plans, subdivision and parcel maps, and computations submitted by private developers, as well as engineering and encroachment permits. Our team is capable of preparing and reviewing environmental reports, coordinating with utility agencies, consultants, and other public agencies, and organizing, participating, and presenting at meetings held by City staff, the City Council, neighborhood groups, and other stakeholders. Additionally, NorrisLeal will handle the preparation of preliminary and final documents, plans, and reports, develop handouts and graphical displays for public meetings, manage and monitor capital improvement and planning projects, and administer and monitor regional, state, and federal grants. We are ready to provide general civil engineering support services as assigned.

NorrisLeal has two local Rio Grande Valley Offices staffed and available to provide support to the City of Edinburg:

2.1 Regulatory Compliance Experience | Federally Funded Projects

The construction of most facilities has required for NL to obtain numerous permits from local, state, and federal agencies such as a construction permit (local), storm water pollution plan permit (EPA-Federal), ADA for handicap accessibility (state), a discharge permit for RO concentrate disposal (TCEQ-State), and a Texas Antiquity Permit (Texas Historical Commission-State). NL has acquired excellent rapport with local, state, and federal agencies during numerous projects requiring all these types of permits. Further detailed below.

Texas Commission on Environmental Quality (TCEQ) / Environmental Protection Agency (EPA) – NorrisLeal has completed and obtained over 15 discharge permits for the disposal of concentrate from desalination plants and wastewater discharge permits for Laguna Madre Water District, Cinco MUD 1, City of Alice, Legacy WSC, North Alamo WSC, City of Harlingen, Brownsville PUB, Southmost Regional Water Authority. For these same entities, NL has also obtained plan approvals and pilot plant protocol approvals. NL as also developed environmental information documents for Bruni, Alice and Laguna Madre Water District.

T**exas Water Development Board (TWDB)** – NorrisLeal has worked with the TWDB since its formation. NL developed the first Drought Contingency Plan and was used as a model plan as a guideline for other entities. NL has worked on several projects funded through the Board's SRF, EDAP, and others for multiple entities including City of Alice, Southmost Regional Water Authority, City of Harlingen, and Brownsville PUB. NL also served as the Region M planning Engineer from 2000-2010, funded and administered through the TWDB.

Bureau of Reclamation (USBOR) – NorrisLeal has worked with a dozen irrigation districts in the Rio Grande Valley with the administration and development of the Bureau's programs including Water Smart Grants and legislative appropriations. A major project includes a 700 cfs pumping plant for Cameron County Irrigation District No. 1. The District hired both NorrisLeal and the Bureau to design (Bureau) and construction manage (NorrisLeal) this multi million dollar project. This is something the Bureau had not done before. The construction management saved significant time and money due to the innovative project delivery by NL. Deemed one of the most successful projects the Bureau has ever been involved with.

NL is also currently working for Laguna Madre Water District on a Seawater Desalination Project with funds from the BOR. This will be one of the first projects in the State of Texas and The Rio Grande Valley. Currently, this project is in the feasibility planning stages.

Proposed Site for Laguna Madre Water District's Seawater Desalination Facility, in collaboration with NorrisLeal and the United States Bureau of Reclamation (USBOR) In Port Isabel, Texas

United States Department of Agriculture (USDA) – NL has administered fund for several project through the USDA including a Micro Filtration (MF) Arsenic removal project for the Town of Bruni. The USDA required NL to included an environmental study, design of the MF, bidding, construction management and post construction plant optimization.

International Boundary and Water Commission (IBWC) – NL has worked with the IBWC for approvals 3 major pump station on the Rio Grande for Laguna Madre Water District, Cameron County Irrigation District No. 2 and the City of Laredo. As the Region M Engineer, interaction with the IBWC was a regular occurrence during the 10-year tenure.

US Army Corps of Engineers (USACE) - NL has permitted several 404 permits including under water pipelines across the Laguna Madre, Rio Grande pumping stations mentioned above, and other wetland permits.

Texas Department of Transportation (TxDOT) and Railroad Commission of Texas (RRC) – All of NL's work with cross county and intercity pipelines have required the acquisition of permits from these agencies. These have been obtained for Laguna Madre Water District, City of Harlingen, City of Laredo and other entities.

3.0 TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

3.0 Team Member Qualifications and Experience

Jesus Leal, PE Project Manager | Process Engineer Licensed Professional Engineer: 82006 Texas Firm Registration No. F-14803 C: 956.535.1453	Mr. Leal is one of the Partners for NorrisLeal, LLC. He has more than 32 years of experience in the planning, design, construction & construction management, and operations of municipal and industrial water and wastewater facilities, in the United States and abroad. His areas of special expertise include water and wastewater treatment processes as well as membrane treatment systems piloting, design, construction/construction management and operations. Mr. Leal has coordinated several projects with different funding agencies as USDA and TWDB. Mr. Leal earned a MS Environmental Engineering from Texas A&M University, Kingsville and a BS Chemical Engineering from Texas A&M University, College Station.
Joseph W. (Bill) Norris, PE QA/QC Civil Design Licensed Professional Engineer: 49962 Texas Firm Registration No. F-14803 C: 956.983.1449	Joseph W. (Bill) Norris, PE has over 40 years of experience in the planning, design, and project management of municipal and industrial water and wastewater facilities. He has served as Principal since founding NRS in 1988 in Harlingen, Texas. Mr. Norris built the firm into being a leader in the development of alternative water resources, developing the largest producing brackish groundwater plant in Texas (Brownsville) and implementing the world's first Full Recovery Desalination Plant in El Paso, Texas. Mr. Norris has coordinated numerous projects with various funding agencies such as USDA, EPA, and TWDB, and possesses familiarity with other governmental entities. Mr. Norris earned MS Civil/Environmental Engineering from the University of Texas at Arlington and a BS Civil Engineering from Texas A&M University, College Station.
Jose Leal, PE, ***Senior Project Manager | Civil** Licensed Professional Engineer: 117241 Texas Firm Registration No. F-14803 C: 956.827.0161 ***Mr.Leal is assigned as the Project Manager for all City of Edinburg Projects**	Jose Leal, PE, has over 18 years of experience in the civil and environmental engineering field. He has experience in planning, design, project management, and construction management for both public and private sector. Mr. Leal has worked on several water and wastewater treatment facilities throughout the Rio Grande Valley that included planning, master planning, and rehabilitation of water and wastewater systems, project management, and construction management. Mr. Leal has coordinated several projects with different funding agencies as USDA and TWDB. Mr. Leal is a licensed Professional Engineer in Texas and earned a MS Environmental Engineering and a BS Civil Engineering from Texas A&M University, Kingsville.

Roel Campos, EIT Design Production Texas Firm Registration No. F-14803	Mr. Campos has over 36 years of experience in municipal, industrial water and wastewater projects. Primary roles include assisting engineers in design, analysis, drafting, and preparing engineering and construction documents for water and wastewater treatment plant design, conveyance and distribution system hydraulics including pump station design, drainage system, and thoroughfare/utility facilities. Mr. Campos earned a BS Mathematics from The University of Texas at Brownsville and Texas Southmost College, BA Government & Politics from The University of Texas at Dallas, Drafting and Design Technology Coursework from Texas State Technical College
Armando Sosa, EIT Project Manager Mechanical Review Texas Firm Registration No. F-14803	Armando Sosa, EIT has a bachelor's degree in mechanical engineering. Through his work he has gained expertise in planning, design, project management, manufacturing, and quality control of mechanical components working directly under a Professional Engineer. Mr. Sosa is currently working on water and wastewater treatment projects as an EIT, responsible for hydraulics calculations, design of water and sewer systems, road design and verification of system's compliance with TCEQ, and reviewing plans & specs. Certifications Include: Apprentice electrician. License No. 521191, OSHA, 10-hr Construction Safety and Health, Heath: Adult CPR, Blood Borne Pathogens, Basic First Aid. Mr. Sosa is an E.I.T in Texas and earned a BS Mechanical Engineering from The University of Texas - Rio Grande Valley.
Oscar Rocha Foreman | Constructability Review | Master Electrician TDLR No. 491835 Texas Firm Registration No. F-14803	Oscar Rocha brings over 25 years of construction management experience, primarily in the Rio Grande Valley and private sector, including serving as a construction superintendent for NorrisLeal. His expertise encompasses overseeing on-site project representatives to ensure precise installation and testing of sanitary sewer lines, manholes, and lift stations. Collaborating closely with Project Engineers, Oscar maintains project timelines, reviews contractors' pay requests, and facilitates monthly progress meetings between owners, contractors, and engineers. As an asset to NorrisLeal, Oscar consistently delivers successful outcomes on multiple projects statewide, completing them within schedule and budget. His role as a licensed Master Electrician amplifies his capabilities, allowing us to leverage his expertise fully to drive project success and maintain the highest standards of quality and efficiency.

Fabian Diaz Construction Manager Texas Firm Registration No. F-14803	Mr. Diaz brings over 35 years of construction management experience to the table, with a focus on water and wastewater projects in the Rio Grande Valley and private sector. During his tenure at NorrisLeal, he served as a construction manager, overseeing the on-site project representatives to ensure precise installation and testing of sanitary sewer lines, manholes, and lift stations according to design plans and specifications. He collaborated closely with Project Engineers to maintain project timelines, review contractors' pay requests, and facilitate monthly progress meetings between owners, contractors, and engineers. In his role at NorrisLeal, Mr. Diaz demonstrated strong leadership and coordination skills, ensuring projects were completed on time and within budget. His ability to work directly with project engineers and contractors enabled effective communication and streamlined project execution. With a proven track record of success in construction management, Mr. Diaz is committed to delivering high-quality results and driving project success.
Hector Gonzalez Design Technician | Licensed Journeyman Electrician Texas Firm Registration No. F-14803 TDLR No. 566076	With extensive experience throughout Texas, Hector Gonzalez has excelled as a Design Technician for NorrisLeal, specializing in water treatment plant design projects. His expertise spans various areas, including design assistance with pump stations, waterlines, sewer lines, and treatment processes. Additionally, Hector has served as an on-site project representative, ensuring the precise installation and testing of waterlines, sanitary sewer lines, manholes, and lift stations according to design plans and specifications. Collaborating closely with Project Managers, Hector plays a pivotal role in project execution, ensuring on-time completion by reviewing contractors' pay requests, receiving monthly schedule updates, and analyzing daily project reports. With his comprehensive skill set and dedication to excellence, Hector has consistently delivered high-quality results, contributing to the success of numerous projects throughout his career. Furthermore, his status as a licensed Journeyman Electrician further enhances his capabilities, allowing him to provide valuable insights and expertise in project planning and execution.

4.0 REFERENCES

4.0 References

At NorrisLeal, we believe that the quality and breadth of our past projects and references serve as a testament to our expertise and commitment to excellence. Providing detailed references and descriptions of past projects is crucial for demonstrating our proven track record in delivering successful outcomes. These references not only highlight our technical capabilities and experience but also showcase our ability to foster strong working relationships with clients and stakeholders. By reflecting on our history of completed projects, particularly those with the City of Edinburg, we aim to illustrate our consistent dedication to meeting and exceeding client expectations through innovative solutions and collaborative efforts.

4.1 Recent Work References

Client Reference No. 1
Bruni Rural Water Supply Corporation (BRWSC)
Name: Mr. Alan Garza, Board President
P: 956.333.9945
E: Alan_Garza@kindermorgan.com

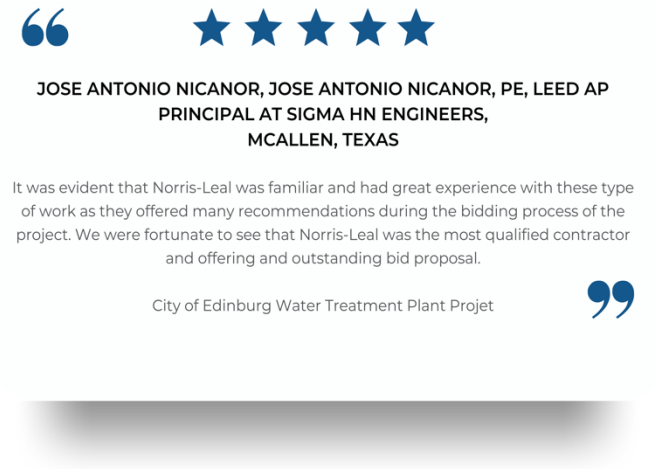
Project Description: Collaborating closely with Bruni Rural Water Supply Corporation (BRWSC) on a **United States Department of Agriculture (USDA) funded initiative**, NorrisLeal led the design, implementation, and construction project management of a Microfiltration (MF) system to remove arsenic from well water, serving over 160 connections. Facing challenges with arsenic concentrations that exceeded drinking water standards, BRWSC sought NorrisLeal's expertise in 2014 to address this issue. NorrisLeal also facilitated all necessary Texas Commission on Environmental Quality (TCEQ) permitting for the project. Despite challenges such as piloting limitations and limited site space, NorrisLeal's innovative design solutions ensured the successful realization of this vital project, providing clean potable water to the town of Bruni. NorrisLeal was able to assist BRWSC get USDA funding of $5.3 million of which $5 million was all grant to assist the town of Bruni construct the new Micro Filtration facility

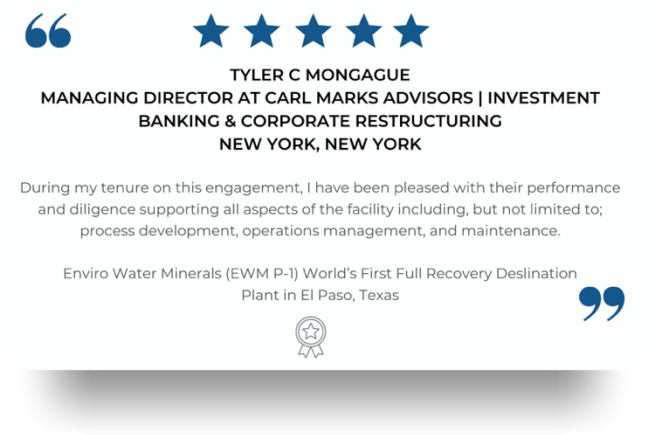
NorrisLeal extends gratitude to all the staff and Board Members at Bruni Rural Water Supply Corporation for their leadership and trust in spearheading this project and entrusting NorrisLeal to handle its execution.

Client Reference No. 2
Laguna Madre Water District
Mr. Carlos Galvan, General Manager
P: 956.572.0316
E: cgalvan@lmwd.org

Project Description: NorrisLeal has a long history with the Laguna Madre Water District over the past three decades. NorrisLeal has completed multiple water and wastewater **projects and is currently engaged in developing a feasibility study funded by the United States Bureau of Reclamatio**n for a 5-MGD seawater desalination facility located in Port Isabel, TX. The project was awarded in December. The scope of work includes the preliminary design of the treatment facility, co-located adjacent to their existing surface water treatment plant. The preliminary design includes the development of the seawater intake structure and concentrate discharge facility. NorrisLeal is also tasked with the discharge and water rights permitting for the project. A key element for implementation of a public and stakeholder participation plan is included in the NorrisLeal scope of work. NorrisLeal is currently engaged in multiple crucial initiatives for the Laguna Madre Water District. These include ensuring environmental compliance, overseeing the design, construction, and operations of a pilot plant, and designing a 3 MGD intake and treatment system. By leveraging our expertise in environmental regulations and water treatment technologies, NorrisLeal aims to support the district in meeting its water quality standards and expanding its water supply infrastructure to serve the community's growing needs.

Client Reference No. 3
City of Alice, Texas
Mr. Michael Esparza, City Manager
P: 361.219.5556
E: Michael.Esparza@cityofalice.org





Project Description: In July 2019, the City received a commitment from the **TWDB Drinking Water State Revolving Fund (DWSRF),** totaling $5,499,000 in financing and principal forgiveness. The project was to develop a new primary brackish groundwater source. The project was to alleviate the City's concerns about increasing raw water costs from Corpus Christi. It was also to ensure that the City would have an additional water source during drought.
The proposed project will construct two brackish groundwater wells and an RO plant to create a new potable water source. The components to be funded by the DWSRF include: 1) planning, design, and construction of two groundwater wells with a combined capacity of 4.0 MGD, and a raw water line and pumping system from the wells to the ROTP, all located within City-owned property; 2) all work necessary to obtain an environmental clearance that meets the National Environmental Policy Act (NEPA) requirements for the entire project, including the two wells, raw water line, ROTP, and brine discharge line and outfall; 3) acquisition of easements for the brine discharge line; and 4) engineering services that include owner's representation for P3 contracting review, and review and oversight of the design and construction of the RO plant.

In January of 2020, the City entered into a public-private-partnership agreement with 7 Seas Water Solutions for the financing, design, construction, ownership and operation of the BWRO facility. NorrisLeal is currently the Project Manager and Engineering Consultant for the City of Alice.

In alignment with your request, we are pleased to submit resumes summarizing the qualifications and experience of our project manager, key staff, and any support staff likely to be assigned to the work. All relevant team members are licensed to practice Engineering, Architecture, or Master Electrician in the state of Texas, ensuring a high standard of professionalism and expertise in delivering project management services for the City. This also includes team members who have worked on the referenced projects above.

4.2 Past Projects with the City of Edinburg

NorrisLeal has established a strong working relationship with the City of Edinburg, built on years of successful collaboration and mutual respect. Our familiarity with the city's engineering department and its processes has enabled us to effectively address and meet their unique project requirements. We have consistently demonstrated our commitment to delivering high-quality engineering solutions that align with the City's goals and standards. This close relationship has allowed us to work seamlessly with the City's team, ensuring smooth project execution and efficient problem-solving. Our ongoing engagement with the City of Edinburg is a testament to our dedication to providing exceptional service and fostering long-term partnerships.

Project Reference No. 1

1. **City of Edinburg Downtown Treatment Plant Filter Control Valve Replacement Project**

Brief Description: The project involved the replacement of valves for the Downtown water treatment plant section 3 filter gallery. The existing valves required replacement due to corrosion and the controls for the valves where the original ones since the plant was built. This replacement would help improve maintenance issues and water treatment plant conditions. NorrisLeal replaced valves, actuators, compressor and compressed air equipment and electrical controls for their existing filter cells. NorrisLeal additionally recoated the existing piping and labeled all waterlines with arrows to provide a new and improved filter gallery.

Team Members Involved:
Jose Leal, P.E., Senior Project Manager
Roel Campos, EIT, Design Production
Armando Sosa, EIT, Mechanical Review
Oscar Rocha, Foreman | Constructability Review | Master Electrician
Fabian Diaz, On-Site Project Manager

Project Cost: $467,740.00

Project Reference No. 2

City of Edinburg Wastewater Treatment Plant Headworks Raw Water Pump

Brief Description: NorrisLeal proudly completed the Wastewater Treatment Plant Headworks Raw Water Pump Project for the City of Edinburg. This comprehensive project encompassed the installation of a new influent lift station 100 HP submersible pump, electrical wiring, and controls, including a 100 HP VFD with bypass pump controls. Additionally, we replaced certain sections of existing ductile iron piping and to ensure optimal functionality for the new Flygt pump. This project reflects our commitment to delivering efficient and state-of-the-art solutions to meet the city's evolving wastewater treatment needs.
Project Cost: $438,000 (Includes $25,000 City Allowance)

Project Reference No. 3

Project Name: On-Call Engineer for City of Edinburg's Project Management Services
Brief Description: **NorrisLeal's Project Manager Scope of Services**

NorrisLeal was selected to be on the City of Edinburg Project management services. This scope is to provide comprehensive construction management services tailored to each project's needs. Our scope includes alterations, additions, renovations, site improvements, new constructions, facility demolitions, and system upgrades (utilities, electrical, mechanical, and plumbing). All services comply with applicable regulations and the City of Edinburg's policies.

Responsibilities

- Execute duties per Job Task Orders or notices to proceed.
- Ensure compliance with codes and OSHA, maintaining site safety.
- Provide construction feasibility, cost estimates, and GMP proposals.
- Offer Value Engineering Services and manage construction schedules.

Phases of Work

- **Pre-Construction**: Assist with scope development, master project schedules, budgets, and coordination with contractors and consultants.
- **Procurement**: Conduct pre-bid conferences, compile bid packages, and award bids.
- **Construction**: Schedule meetings, maintain project logs, manage on-site activities, and oversee quality assurance.
- **Close-Out**: Deliver closeout documents, coordinate project transition, and provide warranties.

NorrisLeal is ready to provide these services as needed to ensure successful project completion.

Team Members Involved:
Jose Leal, P.E., Senior Project Manager
Roel Campos, EIT, Design Production
Armando Sosa, EIT, Mechanical Review
Oscar Rocha, Foreman | Constructability Review | Master Electrician
Fabian Diaz, On-Site Project Manager

The NorrisLeal team is fully prepared and highly qualified to take on future projects with the City of Edinburg. With decades of collective experience and a proven track record of successful project completion, our team has the expertise and dedication required to meet the city's engineering and infrastructure needs.

TEXAS WAIVER OF OUR RIGHT TO RECOVER FROM OTHERS ENDORSEMENT

This endorsement applies only to the insurance provided by the policy because Texas is shown in item 3.A. of the Information Page.

We have the right to recover our payments from anyone liable for an injury covered by this policy. We will not enforce our right against the person or organization named in the Schedule, but this waiver applies only with respect to bodily injury arising out of the operations described in the schedule where you are required by a written contract to obtain this waiver from us.

This endorsement shall not operate directly or indirectly to benefit anyone not named in the Schedule.

The premium for this endorsement is shown in the Schedule.

Schedule

1. ( ) Specific Waiver
   Name of person or organization
   (X) Blanket Waiver
   Any person or organization for whom the Named Insured has agreed by written contract to furnish this waiver.

2. Operations: All Texas operations
3. Premium:
   The premium charge for this endorsement shall be **2.00** percent of the premium developed on payroll in connection with work performed for the above person(s) or organization(s) arising out of the operations described.
4. Advance Premium: Included, see Information Page

This endorsement changes the policy to which it is attached effective on the inception date of the policy unless a different date is indicated below.
(The following "attaching clause" need be completed only when this endorsement is issued subsequent to preparation of the policy.)
This endorsement, effective on 1/1/24 **at 12:01 a.m.** standard time, forms a part of:

Policy no. 0001301956 of Texas Mutual Insurance Company effective on 1/1/24

VIRTUE RISK PARTNERS

VIRTUE PACK

COMMON POLICY CONDITIONS

This endorsement modifies insurance provided under VIRTUE PACK SERVICE BUSINESS PACKAGE POLICY.

Notwithstanding anything contained to the contrary in this VIRTUE PACK Service Business Package Policy, it is hereby agreed that all coverages bound and scheduled in the VIRTUE PACK Service Business Package Policy Declarations or the Contractors Pollution Liability Supplemental Declarations are subject to the following terms and conditions. In the event of a conflict between the provisions of these Common Policy Conditions and any Coverage Part, the provisions of these Common Policy Conditions shall control.

A. LIMITS OF LIABILITY AND DEDUCTIBLE - ALL COVERAGE PARTS

1. With the exception of any defense costs paid under the Commercial General Liability Coverage Part, the General Aggregate Limit Applicable to All Coverage Parts Combined, shown in the Declarations under Item III: Limits of Liability, is the most we will pay for the sum of CLAIMS, CLAIMS EXPENSES, occurrences or damages under all Coverage Parts, Optional Coverages, Supplemental Coverages, and Supplementary Payments under this VIRTUE PACK Service Business Package Policy.

2. If any CLAIM under any Coverage Part of this VIRTUE PACK Service Business Package Policy applies to multiple Coverage Parts, then the General Aggregate Limit Applicable to All Coverage Parts Combined, shown in the Declarations shall be limited to the highest applicable Limit of Liability payable under any one of the applicable Coverage Parts, with the exception of any applicable Excess Liability Coverage.

B. ADDITIONAL INSURED

1. It is understood and agreed that Section II. WHO IS AN INSURED of the Commercial General Liability Coverage Part and Section IV. DEFINITIONS, Paragraph I. INSURED of the Contractors Pollution Legal Liability and Professional Liability Coverage Parts, as applicable, are amended to include ADDITIONAL INSUREDS, but only with respect to liability for "bodily injury," "property damage," "personal and advertising injury" or LOSS caused, in whole or in part, by:
   a) "your work", YOUR SERVICES, or PROFESSIONAL SERVICES performed for that ADDITIONAL INSURED and included in the "products-completed operations hazard";
   b) Your acts or omissions in the performance of your ongoing operations for that ADDITIONAL INSURED; or
   c) The acts or omissions of those acting on your behalf in the performance of your ongoing operations for that ADDITIONAL INSURED.

   However:
   1. The insurance afforded to such ADDITIONAL INSURED only applies to the extent permitted by law; and
   2. If coverage provided to the ADDITIONAL INSURED is required by a contract or agreement, the insurance afforded to such ADDITIONAL INSURED will not be broader than that which you are required by the contract or agreement to provide for such ADDITIONAL INSURED.

2. With respect to the insurance afforded to any ADDITIONAL INSURED, the following is added to Section III. LIMITS OF INSURANCE of the Commercial General Liability Coverage Part and Section V. LIMITS OF LIABILITY AND DEDUCTIBLE of the Contractors Pollution Legal Liability and Professional Liability Coverage Parts:
   If coverage provided to the ADDITIONAL INSURED is required by a contract or agreement, the most we will pay on behalf of the ADDITIONAL INSURED is the amount of insurance:
   a. Required by the contract or agreement; or
   b. Available under the applicable Limits of Insurance, whichever is less.

© 2022 Virtue Risk Partners, LLC

It is understood and agreed that for the purposes of this Endorsement the following definition shall apply.

A. ADDITIONAL INSURED means:

1. Any person or entity specifically endorsed onto this Policy as an ADDITIONAL INSURED. If any, such ADDITIONAL INSURED shall maintain only those rights pursuant to this Policy as are specified by endorsement; or
2. Any person or organization the NAMED INSURED is required to name as an additional insured in a written contract or agreement, but only with respect to "your work," YOUR SERVICES or PROFESSIONAL SERVICES performed by or on behalf of the NAMED INSURED for that person or organization. However, such persons or organizations are covered only with respect to "bodily injury," "property damage," "personal and advertising injury," or LOSS arising out of "your work," YOUR SERVICES or PROFESSIONAL SERVICES and are not covered for any "bodily injury," "property damage," "personal and advertising injury," or LOSS arising out of the person's or organization's own liability.

C. EXCLUSIONS

There is no coverage whatsoever under this Policy for any of the following. We will also have no duty to defend the insured against any suit seeking damages to which this insurance does not apply.

1. Cross Suits
   Any INJURY or DAMAGE, liability or obligation from any CLAIM initiated, alleged or caused to be brought about by a NAMED INSURED or INSURED against any other NAMED INSURED or INSURED.

   This exclusion shall not apply to INJURY, DAMAGE, or CLAIMS brought by any person(s) or organization(s) whom you agree, in a written contract, to name as an ADDITIONAL INSURED, provided such ADDITIONAL INSURED:
   a) is not a parent, subsidiary or affiliate of any NAMED INSURED;
   b) does not have any ownership interest in any NAMED INSURED;
   c) is not owned, operated, controlled, or managed by any NAMED INSURED.

2. Prior Knowledge, Expected or Intended Injury
   BODILY INJURY, PROPERTY DAMAGE, ENVIRONMENTAL DAMAGE, POLLUTION CONDITIONS or any LOSS expected or intended, should have been known by, or could have reasonably been expected by any RESPONSIBLE INSURED, to give rise to a CLAIM. This exclusion shall not apply to BODILY INJURY resulting from the use of reasonable force to protect persons or property.

3. Intentional Acts
   BODILY INJURY, PROPERTY DAMAGE, ENVIRONMENTAL DAMAGE or any LOSS based upon or arising from any acts of an INSURED which are based upon or otherwise attributed to the INSURED'S intentional, willful, dishonest, fraudulent, malicious, deliberate or knowingly wrongful act, including but not limited to such behavior or non-compliance with any statute, regulation, ordinance, administrative complaint, notice of violation, notice letter, executive order, or instruction of any governmental agency or body prior to or after inception of this Policy, including but not limited to an intentional discharge, seepage, disposal, dispersal, migration, release of any substance that could cause a POLLUTION CONDITION, committed by or at the direction of a RESPONSIBLE INSURED.

   This exclusion does not apply to a RESPONSIBLE INSURED that did not commit, participate in, or have knowledge of such an act.

4. Workers' Compensation
   Any liability or obligation of any INSURED under any workers compensation, disability benefits, unemployment compensation, employee benefits, pension sharing, ERISA law or any similar federal, state or local law and any amendments thereto.

5. Employment Practices Liability
   INJURY OR DAMAGE to:
   a. A person arising out of any:
      (1) Refusal to employ that person;
      (2) Termination of that person's employment; or

© 2022 Virtue Risk Partners, LLC

(3) Employment-related practices, policies, acts or omissions, such as coercion, demotion, evaluation, reassignment, discipline, defamation, harassment, humiliation, discrimination or malicious prosecution directed at that person; or

b. The spouse, child, parent, brother or sister of that person as a consequence of INJURY OR DAMAGE to that person at whom any of the employment-related practices described in paragraphs (1), (2) or (3) above is directed.

This exclusion applies whether the injury-causing event described in paragraphs (1), (2) or (3) above occurs before employment, during employment or after employment of that person.

This exclusion applies:

1. Whether the insured may be liable as an employer or in any other capacity; and
2. To any obligation to share damages with or repay someone else who must pay damages because of the injury.

6. Employer's Liability
BODILY INJURY to:
   1. An EMPLOYEE of any INSURED, their parent, subsidiary or affiliate, arising out of and in the course of employment by any INSURED, their parent, subsidiary or affiliate, or while performing duties related to the conduct of any INSURED'S business or the business of any INSURED's parent, subsidiary or affiliate; and
   2. The spouse, child, parent, brother or sister of that EMPLOYEE as a consequence of Paragraph 5 a. above.

   This exclusion applies whether any INSURED may be liable as an employer or in any other capacity and to any obligation of any INSURED to share damages with or repay someone who must pay damages because of such BODILY INJURY. This exclusion does not apply to liability assumed by any INSURED under an INSURED CONTRACT.

7. Related Claims
Any coverage provided under this Policy shall not apply to a CLAIM previously reported to the Company or any CLAIM or CLAIMS EXPENSES involving substantially the same general conditions or allegations that gave rise to any demand as referenced in the application, including any addendum or addenda attached thereto.

8. Injunctive Relief, Fines and Penalties
Any CLAIM seeking injunctive relief or payment for fines or penalties.

9. Project Coverage
Any liability or obligation from any project for which any INSURED is an insured on a separate project-specific policy issued by any insurance company.

10. Unsolicited Communications
Any liability or obligation, including obligations to pay damages or defend any claim or suit by reason of the assumption of liability in an INSURED CONTRACT, from unsolicited communications or allegations of unsolicited communications made by or on behalf of any INSURED.

Unsolicited communications means any form of communication, distribution, or the transmittal or publication of information or material, including, but not limited to facsimile, electronic mail, postal mail, express mail, telephone, internet or web-based advertisement, instant message, SMS message or text message that the recipient has not specifically requested. Unsolicited communications includes, but is not limited to actual or alleged violations of:

a. The Telephone Consumer Protection Act (47 U.S.C 227), including any amendment of, or addition to, such statute;
b. The Controlling the Assault of Non-Solicited Pornography and Marketing Act (15 U.S.C 7701), including any amendment of, or addition to, such statue; or
c. Any other statue, ordinance or regulation relating to the communication, distribution or transmittal of unwanted content, information or material.

© 2022 Virtue Risk Partners, LLC

11. Access or Disclosure of Confidential or Personal Information

Any liability or obligation arising out of any access to or disclosure of any person's or organization's confidential or personal information, including patents, trade secrets, processing methods, customer lists, financial information, credit card information, health information or any other type of nonpublic information.

This exclusion applies even if damages are claimed for notification costs, credit monitoring expenses, forensic expenses, public relations expenses or any other loss, cost or expense incurred by you or others arising out of any access to or disclosure of any person's or organization's confidential or personal information.

12. Cyber Liability

Any liability or obligation arising out of any cyber liability, including but not limited to data breach, spyware, malware, ransomware, phishing, or other electronic system hack or breach.

13. Climate Change

Any liability or obligation arising out of allegations related to global warming or climate change, including but not limited to effects of any naturally occurring or man-made gas, on the earth's climate.

14. Fire Suppression Negligence Exclusion

Any liability or obligation arising out of the NAMED INSURED'S failure to provide safeguards, monitoring or emergency fire suppression equipment, during and up to one hour after performing any operations involving any activity or operation that generates sparks, flames or heat capable of causing combustion.

15. War

Any liability or obligation of any INSURED caused, arising, directly or indirectly, out of:

a. War, including undeclared or civil war;
b. Warlike action by a military force, including action in hindering or defending against an actual or expected attack, by any government, sovereign or other authority using military personal or other agents; or
c. Insurrection, rebellion, revolution, usurped power, or action taken by governmental authority in hindering or defending against any of these.

16. Radioactive Waste

Any liability or obligation for radioactive, toxic or explosive properties of NUCLEAR MATERIAL. This exclusion shall not apply to the INSURED'S work as it relates to remediation and/or decommissioning of nonreactive sites which may contain or have become contaminated with Low-Level Radioactive Waste as defined in the Low-Level Radioactive Waste Policy Act and which is under the regulatory authority of the Atomic Energy Act of 1954, as amended.

17. NUCLEAR EXCLUSION

I. Any obligation:

A. Under any Liability Coverage, to injury, sickness, disease, death or destruction, BODILY INJURY or PROPERTY DAMAGE:

1. With respect to which an INSURED under the Policy is also an INSURED under a nuclear energy liability policy issued by Nuclear Energy Liability Insurance Association, Mutual Atomic Energy Liability Underwriters, Nuclear Insurance Association of Canada or any of their successors, or would be an INSURED under any such policy but for its termination upon exhaustion of its limit of insurance; or

2. Resulting from the HAZARDOUS PROPERTIES of NUCLEAR MATERIAL and with respect to which: (a) any person or organization is required to maintain financial protection pursuant to the Atomic Energy Act of 1954, or any law amendatory thereof, or (b) the INSURED is, or had this policy not been issued would be, entitled to indemnity from the United States of America, or any agency thereof, under any agreement entered into by the United States of America, or any agency thereof, with any person or organization.

© 2022 Virtue Risk Partners, LLC

B Under any Medical Payments Coverage, or under any Supplementary Payments Provision relating to immediate medical or surgical relief, first aid, to expenses incurred with respect to BODILY INJURY, sickness, disease or death resulting from the HAZARDOUS PROPERTIES of NUCLEAR MATERIAL and arising out of the operation of a NUCLEAR FACILITY by any person or organization.

C. Under any Liability Coverage, to injury, sickness, disease, death or destruction, BODILY INJURY or PROPERTY DAMAGE resulting from HAZARDOUS PROPERTIES of NUCLEAR MATERIAL, if:

1. The NUCLEAR MATERIAL is at, or has been discharged or dispersed from any NUCLEAR FACILITY owned by, or operated by or on behalf of, an INSURED; or
2. The NUCLEAR MATERIAL is contained in SPENT FUEL or WASTE and was at any time possessed, handled, used, processed, stored, transported or disposed of by or on behalf of an INSURED; or
3. The injury, sickness, disease, death or destruction, BODILY INJURY or PROPERTY DAMAGE arises out of the furnishing by an INSURED of services, materials, parts or equipment in connection with the planning, construction, maintenance, operation or use of any NUCLEAR FACILITY, but if such facility is located within the United States of America, its territories or possessions or Canada, this exclusion (3) applies only to injury to or destruction of property at such NUCLEAR FACILITY, PROPERTY DAMAGE to such NUCLEAR FACILITY and any property thereat.

As used in this Endorsement:

A. HAZARDOUS PROPERTIES mean radioactive, toxic or explosive properties.

B. NUCLEAR FACILITY means:

1. Any NUCLEAR REACTOR;
2. Any equipment or device designed or used for (a) separating the isotopes of uranium or plutonium, (b) processing or utilizing SPENT FUEL, or (c) handling, processing or packaging WASTE;
3. Any equipment or device used for the processing fabricating or alloying of SPECIAL NUCLEAR MATERIAL, if at any time the total amount of such material in the custody of the INSURED at premises where such equipment or device is located consists of or contains more than 25 grams of plutonium or uranium 233 or any of the combination thereof, or more than 250 grams of uranium 235; or
4. Any structure, basin, excavation, premises or place prepared or used for the storage or disposal of WASTE including the site on which any of the foregoing is located, all operations conducted on such site and all premises used for such operations.

C. NUCLEAR MATERIAL means SOURCE MATERIAL, SPECIAL NUCLEAR MATERIAL, or BY-PRODUCT MATERIAL.

D. NUCLEAR REACTOR means any apparatus designed or used to sustain nuclear fission in a self-supporting chain reaction or to contain a critical mass of fissionable material.

E. SOURCE MATERIAL, SPECIAL NUCLEAR MATERIAL, and BY-PRODUCT MATERIAL have the meanings given them in the Atomic Energy Act of 1954 or in any law amendatory thereof.

F. SPENT FUEL means any fuel element or fuel component, solid or liquid, which has been used or exposed to radiation in a NUCLEAR REACTOR.

G. WASTE means any waste material: (a) containing BY-PRODUCT MATERIAL other than the tailings or waste produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its SOURCE MATERIAL content, and (b) resulting from the operation by any person/organization of any NUCLEAR FACILITY included in the first two paragraphs of NUCLEAR FACILITY.

With respect to injury to or destruction of property, the word injury or the word destruction includes all forms of radioactive contamination of property. PROPERTY DAMAGE also includes all forms of radioactive contamination of property.

© 2022 Virtue Risk Partners, LLC

D. GENERAL CONDITIONS

1. Actions Against Company: No action shall lie against the Company unless, as a condition precedent thereto, each INSURED has fully complied with all of the provisions of this Policy, or until the amount of the INSURED'S obligation to pay shall have been finally determined either by written agreement of the INSURED or by judgment against the INSURED after actual trial and appeal has been concluded.

   Any person, organization or legal representative thereof who has secured such judgment or written agreement shall thereafter be entitled to recover under this Policy to the extent of the insurance afforded by this Policy. No person or organization shall have any right under this Policy to join the Company as a party to any action against the INSURED to determine the INSURED liability, nor shall the Company be impleaded by the INSURED or his legal representative.
2. Additional Premiums: If, during this POLICY PERIOD, an increase in the risk or hazards covered hereunder occurs, the Company shall have the right to charge the appropriate additional premium.
3. Assignment: This Policy may not be assigned and shall be void if assigned or transferred without prior written consent of the Company.
4. Bankruptcy or Insolvency: Bankruptcy or Insolvency of the INSURED or of the INSURED estate shall not relieve the Company of any of its obligations hereunder.
5. Cancellation: This Policy may be cancelled by the NAMED INSURED by surrender thereof to the Company or any of its authorized agents or by mailing written notification stating when thereafter the cancellation shall be effective. This Policy may be cancelled by the Company for any reason, by mailing to the NAMED INSURED at the address shown in the Policy, written notification not less than 60 days (10 days for nonpayment of premium) thereafter such cancellation shall be effective. Proof of mailing of such notification shall be sufficient proof of notification. The time of surrender or the effective date and hour of cancellation stated in the notification shall become the end of the POLICY PERIOD. Delivery of such written notification either by the NAMED INSURED or by the Company shall be equivalent to mailing. If the NAMED INSURED cancels, earned premium shall be computed in accordance with the customary short rate table and procedure. If the Company cancels, earned premium shall be computed pro rata. Premium adjustment may be either at the time cancellation is effected or as soon as practicable after cancellation becomes effective, but payment or tender of unearned premium is not a condition of cancellation. The Company shall be entitled to cancel for non-payment of premium should monies, including, but not limited to premium, fees, or deductibles, be owed on any current or past policy by any NAMED INSURED to the Company. The Company shall be entitled to retain any unearned premium toward such monies owed.
6. Changes: Notification to any agent or knowledge possessed by any agent or by any other person shall not effect a waiver or a change in any part of this Policy or estop the Company from asserting any right under the terms of this Policy; nor shall the terms of this Policy be waived or changed, except by endorsement issued to form a part of this Policy.
7. Choice of Law: The policy shall be governed and construed in accordance with the laws of the State of New York, without giving effect to conflict of law rules.
8. Coverage Territory. This Policy applies to CLAIMS made:
   a. In the United States of America (including its territories and possessions), Puerto Rico and Canada;
   b. International waters or airspace, but only if the injury or damage occurs in the course of travel or transportation between any places included in Paragraph 1 above; or
   c. All other parts of the world if the injury or damage arises out of:
      i. Goods or products made or sold by the INSURED in the territory described in Paragraph a. above; or ii. The activities of a person whose home is in the territory described in Paragraph a. above, but is away for a short time on your business.

   provided the insured's responsibility to pay damages is determined in a CLAIM on the merits, in the territory described in Paragraph a. above or in a settlement we agree to.

9. Declarations and Representations: By acceptance of this Policy, the NAMED INSURED agrees that the statements contained in the Application for insurance, all supplemental materials, CLAIM information and any other information including submitted to the Company, including but not limited to the aforementioned, are accurate and complete at the time such information was reported. All submitted information comprise the INSURED'S agreements and representations, and knowledge that this Policy is issued in reliance upon the truth of such representations and that this Policy Declarations, Provisions, and Endorsements embody all agreements existing between all INSUREDS and the Company and supersede any prior express or implied agreements relating to this Policy.

   The NAMED INSURED acknowledges and agrees that the Application and any other information submitted by the NAMED INSURED is incorporated into, and is part of, this Policy. The NAMED INSURED also acknowledges and agrees that the representations and warranties and contained in the Application or in any other information submitted by the NAMED INSURED in an effort to procure this Policy, are complete, true and correct and that the Company issued this Policy in specific reliance upon the representations and warranties contained in the Application and in any other information submitted by the NAMED INSURED.

10. Independent Counsel: In the event the INSURED is entitled by law to select independent counsel to defend the INSURED at the Company's expense, the attorney fees and all other litigation expenses the Company must pay to that counsel are limited to the rates the Company actually pays to counsel the Company retains in the ordinary course of business in the defense of a similar CLAIM or in the community where the CLAIM arose or is being defended.

    Additionally, the Company may exercise the right to require that such counsel have certain minimum qualifications with respect to their competency, including experience in defending CLAIMS similar to the one pending against the INSURED and to require such counsel to have errors and omissions insurance coverage. As respects any such counsel, the INSURED agrees that counsel will timely respond to the Company's requests for information regarding the CLAIM. Furthermore, the INSURED may at any time, by its signed consent, freely and fully waive its right to select independent counsel.

11. Inspection and Audit: Any of the Company's authorized representatives shall have the right and opportunity, but not the obligation, when the Company so desires, to interview persons employed by the INSURED and to inspect at any reasonable time, during the POLICY PERIOD or thereafter, the INSURED'S premises, equipment, operations, COVERED LOCATIONS and all improvements, structures, products, ways, works, machinery and appliances thereon; but neither the Company nor its representatives shall assume any responsibility or duty to the INSURED or to any other party, person or entity, by reason of such right or inspection. Neither the Company's right to make inspections, nor the actual undertaking thereof nor any report thereon shall constitute an undertaking on behalf of the INSURED or others, to determine or warrant that property or operations are safe, healthful or conform to acceptable engineering practices or are in compliance with any law, rule or regulation. The NAMED INSURED agrees to provide access to appropriate personnel to assist the Company's representatives during any inspection. The Company shall also have the right to examine or audit any financial records of the NAMED INSURED to inspect for accuracy in reporting income or revenue as represented and warranted in the Application. Premium audits may be processed as a result of such inspection, after any policy expires or is terminated. Premium adjustment calculations shall determine additional premiums due, if any, and shall not result in any mid-term downward adjustment of premium.

12. Material Change in Risk: The INSURED must endeavor to notify the Company, in writing, of any change in operations which materially increases the risk from that originally assumed by the Company at Policy inception. Any failure by the INSURED to notify the Company may void all additional risk presented to the Company, if that failure to notify the Company presents additional exposure that the company has not had the opportunity to assess or receive due consideration for. The Company reserves the right to rescind all coverage offered under this policy, accordingly.

© 2022 Virtue Risk Partners, LLC

13. Mediation and Deductible Credit: If the INSURED and the Company agree to use Mediation to resolve a covered CLAIM, and is completely resolved by such Mediation, the INSURED's Deductible obligation will be reduced by 75%, subject to a maximum monetary reduction of $35,000. For the purpose of this paragraph, Mediation means a non-binding process where a neutral panel of individuals assist the parties to reach their own settlement. When this occurs, we will reimburse the NAMED INSURED as soon as practical for any qualifying deductible amount which was already paid by the NAMED INSURED prior to the Mediation.

14. Minimum Earned Premium: If this Policy is cancelled at the request of any NAMED INSURED, the total retained by the Company shall not be less than 25.00%.

15. Nonrenewal: The Company may non-renew this Policy by mailing or delivering to the NAMED INSURED at the address stated on the Declarations Page, or any endorsement amending the Declarations Page, written notice of nonrenewal at least sixty (60) days before the expiration date of this Policy. The offer of Policy terms, conditions or premium different than those in effect prior to renewal, shall not constitute non-renewal.

16. Other Insurance:

Commercial General Liability Coverage Only:

a. Primary Insurance: This insurance is primary except when b. below applies.
b. Excess Insurance:
   (1) This insurance is excess over any other insurance, whether primary, excess, contingent or on any other basis:
      (a) That is Fire, Extended Coverage, Builder's Risk, Installation Risk or similar coverage for "your work";
      (b) That is Fire insurance for premises rented to you or temporarily occupied by you with permission of the owner;
      (c) That is insurance purchased by you to cover your liability as a tenant for "property damage" to premises rented to you or temporarily occupied by you with permission of the owner;
      (d) If the loss arises out of the maintenance or use of aircraft, "auto" or watercraft to the extent not subject to Exclusion g. of Coverage A (SECTION I); or
      (e) That is valid and collectible insurance available to you under any other policy.

   (2) When this insurance is excess, we will have no duty under Coverages A or B to defend the insured against any "suit" if any other insurer has a duty to defend the insured against that "suit." If no other insurer defends, we will undertake to do so, but we will be entitled to the insured's rights against all those other insurers.

   (3) When this insurance is excess over other insurance, we will pay only the amount of the loss, if any, that exceeds the sum of:
      (a) The total amount that all such other insurance would pay for the loss in the absence of this insurance; and
      (b) The total of all deductible and self-insured amounts under all other insurance.

   If a loss occurs involving two or more policies, each of which states that its insurance will be excess, then our policy will contribute on a pro rata basis.

All Other Coverage Parts except the Environmental Impairment Liability Coverage Part: If any part of either LOSS or CLAIMS EXPENSE are covered under this Policy and any other valid and collectible current, prior or subsequent Policy(ies) issued by any other insurer, this Policy shall provide coverage for such LOSS or CLAIMS EXPENSE on a pro rata basis with such other policy according to the applicable Limits of Liability of the applicable Coverage Part and such other policy. This coverage shall apply on an excess basis over any and all Project Specific Policies.

© 2022 Virtue Risk Partners, LLC

This insurance shall in no way be increased or expanded as a result of the receivership, insolvency, or inability to pay of any insurer with respect to both the duty to indemnify and the duty to defend. This also applies to the INSURED while acting as a self-insured for any coverage. The INSURED shall promptly upon the request of the Company provide the Company with copies of all policies potentially applicable against the liability to which this Policy applies.

The Company's obligation to make any payment for TRANSPORTATION shall be on an excess and non-contributory basis over any other primary and excess insurance available to the INSURED, whether collectible or not.

17. Primary Non-Contributory: Except as otherwise specified herein, this Policy shall be considered primary to any similar insurance held by third parties with respect to "your work," YOUR SERVICES and PROFESSIONAL SERVICES performed by you under any written contractual agreement with such third party. It is further agreed that any other insurance which person(s) or organizations(s) as referenced above may have, is excess and non-contributory to this insurance.

18. Severability: Except with respect to the Limits of Liability, and any rights or duties specifically assigned in this Policy to the NAMED INSURED, this insurance applies as if each NAMED INSURED were the only NAMED INSURED and separately to each INSURED against whom a CLAIM is made. Notwithstanding the foregoing, where no coverage is afforded under this policy to the NAMED INSURED, no coverage is afforded to any INSURED under this policy.

19. Sole Agent: The NAMED INSURED first listed in the Declarations shall be deemed agent of, and act on behalf of, all other INSUREDS, if any, with respect to all matters involving this policy, including the payment or return of premium, payment of all deductibles, receipt and acceptance of any endorsement issued to form a part of the Policy, giving and receiving notification of cancellation or non-renewal, and the exercise the Policy of the rights provided in the Extended Reporting Period clause, if applicable. The Company shall have the right to seek indemnification from any INSURED or any other person who may be legally liable for the debts of the NAMED INSURED.

20. Transfer or Recovery Rights: If the Company pays any amount or incurs CLAIM EXPENSE under this Policy, the Company shall be subrogated to the rights of recovery of each INSURED, against any person, firm or organization. All INSUREDS shall execute and deliver instruments and papers and do whatever else is necessary to secure such rights, including without limitation, assignment of the INSURED rights against any person or organization on account of which the Company made payment or incurred coverage expense under this Policy. The INSURED shall do nothing to waive or prejudice such rights either prior or subsequent to any CLAIM.

21. Transfer of the NAMED INSURED'S Rights and Duties: The NAMED INSURED'S rights and duties under this policy may not be transferred without the Company's written consent except in the case of death of an individual NAMED INSURED. If an individual NAMED INSURED dies, their rights and duties will be transferred to the NAMED INSURED'S legal representative, but only while acting within the scope of duties as the NAMED INSURED'S legal representative. Until the NAMED INSURED'S legal representative is appointed, anyone having proper temporary custody of the NAMED INSURED'S property will have the NAMED INSURED'S rights and duties, but only with respect to that property.

22. Waiver of Subrogation: The Company waives any right of recovery it may have against any person(s) or organization(s) to whom the NAMED INSURED agrees, in a written contract, to provide a waiver of subrogation because of payments the Company makes for injury or damage arising out of the YOUR SERVICES done under a contract with that person or organization. This status exists only for the project specified in that contract. Under no circumstances shall this provision act to extend the policy period, change the scope of coverage, or increase the Aggregate Limits of Insurance scheduled in the VIRTUE PACK Service Business Package Policy Declarations or in any Supplemental Declarations. This paragraph shall not apply to the Environmental Impairment Liability Coverage Part.

© 2022 Virtue Risk Partners, LLC

23. Claim and Loss Apportionment. If a Claim made against an Insured includes both covered and uncovered allegations, or is made against an Insured and others not insured, the Insured and the Company recognize that there must be an allocation between covered and uncovered Claim Expenses and Loss payments, if any. The Insured and the Company shall use good faith efforts to agree upon a fair allocation between covered and uncovered Claims, Claim Expenses, and Loss taking into account the relative legal and financial exposures, and the relative benefits obtained in connection with the defense and/or settlement of the Claim by the Insured or others.
    a. If the Insured and the Insurer are unable to agree on the amount of the allocation, then the Company shall pay only those amounts (excess of the Deductible) which the Company deems to be fair and equitable until a different amount shall be agreed upon or determined pursuant to the terms of this Policy.
    b. The Company may advance Claims Expenses and or Loss and pursuant to this paragraph prior to the final disposition of any such Claim, provided such Claim is covered by this Policy. Any such advance shall be on the condition that:
        (1) the appropriate Deductible has been satisfied; and
        (2) any amounts advanced by the Company shall serve to reduce the Limit of Liability stated in the Declarations to the extent they are not in fact repaid; and
        (3) the Insured and the Company have agreed upon the portion of the Claims Expenses or Loss attributable to covered Claims against the Insureds; provided, however, if no agreement, the Company shall pay Costs of Defense as specified herein; and
        (4) in the event it is finally established that the Company has no liability under the Policy for such Claim, the Insured will repay the Company all Claims Expenses and/or Loss advanced by virtue of this provision.

All other policy terms and conditions shall remain the same.

PLEASE READ THIS ENDORSEMENT CAREFULLY AND COMPLETELY. THIS ENDORSEMENT CHANGES THE POLICY. ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.

W. TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US

A. ADDITIONAL INSURED – AUTOMATIC STATUS

Item A.1.c. of SECTION II –COVERED AUTOS LIABILITY COVERAGE,WHO IS AN INSURED is deleted and replaced with the following:

c. Anyone liable for the conduct of an "insured" described above but only to the extent of that liability. This includes, but is not limited to, any person or organization for whom you are performing operations when you and such person or organization have agreed in a written contract or a written agreement that such person or organization be added as an additional insured on your policy. Such person or organization is an additional insured under this policy only with respect to liability caused in whole or in part by your acts or omissions in the performance of your ongoing operations for the additional insured. A person or organization's status as an additional insured for ongoing operations under this policy ends when your operations for the additional insured are completed or when this policy is cancelled, whichever occurs first.

B. BROADENED INSURED

The following paragraph is added to SECTION II –A.1. WHO IS AN INSURED:

d. Any organization of yours, other than a partnership or joint venture, of which you own a financial interest of more than 50% as of the effective date of this Coverage part, will qualify as an "insured". However, such organization will not qualify as an "insured" if it is also an "insured" under another policy, other than a policy written to apply specifically in excess of this Coverage Part or would be an "insured" under such policy but for its termination or the exhaustion of its limits of insurance. Each such organization remains qualified as an "insured" only while you own a financial interest of more than 50% in the organization during the policy period.

e. Any organization that is acquired or formed by you, other than a partnership or joint venture, of which you own a financial interest of more than 50% will qualify as an "insured". However, such organization will not qualify as an "insured" if it is also an "insured" under another policy, other than a policy written to apply specifically in excess of this Coverage Part or would be an "insured" under such policy but for its termination or the exhaustion of its limits of insurance. Each such organization remains qualified as an "insured" only while you own a financial interest of more than 50% in the organization during the policy period.

This provision does not include:

(1) any organization 180 days or more after its acquisition or formation; or

(2) "bodily injury", "property damage" or "covered pollution cost or expense" caused by an "accident" that occurred before you acquired or formed the organization.

C. DUTIES IN THE EVENT OF AN ACCIDENT, CLAIM, SUIT OR LOSS CONDITION

The following paragraph is added to the end of Paragraph A. 2., SECTION IV – BUSINESS AUTO CONDITIONS:

Your obligation to notify us promptly of an "accident", claim, "suit" or "loss" is

satisfied if you send us written notice as soon as practicable after any of your executive officers, directors, partners, insurance managers, legal representatives, or "employees" authorized by you to give or receive notices becomes aware of or should have become aware of such "accident", claim, "suit" or "loss".

If you report an "accident" or "loss" to your workers compensation insurer which later becomes a claim under this coverage part, failure to report such "accident" or "loss" to us at the time of the "accident" or "loss" will not be considered a violation of this Condition, if you notify us as soon as practicable when you become aware that the "accident" or "loss" has become a liability claim.

D. UNINTENTIONAL FAILURE TO DISCLOSE ALL HAZARDS

The following paragraph is added to Paragraph B. of SECTION IV – BUSINESS AUTO CONDITIONS:

Based on our reliance on your representations of existing hazards, if you unintentionally fail to disclose all such hazards prior to the beginning of the policy period of this Coverage Part, we shall not deny coverage under this Coverage Part because of such failure.

E. RESULTANT MENTAL ANGUISH

The definition of "bodily injury" is SECTION V- DEFINITIONS is replaced by the following"

"Bodily injury" means bodily injury, sickness or disease sustained by any person, including mental anguish or death resulting from any of these.

F. AMENDMENT OF FELLOW EMPLOYEE LIABILITY EXCLUSION

The Fellow Employee Exclusion contained in Section II – Covered Autos Liability Coverage does not apply if the "bodily injury" results from the use of a covered "auto" you own or hire. The insurance granted under this provision is excess over any other collectible insurance

G. EMPLOYEES AS INSUREDS

The following is added to the SECTION II –COVERED AUTOS LIABILITY COVERAGE, Paragraph A.1. Who Is An Insured provision:

Any "employee" of yours is an "insured" while using a covered "auto" you don't own, hire or borrow in your business or your personal affairs.

H. EMPLOYEES HIRED AUTOS

The following is added to the SECTION II –COVERED AUTOS LIABILITY COVERAGE, Paragraph A.1. Who Is An Insured provision:

Any "employee" of yours is an "insured" while operating an "auto" hired or rented under a contract or agreement in that "employee's" name, with your permission, while performing duties related to the conduct of your business.

SECTION IV – BUSINESS AUTO CONDITIONS, B. General Conditions, 5.b. Other Insurance is replaced by the following:

For Hired Auto Physical Damage Coverage, the following are deemed to be covered "autos" you own:

1. Any covered "auto" you lease, hire, rent or borrow; and
2. Any covered "auto" hired or rented by your "employee" under a contract in that individual "employee's" name, with your permission, while performing duties related to the conduct of your business.

However, any "auto" that is leased, hired, rented or borrowed with a driver is not a covered "auto".

I. INCREASED BAIL BONDS AND LOSS OF EARNINGS

SECTION II – COVERED AUTOS LIABILITY COVERAGE, A.2. Coverage Extensions, a. Supplementary Payments is amended by:

1. Replace the $2,000 limit for cost of bail bonds with $5,000 in paragraph (2); and
2. Replace the $250 a day limit for reasonable expenses including actual loss of earnings with $500 a day in paragraph (4).

J. INCREASED TRANSPORTATION EXPENSE – TOTAL THEFT OF A COVERED AUTO

SECTION III – PHYSICAL DAMAGE COVERAGE, A.4. Coverage Extensions, a. Transportation Expenses, is amended by replacing $20 per day with $60 per day, and the $600 maximum with $1,800 maximum.

This extension applies to all covered "autos" with a Gross Vehicle Weight of less than 10,001 pounds.

K. INCREASED LOSS OF USE EXPENSES

SECTION III – PHYSICAL DAMAGE COVERAGE, A.4. Coverage Extensions, b. Loss Of Use Expenses, is amended by replacing $20 per day with $60 per day, and the $600 maximum with $1,800 maximum.

L. ACCIDENTAL DISCHARGE OF AIRBAG COVERAGE

The following is added to Exclusion B.3.a. of SECTION III – PHYSICAL DAMAGE COVERAGE:

However, this exclusion does not apply to the accidental discharge of an airbag.

M. GLASS REPAIR DEDUCTIBLE WAIVER

The following is added to paragraph D. of SECTION III – PHYSICAL DAMAGE COVERAGE:

No deductible applies to glass damage if the glass is repaired in a manner acceptable to us rather than replaced.

N. COLLISION DEDUCTIBLE WAIVER

The following is added to paragraph D. of SECTION III – PHYSICAL DAMAGE COVERAGE:

When a covered "auto" insured for Collision coverage under this policy collides with another "auto" we insure, the Collision deductible applicable to the covered "auto" or "autos" insured under this policy shall not apply.

O. INCREASED LIMIT FOR ELECTRONIC EQUIPMENT

Section III PHYSICAL DAMAGE COVERAGE C.1. b. is amended by replacing the $1,000 with $2,500.

P. TOWING

SECTION III – PHYSICAL DAMAGE COVERAGE, A.2. Towing, is replaced by replacing the following:

2. Towing

We will pay up to $75 for towing and labor costs incurred each time an "auto" with a Gross Vehicle Weight of less than 10,001 pounds is disabled if the declarations indicate that either Comprehensive Coverage or Specified Causes of Loss Coverage and Collision Coverage are provided for that "auto".

Q. AUTO LOAN/LEASE GAP COVERAGE

The following is added to SECTION III – PHYSICAL DAMAGE COVERAGE:

In the event of a total "loss" to a covered "auto" shown in the Schedule or Declarations, we will pay any unpaid amount due on the lease or loan for a covered "auto", less:

1. Overdue payments and financial penalties associated with those payments as of the date of the "total loss";
2. The carryover, transfer or rollover of a previous outstanding lease or loan

balance from another vehicle to the original lease or loan for the scheduled "auto";

3. The dollar amount of any unrepaired damage which occurred prior to the total "loss" of the scheduled "auto";
4. All refunds paid or payable to you as a result of the early termination of the lease of loan agreement or, to the extent financed, as a result of the early termination of any warranty or extended service agreement on the scheduled "auto";
5. Financial penalties imposed under a lease agreement for high mileage, excessive use or abnormal wear and tear;
6. Nonrefundable security deposits; and
7. Costs for extended warranties, Credit Life Insurance, Health, Accident or Disability Insurance purchased with the loan or lease.

The following is added to paragraph A. Loss Conditions of SECTION IV – BUSINESS AUTO CONDITIONS:

Lease/Loan Gap Coverage shall apply to the remaining term of the original lease or loan agreement written on the scheduled "auto" at the time of total "loss".

R. PERSONAL EFFECTS COVERAGE

The following is added to SECTION III – PHYSICAL DAMAGE COVERAGE, A.4. Coverage Extensions:

c. Personal Effects

We will pay up to $500 for "loss" to personal effects which are:

(1) owned by an "insured"; and

(2) in or on a covered "auto".

This coverage applies only in the event of a total theft of a covered "auto". No deductible applies to this coverage. Tapes, records, discs or other similar devices used with audio, visual or data electronic equipment are not considered personal effects.

S. LOCKSMITH SERVICES

The following is added to SECTION III – PHYSICAL DAMAGE COVERAGE, A.4. Coverage Extensions:

d. Locksmith Services

We will pay up to $100 for necessary locksmith services incurred because keys to a covered "auto" have been lost, stolen or damaged. No deductible applies to this coverage.

T. TAPES, RECORDS AND DISCS COVERAGE

Exclusion B.4.a. of SECTION III – PHYSICAL DAMAGE COVERAGE does not apply.

The following is added to SECTION III – PHYSICAL DAMAGE COVERAGE, A.4. Coverage Extensions:

e. Tapes, Records And Discs Coverage

Under Comprehensive Coverage we will pay for "loss" to tapes, records, discs or other similar devices used with audio, visual or data electronic equipment. We will pay only if the tapes, records, discs or other similar audio, visual or data electronic devices:

(1) Are your property or that of a family member or employee

(2) Are in a covered "auto" at the time of "loss".

The most we will pay for "loss" is $200.

U. HIRED AUTO PHYSICAL DAMAGE

If hired "autos" are covered "autos" for Covered Autos Liability Coverage, then

Comprehensive and Collision coverages are extended to an "auto" you lease, hire, rent, or borrow subject to the following:

1. The most we will pay for "loss" to any leased, hired, rented, or borrowed "auto" is the Actual Cash Value or the cost to repair the "auto", whichever is smallest.
2. The deductible for Hired Auto Physical Damage will be equal to the largest deductible applicable to any owned "auto" scheduled on this policy for that coverage. No deductible applies to loss by fire or lightning.
3. If the "loss" to the leased, hired, rented, or borrowed "auto" is covered by Comprehensive Coverage, and if no owned "auto" scheduled on this policy is insured for Comprehensive Coverage, a $100 deductible will apply to the "loss".
4. If the "loss" to the leased, hired, rented, or borrowed "auto" is covered by Collision Coverage, and if no owned "auto" scheduled on this policy is insured for Collision Coverage, a $1,000 deductible will apply for the "loss".

V. HIRED PRIVATE PASSENGER AUTOS AND LIGHT TRUCKS – WORLDWIDE COVERAGE

Paragraph b. 7.5.(1) of Section IV – BUSINESS AUTO CONDITIONS – Policy Period, Coverage Territory is replaced by the following:

Anywhere in the world if a covered "auto" of the private passenger type or a light truck with Gross Vehicle Weight less than 10,001 pounds is leased, hired, rented or borrowed without a driver for a period of 30 days or less.

W. TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US

The following is added to Section IV – BUSINESS AUTO CONDITIONS A.5. Transfer Of Rights Of Recovery Against Others To Us:

We waive any right of recovery we may have against any person or organization to the extent required of you under a written contract executed prior to any "accident" or "loss", provided the "accident" or "loss" arises out of operations contemplated by such contract. This waiver applies only to the person or organization designated in such contract.

6.0 PROFESSIONAL SERVICES AGREEMENT

6.0 Professional Services Agreement

Our team at NorrisLeal, LLC has thoroughly reviewed the Professional Services Agreement, and we acknowledge that we understand its contents. We are fully aware of the prerequisite insurance requirements and are prepared to meet and exceed those requirements as specified in the agreement.

If selected for the project, NorrisLeal, LLC is committed to entering into the Professional Services Agreement in accordance with the terms and conditions outlined. We understand the importance of compliance and adherence to contractual obligations, and we assure you that we will approach this partnership with the utmost professionalism and dedication.

7.0 CONTACT INFORMATION

7.0 Contact Information

For over 40 years, NorrisLeal has proudly nurtured deep roots in the local community of the Rio Grande Valley. With our longstanding commitment to the region, we understand the unique dynamics and needs of the area**. Our strategic presence is fortified by local offices in Edinburg and Harlingen**, strategically positioned to cater to the diverse requirements of the City of Edinburg and its projects. This local presence not only underscores our dedication to the community but also ensures that **we are readily accessible** to meet the evolving needs of our clients.

1. TRANSMITTAL LETTER

Perez Consulting Engineers, LLC (PCE) is pleased to submit our Statement of Qualifications for the City of Edinburg Professional Engineering Services RFQ. Having previously worked with various Municipalities, our company is familiar with the procedures for smooth project design and construction. This familiarity and knowledge can help provide insightful information that will offer improvement alternatives and achieve the desired goals.

PCE's office is located at 808 Dallas Avenue in McAllen, Texas. All engineering project work will be performed at this location. Any questions could be directed to our President, J. David Perez, P.E. via email at dp@perezce.com or Jorge D. Perez, P.E., R.P.L.S., Vice President via email at jdp@perezce.com. Both David and Jorge Perez are authorized to bind the firm to contract and can be reached at 956.631.4482.

To date, no addendums have been issued.

Perez Consulting Engineers, throughout its' long history, has developed a broad knowledge of regional characteristics that can affect engineering design projects, including geology, hydrology, soils conditions, weather and indigenous habitat having previously performed numerous engineering design projects for roadways, drainage systems as well as water and wastewater projects within the Rio Grande Valley and the surrounding areas.

Mr. Jorge D. Perez and PCE have been providing Civil Engineering services throughout the Rio Grande Valley and the South Texas area since 1976; including site planning, site development, water and sanitary sewer design, drainage, flood control and public works engineering for Cities such as McAllen, San Juan, Brownsville, Harlingen, Lyford, and Rio Grande City.

PCE has a well-qualified staff equipped to meet all the City's drainage needs. We have successfully demonstrated to our Clients the capability to study, advise, plan, and design a project such as that being contemplated by the City. We appreciate this opportunity to present our qualifications and show our commitment to the City of Edinburg and once more wish to express our most genuine interest in providing our services to you.

PCE's DESIGN TEAM works in TOTAL CONSULTATION with two PCE Professional Engineers to analyze design and construction alternatives. This TOTAL PCE ENGINEERING DESIGN CONSULTATION brings to our clients good, analyzed engineering considerations incorporated into the Project.

We appreciate the opportunity to present our qualifications to the City of Edinburg and wish to express our most genuine interest in providing our services to you.

Respectfully submitted,
Perez Consulting Engineers, LLC

J. David Perez, P.E.
President

2. FIRM QUALIFICATION AND EXPERIENCE

QUALIFICATIONS

CURRENT WORKLOAD

Perez Consulting Engineers is currently working in design of various civil engineering projects involving educational facility site plans, drainage systems, sanitary sewer collection systems, irrigation system improvements in the South Texas area. Collectively, these projects are approximately 80% complete. PCE's workload is such that it can assign a project engineer to start with the proposed projects as soon as awarded.

It is important that the City of Edinburg feel comfortable knowing that its needs will be met in a timely manner and within schedule. PCE has always been committed to providing our clients a high level of service that is both timely and will meet budgetary constraints.

PROJECT APPROACH

Perez Consulting Engineers, having previously done services for The City of Edinburg, has successfully demonstrated its' capability for fulfilling all scope of services required for the various anticipated projects, all within time and budget. With our familiarity with the City of Edinburg, Railroad Company, TxDOT, Irrigation and Drainage Districts' staff members and policies, we have the knowledge and experience in dealing with the proper key entities involved as stakeholders for such an engineering assignment. We eagerly await the opportunity to once more serve The City of Edinburg based on our merit, experience, and reputation as Civil Engineers.

Summary of Project Approach Tasks and Schedules:

The following is a basic outline of the approach for the various projects. Depending on the project, additional meetings and coordination will need to be conducted as required. Notice that PCE has two very experienced Registered Professional Engineers and an Engineer In Training, all working in a collaborative manner to give the client the most efficient and cost-effective outcome to the assignment.

Preliminary Phase

During this Phase of the Project, PCE will meet with the City of Edinburg Officials to clearly understand the anticipated goals and expectations such as the desired permissible levels of flood protection, budget, and schedules for the Project (s). PCE will:

- Meet with City of Edinburg Officials and other stakeholders at a Preliminary Design Conference to establish fundamental aspects, concepts and design criteria and goals of the project and to gather existing information including Drainage Maps and Studies, Drainage Master Plans, Topographic Maps and other related information relative to the Project.
- Request and receive any additional information such as right-of-way limitations for improvements, existing easements, geotechnical reports, and reports from the City.

- As required, along with City Staff, if applicable meet with the Drainage District, Texas Department of Transportation, City Utility Department, Irrigation District(s), Gas Company and other private and public institutions such as the School District and other utilities for coordination of possible conflicts, phasing of the project, permitting requirements and any other matter related to the anticipated design and construction.

- Prepare a Preliminary Engineering Report including related Hydraulic and Hydrological calculations, contributing drainage areas, proposed improvement alignment(s), design criteria, as well as recommendations and cost estimates for the proposed improvements and other options as applicable.

- After City Staff review of the Report, prepare preliminary layout plans based on the approved preferences and options and submit to City of Edinburg staff for review and approval.

Design Phase

- Based on the City of Edinburg's approved option, PCE will conduct detailed engineering and topographical ground surveys, public and private utility locations from field data and record, land acquisition surveys (if required), all performed with adequate information to prepare a detailed digital Base Map to be used for the preparation of plans.

- Prepare Final Plans and Specifications of the approved work.

- Prepare and submit regulatory permits as required, such as Texas Department of Transportation, Railroad, Drainage District, etc.

- Prepare Construction Specifications, Contract and Bidding Documents

Bidding Phase

- Assist the City in scheduling and conducting a Pre-Bid Conference with prospective bidders

- Assist the City staff with the bidding process, including replying to any bidder questions and conducting the bid opening.

- Prepare Bid Tabulations and analyze, study, and evaluate the bids and bidder's qualifications received to ensure their accuracy and prepare a "Letter of Recommendation" to the City Commission for consideration to consider award of the Project.

Construction Phase

- Conduct Pre-construction conference with the Contractor, Engineering, Utility, and Public Works Departments, and any other stakeholders such as gas company, drainage district officials, Texas Department of Transportation, Telephone Company and other affected utilities or institutions.

- Perform periodic site visits to assure that the project is proceeding in accordance with the plans and specifications and in the schedule specified.

- Along with the City Staff, conduct regular scheduled progress meetings with the contractor and other City Departments and stakeholders.

- Assist the City staff with all Request for Information (RFI's) from the Contractor, if any.
- Assist the City in the preparation of Change Orders (if any).
- Assist the City of Edinburg Staff with review of periodic and final estimates and general representation for the construction of the project.
- Assist City of Edinburg staff with the project closeout.

Throughout all the different Phases of the Project, PCE will conduct regular monthly (or bi-weekly) progress meetings with the City of Edinburg Officials, Staff and Stakeholders as required to assure that the designs and preparation of the plans are meeting the City's expectations and schedules and during the Construction Phase, to ensure that all the construction is being conducted in accordance with the Plans and Specifications. In the Progress Meetings, PCE may also include other entities, such as the Texas Department of Transportation, Drainage District, etc., as well as other regulatory agencies and interested parties to make certain that all aspects and conflicts (if any) of the project are being discussed and resolved.

We understand that the growth of the City of Edinburg calls for some projects to be on **FAST-TRACK ENGINEERING** and **CONSTRUCTION SCHEDULES** and it will be implemented as needed to provide timely delivery of submittals and completion of all the Tasks. PCE is cognizant of deadlines and schedules. PCE will incorporate in their plans and Contract Documents, Construction Phasing Schedules and **CONSTRUCTION METHODS** to expedite Construction. PCE's commitment to The City of Edinburg is to PARTNER with CITY STAFF to assure timely and **QUALITY** results.

Throughout the Preliminary, Design and Construction phases of the project, PCE will conduct bi-weekly (or more frequent) progress meetings with the City of Edinburg's Officials to assure that the designs and preparation of the plans are proceeding to the City's expectations. PCE will also meet with other entities, such as drainage district officials, irrigation district officials, and other interested parties to ensure all aspects of the project are taken care of.

As a client-oriented firm, we are committed in providing careful and full attention to each of our client's needs and expectations. We have earned the trust and respect of clients which we have worked for in the past and invite you to contact these clients. We are proud that the greater part of our work is repeat business and from satisfied clients or because of referrals of these clients.

All work will be performed at the 808 Dallas office. It is important to us that The City knows that the Projects will be completed in a timely manner and within schedule. Our workload is such that it can assign a project engineer to start with the proposed projects as soon as awarded. Our company will add more personnel as workload increases.

PROJECT EXPERIENCE

City of Edinburg Stadium and Dawson Drive Drainage Project - Perez Consulting Engineers was selected to perform a detailed Hydrologic and Hydraulics (H&H) study and report to determine causes of local flooding in the Stadium and Dawson Drive vicinity of the City of Edinburg.

To aid in the analysis of the specific identified targeted areas of concern, PCE performed a detailed watershed analysis with the aid of an aerial survey implementing *Laser Imaging Detection and Ranging Technology (LIDAR)* for the designated area to provide a clear understanding of the drainage pattern characteristics. The work will require coordination of the Edinburg School District as well as the Hidalgo County Drainage District No. 1

PCE is using its findings to develop plans and specifications to provide solutions and alternate solutions for the drainage deficiencies within the study area.

City of San Juan Engineer on Record; San Juan, Texas - Perez Consulting Engineers performed review of subdivision plats and engineering plans for infrastructure improvements including paving, drainage, water and sanitary sewer. Engineer performed periodic visits to assure compliance with the City of San Juan Standard Subdivision Development Guidelines.

PCE Engineers also assisted the City of San Juan Staff in the development of the "Standard Design Guide for Public Infrastructure Improvements" to standardize construction of public works within the City of San Juan. These Standards were implemented by City Ordinance in September 2016.

City of San Juan Paving Improvements Phase 1; San Juan, Texas - Rehabilitation of 26 streets to reach newly adopted City Standards. Project included extensive coordination by PCE with the City of San Juan to determine the best method for value. Order of priority for street reconstruction was determined based by the information obtained by the city of San Juan Pavement Maintenance Report as prepared by the University of Texas Rio Grande Valley (UTRGV).

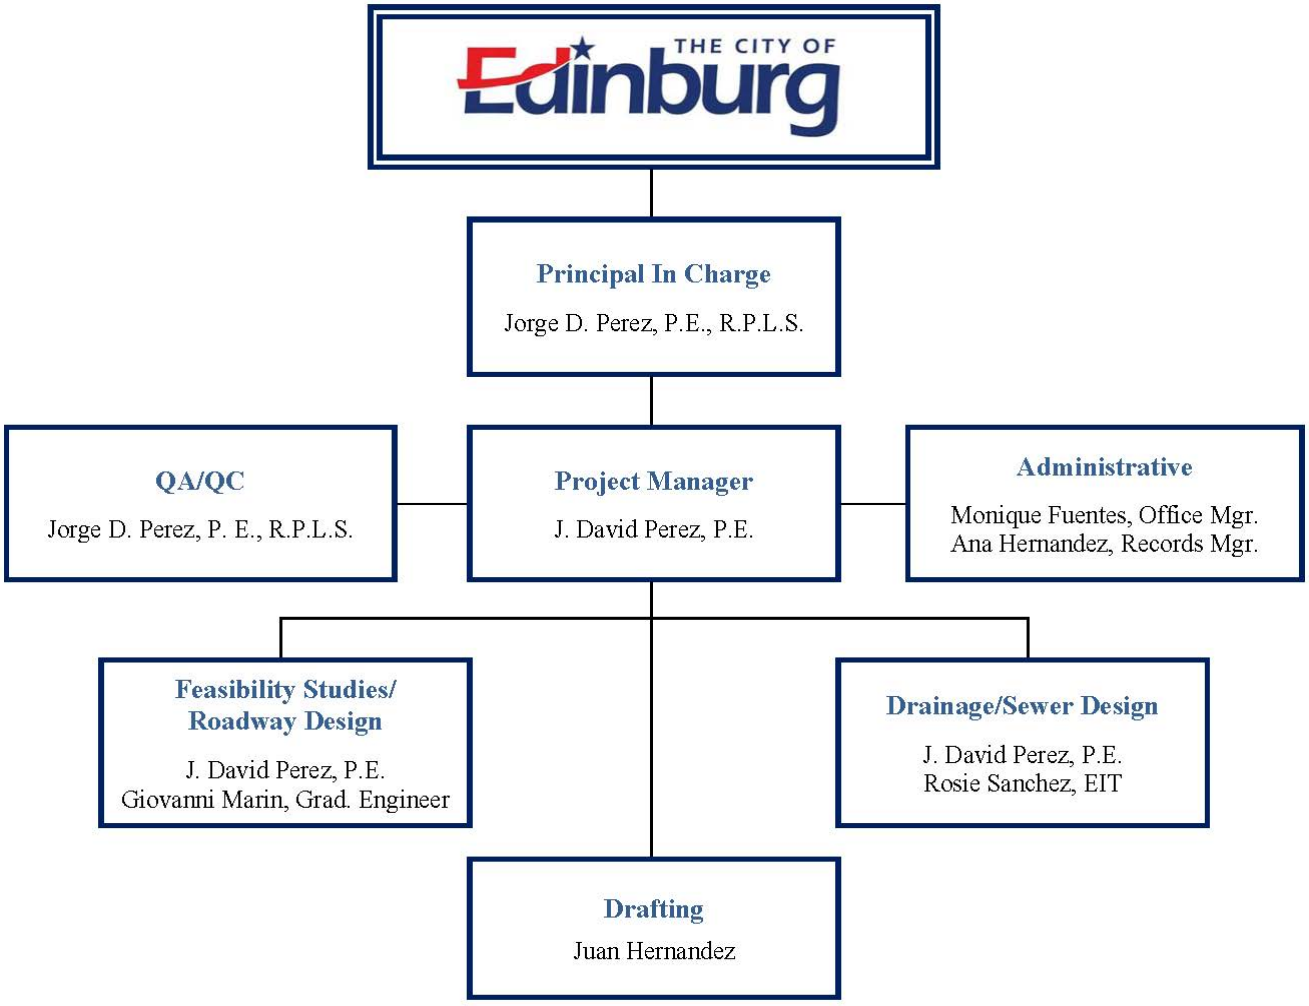
Procurement Documents drafted using two methods. The first being the standard Rehabilitation method, most common utilized. The second was an Alternate method utilizing soil stabilizer method, open to any supplier.

East San Juan Water Improvements: San Juan, Texas PCE assisted the City of San Juan with engineering design and procurement for construction services in connection to the installation of a main water transmission line at the Cesar Chavez and US Expressway 83 intersection.

The projects objective was to open cut the west turn-around under the U.S. Expressway 83 overpass at Cesar Chavez in San Juan, TX, to install the water main of the size and class specified in the plans from the southwest corner to the northeast corner of the referenced intersection. From the northwest intersection at said location, the water main will head west for approximately 1,900 linear feet along the north side of the West Bound Frontage Road to connect with an existing water main owned and operated by the City of San Juan.

PCE worked with the Texas Department of Transportation (TxDOT) Pharr Area Office to obtain approval for the open cut request. Some of the main features consist of constructing two cast-in-place reinforced concrete conflict boxes, removal of 1-1/2" of existing asphalt surface pavement to the limits specified in the plans. Re-surface with 1-1/2" compacted TxDOT Item 340 Type D Fine Surface Dense Graded Hot Mix Asphalt Pavement.

North Water Booster Station Emergency Power Generator Improvements; Edinburg, Tx. - Prepare plans and specifications for the installation of an Emergency Electric Power Generator for the Edinburg North Water Booster Pump Station capable of providing power to 4-100 hp high-pressure potable water pumps and providing pump controls for Pump No. 4.



16th & Beech Sanitary Sewer Improvements Project; McAllen, Texas - Design of a 6,500 l.f. 30-inch diameter sanitary sewer outfall for the McAllen Public Utility (MPU), McAllen, Texas for the purpose of the abandonment of an existing sanitary sewer lift station constructed in 1927. The new outfall line followed the same alignment as the old existing 24" clay receiving line constructed in the 1950's and found in poor condition.

The construction of this new 30-inch PVC sanitary sewer main was part of the MPU's Master Plan and has eliminated a 4.5 MGD lift station with the construction of this new gravity line, open cut with trench depths up to 30 feet for the contract bid price of $ 4.2M.

The construction of this outfall included a 675 ft. long 26 ft. deep Microtunnel with a 30-inch Hobas tunnel pipe constructed through contaminated areas. The new gravity line alignment went along existing dedicated city streets and through existing commercial and residential areas. Public and private utility adjustments were included at conflict locations. The Project was completed on time and below the original contract amount for a savings of $85,000.

Texas 2015 Floods Disaster Recovery Appropriation - CDBG DR 4245 - City of Lyford Drainage Improvement Projects. These grant applications were recently approved and awarded during the spring of 2018 by the GLO and consists of two (2) drainage projects. Project one focus on addressing drainage deficiency in a previously identified area by the owner and currently is under preliminary design. Estimated budget is $400,000.00 including construction costs and professional fees. The second project is in early stages involving acquisition. Project two focuses in a larger area drainage area and involves construction of a regional detention basin and regional drainage pump station. The estimated budget is $1,000,000.00 including construction and professional fees.

3. TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

PCE has always been committed to the *"Collaborative Engineering Design Approach"*; that is, we combine the unique individual talents and experience of each member of our Professional Engineering Staff and the City Staff to every design Project to provide the client with the best alternative for his Project and expectations.

Professional Engineers:
J. David Perez, P.E., President (PCE)
Jorge D. Perez, P.E., R.P.L.S., Senior Engineer and Vice President (PCE)

Registered Professional Land Surveyor:
Jorge D. Perez, P.E., R.P.L.S.

Engineering in Training:
Rosie Sanchez, EIT

Graduate Engineer:
Giovanni Marin

Civil CAD Technician/Designer:
Juan Hernandez, Jr

Administrative:
Monique Fuentes, Office Manager
Ana Hernandez, Administrative Assistant

Biographic Summaries
PCE employees are individuals with diverse, yet complementary, professional backgrounds. Much of our skilled employees have grown with PCE in their careers knowing the commitment to quality that makes this firm prominent and successful. Our firm currently employs Two (2) Professional Engineers, One (1) Engineer in Training, One (1) Graduate Engineer, One (1) Civil CAD/Designer Technician, and Two (2) Administrative/Clerical positions. Additional personnel will be added as workload increases.

Our Senior Engineer and Principal in Charge, **Mr. Jorge D. Perez, P.E., R.P.L.S.,** has over 50 years of experience working with Local, State, and Federal Agencies. His expertise ranges from Drainage Systems, Pump Stations, Land Development and Municipal Waterworks to Transportation and Public Works. Mr. Perez holds a Bachelor of Science in Civil Engineering from The University of Texas at Austin and is a Registered Professional Engineer and a Registered Professional Land Surveyor in the State of Texas. (See Attached Resume)

Perez Consulting Engineers, LLC also employs one other well-qualified Engineer who has experience in Site Development, Municipal Waterworks, Educational, Aviation, Paving & Drainage, and Transportation Projects.

Mr. J. David Perez. P.E. joined the PCE team in March of 2002. He brings in extensive experience in Site Development, Aviation, Municipal Wastewater Treatment and Transportation. As a Project Manager for PCE, Mr. Perez has worked on numerous Educational, Paving & Drainage and Municipal Waterworks projects in this area and has previously worked on Aviation related Projects at the DFW, Laredo, and other County Airports. Mr. Perez holds a Bachelor of Science in Civil Engineering from Texas Tech University. He is a Professional Engineer Licensed in the State of Texas. (See Attached Resume)

J. David Perez, P.E.

President, Perez Consulting Engineers, L.L.C.

Years Experience: With This Firm: 22 With Other Firm: 6.5
Education: B.S., Civil Engineering, Texas Tech University, 1995
Registration: Registered Professional Engineer, Texas # 89429

PROFESSIONAL EXPERIENCE

2002-Present: Perez Consulting Engineers, L.L.C., McAllen, Texas
1996 - 2002: Freese and Nichols, Inc., Fort Worth, Texas

Mr. J. David Perez P.E. joined Perez Consulting Engineers (PCE) in March of 2002. He brings extensive experience in Site Development, Transportation, Municipal Wastewater Treatment and Aviation. As a Project Manager for PCE, Mr. Perez has worked on numerous projects such as Paving & Drainage, Municipal Waterworks and Educational Site Development. In addition, he has previously worked on Aviation related Projects at the DFW and other County Airports.

PROJECTS WITH PCE

- **City of McAllen Drainage Bond 2018 – Group E Projects; McAllen, Texas** – Project Engineer for Group E1 - E7, including Northwest Blueline Regrade, Marigold Ave. Drainage Improvements, N. 12th St. at Esperanza Ave. Drainage Improvements, Harvey Ave. at N. Main St. Drainage Improvements, Iris, Ave. at Cynthia Ave. Drainage Improvements, and East Tamarack Ave. Drainage Improvements. Plans, Specifications, and/or reports were completed for each phase.

  E1 Project included design for new storm sewer, utility relocations and coordination, street paving, traffic control, and channel earthwork along Auburn and Future 33rd Street. The new storm sewer system was designed to alleviate flooding problems along Auburn Avenue west of 29th Street.

  Mr. Perez helped design the additional engineering services which were included by the City of McAllen to minimize flooding along the future 33rd Street north of Auburn Ave to the Ware Ridge Subdivision.

- **San Juan Paving Improvements Phase I; San Juan, Texas -** Rehabilitation of 26 streets to reach new City Standards. Project included extensive coordination by PCE with the City of San Juan to determine the best method for value. Procurement Documents drafted using two methods. The first being the standard Rehabilitation method, most common utilized. The second was an Alternate method utilizing soil stabilizer method, open to any supplier.

- **San Juan Subdivision Plans Review; San Juan, Texas -** The Engineer performed review of subdivision plats and engineering plans for infrastructure improvements including paving, drainage, water and sanitary sewer. Engineer also performed periodic visits to assure compliance with the City of San Juan Standard Subdivision Development Guidelines

- **McAllen Bond Drainage Projects (2018) McAllen, Texas** – Preparation of Plans and Specifications for the Group E Projects. This consisted of Projects E1 through E7 which included multiple Drainage projects to help alleviate local flooding and required storm sewer infrastructure.

- **City of Edinburg Stadium and Dawson Road Drainage; - Edinburg, Texas –** Perez Consulting Engineers was selected to perform a detailed Hydrologic and Hydraulics (H&H) study and report to determine causes of local flooding in the Stadium and Dawson Drive vicinity of the City of Edinburg. PCE will use the data from our report to design plans to alleviate the flooding in the area. The work will require coordination of the City of Edinburg, Edinburg School District as well as the Hidalgo County Drainage District No. 1.

- **MIA Runway 14-32/Taxiway A Safety Improvements (Hydrologic and Hydraulics Report); McAllen, Texas** – Perez Consulting Engineers (PCE) to perform a comprehensive hydraulic and hydrologic (H&H) study to provide general recommendations for the design of storm drainage facilities within the MIA and on the 10th Street and 23 rd. Street Main Drain adjacent to the McAllen International Airport (MIA) property. With the Results of the H&H, the design engineer will be able to design the proposed facilities appropriately.

- **Bentsen Road (U.S. Expressway 83 to F.M. 495); McAllen, Texas** - Design engineer for 1.75 miles by 65 feet wide of new roadway from U.S. Expressway 83 to F.M. 495 (Pecan Blvd.) including storm drainage, striping and signage, railroad crossing, Storm Water Pollution Prevention Plan, retaining wall design and traffic control.

- **Nolana Road; McAllen Texas -** Design engineer for 2,500 ft by 65 ft wide roadway extension from Bentsen Rd. to Taylor Rd. including storm drainage design and two irrigation siphons.

- **Bentsen Road (F.M. 495 to 3 Mile); McAllen, Texas -** Design Engineer for 2 miles by 65’ wide of new roadway from F.M. 495 (Pecan Blvd.) to 3 Mile Line (Buddy Owens) including storm drainage design, irrigation siphon at Daffodil Ave, signage and striping, and a drainage feasibility study.

- **Pin Oak Road; Edinburg, Texas** - Design Engineer for ½ mile of 44-foot-wide new roadway from U.S. 107 to Sprague Ave. Project included paving, drainage, traffic signal and marking & signage plan.

- **I” Road Spur (U.S. 281 to “I” Road); Edinburg Texas -** Design Engineer for a 41 foot wide roadway from U.S. 281 to “I” Road including drainage, striping and signage for the Texas Department of Transportation and the City of Edinburg.

- **City of McAllen Bentsen Road Lift Station, Sanitary Sewer and Waterline Improvements from Expressway 83 to Nolana Avenue; McAllen, Texas-** Design engineer for this $8 Million Dollar project including an 8 MGD fourplex Lift Station with control building, 5,100 feet of 18” force main, 15,000 feet of 16” waterline including appurtenances, 9,195 feet of 30 inch sanitary sewer gravity line ranging from 15’-42’ deep, 3,605 feet of 24” gravity sanitary sewer line, 1,800 feet of 18” gravity sanitary sewer line, 7,500 feet of 8”-12” sanitary sewer service line. This project included all existing utility relocations, right-of-way acquisition, TXDOT permitting, deep bores, railroad permit, and traffic control.

- **City of McAllen Bentsen Road Sewer Laterals; McAllen. Texas -** Design Engineer and Project Manager for this $1.5 Million Dollar project including sanitary sewer laterals serving the Bentsen Road service area. The project consisted of 8,700 feet of 12” gravity line, 1,325 feet of 15” gravity line, 1,515 feet of 8” gravity line (all ranging from 10 to 22 feet), boring and jacking, directional

drilling, irrigation line relocation and pavement repair. This project also included easement acquisition and TxDOT permitting.

- **City of McAllen Manhole Rehabilitation Project; McAllen, Texas -** Design engineer for the rehabilitation of 27 sanitary sewer manholes along the center of 2nd Street, and Trenton Road. This project included rehabilitating deteriorating concrete manholes by inserting fiberglass liners and new concrete bases.

PROFESSIONAL EXPERIENCE

2001 – Present:	**PCE- Perez Consulting Engineers**
1994 - 2000:	**Perez/Freese and Nichols, L.L.C.**
1991 - 1994:	**PCE - Perez Consulting Engineers**
1972 - 1991:	**S.A. Garza Engineers, Inc.**

Jorge D Perez, P.E. has had over 40 years of experience in working with local, state and federal agencies such as the Department of Commerce (Economic Development Agency), H.U.D., Environmental Protection Agency (EPA), Texas Department of Commerce and Community Affairs Block Grants, U.S. Corps of Engineers, Texas Water Commission, Texas Water Development Board, Texas Community Development and Texas Department of Health.

PROJECTS WITH PCE

- **San Juan Paving Improvements Phase I; San Juan, Texas -** Rehabilitation of 26 streets to reach new City Standards. Project included extensive coordination by PCE with the City of San Juan to determine the best method for value.

- **San Juan Subdivision Plans Review; San Juan, Texas -** The Engineer performed review of subdivision plats and engineering plans for infrastructure improvements including paving, drainage, water and sanitary sewer. Engineer also performed periodic visits to assure compliance with the City of San Juan Standard Subdivision Development Guidelines.

- **San Juan City Engineer -** Assisted the City of San Juan Staff in the development of the "Standard Design Guide for Public Infrastructure Improvements" to standardize construction of public works within the City of San Juan. These Standards were implemented by City Ordinance in September 2016.

- **Bentsen Road Reconstruction Project; McAllen, Texas** - This project included the reconstruction of Bentsen Road from a 20 feet wide section to a 65 feet wide urban arterial for 3.8 miles from U.S. 83 to 3 Mile Line (Buddy Owens). Services include feasibility study, drainage study and report, alignment analysis along with associated public meetings, R.O.W. map, and preparation of Plans, Specifications and Estimate (PS&E) including preliminary cost estimates, utility investigations, field surveying, roadway design, and drainage design.

- **S. Bicentennial Blvd; McAllen, Texas** - This project included preparation of plans/specifications for 1500 L.F. of 65 FT. roadway. Also included was storm drainage connecting TxDOT's S. Bicentennial Blvd. Project and overpass to Wichita Street. Plans included transitions to McAllen-Miller International Airport's main entrance. Total project cost was $881,000.

- **South Sugar Road Paving Project; Edinburg, Texas** - This project included the paving and drainage improvements of South Sugar Road from S.H. 107, southerly to Canton Road in Edinburg, Texas.

- **William Cannon Drive; Austin, Texas** - This project is located on the south area of Austin from Interstate Highway 35 westerly 2 miles. This included the preparation of a preliminary report with an in-depth study of Right-of-Ways, alignment, traffic considerations, at-grade railroad crossing, lighting and irrigation for landscaped medians. Services included preliminary route surveying, right-of-way surveys and document preparation, preparation of alignment surveys, plan and profile plans, drainage plans with drainage area maps, lighting studies, spacing analysis, super elevations, irrigation connections for landscape medians, traffic channel studies, water and wastewater utility adjustments, preparation of steel bores for future utility line crossings and traffic signal conduit preparation.

- **Idela Water Mains Improvement, McAllen, Texas** – Waterline improvements for Idela Subdivision consisting of disconnecting and abandoning existing waterline and replacing with new 8" water loop to serve existing subdivision.

- **Relocation of Water Lines - F.M. 495 - Ware Road to 23rd. Street and South 23rd Street at North Levee. (1996); McAllen, Texas -** Relocation of water lines in connection with the reconstruction and widening of F.M. 495 (Pecan Blvd.) from Ware Road to 23rd Street. Also included was the re-grading of highway cross-sections at the North Floodway Levee on South 23rd Street. In addition, this included 1,900 l.f. 8" PVC water lines, road bores with associated valves, tie-ins and 250 l.f. of 12" PVC water lines at South 23rd.

- **South 10th/Service Center Sanitary Sewer Line Relocations (1998-99); McAllen, Texas -** Relocation and re-construction of existing sanitary sewer lines along the east side of South 10th street between Toronto Avenue and Wichita, and along Wichita Avenue, westerly to the McAllen-Miller International Airport at the new S. Bicentennial Blvd. Project included replacement of existing sanitary sewer lines and abandonment of existing sanitary lift station at the Public Works Service Center with 3250 l.f. of 30", 1380 l.f. of 24", 1600 l.f. of 15" and 100 l.f. of 10" sanitary sewer lines. Also included were all appurtenances and three road bores across S. 10th Street. Total Project Cost is $560,000.

- **30" Sanitary Sewer Outfall Mains, Main Lift Station and 16" Water Line – Bentsen Road; McAllen, Texas –** The project consisted of preparation of plans and specifications for the construction of a 30" sanitary sewer main outfall line and a 16" water transmission line along Bentsen Road from U.S. Expressway 83 to Nolana Avenue. The project also included the construction of a main lift station with an ultimate capacity of 8MGD. The sanitary sewer lines were constructed using the open-cut method with depths ranging from 20 to 45 feet. Ground water was encountered at various locations and mitigated with strategic placing of well points. Construction of the sewer line eliminated two lift stations in the vicinity of Daffodil Avenue. This project provided sanitary sewer service to the western-central parts of McAllen.

- **Arthur Terrace, City of McAllen -** Prepared plans and specifications for the replacement of 820 l.f. 8" PVC Sanitary Sewer Main at Arthur Terrace Subdivision from 36th street to 33rd street along the projection of Gull Avenue.

