A. Proclamation- South Texas Broncs

PROCLAMATION

SOUTH TEXAS BRONCS SOFTBALL TEAM
FASTPITCH AMERICAN SOFTBALL ASSOCIATION

WHEREAS, In 2023, the South Texas Broncs Softball Team traveled to Plano, TX to compete in the Southern Nationals Championship and won first place. The attended the 2024 FASA World Series Championships from July 15-20, 2024 in Branson, Missouri and won first place in the 14U Division. This marks back to back National Championships two years in a row; and,

WHEREAS, the South Texas Broncs (STX Broncs) is a fastpitch softball team composed of athletes from the Edinburg Consolidated Independent School District (BL Garza Middle School, South Middle School and Barrientes Middle School). Taking on the name of the city's original UTPA Broncs, the team consists of Savannah Farfan, 00; Addison Cantu, 2; Asiah Trevino, 5; Jeralynn Mendez, 7; Judith Arroyo, 8; Makaylah Flores, 9; Ari Villarreal, 13; Natalie Diaz, 22; Klarissa Rodriguez, 23; Katarina Zepeda-Cerda, 40; Jaylee Garza, 77; Khloe Ramirez, 87; and,

WHEREAS, the South Texas Broncs have been competing in numerous national events locally, out of town and out of state. The girls compete and practice year round, sharpening their softball skills. This commitment to the sport has allowed them to become National Champions two years in a row; and,

WHEREAS, going into the FASA World Series in Branson, Missouri as a fist year 14u team, coaches knew the competition was going to be strong. Facing athletes from all over the nation, they were aware that this would be an uphill battle as they faced second year 14U teams with older girls but the Broncs were up to the challenge; and,

WHEREAS, the girls began their tournament with an early bracket loss to a very seasoned Arkansas second year team. With their backs against the wall, the Broncs played tough earning their spot in the National Championship game. Only to meet up with the same team that handed them their first loss; and,

WHEREAS, the STX Broncs went into the Championship game as the underdog team. Coaches and players knew that if they were to come out Champions, they would have to beat the undefeated team not once but twice as per FASA World Series rules; and

WHEREAS, the STX Broncs went into the championship game without fear and instead were determined to leave their mark in Missouri. Fighting and sacrificing every minute of the game they beat the undefeated second year Arkansas team two games in a row to become the 2024 FASA WORLD SERIES CHAMPIONS; and,

WHEREAS, The City Council of the City of Edinburg is proud to recognize the achievements of the STX Broncs Softball team, and Coaches Juan Rodriguez, Peter Cantu, and Jorge Arroyo for earning the 2024 National title, making their school, family, and city proud.

NOW, THEREFORE, I, RAMIRO GARZA, JR., MAYOR OF THE CITY OF EDINBURG, TX: By the power vested in me by law, do hereby recognize the:

SOUTH TEXAS BRONCS SOFTBALL TEAM

and call upon all residents to join in the celebration of the success of these students and coaches.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the City of Edinburg, Texas, a Municipal Corporation, to be affixed on this the 20th day of August, 2024.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
PUBLIC HEARINGS
Agenda Item No: 7.A.
Rezoning Request - Gerardo Agustin Castorena Salazar and Silvia Nora Lopez

1. **Agenda Item:**
Hold Public Hearing and Consider the Ordinance Providing for the Rezoning Request from Agriculture and Open Space (AO) District to Commercial,General (CG) District, Being a Tract of Land Out of Lot 6, Block 1, John Closner, ET AL Subdivision, Located at 3430 South Raul Longoria Road, as Requested by Gerardo Agustin Castorena Salazar and Silvia Nora Lopez. **(A 4/5 vote is required by the City Council to overturn the Planning & Zoning Commission action.)** [Jaime Acevedo, Director of Planning & Zoning]

2. **Description:**
This property is located on the northeast corner of South Raul Longoria Road and East Wisconsin Road. The property has a total frontage of 169.04 feet along South Raul Longoria Road and 200 feet along East Wisconsin Road for a total of .77 of an acre (gross). The requested zoning designation is Commercial, General (CG) District which is the primary commercial district, meant to accommodate a wide range of commercial uses, including highway service uses and community or regional commercial, office, and service uses. It is intended to provide for a full range of community and regional scale commercial enterprises, including but not limited to retail, office, restaurant, entertainment, and service. The applicant is seeking a zone change to establish a commercial plaza.

Adjacent zoning districts are Commercial, General (CG) District to the west, Agriculture and Open Space (AO) District to the north, south and east. Surrounding land consists of a mix of single-family residential uses, institutional uses and vacant land. On December 10, 2013, the property was annexed into the city with the Agricultural District designation. The future land use designation for this property is Neighborhood Commercial Uses.

Staff mailed a notice of the public hearing to 20 neighboring property owners on Friday, June 28, 2024, and received no comments in favor or against this request at the time this report was prepared. Notice of this public hearing was published in the newspaper on July 31, 2024.

The Planning & Zoning Commission recommended with a unanimous vote of 6-0 to approve the Rezoning Request. A 4/5 vote is required by the City Council to overturn the Planning & Zoning Commission action.

3. **Staff's Recommendation:**
Staff recommends approval of the Rezoning Request from Agriculture and Open Space (AO) District to Commercial, General (CG) District, based on adjacent zoning districts, surrounding land uses and densities in the area. If approved, the applicant will need to comply with all requirements during the permitting process including compliance with subdivision regulations, building/fire codes, fire protection, parking, landscape buffer-yards, solid waste services, utility, and other City requirements, as applicable.

MEETING DATES:
PLANNING & ZONING COMMISSION – 07/09/2024
CITY COUNCIL – 08/20/2024
DATE PREPARED – 06/28/2024

STAFF REPORT
GENERAL INFORMATION

APPLICATION: Rezoning Request from Agriculture and Open Space (AO) District to Commercial, General (CG) District

APPLICANT: Gerardo Agustin Castorena Salazar and Silvia Nora Lopez

AGENT: Not Applicable

LEGAL: Being a Tract of Land Out of Lot 6, Block 1, John Closner, ET AL Subdivision

LOCATION: 3430 South Raul Longoria Road

LOT/TRACT SIZE: .77 of an acre (gross)

CURRENT USE: Vacant land

PROPOSED USE: Commercial Development

EXISTING ZONING: Agriculture and Open Space (AO) District

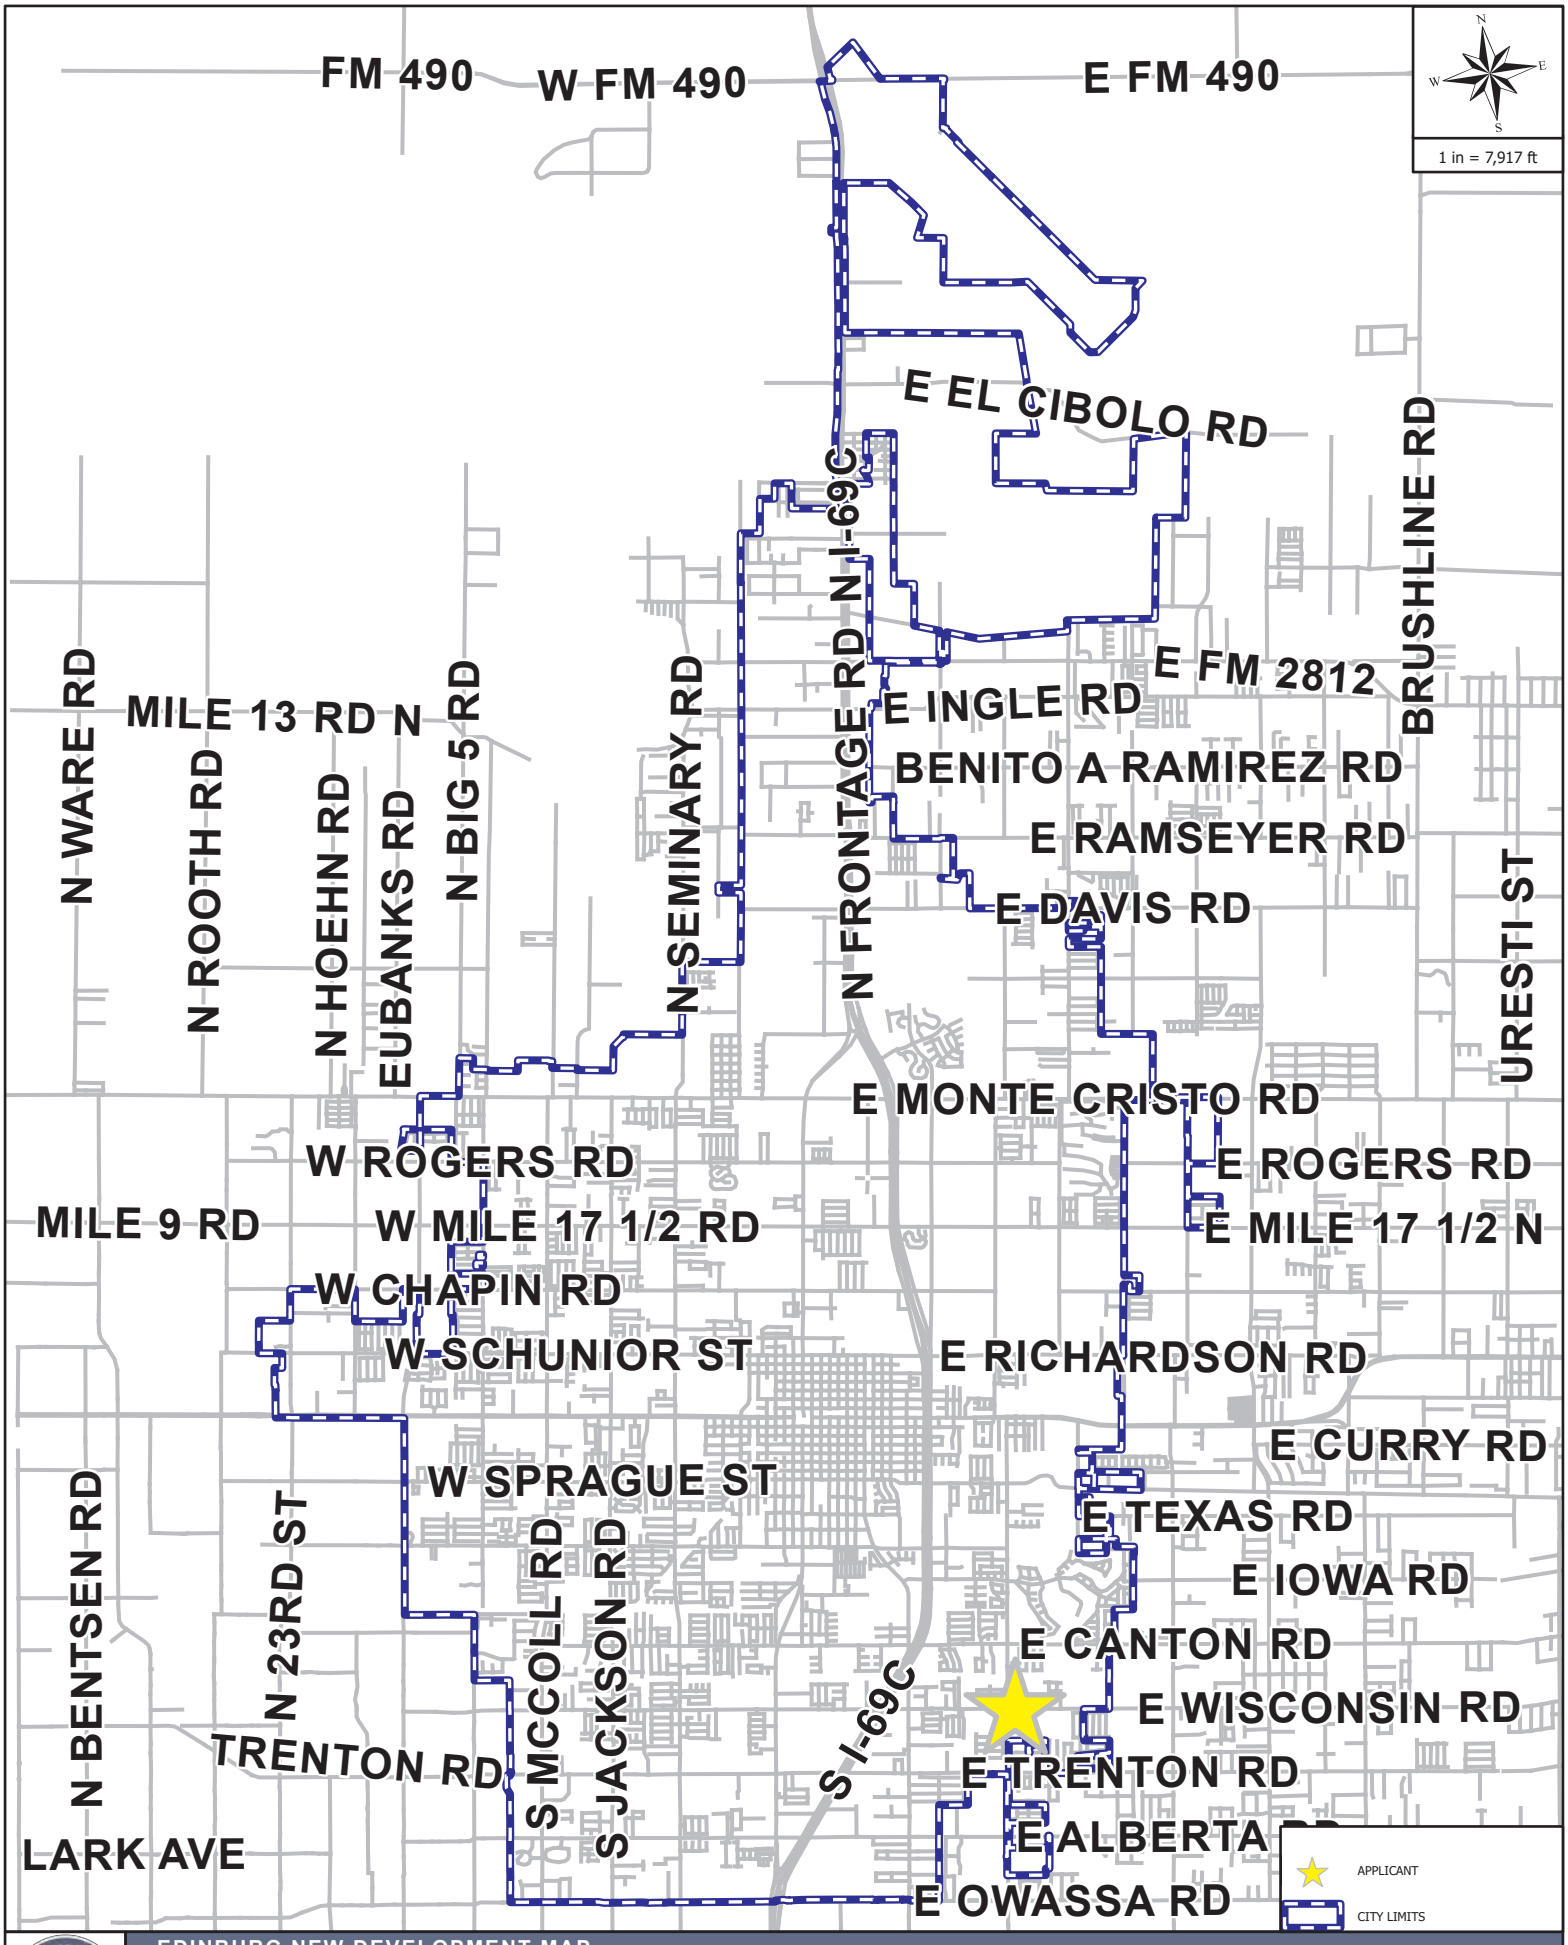
ADJACENT ZONING:
North – Agriculture and Open Space (AO) District
South – Agriculture and Open Space (AO) District
East – Agriculture and Open Space (AO) District
West – Commercial, General (CG) District

LAND USE PLAN: Neighborhood Commercial Uses

PUBLIC SERVICES: North Alamo Water Supply Corporation Water and Sewer

RECOMMENDATION: Staff recommends approval of the Rezoning Request from Agriculture and Open Space (AO) District to Commercial, General (CG) District

REZONING REQUEST
GERARDO AGUSTIN CASTORENA SALAZAR AND SILVIA NORA LOPEZ.

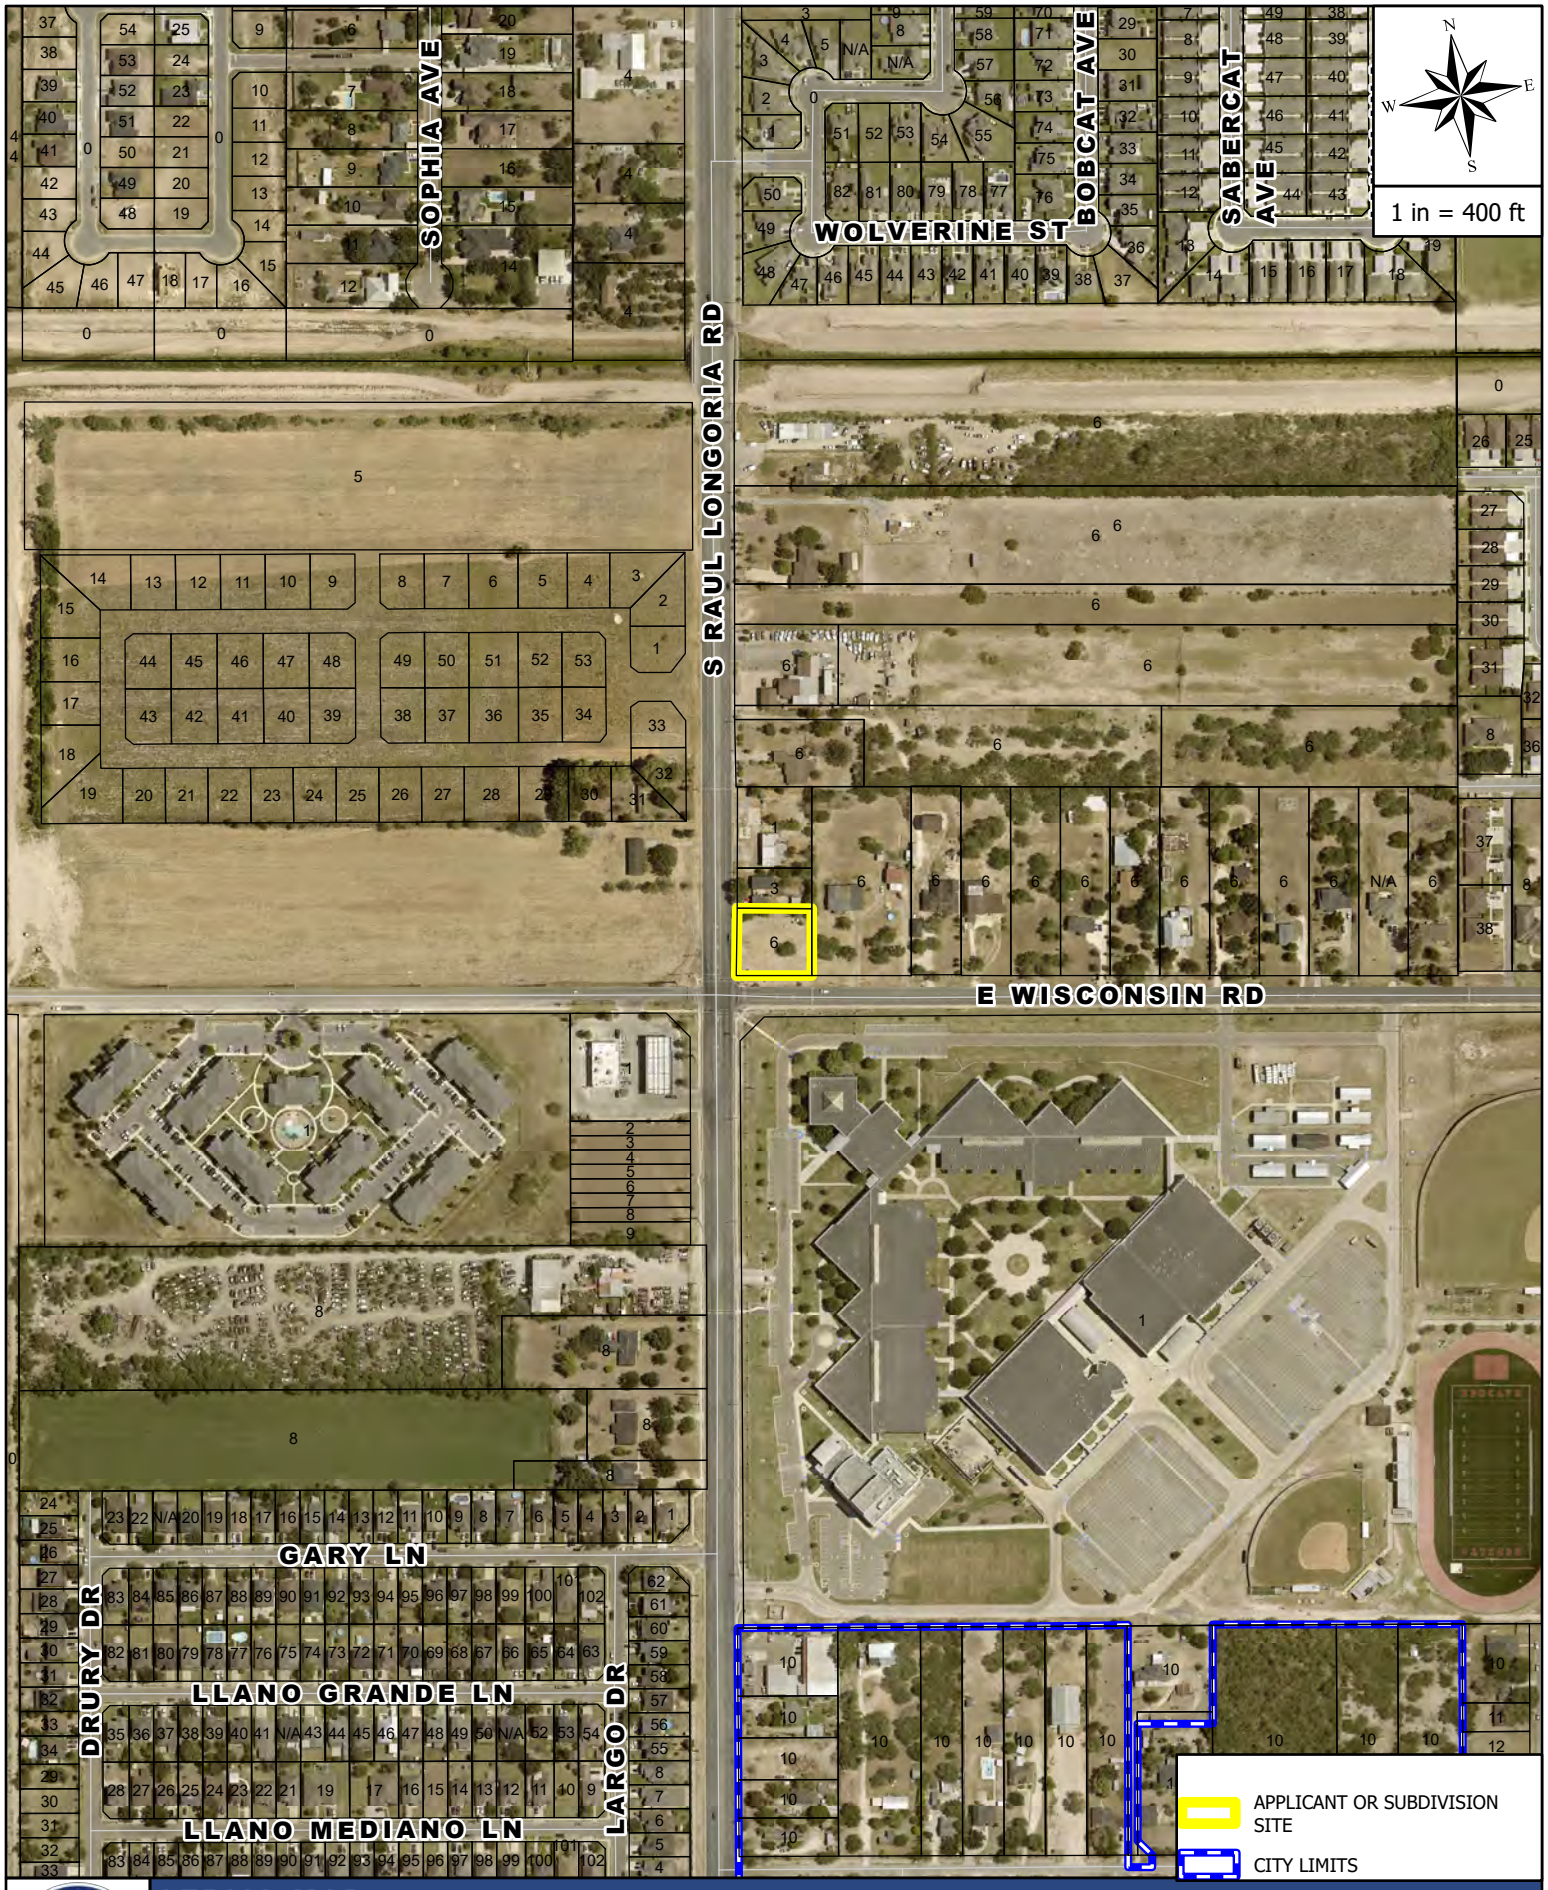


EVALUATION

The following is the staff's evaluation of the request:

1. Surrounding land comprises a mix of single-family residential, institutional, and vacant land.
2. On December 10, 2013, the property was annexed into the city with the Agricultural District designation.
3. The proposed zoning would be consistent with the adjacent uses in the area.
4. The proposed zoning is inconsistent with the Future Land Use Plan.

Staff recommends approval of the Rezoning Request from Agriculture and Open Space (AO) District to Commercial, General (CG) District, based on adjacent zoning districts, surrounding land uses and densities in the area. If approved, the applicant will need to comply with all requirements during the permitting process including compliance with subdivision regulations, building/fire codes, fire protection, parking, landscape buffer-yards, solid waste services, utility, and other City requirements, as applicable.



Staff mailed a notice of the public hearing to 20 neighboring property owners on Friday, June 28, 2024, and received no comments in favor or against this request at the time this report was prepared. Notice of this public hearing was published in the newspaper on July 31, 2024.

ORDINANCE NO. _____

AN ORDINANCE AMENDING, SUPPLEMENTING, AND CHANGING THE BOUNDARIES OF THE AGRICULTURE AND OPEN SPACE (AO) DISTRICT TO COMMERCIAL, GENERAL (CG) DISTRICT, BEING A TRACT OF LAND OUT OF LOT 6, BLOCK 1, JOHN CLOSNER, ET AL SUBDIVISION, LOCATED AT 3430 SOUTH RAUL LONGORIA ROAD, EDINBURG, HIDALGO COUNTY, TEXAS, FROM ONE DISTRICT TO ANOTHER; PROVIDING A REPEALER CLAUSE; PROVIDING A SAVINGS CLAUSE; PROVIDING FOR PUBLICATION AND EFFECTIVE DATE; PROVIDING FOR CODIFICATION; PROVIDING A WAIVER OF THE THREE (3) SEPARATE READINGS; AND ORDAINING OTHER PROVISIONS RELATED TO THE SUBJECT MATTER HEREOF.

WHEREAS, the owner of the herein described real estate has submitted to the Planning and Zoning Commission of the City of Edinburg, Texas, a proposed amendment, and the proposed supplement and change to the boundaries of the Agriculture and Open Space (AO) District and the Commercial, General (CG) District, as set out in the Unified Development Code of the City of Edinburg, Texas, heretofore finally passed, approved, and adopted by said City Council on the 9th day of August, 2022. Such proposed amendment is to change the zoning of all of Being a Tract of Land Out of Lot 6, Block 1, John Closner, ET AL Subdivision, Located at 3430 South Raul Longoria Road, Edinburg, Hidalgo County, Texas, from Agriculture and Open Space (AO) District to Commercial, General (CG) District, for a recommendation and report by said Planning and Zoning Commission; and

WHEREAS, the said Planning and Zoning Commission of the City of Edinburg, Texas, gave due notice as provided by said Unified Development Code of a public hearing to be held before said Planning and Zoning Commission, on July 9, 2024, at 5:30 P.M., in the Edinburg City Hall, City Council Chambers, located at 415 West University Drive, Edinburg, Texas, and said public hearing was held at such time and place, and all of which procedure in the giving of notice and the holding of said public hearing is hereby ratified and confirmed as meeting all the requirements of said Unified Development Code of the City of Edinburg, Texas and applicable statutes, providing said notice by U. S. Mail to all property owners and persons rendering property for taxation within 300 feet of the property affected not less than ten (10) days before said public hearing; and

WHEREAS, after such public hearing, the Planning and Zoning Commission of the City of Edinburg, Texas, presented its report to the City Council of the City of Edinburg that they approved the change in zoning of said property, from one district to the other; and

WHEREAS, after receipt of the final report from the Planning and Zoning Commission, the City Council of said City provided due notice, as provided by said Unified Development Code to be held before said City Council, and notice was published one time in a newspaper published

in the City of Edinburg, Texas, and of general circulation in said City, stating that a public hearing to consider said proposed revision would be held on August 20, 2024 at 6:00 P.M., in the Edinburg City Hall, City Council Chambers, located at 415 West University Drive, Edinburg, Texas, which time was not less than 15 days nor more than 20 days from the date of publication, and that said public hearing was held at such time and place, and all of which procedure in the giving of notice and the holding of said public hearing is hereby ratified and confirmed as meeting all the requirements of said Unified Development Code of the City of Edinburg, Texas and applicable statutes; and

WHEREAS, having held said public hearing, it is the opinion of the City Council of the City of Edinburg, Texas that such change and revision should be made.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF EDINBURG, TEXAS, THAT:

SECTION I. AUTHORITY OF LAW: All requirements of the law have been met in the passing of this Ordinance.

SECTION II. The zoning of the first above-described property is hereby changed from Agriculture and Open Space (AO) District to Commercial, General (CG) District and the boundaries of said Districts are hereby amended, supplemented and changed so as to delete the said area from the said Agriculture and Open Space (AO) District and added to Commercial, General (CG) District.

SECTION III. REPEALER CLAUSE: This Ordinance shall be cumulative of all other ordinances dealing with the same subject and any provision of any ordinance in direct conflict with any provision of this ordinance is hereby repealed and the provisions of this Ordinance shall supersede any provisions in conflict herewith; all provisions of any other ordinance not in conflict herewith shall remain in full force and effect.

SECTION IV. SAVINGS CLAUSE: If any section, part, or provision of this Ordinance is declared unconstitutional or invalid, by a court of competent jurisdiction, then, in that event, it is expressly provided, and it is the intention of the City Council in passing this Ordinance that its parts shall be severable and all other parts of this Ordinance shall not be affected thereby and they shall remain in full force and effect.

SECTION V. PUBLICATION AND EFFECTIVE DATE: This Ordinance shall take effect immediately upon its passage and publication according to law.

SECTION VI. CODIFICATION: That this Ordinance shall not be published in the Code of Ordinances of the City of Edinburg, Texas, as it is not amendatory thereof.

SECTION VII. WAIVER CLAUSE: This requirement of three separate readings of this Ordinance is hereby dispensed with by a vote of not less than a majority of all the members of the City Council.

READ, CONSIDERED, PASSED AND APPROVED at a regular meeting of the City Council of the City of Edinburg, Texas at which a quorum was present and which was held in accordance with V.T.C.A., Government Code, Section 551.041, on the 20th day of August 2024.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
PUBLIC HEARINGS
Agenda Item No: 7.B.
Rezoning Request - Rio Delta Engineering on Behalf of Marco Antonio Vera and Rabanal Limited

1. **Agenda Item:**
Hold Public Hearing and Consider the Ordinance Providing for the Rezoning Request from Industrial, General (IG) District to Commercial, General (CG) District, 1.02 Acres Being All of Lots 25, 26, 27 and out of Lot 15, Shuey Subdivision, Located at 1325 East Schunior Street, as Requested by Rio Delta Engineering on Behalf of Marco Antonio Vera and Rabanal Limited. **(A 4/5 vote is required by the City Council to overturn the Planning & Zoning Commission action.)** [Jaime Acevedo, Director of Planning & Zoning]

2. **Description:**
This property is located on the northwest corner of North Expressway 281 Frontage and East Schunior Road. The property has a total frontage of approximately 330 feet along North Expressway 281 Frontage and 150 feet along East Schunior Street for a total of 1.02 acres. The requested zoning designation is Commercial, General (CG) District which is the primary commercial district, meant to accommodate a wide range of commercial uses, including highway service uses and community or regional commercial, office, and service uses. It is intended to provide for a full range of community and regional scale commercial enterprises, including but not limited to retail, office, restaurant, entertainment, and service. Commercial property to the north was rezoned on April 4, 2017. The applicant is seeking a zone change to establish a commercial development.

Adjacent zoning districts are Commercial, General (CG) District to the north, and Industrial, General (IG) District to the south, east and west. Surrounding land consists of a mix of commercial uses and institutional uses. The future land use designation for this property is Industrial Uses.

Staff mailed a notice of the public hearing to 11 neighboring property owners on Friday, June 28, 2024, and received no comments in favor or against this request at the time this report was prepared. Notice of this public hearing was published in the newspaper on July 31, 2024.

The Planning & Zoning Commission recommended with a unanimous vote of 6-0 to approve the Rezoning Request. A 4/5 vote is required by the City Council to overturn the Planning & Zoning Commission action.

3. **Staff's Recommendation:**
Staff recommends approval of the Rezoning Request from Industrial, General (IG) District to Commercial, General (CG) District, based on adjacent zoning districts, and surrounding land uses in the area. If approved, the applicant will need to comply with all requirements during the permitting process including compliance with subdivision regulations, building/fire codes, fire protection, parking, landscape buffer-yards, solid waste services, utility, and other City requirements, as applicable.

DATE PREPARED – 06/28/2024

STAFF REPORT
GENERAL INFORMATION

APPLICATION: Rezoning Request from Industrial, General (IG) District to Commercial, General (CG) District

APPLICANT: Marco Antonio Vera and Rabanal Limited

AGENT: Rio Delta Engineering

LEGAL: 1.02 Acres Being all of Lots 25, 26, 27 and out of Lot 15, Shuey Subdivision