- **Cameron Park Colonia, Public Utilities Board; Brownsville, Texas -** Perez Consulting Engineers was involved with a joint venture engineering project with Gonzalez Engineering and Surveying Co. of Brownsville, Texas for the design of water and sanitary sewer service for the Cameron Park Colonia. The $5.5 Million Project Cost funded in part by the Texas Water Development Board through its Economically Distressed Areas Program (EDAP) Phase II, the Environmental Protection Agency, and the Public Utilities Board of Brownsville. Work included the preparation of an Engineering Design Report, Plans and Specifications for Water and Wastewater lines within the Colonia. This project provided both water and wastewater service to one of the Texas-Mexican Border's largest Colonias.

- **Regional Solid Waste Master Plan; Lower Rio Grande Valley -** Conducted the first Regional Solid Waste Master Plan for Hidalgo, Cameron and Willacy Counties of the Lower Rio Grande Valley. The Master Plan addressed the lack of solid waste management especially in the Colonias. City and colonia leaders were consulted and various neighborhood meetings were conducted at strategic colonias during the study period to determine particular needs and to inform residents about recycling methods and encouraging the limiting of solid waste volume into landfills. A "Pay-Per-Bag" solid waste collection pilot program was initiated in the South Tower Road Colonia where 5-gallon special coded bags were sold for $ 1.00 for disposal of household waste. The pilot program was implemented to encourage recycling of materials such as metals, glass and paper to minimize solid waste volumes going into landfills.

- **City of Edinburg EPA 201 Wastewater Project; Edinburg, Texas -** A $7 Million project funded in part by the Environmental Protection Agency through the Texas Water Development Board. Work included the preparation of a Facilities Plan, Design of Wastewater Collection Improvements, Lift Station Design (4) and design of 1.7 MGD Sewer Treatment Plant. The projected provided gravity sanitary sewer service especially for the south and east portions of the City of Edinburg service area. The construction of the line eliminated various lift stations.

James Residence Demolition

Pecan Campus Pedestrian Crosswalk

Pecan Campus Northeast Parking Lot (29th& Pecan)

Mid Valley Campus Child Development Center

B. List of Past Projects - City of Edinburg

City of Edinburg Stadium and Dawson Road Drainage; - Edinburg, Texas – Perez Consulting Engineers was selected to perform a detailed Hydrologic and Hydraulics (H&H) study and report to determine causes of local flooding in the Stadium and Dawson Drive vicinity of the City of Edinburg. The work required coordination of the City of Edinburg, Edinburg School District as well as the Hidalgo County Drainage District No. 1

North Water Booster Station Emergency Power Generator Improvements - Jorge D. Perez prepared plans and specifications for the installation of an Emergency Electric Power Generator for the Edinburg North Water Booster Pump Station capable of providing power to 4-100 hp high-pressure potable water pumps and providing pump controls for Pump No. 4.

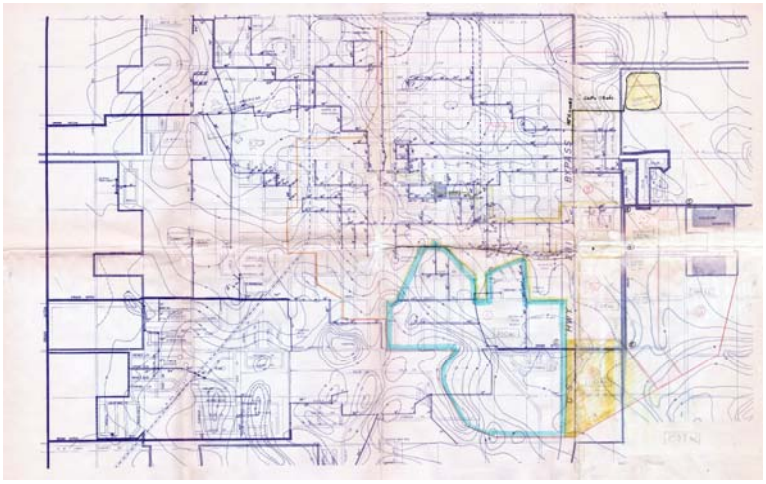
Jackson Point Subdivision Sewer Improvements - Jorge D. Perez prepared plans and specifications for the installation of an 8-inch sanitary sewer line and 4-inch services along Roy Drive to serve Lots 1-10 of the Jackson Point Subdivision, located on the southwest corner of Mile 17 ½ Road and North Jackson Road. The preparations of the engineering plans were based on a topographic survey of the site as prepared by the City of Edinburg's surveyor.

Pin Oak Road - J. David Perez was the design Engineer for ½ mile of 44-foot-wide new roadway from U.S. 107 to Sprague Ave. Project included paving, drainage, traffic signal and marking & signage plan.

"I" Road Spur (U.S. 281 to "I" Road) - Design Engineer for a 41-foot-wide roadway from U.S. 281 to "I" Road including drainage, striping and signage for the Texas Department of Transportation and the City of Edinburg.

City of Edinburg EPA 201 Wastewater Project - A $7 Million project funded in part by the Environmental Protection Agency through the Texas Water Development Board. Work included the preparation of a Facilities Plan, Design of Wastewater Collection Improvements, Lift Station Design (4) and design of 1.7 MGD Sewer Treatment Plant. The projected provided gravity sanitary sewer service especially for the south and east portions of the City of Edinburg service area. The construction of the line eliminated various lift stations.

South Sugar Road Paving Project- This project included the paving and drainage improvements of South Sugar Road from S.H. 107, southerly to Canton Road in Edinburg, Texas



Two major storm water detention facilities - Jorge D. Perez was part of a design team for the San Juan Road Holding Pond and Control/Pump Structure that accommodated drainage for the southeast quadrant of Edinburg, and the Northeast Ponds which regulates flows out of the University of Texas Pan American and adjacent areas. (With another company)

LIST OF PAST PROJECTS – WITHIN THE CITY OF EDINBURG

Mr. Jorge D. Perez, P.E. while managing the Edinburg office of S.A. Garza Engineers from 1976 to 1991 was responsible for the design and construction of two major storm sewer facilities in the city of Edinburg. These projects included the following:

- 1983: Engineering study, design and construction of the drainage pump station to the "Northwest Holding Ponds" designed to minimize flooding within the drainage basin that included the downtown and courthouse square in Edinburg. The City, through the EDC, funding construction of two 20-acre ponds at the intersection of N. Sugar Rd. and Chapin Rd. Since the city's N.W. main 72" outfall was limited to a 18" outfall at the N. main ditch, it became necessary to construct the ponds and pump station with backflow valves to allow the pumps to provide full capacity of the 72" storm main by installing two 17,500 g.p.m. pumps driven by diesel power. This system allowed the full flow to be lifted into the two 20 acre-ponds and later discharged into the storm system after waters subsided.

- 1983-84: Similarly, Jorge D. Perez, P.E. prepared an engineering report, design and construction documents for improvements to drainage for the east section of Edinburg draining into the E**ast Edinburg ditch** with a **drainage area of 2,237 acres** and implementing the "Stormwater Detention Ponds" (San Juan Holding Ponds and now the Birding Center Ponds) with the construction of diesel driven storm sewer pumps, radial gates and backflow sluice gates, capable to prevent storm sewer back-up from the East Edinburg Ditch's downstream areas east of Raul Longoria Road.

Firm Philosophy

Our firm provides cost effective land surveying and engineering services based on our resources, experience and knowledge. We offer the best of technical performance, high standard of professionalism and integrity to the project.

Firm History

Quintanilla, Headley & Associates, Inc.

Founded in 1986, QHA provides a wide range of engineering and land surveying services throughout the Rio Grande Valley. QHA specializes in land surveying projects for right of way mapping, survey parcels, metes, and bounds descriptions, and topographic surveying. QHA uses the latest equipment and software to ensure we provide the most accurate field data.

QHA is managed by professional individuals who are registered with the Texas Board of Professional Engineers and the Texas Board of Professional Land Surveying. QHA is a certified as a Historically Underutilized Business (HUB).

Firm Capabilities

Our project management objectives are to deliver a final plan on schedule, on budget and one that fits the needs of our clients.

Summary

Mr. Quintanilla has been a licensed registered professional land surveyor since 1990. Since then, he has managed and performed numerous surveys in the areas of land title surveying, commercial surveying, subdivision platting, environmental and remediation projects, drainage studies, aerial photogrammetry, engineering/architectural design projects, GPS and geodetic control surveying.

Mr. Quintanilla has performed the boundary surveying of approximately 20 miles of right of way for drainage and roadway projects, as well as numerous land developments. He has supervised the preparation of survey parcels, right of way maps, signed and sealed final survey parcels and metes and bounds descriptions.

Relevant Experience

Hidalgo County:
Regional Mobility Authority SH 365 (Edinburg, TX):

- Topographic Surveying of void areas, performed boundary survey parcels of right of way mapping Size: 50 parcels, 7.0 miles in length
  Contract Cost: $422,496.25

Hidalgo County Precinct No. 2:
Cesar Chavez from Business 83 to E. Nolana Loop

- Design Survey and Right of Way Mapping
  Contract Cost: $131,200.00

City of Alamo:
FM 907 Outfall Drainage

- Surveying, parcel plats, metes & bounds description, right of way maps Size: 38 parcels
  Contract Cost: $175,900.00

Education & Professional Registrations

Instituto Tecnologico de Estudios Superiores, Monterrey, N.L. Mexico

- Bachelor of Science in Civil Engineering, 1984

Licensed Professional Engineer, Texas - No. 95534
Registered Professional Land Surveyor, Texas - No. 4856

Management and Organizational Approach

Our firm is located in the heart of Hidalgo County. We are very familiar with the geographies of this area. We have a long and successful relationship with the Hidalgo County staff as we have provided them with professional engineering services for a large number of developments throughout the city for the past 25 years. We have a great amount of records and data of the County's existing infrastructure.

QHA understands the County's need to constantly improve on the existing infrastructure for the people of Hidalgo County. We will provide the County with alternatives of the most cost effective systems and design. We understand the requirements of the utility companies and drainage and irrigation districts and we will design all projects in compliance.

Our firm provides full professional engineering, surveying, management, and inspection services. We use the latest equipment for field data collection and engineering design. This gives us the ability to expedite the design of the project and provide an efficient design.

Our principal, Mr. Alfonso Quintanilla is a Licensed Professional Engineer and a Registered Professional Land Surveyor. He will be the principal assigned to this project. Should the project require the acquisition of easements, Mr. Quintanilla has prepared hundreds of survey parcels with metes and bounds descriptions. This is a unique qualification that our firm provides.

Our firm ensures a successful partnership that will meet and exceed the County of Hidalgo's expectations. We will specifically become familiarized with a project by conducting field visits and gathering all information needed to properly design and execute all phases. Our project management objectives are to deliver a final plan on schedule, on budget, and personalized to meet the County's needs.

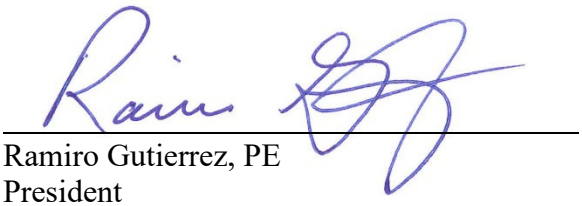
City of Edinburg
C/O City Secretary
415 W. University Drive
Edinburg, TX 78539

Dear City Secretary,



In response to the City of Edinburg's **RFQ #2024-9 "Engineering Services Rotation"**, **R. Gutierrez Engineering Corporation** (**RGEC**) is pleased to present its qualifications. **RGEC** understands that the **City of Edinburg**'s (**City**) Engineering Department is currently seeking to retain a rotation list of qualified professional Engineering firms to provide engineering services. The term of the contract will be two (2) years from 10/01/2024 – 09/30/2026. The work will be assigned on an as-needed basis for a variety of capital improvement projects and city programs and projects. The work may be discrete, short term assignments or may be part of larger capital or planning efforts.

RGEC has an extreme interest and is fully committed to providing professional engineering and project management services for the **City**. I, Ramiro Gutierrez, PE, will be your point of contact for all communications pertaining to this RFQ. As principal in charge of the firm, I am fully authorized to bind the firm to a contract with the **City** and have checked and verified that there are no addendums to this RFQ.

RGEC is registered with the State of Texas as both an engineering and land surveying firm and as a **Historically Underutilized Business (HUB)** and **Disadvantaged Business Enterprise (DBE)**. **RGEC** is an equal opportunity employer and does not discriminate in hiring, promotion, treatment, or other terms and conditions of employment based on race, sex, national origin, age, disability, or in any way violate Title VII of 1964 Civil Rights Act and amendments, except as permitted by said laws.

Respectfully submitted this 16th day of July 2024.

Company: **R. Gutierrez Engineering Corporation**

Signature: 

Ramiro Gutierrez, PE
President

6. PROFESSIONAL SERVICES AGREEMENT 19

1. TRANSMITTAL LETTER

R. Gutierrez Engineering Corporation (**RGEC**) has prepared and included at the beginning of this Statement of Qualifications, a transmittal letter indicating our interest and commitment to perform professional engineering services for the **City of Edinburg**. All pertinent information as required by the RFQ has been provided.

2. FIRM QUALIFICATIONS & EXPERIENCE (Overall Qualification of Team)

RGEC is a fully staffed civil engineering and land surveying firm located in Pharr, Texas. The firm has been in business for 26 years, having begun operation in July 1998. **RGEC** is registered and licensed to practice in the State of Texas as **Engineering Firm Number F-486** and **Land Surveying Firm Number 101650-00**. The firm is fully equipped and staffed to handle most any civil engineering and land surveying task with ease. **RGEC** can provide services and has staffing able to cover the specialized categories listed below:

- Street Infrastructure Evaluation and Improvements
- Pavement Management and Improvements
- Utility Infrastructure Evaluation and Improvements
- Erosion and Sediment Control Design
- Water and Wastewater Evaluation and Improve
- Hydrology & Hydraulics
- Transportation Evaluation
- Traffic Engineering Services
- Traffic Signal Design
- Civil Engineering

In addition, **RGEC** has performed as project manager or lead firm with consultants performing the following services as sub-consultants to **RGEC**:

- Structural Engineering (Improvements & Design)
- Environmental Engineering Services
- Mechanical, Electrical & Plumbing (MEP) Engineering Services

RGEC understands that the services to be provided might include, but may not be limited to:

- Field investigation and data collection
- Feasibility evaluation and alternatives analysis
- Design development and cost estimating
- Preparation of plans, specifications and estimates
- Review and check plans, subdivision and parcel maps, and computations submitted by private developers
- Review of engineering and encroachment permits
- Prepare environmental reports
- Review of environmental and engineering reports and proposals
- Coordination with utility agencies, consultants, and other public agencies
- Organization, participation and presentations at meetings held by City staff, the City Council, neighborhood groups, and other stakeholders
- Preparation of preliminary documents, plans and/or reports including findings and recommendations

- Preparation final documents, plans and/or reports responding to City and other stakeholder comments
- Preparation of handouts and graphical displays for public meetings
- Management and monitoring of capital improvement project
- Management and monitoring of planning projects
- Administration and monitoring of regional, state and federal grants
- General civil engineering support services as assigned

RGEC has extensive experience and has provided professional engineering and project management services for multiple local government agencies on locally funded public works projects, federally funded construction projects, public transportation related projects, and projects located in this general region of the state for local government agencies. This past experience makes **RGEC** uniquely qualified to provide engineering and project management services to the **City**.

RGEC is currently pre-certified by TXDOT in various work categories as listed in the following table.

TXDOT CERTIFICATIONS	
3.2.1	ROUTE STUDIES & SCHEMATIC DESIGN
4.2.1	ROADWAY DESIGN
4.4.1	FREEWAY INTERCHANGES
8.1.1	SIGNING, PAVEMENT MARKING, AND CHANNELIZATION
10.1.1	HYDROLOGIC STUDIES
10.2.1	ROADWAY HYDRAULIC DESIGN
10.3.1	BRIDGE HYDRAULIC DESIGN
11.1.1	ROADWAY CONSTRUCTION MANAGEMENT AND INSPECTION
15.1.1	RIGHT-OF-WAY SURVEYS
15.2.1	DESIGN SURVEY
15.2.2	CONSTRUCTION SURVEY

Additionally, **RGEC** specializes and has experience in th+/-e following types of engineering projects:

Transportation Services

- Streets & Highways
- Roadway Geometrics
- Signing & Striping
- Traffic Control Plans
- Traffic Signal Design
- Airport Design

Drainage Services

- Hydrologic Studies
- Hydraulic Design
- Storm Sewer Design
- Drainage Channel Design
- Detention Ponds
- Floodplain Mapping

Land Surveying Services

- Residential & Commercial Land Surveys
- Residential & Commercial Improvement Surveys
- Acreage Surveys
- ROW & Easement Parcels
- Topographical Surveys
- Construction Staking
- ALTA Surveys
- Elevation Certificates

Land Development Services

- Feasibility Studies
- OSSF Site Evaluations
- Drainage Studies / Reports
- Subdivision Plans
- Civil Site Plans

Subdivision Plat Processing & Reviews

Water Resources

- Water Distribution
- Wastewater Planning/Collection/Treatment
- Pumping/Lift Stations
- Storm Water Pollution Prevention Plans
- Pre-treatment Compliance
- Public Works
- Pumping/Lift Stations

Other Services

- Environmental Services
- Project Management
- Construction Phase Services
- Permitting
- Landfill Services
- Municipal Engineering

RGEC specializes and has provided professional engineering design and land surveying services for various clients in both the public and private sectors. The staff at **RGEC** has a diversified professional engineering and surveying experience and over 1850 engineering and land surveying projects completed. **RGEC** can provide clients the expertise and innovation necessary to provide cost-effective solutions.

ABILITY TO MEET SCHEDULES & DEADLINES

RGEC is committed to providing the **City** with the attention it deserves. The firm has the capability to incorporate any project into its current schedule with ease. The firm is fully staffed and includes ***three (3) registered professional engineers and one (1) registered professional land surveyor***. With this amount of professional staffing, the firm is able to distribute the work strategically to enable work on multiple projects simultaneously. In addition, the firm's current workload is significantly less than the usual workload; thus, the firm finds itself ready and able to commence providing engineering services to the **City** immediately after negotiating an agreement. The approach and philosophy at **RGEC** is to have efficient management and quality control as part of every project. This approach enables **RGEC** to deliver services on time and within budget. At **RGEC**, "**quality**" is the responsibility of the entire staff. Management sets the "**quality**" standards and each team member works to achieve those standards.

A Quality Control Plan will be developed for each task. This plan allows **RGEC** to identify objectives and priorities as well as establish quality control policies and requirements for each team member. The plan also establishes schedules and milestones, scope of the work to be undertaken, and a working budget. The schedule will provide work sequences and review times of the work to be performed. **RGEC** will diligently pursue the completion of the task, as defined by the milestones and deliverable due dates outlined in the schedule. **RGEC** will attend meetings with the **City** to communicate all progress and to assist in the decision-making process as requested. **RGEC** will also assist the **City** at meetings with other entities as may be needed. **RGEC** will have regular meetings with the **City** to keep them abreast of the progress on the task.

The project manager will be responsible for all project coordination and communication with the **City's** appointed project personnel. Communications in the form of meetings, email, on-line communications, or telephone conversations will all be documented, and minutes or notes of these communications will be distributed to all interested parties.

RGEC has provided engineering services to multiple governmental agencies. The following is a list of projects, ongoing and completed, by **RGEC** within the last 2 years for various governmental agencies along with contact and phone number information for each project.

2019 Bond Drainage Projects (Jay & Main Improvements) – McAllen, Texas.

RGEC was contracted by the City of McAllen to provide professional engineering and surveying services for preparing plans and specifications for the construction of drainage improvements for an area in the vicinity of Jay Ave and Main St. A study/report providing an analysis of the area's needs was prepared and presented to the City. Plans and specifications are being prepared. During the construction phase, periodic construction site observations for proposed drainage improvements will be done. **RGEC** will provide construction administration and inspection during the construction phase of the project. This project is in the design phase.

Owner: City of McAllen
Contact: Mario Cruz, PE / Project Engineer
Phone: (956) 681-1181

2018 Bond Drainage Projects (Group C) – McAllen, Texas.

RGEC was contracted by the City of McAllen to provide professional engineering and surveying services for developing solutions for the Stormwater Management Improvements Projects, Group C Projects. A topographic survey of the existing streets, drainage system, spotted utilities, and existing right-of-way was performed for each of the 6 project locations. A drainage analysis and design were performed, to determine what improvements were needed to alleviate current flooding issues within the 6 project locations. A schematic design of the proposed improvements was prepared for review and approval by the City of McAllen. Construction plans, specifications, cost estimates and bid documents for bidding the 6 projects together were prepared for advertising the project and obtaining bids. During the construction phase, periodic construction site observations for proposed drainage improvements for the Group C Projects are being done. **RGEC** is providing construction administration and inspection during the construction phase of the project. This project is under construction.

Owner: City of McAllen
Contact: Mario Cruz, PE / Project Engineer
Phone: (956) 681-1181

Various Streets Rehabilitation Project – La Feria, Texas.

RGEC was contracted by the City of La Feria to perform engineering and surveying services for preparing of construction plans, providing administrative services for the bidding of and awarding of a construction contract, and providing construction administration services for the reconstruction and/or repair of 37 street sections throughout the City of La Feria, Texas. **RGEC** is providing construction administration and inspection during the construction phase of the project. This project is complete.

Owner: City of La Feria
Contact: Jaime Sandoval / City Manager
Phone No: (956) 797-5561

PSJA Tri-City Pedestrian Improvements Project (Phase I) – Pharr, Texas.

RGEC was contracted by the City of Pharr to perform engineering and surveying services for preparing of construction plans, providing administrative services for the bidding of and awarding of a construction contract, and providing construction administration services for the design of sidewalk and ramps in the vicinity of 3 different elementary schools throughout the PSJA area to meet ADA standards. The plans will consist of a layout showing the proposed sidewalk location. Details will be provided to include cross-sections at each driveway or roadway crossing. Both cross-slope and longitudinal slope will be verified to meet ADA standards. Details will be provided to either go around, relocate, or adjust any obstructions encountered, such as mailboxes, water valves, or sanitary sewer cleanouts. The Engineer will also include the necessary TxDOT standard details required for both the sidewalk and ramps as well as traffic control. **RGEC** will provide construction administration and inspection during the construction phase of the project. Project is under construction.

Owner: City of Pharr
Contact: Maria Rangel, PE / Project Engineer
Phoner: (956) 402-4221

North Hutto Road Improvements Project – Donna, Texas.

RGEC was contracted by the City of Donna to perform engineering and surveying services for preparing of construction plans, providing administrative services for the bidding of and awarding of a construction contract, and providing construction administration services for the reconstruction and/or repair of N. Hutto Road, with approximate limits being Interstate 2 on the north and will go approximately 750 feet south of I-2. The street will be reconstructed and/or repaired with an asphalt pavement. As part of the project development, and to improve the drainage conditions of the local area, coordination with TXDOT will be done to obtain approval for connecting additional inlets to the TXDOT drain line that runs from along I-2. The connections from any new inlet to the TXDOT drain line will be by a bleeder line as approved by TXDOT. A boundary and topographic survey were performed to establish horizontal and vertical control and benchmarks for use in the development of the project were set. Cross-sections of the project at every 100' were done to collect detailed topographic information. The existing right-of-way was mapped using existing plat information. Close coordination with utility companies was done in order to identify and resolve potential conflicts with underground utilities. This project is complete.

Owner: City of Donna
Contact: Daniel Ramirez / Asst. Public Works Director
Phone Number: 956-464-6960

Owassa Road Waterline & Sanitary Sewer Relocations – Pharr, Texas.

RGEC was hired by TEDSI Infrastructure Group to provide engineering services required for the preparation of the plans, specification and estimate, and related documents for joint bidding with the Owassa Road project by TxDOT under CSJ 0921-02-140. This City of Pharr Water and Sanitary Sewer relocations project included the 12" (twelve inch) Owassa Road Water line improvement/relocation and upgrade of the existing 8" (eight inch) water main line along the south side of the Owassa Road from Jackson Road to Sugar Road, adjustment/relocation of an existing 8" water line west of Sugar Road, and the Sanitary Sewer relocation of the existing sanitary sewer lines in

conflict with the proposed Owassa Road West and East Outfall along Minnesota Road at the crossing west of Sugar Road and along the center line of Minnesota Road between Sugar Road and West of the I-69C (US 281 Expressway southbound frontage road). This project is complete.

Owner: City of Pharr
Contact: Maria Rangel, PE / Project Engineer
Phone: (956) 402-4221

In addition to the various civil engineering projects listed above, **RGEC** provided engineering and project management services for multiple Border Colonia Access Roads Program projects. Work consisted of developing plans and specifications for the improvement of existing colonia streets which were upgraded to curb and gutter residential streets and included a storm sewer system. Sidewalks were also included where funding was available. Survey work included identification of road right-of-way, topography, and construction staking. Below is a list of Colonia Projects that were done by **RGEC**, some of which were completed more than 5 years ago.

Country Living Estates	Pentecostal Subdivision
El Charro Subdivision No. 2	Primavera I
Eldora Gardens Subdivision	Rancho Escondido Subdivision
Las Fuentes Subdivision	Red Barn Subdivision
Las Haciendas	Roadrunner Subdivision II
Las Milpas Subdivision	RSW Unit I
LJ Subdivision #1	Santana (Nadia Street) Subdivision
McColl Estates Subdivision	South Tower Estates
Morning Sun Subdivision	Southfork Estates Subdivision
North Alamo Village	Southside Village Subdivision
Northside Village Subdivision	Tiny Acres Subdivision
Val-Bar Subdivision	

RGEC has one office located at 130 E. Park Avenue, Pharr, TX 78577 which will be providing services for the **City of Edinburg**.

To handle part-time staffing needs for smaller assignments, **RGEC** has the financial stability and resources to hire additional personnel and has done so in the past. **RGEC** maintains an excellent working relationship with several local firms. *If necessary, the firm would request permission to sub-contract work on a project by project basis.*

3. TEAM MEMBER QUALIFICATIONS & EXPERIENCE

Ramiro Gutierrez., PE
President and Principal In Charge

Professional Engineer, State of Texas, #65948

Hernan A. Lugo, PE, CFM
Engineering Design / Quality Control

Professional Engineer, State of Texas, #108728

Certified Floodplain Manager, State of Texas Certification #1747-09N

Certified Stormwater Manager

Certified Water Quality & Bacteria Monitor

Professional Engineer, State of Florida, #74961

Pablo Soto, Jr., PE, RPLS
Survey Project Manager

Registered Professional Engineer, Texas, #66278

Registered Professional Land Surveyor, Texas, #4541

RGEC is a fully staffed professional engineering and land surveying firm located in Pharr, Texas. The firm is registered to practice in the State of Texas with **engineering firm number F-486** and **land surveying firm number 101650-00**. Copies of the firm's current registration certificates are provided on page 15. The firm is fully equipped and staffed to handle most any civil engineering and land surveying task with ease. With **three (3) professional engineers, one (1) engineer- in – training, and one (1) RPLS** on staff, **RGEC** can assure each project will receive the professional attention it merits. The firms' capabilities and diversity enable **RGEC** to devote personal attention to the City. **RGEC** provides clients the expertise and innovation necessary to provide practical, cost-effective solutions.

RGEC has been in business for 26 years, having begun operation in 1998. The firm is fully equipped and staffed to handle most any civil engineering and land surveying task with ease.

Mr. Ramiro Gutierrez, PE, will be the primary contact for this contract and will be responsible for the day-to-day dealings with the City. Mr. Gutierrez is a longtime resident of the Rio Grande Valley and is extremely knowledgeable of the Rio Grande Valley area, the people, and their needs. He grew up in San Juan, Texas**,** and currently resides in Pharr, Texas.

Mr. Gutierrez has more than 35 years of professional experience and is registered with the State of Texas as **Professional Engineer #65948** and is TXDOT pre-certified to provide civil engineering services. He is a former Texas Department of Transportation (TXDOT) engineer where he worked in various capacities in the Pharr District, in Austin and the Corpus Christi District. While working with TXDOT for 14 years, Mr. Gutierrez moved up the ladder and his last position with TXDOT was that of Area Engineer in the Alice Area Office. He was responsible for the design, construction, maintenance and operation of the State highway system in all of Jim Wells and Kleberg Counties and part of Live Oak and Nueces Counties. While at TXDOT, one of Mr. Gutierrez' tasks was being responsible for the environmental assessments for the Pharr District.

In addition to Mr. Gutierrez, a key member of the staff at **RGEC** is Mr. Hernan A. Lugo, PE, CFM. Mr. Lugo is registered with the **State of Texas as Professional Engineer #108728** and **CFM Certification #1747-09N**. He grew up in Caracas, Venezuela and graduated from Universidad Nueva Esparta in Caracas, Venezuela with a Bachelor of Science degree in Civil Engineering in 1998. In 2011 he earned a Master of Science degree in Environmental Engineering from Texas A&M University at Kingsville.

Mr. Lugo has more than **23** years of experience in the engineering and construction industry. He is also a Certified Floodplain Manager and a Certified Stormwater Manager. Mr. Lugo as a former Project Manager for the City of Alton provided technical assistance to Public Works and Planning Department as well as overseeing all land development and capital improvement projects within the city. In the meantime, he developed and maintained and excellent working relationship with private and public agencies as well with other engineering firms. He has worked in various capacities in the region and coordinated his work with various agencies such as the Environmental Protection Agency, Texas Commission on Environmental Quality (formerly TNRCC), Texas Water Development Board, Hidalgo County Drainage District #1, and multiple irrigation districts in Hidalgo County. Mr. Lugo also managed engineering services and operated an independent civil engineering firm in Pharr, Texas.

Another key member of the staff at **RGEC** is Mr. Pablo Soto, Jr., PE, RPLS. Mr. Soto is registered with the **State of Texas as Professional Engineer #66278** and **Registered Professional Land Surveyor #4541**. He is TXDOT pre-certified to provide land surveying services and is a long-time resident of the Valley. Mr. Soto grew up in San Juan and currently resides in Pharr. He has a long history of working in the Rio Grande Valley as a consultant in professional engineering and land surveying. Mr. Soto has extensive surveying experience in South Texas and provides a vast and in-depth knowledge of the local area with his tremendous background in design engineering and surveying. Mr. Soto is responsible for the surveying work at various levels of design from topographic surveying to surveying for design and construction staking. He also performs boundary surveying services for acquisition of right-of-way and easements on municipal projects. He has developed and maintained an excellent working relationship with various public agencies in the Rio Grande Valley as well with other engineering firms.

The staff at **RGEC** has more than 75 years of combined and diversified professional engineering and surveying experience and over 1,850 engineering and land surveying projects completed. **RGEC** is a well-staffed civil engineering and land surveying firm. The firm has extensive experience and has provided professional engineering services for multiple local government agencies on locally funded public works projects, federally funded construction projects, and projects located in this general region of the state. This experience makes **RGEC** uniquely qualified to provide engineering services for the **City**.

Experience with Government Agencies

RGEC has considerable knowledge and experience working with various government agencies throughout most of the South Texas Region; and as such is familiar with Federal, State and Local Regulations, Policies and Procedures.

RGEC has experience developing projects for or while coordinating with many governmental agencies. **RGEC** has developed projects for the cities of Edinburg, Pharr, McAllen, TXDOT, Cameron County, Hidalgo County, the Regional Mobility Authority, the cities of Pharr, McAllen and **Edinburg** and various school districts across the Rio Grande Valley. These projects have consisted of parking lots, roadways and street projects, overpass design projects, traffic signal design projects, airport expansion projects, water and sanitary sewer infrastructure projects. On many of these projects, **RGEC** has been required to coordinate with various governmental agencies such as **the International Boundary & Water Commission, the US Army Corps of Engineers, US Fish & Wildlife, Texas Parks & Wildlife, Texas Historical Commission, Texas Commission on Environmental Quality (formally Texas Natural Resources Conservation Commission), Texas Department of Transportation, Federal Highway Commission, Federal Aviation Administration, Federal Emergency Management Agency**, and many others.

Additionally, our staff is familiar with the requirements of numerous utility companies such as Texas Gas Service, American Electric & Power, Magic Valley Electric Coop, Time Warner Communications/Spectrum, Oil/Gas Exploration/Production, Sprint, Verizon, and ATT. This list of agencies/companies is as follows:

Ramiro Gutierrez., PE

President and Principal In Charge

BIOGRAPHIC SUMMARY AND EXPERIENCE

Mr. Ramiro Gutierrez, PE is the principal of R. Gutierrez Engineering Corporation and through his broad range of experience offers his clients a commitment of unsurpassed integrity, excellence and satisfaction. Mr. Gutierrez is proud of his excellent reputation in meeting client's aggressive schedules, and his ability to assemble multi-disciplinary project teams to give the client the specialized attention and service they merit.

Mr. Gutierrez, PE is a long-time resident of the Rio Grande Valley. He grew up in San Juan, Texas, and currently resides in Pharr, Texas. He is a former Texas Department of Transportation (TXDOT) engineer. While with TXDOT, Mr. Gutierrez worked in various capacities in the Pharr, Austin, and Corpus Christi Districts. His last position with TXDOT was that of Area Engineer in the Alice Area Office where he was responsible for the design, construction and maintenance activities on State roads in Jim Wells, Kleberg, Live Oak and Nueces Counties. Before opening his own firm, Mr. Gutierrez worked for a large engineering firm as a Project Manager responsible for developing transportation, municipal and site development type projects. Since founding his own firm Mr. Gutierrez has worked extensively in the Hidalgo County area on a wide variety of projects including municipal infrastructure projects related to streets, drainage, water, sanitary sewer, parks, etc., and has become intimately familiar with the local area's characteristics

Mr. Gutierrez is a licensed Professional Engineer with over 34 years' experience in management, design, construction and maintenance of drainage, highway, airport, street, and utilities projects. The work involved analyzing and developing design alternatives, developing construction plans and bid packages; managing sub-consultant design and surveying contracts; managing construction projects; recommending, approving and processing change orders; assuring compliance with state and federal policies and procedures; monitoring project costs; developing and implementing maintenance action plans; recommending and implementing changes in the operation of our transportation system; providing quality customer service; developing and maintaining good working relationships with local public officials.

Mr. Gutierrez has worked as a Project Engineer and designer multiple street, drainage, roadway, and utility improvement projects, some which included flood plain mapping and flood elevation studies in the south Texas and Rio Grande Valley areas. He has analyzed and developed preliminary engineering design alternatives, prepared final design, final construction plans and technical specifications and contract documents for the projects. Managed the construction of projects assuring compliance with the plans and specifications all the way through final inspection, project acceptance and final payment to contractor. Assured that industry standard construction procedures were followed on all projects.

Hernan A. Lugo, PE, C.F.M.

Engineering Design / Quality Control

BIOGRAPHIC SUMMARY AND EXPERIENCE

Mr. Hernan A. Lugo, PE, CFM grew up in Caracas, Venezuela and worked as a resident engineer for a private firm in Venezuela from 1998 to 2001 where he provided design and project management services for various civil engineering projects. In 2001, Mr. Lugo moved to Miami, Florida where he worked for Voice Stream, Inc. as a technical consultant for the sales force.

Mr. Lugo graduated with a Bachelor of Science degree in Civil Engineering in 1998 and a Master of Science degree in Environmental Engineering in 2011. Mr. Lugo is licensed by Texas Board of Professional Engineers to practice civil and environmental engineering under license #108728 and has more than 13 years experience in the engineering and construction industry. He is also a Certified Floodplain Manager and a Certified Stormwater Manager.

Mr. Lugo as a former Project Manager for the City of Alton provided technical assistance to Public Works and Planning Department as well as overseeing all land development and capital improvement projects within the city. In that position, he developed and maintained and excellent working relationship with privates and public agencies as well with other engineering firms. He has worked in various capacities in the region and also coordinated his work with various agencies such as the Environmental Protection Agency, Texas Commission on Environmental Quality (formerly TNRCC), Texas Water Development Board, Hidalgo County Drainage District #1, and multiple irrigation districts in Hidalgo County. Mr. Lugo also managed engineering services and operated an independent civil engineering firm in Pharr, Texas.

RECENT PROJECTS

2018 Bond Drainage Projects (Group C) – McAllen, Texas. RGEC was contracted by the City of McAllen to provide professional engineering and surveying services for developing solutions for the Stormwater Management Improvements Projects, Group C Projects. A topographic survey of the existing streets, drainage system, spotted utilities, and existing right-of-way was performed for each of the 6 project locations. A drainage analysis and design were performed, to determine what improvements were needed to alleviate current flooding issues within the 6 project locations. A schematic design of the proposed improvements was prepared for review and approval by the City of McAllen. Construction plans, specifications, cost estimates and bid documents for bidding the 6 projects together were prepared. During the construction phase, periodic construction site observations for proposed drainage improvements for the Group C Projects are being done.

2019 Bond Drainage Projects (Jay & Main Improvements) – McAllen, Texas. RGEC was contracted by the City of McAllen to provide professional engineering and surveying services to preparing plans and specifications for the construction of drainage improvements for an area in the vicinity of Jay Ave and Main St. A study/report providing an analysis of the area's needs was prepared and presented. Plans and specifications are being prepared. During the construction phase, periodic construction site observations for proposed drainage improvements will be done.

Texas Board of Professional Engineers and Land Surveyors

Pablo Soto, Jr., PE, RPLS

Survey Project Manager

BIOGRAPHIC SUMMARY AND EXPERIENCE

Mr. Pablo Soto, Jr., PE, RPLS grew up in San Juan and is a resident of Pharr, Texas. He has had a long working experience as a consultant in civil engineering and surveying. Mr. Soto provides a vast and in depth knowledge of the San Juan area with his background in civil engineering and surveying. Mr. Soto is responsible for the surveying work at various levels of design from topographic surveying to surveying for design and construction staking. He also is responsible for all property boundary surveys for the office. He has developed and maintained an excellent working relationship with various private and public agencies as well as with other engineering and land surveying firms. Mr. Soto brings over 30 years of professional surveying experience to our team. Mr. Soto's experience includes all types of Land Surveying, Parcel Descriptions, Subdivision work and TX-DOT Right of Way Surveying & Parcel Descriptions. Most of his experience has been in the South Texas community.

RECENT PROJECTS

Owassa Road Right-of-Way & Topographic Survey – Pharr, Texas. Worked as Project Survey Manager responsible for surveying services needed to provide topographic surveying and right-of-way mapping services to the City of Pharr. Topographic surveys included cross-sections every 100' to 10' outside the proposed right-of-way when possible. Driveway cross-sections were also obtained with driveways being identified by type of access and type of surface. Approximate centerline stations were identified. Drainage structure types and flow lines were also obtained. Fences, mailboxes, and signs were tied down. Utilities were marked as per DIGTESS and utility company information. A right-of-way map was prepared using the most current adjoining information such as deeds, plats, ownership information and title reports provided by owner. Six individual parcels were prepared for use in acquisition of additional right-of-way.

URS Surveys – Rio Grande Valley, Texas. As part of URS's contract for Management Services for Community Development Block Grant Disaster Recovery Program for Hurricane Dolly with the Lower Rio Grande Valley Development Council, RGEC was hired to provide detailed topographic and boundary surveys for all the properties within the Rio Grande Valley. Surveys included legal description of properties, utility easements, improvements including but not limited to houses, fences, driveways, trees over 6" in diameter, sidewalks, slabs, etc…, utility locations, staking of property corners, building setback lines and plat of property to meet permitting requirements for construction of a single family residential structure. Multiple properties also required elevation certificates.

Scott Sloan & Veterans Memorial Parks Project – La Feria, Texas. RGEC was contracted by the City of La Feria to perform engineering and surveying services for preparing of construction plans, providing administrative services for the bidding of and awarding of a construction contract, and providing construction administration services for constructing various improvements to two (2) existing municipal parks in La Feria, Texas. Improvements included upgrades to sports fields, installation of new score boards, construction of playscapes, parking lot expansions, and addition of new bathroom facilities.

PREVIOUS EXPERIENCE WITH THE CITY OF EDINBURG

Listed here for reference regarding the success and capabilities of the firm's past services are five individual projects for which RGEC performed engineering services for the **City**.

A. **Edinburg Downtown Water Treatment Plant – Edinburg, Texas.** The firm was responsible for the engineering design of underdrain rehabilitation at the Edinburg Downtown Water Treatment Plant. The work includes review of current water quantity & quality issues, evaluation of applicable regulations, review of past inspection reports, and discussion of current operations to identify & address issues. Design drawings were prepared showing existing facilities and proposed facilities. Pipes & blower for filter backwash were sized and hydraulic calculations for the proposed modifications were done. Services involved preparing estimates, preparing bid packages, assisting during the bid process, construction phase services, surveying services and periodic site observations will be provided. Record drawings will be issued at completion of the project.

B. University Drive Topography – Edinburg, Texas. RGEC was hired by the City of Edinburg to provide a detailed topographic survey of University Drive (SH107) from 10th Avenue west to approximately 100' west of 6th Avenue. The firm obtained cross sections from ROW to ROW at 100' intervals and all appropriate locations providing information regarding existing median, median openings, private & commercial driveways, sidewalks, ramps, drainage structures, fences, signs, mailboxes, traffic signals and utilities. The survey was provided to the City in AutoCAD format.

C. Edinburg Land Fill – Edinburg, Texas. The firm was responsible for the civil site plan and surveying services for construction of the Edinburg Landfill Administrative Office & Maintenance Yard Complex. The work includes sanitary sewer, water, drainage, grading, paving and dimensional control plans. Final schematic design of the proposed civil-site improvements was also developed. Cost estimates of the work developed by the engineer were prepared for bidding purposes. Bid documents for the engineer's work were also prepared and delivered to the architect. Survey work includes collecting of all topographic information and establishing horizontal and vertical control for use in developing the project.

D. Jackson Road Paving & Drainage – Edinburg, Texas. Worked as Project Engineer responsible for the development of schematic design, right-of-way map, plans, specifications and estimate for the improvement of an existing two-lane road to a five-lane road with shoulders and a continuous left-turn lane. This project was developed from conception through the final design stage. Work included Drainage Design, irrigation structure adjustments, and Preparation of Plans Specifications and Estimate (PS&E). The work also included project management. Survey work includes collecting of all topographic information and establishing horizontal and vertical control for use in developing the project.

E. Canton Road Paving & Drainage – Edinburg, Texas. Worked as Project Engineer responsible for the development of schematic design, right-of-way map, plans, specifications and estimate for the improvement of an existing two-lane road to a five-lane road with shoulders and a continuous left-turn lane. This project was developed from conception through the final design stage. Work included Drainage Design, irrigation structure adjustments, and Preparation of Plans Specifications and Estimate (PS&E). The work also included project management. Survey work includes collecting of all topographic information and establishing horizontal and vertical control for use in developing the project.

5. INSURANCE

RGEC carries $2,000,000.00 of general aggregate liability insurance with a $1,000,000.00 limit per each occurrence. The firm also carries $1,000,000.00 auto liability insurance, the required workman's compensation insurance and $1,000,000 of professional liability coverage. A copy of a current insurance certificate is included in "Appendix A – Additional Information and Submittals". A completed City of Edinburg Certificate of Insurance will be provided immediately after award of contract showing RGEC's type of insurance and

coverage limits as stated above. Types of insurance to be verified are Commercial General Liability, Texas Business Automobile Liability, Worker's Compensation, and Professional Liability Coverage.

The following is a list of insurance claims against the firm within the past 5 years:

- 2019 – Workers Comp. – 1 Claim
- 2022 – Automobile – 1 Claim
- 2023 - Workers Comp. – 1 Claim

6. PROFESSIONAL SERVICES AGREEMENT

RGEC has read the Professional Services Agreement provided in the **City's** request for statements of qualifications and will meet all the prerequisite insurance requirements. RGEC also agrees to enter into a Professional Services Agreement such as the one provided.

Re: Request for Qualifications #2024-9 – Engineering Services Rotation

Mr. Hinojosa,

Thank you for allowing us the opportunity to present our Statement of Qualifications for your review and consideration. We welcome the opportunity to offer the City of Edinburg our services as they relate to the above-mentioned RFQ. Enclosed, please review our Statement of Qualifications.

Our office in Edinburg is the firm's main office and our staff looks forward to contributing to the City's continuing effort to improve the lives of our families and fellow citizens. We are confident that, if given the opportunity, we can continue to provide a broad scope of expert engineering, surveying and project management services and become an essential asset for the City.

Rio Delta Engineering has recently completed work on a varied type of infrastructure projects within and for the City of Edinburg. We have the capability to perform all or most aspects of the proposed projects, including, but not limited to, planning and engineering design, construction management services, project management, design overview, construction documents review and recommendations, inspections, land and topographical surveying, cost and risk evaluation of projects, preliminary environmental evaluation, engineering design review, utility coordination, and construction administration. We are a small local firm with offices in Edinburg and Rio Grande City. We offer our clients the whole range of engineering services while maintaining the local everyday type of availability and service required by our clients. Rio Delta Engineering has the capacity to take on any project large or small and we can meet aggressive schedules and deadlines as needed. Our current workload is such that we can begin work on any project immediately.

Our goal is to become part of your team by providing counsel for all your construction management, engineering, surveying, and administrative needs. We are very familiar with the issues at hand and have worked on similar projects within the City of Edinburg and surrounding areas in Hidalgo and Starr Counties.

Our approach to projects entails a hefty combination of the latest technology, creativity, and an innovative approach towards the problem at hand. Project completion in a timely fashion and within budget is always a priority. We pride ourselves on providing all of our clients with the utmost attention by being available when needed and provide a good customer service experience every time.

We are very interested in working with The City of Edinburg and look forward to helping you with these projects. I am an officer of the firm who is authorized to bind the firm to contract and I can be reached at (956) 380-5152 by phone, (956) 380-5083 by FAX, or ivan@riodeltaengineering.com by e-mail. Please call me if you have any questions regarding this letter or the information presented in the packet.

Sincerely,

Ivan Garcia, P.E., R.P.L.S., C.F.M.

Submittal is for: ***Main Office***

Rio Delta Engineering is an engineering firm offering general civil engineering and surveying services in the Lower Rio Grande Valley and South Texas. Our staff has a variety of background experience ranging from structural adhesives sales to general contracting and oilfield fracking. This varied experience, coupled with our education in Agricultural and Civil Engineering, allows us to apply common sense and a practical approach to our civil engineering services. We've all heard a contractor say" Sure, everything fits fine on paper, but…" when they encounter a design issue that just doesn't work as well in the ground as it does on the plan. At Rio Delta Engineering, our objective is to deliver a civil engineering project to our client that is practical, cost effective, and buildable within the allotted budget and time frame. Our experience on both sides of the project "table" allows us to communicate clearly to everyone involved with a project the objectives of our plans and designs, from the contractor to the system operator, to the Board or Council member, and on up to the funding agencies.

Insurance:
General Liability ($2,000,000.00)
Professional Liability ($2,000,000.00)
Umbrella/Excess Liability ($1,000,000.00)
Commercial Auto ($1,000,000.00)
Workers Compensation ($100,000/$500,000)

HUB Certification:
We were initially approved as a HUB vendor on November 7, 2005.
(VID number 1830430819200/ File number 045319).
Our current approval expires September 2, 2025.

Affirmative Action Program/Equal Employment Opportunity Affirmative Action/Program Statement of Policy:
It is the policy of Rio Delta Engineering to provide equal employment opportunity in full compliance with the Civil Rights Act of 1964, as amended, the Age Discrimination in Employment Act of 1973, the Veterans Readjustment Act of 1974, and the Presidential Executive Orders of Federal Contract Compliance Programs. This provides for equal employment without regard to race, color, religion, sex, national origin, marital status, age, disability, or veterans status.

3. *Firm Qualifications and Experience*

At Rio Delta Engineering, our objective is to provide quality engineering, surveying and construction management services to our client in a timely, professional manner. Our experience in working with a variety of clients, including private developers, municipalities, county agencies, and state agencies has shown us that listening to the client and understanding his needs, is the most important step in the completion of a successful project. To this end, we make it a practice to establish clear and open channels of communication with our clients.

Our firm has completed a variety of different types of projects in South Texas since the company's inception in 2005. The projects range from land development and roadway design, to site-civil for educational institutions, commercial development, sanitary sewer treatment and collection systems, and water treatment and distribution systems. Rio Delta Engineering has completed, and is currently working on, numerous Federally and State funded projects for the City of Edinburg, City of McAllen, Edinburg C.I.S.D., Hidalgo County, Starr County, Rio Grande City, Union Water Supply Corporation, North Alamo Water Supply Corporation, the City of Escobares, the City of Roma, among some others. These projects include projects funded by the Texas Department of Rural Affairs (TDRA), the Texas Department of Agriculture (TDA), the Texas Department of Transportation (TxDOT), the Texas Water Development Board (TWDB), The Border Environment Cooperation Commission (BECC, EPA-NADBANK), the US Economic Development Agency (EDA), and the United States Department of Agriculture (USDA). The projects include roadway paving projects, extension of sanitary sewer, water distribution system improvements, wastewater treatment plant rehabilitation and new construction, and storm drainage improvements.

During the course of our 15-year existence, Rio Delta Engineering has dealt with City, County, and State agencies in order to complete our projects. We can work with any person or entity necessary in order to move projects forward to successful completion in a timely manner.

Names, Position, Phone and Fax Numbers of Contact Person:

Depending on the locality of the project, the local office has taken the lead on the project. In this instance, the Edinburg office managed by **Ivan Garcia, P.E., R.P.L.S.**, would be the lead engineer and surveyor on any projects. Ivan would provide project management, engineering design, and surveying services coordination and supervision. Ivan would also be primarily responsible for on-site inspections and would be the direct contact with the Owner.

Office Number: (956) 380-5152
Mobile Number: (956) 263-0934
Fax Number: (956) 380-5083
E-mail: ivan@riodeltaengineering.com

Key Personnel's Professional Background, Caliber and Availability

Ivan Garcia, P.E., R.P.L.S., has accumulated 15 years of experience in the civil engineering and surveying field. Ivan would be the lead engineer out of our local Edinburg office, and would provide primary project management and engineering design and surveying services coordination and supervision. Ivan would also be primarily responsible for on-site inspections and would be the direct contact with the Owner.

One of our key personnel is **Gilbert J. Guerra, P.E.**, who has accumulated 25 years of experience in the civil engineering field ranging from supervising construction and design of municipal utilities, drainage, and roadway projects, to managing construction projects for the City of Edinburg, the City of Rio Grande City, Hidalgo County, Starr County, Edinburg CISD and Rio Grande CISD, Union Water Supply Corporation, and North Alamo Water Supply Corporation. Because of his extensive background, Mr. Guerra possesses a unique expertise that will contribute to the project's success. Gilbert would provide engineering design and construction supervision and management support from the San Antonio office and would be the secondary contact with the Owner.

Organizational Chart and Summary of Work to be Performed by each Staff Member

- Ivan Garcia, P.E., R.P.L.S, C.F.M. – Principal
  As the lead engineer, Ivan would provide primary project management and engineering design and surveying services coordination and supervision. He would also be primarily responsible for on-site inspections and would be the direct contact with the Owner.

- Gilbert J. Guerra, P.E. – Senior Project Manager
  Gilbert would provide engineering design and construction supervision and management support to the Edinburg office. He would be the secondary contact with the Owner.

- Julio Gonzalez, Graduate Engineer – Principal
  Julio would provide design and construction supervision and inspection and construction management support from the Rio Grande City office. He would also coordinate survey support for the project.

- Edwin Pena, Graduate Engineer
  Edwin would provide design and construction supervision and inspection support from the Edinburg office.

- Roberto Salinas and David Rodriguez, Survey Crew
  As field data collection specialists, Roberto and David would provide field data collection services and construction staking services, for design and construction phases, respectively. Roberto and David work out of the Rio Grande City office.

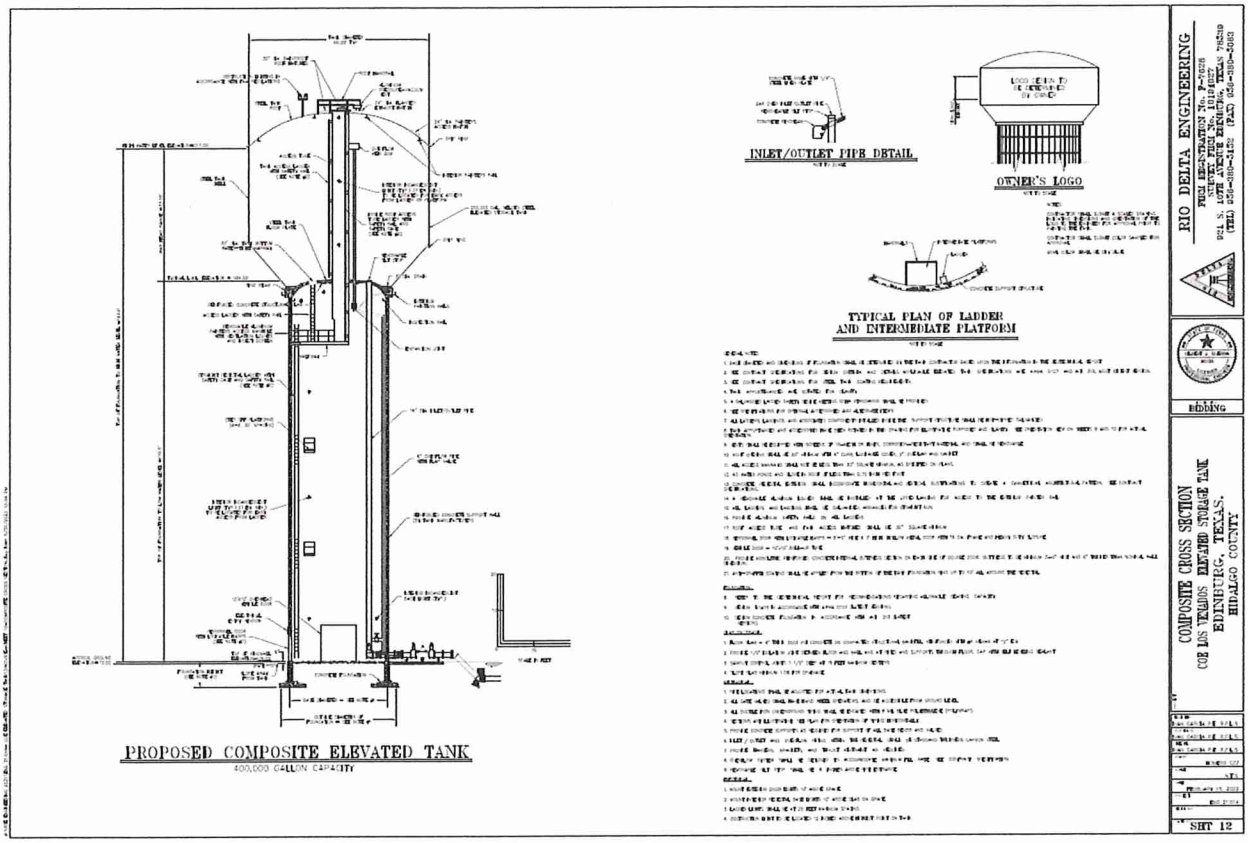
Staff:	Civil Engineer (P.E.)	2
	Civil Engineer/Surveyor (P.E./R.P.L.S.)	1
	Graduate Engineer	6
	ACAD Technician/Designer	5
	Field Data Collection	8
	GIS Analyst	1
	Administrative Staff	2
	Total Personnel	**25**

Capacity to Perform

We are very familiar with the City of Edinburg design standards and guidelines, as well as State and Federal regulations, policies and procedures to bring projects to completion while complying with any applicable regulations.

We have the capability to perform all or most aspects of the proposed projects, including, but not limited to, construction management services, project management, design overview, construction documents review and recommendations, inspections, land and topographical surveying, cost and risk evaluation of projects, preliminary environmental evaluation, engineering design review, utility coordination, and construction administration. We are a small local firm with offices in Edinburg and Rio Grande City. We have varied experience that allow us to offer our clients the whole range of engineering services while maintaining the local every-day type of availability and service required by our clients. We have an in-house Registered Professional Land Surveyor (RPLS) and can provide full surveying services as may be needed for R.O.W. or easement acquisition.

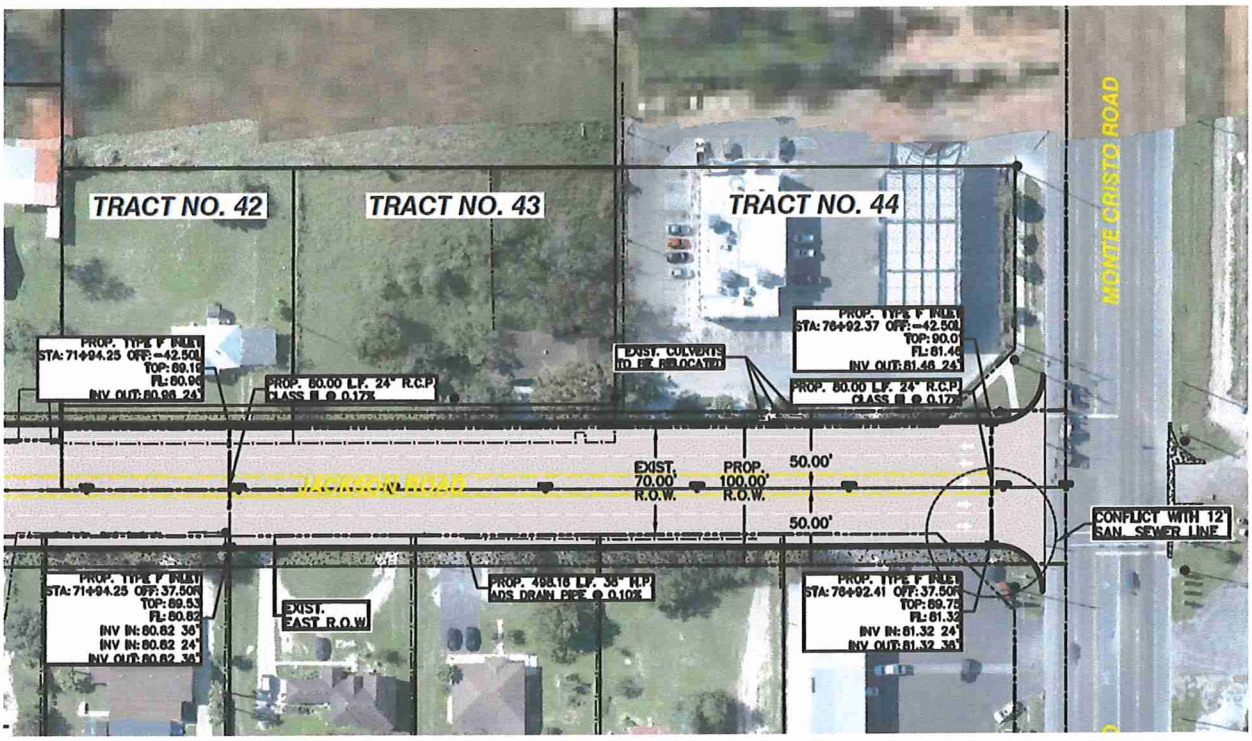
We are confident that, if given the opportunity, we can provide a broad scope of expert engineering services, and with the help of our qualified staff we are sure we can become an essential asset for the City of Edinburg.



Current Workload

Rio Delta Engineering has the capacity to take on any project large or small. Our current work load is such that we can begin work on any project immediately. We have the equipment and office space available with which to expand our personnel and operations as may be required.

Some of the more recent projects that Rio Delta Engineering has provided planning, engineering, surveying, project management, and funding application services for are:



1. City of Edinburg – Los Venados Elevated Storage Tank - 2023

This is an on-going project which consists of the construction of a new 400,000 gallons elevated storage tank, and related improvements to alleviate water pressure and volume demands on north Edinburg area. The construction plans have been completed and the project is scheduled to be bid out for construction within the next year and to be completed and put into operation mid to late 2025 at a cost of approximately $2,000,000.

Contact: **Gerardo Carmona, Jr. P.E. – Utilities Director**

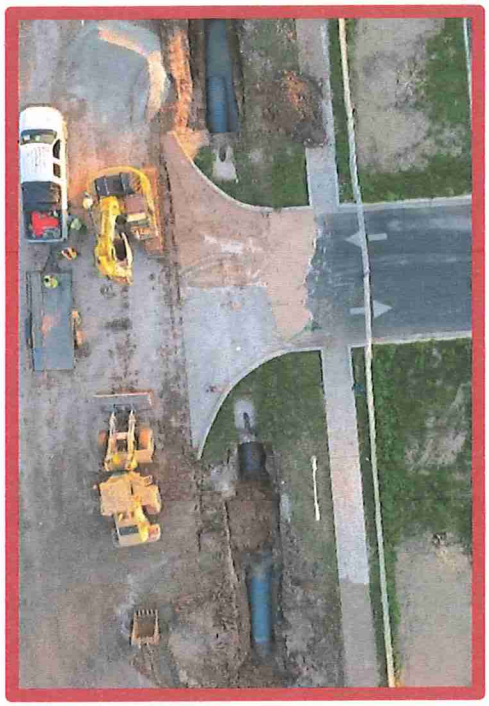
Edinburg, Texas 78541

2. City of Edinburg – North Jackson Road Right-of-Way Project between Saginaw Avenue to Monte Cristo Road – 2023



This is an on-going project which consists of the expansion/widening of Jackson Road between Saginaw Avenue going north to Monte Cristo Road (1.25 Miles) to alleviate traffic mobility and improve safety to this area of the City. Rio Delta Engineering is responsible for providing engineering services and developed an engineering schematic plan which identifies major design elements such as horizontal and vertical alignments, utility conflicts, drainage and signalization and will be used to establish future construction cost. The project is currently going through the right-of-way acquisition phase and funds will be sought for construction early 2025 at a cost of approximately $6,250,000.

3. City of Edinburg – North East Doolittle Road Area Drainage – 2019

This project consisted of the construction of various drainage improvements, including, but not limited to, approximately 2,200 L.F. of 36" and 24" storm drain gravity lines, 2,800 L.F. of excavation/fill and re-grading of road side ditch, and related improvements to alleviate flooding along Doolittle Road between Rogers Road and Russell Road. The improvements were completed at a cost of approximately $387,000 and has been fully operational since the March 2019.

415 W. University Dr.
Edinburg, Texas 78541

4. City of Rio Grande City, TDA #7215419 Paving Improvements -2018

This project consisted of paving various streets in the City Rio Grande City. The work involved included installing drainage improvements in one street and constructing new streets from the subgrade up to finished HMAC, with curb and gutter. The total cost of this project was approximately $400,000.00, including engineering, testing, inspection, and construction management. The funding for this project was provided by the Texas Department of Agriculture. All work has been completed and the project is being administratively closed out. Rio Delta Engineering was responsible for all design, bidding, testing, and construction management.

Contact: **Alberto Perez**
City Manager, City of Mercedes
(512) 809-9470

5. North Alamo Regional Wastewater Treatment Plant and Collection System -2019

This project consisted of constructing a new 0.5 mgd activated sludge wastewater treatment plant for North Alamo WSC. The plant is the first phase of what will ultimately be a 20 mgd plant located at the intersection of Minnesota and Goolie roads in Hidalgo County. The plant site is situated to serve an approximately 50 square-mile area roughly bounded by Expressway 83 on the South, Hwy 107 on the North, Expressway 281 on the West, and Mile 6 West (Westgate) on the East. This initial phase cost, approximately $13 million, including planning, acquisition, design, testing, permitting, and construction management. This project was funded jointly by the Texas Water Development Board (TWDB), the Border Environmental Cooperation Commission (BECC/NADBANK), and the Texas Department of Agriculture (TDA). The collection system consisted of approximately 32,000 linear feet of gravity sanitary sewer lines, approximately 15,000 linear feet of force main lines, and four sanitary sewer lift stations. This project provides sanitary sewer service to 471 families in six Colonias and will established the backbone for future expansion and connections within the projected 50 square-mile service area. Rio Delta Engineering has been responsible for all planning, funding applications, design, permitting, bidding, construction management, and coordination between funding agencies.

General Manager, North Alamo WSC
(956) 383-1618
420 S. Doolittle Road
Edinburg, Texas 78542

6. City of Roma, Efren Ramirez Paving and Drainage Paving Improvements – 2020

This project consists of widening and paving approximately 2,315 lf of Efren Ramirez Street in Roma, Texas. The work involved includes installing approximately 5,630 lf of drainage improvements and constructing a new 37' B-B street section with curb and gutter. The total cost of this project is estimated to be approximately $1,921,769.00 including environmental assessment, R.O.W. acquisition, engineering, testing, inspection, and construction management. The funding for this project will be provided by the United States Department of Agriculture. All funding application, environmental investigations, and engineering design has been completed. The R.O.W. acquisition is also in the final phases of completion. The project is scheduled to be put out for bid within the next few months. Rio Delta Engineering was responsible for the preliminary engineering report, the environmental investigation, the engineering design, and the surveying services for design and R.O.W. acquisition. We will also be responsible for bidding, construction inspection, testing, and project management.

City Manager, City of Roma
(956) 849-1411
P.O. Box 947
Roma, Texas 78584-0947

7. Hidalgo County Drainage District No. 1 and Hidalgo County Irrigation District No 1 – "Mile 17 ½ Road Canal Siphon Improvements - 2013

This project was a joint venture between the Edinburg C.I.S. D. and Hidalgo County Drainage District No. 1 for an irrigation canal crossing relocation, installation of a 490 l.f. of 60" storm sewer line and approx. 200' of road extension. This project was greatly needed to increase safety and ease traffic flow in the area due to the new construction of 1 elementary school and 1 middle school by the Edinburg C.I.S.D. The improvements were completed at a cost of approximately $635,000 and has been fully operational since 2014. As part of this project we improved the connections between the existing drain ditches and left preparations for the construction of the 1298 Ditch along Mile 9 Road between Ware Road and Rooth Road. The Improvements were completed and have enabled for a better and safer traffic flow to and from the schools. Rio Delta Engineering was responsible for all planning, design, permitting, land surveying, bidding, inspections and construction management.

Contact: **Robert Estrada**
Retired District Architect
Edinburg C.I.S.D.
(956) 279-9670

8. Starr County, Disaster Recovery 2.2, General Land Office (GLO) Paving and Drainage Improvements - 2018

This project consisted of providing paving and drainage improvements at various locations in Starr County. The work included constructing paving and drainage improvements for one street in Pct #4, constructing paving and drainage improvements including a 1.5-acre detention pond in Pct #3, and constructing a pilot channel for approximately 1.5 miles of Los Morenos Creek in Pcts #1 and 2. The total cost of this project was approximately $1,100,000.00, including R.O.W. acquisition, engineering, testing, inspection, and construction management. The funding for this project was provided by the Disaster Recovery Fund 2.2 administered by the Texas General Land Office. All work has been completed except for the pilot channel for Los Morenos Creek. Negotiations for the acquisition of R.O.W. for these proposed improvements has been onerous due to the lack of clear title for most of the properties in this area. This area is in "undivided" Porciones. The project will have to be closed out by the end of the year with whatever progress has been accomplished at that time. Rio Delta Engineering was responsible for all design, bidding, testing, surveying services for appraisal and acquisition activities, and construction management.

Project Approach

At Rio Delta Engineering, our objective is to provide quality engineering services to our client in a timely, professional manner. Our experience in working with a variety of clients, including private developers, municipalities, county agencies, and state agencies has shown us that listening to the client and understanding his needs, is the most important step in the completion of a successful project. To this end, we make it a practice to establish clear and open channels of communication with our clients. The following is a basic outline of the typical approach our firm has towards the successful completion of our projects:

PLANNING AND PRELIMINARY DESIGN:

- Attend all necessary Coordination meetings with City of Edinburg, pertinent Irrigation District, Hidalgo County, and any other jurisdictions required
- Coordinate County and State Permits as required
- Coordinate Preliminary Design with Staff and discuss different alternatives
- Prepare Preliminary Construction Cost Estimate
- Prepare Field Topographic Surveys and set benchmarks for horizontal/vertical control
- Prepare boundary/easement surveys as required for acquisition and right-of-entry
- Master-planning consideration for future and to follow the City of Edinburg's masterplan

FINAL ENGINEERING DESIGN PHASE:

- Prepare Construction Plans for project improvements
- Prepare Construction Contract Documents
- Prepare Final Construction Cost Estimate
- Prepare Final Bidding Documents
- Prepare Traffic Control Plans
- Prepare Stormwater Pollution Prevention Plan & TPDES Permits, as required

PRE-CONSTRUCTION PHASE

- Assist the City and the City's Professional Consultants during the scope development, preliminary design, and design development phases in evaluation of options for the project.
- Establish the master project schedule identifying all different phases and all milestone items.
- Develop a project budget and itemized Guarantee Maximum Price (GMP) upon negotiations with the City. The GMP shall include the substantial completion date of the project.
- Review and familiarize itself with all reports, surveys, drawings, tests and results concerning the condition of existing facilities, systems, structures, and sites.
- Work with and coordinate activities with any other contractors that the City contracts work with for the project.

- Review all applicable documents to ensure constructability and to minimize change orders.
- Review the project design to identify long-lead procurement items and equipment/materials which are eligible to be purchased by the City as direct material purchases.
- Coordinate with the City's Professional Consultants to finalize construction documents and develop bid packages.

PROCUREMENT (BIDS AND AWARDS)

- Schedule and conduct pre-bid conferences with the interested subcontractors, material suppliers, and equipment suppliers.
- Assess conditions in the construction market to identify factors that will or may affect costs and time for completing the project.
- Identify and solicit multiple bid packages that together will represent the entirety of the scope of work for the project.
- Compile bid specifications and packages, utilizing City's bid procedures, obtaining bids for any and all construction, sub-contractor, material suppliers, including direct material purchases.
- Solicit, advertise, accept, review, and, based on approvals by the City, award bids to qualified subcontractors based on the bid packages identified.

CONSTRUCTION PHASE

- Schedule and plan construction meetings, take and issue meeting minutes, and attendance sheets as directed by the City's Project Manager.
- Coordinate with the Professional Consultants and IDA to schedule and conduct Pre-Construction meetings with subcontractors.
- Plan and recommend timing for the release of drawings and specifications to enable phasing of construction project.
- Maintain and update the master project schedule, detailed construction schedules, submittal schedules, inspection schedules, and occupancy schedules.
- Provide materials to job site in a timely manner and assure their safe keeping, meeting the terms of the contract, adhering to project scheduling, and direct material purchase program.
- Develop, implement cost controls, and provide financial accounting services for documentation of projects.
- Coordinate on-site construction management services including, but not limited to:
    - progress job site meetings
    - maintain daily on-site project log and schedule report
    - oversee quality assurance testing and inspection programs
    - monitor construction management staff and subcontractor work performance for deficiencies

  - maintain record copy of all contract documents
  - coordinate requests for information (RFI) submittals
- Review adequacy of and oversee and ensure compliance with construction management staff and subcontractor safety programs and policies.

CLOSE-OUT PHASE

- Assemble and deliver sufficient hard copies and electronic copies on USB/Flash Drive of closeout documents, parts and operational manuals, and repair and parts manual.
- Coordinate project close-out, start-up and transition to operation
- Coordinate completion of As-Built documents with City's Building Official and Project Manager.
- Complete or coordinate completion of punch-list items generated by the City's Professional Consultant and the City's representatives during their inspections.
- Coordinate with the City's Professional Consultant to provide complete Project records including Project Manual and CAD drawings corrected to show all construction changes, additions, and deletions compared to the Construction Document.
- Coordinate with the City's Building Official to prepare the Certificate of Final Inspection.
- Coordinate and conduct Building Warranty Inspections
- Warrantee all workmanship and material for one (1) year following substantial completion.
- Ensure coordination and implementation of equipment training for City staff.
- Provide USB/Flash Drive for all project photos.
- Project video record of any training provided to City's staff.
- Prepare As-Built Record Drawings

Rio Delta Engineering uses AutoCAD Civil 3D exclusively but can convert the data to any format that might be necessary. All drafting support would be provided jointly by the Edinburg and Rio Grande City offices. We hope to provide all our clients with the highest quality and professional civil engineering and surveying services and deliver the most efficient and cost-effective solutions to their needs.

4. *Team Member Qualifications and Experience (resumes)*

Ivan Garcia, P.E., R.P.L.S., C.F.M.
Principal, Rio Delta Engineering

Education:

Texas A&M University Kingsville, TX, BS Civil Engineering, December 2008

Licensure & Certifications:

Licensed Texas Board of Professional Engineers, December 2013, P.E.#115662

Texas Board of Professional Land Surveying, May 2014, R.P.L.S. #6496

American Institute of Constructors, March 2012, Associate Contractor (AC)

Work Experience:

May 2009 – Present
Duties:

Rio Delta Engineering
Partner, Civil Engineer, RPLS, Project Manager

- Manages the day-to-day operations of the Edinburg office.
- Supervises the engineering and surveying staff and all engineering design and surveying services.
- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project management for clients, as may be required.
- Attends public meetings in order to present projects for consideration and approval when required and to provide project updates when necessary.
- Coordinates with City, County, and State agencies on behalf of client throughout the course of completing a project.

Summer 2008
Duties:

Texas Department of Transportation, Pharr, TX 78577
Engineering Technician Internship

- Assisted Civil Engineer in application of principles, methods, and techniques of civil engineering technology on the planning and construction of US 83 "Arroyo Roma" bridge, FM 650 "Los Negros Creek" bridge and Garcia St. relocation of utilities in the city of Roma, Texas.

Feb 2006 – Dec 2006

Duties:

CRC Engineering, Inc., McAllen, TX 78504

CADD Technician

- Designed and prepared detailed electronic (CAD) working plans for complex projects from observation, measurements, sketches, specifications, and standard layouts provided by customers, consultants, and/or departmental contacts.

Gilbert J. Guerra, P.E.
Senior Project Manager

Education:
Texas A&M University, College Station, TX, BS Agricultural Engineering, May 1985

Licensure & Certifications:
Licensed by the Texas Board of Professional Engineers, July 2002, P.E. #90156
Licensed by the Alabama Board of Professional Engineers, February 2008, P.E. #29229

Military Service:
United States Marine Corps, 1976-1982, Honorable Discharge, E-5

Work Experience:

Jul 2005 – Present — **Gilbert J. Guerra Engineering, LLC dba Rio Delta Engineering**

Duties: Owner, President, Civil Engineer, Project Manager

- Supervises the engineering and drafting staff and all engineering design.
- Coordinates with City, County, and State agencies on behalf of the client throughout the course of completing a project.
- Consultant for Rio Grande City (8yrs)
- Consultant for Union Water Supply Corporation (7yrs)

Feb 2004 – Jun 2005 — **Rio Delta Engineering & Surveying**

Duties: Vice President, Resident Engineer

- Supervised the engineering and drafting staff and all engineering design.
- Coordinated with City, County, and State agencies on behalf of the client throughout the course of completing a project.

Aug 1996 – Feb 2004: — **J.E. Saenz & Associates, Inc., Edinburg, TX**

Duties: Director of Engineering

- Supervised the engineering and drafting staff and all engineering design.
- Coordinated with City, County, and State agencies on behalf of the client throughout the course of completing a project.
- Provided construction management and supervision on City construction projects.
- Provided field engineering services for the City on projects undertaken by City utility and street paving crews.
- Provided engineering reports, certifications, design and permitting services to the City for City construction projects.

Julio A. Gonzalez, Graduate Engineer
Principal, Rio Delta Engineering

Education:

Texas A & M University Kingsville, BS Civil Engineering, December 2010

South Texas College, Associate of Mathematics and Science, May 2008

Work Experience:

July 2011 – Present
Duties:

Rio Delta Engineering
Graduate Engineer, Partner, Project Manager

- Manages to day-to-day operations of the Rio Grande City office.
- Supervises the engineering and surveying staff and all engineering design and surveying services in the Rio Grande City office.
- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project management for clients, as may be required.
- Attends public meetings in order to present projects for consideration and approval when required and to provide project updates when necessary.
- Coordinates with City, County, and State agencies on behalf of client throughout the course of completing a project.

Jan 2005 – Dec 2008
Duties:

Construcciones en General, Camargo, Tamaulipas
Project Manager

- Supervised site work for paving as well as sewer build outs.
- Prepared bid proposal for project bidding.
- Managed budget and expenses.

Jun 2004 – Dec 2004
Duties:

COMAPA, Camargo, Tamaulipas
Technician

- Performed analysis of potable system and wrote reports on improvements.

Norberto Lopez, Graduate Engineer

Education:

University of Texas, Rio Grande Valley, BS Civil Engineering, May 2017

Work Experience:

March 2018 – Present
Duties:

Rio Delta Engineering
Graduate Engineer

- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project management and inspection for clients, as may be required.
- Attends public meetings in order to present projects for consideration and approval when required and to provide project updates when necessary.

Edwin Pena, Graduate Engineer

Education:

University of Texas, Rio Grande Valley, BS Civil Engineering, May 2020

Work Experience:

January 2017 – Present
Duties:

Rio Delta Engineering
Graduate Engineer

- Meets with clients to plan, manage, design, and supervise the construction of projects.
- Provides project inspection for clients, as may be required.
- Attends public meetings in order to present projects for consideration and approval when required and to provide project updates when necessary.

   County Judge
   Starr County
   100 N. FM 3167
   Rio Grande City, TX 78582
   (956) 716-4800

   Rio Delta Engineering has provided engineering consulting services to Starr County for the past 17 years. We have designed, advertised, bid out, and provided construction and contract administration for paving projects, sanitary sewer collection systems projects, drainage projects, a solid waste transfer station, and subdivision review. Most of these projects were funded by Federal and State agencies. We have assisted the County Staff with funding applications, permit renewals and permit modifications for the Starr County Solid Waste Transfer Station.

   Rio Delta Engineering serves as one of Consulting Engineers on rotation for the City of Edinburg. We provide on-call engineering services related to water distribution systems, sanitary sewer collection systems, and paving and drainage improvements. We attend all City meetings and provide reports to the Council as needed. We coordinate with staff on the day-to-day needs as they relate to our engineering and surveying services. We provide engineering design, surveying, and construction and contract management services for those projects that are bid out.

4. Robert Estrada, AIA
Former District Architect
Edinburg Consolidated Independent School District (ECISD)

Rio Delta Engineering has completed a multitude of paving projects for the ECISD. RDE was the project engineer for the 2008-2009 ECISD Bond Project. Our work consisted of first providing site feasibility studies for one middle school site and four elementary school sites. We then provided surveying services for property acquisition and platting services for four of the sites. RDE also provided site-civil and off-site utility and paving improvements for the four elementary schools. This work entailed widening roads in the County, widening streets in the City of Edinburg, rerouting a Hidalgo County Irrigation District No. 1 irrigation canal by taking it underground so as to provide an on-grade crossing of a newly opened County Road. Throughout the project RDE provided coordination between the ECISD, Hidalgo County Pct. #4, the City of Edinburg, the City of McAllen, Hidalgo County Drainage District #1, and Hidalgo County Irrigation District #1 and the Santa Cruz Irrigation District at different times.

RE: RFQ #2024-9 – Engineering Service Rotations

Thank you for the opportunity to submit our Statement of Qualifications which highlights some of our public project experience for your review and consideration.

We are confident that we can provide the All-American City of Edinburg with our professional engineering services. Our team has the capability to provide services for professional construction management and perform Mechanical, Electrical, Plumbing & Civil Engineering design. We have worked with construction contractors as a design team and construction managers which include their expertise on timing, sequencing, materials, and constructability on more than one-third of our projects. We are skilled at specifications development and bidding for competitive sealed proposals (CSP) for the customary smaller and straight-forward projects. With in-house integrated design and construction administration, our staff can ensure construction occurs as the construction documents intend. We are prepared to begin working with and represent City of Edinburg on your projects.

We have the experience and knowledge to produce high quality, highly coordinated drawings because our in-house engineering and construction services work side-by-side under one roof. Coordination and time savings start the minute our computers turn on. If a construction or design issue comes up, all parties can verify immediately in lieu of an email, phone call or travel. We communicate to our Owner(s) directly and document each of our field visit observation reports that include photographs, plans for any on-site clarifications, document conversations and decisions and document the overall progress of the work.

We have read the requirements of the Request for Statement of Qualifications, and we accept the conditions stated therein.

Should you need additional information or have any questions, please do not hesitate to contact me at 956.292.3336. I will serve as the contact person to provide any clarification required and will serve as the authorized person to conduct final contract negotiations on behalf of RO Engineering, PLLC.

Sincerely,

Rene R. Olivarez, P.E., CSSGB | Principal

RO Engineering, PLLC (ROE) Parent Company
Renoworks, LLC (sister company)
Quantum-Mechanical Contractors, LLC (sister company)

RO Engineering, PLLC was founded on November 25, 2009, by Rene R. Olivarez, P.E. Rene started the firm after practicing for 20 years with other engineers on a variety of engineering and construction projects overseeing budgets, facilities, personnel, and quality control documentation daily in decision making. His management and quality control skills give him the edge to provide customers the valued service which focuses on critical paths in construction, as a designer decision maker, providing analytical data and quality service as an owner's representative. He has traveled and visited other manufacturing quality control plants and has been extensively involved in conferences and meetings with stake holders and engineers that have provided technical, budget cost concerns and knowledge to quantify and provide quality engineering specification designs.

Vision
To be recognized for our project success and the value we deliver to our customers.

Company Mission
At RO Engineering, we strive to deliver the highest quality of professional engineering and construction management services by focusing on innovative & cost-effective solutions, quality, delivery on time, and customer service. We conduct our business with integrity and hard work and strive to build long-term relationships with our customers.

Values
We value the Voice of the Customer, Safety, Quality, delivery on-time, Customer Service, Innovative and Cost-effective Solutions, Teamwork, and Excellence.

Company Information and Background
RO Engineering PLLC, a Professional Limited Liability Company was established on November 25, 2009 in the State of Texas and is owned by Rene R. Olivarez, P.E. The Firm is registered with the State of Texas under Registration No. F-12179.

Non-Discrimination Statement
RO Engineering does not discriminate against any employee or applicant based on race, religion, sex, national origin, or disability.

Rene R. Olivarez, P.E. | Principal & Project Manager

The following is a brief description of the firm's key staff and their areas of expertise:

Rene R. Olivarez, P.E. | Principal and Lead Project Manager
Board of Professional Engineers & Land Surveyors #102302
Texas Department of Insurance Registration: RME-G-2353934
TDLR HVAC License: TACLA #100226E

Mr. Olivarez is a Hispanic American and a graduate of Edinburg High School and obtained a Bachelor of Sciences from the University of Texas Pan American. He received his license as Professional Engineer from the Texas Board of Professional Engineers. He has extensive knowledge in energy conservation, construction supervision, estimating, and business quality control. His experience includes energy studies & procurement, preparation of engineering plans and specifications, grant writing, bidding and contractual processes, construction management, facility assessments, board presentations, private and public infrastructure projects. Mr. Olivarez has a strong management background having direct oversight of Edinburg CISD's Maintenance & Facilities Department. He also previously worked for General Electric Motors & Controls Manufacturing for 10 years in Quality Control. He has a license as a Professional Engineer, HVAC Contractor License, RME-G Fire Sprinkler License and is certified in Six-Sigma.

EDUCATION
Bachelor of Sciences from the University of Texas Pan American
High school diploma from Edinburg High School

LICENSURE & CERTIFICATIONS
Professional Engineer, License No. 102302
Fire Sprinkler License, License No. RME-G-2353934
HVAC Contractor License, License No. TACLA100226E
Six Sigma Black Belt Trained / Six Sigma Green Belt Certified
Mold Remediation Contractor
Quality Control Auditor

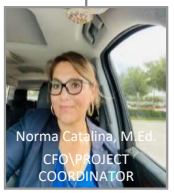
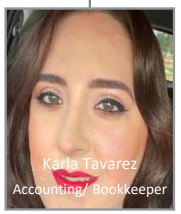
Organizational Chart

RO ENGINEERING, PLLC
Engineering & Construction Management
www.ro-engineering.com





Norma Catalina, M.Ed. | VP and Project Coordinator

Mrs. Norma Catalina manages the company's day-to-day operations and is a senior executive. She's obtained a Bachelor's in Education and holds a Master's in Educational Leadership both from the University of Texas – Pan American. Her 24 years of experience in public education gives her an edge in dealing with our public-school clients. Norma's primary responsibilities cover all aspects of construction administration, ensuring that all technical requirements of contracts are attained and executed. She assists in setting up the contract content and keeping all records regarding the contracts such as award, any modifications, notices to proceed, etc. She maintains project logs and ensures that all subcontracted work is sent out and comes back completed and on-time. Track costs and provide quality control of the firm's documentation (i.e., AIA documentation). She will ensure all invoices are paid on time, keep track of submittals, RFI's, field reports and safety logs. She drives the warranty documentation and close out binders of each project. She ensures all warranty documents, lien releases are properly compiled and delivered to the owner, all punch list items are completed, and documents properly signed and filed. Norma is known for her ability to multi-task and on average manages eight projects simultaneously. Her skills with people allow her to maintain good public relations with clients both in English and Spanish.

EXPERIENCE

2019 – Current – Quantum Mechanical Contractors – Administrative Project Coordinator
2019- Current – RENOWORKS, LLC – Administrative Coordinator and Construction Manager
2018- Current – RO Engineering, PLLC – Administrative Coordinator
2014-2019 Edinburg CISD, Asst. Principal at Memorial Middle School
2010-2013 Edinburg CISD, Asst. Principal at Harwell Middle School
2007-2010 Edinburg CISD, Curriculum Assistant Canterbury Elementary
2005-2007 Edinburg CISD, Curriculum Assistant Cano-Gonzalez Elementary
1997-2005 Edinburg CISD, Teacher and Curriculum Writer

EDUCATION

South Texas College, Construction Superintendent Certificate 2021
Masters in educational leadership, University of Texas Pan American, 2004
Bachelor's in education, University of Texas Pan American, 1997
Rio Hondo HS Graduate 1991

MEMBERSHIPS AND TRAINING

SKILLS

Construction Administration, Bilingual and Biliterate, Marketing
Quick Books software, financial reports (i.e., P&L, WIP, Balance Sheets)

David R. Rivera | Mechanical Designer

Mr. Rivera graduated from UTRGV in electrical engineering. He has demonstrated a history of working in civil engineering and engineering electrical studies. His skills include AutoCAD, AutoCAD MEP, Revit, Visual 3D, and PSpice. He has worked on site layouts, commercial, MEP and Electrical projects and design; construction management, inspections, permits and cost estimates. Mr. Rivera has monitored project progress and ensures specifications and safety standards throughout the construction engineering projects he has worked on.

Pedro Rodriguez | Plumbing Designer

Mr. Rodriguez has 16+ years of experience in plumbing, mechanical and electrical. He has worked in MEP design for K-12, higher education, health care, Industrial, commercial, and residential. He has extensive knowledge of working with BIM, Auto CAD, Revit, Navisworks, 3D modeling and other software. Mr. Rodriguez has also served as a construction administrator for other firms in the past. He has overseen the development of design on Design-Build projects and worked on Value-Engineering (VE) and Constructability Studies. Mr. Rodriguez will be involved in the technical review of construction documents and construction administration.

Hector Montoya | Electrical Designer

Mr. Montoya is an electrical designer with over 20 years of design and industrial work. He graduated from the Institution of Computer Administration in Monterrey, Mexico. He is proficient in AutoCAD, Revit, BIM, and other software programs. He has overseen the development of design on Design-Build projects and worked on Value-Engineering (VE) and Constructability Studies. He has worked with big company projects within electrical design (i.e., CEMEX, Monterrey Casino, Chihuahua Airport, Water Treatment Plants). His experience and quality control are demonstrated in his electrical designs. Mr. Montoya has monitored project progress and ensures specifications and safety standards throughout the construction engineering projects he has worked on.

Harvey Rodriguez | Project Manager

Mr. Rodriguez has a strong background in construction with a specialty in construction trades, managing personnel, estimating costs, field reporting and working with subs. He understands quality control and demonstrates knowledge working with subs and staying under or on budget. He will provide oversite of all workers on site and ensure they are working safely and efficiently in sync with the construction schedule. He will ensure all materials are delivered to the site along with the necessary equipment for construction. He has learned how to effectively communicate with subcontractors and construction workers effectively and respectfully.

Joe De La Fuente | Project Manager

Mr. de la Fuente has over 20 years' experience and is a skilled professional with experience in supervisory, project management, civil work and individual contributor roles within large corporations and small businesses. He has managed multimillion dollar projects coordinating with all trades, developing good faith with project owners, and building positive rapport with architects, engineers, local officials, vendors, and clients while maintaining costs. He has managed day to day operations for planning, bidding, and executing contracts, submittals with a follow-thru on orders. His direct contact with customers and engineers to ensure a quality product is what makes him a professional on our team. He is very thorough and pays attention to details. He is professional in his work and shows respect toward clients and employees.

Robert Reyna | Construction Superintendent

Mr. Reyna has over 30 years' experience in construction working in the state of Texas. He has a strong background in construction with a specialty in Fire Protection, masonry and concrete, MEP and various other construction trades. He will provide oversite of all workers on site and ensure they are working safely and efficiently in sync with the construction schedule. He will ensure all materials are delivered to the site along with the necessary equipment for construction. He has learned how to effectively communicate with subcontractors and construction workers effectively and respectfully. He is adept at eliciting and providing information in a timely and professional manner that ensures the construction moves forward smoothly. His experience covers public and private sectors from small renovations and rehabilitation to commercial and large public buildings.

Karla Tavarez | Accounting Bookkeeper

Ms. Tavarez has over 15 years of experience in financial record keeping. Her experience is in construction accounting, data entry, and maintaining financial records. She has worked at Texas C&S Investments as an internal/external auditor that is responsible for development and implementation policies, procedures of internal systems. She works directly with the project estimator and is responsible for recording, classifying financial transactions and maintaining financial reporting. She develops positive relations with vendors and generates construction cost reports.

Teresa Puente | Assistant Accounting Bookkeeper

Mrs. Puente has over 25 years of experience in bookkeeping. Her experience is in construction accounting, value engineering, data entry, and maintaining financial records. She works directly with the project coordinator and estimator and tracks financial reporting. She develops positive relations with vendors and generates construction cost reports.

RO ENGINEERING PROJECTS

Hidalgo County, Health Clinic Renovation Project – Weslaco, TX – MEP Engineer on record for design of renovations of clinic. Scope of work to survey existing conditions of floor plan and schematic design and provide engineering plans and specifications required for bidding. (in progress)

Hidalgo County, Health Clinic Renovation Project – Edinburg, TX – MEP Engineer on record for design of renovations of clinic. Scope of work to survey existing conditions of floor plan and schematic design and provide engineering plans and specifications required for bidding. (in progress)

City of McAllen, Kappler Park – MEP Engineer on record. Scope of work to survey electrical service entrance, provide electrical for park restrooms, gazebo receptacles and lighting and solar lighting sealed engineering plans and specifications; provide plumbing sealed engineering plans and specifications. (in progress)

Hidalgo County, Hidalgo County Facility Management Offices – MEP Engineer on record. Scope of work to survey existing conditions, providing and adding six offices in the existing open space within the building and provide sealed electrical, mechanical, and plumbing plans and specifications. (in progress)

City of Pharr, TDRI Office and Warehouse – MEP Engineering on record. Scope of work to survey existing conditions of a proposed office and warehouse that includes 1540 SF with two bathrooms and 3000 SF dry warehouse storage; provide mechanical, electrical, and plumbing engineering services. Provide mechanical, electrical, and plumbing sealed engineering plans and specifications.

City of Edinburg, Ace Building – MEP Engineer on record. MEP Commissioning Services for ACE Building. Prepare a project commissioning plan, review design, and supervise commissioning, compile commission report data for the owner. (in progress)

Hidalgo County PCT 4, Two Waste Collection Sites – Project Construction Manager to review design and specifications. Coordinate between the design engineer and geotechnical. Review estimated cost of construction and assist in negotiating a fee with the general contractor and attend bi-weekly meetings and periodic inspections with field reports and photographs. (Est. 7/23, Est. Cost $1.2M)

City of Weslaco, Weslaco Signage - MEP Engineer on record for design of electrical sport poles at eight tennis court school facilities. Scope of work to survey existing conditions to place light poles, review court mapping, identify utility location, perform photometric analysis of lighting levels, prepare site plan layout showing location of light poles.

City of Parr, Pharr Town Oasis Lighting – MEP Engineer on record for design of electrical sport poles at eight tennis court school facilities. Scope of work to survey existing conditions to place light poles, review court mapping, identify utility location, perform photometric analysis of lighting levels, prepare site plan layout showing location of light poles.

Hidalgo County PCT 1, Hargill, TX – Engineer of record for design of street solar lighting improvements at Hargill, TX. Scope of work to survey existing conditions to place light poles, review land street mapping, identify utility location, perform photometric analysis of lighting levels, prepare site plan layout showing location of light poles, provide structural engineering plans for concrete foundation, provide traffic control in accordance of TXDOT standards and provide engineering plans and specifications required for bidding. (Est. 3/22, Est. Cost $270K)

Hidalgo County PCT 4, Head Start Parking Lot Improvements, TX - Engineer of record for design of civil, surveying, structural and MEP and ADA review for head start parking lot improvements. Scope of work of Hidalgo Co Head Start Parking Lot Improvements include new paving and TXDOT standards, provide engineering plans and specifications required for bidding. (Est. 3/23, Est. Cost $440K)

Hidalgo County PCT 4, San Carlos, TX - Engineer of record for design of civil, surveying, structural and MEP and ADA review for head start parking lot improvements. Scope of work of Hidalgo Co Head Start Parking Lot Improvements include new paving and TXDOT standards, provide engineering plans and specifications required for bidding. (Est. 1/22, Est. Cost $440K)

PSJA ISD, Cesar Chavez Elementary School – Engineer of Record for design of MEP kitchen hood design. (Completion 9/22 Est. Cost 5K).

Edinburg CISD, Tennis Court Sport Lighting – Engineer on record for design of electrical sport poles at eight tennis court school facilities. Scope of work to survey existing conditions to place light poles, review court mapping, identify utility location, perform photometric analysis of lighting levels, prepare site plan layout showing location of light poles.

Move It Storage – Electrical Design Services, Harlingen, TX – Engineer of record to assess and survey power sources, review existing preliminary plans, complete design development and construction documents and provide sealed engineering plans. (Completion 5/22, 4K).

Move It Storage – Electrical Design Services, San Benito, TX – Engineer of record to assess and survey power sources, review existing preliminary plans, complete design development and construction documents and provide sealed engineering plans. (Completion 3/22, 4K).

Move It Storage – Electrical Design Services, La Feria, TX – Engineer of record to assess and survey power sources, review existing preliminary plans, complete design development and construction documents and provide sealed engineering plans. (Completion 6/22, 4K).

Construction Professional Services, Donna, Texas – Civil Engineer, Fire Protection Consultant, MEP Engineer and Construction Management for projected project within school district**,** (Est. Completion 2022)

Edinburg CISD, Secured Entrances, Edinburg TX – Engineer of record for design of secured entrances districtwide. Scope encompassed motorized gates with RFID access at all bus loops, wireless keypad at teacher parking and access control at main entrance of school at 30 Elementary schools. Our scope of services will include electrical engineering. We will provide plans and specifications for bidding and construction administration. (Est. Completion 03/21, Est. Cost $1.2M)

Edinburg CISD, Escandon Elementary Gym HVAC Replacements, Edinburg TX – Engineer of record for replacement of (4) 7.5 Ton split systems at Escandon Elementary gym. Our scope of services will include mechanical and electrical engineering. We will provide plans and specifications for bidding and construction administration. (Est. Completion 1/21, Est. Cost $160K)

City of Elsa, Elsa Pacific Trails, Elsa, TX – Engineer of record for design of Mechanical, Electrical and Plumbing of a new park trail lights and HVAC install design for new park public restrooms. (Est. Completion 12/20**,** Est. Cost $500K)

Hidalgo County PCT 4, Design and Construction of Rio Delta Bus Shelter, Edinburg, TX – Engineer of record to design sidewalk and install shelter off Highway 107 and 86th street in San Carlos, install a 4 ft sidewalk from shelter to the WIC Clinic behind the Head Start Building and a 4 ft concrete handicap ramps. (Est. Completion 02/21, Est. Cost $34K)

City of Edinburg, Onsite Standby Generator for Wastewater Plant Orbal Generator, Edinburg TX – Engineering services to survey equipment onsite, verify existing electrical conditions, provide engineering plans and specifications required for bidding, provide construction management from commencement to completion of the project, review submittals, operations, and warranty documents. (Est. Completion 6/20, Est. Cost $200K)

Edinburg CISD, Zavala Elementary Gym HVAC Replacements, Edinburg TX – Engineer of record for replacement of (4) 7.5 Ton split systems at Zavala Elementary gym. Our scope of services will include mechanical and electrical engineering. We will provide plans and specifications for bidding and construction administration. (Est. Completion 1/20, Est. Cost $150K)

Edinburg CISD, Boiler Replacements, Edinburg TX – Engineer of record for replacement of (2) boilers for HVAC system at Memorial Middle School. Our scope of services will include mechanical engineering. We will provide plans and specifications for bidding and construction administration. (Est. Completion 1/20, Est. Cost $170K)

City of Edinburg, Downtown Water Plant Electrical Improvements, Edinburg, Texas – Engineer for replacement of motor control centers and lighting for the Downtown Water Plant in Edinburg TX. Gear controls the clarifiers, mixers, and pumps. (Est. Completion 1/20, Est. Cost $226K)

City of Edinburg, Pump Station No.1 Standby Generator, Edinburg, Texas – Engineer and project manager for replacement of 300kVA standby generator at Pump Station No.1 which serves 3 utility pumps, 150HP, 100HP, and 50HP. We also coordinated the burial of 140LF of overhead power line with AEP and installation of new transformer on concrete pad. (Est. Completion 12/17 Est. Cost $240K)

Edinburg CISD, Hargill Elementary Classroom Renovation, Edinburg, Texas – Engineer Project scope includes addition of ten classrooms and renovation of existing facility. Project will undergo in phases. First phase includes an assessment of existing facility and renovation. RO Engineering was contracted as the consultant by Architect of record Negrete & Kolar Architects. (Est. Completion 12/19, Est. Cost $5.5M)

City of Edinburg, Edinburg Transit Terminal, Edinburg, Texas – Mechanical Engineer for construction of new two story 18,000 SF facility that will serve as a Transit Terminal for the City of Edinburg. The HVAC System included DX package units and split systems. Plumbing systems include sewer and grease waste, domestic water, small pump for elevator, and instantaneous water heaters. RO Engineering was contracted as MEP consultant by Architect of record Negrete & Kolar Architects. (Est. Completion 5/19)

City of Edinburg, Los Venados Booster Station, Edinburg, Texas – engineer for replacement of pumps and electrical panels for 129,000-gallon water tank serving Los Venados Subdivision. Existing booster tank, pumps and piping will be demolished and replaced with new tank, pumps and electrical. (Est. Completion 5/19, Est. Cost $450K)

City of Pharr, City of Pharr HVAC Replacements City Wide, Pharr, Texas – Mechanical Engineer for assessment of the city's building HVAC systems. Prepared mechanical designs to replace and upgrade HVAC systems to higher efficient units with new building automation systems. HVAC improvements were proposed for the Pharr Police Department, Memorial Library, Pharr International Bridge, and Tierra Del Sol Golf Course building. (Est. Completion 5/19, Est. Cost $875K)

City of Pharr, Pharr Sports Complex & Witten Park Sports Lighting, Pharr, Texas – Electrical Engineering services provided for replacement of existing sports lighting. Prepared electrical designs for new LED sports lighting at Witten Park and Pharr Sports Complex. A total of 23 wood poles and 95 sports lights were removed at Sports Complex and 16 wood poles and 62 sports lights were removed at the Witten Park and replaced with 14 new concrete poles and 163 new LED sports lights at Sports Complex and 7 new concrete poles and 90 new LED sports lights at Witten Park. (Est. Completion 2/19, Est. Cost $165K)

Edinburg CISD, Edinburg North HS Cooling Tower Replacement, Edinburg, Texas – Engineer for replacement of (3) cooling towers, (3) Pumps, and new piping at the Edinburg North High School. Three new Evapco towers were 500 tons each with two 30 HP pumps and one 10 HP pump serving existing chillers. New pipe was converted from steel to schedule 80 PVC pipe with new valves. New towers included walkway, frequency drives, and replacement of all electrical wires and disconnects. (Est. Completion 6/17, Est. Cost $620K)

City of Edinburg, Dustin M. Sekula Library Standby Generator, Edinburg, Texas – Engineer and project manager for replacement of 500kVA standby generator at Dustin M. Sekula Library. The generator included a 48hour fuel tank and a CMU enclosure with stucco finish. Construction documents were provided and contracted Metro Electric as the contractor. (Est. Completion 10/15)

Weslaco ISD, Weslaco ISD Energy Conservation Project with Savings Guarantee, Weslaco, Texas – Project Manager & Independent 3rd party engineer for energy conservation project with savings guarantee for the Weslaco ISD. After one-year savings were calculated to be $698,683.31. During the design and buildout, we reviewed contract documents, reviewed savings calculations, payment applications, project schedule, RFI, Submittals, performed site inspections, reported findings to the board of trustees. Project scope included redesign, retrofit, and commissioning of HVAC systems at Weslaco High School, East High School, Mary Hoge Middle School, B. Garza Middle School, Cuellar Middle School, Margo Elementary, Ybarra Elementary, Roosevelt Elementary, Sam Houston Elementary, Gonzalez, Elementary, Sylva Elementary, CATE, Central Middle School, and the Aquatic Center. HVAC Systems included DX package units (Est. Completion 2/16, Est. Cost $12.8M)

City of Alamo, Solar LED Street Lights, Phase 2, Alamo, Texas – Engineer for installation of 40 solar LED streetlights on the west side of Tower Rd. from Business 83 to Nebraska Street which covered approximately one mile. Included photometric lighting design, topographical survey, site plan, and construction administration. RO Engineering served as the engineering consultant to Enviro Group Solutions. (Est. Completion 2/16, Est. Cost $384K)

La Joya ISD, Leo J. Leo Middle School, La Joya, Texas – Engineer for Quality Control Inspection of installation of HVAC Improvements at Leo Middle school and made recommendations to owner in a field report. (Est. 2015)

La Joya ISD, JD Salinas Middle School, La Joya, Texas – Engineer for Mechanical & Electrical construction plans for reheat design for gym and library at Salinas Middle School. (Est. 2015)

CONSTRUCTION PROJECTS
(DBA Renoworks, DBA Quantum-Mechanical Contractors)

City of Edinburg, Ebony Golf Course Installation of new Cart Paths (at punchlist) - General Contractor & Project Manager (DBA Renoworks, LLC). General Contractor to install new paved asphalt cart paths at various locations at Ebony Golf Course. (Est. 263K) at punch list

Hidalgo County PCT 4, Alfonso Flores All Star Park Flag Wall (in progress) - General Contractor & Project Coordinator (DBA Renoworks, LLC). General Contractor to install a 752 SF concrete slab and sidewalk, including plaster with stucco, installation of new signage, installation of 3 flag poles and new electrical for exterior lighting. (Est. 70K)

City of Edinburg, Installation of 2 New Bridges at Ebony Hills Golf Course - General Contractor & Project Coordinator (DBA Renoworks, LLC). Purchase of two pre-fabricated bridges and installation of bridges at Ebony Hills Golf Course (Est. 482K)

Brownsville ISD, Villa Nueva Elementary School HVAC Upgrades *(at punchlist)* - General Contractor & Project Coordinator (DBA Quantum-Mechanical Contractors). Construction services entail demolition and installation of 4 roof top package units: new condensers and piping and electrical (Est. Cost. $980K)

La Joya ISD, Chavez & Memorial Middle Schools HVAC Upgrades *(in progress)* - General Contractor & Project Coordinator (DBA Quantum-Mechanical Contractors). Construction services entails demolition and installation of new installation of ductwork, new electrical, new VAV, new dampers and grills, new piping and installation of 2 new chillers and 8 new AHU's, 44 VAV boxes, piping and at Memorial: installation of 2 new chillers and 7 new AHU's, 39 VAV boxes, piping and electrical at Chavez. (Est. Cost. $6.8M)

La Joya ISD, Corina Pena Elementary School HVAC Upgrades *(in progress)* - General Contractor & Project Coordinator (DBA Quantum-Mechanical Contractors). Construction services to install one new chiller, 7 new MAU's, new concrete pads, new piping and electrical: mechanical accessories and controls. (Est. Cost $1.4M)

La Joya ISD, EB Reyna & Escandon ES Schools HVAC Upgrades *(in progress)* - General Contractor & Project Coordinator (DBA Quantum-Mechanical Contractors). Construction services entails demolition and installation of new HVAC units; install six – 10 Ton; install two-30 Ton; install three-4 Ton; install five- 12-15 Ton and install five – 4 Ton units. Furnish and install ductwork; refrigerant and condensate lines at schools and mechanical devices; new electrical and piping; install new breakers; and controls. (Est. Cost $1.9M)

Edinburg CISD, Freddy Gonzalez Elementary School HVAC Improvements (*completed*) – General Contractor & Project Coordinator (DBA Quantum-Mechanical Contractors). Construction services for Freddy Gonzalez; demolition and installation 41 new DX units; new electrical and piping; install new breakers; install ductwork and controls. (Est. Cost $1.3M).

La Joya ISD, La Joya ISD ESSER Funds Project – Canopy Structures Phase 1 – General Contractor & Project Manager (DBA RENOWORKS, LLC). Construction services for the La Joya ISD ESSER Funds – Canopy Structures Phase I consists of Canopy Improvements to the following 13 Schools: Escandon Elementary, EB Reyna Elementary, Gonzalez Elementary, Camarena Elementary, Bentsen Elementary, Diaz-Villarreal

Elementary, Paredes Elementary, Chavez Middle School, Richards Middle School, Memorial Middle School, Garcia Middle School and Palmview High School. (Est. Cost $1.6M)

City of Edinburg, Museum of South Texas - General Contractor & Project Manager (DBA RENOWORKS, LLC). Connecting sewer line to existing main and installing a new manhole at the museum. Excavating and trench and connections. (Est. Completion 9/22, Est. Cost $17K)

Sharyland ISD, Shimotsu Elementary HVAC Upgrades (*in progress*) - currently serving as General Contractor & Project Manager (DBA Quantum-Mechanical Contractors, LLC). Project scope includes replacement of HVAC systems with new pumps, VFD's and valves. Demo of existing chiller and other materials (Est. Completion 03/23, Est. Cost $1.7M)

Sharyland ISD, BL Gray Chiller Replacement (*in progress*) - currently serving as General Contractor & Project Manager (DBA Quantum-Mechanical Contractors, LLC). Project scope includes replacement of Chiller systems with new pumps, VFD's and valves. Demo of existing chiller and other materials (Est. Completion 11/22, Est. Cost $512K)

City of McAllen, City Hall Mechanical Upgrades- currently serving as the General Contractor and Project Manager (DBA Quantum-Mechanical Contractors, LLC). Project scope includes installation of new valves on the 1st floor, 2nd floor, and 3rd floor to new installed equipment. (Est. Completion 12/22, Est. Cost $169K)

City of McAllen, Public Library - currently serving as the General Contractor and Project Manager (DBA Quantum-Mechanical Contractors, LLC). Project scope includes installation of new VFD's. (Est. Completion 12/22, Est. Cost $49K)

Los Fresnos ISD, Los Fresnos HS Central Plant Equipment Replacement– Is currently serving as General Contractor & Project Manager (DBA Quantum-Mechanical Contractors, LLC). Project scope includes replacement of Cooling Tower and Chiller systems with new electrical, pumps and valves, new overhead door and structural pillars. (Est. Completion 8/22, Est. Cost $1.2M)

Donna ISD, Replacement of HVAC Unit at 6 Schools – Served as General Contractor & Project Manager (DBA Quantum-Mechanical Contractors, LLC). Project scope included replacement of HVAC units at Singleterry Elementary, Sauceda MS, Solis MS, Rivas Elementary, J.W. Caceres Elementary, A.P. Solis MS, and C. Stainke Elementary. (Est. Completion 1/21 Est. Cost $442K)

City of McAllen, Chiller and Boiler Replacements – Serve as General Contractor & Project Manager (DBA Quantum-Mechanical Contractors, LLC). Project scope includes demolition of 2 chillers and one boiler and all associated piping and replace with one chiller and two boilers including new piping and electrical. (Est. Completion 4/21 Est. Cost $210K)

McAllen PUB, WWTP Lab Renovation – Served as General Contractor & Project Manager (DBA RENOWORKS, LLC). Project scope included conversion of office to a laboratory with installation of new cabinetry, solid phenolic countertops, plumbing fixtures, and electrical. (Est. Completion 11/20 Est. Cost $30K)

Barrientes MS Gym AHU Replacement – Serving as mechanical contractor (DBA Quantum-Mechanical Contractors). Project includes demolition and replacement of existing air handling units serving the gymnasium along with new supply and return air ductwork extended to existing ductwork. Includes reinforcement of roof structure to support weight of new units to place on the roof. (Est. Completion 9/20 Est. Cost $126K)

Brownsville PUB River Pump No. 3 Forebay Structural Improvements – Serving as General Contractor & Project Manager (DBA RENOWORKS, LLC). Project includes removal of 56LF of 36in RCP pipe and replace it with 56LF of 42in HDPE pipe. Also includes structural repairs of concrete forebay well. (Est. Completion 11/20 Est. Cost $145K)

Brownsville Navigation District Turning Basin WWTP Clarifier Rehabilitation – Serving as General Contractor & Project Manager (DBA RENOWORKS, LLC). Project includes replacement of existing 50ft walkway, replacement of gear drive unit, repair rake and adjust squeegees, repair, and level concrete floor, and replace motor starter electrical box. (Est. Completion 9/20 Est. Cost $185K)

Quinta Mazatlán Exterior Lighting Project – General Contractor & Project Manager (DBA RENOWORKS, LLC) for improvements of Exterior Lighting at Quinta Mazatlán. Project included installation of underground J- Boxes, mounting cable and installation of 1000 liner feet of café string lights, boring, conduit installation, install LED lighting, exterior bollards and install non-tapered steel pole. (Est. Completion 05/20 Est. Cost $112K)

Living Word EFC Renovations – General Contractor & Project Manager (DBA RENOWORKS, LLC) for church improvements. Project included removal of sheetrock, insulation on south and north walls and two rooms. Disposal of demo materials and install new sheetrock, tape/float new dry wall. Remove mortar and seal on exterior block where it cracked and apply new mortar between blocks. Paint new installed walls (Est. Completion 10/20 Est. Cost. $45K)

PSJA ISD, Carnahan, Franklin & Buell HVAC Improvements to Gyms, Pharr, Texas – General Contractor & Project Manager (DBA RENOWORKS, LLC) for improvements at Carnahan, Franklin & Buell Gyms. Project included installation of 20-ton package units and ductwork at each school's gym. Work at Carnahan included new fire sprinkler system for approximately 19,000 SF, new LED lighting in the gym, new pre-engineered liner system, new athletic synthetic flooring, column padding, complete painting of gym. (Est. Completion 10/19, Est. Cost $748K)

City of Pharr, Emergency Communications Center IT Offices, Pharr, Texas – General Contractor & Project Manager (DBA RENOWORKS, LLC) for the addition of 9 new offices to the existing building renovation that will be used for the city's emergency communications center and for the Information Technology staff. Scope of work included new metal stud walls with finish, doors and hardware, special systems, HVAC & lighting changes, and tile floor. (Est. Completion 10/19, Est. Cost $70K)

City of Edinburg, Edinburg Police Dept. Training Facility, Edinburg, Texas – Construction Project manager for the construction of new 10,000 SF facility that will serve as Police Department Training Facility for the city of Edinburg. Reviewed construction documents, submittals, RFIs, construction progress, payment applications and close out documents. Architect of Record was ERO Architects and general contractor was Candela Organization. (Est. Completion 3/17, Est. Cost $1.22M)

Mission CISD, Mission High School Tennis Court Lights & Canopy, Mission, Texas – General Contractor & Project Manager for installation of 24 LED Musco sports lights and construction of 145ft canopy for the walkway at the Mission High School tennis courts. The canopy was 12ft wide, 10ft tall, constructed with galvanized bolted steel. Structural engineer was Chanin Engineering. (Est. Completion 5/18, Est. Cost $368K)

Edinburg CISD, Barrientes CTE Welding Shop, Edinburg, Texas – General Contractor & Project Manager for renovation of Career & Technology Education shop. Included replacement of HVAC system, upgrade electrical power for 10 new welding booths, demolition of walls and doors, installation of new doors, ceiling, flooring, and new LED lighting. School district performed inhouse architectural design. (Est. Completion 7/18, Est. Cost $270K)

Edinburg CISD, Edinburg North HS Athletics Building HVAC Assessment, Edinburg, Texas – Engineer for assessment of ventilation system at Boys & Girls athletics Edinburg North High School, total of 36,500 SF. Ran loads on exhaust fans and outside air on all air handlers. Analyzed temperature and humidity readings and assessed condition of existing equipment and made recommendations to resolve airflow issues and comply with current building codes. Report was provided to district staff and findings & recommendations presented to the board of trustees. (Est. Completion 2/17, Est. Cost $250K)

Edinburg CISD, Edinburg North HS Boys Athletic Lockers Renovation, Edinburg, Texas – General Contractor and Project Manager for renovation of existing Boys Athletic Locker Rooms. Included demolition of dividing walls, removed chain-link fencing partitions and replaced with new wire mesh panels for each locker area, demo of lockers concrete base and reconstructed base for new lockers, removed benches, repaired flooring, constructed new video review room, installed new rubber flooring with school logo, new drinking fountains, and replaced 10 nonworking exhaust fans. (Est. Completion 9/17)

HUB
Statewide Historically Underutilized Business Program

Certificate/VID Number: **1271584569400**
File/Vendor Number: **487945**
Approval Date: **07-DEC-2018**
Scheduled Expiration Date: **07-DEC-2022**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

RO ENGINEERING, PLLC

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed 07-DEC-2018, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day-to-day management, operational control, business location) provided in the submission of the business' application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Laura Cagle-Hinojosa, Statewide HUB Program Manager
Statewide Support Services Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp) or by contacting the HUB Program at 512-463-5872 or toll-free in Texas at 1-888-863-5881.

Re: **Request for Qualifications – "Professional Services Pools - ENGINEERING" RFQ No.: #2024-9**

To Whom it May Concern:

We are delighted with the opportunity to present our firm's statement of qualifications and proposal to provide our services to City of Edinburg.

S2 Engineering, PLLC is a civil engineering consulting firm established in 2021 based out of the Lower Rio Grande Valley in Mission, Texas. S2 Engineering's President/Senior Project Manager, Jose Noe Saldivar, P.E., C.F.M., has more than 24 years of progressive experience in transportation and drainage planning design. Mr. Saldivar is familiar with the regional characteristics of the Rio Grande Valley and the existing drainage infrastructure.

Our firm provides services for the design and construction of the following areas: hydraulic modeling and design, roadway infrastructure, site planning and land development, stormwater drainage design, land surveying and construction management. S2 Engineering has assembled a team of qualified personnel with the necessary knowledge and experience in the areas listed above. Our firm is positioned to meet the needs of any project from inception to completion. Our current workload permits us to confidently provide projects that meet specific requirements while being cost effective and maintaining quality.
Enclosed is information about our team's qualifications and past completed projects that shows our commitment to our clients, projects, and communities served.

Should there be any questions, contact Mr. Saldivar, President, by phone at (956) 403-9787 or email at s2engineering.ns@gmail.com. Thank you for the opportunity to participate in the Request for Qualifications.

Sincerely,
Jose Noe Saldivar, PE, CFM, President

PROFILE OF

ENGINEERING & LAND SURVEYING SERVICES

S 2 ENGINEERING, PLLC
CIVIL ENGINEERING & LAND SURVEYING
TBPE F-22858 TBLS 10194796

Providing civil engineering & land surveying services as it relates to a wide variety of project developments.

S2 Engineering, PLLC, has an office located at 2424 Mimosa, Mission, Texas 78574. We are licensed by the Texas Board of Professional Engineers and Land Surveyors Firm No. 22858 TBLS 101194796. S2 Engineering provides civil engineering services as it relates to a wide variety of project developments. Our firm can provide complete services from the initial data acquisition to preparation of plans, specifications, and estimates (PS&E). We have maintained excellent professional relationships with the Hidalgo County Drainage District No. 1, Hidalgo County Precinct 1, Precinct 2, Precinct 3 and Precinct 4.

Specific civil engineering services provided by S2 Engineering consist of:

- Hydrologic & Hydraulic Modeling & Design
- HEC-HMS
- HEC-RAS
- Site Planning & Land Development
- Stormwater Drainage Design
- Roadway Hydraulic Design
- Utility Engineering
- Route Studies & Schematic Design
- Street, Roadway & Highway Design
- Traffic Control Planning
- Construction Management
- Preparation of Plans, Specifications, and Estimates (PS&E)
- Mechanical Engineering

BELOW IS A LIST OF REPRESENTATIVE PROJECTS OUR TEAM HAS BEEN INVOLVED IN:

Drainage Projects

Weslaco Drain Improvements, Weslaco, TX (2021)
Proposed USIBWC permanent pump and gate structure, with a reinforced concrete box outfalling to the Main Floodway. The improvements benefit an area of approximately 4,014 acres. This project required close coordination with the USIBWC and six other local and federal government entities, to obtain clearance for a new structure license.

Anaquitas USIBWC Drain Structure, Mercedes, TX (2021)
Proposed USIBWC gate structure, with two reinforced concrete boxes outfalling to the Main Floodway. The improvements benefit an area of approximately 3,840 acres. This project required close coordination with the USIBWC and six other local and federal government entities, to obtain clearance for a new structure license.

K-07-02 Drain Improvements, Pharr/San Juan, TX (2021)
Ditch design, consisting of ditch widening and regrading. The existing ditch width was increased to 125 LF, providing additional capacity for stormwater.

Tierra Dorada Drain Improvements, Hidalgo, County, TX (2021)
Design and sizing of three new culvert road crossings. Two of the culvert crossings are under Shuerbach Rd and Moorefield Rd. The last crossing connects the Tierra Dorada Drain to the Perezville Drain.

J-08 Drain – McColl Rd. Culvert Crossing, Edinburg, TX (2021)
Design and sizing of a culvert crossing under McColl Road (FM 2061), calculating the appropriate tailwater elevation. This project required coordination with TxDOT for the design and traffic control plan.

Ditch 47 & Ditch 350 Improvements, Hidalgo County, TX (2020)
Design and sizing of three culvert road crossings and one culvert irrigation canal crossing. The three culvert crossings are under Mile 6 1/2, Mile 10 N., and Mile 9 N.

Chaparral Drain Extension, Donna, TX (2019)
Ditch design, consisting of ditch widening and regrading Design and sizing of a new culvert.

North San Juan Drainage Lateral, San Juan, TX (2003)
Survey work and hydraulic study for ditch design. Proposed drainage structures and upsizing the irrigation owned drainage ditch from FM 495, north to its outfall near Canton Road.

TxDOT Projects

US 277 / Maverick County, TxDOT-Laredo District (2006)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. System outfalls into Canyon Grande Creek. Preparation of all Hydraulic Sheets.

US 83/359, Webb County, TX (2005)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. System outfalls into Chacon Creek. Preparation of all Hydraulic Sheets.

SH 345, Cameron County, TX (2004)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. System outfalls into a Resaca. Irrigation crossing design. Preparation of all Hydraulic Sheets.

US 83 Arroyo Roma Creek, TX (2004)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. System outfalls into San Casimiro Creek. Preparation of all Hydraulic Sheets.

North I Road, Pharr, TX (2002)
Storm drain design, analyzing appropriate tail water elevations for culvert drainage areas. Illumination, signing and pavement marking design. Preparation of all Hydraulic Sheets.

PROJECTS COMPLETED WITH

CONFIDENCE

HYDRAULIC AND HYDROLOGIC EVALUATION FOR THE DEVELOPMENT OF DRAINAGE REPORTS (2001 – 2002). SUBDIVISIONS INCLUDE:

- Taurus Estate No. 12, 13, 15 and 16 Subdivision, private developer, Alton Texas.
- Alma Delia Subdivision, Huisache Acres No.3 Subdivision, Private Developer, Alamo Texas
- Taurus Estates No. 3,5,6,7,8,9 Subdivision, Church Estates Subdivision, Colinas del Rio Subdivision, Empire Subdivision, Private Developer, Mission Texas.
- Rancho Blanco Estate Subdivision, Private developer, Harlingen Texas.
- Seventh Day Subdivision, Arboledas Subdivision, Private developer, McAllen Texas.
- Taurus Estate No. 11,14,18 Subdivision, Western Village Subdivision, Western Estate Subdivision, Texas Village Subdivision, Private Developer, Hidalgo County Texas.

PROGRESSIVE ENGINEERING

WITH EXPERIENCE

S2 Engineering, PLLC,

has a team of qualified personnel providing a combination of backgrounds in design engineering, land surveying and construction. Our President and Senior Project Manager, Mr. Saldivar, is a licensed professional engineer who has more than 24 years of progressive engineering experience in the Lower Rio Grande Valley. He has provided engineering design services for Cities, Counties, Federal entities, and private clients. Our firm's current workload enables Mr. Saldivar to be involved in all project development, from inception through final construction.

MEET

THE S2 TEAM

JOSE NOE SALDIVAR, P.E., C.F.M.

Title
President/Senior Project Manager

Years of Experience
24

Education
BS, Civil Engineering
Instituto Tecnologico de Cd. Victoria, 1997

Training/Certifications
Professional Engineer: Texas/94076

Certified Floodplain Manager
(CFM)/3340-17N

TxDOT Pre-Certifications:
3.4.1 Minor Bridge Layouts
4.2.1 Major Roadway Design
8.1.1 Signing, Pavement Marking & Channelization
10.1.1 Hydrologic Studies
10.2.1 Basic Hydraulic Design

Areas of Expertise
• PS&E • Hydraulic Design • Hydrologic Studies • FEMA Requirements, Coordination & Funding • Minor Bridge Design • Major Roadway Design

Mr. Saldivar will be responsible for the overall project administration and management including thorough coordination with the client's essential decision makers to ensure the client's needs are met. As Senior Project Manager, he is also responsible for the in-house project coordination. The success of any project depends on proper design and engineering. S2 Engineering's in-house design and capabilities are focused on cost-efficient engineering techniques related to the constructability of projects. These designs are supported by in-house surveying capabilities. Additionally, in-house drafting services utilize the latest versions of AutoCAD to provide detailed exhibits and drawings as necessary to support bidding and construction. Drafting revisions over the course of a project are maintained through a document control process.

TEAM MEMBERS QUALIFICATIONS AND EXPERIENCE

S2 Engineering's goal is to establish long-term relationships with our clients by performing a highly competent service with quality and concern for the client, as well as our local communities. This is successfully done by the technical abilities, project management skills and commitment of the project team members. The resumes of key professional and technical staff are presented individually on the following pages.

Summary

Mr. Saldivar has more than 24 years of progressive experience in transportation and drainage planning and design. He has served as a Project Manager and Surveying Manager for various engineering firms and 14 years with the Hidalgo County Drainage District No. 1. He is experienced in route studies and planning, preparations of plans, specifications and estimates (PS&E), utility relocation, geometrics, signage and pavement markings and hydraulics. He has participated on numerous engineering assignments associated with the development of roadways, storm drainage systems, traffic control planning, bridge layout, and various other civil engineering applications. His experience includes design and development and hydraulic report/data sheet development. He is proficient in software such as WinStorm, HEC-RAS, TR 55, HY8, Geopak and AutoCAD. Mr. Saldivar has prepared numerous drainage studies and reports including determining proposed improvement impacts, drainage areas, discharges, FEMA floodway requirements, culvert/ bridge locations and sizes, design frequency flow, tailwater and headwater elevations for design and anticipated overtopping of the bridges. He has performed scour analysis and prepared numerous SW3Ps to minimize sediment transport into drainage facilities.

Project Experience

2018 Drainage Bond Program, Hidalgo County, TX
Role: Project Manager

Mr. Saldivar was responsible for managing seventeen (17) consultants with countywide projects that would positively affect more than 69,000 structures in Hidalgo County, helping to protect more than $5.5 billion in assessed property value. The 2018 Drainage Bond Program consists of 37 projects of which ten (10) projects required coordination with USIBWC to secure environmental clearance for amended or new licenses for structures outfalling into the USIBWC Floodway. Mr. Saldivar was responsible for reviewing and approving all H&H deliverables.

Drainage Projects

Role: Project Engineer

- Anaquitas Drain
- Chaparral Drain Extension
- Chaparral Drain Extension
- Delta Regional Water Mgmt.
- Ditch 47 & Ditch 350
- J-08 Drain
- K-07-02 Drain Improvements
- North San Juan Drainage Lateral
- Tierra Dorada Drain Improvements
- Weslaco Drain Improvements

TxDOT Projects
Role: Project Engineer

- **US 277 / Maverick County**
- **US 83 / 359**
- **SH 345**
- **US 83 Arroyo Roma Creek**

OSCAR HERNANDEZ , R.P.L.S.

Title
Registered Professional Land Surveyor (RPLS)

Years of Experience
43

Education
Harlingen High School

Areas of Expertise
Surveying
Topographic Surveys Global Positioning System (GPS)
Boundary
Road / Highways
ALTA Surveys Subdivisions / Land Development
Civil Engineering Design Survey
AutoCADD
Carlson Software
Leica GEO Office Terrestrial LiDAR

Summary

Mr. Hernandez has 43 years of surveying in South Texas from San Antonio south to Brownville and from Corpus Christi west to Laredo to good use. Mr. Hernandez's areas of experience and certifications are listed below:

Experience:

SAMES, INC

JUNE 2021 – OCTOBER 2022

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects.
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity.
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

COBBFENDLEY

August 2019 – June 2021

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects.
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)

- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high- performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity.
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

BAIN MEDINA BAIN

November 2018 – August 2019

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects.
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, fieldwork, and completion of survey documents (maps,plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develo a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity.
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

SURVEY MANAGER/GUZMAN AND MUÑOZ

September 2018 – November 2018

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with Design Engineers to determine pertinent survey information required for proposed projects.
- Prepare survey scopes and cost estimates
- Direc and assist survey staff with research, field work and completion of survey documents (Maps,Plats, Legal Descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the Survey Department to maintain Client relations and Staff productivity.
- Oversee quality assurance and control of Survey documents.
- Prepare and submit budgets for Survey Department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the Resumes and conduct interviews.

SURVEY MANAGER/GONZALEZ DE LA GARZA

July 2013 – March 2018

- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals

- Meet with design engineers to determine pertinent survey information required for proposed projects.
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity.
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews.

PARTNER/REO ENGINEERING AND SURVEYING
April 2000 – August 2002
- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Meet with Design Engineers to determine pertinent survey information required for proposed projects.
- Direct and assist survey staff with research, field work, and completion of survey documents (Maps, Plats, Legal Descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Handle communication in and out of the Survey Department to maintain Client relations and Staff productivity.
- Oversee quality assurance and control of Survey documents.
- Prepare and submit budgets for Survey Department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques.
-Evaluate new hires by Resumes and conducts interviews.

SURVEY MANAGER/CARTER AND BURGESS
BROWNSVILLE
SEPTEMBER 1997 – APRIL 2000
- Responsible for mid to long range planning, prioritization, and coordination of survey business within the survey department.
- Multi-task and work on multiple projects simultaneously
- Good managerial and communication skills
- Creating relationships with clients and managing projects to meet schedule and budget goals
- Meet with design engineers to determine pertinent survey information required for proposed projects.
- Prepare survey scopes and cost estimates
- Direct and assist survey staff with research, field work, and completion of survey documents (maps, plats, legal descriptions, etc.)
- Provide survey expertise to special surveying problems.
- Working with field crews and technicians to develop a high-performing team
- Handle communication in and out of the survey department to maintain client relations and staff productivity.
- Oversee quality assurance and control of survey documents.
- Prepare and submit budgets for survey department
- Monitor new technology, evaluate, and authorize purchase of new equipment and supplies.
- Evaluate and verify employee's performance through the review of completed work assignments and work techniques.
- Train office and field staff on surveying techniques to ensure growth opportunities.
- Evaluate new hires by the resumes and conduct interviews

TxDOT Pre-Certifications:
Sequence No. 6344 Pre-certified in
- 15.1.1 Survey
-1 5.1.2 Parcel Plats
- 15.1.3 Legal Descriptions
- 15.1.4 Right of Way Maps
- 15.2.1 Design and Construction Survey

TxDOT Districts:
- Pharr District – US 281 from FM 506 to FM 509 (Design Survey)
- Laredo District – US 83 – from San Ygnacio, Texas to the Zapata/Webb County line (Design Survey)
- Beaumont District – FM 3180 from IH-10 to m 565 (Design

Survey), IH-10 3⁄4 mile on each side of FM 3180 (Design Survey)
- Yoakum District – FM 80and FM 121 Rural (Design Survey) for culvert extensions
- Waco District – SH 190 6.7 miles (Design Survey) for widening inter lanes and ramp reversals
- San Antonio District – Intersection of SH 16 and Loop 1604 (Design Survey)

SAN ANTONIO WATER SYSTEM

Central Basin – Locating Sanitary Sewer Manholes with GPS and measuring depths, Design Survey for 30 % Design

Vista Ridge – Creating Metes and Bounds for Easements for construction of distribution water line

East Sewer Shed – Creating Metes and Bounds for Construction Easement along existing Sanitary Sewer line

CITY OF SAN ANTONIO

Alley Rehabilitation Design Survey throughout the City Boundary and Improvement Survey on;
Huantes Property on Guadalupe Street,
Las Palmas Property on Commerce Street,
St Marys Property on Culebra Street
Sidewalk Construction Project (Design Survey) on;
Martin Luther King Drive Indiana Street
Aransas Avenue
Porter Street
Delmar Street
New Braunsfels Avenue

Drainage Projects

Role: Design Technician
- -HWY 107 Drainage Improvements
- -Mercedes Lateral Widening
- -Mile 3 Outfall to Bell RDF
- -Trenton Drain Phase III

RESTITUTO A. ASCANO III, R.P.L.S.

Title
R.P.L.S.

Years of Experience
15 years

Areas of Expertise
- Design of survey plats.
- Survey analization.

Education

Mapua Institute of Technology

Bachelor of Science: Civil Engineering

Manila, Philippines

TEAM MEMBERS QUALIFICATIONS AND EXPERIENCE

Summary

Dedicated and focused Project Management Specialist with over 15 years of experience excelling at prioritizing, completing multiple tasks simultaneously and following through to achieve project goals. Flexible, detail-oriented and adaptive team player with expertise in equipment operation, staff training and development, customer service and process improvements.

Skills

- •Technical Presentations
- •Project Development
- •Work Planning and Prioritization
- •Work Flow Planning
- •Team Leadership
- •Project Management

Experience

August 2023 - Present
S2 ENGINEERING PLLC / RPLS **Mission TX**

-Analyze survey points
-Reseatch chain of title
-Check existing easements
-Prepare and revise survey plats
-Write and revise metes and bounds

Jan 2012 - Dec 2014
J A Garza Associates / Project Manager **McAllen, TX**

-Project Manager
-Analyze Survey Points
-Research Chain of Title
-Check existing Easements if any
-Prepare Survey Plat
-Write Metes and Bounds

Mar 2010 - Dec 2011

LMS Resources / ERC GIS Tech **McAllen, TX**

-Convert previous AutoCAD files to ARC GIS
-Built Gas Pipeline Database of Various Clients using all existing maps, data and
surveys.
-Conversion of different drawing files to ARC GIS building database for Client's use.

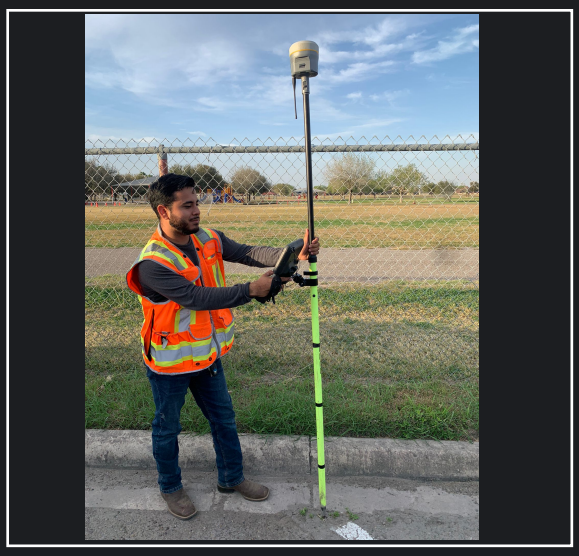
LUIS ROBERTO MARTÍNEZ IBARRA

Title
Graduate Engineer

Years of Experience
2 years

Education
The University of Texas Rio Grande Valley, Edinburg, TX Bachelor of Science in Civil Engineering – GPA: 3.42 Colegio Mexicano Reynosa, Reynosa, TAMPS, MX High School Diploma - GPA 4.0

Areas of Expertise
• Design of subdivision plats.
• Drainage and utility layout design for subdivisions.
• Design and draft drainage improvement projects for the Hidalgo County Drainage District No. 1
• Traffic control plans design.
• Drainage reports for subdivisions.



Summary
Mr. Martinez has 2 years of experience. Mr. Martinez's areas of experience are listed below:

Project Experience
• Conducting professional project presentations for different cities in the Hidalgo County.
• Coordinating and meeting with cities and/or utility companies for subdivision processes.

Academic/Personal Projects
Senior Design – Edinburg Arts and Cultural Center; Edinburg, TX August 2021 – May 2022
• As the Project Manager of a team of 5, we created and designed a proposed city capital improvement project for the school board.
• Conducted and organized over 10 meetings with Engineers and Professors to properly address technical calculations and designs.
• Completed a formal set of plans, request for qualifications, site assessment, environmental/geotechnical studies, drainage assessment/report, 3D Rendering, cost estimates, standard details and project schedules.

Organizations
ASCE – American Society of Civil Engineers
Member January 2019 – Present
• Member of the international Concrete Canoe Competition contributing with the canoe design and concrete mix.

Skills
Public speaking, teamwork, adaptability, problem solving, leadership, listening. Language proficiency: Spanish, English, French (Basic). Software proficiency: AutoCAD, Civil 3D, MicroStation, Microsoft Office. 55+ WPM.

MICHAEL ALEXANDER PALOMO

Title
Survey Party Chief

Years of Experience
4 years

Areas of Expertise

- Survey field work
- Topographic collector
- Heavy Equipment Operator
- Data Collector Software

Summary

Mr. Palomo has 4 years of experience. Mr. Palomo's areas of experience are listed below:

Experience

• Hidalgo County Drainage District, Engineering Department - Survey crew member. Conducting topographic information for engineering projects:

• S2 Engineering PLLC - Survey Party Chief. In charge of the survey management of the engineering company. Getting field data essential for engineering design.

Projects

• Hidalgo County Drainage District

-Mission Lateral Drain Bond Project, Hidalgo County
-North Main Drain Widening Project, Hidalgo County
-South Lateral Drain Bond Project, Hidalgo County

• S2 Engineering PLLC

-Sunshine Estates No. 2 Subdivision, Hidalgo County
-TARS No. 1 Subdivision Hidalgo County
-T&O Ranch No. 4 and No. 5 Subdivisions Hidalgo County
-Los Amigos Phase 3 Subdivision
-Collecting field information and managing surveying data for property survey projects.

Skills

Trimble R12i, Trimble R8, Trimble R10, Conventional Level, Trimble Total Station Management, Digital Level, Project Management, Team Management.

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____

COMPANY PROVIDING PROPOSAL GENERAL QUESTIONNAIRE

1 Name/Name of Agency/Company: S2 Engineering PLLC
(Full, correct legal name)

- Address: 2020 E Griffin Pkwy, Mission, Texas, 78574
- Telephone/Fax: 956-403-9787
- Email address: s2engineering.ns@gmail.com

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?

3.

Yes____ No_x__

3. Is your Company authorized and/or licensed to do business in Texas?
Yes_x__ No____

4. Where is the Company's corporate headquarters located? Mission, Texas

5. a. Does the Company have an office located in Edinburg, Texas?

4.

Yes____ No_x__

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office?

_____ (years) _____ (months)

c. State the number of full-time employees at the Edinburg office. _____

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity?
Yes____ No_x__

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. _____

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Jose N. Saldivar, P.E.
Address: 2020 E Griffin Pkwy, Mission, Texas 78574
Telephone: 956-403-9787
Fax: _____
Email: s2engineering.ns@gmail.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (x).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture._____
_____
_____

9. Bankruptcy Information

Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (x)
If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets. _____
_____
_____
_____

10. Provide any other names under which your business has operated within the last 10 years.
N/A
_____
_____

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES (NO)

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES (NO)

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Jose N. Saldivar, the undersigned representative of S2 Engineering PLLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, Jose N. Saldivar, the undersigned representative of S2 Engineering PLLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY
Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

S2 Engineering PLLC

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

RE: Request for Qualifications #2024-9 Engineering Services Rotation

Greetings Mr. Hinojosa,

SAMES, Inc. ("SAMES") is extremely pleased and interested in presenting our Qualifications for professional Engineering Services to the City of Edinburg ("City"). We have reviewed the Request for Qualifications and strongly believe that our extensive experience in quality engineering along with our team mentality and commitment to the City of Edinburg will deliver the best solution for the City's projects.

SAMES' professionals have considerable experience working with municipalities to plan, analyze, evaluate, design, and provide strategic support for infrastructure improvements. We offer in-house support services such as surveying, drafting, environmental compliance, and construction management and inspections, which may be called upon to complete the project. SAMES is fully committed to providing full coverage for the City of Edinburg's projects and will ensure the projects are designed and constructed in accordance with the latest local, state and federal standards. Due to our definitive experience with municipal engineering and our history of successfully completing similar projects within the South Texas region, and specifically for the City of Edinburg, we are confident in our ability to perform this work in a professional, timely and cost-effective manner.

I, Saul D. Maldonado, will be the primary point of contact for all correspondence and communications pertaining to this RFQ. My contact information is as follows:

Saul D. Maldonado, PE – Principal / President
200 S. 10th Street, Suite 1500, McAllen, TX 78501
O: (956) 702-8880 F: (956) 702-8883 M: (956) 451-5826
saul@samengineering-surveying.com

As one of the two firm principals, I have the authority to submit this Statement of Qualifications and contractually bind the firm. To date we have not received any addendums to this RFQ. Thank you for your time and consideration of our qualifications.

Respectfully Submitted,

Saul D. Maldonado, PE
Principal / President

FIRM QUALIFICATIONS AND EXPERIENCE

SAMES is a minority owned company established in 2008 by Samuel and Saul D. Maldonado, two brothers with a vision to develop a legacy of leadership succession serving communities worldwide. Originally established as a professional engineering and surveying firm, SAMES expanded in 2010 and started providing general construction and construction management services. In 2013 SAMES expanded once more and added federal government contracting as another strategy for business growth. Today, SAMES proudly serves local, municipal, state, federal, and private/commercial clients from any one of our four (4) office locations: McAllen, TX; Harlingen, TX; Santa Fe, NM; Los Alamos, NM. SAMES is headquartered in McAllen, Texas.

Principal Owners:	**Office Locations:**	**General Information:**
Saul D. Maldonado Principal & President Mobile: (956) 451-5826 saul@samengineering-surveying.com Samuel D. Maldonado, PE, RPLS Principal & CEO Mobile: (956) 207-7130 sam@samengineering-surveying.com Firm Established: 2008	* The Chase Tower 200 S 10th St, Suite 1500 McAllen, TX 78501 222 E. Van Buren Ave, Suite 306 Harlingen, TX 78550 1596 Pacheco St, Suite 203 Santa Fe, NM 87505 1247 Central Ave, Suite 220 Los Alamos, NM 87544 * Location serving City of Edinburg	• Type of Organization: S-Corp. • Engineering Firm No.: F-10602 • Surveying Firm No.: 10141600 • Texas HUB No. 59680 • TxDOT DBE No. VN 23559 • Federal HUBZone No. 54823 • Small Disadvantaged Business • UEI No. DP31KANLHAT1 • Cage Code: 66n60 • TIN: 26-2941288

SAMES is registered and in good standing with the Texas Board of Professional Engineers and Land Surveyors. We are a certified Disadvantaged Business Enterprise **(DBE)**, a State of Texas Historically Underutilized Business **(HUB)**, and a Small Disadvantaged **HUBZone** firm certified through the U.S. Small Business Administration. SAMES is also administratively qualified and pre-certified with the Texas Department of Transportation (TxDOT) to provide civil engineering, surveying and related services for state and federally funded projects.

Uniqueness to Best Perform

SAMES specializes in a complete range of services in multiple professional disciplines, including Project/Program Management; Civil Engineering, Land Development, and Surveying; Construction Administration and Construction Engineering Inspection. We have a fully staffed and operational Survey and CADD department which allows us to research, collect, analyze and transfer technical data quickly and efficiently. SAMES' ability to provide project turnkey services on projects involving multiple scopes will provide the best value to the City of Edinburg. Rather than working with multiple firms to successfully complete a project encompassing various scopes, the City can rely on the knowledge and responsiveness of one (1) firm that will ensure compliance with all design standards and applicable rules and regulations. Regardless of scope or size, SAMES can successfully manage any project from inception to completion.

Professional Services

SAMES provides client-focused quality Engineering, Surveying and Construction services. We offer design services that encompass CORE civil engineering disciplines: **Water Distribution Systems, Wastewater Collection Systems, Storm Sewer Collection Systems,** and **Roadway Design.** To better serve our clients, we have gradually expanded our services to include **Development and Planning**, **GIS and Mapping Services, Land Surveying**, **General Construction Services**, and **Construction Engineering Inspections**.

SAMES provides the following services in-house:

- **Design Services**
  - Civil Engineering
  - Construction Engineering Inspections
  - GIS and Mapping
  - Project Management
- **Development and Planning**
  - Subdivision Platting
  - Feasibility Studies
- **Land Surveying**
  - Topographic & Boundary
  - ROW & Utility Mapping
  - Aerial Mapping & LiDAR
  - Construction Staking
- **Construction Services**
  - General Contractor
  - Heavy Civil & Highway
  - Commercial & Institutional

Fundamental Engineering Service Areas

- *Planning, Research & Development*
- *Feasibility Studies & Engineering Reports*
- *Roadway Design*
- *Storm Water Collection Systems / Drainage Design*
- *Hydrology Analysis and Hydraulics Design*
- *Erosion and Sediment Control Designs*
- *Water and Wastewater Infrastructure Design*
- *ROW Mapping & Easement Acquisitions*
- *Plans, Specifications & Cost Estimates*
- *Procuring Federal/State/Local Grants/Permits*
- *Bid Procurement & Construction Administration*

Experience with Local, State and Federal Agencies

Many of the projects SAMES has successfully completed have touched every level of government. Local, state and federally funded projects have presented our professionals with valuable insight and the requisite knowledge of multiple agency's rules, statutes, regulations, policies and procedures. Some of these contracts have included capital infrastructure improvements funded by multiple agencies such as the Texas Water Development Board (TWDB), North American Development Bank and the Environmental Protection Agency.

SAMES has also completed numerous engineering and construction projects funded or administered by agencies such as the Texas General Land Office (GLO), Texas Department of Transportation (TxDOT), United States Department of Agriculture (USDA), Economic Development Agency (EDA), and programs such as the Community Development Block Grant (CDBG) program and the US Urban County Program. Working with these agencies and within these programs has provided SAMES' professionals with experience in strict document control, permitting and funding requirements, and the preparation and submission of funding/grant applications, monthly status reports, weekly certified payroll reports and other documents and tables required by such programs to ensure funding and regulatory compliance.

Municipal Public Works Experience

As a direct result of our firm's qualifications, team experience, and the responsiveness of our professional staff, SAMES has completed numerous government-funded projects for Municipal and Local government entities. In the past two (2) years alone, SAMES has successfully completed over 25 engineering projects for municipalities in the Rio Grande Valley. The projects noted below are just a few of the major Municipal and Government funded projects we have completed since our inception in 2008.

- ***City of Edinburg*** *– Surveying, Drainage Design and Construction Administration for 2018 Bond Project Schunior Regional Detention Pond; Schunior Phase III Mon Mack Project;*
- ***City of McAllen BOND Drainage Utility Fee Projects*** *– Surveying, Assessment and Design of Drainage Improvements.*
- ***City of McAllen*** *TxDOT Expansion - Ware Road Utility Relocation Project; Trade Zone Stormwater Pump Station;*
- ***City of San Juan*** *– 2019/2020/2021/2022 CDBG Street Improvements – Surveying and Design of Roadway Improvements; Fire Station Sanitary Sewer Improvements; San Juan Park and Recreation Center; City Hall Gateway Utility Relocation;*
- ***City of Donna Planning & Zoning Division*** *Engineering Services for Hidalgo County Metropolitan Planning Organization – Transportation Alternatives Program Sidewalk and ADA Ramps;*
- ***City of Pharr*** *– TxGLO Downtown Drainage Improvements*
- ***City of Palmview*** *– Surveying and Engineering Services for Showers Road Municipal Park; Ramirez Drainage Project; Riverside Estate Drainage Improvements;*
- ***City of Rio Grande City*** *– Public Safety Subdivision Off-Site Improvements; Public Safety Water and Sewer Improvements; CDBG Street Improvements;*
- ***City of Roma*** *– Las Americas Roma Logistics and Industrial Park; CDBG Street Improvements;*
- ***City of Escobares*** *– CDBG Projects for Water, Lighting, Street/Roadway Improvements; Surveying and Engineering design for Municipal Park Project;*
- ***City of Brownsville*** *– Repairs and Renovations to Dean Porter Park and Brownsville Event Center;*
- ***City of Harlingen*** *– Drainage Improvements for Storm Sewer Systems 204 and 252;*
- ***Hidalgo County Urban County Program (UCP)*** *Professional Engineering Services for 2015 CDBG – Disaster Alamo and Edinburg Area Stormwater Relief Project*
- ***Hidalgo County Housing Authority -*** *Hacienda De San Miguel, Professional Engineering Services*
- ***Hidalgo County*** *Engineering design and Construction management services for Hidalgo County Border Colonia Access Program 3rd Call*
- ***Hidalgo County Drainage District No. 1 BOND Projects*** *– Design of Drainage Improvements*
- ***Hidalgo County Pct. 1 -*** *Construction Engineering Inspections for Mile 6 W Road Project*

Staffing

SAMES has a total of 86 employees which includes licensed professional staff, state registered/certified technicians and highly trained support and administrative/management personnel. SAMES professional staff includes:

- Six (6) State of Texas Licensed Engineers
- Two (2) State of Texas Registered Professional Land Surveyors
- One (1) Certified Project Management Professional
- Two (2) Certified Floodplain Managers

- Seven (7) State Registered Engineers in Training
- Eight (8) Graduate / Field Engineers

SAMES' staffing plan will designate assignments according to project scope of work taking into consideration specific discipline and expertise – as each project team member brings complementary strengths to the team and has unique experience that will be called upon as projects arise and scopes are identified. Additionally, all members of our professional team have cross-discipline capabilities which will allow personnel to perform dual roles if the need arises – such as during sickness, personal leave or during periods of increased workloads.

SAMES' management system will allow for adequate flexibility to compensate for unanticipated workloads within the firm - thereby providing a balanced staffing plan that will never jeopardize the responsiveness of our team. Moreover, our staffing plan will allow the firm to manage multiple concurrent projects without compromising the quality and the attention to detail that encompasses our commitment to our clients.

Commitment

SAMES is committed to providing professional services that are focused on efficiency and production, meeting contractual obligations and commitments, quality designs, and environmental awareness that promotes public welfare. The SAMES team adheres to a strong Code of Ethics and is committed to the highest standards in protecting the interests of the public and our clients while evaluating prospective projects, establishing key business relationships, and supporting our clients in the achievement of their infrastructure goals.

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

SAMES professionals have a "team" mentality and work together to accomplish a common goal – Excellence Thru Teamwork. The City of Edinburg will be facilitated by a solid team of professionals and experts in a variety of fields needed to fulfill the scope requirements for any civil engineering project. The combined human and technical resources of the SAMES project team will offer the City of Edinburg professional engineering services that are tailored to the unique needs and conditions of each project. Most of our professional team have collaborated on multiple projects involving various scopes thus demonstrating the proven capability to work together effectively and perform seamlessly on a wide array of projects. SAMES plans to self-perform all aspects of the proposed project's scope of work. However, should the project call for a service we do not provide in-house, SAMES has developed key business relationships with experienced and respected professionals that can be called upon to provide support if/when needed.

SAMES is led by our two (2) highly qualified firm principals, Samuel D. Maldonado, PE, RPLS and Saul D. Maldonado, PE. Samuel D. Maldonado has over 25 years of experience in Civil Engineering and Construction Management of infrastructure and capital improvement projects and over 16 years of experience in Professional Land Surveying. Saul D. Maldonado has over 20 years of experience in managing the design and construction of multi-disciplined projects and has extensive experience in Project Management of large-scale developments. Together, they offer over 40 years of professional civil engineering and project management experience and will lead the professional team facilitating the City of Edinburg's projects.

The following is a table of the key personnel who may be involved in this contract followed by resumes highlighting relevant professional experience. The resumes are followed by an organizational chart which includes multiple personnel under certain roles to substantiate SAMES' staffing plan.

Table of Key Personnel

Name	Role	Credentials	Education
Saul D. Maldonado, PE	Principal-in-Charge	• TX Licensed Engineer #100320	• B.S., Civil Engineering (2003)
Samuel D. Maldonado, PE, RPLS	Principal & RPLS	• TX Licensed Engineer #91889 • AZ Licensed Engineer #71257 • TX Professional Surveyor #6027	• M.B.A. (2017) • B.S., Civil Engineering (1997)
Jessica M. Maldonado, PE, PMP, CFM, SIT	Vice President of Professional Services	• TX Licensed Engineer #111579 • Project Management Professional, TX #2077158 • Certified Floodplain Manager, TX #3995-21N • Certified Surveyor-In-Training, TX 110912	• M.B.A. (2018) • B.S., Civil Engineering (2005)
Mario A. Garcia, PE	Director of Engineering	• TX Licensed Engineer #137503	• B.S., Civil Engineering (2015)
Christopher Hinojosa, PE	Project Manager	• TX Licensed Engineer #152426	• B.S., Civil Engineering (2019) • A.S. Mathematics (2016)
Phillip Harris, EIT	Project Manager	• TX Engineer-In-Training #71223 • Certified Floodplain Manager, TX #4183-22N	• B.S., Civil Engineering (2015)
Isael Posadas Jr., EIT	Project Engineer	• TX Engineer-In-Training #80390	• B.S., Civil Engineering (2020)
Luis Mendez	Project Engineer	• Multiple TSPS Trainings	• B.S., Civil Engineering (2023) • A.A.S. Engineering & Technology (2018)
Luis Hernandez, EIT	Project Engineer	• TX Engineer-In-Training #75429	• M.S., Civil Engineering (2021) • B.S., Civil Engineering (2019)
Justin M. Serna, EIT	Project Engineer	• TX Engineer-In-Training #72300	• B.S., Civil Engineering (2020)
Rusbel Pena, EIT	Project Engineer & Project Surveyor	• Remote Pilot Small Unmanned Aircraft System #4539028	• B.S., Civil Engineering (2017) • A.A.S. Engineering & Technology (2014)
Esequiel Garcia, SIT	Survey Manager	• TX Surveyor-In-Training #110318	• B.S. Psychology (2013) • A.A.S. Drafting & Design (1998)

Resumes

Saul D. Maldonado, PE, Principal-in-Charge is a Licensed Professional Engineer and experienced Construction Manager with over 20 years of experience. Mr. Maldonado has managed the design and construction of Sanitary Sewer Collection Systems, Road Improvements, Water Distribution Systems, Subdivision Development, as well as Storm Runoff Collection Systems. Mr. Maldonado offers a unique understanding and knowledge of general engineering inspection strategies and provisions related to assessment, information gathering, and alternative analysis and infrastructure development projects. He is highly proficient in the permitting requirements for TxDOT, TCEQ, Texas Department of Licensing and Regulations and U.S. Army Corps of Engineers. Saul Maldonado's management experience includes working for the City of McAllen as their Capital Improvements Project Engineer and Manager, and Subdivision Coordinator. He served as District Engineer to Agua Special Utility District for seven (7) years and City Engineer for the City of Palmview six (6) years. As City and District Engineer, he designed and oversaw water and wastewater projects, budget preparations, cost estimating, bid procurement, and construction management. His experience includes design and management of federal, state, county, city, and school district projects.

Representative Projects:

Agua SUD - U.S. Highway 83 Relief Route Waterline Adjustment – Hidalgo County, Texas

- Provided design management for the adjustment of 11,000 LF 8" – 16" PVC waterline.
- Coordinated with multiple entities, including TxDOT, Hidalgo County Drainage District #1, and private firms to ensure design accuracy and minimize conflicts.

2013 Street Improvements: La Homa Road Realignment and Bridge Project – Palmview, Texas

- Provided design and construction management for the construction of a new bridge structure spanning the width of an Irrigation Canal and then realigning the road to the existing intersection at Business Hwy. 83.
- Coordinated with TxDOT for approval of design and with local utility owners for conflict avoidance and/or resolution and obtained all required permits (TxDOT, Hidalgo County Irrigation District #1)
- Performed roadway design for the realignment of the road, structural design for the new bridge structure and hydraulic calculations and design for a new storm sewer system that required both a gravity collection system and pumping system to move the water over the irrigation canal and into the ultimate outfall at Business Hwy. 83.

Starr County BCAP Rnd III Street Improvements – Athens Road – Roma, Texas

- Provided design quality assurance/quality control and construction management oversight for 1.1 miles of new roadway construction with connection and protection of existing adjacent storm water drainage systems.
- Performed oversight and administrative design and review of the proposed SW3P and verified compliance with District Standard Operating Procedures and TCEQ requirements for Best Management Practices (BMPs).
- Performed initial review and completion / management of the EPIC sheets.

City of McAllen Trenton Road Expansion Project – McAllen, Texas

- Provided design and construction management for the 1.25-mile extension of the 5-lane roadway, including the extension and relocation of waterlines, sanitary sewer lines, and drainage systems.

Samuel D. Maldonado, PE, RPLS, Principal and Project Surveyor is a Licensed Professional Engineer, a Registered Professional Land Surveyor, and experienced Construction Manager with over 25 years of experience. Mr. Maldonado's experience includes project management and professional administrative service with respect to scheduling, cost analysis, budget management, and overall contract support on all projects. He manages the design and construction of Capital Improvements Infrastructure Projects, Municipal Sanitary Sewer Collection Systems, Water Distribution Systems, Road Improvements, Drainage Systems, and vertical construction projects such as office buildings and facilities. As a Registered Professional Land Surveyor, Mr. Maldonado spearheads all our surveying projects and has developed relationships with entities such as AT&T, American Electric Power (AEP) and Time Warner Cable Communications (TWC) for general coordination while continuously providing surveying and engineering services. Mr. Maldonado's experience includes design and management of federal, state, county, city, and school district projects.

Representative Projects:

2018 Bond Project Schunior Regional Detention Pond – Edinburg, Texas

- Provided project management services for the design of a new lateral detention system (appx. 900 acres).
- Oversaw the preparation of a detailed study and the hydrologic and hydraulics engineering design including modeling of system utilities which included conveyance design of 10 and 25-year options, detention volumes included 25 and 50-year options.

New Hidalgo County Courthouse – Edinburg, Texas

- Provided surveying specific to construction staking of utilities, drainage and site infrastructure.
- Provided project benchmarks and performed construction staking of building corners, building piers, water and sewer lines, storm drain lines and other utility improvements.
- Surveying services were provided in multiple phases to allow for minimal disturbance to ongoing construction work.

Schematic Right-of-Way Acquisition Strip Map of Davis Road (I69C to East City limits) and Schunior road (Jackson to West City limits) – Edinburg, Texas

- Provided surveying services to develop a schematic Right-of-Way acquisition strip map of Schunior Road, a 2.73-mile length of road, and Davis Road, a 1.75-mile length of road.
- Performed research and data collection using Hidalgo County City maps and Appraisal District property information.
- Performed aerial surveying to capture and include all structures while conventional field surveying established minor control for the project.

Hidalgo County Regional Mobility Authority Surveying Services – Hidalgo County, Texas

- Provided boundary surveying services for multiple parcel plats located throughout the County, including abstracting and plotting, setting of control monuments and establishment of benchmarks, prepared parcel plats with metes and bounds description.
- Topographic survey and right-of-way map for FM 493 in Donna, Texas which included appx. 105 parcel plats with metes and bounds description.

Taylor Road Widening – Mission, Texas

- Provided surveying services and developed topographic map of existing ground features to include all structures and current right-of-way information.

- Established construction benchmarks throughout the project according to TxDOT specifications.
- Performed research and delineation of current ROW and developed ROW strip map.
- Coordinated with utility providers and property owners to confirm all existing utilities and easements within the project limits.
- Performed document control and project scheduling as required by client.

Jessica M. Maldonado, PE, PMP, CFM, SIT, Vice President of Professional Services is a Licensed Professional Engineer, Certified Project Management Professional, Certified Floodplain Manager and Surveyor in Training with over 17 years of experience in municipal civil engineering, public works construction and project management of multi-disciplined projects. She provides engineering design and management throughout project phases and has provided engineering services encompassing civil design, site surveying, and construction phase improvements to various projects in Hidalgo County. Much of Mrs. Maldonado's career has been associated with the design, contract administration and construction management of disaster recovery roadways and storm sewer improvement projects. She is proficient in the preparation of documents required for government funded projects and has ensured funding compliance for over 16 projects funded by the State's General Land Office She prepared and/or oversaw the completion and submission of all required submittals and progress reports to the Texas General Land Office (GLO) and ensured compliance with the GLO's standards and requirements. Mrs. Maldonado has also provided project management and contract administration services for FEMA funded roadway improvements and housing inspections required by FEMA in the wake of Hurricane Harvey. Mrs. Maldonado serves as Vice President for the Department of Professional Services and manages a staff of approximately 50 professionals, technicians, and administrative support staff.

Representative Projects:

Ware Road Utility Relocation Project, TxDOT Roadway Expansion – McAllen, Texas

- Oversaw the design and provided project management of the PS&E utility relocation package which included the waterline and sanitary sewer line improvements.
- Assisted McAllen Public Utility (MPU) with compensable utility support documentation required for the Advance Funding Agreement and Standard Utility Agreement.
- Provided project estimates and review submittals for TxDOT and MPU to review and approve.
- Oversaw the preparation of construction approved plans and specifications in accordance with TxDOT standards and MPU requirements.
- Performed TxDOT utility coordination to avoid conflicts during construction and provided responses to all contractor requests for information.
- Prepared final as-built drawings and submitted them to MPU and TxDOT.

Hidalgo County BCAP Fresno Street Roadway & Drainage Improvements – San Juan, Texas

- Provided engineering design, contract administration and construction management for this road and drainage improvement project funded by TxDOT's Border Colonia Access Program.
- Prepared all required forms and reports and ensured compliance with TxDOT program regulations.
- Oversaw the survey and CAD departments, providing direction and management when needed.
- Primary point of contact for Hidalgo County.

Sam Houston Boulevard Widening – Pharr, Texas

- Provided design management for the roadway and drainage improvements, as well as the adjustment of waterline and sanitary sewer lines.
- Completed the environmental study for TxDOT funding regulations.
- Provided utility coordination and construction oversight for the relocation of existing utilities located along the proposed route for expansion.

TxGLO 2015 Floods Grant Stormwater Relief Project Ph. II – Alamo & Edinburg, Texas

- Provided contract administration and construction management services for the design and installation of a new storm sewer system that included drainage swales, roadside ditches, inlets, and pipe networks ultimately flowing into an existing drainage ditch owned by Hidalgo County Drainage District #1.
- Prepared and submitted grant application and obtained all required permits.
- Coordinated with the GLO and County to ensure funding and schedule compliance during design and construction.

Mario A. Garcia, PE, Director of Engineering is a Licensed Professional Engineer with 8 years of experience working in the civil engineering field. He has extensive experience in conducting feasibility studies and managing projects for multi-family and commercial developments for private and public clients. Mr. Garcia has also managed the preparation of construction documents and construction administration for land and site development projects specifically focusing on platting, paving, drainage, and sanitary and water improvements. Additionally, he has demonstrated experience in the design and project management of street improvements and restoration projects. Mr. Garcia manages civil engineering projects from proposal submittal to construction-closeout. He leads proposed design and works with the client to ensure their project is designed and constructed as requested. Mr. Garcia prioritizes his team's workload and schedules work activities as needed to ensure budget and project milestones are met. He directs team production and provides quality assurance/quality control measures through interim and final review of project plans, specifications, and estimates.

Representative Projects:

2021/2022 La Joya CDBG Street Improvements – San Juan, TX

- Managed the production of 2,000 linear feet of required street improvements from Schematic Design through Construction Documents.
- Managed the development of Bidding and Contract documents for contract award to selected Contractor.
- Verified Submittals, Requests for Information, Pay Applications from Contractor for final recommendation.
- Conducted site visits, inspections of existing conditions, and documentation of any defects that may be improved with CDBG funds.

2021/2022 San Juan CDBG Street Improvements – San Juan, TX

- Managed the production of seven (7) streets requiring street improvements from Schematic Design through Construction Documents.
- Managed the development of Bidding and Contract documents for contract award to selected Contractor.

- Verified Submittals, Requests for Information, Pay Applications from Contractor for final recommendation.
- Conducted site visits, inspections of existing conditions, and documentation of any defects that may be improved with CDBG funds.

City of Escobares CDBG Street Improvements Project – Escobares, TX

- Manage the production of three (3) streets requiring street improvements from Schematic Design through Construction Documents.
- Managed the development of Bidding and Contract documents for contract award to selected Contractor.

Hidalgo County Drainage District No. 1 - FM 493 & County Rd (Project 12 Phase II)

- Manage and coordinated the approval of final design for the upgrade of an existing storm drain system and installation of a new story drain system for the neighborhoods located between South River Road and surrounding the Chaparral Drain in Donna, TX.
- Managed the development of Bidding and Contract documents for contract award to selected Contractor.
- Oversaw construction administration services including construction site visits and administration of contract documents for payment applications, requests for information and material submittals.

Christopher Hinojosa, PE, Project Manager is a Licensed Professional Engineer with extensive experience in construction inspection, construction management, and civil engineering design. Mr. Hinojosa has taken the lead in the advancement of various street improvement projects funded through CDBG funding. Additionally, Mr. Hinojosa has designed, reviewed, and managed land development projects including platting, construction plans, and permits for single family, multifamily, and commercial developments. His most recent experience includes drainage improvement projects funded through GLO and CDBG. This mix of experience has allowed Mr. Hinojosa to become well versed in design standards, regulations, and procedures at the city, county, and state level for both public and private work.

Representative Projects:

Sullivan City Street Improvements Project (CDBG) – Sullivan City, Texas

- Managed design, review, and scheduling of deliverables of construction plans, engineer's estimate, and specifications needed by Hidalgo County Urban County for 1,800 LF of asphalt overlay including milling, concrete aprons, and pothole base repairs.
- Coordinated public bidding matters including the pre-bid meeting, bid opening, pre-construction meeting, and addendums.
- Reviewed and assessed contractor bids to ensure construction plans and specifications were followed and priced accurately for submitted bids.
- Performed final walkthrough of substantial completion and reviewed final punch list.

San Juan Street Improvements Project (CDBG) – San Juan, Texas

- Managed design, review, and scheduling of deliverables of construction plans, engineer's estimate, and specifications needed by Hidalgo County Urban County for three streets totaling in approximately 1,700 LF of asphalt mil and overlay including concrete aprons, pothole base repairs, and level ups.
- Developed schedule for project team to meet required deliverable deadlines from Hidalgo County Urban County and City of San Juan.

- Performed site visits of project area and coordinated with survey team to assure all necessary survey information is being shown accurately and as needed.
- Coordinated public bidding matters including pre-bid meeting, contractor deliverables of plans and specifications, and bid opening.

ACME Square Subdivision – Pharr, Texas

- Managed design and review of drainage, grading, water, sanitary sewer, pavement, striping, traffic signs, stormwater pollution prevention plan, and street lighting design items needed for the development of the 47-lot multifamily subdivision.
- Provided drainage report analysis of subdivision to Drainage District and city.
- Prepared and shared engineer's construction cost estimate for development of the subdivision.
- Coordinated with owner, city, county, and utility providing entities including North Alamo Water Supply for approval of design and subdivision requirements.
- Coordinated with AEP & MVEC for power pole relocation work orders needed as a result of proposed street widening.
- Prepared various permits such as Irrigation District Crossing Permits, Drainage District Discharge Permit, and TxDOT Utility Instillation Request.
- Assisted owner with preparation of bid tabs and contractor bid reviews to assure contractor bids followed plans and priced bid items accurately.

Phillip R. Harris, EIT, CFM, Project Manager is a certified Engineer-in-Training and Floodplain Manager with experience in Civil Engineering Design related to land and site development projects both private and public. He has a broad background of design experience with projects located throughout the State of Texas, extending nationally. This makes him proficient in the various stages of design regarding site access, grading, drainage, water, sanitary sewer, and dry utility improvements.

Representative Projects:

San Benito Street Rehabilitation Project – San Benito, Texas

- Designed a street rehabilitation project in accordance with the needs of San Benito, Texas.
- Consulted with city officials, analyzed geotechnical engineering reports, and developed a cost-effective solution to enhance the drainage and driving conditions for residential roads across the City of San Benito.

Edinburg Residential Drainage Improvements – Edinburg, Texas

- In cooperation with Edinburg, Texas, oversaw the construction of residential drainage improvements to ensure strict compliance with the Texas Department of Transportation Code, as well as implemented and designed change-orders to ensure the project's completion by its scheduled date.

Riddell Homestead North and South – 37.4 Acre 750-unit Garden Style Multifamily – Austin, Texas

- Lead coordination with the City of Austin regarding all aspects of the site development process.
- Responsible for the day-to-day client coordination.
- Managed the production of two separate sets of construction documents.

- Successfully participated in the City of Austin Regional Stormwater Management Participation Program. Reducing the required on-site detention storage to only the 2-Year storm event.
- Designed the water, sanitary, and drainage systems for the development, including the dedicated public right-of-way.

SAWS Blanco Road 24" Water Main – 15,200 LF of Public Waterline Design – San Antonio, Texas

- Assisted in the design and production of the construction documents for the proposed water main.

Luis A. Mendez, Project Engineer is a Project Engineer and senior CADD technician with over 6 years of experience in computer aided drafting design and civil engineering design. As Project Engineer, Mr. Mendez provides leadership and direction for the completion of project deliverables. Perform the responsibility, and professional engineering work in the design, and construction for a wide range of engineering projects. Coordinate projects within the engineering division, with City departments, public and private utility owners, and state regulatory agencies keeping parties informed and developing solutions to issues that arise. He oversees the training of new employees and provides quality assurance for all surveying and engineering projects he works on by ensuring they are completed on time and in accordance with applicable engineering standards and city or state specifications.

Representative Projects:

Roma Industrial Park Subdivision, Roma, Texas

- Coordinated the process of the plan development for a new industrial park (297-acre tract) development, located within the City of Roma.
- Managed the design of all utilities (water, sanitary sewer), storm sewer improvements, and roadway improvements.
- Coordinated with various agencies, TxDOT, USACE, and public works ensuring compliance with all applicable rules, regulations and requirements.

Space X SH Camber Adjustment Design, City of Brownsville, Cameron County, Texas

- Provided redesign for the adjustment of a roadway with superelevation curves including redesign of the subgrade base and pavement thickness to withstand heavy traffic flows.

Sunset Breeze at Laguna Vista Subdivision, Laguna Vista, Cameron County, Texas

- Coordinated the process of the plan development for a new 56-acre tract commercial development.
- Managed the design of all utilities (water, sanitary sewer), storm sewer improvements, and roadway improvements.

Glazers Beer and Beverage Site Civil – Weslaco, Hidalgo County, Texas

- Provided drafting design and production of engineering construction plans sheet set as per the Architectural plans provided from the client for a 20-acre tract of land to be used for a new warehouse distribution area.
- Provided design and modeling of the grading plan for the parking lot to design the utilities layout plan and profiles along with the proposed surface.

Isael Posadas Jr., EIT, Project Engineer is a certified Engineer-in-Training with experience in Civil Engineering Design and Construction Management as well as Field Inspections. With a combined 5 years of experience of engineering and drafting, he has dealt with multiple local government and

state entities to design and manage construction of subdivisions, site plans, and utility and roadway improvement projects. His recent experiences include design and management of a $2.3 Million detention pond and various street improvement projects where he was lead designer. He has also worked on a variety of drainage improvement projects such as expanding existing ditches and managing their construction. He has designed and managed various subdivisions ranging from new Plats to Replats and worked on designing local parks. Mr. Posadas has a vast project list that makes him familiar with a wide range of design standards and regulations in a variety of project scenarios.

Representative Projects:

The Highland Heights Subdivision – Edinburg, TX

- Managed design and review of drainage, grading, water, sanitary sewer, pavement, striping, traffic signs, stormwater pollution prevention plan, and street lighting design items needed for the development of the 124-lot single family subdivision.
- Provided drainage report analysis of subdivision to Drainage District and City of Edinburg.
- Prepared and shared engineer's construction cost estimate for development of the subdivision.
- Coordinated with owner, city, county, and utility providing entities for approval of design and subdivision requirements.

2022 San Juan Street Improvements – San Juan, TX

- Conducted site visits, inspections of existing conditions, and documentation of any defects that may be improved with CDBG grant money.
- Created preliminary cost analysis of project based on site visits.
- Designed the improvements and repairs of 7 asphalt roads.
- Created construction cost estimates and construction plan set.

2022 La Joya Street Improvements – San Juan, TX

- Conducted site visits, inspections of existing conditions, and documentation of any defects that may be improved with CDBG grant money.
- Created preliminary cost analysis of project based on site visits.
- Designed the improvement of about half of a mile.
- Created construction cost estimates and completed construction plan set.

Hidalgo County Irrigation District No. 1 Project 12 PH II – Hidalgo County, TX

- Designed utility improvements, asphalt improvements/repairs, drainage improvements, and miscellaneous items to improve admin office.
- Coordinated with contractor and vendors on behalf of owner, reviewed submittals and construction documents.
- Assisted in creation of bid documents and bid forms.
- Weekly site visits and reports of progress of construction and conflict resolution as they appeared.
- Conducted Bi-weekly meetings with owner and contractor

Justin M. Serna, EIT**, Project Engineer** is a certified Engineer-in-Training with experience in Civil and Structural Engineering Design as well as Structural and Windstorm Inspections. His engineering experience includes engineering design and platting services for several subdivision projects in Hidalgo County which served to increase his knowledge of the development process and the design of roadways, embankment, utilities, and drainage infrastructure. Mr. Serna's experience ranges from windstorm engineering and inspections for structures and forensic inspections to land

surveying and design of public utilities and drainage systems for subdivision developments. His most recent projects in land development include residential and industrial improvements which have allowed him to become well versed in design standards and regulations at state and municipal levels.

Representative Projects:

West Palm Subdivision – 15.5 Acre Subdivision– Edinburg, Texas

- Designed sanitary sewer collection and water distribution networks in accordance with TCEQ and City of Edinburg requirements to service 58 residential lots.
- Proposed street and lot grading and designed storm sewer network including detention pond and outfall to existing structures.
- Assisted in preparation of subdivision plat and drainage report for submittal to City of Edinburg and Hidalgo County Drainage District No. 1.
- Coordinated underground utility marking and topographic surveying for site.
- Led production of construction plans for approval by the City of Edinburg.

The Heights on Wisconsin Phase III Subdivision – 18 Acre Subdivision – Edinburg, Texas

- Assisted in design of public improvements and production of construction plans for approval by the City of Edinburg.
- Assisted in preparation of subdivision plat and drainage report for submittal to the North Alamo Water Supply Corporation and Hidalgo County Drainage District No. 1.
- Designed concrete foundation for proposed lift station improvements.

Mid-Valley International Industrial Park – 146 Acre Subdivision– Weslaco, Texas

- Assisted in preparation of subdivision plat and drainage report for submittal to the City of Weslaco and Hidalgo County Drainage District No. 1.
- Assisted in design of public improvements and production of construction plans for submittal to the City of Weslaco.

T.M.J.C. Phase 1 – Environmental Site Assessment – McAllen, Texas

- Performed on-site inspection of one-acre commercial site for potential environmental concerns.
- Produced Environmental Site Assessment based on site findings and research of the site

Luis B. Hernandez, EIT, **Project Engineer** is a certified Engineer-in-Training with experience in Civil Engineering Design and Land Development. His experience includes road assessment, drainage design, Utility design, utility coordination, Hydrology and Hydraulics modeling. His most recent projects in land development include residential and commercial improvements which have allowed him to become well versed in design standards and regulations at municipal and county levels.

Representative Projects:

County Wide Street Inventory Project – Hidalgo County, Texas

- Collected data effectively performing road assessments by capturing and geo-referencing data.
- Inspected road existing condition for approximately 250 miles of county roads.

Sunset Breeze at Laguna Subdivision – Laguna Vista, Texas

- Provided a watershed analysis for 28 surrounding subbasins using HEC-HMS.

- Modeled the hydraulics of approximately 5,000 LF of existing drainage ditch with proposed and existing conditions using HEC-RAS.
- Provided design of public improvements for water and sanitary sewer.
- Coordinated with Laguna Madre Water District to comply with their design standards and regulations for water and wastewater services.

Casa Paraiso Subdivision - McAllen, Texas

- Provided design of 144,000 CF drainage swale and 80 LF of storm RCP pipe.
- Coordinated with Hidalgo County Drainage District #1 to comply with their design standards and regulations.
- Provided design of 50 LF of waterline extension.
- Coordinated with Sharyland Water Supply Corporation to comply with their design standards and regulations.
- Provided quantity takeoff of the project.

Las Americas Roma Logistics and Industrial Park - Roma, Texas

- Provided a watershed analysis for 7 subbasins contributing to Ramirez Creek using HEC-HMS and QGIS.
- Modeled the hydraulics of approximately 12,600 LF of the Ramirez Creek and analyzed proposed impacts into the existing conditions using HEC-RAS.

Rusbel Peña, EIT, Project Engineer is a certified Engineer-in-Training with experience in civil engineering design, project management and professional land surveying. Mr. Peña works closely with the Project Manager to research, develop and design roadway, drainage, water, and sewer line projects for municipalities throughout the Rio Grande Valley. He assists in the completion of utility layouts, drainage layouts, and drainage reports. Additionally, he coordinates with the project owner, aids in the development of construction plans and specifications, and assists with the bid procurement and construction administration of a project. Mr. Peña also has experience in land surveying including aerial and topographic surveys completed for government clients as well as American Land and Title Association (ALTA) surveys completed for commercial clients.

Representative Projects:

City of Rio Grande City Street Improvements Project – Rio Grande City, TX

- Oversaw the preparation of a boundary base map with existing adjoiners, easements, and the current right of way.
- Provided guidance on importing and deciphering raw data from the surveying crew, and the creation of an existing surface.
- Proposed a new reconstruction of two existing roads with curb and gutter and valley gutters for drainage mitigation.
- Assisted in the preparation of Bid Documents.
- Provided a full set of AS-BUILTS Construction Plans with all proposed improvements.

2020 Donna Street Improvements – Donna, TX

- Provided boundary base map with existing adjoiners, easements, and the current right of way.
- Imported and deciphered the raw data from the surveying crew, created the existing surface.
- Provided a full set of Construction Plans showing existing conditions and the proposed improvements for Miller Avenue, South 26th Street, South Avenue, and Lissner Avenue.
- Assisted in the preparation of Bid Documents (Purchase of Materials only).

ECISD Brewster Elementary School - Edinburg, TX

- Provided a boundary base map with existing adjoiners, easements, and the current right of way.
- Imported and deciphered the raw data from the surveying crew.
- Coordinated with surveyors to provide existing conditions of the area.
- Provided a survey plat detailing all existing features of the school.

SPACE X – SH4 Chamber Adjustment Design - Cameron County, TX

- Provided a topographic map of approximately 3,800 LF of the existing roadway.
- Created the existing surface of the road.
- Coordinated with utilities that could have affected the road.

Esequiel Garcia, SIT, Survey Manager is a certified Surveyor-in-Training with experience in land development, surveying, civil engineering design, and project management. Mr. Garcia is proficient in organizational leadership and client relations and uses these skills to manage the Survey Department's operations and production. His responsibilities include management and coordination of survey work and crews, preparation of surveying cost estimates and proposals, review of project plans and drawings to provide quality assurance, networking and business development activities involving survey clients. Mr. Garcia works closely with SAMES' Registered Professional Land Surveyor's and the department coordinator to ensure a quality survey deliverable prepared on time and within the client's budget.

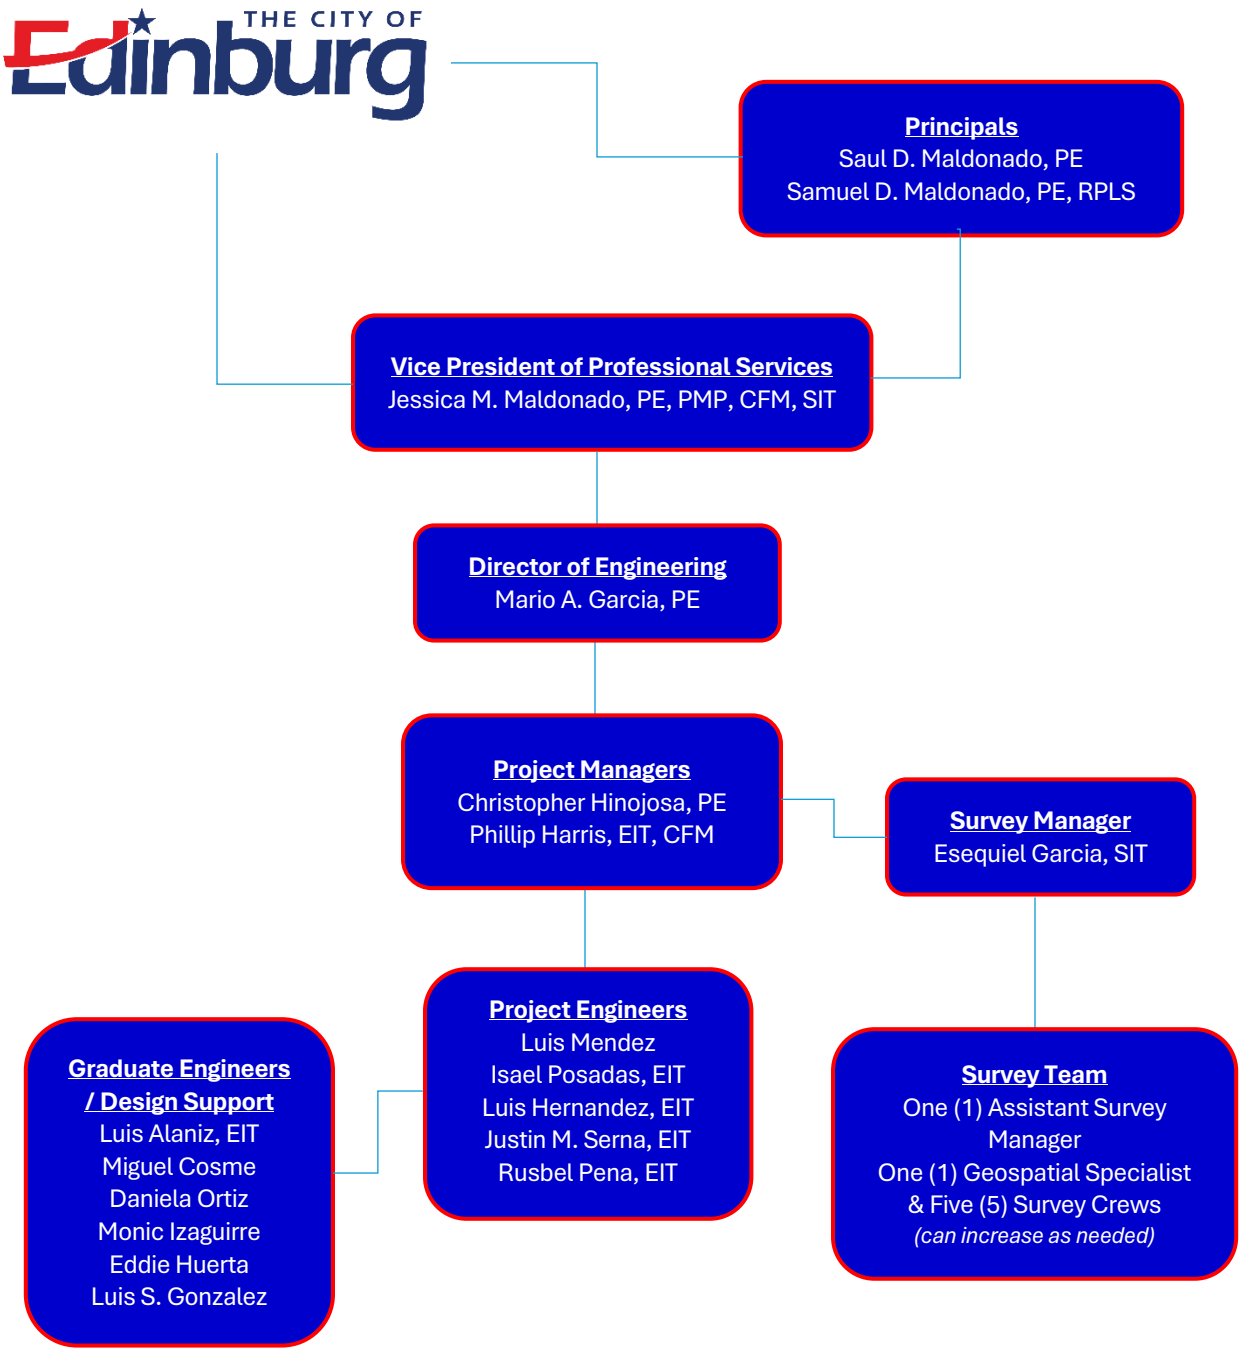
Representative Projects:

City of McAllen Medical Center Topographic Survey

- Oversaw project to create a digital cad file of all existing improvements for a Utility Emergency Power Upgrade Project.
- Provided utility coordination with Hospital staff and Electrical Company as well as utilized GPRS to provide CADD file and final topographic survey.

Adolph Thomae Jr. County Park Shoreline Protection Project Phase III & IV

- Prepared Survey Control Plan for establishing and maintaining horizontal and vertical control
- Prepared Pre-Construction Survey
- Prepared Post-Construction Survey
- Coordinated with client and field crews to stake out a proposed alignment for a gravity wall.
- Collected proposed materials for the wall as it was installed to create as-builts cross sections.
- Provided quality assurance and quality control procedures for project.



Schematic of Right-of-Way Acquisition Strip Map of Davis Road, Edinburg

- Oversaw the schematic for Right-of-way acquisition project of approximately 1.75 miles
- Services included referencing Hidalgo County City Maps and Appraisal District property information to create Right-of-Way Exhibit Map.

Schematic of Right-of-Way Acquisition Strip Map of Schunior Road, Edinburg

- Oversaw the schematic for Right-of-way acquisition project of approximately 2.73 miles
- Services included referencing Hidalgo County City Maps and Appraisal District property information to create Right-of-Way Exhibit Map.

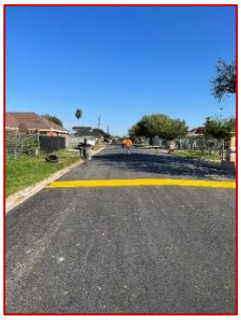
Organizational Chart

REFERENCES AND PROJECT EXPERIENCE

SAMES will offer the City of Edinburg access to a wealth of resources, qualified staff, and technical experts in the local geographical area to complete respective assignments and other logistical tasks. SAMES plans to self-perform any land surveying scopes of work required in our engineering projects. We have two (2) Registered Professional Land Surveyors on staff with over 50 years of cumulative surveying experience. Both are experienced and qualified to provide professional surveying services throughout the entire State of Texas.

The following projects denote *SAMES* experience with respect to scope of service areas in: ***(1) Roadway, Utilities and Civil Engineering Design; (2) General Design and Construction Management; and (3) Federal, State, and County-Funded Construction Projects.***

2018 Bond Project Schunior Regional Detention Pond, Edinburg, Texas



Client: City of Edinburg
415 W. University Drive, Edinburg, TX 78541
Mardoqueo Hinojosa, PE, CFM, CPM, City Engineer
(956) 388-8204

Contract Value: $291K (A/E), $2.3M (Construction)
Completed: 11/08/2023

Project Description: This project consists of planning, surveying, hydraulics analysis and hydrology design, preparation of plans, specifications and cost estimates for the purpose of bid procurement, bidding and award phase services as well as construction administration services. During the preliminary phase of the contract SAMES prepared a detailed study (of appx. 900 acres) to design a lateral detention system or upgrade the existing facilities. SAMES performed related topographic surveying, and preliminary hydraulics and hydrologic analysis of the proposed detention design. The final hydrologic and hydraulic engineering design included modeling of system utilities, (USACE HEC-RAS V 4.0), design criteria. The model included conveyance design of 10 and 25-year options while detention volume included 25 and 50-year options. Halfway through engineering design the City issued a contract amendment to include field surveying and development of parcel plats required for the additional ditch detention capacity. Services included property title reports and 7 final parcel plats with metes and bounds description for Phase I, property south of SH 107. As the design process progressed the limits of the project analysis expanded to include a City ditch south of Sprague Road to an ultimate HCDD #1 outfall located east of McColl Road. SAMES worked with the City to determine an alternative drainage conveyance route south of Sprague. Preliminary topographic surveying and multiple iterations on the project HEC-RAS model were performed to determine the viability of the south option. Model iterations were presented based on land acquisition constraints/availability coordinated by the City. SAMES also provided Construction Phase services. Before commencement of construction SAMES was responsible for the preparation of bidding documentation including preparation and submittal of advertisement, obtaining relative permits for construction, attending pre-bid and bid opening conferences as well as providing final bid tabulations in order to provide a recommendation of award for a Project Contractor. SAMES, along City of Edinburg, held a pre-construction meeting where relevant requests for information (RFI), permits, scheduling and sequence of construction were discussed prior to issuance of a formal Notice to Proceed. During the course of construction SAMES made periodic site visits,

addressed incoming RFI's and Material Submittals, processed change orders for material quantities, time, and additional work required to cover on-site conflicts discovered during construction. Additionally, SAMES reviewed and approved Contractor Pay Applications ensuring the quantities billed matched the quantities installed. A final walk through was held at construction completion and a punch list was developed and addressed prior to close-out.

2021/2022 CDBG Street Improvements Project #5021-75-0311-5000-7500-UCP-EP, San Juan, Texas

Client: City of San Juan
709 S. Nebraska Avenue, San Juan, TX 78589
Ben Arjona, City Manager
(956) 223-2206

Contract Value: $54K (A/E) and $646K (Construction)
Start/Stop: 05/03/2022 – 12/23/2022

Project Description: This project was funded by the Texas Community Development Block Grant program and involved professional surveying and engineering services for street improvements to Alfredo Street, Jaime Street, N. Standard Avenue, W. 12th Street, Loma Vista Street, Loma Verde Street, and Loma Linda Street in San Juan, Texas. SAMES provided topographic surveying and survey related services for design requirements and easement/right of way identification and coordinated with existing utility provided prior to submitting the schematic design to UCP for approval. During the design phase, the team coordinated with the geotechnical engineering firm for completion of bore and subsurface soil investigations. All information gathered was incorporated into the design of the street improvements and submitted at 60% and 100% completion to UCP for review, comments, and approval. SAMES prepared projects specifications, construction plans and related bid documents to assist with the bid procurement phase. Once the project was awarded, SAMES provided construction management services and conducted periodic site visits, reviewed and approved material submittals, addressed contractor RFI's and change order requests, reviewed contractor payment applications, and performed a final walk-thru / inspection of the project prior to preparation and submittal of final close-out documents.

Professional Engineering Services for Design of Storm Drainage Improvements (2019 Drainage Utility Fee Projects), McAllen Foreign Trade Zone Pump Station Upgrades, McAllen, Texas

Client: City of McAllen
1300 Houston Avenue, McAllen, TX 78501
Jorge Gutierrez
(956) 681-1151

Contract Value: $20,535 (A/E)
Start/Stop: 04/26/2022 – 10/31/2023

Project Description: McAllen's Foreign Trade Zone (FTZ) currently has a large detention area on the south side of the property that is drained using a manually operated pump to discharge to a control structure located across the levy just south of the subject property. SAMES Inc. was contracted to assess the existing conditions of the inlet control structure, pumps, and electronic controls currently in place. The intent being to provide similar pumping capacity while providing the ability for the pumps to operate automatically with the capability to upgrade to remote monitoring and operation

(SCADA). Using historical data, the drawdown time for the detention pond was used to calculate the flow rate of the existing pump. Through coordination with an accepted pump vendor, an axial flow pump was selected to replace the existing pump. The requested control features also required coordination with an MEP engineering firm (DBR) as well as AEP to determine if any upgrades to the power distribution system were required. The existing electrical infrastructure was suited to the proposed upgrades and pump motor requirements. The existing inlet control structure was assessed for structural integrity and safety. While structurally sound, it was observed through topographic data and site visits that the earthen side slope of the detention area near the inlet control structure exceeded the maximum allowable slope of 2H:1V. City of McAllen did not wish to perform any improvements to the detention pond therefore it was proposed to extend the concrete rip rap at either side to a point where the required slope was achieved, providing additional bank stability in this area of the pond. Using as-built drawings provided by McAllen the proposed duty point of the pump was established since there were to be no upgrades to the existing discharge forcemain. Final deliverables included construction plans, technical specifications, and cost estimate to support McAllen's bidding processes.

Rio Grande City Public Utilities Water and Sewer Extension Project, Rio Grande City, Texas

Client: City of Rio Grande City
5332 E. U.S. Highway 83, Rio Grande City, TX 78582
Elisa Y. Beas, Utilities Director
(956) 487-0672

Contract Value: $556K
Start/Stop: 02/08/2023 - 08/21/2023

Project Description: SAMES was contracted to provide professional surveying, development and civil engineering services for the Rio Grande City (RGC) Public Safety Commercial Subdivision (2 lots). The intent behind this project was to provide public utilities to Lot 1 and Lot 2 of the RGC Public Safety Subdivision. Furthermore, these utilities will serve the creation of a new Public Safety Building on Lot 1 (in construction right now) for the City of Rio Grande City and the proposed Performing Arts Building that will be on Lot 2 in the near future. Waterline scope of work included 240 linear feet of trenchless installation (Jack and Boar) of an 8-inch PVC C-900 waterline with a 16-inch steel casing, crossing Farm to Market Road 755. The 8-inch waterline was connected to an existing 12-inch waterline by a 12 by 8 tee. An additional 687 linear feet of 12-inch C-900 PVC waterline was installed by continuing an existing 12-inch waterline to the northwest corner of lot 1. A 12 by 8 tee was installed to provide 980 linear feet of 8-inch C-900 PVC waterline within an existing 20-foot utility easement on lot 1 and lot 2. Fire hydrants, gate valves and flush valves were installed with the waterline to ensure line safety and ease of maintenance. Sewer scope of work included 689 linear feet of 10-inch Gravity Sanitary Sewer PVC SDR-26 Pipe, extending an existing 10-inch Gravity Sewer PVC Sanitary Sewer north into the northwest corner of lot 1. The Gravity Line included installation of Sanitary Sewer Fiber Glass Manholes, meeting TCEQ minimum spacing requirements. An additional 992 linear feet of 10-inch Gravity Sanitary Sewer PVC SDR-26 Pipe was installed, extending from a fiber glass manhole in a 20-foot utility easement on Lot 1 and Lot 2 to a 10-foot utility easement at the end of Lot 2. A total of four (4) fiberglass manholes were installed along this Gravity Line, meeting TCEQ minimum spacing requirements. During construction a change field directive was issued regarding the placement of a fire hydrant on the east right of way of FM 755. The issue was resolved by agreeing to convert the parking stall into an island.