LOCATION: 1325 East Schunior Street

LOT/TRACT SIZE: 1.02 Acres

CURRENT USE: Vacant land

PROPOSED USE: Commercial Development

EXISTING ZONING: Industrial, General (IG) District

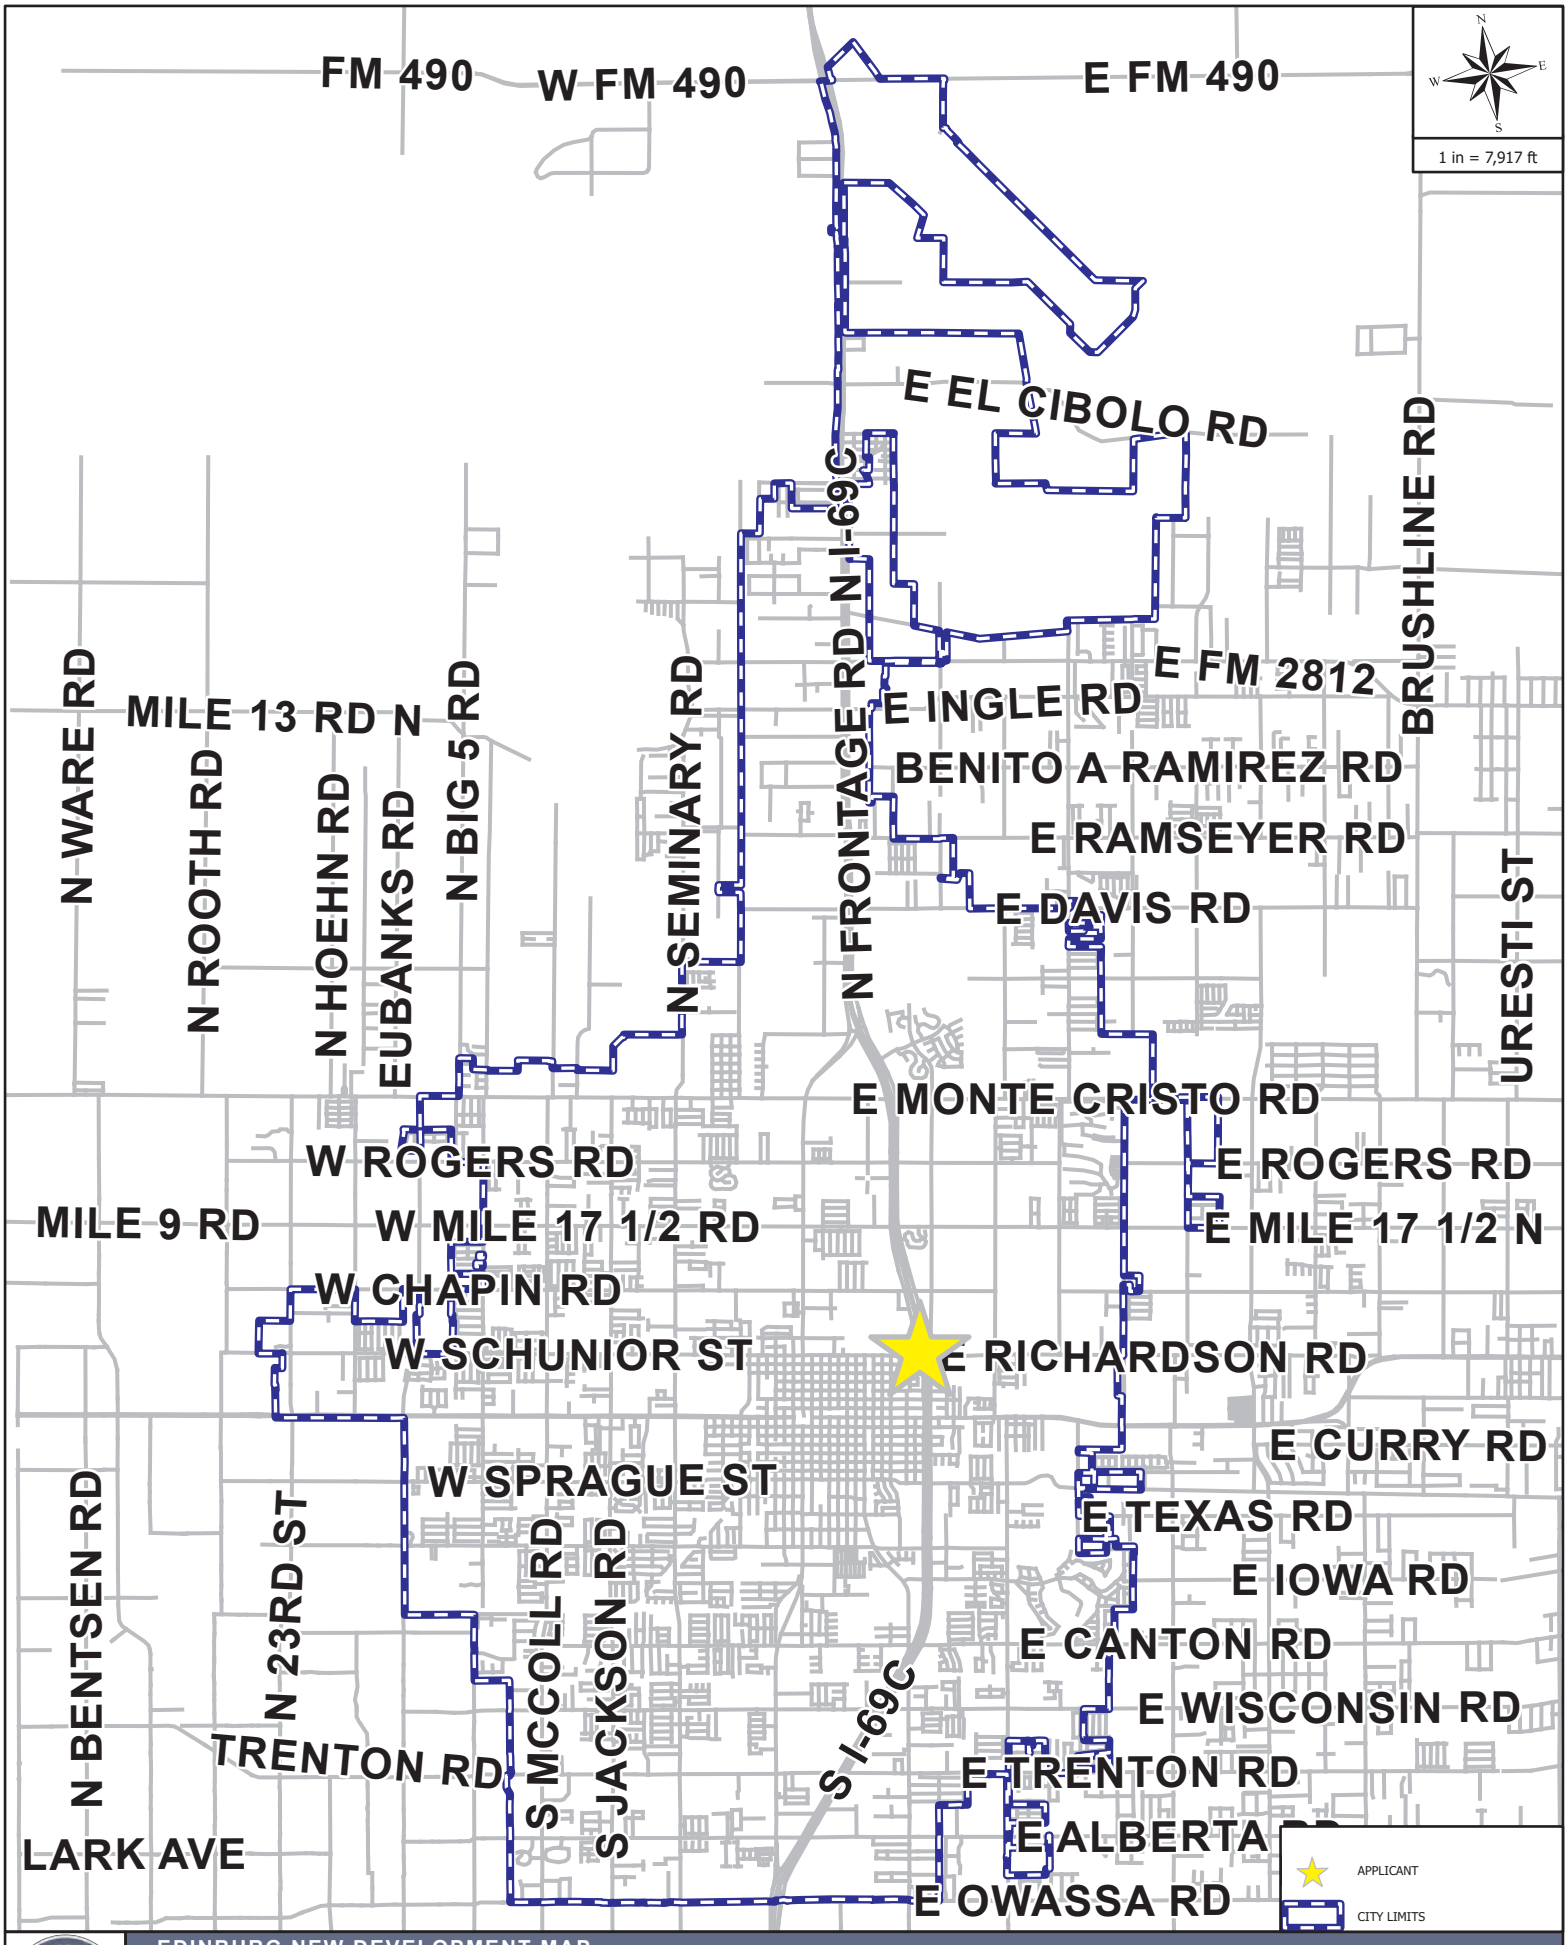
ADJACENT ZONING:
North – Commercial, General (CG) District
South – Industrial, General (IG) District
East – Industrial, General (IG) District
West – Industrial, General (IG) District

LAND USE PLAN: Industrial Uses

PUBLIC SERVICES: City of Edinburg Water and Sewer

RECOMMENDATION: Staff recommends approval of the Rezoning Request from Industrial, General (IG) District to Commercial, General (CG) District

REZONING REQUEST
RIO DELTA ENGINEERING ON BEHALF OF MARCO ANTONIO VERA AND RABANAL LIMITED

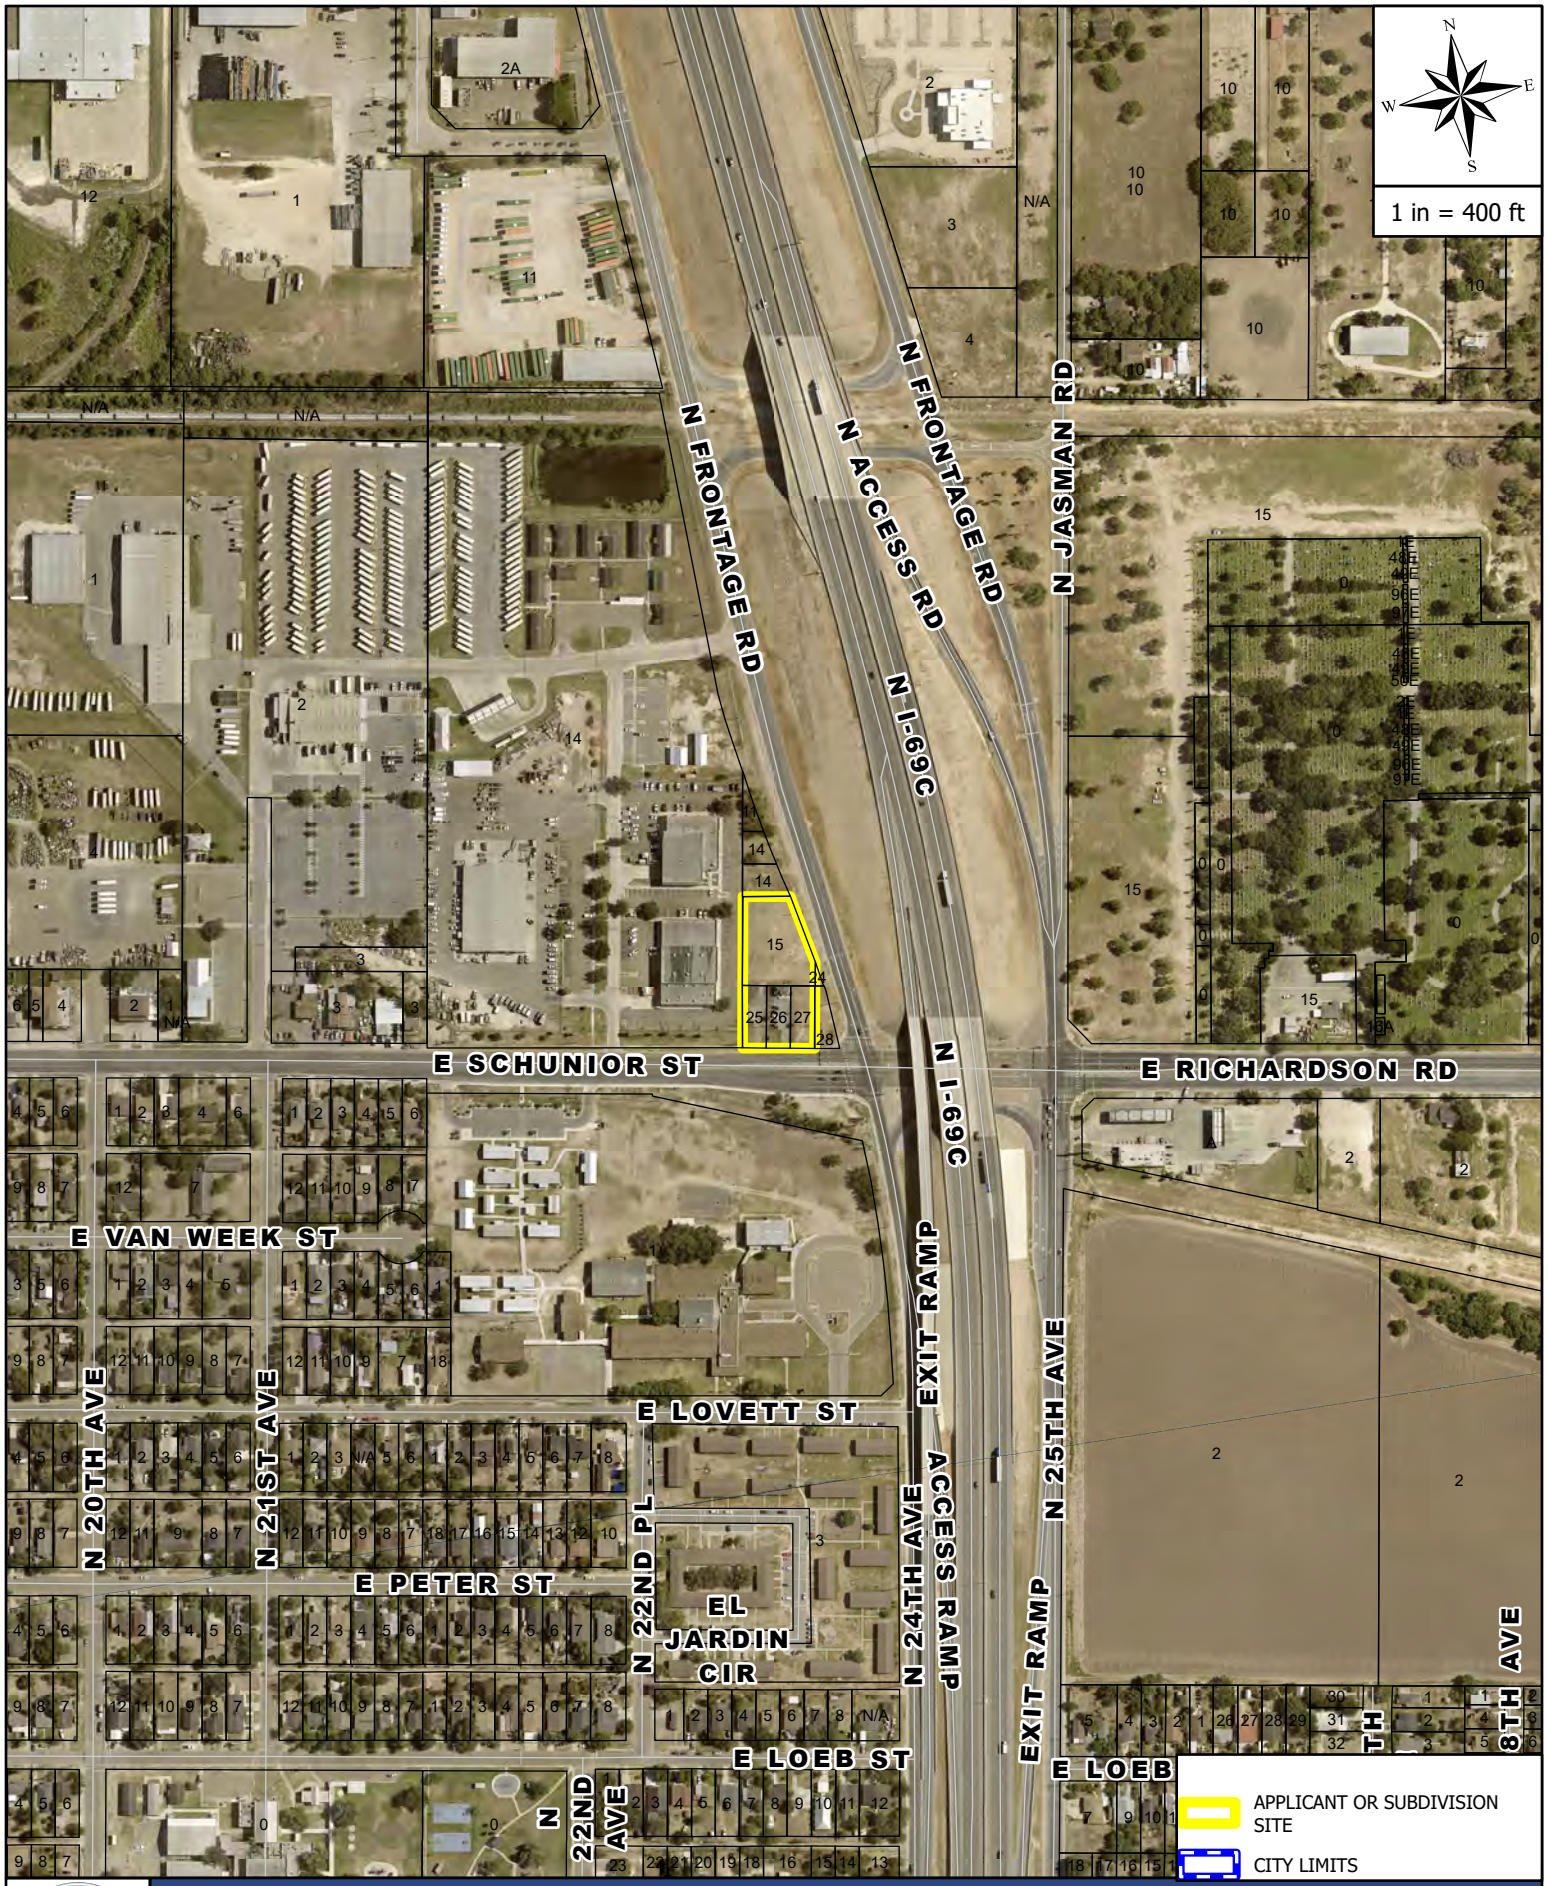


EVALUATION

The following is the staff's evaluation of the request:

1. Surrounding land consists of a mix of commercial and institutional uses.
2. The proposed zoning would be consistent with the adjacent uses in the area.
3. The proposed zoning is not consistent with the Future Land Use Plan.

Staff recommends approval of the Rezoning Request from Industrial, General (IG) District to Commercial, General (CG) District, based on adjacent zoning districts, and surrounding land uses in the area. If approved, the applicant will need to comply with all requirements during the permitting process including compliance with subdivision regulations, building/fire codes, fire protection, parking, landscape buffer-yards, solid waste services, utility, and other City requirements, as applicable.



Staff mailed a notice of the public hearing to 11 neighboring property owners on Friday, June 28, 2024, and received no comments in favor or against this request at the time this report was prepared. Notice of this public hearing was published in the newspaper on July 31, 2024.