Hidalgo County Metropolitan Planning Organization Transportation Alternatives – Donna Sidewalk Project, Donna, Texas CSJ# 0921-02-393

Client: City of Donna
307 S. 12th Street, Donna, TX 78537
Ernesto Silva, City Manager
(956) 464-3314

Contract Value: $49,212 (A/E)
Start/Stop: 05/07/2019 - 08/04/2021

Project Description: SAMES was contracted to provide planning, surveying, civil design, construction administration, environmental services (including NEPA cleared Environmental Assessment) as well as all other support service required to satisfy TxDOT funding requirements and construction of the Hidalgo County Metropolitan Planning Organization Transportation Alternatives for the City of Donna Sidewalk Project. This included full Plans, Schedules, and Estimates as well as all Environmental consideration, Specifications, Bidding and Contract Documents. The Project consisted of the construction of approximately 3.56 miles of Sidewalk along various TxDOT highways in City of Donna, Texas. The 5-ft sidewalks were designed to be ADA compliant, incorporating the installation of curb ramps, signage, two railroad crossings, pavement markings, stormwater pollution prevention plan, and traffic control plan. During project progression City of Donna's original funding scope was exceeded by the incorporation of the two railroad crossings required by TxDOT. After months of coordinating between the City of Donna, TxDOT, and Rio Valley Switching Company, a compromise was met that ensured the project ultimately moved forward. This project was regulated by TxDOT and, to ensure the project was cleared by the National Environmental Policy Act (NEPA) in a timely manner, SAMES maintained an open line of communication with TxDOT's project manager. We also increased the frequency of project update meetings from bi-weekly to weekly to ensure a timely ready-to-let status. Our regulatory involvement also consisted of compliance with the environmental standards set in place by TxDOT, concerning the management of water resources and other sustainable compliance guidelines. SAMES submitted compliance forms including Water Analysis and Species analysis to TxDOT as part of the environmental assessment.

Extension of Shary Road, 2 Miles North of SH 107 Phase I, Mission, Texas

Client: Hidalgo County Precinct 3
724 Breyfogle Road, Mission, TX 78574
Jorge Arcaute, Chief of Staff
(956) 585-4509

Contract Value: $990K
Start/Stop: 08/18/2022 - 08/17/2024

Project Description: This project consists of expansion of the existing two-lane Shary Rd from SH 107 to Mile 9 in McAllen, Texas. The preliminary/proposed expansion consists of a five-lane road with a 120-foot right-of-way. SAMES was contracted to provide Phase I services: planning, schematic design, right-of-way acquisition services, environmental compliance, and assistance with project funding. The work was developed in accordance with all applicable Hidalgo County, TxDOT, and Federal regulations and specified design requirements for funding applicability. SAMES performed topographic surveying, right-of-way acquisition services, parcel plats with metes and bounds, traffic control, and line of sight analysis for off-system roadways, environmental documentation and

clearance through TxDOT and FHWA, schematic development and TxDOT approval, H&H report and hydrologic map, and assistance with project funding including public involvement, entity coordination and development of the Advance Funding Agreement (AFA).

San Juan City Hall / Terminal Building (Project #20034), San Juan, Texas

Client: City of San Juan
512 S. Nebraska Avenue, San Juan, TX 78589
Daniel Tijerina, Planning Director
(956) 223-2200

Contract Value: $55K (A/E), $534K (Const.)

Project Description: SAMES was contracted by the City of San Juan to provide professional surveying, civil engineering and basic construction administration services for the New City Hall building. The scope of work included design and construction of an underground storm sewer system with curb inlets (within the parking lot design) to avoid ponding, and curb inlets along Lincoln Avenue and 6th street. Storm inlets were connected to a roof drain system to avoid flooding on the roof. A drainage report was prepared to determine the amount of cubic feet of water that would be discharging into a bleeder pipe on an existing grate inlet located at Nebraska Avenue and 6th street. Waterline scope of work included design and construction administration services for a new waterline which tapped onto an existing 12" water line on 6th street looping an 8" water line inside the property of the New City Hall. Waterline design included a fire hydrant assembly, a fire department connection and 2 independent water meters. During construction it was discovered that an 8" gas line was running north and south across the property and relocation was needed to avoid conflicts with the gas line. SAMES coordinated the successful gas line relocation with Rene Casares, the General Manager for Texas Gas Service. Construction administration services included addressing contractor requests for information, reviewing contractor pay applications and monthly site visits during construction to ensure compliance with contract documents, specifications and project schedule. Detailed progress reports showing construction status were prepared and submitted to the city. SAMES also provided design for the sewer line extension but through a different contract.

Las Americas Roma Logistics and Industrial Park Phase I, Roma, Texas

Client: City of Roma
201 W Convent Blvd, Roma, TX 78584
Alejandro Barrera, City Manager
(956) 286-7892

Contract Value: $320K

Project Description: SAMES was contracted to provide surveying, land development and civil engineering design for a new industrial park in Roma, TX. Scope of work included subdividing 330 acres into three phases of the project. Phase I was the primary development focus with future connections left for phase II and phase III. SAMES designed 8,550 linear feet of 10" PVC waterline for the development of phase I, along with related appurtenances that were required for this design. We also designed 8,658 linear feet of gravity based sanitary sewer line for the development of phase I that will ultimately lead to a lift station designed for this service area, along with the related sanitary sewer appurtenances required for installation of a fully operational design. Additionally, design of four (4) detention ponds was necessary for the detention of the anticipated storm water. SAMES also

designed three (3) concrete pavement streets that were necessary for the anticipated heavy incoming traffic for the industrial park. We provided Construction Administration for this development, which included periodic site visits, reviewing material contractor submittals, reviewing and approving contractor pay applications to the owner, answering requests for information, and providing close out documents for this project. Scope also included design of a new sanitary sewer lift station designed to service approximately 330 acres of industrial and existing residential developments. Existing sanitary sewer flows were determined using as-built utility drawings provided by City of Roma and other private utility entities. Future anticipated flows were determined using TCEQ, SAWS, and City of Roma Construction Standards. In addition to servicing the proposed industrial park, the lift station was designed to intercept the existing sanitary sewer system forcemain flows from several small residential developments. The system will then discharge and tie into the existing downstream forcemain. The receiving forcemain was assessed for conformance to TCEQ standards and was determined to remain in place and did not require upgrades or improvements. Pumps were selected by generating a system curve of the proposed improvements and coordinating with vendors to provide a practical option that meets all applicable standards and regulations.

Drainage Improvements for Storm Sewer Systems 204 and 252, Harlingen, Texas

Client: City of Harlingen
24200 FM 509, Harlingen, TX 78550
Luis Vargas, PE, CFM, City Engineer
(956) 216-5223

Contract Value: $61K (A/E), $508K (Const.)
Start/Stop: 10/10/2023 - 03/10/2024

Project Description: SAMES was contracted to update two of the City of Harlingen's storm sewer systems to meet current standards. This project was part of a larger effort by the City to analyze various storm drain systems for improvements using funds acquired from the American Rescue Plan Act of 2021. The two drainage systems analyzed serviced the Lazy Palms subdivision in the northern part of the city and the Sun County Estates subdivision near Vela Middle School and totaled approximately 2,664 linear feet of storm drains with 22 inlet/outlet structures. During the design phase, SAMES faced numerous challenges stemming from the location of existing water and sewer utility pipelines and lot services. We resolved crossing conflicts by coordinating with both the City and Harlingen Waterworks System to pothole an existing 20" water transmission line to verify that our proposed outfall pipes would not be in conflict. SAMES also dealt with the existing grades of the subdivisions, where the relatively flat street grades made fitting larger storm drains difficult. We managed to create an effective design by utilizing concrete arch pipes and proposing retrofit improvements to several curb inlets to increase their inflow capacity. Overall, the scope of work included topographic and boundary mapping, including sealed and signed surveys for drainage systems and current utility locations, as well as potholing waterline depths and designing two drainage systems' worth of stormwater upgrades, including suggested pipelines, curb intake adjustments, and outfall structures. SAMES prepared "approved for construction" documents such as technical specifications, plans, and an estimate of the expected cost of construction. We also provided support for procurement, bidding paperwork services related to procurement, participation in pre-bid conferences, and letter of recommendation for award to the City. During construction SAMES provided construction administration services and addended the pre-

construction meeting, reviewed and addressed contractor RFIs and submittals, coordinated the final walkthroughs, reviewed close-out paperwork, and ensured the contractor submitted as-built plans for record keeping to the City of Harlingen.

BL Garza Middle School New Visitors Parking Lot and Pavement Reconstruction, Edinburg, Texas

Client: Edinburg C.I.S.D.
411 N. 8th Avenue, Edinburg, TX 78541
Roberto Estrada, former District Architect
(956) 289-2300

Contract Value: $52K (A/E), $417K (Const.)
Start/Stop: 11/2018 - 09/2019

Project Description: SAMES was contracted by Edinburg CISD to provide planning, surveying, civil engineering and construction administration services for a new visitor's parking lot and the reconstruction of existing pavement for BL Garza Middle School. Survey services included both conventional topographic, as well as drone topographic services. Civil engineering services included drainage analysis, site regrading, parking lot design and design of water, sewer and drainage utilities. SAMES subcontracted Solorio, Inc. to provide design services for the canopy improvements over the existing walkway. This project consisted of approximately 30 acres, which included a middle school campus. SAMES worked with our drone technician to set up ground control and calibrate the coordinates with our GPS system. Our drone technician then set the flight controls including the flight path and we flew the project. Drone data was processed in Trimble business center to the desired point data for our project. The topographic data was used to internally design proposed parking lot expansion, building entrance canopy extension, site re-grading for storm run-off conveyance, and detention pond volume calculations. Surveying of the project was done in Referenced State Plane Coordinate Zone for its precision based on the Texas State Planes (NAD 83) and (NAVD 88). SAMES attended all coordination, site, and construction meetings, established horizontal and vertical control for the project, provided schematic plans for review and once approved, provided plans and specifications "approved for construction". At the onset of the bidding phase SAMES coordinated the advertising and bid procurement process, assisted Edinburg CISD with the pre-bid meeting and bid opening, prepared final bid tabulations, and issued recommendation for award. Once a contractor was selected SAMES conducted the pre-construction meeting, reviewed, and approved all material submittals, provided monthly status reports and oral presentations (as needed) to the district, coordinated the construction work, processed contractor requests for information and monthly payment requests. At substantial completion SAMES conducted a final walk-thru and prepared the punch-list of pending issues, then processed the close out documents and submitted final as-builts to Edinburg CISD. This project was completed on time and within budget.

Storm Water Pollution Prevention Plan for the TFC TBI Project, Laredo Sector, Webb County - Faith Ranch, Fisher Project No. 23944

Client: Fisher Industries
1302 W. Drivers Way, Tempe, AZ 85284
Ben Schoonover, SW Area Manager
(409) 730-1033

Contract Value: $89.5K
Start/Stop: 11/05/2020 - 06/18/2021

Project Description: SAMES was subcontracted by Fisher Industries to provide all labor, material, tools and equipment necessary to perform pre-construction and post-construction services for the Design-Build Texas Border Infrastructure Project in Webb County. The project site consisted of a 5.0 mile stretch along the new border wall being constructed northwest of Laredo in Webb County. SAMES was subcontracted to provide aerial and conventional topographic surveying, subsurface utility exploration, geotechnical services, construction material testing, quality control and inspection services, erosion control and SWPPP. Due to the location of the project site, SAMES was also tasked to provide environmental services in the form of a Migratory Bird Plan to minimize disturbance in the area and comply with the Migratory Bird Treaty Act. SAMES performed research and developed a comprehensive and detailed storm water pollution prevention plan (SWPPP) and ensured compliance with the Texas Commission on Environmental Quality's (TCEQ) stormwater permit requirements to obtain TXR150000, Stormwater General Permit for Construction Activities. At completion the SWPPP report included certification statements, site contact information, site descriptions, best management practices (BMP) which detailed various erosion, sediment and pollutant control measures, required location, detail site, FEMA and soils maps, along with the erosion & sediment control plan, BMP details and a copy of the TXR150000 Stormwater General Permit. All communication and coordination with local authorities was overseen by SAMES to facilitate review of the application and provide continuous updates throughout the submission and approval process.

ADDITIONAL REQUIREMENTS

Insurance

SAMES carries Professional Liability in the amount of $3,000,000, Commercial General Liability, Workers Compensation, and meet all County and State insurance requirements. An exhibit of our current certificates of insurance is included at the end of this section to demonstrate current and active required coverage.

Professional Services Agreement

SAMES has read the sample Professional Services Agreement included with the City of Edinburg's RFQ packet and will meet all prerequisite requirements. Furthermore, if selected, we agree to enter into such an agreement.

Contact Information

Firm principal, Saul D. Maldonado, PE, will serve as the Primary Point of Contact for any correspondence regarding this Statement of Qualifications. Jessica M. Maldonado, PE, PMP, CFM, SIT, will serve as the Secondary Point of Contact for correspondence regarding this Statement of Qualifications and, if awarded a contract resulting from this submittal, will thereafter serve as the primary point of contact for all contract related information. To whom it may concern,

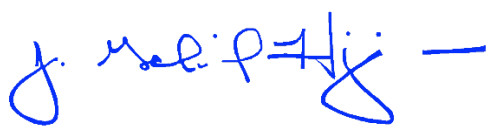
Sigma HN Engineers, PLLC (SIGMA) is submitting this Statement of Qualifications package for Professional Engineering Services – Mechanical, Electrical, and Plumbing RFQ No. 2024-9. We are very interested in providing the City of Edinburg with professional engineering and construction administration services.



SIGMA is a firm whose goal is to produce quality designs for facilities that are functional, economical, energy efficient, and sustainable. SIGMA is led by two LEED Accredited Professional Engineers, Jesus Gabriel Hinojosa, and Jose Antonio Nicanor (Tony). Gabriel will handle the mechanical and plumbing engineering, and Tony will handle the electrical and special systems engineering. Both of us will be performing the construction administration duties of our respective disciplines. As the primary point of contact for the City of Edinburg, Gabriel will ensure the necessary resources are available to meet any challenge presented and ensure adherence to the quality standards expected by the City of Edinburg.

Gabriel and Tony have been providing MEP engineering services for more than 20 years combined and have worked together on numerous projects. We focus on providing quality construction documents that meet our client's needs. Because we have successfully completed projects working directly with institutional owners, we can guide you through the difficulties that may arise in a project. From design, through procurement and construction, Gabriel and Tony will be leading the project to ensure designs are properly implemented in the construction process.

The City of Edinburg will always be working directly with the principals of the firm. Our size allows us to be more nimble, more flexible, and more able to meet your needs in a cost-effective manner. We engage regularly in continuing education courses and seminars to maintain knowledge of the latest and most innovative materials and technology. With our understanding of facility infrastructure, we will evaluate existing conditions and propose solutions using appropriate mechanical, electrical, and plumbing systems.

Given our education and experience, we feel that we can be a valuable contribution to the City of Edinburg and would be excited to hear more details about the projects coming up in a near future. We appreciate the opportunity to provide MEP engineering services, and we encourage you to call our references as we you for your time and consideration.

Best Regards,

Jesus Gabriel Hinojosa, PE, LEED AP

Firm Qualifications

PRIME FIRM HISTORY

FIRM PROFILE

Sigma HN Engineers, PLLC was established in October 2012 by Jesus Gabriel Hinojosa and José Antonio Nicanor to provide excellence in MEP engineering services. All of our clients receive personal, responsive attention from the firm's principals. Both Gabriel and Tony are licensed professional engineers registered in the state of Texas and LEED accredited professionals. With over 20 years of combined experience, SIGMA is committed to the successful completion of projects on time and within budget. We have successfully completed over 300 projects, 57 of which were for higher education institutions and 103 for K-12 education institutions. To date, we have completed 33 projects for UTRGV, 21 for STC, and 1 each for TAMUK and TSTC-Harlingen. Please refer to the prime firm resumes for a more detailed description of representative projects.

Prior to forming Sigma HN Engineers, PLLC, Gabriel and Tony gained experience working on over 100 projects combined, 45 of which were for higher education. In various roles ranging from project manager to mechanical or electrical engineer of record to lead design engineer, 26 projects were completed for South Texas College, 14 for the University of Texas Pan American, 2 for the University of Texas Brownsville - South Most College, 2 for Texas State Technical College Harlingen, and 1 for the University of Texas Permian Basin.

Mission Statement

To enhance the health, safety, welfare, and comfort of the public by providing economical, responsive, and innovative professional engineering services.

Project Portfolio include new construction, renovations, and additions for higher education, K-12 education, data centers, restaurants, religious institutions, office buildings, kitchen facilities, science laboratories, gymnasiums, sports complexes, multi-purpose facilities, retail spaces, commercial plazas, medical facilities, FEMA-rated community safe rooms, private residences, public resource centers, fire stations and emergency services facilities, sanitary sewer lift stations, water-waste water treatment plants, libraries, parking lots, parks and recreation facilities, warehouses, etc.

Mechanical Engineering Services include HVAC load analysis, air balance analysis, ventilation for indoor air quality, demand control ventilation, air distribution systems, duct & piping insulation systems, air cooled and water cooled chilled water systems, packaged DX systems, split DX Systems, variable refrigerant flow systems, energy recovery systems, testing adjusting and balancing, vibration isolation, acoustic analysis, HVAC control & instrumentation systems, and energy compliance reports.

Electrical Engineering Services include emergency/standby & normal power distribution, lighting systems, network lighting control systems, alternative energy- wind and solar systems, grounding-bonding & surge suppression systems, lightning protection systems, fire alarm systems, and energy compliance reports.

Plumbing Engineering Services include domestic water systems, sanitary sewer and vent systems, grease waste systems, acid waste systems, interceptor systems, storm drainage systems, natural gas distribution systems, medical gas systems, and energy compliance reports.

Special Systems Engineering Services include structured cabling infrastructure for voice and data, design of classroom audio/visual systems, electronic safety, and security-access control & intrusion detection, and camera surveillance systems.

Facilities Services include a specialized offering of services such as power system studies, building condition assessments of Mechanical, Electrical, and Plumbing Systems, preliminary review, and on-site observations, drawings and specifications review, code compliance reviews, LEED consulting, and BIM Revit MEP modeling.

UNIQUE QUALIFICATIONS & SPECIALIZED DESIGN EXPERIENCE

We have designed the mechanical, electrical plumbing and special systems for government municipalities new construction and renovations buildings. Refer below for representative projects.

One of the qualities that makes SIGMA unique is our proximity to the City of Edinburg. Located in downtown McAllen, our office is only 18 miles away from the City of Edinburg. Our proximity to the City allows us to be there when you need us.

Our experience working directly as the prime consultant with government municipalities, higher education institutions and school district on new construction, renovations, and additions is another quality that makes SIGMA unique. We have provided engineering and construction administration services on numerous projects throughout the Rio Grande Valley. City of Weslaco, La Joya ISD, The University of Texas Rio Grande Valley, Harlingen CISD, Brownsville ISD, and Edinburg CISD.

Another quality that makes us unique is that we have gained familiarity working with government municipalities over the course of our careers.

Our size, proximity, extensive design experience, including prime firm experience, coupled with our familiarity with government municipalities, are all factors that make SIGMA uniquely qualified to perform the engineering and construction administration services for the City. Given our education and experience, we feel that we can be a valuable resource to The City of Rio Grande City and would welcome the opportunity to work with you on the projects that may arise in the future.

Small sample of projects involving with government municipalities:

- U.S. Customs Border Patrol McAllen Station Back Up Generator
- Rio Grande City FMCSA Office Renovation
- City of McAllen Harvey Ave. Stormawater Pump Station Improvements
- City of Roma North Plaza Lighting
- City of Edinburg Downtown Water Plant Section 3 Filter Control Valve Replacement
- City of Edinburg Fire Station Improvements
- City of Edinburg Water Treatment Plant Office
- City of Edinburg Transit Terminal
- Brownsville Senior Center
- Brownsville Metro Transfer Station
- Edinburg CISD Austin Gym
- Weslaco North Side Sports Complex
- Texas Department of Public Safety McAllen
- Texas Department of Public Safety Rio Grande City
- LRGV-DC 911 Center
- Texas Human Health Services
- Penitas City Hall & Police Station
- McAllen ERO Sub-Office US Immigration and Customs Enforcement
- LRGV-DC Building D Expansion

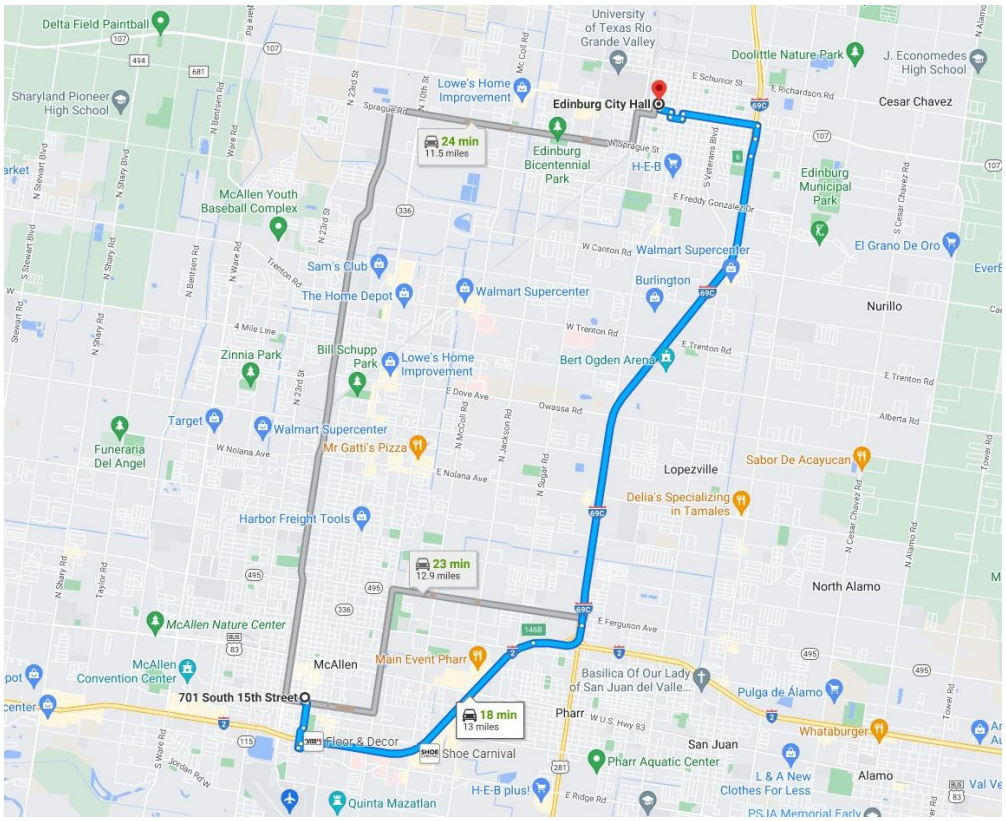
SIGMA HN ENGINEERS, PLLC

701 S 15th St
McAllen, TX 78501
(956) 332-3206

PROJECT EXECUTION

Meeting schedules and accelerated timelines is a critical part of our culture at SIGMA, and we take a great deal of pride in our commitment to meet our client's schedules and timelines. We are willing and able to expedite Mechanical, Electrical, Plumbing Engineering design and construction administration services for projects no matter how big or small. To complete projects within budget we communicate with our clients and visit the job site to clearly define a scope of work. We prepare an engineering cost estimate and establish a budget. We develop a detailed schedule and formulate a staffing plan. We also document work scope modifications and seek the client's approval prior to proceeding with the work, and we assign qualified personnel to each task. These basic elements of effective budget control allow us to provide quality designs, which minimize unanticipated cost in the construction phase such as change orders.

Early in the planning phase, we identify and communicate the technical expertise required, schedule time frames, and level of effort expected for each work order. For staffing purposes, it is simple; Gabriel and Tony will be involved in all phases of each work order. Gabriel will perform the mechanical and plumbing engineering, and Tony will perform the electrical and special systems engineering. Both Gabriel and Tony will handle the construction administrative duties of their respective disciplines. Needless to say, Gabriel and Tony will be hands-on and be fully involved in the day-to day activities of managing the project. Internal team meetings will be held throughout the duration of the contract to review progress on all delivery work orders.



Whether working on fast-track projects for demanding owners in the private sector, working for school districts on short fuse projects to meet grant deadlines, or working with higher education institutions to design improvements that can be constructed within restricted schedule downtimes, Gabriel and Tony have a track record of proven performance.

SIGMA HN ENGINEERS, PLLC

701 S 15th St
McAllen, TX 78501
(956) 332-3206

PRIME FIRM PROXIMITY

A quality that makes SIGMA unique is our proximity to Edinburg City Hall. Located in downtown McAllen, our office is only 18 miles away from Edinburg City Hall building. Our proximity to the campus facilitates design and construction administration duties. It allows us to be there when you need us.

SIGMA HN ENGINEERS, PLLC

701 S 15th St
McAllen, TX 78501
(956) 332-3206

AVAILABILITY AND COMMITMENT

Sigma HN Engineers, PLLC has the resources and is prepared to commence MEP engineering services for the City of Edinburg immediately upon receipt of a Notice to Proceed. With Gabriel and Tony as principals of the firm, we have the mechanical and electrical engineering capacity to accomplish any work order presented by the City of Edinburg. Gabriel will perform the mechanical and plumbing engineering, and Tony will perform the electrical and special systems engineering. Both Gabriel and Tony will be handling the construction administration duties of their respective disciplines. Gabriel and/or Tony will attend all required meetings with the City of Edinburg to make certain projects are completed successfully on time and within budget. As the primary point of contact for the City of Edinburg, Gabriel will ensure the necessary resources are available to meet any challenge presented and ensure adherence to the quality standards expected by the City of Edinburg. SIGMA's team will consist of the following associates whose duties and responsibilities are as follows:

- Jesus Gabriel Hinojosa, PE, LEED AP, will design the Mechanical and Plumbing systems, perform construction administration duties, and attend meetings in the design and construction phases of the project. Gabriel will also manage and supervise all phase of the project and serve as the primary point of contact for STC.

- Jose Antonio Nicanor, PE, LEED AP, will design the Electrical and Special Systems, perform construction administration duties, and attend meetings in the design and construction phases of the project.

- Anthony Nicanor, EIT, will design the Electrical and Special Systems, prepare construction documents, and assist with construction phase duties.

- Kevin Alvarez, CAD Technician, will prepare construction documents and assist with construction phase duties.

- Kevin Mejia, CAD Technician, will prepare construction documents and assist with construction phase duties.

  Lorenzo Lopez, CAD Technician, will prepare construction documents and assist with construction phase duties.

- Leonel Sanchez, Designer, will prepare construction documents and assist with construction phase duties.

- Patricia Hinojosa and Aimee Nicanor will handle any clerical and office administration duties.

We live and work in the Rio Grande Valley, and are committed not only on a professional level, but on a personal level to ensure projects are completed successfully on time and within budget. Our office is in McAllen so we will be ready to begin service immediately upon request.

QULAIFICATIONS & EXPERIENCE

Prior to pursuing his entrepreneurial endeavor with SIGMA in 2012, Gabriel had been with Halff Associates for more than 8 years. Gabriel has been involved in all aspects of MEP engineering design and project management for commercial, institutional, industrial, and educational facilities. He has extensive experience with new construction projects, additions, renovations, remodels, and improvements. He provides sustainable designs with a focus on energy efficient HVAC systems. Representative experience includes:

- South Texas College Starr County Campus Health Professions + Science Building
- South Texas College Starr County Campus Thermal Plant
- Brownsville ISD Rivera Early College High School HVAC & Lighting Improvements
- Region One Education Service Center Laredo Renovations
- Region One Education Service Center Edinburg Additions
- University Of Texas Rio Grande Valley One Stop
- La Joya ISD Irene M. Garcia Middle School HVAC Improvements
- Edinburg CISD BL Garza Middle School Athletic Addition And Remodel
- Edinburg CISD Escandon, Cavazos, & Eisenhower Elem School Lighting Upgrades
- Harlingen CISD HVAC Improvements at Long & Wilson Elementary Schools
- Brownsville ISD Cummings Middle School Remodel
- Santa Maria Agricultural Support Facilities
- STISD Edinburg Bus Maintenance
- Edinburg CISD Esparza Elementary School HVAC Improvements
- City of Edinburg Fire Station HVAC Upgrades
- ECISD Richard R. Flores Fieldhouse Improvements
- La Joya ISD Performing Arts Center
- HCISD Transition Academy
- City of Granjeno 2019 Public Facility and Improvements Project

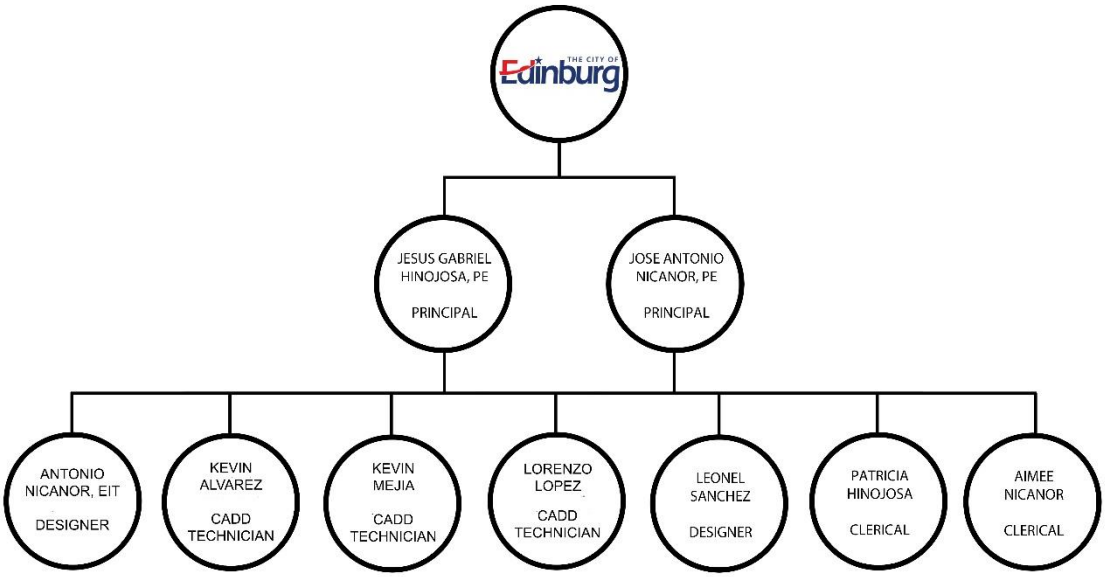
QULAIFICATIONS & EXPERIENCE



Prior to pursuing his entrepreneurial endeavor with SIGMA in 2012, Tony had been with Halff Associates for more than 6 years. Tony has been the lead electrical and telecommunications engineer for new and renovation projects for commercial, institutional, industrial, and educational facilities. He has worked in numerous school district projects ranging from building renovations to new construction, thermal energy plant expansions, parking lot additions, network operating centers, electronic safety and security, data and voice networked-telecommunication infrastructure, audio/video for conference rooms, and TV production video/sound equipment and media infrastructure for school board rooms and football high school stadiums. Representative experience includes:

- South Texas College Starr County Campus Health Professions + Science Building
- South Texas College Starr County Campus Thermal Plant
- Brownsville ISD Rivera Early College High School HVAC & Lighting Improvements
- Region One Education Service Center Laredo Renovations
- Region One Education Service Center Edinburg Additions
- University Of Texas Rio Grande Valley One Stop

REPRESENTATIVE PROJECTS

City of Edinburg Central Fire Station HVAC Improvements, Edinburg, TX

- Owner/Client
  - Owner: City of Edinburg
  - Contact: Mardoqueo Hinojosa, City Engineer
  - Address: 415 W University Dr, Edinburg, Texas 78541
  - Phone: (956)-388-8211
  - Email: mhinojosa@cityofedinburg.com

- Project Construction Cost: $170K
- Completion Year: 2020
- Project Description: This was an HVAC improvements project. The Owner had consistent thermal comfort problems due to old chilled water fan coil units and air cooled chiller that had been neglected over the years and were beyond repair. We replaced the chilled water fan coil units which were suspended above the ceiling with packaged DX rooftop units. We had to be careful with the demolition plans and specifications as the existing chilled water piping was wrapped with insulation that contained asbestos. The city did not have enough funds to perform asbestos remediation, so the existing piping and chiller were abandoned in placed. We studied the existing duct and the new airflow requirements and made the air distribution duct modifications necessary to provide appropriate conditioned airflow into each space. The existing roof was analyzed to ensure it could support the weight of the new roof mounted units. We specified a new electrical panel to serve the new HVAC equipment.

  - Address: 415 W University Dr, Edinburg, Texas 78541
  - Phone: (956)-388-8212
  - Email: Gcarmona@cityofedinburg.com

- Project Description: Project consisted on the the replacement of control valves for the City of Edinburg Downtown Water Plant. We conducted a site visit to determine the existing conditions of the plant to coordinate the locations of the existing valves, air compressor, air dryer and other equipment that needed to be replaced. The site visits also consisted of identifying the electrical infrasctrucre of the plant to connect the new equipment.

Structural Engineering

Ref: Request for Qualifications for Engineering Services Rotation
RFQ No. 2024-9

Dear Mr. Hinojosa,

Solorio, Inc. appreciates the opportunity to submit a response to the above referenced Request for Statement of Qualifications, and to showcase our Structural Engineering capabilities to the City of McAllen. In the past we have had a great partnership with the city and look forward to continuing that relationship. As noted by our project referenced within our response, Solorio, Inc. is highly qualified, skilled and prepared to place our knowledge, experience, and energy at your disposal for a successful completion of important municipal projects.

Solorio, Inc. is well versed in the successful implementation structural engineering requirements. We take pride in having Principal involvement in each project to ensure that design integrity is maintained and that it meets all applicable codes, restrictions, and regulations.

Solorio, Inc. is committed to assisting the City of Edinburg, as needed with Structural Design Services, on various projects throughout the City through the annual term contract that will be awarded. Currently our workload will allow up us to be prepared at any time with any of the City's requests.

Once, again, your time and consideration to this statement of qualifications are greatly appreciated.

Respectfully submitted,

Simon G. Solorio, Jr., P.E.
President / Principal
Solorio, Inc.

SOLORIO

Unique Qualifications

Solorio, Inc., is a small firm and ideally suited to provide structural engineering services in a prompt and courteous manner for small, large and challenging projects. The key principal will be directly involved with each project, and will be responsible for production management in all phases of design, contract documents, and construction administration.

Solorio, Inc.'s, strength lies in attentive and prompt response from project inception through completion. The firm places special importance on cost constraints and seeks to ensure clients that capital improvement costs, and long-term maintenance costs are reasonable and realistic.

Solorio, Inc.'s, is thoroughly versed in the successful implementation of designed elements. This experience fosters realistic design and cost analysis, resulting in the completion of projects within established budgets. Principal involvement in our projects insures that design integrity, applicable codes, Restrictions and regulations are kept intact.

Solorio, Inc., has established a long-standing reputation of integrity and competence, by delivering projects on time, on budget, and of the highest quality. We provide our services with a "can do" and "will do" attitude and work hard to establish long-term relationships with our clients. Solorio, Inc., is committed to delivering exceptional service, doing things right the first time and every time, and providing effective solutions to every challenge we come across. Mr. Solorio's involvement in each and every client project ensures that design integrity, applicable codes, restrictions, and regulations are kept intact. We keep current with the latest structural engineering advances by attending seminars and staying active in engineering associations, in order that we can provide the best creative solutions that support the client's ideas or challenging structural work.
active in engineering associations, in order that we can provide the best creative solutions that support the client's ideas or challenging structural work.

SOLORIO

Timelines & Budget

At the beginning of each engagement, Solorio conducts a very thorough discovery and scope process whereupon data, hours, materials, costs and schedules are examined and correctly detailed. The Firm works closely with all parties of the client design team, creating work items and milestones that are carefully examined and organized to ensure that solutions during the design phase eliminate cost escalations or overruns. The Firm's strength lies in its attentive and prompt response to challenges from project inception through completion. The Firm will place special importance on construction constraints and will always seek to ensure that costs and long-term maintenance costs are investments that are reasonable and realistic. Timely submittal or projects is important, and Solorio has the capacity and systems in place to complete work on time without major cost escalations or overruns.

Because of our experience, design team effort and approach, Solorio, Inc., is extremely confident that the Client's needs and requirements will be satisfactorily met, on time, and on budget, over and over again. Our repeat client base and performance record over the last fourteen years is an indication of how well we have delivered on our dedication to meeting schedules and deadlines.

Based on current workload, Solorio, Inc., is ready to meet the demands and requirements of this project. We have established a reputation for providing a team approach that delivers quality services and creative solutions in a timely manner. Our strength lies in attentive and prompt responses to all challenges, from project inception through completion. Solorio, Inc., standard of excellence, through state-of-the-art equipment and utilization of automated drafting and engineering programs, permit the firm to deliver projects on schedule.

Local Team

Simon G. Solorio, Jr. PE

As Principal and project manager Mr. Solorio is a key member who is responsible for production management in all phases of design, contract documents, and construction administration. He encompasses a wide array of responsibilities, including project management, structural design analysis, engineering plan reviews, forensic engineering, support calculations and scheduling.

His extensive years of experience includes the design of large- and small-scale projects in institutional facilities, correctional facilities, multi-story housing projects and large- and small-scale corporate/industrial parks. Other types of buildings he has completed include banks, hotels, medical facilities and office buildings.

His substantial experience includes designs for the following construction materials, Concrete, Masonry, Timber and Steel.

His other structural experience has included Tilt-Up Panel Construction, Foundation Design and Inspection, Seismic Analysis, Remodels and Additions and Code Compliance Assistance.

His extensive experience in construction documents and precision detailing has provided the client the ability to meet cost and time constraints.

Bert Ogden Arena

Location	Edinburg, Texas
City	City of Edinburg
Contact	Marty Hinojosa, AIA Cantu Construction
Phone	956.631.1273
Services Provided	Structural Engineering

Project Description – The Bert Ogden Arena with 8,500 seats, is the largest in the Rio Grande Valley. The arena was home to the NBA Development League (D-League) team, The Vipers. The arena hosts a variety of musical and entertainment acts year-round. The clear span of the structure is 310 feet. The roof structure is supported by a set of double 28 feet deep steel trusses. The architectural requirement was to have the minimum amount of exposed bracing to support the lateral buckling of the truss. It was decided to place two trusses approximately eight feet apart and install a horizontal truss in-between at the top and bottom chords. This arrangement eliminated the need of any lateral bracing.

HEB Park Soccer Stadium

Location	Edinburg, Texas
City	City of Edinburg
Contact	Marty Hinojosa, AIA Cantu Construction
Phone	956.631.1273
Services Provided	Structural Engineering

Project Description - The Stadium is designed to seat approximately 9,700 fans with the ability to expand seating to more about 16,000. With its two long rows of seating running parallel to the field, it ensures that every seat can be witness to some part of the action.

The exposed steel that the stadium is comprised of provides a modern aesthetic for the stadium; as well as allowing for gusts of wind to cool the fans down on those particularly hot days. The roof steel structure cantilevers partly over the seating to also help shade the crowd.

Educational Building, Sea Turtle, Inc.

Location	South Padre Island, Texas
Contact	Roberto Ruiz, AIA
Services Provided	Structural Engineering

Project Description – The new educational center that houses classrooms and offices. These classrooms allow staff to teach incoming visitors why sea turtles are necessary to our environment, how they are endangered, and what steps they take in order to rehabilitate those turtles who are badly hurt. This building will be outfitted with amazing displays to outline the grand scheme of what makes Sea Turtle Inc. so important. The aquarium tanks will have a glass bottom so visitors can see the marine life from a new perspective. The tanks are housed under a roof structure consisting of glulam beams and wood trusses; supported by CIP concrete columns.

Barrientes Middle School Addition

Location	Edinburg, Texas
District Name	Edinburg CISD
Contact	Robert Estrada, AIA
Phone	956.380.8920
Services Provided	Structural Engineering

Project Description – The project consisted of an addition of a classroom wing. The building consisted of steel roof joist supported by conventional reinforced concrete masonry units. The building was supported by a stiffened concrete slab foundation system.

Falfurrias Elementary School

Location	Falfurrias, Texas
District Name	Brooks County ISD
Contact	Rudy Molina, AIA
Phone	956.688.5656
Services Provided	Structural Engineering

Project Description – The project consisted of a new one-story structure. The building structure is a metal building structure with exterior reinforced concrete masonry units. The building was supported by a stiffened concrete slab foundation system.

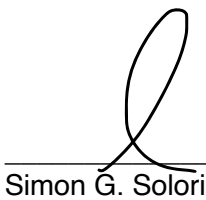
Professional Services Agreement / Insurance

Solorio, Inc. has read the RGQ's enclosed Services Agreement and will agree to execute the proposed agreement upon being awarded the opportunity to provide the City of Edinburg with Structural Engineering Services.

Certificates of Insurance have been submitted with our response to this RFQ. However, any changes required or additions, such as adding the City as an Additional Insurance will be addressed at the time of the contract being awarded. We agree to all insurance requirements.



Solorio, Inc. has been financially sound since inception, and we foresee the 2024 and 2025 to remain the same. We are capable of the work load we have, and the addition of any possible City of Edinburg work that we may receive from this submission, and due to our work history together.

CONFLICT OF INTEREST
DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES NO

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES NO

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Simon G. Solorio, Jr., P.E., the undersigned representative of Solorio, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, Simon G. Solorio, Jr., P.E., the undersigned representative of

Solorio, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

Solorio, Inc.

2 [X] **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

n/a

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

n/a

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

[ ] Yes [ ] No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

[ ] Yes [ ] No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

n/a

6 [ ] Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

July 16, 2024

City of Edinburg
Attn: Mardoqueo Hinojosa,
City Engineer
415 W. University Drive
Edinburg, Texas 78539

RE: RFQ No. 2024-9 Engineering Services Rotation

Dear Mr. Hinojosa:

South Texas Infrastructure Group, L.L.C. (STIG) is pleased to present our qualifications and offer our Professional Engineering services in response to City of Edinburg's **RFQ No. 2024-9**. **South Texas Infrastructure Group, L.L.C.** is a Hidalgo County, Mission, Texas engineering firm, located on 900 South Stewart Road, Suite #13, who has the experience and knowledge in design and managing for projects in Hidalgo County and the Rio Grande Valley. As president of **South Texas Infrastructure Group, L.L.C.,** I have 26+ years of experience in the public sector where I have been able to work with yearly budgeted funding where we have to be fiscally responsible for it. My commitment to client service and excellent communication has allowed me to maintain a constant client base throughout the Rio Grande Valley.

Our goal is to provide the City of Edinburg and its residents with a thoughtfully designed and constructible public project that can be completed in a timely manner with the available funding resources. The goal can be achieved with our comprehensive team experience and our innovative approach to project design and delivery. The **South Texas Infrastructure Group, L.L.C.** program is structured to match the staffing needs to the project size. We are readily available to augment the core design services and ancillary engineering services. We believe that we offer a strong pro-active Design Team to successfully complete the selected projects and we appreciate the opportunity to submit this Statement for Qualifications.

We are eager to provide professional services to the City of Edinburg for any Professional Engineering services related work, and we thank you for the opportunity to provide you with our professional services. I am the primary contact person and may be reached at (956) 451-2670 or by email at julio@southtexasig.com.

Also, we did not receive any addendums or viewed any posted on the City of Edinburg's procurement portal. We acknowledge that this Statement of Qualifications has been prepared as per the requirements of the posted Request for Statement of Qualifications for Engineering Services Rotation, RFQ No. 2024-9.

Sincerely,

Julio Cerda, P.E., President

FIRM QUALIFICATIONS AND EXPERIENCE:

South Texas Infrastructure Group, L.L.C. provides high quality, cost-effective professional engineering services for:

- ***Roadway /Transportation***
- ***Bridge and general design***
- ***Federal, state and county-funded design and construction projects***
- ***Site Work / Infrastructure***
- ***Land Development (Governmental and Private)***
- ***Utility Design and Coordination***
- ***Drainage Studies (Hydrology and Hydraulics)***
- ***Specifications and Construction Cost Estimates***
- ***Construction Management Engineering***

South Texas Infrastructure Group, L.L.C. (STIG) is a locally owned engineering firm providing a variety of civil engineering services for both the public and private industry. Our firm focuses on delivering quality, cost-effective, and innovative engineering solutions in a timely manner. STIG offers a broad range of experience in consulting services which include transportation engineering, public works, land development, utility design/coordination, planning, project management and construction phase services. We have experience in a capacity of multi-disciplined engineering services, which makes us able to exceed project/client demands and expectations. STIG offers experience, vision, dependability, and creative design approaches.

Key personnel of the STIG staff have previously worked with the City of McAllen, City of Mission, City of Edinburg, Drainage District No. 1, Hidalgo County and the Texas Department of Transportation (TxDOT). This experience further bolsters their expertise of public improvement projects. STIG has over 26 years of experience working on roadway, drainage, water, sewer, and traffic operations projects.

Professional Personnel and Experience

STIG personnel are highly qualified, experienced and motivated. This combination produces constant high-rated, cost-effective, and timely solutions and services for their Clients. In the course of our business we can:

- Plan, design, and manage a design team in development of a widely variety of projects ranging from public improvement projects to private residential and commercial projects.
- Coordinate with state and local agencies in addition to utility surveyors to determine project requirements, while minimizing construction costs and achieving client objectives. Participate in administrative and management duties related to proposal preparation, budget monitoring, and requests for additional service contracts, invoicing, maintaining client relations, and meeting client needs.
- Manage and plan land development projects from site feasibility through design and construction. Meet and coordinate with clients to establish project objectives and monetary constraints while meeting local, state, and federal agency codes. Work with client and design team to value engineer designs in order to minimize construction costs and schedules while optimizing development potential.

- Coordinate with sub-consultants, to include but not limited to the geotechnical engineer, structural engineer, and architects to resolve project and development issues.
- Design and manage preparation of construction documents and specifications for variety of projects including, but not limited to, demolition plans, grading and drainage plans, storm water pollution prevention plans, roadway plans, water and sewer plans, and dimensional control plans.
- Oversee and lead design team in preparation of plats. Track plat through platting process and coordinate with review agencies to achieve plat approval. Prepare, submit, and monitor building permits, state driveway and utility permits.
- Adhere to QC/QA policies to assure that plans are accurate and have been developed with a high level of confidence.
- Review and approve submittals by contractors during construction to determine compliance with project construction documents specifications.

Design/Process Experience

Site	▪ Site Planning, Platting, Zoning, Quitclaim ▪ Feasibility Studies
Grading and Drainage	▪ Site Grading, Underground Storm Drain Design ▪ Open-Channel Design, Culvert Design, Street Drainage, and Detention Pond Design
Hydrology and Hydraulics	▪ HEC-1, Rational Method, Boss RMS, HEC-2, ▪ Microstation Drainage, PondPack, StormCad, and Culvert Master
Roadway/Utility	▪ Roadway Design, Water Plan Design, Sewer ▪ Plan & Profile, Overall Utility Plans, Utility Relocation, and Lift Stations
Construction	▪ Site Demolition Plan, Construction Phasing, and ▪ Traffic Control Plans
Permitting	▪ Building Permit, State Driveway and Utility Permit, ▪ TPDES NOI & NOT, FEMA LOMR & CLOMR

Work Performance:

Understanding of Project & Services

South Texas Infrastructure Group, L.L.C. (STIG) understands that the City of Edinburg is seeking to contract with competent engineering firms, registered and licensed to practice in the State of Texas that have experience with Professional Engineering Services. Detailed services may encompass a broad range of services such as but not limited to the following: field investigation and data collection; feasibility evaluation and alternative analysis; design development and cost estimating; preparation of plans, specifications and estimates; review and check plans, subdivision and parcel maps, and computations submitted by private developers; review of engineering and encroachment permits; prepare environmental reports; review of environmental and engineering reports and proposals; coordination with utility agencies, consultants, and other public agencies; organization, participation and presentations at meetings held by City staff, the City Council, Neighborhood groups, and other stakeholders; preparation of preliminary documents, plans and/or reports including findings and recommendations; preparation final documents, plans and/or reports responding to City and other stakeholder comments; preparation of handouts and graphical displays for public meetings; management and monitoring of capital improvement project; management and monitoring of planning project; administration and monitoring of regional, state, and federal grants; and general civil engineering support services as assigned.

Project Approach

The successful completion of a project can best be attributed to the approach that is taken during project development. The STIG Team has experience working with the current phase-based approach system that the City uses for planning, designing and providing construction phase services for a project. Utilizing elements of the current system, the STIG Team will expand on it and develop projects in three phases. Phase 1 is the Planning and Schematic Phase; Phase 2 is the Design Phase; and Phase 3 is Construction Phase Services.

Project-Kick off Meeting

Prior to beginning any design work, the STIG Team will request a project kick-off meeting. At this meeting, the goal will be to meet the project manager and to get a thorough understanding of the scope and schedule of the project. It will be important to determine any potential issues which might slow down the project so that the scope can account for whatever services may be needed. Determining as many of these issues during this meeting will allow the STIG Team to begin to address them immediately.

Phase 1 - Planning and Schematics: This is the first phase of project development. During this phase, the project will be looked at to determine all issues that will need to be addressed. Design alternatives and options will also be developed during this phase and evaluated from a value engineering standpoint. During this phase, our team will also be able to assists the City with the facilitation of any funding agreements, or joint use agreements that may be needed. Preliminary investigations and research will begin during this phase; information such as as-built plans, right-of-way maps and topography maps will be gathered. Other key components of Phase 1 include:

Utilities/Utility Coordination: Communication with all utility companies will begin immediately (AT&T, AEP, etc.). Utility maps will be requested and all facilities will be verified for horizontal location. A preliminary conflict list will be created and distributed to all parties involved with the project. Overall, the utility coordination process will be initiated and by the end of Phase 1 all utility companies within the project limits should be accounted for. Coordination with the irrigation districts that will be affected will also be conducted during this phase.

Environmental: A key element to the project development process is obtaining all environmental clearances. During this phase, our team will work with the city to determine what type of environmental documentation is needed, such as categorical exclusions, blue line reports, and nationwide permits.

Public Involvement: During the early stages of most projects, it is important to get the public's input on the proposed improvements. The Team will develop exhibits, presentations, handouts, provide notice of meetings and any other information that may be needed for public meetings or hearings.

Phase 2 - Design: Phase 2 will consist of developing the detailed plans, specifications, bid tabulations/documents and estimates for each project. Proposed plans will include the preparation of a title sheet/index, plan and profile sheets, irrigation crossings and hydraulic calculations, water and sewer plans, and sequence of work notes. During this phase, any other ongoing coordination will continue with the surveyors, utility companies, and the geotechnical engineer.

Phase 3 - Construction Phase Services: The STIG Team will provide construction phase services support for all projects. Team personnel will be readily available during the bidding process to answer and address any questions that potential bidders may have. Upon awarding the construction contract, the STIG team personnel will request visits to the project to assure plan compliance. STIG team personnel will schedule periodic construction meetings to assure that the project is on schedule. The STIG Team will continue to coordinate with the contractor and the utility companies to assure that the contractor and utility companies are aware of each other's schedules. Any Requests for Information that the contractor may have, will be promptly addressed. Throughout the project construction, the STIG Team will review all shop drawings, review and recommend approval of request for payment, and will work hand-in-hand with the City of Edinburg staff to ensure that the work is progressing as per plans. Upon completion of the project, a final inspection will be performed with the contractor, City Inspectors, and Project Manager. A final punch list for the contractor will be developed in order to assure that the project is to the satisfaction of the City of Edinburg. Lastly, STIG will compile and distribute all construction redlines to design consultants for preparation of the "Plan of Record" or "As-Built" Plans. STIG will compile all "Plan of Record" or "As-Built" Plans from the design consultants and deliver them to the City of Edinburg's staff.

QA/QC Practices:

A big part of the success of STIG is our commitment to QA/QC Practices. We have an established set of criteria that are the foundation of our QA/QC Procedures. These criteria are the following:

- ***Knowledge/Experience:*** The STIG Team will assign a knowledgeable and experienced team member to lead the various tasks to minimize errors and omissions.
- ***Coordination/Communication:*** STIG will establish open lines of communication between City Engineer and all team members to assure that all project needs are addressed.
- ***Constructability Review:*** The plans will be reviewed at all project milestones to determine if the proposed designs are safe and provide adequate consideration to constructability and value engineering.
- ***Accuracy/Completeness:*** The plans will be reviewed to identify any drafting and design discrepancies and to verify that the plans are complying with the respective design manuals. Construction quantities will be tabulated by several individuals to verify accuracy. The plans will also be reviewed to assure that all bid items are accounted for.
- ***Design Schedules:*** Schedules will be developed for the design phase of the project in order to complete the project design in a timely manner.

The success of the STIG Team's QA/QC Program is that it incorporates the five founding criteria in a three-level review process. Prior to each submittal, the plans will first be reviewed on the production level. Technicians and draftsmen will review one another's work. The second level of review will be done by the Project Engineers and Assistant Engineers. A full set of plans will be reviewed by each of the Engineers and Assistant Engineers working on the project. They will cross reference each other's comments and redlines prior to revisions. The final level of review is by the Project Manager, Deputy Project Manager, and QA/QC Manager. They also will cross reference each other's comments and redlines prior to revisions. Throughout the QA/QC Process, the design and consideration of utility design will be closely looked at to minimize conflicts. The STIG Team will coordinate internally to assure the most feasible solution is used for all conflicts, whether it be a design change or having to design a utility relocate. The design and construction schedule of the utility companies will be considered in the overall project schedule and traffic control plans will include providing safe work zones for utility adjustments. The STIG Team has demonstrated its ability to provide excellent, innovative, cost-saving engineering and design services in a timely manner. The overall commitment that the STIG Team provides to the project is unsurpassed. Attention to detail and rapid response to issues is a staple of the STIG Team Philosophy. The STIG Team has an excellent track record for successful projects and extremely satisfied clients.

Experience:

PROJECT 1: ALBERTA RD RECONSTRUCTION: The purpose of the project was to reconstruct Alberta Rd. from West City Limits to ¼ mile East of Jackson Rd. STIG Developed the PS&E for widening to 57' B-B Roadway to include 4' bike lanes. The project consisted of widening with no Right of Way to be taken. Value Engineering was also implemented to the project. Working with staff and contractor to redesign roadway to a four-lane roadway with 8' hike and bike lane

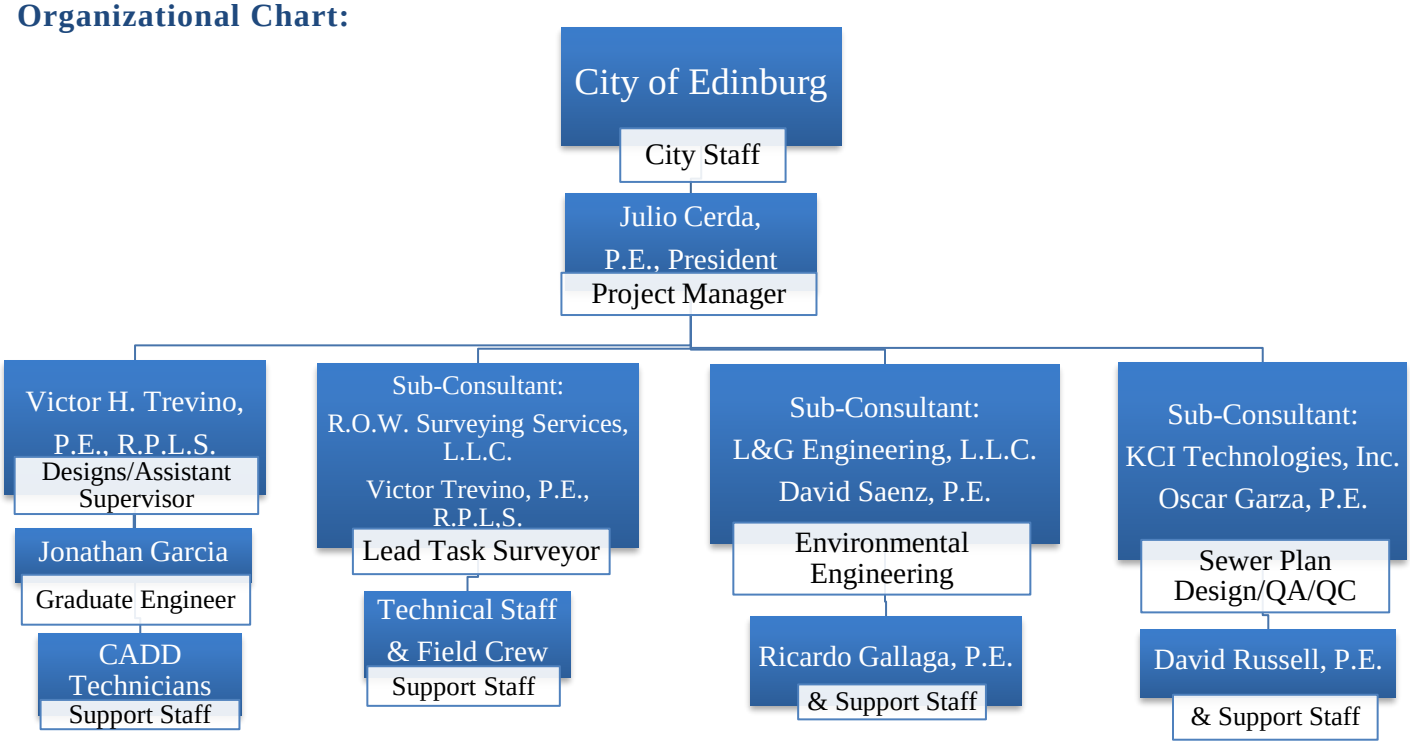
PROJECT SCOPE: STIG (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Design tasks included Design horizontal, vertical Alignment traffic, hydrology and hydraulics.

Project Manager:	Julio Cerda, P.E.
Project Completion:	Design Complete/ Const. On going
Construction Cost:	$3,017,905.20
Engineering Fee:	$325,000.00
Owner's Name:	City of Edinburg
Owner's Representative:	Mardoqueo Hinojosa P.E.
Representative's Phone #:	(956)388-1895
Representative's Email:	mhinojosa@cityofedinburg.com

Project Manager:	Julio Cerda, P.E.
Facility Size:	6.5 Miles
Project Completion:	Design Complete/ Const. On going
Construction Cost Estimate:	$11,380,950
Owner's Name:	Hidalgo County Drainage District No. 1
Owner's Representative:	Raul Sesin, P.E.
Representative's Address:	902 N. Doolittle Road Edinburg, Texas 78542
Representative's Phone #:	(956) 292-7080

PROJECT 2: MILE 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station.

PROJECT SCOPE: STIG (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Duties included contract management, QA/QC, construction phase services and local letting. Design tasks included hydraulic design, hydrologic modeling system (HEC-HMS), horizontal and vertical alignment, drain typical section, design cross-sections and storm water pollution prevention.



PROJECT 3: ELM DRAINAGE PROJECT CITY OF MISSION: This Project consisted of upgrading the existing storm sewer system by upsizing the existing storm drain pipes, adding new storm drain pipes and channel improvements.

PROJECT SCOPE: STIG (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Duties included contract management, QA/QC, construction phase services and local letting. Design tasks included storm drainage design. Provided drainage area map, hydrologic data, hydraulic data sheet, and horizontal and vertical alignments for the storm drain improvements.

Project Manager:	Julio Cerda, P.E.
Project Completion:	Design Complete/ Const. On going
Construction Cost:	$ TBD
Engineering Fee:	$ TBD
Owner's Name:	City of Mission
Owner's Representative:	JP Terrarzas, P.E.
Representative's Address:	1201 E. 8th St. Mission, Texas 78572
Representative's Phone #:	(956) 585-3275

TEAM MEMBER QUALIFICATION AND EXPERIENCE:

Organizational Chart:

Summary Paragraph

The project work to be performed with South Texas Infrastructure Group will be as follows:

Mr. Cerda will be in charge as a Project Manager, and will execute QC/QA. Mr. Trevino will be performing all surveys requested by STIG and will execute the QC/QA for any survey done by or for the City of Edinburg. Mr. Garza will execute the QC/QA for any engineering done by or for the project. Mr. Saenz will be performing all Environmental Engineering services requested by STIG. Mr. Trevino will be the design engineer for all street and utilities and land development projects.

Familiarity with Geographical Area

The STIG Team has the expertise, diversity, knowledge, and experience needed to handle public improvement projects. The Team has successfully completed numerous public improvement projects; therefore, our team is aware and up to date on the latest ordinances, standards, codes, regulations and requirements that are critical to a projects' success. The following is a listing of some of those standards and criteria:

NEPA Process, Army Corp of Engineer Permit Regulations, Federal Highway Administration Policies, FEMA – Flood Insurance Maps & Regulations, TxDOT Design Standards and Policies (Roadway, Hydraulics, Bridge, Traffic Operations), AASHTO Design Standards, Texas Commission on Environmental Quality (TCEQ), National Pollutant Discharge Elimination System (NPDES), and Institute of Transportation Engineers Traffic Design Manuals.

Ability to Commence Services Immediately

The STIG Team professionals, technical resources, and staff available for this endeavor are summarized below:

STAFF AVAILABILITY

Firm Name	Team Member	Task Leader Role/Responsibility	% Current Commitments	% Project Availability
South Texas Infrastructure Group, L.L.C. (STIG) **900 S. Stewart Rd. Ste. 13** **Mission, TX 78572**	Julio Cerda, P.E.	Senior Project Manager	30%	70%
	Victor Treviño, P.E., R.P.L.S.	Design	20%	80%
R.O.W. Surveying Services, L.L.C. (ROW) **900 S, Stewart Rd. Ste. 13** **Mission, TX 78572**	Victor Treviño, P.E., R.P.L.S.	Surveying Task Leader	35%	65%
L&G Engineering, L.L.C. (LGE) **900 S. Stewart Road, Suite 5** **Mission, TX 78572**	David Saenz, P.E.	Environmental Engineering	40%	60%
KCI Technologies, Inc. (KCI) **2610 N. Shary Road** **Mission, Texas 78574**	Oscar Garza, P.E.	Engineering	40%	60%

Team Task Leaders

Julio Cerda, P.E. (STIG) will serve as the project manager and will liaise directly with the City of Edinburg and the remainder of the STIG/ROWSS/LGE/KCI leadership team. Mr. Cerda's commitment to client service and excellent communication has allowed STIG to maintain a constant client base throughout the Rio Grande Valley.

Victor Trevino, P.E., R.P.L.S. (STIG) has over 11 years of experience in engineering design in the transportation and development industry. Victor assisted Mr. Cerda on the delineation of drainage areas and in the H&H Modeling on Project 22 (Mile 11 N. & FM 1015-2018 Bond Referendum Project #22). He also has experience in management, design, street and utilities and land development projects. His experience includes developing construction plans for approval by the engineer, platting and permitting and managing construction projects.

Victor Trevino, P.E., R.P.L.S. (ROWSS) will be responsible for the direction of survey technicians and field crew and execute QA/QC for any survey done for the project. Mr. Trevino has more than 11 years of experience in professional surveying experience with vertical and horizontal control, topography, cross sections, photogrammetric ground control, boundary surveys and construction layout. This position includes performance of route surveys, boundary surveys, platting, topographic mapping, construction staking, providing quality control, direction field crews and office technicians, budgeting, scheduling, project management and client development.

David Saenz, P.E. (LGE) will serve as the Environmental Engineer for the City of Edinburg Project. Mr. Saenz is available to work immediately and see the project to a successful completion by working with the City of Edinburg staff. He will meet with the STIG and City's staff as needed to discuss environmental reports for the project

Oscar Garza, P.E. (KCI) and his staff will assist with the QA/QC and sewer plan design for this project. Mr. Garza has 12 years of engineering experience with various engineering firms in Texas. His firm has experience and is familiar with local municipal and state regulations required for engineering projects.

YEARS OF EXPERIENCE

Civil Engineering Design Public Works (26+ years)

Mr. Cerda has over 26 years of experience in the design and management of various public improvement projects. For eight years Julio served as City Manager for the City of Mission overseeing the operations of the City Engineer and Public Works Director. He has previously worked as a City Engineer for the City of Mission and previous to that for the City of Harlingen. In between working for these cities, he worked as the Asst. Cameron County Engineer overseeing several drainage and roadway projects. Previous to all, he worked for the Texas Department of Transportation as a design engineer. With positions of head of departments in all of these entities provided him with excellent hands on experience with government projects. Julio has been able to take his work experience and utilize it to provide effective engineering services. Furthermore, Julio has worked extensively on the detailed design and development of numerous roadway and drainage projects. He has designed and developed roadway geometrics, traffic control plans, Storm Water Pollution Prevention Plans (SW3P), signing and pavement marking layouts, culvert and storm sewers, general notes, estimates and specifications and coordinated adjustments of conflicting utilities. Julio is also very familiar with Texas Department of Transportation, Federal Highway Administration, Hidalgo County and AASHTO regulations and design criteria. Julio also has extensive experience coordinating with utilities and local irrigation and drainage districts in Hidalgo County.

PROJECT EXPERIENCE

Alberta Rd. Reconstruction (City of Edinburg): This project consisted of reconstructing Alberta Rd from West City Limits to ¼ Mile East of Jackson RD. (Julio Cerda, P.E.) served as the Project & Design Manager for this project. STIG developed the PS& E for widening the 49'B-B Roadway to include sidewalks with no Right of Way to be taken. Duties included contract management, QA/QC, construction phase services and local letting. Duties included design task included hydraulic design, horizontal and vertical alignment and traffic.

ELM Drainage Project (City of Mission): This Project consisted of upgrading the existing storm sewer system by upsizing the existing storm drain pipes, adding new storm drain pipes and channel improvements. (Julio Cerda, P.E.) served as Project & Design Manager for this project. Duties included contract management, QA/QC, construction phase services and local letting. Design tasks included storm drainage design. Provided drainage area map, hydrologic data, hydraulic data sheet, and horizontal and vertical alignments for the storm drain improvements.

Mile 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station. Project Scope: STIG (Julio Cerda, P.E.) served as the Project & Design Manager for this project. Duties included contract management, QA/QC, construction phase services and local letting. Design tasks included hydraulic design, hydrologic modeling system (HEC-HMS), horizontal and vertical alignment, drain typical section, design cross-sections and storm water pollution prevention.

SH 4, SH 48 @ FM 511 Intersection (TxDOT Pharr District CSJ:1504-01-031): This project consisted of the reconstruction of the major intersections from Veterans International Bridge to Port of Brownsville. Being an overweight corridor for the Mexican trucks to the Port of Brownsville, Mr. Cerda designed the intersections to the 100k to 125k trucks and trailers into the Port of Brownsville. The design and development consisted of grading, storm sewer structures, lime treated subgrade, asphaltic concrete pavement, concrete pavement, curb and gutter, roadway signage, and pavement markings. Mr. Cerda was responsible for the design and development of the roadway plans, specifications, and estimate. During the construction phase, Mr. Cerda provided the guidance to the chief inspector and contractor as the project engineer.

YEARS OF EXPERIENCE

---

11 years

Mr. Treviño has over eleven (11) years of experience in management, design, street and utilities and land development projects. His experience includes developing construction plans for approval by the engineer, platting and permitting and managing construction projects. Mr. Treviño has worked as a project designer in new subdivisions for developers, calculating storm water detention and pipe sizes, designing water distribution, wastewater collection systems, street and roadway development, cost estimates, and cost-efficient recommendations.

PROJECT EXPERIENCE

Alberta Rd. Reconstruction (City of Edinburg): This project consisted of reconstructing Alberta Rd from West City Limits to ¼ Mile East of Jackson RD. (Victor Trevino, P.E.) served as the Project Engineer for this project. Mr. Trevino developed the PS& E for widening the 49'B-B Roadway to include sidewalks with no Right of Way to be taken. Duties included design task included hydraulic design, horizontal and vertical alignment and traffic.

Mile 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station. Project Scope: STIG (Victor Trevino, P.E.) served as the Project Engineer for this project. Duties included design tasks included hydraulic design, hydrologic modeling system (HEC-HMS), horizontal and vertical alignment, drain typical section, design cross-sections and storm water pollution prevention.

ELM Drainage Project (City of Mission): This Project consisted of upgrading the existing storm sewer system by upsizing the existing storm drain pipes, adding new storm drain pipes and channel improvements. (Victor Trevino, P.E.) served as Project Engineer for this project. Design tasks included storm drainage design. Provided drainage area map, hydrologic data, hydraulic data sheet, and horizontal and vertical alignments for the storm drain improvements.

Inspiration Rd Water and Sewer Adjustments (City of Mission): This project consisted on the relocation of water lines and sewer lines being in conflict with the expansion of Inspiration Rd. The project consisted on the relocation of 10,500 LF of 12" water line, 1,700 LF of 8" waterline, 2,300 LF of 16" sewer force main, 590 LF of 12" sewer force main and 600 LF of 10" sewer force main. The purpose of this project is to have water and sewer cleared for the reconstruction of Inspiration Rd. All of the design was developed so that it worked with the proposed street and drainage plans developed by L&G Engineering. Mr. Treviño prepared sanitary sewer plans, force main plans, water lines plans, profiles and details for the engineer.

RCW Subdivision Drainage Improvements: This project consisted grading ditches, installing storm sewer; driveway pipes and safety end treatments. Project Scope: (Victor Trevino, P.E.) served as the Project Engineer for this project. Design tasks included storm drainage design for RCW Subdivision. Provided drainage area map, hydrologic data, hydraulic data sheet, and horizontal and vertical alignments for the storm drain improvements.

Jonathan Garcia, Graduate Engineer

EDUCATION

University of Texas Rio Grande Valley – Edinburg, TX

Bachelors Degree -Civil Engineering Year 2016

YEARS OF EXPERIENCE

7+ Years

Mr. Garcia has 7+ years of experience as a Graduate Engineer in the civil infrastructure area in project that vary from residential & commercial developments to roadways & utilities locate. Mr. Garcia is knowledgeable in all aspects of surveying including CADD software design, preparing legal descriptions, problem-solving, and research.

Project Experience:

Mayfair Residential Subdivision, Mission Texas. Assist Professional Engineer in the development of an 83 Lots Residential Subdivision located in the City of Mission, Texas. The duties involved vary from collecting topographic information, deed research, preliminary design for map layout, design utilities according to the City of Mission design parameters, calculate construction estimates, coordinate construction with the contractor, recording of the documents such as easements, boundaries and final plat.

Carrizales Residential Subdivision, Mission Texas. Assist Professional Engineer in the development of an 48 Lots Residential Subdivision located in the City of Mission, Texas, ETJ. The duties involved vary from collecting topographic information, deed research, preliminary design for map layout, design utilities according to the City of Mission design parameters, calculate construction estimates, coordinate construction with the contractor, recording of the documents such as easements, boundaries and final plat.

Palo Alto Residence Phase 1 & 2 Residential Subdivision, Brownsville Texas. Assist Professional Engineer in the development of an 124 Lots Residential Subdivision located in the City of Brownsville, Texas. The duties involved vary from collecting topographic information, deed research, preliminary design for map layout, design utilities according to the City of Brownsville design parameters, calculate construction estimates, coordinate construction with the contractor, recording of the documents such as easements, boundaries and final plat.

FM 1925 Road (10th Street to McColl Road) San Benito, Texas. Survey Technician responsible for deed research, abstract maps, sketch 38 parcels plats, parent tract, metes and bounds descriptions & closure report.

US 77 83 South Parallel Corridor (FM 2520-FM 1577), San Benito, Texas. Survey Technician responsible for deed research, abstract maps, sketch 45 parcels plats, parent tract, metes and bounds descriptions & closure report.

Taylor Rd Water and Sewer Adjustments, McAllen, Texas. Assist in the relocation of Water & Sewer Utilities. Duties involved vary from locate Utility companies for information of the existing utilities, collect & process topographic information, mapping of the existing conditions, design the proposed improvements, sketch the construction sheets and calculate the estimate the construction cost.

Mr. Treviño has over ten (11) years of professional surveying experience.

PROJECTS:

Inspiration Rd/Military Pkway: This Project consist of field surveys for engineering from US 83 to Military Pkway. Responsible for right-of-way retracement of approximately 4.46 miles of highway. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for this project.

Mile 11 North & FM 1015-2018 Bond Referendum Project #22 (6.5 Miles): Hidalgo County Precinct, July 1, 2019-Ongoing. This project consisted of making improvements of 6.5 miles of channels, including local detention systems and pump station. **Project Scope:** STIG (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for this project. Duties included establishing benchmark identifications and tie into approved USGSSSS, FEMA or County Benchmark data; obtain data of existing drainage facilities and/or structures, including size, type, and flowline (upstream & downstream) elevations of structures; obtain profiles of intersecting roadways that cross existing and proposed channels; obtain data for all existing or proposed utilities that may affect the project, including but not limited to water lines, sewer lines, gal lines, telephone lines, cable lines, etc.; obtain flood plain and cross-section (along with appropriate overbank data), and establish reach lengths, as required; primary project control points (horizontal and vertical control points) and secondary control points; and coordinate with various agencies; data collection.

Bus 281 - SH 107 Roadway & Drainage Improvements: (ROW) This Project consist of field surveys for engineering from Courthouse Square to HWY 281/ Existing Outfall to Raul Longoria. Responsible for right-of-way retracement of approximately +/- 1.5 miles roadway / 1.1 Miles Existing Outfall. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for this project.

Mile 10 Road (Mile 6 to SH 1015): (ROW) This Project consist of field surveys for engineering from Mile 6 to SH 1015. Responsible for right-of-way retracement. Provided recovery of and re-establishment of existing centerline and right-of-way monuments, conducted deed research, analysis of right-of-way, monumentation of right-of-way with new monuments set, and provided right-of-way maps. Parcel Plats, Metes and Bounds descriptions, and final ROWSS deliverables. (Victor Trevino, P.E., R.P.L.S.) served as the Project Engineer for

RESUMES

OSCAR GARZA, PE

Project Manager

Education:
BS / Civil Engineering / 2011 / The University of Texas, Rio Grande Valley

Registrations/Certifications:
PE / TX / 122125 / 2015

Years of Experience: 10 years
Years with KCI: 4 years

Oscar Garza is a project engineer with KCI and has more than ten years of experience in the civil engineering industry. Oscar's experience includes roadway design, hydrology, hydraulics, traffic design, and construction engineering and inspection.

He is proficient in legacy GeoPAK (2D Design), SS3, and newer 3D Modeling and Design. He has a high understanding of governing design manuals and codes including: TxDOT 2014 Roadway Design Manual, TxDOT Hydraulic Design Manual, TxDOT Geotech Manual, HEC-18, AASHTO Green Book, AASHTO Roadside Design, AASHTO Pedestrian Facilities, FEMA Flood, Fed Aviation Admin., Railroad Commission, and Texas Administrative Code. Oscar is also experienced in using Watershed Modeling System and GIS driven software to increase efficiency of performing hydrologic analysis.

US 281, Texas Department of Transportation, Pharr, TX. **Project Engineer.** This project included PS&E for the proposed improvements to US 281 under Contract No. 21-85DP5003. The project limits are from 0.60 miles south of SH 186 to 0.34 miles north of FM 490 in Hidalgo County, Texas.

Mile 1 East. City of Mercedes, TX. **Project Manager.** This project included S&E review and PS&E services for the reconstruction of Mile 1 East for the City of Mercedes. This 1.40-mile corridor runs from BUS 83 (south end) to the Mile 8 North (north end) and consists of urban and rural roadways. This project is a local let project in Hidalgo County funded by federal, state, and city monies. KCI is involved in developing the Advanced Funding Agreement between the RGV MPO, TxDOT, City of Mercedes, and Hidalgo County.

US 83 La Joya Relief Route, Texas Department of Transportation, Pharr, TX. **Project Engineer.** This project included Schematic and Environmental and PS&E for 9.16 miles of new location rural highway and storm drainage system consisting of frontage roads and direct connectors from existing US 83 to the proposed relief route.

SH 75 Hydraulic Impact Analysis, Texas Department of Transportation, Houston, TX. **Project Engineer.** This project involved preliminary engineering services to conduct a hydraulic study to determine the needs for detention ponds and verify the preparing schematic design to meet drainage requirements for the widening of SH 75 from FM 3083 to FM 2432 in Montgomery County, Texas.

FM 1847, Texas Department of Transportation, Cameron County, Pharr, TX. **Project Manager.** Mr. Garza served as Project Manager for rehabilitation and widening of the existing roadway. He completed the grading, flexbase, asphaltic concrete pavement, signing and pavement markings, drainage improvements, replacement of irrigation structures and bridge widening. He designed the signing and pavement marking scheme and channelization plans per TMUTCD. He also performed the hydrologic analysis including defining the drainage area, selected design storm and duration, determined gross precipitation depth, established time of concentration, and calculated existing condition runoff. Mr. Garza analyzed and designed the open system using HY-8 including roadside ditches for storage and conveyance, cross culverts, and three drainage ditches sized and graded utilizing a special excel program that he wrote. He also conducted a full scour analysis of the subject bridge including creating HEC-RAS models and writing a Level II Bridge Scour Analysis report consisting of all hydraulic calculations, design, and methodology.

RESUMES

DAVID RUSSELL, PE

Water Designer

Education:
BS / Civil Engineering / 2011 / University of Texas, San Antonio

Registrations/Certifications:
PE / TX / 123318 / 2016

Years of Experience: 9 years
Years with KCI: 5 years

Mr. Russel is a Project Manager with ten years of experience. His passion for the work, ability to collaboratively partner with his clients and desire to lead to a team has propelled his career in just a few short years. He offers diverse expertise in all phases of the project lifecycle from inception to completion; to include design, planning, accessing utility conflicts, and construction oversight. Mr. Russell has provided consulting services on various general civil and utility infrastructure projects for state, county, and city agencies.

2018 Dead End Mains, San Antonio Water System, San Antonio, TX. **Project Engineer.** KCI provided planning/design services. Part of this effort was to also identify the initial grouping of projects to meet cost restraints for the 2018 budget. This Group 1 was in the middle of an extremely fast-track schedule to make SAWS board in January. The design included 1,500 LF of 8 through 16-inch water mains at 10 different locations within SAWS service area. The project bid within 2.5% of the engineer's estimate and is currently under close- out phase after recent completion of construction.

US 181 Harbor Bridge Project, Flatiron/Dragados LLC, Corpus Christi, TX. **Water and Sewer Task Manager.** The majority of the distribution system was placed in service using asbestos cement pipe (ACP) and or a combination of materials such as cast iron, ductile iron and polyvinyl chloride pipe. Water main systems range from 4"-16" in diameter. Using TxDOT's Utility Accommodation Requirements, 88,000 LF of water main system improvements were identified. KCI prepared 13 packages to accomplish the relocation designs. Methods included remove/replace, reroute/abandon, and parallel/abandon. All designs were prepared in accordance with governing TxDOT and Corpus Christi requirements. Portions of existing, intersecting water main systems identified to remain in service were connected. The remaining portions of the existing water main systems were either removed or grout-filled and abandoned in place.

Carmona Hills Subdivision, KB Home Lone Star Inc., San Antonio, TX. **Project Manager.** Mr. Russell provided engineering design and project management services. KCI's services included land planning, platting, street and drainage design, tree mitigation and permitting, to include SAWS water and wastewater design, and utility coordination. City of San Antonio and SAWS plan approval submittals, and construction oversight to include testing was part of the scope of work. 2,099 LF of 8-inch diameter gravity wastewater was installed, associated wastewater manholes, and service connections were designed and installed in accordance with SAWS Utility Service Regulations. The design was also checked for compliance with SAWS and TCEQ regulations. Construction reports were provided to SAWS inspectors at time of Field Acceptance Records.

Premont Lift Station, Texas Department of Transportation, Premont, TX. **QA/QC.** Design for a new 2.0 MGD capacity, triplex lift station to serve the City of Premont, Texas. The team provided civil site, electrical, mechanical, structural, and architectural documents for the improvements. The work included the abandonment of approximately 5,200 LF of 15-inch sanitary sewer; the phased abandonment and demolition of the existing 70-year old, 1.0 MGD duplex lift station; relocation of the existing electrical service and emergency generator; design of approximately 3,900 LF of new 15- to 30-inch diameter gravity sanitary sewer, 650 LF of new 8-inch diameter force main, a 16-foot diameter wet well, pump controls, control building, access road and other site improvements. Given the age of the facility, no record information was available. Mr. Russell provided quality assurance/quality control on the pipelines for the project.

RESUMES

KATHY BEREK, PE, ENV SP

Practice Leader

Education:
BS / Civil Engineering / 1980 / University of Delaware
ME / Civil Engineering / 1996 / The University of Texas

Registrations/Certifications:
PE / TX / 87628 / 2001
ENV SP / 18346 / 2016
IAM Certificate in Asset Management – The Principles in Asset Management

Years of Experience: 33 years
Years with KCI: 5 years

Ms. Berek is a seasoned engineering manager with 34 years of experience on all phases of public works projects with the goal of safe on-time on budget completion of the intended project. She is consistently supporting the coordinate collaboration between contract and public agency teams, optimizing the allocation of resources for initiatives totaling up to billions of dollars. This included all phases of planning, implementation and management of engineering design / construction operations with the introduction of new processes, procedures, systems, and controls. She provides team members with the training, resources, guidance, to prepare for challenging project needs.

Program Management for Construction Management and Inspection – NETL Program, City of Houston, Houston, TX. **Construction Management Program Manager.** KCI provided Program Management for the Construction Management and Inspection (CM&I) tasks for each of the 13 large diameter (54-inch to 120-inch)
water line projects that fall within the City's Surface Water Transmission Program. Task include the management of CM&I firms, constructability reviews, risk analysis and management, senior inspection, construction inspection training, project scheduling and controls, Stakeholder coordination and Public outreach, development and monitoring of standardized CM&I procedures.

6-MGD Surface Water Treatment Plant, City of San Marcos, San Marcos, TX. **Design Engineer.** Assigned to liquid chemical feed system, including pumping system, bulk storage tanks, monitoring instruments, and disinfection facilities (chlorinators, vacuum regulators / ejectors, solids contact clarifier - tube settlers, sludge blow-down valve, and re-circulation pump). Planned the design for 36 MGD for future plant capacity.

Disinfection Schemes for Various Water Treatment Plants, , Various Locations, TX. **Design Engineer.** Delivered disinfection studies for alternative disinfection schemes focused on Bistone MWD, Mansfield, San Marcos, Brazos River Authority, and Waxahachie water treatment plants.

High Service Pump Station and Clearwell Design, City of Mansfield, Mansfield, TX. **Project Manager.** Spearheaded design of Upper Pressure Plane High Service Pump Station (cast-in-place) encompassing 3 3,600-GPM, 350-HP pumps, new electrical building, and 1.5-MG baffled cast-in-place clearwell. Project required retaining wall, fence, and architectural / sound control due to proximity to residential area.

Integrated Pipeline Program Conceptual Study, Tarrant Regional Water District, Dallas, TX. **Client Services Manager.** Participated in TRWD and Dallas partnering sessions for planning the $2.3B program. Collaboration included preparation of the finance and delivery agreements between the two agencies, plans for program procurement and communication, risk assessment, and 150-mile corridor analysis

Richland Chambers Pipeline System High Capacity Expansion, Tarrant Regional Water District, Fort Worth, TX. **Principal-in-Charge.** Supported construction of 240 MGD new booster pump station at Ennis as well as 240 MGD expansion of existing booster pump station in Waxahachie. Project encompassed electrical substations, storage tanks, yard piping, 5000 horsepower pumps, motors, and variable frequency drives. Pipeline system draws water from Richland-Chambers reservoir. Achieved the Texas CEC Silver Award in 2006.

Rockwell-Heath Transfer Sewer, North Texas Municipal Water District, Rockwell, Heath, and Forney, TX. **Project Manager.** Managed construction of a 15-mile transfer sewer system serving multiple cities (Rockwall, Heath, and Forney) and connecting to NTMWD's South Mesquite Wastewater Treatment Plant. Led design / construction of 36- to- 48 inch diameter trunk sewer, lift station, and splitter box structure.

Rowlett Creek Wastewater Treatment Plant (WWTP) Emergency Scrubber Project, City of Garland, Garland, TX. **Owner's Engineer.** Delivered expertise and support of construction administration focused on city's role of general contractor for the Emergency Scrubber Project. Analyzed equipment shop drawings, equipment / staff scheduling, pay estimates, contract modifications, and change orders.

Rowlett Creek Wastewater Treatment Plant (WWTP) Emergency Scrubber Project, City of Garland, Garland, TX. **Owner's Engineer.** Coordinated design operations for enclosing an existing chlorine ton-cylinder storage area with concrete tilt walls, moving sulfur dioxide feed system to building for protection by a 1-ton dry media chlorine / sulfur dioxide scrubber. Drove demolition of a bridge crane and replaced it with 2 monorails. Installed new chlorine residual sampling point at plant outfall (radio system for signal return to SCADA plant).

Surface Water & Treatment System (SWATS) Expansion – 15-MGD, Brazos River Authority, Granbury, TX. **Design Engineer.** Engineered design and construction for solids contact clarifier ultra-filtration membrane system, reverse osmosis membrane system and storage / feed systems for lime, soda ash, ammonia, and carbon dioxide. Conducted review and processing of shop drawings, requests for information, contract modifications, and preparation of information logs.

Wastewater Improvements Project, Confidential Client, Vicksburg, MS. **Regional Water Operations Manager.** The improvements include above ground surge and equalization tanks and pumps for handling storm water across the refinery and redundant dissolved nitrogen flotation (DNF) process units. These improvements will provide improved stormwater management and oil-water separation to achieve their NPDES discharge requirements.

Water Conservation, Dallas Water Utilities, Dallas, TX. **Client Services Manager.** Provided program management for four local public relations firms. Delivered expertise in the areas of budgeting, program operations, scheduling, media planning, and coordination of joint efforts with TRWD.

Water Treatment Plant Expansion Preliminary Design, Trinity River Authority (TRA), Huntsville, TX. **Project Manager.** Coordinated development of technical memoranda on Water Demand / Supply Projections, Membrane Evaluation, High-Service Pumping Improvements, and Solids Handling as well as Alum Recovery and Nitrate Removal Process Evaluation.

Water Treatment Plant Improvements, City of Waxahachie, Waxahachie, TX. **Task Manager.** Functioned as Task Manager in design of chemical feed facility, encompassing chlorine ton cylinder storage area / monorail and delivery as well as vacuum chlorine feed system. Performed expert analysis of CT evaluation, chemical bulk storage containment and delivery area for alum, caustic, liquid ammonia sulfate, fluoride, and sodium chlorite.

Water Treatment Plant Up-Rating Study, City of San Marcos, San Marcos, TX. **Task Manager.** Served as Task Manager charged with overall review of flow, turbidity, TOC, THM, HAA and additional water quality parameters as well as hydraulic analysis of treatment units. Reviewed chemical feed / storage, backwash, and solids-handling facilities. Findings resulted in up-rating report for TCEQ capacity increase from 6- to 9-MGD.

David A. Saenz, P.E., C.F.M.

EDUCATION

Texas A&M University – Kingsville, Bachelor of Science in Civil Engineering with Honors, 2003
Member of Tau Beta Pi, National Engineering Honor Society

PROFESSIONAL REGISTRATION

Professional Engineer, State of Texas, 2008, #102365
Certified Floodplain Manager, FEMA, 2011, Certification # 2205 11N
TxDOT Pre-Certified Categories – 3.1.1, 3.2.1, 3.3.1, 3.4.1, 3.5.1, 4.1.1, 4.2.1, 4.3.1, 5.1.1, 8.1.1, 10.2.1, 10.5.1, 11.1.1, 12.1.2, 14.1.1, 14.2.1, 14.3.1, 14.4.1

PROFESSIONAL EXPERIENCE

- **Project Manager/Engineer**, L&G Consulting Engineers, Inc. (L&G) — Dec. 2008 – Present
- Engineering Assistant, L&G Consulting Engineers, Inc. (L&G) — Nov. 2007 – Dec. 2008
- Engineering Assistant, Texas Dept. of Transportation – Pharr District — Jan. 2004 – Nov. 2007

Mr. Saenz's post graduate engineering career begin at the Texas Department of Transportation (TxDOT) in the Pharr District Bridge Section working primarily in bridge review, bridge management, structural design and PS&E design. Under Bridge Review, he provided QC/QA of bridge geometry, bridge details and bridge design for many large scale expressway projects including US 83, US 281, and US 77/83 projects. Under Bridge and Structural Design, he provided design & details for various bridge types including slab & box beam bridges, I-beam bridges and girder bridges.

At L&G Engineering, Mr. Saenz works in a dual role providing a general **Project Engineer** role for L&G Engineering with responsibilities in planning, designing and project development of roadway and bridge geometrics, cross sections, hydrologic & hydraulic analyses, schematics, bridge designing and detailing, structural analyses, geotechnical analyses, project construction cost estimates and scheduling, general notes and bidding documents. His primary duties in this position are bridge geometrics/design, retaining wall geometrics/design, structural geotechnical projects, pavement design projects and hydraulic analyses for bridge design. Mr. Saenz also serves as the **Laboratory Engineer of Record/Geotechnical/Construction Material Testing (CMT) Engineer**. In this position Mr. Saenz is responsible for all engineering, geotechnical and construction material testing (CMT) laboratory projects in addition to the managing of various aspects of the engineering laboratory. His duties also include overseeing personnel during the development and subsequent completion of L&G projects and providing QC/QA (L&G Quality Control Director) for all laboratory testing procedures (verifying laboratory compliance with ASTM, AASHTO, ACI, TAPA and TxDOT testing requirements as specified by project). He is responsible for the review of all commercial/governmental CMT reports produced by L&G. Additionally; Mr. Saenz typically serves in the lead design role with the development and analyses of Geotechnical Studies and Recommendations for various clients. Mr. Saenz has a wealth of hands-on experience in soil classification, soil testing, and concrete field and lab testing. He has completed over 125 Geotechnical Studies in South & Central Texas including over 50 Transportation Facilities.

PROJECT EXPERIENCE (Major Projects in the Area of Geotechnical Engineering & CMT)

- Hidalgo County and DHS Levee Re-Construction and Floodwall Project
- USIBWC Lower RGV Interior Flood Control System Projects
- HCRMA SH 365 Segment I/II/III & IBTC Project
- FM 396 Anzalduas Extension and US 83/FM 396 Project (Anzalduas International Corridor)
- US 77 Project and SH 550 Project (Controlled Access Facilities – Expressway Type) (2 Projects)
- US 83 Expressway at Inspiration Rd. Project (Geotechnical Engineering for Bridge/Ret. Walls/Pavement)
- CCRMA – SPI 2nd Access Bridge Project (Geotechnical Engineering and Pavement Designs)
- CCRMA – SH 550 Toll Project (Geotechnical Engineering and CMT)

L&G Consulting Engineers, Inc.

Ricardo S. Gallaga, Jr., P.E.

EDUCATION

Texas A&I University at Kingsville, Bachelor of Science in Civil Engineering, 1984

PROFESSIONAL REGISTRATION

Professional Engineer in the State of Texas since 1990, Serial No. 67612
Local Government Project Procedures Qualification for TxDOT (LGPP)

PROFESSIONAL EXPERIENCE

L&G Eng. / L&G Eng. Lab., **Sr. Project Manager and Sr. Construction Eng.**	2012 – Present
TxDOT, Assistant Area Engineer (San Benito - Pharr District)	1993 – 2012
TxDOT, Design Engineer (Pharr District, Pharr Area Office)	1990 – 1993
TxDOT, Construction EIT/Inspector (Tarrant Cnty Const, Ft Worth District)	1984 – 1990

Mr. Gallaga has over 28 years of experience in the public sector (beginning his career and working with TxDOT until retirement in 2012 and subsequently joining L&G Consulting Engineers, Inc. (L&G) (including L&G Lab). Mr. Gallaga brings a wealth of knowledge and experience in general transportation infrastructure projects with an emphasis in the fields of Construction Engineering including construction development, oversight, inspection, management, contract administration and scheduling. As the San Benito Area Office Assistant Area Engineer, he oversaw and was directly responsible for all of the Area Office construction projects which included the expansion of the major corridors (US 77 and US 83) during a time noted as the District's and San Benito Area Office's heaviest workload period since inception. Mr. Gallaga's experience in the field of Construction Engineering stems from his time as a Construction EIT/Inspector, and Assistant Area Engineer (over 25 years). As the Assistant Area Engineer with TxDOT San Benito Area Office, he was directly in charge of many large scale projects including the US 77 / US 83 Interchange project and all of US 77/US 83 construction projects from Harlingen to Brownsville Los Tomates Bridge. He was also directly in charge of the US 83 construction expansion from US 77 / US 83 Interchange in Harlingen to Cameron/Hidalgo County Line. Mr. Gallaga is also highly cognizant of the necessary oversight requirements of Geotechnical Testing (GEO) & Construction Material Testing (CMT) programs for construction and has personally overseen testing to ensure compliance with project specifications. At L&G Engineering, Mr. Gallaga serves as the **Senior Project Manager & Senior Construction Engineer**. Mr. Gallaga also provides QA/QC for testing and laboratory oversight.

IN THE AREA OF CONTRACT ADMINISTRATION: Mr. Gallaga was responsible for oversight of the San Benito Area Office construction program during the expansion of two primary Expressway corridors (US 83, US 77). Other projects included added capacity projects, off-system bridge projects, seal coat and overlays projects as well as various and miscellaneous project types. During this period, he participated in the resolution of disputes and claims associated with various construction issues. He has an extreme understating of necessary requirements to formally process field change orders as necessary and provide overall documentation requirements.

IN THE AREA OF CONSTRUCTION MANAGEMENT / ENGINEERING / INSPECTION: Mr. Gallaga was responsible for the day to day project activities and requirements as well as the management of various types of projects as the Assistant Area Engineer in the TxDOT San Benito Area Office. He is well versed in the requirements of transportation infrastructure construction projects and can provide insight in to potential pitfalls that can be attributed to construction scheduling issues and conflicts. He has coordinated work with various local and state to ensured Contractor compliance with contract documents. He has verified and approved shop drawings for construction.

PROJECT EXPERIENCE (Major Projects in the Area of Geotechnical Engineering, CMT & CEI)

- US 83 Expressway from Hid/Cam Cnty Line to Brownsville, TX
- US 77 Expressway from Cameron/Willacy Cnty Line to North of Raymondville TX
- US 77 Expressway and US 83 Expressway Interchange in Harlingen, TX
- SH 100 from US 77/83 Expressway to Laguna Vista
- SH 550 from US 77 to SH 48

Re: RFQ No. 2024-009 –Engineering Services Rotation

Dear Ms. Balderas:

Supreme Engineering, PLLC (Supreme) is pleased to submit our Statement of Qualifications to City of Edinburg for the 2024 Professional Engineering Services.

Supreme has been providing Professional Services since 2019; therefore, we are confident that our company diverse team is qualified to serve the needs of City of Hidalgo and our communities. We are eager to demonstrate that our experience and motivation will produce a quality product that will meet your expectations. Our Team gained firsthand experience with municipal and county projects by means of employment; therefore, our Team is very familiar with City of Edinburg needs. The Team gained over twenty-five (25) years of combined experience and worked closely to plan, design, draft, and perform quality assurance on various projects.

We are looking forward to developing a continuous professional relationship with City of Edinburg.

Should you have any questions or need additional information, please feel free to call me as the main point of contact at 956-272-2246 or email me at omar.cano@supremeengineering.com.

Sincerely,

Omar Cano, PE, CFM
President

Section 2
Firm Qualifications and Experience

FIRM QUALIFICATION AND EXPERIENCE

Project Needs

Supreme Engineering, PLLC (Supreme) understands that in order for City of Edinburg to proactively manage the City's needs, especially in efficient and timely manner to alleviate the City's infrastructure and to protect life and property for City of Edinburg's residents, businesses and surrounding jurisdictions, may contract with qualified engineering firms to assist with this endeavor. Road/Utility infrastructure and Drainage have had a major impact in City of Edinburg in the past years. This has impacted the city economically, and it has reached the residents Citywide. Many state and federal agencies have open new grant and loan opportunities to mitigate the latest natural disaster declarations allowing City of Edinburg the opportunity to seek assistance from these federal and state agencies to assist with major infrastructure which will results in benefits for the residents.

Engineering and Project Management

Supreme has experience in the past years with preparation of plans, specifications, and estimates (PS&E), utility relocation, water and sewer distribution, signage, pavement markings, traffic, project management, drainage design and hydraulics. Our approach to ensuring that the Engineering work required is performed in a timely manner is as follows:

I. Preliminary Phase

The preliminary phase will consist of meeting with City of Edinburg to ensure that a clear and concise understanding of the project and that City's expectations are met. Scope of work, budget and project schedule will be clearly defined.

1. Design Concept Conference: The DCC will take place with the City and stakeholders to discuss the fundamental aspects of the project along with the roles and responsibilities of each team member.
2. Surveying and any relevant geotechnical will be performed to commence design.
3. Utilities and permitting will be identified and addressed accordingly.
4. Preliminary Engineering Report with cost estimate(s) will be prepared and reviewed by the City. Upon approval, the Design Phase, which has commenced, will move forward.

II. Design Phase

The design will be based on the approved option by the City. The design will incorporate the survey and will consider any utility conflicts that will need to be adjusted, relocated, or addressed. A 30%, 60%, 90% and 100% PS&E package will be submitted to the City for review. Comments will be addressed accordingly.

III. Bidding Phase

1. Pre-Bid Conference – will meet with prospective bidder to answer questions regarding the design of the project. A list of questions and answers will be prepared.
2. Bid Opening – open bids from prospective bidders. A bid tabulation will be prepared and submitted to the City with a recommendation to award the project to the qualified bidder.

IV. Construction Phase

During the construction phase, assist the City with the Bid Package and Construction Contract execution. Throughout the construction phase, constant communication will take place with City and the Contractor.

1. Pre-Construction Conference: will meet with City, Contractor, Utility Companies, Geotechnical / CMT, Cities, Precincts, and USIBWC, as applicable.
2. Perform site visits / construction management.
3. Prepare responses to Requests for Information (RFIs).
4. Prepare Change Orders.
5. Review Pay Applications for City's approval.
6. Prepare and Submit As-Builts.
7. Prepare Project Close Out Documents.

Past Projects

While Supreme is a newcomer and is working to build its company portfolio, we are confident that the experience our Team offers is able to meet the engineering needs of City of Edinburg. Those services include but are not limited to the following: A.) Route and Design Studies, right of way maps and data, utility adjustments, surveying, pre-design; B) Roadway Design, Drainage Design, Solid Waste, signing, markings and signalization, traffic control plans, plans and specifications, bid preparation; C) plans, drawings and specifications; D) Construction Management & Inspection, design for new construction, design for alterations / renovations, needs assessment, ADA compliance, cost estimating.

Hidalgo County Drainage District No. 1

Trenton Drain Phase III – Project limits are from Southwest Trenton to North of Wisconsin to connect to the South Main Drain I in Edinburg. New ditch that serves 12 colonias to have a drainage outfall. 1.7 Miles of drainage ditch and 2 major crossings.

Hidalgo County Drainage District No. 1

South Main Drain II Phase I Ditch Improvements – The project consisted of improving the existing South Main Drain II from McColl Road to I69C in Edinburg. The improvements consist of maximizing the cross sections of the ditch to take advantage of the existing ROW. This not only helps many existing subdivisions using it as an outfall but also will help other communities from western cities by reducing water surface elevation of the ditch.

City of Edinburg

Jackson Rd Hike & Bike Phase I – Project limits are from Canton to Chapin, 2.8 miles, first of its class in Edinburg. The project consisted of rest areas and parking areas, designed for future connectivity to other cities.

Private Development

Canton Heights Subdivision Development – Project limits are from I69C to Raul Longoria Road in Edinburg. The project consisted of improving the existing South Main Drain I to connect and accommodate the proposed new development's storm system.

Firm Uniqueness to Perform

Supreme has an advantage to perform due to the fact that his team has several years of experience in local government. The team understands and easily identify the City's needs which results in a proactively solution to solve and/or alleviate the issues.

For instance, hurricanes and rain events have recently produced multiple 500-yr storms in our area, causing a significant amount of flooding, damaging homes, personal property, and businesses. Our team understand the need for large projects that will significantly increase the capacity of the Drainage System to bring flooding relief to the City of Edinburg by identifying potential funding for these projects.

City of Edinburg along with its counterparts strive to implement drainage requirements for new development to ensure that these developments take the necessary measures to mitigate stormwater out of the area as quickly as possible.

Supreme understands the need to design projects that will meet the goals of the City of Edinburg. These projects; however, must be designed within City's budget. Supreme is also familiar with the policies and procedures implemented for new infrastructure.

Office Location

Supreme Engineering has its office in Edinburg Texas at 135 paseo del Prado Ste 7.

Firm's Capacity to Undertake the Project and Accomplish in the Required Time

✓ **Ability to Commence Services**
Supreme Engineering, PLLC is able to commence services immediately upon issuance of a Notice to Proceed.

✓ **Concurrent Projects**
Supreme Engineering, PLLC has a variety of government and private projects: however, we have the personnel and resources to avoid any interference with any projected awarded to Supreme Engineering.

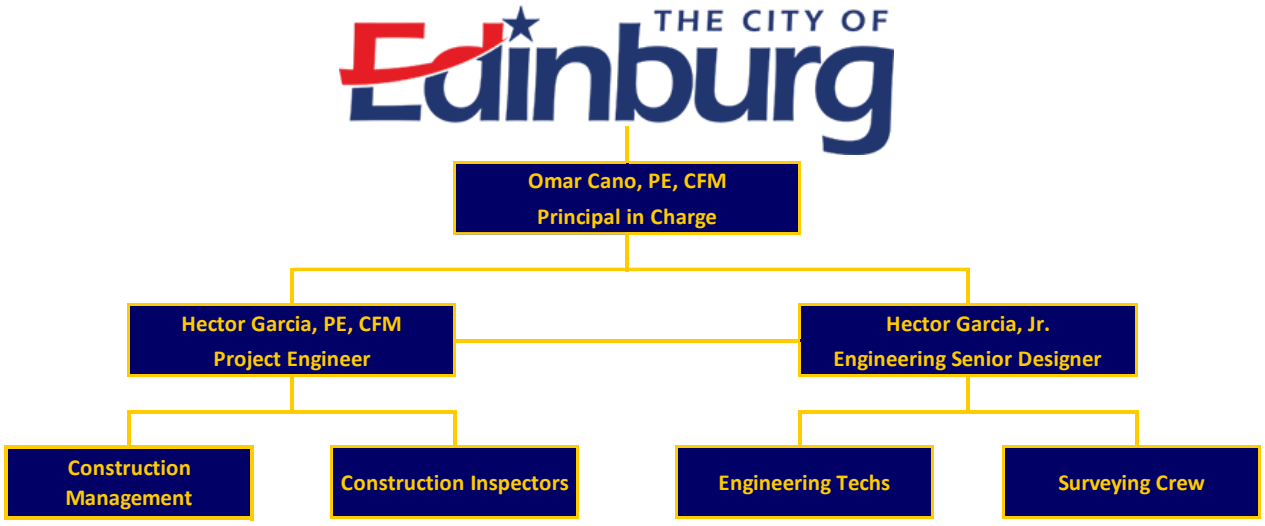
✓ **Company Ownership**
Supreme Engineering, PLLC is a one owner company with healthy finances. Supreme is not for sale nor intend to be offer in the long future.

✓ **Litigations**
Supreme Engineering, PLLC has no past nor pending litigations.

✓ **Financials**
Supreme Engineering, PLLC is not in default in any loan or any other financial agreements with a bank or other financial institution.

✓ **Conflict of Interest**
Supreme Engineering, PLLC, owner/s, owners' family has no financial or other relationship with City employees, officers, City Council or committee members.

✓ **Insurance Claims**
Supreme Engineering, PLLC has no insurance claims in the past five years.



✓ **Affirmative Action Program**
Supreme Engineering, PLLC is committed to affording equal opportunity in employment to all individuals without regard to race, color, religion, sex or national origin.

Section 3
Team Member Qualifications and Experience

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Supreme Engineering, PLLC (Supreme) has been providing professional engineering services since 2019. Supreme is registered with the Texas Board of Professional Engineers and Land Surveyors, Registration No. F-21135. Supreme has over 30 years of combined experience. Supreme is located locally in Edinburg, Texas, giving Supreme an edge when selected to provide services for projects within Hidalgo County. Supreme is familiar with City of Edinburg's design standards and guidelines as well as County, State, and Federal regulations to assist with completing projects while complying with any applicable regulations. Supreme utilizes the latest CADD and GPS technology and equipment. Our firm is equipped with technology that will allow us to respond to our client's needs immediately.

Supreme currently employees registered professional engineer, engineer in training, engineer designer, construction inspector, surveying technicians and sub-consult any professional surveying as required. Employees have a diverse background and are committed to delivering a quality product. Therefore, their diversity allows them to perform multiple duties to ensure that a project meets City of Edinburg's expectations and is delivered on time.

Mr. Omar Cano, PE, CFM has been licensed Engineer in the State of Texas since 2015. Mr. Cano is also a Certified Floodplain Manager. Mr. Cano has over 12 years of experience in the private

and public sectors. Mr. Cano gained experience in roadway design while employed at the Texas Department of Transportation (TxDOT). While employed at Ambiotec Civil Engineering Group, Mr. Cano gained experience in municipal water, sewer, storm drainage and land development. As Interim Director of Engineering at the City of Edinburg, Mr. Cano not only enriched his engineering experience but was able to develop his ability to interact and discuss projects with government

officials. The opportunity to deal with the concerns of the constituents gave him insight to the needs of the community. Mr. Cano spent approximately three (3) years the Hidalgo County Drainage District No. 1 as an Engineer III where he was able to assist with several drainage projects.

Mr. Hector H. Garcia de Peña is a certified engineer in training in the State of Texas. Mr. Peña graduated from the University of Texas RGV in 2018. Mr. Peña is familiar with project management and construction inspections. Mr. Peña has extensive knowledge of County's requirements for land development and is familiar with the county rules and regulations for subdivisions.

Mr. Jose Luis Garcia, Jr graduated from South Texas College with a certificate in Civil Drafting. He has performed boundary surveys and drafted for roadway, storm drainage, wastewater collection and water distribution design. Mr. Garcia has also drafted for commercial, public, and residential development. He has produced As-Builts, prepared presentation exhibits and has assisted with USIBWC levee gate structure plans.

Omar Cano, PE, CFM

BS in Civil Engineering, Texas A&M University – Kingsville, Texas
Registration: Texas Professional Engineer 120081
Certified Floodplain Manager 2389-13N

Mr. Cano has performed work with public and private entities. His public service includes serving as Interim Director of Engineering for the City of Edinburg and he served as an Engineer for Hidalgo County Drainage District No. 1. Public service allowed Mr. Cano to coordinate with consultants, entities, and the public to resolve the infrastructure needs to the area. He is also familiar with the local municipal and state regulations required for design and construction and survey of engineering projects. Mr. Cano's experience includes designing and analyzing engineering work related to hydraulics and hydrology, preparing cost estimates and Preliminary Engineering Reports for a design that will serve the needs and budget, conducting and coordinating site visits to monitor the projects progress and contractors' performance. Mr. Cano has managed projects funded through TWDB / GLO. He will be responsible for final review of plans and will be sealing all designs. As Project Manager, Mr. Cano will be responsible for leading all tasks in the contract and overseeing all aspects of the day-to-day operations.

Mr. Cano is proficient in HEC-HMS and HEC-RAS, SEWER CAD, Windstorm, and AutoCAD/Civil 3D.

Trenton Drain Phase III – Project limits are from Southwest Trenton to North of Wisconsin to connect to the South Main Drain I in Edinburg. New ditch that serves 12 colonias to have a drainage outfall. 1.7 Miles of drainage ditch and 2 major crossings.

South Main Drain II Phase I Ditch Improvements – The project consisted of improving the existing South Main Drain II from McColl Road to I69C in Edinburg. The improvements consist of maximizing the cross sections of the ditch to take advantage of the existing ROW. This not only helps many existing subdivisions using it as an outfall but also will help other communities from western cities by reducing water surface elevation of the ditch.

City of Edinburg Jackson Rd Hike & Bike – Project limits are from Canton to Chapin, 2.8 miles, first of its class in Edinburg. The project consisted of rest areas and parking areas, designed for future connectivity to other cities.

Canton Heights Subdivision Development – Project limits are from I69C to Raul Longoria Road in Edinburg. The project consisted of improving the existing South Main Drain I to connect and accommodate the proposed new development's storm system.

Hector H. Garcia De Peña

BS in Mechanical Engineering, University of Texas RGV – Edinburg, Texas
Registration: Texas Professional Engineer 150389
Certified Floodplain Manager 4241-22N

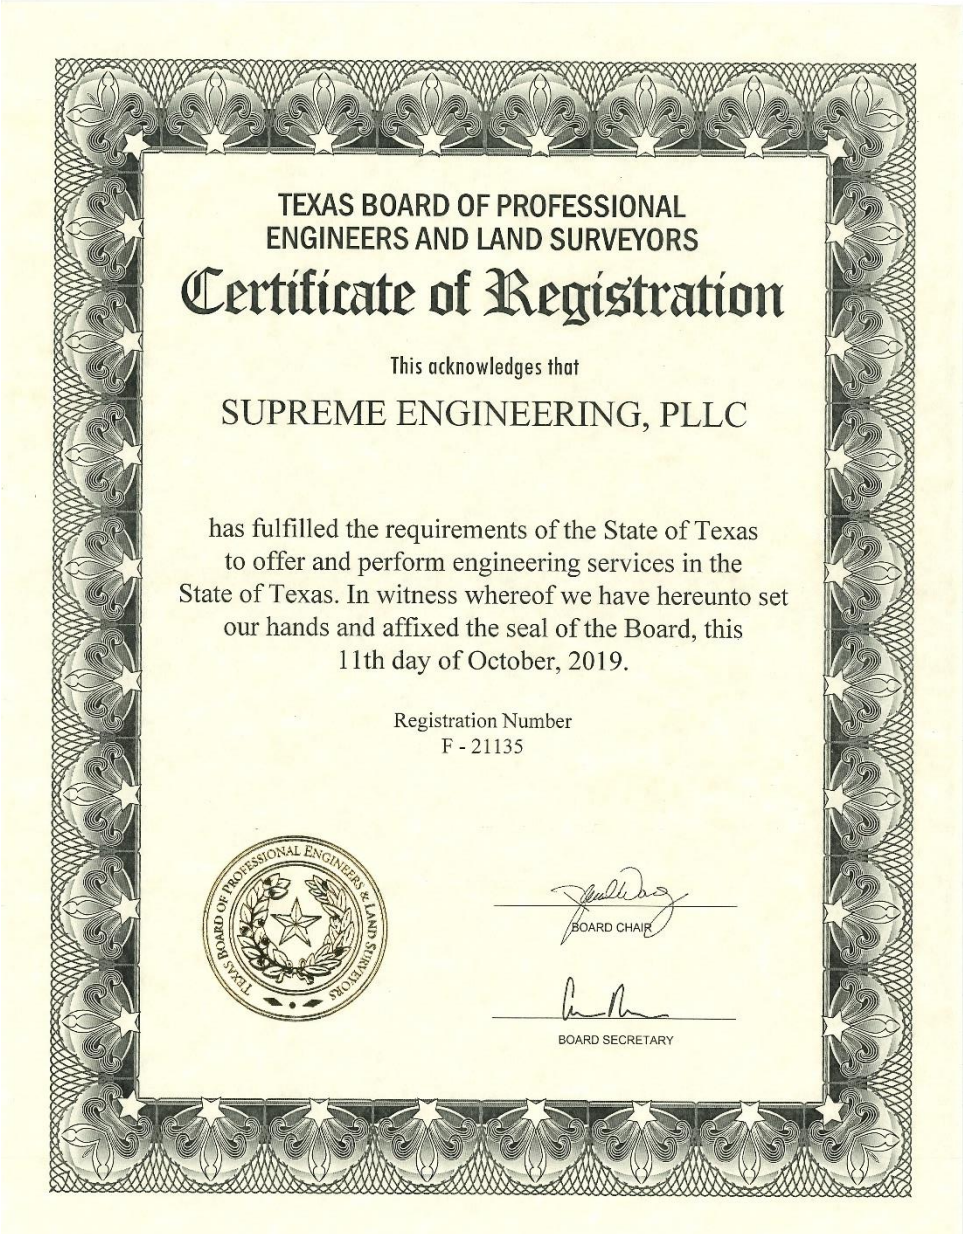
Mr. Garcia de Peña has three (4) years of experience and is ready to contribute to everything from minor site improvements to major, multi-site undertakings. He is skilled at Site Development with training in AutoCAD/Civil3D and Drainage Design. Mr. Garcia de Peña's attention to a project has provided successful, accurate and detailed project specifications. He verifies code compliance and regulatory integration while leading projects safely and smoothly to completion.

Mr. Garcia de Peña had the opportunity to gain firsthand knowledge of the requirements set forth by Hidalgo County Drainage District No. 1 for land development by reviewing over 300 drainage reports, conducting 15 inspections, and reviewing over 20 construction plans. In reviewing drainage reports, Mr. Garcia de Peña analyzed reports, maps, drawings, and photographs on soil composition, terrain, hydrological characteristics, run off calculations, Floodplain & Topographical Maps, and other data to determine feasibility of proposed projects and ensure all state and local government drainage requirements were met. He also prepared meetings with general contractors and engineering firms.

Mr. Garcia de Peña has been responsible for managing all Land Development submittals for Cameron County by creating workflows, templates, and application forms, attending meetings and site locations to gather data for projects, and work closely with the County Floodplain Administrator. He has participated in project design reviews and created engineering designs under supervision of licensed engineering professionals. Mr. Garcia de Peña has participated in the updating of the Cameron County Rules and Regulations for Subdivisions. He also assisted with project coordination, most notable SpaceX Facilities on Boca Chica

Jose Luis Garcia, Jr.

Certificate in Civil Drafting – South Texas College



Mr. Garcia offers over fifteen (15) years of civil drafting experience. He is proficient in the following:

- Autodesk Land Desktop
- MicroStation V8i (Select Serie 4)
- Microsoft Office
- Geo Viewer
- AutoTurn
- Civil 3D
- Trimble GPS Equipment

He has performed boundary surveys and drafted for roadway, storm drainage, wastewater collection and water distribution design. Mr. Garcia has also drafted for commercial, public, and residential development. He has produced As-Builts, prepared presentation exhibits and has assisted with USIBWC levee gate structure plans. Mr. Garcia has also served as a survey technician and field crew member to perform boundary surveys. Currently Mr. Garcia is enrolled at Lone Star College Montgomery to assist him on becoming eligible to be a Professional Land Surveyor.

Section 8

Appendix A

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

COMPANY PROVIDING PROPOSAL GENERAL QUESTIONNAIRE

1 Name/Name of Agency/Company: Supreme Engineering, PLLC
(Full, correct legal name)

- Address: 135 Paseo del Prado Ste 7 Edinburg, TX 78539
- Telephone/Fax: (956) 272-2246
- Email address: omar.cano@supremeengineering.com

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?

3. Yes____ No✓

3. Is your Company authorized and/or licensed to do business in Texas?
Yes✓ No____

4. Where is the Company's corporate headquarters located? Edinburg, Texas

5. a. Does the Company have an office located in Edinburg, Texas?

4. Yes✓ No____

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office?

_____ (years) _____ (months)

c. State the number of full-time employees at the Edinburg office. 9

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity?
Yes____ No✓

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. _____

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Omar Cano
Address: 135 Paseo del Prado Ste 7 Edinburg, TX 78539
Telephone: (956) 272-2246
Fax: _____
Email: omar.cano@supremeengineering.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (✓).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture.

9. Bankruptcy Information

Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (✓)
If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets.

10. Provide any other names under which your business has operated within the last 10 years.
N/A

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES (NO)

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES (NO)

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Omar Cano, the undersigned representative of Supreme Engineering, PLLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, Omar Cano, the undersigned representative of Supreme Engineering, PLLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

Supreme Engineering, PLLC

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);

(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

Form **W-9**
(Rev. October 2018)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

► **Go to *www.irs.gov/FormW9* for instructions and the latest information.**

Give Form to the requester. Do not send to the IRS.

Print or type. See **Specific Instructions** on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.

Supreme Engineering, PLLC

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☐ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☑ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ► S

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is **not** disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) ►

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from FATCA reporting code (if any)

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.

410 S. Jackson Rd #2780

Requester's name and address (optional)

6 City, state, and ZIP code

Edinburg, TX 78539

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN,* later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

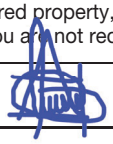
Social security number

			–			–				

or

Employer identification number

8	4	–	2	9	8	1	4	3	3



Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here **Signature of U.S. person** ►

Date ► 1/4/2024

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9.*

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

City of Edinburg
Mardoqueo Hinojosa, City Engineer
415 W. University Drive
Edinburg, Texas 78539

Dear Mr. Hinojosa:

We appreciate the opportunity to present our Statement of Qualifications in response to the City of Edinburg-Engineering Services Rotation, RFQ No. 2024-9. We have put together a team that strives to exceed expectations and possesses true dedication, exemplified by our commitment to project success.

SWG Engineering, LLC (SWG) has provided engineering services in the South Texas Region, with extensive projects since its establishment as a corporation in 1945. Throughout the 77 years in engineering, all SWG Professional Engineers are licensed and active with state licensing requirements, education, and professional experience to provide a wide range of engineering services that uphold our sound principles and practices. SWG will serve as the prime firm for this project and is supported by a sub-consultant partner, Scheibe Consulting, LLC, who, in 2023, acquired Brown, Leal, and Associates and now has a local office with over 40 years of experience in the Lower Rio Grande Valley. Together, we bring extensive specific historical knowledge in civil engineering and a full-service Civil, Land Development, Environmental, Water Resources, Water, and Wastewater Infrastructure. Our clients include the public and private sectors, and our projects span numerous communities.

We have thoroughly reviewed the scope of work and are confident in our ability to deliver timely, cost-effective, and professional results. SWG has worked with numerous municipalities in the County and other government entities on previous and current projects. We also have experienced project managers with extensive expertise in mapping, planning, engineering, surveying, platting, material testing, construction, design, analysis, feasibility studies, bidding, procurement, and project management.

We have extensively assisted local communities in preparing applications for funding with government agencies such as **USDA**, **TWDB, GLO,** and **NADBANK/BECC.** We have extensively worked on specialized engineering studies, preparing plans and specifications for construction projects, construction administration, project management, and surveying activity projects. We can provide various engineering and consulting services as we are well equipped with personnel, expertise, equipment, and time availability to commit needed.

The proposal set forth in it remains effective for 90 calendar days as instructed in said RFQ and in acceptance of the Professional Services Agreement enclosed in the RFQ. We look forward to working with the City of Edinburg, and please don't hesitate to call us; we would be glad to discuss any questions you might have.

Sincerely,

Randall C. Winston, P.E., President

SECTION #2

FIRM QUALIFICATION AND EXPERIENCE

ORGANIZATION PROFILE

SWG ENGINEERING, LLC (SWG) has taken a leadership role in providing quality engineering answers in the Valley through our greatest resource – a dedicated and talented staff. Leadership begins with the principals, who are all Texas-registered professional engineers. Our work speaks for itself as 80 percent of our business is from repeat clients.

***Our firm's philosophy is simple*, we always strive to provide our clients with unparalleled consulting services by putting our clients' interest first.** We work closely with our clients to identify the objectives of the project and assemble a team of highly qualified professionals to meet those needs. SWG strives to be more than an engineer to our client. We are trusted partners and consultants. Our firm's principles are based on efficiency, quality and **unmatched customer service**. We envision cost-effective engineering design concepts without compromising on quality. SWG Engineering is committed to our clients' success. Our experience, combined with our advanced technical support, provides us with the unique ability to expedite the planning and design phase before the actual construction.

SWG also brings the expertise of Scheibe Consulting (SC) a full-service Civil Engineering firm with locations in South and Central Texas (TBPE Firm #13880). SC provides water resources engineering services throughout the State and specifically in the Lower Rio Grande Valley (LRGV). SC staff have over 40 years of history in the LRGV with a unique focus on drainage, flood control, and grant management. SC is participating in the execution of the nearby Guadalupe Basin Regional Flood Plan for the TWDB providing our Team with a unique inside understanding of this ever-evolving state-wide regional planning process, which is critical to applying for any FIF grant.

As a collective Team we have collaborated directly and indirectly on numerous projects in the past and specifically related to drainage design projects in the LRGV. Noteworthy local (and Grant funded) experience includes the Cameron County Drainage District #3 FPP (2010), Cameron County Drainage District #5 FPP (2008 & 2019), City of La Feria/Santa Rosa FPP (2011), Cameron County Drainage District #3 FIF Study (2021), Cameron County Drainage District #5 FIF Design Projects (2021), the FMA Grant for the City of San Benito (2022), and the TWDB Stormwater Drainage Planning for the Colonias of the Lower Rio Grande Valley (2014).

We are very excited about working with the City of Edinburg and are committed to making resources available to complete project(s) within the timeframe allotted. Our collaborated efforts and knowledge of this area and historic modeling expertise in this region will help to improve efficiency of effort. SWG will also be supported by several sub consultant firms providing support with data collection, survey, public meetings, environmental services, design, landscape services, structural engineering, and geotechnical engineer. The SWG Team will be comprised of SWG acting as the Prime Firm, with the support from Scheibe as a major sub consultant. Other minor sub consultants will be added to the team as needed to meet the goals of the project(s).

OUR PRINCIPLES THAT HELP GUIDE OUR ENGINEERING VISION AT SWG

- Continuous re-invention as engineering practices constantly evolve; ensure our team is always working with the latest technologies and tools to empower them and their work.
- SWG prides itself on our transparency and our engineering team. We prioritize providing a space to encourage learning, development, and team collaboration.
- We earn customer loyalty through performance and efficiency.
- We conduct business with social responsibility, reliance on the character, and truth in actions.
- We replicate success through proven solutions, client satisfaction, and industry leadership.

PROJECT MANAGEMENT

Being a full-service firm, and always being mindful of the project owners' bottom line, SWG Engineering provides Funding Procurement services for any project we are involved in. Our management team has prepared numerous grant application over 30 years in municipal government. Many of these applications funded and accounted for millions of dollars of infrastructure improvements including water and sewer systems, drainage systems, streets, parks, downtown revitalization, housing, economic development, emergency management, first responder facilities, and other capital improvements.

One of our samples projects is The Delta Lake Irrigation District canal to pipeline conversion project is an ongoing project, which has been in development for almost two years, and has an estimated construction timeline of two additional years. A grant from the Bureau of Reclamation (BOR) of $1 Million dollars was procured by SWG to aid in the cost of construction of this important project.

We've worked with large cities and small towns, and we've found that many times there is funding available that will save the owner from expending funds from their own budget, or that perhaps the owner is in dire need of a project they cannot afford at this time. In both of these cases, the owner would benefit from procuring project funding.

Our team of Administrators and Engineers work side by side to assemble a competitive, accurate application that exceeds the target Agency's requirements. We have worked with various types of funding, ranging from sub-market rate low interest loans, 100% grants, or a combination of both grant and loan, procured through various agencies and methods.

ADMINISTRATION EXPERIENCE

SWG has provided Funding Procurement Services to secure project funding from many local, state, and federal agencies, such as: TWDB, USDA, NADBANK/BECC, FEMA, CDBG, GLO, HUD, TDEM, EDA, TPWD, BOR, among others. SWG Engineering has over 30 years of municipal funding experience including financial management, identifying grant resources, grant writing, and grant management.

ENVIRONMENTAL CLEARANCE PROCEDURES

In addition to the funding procurement itself, SWG also has experience executing environmental clearance procedures from inception through completion, to include initiating the environmental process by coordinating contact with applicable state agencies, such as Texas Historical Commission, EPA, Tribal Organizations, and U.S. Fish and Wildlife Service, to completion of the Environmental Review Record. Our firm is knowledgeable with the provisions of a full Environmental Assessment (EA), Categorical Exclusions (CE), Preliminary Engineering Reports (PER), Environmental Reports (ER), various Water Reports, Benefit Cost Analyses, and is capable of executing all to completion. For more than 30 years we have contracted with the Texas General Land Office as an Environmental Service Provider to complete the environmental assessments for communities that were affected by Hurricanes Dolly and Ike, increasing our knowledge of the regulations required for environmental approval.

A few of our most recent successfully secured funds are for the following project:

Bureau of Reclamations (BOR)

- Delta Lake Irrigation District Canal Lining $1,000,000.00

  https://www.usbr.gov/watersmart/weeg/docs/2018/FY2018-WEEG-Project-Descriptions.pdf

Federal Emergency Management Agency (FEMA)

- City of Lyford HMGP Drainage Improvements $750,000.00 (TDEM)
- City of La Feria HMGP Drainage Improvements $500,000.00
- City of La Feria HMGP Drainage Improvements $ 2,600,000.00

General Land Office (GLO)

- City of La Feria Water and Wastewater Improvements $ 16,000,000.00

Housing and Urban Development (HUD)

- City of La Feria(CDBG) $13,000,000.00 https://www.nadb.org/our-projects/infrastructure-projects/water-and-wastewater-improvements-project-in-la-feriatexas

North American Development Bank (NADBANK/BECC)

- Hidalgo & Cameron Counties Irrigation District Water Conservation Project $1,250,000.00

https://www.nadb.org/our-projects/infrastructure-projects/water-conservation-improvement-project-for-hidalgo-and-cameron-counties-irrigation-district-no-9-mercedestexas

- City of La Feria Water and Wastewater Improvements $13,820,000.00

https://www.nadb.org/our-projects/infrastructure-projects/water-and-wastewater-improvements-project-in-la-feriatexas

Texas Parks & Wildlife Department (TPWD)

- City of Port Isabel Washington Park $150,000.00
- City of La Feria Nature Center
- City of Los Indios Park $150,000.00

Texas Water Development Board (TWDB)

- City of La Feria Water & Wastewater Improvements $15,000,000.00
- City of Ingram Sanitary Sewer Line Improvements $1,000,000.00
- Delta Lake Irrigation District Canal Lining $60,000.00
- City of Mercedes Capisallo Subdivision Sanitary Sewer and Lift Station $2,500,000.00

United Stated Department of Agriculture (USDA)

- Sharyland Water Supply Corporation Water Treatment Plant No. 3 $25,000,000.00
- City of Ingram Wastewater Improvements $ 10,600,000.00

TECHNICAL APPROACH

SWG employs a systematic approach to executing projects to ensure maximum efficiency and accuracy. From engineers to project managers and construction quality control teams, we all adhere to the execution plan to deliver the assignment on time and within budget.

PHASE 1: PROJECT DEVELOPMENT

This initial phase is crucial for the success of a project. Our team gathers the necessary information to commence conceptual engineering and preliminary engineering, and ultimately establish a project budget estimate and schedule before moving into detailed design.

CONCEPTUAL ENGINEERING

- Review project scope
- Formalize strategy
- Review owner design standards
- Review existing utilities and site constraints
- Perform preliminary code search
- Research permitting requirements
- Develop process design basis

PRELIMINARY ENGINEERING

- Establish design criteria and approach
- Conduct code and permitting reviews
- Coordinate with OEMs and vendors
- Create process equipment flow diagrams and layouts
- Estimate with accuracy and contingency variance
- Provide value engineering and alternates
- Develop a preliminary schedule
- Determine project staffing

PHASE 2: DETAILED DESIGN

In the detailed design phase, we use the client's input from the project development phase to transform the schematic drawings, outline specifications and project definition into working drawings and specifications.

- Delivery of final outline specification and drawings
- Multiple drawing reviews: 30%, 60%, and 90%
- Drawing acceptance by the owner
- Collaboration with vendors and OEMs on longer-lead items

PHASE 3: PROJECT IMPLEMENTATION

Cost control: We perform thorough planning and bid management during procurement, develop a process for change management and prepare detailed accounting for accurate forecasting and reporting.

Quality assurance: Our proactive approach to quality control begins during pre-construction and continues through closeout. It includes rigorous review of design and submittal documents, on-site inspections and project observation reports for every critical juncture, monthly and weekly progress reports, independent agency testing, as well as mock-ups & samples and mechanical systems start-up and training. **We keep tight control throughout construction, to safeguard owner from any deficiencies.**

Schedule controls: We keep projects moving through constant collaboration and planning, which includes regular schedule updates, two-week look-aheads and weekly subcontractor coordination meetings.

Communication: All client communications are handled through our project manager. Our project manager oversees all communication, acting as a single point of contact for design, submittals and shop drawing control, requests for information (RFIs), drawing management procedures and design changes.

Safety: The safety of our employees, clients and contractors is top priority, so we create project-specific safety plans, perform safety audits, create emergency protocols, and adhere to all OSHA requirement.

PHASE 4: COMMISSIONING AND CLOSING

- Mechanical systems start-up and training
- Final field inspections
- Punch list
- Record drawings
- Owner's manuals

1. PROJECT SCOPE VERIFICATION (5%):

Meet with client to verify project parameters, complete preliminary investigations, budget, schedule, size, location service district…etc.

2. INTERNAL KICK-OFF MEETING (5%):

The design team meets to discuss the project considerations, approach, schedule, and deliverables. This meeting is directed by the project manager and attended by the survey department, designer, engineer, drafter, and the client representative.

3. OBTAIN EXISTING INFORMATION (10%):

Available local record information is researched and existing utility companies are requested to provide their specific utility information.

4. TOPOGRAPHIC SURVEY (15%):

Initiate field work order to cover the project construction area. Office work includes verification of Right-Of-Way, property lines, existing easements and public/private utility location.

5. UTILITY REVIEW (20%):

Preliminary drawings are supplied to all utility agencies for review and comment. All possible conflicts are addressed at this stage. Alternatives are discussed as applicable.

6. PRELIMINARY DESIGN (30%):

Provide preliminary alignment, drawings, schedule, and cost estimates.

7. PERMIT DOCUMENTS (60%):

Final location is determined and all applicable permit applications are prepared. Necessary easements documents finalized and project specifications are assembled.

8. FINAL DESIGN (90%):

All applicable permits and easements are secured. Permitting agency comments and special conditions are addressed. Internal constructability review is conducted. Plans are forwarded to the client for final review and approval.

9. BIDDING DOCUMENTS (100%):

Final plans and specifications are assembled creating the “Bid Package”. Client specific sections (General Conditions, Bonds, Agreements, Technical Specifications…etc.) are included.

10. BID ADVERTISEMENT:

Trade publications and local newspapers are used to place the advertisements as authorized by the client. Bidding documents are often scanned and made available for viewing. Hard copies will typically be located at SWG Engineering offices for examination and pickup. General contractors and supplier questions / requests for clarifications are addressed and addenda issued as appropriate.

11. PRE-BID MEETING:

Frequently, this meeting is facilitated by SWG Engineering to ensure bidders have a complete understanding of the project scope.

12. BID-OPENING:

SWG Engineering will facilitate the bid opening meeting that is attended by the client, bidders, and stake holders. All bids are checked for completeness including the required bonds.

13. BID TABULATION & RECOMMENDATION:

Bids are checked for responsiveness, balance, and fatal errors. Bidder’s qualifications, insurance, and references are checked. Subsequently, Recommendation of Award will formally be issued to the client.

PROJECT MANAGEMENT

PROJECT INSTRUCTIONS AND WORK PLANS

The Project Manager will initiate work, prepare project instructions and work plans, and manage and control progress of the work. He will be the primary contact between City of Edinburg and SWG team members. Project instructions will communicate team members' responsibilities and define tasks, schedules, budgets, and coordination methods.

PROJECT MONITORING AND CONTROL

SWG will prepare monthly narrative progress reports describing work accomplished during the reporting period, work anticipated in the next reporting period, issues and concerns, problem resolutions, and schedule and budget updates. A cost summary will document expenditures during the reporting period, cumulative expenditures to date, estimated cost to complete the work, and total estimated cost at completion. The costs will be compared to the budget amounts for each task and show any variance. SWG recognizes that meeting the proposed schedule is an essential part of delivering the project successfully and meeting the budget.

ON TIME AND WITHIN BUDGET

SWG's project management competence rests on our mastery of the tools necessary for managing water and wastewater projects. Our project managers have a fully integrated project control system that combines scope, schedule, budget, and forecast data into one database. This real-time reporting project control system assists project teams in the day-to-day management of their projects.

SCHEDULING

The keys to an effective schedule include direct integration with Work Breakdown Structure (WBS), resource-loading to assist with funding needs and budget analysis, identification of milestones or deliverables, logical depiction of work processes, and regular updates to assess project performance. Our scheduling success can be attributed to the Critical Path Method (CPM) developed from software programs, depending on project needs and system compatibility.

BUDGET CONTROL

SWG will use a number of tools for project budget control. These include our management information system for tracking internal project costs; resource utilization, and costs; and cost estimating software for both professional services budget estimates and construction cost estimates. Elements of cost to be estimated include, but are not limited to, are labor, materials, equipment, travel, and expenses.

PROJECT MEETINGS

Well-planned and properly timed meetings ensure excellent service. The kick-off meeting will help ensure that the City of Edinburg needs, vision, and team member roles and responsibilities are clearly understood. Meetings with City of Edinburg staff and other agencies, as appropriate, will provide valuable coordination. To reduce costs, conference calls will be used when appropriate.

PROBLEM SOLVING

While many issues can be anticipated and planned around, unexpected obstacles often arise in performance of an endeavor such as this. When obstacles arise, we immediately manage them by investigating the problem, developing alternative solutions, and communicating our ideas for maintaining schedule and budget as soon as possible. Engineers are often described as practical problem solvers, a quality personified by SWG. Characterized by creative thinking, we will offer innovative yet practical concepts for your consideration throughout the project in an effort to better serve City of Edinburg. We will maintain close contact with your staff, carefully address their ideas, and include them in developing project solutions wherever appropriate.

QUALITY ASSURANCE/ QUALITY CONTROL PLAN

The following summarizes the general planning methodology that our team has developed. At SWG Engineering, we believe that it is our responsibility to ensure the accuracy and quality of our proposed projects. Our team prides themselves in client support by ensuring each designated project team member is invested to see their part of the design become a reality. We ensure the all documents are meeting standards and are coordinated between consultants. Quality control is an everyday practice. SWG has developed a Quality Assurance and Quality Control (QA/QC) plan, with the ability to modify it so that it specifically meets each individual projects' requirements. Each project presents unique opportunities and challenges, making customization key. Our plan consists of:

- **DESIGN CONSULTATION (i.e. PRELIMINARY DRAWINGS AND EXHIBITS)**
  - We ensure all expectations, design criteria, and construction standards are met.
- **PARTICIPATION**
  - We encourage ample participation from stakeholders, public entities, and community groups to ensure all expectations are constantly being exceeded.
- **STANDARD OPERATING PROCEDURES**
  - Set standard of how our firm prepares, produces and reviews plans, specifications, estimates, calculations and other necessary submittal items.
  - Specific procedures based upon type of project, size, scale, and scope of work.
  - Role coordination procedures are followed to properly assign tasks without creating conflicts.
  - Proper procedures followed for obtaining necessary permits.
  - Final review methodology to ensure adequacy of total project design.
    - Each document is independently reviewed and verified for clarity, feasibility, completeness and a precision.
- **SUBSTANTIATION**
  - Proper documentation and submission of required submittals to ensure all QA/QC procedures have been met.
- **FIELD CONSTRUCTION QA/QC**
  - Field Inspection Daily Observation Reports.
  - HD 4K aerial video recordings and drone flights that will showcase project scope, progress, and completion.
    - Also a valuable tool for project owner to showcase improvements to public and stakeholders.
  - Web-based service for client's authorized personnel to access, view, and comment on project documents.
- **OTHER**
  - Showcase/Announcement of successful project completion on ASCE-RGV monthly newsletter for public outreach, if desired.

We are aware that each project presents unique opportunities and challenges; customization is the key to success. Our goal is to provide design consultation, drawings, exhibits, and participation in meetings with stakeholders, community groups, and public entities to develop a successful design.

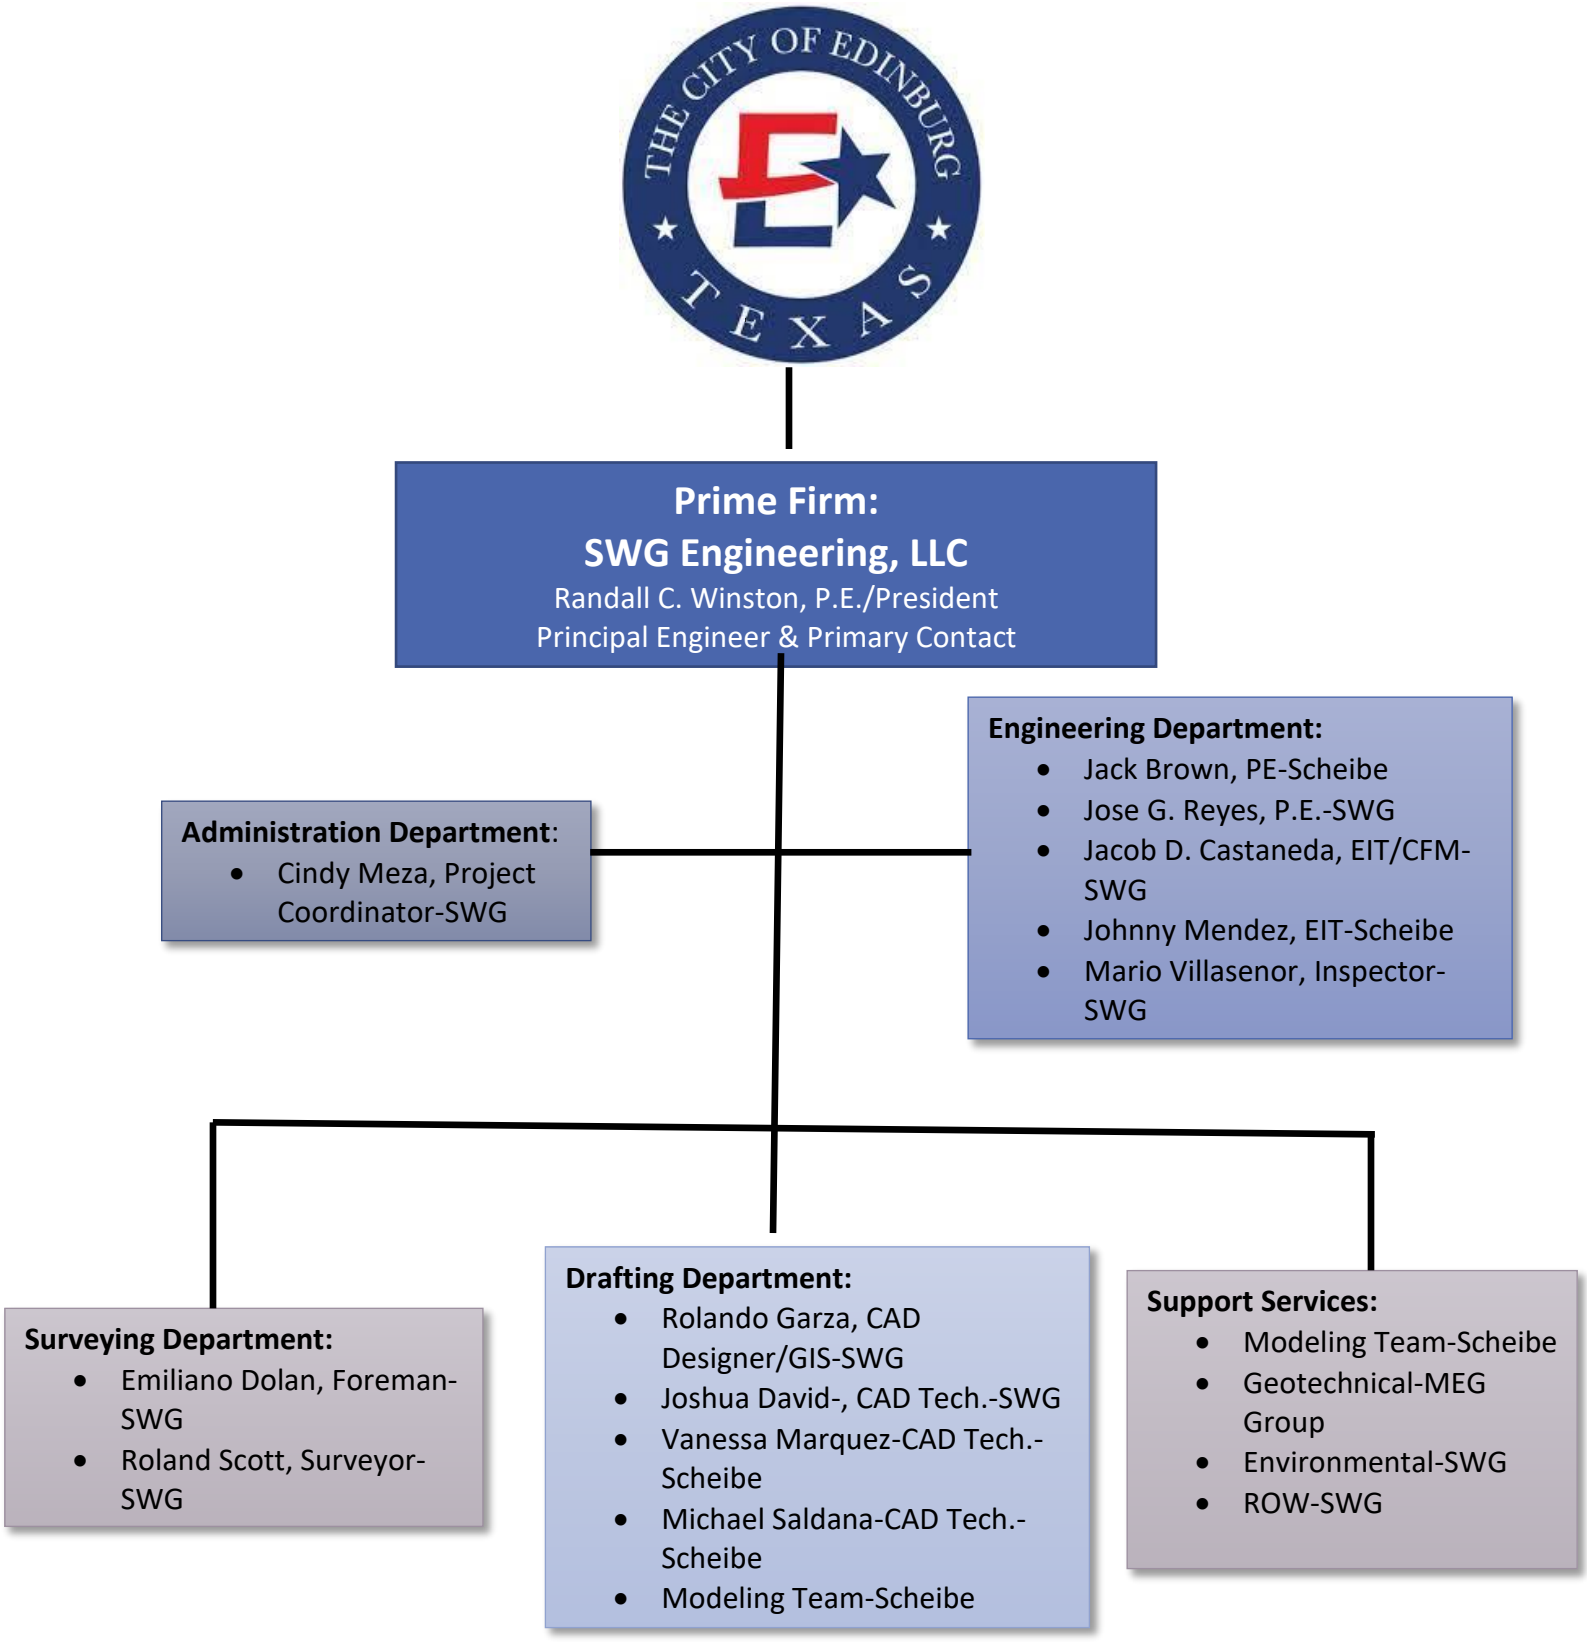
Our firm has built a reputation for high quality work achieved in a spirit of collaboration, both within the firm and with our clients. Quality management is best achieved when all members of a team are thoroughly invested in the project and see their part of the design as a piece of the whole picture. Our team assures the construction documents are meeting standards and are coordinated between consultants. Quality Control is an everyday practice.

Our goal is to make sure that the drawings can be built as planned. We host project coordination meetings and implement internal deadlines to review everyone's goals. This helps us ensure that our clients' needs and requirements are being met. At key milestone of 30%, 60% and 90% progress, our team produces a set of red-lines for an internal review of documents. Constant review of the work is crucial to eliminate human error.

The team's focus on Quality Control assures that our services are continually meeting the goal of continual improvement throughout the process, leading to design excellence.

CONSTRUCTION ENGINEERING INSPECTION

At SWG Engineering, we have a proven history of delivering successful engineering, environmental, and construction management solutions for projects since 1945. Our team prides ourselves in demonstrating value to our clients through our work by conveying innovative, cost effective, and timely design solutions to their unique request. Our designated Construction Engineering Inspector provides professional supervision in the field, ensuring that our plans are coming to life as per all specifications and design criteria. SWG is glad to provide the following services under our ***Construction Engineering Inspection***:



- Full construction oversight to ensure construction as per plans and specifications
- Coordination with all Contractors, Consultants, and Clients
- Overview of tests through independent laboratories on an as needed basis per project specifications
- Ensuring that all ongoing construction meets established timelines
- Preform Field Inspection Report for each site visit
- Preforming monthly drone flights inspections for stakeholders meetings
- Monitoring through time-lapse equipment and recordings to ensure proper QA/QC
- Overseeing that all Safety and Quality Procedures are taking place at all times.
- Ensure that workmanship meets or exceeds expectations
- Ensure high quality materials are used

SWG understands that the best set of plans are only as good as their equivalent construction on the field. This is why SWG ensures coordination and enforces strict oversight over the construction teams, to guarantee the successful construction and realization of the project plans.

SECTION #3

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

PROJECT CHART

KEY STAFF

Randall C. Winston, P.E., MSCE, President

Texas Registered Professional Engineer No. 70417
Master of Engineering in Civil Engineering, Texas A&M University
Bachelor of Science in Civil Engineering, Texas A&M University

Mr. Winston has 37 years of experience in the Civil Engineering industry. His experience includes being principal engineer for several largescale water and wastewater projects in design, regulations, budget and schedule control, and construction management. He has been lead engineer for many treatment projects, detention facilities, large water and wastewater plants, rapid dewatering drying beds, lift stations, and collection and distribution systems. As Project Manager, Mr. Winston will be responsible for providing superior client service to ensure complete client satisfaction. He'll ensure technical delivery of the design, and adherence to QA/QC, safety and health requirements, managing project staffing, and financial performance tracking. Mr. Winston has expertise in working with regulatory agencies such as TCEQ, TxDOT, Army Corp of Engineers, IBWC, and other regulatory agencies. In additional to regulatory agencies, Randall has extensive knowledge with funding agencies such as TWDB, USDA, NADBANK/BECC, FEMA, CDBG, GLO, HUD, TDEM, EDA, among others.

Jack L. Brown, PE, Senior Engineer

Texas Registered Professional Engineer No. 53675
Bachelor of Science in Civil Engineering, Texas A & I University

Mr. Brown brings decades of experience specific to the greater Harlingen area. His experience includes both public and private sector services, providing a unique perspective to the Team, especially given his role in the development of several communities' subdivision ordinances and establishment of several drainage districts within the study area. Mr. Brown has managed roadway, drainage, water/wastewater, and survey related projects ranging from hundred thousand dollars to multi-million dollar engineering services contracts. Mr. Brown also brings extensive background knowledge with the development of the latest City of Harlingen Drainage Masterplan, drainage improvements for the Harlingen International Airport, and an intimate knowledge of the drainage history of this entire region. Mr. Brown's reputation both with the public sector and private development community will be invaluable to establishing a regional drainage policy that will achieve the goals of the City/public, and will be palatable to the development community.

Jose G. Reyes, P.E., Senior Project Engineer

Texas Registered Professional Engineer No. 93827
Bachelor of Science in Mechanical Engineering, University of Texas at San Antonio

Mr. Reyes has 21 years of engineering experience. His experience is composed of engineering design, project estimation and scheduling, planning and controlling, engineer in charge, and coordination. Jose has a strong understanding of both the public and private sectors with project design and oversight experience in Waterline Improvements Design, Wastewater and Water Utility Connection Design, and Drainage Improvements. Mr. Reyes also a strong working knowledge of coordinating with agencies such as TCEQ, TxDOT, IBWC, TWDB, TPWD, NADBANK, USDA, and FEMA. As Project Engineer, Mr. Reyes will be responsible for project oversight, project design support, and coordination with project drafting and surveying, participate in the review of existing data, and gathering of field data.

Mario A. Villasenor, BA, Inspector

Bachelor of Science in Accounting, Instituto Technologio y de Estudios Superiores de Monterrey

Mr. Villasenor has 15 plus years of experience in the Construction Industry & Compliance. Mario's experience consists of inspection and oversight of several largescale water and wastewater treatment projects, elevated storage tanks, ground storage tanks, detention facilities, lift stations, and collection and distribution utility systems. Mr. Villasenor is responsible for full construction oversight of each project to ensure all projects and plans are being built to its specifications, performing Quality Assurance and Quality Control assessments throughout. Additionally, he coordinates with Engineers, contractors, subcontractors, and conducts regular field inspections and reporting, ensuring all safety and quality procedures are met, and assists with proper communication to ensure project is within budget and on time. He has worked as Resident Project Representative for several large scale projects, on which funding by federal agencies required strict construction compliance.

SUMMARY OF WORK EXPERIENCE

- Delta Lake Irrigation District Canal A: 28,500 LF of Canal Conversion to 36" and 24" Pipeline Design and Project Management
- Delta Lake Irrigation District Canal A: Procurement of $1M US Bureau of Reclamations grant Progreso Bridge Co. Port of Entry: Paving and Detention Pond Design
- Sharyland Water Supply Corporation Design and Construction of Water Treatment Plant NO. 3
- Sharyland Water Supply 1.0 MG Elevated Water Tower
- Sharyland Water Supply WTP #1: USDA $6 Million Funding Coordination
- City of Donna 1.0 MG Elevated Water Tower
- City of Ingram Wastewater Improvements - Phase I
- City of Ingram Wastewater Improvements - Phase II
- City of Ingram Lift Station No. 1 and No. 2
- Solid waste disposal sites and transfer stations.
- City of Weslaco EDAP Facility Plan
- Weslaco T- Mobile: Civil Site Grading, Paving, and Detention Pond Design
- Landfill Closure for the City of McAllen.
- Landfill Surveying and Engineering for BFI Landfill, Donna, Texas.
- Water distribution study for the Sharyland Water Supply Corporation.
- Odor control study for the City of Weslaco Wastewater Treatment Plant and Collection System.
- Wastewater pretreatment plant for Southern Frozen Foods packing plant in Alamo (a 0.5 million gallon per day flow, 1,210 mg/l BOD_5 average).
- Study and pilot program for the City of La Feria using manmade wetlands as secondary treatment for lagoon effluent.
- City of Weslaco Economically Distressed Areas Program (EDAP) Facility Plan.
- City of McAllen Wastewater Treatment Plant No. 3, Four (4) Million Gallon Per Day Addition.
- Environmental Assessment for Hidalgo County Irrigation District No. 6 for a loan application to the United States Bureau of Reclamation. Complete archeological and environmental coordination with Local, State and Federal Agencies with approval for this project was done in this report.
- Multiple site work for HEB Stores located across the Valley: Ware Road HEB, McAllen; Weslaco HEB; Mercedes HEB; and subdivision work on Alamo HEB.
- Subdivision and site work for Weslaco Luby's Cafeteria.
- Weslaco Independent School District/ South Palm Gardens -- Septic tank design and drain field.
- City of Weslaco - City Engineer from 1990 to 2006, 2018
- City of McAllen Water Treatment Plant 2 MGD addition to the North Treatment Plant to bring total permitted capacity to 8 MGD.
- City of Weslaco Odor Control for North Wastewater Treatment Plant
- City of Weslaco 1 MGD Addition Extended Aeration Wastewater Treatment Plant
- City of Weslaco Study and Master Plan for Water and Wastewater Facilities
- City of Weslaco La Colonia Las Palmas Sewer Improvements
- City of McAllen Rehabilitation of Sludge Beds at WWTP No. 2
- City of McAllen PUB Sludge Handling Facility Pilot Study and Recommendations
- City of McAllen Highland Lift Station
- City of Weslaco Re-Design of Pumps and Motors and Controls for LS No. 27

WORK EXPERIENCE

QA/QC Team Lead-Scheibe Consulting, LLC 2023-Present
Principal-Engineering Firm of Brown, Leal & Associates- 1983–2023

SUMMARY OF WORK EXPERIENCE

- Los Indios International Bridge, Cameron County – Project Manager
- Design of complete P.S. & E. for the Cameron County Facilities at the Los Indios International Bridge
- F.M. 509 Right-of-Way Map (Section 6), strip map and legal descriptions.
- Valley International Airport Drainage Improvements Phases I-IV, which included all surveying, complete Right-of-Way mapping, complete P.S. & E. package, along with bidding of contracts and construction management/supervision.
- Engineers' Report for the creation of the Cameron County Drainage District No. 5
- Complete Design of the following CCDD No. 5 projects: Hoening Road Bridge, Palm Drive Bridge, Garrett Road Structure Improvements, Paloma Lane Bridge, Palm Boulevard Bridge, and Stuart Place Main Drain. The work involved on these projects included obtaining surveying information, designing complete P.S. & E. packages, bidding and award process of contracts, as well as construction management and supervision.
- Design of complete P.S. & E. on the Arroyo Colorado Pilot Channel Relocation project for the Cameron County Harlingen Irrigation District No. 1
- Design of complete P.S. & E. for Harlingen Industrial Parks III and IV
- Design of Valley International Airport, Long Term Parking Expansion
- Design of Valley International Airport, Terminal Drainage Improvements Port Isabel – San Benito Navigation District EDA Multi-Purpose Cargo Dock
- Design of Valley International Airport Bodenhamer Road Extension Project
- Complete Design of the following CCDD No. 3 projects (GLO Contract No.: 12-361-000-6127):

  1.) 1577 Subdivision Drainage Improvements

  2.) Montalvo Subdivision Drainage Improvements

  3.) Los Ranchitos & Rancho Grande Drainage Improvements

  4.) Drain "A" Widening Drainage Improvements, Phase I & II
- Rancho Grande Drainage Improvements (current)

SUMMARY OF WORK EXPERIENCE

- City of Donna: Proposed Offsite Waterline Improvements, Wastewater and Water Improvements Phase 2 for The Shops at 493 Subdivision: Engineer in charge of Design and Construction.
- Proposed Paving Improvements and Drainage Improvements for The Shops at 493 Subdivision Phase 2: Engineer in charge of Design and Construction.
- Proposed 12" Offsite, Interconnecting Waterlines and Existing Elevated Tank Improvements: Engineer in charge of Design and Construction.
- SWSC's WTP #2: Paving and Drainage Improvements: Engineer in charge of Design and Construction.
- SWSC's 10,100 LF of 12" WL: Transmission: Engineer in charge of Design and Construction.
- City of Port Isabel Medians: Civil Improvements: Engineer in charge of Design and Construction.
- City of Port Isabel Washington Park: Civil Improvements: Engineer in charge of Design and Construction.
- City of Harlingen I.S.D: Paving and Drainage: Engineer in charge of Design and Construction.
- City of Port Isabel Garcia Street: Engineer in charge of Design and Construction.
- NAWSC's 5100 LF of 6" WL: Engineer in charge of Design and Construction.
- City of Los Indios Community Park: Civil Improvements: Engineer in charge of Design.
- City of Mercedes Community Center: Civil and Paving Design: Engineer in charge of Design and Construction.
- City of Donna Waterline Interconnect Improvements: Civil Design: Engineer in charge of Design.
- City of Weslaco Pleasantview and 11th Street: Civil and Drainage Design: Engineer in charge of Design of Crossings and Ditch Improvements.
- City of Weslaco: Designed of Subdivision, Engineer in charge of Plat and Construction Plans.
- City of Weslaco IBWC Levee: Civil Design: Engineer in charge of Design and Construction.
- Long Island Village: Civil Design: Engineer in charge of Design of Water, Wastewater and Paving Improvements.
- Hidalgo County: Designed of Subdivision, Engineer in charge of Plat and Construction Plans.
- City of Weslaco: Designed of Subdivision, Engineer in charge of Plat and Construction Plans.
- City of McAllen: Designed of Subdivision, Engineer on charge of Plat and Construction Plans.
- UTRGV –IEAS Building and UTRGV – Science Building
- USIBWC, LRGFCP, Progeso Levee: (Project length 6 miles)
- USIBWC, LRGFCP, North Floodway and Arroyo Colorado Levees: (Project length 26.8 miles)
- Mission Levee, Common Levee/Anzalduas Dike Improvements, USIBWC/DHS
- Morrison Rd., Responsible for management and administration. For the design of the schematic layout and then continued with the PS&E. Designed the horizontal alignment using existing survey data and TxDOT Roadway Design Manual criteria
- Mile 6 West, Responsible for roadway pay quantities, and design of pavement markings as per TxDOT standards and the Texas Manual on Uniform Traffic Control Devices (TMUTCD).
- Mile 2 WEST, Responsible for the pavement quantity calculations and roadway design for Schematic Layout. Developed transition lengths sections as per TxDOT Standards. Prepared Plans and Profiles, Sign Summaries, SW3P's, Pavements Markings and TCP's. Sized culverts and developed culverts layout as per TxDOT Standards
- IH 35 RAMP SCHEMATIC, Responsible for evaluating different ramp alternatives alignments for IH 35. Developed typical sections for the proposed on and off ramps as per TxDOT standards.
- JBS PARKWAY, Odessa, TX, Developed all the required documentation for TxDOT Public Meetings. Developed Pre-Construction Estimates and Project Layouts for the proposed interchanges configurations alternatives.
- US 83/SH 359 – Laredo, TX, Developed plans and profiles, design roadway typical sections, and calculate pavement quantities. Developed project cost summaries using HIGH ESTIMATOR PROGRAM.

LIST OF TEAM MEMBERS
SWG ENGINEERING, LLC: 77 YEARS IN BUSINESS SINCE 1945
19 EMPLOYEES ON STAFF

Disciplines: Civil Engineering, Environmental Engineering, Water & Wastewater Resources Engineering, Re-construction and Project Improvements, Construction Engineering & Inspection, Surveying, Construction Administration, Grant Writing, Grant Management, Financial Analysis, and Funding Procurement.

ENGINEERING DEPARTMENT: (PROJECT ENGINEERS AND PROJECT MANAGERS): *Responsible for the design, drawing, codes, and specifications of the projects, that include material required, quantity, and quality of components procured from vendors. Project Management, Reporting, Project Oversight, Create and Manage Project Budgets that includes cost estimates, proposals, and Inspection.*

- RANDALL C. WINSTON, PE/PRESIDENT
- JOE B. WINSTON, PE/RPLS
- JOSE G. REYES, PE/VICE-PRESIDENT
- WILLIAM F. UECKERT, PE/PROJECT MANAGER
- JACOB D. CASTANEDA, EIT, CFM
- DALINDA RAMOS, EIT
- MARIO VILLASENOR, INSPECTOR (COMPLIANCE)
- GREGORY WHITE, INSPECTOR (COMPLIANCE)

DRAFTING DEPARTMENT: (DRAWINGS AND DRAFTING): *Follow specifications and calculations to create various technical drawings in collaboration with Engineering Department.*

- MANUEL VALDEZ, JR., CADD DESIGNER SUPERVISOR & SCHEDULER
- ROLANDO GARZA, ASST. ENGINEER/CADD DESIGNER/GIS SPECIALIST
- MANUEL VILLALPANDO, CADD TECHNICIAN
- JOSHUA B. DAVID, CADD TECHNICIAN

SURVEYING DEPARTMENT (SURVEYING): *Responsible for precise measurements to determine property boundaries, provide data relevant to the shape and contour of the Earth's surface for engineering, mapmaking, and construction projects. Update boundary lines and prepare sites for construction.*

- EMILIANO DOLAN, SURVEYOR FOREMAN
- ROLAND SCOTT, SURVEYOR
- ISRAEL FOX, SURVEYOR

ADMINISTRATION DEPARTMENT (BUSINESS OPERATIONS): *Responsible for Data Management, Contract Management, Procurement, Grant Writing, Client Relations, Accounting, Finance Analysis, and Coordinating Business Operations to secure efficiency and compliance to company and contractor policies.*

- CINDY MEZA, MEd/PROJECT COORDINATOR (CONTRACT MANAGEMENT)
- MONICA R. DUENES, MBA/CONTRACT SPECIALIST (PROCUREMENT& FINANCIAL ANALYSIS)
- CHRISTIAN WINSTON, B.A. Com/GRANT ADMINISTRATION & CLIENT RELATIONS
- RON PEYNADO, BBA/CFO (ACCOUNTING & DATA MANAGEMENT)

Phone: (956) 943-2626, Ext. 130
Date: 2022- Present
Contract Value: $19,500,000.00

Project Summary:

SWG was selected for the following:

Design of the water distribution system lines and wastewater collection system lines to be placed within the multiple street right-of-ways (ROW) or Easements, replacing the existing lines possibly under dwellings.

The four (4) existing Lift Stations (LS) will be designed for upgrades and or replacements, move LS #4 to the main road being Sea Shell Blvd. SWG also consider combining and eliminating LS within the Long Island Village community.

The streets that will be cut for the installation of the water and wastewater lines will be designed to be repaved to the current width with no additional drainage outfalls.

Every street intersection will be provided a tap and water meter for the LIV community maintained private sprinkler systems.

The project has a contract value of $19.5 Million that includes the construction.

Client: City of Ingram

Contact: Ms. Heather Davis, City Secretary
Address: 230 Hwy 39, Ingram, TX 78025
Phone: (830)367-5115
Date: 2009 – 2024
Contract Value: $6,500,000.00
Project Summary:

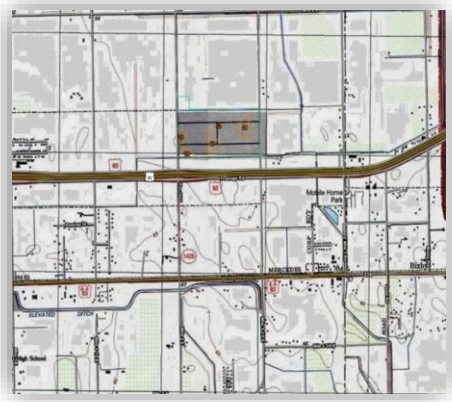
Phase I SWG was hired by the City of Ingram to procure the funding, design, and provide easement documents for individual lot sewer system connections for 172 residential properties and decommission 172 septic tanks within the city. This provided immediate connections for the residents at no cost to them.

Phase II - SWG prepared a Preliminary Engineering Report in accordance with United States Department of Agricultural Rural Development (USDA RD) and as a result, obtained funding for the design and installation of gravity lines for collection of residential wastewater within the Phase II area, which included 302 connections and two new lift stations, which were installed to re-pump all the wastewater flow. These improvements have made a tremendous improvements on the water quality of the pristine Guadalupe River.

Phase III- SWG is currently assisting the City of Ingram with the third phase of improvements and has an estimated 152 addition connections to be added.

Client: City of Mercedes

Contact: Mr. Alberto Perez, City Manager



Address: 400 S. Ohio Ave., Mercedes, TX 78570

Phone: (956) 565-3114

Date: 2019-2024

Contract Value: $2,160,275.00

Project Summary: Proposed Sanitary Sewer Improvements, Existing Septic Systems Decommissioning, and Proposed Lift Station for Capisallo Terrace Subdivision.

The project site is located approximately 1,000 feet north of the intersection between US 83 Frontage Road and Mile 2 East Road at the proposed site will accommodate for proposed lift station and sanitary sewer line improvements. The site construction for the proposed structure is anticipated to be on a slab-on-grade or on-fill foundation provided expansive, soil-related movements will not impair the performance of the structure. Project will be divided in 4 phases:

Phase 1: Preliminary

Conduct preliminary deliberations for determination of project scope of work, prepare preliminary cost estimates and establish scope of work.

Phase 2: Funding

Assist City in procurement of funding or Funding Administrator.

Phase 3: Design

Conduct necessary analysis of project area, complete design, and develop construction plans.

Phase 4: Construction

Solicit bids, procure contractor, conduct construction management and conduct frequent site inspections. Conduct project closeout and assist in fulfillment of funding requirements, if any.

Client: Union Water Supply Corporation (UWSC)

Contact: Mr. Jorge Bazan, General Manager

Address: 5992 FM 1430, Rio Grande City, TX 78582

Phone: (956) 487-3744

Date: 2021- Present

Contract Value: $30,000,000.00

Project Summary: Design for the construction of the System-Wide Improvements and Rehabilitation, including WTP Expansion and Rehabilitation, River Pump Station Rehabilitation, and Distribution System Upgrades

Union Water Supply Corporation (UWSC) of La Casita-Garciasville, Texas, Starr County acquired funding from USDA in the amount of $30 million dollars for a much-needed water system expansion. This improvement allows for treatment system to expand from the existing 1.5 million gallons per day to 4 million gallons per day. It will also provide for constructing a 250,000 gallon ground storage tank and rehabilitation of the existing river pump structure located on the Rio Grande River. Additionally, the funds will replace the existing 25 miles of outdated 1" to 4" small diameter pipes with more efficient 8" waterlines, which will alleviate the problem of water line breaks in the system. With new waterlines, fire hydrants will be installed to provide fire protection for the community's resident.

SWG assisted UWSC with each step of the grant process, from the earliest scope and budget preparations for application through grant administration. SWG targeted assistance with specific aspects of the funding process, such as conceptual designs, engineering reports to support a proposed project, and summaries of the project's economic development quantitative and

qualitative indicators that will positively impact hundreds of residents. Project Deliverables as follow:

- **Waterline Improvements**

Upgrade existing 1-inch thru 4-inch water line to a minimum 6-inch waterline
Placement of fire hydrants for fire protection with the service area
Upgrade existing 6-inch thru 8-inch water transmission lines to 10-inch lines

- **Existing Water Plant Improvements (1.5 MGD)**

Replace the existing claricone (clarifier) with a new claricone (clarifier)
Upgrade filters - Replace filter media and replace possible underdrains
Upgrade the chemical buildings
Upgrade the electrical distribution system
Upgrade the SCADA system

- **Water Storage**

Abandon existing ground steel storage tank
Placement of a new 250,000 gallon concrete ground storage tank

- **Additional Capacity (2.5 MGD)**

Placement of Ultra-Filtration surface source water purification system
Piping from Ultra-Filtration system to storage tank

- **Plant Distribution System**

Upgrade high service pumps to the distribution system
Upgrade transfer pumps from the storage reservoir to the existing plant and the Ultra-Filtration system plant

- **Raw Water Supply**

Upgrade pumps at the River Pump Station
Stabilize River Pump Station Structure on the Rio Grande Banks

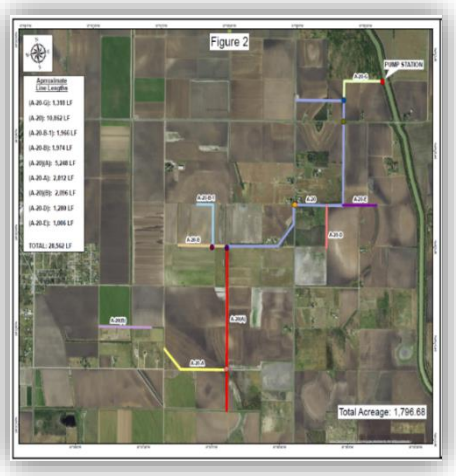
Client: Delta Lake Irrigation District

Contact: Mr. Troy Allen, General Manager

Address: 10370 Charles Green Rd., Edcouch, TX 78538

Phone: (956) 262-2101

Date: 2018 – 2023



Contract Value: $3,200,000.00

Project Summary: Canal to Pipeline Conversion of Canal A-20 and Pump Station

For this important project, a grant from the Bureau of Reclamation (BOR) of $1,000,000 was procured by the SWG to aid in the cost of construction.

The project will convert approximately **28,000 linear feet** (~5.3 miles) of deteriorated canal into a modern pipeline system. **This 36”-18” pipeline** will contain flowmeters at strategic points to monitor water flow, and has sluice gates and line gate valves at specific locations to isolate pipeline sections as necessary. Additionally, the main diesel pump station will be deleted and has been designed to be replaces as a **state-of-the art pump station, with VFD controlled twin electric pumps**, which will enable the deletion of 5

total diesel pump stations in the system. The flow meters will also connect to this master pump station, and the entire system will be capable of being monitored and controlled remotely.

The deletion of these diesel pump stations will Significantly lower operation and maintenance costs to the District, while eliminating any contamination from them. Additionally, and the primary reason why the BOR funded the project, the canal conversion to pipeline project is anticipated to save approx. 2,050 acre-feet of water, being **668 million gallons, per year.**

Client: Laguna Madre Water District

Contact: Mr. Charles F. Ortiz, P.E., District Engineer

Address: 105 Port Road, Port Isabel, TX 78578

Phone: (956) 943-2626, Ext. 130

Date: February 2021- 2023

Contract Value: $2,630,604.00

Project Summary: Improvements to the Water Distribution System for Laguna Blvd, Causeway Bypass, and Valve Upgrades.

SWG was selected by LMWD to design and conduct construction management for waterline upgrade in Laguna Blvd. from Marisol St. to Gardenia St. Also, design services for the Installation of VFDs for the High Service Pumps.

Client: Laguna Madre Water District

Contact: Mr. Charles F. Ortiz, P.E., District Engineer

Address: 105 Port Road, Port Isabel, TX 78578

Phone: (956) 943-2626, Ext. 130

Date: May 2020- April 2022

Contract Value: $1,601,776.75

Project Summary:

Rehabilitation and Improvements of Clarification and Flocculation Basins at Water Treatment Plant No. 1.

SWG was selected by LMWD to design Water Treatment Plant No. 1 in Port Isabel, TX. Design of clarifier a rehabilitation including removal and replacement of 60 FT. upflow clarifier butterfly valve, Mag meter for 10" and 14" raw water lines along with electrical as required.

Current Projects:

- City of Brownsville- Bus Stop Improvements
- City of Donna-Water Plant Improvements

PROFESSIONAL SERVICES AGREEMENT

PROFESSIONAL SERVICES AGREEMENT: STATEMENT

SWG Engineering, LLC (SWG) has read the Professional Services Agreement included in the RFQ#2024-9, and if selected will meet the prerequisite insurance requirements as per the said RFQ, and agrees to enter in to such agreement.

Acknowledged By:

Randall C. Winston, P.E.

Randall C. Winston, PE/President
SWG Engineering, LLC
July 16, 2024

SECTION #7

CONTACT INFORMATION

1.) Firm name, including the address of firm office, structure of firm, and future plans for change of ownership:

Primary Office:	**SWG Engineering, LLC** 611 Bill Summers Intl. Blvd. Weslaco, TX 78596
Structure of Firm:	Limited Liability Company (LLC) Corporation
Ownership:	N/A

2.) Names, position, phone and fax of contact person:

Randall C. Winston, P.E./President
Tel.: (956) 968-2194
Fax: (956) 968-8300
E-mail: randy@siglerwinstongreenwood.com

3.) Names of principals in the firm, years firm has been in business and size of firm:
Principals: Randall C. Winston, P.E./President, Joseph B. Winston, P.E./RPLS, Jose G. Reyes, P.E., and William F. Ueckert, P.E.

Years in business: 77 Years

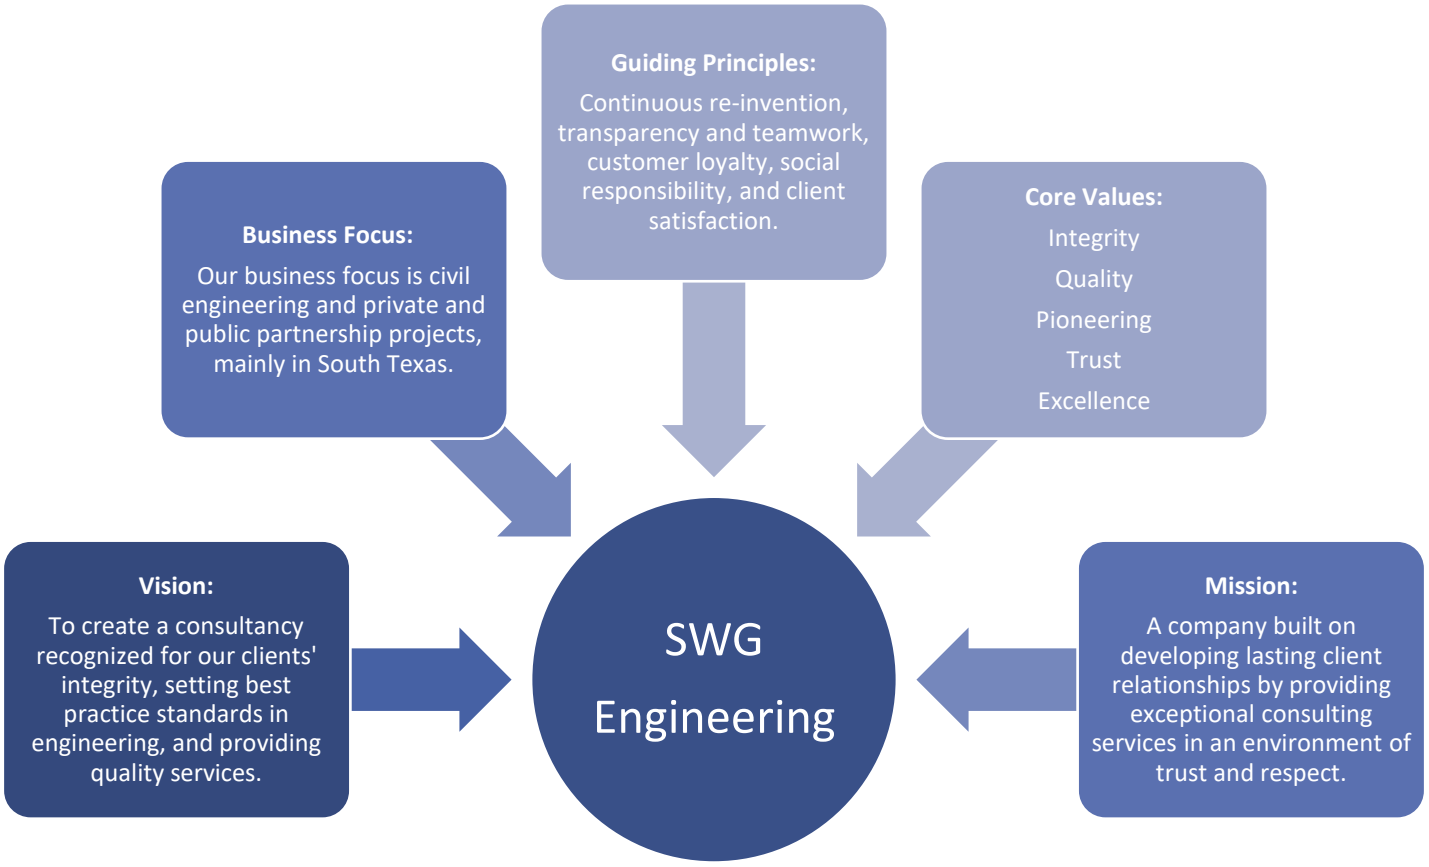
Size: 19 (3 PEs, 1 RPLS, 2 EIT's, 4 AutoCAD 2022 Draftsmen/GIS Specialist, 4 Administrative Staff, 3 Survey Field Personnel, and 2 Project Inspectors)

4.) Listing of all pending litigation or malpractice insurance against or involving the firm or its agents or employers with respect to any work performed; any relationship with City/County employee, officer, City/County Council, or committee member:
None

5.) Amount of professional liability insurance coverage carried by your firm:
SWG Engineering, LLC maintains a professional liability insurance in the amount of $1,000,000.00

6.) Name and phone number of person to contact at the banking institution where firm does business, and list default on loan or finance agreements:
Frost Bank
Paola Escalante Castillo
(956) 702-6683

Default on loan or finance agreements: N/A



7.) Disciplines of consultants for the proposed project:
SWG Engineering – Civil Engineering, Environmental Engineering, Water Resources Engineering, Construction Engineering & Inspection, Surveying, Construction Administration, Grant Writing, and Funding Procurement

8.) Commitment of the firm, assigned project staff, and current work load of staff that would be responsible for the project:

SWG Project Staff included in the Project Chart in the RFQ would be allocated 75% of their time and effort to this project and is committed to the delivery of timely results. Also, SWG has sufficient personnel in the firm to provide back-up for the assigned project staff to be on hand if required.

Project team lead would be Mr. Randy C. Winston, P.E. with project staff such as: Project Engineers, EIT's, and Engineer Inspectors on hand to provide project oversight and consulting as needed.

9.) Firm's purpose:

RE: RFQ #2024-9 Professional Engineering Rotation Services

To whom it may concern:

TEDSI Infrastructure Group Inc (TEDSI) is pleased to submit our Request for Qualifications (RFQ) for a variety of capital improvement projects and city programs and projects. **TEDSI** specializes in Street Infrastructure Evaluation and Improvements, Pavement Management and Improvements, Utility Infrastructure Evaluation and Improvements, Erosion and Sediment Control Design, Water and Wastewater Evaluation and Improvements, Hydrology & Hydraulics, Transportation Evaluation, Traffic Engineering Services, Traffic Signal Design, and Civil Engineering as described in the scope of services.

Founded over 35+ years ago, **TEDSI** is a well-established Engineering Consultant Firm with a local office in Mission, Texas. We are registered with the Texas Board of Professional Engineers (# F-1640) to perform engineering services in the State of Texas. Our professional staff has extensive experience with municipalities across the State of Texas and has experience in working with programs funded by federal, state, and local governments. The experience of our team's professional staff covers a broad spectrum of Professional Services. This experience will allow the **TEDSI Team** to provide solutions needed to complete these projects on time and with the utmost professionalism.

Our client relationships are a crucial part of our day-to-day business. Our staff is committed to the philosophy of establishing and maintaining long-term relationships with our clients in order to provide them the product they need. We have assembled a very capable team of engineers, surveyors and scientists who can meet the challenges and provide a quality product for the city.

For this RFQ, the point of contact will be Mr. Ponciano N. Longoria, P.E., CFM (ponciano.longoria@tedsi.com) 1201 E. Interstate Hwy 2, Mission TX 78572, (956) 424-7898. We pledge our total commitment and are ready to respond promptly and efficiently to serving your needs. **TEDSI** is privileged and grateful to present the following qualifications for your review and consideration.

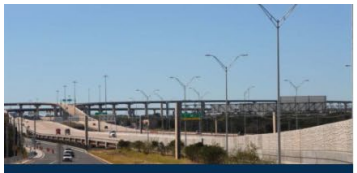
By signing this letter of transmittal, I certify that I am the CEO & President to bind TEDSI into contract with the City of Edinburg.

Sincerely,
TEDSI INFRASTRUCTURE GROUP, INC.

CEO/President

II. FIRM QUALIFICATION AND EXPERIENCE

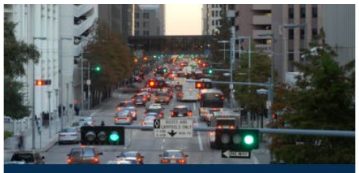
TEDSI, founded in 1984, is registered with the Texas Board of Professional Engineers (F-1640) to perform engineering services in the State of Texas. **TEDSI** has been providing engineering services in the State of Texas for over 35+ years.



Scope of Services TEDSI can perform:

- **Street Infrastructure Evaluation and Improvements**
- **Pavement Management and Improvements**
- **Utility Infrastructure Evaluation and Improvements**
- **Erosion and Sediment Control Design**
- **Water and Wastewater Evaluation and Improvements**
- **Hydrology & Hydraulics**
- **Transportation Evaluation**
- **Traffic Engineering Services**
- **Traffic Signal Design**
- **Civil Engineering**

Engineering Services provided by firm include, but may not limited to:

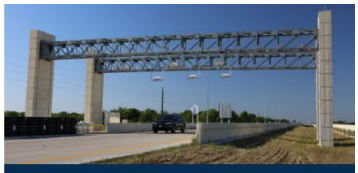


- **Field investigation and data collection**
- **Feasibility evaluation and alternatives analysis**
- **Design development and cost estimating**
- **Preparation of plans, specifications and estimates**
- **Review and check plans, subdivision and parcel maps, and computations submitted by private developers**
- **Review of engineering and encroachment permits**
- **Coordination with utility agencies, consultants, and other public agencies**
- **Organization, participation and presentations at meetings held by City staff, the City Council, neighborhood groups, and other stakeholders**
- **Preparation of preliminary documents, plans and/or reports including findings and recommendations**
- **Preparation final documents, plans and/or reports responding to City and other stakeholder comments**
- **Preparation of handouts and graphical displays for public meetings**
- **Management and monitoring of capital improvement project**
- **Management and monitoring of planning projects**
- **Administration and monitoring of regional, state and federal grants**
- **General civil engineering support services as assigned**

Additional Services TEDSI can perform:

Transportation Services

TEDSI has developed a structured format to provide efficient and quality assured management of traffic signal and other transportation related construction.



Traffic Engineering and Design

Our expertise covers every aspect of new roadways, highways, expressways, urban freeways, complex interchanges and toll roads.

Hydrology and Water Resources

A major component of any project is drainage. Design, maintenance and Functionality are the standard measures of effectiveness in the area of storm-water design.

Tolling and ITS

With decades of Intelligent Transportation Systems (ITS), TEDSI has specialized in giving customers the ability to measure, evaluate and communicate traffic conditions to motorist.

ADVANCED PROJECT DEVELOPMENT	ROADWAY & PS&E	TRAFFIC ENGINEERING		WATER RESOURCES
		TRAFFIC STUDIES	TRAFFIC PS&E	
Route Studies	Roadway Design	Traffic Impact Analysis	Intelligent Transportation Systems	Storm Water Pollution
Schematics	Bridge Design	Traffic Projections	ITS Integration	Wastewater Lines

Preliminary Utility Coordination	Culvert Crossings/Outfall Design	Lighting Contour Studies	Traffic Control Plan	Waterline Improvements
Preliminary Engineering Report	Subsurface Utility Engineering	Traffic Signal/Warrants	Illumination	Effluent Line Improvements
Mobility Planning	Utility Coordination Management	Intersection Control Evaluation	Signal Design	Water Reclamation
	Detentions Facility Design	Speed Zone Studies	Signing	
	Drainage Ditch Design	Traffic Analysis for Highway Design	Pavement Markings	
	Bicycle and Pedestrian Facility Design	Ramps Capacity Analysis	Traffic Control	
	Construction Management/Inspection	Freeway Weaving Analysis		
		Traffic Signal Phasing & Timings Development		

TEDSI has completed projects within budget and on a timely manner for the City of Edinburg, City of McAllen, City of Mission, City of Pharr, City of Weslaco, City of Harlingen, City of Brownsville, Hidalgo County, Cameron County, Hidalgo County Regional Mobility Authority, Cameron County Regional Mobility Authority as well as the Texas Water Development Board, TCEA, FEMA, Texas Department of Transportation (TXDOT) in the Pharr, Laredo, San Antonio, Beaumont, Dallas, Tyler , Fort Worth, Waco, Austin, Houston and El Paso Districts.

TEDSI is fully cognizant of all applicable Federal, State, County and municipal codes, ordinances, regulations and standards relating to transportation and traffic engineering. We pride ourselves in the ability to provide personalized quality-assured service and timely responses to our clients' needs. Our track record has demonstrated our performance and earned us a distinguished reputation in the field of transportation and traffic engineering.

EXPERIENCE - ENGINEERING AND PROJECT MANAGEMENT SERVICES

The **TEDSI** Team has completed projects with similar tasks required for this RFQ. **TEDSI** has extensive experience working for various entities. See below for list of representative projects (**Last 2 Years) (***Last 5 Years):

- 2022 Raise Grant – City of Edinburg, Completed 2023 **
- Jackson Rd at Chapin Rd Traffic Signal Design – City of Edinburg, On-going Construction **
- FM 1925 at M Rd – City of Edinburg, On-going Construction **
- Freddy Gonzalez Dr at Monmack Rd – City of Edinburg, On-going Construction **
- Torres Acres – City of McAllen, PS&E Complete & Pending Construction 2022 **
- Trenton at Auburn – City of McAllen, On-Going Construction **
- Dove Ave – City of McAllen, Construction Complete Mar. 2022 **
- City of Mission Master Drainage Plan – City of Mission, Completed 2020 ***
- Esperanza Drainage Improvements – City of Mission, On-Going Construction ***
- Faysville Drain – Hidalgo County Drainage District, On-Going Construction **
- J-08 Drain – Hidalgo County Drainage District, On-Going Construction **
- Pharr BSIF – City of Pharr, On-Going Construction **
- 9th & 13th Street Storm Sewer Improvements – City of Harlingen, Construction Complete 2021 **
- Jefferson Avenue Storm Sewer Improvements – City of Harlingen, On-going PS&E ***
- Hickory Hill Road Drainage Improvements – City of Harlingen, On-going PS&E **
- Victor Park Parking Lot – City of Harlingen, Ongoing PS&E **
- Brownsville-Los Fresnos Hike & Bike Trail – City of Brownsville, PS&E Complete & Pending Construction **
- UTRGV Pedestrian Study – City of Brownsville & UTRGV, Finalizing Study ***
- Whipple Road – Hidalgo County RMA, Complete Schematic ***
- Russell Rd – CCRMA, On-going PS&E ***
- HUC 10 Flood Protection Study – City of Harlingen, On-going Study **
- Delta Regional Watershed – Delta Regional Water Management, Hidalgo County Drainage District No. 1
- Sanitary Sewer Improvements, City of Edinburg***
- City of Edinburg GIS Mapping and Preliminary H&H for Master Drainage Plan Application***
- City of Edinburg Master Drainage Plan/TWDB Flood Protection Plan
- SH 107 (University Dr) at Joe Ochoa Ave Traffic Signal, City of Edinburg ***
- Safe Routes to School Project Phase I, City of Edinburg ***
- Safe Routes to School Project Phase II, City of Edinburg ***
- Edinburg Wastewater Treatment Plant Effluent Line, Edinburg, City of Edinburg ***
- J09 Drainage Outfall, Hidalgo County, Hidalgo County Pct 4 ***
- Mile 2W Rd, Mercedes, Hidalgo County Pct 1***
- Mile 6W Rd, Weslaco, TXDOT Pharr District ***
- Saenz St, Mercedes, Hidalgo County, Pct 1 ***
- Solar Lighting Project, Hidalgo County, Hidalgo County Pct 1 ***
- Dixieland Extension, Harlingen, City of Harlingen ***

TEDSI's UNIQUENESS

TEDSI can provide services and has staffing covering the following categories: Street Infrastructure Evaluation and Improvements, Pavement Management and Improvements, Utility Infrastructure Evaluation and Improvements, Erosion and Sediment Control Design, Water and Wastewater Evaluation and Improvements, Hydrology & Hydraulics, Transportation Evaluation, Traffic Engineering Services, Traffic Signal Design and Civil Engineering Projects. We understand both Traffic and Transportation aspects of a project, which makes **TEDSI** a unique company to perform these services for the city.

Our purpose is to provide professional consulting services with passion and integrity, to help build a better world for our employees, their families, our clients, and the communities we serve. We pride ourselves in the ability to provide personalized quality-assured service and timely responses to our clients' needs. Our track record has demonstrated our performance and earned us a distinguished reputation in the field of transportation and traffic engineering.

With a local office and local staff, **TEDSI** is committed to City of Edinburg and able to provide fast project deliverables. Our employees work and live in the area and are familiar with the local issues and concerns.