ISSUED FOR: PRELIMINARY

STORM PAVING & DRAINAGE LAYOUT
POULTRY SUBDIVISION
CITY OF EDINBURG
HIDALGO COUNTY, TEXAS

DESIGNED:	IVAN GARCIA P.E. R.P.L.S.
SURVEYED:	IVAN GARCIA P.E. R.P.L.S.
DRAWN:	Y.V
SCALE:	1"=20'
DATE:	MAY 31, 2024
PROJECT:	SUB 24 015
REVISIONS:	
PAGE NO.	SHT 5

GENERAL NOTES

1. Hay bales shall be a minimum of 30" in length and weigh a minimum of 50 Lbs.
2. Hay bales shall be bound by either wire or nylon or polypropylene string. The bales shall be composed entirely of vegetative matter.
3. Hay bales shall be embedded in the soil a minimum of 4" and where possible 1/2 the height of the bale.
4. Hay bales shall be placed in a row with ends tightly abutting the adjacent bales. The bales shall be placed with bindings parallel to the ground.
5. Hay bales shall be securely anchored in place with 3/8" Dia. rebar or 2" x 2" wood stakes, driven through the bales. The first stake shall be angled towards the previously laid bale to force the bales together.
6. The guidelines shown hereon are suggestions only and may be modified by the Engineer.
7. The proposed construction entrance will be the only entrance to the site, except for emergency access, used throughout the duration of the construction, or until the proposed drives are paved.
8. The silt fence shall be maintained in place until the site is vegetated.
9. The construction entrance aggregate shall be replaced as needed.
10. All exposed entrance to storm drain pipes and to storm inlets, once installed, shall be protected against sedimentary flows until the development and landscaping has been completed.

BALED HAY USAGE GUIDELINES

A Baled Hay installation may be constructed near the downstream perimeter of a disturbed are along a contour to intercept sediment from overland runoff. A two year storm frequency may be used to calculate the flow rate to be filtered. The installation should be sized to filter a maximum flow thru rate of 30PM/FT² of cross sectional area. Baled hay may be used at may be used at the following locations:

1. Where the runoff approaching the baled hay flows over disturbed soil for less than 100'. If the slope of the disturbed soil exceeds 10%, the length of slope upstream the baled hay should be less than 50'.
2. Where the installation will be required for less than 3 months.
3. Where the contributing drainage area is less than 1/2 acre.

For Baled Hay installations in small ditches, the additional following considerations apply:

1. The ditch sideslope should be graded as flat as possible to maximize the drainage flowrate thru the hay.
2. The ditch should be graded large enough to contain the overtopping drainage when sediment has filled to the top of the baled hay.

Bales should be replaced usually every 2 months or more often during rot weather when loss of structural integrity is accelerated.

EXHIBIT A
TRACT 1 -1.02 ACRES
BEING ALL OF LOTS 25, 26, 27 AND OUT OF LOT 15
SHUEY SUBDIVISION
VOL. 8, PG. 33, MAP RECORDS OF
HIDALGO COUNTY, TEXAS

BEING 1.02 ACRES TRACT OF LAND MORE OR LESS, SITUATED IN THE CITY OF EDINBURG, HIDALGO COUNTY, TEXAS, SAID 1.02 ACRES BEING ALL OF LOTS 25, 26, 27 AND BEING OUT OF AND FORMING PART OF LOT 15, SHUEY SUBDIVISION, RECORDED IN VOLUME 8, PAGE 33, MAP RECORDS OF HIDALGO COUNTY, TEXAS, AND SAID 1.02 ACRES TRACT OF LAND BEING MORE PARTICULARLY DESCRIBED BY METES AND BOUNDS AS FOLLOWS;

BEGINNING AT THE SOUTHWEST CORNER OF THE SAID LOT 25, SAME BEING A POINT ON THE EXISTING NORTH RIGHT-OF-WAY LINE OF SCHUNIOR ROAD, FOR THE SOUTHWEST CORNER OF THE HEREIN DESCRIBED TRACT AND THE **POINT OF BEGINNING;**

THENCE, N 08° 51' 32" E ALONG THE EAST LINE OF LOTS 25 AND 15, TO THE NORTHWEST CORNER OF THE SAID LOT 15, A DISTANCE OF 315.80 FEET TO A CALCULATED POINT FOR THE NORTHWEST CORNER OF THE HEREIN DESCRIBED TRACT;

THENCE, S 81° 10' 25" E ALONG THE NORTH LINE OF THE SAID LOT 15, TO A POINT ON THE EXISTING WEST RIGHT-OF-WAY LINE OF U.S. HIGHWAY 281, A DISTANCE OF 95.85 FEET TO A CALCULATED POINT FOR THE NORTHEAST CORNER OF THE HEREIN DESCRIBED TRACT;

THENCE, S 14° 07' 03" E ACROSS THE SAID LOT 15, SAME BEING ALONG THE EXISTING WEST RIGHT-OF-WAY LINE U.S. HIGHWAY 281, A DISTANCE OF 12.70 FEET TO A ½-INCH CAPPED IRON ROD SET FOR A CORNER POINT OF THE HEREIN DESCRIBED TRACT;

THENCE, IN A SOUTHEASTERLY DIRECTION ALONG THE EXISTING WEST RIGHT-OF-WAY LINE OF U.S. HIGHWAY 281, TO A POINT ON THE EAST LINE OF THE SAID LOT 15, A CURVE TO THE RIGHT, WITH AN ARC LENGTH OF 128.21 FEET, A RADIUS OF 2864.79 FEET, AND A DELTA OF 2.56 FEET TO A ½-INCH CAPPED IRON ROD SET FOR A CORNER POINT OF THE HEREIN DESCRIBED TRACT;

THENCE, S 08° 51' 32" W ALONG THE EAST LINE OF THE SAID LOT 15, TO THE SOUTHEAST CORNER OF THE SAID LOT 15, A DISTANCE OF 54.96 FEET TO A ½-INCH CAPPED IRON ROD SET FOR A CORNER POINT OF THE HEREIN DESCRIBED TRACT;

THENCE, N 81° 10' 25" W ALONG THE SOUTH LINE OF THE SAID LOT 15, TO THE NORTHEAST CORNER OF THE SAID LOT 27, A DISTANCE OF 1.20 FEET TO A ½-INCH CAPPED IRON ROD SET FOR A CORNER POINT OF THE HEREIN DESCRIBED TRACT;

THENCE, S 8° 51' 32" W ALONG THE EAST LINE OF THE SAID LOT 27, TO THE SOUTHEAST CORNER OF THE SAID LOT 27, SAME BEING A POINT ON THE EXISTING NORTH RIGHT-OF-WAY LINE OF SCHUNIOR ROAD, A DISTANCE OF 130.00 FEET TO A ½-INCH CAPPED IRON ROD SET FOR THE SOUTHEAST CORNER OF THE HEREIN DESCRIBED TRACT;

THENCE, N 81° 10' 25" W ALONG THE SOUTH LINE OF THE SAID LOTS 27, 26 AND 25, SAME BEING ALONG THE EXISTING NORTH RIGHT-OF-WAY LINE OF SCHUNIOR ROAD, A DISTANCE OF 150.00 FEET TO THE **POINT AND PLACE OF BEGINNING, SAID TRACT CONTAINING 1.02 ACRES TRACT OF LAND, MORE OR LESS.**

I, IVAN GARCIA, CERTIFY THAT THE ABOVE FIELDNOTES AND PLAT REPRESENT AN ACTUAL SURVEY ON THE GROUND MADE UNDER MY SUPERVISION AND THAT ALL CORNERS HAVE BEEN LOCATED AS INDICATED.

ORDINANCE NO. _____

AN ORDINANCE AMENDING, SUPPLEMENTING, AND CHANGING THE BOUNDARIES OF THE INDUSTRIAL, GENERAL (IG) DISTRICT TO COMMERCIAL, GENERAL (CG) DISTRICT, 1.02 ACRES BEING ALL OF LOTS 25, 26, 27 AND OUT OF LOT 15, SHUEY SUBDIVISION, LOCATED AT 1325 EAST SCHUNIOR STREET, EDINBURG, HIDALGO COUNTY, TEXAS, FROM ONE DISTRICT TO ANOTHER; PROVIDING A REPEALER CLAUSE; PROVIDING A SAVINGS CLAUSE; PROVIDING FOR PUBLICATION AND EFFECTIVE DATE; PROVIDING FOR CODIFICATION; PROVIDING A WAIVER OF THE THREE (3) SEPARATE READINGS; AND ORDAINING OTHER PROVISIONS RELATED TO THE SUBJECT MATTER HEREOF.

WHEREAS, the owner of the herein described real estate has submitted to the Planning and Zoning Commission of the City of Edinburg, Texas, a proposed amendment, and the proposed supplement and change to the boundaries of the Industrial, General (IG) District and the Commercial, General (CG) District, as set out in the Unified Development Code of the City of Edinburg, Texas, heretofore finally passed, approved, and adopted by said City Council on the 9th day of August, 2022. Such proposed amendment is to change the zoning of all of 1.02 Acres Being all of Lots 25, 26, 27 and out of Lot 15, Shuey Subdivision, Located at 1325 East Schunior Street, Edinburg, Hidalgo County, Texas, from Industrial, General (IG) District to Commercial, General (CG) District, for a recommendation and report by said Planning and Zoning Commission; and

WHEREAS, the said Planning and Zoning Commission of the City of Edinburg, Texas, gave due notice as provided by said Unified Development Code of a public hearing to be held before said Planning and Zoning Commission, on July 9, 2024, at 5:30 P.M., in the Edinburg City Hall, City Council Chambers, located at 415 West University Drive, Edinburg, Texas, and said public hearing was held at such time and place, and all of which procedure in the giving of notice and the holding of said public hearing is hereby ratified and confirmed as meeting all the requirements of said Unified Development Code of the City of Edinburg, Texas and applicable statutes, providing said notice by U. S. Mail to all property owners and persons rendering property for taxation within 300 feet of the property affected not less than ten (10) days before said public hearing; and

WHEREAS, after such public hearing, the Planning and Zoning Commission of the City of Edinburg, Texas, presented its report to the City Council of the City of Edinburg that they approved the change in zoning of said property, from one district to the other; and

WHEREAS, after receipt of the final report from the Planning and Zoning Commission, the City Council of said City provided due notice, as provided by said Unified Development Code to be held before said City Council, and notice was published one time in a newspaper published in the City of Edinburg, Texas, and of general circulation in said City, stating that a public hearing

to consider said proposed revision would be held on August 20, 2024 at 6:00 P.M., in the Edinburg City Hall, City Council Chambers, located at 415 West University Drive, Edinburg, Texas, which time was not less than 15 days nor more than 20 days from the date of publication, and that said public hearing was held at such time and place, and all of which procedure in the giving of notice and the holding of said public hearing is hereby ratified and confirmed as meeting all the requirements of said Unified Development Code of the City of Edinburg, Texas and applicable statutes; and

WHEREAS, having held said public hearing, it is the opinion of the City Council of the City of Edinburg, Texas that such change and revision should be made.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF EDINBURG, TEXAS, THAT:

SECTION I. AUTHORITY OF LAW: All requirements of the law have been met in the passing of this Ordinance.

SECTION II. The zoning of the first above-described property is hereby changed from Industrial, General (IG) District to Commercial, General (CG) District and the boundaries of said Districts are hereby amended, supplemented and changed so as to delete the said area from the said Industrial, General (IG) District and added to Commercial, General (CG) District.

SECTION III. REPEALER CLAUSE: This Ordinance shall be cumulative of all other ordinances dealing with the same subject and any provision of any ordinance in direct conflict with any provision of this ordinance is hereby repealed and the provisions of this Ordinance shall supersede any provisions in conflict herewith; all provisions of any other ordinance not in conflict herewith shall remain in full force and effect.

SECTION IV. SAVINGS CLAUSE: If any section, part, or provision of this Ordinance is declared unconstitutional or invalid, by a court of competent jurisdiction, then, in that event, it is expressly provided, and it is the intention of the City Council in passing this Ordinance that its parts shall be severable and all other parts of this Ordinance shall not be affected thereby and they shall remain in full force and effect.

SECTION V. PUBLICATION AND EFFECTIVE DATE: This Ordinance shall take effect immediately upon its passage and publication according to law.

SECTION VI. CODIFICATION: That this Ordinance shall not be published in the Code of Ordinances of the City of Edinburg, Texas, as it is not amendatory thereof.

SECTION VII. WAIVER CLAUSE: This requirement of three separate readings of this Ordinance is hereby dispensed with by a vote of not less than a majority of all the members of the City Council.

READ, CONSIDERED, PASSED AND APPROVED at a regular meeting of the City Council of the City of Edinburg, Texas at which a quorum was present and which was held in accordance with V.T.C.A., Government Code, Section 551.041, on the 20th day of August 2024.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
PUBLIC HEARINGS
Agenda Item No: 7.C.
Rezoning Request - Julio Montemayor

1. **Agenda Item:**
Hold Public Hearing and Consider the Ordinance Providing for the Rezoning Request from Residential, Primary (RP) District to Residential, Multi-family (RM) District, Being All of Lot 5, Iowa Estates, Located at 2110 East Iowa Road, as Requested by Julio Montemayor. **(A 4/5 vote is required by the City Council to overturn the Planning & Zoning Commission action.)** [Jaime Acevedo, Director of Planning & Zoning]

2. **Description:**
This property is located on the south side of East Iowa Road approximately 150 feet west of Citrus Lane. The property has a total frontage of 82 feet along East Iowa Road and a depth of 140 feet for a total of 11,480 square feet. The requested zoning designation is Residential, Multi-family (RM) District which is a high-intensity residential district intended to accommodate various multi- family residential uses (2 or more dwelling units on a single lot). The district includes auto-urban and higher densities meant to meet the community's need for infill and rental housing. The applicant is seeking a zone change to establish a multi-family development.

Adjacent zoning districts are Residential, Primary (RP) District in all directions. Surrounding land consists of a mix of single-family residential uses and multi-family uses. The future land use designation for this property is Auto Urban Uses.

Staff mailed a notice of the public hearing to 35 neighboring property owners on Friday, June 28, 2024, and received no comments in favor and 3 comments against this request at the time this report was prepared. Notice of this public hearing was published in the newspaper on July 31, 2024.

The Planning & Zoning Commission recommended with a unanimous vote of 6-0 to approve the Rezoning Request. A 4/5 vote is required by the City Council to overturn the Planning & Zoning Commission action.

3. **Staff's Recommendation:**
Staff recommends approval of the Rezoning Request from Residential, Primary (RP) District to Residential, Multi-family (RM) District, based on adjacent zoning districts, surrounding land uses and densities in the area. If approved, the applicant will need to comply with all requirements during the permitting process including compliance with subdivision regulations, building/fire codes, fire protection, parking, landscape buffer-yards, solid waste services, utility, and other City requirements, as applicable.

STAFF REPORT
GENERAL INFORMATION

APPLICATION: Rezoning Request from Residential, Primary (RP) District to Residential, Multifamily (RM) District