OFFICE LOCATION PROVIDING SERVICES

We have offices located in:

MISSION
1201 E. Interstate Highway 2
Mission TX 78572
Tel: (956) 424-7898
Fax: (956) 424-7022

HOUSTON
738 Highway 6 South Ste 430
Houston TX 77079
Tel: (832) 619-1000
Fax: (832) 619-1018

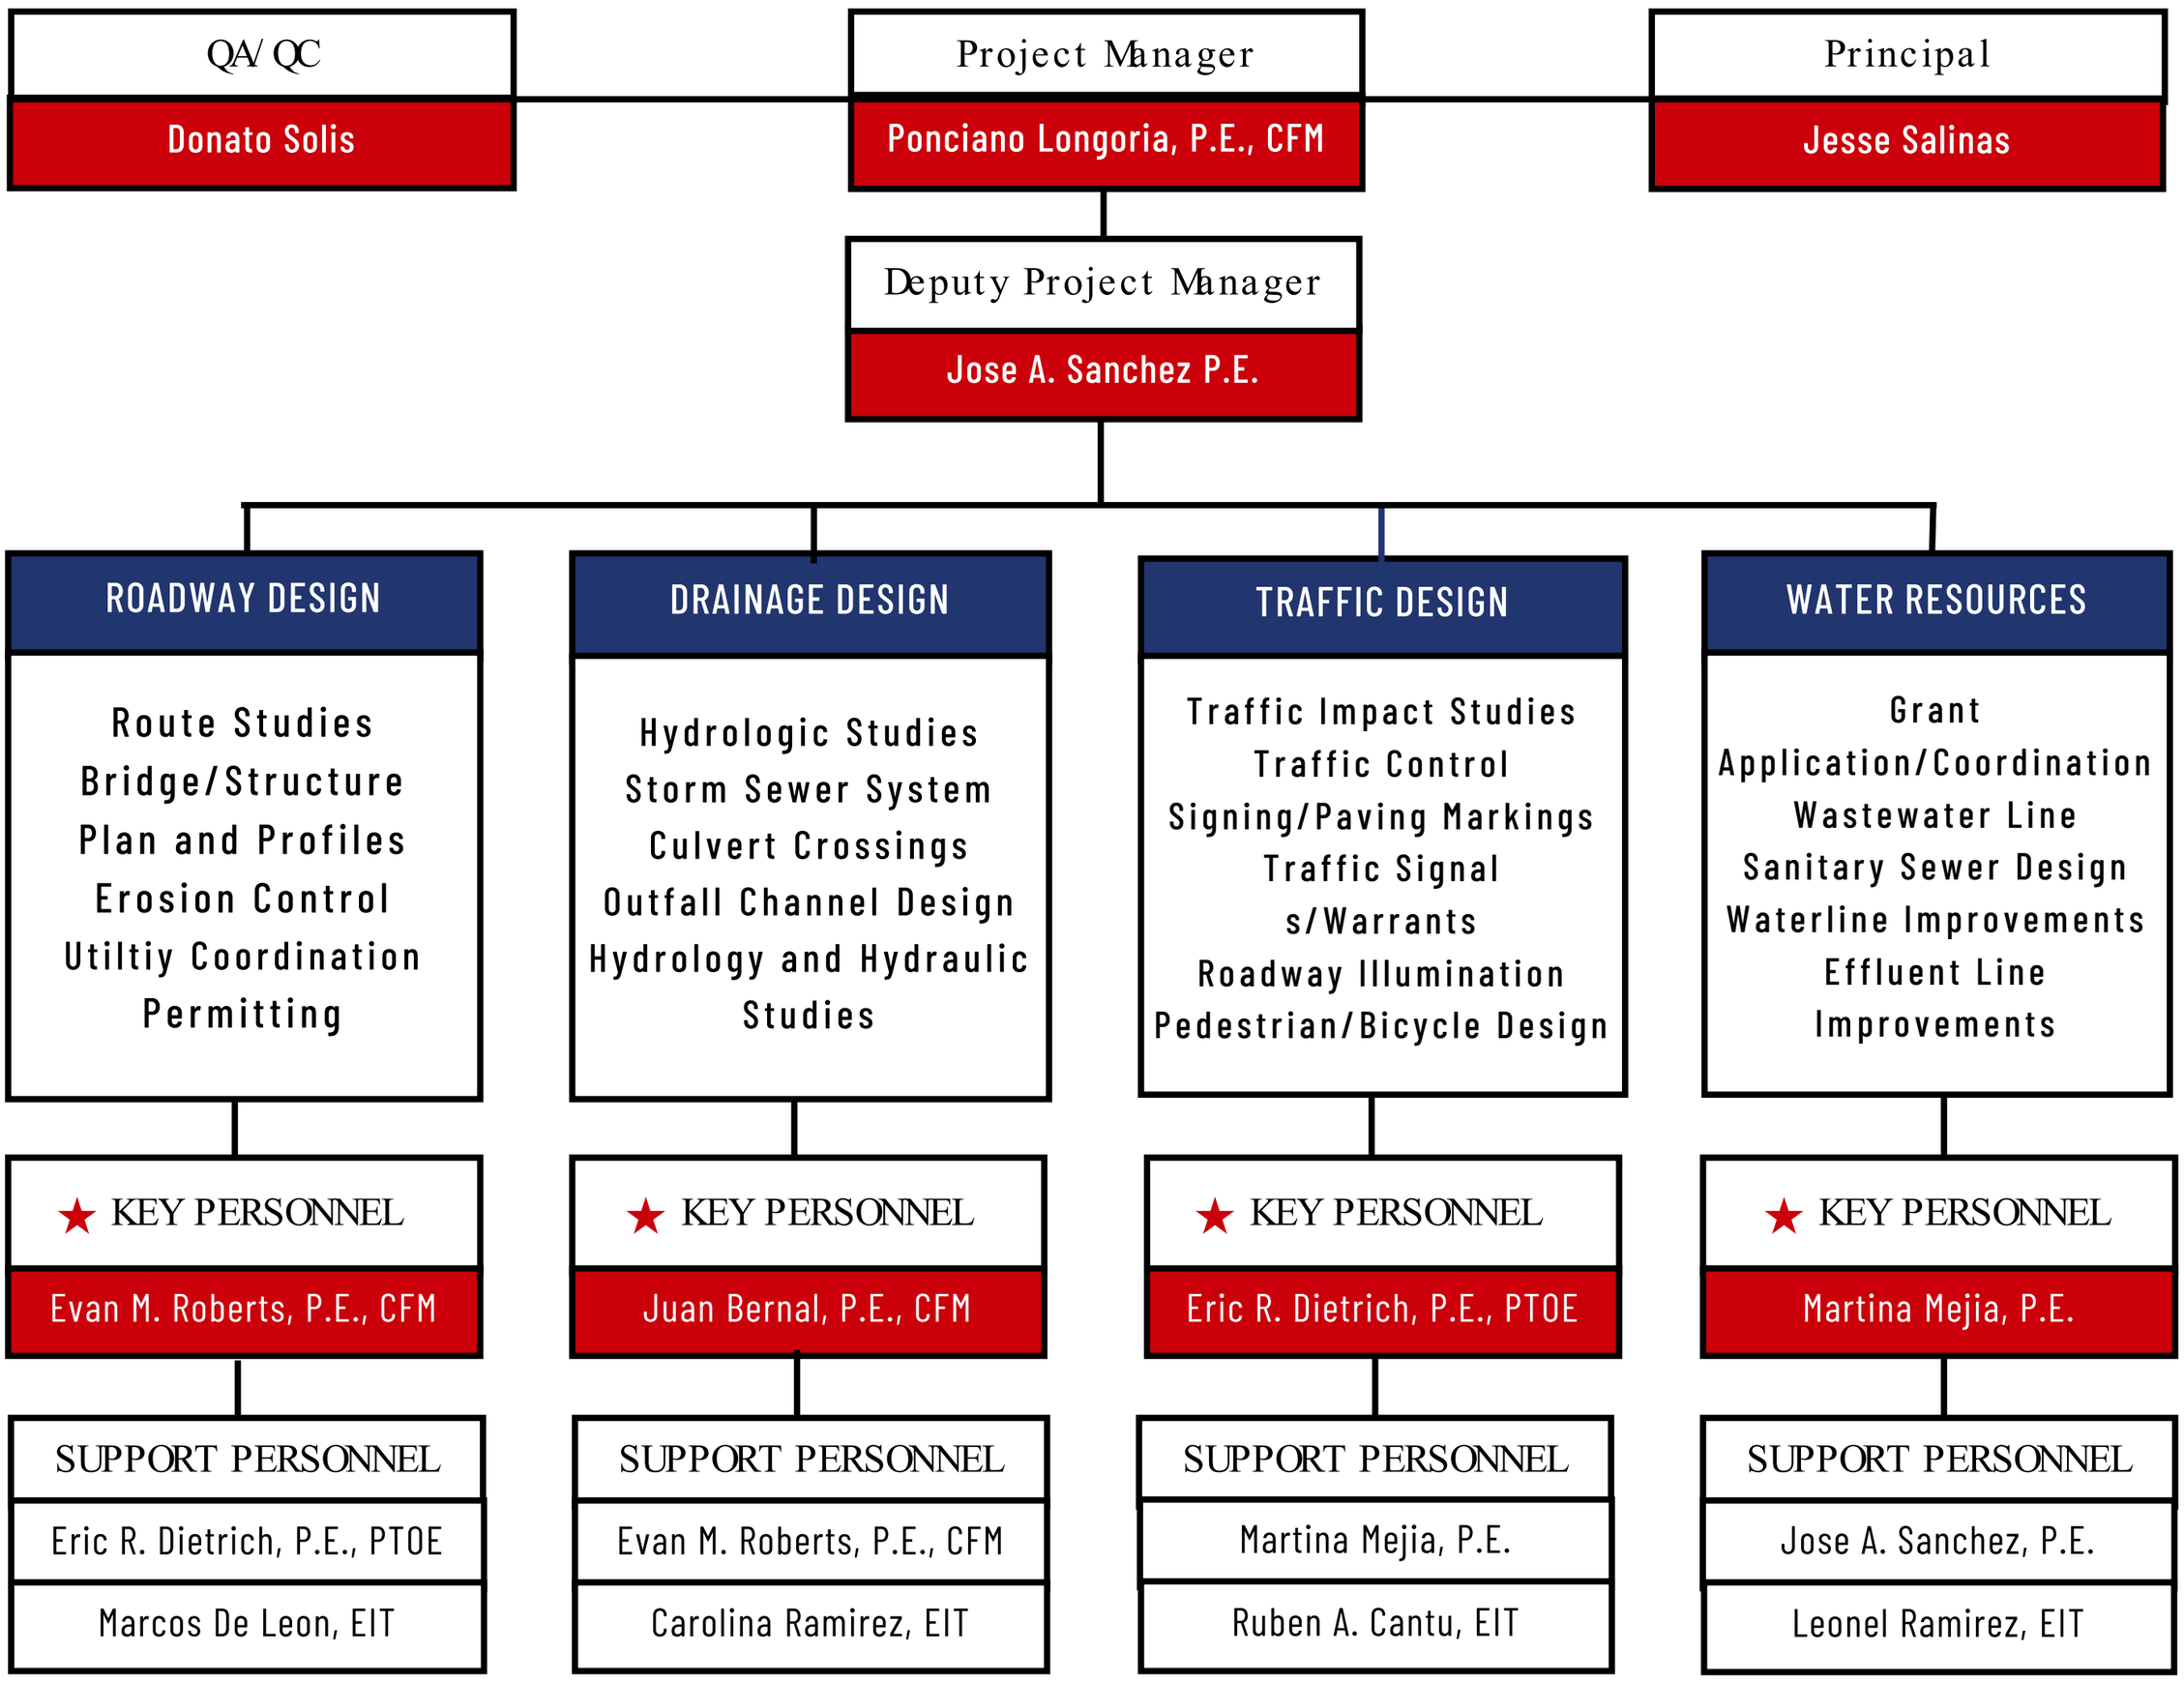
Office selected for this project: Mission (Headquarter)

The Mission Office will provide and manage all services requested by the city for this said RFQ with support from our Houston Office if needed.

Contact Person: Jesse Salinas
Chief Executive Officer/President
Tel.: (956) 424-7898 Fax: (956) 424-7022

PART TIME STAFFING

TEDSI's staff include professionals with the following licenses: 11 Professional Engineers (PE), 1 Professional Traffic Operations Engineers (PTOE), 3 Certified Floodplain Manager (CFM) and 1 Registered Public Land Surveyor (RPLS).



Our firm has the necessary staff required to provide all services requested by the city at this time.

PAST PROJECTS WITHIN THE CITY OF EDINBURG WITH REFERENCES

Jackson & Chapin Traffic Signal, Edinburg, TX

Developed signal timings using Synchro software and turning movement counts (TMCs), ensuring optimal coordination for all four approaches. This process involved creating timings that effectively manage traffic volumes during peak hours, both in the morning (AM) and evening (PM). By manually counting vehicles, gained firsthand insights into intersection dynamics and identified necessary adjustments to enhance traffic flow and efficiency.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

2022 Raise Grant Program Submittal for Sprague Road, City of Edinburg, TX

The purpose of this project was to develop the Benefit-Cost Analysis (BCA), BCA Summary, Quantities, and Cost Estimate of Sprague Street between SH 336 (10th Street) and Business 281 (Closner Boulevard). The existing Street of Sprague Street is proposed to widen and add pedestrian and drainage structures for a length of 3.13 miles. BCA summary included a description of the project, existing and proposed conditions of street, demand/project generators, and estimate of benefits.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Austin Street and Joe Ochoa Drive Street Improvements

Project involved the development of the plans, specifications and estimates, drainage area map and design of storm sewer system (hydrology and hydraulics), traffic control plans, utility coordination, signage, pavement markings and construction management for Joe Ochoa Drive from University Drive from University Drive to Fay Street.
Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Trenton Road at Professional Drive, Edinburg TX

Traffic PS&E associated with signal improvements in Edinburg, TX. Traffic engineering tasks included traffic signal design, pavement markings design and small signing design. Signals were designed as part of single plan set. Project required survey, field inventory, signal design, signing and pavement markings design, civil improvements, estimates, bid documents, pre-bid conference, award recommendation, pre-construction and shop drawing reviews.
Team Member in charge: Mr. Jose A. Sanchez, P.E.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Edinburg Safe Routes to School Phase I and II, Edinburg TX, TXDOT Pharr District.

Project involved sidewalk improvements for 28 schools/24 sites. Project required coordination with multiple entities. Project involved design of sidewalks, ramps, driveways, solar powered illuminated crosswalks, traffic signal warrants, traffic signals, overhead flashing beacons, signing, pavement markings, solar roadside school flashers, bike racks, utility coordination, balancing of various CSJ to bring project under budget, coordination with Edinburg CISD, Hidalgo County Pct 4, City of Edinburg, City of McAllen and TXDOT, specifications, estimates and standards.
Team Member in charge: Mr. Jose A. Sanchez, P.E.
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM & Jesus Leal TxDOT

SH 107 (University Dr) at Joe Ochoa Ave Traffic Signal, Edinburg TX, City of Edinburg

The purpose of this project was to allow UTPA and Joe Ochoa Ave traffic to access to both approaches to SH 107. Project involved traffic signal warrant study, traffic signal design, minor roadway improvements and construction support services. Warrant study required use of existing volume counts and projected volume counts. Project required coordination with various entities including UTPA, TXDOT and City of Edinburg. Traffic Signal included spam wire installation, loops, pedestrian signal heads, bike boxes, radio spectrum, accessible pedestrian signals and opticom system for emergency vehicles. Roadway improvements included reconstruction of UTPA driveway, sidewalk, ramps, and removal of SH 107 medians. Tasks also included specifications, estimates and standards.

Team Member in charge: Mr. Eric R. Dietrich, P.E., PTOE

References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM & Jesus Leal TxDOT

SH 107 - Jackson Rd to 10th Ave, Edinburg TX, TXDOT Pharr District

Project involved widening and reconstruction of SH 107. Tasks included roadway design, drainage design, sw3p, traffic control, survey, utility coordination, traffic signal design, pavement markings design, small signing design, specifications, estimates and standards.

Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM

References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM & Jesus Leal TxDOT

Sugar Rd – Owassa Rd to Trenton Rd, Edinburg TX, City of Edinburg

Project involved the widening of Sugar Rd. Tasks included roadway design, drainage design, irrigation crossing design, sw3p, traffic control, survey, utility coordination, traffic signal design, pavement markings design, small signing design, specifications, estimates and standards.

Team Member in charge: Mr. Eric R. Dietrich, P.E, PTOE

References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Sugar Rd at Schunior Rd Traffic Signal, Edinburg TX, City of Edinburg

Project involved traffic signal design, survey, geotechnical study, signing, pavement markings, utility coordination, construction support services, specifications, estimates and standards.

Team Member in charge: Mr. Eric R. Dietrich, P.E, PTOE

Reference: City of Edinburg Director of Public Works Mr. Vicente Romero

SH 107 from McColl Rd to 4th Ave, City of Edinburg, Edinburg, TX

Performed a traffic engineering study analyzing the existing timing along SH 107 arterial, evaluated the benefits of signal timing coordination between McColl Rd and 4th Ave. Signal timing coordination was performed using Synchro 8 and SimTraffic simulation. Deliverables included submittal of clearance interval worksheet, existing and optimized AM, Off, Noon, & PM signal timing analysis.

Team Member in charge: Mr. Jose A. Sanchez, P.E.

References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Jackson Road Hike and Bike Trail – Edinburg TX, City of Edinburg

The purpose of this project was to develop the plans, specifications, estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the Jackson Road Hike and Bike Trail from University Drive to Canton Road. This project was funded through Hidalgo County Metropolitan Organization Transportation Alternative Program.

Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM

References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Cano Walking Trail – Edinburg TX, City of Edinburg
Project involved the development of the plans, specifications and estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the Cano Hike and Bike Trail from Cano Street to Freddy Gonzalez Drive. This project was funded through a healthy living grant from the Edinburg Independent School District.
Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

McIntyre Railroad Crossing Pedestrian Project – Edinburg TX, City of Edinburg
Project involved the development of the plans, specifications and estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the railroad crossing at McIntyre Street between 5th and 6th Avenue. This project was funded through the Hidalgo County Metropolitan Organization Transportation Alternative Program.
Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Bicycle and Pedestrian Plan – Edinburg TX, City of Edinburg
Project involved the development of a Bicycle and Pedestrian Master Plan for the City of Edinburg which consisted of public meetings, data collection, pedestrian and bicycle studies and a capital improvement plan. This project was funded through the Hidalgo County Metropolitan Organization Transportation Alternative Program.

Team Member in charge: Mr. Ponciano N. Longoria, P.E., CFM
References: City of Edinburg City Engineer Mr. Mardoqueo Hinojosa, P.E., CFM, CPM

Sanitary Sewer Improvements – Edinburg TX, City of Edinburg
The purpose of this project was to outline the issues and aspects involved in the development of any reports or studies, identity existing conditions and design requirements. An analysis of existing lifts station was performed with a survey to collect data from the nearest upstream/downstream manhole or structure that will allow the slope and size of the associated facilities to be established. Condition assessment of the Lift Station and associated list station components.
Team Member in charge: Mr. Jose A. Sanchez, P.E.

Phase I Preliminary H&H and Grant Application for Edinburg Master Drainage Plan, Edinburg TX, City of Edinburg.
The purpose of this project was to provide preliminary GIS Mapping and Preliminary Hydrologic and Hydraulic Modeling to formulate the back-up documentation to prepare a grant application for funding and the completion of the City of Edinburg Master Drainage Plan.
Team Member in charge: Mr. Mark W. Lupher, P.E., RPLS
References: Ivan Ortiz, CFM Texas Water Development Board/ City of Edinburg Director of Community Dev./Grants Mgmt. Ms. Marissa Garza

City of Edinburg Master Drainage Plan/TWDB Flood Protection Plan, Edinburg TX, City of Edinburg.
Development of a Stormwater Master Drainage Plan for the City of Edinburg. Tasks included Hydrologic and Hydraulic Baseline Report, Environmental Baseline Report and Master Drainage Report.
Team Member in charge: Mr. Mark W. Lupher, P.E., RPLS
References: City of Edinburg Director of Community Dev./Grants Mgmt. Ms. Marissa Garza

Edinburg Wastewater Treatment Plant Effluent Line, Edinburg TX, HCDD#1/City of Edinburg
Project currently under construction. Project involved new construction of an effluent line/open ditch from Edinburg Wastewater Treatment Plant to North Main Drain Outfall. Effluent line/open ditch extended from WWTP thru Chapin Rd-Doolittle Rd-Russell Rd-Kenyon Rd-Monte Cristo Rd-North Main Drain. Project tasks included drainage studies, drainage

structures design, roadway crossings, utility coordination, construction support services, coordination duties with Hidalgo County and City of Edinburg, specifications, estimates and standards.
Team Member in charge: Mark W. Lupher, P.E., RPLS

VI. PROFESSIONAL SERVICES AGREEMENT

TEDSI has read RFQ Professional Services Agreement and will meet the prerequisite insurance requirements and if selected agree to enter into such agreement. TEDSI accepts the conditions contained in this RFQ with the City of Edinburg.

VII. CONTACT INFORMATION

Jesse Salinas
CEO/President
1201 E. Interstate Hwy 2,
Mission, Texas 78572
Office: (956) 424-7898
Mobile: (956) 222-5181
E-Mail: jsalinas@tedsi.com

Ponciano N. Longoria, P.E, CFM
Project Manager
1201 E. Interstate Hwy 2,
Mission, Texas 78572
Office: (956) 424-7898
Mobile: (956) 221-4794
E-Mail: ponciano.longoria@tedsi.com

VIII. ABILITY TO MEET SCHEDULES AND DEADLINES

This type of contract, above all else, requires response and close coordination with the City Project Manager/Engineer. As on all previous contracts which we have performed, we will posture our team to:

- Expedite the scoping of a work order, fee proposal and resource allocation work plan
- Negotiate the budget
- Execute Prime and Sub Agreements
- Commence work upon issuance of a Notice to Proceed

We have demonstrated our staff's qualifications and necessary expertise for these types of projects through our previously completed work. We have the utmost confidence that the TEDSI Team will fulfill your needs to your complete satisfaction, on time and within budget. The designated Project Manager, Mr. Ponciano N. Longoria, P.E., CFM, has availability to commit the necessary time to complete the projects according to the City of Edinburg schedule. Mr. Longoria as well as the entire Key/Support Personnel are ready to meet the opportunities granted by the city under this contract. The TEDSI Team members have proven track records and have demonstrated their on-time performances on similar projects with Cities, Counties, TxDOT, Regional Mobility Authorities, Toll Road Authorities and other governmental agencies. We commit to you our pledge of total quality and superior performance within time and budget constraints.

APPENDIX

Ponciano N. Longoria, P.E., CFM

Project Manager

Professional Registrations

P.E, State of Texas, No. No. 92969
TxDOT Certification #13335
CFM, #1554-09N

Mr. Longoria has 25 years of experience in the design and construction management of civil engineering projects. Project experience include Hydrologic and Hydraulic studies, Traffic Engineering Studies as well as Plans, Specifications and Estimates (PS&E) for various projects such as traffic signalization, traffic control, signing, pavement markings, roadway design and drainage design/analysis, utility coordination, transportation and construction management services for municipal facilities, Federal Emergency Management Agency (FEMA),Texas Water Development Board (TWDB) and Texas Commission on Environmental Quality (TCEQ), Federal Transit Administration (FTA), and the Texas Department of Transportation (TXDOT) Projects.

Professional Experience

ROADWAY

US Expressway 83

Responsible for the development of the plans, specifications and estimates, drainage area map, design of storm sewer system (hydrology and hydraulics), and utility coordination for US 83 from Inspiration Road to Showers Road. Analyzed and designed the Abram Road Outfall from US Expressway 83 to BUS 83 which consisted of ditch widening and upgrading and/or adding new culverts.

Trenton & Auburn – City of McAllen

The project involved reconstructing an existing roadway and constructing a new roadway to establish an intersection aimed at improving traffic flow in the vicinity. Scope of work included installing curb and gutter, storm sewer systems, signage, and pavement markings. Collaboration with the Project Engineer spanned throughout the entire development of the PS&E (Plans, Specifications, and Estimates) package, encompassing tasks such as creating horizontal alignments, plan and profile sheets, and summary sheets. Additionally, coordination with the City of McAllen ensured incorporation of specific project design standards mandated by the city.

25 Years of Experience

Education

ponciano.longoria@tedsi.com *(956) 424-7898* *www.tedsi-infrastructure.com*

Dove Avenue – City of McAllen

This project, executed in collaboration with the City of McAllen, involved widening an existing 4-lane roadway to accommodate 5 lanes. Scope of work encompassed installing curb and gutter, as well as signage and pavement markings. Throughout the project, coordination with the Project Engineer was maintained to complete the PS&E (Plans, Specifications, and Estimates). Responsibilities included developing horizontal alignments and vertical profiles for the proposed roadway. Additionally, tasks involved creating plan and profile sheets as well as the existing and proposed typical sections. Collaboration with the City of McAllen ensured integration of specific project design standards mandated by the city.

TRAFFIC

City of Edinburg Traffic Signals Projects

Responsible for the development of plans, specifications and estimate and construction management as the City Engineer for various intersections throughout the city for traffic signals, flashing beacons, or multistep intersections. Design included traffic signal warrant studies, traffic signal design, signing and pavement markings, illumination, wheelchair ramp upgrades, and utility coordination.

SH 48

Responsible for the development of the plans, specifications and estimates, drainage area map, hydrology, hydraulics, traffic control plans, utility coordination, signage, pavement markings, traffic signals and construction management for SH 48 from Bahia Grande Bridge to 3 miles north of bridge.

HYDRALOGY, HYDRAULICS

Joe Ochoa Drive

Responsible for the development of the plans, specifications and estimates, drainage area map and design of storm sewer system (hydrology and hydraulics), traffic control plans, utility coordination, signage, pavement markings and construction management for Joe Ochoa Drive from University Drive from University Drive to Fay Street.

US Expressway 83

Responsible for the development of the plans, specifications and estimates, drainage area map, design of storm sewer system (hydrology and hydraulics), and utility coordination for US 83 from Inspiration Road to Showers Road. Analyzed and designed the Abram Road Outfall from US Expressway 83 to BUS 83 which consisted of ditch widening and upgrading and/or adding new culverts.

FM 494 (Shary Road)

Responsible for the development of the plans, specifications and estimates, drainage area map, design of storm sewer system (hydrology and hydraulics), and utility coordination for Shary Road from US Expressway 83 to FM 1016. Analyzed, designed, and preformed Scour Analyses for two major crossings (outfalls).

Bar 5 Subdivision

Responsible for the development of the plans, specifications and estimates, drainage area map and design of storm sewer system (hydrology and hydraulics), traffic control plans, utility coordination, signage, pavement

markings and construction management for Bar 5 Subdivision (Elizabeth Street, Efrain Street, and Yvonne Street.

DRAINAGE

J-08 Hidalgo County Drainage Project in Hidalgo County, Texas

Responsible for assembling the Specifications and Forms of Contract, Bond and Proposal and the Bid Documents.

5th & 7th Drainage Improvements in the City of Harlingen, Texas

Responsible for the preliminary design of drainage improvements in the Harlingen Area known as 5th & 7th (System 21). Project also included the preliminary design of Traffic Control Plans, SW3P layouts, and estimate of quantities.

City of Harlingen Downtown Drainage Project

Responsible for the development of the plans, specifications and estimates, drainage area map and design of storm sewer system (hydrology and hydraulics), traffic control plans, utility coordination, signage, pavement markings and construction management for the Harlingen Downtown Drainage Improvements from Bus 77 and Jefferson Avenue to 3rd and Monroe Avenue.

Torres Acres Roadway and Drainage Improvements

Responsible for the development of the plans, specifications, and estimates, utility coordination, and construction support services for the improvements of the intersection of Trenton at Auburn/33rd Street.

North Main Drain – Hidalgo County

In collaboration with Hidalgo County Precinct 4 and the Hidalgo County Drainage District No. 1, this project entailed widening an existing drainage ditch to enhance storage capacity and accommodate maintenance access. Throughout the planning phase, tasks included creating a horizontal alignment and natural ground profile for the ditch, used to generate plan & profile sheets. Collaboration with the Project Engineer was crucial in devising proposed typical sections, addressing right-of-way issues and potential conflicts. Cross sections were then computed to determine earthwork quantities, included in the final plans. Adherence to specific project design standards mandated by Hidalgo County Drainage District No. 1 was ensured.

Esperanza Drainage Improvements Project

Responsible for the development of the plans, specifications, and estimates, utility coordination, and construction support services for the drainage improvements for the Esperanza Drainage Improvement Project.

Hickory Hill Drainage Improvements

Responsible for the development of the hydrology and hydraulic report, plans, specifications, and estimates, utility coordination, and construction support services for the improvements of the Hick Hill Culvert Crossing.

CONSTRUCTION

Dove Avenue Widening Project

Responsible for the development of the plans, specifications, and estimates, utility coordination, and construction support services for the widening of Dove Avenue from Bicentennial Blvd to 23rd Street.

Trenton At Auburn Street Improvements

Responsible for the development of the plans, specifications, and estimates, utility coordination, and construction support services for the improvements of the intersection of Trenton at Auburn/33rd Street.

PEDESTRIAN ELEMENTS

City of Edinburg Jackson Road Hike and Bike Trail

Responsible for the development of the plans, specifications and estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the Jackson Road Hike and Bike Trail from University Drive to Canton Road. This project was funded through the Hidalgo County Metropolitan Organization Transportation Alternative Program.

City of Edinburg Cano Walking Trail

Responsible for the development of the plans, specifications and estimates, traffic control plans, utility coordination, railroad coordination, signage, pavement markings and construction management for the Cano Hike and Bike Trail from Cano Street to Freddy Gonzalez Drive. This project was funded through a healthy living grant from the Edinburg Independent School District.

Jose A. Sanchez, P.E.

Project Manager

Professional Registrations

Professional Engineer, State of Texas, No. 87890

TXDOT Pre-Certification No. 11832

Mr. Sanchez has over 30 years of comprehensive experience in the design of transportation engineering projects. Project experience includes Preliminary Engineering Reports (PER), H&H Studies, FEMA Benefit Cost Analysis, Traffic Studies, Schematics and Plans, Specifications and Estimates (PS&E) for roadway design, drainage design, culvert layouts, small/large drainage areas, typical sections, earthworks, cross-sections, vertical/horizontal alignments, removal layouts, driveway layouts, SW3P, Utility Coordination, Metes and Bounds, ROW Acquisition, Railroad Permitting, Construction Management/Support Services, traffic control design, sequence of construction, detour layouts, illumination design, traffic control, intelligent transportation systems, tolling design, signing design, pavement marking design, traffic signal design, general notes, specifications and construction cost estimates.

Professional Experience

ROADWAY

Hardy Toll Rd – IH 610 to IH 45

The Project Manager responsible for a large sign schematic for 21 miles of Hardy Toll Rd in Houston, TX, with incidental limits extending to IH 610, IH 45, Beltway 8, FM 1960, and Hardy Toll Airport Connector, totaling 34 miles. This included analyzing existing signage and proposing 228 large guide sign panels, with recommendations for 23 overheads, 42 cantilever, 69 bridge-mounted, and 16 ground-mounted structures.

LP 375 – US 62/180 (Montana) to Tank Crossing No. 5

The Project Manager responsible for the development of PS&E for ITS and Illumination Design. ITS components included fiber optic backbone, CCTV, DMS, HAR, Bluetooth, lane control signals, and radar vehicle sensing devices. Illumination design encompassed conventional luminaires, high mast assemblies, underpass lighting, utility coordination, and coordination with El Paso International Airport and FHWA.

Border Safety Facility Inspection (BSIF)

The Project Manager responsible for the PS&E for the BSIF at the Pharr – Reynosa International Bridge, which included tasks like ITS,

30+ Years of Experience

Education

B.S., Civil Engineering, Texas A&I University, 1992

M.S., Civil Engineering, Stanford University, 1994

TxDOT Pre-Certifications/ Registrations

- 7.1.1 - Traffic Engineering Studies
- 7.3.1 - Traffic Signal Timing
- 8.1.1 - Signing, Pavement Marking, and Channelization
- 8.2.1 - Illumination
- 8.3.1 – Signalization
- 4.2.1 - Roadway Design
- 7.5.1 - Intelligent Transportation System

Professional Expertise

Roadway, Traffic Control, Traffic Signalization, Illumination, Drainage, Intelligent Transportation Systems, H&H Studies, Signing, Pavement Marking, Tolling, Schematics and Plans, FEMA Benefit Cost Analysis, Specifications and Estimates (PS&E), SW3P, Medes and Bounds, ROW Acquisition, Utility Coordination, Railroad Permitting, Construction Management/Support Services, cross-sections, earthworks, vertical/horizontal alignments, detour layouts, culvert layouts, removal layouts, driveway layouts.

jasanchez@tedsi.com (956) 424-7898 www.tedsi-infrastructure.com

illumination, signing, and pavement markings. The project entailed installing a Vehicle Screening System with various components like Weigh in Motion System, Dimensioning System, Static Scales, Snapshot cameras, Transponder System, Flow Manager System, CCTV cameras, DMS, and VIVDS. Additionally, the project involved estimating construction costs, preparing diagrams and layouts, detailing TMS, and selecting standards and specifications.

US 83 - Sugar Rd to Bentsen Rd

The project involved widening and reconstructing 6.4 miles of US 83 in McAllen, TX, including main lanes, bridge approaches, and frontage roads. Tasks encompassed field inventory, site review, and developing traffic signal plans for five diamond intersections. Signing tasks included creating guide sign panels, sign structures, and summarizing existing and proposed signs. Pavement marking design included layouts and summaries.

TRAFFIC

LP 375 El Paso, TXDOT El Paso District - Project Manager responsible for Traffic PS&E associated with proposed widening and reconstruction of LP 375 from Fonseca Dr to Padres Dr in El Paso TX. Tasks included photometric analysis, illumination design using conventional luminaires, high mast assemblies and underpass lighting.

US 77/83, Brownsville, TXDOT Pharr District - Project Engineer responsible for Traffic PS&E associated with widening and reconstruction of US 7783 – 14th St to FM 3248 in Brownsville TX. Traffic engineering tasks included traffic signal warrants, permanent-temporary traffic signal design for diamond interchanges, pavement markings design, illumination design, large guide sign panel design, overhead structures design, large ground mounted sign design and small signing design.

US 83, Weslaco-Mercedes, TXDOT Pharr District - Project Engineer responsible for Traffic PS&E associated with widening and reconstruction of US 83 – FM 1423 to FM 1015 in Weslaco TX. Traffic engineering tasks included illumination design, traffic signal design for diamond interchanges, pavement markings design, design, large guide sign panel design, overhead structures design, large ground mounted sign design and small signing design.

US 83/SH 359 Interchange, Laredo, TXDOT Laredo District - Project Engineer responsible for Traffic PS&E associated with proposed interchange in Laredo TX. Traffic engineering tasks included traffic signal design, pavement markings design, large guide sign panel design, overhead structures design, large ground mounted sign design and small signing design.

INTELLIGENT TRANSPORTATION SYSTEMS

365 Toll Rd – Anzalduas Connector Rd to US 281 (Military Hwy), Hidalgo County RMA

Project Manager responsible for 13 miles of PS&E for ITS and Toll System including toll zone pavement design, 36 CCTV, 27 single lane Bluetooth detection, 4 multi-lane Bluetooth detection, 43 Radar Vehicle detectors, 4 LED DMS, 4 Wireless Antennas, 9 Toll Gantries Structures integrated using over 38 miles of single mode fiber optic with redundancy, 82 cabinets, 93 patch panels, 46 ITS poles, 238 TY 1 ground boxes, 165 TY 2 ground boxes w/splice enclosures, over 2800 fiber splices and Traffic Management Center Electronics/Software.

US 62/180 (Montana Ave) – Global Reach to Tierra Este. TXDOT El Paso District

Project Manager responsible for 5 miles of PS&E for ITS System including 7 CCTV, 6 multi-lane Bluetooth detection, 6 Radar Vehicle detectors, 8 LED DMS, 2 HAR integrated using over 16 miles of single mode fiber optic, 16 cabinets, 70 patch panels, 6 ITS poles, 128 TY 1 ground boxes and one TY 2 ground box w/splice enclosure.

Toll System Integration Request of Proposals, Hidalgo County RMA

Project Manager responsible for development of Request for Proposal (RFP) to procure selection of Toll System Integrator (TSI) for HCRMA. Tasks included TSI RFP preparation, TSI RFP submittals evaluation/recommendation and negotiating agreement between HCRMA and selected TSI. TSI RFP development included 16 volumes: introduction, project description, general provisions, infrastructure, system requirements, system implementation/testing, operations/maintenance, deliverables, performance requirements, scoring methodology, pricing sheets, technical response guide, payment bond, performance bond, agreement and glossary.

DRAINAGE

23rd St – Dicker Rd Water Main/Force Main Extension, McAllen TX, City of McAllen

The Project Manager developed a Preliminary Engineering Report, Schematic, and PS&E for a water main project involving:

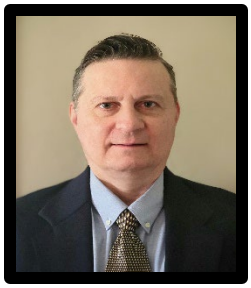
- 16" water main on the east side of 23rd St - FM 1016 to Dicker Rd
- 12" water line on the north side of Dicker Rd - 23rd St to McColl Rd.

The report covered existing and future conditions, utilities, design alternatives, and cost estimates. The schematic included plans for water lines and future road widening on Dicker Rd. PS&E included general notes, quantities, plan and profiles, standards, specifications, and bid documents. Coordination and permitting were conducted with multiple agencies including City of Hidalgo, IBWC, Texas Commission on Environmental Quality, Texas Parks and Wildlife Department, US Army Corps of Engineers, TXDOT and others.

Evangeline Gardens Subdivision Sanitary Sewer Improvements, City of Edinburg

Project Manager responsible for design production of PS&E for sanitary sewer system improvements within the Evangeline Gardens Subdivision, consisting of approximately 3,300 linear feet of 8" sanitary sewer lines, manholes, service connections, and existing pump analysis. Coordination with the City of Edinburg and various utility companies.

9th at 13th St Storm Sewer Improvements, Harlingen TX, City of Harlingen



The project focused on Drainage PS&E, involving hydraulic and hydrologic (H&H) studies and analysis for proposed improvements. It entailed replacing the existing storm sewer system along 9th and 13th St, with tasks including FEMA BCA preparation, H&H Study, and developing Plan and Profile sheets, drainage areas, and stormwater pollution prevention plan. Coordination with TXDOT for Tyler Ave crossing approval was crucial. Additionally, the project involved pre-bid conferences, bid analysis, preconstruction meetings, and addressing Requests for Information (RFI).

Evan M. Roberts, P.E., CFM

Senior Engineer

Professional Registrations

P.E, State of Texas, No. No. 86360
TxDOT Certification, No. 31898
CFM, # 0963-06N

Mr. Roberts has over 28 years of comprehensive experience in the design of transportation engineering projects. He also has over 25 years of experience working for the Texas Department of Transportation (TxDOT). He also has 13 years of supervisor experience with TxDOT in charge of the Pharr District Design and Design Support Sections. He also has 3 years of transportation engineering experience with his current employer TEDSI Infrastructure Group. He is also TxDOT LGPP certified. His project experience includes H&H Studies and roadway schematics, Plans, Specifications and Estimates (PS&E) for hydrologic drainage area map design, roadway drainage design, culvert layout design, storm drain design, roadway design, typical sections, earthwork design, roadway cross-sections, vertical/horizontal alignments, removal layouts, driveway layouts, SW3P details, Utility Coordination, Metes and Bounds review, ROW Acquisition, consultant management, construction management/support services, traffic control plan design, sequence of construction, detour layouts, supporting documentation such as project general notes, utility, ROW Acquisition, ROW encroachment, & ROW relocation certifications, project specifications and construction cost estimates. Relevant project experience includes:

Professional Experience

ROADWAY

US 83 – Responsible for helping develop the plans, specifications, and estimates, that included roadway schematic design, roadway typical section, roadway and geometric alignment design, hydrologic/hydraulic design for cross-culverts, utility engineering & constructability review, signing, pavement markings and other roadway items. I was responsible for the roadway design for this section of US 83 from 0.28 Miles North of FM 2687 to 0.22 Miles South of Lasso Lane

SP 241 (Military Highway) – Responsible for the development of the plans, specifications, and estimates, that included roadway schematic horizontal and vertical alignments, plan and profile detail sheets, typical section details, traffic control plan details, drainage area maps, utility and drainage details sheets, design of drainage area

28+ Years of Experience

Education

B.S., Civil Engineering, Texas A&M University, 1994

TxDOT Pre-Certifications/ Registrations

- 3.2.1 - Route Studies and Schematic Design
- 4.2.1 - Roadway Design
- 4.5.1 - Constructability Review
- 8.1.1 - Signing, Pavement Marking, and Channelization

- 10.2.1 - Roadway Hydraulic Design
- 18.4.1 - Utility Engineering

Professional Expertise

H&H Studies, Roadway Design, Drainage, culvert layout, typical sections, earthwork design, Plans, Specifications and Estimates (PS&E), cross-sections, Schematics, vertical/horizontal alignments, removal layouts, driveway layouts, SW3P, Utility Coordination, Metes and Bounds, ROW, Consultant Management, Construction Management/Support, detour layouts,

eroberts@tedsi.com (956) 424-7898 www.tedsi-infrastructure.com

maps and storm drain system details (hydrology and hydraulics) along with the outfalls for SP 241 from FM 2061 to SP 600.

US 83 (I2 expressway) – Responsible for helping with the development of the roadway schematic design. This included the development of the roadway schematic horizontal and vertical alignments. It also included the roadway typical section development for this corridor from Vanderpool Road to West of Showers Road.

US 83, US 77, US 281, SH 107 and SH 336 – As the TxDOT Pharr District Design Support Supervisor, I was responsible for the review, analysis and processing of all TxDOT Pharr District plans along these major roadway corridors and all other state roads in Pharr District from July 2007 through July 2020. This included the review, analysis and processing of plans, specifications and estimates, consisting of roadway schematic horizontal and vertical alignments, plan and profile detail sheets, typical section details, traffic control plan details, utility and drainage details sheets, design of drainage area maps, roadside drainage ditches and storm drain system details (hydrology and hydraulics) along with the outfalls and all project supporting documentation.

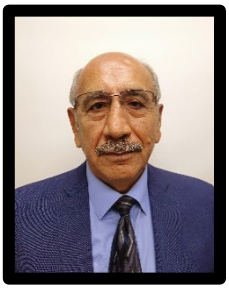
DRAINAGE

US 281 (@ FM 162 Overpass) – Responsible for the development of the plans, specifications and estimates, that included design of drainage area maps, utility and drainage details sheets, roadside drainage ditches, storm drain system details (hydrology and hydraulics) along with the outfalls, bridge details, retaining wall details, roadway schematic horizontal and vertical alignments, plan and profile detail sheets, typical section details, and traffic control plan details for US 281 from 0.5 Mi south of FM 162 to 0.5 Mi north of FM 162. Construction has been completed.

US 281 (@ SH 186 overpass) – Responsible for the development of the plans, specifications and estimates, that included drainage area maps, utility and drainage details sheets, design of drainage area maps, roadside drainage ditches, storm drain system details (hydrology and hydraulics) along with the outfalls, bridge details, retaining wall details, roadway schematic horizontal and vertical alignments, plan and profile detail sheets, typical section details, and traffic control plan details for US 281 from 0.5 Mi south of SH 186 to 0.5 Mi north of SH 186. Construction has been completed.

FM 495 (West Griffin Parkway) – Responsible for the development of the plans, specifications and estimates, that included design of drainage area maps, utility and drainage details sheets, roadside drainage ditches, storm drain system details (hydrology and hydraulics) along with the outfalls, roadway schematic horizontal and vertical alignments, plan and profile detail sheets, typical section details, and traffic control plan details for FM 495 from La Homa Road to SH 107. Construction has been completed.

FM 281 – Responsible for the development of the drainage design that included design of drainage area maps, roadside ditch design, drainage cross-culvert design, along with the outfalls. The project limits were from Hartley County line to US 287.



TEDSI

Juan A. Bernal, P.E., CFM

Professional Engineer

Professional Registrations

P.E, State of Texas, No. 80565
TxDOT Certification #35586
CFM, # 20019715

Mr. Bernal is a Transportation Engineer with over 18 years of dedicated service within the Texas Department of Transportation (TxDOT), notably in the Laredo and Pharr Districts. His expertise spans 13 years as a Hydraulics Design Engineer and Plan Review Lead Engineer, offering invaluable insights into infrastructure development and regulatory compliance. Moreover, he was also the Cameron County Engineer for 8 years. During this time, he managed the County Public Works offices across Harlingen, San Benito, and Brownsville, ensuring the seamless operation of critical infrastructure projects.

Professional Experience

ROADWAY, DRAINAGE

FM 506 (La Feria)TxDOT Pharr District. Limits from FM 3097 to Bus. US 83.

Combination of typical sections, half urban, within the city of La Feria and half rural, outside city limits. Rehabilitation and widening of existing highway consisting of grading, pavement replacement of existing cross culvert structures and irrigation crossings. Review of plans, specifications and estimates. Hydrology and hydraulics review of five culvert crossings and one irrigation canal along the roadway as well as the analysis of the storm sewer system in the urban section of the project

Interstate 69-E. (Harlingen) TxDOT. Limits from Industrial Blvd. to FM 499

Review and final approval of the schematics prepared for the freeway exit and entrance ramps relocation. Ramps reversal to facilitate freeway operational improvements. Highway plans consisted of pavement design, typical sections, drainage, signing and pavement markings. Horizontal and vertical alignments. Traffic control plan, plan and profile sheets, specifications, and estimates

US 281. TxDOT (Hidalgo County) Limits from SH 186 to FM 490

Review and final approval for roadway plans for the reconstruction and upgrade of existing US 281 to Interstate standards. 2-12 ft lanes plus shoulders in each direction to be reconstructed as 2-12 ft lanes plus shoulders in each direction and two-12 ft. lanes frontage roads on both

18+ Years of Experience

Education

B.S., Civil Engineering,
University of Texas At El Paso
1984

TxDOT Pre-Certifications/ Registrations

- 10.1.1 - Hydrologic Studies
- 10.2.1 - Roadway Hydraulic Design
- 10.3.1 - Bridge Hydraulic Design

Professional Expertise

Hydraulics, Hydrology, Drainage, Specifications and Estimates, Water Resource Management, Storm Water Management, Traffic Control Plan, horizontal/vertical alignments, Cross-culvert replacements, bridge replacement, scour analysis, typical sections, irrigation systems, signing and pavement marking, layouts.

jbernal@tedsi.com (956) 424-7898 www.tedsi-infrastructure.com

directions. A large drainage area analysis was required for this rural section of highway. Since the median was removed from the existing configuration, an unusual case was brought up where detention ponds were used at the edge of the ROW, and as far as possible from the travel lanes. The analysis of 18 cross-culverts was required for this project. In addition, the review encompassed all typical sections, quantities, plan and profile sheets, horizontal and vertical alignments, and culvert layouts.

HYDROLOGY

FM 509 Cameron County. (Rio Grande Valley MPO).

Hydrology and hydraulic analysis of FM 509 from IH-2 to US 281, 8.5 miles long project. Analysis and proposed design of 23 cross-culverts and one bridge along this route. Complex H&H analysis due to the very flat terrain, several elevated irrigation canal crossings, and limited outfall capacity of some existing culverts. Large shallow FEMA floodplains labeled Zones AE/AH, particular attention given at these locations to minimize or avoid any rise in water surface elevations. Hydrology modeling using Rational formula and Win-TR55. Hydraulics modeling using HY-8 to size proposed cross-culverts.

FM 846 TxDOT (Odessa District).

The Hydraulics Design Engineer responsible for this 11-mile project that included bridge replacement at Sulphur Springs Creek and eleven cross-culvert replacements. He performed the hydrology and hydraulics study for this bridge which comprised a drainage area of 142 square miles. Using HEC-HMS, the NRCS hydrograph model, and TxDOT hydraulics manual, the appropriate design frequency and the 100-year flood check were determined. HEC-RAS was used to determine the effects of water surface profiles, water velocities, and scour potential. Scour analysis was performed following FHWA HEC-18 and TxDOT Scour Analysis guide. TxDOT does not recommend the use of scour analysis from HEC-RAS. This project also included the replacement of all cross-culvert crossings. Multiple RCPs were used at several locations instead of large RCB due to the shallow depth of the roadway.

Spur 54 (City of Harlingen). Limits from Chester Park Road to IH-69E.

Review, analysis, and approval of the schematics prepared by the City of Harlingen and submitted to TxDOT. Schematics included adding an additional lane, storm sewer system and raised medians along the project. Responsible for the analysis and design of the storm sewer system. Review of the final plans, specifications and estimates, horizontal and vertical alignments, plan and profile data sheets, typical section details, and prepare final estimates.

Trenton Road (Hidalgo County). Limits from IH-69C to FM 907.

Prepare schematics for submittal to TxDOT for existing 2-lane roadway to an ultimate configuration of 4-lanes and continuous left turning lane. Including storm sewer design system and bike and pedestrian shared-use path. Schematics included horizontal and vertical alignment. Bridge Hydrology and Hydraulics analysis for the replacement of a bridge on Trenton Road over the Hidalgo County Drainage District No. 1 ditch PSJA Lateral.

Eric R. Dietrich, P.E., PTOE

Project Engineer

Professional Registrations

P.E., State of Texas, No. 94970

PTOE, No. 1590

Mr. Dietrich has over 25 years of experience in traffic and transportation engineering. His past experience includes conducting existing traffic volume collection efforts, performing traffic projections, conducting highway and intersection capacity analysis, freeway weaving and ramp analysis, traffic signal design, development of signal timing plans, traffic signal coordination for optimum vehicular progression on arterials, preparation of traffic study reports, development of speed zone strip maps, Access Management and Traffic Impact studies, ITS planning and design, signing and pavement markings design and roadway design. He is precertified by TxDOT in 8 different categories, the majority being in the groups of Traffic Engineering and Operations Studies and Traffic Operations Design.

Professional Experience

ROADWAY

Hunt Lane Widening – San Antonio, TX.

Mr. Dietrich evaluated traffic demands and road conditions for a City of San Antonio project, widening and reconstructing 1.18 miles of Hunt Lane to address growing traffic needs. Hunt Lane serves as a vital north-to-south route on the city's west side and a key Metro Route for VIA Metropolitan Transit System. Surrounding areas include residential neighborhoods, churches, and schools. Thorough data collection and analyses were conducted using Synchro software for LOS and traffic signal warrant analyses. Recommendations included access management strategies and auxiliary lane analyses to optimize traffic flow, aligning with various guidelines and manuals provided by by the CoSA Final Design Guidance Manual, the CoSA Unified Development Code, the 2006 Texas Manual on Uniform Traffic Control Devices for Streets and Highways (TMUTCD), the 2000 Highway Capacity Manual (2000 HCM), and by A Policy on Geometric Design of Highways and Streets (Green Book), 2001, American Association of Highway and Transportation Officials (AASHTO).

Speed Zone Studies.

Performed sign inventory, speed measurements and development of speed zone strip maps for TxDOT, Laredo, El Paso, Fort Worth and Pharr Districts for over 1,000 miles of urban and rural roadways located in various counties in the state of Texas.

25+ Years of Experience

Education

B.S., Civil Engineering, Universidad Nacional de Tucuman Argentina, 1990

TxDOT Pre-Certifications/ Registrations

- 7.1.1 - Traffic Engineering Studies
- 7.3.1 - Traffic Signal Timing
- 7.5.1 - Intelligent Transportation System
- 8.1.1 - Signing, Pavement Marking, and Channelization
- 8.3.1 – Signalization
- 3.2.1 - Route Studies and Schematic Design
- 4.2.1 - Roadway Design
- 8.6.1 - Rail-Highway Design

Professional Expertise

Roadway Design, Traffic Control, Traffic Signalization, Rai-Highway Design, Illumination, Highway/Intersection Capacity Analysis, Access Management, Traffic Impact Studies, ITS Planning/Design, Plans, Specifications and Estimates (PS&E), Speed Zone Studies, Signing, Pavement Marking, Channelization, Traffic Signal Warrant Analysis, Freeway Reaving and Ramp Analysis.

edietrich@tedsi.com *(956) 424-7898* *www.tedsi-infrastructure.com*

Mr. Dietrich managed speed zone studies for the Fort Worth District. The project included the generation of speed zone strip maps for over 100 miles of roadways in Wise County. Mr. Dietrich coordinated the data collection efforts needed to establish the speed zones and is currently supervising the quality of the strip maps generated. He was in constant communication with the District to make sure the strip maps were completed according to District standards and preferences. As part of the deliverables, Mr. Dietrich created a spreadsheet identifying all speed zones to be approved by either TxDOT Transportation Commission Minute Order and/or by City Ordinance. A cd containing video information was also submitted for each of the segments to help the district visualize the roadway and development characteristics of the segments depicted on the strip maps.

TRAFFIC

City of Port Neches Traffic Study.

Mr. Dietrich conducted a traffic study for the Port Neches Riverfront Development and the reconstruction of the Woodcrest Intermediate School Campus within the City of Port Neches, Texas. The study had multiple purposes. They were:

1) Evaluate vehicle stacking along Heisler St, Jackson Ave and Block St. for the time when Woodcrest students are being picked up by parents.
2) Conduct a signal warrant analysis for intersections of Port Neches Ave at Nall St and at Block St.
3) Perform traffic impact analysis for the proposed development.
4) Evaluate intersection sight distance at the intersection of Port Neches Ave at Montgomery St. and provide recommendations to mitigate any sight distance issue.
5) Evaluate existing speed limits on Port Neches Ave, Llano St and Lee Ave.
6) Propose additional measures to discourage the use of Montgomery St., Marion St., Dallas St. and Llano St, as access routes to the Riverfront Development.

After performing the various analyses, Mr. Dietrich recommended multiple improvements to solve the queueing concerns at the Woodcrest elementary school campus and the various measurements to be taken to mitigate impacts as a result of the additional vehicular traffic accessing the Riverfront Development.

Robstown Trade Processing and Inland Center (RTPIC).

Mr. Dietrich performed a Traffic Impact Analysis and Site Access Study for the proposed RTPIC which will serve as an "Inland Port" facility, coordinating regional ground transportation for shipping, receiving and distributing materials and goods throughout the South Texas Gulf Coast corridor. The study analyzed historical traffic data from the Texas Department of Transportation and conducted 24-hour mechanical counts and turning movement counts. Traffic forecasts were developed over various years using growth rates estimated for the City of Robstown. Future traffic forecasts also considered noise impacts for environmental assessment, with trip generation estimates from the ITE Trip Generation Manual. Maps were created to illustrate truck trip distribution. Additionally, a level of service analysis was conducted for intersections impacted by the facility's traffic, with recommendations proposed for safe access and egress.

Traffic Signal Timing

Mr. Dietrich past experience includes numerous TxDOT projects with the districts of Pharr, Laredo and El Paso which required the preparation of timing charts for diamond type intersections. Examples of these projects include, among others, US 83 in Palmview (4 diamond interchanges), US 83 in Weslaco (6), US 83 in Mercedes (4), US 77/83 in Brownsville (6) and IH-10 in El Paso (3). Mr. Dietrich also prepared timing charts for conventional intersections at numerous locations for Hidalgo County and City of Brownsville and performed coordinatability

analysis and preparation of timing charts for closed loop systems such as the one involving coordination of 7 traffic signals along SH 107 (Conway Ave) in the city of Edinburg, Texas.

Signalization

Traffic signal design involves the preparation of plans, specifications, and estimates for the installation of traffic signals. Mr. Dietrich experience includes numerous TxDOT projects with the districts of San Antonio, Pharr and Laredo as well as projects for the Cities of Laredo, Edinburg, Brownsville and San Antonio. These projects involved the design of both, span wire and mast arm mounted traffic signals for intersections with various geometric configurations including conventional intersections, diamond interchanges, closely spaced intersections, pedestrian signals and "T" intersections.

Examples of TxDOT San Antonio District projects include, among others:

- Loop 1604 at Huebner Rd - Diamond interchange.
- Loop 1604 at FM 2252 (Nacogdoches Rd) - Diamond interchange.
- Loop 1604 at Rogers Ranch Pkwy/Bitters Rd - Diamond interchange.

In upgrading Loop 1604, Mr. Dietrich developed Plans, Specifications & Estimates (PS&E) for signage, illumination, pavement markings, and signals, ensuring compliance with TMUTCD, NEC, and TxDOT standards. He adhered to TAS and ADA guidelines for pedestrian signals and wheelchair ramps. Utilizing advanced technology like LED bulbs and radar detection, he ensured compliance with the latest standards. Mr. Dietrich used the latest technology, including LED bulbs, LED pedestrian signal heads and Audible Pedestrian Signal (APS) units as well as radar presence (RPDD) and advance (RADD) detection to ensure compliance with the latest standards.

US 83 Ramp Analysis between the flood levee and FM 1425 in Mercedes Texas

The project involved analyzing capacity and Level of Service for US 83 freeway between the flood levee and FM 1425 interchange, covering a 3.5-mile main lanes segment with 14 ramps and four diamond interchanges. Data collection included 24-hour mechanical counters and video recordings. The study assessed the potential benefits of reversing ramps to an "X" configuration for new developments along frontage roads. Future traffic volumes, especially from a proposed Factory Outlet Mall, were projected using the ITE Traffic Generator Manual. Highway Capacity Software was used to analyze main lanes and ramp junctions for both configurations, ensuring compliance with TxDOT guidelines. Various scenarios were considered for signalized intersections to achieve acceptable Levels of Service for the interchanges.

IH 35 Ramp Analysis from south of Shiloh Rd Interchange to Loop 20 Interchange, Laredo-Texas

The project analyzed the impact of a proposed 1,800-acre development on the northbound segment of IH 35 freeway between Shiloh Rd and Loop 20 interchanges, covering approximately 3 miles. Four ramps were studied, assessing existing conditions and a proposed option of reversing one on-ramp and adding an off-ramp for better access to the development. Reports were generated for 5-year and 20-year projections, verifying ramp junction locations and conducting diamond interchange analyses to evaluate the traffic generated by the projected growth plus the additional traffic generated by the proposed development.

Loop 375 - Santa Fe St to Pan American Dr, El Paso, TX

Project engineer responsible for the preparation of complete sets of plans, specifications and estimates (PS&E's) for Loop 375 (Border Highway) between Santa Fe St. and Pan American Dr. in the city of El Paso. This project consisted in the installation of 7 Hub Cabinets, 13 CCTV cameras, 4 Dynamic Message Signs, Video Detection Surveillance Systems at 3 Ports of Entry, interconnection of 3 intersection controllers for traffic signal integration

and over 20 radar detection zones connected thru more than 13 miles of fiber optic cable. The development of the system involved coordination with TxDOT's El Paso district as well as with other agencies such as the City of El Paso and U.S. Customs and Border Patrol as a result of the location of the project in the vicinities of an international border.

Pharr – Reynosa Bridge Border Safety Facility Inspection (BSIF), Pharr, TX

Participated as project engineer in the preparation of a complete Signing and Pavement Markings, Illumination and TMS PS&E for the above captioned project. This project involved the installation of a Vehicle Screening System (VCS) including Weigh in Motion System, Dimensioning System, Static Scales and Snapshot cameras as well as a Transponder System, a Flow Manager System, CCTV cameras, DMS and VIVDS at the Pharr – Reynosa Bridge (BSIF) in Pharr, Texas. The project included an Estimated Construction Cost Estimate for the SPM, Illumination and TMS Elements, diagrams and layouts, TMS details plus the selection of applicable standards and specifications.

PEDESTRIAN ELEMENTS

University of Texas Rio Grande Valley (UTRGV) Pedestrian Crossing Analysis Studies.

Mr. Dietrich performed a pedestrian crossing study for UTRGV campus in Bronwsville, Texas. The purpose of this traffic engineering study was to analyze current vehicular and pedestrian activity and propose pedestrian safety enhancements along W University Blvd. Mr. Dietrich assessed existing traffic conditions, compiled pedestrian, and vehicular data collection, performed an operational and a crash analysis, a marked crosswalk analysis and developed short-term and long-term safety recommendations for the campus.

Martina Mejia, P.E.

Design Engineer

Professional Registrations

P.E, State of Texas, No. 143950

TxDOT Certification #33736

Ms. Mejia has extensive experience in the design and construction management of civil engineering projects. Project experience includes Traffic Engineering studies, Review of Development on behalf of Traffic Operations Department, Traffic Design and Roadway Design. As well as Plans, Specifications and Estimates (PS&E) for various projects, traffic control plans, signing, pavement markings, illumination, and roadway design.

Professional Experience

ROADWAY

US 90 Roadway in the City of Castroville, Texas, Texas DOT – Responsible for the development of signage and sidewalk design. Project consisted of field review of signage, utilities and existing structures, design of signage, sidewalk, and estimate of quantities.

FM 1333 Roadway in Atascosa County, Texas, Texas DOT – Responsible for the development of driveway planning and profiling. Project consisted of design of existing and proposed driveway planning and profiling and estimate of quantities.

FM 78 Rehabilitation, in Seguin, Texas, Texas DOT – Responsible for field review of signage and existing structures.

Old Alice Road in the City of Brownsville, Texas – Responsible for the design of Existing and Proposed Typical Sections to Old Alice Road schematic. Old Alice Road is being proposed to be widened and include sidewalks and a shared use 10ft Hike and Bike Trail. Project is currently in the proposal state, being reviewed to proceed for design.

FM 281 Roadway, Amarillo District, Texas DOT – Responsible for completing the Removal Layouts and Storm Water Pollution Prevention Plan (SW3P) Layouts for FM 281 roadway project. Project funded through the Texas Department of Transportation.

TRAFFIC

Development Reviewer for the City of McAllen, McAllen, Texas
Responsible for reviewing applications of the development process which include subdivision plats, site plans, rezoning applications, conditional use permits and building permits. I reviewed these cases on behalf of the Traffic Operations department. Since I began, I have reviewed more than 170 development cases.

8 Years of Experience

Education
B.S., Civil Engineering, University of Texas Pan-American, 2015

mmejia@tedsi.com *(956) 424-7898* *www.tedsi-infrastructure.com*

Every case requires a trip generation and a review for access location(s), and sometimes a Traffic Impact Analysis is warranted depending on the size of the development. There are more items to review depending on the development, but these items were the most common and impactful topics to review. As part of this process, I would also meet with the engineer or representative of the development to discuss comments and find alternative solutions to any development concerns.

Traffic Studies in the City of McAllen, Texas - Responsible for traffic analysis for various roadways and intersections in the City of McAllen which included the review of traffic data and characteristics, types of traffic control devices, signage, and pavement markings. Projects include review of All-Way Stop intersections, Signalized/Unsignalized Intersections, Change of Lane Distributions, Addition of Right/Left Turn Lanes, Adjusting Signalized Time, Feasibility Studies for Critical Crash locations, Reviewing Trip Generations and/or Traffic Impact Analysis for Developments and Speed Hump Evaluations in Residential Streets.

Signal Design at SH 336 (10th Street) and Wisconsin Road, City of McAllen, Texas – Responsible for the traffic data collection, design, and construction plan of the traffic signal at the intersection of SH 336 (10th Street) and Wisconsin Road. Project consisted of traffic data collection, signal warrant study, field surveys, base mapping, signage, pavement markings, electrical schedule and estimate of quantities.

Signal Design at FM 1926 (23rd Street) and Sprague Road, City of McAllen, Texas, Texas DOT – Responsible for the traffic data collection, design, and construction plan of the traffic signal at the intersection of FM 1926 (23rd Street) and Sprague Road. Project consisted of traffic data collection, signal warrant study, field surveys, base mapping, signage, pavement markings, electrical schedule and estimate of quantities.

Signal Rebuilds of the City of McAllen, Texas – Responsible for the rebuild of three (3) existing signalized intersections. Project consisted of maintaining and updating broken bores, ramps, signal pole foundations, rewiring with new pull boxes, new signal design, and being consistent with budget available.

Bicentennial Boulevard Corridor between Trenton Road and SH 107 (University Drive) for the City of McAllen, Texas, Texas DOT – Responsible for review of Signal Design, Illumination, Sign and Pavement Marking layouts of Bicentennial Boulevard Project. Project consisted of seven (7) new signalized intersections and 2.8 miles of new corridor which consisted of field review of utilities and existing structures, review of design, signage, pavement markings, electrical schedule, estimate of quantities, and final walk-throughs for four phases.

Signal Design at Camp and W Court Street of the City of Seguin, Texas, Texas DOT - Responsible for the rebuilding of an existing signalized intersection. Project consisted of new signal design, new foundations for all poles, signal cabinet and pull boxes, development of electrical schedule, signal, and estimate of quantities.

Signal Designs along US 377 Corridor between Pirate Drive and Overstreet Boulevard in the City of Granbury, Texas, Texas DOT – Responsible for the Signal Design of 4 intersections of US 377 Project. Project consisted of one (1) new signalized diamond intersection, two (2) existing signals needing updated/rebuild, and one (1) Diamond Intersection changing to a Diverging Diamond Intersection (DDI). The plans consisted of review of utilities and existing structures, design of all signals, overhead signage, electrical schedule, and estimate of quantities.

FM 509 Traffic Studies in the City of Harlingen, Texas, Texas DOT
Responsible for traffic analysis for FM 509 and seven (7) intersections along FM 5059 in the City of Harlingen which included the review of traffic data and characteristics, types of traffic control devices, and the Level of Service for FM 509 segment and intersections. Projects include review of All-Way Stop intersections,

Signalized/Unsignalized Intersections, Change of Lane Distributions, Addition of Right/Left Turn Lanes, and Adjusting Signalized Time (if applicable).

Signal Designs along Spur 54 in the City of Harlingen, Texas, Texas DOT – Responsible for the Signal Design of two (2) intersections on Spur 54. Project consisted of changing to two (2) flashing-beacon intersections into two (2) new signalized intersection. The plans consisted of review of utilities and existing structures, design of all signals, overhead signage, electrical schedule, and estimate of quantities.

PEDESTRIAN ELEMENTS

Helena Avenue Sidewalk Project in the City of McAllen, Texas - Responsible for the development of the plans, specifications and estimates, traffic control plans and field review of utilities and utility coordination on Helena Avenue from Ware Road to 24th Street.

Jackson Road Hike & Bike Trail – Phase II for the City of Edinburg and City of McAllen, Texas – Responsible for the Sign and Pavement marking design, Rest Area design, and the estimate of quantities for the Jackson Road Hike & Bike Trail. The Hike and Bike consists of a 10ft shared use path in McAllen and Edinburg TX boundaries.

Southmost Nature Trail for the City of Brownsville, Texas – Responsible for installation of Pedestrian Infrastructure (solar security lights, concrete pads, benches and trash receptacles), Sign and Pavement Markings, and the Estimate of Quantities for the Southmost Nature Trail. The Hike and Bike consists of an existing 10ft hike and bike trail in Brownsville, Texas.

West Rail Trail for the City of Brownsville, Texas – Responsible for installation of Pedestrian Infrastructure (solar security lights, concrete pads, benches, water fountains, canopies, etc.), three (3) Parking Lots designs, Sign and Pavement Markings, and the Estimate of Quantities for the West Rail Trail. The Hike and Bike consists of an existing 12ft hike and bike trail in Brownsville, Texas.

DRAINAGE

J-08 Hidalgo County Drainage Project in Hidalgo County, Texas – Responsible for assembling the Specifications and Forms of Contract, Bond and Proposal and the Bid Documents.

Hick Hill Drainage Improvements in the City of Harlingen, Texas – Responsible for the design of the Force Main Adjustments of Hick Hill Project. Project also included the Traffic Control Plan, SW3P layouts, and estimate of quantities for project items.

5th & 7th Drainage Improvements in the City of Harlingen, Texas – Responsible for the preliminary design of drainage improvements in the Harlingen Area known as 5th & 7th (System 21). Project also included the preliminary design of Traffic Control Plans, SW3P layouts, and estimate of quantities.

OTHER ELEMENTS OF ENGINEERING

Feasibility Study for Dana Road, City of Brownsville, Texas – Responsible for the Feasibility Report to Dana Road. Dana Road is being proposed to widen and include sidewalks and a shared use 10ft Hike and Bike Trail. The feasibility report included a description of the project, existing and proposed conditions, alternative alignments, and a Matrix for Comparison of Alternatives.

Preemption Form Submittal of Fort Bend Project, Houston District, Texas, Texas DOT – Responsible for completing the Traffic Signal Preemption at Highway-Rail Grade Crossings Form. Form consisted of geometric data, and time calculations.

Raise Grant Program Submittal for Sprague Road in the City of Edinburg, Texas, US DOT – Responsible for the Benefit-Cost Analysis (BCA), BCA Summary, Quantities, and Cost Estimate of Sprague Street between SH 336 (10th Street) and Business 281 (Closner Boulevard). The existing Street of Sprague Street is proposed to

widen and add pedestrian and drainage structures for a length of 3.13 miles. BCA summary included a description of the project, existing and proposed conditions of street, demand/project generators, and estimate of benefits.

Parking Lot Design of Victor Park in the City of Harlingen, Texas – Responsible for the design of the Parking Lot Improvements and Proposed Parking Lot of Victor Park. Project also included the Traffic Control Plan, SW3P layouts, and estimate of quantities for project items.

Feasibility Study for Stenger Road, City of San Benito, Texas – Responsible for the Feasibility Report to Stenger Road. Stenger Road is being proposed to include a 10ft shared use path and a reconstructed 5ft sidewalk near the end of the project. The feasibility report included a description of the project, existing and proposed conditions, and a best recommendation due to circumstances.

Small and Large Sign Design, Various Locations, Texas
Responsible for the Small and Large Sign Design of signs in Various Locations in Texas. Using Sign CAD software and the direction of the *Texas Manual of Uniform Traffic Control Devices* and the *Standard Highway Sign Designs for Texas* manuals. A list of locations is listed below.

- FM 48 (Small Signs)
- FM 377 (Small and Large Signs)
- FM 846 (Small and Large Signs)
- FM 1333 (Large Sign)
- FM 2258 (Small Signs)
- HCTRA (Large Signs)
- Jackson H&B Trail – Phase II (Small Signs)

Texas Board of Professional Engineers and Land Surveyors

CERTIFICATE OF REGISTRATION

This acknowledges that

TEDSI Infrastructure Group Inc

has fulfilled the requirements of the Texas Board of Professional Engineers and Land Surveyors to offer and perform engineering services in the state of Texas.

Registration Number
F-1640

Expiration Date
9/30/2024

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: 1760128014600
Approval Date: May 22, 2024
Scheduled Expiration Date: May 22, 2028

In accordance with the Memorandum of Agreement between the
EL PASO HISPANIC CHAMBER OF COMMERCE (EPHCC)
and the Texas Comptroller of Public Accounts (CPA), the CPA hereby certifies that

TEDSI Infrastructure Group, Inc.

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **May 22, 2024**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day-to-day management, operational control, addresses, phone and fax numbers or authorized signatures) provided in the submission of the business; application for registration/certification into EPHCC's program, you must immediately (within 30 days of such changes) notify EPHCC's program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility. If your firm ceases to remain certified in the EPHCC's program, you must apply and become certified through the State of Texas HUB program to maintain your HUB certification.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

Disadvantaged Business Enterprise Program

This certifies that the following listed firm is certified as a **DBE**
in accordance with 49 Code of Federal Regulations Part 26

TEDSI Infrastructure Group, Inc. (VN: 26838)

This Certificate is subject to suspension or revocation, and DBE information verification annually, upon the anniversary month. Current certification information will be listed in the Texas Unified Certification Program (TUCP) Directory located at
https://txdot.txdotcms.com

July 27, 2016
Date Issued

Michael D. Bryant

Civil Rights Division

CONFLICT OF INTEREST
DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

COMPANY PROVIDING PROPOSAL GENERAL QUESTIONNAIRE

1 Name/Name of Agency/Company: TEDSI Infrastructure Group, Inc.
(Full, correct legal name)

- Address: 1201 E. Interstate Highway 2 Mission, Texas 78572
- Telephone/Fax: P: (956) 424-7898 F: (956) 424-7022
- Email address: jsalinas@tedsi.com

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?

3.

Yes____ No√

3. Is your Company authorized and/or licensed to do business in Texas?
Yes√ No____

4. Where is the Company's corporate headquarters located? Mission, Texas

5. a. Does the Company have an office located in Edinburg, Texas?

4.

Yes____ No√

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office?

_____ (years) _____ (months)

c. State the number of full-time employees at the Edinburg office. _____

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity?
Yes____ No√

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. _____

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Jesus Salinas
Address: 1201 E. Interstate Highway 2 Mission, Texas 78572
Telephone: (956) 424-7898
Fax: (956) 424-7022
Email: jsalinas@tedsi.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (√).
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture._____
_____
_____

9. Bankruptcy Information

Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (√)
If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets. _____
_____
_____
_____

10. Provide any other names under which your business has operated within the last 10 years.
TEDSI
_____
_____

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES NO

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES NO

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES NO

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Jesus Salinas, the undersigned representative of

TEDSI Infrastructure Group, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 19 VERIFICATION

I, Jesus Salinas, the undersigned representative of

TEDSI Infrastructure Group, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - a) *means, with respect to the entity or association, to:*
     - i) *refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - ii) *refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - iii) *terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - b) *does not include:*
     - (i) *the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - (ii) *a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   - a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   - b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   - a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   - b) *has two or more firearm entities as members; and*
   - c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

TEDSI Infrastructure Group, Inc. - Jesus Salinas

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

None

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

N/A

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☑ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☑ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

None

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

A complete copy of Chapter 176 of the Local Government Code may be found at http://www.statutes.legis.state.tx.us/Docs/LG/htm/LG.176.htm. For easy reference, below are some of the sections cited on this form.

Local Government Code § 176.001(1-a): "Business relationship" means a connection between two or more parties based on commercial activity of one of the parties. The term does not include a connection based on:

(A) a transaction that is subject to rate or fee regulation by a federal, state, or local governmental entity or an agency of a federal, state, or local governmental entity;

(B) a transaction conducted at a price and subject to terms available to the public; or

(C) a purchase or lease of goods or services from a person that is chartered by a state or federal agency and that is subject to regular examination by, and reporting to, that agency.

Local Government Code § 176.003(a)(2)(A) and (B):

(a) A local government officer shall file a conflicts disclosure statement with respect to a vendor if:

***

(2) the vendor:

(A) has an employment or other business relationship with the local government officer or a family member of the officer that results in the officer or family member receiving taxable income, other than investment income, that exceeds $2,500 during the 12-month period preceding the date that the officer becomes aware that

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor;

(B) has given to the local government officer or a family member of the officer one or more gifts that have an aggregate value of more than $100 in the 12-month period preceding the date the officer becomes aware that:

(i) a contract between the local governmental entity and vendor has been executed; or

(ii) the local governmental entity is considering entering into a contract with the vendor.

Local Government Code § 176.006(a) and (a-1)

(a) A vendor shall file a completed conflict of interest questionnaire if the vendor has a business relationship with a local governmental entity and:

(1) has an employment or other business relationship with a local government officer of that local governmental entity, or a family member of the officer, described by Section 176.003(a)(2)(A);

(2) has given a local government officer of that local governmental entity, or a family member of the officer, one or more gifts with the aggregate value specified by Section 176.003(a)(2)(B), excluding any gift described by Section 176.003(a-1); or

(3) has a family relationship with a local government officer of that local governmental entity.

(a-1) The completed conflict of interest questionnaire must be filed with the appropriate records administrator not later than the seventh business day after the later of:

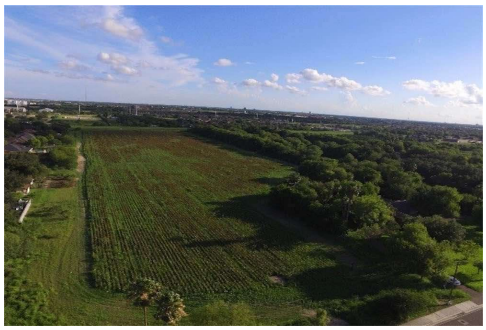
(1) the date that the vendor:

(A) begins discussions or negotiations to enter into a contract with the local governmental entity; or

(B) submits to the local governmental entity an application, response to a request for proposals or bids, correspondence, or another writing related to a potential contract with the local governmental entity; or

(2) the date the vendor becomes aware:

(A) of an employment or other business relationship with a local government officer, or a family member of the officer, described by Subsection (a);



(B) that the vendor has given one or more gifts described by Subsection (a); or

(C) of a family relationship with a local government officer.

REQUEST FOR QUALIFICATIONS
No. 2024-9

Engineering Services Rotation

Presented by:
Texas Infrastructure Development Group, LLC
1400 N. McColl Rd., Suite 202
McAllen, Texas 78501

July 16, 2024

TRANSMITTAL LETTER

July 16, 2024

City of Edinburg
415 W. University Drive
c/o City Secretary Department (1st Floor)

RE: **STATEMENT OF QUALIFICATIONS RFQ No. 2024-9 ENGINEERING SERVICES**

Transmitted herewith is **Texas Infrastructure Development Group, LLC (TxIDG)** Statement of Qualifications (SOQ) for the above referenced RFQ. **TxIDG is excited and pleased to express our interest and commitment to perform Professional Engineering Services as outlined in the above referenced RFQ for City of Edinburg (City).**

TxIDG's primary contact person responsible for matters regarding our SOQ is Mr. Carlos Peralez. He is located in our McAllen office at 1400 N. McColl Rd, Suite 202. He can be contacted by telephone at (956) 739-8110 Cell / (956) 540-7232 (Office) or by email at carlos.peralez@txidg.com.

TxIDG specializes in the design and construction of roadway infrastructure and drainage at both municipal and state levels. We are qualified to handle all aspects of project development, design, construction management, and construction inspection for the City of Edinburg. Our team is licensed in the State of Texas, meeting the standards set by the Texas Board of Professional Engineers. TxIDG has successfully completed numerous projects for municipalities, state and federal agencies, as well as private clients.

TxIDG's proposed Quality Assurance Officer, Mr. David Balli, P.E., brings over 50 years of experience in civil engineering projects, making him exceptionally qualified for the role. Mr. Carlos Peralez, P.E., serving as Project Manager and Principal of Texas Infrastructure Development Group LLC, will oversee assignments and ensure their successful completion and effectiveness. With over 34 years of experience, Mr. Peralez has been actively involved in a wide range of municipal engineering and design projects across the State and particularly in the South Texas Region.

I, as President of Texas Infrastructure Development Group, LLC, will oversee this assignment and will be duly authorized to bind the firm to a contract with the City of Edinburg.

Thank you for the opportunity to present our Professional Engineering qualifications. We look forward with great anticipation to working with the City of Edinburg staff on this important project should we be selected.

Sincerely,

Richard Zamora, PE
President
Texas Infrastructure Development Group, LLC

1. FIRM QUALIFICATION AND EXPERIENCE

Texas Infrastructure Development Group, LLC (TxIDG), was founded in 2009 and has been providing exceptional services to our clients. TxIDG is one of Texas's leading Civil Engineering consultant firms for the planning and design of all types of infrastructure, with expertise in transportation, public infrastructure, hydrology and hydraulics, drainage, wastewater systems, transportation facilities for rural and urban communities, and land development. Our McAllen office currently has a team of 7 employees. Additionally, we have access to a wide range of resources with diverse expertise and skill sets located in El Paso and San Antonio.

TxIDG has put together an expert team ready to start working with the City of Edinburg immediately. Leading the charge is our President, **Mr. Richard Zamora, PE,** who brings more than 30 years of experience to the table, specializing in the planning, environmental assessment, and development of schematic and PS&E packages. As TxIDG's president, Mr. Zamora holds the decision-making power to streamline processes, thus reducing administrative delays and accelerating project timelines. **Mr. Carlos Peralez, PE**, will take on the role of **Project Manager**. With his extensive experience exceeding 34 years in the engineering, oversight, and upkeep of highway, street, drainage, and bridge projects, Mr. Peralez will be the main point of contact for the City of Edinburg. Both Mr. Zamora and Mr. Peralez have extensive experience in project development throughout Hidalgo County and understand local entity and TxDOT guidelines and restrictions. This enables them to streamline the design process thereby providing a cost benefit to the city. Incorporated yet not limited to said team of professionals, are the following services:

- Advanced Planning/Preliminary Engineering
- Construction Phase/Management Services
- Special Studies/Design
- Final Design/PS&E
- Project Development Management
- Site Planning and Analysis

TxIDG's capabilities in these areas range from conceptual planning and preliminary design to regulatory compliance, permit negotiation, and construction phase management. TxIDG has a proven track record in the industry for being one of the top engineering firms for all types of engineering projects.

A. FIRMS UNIQUENESS

Proficient in Open Roads Designer and hydraulic design software, our skilled engineers use advanced tools such as LIDAR and GIS, and craft hydraulic models using HY8, HEC-HMS, HEC-RAS, and HEC-2 that are aligned with TxDOT's and City standards. With an adept team, including ex-TxDOT members, we intricately address design criteria for effective Rural, Urban, and Metro projects. At TxIDG, our constructability review process is designed to ensure that projects are designed and planned in a manner that optimizes efficiency, safety, and feasibility during construction. During the review process, TxIDG employs an independent engineer, Mr. David Balli, to evaluate the design's constructability. Leveraging Mr. Balli's extensive construction experience throughout the state, TxIDG gains valuable insights into the locally available materials, an understanding of key stakeholders, familiarity with contractors, and awareness of construction challenges associated with heavy traffic patterns. Our review process typically involves:

- Early Involvement of a Construction Expert
- Review of Design Document
- Identification of Alternatives
- Collaborative Workshops and Meetings (Value Engineering)
- Implementation of Recommendations

TxIDG constructability review process is a critical component of its project management, ensuring that projects are not only designed to meet their intended purposes but also are constructible in a practical, cost-effective, and safe manner.

At the Schematic level, design work is not as detailed as it is at the PS&E level, offering several opportunities for cost-saving measures that TxIDG actively investigates. Examples of this approach include, but are not limited to, conducting a cost-benefit analysis between rigid concrete and flexible pavement designs, optimizing bridge and retaining wall lengths, and evaluating the use of two-layer versus three-layer pavement designs at major intersections. For projects that necessitate a Value Engineering (VE) Study, we proactively present alternative cost-saving strategies and ideas, including those previously mentioned, before the initiation of the VE Study itself.

Effective communication among the prime, sub-consultants, and the City is pivotal for project success. At TxIDG, we prioritize this by early identification of project-specific needs and **stakeholders**. Our practice includes involving City Engineering and Maintenance staff in meetings, given their familiarity with local challenges. Recognizing project diversity in terms of size, complexity, and City preferences, our approach ensures purposeful communication, minimizing excessive emails and needless meetings. We set a regular communication schedule, clarifying expectations and allotting time for crucial discussions and reporting. In this solicitation, we envision monthly meetings led by our project manager, with key players handling specific communications for prompt updates as required.

B. OFFICE PROVIDING SERVICES TO EDINBURG

Texas Infrastructures Development Group, LLC currently has offices in San Antonio, El Paso and McAllen, Texas.

The office shown below will oversee providing services to the City of Edinburg for this solicitation.

Firm Name/ Address:	**Texas Infrastructure Development Group, LLC** 1400 N. McColl Rd - Suite 202 McAllen, Texas 78504
Phone/ Fax Numbers:	956-540-7232
Email:	Richard.zamora@txidg.com Mirna.castro@txidg.com

Texas Registration Number: *F-*23114

C. RESOURCING AND STAFFING

TxIDG's statewide offices streamline budget, personnel, and up-to-date industry software to attain project objectives. Our organized staffing and resource strategy involves office relocation and statewide resource incorporation, when needed, to maintain employee engagement. Concurrent projects are managed through a prioritization system, assessing importance, complexity, and deadlines for resource allocation and task focus on vital projects. Effective communication, monitoring, guidance, and project management tools ensure streamlined project milestones, timelines, and resource distribution. TxIDG's commitment to maintaining an ample staff pool guarantees seamless replacements in case of unexpected turnover. Our rigorous training and standardized procedures empower each employee to excel in diverse roles, from corridor and storm sewer design and plan production using OpenRoads Designer and AutoCAD to culvert hydraulic computations in HEC-RAS or HY-8.

D. RECENT PROJECTS

GEC - City of Escobares , TX

Client: City of Escobares

Completion Date: est. June 2025

Reference: Luis Garcia, Jr
(956) 847-1200; Email lg.cityofescobares@yahoo.com
Key Personnel: Richard Zamora, Jesse Ramos, Carlos Peralez

TxIDG has been designated to provide a wide array of engineering services to the City of Escobares, covering expertise in the Geotechnical, Architectural, Surveying, and Environmental sectors. Thus far, TxIDG has played a pivotal role in assisting the city through the application phase for the 2023 Texas Community Development Block Grant Program, which seeks to support public facilities in mitigating emergency hazardous conditions impacting public safety. In collaboration with the City of Escobares, TxIDG has identified several necessary street improvements to address drainage and structural issues. Within the budgetary constraints of the grant, TxIDG carefully assessed and chose seven projects to apply for the grant. The application was successful, resulting in the grant being awarded to the City of Escobares. Currently, TxIDG is moving forward to the next stage of the program, concentrating on creating the Plans, Specifications, and Estimates (PSE) for the locations of the approved projects.

CIENEGAS ROAD, DEL RIO, TEXAS

Client: Val Verde County
Completion Date: est. March 2025
Reference: Gustavo Flores (830) 774.7656 – Val Verde County Commissioner Pct. 4
Email: gflores@valverdecounty.texas.gov
Key Personnel: Richard Zamora, Jesse Ramos, Carlos Peralez

TxDIG was chosen to perform the Schematic and PS&E for a 1.8-mile curb and gutter roadway project, which faces significant drainage issues. To address these concerns, TxDIG conducted extensive research on drainage solutions and presented multiple options to Val Verde County. The optimal solution identified involves constructing a drainage ditch leading to an outfall through private property, necessitating the acquisition of easements for the ditch construction. Another major challenge in this project is the restricted Right-of-Way (ROW). The devised solution includes a 3-lane divided road featuring both rural and curb & gutter sections. To overcome the constraints of the narrow ROW, a drainage strategy was developed that incorporates a storm sewer system directing water into the newly constructed drainage ditch.

DOFFING ROAD PAVEMENT DESIGN, PHARR, TEXAS

Client: City of Pharr
Completion Date: est. March 2026
Reference: Ruben Alfaro (956) 402.4242 – Pharr City Engineer
Email: ruben.alfaro@pharr-tx.gov
Key Personnel: Jesse Ramos, Carlos Peralez, Vincent Pantone

TxIDG has been selected to perform Engineering Services including Schematic, Pavement Design, PS&E, Survey, Utilities, Subdivision, and Right-of-way. Doffing Rd. is an overweight corridor as identified by Hidalgo County Regional Mobility Authority (RMA). It lies in the City of Pharr's "Heavy Industrial Area and Trade Zone" due to its extremely close proximity to the Pharr International Bridge. West Doffing Rd. and the City of Pharr owned property will be a critical feeder to the existing State highway system and the future planned heavy industrial complexes. West Doffing Rd. is in need of repair and will need significant expansion in order to meet future needs. The current road does however possess useful capacity in terms of overweight vehicles. In light of these challenges, our initial engineering study has meticulously assessed the existing condition of West Doffing, identified areas of concern, and proposed viable solutions of preservation, maintenance, and future reconstruction to help the City of Pharr and Hidalgo County RMA reach its very

necessary goals. Through detailed analysis and consultation with industry experts, TxIDG has developed a comprehensive strategy that aims to optimize the current infrastructure within its structural limits while simultaneously planning to transform West Doffing Road into a robust and reliable route. This route will be capable of safely and effectively handling a substantial amount of overweight traffic in the near future. The City of Pharr and the Hidalgo County RMA aim to permit overweight trucks along this corridor as soon as possible. To achieve this, two phases are being proposed for the corridor. Phase I will enable overweight traffic to use the existing Doffing Road, with necessary improvements. This phase is expected to last 2 to 3 years. Phase II will involve the development of the "ultimate" section, designed to accommodate overweight traffic for a lifespan of 30 years and beyond.

PLANNING STUDY, CITY OF SOCORRO, TEXAS

Client: City of Socorro

Completion Date: est. Sept 2024

Reference: Adriana Rodarte (915) 209-9945 – City Manager

Email: citymanager@costx.us

Key Personnel: Jesse Ramos, Vincent Pantone, Carlos Peralez

TxIDG was selected as part of a team to perform Planning Services for the City of Socorro. The significance of the mobility aspect in a planning study for Socorro, Texas, cannot be overstated, given the city's unique demographic and geographic context. As Socorro continues to grow, enhancing mobility is crucial for ensuring sustainable urban development and improving the quality of life for its residents. This focused mobility plan addressed the need for efficient transportation networks, catering to the diverse needs of its community. This includes the development of more robust public transportation options, improved road infrastructure, and the integration of pedestrian and cycling paths to promote healthier, more eco-friendly travel alternatives. These enhancements go beyond simply making commutes easier; they are essential for stimulating economic growth, drawing in new businesses, and broadening access to educational and healthcare services. Moreover, considering Socorro's location in the El Paso metropolitan area, improved mobility will facilitate better regional connectivity, opening new opportunities for residents and businesses alike. In essence, a well-conceived mobility plan is a key pillar in Socorro's pursuit of a more connected, vibrant, and resilient urban future. With proficiency in ARCGIS, TxIDG developed several maps demonstrating how to efficiently connect people, goods, and services, facilitating seamless travel from origin to destination through preferred transportation modes.

E. ABILITY TO MEET COMPRESSED SCHEDULES

Our PM's extensive experience allows him to manage compressed schedules to successfully complete the project plans without sacrificing quality. A key element for a compressed schedule is understanding which tasks can be performed concurrently. Once we determine this, we will assign the necessary resources to meet the compressed schedule. Over the shoulder concurrent reviews will be an integral part of this compressed schedule. To accomplish this, Our PM will hold frequent coordination meetings to keep the entire team informed on all aspects of the project development. It is imperative we develop and follow a detailed Primavera P6 schedule.

Mr. Peralez manages project tasks by ensuring team members are functioning as one cohesive unit. All TxIDG Team members have county and city PS&E design experience in their respective work categories and have worked together on multiple projects. The Team is structured for availability of Task Leads. We have back-up at each position with personnel capable of taking on the role of Task Lead in situations where multiple assignments are needed. TxIDG and team has adequate resources to work on multiple projects simultaneously without delaying a project.

It may be required to perform all anticipated tasks, including review and coordination with others. The challenge is to manage multiple critical paths, perform them efficiently, and accurately track the status in real time. Resources must be managed via establishing work-load projections. This will allow the PM to identify when peak resources will be needed and how to shift staff as needed. The goal is to balance the workload. To accomplish this, TxIDG will assign a Document Controller, Scheduler, and PM, which will utilize our in-house tools and other resources to accurately manage cost, scope, and time. We will develop realistic, accurate, and comprehensive scopes, budgets, and baseline schedules.

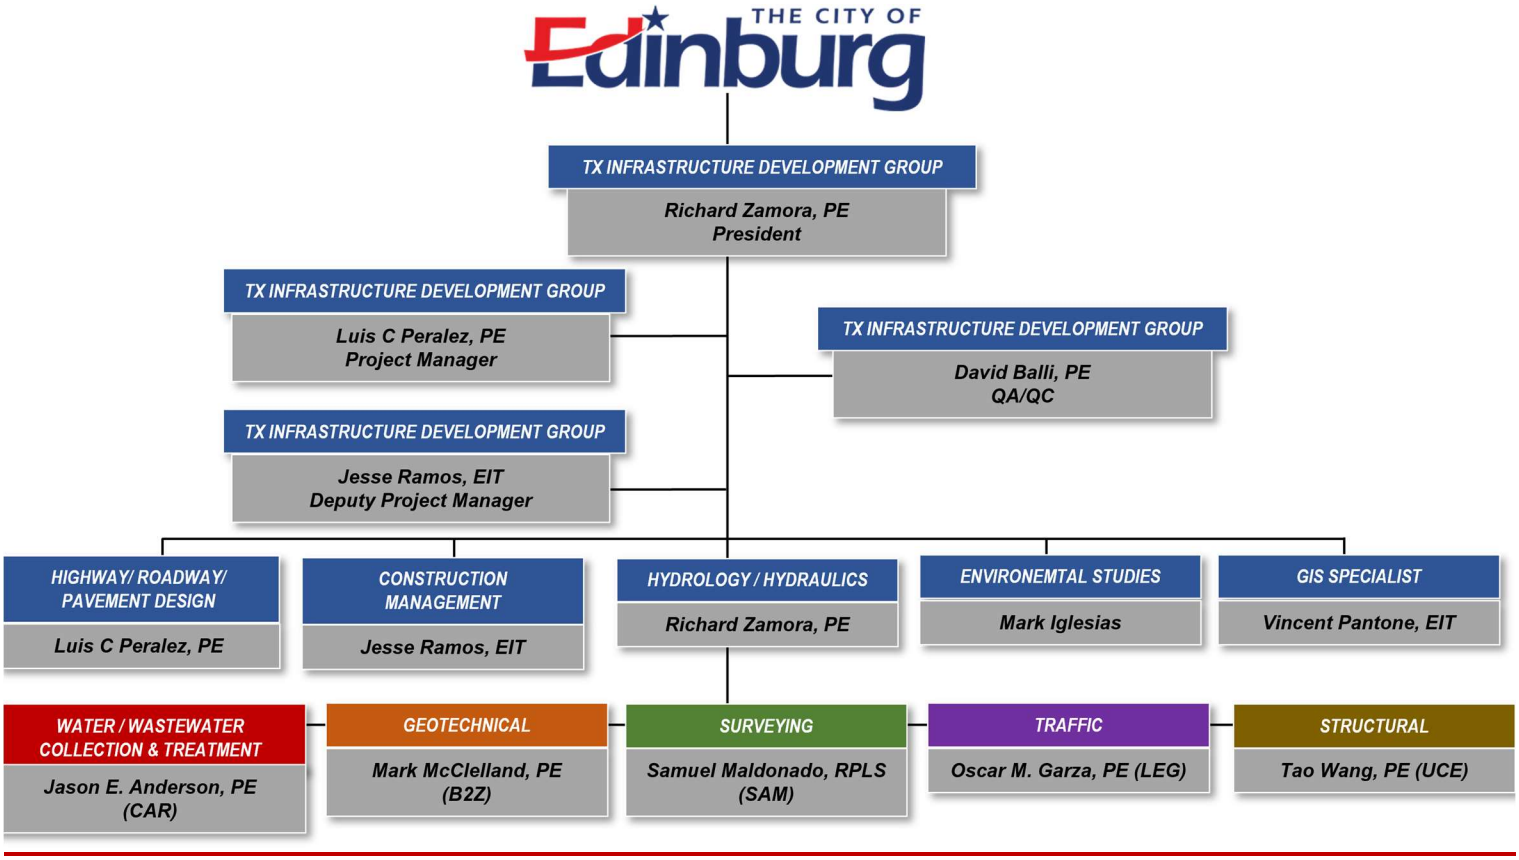
F. TXIDG'S USE OF TECHNOLOGY

Many times, as engineers we are faced with different obstacles. Some of them being time constraints, availability of funds to complete tasks or projects and having the correct tools and information in order to keep projects moving towards completion. For example, this solicitation may require the use of survey data collection which will take much time. In order to advance immediately on these projects, TxIDG can readily acquire preliminary data such as Right Of Way and Parcel Ownership information as well as Digital Terrain Modeling (DTM) in order to know ground elevations at the project location. This data is readily available, remarkably accurate and is collected from the Texas Natural Recourses Information System (TNRIS) website and cross checked with parcel maps and As-Built plans from the project area. The process to obtain this data from TNRIS website and apply to engineering design starts with downloading the files needed into a geographic information system (GIS) program. GIS is a computer system for capturing, storing, checking, and displaying data related to positions on Earth's surface. GIS gives us the ability to edit the downloaded data and convert it into a usable format that is needed in MicroStation Open Roads. Once the information is in its final format, TxIDG can initiate the design process. TxIDG's ability to acquire this data provides a cost-effective alternative with the goal of saving money and time to the client.

Data that TxIDG can provide without Field Survey:

- Lidar
- Imagery
- Texas Rivers, Streams, and Waterbodies
- Land Parcels with Ownership info

G. FAMILIARITY WITH GEOGRAPHIC PROXIMITY



TxIDG has consistently been engaged in various projects related to roadways/highways, water resources, and wastewater management within Hidalgo County for numerous years, providing engineering services directly for Hidalgo County entities or within their jurisdiction. The city presents distinct challenges such as managing drainage in its predominantly flat landscape, addressing concerns with expansive clay soils, and navigating the complexities of being in proximity to diverse environmental and wildlife issues. A critical aspect of our design process is a thorough understanding of local materials and the strategic locations of hot mix asphalt and concrete plants. This extensive knowledge of materials and construction techniques now offers a significant advantage in the formulation of Plans, Specifications, and Estimates (PS&E), enhancing our capacity to deliver tailored solutions that meet the unique demands of the City of Edinburg.

H. AFFIRMATIVE ACTION PROGRAM

Texas Infrastructure Development Group, LLC is keenly aware of State and Federal Affirmative Action Programs and Policies. TxIDG maintains a stringent corporate policy with respect to affirmative action and will incorporate the Program into all phases of this project. TxIDG is an Equal Opportunity Employer and does not discriminate on the basis of race, color, sex, religion, age, national origin or disability. All employees are expected to comply with this policy and spirit of the letter of Title VII of the Civil Rights Act of 1964, as amended; the Age Discrimination in Employment Act, as amended; and the Texas Commission on Human Rights Act, as amended. TxIDG posts all Affirmative Action notices and/or bulletins in heavily trafficked, readily accessible areas in each office locations for all employees to easily access them.

2. TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

A. ORGANIZATION CHART

B. KEY STAFF RESPONSIBILITIES

Carlos Peralez, PE, has been appointed as our Project Manager (PM) and will act as the main liaison for the City on a daily basis. Known for his forward-thinking, creative solutions, and unwavering dedication to his responsibilities, he has proven to be a reliable consultant with a track record of successfully completing projects. With a broad range of experience in overseeing transportation projects from initial feasibility studies and schematic designs to the finalization of construction documents, Mr. Peralez will be responsible for managing all aspects of project delivery.

He will direct the team's performance and facilitate communication between the City, Contractors, and the TxIDG Team. Under the guidance of the City's directions and input, he will play a pivotal role in determining project's scope for each authorization, ensuring the project's comprehensive integration, management, supervision, and regulation. His duties include establishing deadlines, allocating resources, engaging with subconsultants, and selecting team leaders to ensure the project remains on budget and schedule. By utilizing Microsoft Project, he will monitor and report on the project's progress, adjusting plans as necessary to accommodate changes in project dynamics. In the event additional resources are needed, Mr. Peralez has the authority to directly contact our company President for further support.

C. TXIDGs TEAM RESUMES

Richard Zamora, PE (President)

Mr. Zamora has over 30 years of experience in the design, review, and constructability of proposed PS&E, and in the management of projects involving freeway, urban and rural facilities, and drainage studies. During his tenure at TxDOT, Mr. Zamora was responsible for review and analysis of 46 PS&E projects totaling an estimated construction value of $178 million with the Pharr District's Plan Review Section. has over 30 years' experience in drainage design and analysis of complex watersheds, including rainfall/runoff determination, hydraulic design/analysis, storm water quality evaluations, flood plain analysis, and channel/reservoir routing.

As the TxDOT Pharr District Hydraulics coordinator and his experience in the private sector, he has worked extensively on TxDOT projects as well as multiple Local Government projects. Hydraulic conditions require a balance of maintaining flood plain volume/storage and detention/retention basins. On high profile projects, Mr. Zamora also coordinates with high-level government officials such a Commissioners, City Council Members, Public Work Director's, and City Engineers.