APPLICANT: Julio Montemayor

AGENT: Not Applicable

LEGAL: Being all of Lot 5, Iowa Estates

LOCATION: 2110 East Iowa Road

LOT/TRACT SIZE: 11,480 square feet

CURRENT USE: Vacant land

PROPOSED USE: Vacant Land

EXISTING ZONING: Residential, Primary (RP) District

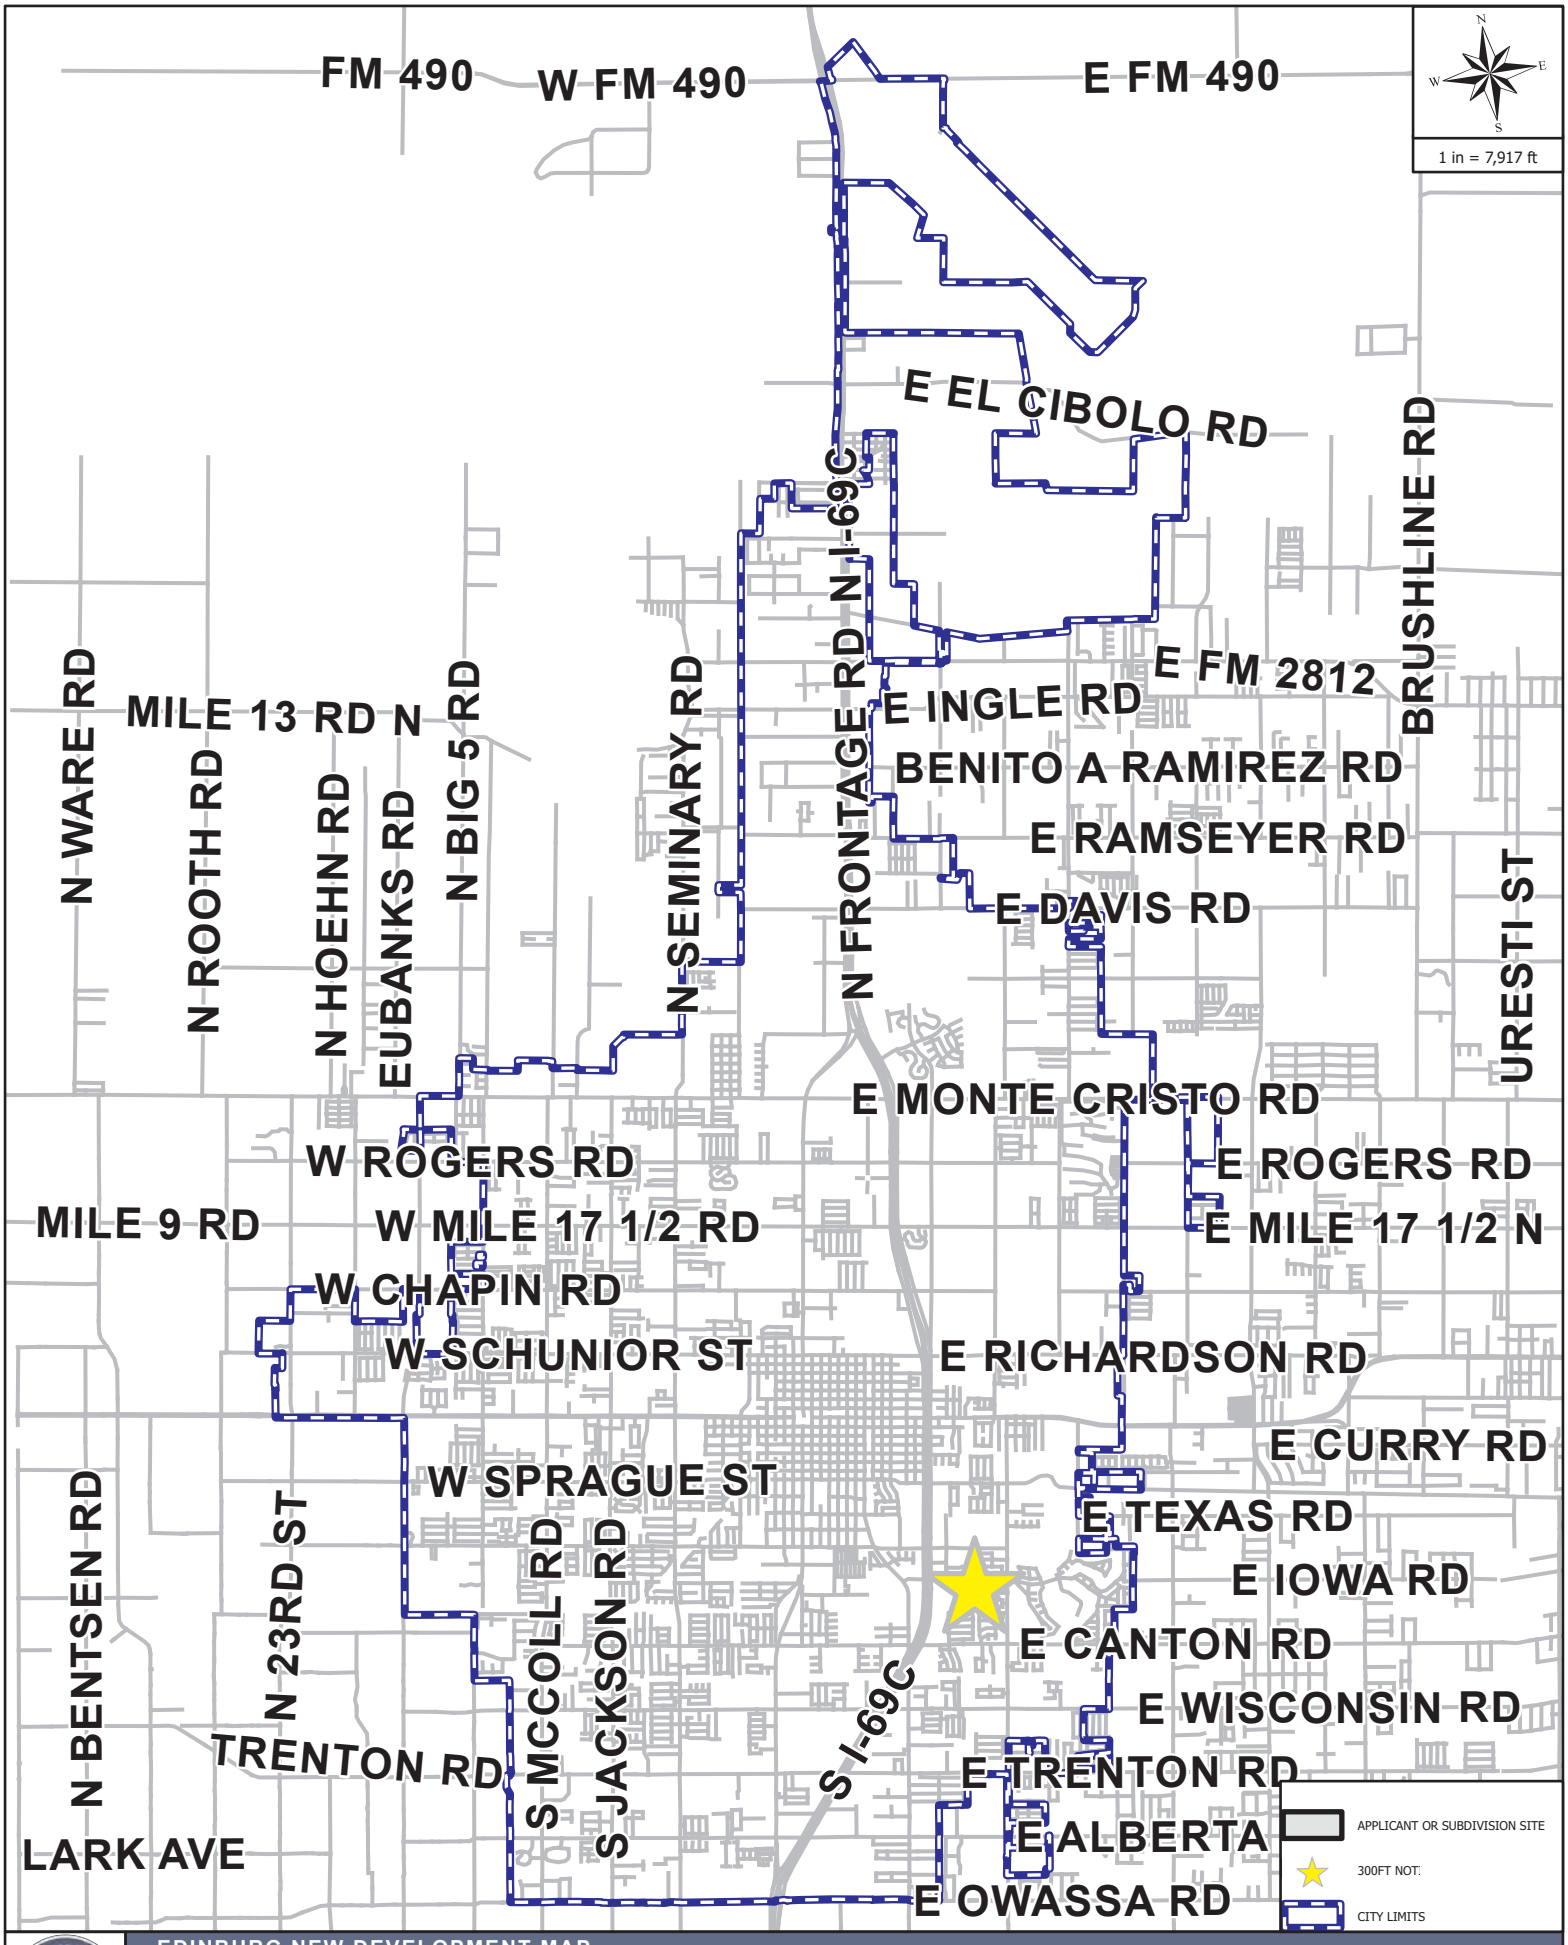
ADJACENT ZONING:
North – Residential, Primary (RP) District
South – Residential, Primary (RP) District
East – Residential, Primary (RP) District
West – Residential, Primary (RP) District

LAND USE PLAN: Auto Urban Uses

PUBLIC SERVICES: North Alamo Water Supply Corporation Water and City of Edinburg Sewer

RECOMMENDATION: Staff recommends approval of the Rezoning Request from Residential, Primary (RP) District to Residential, Multifamily (RM) District

REZONING REQUEST
JULIO MONTEMAYOR

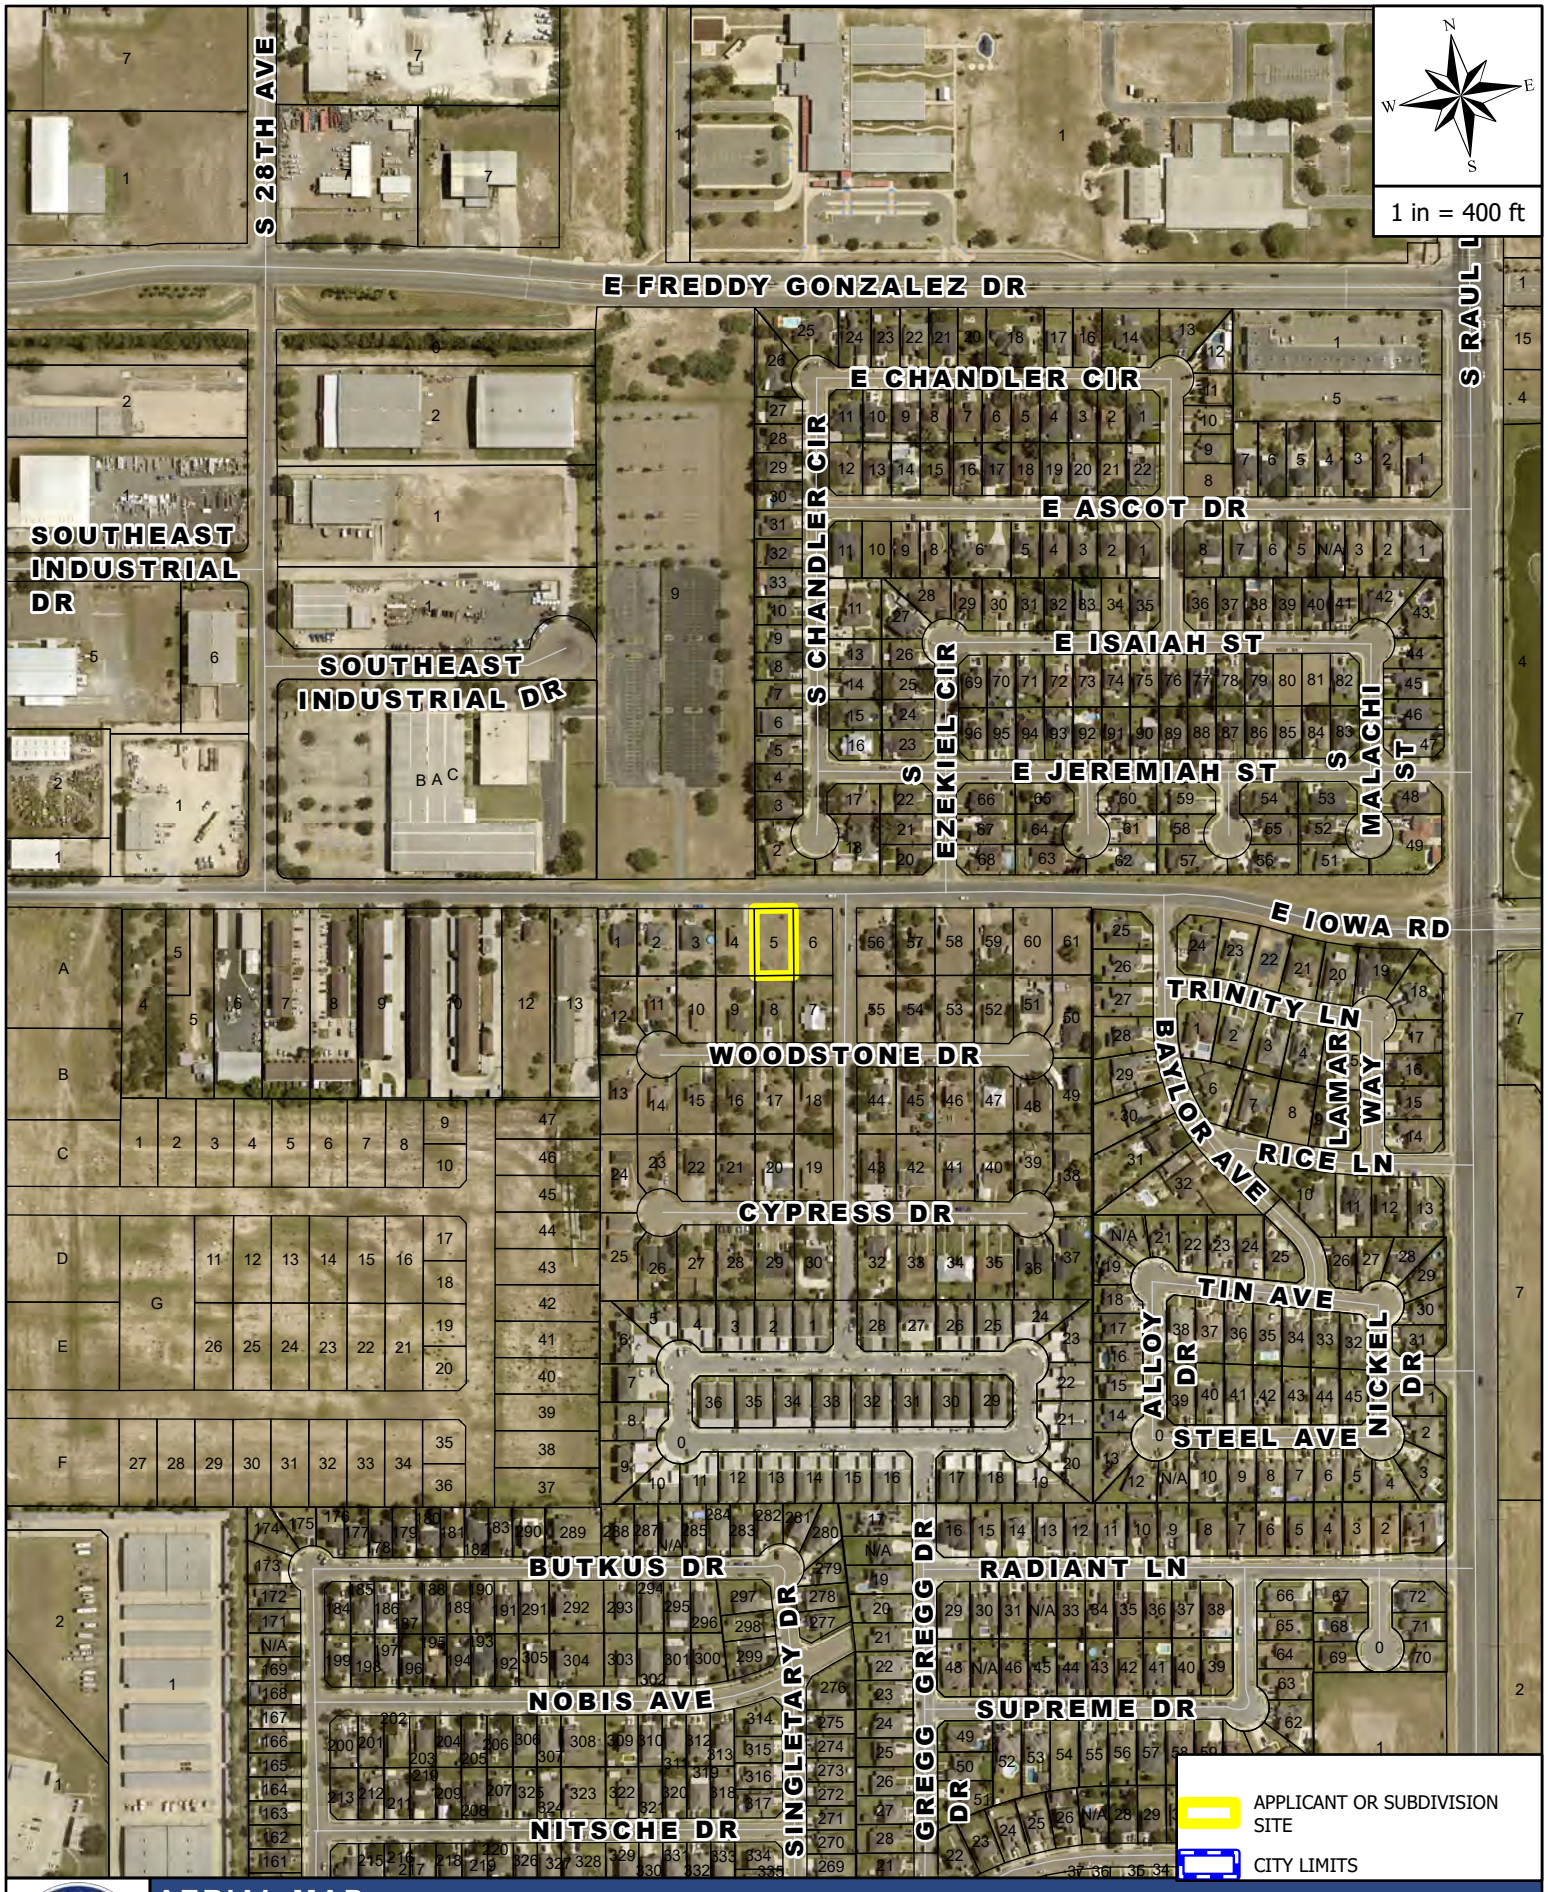


EVALUATION

The following is the staff's evaluation of the request:

1. Surrounding land consists of a mix of single-family residential uses and multi-family uses.
2. The proposed zoning would be consistent with the adjacent uses in the area.
3. The proposed zoning is consistent with the Future Land Use Plan.

Staff recommends approval of the Rezoning Request from Residential, Primary (RP) District to Residential, Multifamily (RM) District, based on adjacent zoning districts, surrounding land uses and densities in the area. If approved, the applicant will need to comply with all requirements during the permitting process including compliance with subdivision regulations, building/fire codes, fire protection, parking, landscape buffer-yards, solid waste services, utility, and other City requirements, as applicable.



Staff mailed a notice of the public hearing to 35 neighboring property owners on Friday, June 28, 2024, and received no comments in favor and 3 comments against this request at the time this report was prepared. Notice of this public hearing was published in the newspaper on July 31, 2024.

THE CITY OF Edinburg

NOTIFICATION

Dear Property Owner:

A public hearing will be held on **Tuesday, July 9, 2024, at 5:30 P.M.** in the Edinburg City Hall, City Council Chambers, located at 415 West University Drive, at which time the Planning and Zoning Commission will address the following:

CONSIDER THE REZONING REQUEST FROM RESIDENTIAL, PRIMARY (RP) DISTRICT TO RESIDENTIAL, MULTIFAMILY (RM) DISTRICT, BEING ALL OF LOT 5, IOWA ESTATES, LOCATED AT 2110 EAST IOWA ROAD, AS REQUESTED BY JULIO MONTEMAYOR

This district is a high intensity residential district intended to accommodate various multifamily residential uses (2 or more dwelling units on a single lot).

This request is scheduled to be heard by the **City Council on Tuesday, August 20, 2024, at 6:00 P.M.** As a property owner within 300 ft. of the subject property, you are invited to attend. Please note that meeting time (s) and date (s) are subject to change. Therefore; please call on the date of the meeting to assure that the item is on the agenda. As part of the City effort to encourage greater participation in the rezoning process, **the City is using this notice to solicit your input, but no action or response is required**. Should you have any questions or need more information regarding this notice, you may call (956) 388-8202.

You may return your response by one of the following:
MAIL: P. O. Box 1079 Edinburg, Texas 78540
FAX: (956) 292-2080 by Monday, July 8, 2024

ORDINANCE NO. _____

AN ORDINANCE AMENDING, SUPPLEMENTING, AND CHANGING THE BOUNDARIES OF THE RESIDENTIAL, PRIMARY (RP) DISTRICT TO RESIDENTIAL, MULTIFAMILY (RM) DISTRICT, BEING ALL OF LOT 5, IOWA ESTATES, LOCATED AT 2110 EAST IOWA ROAD, EDINBURG, HIDALGO COUNTY, TEXAS, FROM ONE DISTRICT TO ANOTHER; PROVIDING A REPEALER CLAUSE; PROVIDING A SAVINGS CLAUSE; PROVIDING FOR PUBLICATION AND EFFECTIVE DATE; PROVIDING FOR CODIFICATION; PROVIDING A WAIVER OF THE THREE (3) SEPARATE READINGS; AND ORDAINING OTHER PROVISIONS RELATED TO THE SUBJECT MATTER HEREOF.

WHEREAS, the owner of the herein described real estate has submitted to the Planning and Zoning Commission of the City of Edinburg, Texas, a proposed amendment, and the proposed supplement and change to the boundaries of the Residential, Primary (RP) District and the Residential, Multifamily (RM) District, as set out in the Unified Development Code of the City of Edinburg, Texas, heretofore finally passed, approved, and adopted by said City Council on the 9th day of August, 2022. Such proposed amendment is to change the zoning of all of Being all of Lot 5, Iowa Estates, Located at 2110 East Iowa Road, Edinburg, Hidalgo County, Texas, from Residential, Primary (RP) District to Residential, Multifamily (RM) District, for a recommendation and report by said Planning and Zoning Commission; and

WHEREAS, the said Planning and Zoning Commission of the City of Edinburg, Texas, gave due notice as provided by said Unified Development Code of a public hearing to be held before said Planning and Zoning Commission, on July 9, 2024, at 5:30 P.M., in the Edinburg City Hall, City Council Chambers, located at 415 West University Drive, Edinburg, Texas, and said public hearing was held at such time and place, and all of which procedure in the giving of notice and the holding of said public hearing is hereby ratified and confirmed as meeting all the requirements of said Unified Development Code of the City of Edinburg, Texas and applicable statutes, providing said notice by U. S. Mail to all property owners and persons rendering property for taxation within 300 feet of the property affected not less than ten (10) days before said public hearing; and

WHEREAS, after such public hearing, the Planning and Zoning Commission of the City of Edinburg, Texas, presented its report to the City Council of the City of Edinburg that they approved the change in zoning of said property, from one district to the other; and

WHEREAS, after receipt of the final report from the Planning and Zoning Commission, the City Council of said City provided due notice, as provided by said Unified Development Code to be held before said City Council, and notice was published one time in a newspaper published in the City of Edinburg, Texas, and of general circulation in said City, stating that a public hearing to consider said proposed revision would be held on August 20, 2024 at 6:00 P.M., in the Edinburg

City Hall, City Council Chambers, located at 415 West University Drive, Edinburg, Texas, which time was not less than 15 days nor more than 20 days from the date of publication, and that said public hearing was held at such time and place, and all of which procedure in the giving of notice and the holding of said public hearing is hereby ratified and confirmed as meeting all the requirements of said Unified Development Code of the City of Edinburg, Texas and applicable statutes; and

WHEREAS, having held said public hearing, it is the opinion of the City Council of the City of Edinburg, Texas that such change and revision should be made.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF EDINBURG, TEXAS, THAT:

SECTION I. AUTHORITY OF LAW: All requirements of the law have been met in the passing of this Ordinance.

SECTION II. The zoning of the first above-described property is hereby changed from Residential, Primary (RP) District to Residential, Multifamily (RM) District and the boundaries of said Districts are hereby amended, supplemented and changed so as to delete the said area from the said Residential, Primary (RP) District and added to Residential, Multifamily (RM) District.

SECTION III. REPEALER CLAUSE: This Ordinance shall be cumulative of all other ordinances dealing with the same subject and any provision of any ordinance in direct conflict with any provision of this ordinance is hereby repealed and the provisions of this Ordinance shall supersede any provisions in conflict herewith; all provisions of any other ordinance not in conflict herewith shall remain in full force and effect.

SECTION IV. SAVINGS CLAUSE: If any section, part, or provision of this Ordinance is declared unconstitutional or invalid, by a court of competent jurisdiction, then, in that event, it is expressly provided, and it is the intention of the City Council in passing this Ordinance that its parts shall be severable and all other parts of this Ordinance shall not be affected thereby and they shall remain in full force and effect.

SECTION V. PUBLICATION AND EFFECTIVE DATE: This Ordinance shall take effect immediately upon its passage and publication according to law.

SECTION VI. CODIFICATION: That this Ordinance shall not be published in the Code of Ordinances of the City of Edinburg, Texas, as it is not amendatory thereof.

SECTION VII. WAIVER CLAUSE: This requirement of three separate readings of this Ordinance is hereby dispensed with by a vote of not less than a majority of all the members of the City Council.

READ, CONSIDERED, PASSED AND APPROVED at a regular meeting of the City Council of the City of Edinburg, Texas at which a quorum was present and which was held in accordance with V.T.C.A., Government Code, Section 551.041, on the 20th day of August 2024.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
PUBLIC HEARINGS
Agenda Item No: 7.D.
Rezoning Request - Melden and Hunt on behalf of Creative Hotel Group, LLC.

1. **Agenda Item:**
Hold Public Hearing and Consider the Ordinance Providing for the Rezoning Request from Residential, Primary (RP) District to Residential, Urban & Townhome (RU) District, Being 39.334 Acres Out of Lot 5, Section 248, Texas-Mexican Railway Company's Survey, Located at 3200 North M Road, as Requested by Melden and Hunt on Behalf of Creative Hotel Group, LLC. **(A 4/5 vote is required by the City Council to overturn the Planning & Zoning Commission action.)** [Jaime Acevedo, Director of Planning & Zoning]

2. **Description:**
This property is located on the northeast corner of East Rogers Road and North M Road. The property has a total frontage of 1319.40 feet along East Rogers Road and 1,320 feet along North M Road for a total of 39.334 acres. The requested zoning designation is Residential, Urban & Townhome (RU) District, the highest - intensity single-family residential district. The district includes auto-urban and higher densities meant to meet the community's need for more compact developments, walkable areas, and affordable housing. The applicant is seeking a zone change to establish a single-family residential development. The property is currently undergoing the subdivision process under the name Sorento Estates which consists of 242 single - family residential lots.

Adjacent zoning districts are Residential, Primary (RP) District to the north, Agriculture and Open Space (AO) District to the west, Residential, Manufactured Home (RMF) District to the east, and Residential, Suburban (RS) District, Residential, Primary, (RP) District, and Agriculture and Open Space (AO) District to the south. Surrounding land consists of a mix of single-family homes, manufactured homes, vacant land and multi-family uses. The future land use designation for this property is Auto Urban Uses.

Staff mailed a notice of the public hearing to 103 neighboring property owners on Friday, June 28, 2024, and received no comments in favor and 1 comment against this request at the time this report was prepared. Notice of this public hearing was published in the newspaper on July 31, 2024.

The Planning & Zoning Commission recommended with a unanimous vote of 6-0 to approve the Rezoning Request. A 4/5 vote is required by the City Council to overturn the Planning & Zoning Commission action.

3. **Staff's Recommendation:**
Staff recommends approval of the Rezoning Request from Residential, Primary (RP) District to Residential, Urban & Townhome (RU) District, based on adjacent zoning districts, surrounding land uses, and densities in the area. If approved, the applicant will need to comply with all requirements during the permitting process including compliance with subdivision regulations, building/fire codes, fire protection, parking, landscape buffer-yards, solid waste services, utility, and other City requirements, as applicable.

STAFF REPORT
GENERAL INFORMATION

APPLICATION: Rezoning Request from Residential, Primary (RP) District to Residential, Urban & Townhome (RU) District

APPLICANT: Creative Hotel Group, LLC

AGENT: Melden and Hunt

LEGAL: Being 39.334 acres out of Lot 5, Section 248, Texas-Mexican Railway Company's Survey

LOCATION: 3200 North M Road

LOT/TRACT SIZE: 39.334 acres

CURRENT USE: Vacant land

PROPOSED USE: Single Family

EXISTING ZONING: Residential, Primary (RP) District

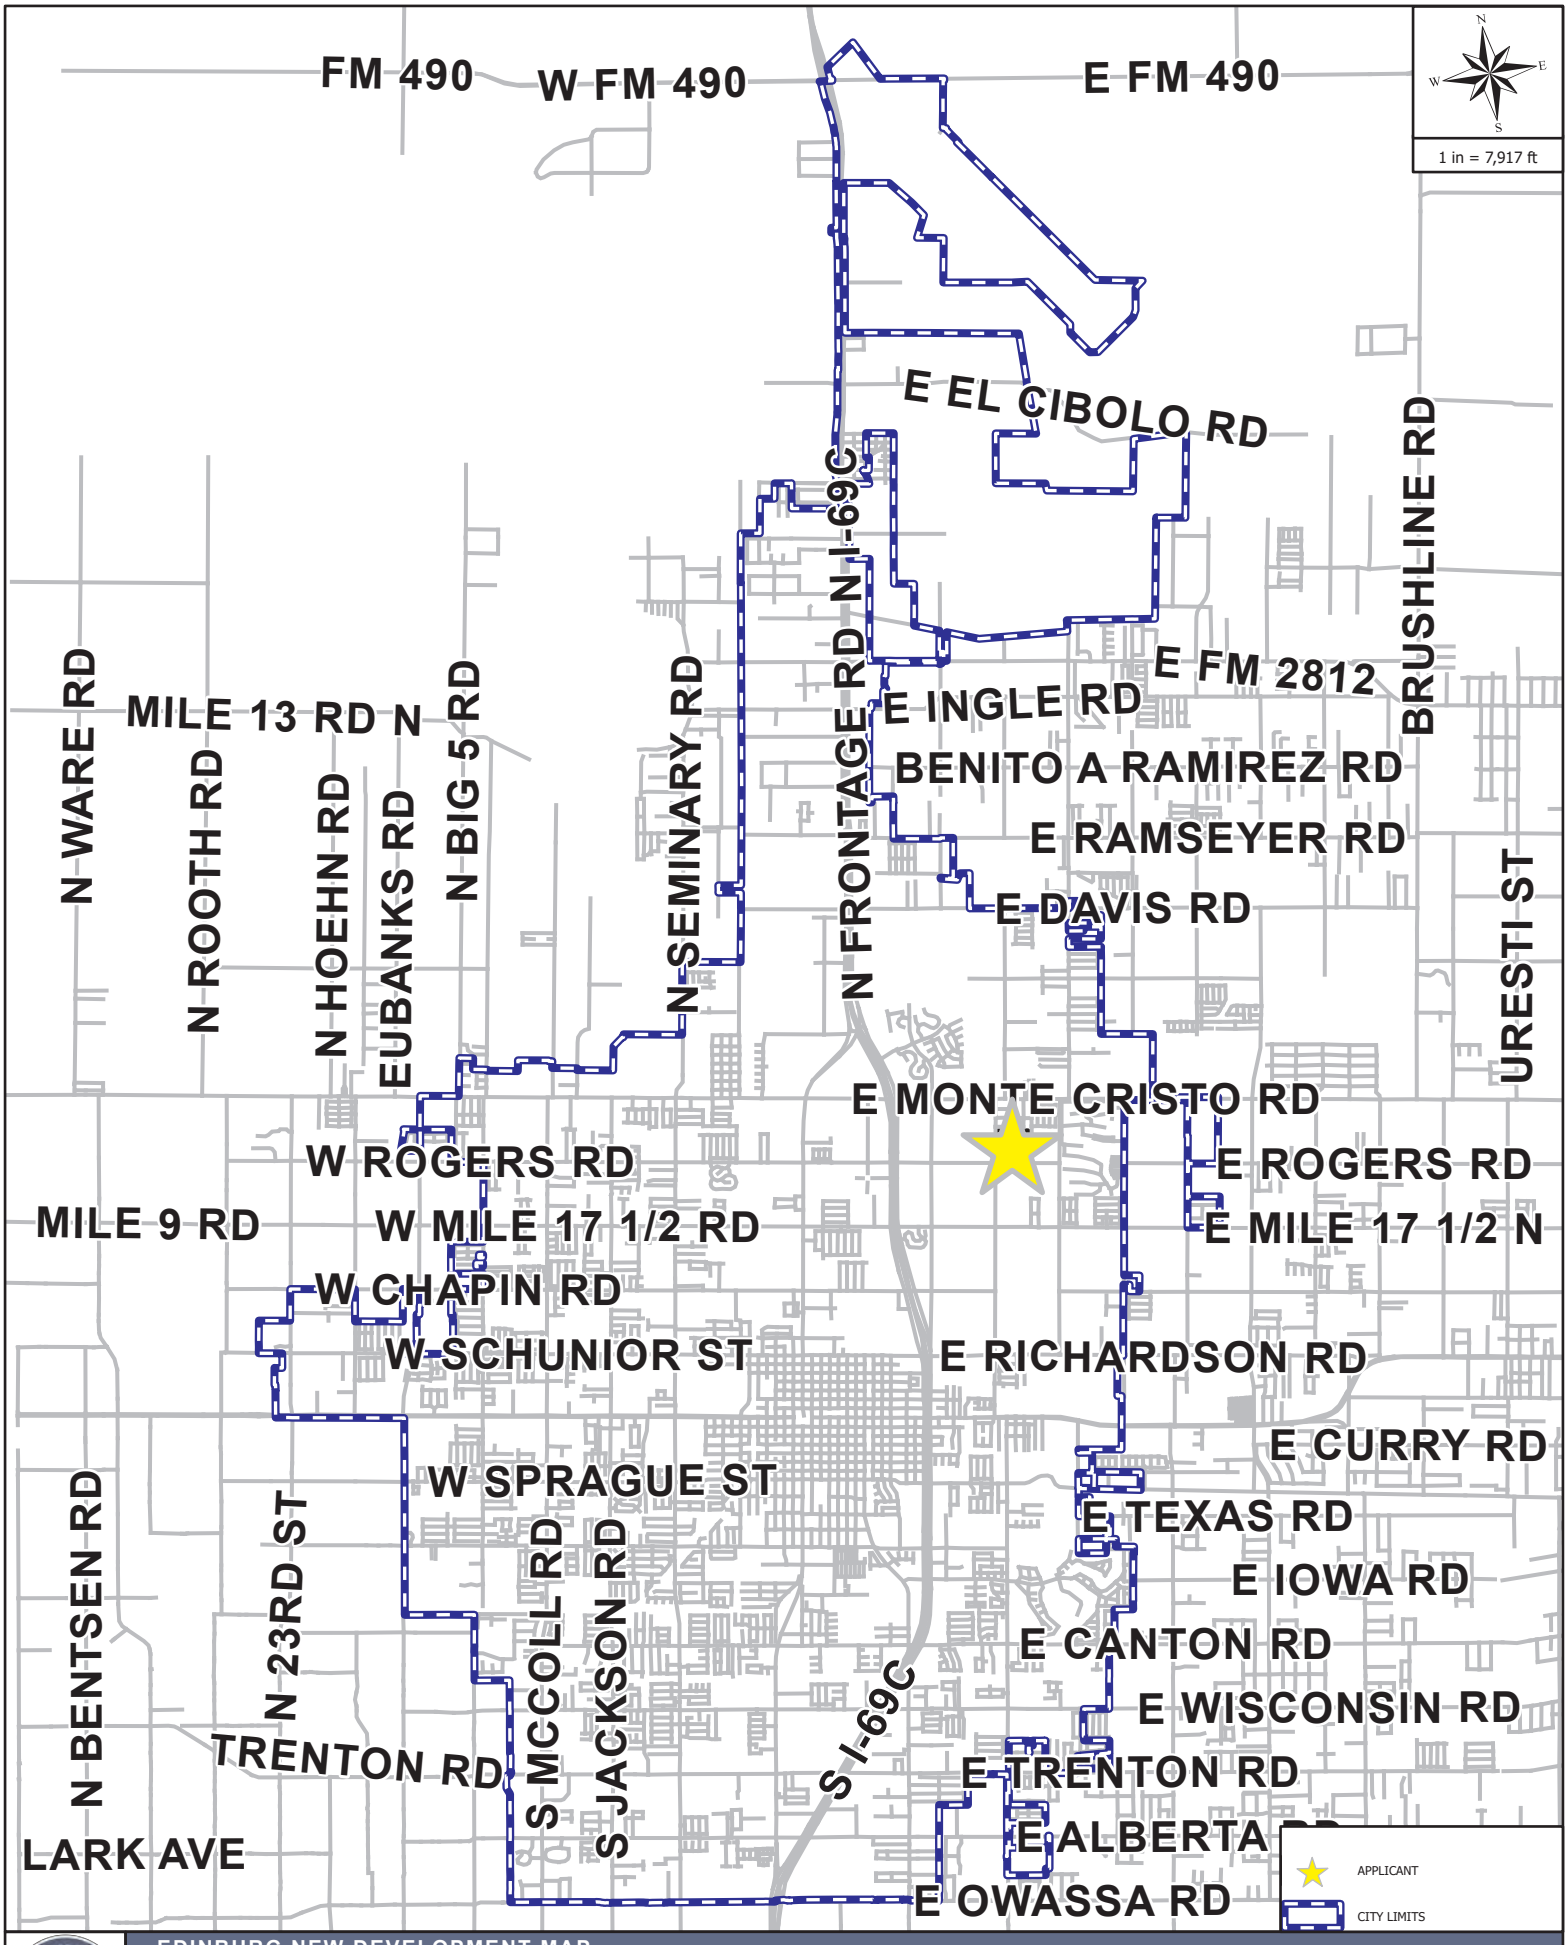
ADJACENT ZONING:
North – Residential, Primary (RP) District
South – Residential, Suburban (RS) District, Residential, Primary, (RP) District, and Agriculture and Open Space (AO) District
East – Residential, Manufactured Home (RMF) District
West – Agriculture and Open Space (AO) District

LAND USE PLAN: Auto Urban Uses

PUBLIC SERVICES: North Alamo Water Supply Corporation Water and City of Edinburg Sewer

RECOMMENDATION: Staff recommends approval of the Rezoning Request from Residential, Primary (RP) District to Residential, Urban & Townhome (RU) District