Education:

Bachelor of Science, Civil Engineering, Texas A&I University

Professional Registration:

PE, Texas No. 92079

TXDOT Precertifications:
3.2.1, 4.2.1, 8.1.1, 9.1.1, 10.1.1, 10.2.1, 10.3.1, 10.5.1

Areas of Expertise:

- Contract Administration
- Management
- Schematic Design
- Environmental Coordination
- PS&E Design
- Drainage Studies
- Hydrology
- Construction Services

Project Experience:

City of Socorro General Engineering Consultant (GEC): City of Socorro Texas
Principal-In-Charge as the GEC for the City of Socorro, Mr. Zamora has been able to acquire over $68M in federal funding for local projects through the MPO. He has successfully aided in developing the Major Thoroughfare Plan, Bicycle Accommodation Projects, Master Sidewalk Plan, Multiple PS&Es for Roadways and Bridges. Mr. Zamora has also handled Local Bidding Processes and Environmental and Public Involvement.

FM 1423 Schematic Design, Donna, Texas Mr. Zamora served as **Project Manager** on this on-going project which involves the reconstruction of FM 1423 (Valverde Rd.) from a two-lane rural roadway to a four (4) and six (6) lane urban roadway. The limits are from SH 107 to BU 83 and encompass over 8 miles in length. Mr. Zamora helped develop a design schematic, including environmental documents/studies. The team developed three alternatives and evaluated these alternatives in order to arrive at a preferred alignment. Team collected ROW and utility data to aid in further development of the schematic. Concerning drainage design, Mr. Zamora has coordinated closely with numerous entities including Donna Irrigation Dist, Hidalgo County Drainage District No. 1 and the City of Donna. In an effort to improve safety along the project, several deficient horizontal curves were re-designed. FM 1423 will also include the design of several signalized intersections with ADA access compliant ramps and pedestrian crossings. All pedestrian facilities such as sidewalks, curb ramps, and driveways were designed in compliance with ADA requirements

TXDOT, US 62/180 Montana Ave. Widening, El Paso Texas **Project Manager** Mr. Zamora led the design of a storm drain system to convey storm water into the proposed retention basins. Eight retention basins were designed for this project. The proposed project included the design of three controlled-access main lanes and 3-lane frontage roads in each direction. Overpass bridge structures were designed at 3 major cross-overs. Underpass structures were designed to pass under 2 other roadways. The proposed main lanes were designed with a design speed of 70 mph. Each direction was configured with three 12-foot main lanes, an 11-foot inside shoulder, and a 10-foot outside shoulder.

Carlos Peralez, PE (Project Manager/Roadway)

Mr. Peralez began his engineering career with the Texas Department of Transportation (TxDOT) and has over 34 years of experience in the design, review, management, maintenance, and construction of highway, street and bridge projects involving freeway, urban and rural systems. During his 28 years at TxDOT, he served in many positions within the Pharr District, including Assistant District Design Engineer, Materials and Pavements Engineer and District Construction Engineer.

Education:

Bachelor of Science in Civil Engineering, Texas A&M University

Professional Registration:

PE, Texas, No. 73564

TXDOT Precertifications:
4.2.1, 10.2.1

Areas of Expertise:

- Bridge Design
- Roadway Design
- Highway Design

Project Experience:

Mile 6 Project in Hidalgo County (From Mile 9 to Mile 11) – PS&E – Project Manager
This 2-mile project entailed PS&E project delivery of a 4-lane divided highway in the City of Weslaco. This design project was contracted through Hidalgo County with partnership from the City of Weslaco. This project was successfully let in December 2019 with a low bid of approximately $12.4 M. Schematic was submitted to TxDOT and received approval. As project manager, coordinated all utility activities for the project, including all SUE work. Right-of-Way activities included acquisition of 74 Parcels, 15 eminent domain proceedings and four (4) relocations. Due to a limited budget by Hidalgo County, the use of four "deductive" alternates were used for the project. Close coordination with TxDOT's construction division was needed in order to correctly introduce "deductive" alternates on the estimate for all bidders and to allow the County to add or remove alternates due to budget constraints.

FM 1015 Project in Hidalgo County (From Mile 12 to SH 107) – Schematic, Surveying, Traffic Analysis and Public Involvement – Project Manager
This 5.5-mile project in Hidalgo County is being performed as a Voluntary Transportation Agreement through TxDOT. Hidalgo County is the Local Government performing this voluntary service. Estimated construction cost is $28 M for the roadway and $5 M for outfall improvements. Part of the contract included Right-of-Way determination, Advance Planning, and GIS Drainage maps.

Sparks Arroyo, City of Socorro – El Paso County - TWDB/ Project Manager Mr. Carlos Peralez is managing a major $13.65 million drainage project in El Paso County and the City of Socorro, responsible for its Schematic, Environmental, and PS&E aspects. The project, under the Texas Water Development Board's oversight, spans over 3,800 acres and includes creating an 8-acre detention facility capable of holding 25.
1 acre-feet of water. To assess the drainage needs of the area, the team created a comprehensive 2D rainfall-on-grid model. The project's 3D modeling, executed using Open Roads Designer, incorporates all essential hydraulic computations, which are under review by the Texas Water Development Board. A distinctive challenge within the project is a 40-foot escarpment, for which Peralez has devised a Gabion design solution. Additionally, a Right of Way Map for eight parcels needed for the project has been prepared. Currently, 60% of the project's design phase is complete, and it is on schedule for a letting date in September 2024. This progress highlights Peralez's effective management and innovative approach in handling this complex, large-scale drainage project.

David Balli, PE (QA/QC Officer)

Mr. Balli has over 45 years of experience in the design, maintenance, and construction of highway, street, and bridge projects involving freeway, urban, and rural facilities. He began his career with TxDOT and remained 28 years, serving as a Bridge Designer, Area Office Roadway Design Engineer and Construction Engineer, Area Engineer in a rural county, Assistant Director of Maintenance, Acting Director of Maintenance, and Area Engineer in the San Antonio. In the last 15 years, he has worked as a Consultant for the El Paso, Laredo, Paris, and San Antonio TxDOT Districts. His years of experience in design, construction management of roadways and bridges, and maintenance responsibilities uniquely provide him with the experience to provide comprehensive quality reviews.

Education:

Bachelor of Science in Civil Engineering, Texas A&M University

Professional Registration:

PE, Texas, No. 52920

TXDOT Precertifications: 4.2.1, 8.1.1, 11.1.1

Areas of Expertise:

- Roadway Design
- Construction Mgt
- Signing, Pavement

Project Experience:

TxDOT El Paso District | Program Management Consultant (PMC) | El Paso, Texas | Deputy Project Manager Assist the Project Manager in the coordination, review, and oversight of the 2008 Comprehensive Mobility Plan (CMP) from 2010 -2018. Also served as QAQC Manager as an extension to TxDOT for review and oversight of other firms performing preliminary engineering, design, environmental studies, surveying, utility relocations, toll analysis, right-of-way acquisition, construction engineering, and procurement of Public Private Partnerships, including Pass Through Financing Agreements and Comprehensive Development Agree-ments. Provided QA/QC during the development of the following projects:

- Loop 375 (Woodrow Bean/Transmountain Road) BU 54 (Dyer) to US 54, Utility Coordination and Construction Management
- Loop 375 (BHW Extension Part 1 & 2) (Phase II & III Southern Corridor), Schematic and Environmental Review for IH 10 CD Lanes
- Border Highway Ext. East, Schematic and EIS
- Loop 375 at IH 10 Americas Interchange, PS&E Review

TxDOT Valverde District & Del Rio, Texas | Frontera Road | Val Verde County, Texas - Mr. Balli was the Project Manager for the Frontera Road project, from Spur 239 to Cienegas Street (approximately 2.5 miles), in Val Verde County within the vicinity of the City of Del Rio. The team was providing planning and final design services for the upgrade of the existing facility to a 2-lane roadway with shoulders. Work included environmental documentation, roadway design, field surveys, utility coordination and relocation, grading paving, drainage, environmental data sheets, signing, pavement markings, traffic control plans (TCPs), storm water pollution prevention plan (SWPPP), geotechnical engineering, shop drawings, and all other details.

TxDOT San Antonio District | 4 years Assistant/Acting Director of Maintenance - Responsibilities included overseeing 21 Maintenance Sections in 16 counties with over 400 employees. His responsibilities involved budgeting and administrating, maintaining incident response functions, roadway operation appurtenances, pavement repairs, pavement markings, guardrail, signage, drainage systems, structures, mowing, herbicides, debris removal, slope failures, and weather event response. He oversaw both TxDOT as well as contracted staff to carry out his responsibilities. In addition to the items mentioned above, he was responsible for QA/QC for all District set of PS&E plans for comments pertaining to maintenance issues prior to approving for letting.

Olbein (Jesse) Ramos, EIT
(Deputy PM / Construction Management)

Mr. Ramos has 12 years of diverse engineering, design, detailing, and construction compliance services experience in various aspects of land development, drainage, and transportation projects. His work with transportation projects includes but is not limited to preparation of schematics, preliminary and final design plans and specifications including design and detailing of grading layouts, roadway and street plan and profiles, stormwater drainage, intersection layouts, traffic signal layouts, signing and pavement markings, lighting, and detention facilities. His construction experience includes implementation and building within government codes and guidelines. Having performed various engineering and construction projects in the lower Rio Grande Valley makes him an essential valuable piece of the team.

Education:

Bachelor of Science, Civil Engineering, University of Texas, Rio Grande Valley

Bachelor of Science, Business Management, University of Texas, Rio Grande Valley

Areas of Expertise:

- Roadway
- Highway
- Construction

Project Experience:

Mission Lateral Drainage, Project Engineer for Construction. This project involves the reconstruction and widening of an existing drainage canal with excavation of over one hundred thousand cubic yards of earth movement. Mr. Ramos led the construction and coordination between (HCDD1) Owner and engineer to ensure the project was built to standards and specifications. The application and instalment of RIP Rap as well as drainage structures contributed to his tenure of reference on what Hidalgo County Drainage Projects encompass. The Project was completed and has helped mitigate flood prevention in its corresponding area successfully.

Veterans Drainage Project, Edinburg, Texas. Project Engineer For construction. Reconstruction of three existing streets in the City of Edinburg was necessary in order to mitigate flood prone areas. The installation of a curb and gutter section as well as drainage trunk lines and inlets were the main attribute to this project. During construction there were many existing utility issues that posed delays and procurement congestion. Mr. Ramos's ability to meet and discuss project issues with engineers and the City allowed this project to keep moving forward till completion. Persistence and making time to meet for project meetings and updates became the essential aspects in order to take this project passed the finish line.

Land Development Projects, Rio Grande Valley Project Engineer For construction. Mr. Ramos has led the effort in the development of numerous residential as well as commercial developments in the Rio Grande Valley. With his extensive knowledge and experience in the construction of roadways, extension of utilities, and improvement of drainage facilities, Mr. Ramos has development himself into in professional asset in the construction field. The ability to work with inspectors from a wide range of local governments as well as having an in-depth comprehension of the different local government standards helps attribute to a smoother and better construction process. With multiple projects operating within the same time frame Mr. Ramos has proven to use his abilities and assets to preform and assure timelines are met and projects are completed.

Vincent Pantone (GIS)

Mr. Pantone has been a GIS Specialist for 3 years. Mr. Pantone has successfully executed multiple ROW acquisition projects for the utility and oil and gas industries. He also has provided attribute and spatial analysis for Federal agencies and state and local governments. Mr. Pantone is fully proficient in Esri ArcGIS, ArcGIS Server, Esri Online, ArcPad, SDSFI, Trimble PathFinder Office, and Python. Mr. Pantone is committed to executing comprehensive analysis and design to resolve issues and complete projects. He is backed by successful internship experience and knowledge of engineering theories, principles, specifications, and standards. Mr. Pantone is able to function well as a member of an engineering team.

Education:

Bachelor of Science in Civil Engineering, University of Texas Rio Grande Valley

Areas of Expertise:

- GIS
- Roadway Design

Project Experience:

FM 1423 Schematic Design, Donna, TX – TxDOT Pharr District

GIS Data Analyst for a Schematic and Environmental roadway reconstruction project in Donna, Texas. Project duties included geospatial data gathering, management, analysis, and documentation. This project also included the sourcing of Digital Elevation Models (DEM) to be used in retrieving existing ground elevations, contours, and 3D visualizations. Furthermore, land parcel and ownership information were needed in the preliminary stages of schematic design where ground surveying services had not been completed.

Arterial 1 Schematic Design, Socorro, TX – TxDOT Pharr District

GIS Data Analyst for a Schematic, Environmental and PS&E new location roadway project in Soccoro, Texas. The scope of this project required proper sourcing and analysis of data and ranging from DEM's to land parcels to utility information. Being that the project's scope involved an alternative analysis of multiple options over a large section of Soccoro, data management was vital. Drainage analysis was also conducted to identify sinks, determine flow direction, and delineate watersheds in the surrounding area. Detailed mapping was also performed to assist in environmental assessment and public outreach.

Hueco Tanks Schematic Design, Socorro, TX – City of Socorro

GIS Data Analyst for this on-going 1-mile project that involved the construction of a 4-lane concrete pavement with bicycle lanes and a raised concrete median. Project included Schematic and Environmental new location roadway design and is an extension of the New Hueco Tanks Rd project. Analyst performed GIS services that included data gathering, analysis, planning, and field mapping. Decision support program management tools include secure web apps for property acquisition, utility relocation, and web-based access to web-driven GIS drawings.

Mark Iglesias (Environmental)

Mr. Mark Iglesias has over 25 years of environmental experience specializing in the National Environmental Policy Act of 1969 (NEPA). Prior to joining the private sector, he spent over 7 years with the TxDOT Pharr District, of which 4 years were served as the Environmental Coordinator. He managed, directed, and evaluated a small group of environmental specialists engaged in conducting environmental assessments for environmental clearances under NEPA for transportation projects within the 8 counties of Hidalgo, Cameron, Willacy, Brooks, Kennedy, Zapata, Starr and Jim Hogg. He oversaw and directed inspections and field surveys to ensure compliance with applicable state and federal environmental laws, rules, policies and procedures in the areas of biological resources, cultural resources, wetlands, air/water quality, traffic noise assessments, hazardous materials, socio-economic, and indirect and cumulative impacts

Education:

Bachelor of Science in Biology, University of Texas Pan American

Areas of Expertise:

- Environmental
- Wetland
- Public Involvement

Project Experience:

Lone Star Pipeline Wetland Delineation, Endangered Species Survey, Archeological Survey, IBWC Permit April 2022 – As Environmental Manger, Mark was responsible for the wetland delineation, endangered species survey, archeological survey, and coordination with the IBWC for the proposed pipeline relocation to address potential conflicts with the proposed Hidalgo County Regional Mobility Authorities proposed toll road project. The existing pipeline traverses through the IBWC Rio Grande Floodway and required coordination with IBWC to update the existing license.

Noise Analysis Technical Report and Wetland Delineation, Inspiration Road/Military Parkway Loop, CSJ 0921-02-395, City of Mission, Hidalgo County As Environmental Manager for CSR Environmental and Consulting, Mark is responsible for the preparation of several Technical Reports for the Environmental Assessment. Mark conducted existing noise levels along the roadway and conducted a wetland delineation. Technical Reports for the Noise Analysis and Wetland Delineation was prepared for the proposed roadway improvements.

Noise Analysis Technical Report, FM 2220, CSJ 2094-01-063 & 2094-01-062, City of McAllen, Hidalgo County. As Environmental Manager for CSR Environmental and Consulting, Mark is responsible for the preparation of a Noise Technical Report for the Environmental Assessment. Mark conducted existing noise levels along the roadway. A Technical Reports for the Noise Analysis was prepared for the proposed roadway improvements.

Wetland Delineation/Habitat/Wildlife Assessment, Edinburg International Airport, TxDOT Aviation Division, Hidalgo County As Project Manager Mark was responsible for the preparation of a wetland delineation report, jurisdictional determination, coordination with USFWS, wildlife assessment and habitat assessment for the proposed drainage improvements and additional land acquisition for future improvements to the airport's runway, taxiway, and hangers. Mark managed the environmental studies which included such issues as wildlife hazards, jurisdictional determination, habitat analysis, and threatened and endangered species.

D. SUBCONSULTANTS TEAM RESUMES

LEGACY ENGINEERING GROUP

Oscar M. Garza, PE, PE, PTOE (Traffic-LEG)

Mr. Garza is a certified Professional Traffic Operations Engineer (PTOE), Roadway Safety Professional (RSP1), and Licensed Professional Engineer (Texas, Mississippi, Louisiana) with over 20 years of cumulative experience in transportation. He is exceedingly proficient in the analysis, design, and implementation of various traffic engineering elements such as traffic simulation, operational analysis, safety/crash studies, travel demand modeling, traffic projection development, and the planning/design of traffic signals, illumination, TCP, signing, pavement markings, and temporary/permanent ITS elements on both rural and urban corridors throughout the State of Texas. He is TxDOT Precerfied in 17 Work Categories and LGPP Qualified.

Education:

Bachelor of Science in Civil Engineering, University of Texas at San Antonio

Professional Registration:

PE, Professional Engineer, Texas No. 108602

Roadway Safety Professional 1 TPCB No. 489

PTOE, Professional Traffic Operations Engineer, Texas No. 3241

TXDOT Precertifications:
3.2.1, 3.7.1, 4.2.1, 4.4.1, 4.7.1, 7.1.1, 7.3.1 7.4.1, 7.5.1, 8.1.1, 8.2.1, 8.3.1, 8.4.1, 9.1.1

Areas of Expertise:

- Traffic Engineering
- Illumination
- Intelligent Transportation Systems

Project Experience:

TxDOT San Antonio District Traffic Engineer – San Antonio, TX

In this role Mr. Garza was responsible for the planning, design, construction, maintenance, and operations of all District Traffic Engineering Section elements within a 12-county boundary. He worked diligently with staff to produce over $80M in new projects while managing $55M in construction projects simultaneously.

I-10 HOV Lanes Project – San Antonio, TX (0072-07-041) (Flatiron ~ Contractor)

Mr. Garza served as the Project Manager and Traffic Engineering Task Leader for this 5.3 mile $73M managed lane improvement project in northwest San Antonio being administered by TxDOT and the Alamo RMA. This project included adding one HOV Lane and one GP Lane in each direction from La Cantera Pkwy out to FM 3351. His responsibilities included the overall schematic development, coordination with VIA, traffic engineering analysis, public involvement activities, and all recommended ITS components required for the project. For the PS&E phase, Mr. Garza led the Traffic Enginering Design on the temporary and proposed ITS elements for the project. The project was ultimately constructed in 2020.

Talley Road Mobility Enhancement and Flood Mitigation Project – Bexar County, TX

Mr. Garza served as the Project Manager for this $12M project which included reconstructing 3 miles of a 2-lane rural roadway to a 4 to 5-lane urban roadway with bike lanes, curbs, and sidewalks. The project included the addition of storm drainage facilities and four new traffic signals. His responsibilities included developing the project geometric schematic, evaluating various project alternatives, coordinating all utilities, performing the traffic engineering analysis, developing a conceptual TCP, preparing the Preliminary Engineering Report, and developing the PS&E package; this project ultimately received the Tx-APWA Project of the Year Award in 2022

Tao "Frank" Wang, PE (Structural Design-UCE)

Mr. Mr. Wang has over 25 years of structural design experience within the public and private sectors. He is experienced in the designing urban and rural roadways and bridges such as resurfacing, retaining walls, and rehabilitation. Mr. Wang is knowledgeable in designing CMU wall, retaining walls, sound wall, steel framing, precast/prestressed concrete and reinforced concrete, wind bracing design, drafting, foundation design, checking, on-site inspection, structural analysis of existing building, structural renovations design, and commercial structure and residential inspections. Mr. Wang is also certified in providing bridge inspection task leader services

Education:

Bachelor of Science in Civil Engineering, Wuhan University of Texdhnology, China

Professional Registration:

PE, Texas No. 103820

Areas of Expertise:

- Structural
- Bridge
- Route Bridge Inspection

Project Experience:

Hidalgo RMA SH - 365 Segment 3 at US-281, Hidalgo RMA, Hidalgo County, TX / Project Manager - As sub-consultants for Tedsi, UNINTECH provided structural engineering services for a bridge overpass at US-281. This is a 292 ft. long, I-beam bridge with inverted T bent Cap. Mr. Wang performed the bridge layout design, bridge substructure design including inverted-T bent and special columns, and bridge superstructure design with PCP panels. Mr. Wang also coordinated with clients on all the requirements for this project.

Hidalgo RMA International Bridge Trade Corridor (IBTC)- Segment 0012 & 0013, Hidalgo RMA, Hidalgo County, TX / Project Manager - As subconsultants for Tedsi, UNINTECH provided structural engineering servivces for three bridges for IBTC project. Bridge No. 1 is a 292 ft. long overpass at CR 1821, and bridge No. 2 and 3 are 1,100 ft. long sister bridges overpass at US 83 and over the railroad. Mr. Wang performed the bridge layuout design, railroad exhibit "A" design, and bridge substructures including inverted-T bent and special rec. column with form liner details and big size drilled shaft. He also designed the bridge superstructure.

Hidalgo RMA Trade Corridor Connector (I Road Overpass & Dicker Road Overpass), Hidalgo RMA, Hidalgo County, TX / Project Engineer. As sub-consultants for S&B, UNINTECH provided route and design studies, retaining walls and bridge designs for Hidalgo County RMA from west of 10th Street to the International Bridge Trade Corridor (IBTC) approximately 31,365 ft. (5.94 miles). Mr. Wang prepared plans for Mechanically Stabilized Earth (MSE) retaining walls at the US 281 overpass locations. He also provided bridge designs and layouts for three overpasses including US 281 (approx 292 ft); I Road Overpass (approx 470 ft); and Dicker Road Overpass (approx 358 ft). Mr. Wang is assisting with the quality control and assurance (QA/QC) on all deliverables associated with project.

B2Z ENGINEERING

Mark McClelland, PE (Geotechnical-B2Z)

Mr. McClelland functions as the Senior Geotechnical Engineer with B2Z Engineering. He has extensive experience in all aspects of Geotechnical Engineering which was gained during his 29 years with TxDOT. Most of his career was spent working in, and ultimately managing, the Geotechnical Branch of TxDOT Bridge Division. He oversaw the complete update of the TxDOT Geotechnical Manual, wrote all foundation and retaining wall Standard Specifications for the 2004 Standard Specification Book, and has overseen development of all current foundation and retaining wall design processes currently in use by TxDOT. He was involved in the management of bridge structures through the development and oversight of the TxDOT Scour Management Program, and the program to manage structures on unknown foundations.

Education:

Bachelor of Science in Civil Engineering (BSCE), The University of Texas – Austin

Professional Registration:

PE, Texas No. 60710

Areas of Expertise:

- Stormwater
- Hydrology and Hydraulics
- Construction Management
- Program Management
- Quality Assurance/Quality Control
- Laboratory Field Operations
- Geotechnical Engineering
- Construction Materials Testing

Project Experience:

IH 35 at US 183 Project (TxDOT)

This project consisted of the design of 4 direct connectors between IH-35 and US 183, 1 underpass of IH-35 at St. Johns Avenue, 1 IH-35 overpass widening at US 290 and various other improvements to the IH-35 and US 183 existing interchange corridor. The Geotechnical portion of the project scope included the drilling of 36 structural/bridge borings at approximately 30 to 60 feet in depth, 44 retaining wall borings at approximately 30 to 50 feet in depth and 15 miscellaneous borings at approximately 50 feet in depth for a total of 3,730 LF of geotechnical drilling. It should be noted, the bulk of the drilling was located in an area of thin clayey/sandy overburden sections atop marl and limestone. Field investigations included TxDOT TCP testing, Shelby Tube sampling in overburden and rock drilling/coring - % recovery & RQD. Laboratory testing included moisture content, -200 gradation, atterberg limits, sulfate content and one-dimensional consolidation testing. Engineering analyses included generation of soil strength foundation curves (skin friction and point bearing) for deep foundation design, development of lateral soil parameters for deep foundation design, calculation and analysis of external stability for retaining walls, development of modeling and analysis for global stability for retaining walls, analysis of settlement of retaining walls, establishment of parameters and sketches of cut type retaining walls (soil nailed walls), construction recommendations for geotechnical items.

Raymondville Drain, Hidalgo and Willacy County Main Outfall Project

This project consisted of Geotechnical Exploration, Laboratory Testing and Value Engineering Recommendations for the placement of a new location Main County Outfall System in Hidalgo County and connection to & expansion of an existing Delta Region drain system. Geotechnical information has been primarily collected along all outfall stretches and various analyses were completed to verify adequacy of side slopes for proposed channel section (Slope Stability). Additionally, Foundation Design Analyses & Curves have been primarily generated for all crossings including investigation of Scour ability based on D50-D90 parameters at the structure locations. This job is being let out in phases and as such is still currently underway.

Samuel D. Maldonado, PE, RPLS (Surveying-SAM)

Mr. SAMUEL D. MALDONADO, PE, RPLS is a Licensed Professional Engineer (PE) and Registered Professional Land Surveyor (RPLS) with over 25 years of experience in Civil Engineering and Construction Management, and over 15 years of experience in Land Surveying. Mr. Maldonado has provided surveying services to local municipalities, counties, state and federal government agencies as well as private and commercial clients. He has performed surveying services for federal facilities, state and local parks, new subdivisions, commercial and institutional buildings, road and parking lot improvements, drainage systems and infrastructure improvements. Mr. Maldonado oversees major land surveying projects involving: topographic and boundary surveying; utility and right of way (ROW) mapping; aerial mapping and photogrammetry; horizontal and vertical control; precast and steel erection surveys; construction staking and as-built surveys. He also provides ALTA/NSPS Land Title surveys for commercial properties and adheres to the minimum standard detail requirements established by the National Society of Professional Surveyors and the American Land Title Association. Mr. Maldonado is a member of the Texas Society of Professional Surveyors and stays current with the latest developments, and the newest software and technologies used in land surveying.

Education:

M.B.A., University of Texas – Rio Grande Valley

B.S., Civil Engineering, Texas A&M University - Kingsville

Professional Registration:

•Professional Engineer, Texas: No. 91889
•Professional Engineer, Arizona: No. 71257
•Registered Professional Land Surveyor, Texas: No. 6027

Areas of Expertise:

- Survey
- ROW Acquisition
- Aerial Mapping

Project Experience:

New Hidalgo County Courthouse – Edinburg, Texas

- Provided surveying specific to construction staking of utilities, drainage and site infrastructure.
- Provided project benchmarks and performed construction staking of building corners, building piers, water and sewer lines, storm drain lines and other utility improvements.
- Surveying services were provided in multiple phases to allow for minimal disturbance to ongoingconstruction work.

Schematic Right-of-Way Acquisition Strip Map of Davis Road (I69C to East City limits) and Schunior road (Jackson to West City limits) – Edinburg, Texas

- Provided surveying services to develop a schematic Right-of-Way acquisition strip map of Schunior Road, a 2.73-mile length of road, and Davis Road, a 1.75-mile length of road.
- Performed research and data collection using Hidalgo County City maps and Appraisal District property information.
- Performed aerial surveying to capture and include all structures while conventional field surveyingestablished minor control for the project.

Hidalgo County Regional Mobility Authority Surveying Services – Hidalgo County, Texas

- Provided boundary surveying services for multiple parcel plats located throughout the County, including abstracting and plotting, setting of control monuments and establishment of benchmarks, prepared parcel plats with metes and bounds description.
- Topographic survey and right-of-way map for FM 493 in Donna, Texas which included appx. 105 parcelplats with metes and bounds description.

.

Jason E. Anderson, PE (Water/Wastewater-CAR)

Mr. Jason Anderson, a Vice President and Project Manager with Carollo, joined the company in 1996. His experience includes master planning, design, and optimization of water and wastewater facilities. He provides exper-tise in the design of upflow solids contact clarifiers, granular media fil-ters, chemical storage and feed systems, UV disinfection systems, pump stations, blower buildings and aeration basins, odor control systems, an-aerobic digester mixing systems, reservoir retrofits, permitting, and O&M manual development.

Education:

MS Environmental Engineering, University of California, Davis

BS Civil Engineering, University of Nevada, Reno

Professional Registration:

Professional Engineer, Texas, California, Arizona

Areas of Expertise:

- Water / Wastewater
- Hydrology and Hydraulics

Project Experience:

Project manager for the Walnut Creek Wastewater Treatment Plant Headworks Improvements, City of Austin, Texas. The City of Austin chose Carollo to design improvements to Headworks (HW) 1, the original head-works for the 75-mgd wastewater treatment plant. Carollo's had evaluated the condition of HW 1 under the Facilities Plan and found the concrete structure was in remarkably good condition; however, all mechanical equipment was in need of replacement. Carollo had performed a hydraulic analysis to show the headworks could handle a flow of up to 190 mgd with relatively minor structural modifications. This project will replace all screenings removal and handling equipment, rehabilitate the aerated grit removal and transport system, expand grit handling, improve odor control, improve building access and safety, and improve flow measurement to all four downstream primary clarifiers.

Project manager for the Walnut Creek Wastewater Treatment Plant Op-timization and Facilities Plan, City of Austin, Texas. With future increases in flow and changes in influent wastewater conditions, the City wants to iden-tify and plan for improvement projects, both for the existing facility and for expansion of the facility. As a subconsultant, Carollo teamed with the prime firm to prepare the facility plan. Carollo's project team focused on modeling hydraulics through the entire process train and providing input on process changes. Project tasks also included performing a condition as-sessment and recommending improvements for the headworks, primary treatment complexes, odor control, chlorination and dechlorination facili-ties, solids handling facilities, and non-potable water and reclaimed water pumping facilities. Carollo is following up on this facility planning effort with the design of the improvements recommended for Headworks 1.

Project manager for the Southeast Water Reclamation Plant (SEWRP) Plant 3 Improvements, City of Lubbock, Texas. The SEWRP is a 23-mgd facili-ty with two treatment trains—the 15-mgd Plant 4 operated as a biological nutrient removal facility (specifically IFAS), and the older 8-mgd Plant 3 op-erated as a conventional activated sludge facility. Given Plant 3's age, there are rehabilitation needs throughout the plant. This project converts two 115-foot-diameter secondary clarifiers from organ pipe sludge withdrawal to hydraulic suction headers and includes energy-dissipating inlets. Im-provements include new RAS pumps, new secondary scum pumps, and a new WAS pump. The improvements end the practice of returning second-ary scum to the aeration basins and provide individual RAS withdrawal control for each clarifier. Other improvements include a new elevated air header from the blowers to the aeration basins to bypass leaking buried air piping, as well as new air distribution piping in each of the three aera-tion basins.

4. INSURANCE

TxIDG has been doing business with Texas municipalities for nearly 70 years. We maintain general liability/worker's compensation and employers' liability and professional liability/errors and omissions insurance coverage as follows:

- Worker's compensation and employers' liability insurance.....$1,000,000
- Commercial general liability insurance $2,000,000
- Professional liability insurance $1,000,000
- Excess/umbrella liability insurance $1,000,000

Insurance Carrier/Agent:

USI Southwest
9811 Katy Freeway, Suite 500
Houston, Texas 77024
Agent Contact: **Stephanie Anguiano**
Ph: 713-490-4600 / Email: stephanie.anguiano@usi.com

Companies Affording Coverage:

- ✓ Hartford Underwriters Insurance Company
- ✓ Hartford Ins Co of Illinois
- ✓ XL Specialty Insurance Company

TxIDG meets the professional liability and other insurance limits required by the City and will provide an original certificate of insurance within two days of selection for the City's Rotation List.

Texas Infrastructure Development Group, LLC has had no insurance claims made against the firm within the past 5 years.

STATEMENT OF QUALIFICATIONS

CITY OF EDINBURG

RFQ NO. 2024-9
Request for Qualifications for Engineering Services Rotation

TRIMAD CONSULTANTS L.L.C.

Firm Number F-18526

1803 Mozelle St.
Pharr, TX 78577
(956) 688-8860

Prepared For:
City of Edinburg

Date:
July 16, 2024

Section 1

Letters

July 16, 2024

City of Edinburg
415 W. University Drive
c/o City Secretary Department (1st Floor)
Edinburg, TX 78541

SUBJECT: RFQ No. 2024-9. Engineering Services

To Whom It May Concern,

Trimad Consultants, L.L.C. (TRIMAD) is pleased to express our interest in providing engineering services for the City of Edinburg under RFQ No. 2024-9. We are committed to delivering efficient and innovative solutions tailored to your infrastructure needs.

Mr. Ricardo Salazar, P.E., President of TRIMAD, will be the primary point of contact for all correspondence related to this RFQ. His contact information is as follows:

Physical Address: 1803 Mozelle St., Pharr, TX 78577 Cellphone: (956) 497-5355

Telephone: (956) 688-8860 Email: rsalazar@trimadstx.com

Mr. Salazar has over 21 years of experience in water and wastewater infrastructure projects throughout the Rio Grande Valley (RGV) and South Texas. He has dedicated his entire career to Civil Engineering applications, including construction management, surveying, development, paving, and drainage projects.

He has served numerous municipalities, including San Juan, Pharr, Elsa, Weslaco, Donna, Edinburg, Sullivan City, Rio Grande City, Roma, McAllen Public Utility, and the Brownsville Public Utility Board. His projects include wastewater treatment facilities, lift stations, recycle pump stations, water treatment plants, water mains, elevated storage tanks, and water and wastewater master planning and modeling.

Mr. Salazar also has extensive experience working with the Texas Water Development Board (TWDB) and the United States Department of Agriculture (TDA). We have successfully secured low-interest loans and grant funding for various projects.

We confirm that we have received all addendums related to this RFQ and have duly considered their content in our submission. As an authorized officer of TRIMAD, I am empowered to bind the firm to any contract resulting from this RFQ.

We look forward to the opportunity to serve the City of Edinburg and contribute to its infrastructure goals. As a local firm located in Pharr, Texas, we are confident in our ability to provide fast and effective engineering solutions for any project challenges.

Thank you for considering Trimad Consultants for this opportunity.

Sincerely,

Ricardo Salazar, P.E.
President

Firm Qualifications and Experience

City of Edinburg

Firm Identification

Trimad Consultants, L.L.C. (TRIMAD) is a civil engineering firm that was incorporated in 2017 but didn't practice until 2019. Although TRIMAD is a new firm, our TEAM has extensive experience in delivering an array of complex projects with a strong emphasis in supporting municipal and private infrastructure including roadway, transportation, stormwater management, drainage improvements, wastewater treatment, sanitary sewer collection, water treatment plant, and water distribution projects. Ricardo Salazar, P.E. President of TRIMAD, is a Rio Grande Valley (RGV) native, high school graduate, resident, business owner and public servant. Mr. Salazar wants to help his community by providing quality affordable Civil Engineering Services.

Certifications

TRIMAD is certified by the South-Central Texas Regional Certification Agency as an Emerging Small Business Enterprise (ESBE), Hispanic American Business Enterprise (HABE), Minority Business Enterprise (MBE), Small Business Enterprise (SBE). Trimad is also certified by Tx Dot Disadvantaged Business Enterprise (DBE), and SBA 8(a).

Unique Qualifications and Specialized Design

Mr. Ricardo Salazar has over 20 years of experience in Civil Engineering and has worked for a variety of civil engineering firms and construction firms to further his knowledge to succeed in the field. Mr. Salazar is passionate and ensures the work needed will be done with. Mr. Salazar has extensive experience in civil engineering projects. His extensive work can be found in **Section 3 Team Member Qualifications and Experience under Resumes** TRIMAD is dedicated to working in South Texas. Furthermore, we strongly encourage our references to be contacted. We take tremendous pride in our work and customer service. A small sample of TRIMAD's clients and successfully executed TRIMAD projects, as well as projects delivered by our staff are summarized in **Section 3 Team Member Qualifications and Experience under Resumes.** TRIMAD will ensure all work is successfully delivered and at upmost satisfaction to our clients. TRIMAD can serve its clients with a wide range of services.

City of Edinburg

Capacity to Perform

Trimad Consultants is a firm of 11 employees. The TRIMAD Team consists of six graduate engineers and one Construction Manager that have each had experience under the guidance of Mr. Salazar. The TEAM understands that having experienced personnel that work well as a team and maintain communication with the client is key to the successful completion of any assignment. The TEAM offers well-qualified professionals in planning, design, and construction with a history of excellent customer service. Ricardo Salazar, P.E. (Principals) is both a Project Manager and Principal-in-Charge. The principal is knowledgeable and an experienced leader that will ensure the team is well organized and receives the highest priority of available resources. The Leader of the different services are outlined in our organizational chart with the leader of each service reporting directly to the principal for updates on project status and coordination issues.

The principal, who will be assigned Project Manager for the City of Edinburg, is available and the level of involvement in the technical design will depend on the specific project assignment. Generally, the Principal may be available to devote as much as 85% of time to the City of Edinburg.

Jose Perez and Fredy Carmona will be the main engineers under the general guidelines of the program. Mr. Jose Perez and Fredy Carmona will commit 85% of their time to the project. Mr. Perez and Mr. Carmona will also go to the construction site to ensure completion of the project is done accurately and in a timely manner. Mr. Rene Salazar, Construction Manager, will go to the construction site periodically to ensure the project is going smoothly.

Ms. Trisha Salazar is the Office Manager in which will be the member of the team to ensure invoicing, insurance documents, contract terms, and any administrative tasks are conducted. Ms. Salazar will commit 30% of her time to the project when needed for the administrative tasks and QA/QC.

The Trimad team is confident and ensures the project will finish in a timely manner. Mr. Perez, Mr. Carmona, and Ms. Salazar all report to Mr. Salazar.

Trimad has extensive experience working in task order arrangement. Trimad is currently successfully completing their assignments within the project schedule. Over the past two years, we have successfully executed projects for municipalities such as projects can be fund in **Section 4 References under Current Project List.** Showcasing our ability to meet deadlines and exceed expectations. Trimad establishes communication protocols at the design kickoff meeting and identify key project challenges and issues. Communication structure during the project includes routine updates with the PM and any sub-consultant representatives to check status, provide feedback, manage change, and maintain

schedule. All documents prepared by the TEAM will be subjected to the following procedures before being submitted to the City of Edinburg for review. Our corporate policy is to review our standard checking procedures, and if the peculiarities of the project require, modify them. All project related documents will be reviewed prior to submittal to the City of Edinburg.

Familiarity with Applicable Rules and Regulations

Trimad has delivered a multitude of projects similar to those anticipated to be undertaken by the City of Edinburg. This includes roadway reconstruction and drainage improvements. Clients we have served are listed in **Section 4 References** and include several high-profile entities from the Rio Grande Valley. Based on our experience we are confident that our team is well qualified to assist the City of Edinburg.

Project Understanding

Trimad has a long history of working in the Rio Grande Valley and South Texas Region. Trimad is experienced in delivering a wide range of engineering services from planning to final construction. Provided below are examples of projects Trimad is currently working on or recently delivered.

- Funding Procurement
- Program Management
- Project Engineering Design Report/permitting application assistance
- Civil Design, Specifications, and preparation of Construction Documents
- Construction Cost Estimating
- Construction Contract Administration and Inspection
- Construction of projects

Trimad has successfully delivered the following types of projects:

- Roadway and transportation design
- Stormwater Management and Drainage Improvements
- Utility assessments and coordination
- Water/Wastewater treatment facilities and collection/distribution systems
- Institutional, commercial and residential development

Specific examples of the services Trimad has provided for previous projects are listed in **Section 3 Work Performance under Representative Projects**. In addition to engineering expertise, these projects demonstrate our experience in leading and managing projects and addressing appropriate regulations and policies for funding and permitting approval.

Specific Project Approach

Upon selection, our team will meet with the City of Edinburg to refine the scope of engineering services and to solidify the client's long term goals and expectations for the assignment. The final project scope will be defined and our team will prepare a work plan that will establish schedules and budgets for the scope of work that is required. The work plan will be the basis for allocating resources throughout the course of the project.

We follow a basic conventional project approach that is simple yet effective.

1. **Develop the Team –** The Project Manager will be responsible for the selection of staff for the project task. In this initial step, the Project Manager shall confirm the client's vision and select the task leader.
2. **Team Chartering –** TRIMAD will define the mission, vision, goals, rules, and responsibilities required for client satisfaction.
3. **Plan the Work (In Writing) and Create the Project Work Plan –** TRIMAD staff will prepare the work plan which includes work breakdown, assignments, schedule, budget, and Quality Control Plan.
4. **Endorse the Plan –** Client and Team members shall have the opportunity to discuss and review the work plan and endorse it.
5. **Perform the Work and Manage Change –** TRIMAD will continuously monitor client relationship, teamwork, schedule, budget, quality, and plan for change.
6. **Close and Learn –** TRIMAD will demobilize, archive, conduct project review, and construction closeout meetings.

We are committed to assisting the City of Edinburg in any Professional Engineering project by providing an "As Needed Basis" or on a "Project Specific Basis" both with efficient and innovative cost-effective solutions.

Project Engineering Design Report, Phase A

During the Project Engineer Design Report, Phase A (or Project Definition Phase), sufficient information will be gathered to define the project goals and requirements. It is important that the work performed in this phase accurately define the issues that are to be solved in subsequent design phases.

Preliminary Engineering, Phase B

The schematic design work involves using the data and guidelines defined in Phase A to develop the preliminary project design. Phase B combines all design components into a package that is free of major conflicts. Phase B also provides sufficient information for an informed review of the proposed design. During this time, alternative design approaches are also considered, and a single design concept is established and agreed upon.

Final Design, Phase C

During the Final Design phase, the final construction drawings and specifications are prepared based on

the basic design elements identified in the Phase A and Phase B work.

Bidding Services

During the bidding phase, the TEAM is prepared to assist the City of Edinburg and perform the following tasks:

- Provide bid sets for project advertisement
- Provide an Opinion of Costs for use in the award of a construction contract
- Conduct a pre-bid meeting with all registered bidders, prepare the agenda, and take minutes of the meeting and prepare an attendance registry.
- Respond to questions from bidders and prepare addenda to clarify the intent of the project documents
- Attend the bid opening, review the bids received and the bid tabulation provided by the City of Edinburg. verify the low bidder's qualifications, and submit a letter of recommendation regarding award of contract to the PM.

Services During/After Construction

During the construction phase, the TEAM anticipates performing the following tasks:

- Conduct a pre-construction meeting with the contractor, prepare the agenda, and take minutes of the meeting and prepare an attendance registry.
- Perform construction staking.
- Provide on-site observation of the work and monitoring of the construction schedule.
- Provide review of contractor's monthly construction pay estimates and make recommendations for payment.
- Review and take action on all specified contractor submittals, plus laboratory, shop, mill, and field tests reports on materials and equipment.
- Provide assistance to the City of Edinburg during project acceptance (substantial and final completions), including assistance with performance tests and initial operations of the project.
- Perform a final inspection, and provide a report marking the completion of the project.
- Prepare and submit conformed construction record drawings based on marked-up documents provided by the contractor.
- Respond to RFIs from the contractor or the City of Edinburg in a timely manner.
- Assist the City of Edinburg in the preparation of change orders, including a final change order covering recapitulations (over and under) of projected bid quantities in support of the final request for payment from the contractor.

City of Edinburg

Possible Difficulties in Completing Projects and Proposed Solutions

Difficulties arise during the development of a project design and require diverse technical expertise, an innovative mindset, and excellent communication skills to achieve a successful resolution. Trimad manages unexpected changes to project scope by identifying difficulties early in the design process. If a large task order assignment or projects with compressed schedules are needed, Trimad will provide the additional man-hours to minimize schedule impacts. A key aspect of our service is our flexible staffing model, which allows us to allocate part-time resources from our skilled team for smaller assignments. By tapping into our experienced network, we can provide specialized expertise tailored to the City's requirements, guaranteeing that every project receives the attention it deserves, regardless of size. Trimad has met aggressive design schedules while not compromising quality. Supporting the City of Edinburg Order Contract matches the core values and skill set of Trimad.

Similar Projects and Clients

The following are similar projects and clients the TEAM has recently served:

Municipal Projects:

- City of Pharr Wastewater Treatment Plant Expansion (5-mgd Expansion). This project was the first BNR Plant built in the Rio Grande Valley.
- City of Pharr Water/Wastewater Master Plant
- City of Pharr Lift Station No. 25
- BPUB UV Disinfection Facility Improvements
- City of Donna TCEQ Discharge Plant

Federally-Funded Projects:

- United States Air Force (USAF) Utility Hookups

Clients:

- Brownsville Public Utilities Board (BPUB)
- City of Pharr
- City of Donna
- McAllen Public Utilities (MPU)
- City of San Juan
- City of Alamo

City of Edinburg

Quality Assurance

The TEAM will employ a Total Quality Management (TQM) Program on all the projects we undertake and for the City of Edinburg contract. The TEAM will assign a knowledgeable and experienced team member to lead the various tasks to minimize errors and omissions. His/her responsibility is to check the project and ensure the firm's Quality Control (QC) Program is executed properly. The plans will be reviewed during project milestones to determine if the proposed designs are safe and provide adequate consideration to constructability and value engineering. Throughout the QA/QC Process, the design and consideration of utility will be closely observed to minimize conflicts. The plans will be reviewed to identify drafting and design discrepancies and to verify that the plans are in compliance with the respective design manuals. The Trimad TEAM is fully committed to our QA/QC Program. The TEAM recognizes that QA/QC requires relentless and unending effort by top management with participation by all employees. We also believe in the definition of quality as conformance with requirements like those of TxDOT, plus any industry, professional or governmental standards that may be applicable. The TEAM QA/QC process reflects a philosophy that emphasizes the prevention of errors, rather than merely checking and counting.

Firms Proximity and Ability to Respond

The firm is located at 1803 Mozelle St. in Pharr, Tx. TRIMAD understands that there may be instances in which the City of Edinburg may need to have unplanned meetings at any time during the project and TRIMAD is dedicated to accommodate any meetings in any form, whether it may be in person, by phone or virtual at any time the team at the City of Edinburg may need to meet.

Organizational Chart

Trimad Staff List

The Key Project Personnel is noted below: **Trimad: 1 P.E.**

Trimad Consultants, L.L.C.	
Personnel	Discipline
Ricardo Salazar, P.E.	Professional Engineer / President
Jose A. Perez	Graduate Engineer
Fredy Carmona	Graduate Engineer
Alfonso Guzman	Graduate Engineer
Miguel Mateos	Graduate Engineer
Ivan Rodriguez	Graduate Engineer
Cruz Flores	Senior Designer
Rene Salazar	Construction Manager
Trisha M. Salazar	Office Manager
Valeria Lafaire	Administrative Assistant

Key Team Members and Experience Summary

Provided below is a brief profile for key personnel:

Mr. Ricardo Salazar, P.E. (TRIMAD)

Role: Roadway Design, Water/Wastewater, Program Manager, Construction Manager, Client Liaison

Mr. Salazar has approximately 20-years of experience in the planning and design of civil engineering projects and survey. His project experience includes roadway improvements, drainage infrastructure, sanitary sewer collection, and water distribution. Mr. Salazar is located in Pharr, Texas and is able to quickly respond to any needs. Among communities he's has served include the Cities of Pharr, Elsa, Edcouch, Donna, and Weslaco, Edinburg ECISD, La Joya ISD, Hidalgo County, Urban County, and number of private developers in the Rio Grande Valley.

City of Edinburg

Mr. Jose A. Perez, Graduate Engineer (TRIMAD)

Role: Roadway/Water/Sanitary Sewer Design Support

Mr. Perez undertakes a variety of tasks including field survey, survey technician and design/drafting technician. He is working under the direction of Ricardo Salazar, P.E. in support design efforts for a wide range of civil type projects (paving and drainage improvements, water and wastewater utility work, educational facilities, residential and commercial development, etc.). Mr. Perez is a proficient AutoCAD Civil 3D Operator and Designer with significant plan/profile, utility plan and profile drafting and design support experience.

Mr. Fredy Carmona, Graduate Engineer (TRIMAD)

Role: Roadway/Water/Sanitary Sewer Design Support

Mr. Carmona undertakes a variety of tasks including field survey technician and design/drafting technician. He is working under the direction of Ricardo Salazar, P.E. in support design efforts for a wide range of civil type projects (paving and drainage improvements, water and wastewater utility work, educational facilities, residential, and commercial development, etc). Mr. Carmona is proficient AutoCAD Civil 3D Operator and Designer with significant plan/profile, utility plan and profile drafting and design support experience.

Ricardo Salazar,
President & Principal

PROFESSIONAL EXPERIENCE

Ricardo Salazar, Professional Engineer, has over 20 years of experience in a broad range of Civil Engineering areas which include roadway, drainage, utilities, etc. His knowledge and experience have been gained mainly by working with the South Texas Region and its community. Areas that Mr. Salazar has served include the City of Pharr, City of Edcouch Elsa, City of Weslaco, City of Edinburg, City of McAllen, City of Brownsville, City of La Joya, San Antonio Water Supply Corporation, as well as the Counties of Hidalgo, Starr, Cameron, and Willacy.

RELATED PROJECTS

City of Pharr Improvements Project, Pharr, Texas

Mr. Salazar has applied his knowledge to various projects involving the City of Pharr. Many of these projects include utilities, existing right-of-way, assessments, and design of new street improvements for the installation of underground infrastructure within a street paved section. The recent projects completed are as follows:

* Sanitary Sewer Collection System Improvements
* Water Transmission Main Improvements
* Eldora Elevated Storage Tank / Collection System Improvements

City of Pharr NW Collection System Improvements and Lift Station Elimination Project, Pharr, Texas

Mr. Salazar is the assigned Project Manager involved in the planning and design phase of this project. Construction is due to commence in approximately 3 months. During the construction phase of the project, Mr. Salazar will be conducting the critical changes required due to unforeseen and poorly documented record drawings of existing underground infrastructure within project limits, if necessary. In addition, he will conduct construction meetings, submittal reviews, respond to Request for Information (RFI) and Request for Proposals (RFP), construction inspections, approvals of pay requests, review of charge orders, and project completion / close-out.

City of Pharr Water and Wastewater Master Plan, Pharr, Texas

This project involved the analysis of the wastewater treatment plant and collection system to assist the City in developing a capital improvement plan to meet future demands and regulatory requirements. The scope of work included analyzation of existing water and wastewater

treatment plants, the collection and distribution system. The tasks also included proposed system alignments, pipe sizing, crossing, and estimates. The completed master plan was designed for 20-year duration.

City of Pharr Wastewater Collection and Lift Station Design Project, Pharr, Texas

The project tasks included the preparation of a wastewater collection system hydraulic model and master plan, design of 23 Miles of wastewater pipelines ranging diameter from 12 inches to 36 inches, decommission 23 lift stations, and design of three (3) new lift stations ranging from 2.4 to 8 mgd. Mr. Salazar was involved during the planning, design, and construction stages of the project. Mr. Salazar conducted critical changes caused by unforeseen and poorly documented record drawings of existing underground infrastructure. Tasks also included meetings, review of submittals, responses to RFI's and RFP's, construction inspections, review and approval of pay requests, review of change orders, etc.

North McAllen WWTP Improvements and Recycle Pump Station, MPU, McAllen, Texas

The purpose of this project involved miscellaneous improvements to reliably produce Type 1 Reclaim Water with inclusion of a storage basin, effluent disk filters, chlorine disinfection, and a recycle pump station. The system was designed to filter all water from the plant and pump station designed to meet 5-mgd peak demand. Mr. Salazar conducted critical changes caused by unforeseen and poorly documented record drawings of existing underground infrastructure. Tasks also included meetings, review of submittals, responses to RFI's and RFP's, construction inspections, review and approval of pay requests, review of change orders, etc.

Hidalgo County Wide Paving and Drainage Improvements (Border Colonia Project), Hidalgo, Texas

Mr. Salazar assisted Precinct No. 1, 2, and 4 on paving and drainage projects throughout the county of Hidalgo. The scope of work involved cost estimates, review of plans, development of proposals, preparation of design and specifications. Routine visits were made to the work site in order to maintain the schedule. Weekly and monthly conferences were held in relation to each project.

Starr County Wide Paving and Drainage Improvements (Border Colonias Project), Starr, Texas

Mr. Salazar assisted the Starr County Precinct involving paving and drainage projects. Additional project tasks include design drawings for road and drainage improvements, periodic site visits for project completion tracking, weekly and monthly conferences for each related project, surveying, and quality control management. The project consisted of drainage and reconstruction of Athens Road for widening of a 24 feet cross section approximately 1 Mile long. Coordination and communication with TxDOT was necessary, as TxDOT was also reconstructing approximately 1 Mile of road tied to this project.

Hurricane Dolly Relief Program / Texas Department of Rural Affairs – Disaster Recovery (TDRA-DR) Round I & II Program – Starr, Hidalgo, Duval and Kleberg County

Mr. Salazar assisted in the designs for road and drainage improvement projects delivered under the Hurricane Dolly TDRA-DR Round I and II programs. The design provided plans and specifications, SW3P, traffic control, and surveying services needed. The project also included street replacement and drainage infrastructure improvements such as culverts, drainage channels, curb inlets, junction boxes, grated inlets, etc. Specific locations for related projects are the Balcones Height Subdivision (Penitas, TX), City of Pharr Downtown Drainage (Pharr, TX), Hutto Road Roadway Drainage (Donna, TX), Catalina Subdivision Drainage (Progreso, TX) and Vales Subdivision Drainage Channel Interceptor (Sullivan City, TX).

IH 37 Hurricane Evacuation Route Improvements, San Antonio, Texas

Mr. Salazar completed the design plans for the expansion of approximately 8 miles of IH 37. The designs included plan and profile sheets, control plans, and small / large bridge sign. TxDOT regulations and design requirements were followed and implemented.

City of San Antonio Paving and Design Improvements, San Antonio, Texas

Mr. Salazar assisted in the design plans for various COSA projects. The designs included plan and profile sheets, traffic control plans, SW3P, and existing and proposed requirements. COSA rules and regulations were implemented.

PROFESSIONAL EXPERIENCE

Mr. Perez has approximately 4 years of broad range experience in all related field of Civil Engineering which includes sewer networks, reports and construction estimates, and roadway / drainage improvements. His experience has been proudly based in the Rio Grande Valley. The agencies to have received his assistance include the City of Pharr, City of Alamo, City of San Juan, City of Donna, and Brownsville Public Utilities (BPU).

RELATED PROJECTS

Rudy's Lift Station and Force Main - Pharr, Texas

Mr. Perez is assisting with the design of this project which consists of the relocation of the lift station located next to Rudy's Country Store & Bar-B-Q and the force main. It includes the installation of approximately 4,700-lf of 10-inch pipe. The scope of work included an analysis of existing water, wastewater, and irrigation lines from as-builts to check for easements. He was consistently in contact with phone and gas companies for inquiries related to existing underground lines and is currently under design phase. The alignment starts from Eldora Road and will go north to Nolana Road on the right side of the drain ditch, it then proceeds to the east to Rudy's and connects to the newly relocated lift station.

Gravity Line and Abandonment of Lift Station #29 and #33 - Pharr, Texas

Mr. Perez is assisting in the design of this project which consists of the abandonment of two lift stations (#29 & #33) and installation of a gravity line. It includes the installation of approximately 2,900-lf of 15-inch, 1,400-lf of 18-inch, and 2,900-lf of 24-inch pipe. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with phone and gas companies for inquiries related to existing underground lines and is currently under design phase. Mr. Perez has coordinated with TxDOT / AEP for permit acquisition and crossing permit from Hidalgo County Irrigation District No. 2. (HCID No. 2). The alignment starts from Sioux Road and will go north to Eldora Road on the left side of the drain ditch, and it will switch to the right side before crossing the drain ditch (H.C.D.D No. 1) which then goes west crossing Sugar Road in between Sugar and Jackson Road it will go north to connect with lift station #29. Mr. Perez is assisting with the paving design of Eldora Road which consists of the reconstruction of the road, where gravity is going to be installed, of 2,800 linear feet. The paving of this project will commence from Allen and William Arnold Elementary School and will finish halfway between Jackson Road and Sugar Road.

City of Alamo CDBG - MIT Project - Alamo, Texas

Mr. Perez is assisting the City of Alamo in designing proposed improvements and calculating estimates corresponding to the 2015, 2016, and 2018 Texas General Land Office (TxGLO) funding applications. The City Board Members provided their assistance in selecting the most impacted areas impacted by recent flooding due to natural disasters. Based on the information gathered, certain estimates were developed respecting the grant budget. The applications' estimates consisted of the proposed drainage system, water plant improvements, street improvements, sewer improvements, and replacing existing clay lines.

WWTP Headworks Improvements - Pharr, Texas

Mr. Perez is currently assisting in the project design which requires the demolition and replacement of the existing headworks and associated lift station. It includes the redirection of the existing gravity flow mains from the City's sanitary sewer collection as well as the plant drain line to the new lift station. The scope of work includes calculating for wastewater flow projections to match the projected year 2040 plant flows, analyzing and designing new yard piping to accommodate to the upgraded headworks facility, and develop an opinion of probable construction cost (OPCC).

City of Donna CDBG-MIT Project - Donna, Texas

Mr. Perez assisted the City of Donna in designing proposed improvements and calculating estimates corresponding to the 2019 Texas General Land Office (TxGLO) Lower Rio Grande Valley Floods funding application. The City board members provided assistance in selecting the most impacted areas from recent flooding due to natural disasters. Based on the information that was gathered, certain estimates were developed respecting the grant budget. The applications' estimates consisted of proposed drainage system and sewer improvements.

I/2 – I-69C Interchange Project - Pharr, Texas

Mr. Perez provided assistance to Dragados - Pulice Joint Venture with the relocation of an existing sanitary sewer line which consisted of the abandonment of an existing 10-inch sanitary sewer line and redirected the flow to a southerly east direction. It included the installation of approximately 380-lf of 10-inch PVC sanitary sewer pipe. The scope of work included an analysis of existing water, wastewater, and drainage from as-builts. The alignment begins from the west ROW of North Cage Blvd. (I/69C) going southwest approximately 100-lf which then goes east to connect to an existing sanitary sewer manhole approximately 280-lf on E. Warren Ave.

City of Alamo Morningside South-Sewer Project - Alamo, Texas

Mr. Perez is assisting in the design of this project which consists of a new 0.31 MGD lift station, installation of a gravity line, and force main. It includes the installation of approximately 2,210-lf of 8-inch and 720-lf of 4-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies and City of Alamo Public Works personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts along Ridge Rd. and goes along Morningside South Subdivision alleys for the gravity line and East from starting point to an existing manhole in front of Mayfair Subdivision for the force main. The Lift Station will be installed in front of a proposed subdivision East of Morningside South Subdivision along Ridge Rd.

City of San Juan Lift Station No. 6 – San Juan, Texas

Mr. Perez is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 6 and installation of a gravity line. It includes the installation of approximately 1,318-lf of 24-inch and 68-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with gas companies, TXDoT, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the proposed lift station location. The force main will tie in to the existing force main located on the east side of Cesar Chavez. The Lift Station will be installed in front of a proposed subdivision (Oak Ridge Estates) and will be designed to service the majority of the north side of the City of San Juan.

Mr. Carmona has approximately 2-year experience in the Civil Engineering field and is proudly based in the Rio Grande Valley. His most recent experience includes roadway, drainage, and civil sites. Under the supervision of Mr. Salazar, P.E., Fredy has been able to deliver in Civil Engineering Design, Construction Management, Paving / Road and Drainage improvements.

Mr. Carmona's experience also includes coordination with TxDOT and County officials for successful project completion of state funded projects.

RELATED PROJECTS

City of San Juan Alta Vista Sub Water & Sanitary Sewer Improvements Project – San Juan, Texas

Mr. Carmona is currently assisting the City of San Juan in the assessment and design of the water line system and sanitary sewer collection system improvements within Alta Vista Subdivision in the City of San Juan. The scope of work consists of the installation of approximately 1,584 lf of 8" C-905 DR PVC Water Line and 2,000 lf of 8" PVC sanitary sewer line. This project also consists of site preparation, sedimentation, erosion control and pavement repairs.

City of Alamo Sanitary Sewer Improvements Project – Alamo, Texas

Mr. Carmona is currently assisting the City of Alamo in the assessment and design of a proposed sanitary sewer collection system within Bonita Estates in the City of Alamo. The proposed sanitary sewer collection system within Bonita Estates in the City of Alamo. The scope of work consists of approximately 540 lf of 12" PVC, 1,040 lf of 10" PVC, and 3,180 lf of 8" PVC of sanitary sewer line to connect to an existing sanitary sewer collection system. This project also consists of site preparation, sedimentation, erosion control and pavement repairs.

City of San Juan Sanitary Sewer Improvements Project - San Juan, Texas

Mr. Carmona successfully assisted the City of San Juan in the assessment and design for the improvements to the existing sanitary sewer line within Iowa road in the City of San Juan. The scope of work consisted of approximately 194 lf of sanitary sewer line to connect to the existing sanitary sewer collection system. This project also consisted of site preparation, sedimentation, erosion control, and pavement repairs.

CSJ# 0921-02-311 North Alamo Road - Hidalgo, County

Mr. Carmona served in the project management team that assisted Hidalgo County to oversee the realigning of FM 1925 to 0.54mi. north of FM 1925 (North Alamo Rd). The project consisted of grading, cement treated subgrade, lime treated flexible base, drainage structures, asphalt concrete pavement, signing, delineation, and pavement markings.

CSJ# 0039-19-061 IH-2 - Cameron County

Mr. Carmona assisted and coordinated with TxDOT in the project management and inspection of the milling and overlay of Interstate Highway 2. The length of the project was approximately 9 miles eastbound and westbound of IH-2 from Hidalgo and Cameron County Line to Dixie Rd. The project consisted of milling, SMA overlay, and pavement markings.

PROFESSIONAL EXPERIENCE

Mr. Alfonso Guzman has gained 2-year of experience in the Civil Engineering field which includes the areas of roadway and drainage improvements. His experience is proudly based in the Rio Grande Valley. Under the supervision of Mr. Salazar, Alfonso has the ability to successfully deliver in civil engineering design, construction management, paving / roadway and drainage improvement projects.

Mr. Guzman has successfully coordinated with agencies such as TxDOT and county officials for completion involving state funded projects.

RELATED PROJECTS

CSJ# 0916-02-024 Riviera Sidewalk Project - Kleberg County

Mr. Guzman served by designing, coordinating, and generating estimates for the TxDOT project in Kleberg County. The project consisted of designing 0.42 mile, ADA compliant sidewalk that begins at the intersection of Highway 77 & E Willow Ave, continues East through a school zone, and ends at the north intersection of S 10th St & E S Blvd. The scope of work included an analysis of the existing site to determine proper drainage and to ensure that the sidewalk would not impede any storm water. Mr. Guzman communicated and coordinated with TxDOT personnel to verify the project plans reflected their standards and generated an estimate based on TxDOT bid items.

Celedon Therapy Clinic - McAllen, Texas

Mr. Guzman served with the design and coordination of a developing therapy clinic in McAllen, Texas at the intersection of N Jackson Road and E Nolana Avenue. The scope of work consisted of grading the proposed parking lot according to city ordinances and connecting on-site utilities to existing city infrastructure. Mr. Guzman was in charge of designing a civil engineering construction set of plans to be delivered to the City of McAllen and the awarded contractor. He was also involved in coordinating with the architect city officials in order to acquire site plan approvals and start the permit process to commence construction.

Subdivision Development Feasibility Studies - Rio Grande Valley

Mr. Guzman has been in charge of completing multiple subdivision development feasibility studies in various cities along the Rio Grande Valley which include Raymondville, Edinburg, Mission, and Alamo. The process includes staying in contact with city officials to ensure the development is in accordance with city codes and infrastructure. The report is composed of detailed exhibits, engineering estimates, drainage reports, and geographic data.

Under the supervision of Mr. Salazar, P.E., Miguel has been able to deliver in Civil Engineering Design, Construction Management, Construction Staking, Topography, Paving / Road and Drainage improvements.

Mr. Mateos' experience also includes coordination with TxDOT and County officials for successful project completion of state funded projects.

RELATED PROJECTS

City of San Juan Alta Vista Subdivision Sanitary Sewer and Waterline Improvements Project – San Juan, Texas

Mr. Mateos assisted the City of San Juan in the assessment and design of the water line system and sanitary sewer collection system improvements within Alta Vista Subdivision in the City of San Juan. The scope of work consists of the installation of approximately 1,584 lf of 8" C-905 DR PVC Water Line and 2,000 lf of 8" PVC sanitary sewer line. This project also consists of site preparation, sedimentation, erosion control and 8536 sy mill and overlay.

Subdivision Development Feasibility Studies - Rio Grande Valley

Mr. Mateos has been in charge of completing multiple subdivision development feasibility studies in various cities which include Edinburg, Mission, and Alamo, Mercedes, and Bastrop. The process includes staying in contact and meeting with city officials to ensure the development is in accordance with city codes, ordinances, and infrastructure regulations. The report is composed of detailed exhibits, engineering estimates, drainage reports, and geographic data which provide all the information needed to see if a property if feasible for an investment opportunity.

City of Alamo Morningside South-Sewer Project - Alamo, Texas

Mr. Mateos is assisting in the topography and design of this project which consists of a new 0.31 MGD lift station, installation of a gravity line, and force main. The project includes the installation of approximately 2,210-lf of 8-inch and 720-lf of 4-inch force main. The scope of work includes an analysis of existing infrastructure including any water and sewer lines from as-builts. He maintains frequent contact with gas companies and City of Alamo Public Works personnel for inquiries related to existing underground lines and is currently under design phase. The alignment for this project's gravity line starts along Ridge Rd. on the Northeast corner of this subdivision and runs along the alleys. The force main runs from the new 0.31 MGD lift station to an existing manhole in front of Mayfair Subdivision.
The Lift Station will be installed in front of a proposed subdivision East of Morningside South Subdivision along Ridge Rd.

City of San Juan Lift Station No. 6 – San Juan, Texas

Mr. Mateos is assisting in the design of this project which consists of the abandonment and relocation of Lift Station No. 6 and installation of a gravity line. It includes the installation of approximately 1,318-lf of 24-inch and 68-lf of 12-inch force main. The scope of work includes an analysis of existing water and wastewater from as-builts. He maintains frequent contact with companies, TXDot, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase. The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the companies companies, TXDot, and City of San Juan Public Utilities personnel for inquiries related to existing underground lines and is currently under design phase.

The alignment starts from the existing lift station along Cesar Chavez Rd and goes South approximately 1,100-lf to the proposed lift station location. The force main will tie in to the existing force main located on the east side of Cesar Chavez. The Lift Station will be installed in front of a proposed subdivision (Oak Ridge Estates) and will be designed to service most of the North side of the City of San Juan.

City of Elsa Weaver Rd. and Parking Lot improvements

Mr. Mateos assisted with the topography and the design of this project which consisted of approximately 4300 sy of mill and overlay along Weaver Rd. He maintained frequent contact with Texas 811 and City of Elsa Public Works personnel for inquiries related to existing underground lines. The parking lot was located at the intersection of E. 4th Ave and Bowie St consisted of 128 sy of 5-in sidewalk and approximately 1400 sy of 2-in hot mix asphalt.

The force main will tie in to the existing force main located on the east side of Cesar Chavez. The Lift Station will be installed in front of a proposed subdivision (Oak Ridge Estates) and will be designed to service the majority of the north side of the City of San Juan.

City of Pharr Wastewater Collection and Lift Station Design Project, Pharr, Texas
This project included preparation of a wastewater collection system hydraulic model and masterplan, design of 23 miles of wastewater pipelines, ranging in diameter from 12 inches to 36 inches, decommissioning of 23 lift stations, and design of three new lift stations, ranging in size from 2.4 to 8-mgd. Mr. Flores was involved throughout the planning, design, and construction of the project.

City of San Juan Sgt. Leonel Trevino Sanitary Sewer Improvements Project- San Juan, Texas
Mr. Flores successfully assisted the City of San Juan in the assessment and design for the improvements to the existing force main line within Sgt. Leonel Trevino Road in the City of San Juan. The scope of work consisted or rerouting approximately 1033 LF of 6in force main to connect to the existing sanitary sewer collection system. This project also consisted of site preparation, sedimentation, erosion control, and pavement repairs. connect to the existing sanitary sewer collection system. This project also consisted of site preparation, sedimentation, erosion control, and pavement repairs.

City of Alton 2012-2014 TWDB Clean Water State Revolving Fund Project, Alton, Texas
This project included connections, collection lines, transmission lines, and upgrades to an existing lift station for a total of sixteen (16) subdivisions providing 578 connections. Mr. Flores was involved throughout the planning, design, coordinated with TxDOT with repaving, insured the contractor was on schedule.

City of Mercedes TWDB Clean Water State Revolving Fund (CWSRF) Wastewater Collection and Wastewater Treatment Plant SCADA
Mr. Flores created provided project management for rehabilitation of old, dilapidated clay sewer lines with a new technology of Cured In Place Pipe (CIPP) and rehabilitation of twenty-four (24) existing lift stations funded with a $4.3M grant from the TWDB.

Zavala County Water Control & Improvement District No.1 Wastewater Improvements Project
This project consisted of a new 0.6 MGD wastewater treatment plant and collection system, including lift stations, for a community that has never had a centralized sewer system. Mr. Flores was involved from the initial preliminary phase all the way the construction phase of the project.

McAllen Public Utilities Board-Tres Lagos Wastewater Reuse Project & 29th Street Sports Complex Wastewater Reuse Project 2016
Mr. Flores provided McAllen PUB with civil design for the proposed wastewater collection improvements project. The project consisted of abandoning the existing undersized and inadequate water lines and replace with 16-inch PVC wastewater reuse line. Their was approximately 60-70 fire hydrants and 1500 linear feet of 12-ince bore construction with 12-inch steel casing installed. This project benefited the entire area of Tres Lagos by improved facilities and the deletion of asbestos water lines currently being used.

TWDB CWSRF Project No. 73642 City of Mercedes-Sanitary Sewer Collection System Rehabilitation Project
The project consists of rehabilitation to two (2) lift stations; demolition/reconstruction of one main (1) lift station; approximately 32,000 linear feet of Cured-In-Place Piping and Pipe Bursting of old, dilapidated clay sewer lines; and manhole replacement/rehabilitation. Mr. Flores was involved from the initial preliminary phase all the way the construction phase of the project, where he assisted in on field changes from unforeseen problems.

City of Combes-Crosswind Landing Public Park & Commercial Development-Utilities & Drainage
In this project we provided City of Combes with environmental services, park and subdivision planning, Water and Wastewater Infrastructure Design, Road and Drainage Design, Planning, Construction Phase Engineering, and Inspection for Crosswind Landing Development and Loves Truck Stop Water & Sewer Improvements located in Combes, Texas: The City of Combes utilized $11M in Public Bonds Issuance in the development of the proposed development to include ten (10) commercial lots for restaurants, hotels, and retail development along I-69 Corridor. Mr. Flores assisted in providing drainage and detention for a Love's Gas Stop located adjacent to the development, including over 2000 linear feet of water and sewer infrastructure for the Love's and the Development.

Progreso International Bridge FMCSA Inspection Station Design and Water & Wastewater Facilities
As the prime designer for the Progreso International Bridge, Mr. Flores provided preliminary design for a two-bay inspection station, including underground inspection pits, catwalks for overhead inspections, metal canopy for both bays, parking, 8800 cy of 14" concrete/steel reinforced driveways and roads, administration building coordination designed by architect, for the Owners of the Progreso Bridge, General Services Administration (GSA) and the Federal Motor & Carrier Services Administration (FMCSA) for the use by US Border Patrol & US Immigrant & Customs Administration (ICE) agents for vehicular inspections of commercial trucks. The overall cost estimate of the project is $9M for construction. Bridge Administration is waiting on approval and notice to proceed from the General Services Administration. Included in the design was a new lift station for industrial site development to be utilized by the FMCSA inspection station. New 10" waterline was designed and installed which included over 15 fire hydrants.

References

Representative Projects

While TRIMAD has not previously worked with the City of Edinburg, we bring substantial experience from a variety of successful projects that demonstrate our capabilities in engineering and project management. Below are examples of relevant projects: A small sample of TRIMAD's clients and successfully executed projects, as well as projects delivered by our staff are summarized in this Statement of Qualifications. TRIMAD has provided sample projects of our past performance in accordance with the RFQ requirements, instruction and evaluation criteria for solicitation. For other related projects, please refer to the **Section 3 Team Member Qualifications and Experience under Resumes**.

Representative Projects

Alta Vista Waterline and Sanitary Sewer Improvements - City of San Juan, TX

Description and Scope of Work:

The Alta Vista Waterline and Sanitary Sewer improvements project consisted of improving the waterline system and sanitary sewer along W Texas Avenue and Standard Avenue in the City of San Juan as well as milling and overlay of W Texas Avenue and Standard Avenue. The waterline improvements required 1,584 linear feet of the new 8-inch C-905 waterline and a 41 Waterline Service connection. The sanitary sewer improvements required 2,000 linear feet of new 8-inch SDR-26 sanitary sewer line, 4 - 48-inch diameter fiberglass manholes, 2 – 48-inch diameter fiberglass manholes, and 60 sanitary sewer services. Paving improvements required 8,536 square yards of mill and 2” Hot Mix Asphalt Overlay.

Role:

Mr. Salazar provided all services related to the design of Alta Vista waterline and sanitary sewer improvements. This included civil engineering, surveying, design plans & specification bidding documents, permitting, environmental clearances, bidding documents, and construction phases services.

Project Budget:	**$1,424,406.00**
Project Owner and Contact:	**City of San Juan Juan Martinez (956)223-2000**
Project Manager/Engineer/Designer:	**Ricardo Salazar, P.E.**
Year Completed:	**In progress, expected 2024**

Representative Projects

Weaver Rd. and Parking Lot Improvements—City of Elsa, TX

Description and Scope of Work:
TRIMAD Consultants performed design, bid, and construction phase services for improvements to Weaver Ave roadway and parking lot. Mr. Salazar along with graduate engineers Jose A Perez and Freddy Carmona were assigned to this project. The project embarked on removing existing caliche and removal of biodegradable erosion control logs. It also included renovation of an existing tree. This roadway was predominately residential and approximately 32-ft wide. Valley gutters were incorporated at intersections as necessary. The project is currently in construction on Phase 2.

Role:
Mr. Salazar provided all services related to the design and construction of Weaver Rd. and Parking Lot Improvements. This included civil engineering, surveying, design plans & specifications bidding documents, permitting, environmental clearances, bidding documents, and construction phase services.

Roadway Design:

Work activities included utility conflict resolution, utility coordination, roadway design, hydrology, and hydraulics along with urban storm drain design, signing and stripping, traffic control devices, and cost estimating. Final street grades ranged from 0.5 to 1% and designed. All sidewalks and pedestrian crossing were designed in compliance with American Disabilities Act (ADA) and project traffic control devices to Texas Manual on Uniform Traffic Control Devices (TMUCD).

Mr. Salazar also provided utility design (water and sewer), developed the SW3P, and provided construction phase services. All Weaver Rd and Parking Lot Improvements is completed.

Design and Construction Mgmt.:	**$27,441.80**
Project Owner and Contact:	**City of Elsa** **Daniel Rivera** **(956)262-2127**
Project Manager/Engineer/Designer:	**Ricardo Salazar, P.E.**
Year Completed:	**2024**

Representative Projects

Sgt. Leonel Trevino Sanitary Sewer Improvements - City of San Juan, TX

Description and Scope of Work:

The Sgt. Leonel Trevino Sanitary Sewer improvements project consisted of professional engineering services and associated budget to prepare for improvements to the existing sanitary sewer collection system along Sgt. Leonel Trevino Street in the City of San Juan, Texas. This project includes the addition of approximately 1,600 L.F. of 4-inch force main, 500 L.F. of 6-inch PVC sanitary pipe, and the removal and abandonment of 2 existing sanitary sewer manholes. The scope of work included research and relevant data collection, design plans, topographic data collection, and construction phase services.

Role:

Mr. Salazar provided all services related to the design of Sgt. Leonel Trevino Sanitary Sewer Improvements. This included civil engineering, surveying, design plans & specification bidding documents, permitting, environmental clearances, bidding documents, and construction phases services.

Project Budget:	**$106,213.50**
Project Owner and Contact:	**City of San Juan Juan Martinez (956)223-2000**
Project Manager/Engineer/Designer:	**Ricardo Salazar, P.E.**
Year Completed:	**2023**

Article 1 - Entity Name and Type

The filing entity being formed is a limited liability company. The name of the entity is:

TRIMAD CONSULTANTS LLC

Article 2 – Registered Agent and Registered Office

☐ A. The initial registered agent is an organization (cannot be company named above) by the name of:

OR

☑ B. The initial registered agent is an individual resident of the state whose name is set forth below:

Name:
RICARDO SALAZAR

C. The business address of the registered agent and the registered office address is:

Street Address:
1107 ORTEGA CIRCLE ALAMO TX 78516

Consent of Registered Agent

☐ A. A copy of the consent of registered agent is attached.

OR

☑ B. The consent of the registered agent is maintained by the entity.

Article 3 - Governing Authority

☐ A. The limited liability company is to be managed by managers.

OR

☑ B. The limited liability company will not have managers. Management of the company is reserved to the members.

The names and addresses of the governing persons are set forth below:

Managing Member 1: **RICARDO SALAZAR** Title: **Managing Member**

Address: **1107 ORTEGA CIRCLE ALAMO TX, USA 78516**

Article 4 - Purpose

The purpose for which the company is organized is for the transaction of any and all lawful business for which limited liability companies may be organized under the Texas Business Organizations Code.

Supplemental Provisions / Information

[The attached addendum, if any, is incorporated herein by reference.]

Organizer

The name and address of the organizer are set forth below.

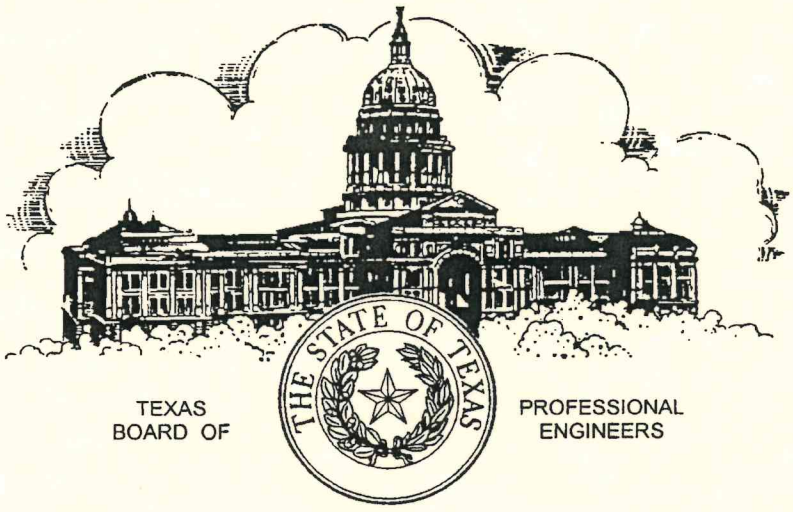
RICARDO SALAZAR **1107 ORTEGA CIRCLE, ALAMO, TX 78516**

Effectiveness of Filing

☐ A. This document becomes effective when the document is filed by the secretary of state.

OR

☑ B. This document becomes effective at a later date, which is not more than ninety (90) days from the date of its signing. The delayed effective date is: **January 1, 2017**



Execution

The undersigned affirms that the person designated as registered agent has consented to the appointment. The undersigned signs this document subject to the penalties imposed by law for the submission of a materially false or fraudulent instrument and certifies under penalty of perjury that the undersigned is authorized under the provisions of law governing the entity to execute the filing instrument.

Trinity MEP Engineering, LLC is adept in mechanical, electrical and plumbing design and would love the opportunity to provide these services to the City of Edinburg. We are knowledgeable, experienced, and aptly suited to provide the City of Edinburg a comprehensive evaluation and professional counsel that will be both constructive and advantageous to Edinburg. Trinity MEP Engineering has a proven track record of delivering similar work for various municipalities including but not limited to: Weslaco, Mercedes, Donna, Pharr, San Juan, Alamo, Edinburg, McAllen, Palmhurst, Hidalgo, Bastrop, Cotulla, Roma, Brownsville, La Feria, and Laredo.

Our firm's best attribute is that we are client centric, and we work relentlessly to fulfill our customers' specific needs. We never cut corners by delivering the same prescription for every project, instead we focus on how to best serve the needs of our client. Our focal point is giving the owner an affordable, operable, and maintainable product. By taking an approach that focuses on quality, energy and above all customer satisfaction, we are able to consistently render superior performance on every assignment.

Trinity MEP Engineering has the manpower and commitment to not only complete our scope of work but to assist the client where needed. We have a working facility that lends itself to collective team effort. Our designs consistently convey the passion we have for our work. We use the most up to date technology to place our design concepts into a set of plans that will convey effectively our design intent to the builder. At Trinity MEP Engineering, success means providing the best possible product to a satisfied client.

The City of Edinburg can trust that we will deliver on our promises. We encourage you all to contact our references to gain a thorough understanding of our capabilities. Our philosophy is to let our work speak for itself. We thank you for your time and hope you will consider Trinity MEP Engineering, LLC for your project needs.

Sincerely,

Leonardo Munoz
President / CEO
Trinity MEP Engineering, LLC

2. Statement of Qualifications:
Firm Qualification & Experience

Trinity MEP Engineering, LLC, is a HUB certified full-service engineering consulting firm located in Weslaco, Texas. We service the construction industry and provide the design for all HVAC on new construction and existing buildings in the government and private sectors.

Since its establishment in January 2008, our company has experienced strong and sustained growth. Trinity MEP Engineering began with a back room for an office, one employee, and a vision. We envisioned a strong company that would be composed of enthusiastic employees who love what they do, have access to the best technology and software, and produce first-rate work for our customers. Today our company has relocated to new full-scale office in Weslaco, Texas, and is composed of 18 valuable and eager employees. Our employees are able to handle large and smaller assignments. Our approach is to serve our customers' specific needs, regardless of the size of the project.

Trinity MEP has over 16 years of experience working with multiple school districts, city entities, and private entities. Our approach to work is one focused on quality, energy, and customer satisfaction. Through our track record, Trinity MEP Engineering has maintained an image of responsibility and success. Our designs consistently convey the passion we have for our work. At Trinity MEP Engineering, success means providing the best possible product, so our customers can be 100% confident that their needs and desires will be met.

2. Statement of Qualifications:

Firm Qualification & Experience

Trinity MEP Engineering, LLC, is a consulting firm providing mechanical, electrical, plumbing, and fire protection system design for a diversity of industries, including educational, commercial, and industrial. Our objective is to understand the vision of the architect or owner and to then design our MEP systems to operate efficiently and effectively with the building. For either business operation or residence, we receive gratification from creating a comfortable environment. Whatever the project, we aim to improve the energy efficiency as well as the longevity of the product. In all, Trinity MEP Engineering gives the client a comfortable system that is easy to understand, meets all codes, clearances, and regulations, and sustains itself for the life of the building.

Mechanical

Power transmission and distribution systems
Medium voltage switchgear
Motor Control Centers
Lightening systems
Power factor correction
Emergency power and transfer systems
Life safety protection systems
Code compliance inspections/report
Components design and rehabilitation
Emission control
Energy analysis and systems

Electrical

Light level calculations
Back-up power generators
Electronic security systems
Emergency and standby generating systems
Fire Alarm systems
Lighting design
Lightning protection
Local Area Network
Nurse Call System
Primary and secondary electrical distribution systems
Public address/Intercom System
Uninterruptible power systems

Plumbing

Domestic water distribution system
Boiler systems
Hot water heating systems
Hot water recirculation systems
Reverse osmosis systems
Compressed air systems(pneumatic)
Chemical Sanitary and Vacuum waste systems
Condensate piping
Laboratory waste systems
Process waste systems
Grease and oil waste systems
Sediment and sand traps systems

2. Firm Qualification & Experience Cont.

MEP (Mechanical, Electrical, and Plumbing) and Energy Management Engineering Services:
1. Develop complete turnkey construction documents, including all necessary MEP and Energy Management systems engineering design plans and specifications and construction documents for all district-wide construction and general maintenance projects that may be required at any school campus, athletic facilities or administrative support service facilities.

2. Provide on-site project supervision, inspection, and full contract administration services by a Licensed Engineer (in the State of Texas), of all district-wide MEP engineering-related construction and general maintenance projects as required. Daily inspections and observations of project sites by a Licensed Engineer will be required.

3. Conduct MEP engineering designs, feasibility studies, commissioning, assessments, analysis, and evaluations of facilities' MEP systems and provide recommendations and construction documents as required.

4. Conduct building feasibility and/or commissioning studies of MEP and Energy Management facilities operating systems, energy engineering audits and investigation studies and reports, forensic engineering investigations and reports, systems evaluation and design, instrumentation and control analysis and reports, electrical power analysis and design, lighting design, electrical controls and design, and all electrical systems and components upgrades and retrofits as required.

5. Develop MEP and Energy facilities master planning, evaluation and design studies and reports for school campuses, athletic facilities, or administrative support service facilities as required for HVAC, electrical, plumbing and energy management systems.

6. DESIGN ELECTRIC CONTROLS AS REQUIRED FOR ANY CONSTRUCTION OR MAINTENANCE PROJECT.

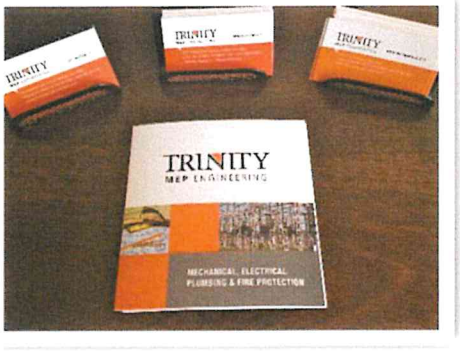
Construction Administration

At Trinity Engineering, LLC, our professional engineers and project managers oversee construction administration for all Trinity projects, providing on-site quality control throughout the project. Our construction administration services ensure that your project meets or exceeds all local standards and regulations.

We perform key construction-phase activities including responding to requests for information, managing change order and submittal reviews, and scheduling site visits and review meeting.

2. Firm Qualification & Experience Cont.

Customer Satisfaction



Our gratification comes from a satisfied customer...

At Trinity Engineering, LLC, our gratification derives from satisfying our customers, of which we have two types: design architects and owner direct customers. The owner wants an affordable, maintainable, and operable system: the architect wants a design that complements his or her building. Both want the project to be done well and in a timely manner.

At Trinity MEP Engineering, we satisfy the needs of all our customers. Our designs meet the clients' desires as well as ensure logical thought and efficiency in the product. We provide design plans and specifications that are clear, thus minimizing Requests for Information.

Whether architects or owners, customers can expect to receive a quality product, one that results from time, design experience, and expertise.

Pledge of Excellence

Those of us at Trinity MEP Engineering, LLC, strive to produce excellent quality work in a timely manner that corresponds to the expectations of our clients. With passion and enthusiasm, we look forward to every project, big or small. Our goal is to merit the business and esteem of our clients and build strong relationships for many years to come.

More specifically, within the last 2 years, Trinity MEP Engineering, LLC, has met the MEP needs of various governmental agencies including but not limited to: The City of Edinburg, City of Mercedes, City of Laredo, the City of Mission.

BIOGRAPHY

Leo was raised in Sullivan City, Texas. Born into a migrant family, he spent months traveling to northern states to harvest crops with his family. From a young age, he served as an integral part in his family's economic survival. Leo attributes his past for
shaping him into the person he is today: driven, hardworking, and self-assured. It is with the aid of the lessons from his past that he earned a B.S. in Mechanical Engineering from the University of Texas at Austin and ultimately established Trinity MEP Engineering. Leo has accrued more than 21 years of professional practice in South Texas as a Mechanical Engineer.

Leonardo Munoz, PE, RME, is the CEO and owner of Trinity MEP Engineering, LLC. He distinguishes himself from most of the industry's engineers in the breadth of his expertise on all mechanical, electrical, plumbing, and fire protection trades. The dedicated CEO plays an extensive role in overseeing each area of the company – coordinating all aspects of projects, running day-to-day operations, and spending a sizable amount of time meeting with clients to provide the upmost satisfaction.

His role is meeting with clients to define the project school of work, assigning work to his project managers, reviewing work completed with staff and owner, and setting a schedule for project milestone and final delivery. He has been with the company for thirteen years.

Wilford L. McGee III, PE, is the Principal Mechanical Engineer for Trinity MEP Engineering. His professional duties are to design mechanical systems, manage projects within our office from inception to completion, assign duties to all his subordinates, review all work as it's being designed, and follow through with construction administration.

Throughout most of his professional workday, he manages to perform his duties while always striving to educate himself and office staff on new product lines and seeks continuing education on all aspects of engineering design system.

Wilford McGee has been with Trinity MEP Engineering since 2009 and has worked on a series of GSA projects. His most recent project was the renovation work to the existing Harlingen Border Patrol Station in Harlingen, Texas. The challenge posed by this project was to remodel the existing facility while always maintaining the building functional. Strategic planning was key for laying out the mechanical system required to meet the objective.

Wilford McGee is determined to educate owners on the best types of mechanical designs and systems based on the owner's needs, occupant classifications, as well as resources available to the end user. These factors are considered to evaluate what type of HVAC system best meets the intended application.

Developing our employees' expertise

Trinity MEP Engineering, LLC is a strong company composed of enthusiastic employees who love what they do, have access to the best technology and software and produce first-rate work for customers. Today our company is composed of 18 valuable and eager employees. Youth and high energy distinguish us from other MEP firms, as we can work quickly and efficiently to have a fast turnaround when need be.

Trinity MEP Engineering is dedicated to providing our personnel with all necessary tools and equipment, including the most current software, technology, and certifications to work at their best. Our long-term goal is to grow into a 20-engineer company, to provide our customers with the highest expertise. As a step towards achieving our goal, we aim to constantly develop our talent. Presently, our personnel are in the process of acquiring various certifications.

3. Team Member Qualifications and Experience Cont.
In House Professionals

Edgar Limon
Mechanical Designer

Edgar Limon is a South Texas College graduate with an associate degree in Architectural Drafting in 2011. Previously worked in Structural, Milwork, Civil Architectural and now Mechanical Designer. Some duties are compiling HVAC analysis reports, designing, and drafting HVAC layouts and coordinating with vendors for mechanical equipment selection.

Notable Project Experience
Del Rio Elementary, E-Bridge, Harlingen Border Patrol, Well Med Clinics, Tru Fit, LISD Pac/Administration Complex, Evergreen, Webb County Detox

Cesar Garcia
Mechanical Designer

Cesar Garcia is a University of Texas at Brownsville graduate. He has a bachelor's degree in engineering physics with a specialty in Mechanical Engineering. Some of his duties include Project Management, HVAC analysis reports, generating Com-checks, designing, and drafting HVAC systems and coordinates with vendors for mechanical equipment selections.

Notable Project Experience

Webb County Administration Building, LBJ Middle School, Plains Capital Bank, Well Med Clinics, Dental Clinics, Horizon Montessori Public Schools, Affordable Attics, Knapp Pharmacy, Tru Fit Athletics Clubs, STC campuses, beauty/nail salons, barber shops, meat markets, Jimmy, Johns, Kith Chiropractic, Edinburg ACE Building.

Jose Garcia
Mechanical Designer

Jose Garcia is new to Trinity Engineering as he started in February of 2023. His responsibilities include designing and drafting as well as designing HVAC systems.

Notable Project Experience
WISD Elementary Schools, Well Med Clinic, Trufit Athletic Club, F.I.T Lab Fitness, Affordable Attic, Rooms for More, GSA US DOT, Sames Super Center, Kumori Restaurant, Subway, and El Pato

Caleb Givilancz
MECHANICAL DESIGNER

Caleb Givilancz graduated with an associate degree in aviation science generals, Airframe, and Powerplant from Texas State Technical College. He started in May of 2022 and is currently working with the mechanical design team at Trinity MEP engineering. Responsibilities range from basic loads calculation and mechanical design drafting.

Notable Project Experience: The Webb County Fairgrounds arena building in Laredo, TX; Multiple Tru-Fit gym's and Well-Med clinics.

3. Team Member Qualifications and Experience Cont.
In House Professionals

Jessica Alacron
Electrical Designer

Jessica graduated from The University of Texas Rio Grande Valley with a bachelor's degree in civil engineering and is currently working on the electrical design team at Trinity MEP engineering. Responsibilities range from designing and drafting construction document set, generating com-checks, photometrics.

Notable Project experience: Boys & Girls Club in San Juan, TX, Weslaco FM 88 Plaza in Weslaco, TX, Anita's Tortilleria in Brownsville, TX, Laredo Logistics, and Multiple Tru-Fit Gyms and Apartments.

Sergio Castillo
Electrical Engineer

Sergio Castillo is a graduate of STC. He has 9 years of experience as an electrical designer. Some of his duties include developing accurate and precise product designs, complying with recognized drafting standards, company practices, policies, and procedures.

Notable Project Experience
New Brownsville Academic Center, Mercedes El Norte Subdivision, La Feria Elementary School, McAllen Laurel Electrical Service, Edinburg Arts, Culture & Event ACE Center, STISD Rising Scholars Academy, STC Starr County Campus - Welding Lab Expansion, United ISD- Ruiz Elementary School Renovations

Enoch Gonzalez
Electrical Designer

Enoch Gonzalez graduated with honors from the South Texas College, Architectural and Engineering Design Technology program and is currently working on the electrical design team at Trinity MEP engineering. Responsibilities range from basic design development to completed construction document set.

Notable project experience: The Casa Verde mixed-occupancy building in Laredo, TX, The Euclid St. residential in San Antonio TX., the Linn-San Manuel Veterans Park in Edinburg, TX., Multiple Tru-Fit gym, Well-Med clinic, and Affordable Attic projects.

Melissa Perez
Electrical Designer

Melissa joined the Trinity MEP team in late April of 2024. She is certified in HVAC/R from South Texas College, has her Universal EPA Certification and is currently working on her Associates. She has 5 years of PSM experience in the HVAC/R industry as an Ammonia Refrigeration Operator/Tech. She has been drafting in AutoCAD since 1999. Working on projects ranging from remodels, new floor plans, elevations, plot plans, and windstorm plans for commercial, industrial, and residential properties.

Notable project experience: Mechanical Integrity for Shintech Freeport, TX

3. Team Member Qualifications and Experience Cont.
In House Professionals

Jesus Venegas
Plumbing Designer

Jesus Venegas is a South Texas College Graduate. He has over 12 years of experience. Some of his duties include drafting plumbing and fire protection systems in AutoCAD and Revit, project setups & inspecting projects, meeting company BIM standards from initial startup to the final construction of documents delivered, preparing ComChecks, provision BIM solutions assistance to MEP project.

Notable Project Experience
South Texas ISD Rising Scholars Academy, South Texas Veterinary Ophthalmology STVO, JEEP Dealership, Mercedes Police Department, Valley Food Bank, Schlitterbahn, Santana Textiles, DPS McAllen.

Juan Gonzalez
Plumbing Designer

Juan Gonzalez is a South Texas College graduate. He has 18 years of experience as a drafter with the last 10 years of plumbing experience. Some of his duties include plumbing systems design for commercial and industrial facilities and equipment selection.

Notable Project Experience
Zapata Museum, Weslaco Airport, La Feria Elementary, Sam Houston Elementary, Sacred Heart Church, PSJA Stadium Renovations, Progresso Technology Building, King Ranch Hunting Lodge.

Jorge A. Garza
Plumbing Designer

Jorge Garza, Marine Corps veteran, earned an Architectural and Engineering Design Technology Certificate from South Texas College. He has been with Trinity Engineering since May 2022. His current responsibilities include Designing & Drafting plumbing and fire protection plans using CAD or Revit, communicating tasks with project managers, input information to ComCheck reports, and running calculations for water demands, gas demands, and sewer drainage.