REZONING REQUEST
MELDEN AND HUNT ON BEHALF OF CREATIVE HOTEL GROUP, LLC

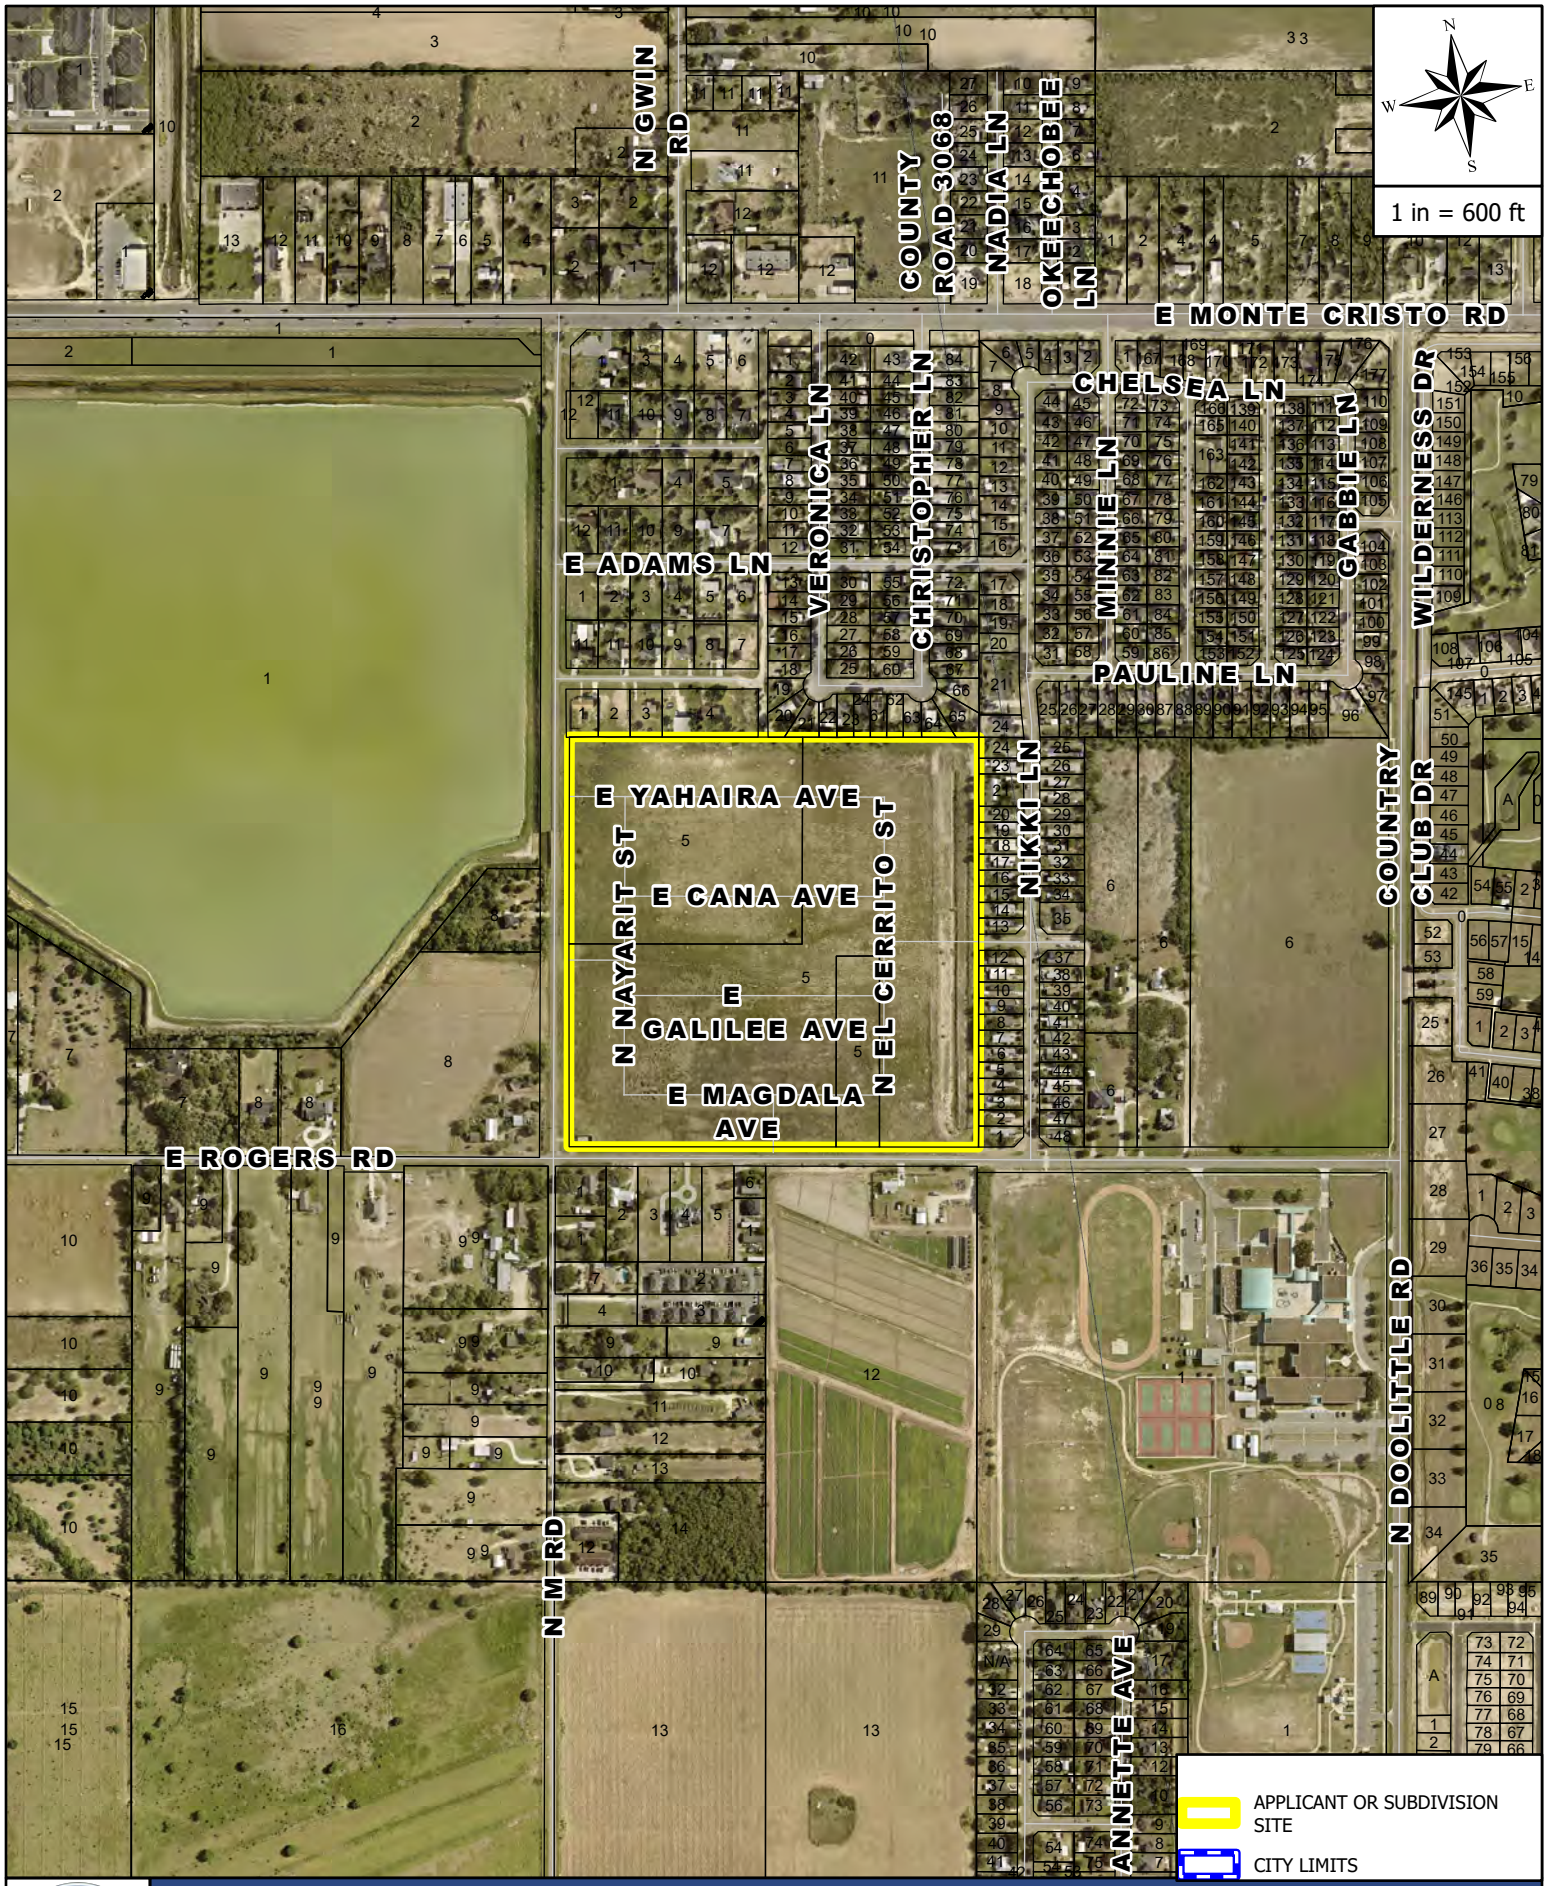


EVALUATION

The following is the staff's evaluation of the request:

1. Surrounding land consists of a mix of single-family homes, manufactured homes, vacant land, and multi-family uses.
2. The proposed zoning would be consistent with the adjacent uses in the area.
3. The proposed zoning is consistent with the Future Land Use Plan.

Staff recommends approval of the Rezoning Request from Residential, Primary (RP) District to Residential, Urban & Townhome (RU) District, based on adjacent zoning districts, surrounding land uses, and densities in the area. If approved, the applicant will need to comply with all requirements during the permitting process including compliance with subdivision regulations, building/fire codes, fire protection, parking, landscape buffer-yards, solid waste services, utility, and other City requirements, as applicable.



Staff mailed a notice of the public hearing to 103 neighboring property owners on Friday, June 28, 2024, and received no comments in favor and 1 comment against this request at the time this report was prepared. Notice of this public hearing was published in the newspaper on July 31, 2024.

NOTIFICATION

Dear Property Owner:

A public hearing will be held on **Tuesday, July 9, 2024, at 5:30 P.M.** in the Edinburg City Hall, City Council Chambers, located at 415 West University Drive, at which time the Planning and Zoning Commission will address the following:

CONSIDER THE REZONING REQUEST FROM RESIDENTIAL, PRIMARY (RP) DISTRICT TO RESIDENTIAL, URBAN & TOWNHOME (RU) DISTRICT, BEING 39.334 ACRES OUT OF LOT 5, SECTION 248, TEXAS-MEXICAN RAILWAY COMPANY'S SURVEY, LOCATED AT 3200 NORTH M ROAD, AS REQUESTED BY MELDEN AND HUNT ON BEHALF OF CREATIVE HOTEL GROUP, LLC

This district is the highest intensity single-family residential district. The district includes auto-urban and higher densities meant to meet the community's need for more compact developments, walkable areas, and affordable housing. Traditionally associated with downtown areas, these densities may be desirable in other locations where there is a need and demand for smaller single-family homes.

This request is scheduled to be heard by the **City Council on Tuesday, August 20, 2024, at 6:00 P.M.** As a property owner within 300 ft. of the subject property, you are invited to attend. Please note that meeting time (s) and date (s) are subject to change. Therefore; please call on the date of the meeting to assure that the item is on the agenda. As part of the City effort to encourage greater participation in the rezoning process, **the City is using this notice to solicit your input, but no action or response is required**. Should you have any questions or need more information regarding this notice, you may call (956) 388-8202.

You may return your response by one of the following:
MAIL: P. O. Box 1079 Edinburg, Texas 78540
FAX: (956) 292-2080 by Monday, July 8, 2024
EMAIL: planning@cityofedinburg.com by Monday, July 8, 2024

Please place a checkmark on the appropriate box to indicate if you are in favor, against, or have no comments on this request.

☐ **In Favor/A Favor** ☑ **Against/En Contra** ☐ **No Comments/No Comentario**

Comments: This is not the appropriate solution for this community. I do not want more cookie cutter developments in my community. ~~It~~ I also think if this is a severe issue reduce The appraisals ~~that~~ clearly are made up.

ORDINANCE NO. _____

AN ORDINANCE AMENDING, SUPPLEMENTING, AND CHANGING THE BOUNDARIES OF THE RESIDENTIAL, PRIMARY (RP) DISTRICT TO RESIDENTIAL, URBAN & TOWNHOME (RU) DISTRICT, BEING 39.334 ACRES OUT OF LOT 5, SECTION 248, TEXAS-MEXICAN RAILWAY COMPANY'S SURVEY, LOCATED AT 3200 NORTH M ROAD, EDINBURG, HIDALGO COUNTY, TEXAS, FROM ONE DISTRICT TO ANOTHER; PROVIDING A REPEALER CLAUSE; PROVIDING A SAVINGS CLAUSE; PROVIDING FOR PUBLICATION AND EFFECTIVE DATE; PROVIDING FOR CODIFICATION; PROVIDING A WAIVER OF THE THREE (3) SEPARATE READINGS; AND ORDAINING OTHER PROVISIONS RELATED TO THE SUBJECT MATTER HEREOF.

WHEREAS, the owner of the herein described real estate has submitted to the Planning and Zoning Commission of the City of Edinburg, Texas, a proposed amendment, and the proposed supplement and change to the boundaries of the Residential, Primary (RP) District and the Residential, Urban & Townhome (RU) District, as set out in the Unified Development Code of the City of Edinburg, Texas, heretofore finally passed, approved, and adopted by said City Council on the 9th day of August, 2022. Such proposed amendment is to change the zoning of all of Being 39.334 acres out of Lot 5, Section 248, Texas-Mexican Railway Company's Survey, Located at 3200 North M Road, Edinburg, Hidalgo County, Texas, from Residential, Primary (RP) District to Residential, Urban & Townhome (RU) District, for a recommendation and report by said Planning and Zoning Commission; and

WHEREAS, the said Planning and Zoning Commission of the City of Edinburg, Texas, gave due notice as provided by said Unified Development Code of a public hearing to be held before said Planning and Zoning Commission, on July 9, 2024, at 5:30 P.M., in the Edinburg City Hall, City Council Chambers, located at 415 West University Drive, Edinburg, Texas, and said public hearing was held at such time and place, and all of which procedure in the giving of notice and the holding of said public hearing is hereby ratified and confirmed as meeting all the requirements of said Unified Development Code of the City of Edinburg, Texas and applicable statutes, providing said notice by U. S. Mail to all property owners and persons rendering property for taxation within 300 feet of the property affected not less than ten (10) days before said public hearing; and

WHEREAS, after such public hearing, the Planning and Zoning Commission of the City of Edinburg, Texas, presented its report to the City Council of the City of Edinburg that they approved the change in zoning of said property, from one district to the other; and

WHEREAS, after receipt of the final report from the Planning and Zoning Commission, the City Council of said City provided due notice, as provided by said Unified Development Code to be held before said City Council, and notice was published one time in a newspaper published

in the City of Edinburg, Texas, and of general circulation in said City, stating that a public hearing to consider said proposed revision would be held on August 20, 2024 at 6:00 P.M., in the Edinburg City Hall, City Council Chambers, located at 415 West University Drive, Edinburg, Texas, which time was not less than 15 days nor more than 20 days from the date of publication, and that said public hearing was held at such time and place, and all of which procedure in the giving of notice and the holding of said public hearing is hereby ratified and confirmed as meeting all the requirements of said Unified Development Code of the City of Edinburg, Texas and applicable statutes; and

WHEREAS, having held said public hearing, it is the opinion of the City Council of the City of Edinburg, Texas that such change and revision should be made.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF EDINBURG, TEXAS, THAT:

SECTION I. AUTHORITY OF LAW: All requirements of the law have been met in the passing of this Ordinance.

SECTION II. The zoning of the first above-described property is hereby changed from Residential, Primary (RP) District to Residential, Urban & Townhome (RU) District and the boundaries of said Districts are hereby amended, supplemented and changed so as to delete the said area from the said Residential, Primary (RP) District and added to Residential, Urban & Townhome (RU) District.

SECTION III. REPEALER CLAUSE: This Ordinance shall be cumulative of all other ordinances dealing with the same subject and any provision of any ordinance in direct conflict with any provision of this ordinance is hereby repealed and the provisions of this Ordinance shall supersede any provisions in conflict herewith; all provisions of any other ordinance not in conflict herewith shall remain in full force and effect.

SECTION IV. SAVINGS CLAUSE: If any section, part, or provision of this Ordinance is declared unconstitutional or invalid, by a court of competent jurisdiction, then, in that event, it is expressly provided, and it is the intention of the City Council in passing this Ordinance that its parts shall be severable and all other parts of this Ordinance shall not be affected thereby and they shall remain in full force and effect.

SECTION V. PUBLICATION AND EFFECTIVE DATE: This Ordinance shall take effect immediately upon its passage and publication according to law.

SECTION VI. CODIFICATION: That this Ordinance shall not be published in the Code of Ordinances of the City of Edinburg, Texas, as it is not amendatory thereof.

SECTION VII. WAIVER CLAUSE: This requirement of three separate readings of this Ordinance is hereby dispensed with by a vote of not less than a majority of all the members of the City Council.

READ, CONSIDERED, PASSED AND APPROVED at a regular meeting of the City Council of the City of Edinburg, Texas at which a quorum was present and which was held in accordance with V.T.C.A., Government Code, Section 551.041, on the 20th day of August 2024.