Notable project experience: Volvo Mack Laredo Dealership, Palmhurst City Hall, St. Charles Restaurant, Mercury Warehouse, TruFit, Murfreesboro, TN

Noe Martinez
CAD/ Revit BIM Technician

Noe Martinez is a South Texas College Graduate with an associate degree in Precision Manufacturing Technology. He began with Trinity MEP in April of 2022. His responsibilities include new project clean and set up, project updates and creating MEP PDF documents as advances are made in projects timeline.

Flow Chart – Roles

If awarded the Services Contract for this RFQ Trinity MEP Engineering will be working as a Prime Firm to provide the mechanical, electrical, and plumbing design for projects. Trinity Engineering Is committed to provide 100% of our time and attention to this project to meet the scheduled milestones.

Currently, Trinity employees are working relentlessly to fulfill our customers' specific needs. As engineers, we do not issue the same prescription for every project. We feel for our customer's needs and focus on giving the owner an affordable, operable, and maintainable product. Every project design is catered to the owner's maintenance level needs at Trinity MEP Engineering.

The individuals assigned to the project will be committed for the entire duration of the project.

Recent Work:

1. Project: Edinburg Arts & Cultural Event Center
   Project Owner: City of Edinburg
   Point of Contact: Brian Godinez, ERO ARCHITECTS
   Phone #: 956-655-4655
   Brief Description:
   Provided mechanical, electrical, and plumbing engineering design and specifications for a new 45,000 SF facility. Facility will serve as a downtown venue to host local conferences, cultural art exhibits, live performances, classes and community events. The overall budget of this facility was $14 Millon. Our design consisted of the following:

   - **Mechanical Design**
     - **Heating and Cooling Loads for the facility / "Manual "J" Calculations"**
     - **HVAC design and engineered construction documents for the project inclusive of all mechanical equipment selection "Manual S", ductwork sizing, ductwork accessories, piping, and equipment controls. Design shall conform to the Mechanical Code adopted by the local municipality.**
   - **Electrical Design**
     - **Electrical design and engineered construction documents for the project inclusive of building interior and site lighting, data and special systems rough-ins, general power distribution, equipment power connections, & electrical service size and power demand load calculation. Design shall conform to the National Electrical Code as adopted by the local municipality.**
   - **Plumbing Design**
     - **Plumbing design and engineered construction documents, in 2D and isometrics, for the project inclusive of all work to 5 feet outside the foundation for the sanitary / vent / water / condensate, plumbing fixtures, piping accessories. Design shall conform to the Plumbing & Gas Codes as adopted by the local municipality.**
   - **Energy Conservation Report (ComCheck) for the Mechanical Equipment, Lighting System, and Water Heaters.**

FY 23-24 Budget Amendment Notes

The budget amendments in the following pages were presented to the Edinburg Economic Development Corporation Board of Directors on June 3, 2024 and also on June 25, 2024 and approved at those meetings by the Board. The request is for the City Council to approve the amendments as presented as well.

Revenues:

Sales tax revenues for this fiscal year were projected to be $9,725,676 at the time the budget was prepared last year. We understood that the number was aggressive, but given that we had 12% growth for the 2 years prior to last year and a solid 5% growth last year versus the previous years, we thought it would be a good number to use. Sales tax growth is still at a good pace, but not quite as expected, so we adjusted this year's projections by approximately $225,000 less to $9,500,000.

Sale of EEDC property was projected to be approximately $2.19M based on negotiations at the time of the budget process. We adjusted that projection down by approximately $400,000 because we had one prospect that is not quite ready to commit. We are still projecting land sales in excess of $1.7M for this fiscal year.

Miscellaneous revenue of $12,500 was added because we received that amount from The City of Edinburg as a reimbursement for a shared cost for appraisal services.

We also have **transfers from Reserves and from bond reserves** to allow for us to pay for some bond construction activity and for projects that were not in the budget at the time of adoption.

Total increase in revenues was mostly due to the funds transfers for bond activity and for special projects outlined in the expense line items below.

Expenditures:

Administrative services expenses were adjusted mostly down for various reasons. **Personnel** expenses are projected to be less because we have not filled two positions and had a recent new hire come online later than anticipated. When salaries are reduced in the budget, the associated expenditures such as taxes, retirement, insurance, and other line items listed are also reduced. Personnel expenses are being adjusted down by $202,971.

We have also adjusted **Contractual Services** down by $14,820. Of those, professional services are being reduced by $26,000 and office space is being increased by $11,180 to account for expanded space for

new personnel and also for a longer lease as the space at the terminal bus building is not finished out yet.

The **Supplies & Equipment** group of expenses is being reduced by $171,000 total. Much of that is due to holding back on some expenditures which were related to new office space which has yet to be delivered, and also again, deferring traveling to trainings and some conferences because we have limited staff and have prioritized local projects such as FLIP.

Total **Administrative Services** adjustment was a $388,791 reduction in expenditures.

The **Programs, Properties & Projects** group of expenditures was adjusted by an increase of $19,850,488. We projected in this budget amendment the reduction of $60,000 in the **Programs** group of expenses, specifically in the **Research, Studies, other Contracts** line item because we obtained better pricing on the cost of a strategic plan and the Airport Master Plan. We have increased the **Properties** group of expenses to account for the projected expenses with building an extension to Democracy Drive and related infrastructure in the replatting of 25 acres at North Industrial Park and also a decrease in the expected purchase of property. The **Projects** group has a net increase of $13,072,022 due to our participation in City projects listed in the attachment.

At the time of the original budget adoption, we did not project any expenditures for the ACE building or the Municipal Water Park. We did project an expenditure for the Workforce Resource Center. The budget amendment considers the EEDC's participation in both the ACE and water park projects by adding $8,000,000 from bond proceeds for those projects and taking out the $1.84M set aside for the Workforce Resource Center and leaving it back in our bond reserves. Thus, our net increase in **bond projects** expenses is $6.16M.

Re: 2024 CITY OF EDINBURG Anticipated Collection Rate
And Excess 2023 Debt Tax Collections

Dear Mr/s. ALONZO:

As you are aware, a taxing unit that levies a Debt Tax must consider anticipated collections in calculating the debt component of its Rollback Tax Rate. The collector must certify the above mentioned in addition to excess Debt Tax Collections for the year 2023 to the governing body.

Certification

This is to certify that the Estimated Collection Rate for the year 2024 has been projected at the 100% rate.

Also, the 2023 Estimated Collection Rate was projected at 100% and consequently no excess Debt Tax Collections are to be reported in Schedule "B", 2023 Debt Service Report.

Sincerely,

Pablo (Paul) Villarreal Jr., PCC

Encl.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
APPOINTMENTS
Agenda Item No: 13.A.
Appointments

1. **Agenda Item:**
Consider Appointments to the Following City Advisory Board, Council, Commission and Committee: Zoning Board of Adjustment, One Member. [Clarice Y. Balderas, City Secretary]

2. **Description:**
City staff is presenting the following Appointments to the City Advisory Board, Council, Commission and Committee for consideration:

Zoning Board of Adjustment (1 member)- Function: The Zoning Board of Adjustment hears and decides appeals where it is alleged there is error of law in any order, requirement, decision, or determination made by the Building Inspector. The Board of Commissioners may from time to time amend, supplement or change by ordinance the boundaries of the districts or the regulations herein established.

Present Member(s): Marc Moran, Resigned

Applicant(s): Omar Govea, Nancy Ramirez

CHAPTER 32: BOARDS, COUNCILS, COMMISSIONS AND COMMITTEES
Sec. 32.01 – Residence or tax paying status requirements for membership.

1. Unless otherwise provided for, all members of boards, councils, commissions, and committees appointed by the Mayor and/or City Council pursuant to provisions of the charter and ordinances and resolutions of the city shall be residents of the city or nonresident tax-paying property owners of the city but residing within the extraterritorial jurisdiction of the city.
2. Unless otherwise provided for, any member of a board, council, commission, or committee who, after such member's appointment, shall change such member's residence of property status so that such member does not comply with either of the qualifications set out above shall be deemed to have resigned from such board, council, commission, or committee.

Sec. 32.02 – Appointment of members; filling vacancy.

1. Unless otherwise provided by federal law, state law, the city charter, or city ordinance, all appointments to boards, councils, commissions, and committees shall be made by the City Council.
2. Unless otherwise provided by federal law, state law, the city charter, or city ordinance, and except for the Edinburg Economic Development Corporation and Civil Service Commission, all appointments to boards, councils, commissions, and committees shall serve two-year terms with no limits on the number of terms they may serve. Board members whose two-year term has ended may continue to serve until a replacement has been appointed.
3. Any vacancy, for whatever reason, of membership of any board, council, commission, or

committee shall be filled by the Mayor and/or City Council in the same manner as the original appointment. Unless otherwise provided for, rather than serve out only the unexpired term of the vacant position, all appointees to fill vacancies shall begin a new, full term upon appointment.

Board Members are required to attend not less than 3/4 of the meetings scheduled; a vacancy is created if a member is absent three consecutive meetings, unless specifically excused at the following meeting for purposes authorized by Resolution.

All appointments to the City Advisory Boards and Committees are at the discretion of the City Council. The City Council may choose from the list of applicants or appoint a resident meeting the requirements for membership.

3. Staff's Recommendation:

Approve Appointments to the Following City Advisory Board, Council, Commission and Committee: Zoning Board of Adjustment, One Member.

Agenda Item No: 14.A.
Interlocal Agreement - Sharyland Water Supply Corporation

1. **Agenda Item:**
Consider Authorizing the City Manager to Enter Into an Interlocal Agreement with Sharyland Water Supply Corporation to Provide Water Services to the Woodlands at Jackson Subdivision and Execute all Documents Relating Thereto. [Gerardo Carmona Jr, P.E., Director of Utilities]

2. **Description:**
This agreement will allow the Woodlands at Jackson Subdivision to connect to the City's water main on a temporary basis until Sharyland Water Supply Corporation (SWSC) extends a water main sized to support the fire hydrants on the property. After the construction is complete, the water line shall become the property of SWSC and the fire hydrants shall become the property of the City. In addition, SWSC will pay the City on a monthly basis for the water used by the Woodlands at Jackson Subdivision at the current City water rates.

3. **Staff's Recommendation:**
Approve Authorizing the City Manager to Enter Into an Interlocal Agreement with Sharyland Water Supply Corporation to provide water services to the Woodlands at Jackson Subdivision and Execute all Documents Relating to Thereto.

A. Interlocal Agreement

INTERLOCAL AGREEMENT BETWEEN SHARYLAND WATER SUPPLY CORPORATION AND THE CITY OF EDINBURG, TEXAS

Sharyland Water Supply Corporation ("SWSC"), whose address is P. O. Box 1868, Mission, Hidalgo County, Texas 78573, and the City of Edinburg, Texas ("City"), whose address is 415 W. University Drive, Edinburg, Hidalgo County, Texas 78539, in consideration of the mutual promises contained herein and no other, hereby agree as follows:

WHEREAS, SWSC holds Certificate of Convenience and Necessity ("CCN") No. 10558;

WHEREAS, SWSC has a water distribution system designed for potable water distribution to rural communities;

WHEREAS, SWSC's system was not designed specifically with the intent to provide water for fire suppression purposes;

WHEREAS, land described as a 4.00 acre tract of land out of Lot 4, Section Texas-Mexican Railway Company's Survey, Hidalgo County, Texas, as per map recorded in Volume 1, Page 12, Map Records of Hidalgo County, Texas, also known as The Woodlands at Jackson Subdivision, ("Property") is located within SWSC's CCN area (Exhibit "A");

WHEREAS, Marco Santivanez is the owner of the Property ("Owner") and is developing multi-family housing on the Property;

WHEREAS, the City requires that fire hydrants be installed on the Property;

WHEREAS, SWSC's system is not currently capable of supporting the fire hydrants on the Property;

WHEREAS, City has a water main nearby;

WHEREAS, City is willing to allow the Owner to connect the subdivision to the water main on a temporary basis until such time as SWSC extends a water main sized to support the fire hydrants on the Property;

WHEREAS, Owner has agreed to install fire hydrants and construct a water line to the City's water main pursuant to SWSC's standards and as shown in Exhibit "A";

WHEREAS, the water line shall become the property of SWSC;

WHEREAS, SWSC will coordinate with City for the connection of the water line to City's water main;

WHEREAS, the City, Owner, and SWSC will execute a Waterline Access Agreement for the Property;

WHEREAS, SWSC agrees that it will not supply any potable water from the City water main outside of this agreement; and

WHEREAS, SWSC will provide sixty (60) days advance notice to City of its intent to disconnect its water line from the City's water main.

NOW THEREFORE, in consideration of the recitals and covenants contained herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by the parties, SWSC and City agree as follows:

I. City shall provide potable water service to the Property on a temporary basis, conditioned upon Owner's payment of all required fees to SWSC, and completion of the construction of all required infrastructure.

II. City agrees that it will not supply any potable water service to the Owner outside of this agreement. SWSC agrees that City will not supply SWSC any potable water service outside of this agreement.

III. City shall allow Owner to connect to its water main via a water line, on a temporary basis and only until such time as SWSC extends a water main sufficient in size to support the provision of potable water to customers within Owner's property as well as operation of the fire hydrants.

IV. Owner shall be responsible for the installation of the water line from the Property to the City's water main and shall install such water line pursuant to City's standards in addition to SWSC's standards.

V. Upon completion of its installation, the fire hydrant shall become the property of the City and the water line shall become the property of SWSC.

VI. SWSC will coordinate with the City for the connection of the water line to City's water main.

VII. SWSC agrees that the City must be present during all testing and that SWSC will share the test results of the water mains and fire hydrants with the City.

VIII. SWSC agrees to bill its customers within the Property ("Customers") at the City's then-current monthly water rates for properties located inside its City limits (i.e.

the rates in effect at the time of water usage) and to pay the City of Edinburg for the water usage for each Customer, as follows:

a. During the term of this Agreement, City shall notify SWSC in writing of any changes to the monthly water rates.
b. City understands and acknowledges that upon SWSC's receipt of payments due to the City from Customers for monthly water services, SWSC will deposit such sums in an account in SWSC's depository bank, commingled with payments made for SWSC's water utility services. All funds due to the City shall be forwarded to City no less frequently than once a month.
c. SWSC agrees to provide monthly meter readings for each of the Customers as proof of water usage for City's review and approval.
d. SWSC agrees to use its best efforts to collect amounts due to City from Customers within the Property and shall not provide water service to Customers owing delinquent charges until SWSC has received payment of all such delinquent charges from said Customers.

IX. This Agreement shall remain in effect until SWSC has constructed infrastructure sufficient to provide fire protection water service to the Property and has given the City sixty (60) days advance notice of SWSC's intent to disconnect its water line from the City's water main.

X. This Agreement contains the entire agreement between the parties with respect to the rights granted and obligations assumed by the parties hereto. Any oral representations or modifications concerning this instrument shall be of no force or effect unless contained in a subsequent writing signed by the party to be charged.

XI. This Agreement has been approved by the appropriate bodies of SWSC and City as evidenced by copies of the resolutions and/or minutes of the governing bodies of each, attached hereto as Exhibits "B" and "C" respectively, which have been executed by the appropriate officers thereof.

EXHIBIT “A” – MAP OF THE WOODLANDS AT JACKSON SUBDIVISION

GENERAL NOTES:

SUBDIVISION LOTS ARE DESIGNED FOR RESIDENTIAL

1. PROPOSED SETBACKS FOR AUTO-URBAN RESIDENTIAL ZONED LOTS AS PER THE FOLLOWING:

FRONT	20' OR GREATER FOR EASEMENTS
REAR	20' OR GREATER FOR EASEMENTS
SIDE	06' OR GREATER FOR EASEMENTS
FRONT CUL-DE-SAC	15' OR GREATER FOR EASEMENTS
REAR CUL-DE-SAC	15' OR GREATER FOR EASEMENTS
SIDE CORNER	10' OR GREATER FOR EASEMENTS
SIDE CORNER GARAGE	18' OR GREATER FOR EASEMENTS

2. MINIMUM PERMISSIBLE FINISHED FLOOR ELEVATION: 24" ABOVE TOP OF CURB MEASURED AT FRONT OF EACH LOT.

3. THE SUBDIVISION IS IN ZONE X-SHADED"; AREAS OF 500-YEAR FLOOD; AREAS OF 100-YEAR FLOOD WITH AVERAGE DEPTHS OF LESS THAN 1 FOOT OR WITH DRAINAGE AREAS LESS THAN 1 SQUARE MILE; AND AREAS PROTECTED BY LEVEES FROM 100-YEAR FLOOD, IN ACCORDANCE WITH F.E.M.A. COMMUNITY FIRM MAP NO. 480338 0030 E, MAP REVISED JUNE 06, 2000.

4. BENCHMARK: 96.00 NAIL ON POWER POLE FOUND SOUTH WEST CORNER OF PROPOSED SUBDIVISION. NAVD 88 DATUM. LAT 26.322537°N LON -98.182958° E

5. NO PERMANENT STRUCTURES SHALL BE ALLOWED WITHIN UTILITY EASEMENTS, GAS EASEMENTS, IRRIGATION EASEMENTS, LOT LINES.

6. TOTAL VOLUME REQUIRED TO DETAIN 0.65 AC-FT (28,099 C.F.) OF STORM RUNOFF AS PER APPROVED DRAINAGE REPORT FOR THE WOODLAND AT JACKSON SUBDIVISION.

7. NO ACCESS TO LOT 1 FROM JACKSON ROAD IS ALLOWED.

8. A FIVE (5.0) FOOT SIDEWALK FIVE (5.0) FEET BEHIND THE BACK OF CURB IS REQUIRED ALONG MON MACK RD. AND BOTH SIDES OF INTERIOR STREET. SIDEWALKS TO BE CONSTRUCTED AT BUILDING PERMIT STAGE, INCLUDING HANDICAP RAMPS IN COMPLIANCE WITH ADA STANDARDS.

9. ALL CONSTRUCTION SHALL COMPLY WITH STORMWATER POLLUTION PREVENTION PLAN (SW3P REQUIREMENTS).

10. SET NO 4 IRON REBAR ON ALL PROPOSED LOT CORNERS

11. PROPERTY ZONING IS MULTIFAMILY

12. A SEPARATE PERMIT IS REQUIRED FOR SIDEWALKS DURING BUILDING PERMIT STAGE FOR RESIDENTIAL USE.

13. 50% OF PERCENT OF THE PARKLAND FEE WILL BE REQUIRED AT BUILDING PERMIT STAGE $300.00

14. NO CEDAR FENCE OR BLOCK SHALL BE ALLOWED ON FRONT OF LOTS – (OPAQUE)

15. ALL LOTS MUST HAVE 1 % GRADE FROM REAR OF LOT TO STREET TO PROVIDE POSITIVE DRAINAGE.

16. DRAINAGE DETENTION AREA "A" SHALL BE USED FOR THE PURPOSES OF DRAINAGE DETENTION FOR WOODLAND AT JACKSON SUBDIVISION ONLY AND CANNOT BE EXCHANGED FOR OWNERSHIP; MUST BE FURNISHED AND MAINTAINED BY THE SUBDIVISION DEVELOPER UNTIL HOA IS ESTABLISHED.

EXHIBIT “B” – SHARYLAND WATER SUPPLY CORPORATION MINUTES AND/OR RESOLUTION APPROVING INTERLOCAL AGREEMENT

MINUTES OF THE REGULAR BOARD MEETING OF SHARYLAND WATER SUPPLY CORPORATION JULY 18, 2024

The Board of Directors, staff and attendees were present at the Corporation Business Office located at 321 S. Shary Blvd., Alton, Tx, 78573.

AGENDA ITEM 1: Call to Order:

Vice President Smith called the meeting to order at 6:30 p.m.

AGENDA ITEM 2: Pledge of Allegiance

Vice President Smith led those present in the pledge of allegiance.

AGENDA ITEM 3: Confirm Posted Meeting Notice and Establish Quorum:

Manager Lima confirmed the meeting was properly posted and the Directors present acknowledged their attendance and quorum was established.

Directors Present:

Vice President Andrew H. Smith III, Secretary-Treasurer Mark A. Moseley, Mario Reyna, Isidro Quintero, and Ruben Alaniz.

Directors Absent:

President M. Danny Sosebee and Lisa B. Helle.

Also Present:

Carlos R. Lima, General Manager, Jose G. Ibarra, James Johnson, Gerardo Gracia, Gerardo Aguilera, Ana Castro and Sandra Gonzalez, Staff, Richard Fryer (Attorney), Fryer and Hansen, LLC, Rebecca Morrison, SDI Engineering.

AGENDA ITEM 4: Welcome Visitors:

Jane Cross, Member.

AGENDA ITEM 5: Public Comments:

Jane Cross, SWSC Member provided public comments with regards to fire meter monthly fees. She proceeded to state that the fire meter monthly fee was not justified for the non-existent or minimal water consumption through the meter. The General Manager agreed with the Board of Directors that SWSC will reevaluate existing fees and provide an update at a later time.

AGENDA ITEM 6: Approve June 2024 Regular Meeting Minutes

Director Reyna made a motion to approve the June 2024 Regular Meeting Minutes. Director

Quintero seconded the motion. All present voted "aye". The motion passed unanimously.

AGENDA ITEM 7: Status Reports and Possible Action on:

A. TxDOT Waterline Improvement Projects

Rebecca Morrison, SDI Engineering, provided a brief update on all the TxDOT Projects. No Action Taken.

AGENDA ITEM 8: Consider and Approve Change Order #1- Reconciliation for FM 676 (Mile 5): Taylor Rd to Ware Rd (ROW CSJ No: 1064-01-047) Infrastructure Relocation Project in the Decreased Amount of $132,351.91

Director Quintero made a motion to Approve Change Order #1- Reconciliation for FM 676 (Mile 5): Taylor Rd to Ware Rd (ROW CSJ No: 1064-01-047) Infrastructure Relocation Project in the Decreased Amount of $132,351.91. Director Alaniz seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 9: Consider and Possibly Approve FM 676 (Mile 5): Taylor Rd to Ware Rd (ROW CSJ No: 1064-01-047) Infrastructure Relocation Project Completion

Director Reyna made a motion to Approve FM 676 (Mile 5): Taylor Rd to Ware Rd (ROW CSJ No: 1064-01-047) Infrastructure Relocation Project Completion. Director Alaniz seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 10: Consider and Possibly Approve FM 494 (Shary Rd): Mile 5 to Mile 7 (ROW CSJ No: 0862-01-072) Infrastructure Relocation Project Completion

Director Quintero made a motion to Approve FM 494 (Shary Rd): Mile 5 to Mile 7 (ROW CSJ No: 0862-01-072) Infrastructure Relocation Project Completion. Director Reyna seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 11: Consider and Possibly Approve WTP #1 Reservoir Relocation Project Completion

Director Alaniz made a motion to Approve WTP #1 Reservoir Relocation Project Completion. Secretary-Treasurer Moseley seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 12: Consider and Possibly Approve Interlocal Agreement Between SWSC and City of Edinburg for the Woodlands at Jackson Subdivision

Secretary-Treasurer Moseley made a motion to Approve an Interlocal Agreement Between SWSC and City of Edinburg for the Woodlands at Jackson Subdivision. Director Alaniz seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 13: Consider and Possibly Approve SWSC Mid-year Operating Budget Amendment

Director Reyna made a motion to Approve SWSC Mid-year Operating Budget Amendment. Director Quintero seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 14: Consider and Possibly Approve SWSC Mid-year Capital Improvement Plan (CIP) Budget Amendment

Secretary-Treasurer Moseley made a motion to Approve SWSC Mid-year Capital Improvement Plan (CIP) Budget Amendment. Director Reyna seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 15: Consider and Possibly Approve General Manager to Renegotiate City Utility Billing Fees

Director Alaniz made a motion to Approve General Manager to Renegotiate City Utility Billing Fees. Director Quintero seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 16: Consider and Possibly Approve the Changes of the Water Drought Contingency and Water Conservation Plan to Implement General Guidelines by the Hidalgo County Judge's Office

Director Reyna made a motion to Approve the Changes of the Water Drought Contingency and Water Conservation Plan to Implement General Guidelines by the Hidalgo County Judge's Office. Director Quintero seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 17: Consider and Possibly Approve Uniform Non-Standard Water Service Agreements

A. Izaguirre Real Estate Holdings, LLC – Aniceto Izaguirre, Eduardos Subdivision No. 22, Los Ebanos N 6 ½ (E), 64 Lots
B. Javier V. Acosta and Kayla Acosta, JK Subdivision, Schuerbach N 2 (N/E), 1 Lot

After review, Secretary-Treasurer Moseley made a motion to approve the Uniform Non-Standard Water Service Agreements as presented. Director Alaniz seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 18: Committee Reports and Possible Action:

A. Corporation Policy Review Committee

No Action Taken.

B. Credentials Committee

No Action Taken.

C. Executive Directors Committee

No Action Taken.

D. Finance and Development Committee
   i. Meeting on Mid-Year Budget Amendment and City Utility Billing Services – July 10, 2024

No Action Taken.

E. Scholarship Program Committee

No Action Taken.

AGENDA ITEM 19: Review and Possibly Approve June 2024 Financial Reports:

After discussion Secretary-Treasurer Moseley made a motion to approve the June 2024 Financial Reports. Director Reyna seconded the motion and upon vote, the motion passed unanimously.

AGENDA ITEM 20: General Manager Report:

A. Update on Local Emergency Public Committee (LEPC) Hazmat Scenario
B. TWDB SRF Loan Closing on July 22, 2024
C. Reservoir Levels Update
D. Next Board Meeting, August 15, 2024

Gerardo Gracia, Operations Manager reported on Agenda Item 20A. No Action Taken. Manager Lima reported on Agenda Item 20B through 20D. No Action Taken.

AGENDA ITEM 21: Executive Session

A. Update on WTP 3 Structural Concerns
B. Discussion and Possible Action on Potential CCN Buyout Analysis

VICE PRESIDENT SMITH ADJOURNED THE OPEN MEETING TO ENTER EXECUTIVE SESSION AT 8:06 PM

VICE PRESIDENT SMITH ENTERED EXECUTIVE SESSION AT 8:07 PM TO DISCUSS:

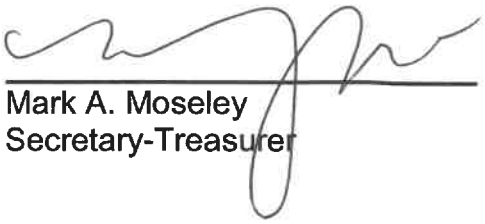
AGENDA ITEM 21: Executive Session

A. Update on WTP 3 Structural Concerns
B. Discussion and Possible Action on Potential CCN Buyout Analysis

VICE PRESIDENT SMITH ADJOURNED EXECUTIVE SESSION TO ENTER OPEN MEETING AT 8:38 PM

VICE PRESIDENT SMITH RETURNED TO THE OPEN MEETING AT 8:38 PM

AGENDA ITEM 21: Executive Session



A. Update on WTP 3 Structural Concerns
B. Discussion and Possible Action on Potential CCN Buyout Analysis

No Action Taken.

Agenda Item 22: Adjournment:

There being no further business, Vice President Smith adjourned the meeting at 8:39 p.m. on July 18, 2024.

Attested:

Mark A. Moseley
Secretary-Treasurer

Approved:

M. Danny Sosebee
President

Consider Approving the Renewal of Adobe Product Licenses from CDW-G in the Amount of $45,585.39 Through OMNIA ESCR4 R210401 Tech Sol. Products/Services (R210401) and Authorize the City Manager to Execute Any Documents Related Thereto. [Daniel Vera, Director of Information Technology]

2. **Description:**
Adobe software is widely used across city departments for a variety of functions, including creating official documents, designing marketing materials, managing PDFs, and enhancing communication efforts. Renewing these licenses is crucial for maintaining the workflow and productivity of city employees, ensuring that they have uninterrupted access to essential tools for efficient document creation, editing, and management.

This renewal will support the ongoing operations of departments such as Communications, Planning, Human Resources, and others, ultimately contributing to the overall efficiency and quality of city services.

3. **Staff's Recommendation:**
Approve the renewal of Adobe Product licenses from CDW-G in the Amount of $45,585.39 through OMNIA ESCR4 R210401 Tech Sol. Products/Services (R210401) and Authorize the City Manager to Execute Any Documents Related Thereto.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
CONSENT AGENDA
Agenda Item No: 14.C.
Memorandum of Understanding - Texas Joint Counterdrug Task Force

1. **Agenda Item:**
Consider Authorizing the City Manager to Amend a Memorandum of Understanding (MOU) Between the City of Edinburg Police Department and the Texas Joint Counterdrug Task Force, Operational Support. [Jaime Ayala, Chief of Police]

2. **Description:**
The Texas Joint Counterdrug Task Force (JCDTF) is an active duty component of the Texas Army National Guard operating under Title 32 Active Duty state orders. A JCDTF member will be assigned to the Edinburg Police Department and will assist investigators by providing timely intelligence data with local, state, and federal database access. A JCDTF member will assist in the intelligence gathering stages of investigation while on orders. Said orders will provide the funding for the analyst assigned to the Edinburg Police Department. In general, the JCDTF will provide Counterdrug support to the law enforcement agency when requested in writing, subject to funding, and when a drug nexus is apparent. Each member is fully vetted with extensive background checks and granted a federal secret security clearance.

The term of this agreement shall be effective August 20, 2024, and will continue to be in effect unless superseded by an updated, signed memorandum of understanding. The amendment to the existing Memorandum of Understanding (MOU) will provide a system of cooperation between the Edinburg Police Department, and the Joint Counterdrug Task Force with operational support.

3. **Staff's Recommendation:**
Approve Authorizing the City Manager to Amend a Memorandum of Understanding (MOU) Between the City of Edinburg Police Department and the Texas Joint Counterdrug Task Force, Operational Support.

g. Memorandum, National Guard Bureau, Subject: National Guard Counterdrug Division Fiscal Year 2023 Implementation Guidance, 14 July 2022

2. PURPOSE: This MOU is a new agreement between Edinburg Police Department (hereinafter referred to as “Law Enforcement Agency” or “LEA”) and the JCDTF. This MOU sets forth the agreed terms and conditions of support to the LEA by the JCDTF at the direction of the Counterdrug Coordinator (CDC). In general, the JCDTF will provide Counterdrug support to federal, state, local, and tribal law enforcement agencies when

requested in writing, subject to funding, and when a drug nexus is apparent. This MOU is not intended, and should not be construed, to create any right or benefit, substantive or procedural, enforceable by law or otherwise by any third party against the parties, the United States, or the officers, employees, agents, or other associated personnel thereof. It is understood among the parties to this agreement that requests for Counterdrug support may include federal, state, local, and tribal cooperative law enforcement efforts.

3. AUTHORITY: This MOU is entered into by the JCDTF pursuant to the authority contained in Title 32, Sections 112 and 502(f) of the United States Code and using guidance contained in the National Guard Bureau Counterdrug Fiscal Year Implementation Guidance.

4. EFFECTIVE DATE: This MOU takes effect beginning on the day after the last Party signs.

5. EXPIRATION DATE: This MOU expires on the 30th of September 2027.

6. DRUG NEXUS: By executing this MOU, the supported LEA certifies that JCDTF personnel will only engage in support to investigations that have a drug nexus.

7. PLANNED DEPLOYMENT OF PERSONNEL AND EQUIPMENT:

a. Personnel: The JCDTF is not a LEA and JCDTF personnel are not law enforcement officers.

(1) Request for Support: Any involvement of the JCDTF in support of a LEA must be in response to a request for support.

(2) Support Role: It is understood by both parties to this agreement that JCDTF personnel are not sworn police officers and JCDTF personnel assigned to the LEA serve in a support role.

(3) Transfers of JCDTF Personnel: While the JCDTF will attempt to provide continuity by leaving JCDTF personnel in place at their assigned LEA, movement of JCDTF personnel is at the sole discretion of the CDC. However, the CDC will provide the LEA with at least a 14-day notice of such movement, if feasible.

b. Equipment:

(1) The loaning of JCDTF equipment to the LEA will be in accordance with applicable laws and regulations and is at the discretion of the CDC. Likewise, LEA equipment loaned to the JCDTF is at the discretion of the LEA.

(2) All loans of equipment will be documented in writing with at least the following information: full description of the item(s); condition at the time of the loan; length of time of the loan; location to which the item is to be returned.

(3) Both parties to this agreement will contact the other party as soon as possible to report any damage caused or loss to loaned equipment.

(4) Unless contrary to law or regulation, each party agrees to be financially responsible for any damage to, or loss of equipment loaned from the other party, caused by the borrowing party's personnel through negligent conduct or willful misconduct.

8. REPORTING PROCEDURES:

a. JCDTF personnel will input statistical results of support to LEAs into the Full Time Support Management Control System (FTSMCS) Case Management (CM) for inclusion in required reports and records.

b. The JCDTF will maintain compliance with Intelligence Oversight (IO) and Operational Security on all reporting in accordance with all Department of Defense (DoD) regulations and guidance.

c. Information provided to the JCDTF by the LEA will not be released outside of the LEA unless in accordance with supported duties in the task force and approved by the LEA.

9. COMMAND AND CONTROL:

a. JCDTF is under the command and control of the CDC. The supported LEA will notify the CDC immediately if any JCDTF personnel are injured or suspected of misconduct. Personnel may be recalled at any time from their LEA due to emergencies or other operational necessities. The CDC has the sole discretion to approve or deny modifications to a LEA support request.

b. JCDTF personnel are under the direct supervision of the supported agency for all assigned duties. JCDTF personnel will also maintain a military chain of command. The military chain of command always takes precedence.

c. The JCDTF will handle all personnel management processes.

10. SCOPE OF OPERATIONS: JCDTF personnel will operate in accordance with a LEA support request as approved by the CDC, subject to the operational constraints found in law, in intelligence oversight regulations, in DoD policy, in the CNGBM 3100.01, and in periodic guidance from the Deputy Assistant Secretary of Defense for Counternarcotics and Stabilization Policy (DASD CNSP). JCDTF personnel will not participate in direct law enforcement action, nor will they participate in the collection of information on U.S. persons.

11. RULES FOR THE USE OF FORCE:

a. Prior to the beginning of an operation, the supported LEA will provide the JCDTF with all known information regarding potential or actual threats and hazards to personnel and equipment. JCDTF personnel will operate under and comply with the Rules for the Use of Force (RUF) orders established by The Adjutant General for the State of Texas. Only specifically authorized JCDTF personnel shall carry issued weapons. The JCDTF CDC authorizes these individuals in an armed status with the concurrence of the supported LEA. Each LEA will follow their own policy concerning firearms discharge and use of deadly force.

b. JCDTF personnel have the right to use force only, if necessary, to defend themselves or in the defense of others. The member can only use the amount of force necessary to achieve self-protection or preservation. Members are only to use deadly force if all lesser means of force have been exhausted or are unavailable and will only use the minimum force immediately necessary to defend against the unlawful use of deadly force and only if the risk of injury to innocent persons or bystanders are not increased by using deadly force.

12. PUBLIC AFFAIRS:

a. Information released to the media concerning JCDTF support to LEAs is coordinated between the LEA and JCDTF public affairs/information officers. Participating JCDTF personnel or specific units will not be identified by name, address or photograph unless cleared through the CDC, who is responsible for obtaining a release through applicable National Guard channels.

b. The lead party for the dissemination of information is the LEA, and therefore, members of the JCDTF will refer all questions from the media to the LEA for reply. The JCDTF public affairs office may provide guidance on issues specific to the National Guard as appropriate.

13. SAFETY: The safety of JCDTF personnel is the primary concern of the CDC and is emphasized in planning and execution of operations. The accomplishment of all LEA supported missions with minimum risk is paramount. JCDTF personnel will always adhere to the CDC's safety policy. JCDTF personnel should not knowingly be sent to, or directed to enter a hostile environment where there is a high probability of encountering life threatening situations or direct contact with suspects. The JCDTF develops risk assessments and implements control measures to mitigate risk based on the authorized activities they conduct at the request of the LEA, and the threats they may encounter in their operational environments.

14. WARRANTS/LEGAL REQUIREMENTS: The supported LEA is responsible for obtaining the legal authorizations and warrants required to permit information handling. The supported LEA recognizes that JCDTF personnel may not engage in any activity that law enforcement officers are prohibited from conducting. JCDTF personnel will not be utilized for or participate in unauthorized surveillance activities. Information or data obtained by the JCDTF, because of work done in support of the LEA, is passed on immediately, as obtained, to the LEA, and is not stored or maintained by JCDTF personnel or in National Guard facilities. Procedures utilized for reporting such information are established by the LEA in accordance with internal practices and procedures. The LEA is responsible for follow-up on any such information. Information gathered by members of the JCDTF will be given adequate classification consideration.

15. ARREST, SEARCHES, SEIZURES AND EVIDENCE:

a. JCDTF personnel will not directly participate in law enforcement activities such as arresting or conducting searches of individuals or private property. Additionally, JCDTF personnel do not enter the chain of custody of evidence but may provide LEA officials with technical support for digital evidence extraction, preservation, and analysis.

b. All activities performed by JCDTF personnel shall be strictly limited to support of LEA counter-drug operations. JCDTF personnel shall not collect, retain, or disseminate information on United States persons or store LEA sensitive products on JCDTF databases. JCDTF personnel may support digital forensic efforts after the information has been lawfully obtained by the LEA.

c. JCDTF personnel will not be deputized or cross designated with Title 21 investigative authority.

16. SUBPOENAS OR OTHER ORDERS TO APPEAR: The supported LEA will immediately notify JCDTF personnel in the event they are subpoenaed, or otherwise ordered to appear in any court. JCDTF personnel will report such order to appear in court to their respective military command and Judge Advocate. If JCDTF personnel are ordered to appear in court, the supported LEA will assist the JCDTF personnel to obtain pre-trial counsel and preparation from the prosecuting attorney responsible for the case.

17. DUTY HOURS, UNIFORM WEAR & WORK SCHEDULES: Duty hours and work schedules shall be in accordance with the LEA support request. All JCDTF personnel maintain additional military duties as part of their regular National Guard unit. As such, JCDTF personnel will be required to attend Inactive Duty Training (monthly drills as required) and Annual Training (not to exceed 30 days). In addition, all JCDTF personnel are authorized 30 days of leave per year, as approved by the CDC. Personnel will wear appropriate military uniforms on duty unless this requirement has been explicitly waived by the CDC or their designated representative.

18. WORKSPACE REQUIREMENTS: The supported LEA will provide parking, appropriate workspace, and use of communication equipment (including desk phone, personal computer, and internet/email capabilities) for JCDTF personnel.

19. LEA FUNDING: This MOU is not an obligation or commitment of funds, nor a basis for transfer of funds. Even where one party has agreed (or later does agree) to assume a particular financial responsibility, written agreement must be obtained before incurring an expense expected to be assumed by another party. All obligations of, and expenditures by the parties are subject to their respective budgetary and fiscal processes and availability of funds pursuant to all laws, regulations, and policies applicable thereto. The parties acknowledge that there is no intimation, promise, or guarantee that funds will be available in future years.

20. SALARIES & BENEFITS: All JCDTF personnel serve in military status on full time National Guard duty. As such, the JCDTF will pay all related salaries, allowances, and benefits for JCDTF personnel. The supported LEA shall not pay any monetary bonus or other monetary award to any JCDTF personnel without the advanced approval of the CDC.

21. EQUITABLE SHARING PROGRAM: The JCDTF may participate in equitable sharing (asset forfeiture) as permitted by law and policy. The JCDTF will apply for a respective share, based upon the level of participation, in an investigation resulting in the seizure and subsequent forfeiture of assets. All forfeiture sharing shall be in accordance with applicable laws governing the disposition of forfeited assets.

22. LIABILITIES:

a. The LEA acknowledges that the United States of America is liable for the negligent, wrongful acts or omissions of its agents and employees while acting within the scope of their employment to the extent permitted by the Federal Tort Claims Act, codified in Title 28, Section 1346 of the United States Code.

b. No hold harmless agreements are required in agreement between the JCDTF and other federal agencies. The Federal Government may not hold harmless a state or other jurisdiction.

23. RENEGOTIATION/MODIFICATION: This MOU may be altered or otherwise modified, if done in writing through mutual written consent from the JCDTF and the LEA. Changes to the scope of work or functions of JCDTF must be approved by the CDC. Agreements must be renegotiated when laws, regulations, and/or support requirements change in such a manner that the agreement cannot be executed.

24. TERMINATION: This MOU will remain in effect until otherwise rescinded or revoked by either party, or otherwise upon expiration date. Either the JCDTF or LEA may terminate this MOU at any time by written or verbal notification to the other party. If notification of termination is delivered verbally, written confirmation shall follow within five business days. The LEA recognizes that JCDTF personnel may be mobilized and called to active federal military duty as part of their normal military unit. In addition, the LEA understands that JCDTF operations are subject to and dependent upon annual appropriated funding.

25. CORRESPONDENCE: All correspondence to be sent and notices to be given pursuant to this MOU will be addressed, if to the LEA, to Chief Jaime Ayala 1702 S Closner, Blvd, Edinburg, TX 78539 and, if to the JCDTF, to ATTN: Joint Counterdrug Task Force J3, 2200 W. 35th St. Austin, TX 78703, or as may from time to time otherwise be directed by the parties.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
CONSENT AGENDA
Agenda Item No: 14.D.

1. **Agenda Item:**
Consider Exercising the Second Year Option to Award the City of Edinburg's Fiscal Year 2023-2024 Audit to Cascos & Associates, PC, in the Amount of $86,900.00 and Authorize the City Manager to Execute an Engagement Letter relating Thereto. [Ascencion Alonzo, Director of Finance]

2. **Description:**
Staff recommends awarding the audit for Fiscal Year ending September 30, 2024 to the accounting firm of Cascos & Associates, PC. Cascos & Associates, PC, will perform an audit of the City's governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information, including the disclosures, which collectively comprise the basic financial statements, of the City as of the year ended September 30, 2024. Accounting standards generally accepted in the United States of America (GAAP) provide for certain required supplementary information (RSI), such as management's discussion and analysis (MD&A), to supplement the City's basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. As part of our engagement, they will apply certain limited procedures ot the City's RSI in accordance with auditing standards generally accepted in the United States of America (GAAS). These limited procedures will consist of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to their inquiries, the basic financial statements, and other knowledge they obtain during their audit of the basic financial statements.

Chapter 2254.001 Professional Services Procurement Act, defines Professional Services as services provided in connection with the professional employment or practice of a person who is licensed or registered as a certified public accountant. The procurement of an Auditing firm qualifies as a professional service. Under Local Government Code Chapter 252. Purchasing and Contracting Authority of Municipalities, Section 252.022 General Exemptions-a procurement for personal, professional, or planning services is exempt. Procurement of auditing services is exempt under the local government code.

Funding in the amount of $86,900 is available in the Fiscal Year 2024-2025 Operating Funds Budget, Non-Departmental, Audit.

3. **Staff's Recommendation:**
Approve Exercising the Second Year Option to Award the City of Edinburg's Fiscal Year 2023-2024 Audit to Cascos & Associates, PC, in the Amount of $86,900.00 and Authorize the City Manager to Execute Engagement Letter Relating Thereto.

AUDIT ENGAGEMENT LETTER

July 25, 2024

City of Edinburg, Texas
Attn: Myra L. Ayala
City Manager
415 W. University Drive
Edinburg, Texas 78540

We are pleased to confirm our understanding of the services we are to provide for City of Edinburg, Texas (the "City") for the year ended September 30, 2024.

Audit Scope and Objectives

We will audit the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information, including the disclosures, which collectively comprise the basic financial statements, of the City as of and for the year ended September 30, 2024. Accounting standards generally accepted in the United States of America (GAAP) provide for certain required supplementary information (RSI), such as management's discussion and analysis (MD&A), to supplement the City's basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. As part of our engagement, we will apply certain limited procedures to the City's RSI in accordance with auditing standards generally accepted in the United States of America (GAAS). These limited procedures will consist of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We will not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient appropriate evidence to express an opinion or provide any assurance. The following RSI is required by GAAP and will be subjected to certain limited procedures, but will not be audited:

1) Management's Discussion and Analysis.
2) Budgetary Comparison Schedules
3) Schedule of Changes in Net Pension and OPEB Liability
4) Schedule of Contributions for Pensions and OPEB

We have also been engaged to report on supplementary information other than RSI that accompanies the City's financial statements. We will subject the following supplementary information to the auditing procedures applied in our audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS, and we will provide an opinion on it in relation to the financial statements as a whole in a report combined with our auditors' report on the financial statements.

1) Schedule of expenditures of federal awards.
2) Combining Statements and Schedules

AICPA Members | TXCPA Rio Grande Valley

In connection with our audit of the basic financial statements, we will read the following other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

1) Introductory Section

2) Statistical Section

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and issue an auditors' report that includes our opinions about whether your financial statements are fairly presented, in all material respects, in conformity with GAAP, and report on the fairness of the supplementary information referred to in the second paragraph when considered in relation to the financial statements as a whole. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. Misstatements, including omissions, can arise from fraud or error and are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment of a reasonable user made based on the financial statements. The objectives also include reporting on:

- Internal control over financial reporting and compliance with provisions of laws, regulations, contracts, and award agreements, noncompliance with which could have a material effect on the financial statements in accordance with *Government Auditing Standards*.
- Internal control over compliance related to major programs and an opinion (or disclaimer of opinion) on compliance with federal statutes, regulations, and the terms and conditions of federal awards that could have a direct and material effect on each major program in accordance with the Single Audit Act Amendments of 1996 and Title 2 U.S. *Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance).

Auditors' Responsibilities for the Audit of the Financial Statements and Single Audit

We will conduct our audit in accordance with GAAS; the standards for financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; the Single Audit Act Amendments of 1996; and the provisions of the Uniform Guidance, and will include tests of accounting records, a determination of major program(s) in accordance with Uniform Guidance, and other procedures we consider necessary to enable us to express such opinions. As part of an audit in accordance with GAAS and *Government Auditing Standards*, we exercise professional judgment and maintain professional skepticism throughout the audit.

We will evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management. We will also evaluate the overall presentation of the financial statements, including the disclosures, and determine whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation. We will plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether from (1) errors, (2) fraudulent financial reporting, (3) misappropriation of assets, or (4) violations of laws or governmental regulations that are attributable to the government or to acts by management or employees acting on behalf of the government. Because the determination of waste and abuse is subjective, *Government Auditing Standards* do not expect auditors to perform specific procedures to detect waste or abuse in financial audits nor do they expect auditors to provide reasonable assurance of detecting waste or abuse.

Because of the inherent limitations of an audit, combined with the inherent limitations of internal control, and because we will not perform a detailed examination of all transactions, there is an unavoidable risk that some material misstatements or noncompliance may not be detected by us, even though the audit is properly planned and performed in accordance with GAAS and *Government Auditing Standards*. In addition, an audit is not designed to detect immaterial misstatements or violations of laws or governmental regulations that do not have a direct and material effect on the financial statements or on major programs. However, we will inform the appropriate level of management of any material errors, any fraudulent financial reporting, or misappropriation of assets that come to our attention. We will also inform the appropriate level of management of any violations of laws or governmental regulations that come to our attention, unless clearly inconsequential. We will include such matters in the reports required for a Single Audit.

Our responsibility as auditors is limited to the period covered by our audit and does not extend to any later periods for which we are not engaged as auditors.

In connection with this engagement, we may communicate with you or others via email transmission. As emails can be intercepted and read, disclosed, or otherwise used or communicated by an unintended third party, or may not be delivered to each of the parties to whom they are directed and only to such parties, we cannot guarantee or warrant that emails from us will be properly delivered and read only by the addressee. Therefore, we specifically disclaim and waive any liability or responsibility whatsoever for interception or unintentional disclosure of emails transmitted by us in connection with the performance of this engagement. In that regard, you agree that we shall have no liability for any loss or damage to any person or entity resulting from the use of email transmissions, including any consequential, incidental, direct, indirect, or special damages, such as loss of revenues or anticipated profits, or disclosure or communication of confidential or proprietary information.

We will also conclude, based on the audit evidence obtained, whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the government's ability to continue as a going concern for a reasonable period of time.

Our procedures will include tests of documentary evidence supporting the transactions recorded in the accounts, and direct confirmation of receivables and certain assets and liabilities by correspondence with selected individuals, funding sources, creditors, and financial institutions. We will also request written representations from your attorneys as part of the engagement and they may bill you for responding to this inquiry.

We have identified the following significant risk(s) of material misstatement as part of our audit planning:

- Management override of controls
- Improper revenue recognition

Our planning has not been concluded, and modifications may still be made.

Our audit of financial statements does not relieve you of your responsibilities.

Audit Procedures—Internal Control

We will obtain an understanding of the government and its environment, including the system of internal control, sufficient to identify and assess the risks of material misstatement of the financial statements, whether due to error or fraud, and to design and perform audit procedures responsive to those risks and obtain evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentation, or the override of internal control. Tests of controls may be performed to test the effectiveness of certain controls that we consider relevant to preventing and detecting errors and fraud that are material to the financial statements and to preventing and detecting misstatements resulting from illegal acts and other noncompliance matters that have a direct and material effect on the financial statements. Our tests, if performed, will be less in scope than would be necessary to render an opinion on internal control and, accordingly, no opinion will be expressed in our report on internal control issued pursuant to *Government Auditing Standards*.

As required by the Uniform Guidance, we will perform tests of controls over compliance to evaluate the effectiveness of the design and operation of controls that we consider relevant to preventing or detecting material noncompliance with compliance requirements applicable to each major federal award program. However, our tests will be less in scope than would be necessary to render an opinion on those controls and, accordingly, no opinion will be expressed in our report on internal control issued pursuant to the Uniform Guidance.

An audit is not designed to provide assurance on internal control or to identify significant deficiencies or material weaknesses. Accordingly, we will express no such opinion. However, during the audit, we will communicate to management and those charged with governance internal control related matters that are required to be communicated under AICPA professional standards, *Government Auditing Standards*, and the Uniform Guidance.

Audit Procedures—Compliance

As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we will perform tests of the City's compliance with provisions of applicable laws, regulations, contracts, and agreements, including grant agreements. However, the objective of those procedures will not be to provide an opinion on overall compliance, and we will not express such an opinion in our report on compliance issued pursuant to *Government Auditing Standards*.

The Uniform Guidance requires that we also plan and perform the audit to obtain reasonable assurance about whether the auditee has complied with federal statutes, regulations, and the terms and conditions of federal awards applicable to major programs. Our procedures will consist of tests of transactions and other applicable procedures described in the *OMB Compliance Supplement* for the types of compliance requirements that could have a direct and material effect on each of the City's major programs. For federal programs that are included in the Compliance Supplement, our compliance and internal control procedures will relate to the compliance requirements that the Compliance Supplement identifies as being subject to audit. The purpose of these procedures will be to express an opinion on the City's compliance with requirements applicable to each of its major programs in our report on compliance issued pursuant to the Uniform Guidance.

Responsibilities of Management for the Financial Statements and Single Audit

Our audit will be conducted on the basis that you acknowledge and understand your responsibility for (1) designing, implementing, establishing, and maintaining effective internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error, including internal controls over federal awards, and for evaluating and monitoring ongoing activities to help ensure that appropriate goals and objectives are met; (2) following laws and regulations; (3) ensuring that there is reasonable assurance that government programs are administered in compliance with compliance requirements; and (4) ensuring that management and financial information is reliable and properly reported. Management is also responsible for implementing systems designed to achieve compliance with applicable laws, regulations, contracts, and grant agreements. You are also responsible for the selection and application of accounting principles; for the preparation and fair presentation of the financial statements, schedule of expenditures of federal awards, and all accompanying information in conformity with accounting principles generally accepted in the United States of America with oversight of those charged with governance; and for compliance with applicable laws and regulations (including federal statutes), rules, and the provisions of contracts and grant agreements (including award agreements). Your responsibilities also include identifying significant contractor relationships in which the contractor has responsibility for program compliance and for the accuracy and completeness of that information.

You are also responsible for making drafts of financial statements, schedule of expenditures of federal awards, all financial records, and related information available to us and for the accuracy and completeness of that information (including information from outside of the general and subsidiary ledgers). You are also responsible for providing us with (1) access to all information of which you are aware that is relevant to the preparation and fair presentation of the financial statements, such as records, documentation, identification of all related parties and all related-party relationships and transactions, and other matters; (2) access to personnel, accounts, books, records, supporting documentation, and other information as needed to perform an audit under the Uniform Guidance; (3) additional information that we may request for the purpose of the audit; and (4) unrestricted access to persons within the government from whom we determine it necessary to obtain audit evidence. At the conclusion of our audit, we will require certain written representations from you about the financial statements; schedule of expenditures of federal awards; federal award programs; compliance with laws, regulations, contracts, and grant agreements; and related matters.

Your responsibilities include adjusting the financial statements to correct material misstatements and confirming to us in the management representation letter that the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements of each opinion unit taken as a whole.

You are responsible for the design and implementation of programs and controls to prevent and detect fraud, and for informing us about all known or suspected fraud affecting the government involving (1) management, (2) employees who have significant roles in internal control, and (3) others where the fraud could have a material effect on the financial statements. Your responsibilities include informing us of your knowledge of any allegations of fraud or suspected fraud affecting the government received in communications from employees, former employees, grantors, regulators, or others. In addition, you are responsible for identifying and ensuring that the government complies with applicable laws, regulations, contracts, agreements, and grants. You are also responsible for taking timely and appropriate steps to remedy fraud and noncompliance with provisions of laws, regulations, contracts, and grant agreements that we report. Additionally, as required by the Uniform Guidance, it is management's responsibility to evaluate and monitor noncompliance with federal statutes, regulations, and the terms and conditions of federal awards; take prompt action when instances of noncompliance are identified including noncompliance identified in audit findings; promptly follow up and take corrective action on reported audit findings; and prepare a summary schedule of prior audit findings and a separate corrective action plan.

You are responsible for identifying all federal awards received and understanding and complying with the compliance requirements and for the preparation of the schedule of expenditures of federal awards (including notes and noncash assistance received, and COVID-19-related concepts, such as lost revenues, if applicable) in conformity with the Uniform Guidance. You agree to include our report on the schedule of expenditures of federal awards in any document that contains, and indicates that we have reported on, the schedule of expenditures of federal awards. You also agree to include the audited financial statements with any presentation of the schedule of expenditures of federal awards that includes our report thereon. Your responsibilities include acknowledging to us in the written representation letter that (1) you are responsible for presentation of the schedule of expenditures of federal awards in accordance with the Uniform Guidance; (2) you believe the schedule of expenditures of federal awards, including its form and content, is stated fairly in accordance with the Uniform Guidance; (3) the methods of measurement or presentation have not changed from those used in the prior period (or, if they have changed, the reasons for such changes); and (4) you have disclosed to us any significant assumptions or interpretations underlying the measurement or presentation of the schedule of expenditures of federal awards.

You are also responsible for the preparation of the other supplementary information, which we have been engaged to report on, in conformity with U.S. generally accepted accounting principles (GAAP). You agree to include our report on the supplementary information in any document that contains, and indicates that we have reported on, the supplementary information. You also agree to include the audited financial statements with any presentation of the supplementary information that includes our report thereon. Your responsibilities include acknowledging to us in the written representation letter that (1) you are responsible for presentation of the supplementary information in accordance with GAAP; (2) you believe the supplementary information, including its form and content, is fairly presented in accordance with GAAP; (3) the methods of measurement or presentation have not changed from those used in the prior period (or, if they have changed, the reasons for such changes); and (4) you have disclosed to us any significant assumptions or interpretations underlying the measurement or presentation of the supplementary information.

Management is responsible for establishing and maintaining a process for tracking the status of audit findings and recommendations. Management is also responsible for identifying and providing report copies of previous financial audits, attestation engagements, performance audits, or other studies related to the objectives discussed in the Audit Scope and Objectives section of this letter. This responsibility includes relaying to us corrective actions taken to address significant findings and recommendations resulting from those audits, attestation engagements, performance audits, or studies. You are also responsible for providing management's views on our current findings, conclusions, and recommendations, as well as your planned corrective actions for the report, and for the timing and format for providing that information.

With regard to publishing the financial statements on your website, you understand that websites are a means of distributing information and, therefore, we are not required to read the information contained in those sites or to consider the consistency of other information on the website with the original document.

Other Services

We will also assist in preparing the financial statements, schedule of expenditures of federal awards, and related notes of the City in conformity with accounting principles generally accepted in the United States of America and the Uniform Guidance based on information provided by you. These nonaudit services do not constitute an audit under *Government Auditing Standards* and such services will not be conducted in accordance with *Government Auditing Standards*. We will perform the services in accordance with applicable professional standards. The other services are limited to the financial statements, schedule of expenditures of federal awards, and related notes services previously defined. We, in our sole professional judgment, reserve the right to refuse to perform any procedure or take any action that could be construed as assuming management responsibilities.

You agree to assume all management responsibilities for the financial statements, schedule of expenditures of federal awards, and related notes, and any other nonaudit services we provide. You will be required to acknowledge in the management representation letter our assistance with preparation of the financial statements, the schedule of expenditures of federal awards, and related notes and that you have reviewed and approved the financial statements, the schedule of expenditures of federal awards, and related notes prior to their issuance and have accepted responsibility for them. Further, you agree to oversee the nonaudit services by designating an individual, preferably from senior management, with suitable skill, knowledge, or experience; evaluate the adequacy and results of those services; and accept responsibility for them.

Engagement Administration, Fees, and Other

We understand that your employees will prepare all cash, accounts receivable, or other confirmations we request and will locate any documents selected by us for testing.

We will schedule the engagement based in part on deadlines, working conditions, and the availability of your key personnel. We will plan the engagement based on the assumption that your personnel will cooperate and provide assistance by performing tasks such as preparing requested schedules, retrieving supporting documents, and preparing confirmations. If, for whatever reason, your personnel are unavailable to provide the necessary assistance in a timely manner, it may substantially increase the work we have to do to complete the engagement within the established deadlines, resulting in an increase in fees over our original fee estimate.

At the conclusion of the engagement, we will complete the appropriate sections of the Data Collection Form that summarizes our audit findings. It is management's responsibility to electronically submit the reporting package (including financial statements, schedule of expenditures of federal awards, summary schedule of prior audit findings, auditors' reports, and corrective action plan) along with the Data Collection Form to the Federal Audit Clearinghouse. We will coordinate with you the electronic submission and certification. The Data Collection Form and the reporting package must be submitted within the earlier of 30 calendar days after receipt of the auditors' reports or nine months after the end of the audit period.

We will provide copies of our reports to the City; however, management is responsible for distribution of the reports and the financial statements. Unless restricted by law or regulation, or containing privileged and confidential information, copies of our reports are to be made available for public inspection.

The audit documentation for this engagement is the property of Cascos & Associates, PC and constitutes confidential information. However, subject to applicable laws and regulations, audit documentation and appropriate individuals will be made available upon request and in a timely manner to its designee, a federal agency providing direct or indirect funding, or the U.S. Government Accountability Office for purposes of a quality review of the audit, to resolve audit findings, or to carry out oversight responsibilities. We will notify you of any such request. If requested, access to such audit documentation will be provided under the supervision of Cascos & Associates, PC personnel. Furthermore, upon request, we may provide copies of selected audit documentation to the aforementioned parties. These parties may intend, or decide, to distribute the copies or information contained therein to others, including other governmental agencies.

The audit documentation for this engagement will be retained for a minimum of five years after the report release date or for any additional period requested by the regulator. If we are aware that a federal awarding agency, pass-through entity, or auditee is contesting an audit finding, we will contact the party(ies) contesting the audit finding for guidance prior to destroying the audit documentation.

With the recent passing of Carlos H. Cascos, Alfredo Vera, Jr., CPA has been appointed and authorized by the independent executor and sole beneficiary of the estate as the managing and supervising CPA of the firm. He will be responsible for supervising the engagement and signing the reports or authorizing another individual to sign them.

Our fee for these services will be at our standard hourly rates plus out-of-pocket costs (such as report reproduction, word processing, postage, travel, copies, telephone, confirmation service provider fees, etc.) except that we agree that our gross fee, including expenses, will not exceed $86,900. Our standard hourly rates vary according to the degree of responsibility involved and the experience level of the personnel assigned to your audit. Our invoices for these fees will be rendered at the completion of our services. The above fee is based on anticipated cooperation from your personnel and the assumption that unexpected circumstances will not be encountered during the engagement. If significant additional time is necessary, we will keep you informed of any problems we encounter, and our fees will be adjusted accordingly.

You may request that we perform additional services not addressed in this engagement letter. If this occurs, we will communicate with you regarding the scope of the additional services and the estimated fees. We also may issue a separate engagement letter covering the additional services. In the absence of any other written communication from us documenting such additional services, our services will continue to be governed by the terms of this engagement letter.

Reporting

We will issue written reports upon completion of our Single Audit. Our reports will be addressed to the Mayor and the members of the City Council. Circumstances may arise in which our report may differ from its expected form and content based on the results of our audit. Depending on the nature of these circumstances, it may be necessary for us to modify our opinions, add a separate section, or add an emphasis-of-matter or other-matter paragraph to our auditor's report, or if necessary, withdraw from this engagement. If our opinions are other than unmodified, we will discuss the reasons with you in advance. If, for any reason, we are unable to complete the audit or are unable to form or have not formed opinions, we may decline to express opinions or issue reports, or we may withdraw from this engagement.

The *Government Auditing Standards* report on internal control over financial reporting and on compliance and other matters will state that (1) the purpose of the report is solely to describe the scope of testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance, and (2) the report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. The Uniform Guidance report on internal control over compliance will state that the purpose of the report on internal control over compliance is solely to describe the scope of testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Both reports will state that the report is not suitable for any other purpose.

We appreciate the opportunity to be of service to the City and believe this letter accurately summarizes the significant terms of our engagement. If you have any questions, please let us know. If you agree with the terms of our engagement as described in this letter, please sign the attached copy and return it to us.

Respectfully,

Cascos & Associates, PC

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
CONSENT AGENDA
Agenda Item No: 14.E.
City Council Minutes

1. **Agenda Item:**
Consider Approving the City Council Minutes for the following: 2024 Regular Meetings: May 29, 2024, June 04, 2024 and June 18, 2024. [Clarice Y. Balderas, City Secretary]

2. **Description:**
The City Secretary Department prepares and maintains the legislative history of all City Council meetings for historic and public purposes in accordance to the:
City of Edinburg Code of Ordinances, Charter, Article III. Procedures of the City Council, Legislation, Section 6: Introduction and Passage of Ordinances and Resolutions. The City Code of Ordinances states, "yeas and nays shall be taken upon the passage of all ordinances and resolutions and entered upon the journal of proceedings of the City Council."

Texas Government Code; Title 5. Open Government; Ethics; Subtitle A. Open Government; Chapter 551. Open Meetings; Subchapter A. General Provisions and Subchapter B. Record of Open Meeting:

Sec. 551.021. Minutes or Recording of Open Meeting Required "(a) A governmental body shall prepare and keep minutes or make a recording of each open meeting of the body. (b) The minutes must: (1) state the subject of each deliberation; and (2) indicate each vote, order, decision, or other action taken."

Sec. 551.022. Minutes and Recording of Open Meeting: Public Record; and the 2022 Texas Open Meeting Act, Chapter X. Records of Meetings, Section A. Minutes or Recordings of Open Meeting. "The minutes and recordings of an open meeting are public records and shall be available for public inspection and copying on request to the governmental body's chief administrative officer or the officer's designee."

City Council meeting minutes and recordings are available to the public upon request.

The City Council meeting videos are also available to the public through the city's website at: www.cityofedinburg.com. The Mayor signs the minutes and attested by the City Secretary. Minutes are maintained for historical and public purposes.

In accordance to the City's Code of Ordinances, the City Secretary Department prepares and maintains the minutes of all City Council meetings for historical and public purposes.

3. **Staff's Recommendation:**
Approve the City Council Minutes for the following: 2024 Regular Meetings: May 29, 2024, June 04, 2024, and June 18, 2024.

MINUTES OF THE EDINBURG CITY COUNCIL REGULAR MEETING
CITY OF EDINBURG, HIDALGO COUNTY, TEXAS
Location: Edinburg City Hall-Council Chambers
415 West University Dr.
Edinburg, Texas 78541
MAY 29, 2024
6:00 PM

Mayor Ramiro Garza, Jr. called the meeting to order at 6:00 p.m.

PRESENT:

Ramiro Garza, Jr.	Mayor
Daniel "Dan" Diaz	Mayor Pro Tem
Jason De Leon	Councilmember Place 2
David Salazar, Jr.	Councilmember Place 3
Myra L. Ayala	City Manager
Clarice Y. Balderas	City Secretary
Omar Ochoa	City Attorney

ABSENT:

David White	Councilmember Place 4

1. CALL TO ORDER, ESTABLISH QUORUM

A. Prayer by Dr. David Alexander, First Baptist Church.
B. Pledge of Allegiance by Mayor Ramiro Garza, Jr.

2. CERTIFICATION OF PUBLIC NOTICE

Mayor Ramiro Garza, Jr. verified the City Secretary's posting of the City Council meeting and its compliance as required by the Texas Open Meetings Act. The notice was posted on May 24, 2024 at 8:30 p.m.

3. DISCLOSURE OF CONFLICT OF INTEREST

City Attorney Omar Ochoa stated under State Law a conflict of interest exists if a Councilmember or a certain member of that Councilmember's family has a qualifying financial interest in any agenda item. Members with a conflict of interest cannot participate in the discussion nor vote on that agenda item.

Omar Ochoa, City Attorney asked Mayor and Councilmembers if there were any known conflict of interest to disclose at that time.

There were no conflict of interests presented.

4. PROCLAMATIONS/RECOGNITIONS

A. Presentation of Certificates of Recognition to the 2024 Girl Scouts of Greater South Texas Graduating Senior Ambassadors Troop No. 059, Troop No. 62, Troop No. 65, Troop No. 1008, and Troop Juliette as Requested by Delia Quilanta. [Clarice Y. Balderas, City Secretary]
Clarice Y. Balderas, City Secretary read the names of the recipients aloud.

Mayor Ramiro Garza, Jr. congratulated the graduating senior ambassadors and stated it is a lot of work and dedication to be a Girl Scout and he would like to advise them to go out and do everything they want to in terms of education but to come back to lead the city.

B. Presentation of Proclamation Recognizing May 2024 as National Stroke Awareness Month as Requested by Doctor's Hospital at Renaissance Health. [Clarice Y. Balderas, City Secretary]
Clarice Y. Balderas, City Secretary read the proclamation aloud.

Dr. Fernandez, DHR stated on behalf of Doctor's Hospital at Renaissance Health they appreciated the recognition of the importance of creating awareness about strokes, she stated it is a leading cause of death and disability in Texas. Dr. Fernandez stated two million neurons die every minute a person is having a stroke, if the symptoms are recognized and are able to act fast more people can be helped because there are many efficient treatments. She encouraged everyone to join forces and spread awareness.

C. Presentation of Proclamation Recognizing May 19-25, 2024 as Public Works Week. [Vincent Romero, Director of Public Works]
Clarice Y. Balderas, City Secretary read the proclamation aloud.

Vincent A. Romero, Director of Public Works stated they honor and celebrate the contribution of the public works staff. He said the dedicated men and women work tirelessly behind the scene to ensure the community runs smoothly and safely. Mr. Romero stated the theme "Advancing Quality of Life for All" perfectly captures the essence of what the public works staff does. From maintaining the roads and bridges, drainage system, the network of traffic signs and signals to the never-ending maintenance of right of ways and green spaces. Their efforts are essential to daily life, they are often the first to respond to emergencies and weather events mitigating road closures or clearing streets, removing down trees and dewatering. They are always present during weather events to ensure the infrastructure remains resilient and reliable. Their dedication and hard work often goes unnoticed but they are the backbone of daily life, their commitment keeps the city running smoothly and safely. Mr. Romero stated he would like all Public Works staff to know their hard work and dedication does not go unnoticed, and to all Public Works staff he extended the utmost gratitude, for their commitment to excellence and service truly making the City of Edinburg a better place to live.

Mayor Ramiro Garza, Jr. thanked the Public Works staff for all they do day in and day out, he said they are the ones that get the first complaints from roadways or other things

that need to be done, but they never get thanked enough. Mayor Garza, thanked staff for all they do, he said many residents appreciate the work that is done every day. He stated it is a tough task with the city growing adding more areas to maintain and take care of and he said they do an excellent job.

Mayor Pro Tem Daniel "Dan" Diaz stated Public Works are not recognized but they are first responders, he said in all emergencies they are the first that go out there in the rain, high winds, and the flooding and without them being out there no one would be able to move around.

5. PUBLIC COMMENTS

Magdiel Castle, Assistant Director of Cultural Arts: Mr. Castle stated Conceptos Dance Ensemble, is a dance group absorbed into the City of Edinburg, where they have dance classes free to the students, with costumes provided. The Conceptos Dance Ensemble competed in San Antonio with over 800 different teams from all over the nation from California to Georgia. He said this was their first time competing and they not only brought back 14 trophies but were also crowned Grand Champions nationwide and earned several Best of the Best Awards. Mr. Castle stated the two groups in costumes were awarded 300 points out of 300 points for their duets. He stated the group is thankful to have the space here in Edinburg to practice and display their talent.

Nancy Soto: Ms. Soto stated she was very proud of Conceptos and proud that they can represent their culture, and the City of Edinburg. She thanked the Mayor and Council for the support.

Eduardo Gamino: Mr. Gamino stated he was proud of everyone, he said it was hard practicing long hours but they were able to accomplish their goal. Mr. Gamino stated they were all very thankful for all the support.

Javier Solis, Lower Rio Grande Valley Development Council: Mr. Solis was present to inform the public that they have selected the City of Edinburg to host the 2024 Annual South Texas Rio Grande Valley Police K-9 competition. He stated they have been hosting the event for several years and last year they had a very successful event at the Bert Ogden Arena and they would like a repeat. Mr. Solis thanked the Mayor and Council and the City of Edinburg for all the support. He stated this year's competition would be held at the Parks and Recreation Center he said they have been working with city staff and they have been supportive. Mr. Solis invited everyone to come out and witness the event that highlights and features the talents of the four-legged heroes that at times are forgotten in law enforcement. Mr. Solis stated the event is international and they already have teams from Arkansas, they have gotten confirmation from the Kansas City Railroad, in Mexico they have police K-9 coming from Monterey, and San Luis Potosi. He stated the event has also been a platform to inform citizens' information on the many social and public programs available out there. He asked everyone to help promote the event to the public and if there are, any programs within the city that you would like featured at the event reach out and get a table or a booth setup.

Fern McClaugherty: Ms. McClaugherty stated the people want a city that provides basic services like water, sewer, streets, and public safety at the lowest cost possible, recognizing that each community is financially different. She stated the Council does not see that the services provided must be within the ability of the people's ability to pay. Ms. McClaughrty stated the City has not conducted a survey to establish the people's ability to pay, but what is known is that Hidalgo County is one of the largest counties with one of the largest concentrations of poverty and the City of Edinburg is right in the middle. She said the elected officials are doing things that are increasing poverty and that the people do not want. Ms. McClaugherty stated increasing taxes will increase poverty and the people are unable to keep up with the city's spending. She said every member of this Council voted supporting the existing members of the appraisal district board and they have increase the property values at least twenty years. She said the average value increase for the people they help protest is 40%, and that is the result of the elected officials spending. Ms. McClaugherty stated the water rate will be increased by over 67% but the increase was spread over several years. She said that was one of the complaints leveled against the previous administration, they would tax for stuff they were going to do in the future. She stated the 67% increase is described as a modest rate adjustment. She stated the Council lowered the tax rate by one cent and increased the water rate by 67%. Ms. McClaugherty stated in 2025 there are two councilmembers and a mayor are up for reelection and she is waiting to hear their reelection speeches. Ms. McClaugherty asked that everyone continue praying for Israel.

Magdiel Castle,Assistant Director of Cultural Arts: Mr. Castle was present to invite the public to a concert in the Spring Concert Series as part of the Music Friendly community. He stated they had been having concerts of different genres, by young Rio Grande Valley artists. He invited everyone to the punk concert on Saturday, June 1, 2024 from 7:00 p.m. to 11:00 p.m. Mr. Castle also encouraged everyone to submit photos of Edinburg to be entered in the photo contest, and winners will be featured on a calendar.

Viviana Caballero, Library Children's Supervisor: Ms. Caballero was present to invite the community to register for the summer reading program themed Adventures at Your Library, starting June 10, 2024. She said the program would include literacy programs, art sessions, story times, and special presentations. Ms. Caballero stated the program is for everyone, children, teens, and adults, with sessions for every age. She said the summer reading program would be held for six weeks with a day session Monday through Friday and it will be free with all materials included. Ms. Caballero invited everyone to the summer reading program kickoff party on Friday, June 7, 2024 at 6:00 p.m. at the library.

There were no further Public Comments.

6. PUBLIC HEARING

Mayor Ramiro Garza, Jr. declared the hearing open for public comments at 6:37 p.m. There being no comments, Mayor Ramiro Garza, Jr. declared the hearing closed at 6:38 p.m.

A. Hold Public Hearing and Consider the Variance Request to the City's Unified Development Code Article 4, Section 4.303, Permanent Signs, Being Lot 1, Freedom Bank at La Sienna Subdivision, Located at 4120 North I-69C, as Requested by A1 Skylite Signs. NAYS: None
ABSENT: Councilmember David White
ABSTAIN: None
The motion to Approve carried.

8. AWARDING OF BIDS

A. Consider Awarding RFP No. 2024-010, Animal Care Facility to Renoworks, LLC in an Amount Not to Exceed $600,000.00 and Authorize the City Manager to Execute Any Documents Related Thereto. [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

MOTION: Councilmember David Salazar, Jr. to Approve Awarding RFP No. 2024-010, Animal Care Facility to Renoworks, LLC in an Amount Not to Exceed $600,000.00 and Authorize the City Manager to Execute Any Documents Related Thereto.
SECOND: Mayor Pro Tem Daniel "Dan" Diaz

Mayor Ramiro Garza, Jr. stated he would like to meet with Palm Valley Animal Society, because once the facility is built it will not solve the challenge the city has. The facility will be at capacity. He said Palm Valley Animal Society and the City of McAllen have a partnership and that maybe something the City of Edinburg should entertain.

Ms. McClaugherty asked if the City of Edinburg would be opening its own facility, and that it will be a no kill facility and get the animals adopted. She asked that the city reach out to veterinarians for help spaying and neutering the animals, because many people cannot afford it. The reproduction and spread of animals needs to be controlled.

There was no discussion.

Mayor Ramiro Garza, Jr. called for a vote.

RECORD OF VOTE:
AYES: Mayor Ramiro Garza, Jr., Mayor Pro Tem Daniel "Dan" Diaz, Councilmember Jason De Leon, and Councilmember David Salazar, Jr.
NAYS: None
ABSENT: Councilmember David White
ABSTAIN: None
The motion to Approve carried.

CITY OF EDINBURG

_____
Ramiro Garza, Jr., Mayor

ATTEST:

_____
Clarice Y. Balderas, City Secretary

City Council Approval: _____

MINUTES OF THE EDINBURG CITY COUNCIL REGULAR MEETING
CITY OF EDINBURG, HIDALGO COUNTY, TEXAS
Location: Edinburg City Hall-Council Chambers
415 West University Dr.
Edinburg, Texas 78541
JUNE 4, 2024
6:00 PM

Mayor Ramiro Garza, Jr. called the meeting to order at 6:00 p.m.

PRESENT:

Daniel "Dan" Diaz	Mayor Pro Tem
Jason De Leon	Councilmember Place 2
David Salazar, Jr.	Councilmember Place 3
David White	Councilmember Place 4
Myra L. Ayala	City Manager
Clarice Y. Balderas	City Secretary
Omar Ochoa	City Attorney

ABSENT:

Ramiro Garza, Jr.	Mayor

1. CALL TO ORDER, ESTABLISH QUORUM

A. Prayer by Pastor David Alexander, First Baptist Church.
B. Pledge of Allegiance by Mayor Pro Tem Daniel "Dan" Diaz.

2. CERTIFICATION OF PUBLIC NOTICE

Mayor Pro Tem Daniel "Dan" Diaz verified the City Secretary's posting of the City Council meeting and its compliance as required by the Texas Open Meetings Act. The notice was posted on May 31, 2024 at 4:30 p.m.

3. DISCLOSURE OF CONFLICT OF INTEREST

City Attorney Omar Ochoa stated under State Law a conflict of interest exists if a Councilmember or a certain member of that Councilmember's family has a qualifying financial interest in any agenda item. Members with a conflict of interest cannot participate in the discussion nor vote on that agenda item.

Omar Ochoa, City Attorney asked Mayor Pro Tem and Councilmembers if there were any known conflict of interest to disclose at that time.

There were no conflict of interests presented.

4. PROCLAMATIONS/RECOGNITIONS

A. Presentation of Proclamation Recognizing Stephanie Meza, Miss Teen Rio Grande Valley as Requested by Filemon Meza. [Clarice Y. Balderas, City Secretary]
Clarice Y. Balderas, City Secretary read the proclamation aloud.

Miss Stephanie Meza thanked the Council for the recognition and her family for all of their support.

B. Presentation of Proclamation Recognizing June 2024 as Elder Abuse Awareness Month as Requested by the Department of Adult Protective Services. [Clarice Y. Balderas, City Secretary]
Clarice Y. Balderas, City Secretary read the proclamation aloud.

Representative from the Department of Family and Protective Services thanked the Council for the proclamation. She stated older adults are vital contributing members of society and everyone deserves to live free of abuse. Research shows that one in ten older Americans are abused or neglected each year. Stated the Adult Protective program will remain focused on raising awareness of elder abuse.

C. Presentation of Proclamation Recognizing City of Edinburg Retiree, Jose J. Garza, Custodian, City Manager's Department/Building Maintenance Division for 20 Years of Service. [Belinda Torres, Director of Human Resources/Civil Service]
Clarice Y. Balderas, City Secretary read the proclamation aloud.

Mr. Jose J. Garza was present to receive the proclamation.

Mayor Pro Tem Daniel "Dan" Diaz and Councilmember David White thanked Mr. Garza for his hard work and dedication.

D. Present the Recipient for the Employee of the Month Award for the Month of May 2024. [Belinda Torres, Director of Human Resources/Civil Service]

Natalia Velasquez, Director of Building Safety stated Ms. Leticia Morales is a very valued, highly motivated asset to the Building Safety Department. She said Ms. Morales plays various roles as a Permit Clerk, Building Plans Examiner I, and her current position Building Plans Examiner II, she is widely recognized in the construction industry for her dedication and professionalism. Ms. Velasquez stated it was an honor to work with Ms. Leticia Morales.

Ms. Leticia Morales thanked everyone for the recognition and stated she has learned so much and she really enjoys her job.

5. PUBLIC COMMENTS

Fern McClaugherty: Ms. McClaugherty stated the priority of the Council is not to build

high-rise parking facilities, voting for an appraisal district board who increase the property values, investing in projects that construct sports arenas, soccer fields, or projects that are simply political payback. The Council's job is to provide basic service that the people cannot provide themselves and it should be provided at the lowest cost possible. Ms. McClaugherty stated sewer should not be coming from a short standpipe on the ground on McColl and Chapin, especially when this has been discussed before. She stated if this was happening on private property the City would stop construction and fine the owner for every occurrence. She said does not want an explanation as to why the sewer is coming from a short pipe she just wants the City to fix it. Ms. McClaugherty stated the City raised the water rates by a modest 67%, she said the City auditor on two occasions described the City's budget as being healthy so if the City has the money why increase the water rate and if the City does not have the money then why are they building high-rise parking lot and buying all the unnecessary things. Ms. McClaugherty stated in 2025 the people will be electing a mayor and two councilmembers, she said the people want lower taxes, lower water rates, and no high-rise parking. Ms. McClaugherty asked everyone to pray for Israel and that they are able to get the hostage back.

Heriberto Anaya: Mr. Anaya stated he has been living on Owassa Road since the mid 80's and the City annexed that area back in 2015 but they still have yet to get the amenities that came with the annexation. He said he knows that area is on the agenda for a lift station and sewer but he would like a time frame a date of completion. Mr. Anaya stated they would like to know if they will have input as to where these amenities will be installed. He said the City purchased land in that area and residents in that area would like to know if whatever is constructed there will impact them in a negative way. Mr. Anaya stated he had offered some of his land for the installation of the lift station and he is still open to discussion, if the City needs it. Mr. Anaya thanked the Council for their time.

Rigo Gonzalez: Mr. Gonzalez stated there is a proposal for the change of land use between their property and Business 281, from Commercial General to Commercial Multi-family. He said currently there is a mechanic body shop, and the plaza that faces Closner. They are proposing four units with 15 apartments. Mr. Gonzalez stated the road is very narrow, it has no lights, and there are quite a few things that can be an issue. He said placing apartments in between two commercial properties will have issues one of them being traffic. Mr. Gonzalez stated at a previous meeting staff and the board voted against the proposal, and he asked that this Council vote the same way.

Samuel Valdez: Mr. Valdez stated he is part of 3-G propane located on Mr. Gonzalez's property. He was concerned with the width of the road. Currently there is no center division and if there is an increase in traffic with no posted speed limit, it will be a problem.

There were no further Public Comments.

6. PRESENTATION AND REPORT

A. Presentation and Discussion on the Proposed West and East Owassa Road Sanitary Sewer Improvements. [Gerardo Carmona Jr., P.E., Director of Utilities]

Gerardo Carmona, Director of Utilities stated the most of west side was annexed in 2015 and the east side was annexed in 2013. He said there are approximately 102 properties on 325 acres. Mr. Carmona stated they will construct a lift station on the west side to provide sewer to the area. He said there is an item on the agenda to acquire the property for the proposed lift station and they are working with the Public Utility Commission to incorporate the area into the City's sewer. Mr. Carmona stated they are anticipating completing the property acquisition in August 2024; the design will start in September with a completion date for January 2025. The application to obtain Certification of Convenience and Necessity (CCN) application from the Public Utility Commission approval has been submitted and should be completed by January 2025; the procurement process will tentatively begin in February 2025 and be completed by March 2025; construction would start April 2025 with a completions date of December 2025. Mr. Carmona stated dates are subject to change. He said for East Owassa Road they are proposing to install sewer lines that they would connect to an already existing sew line on Albert Road just south of the Bert Ogden Arena. Mr. Carmona's tentative timeline for East Owassa Road is to complete easement acquisitions by December 2024, start the design process in January 2025 with a design completion by June 2025; procurement process to start in July 2025 and completed by August 2025; and construction to start September 2025 with a project completion date of June 2026.

Mayor Pro Tem Daniel "Dan" Diaz stated there are some businesses on the East side that are still on septic tanks and the Edinburg Economic Development Corporation was able to come up with a plan to fund and incorporate all those businesses in this project. He said the easement acquisitions could be a big issue.

Heriberto Anaya stated he was willing to donate the easement to the City, a little over a thousand feet. He said he did not think there would be any issues with his neighbors and the easement.

The presentation will be included in the minutes.

7. PUBLIC HEARING

Mayor Pro Tem Daniel "Dan" Diaz declared the hearing open for public comments at 6:38 p.m. There being no comments, Mayor Pro Tem Daniel "Dan" Diaz declared the hearing closed at 6:38 p.m.

A. Hold Public Hearing and Consider the Ordinance Providing for the Rezoning Request from Agriculture and Open Space (AO) District to Industrial, General (IG) District, Being 199.997 Acres, Being All of Lots 38 and 39, Baker's Subdivision of the Cucharia Tract, According to the Plat Thereof Recorded in Volume 2, Page 46, Maps of Records in the Office of the County Clerk of Hidalgo County, Texas, Being Located at 8601 North Jasman Road, as Requested by the City of Edinburg. (A 4/5 vote is required by the City Council to overturn the Planning & Zoning Commission action.) [Jaime Acevedo,

Director of Planning & Zoning]

MOTION: Councilmember David Salazar, Jr. to Approve Ordinance Providing for the Rezoning Request from Agriculture and Open Space (AO) District to Industrial, General (IG) District, Being 199.997 Acres, Being All of Lots 38 and 39, Baker's Subdivision of the Cucharia Tract, According to the Plat Thereof Recorded in Volume 2, Page 46, Maps of Records in the Office of the County Clerk of Hidalgo County, Texas, Being Located at 8601 North Jasman Road, as Requested by the City of Edinburg.

Building Standards, Lot Width for the proposed Serenity Springs Phase II Subdivision, Being a 4.00 Acre Tract of Land Being the East 4.00 Acres of the South 5.00 Acres of the North 20.00 Acres of Lot 7, Section 275, Texas-Mexican Rail Way Company's Survey, Hidalgo County, Texas, Located at 1300 South McColl Road, as Requested by Quintanilla Headley & Associates.
SECOND: Councilmember Jason De Leon

Fern McClaugherty stated many of these construction projects request to make the streets a little more narrow, she said Chief Snider† would allow for them to go measure the firetrucks. She said when you have a street and make it narrower and then you have cars parked on both sides of the street making the access even smaller. Ms. McClaugherty stated the City has at least one firetruck that will not go down there. She said when you have twelve families and one of the house catches fire they are going to wish that road was twice as wide. Ms. McClaugherty asked the Council to deny this request for the safety of the people.

There was discussion. Jaime Acevedo, Director of Planning & Zoning addressed the Council's questions.

Omar Garza, Fire Chief stated there is no fire safety it just the smaller size lots makes it more difficult to fit in the utilities, sidewalks, fire hydrants, and the trashcans.

CITY OF EDINBURG

_____
Daniel "Dan" Diaz, Mayor Pro Tem

ATTEST:

_____
Clarice Y. Balderas, City Secretary

City Council Approval: _____

MINUTES OF THE EDINBURG CITY COUNCIL REGULAR MEETING
CITY OF EDINBURG, HIDALGO COUNTY, TEXAS
Location: Edinburg City Hall-Council Chambers
415 West University Dr.
Edinburg, Texas 78541
JUNE 18, 2024
6:00 PM

Mayor Ramiro Garza, Jr. called the meeting to order at 6:00 p.m.

PRESENT:

Ramiro Garza, Jr.	Mayor
Daniel "Dan" Diaz	Mayor Pro Tem
Jason De Leon	Councilmember Place 2
David White	Councilmember Place 4
Nelda Ramirez	Assistant City Manager
Clarice Y. Balderas	City Secretary
Omar Ochoa	City Attorney

ABSENT:

David Salazar, Jr.	Councilmember Place 3
Myra L. Ayala	City Manager

1. CALL TO ORDER, ESTABLISH QUORUM

A. Prayer by Joanna L. Walker, Abundant Grace Church.
B. Pledge of Allegiance by Mayor Ramiro Garza, Jr.

2. CERTIFICATION OF PUBLIC NOTICE

Mayor Ramiro Garza, Jr. verified the City Secretary's posting of the City Council meeting and its compliance as required by the Texas Open Meetings Act. The notice was posted on June 14, 2024 at 5:45 p.m.

3. DISCLOSURE OF CONFLICT OF INTEREST

City Attorney Omar Ochoa stated under State Law a conflict of interest exists if a Councilmember or a certain member of that Councilmember's family has a qualifying financial interest in any agenda item. Members with a conflict of interest cannot participate in the discussion nor vote on that agenda item.

Omar Ochoa, City Attorney asked Mayor and Councilmembers if there were any known conflict of interest to disclose at that time.

There were no conflict of interests presented.

4. MAYOR'S REPORT

A. National Civic League 2024 All-America City Award.
Mayor Ramiro Garza, Jr. stated the National Civic League designated the City of Edinburg as an All-America City for the fourth time in the City's history.

Roxanne Lerma, Director of Meida and Communications stated they were still reeling from the excitement. She said maybe not everyone understands how big the recognition is. Ms. Lerma stated it is the most prestigious Civic recognitation a city can get. She said they were notified in April that the City of Edinburg was a finalist out of a couple hundred cities that applied, top 20 in the nation. Being finalist the City has to go to Denver to do a skit/presentaion showcasing what the City does, that sets it apart. How does it strengthen democrocy, how does it engage it's residents? Ms. Lerma stated for the last couple of months they had been working with some residents and she thanked them for showing up to practice. She thanked UTRGV for lending the City their mascot, she thanked Concepto the dance ensemble, members of the 2024 Committees, Capable Kids, she said they really showcased the inclusive Pirates Cove and the Miracle Mile. Mr. Lerma stated that thanks to everyones hard work and to God they were able win the All-America City Award.

Mayor Ramiro Garza, Jr. stated many residents had asked him what is the All-America City Award, he told them it is a recognition for the whole community. He said they take a look at everything, the growth, the population, but in particular the initativies the City takes. Mayor Garza, thanked everyone who participated.

5. PROCLAMATIONS/RECOGNITIONS

A. Presentation of Proclamation Recognizing Captain Roman Gabriel Rodriguez for his 30 Years of Service with the Texas Department of Public Safety. [Clarice Y. Balderas, City Secretary]
Clarice Y. Balderas, City Secretary read the proclamation aloud.

Mr. Gabriel Rodriguez thanked the Mayor and Council for the proclamation, and he thanked his family for all of their support. Mr. Rodriguez stated he was honored to be a long-life resident of the City of Edinburg and it was an honor to work for the Department of Public Safety all those years. He stated during his career he always had the support of the Edinburg Fire Department, they never hesitated. Mr. Rodriguez said he has always had a great relationship with the Edinburg Police Department, he said it has been great working alongside them. Mr. Rodriguez stated he looks forward to continue serving the City of Edinburg.

Mayor Ramiro Garza, Jr. thanked Mr. Rodriguez on behalf of the City and stated in addition to serving the State of Texas in his career he continued to serve on the City Boards. Mayor Garza stated as a fellow father Mr. Rodriguez is at every one of his kids school events.

B. Presentation of Proclamation Recognizing June 2024 as National Gun Violence Awareness Month as Requested by South Texas Health Systems. [Clarice Y. Balderas, City Secretary]
Clarice Y. Balderas, City Secretary read the proclamation aloud.

Representative from South Texas Health Systems thanked the Mayor and Council for the commitment the City of Edinburg has for keeping the community safe. He said as a health system that is what they are there for also, and he would like to applaud the Edinburg Police Department. He stated they work with them very closely every day. He said, sadly they do see the statistical results from gun violence in the hospital settings. As a community he was glad to be able to recognize and work together to ensure everyone especially the youth understands gun safety.

6. PUBLIC COMMENTS

Tom Reyna, Assistant City Manager: Mr. Reyna informed the public the City will continue to hand out sandbags at their two locations. He said the first location is at the City's Service Center located at 1201 N. Doolittle Road, at this location while supplies last those with proof of residence could get up to six sandbags per household and businesses will be allotted eight sand bags. Mr. Reyna stated the second is a self-service location at the Edinburg Municipal Park located at 1714 S. Raul Longoria St. where anyone can go out there and make their own sandbags. The number of bags is the same six for residents and eight for businesses, if the individual brings their own bags; they are welcomed to as much sand as they like. He said depending on the weather they would continue to distribute sandbags from 7:00 a.m. to 7:00 p.m. During periods of bad weather they will stop the distribution.

Ronnie Larralde, Executive Director of the Edinburg Chamber of Commerce: Mr. Larralde was present to invite the entire community to the 18th Annual Texas Cook'Em High Steaks on Saturday, July 6, 2024 at The Ebony Hill Golf Club. He invited everyone to go out and enjoy a day of Championship BBQ, live entertainment, lots of family entertainment, food and arts & craft vendors, and a firework show at the end of the night. Mr. Larralde stated the best part is that the event was free, thanks to the continued partnerships with the City, EEDC, and a lot of the business community. He stated some of the major things taking place is the BBQ Competition, many music artist, a car & truck show, and Night of Champions Boxing. Mr. Larralde encouraged everyone to bring their lawn chairs, footballs, Frisbees, and their picnic blankets.

Obed Montoya: Mr. Montoya stated it does not matter who sits on the council when things are left up to the people's vote. Mr. Montoya stated as far as the terms leave it at two terms. That is what the people voted for. He thanked the Council for all they do. Mr. Montoya asked for prayers for Ms. McClaughtery who was dealing with a broken arm.

There were no further Public Comments.

ABSTAIN: None
The motion to Approve carried.

Mayor Ramiro Garza, Jr. Adjourned the meeting at 9:03 p.m.

CITY OF EDINBURG

_____
Ramiro Garza, Jr., Mayor

ATTEST:

_____
Clarice Y. Balderas, City Secretary

City Council Approval: _____

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
CONSENT AGENDA
Agenda Item No: 14.F.
Disposition of Records

1. **Agenda Item:**
Consider Authorizing the Disposition of Approximately 37 Cubic Feet (Boxes of Letter Size Records) of Non-Vital City Records in Accordance with City's Records Management Program and the Texas State Library and Archives Commission Local Records Retention Schedules. [Clarice Y. Balderas, City Secretary]

2. **Description:**
The City Secretary Department maintains an active Central File System as part of the City's Records Management Program. City departments that maintain record copies are responsible for inventorying the records and submitting requests for disposition to the City Secretary Department. All retention dates for the proposed disposition of records have expired and have been assessed to ensure they comply with the Texas Local Retention Schedules; therefore, staff is requesting disposition of the records that have met their retention period.

By copy of this agenda item and recommendation all City Departments are notified that any non-record copies and digital copies of the records listed for disposition are required to also be disposed of at the same time as the record copy.

The City's Records Committee consists of the City Manager, City Secretary, City Attorney, and Finance Director. If the disposition of records is approved by City Council the Committee will then execute the required forms ascertaining the records listed have been reviewed for applicable value before they are disposed.

3. **Staff's Recommendation:**
Approve Authorizing the Disposition of Approximately 37 Cubic Feet (Boxes of Letter Size Records) of Non-Vital City Records in Accordance with the City's Records Management Program and Texas State Library and Archives Commission Local Records Retention Schedules.

TEXAS LOCAL GOVERNMENT CODE
Title 6. Records
Subtitle C. Records Provisions Applying to More Than One Type of Local Government

CHAPTER 202. DESTRUCTION AND ALIENATION OF RECORDS

Section 202.001. DESTRUCTION OF RECORDS.

(a) A local government record may be destroyed if:
1. the record is listed on a valid records control schedule and either its retention period has expired or it has been microfilmed or stored electronically in accordance with the requirements of Chapters 204 and 205;
2. the record appears on a list of obsolete records as provided by Section **203.044**; or
3. the record is not listed on a records retention schedule issued by the commission and the local government provides notice to the commission at least 10 days before destroying the record as required by Section **441.169**, Government Code.

(b) The following records may be destroyed without meeting the conditions of Subsection (a):
1. records the destruction or obliteration of which is directed by an expunction order issued by a court pursuant to state law; and
2. records defined as exempt from scheduling or filing requirements by rules adopted by the commission or listed as exempt in a records retention schedule issued by the commission.

Added by Acts 1989, 71st Leg., ch. 1248, Sec. 1, eff. Sept. 1, 1989. Amended by Acts 2017, 85th Leg., R.S., Ch. 1149 (H.B. 557), Sec. 9, eff. September 1, 2017; Acts 2019, 86th Leg., ch. 533 (H.B. 1962), Sec. 13, eff. September 1, 2019.

RECORDS MANAGEMENT PROGRAM
Sec. 34.24 - Retention and disposition schedules.

Sec. 34.24 - Retention and disposition schedules.

(A) *Required.* All city offices and departments shall adopt records retention and disposition schedules and destroy, transfer or otherwise dispose of records only according to such schedules.

(B) *Development; authority granted; revision.*

(1) Retention periods to be included in records schedules shall be submitted by the Records Manager to the Finance Officer and City Attorney, who shall notify the Records Manager within ten working days of his approval or of any objection to a retention period. At the expiration of the ten-day period, if no objection has been submitted, the records schedule shall be adopted and shall have full force as sufficient authorization for records destruction or other action. If objection is made, the Records Manager shall determine a retention period satisfactory to the office or department concerned, to the Finance Officer and to the City Attorney.

(2) When a records retention and disposition schedule is adopted, it shall thenceforth constitute full authority to destroy, transfer, microphotograph or take other actions, and the City Council hereby directs that such action be taken by the Records Manager or under his or her supervision. The Records Manager shall notify the State Librarian of intended destruction, as required by law, but no further notice to the City Council or other city office shall be required.

(3) Revision of retention periods shall be submitted for review to the City Attorney and City Finance Officer in the same manner as the original retention periods.