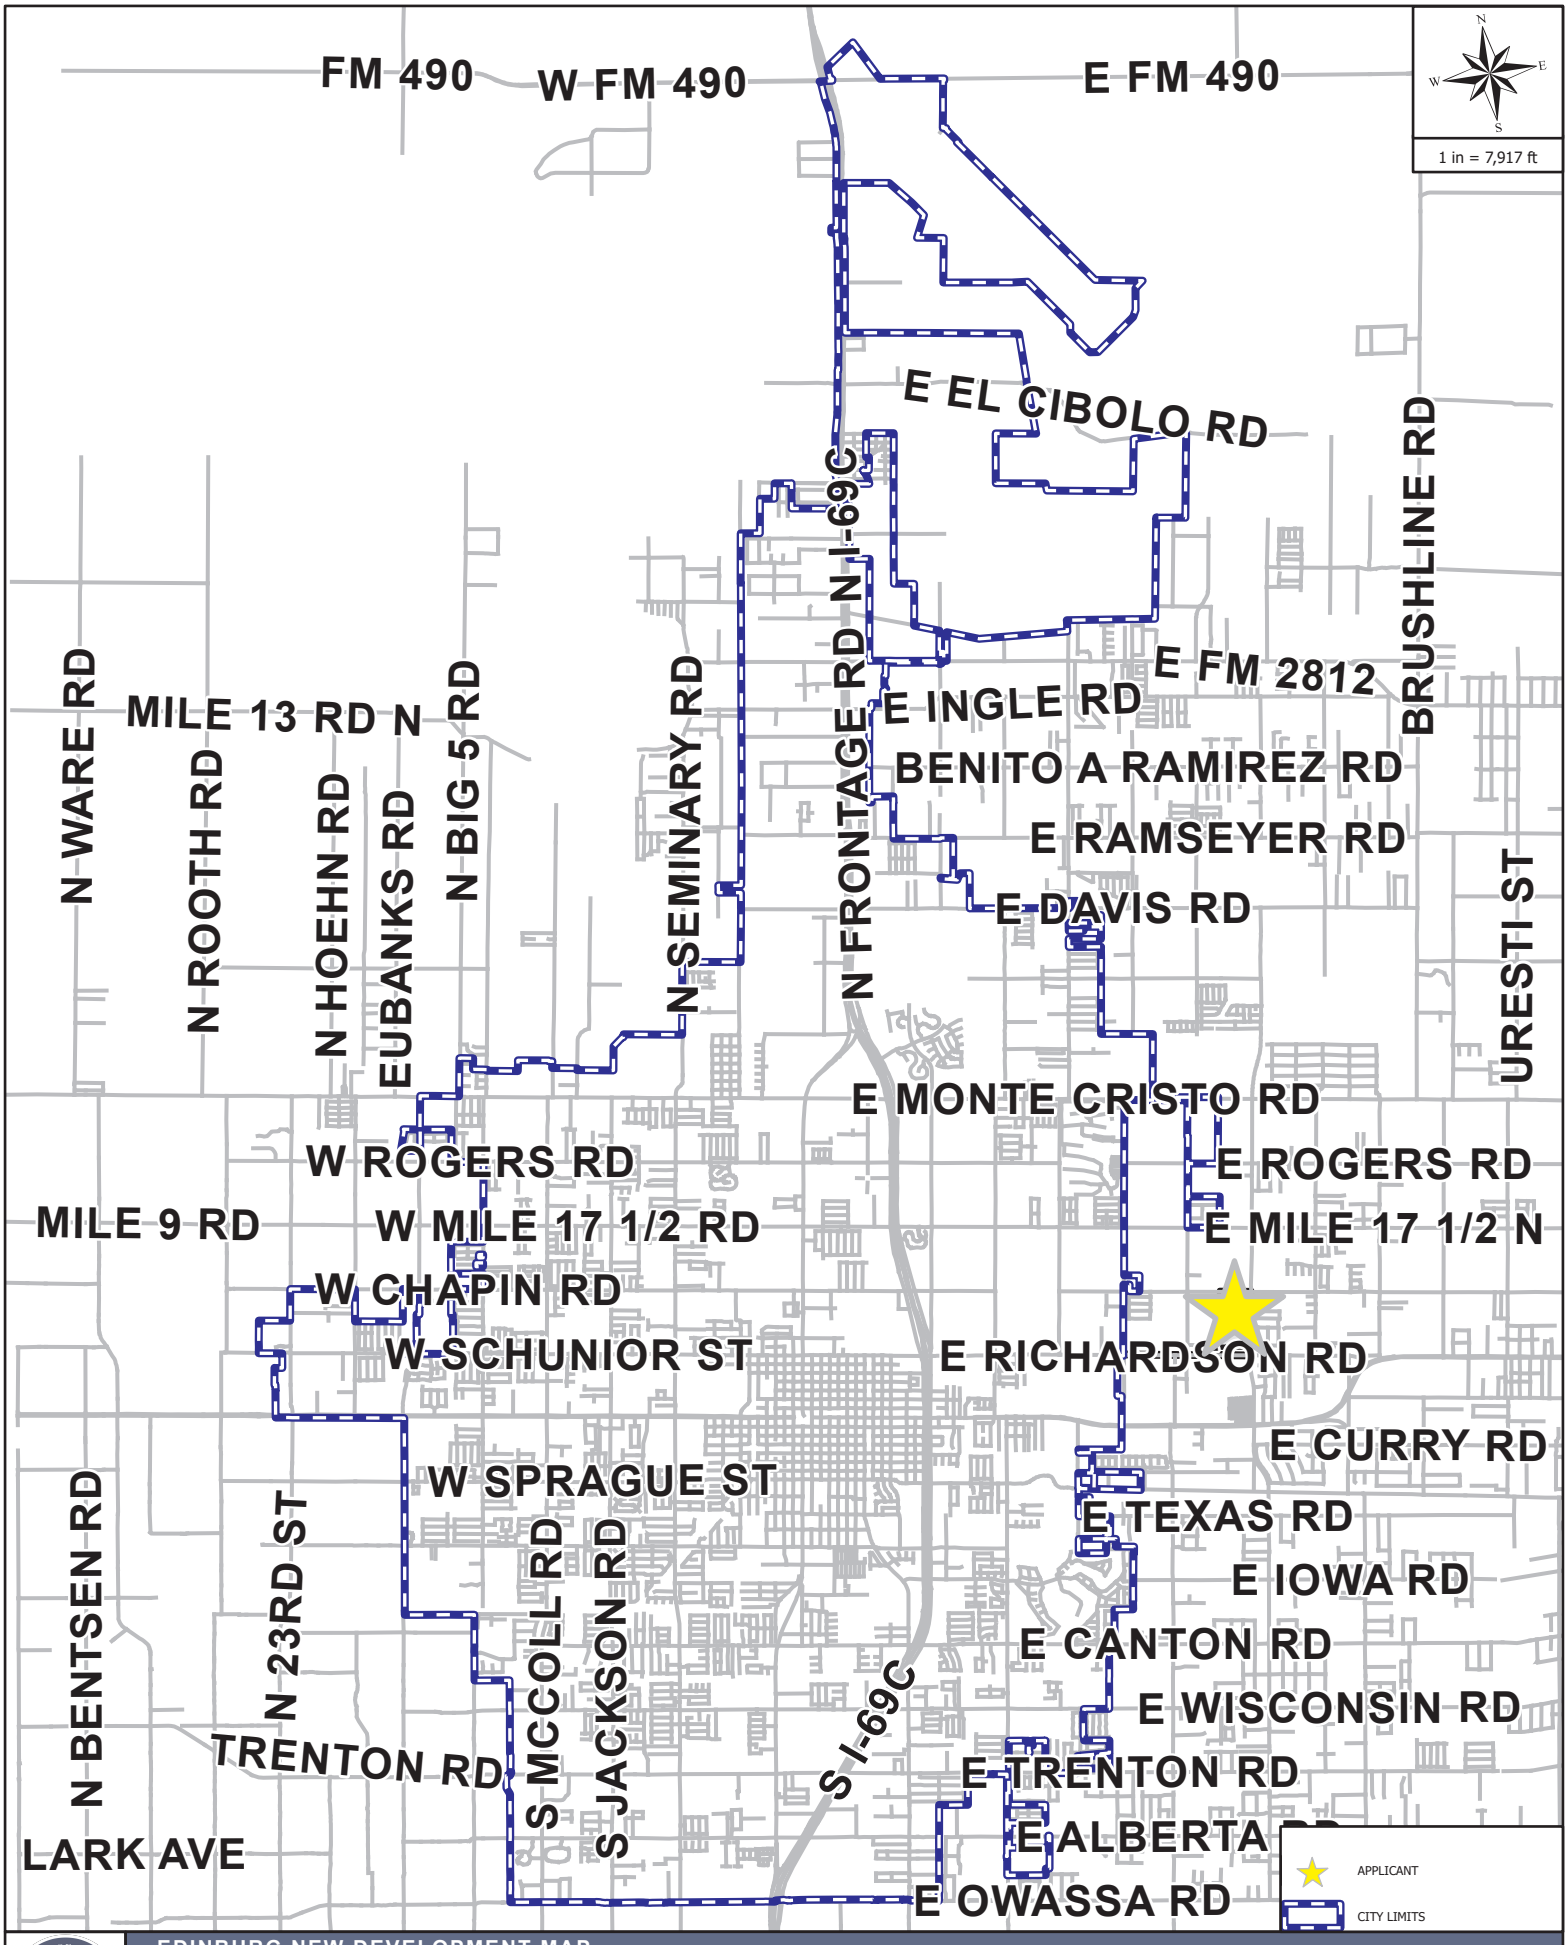
CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
PUBLIC HEARINGS
Agenda Item No: 7.E.
Ordinance providing for Voluntary Annexation – WW Escondido, L.P.

1. **Agenda Item:**
Hold Public Hearing and Consider the Ordinance Providing for the Voluntary Annexation of 84.66 Acres Out of Chapin Road Right-of-Way, Alamo Road Right-of-Way, Richardson Right-of-Way, and Alamo Road Right-of-Way in Blocks 249, 250, and 267, and out of Lots 9 and 16 Block 250, Texas-Mexican Railway Company Survey, Hidalgo, Texas, Being Located at 1101 North Alamo Road, as Requested by Paul Arthur, On Behalf of WW Escondido, L.P. [Jaime Acevedo, Director of Planning & Zoning]

2. **Description:**
The property owner for the subject tract of land has filed a petition for Voluntary Annexation. The 84.66-acre tract is currently occupied by abandoned homes and agricultures uses. The proposed development is located on the southwest corner of East Mile 17 North and North Alamo Road. Water Services will be provided by North Alamo Water Supply Corporation CCN and Sewer Services will be provided by City of Edinburg. Once annexed into the City Limits, services from Code Enforcement, Planning and Zoning, Engineering, Fire, Police, Solid Waste and other City Departments will be provided

Annexation of this property is being undertaken in accordance with the provisions of the Texas Local Government Code, Chapter 43, Municipal Annexation, Section 43.028 and the City Charter. The Texas Local Government Code requires a governing body to take action after the 5th day or before the 30th day after a petition is filed for Voluntary Annexation.

As per the City Charter, the City Council, at a regular session held not sooner than twenty (20) days after the presentation of said petition, may by ordinance annex such territory. The Petition for Voluntary Annexation was approved at the City Council meeting on August 07, 2024. Based on the preceding provisions, the City Council may act to adopt an ordinance annexing the property at the August 20, 2024 regular meeting.



3. **Staff's Recommendation:**
Staff recommends approval of the ordinance for the Voluntary Annexation of 84.66 acres out of Chapin Road Right-of-Way, Alamo Road Right-of-Way, Richardson Right-of-Way, and Alamo Road Right-of-Way in Blocks 249, 250, and 267, and out of Lots 9 and 16 Block 250, Texas-Mexican Railway Company Survey, Hidalgo, Texas. The proposed Voluntary Annexation falls in line with the City's Comprehensive Plan and allows the City to plan for appropriate and responsible land use within Edinburg City Limits and its Extraterritorial Jurisdiction.

ORDINANCE NO. _____

AN ORDINANCE PROVIDING FOR THE VOLUNTARY ANNEXATION OF 84.66 ACRES OUT OF CHAPIN ROAD RIGHT-OF-WAY, ALAMO ROAD RIGHT-OF-WAY, RICHARDSON RIGHT-OF-WAY, AND ALAMO ROAD RIGHT-OF-WAY IN BLOCKS 249, 250, AND 267, AND OUT OF LOTS 9 AND 16 BLOCK 250, TEXAS-MEXICAN RAILWAY COMPANY SURVEY, HIDALGO, TEXAS, BEING LOCATED AT 1101 NORTH ALAMO ROAD, AS REQUESTED BY PAUL ARTHUR, ON BEHALF OF WW ESCONDIDO, L.P., SAID PROPERTY LYING ADJACENT TO AND ADJOINING THE PRESENT BOUNDARY LIMITS OF THE CITY OF EDINBURG, TEXAS; AND PROVIDING FOR THE EXTENSION OF THE CITY'S BOUNDARIES AND EXTRA-TERRITORIAL JURISDICTION, THEREBY; PROVIDING WAIVER OF THREE SEPARATE READINGS; PROVIDING FOR PUBLICATION AND AN EFFECTIVE DATE; AND ORDAINING OTHER PROVISIONS RELATED TO THE SUBJECT MATTER HEREOF.

WHEREAS, on August 07, 2024, the City Council accepted a petition from City of Edinburg, for voluntary annexation of the above described property and adjoining roadways of said property, more particularly described herein in Exhibits "A" and "B" proposed to be annexed by the City of Edinburg; and

WHEREAS, the City of Edinburg seeks to annex the above described property, more particularly described herein in Exhibits "A" and "B"; and

WHEREAS, the property hereinafter described adjoins, lies adjacent to, or is within the extraterritorial jurisdiction of the City of Edinburg.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF EDINBURG, TEXAS, THAT:

SECTION I: AUTHORITY OF LAW: All requirements of the law have been met in the passing of this Ordinance.

SECTION II: The land described in Exhibits "A" and "B", attached hereto and made a part hereof for all purposes, being territory adjacent to and adjoining the City of Edinburg, Texas, is hereby added and annexed to the City of Edinburg, Texas, and said property therein described shall be included within the boundary limits of such city, and the present boundary limits of such city, at the various points contiguous to the areas hereinafter described, are altered and amended so as to include said areas within the corporate limits.

SECTION III: The herein described property and the area to be annexed shall be a part of the City of Edinburg, Texas, and the property so added hereby shall bear its pro rata share of the taxes levied by the City of Edinburg, Texas. The inhabitants hereof shall be entitled to all of the rights and privileges of citizens of the City of Edinburg, Texas, in areas having similar characteristics of topography, land utilization and population density, and shall be bound by the acts, ordinances, resolutions, and regulations of the City of Edinburg, Texas.

SECTION IV: The extraterritorial jurisdiction of the City of Edinburg shall expand in conformity with this annexation and shall comprise an area around the new corporate limits of the City, consistent with state law.

SECTION V: Upon annexation of the herein described property, the acreage within the City limits of Edinburg will be increased by 84.66 acres out of Chapin Road Right-of-Way, Alamo Road Right-of-Way, Richardson Right-of-Way, and Alamo Road Right-of-Way in Blocks 249, 250, and 267, and out of Lots 9 and 16 Block 250, Texas-Mexican Railway Company Survey, Hidalgo, Texas, which does not exceed the statutory limitations as set out in Section 43.055, Tex. Local Gov't C. (Vernon 1988 and Vernon Supp. 1994).

SECTION VI: The requirement of three separate readings of this Ordinance is hereby dispensed with by a vote of not less than a majority of the members of the City Council present.

SECTION VII: Upon final passage, this Ordinance shall be published in the official newspaper of the City of Edinburg, Texas, as provided by law, and shall be and remain in full force and upon passage.

SECTION IX: If any part, phrase or sentence of this Ordinance is held void or unconstitutional by a court of competent jurisdiction, or if any tract of land or portion of any tract of land hereby annexed shall be held to be ineligible for annexation or wrongfully annexed, the remaining portions of this Ordinance and the remaining tracts so annexed shall be considered severable and shall remain in full force and effect.

SECTION VII: In accomplishing the annexation of the property herein described the City of Edinburg has strictly followed the provisions of the Charter of the City of Edinburg, and the state statutes as they apply to annexations and any possible deviation from these provisions was unintentional and not material to the accomplishment of this annexation.

READ, CONSIDERED, PASSED AND APPROVED at a special meeting of the City Council of the City of Edinburg, Texas, at which a quorum was present and which was held in accordance with V.T.C.A., Government Code, Section 551.041, on the 20th day of August, 2024.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
ORDINANCES
Agenda Item No: 8.A.
Ordinance: BYOB

1. **Agenda Item:**
Consider Ordinance Amending the Code of Ordinances of the City of Edinburg Title XI: Business Regulations, Chapter 110 Alcoholic Beverages, by Adding Section 110.11 Bring Your Own Beverage Establishments, Creating a Permitting System for BYOB Establishments. [Josephine Ramirez Solis, City Attorney]

2. **Description:**
A BYOB establishment in Texas is a commercial business that allows patrons to bring their own alcohol onto the premises for consumption, but is not licensed or permitted by the Texas Alcoholic Beverage Commission (TABC). Because they are not regulated by TABC, local municipalities may regulate BYOB establishments by ordinance. The City of Edinburg currently does not have an ordinance regulating BYOB establishments, but other surrounding cities do such as McAllen and Brownsville.

The proposed ordinance establishes regulations for BYOB establishments including requiring a permit that must be renewed each year, limiting hours during which alcoholic beverages may be consumed, limiting hours that the public can remain on the premises, and requiring that BYOB establishments not exceed a certain threshold of calls for emergency services.

ORDINANCE NO. _____

ORDINANCE AMENDING THE CODE OF ORDINANCES OF THE CITY OF EDINBURG, TITLE XI: BUSINESS REGULATIONS, CHAPTER 110 ALCOHOLIC BEVERAGES, BY ADDING SECTION 110.11 BRING YOUR OWN BEVERAGE ESTABLISHMENTS; PROVIDING FOR A REPEALER CLAUSE; PROVIDING A SAVINGS CLAUSE; PROVIDING FOR PUBLICATION AND EFFECTIVE DATE; PROVIDING FOR CODIFICATION; PROVIDING A WAIVER OF THE THREE (3) SEPARATE READINGS; AND ORDAINING OTHER PROVISIONS RELATING TO THE SUBJECT MATTER HEREOF

WHEREAS, the City of Edinburg is a home-rule municipality possessing the full power of local self-government pursuant to Article XI, Section 5 of the Texas Constitution; and

WHEREAS, pursuant to the laws of the State of Texas, including Section 51.001 of the Texas Local Government Code, the Commission has the authority to adopt an ordinance that, among other things, is for the good government, peace, or order of Edinburg; and

WHEREAS, the Texas Alcoholic Beverage Code (the "Code") regulates the manufacture, sale, distribution, transportation, and possession of alcoholic beverages by licensed and permitted establishments; and

WHEREAS, the Texas Alcoholic Beverage Commission ("Agency") only regulates and enforces that Code as it applies to licensed and/or permitted establishments; and

WHEREAS, establishments that allow patrons to bring their own alcoholic beverages on the premises ("BYOB") are not licensed or permitted by the Agency and therefore have no regulations imposed on them by the Code; and

WHEREAS, establishments that are licensed or permitted by the Agency are regulated by the Code in a manner designed to prevent them from becoming a nuisance to the surrounding neighborhood, community and the general public; and

WHEREAS, without similar regulations for unlicensed and/or unpermitted establishments, BYOB establishments can become a nuisance to the surrounding neighborhood, community, and the general public; and

WHEREAS, the City Council of the City of Edinburg desires to enact an ordinance creating a permitting process for BYOBs and imposes restrictions on the hours of operation for said BYOBs to mirror state law restrictions on the hours of consumption of alcohol at licensed or permitted alcohol establishments; and

WHEREAS, the City Council finds that creating a permitting process for BYOBs and imposing restrictions on hours of operation for BYOBs are regulations that are consistent with, ancillary to, not any stricter than, and in harmony with the general scope and purpose of what is imposed on licensed and permitted establishments under the Code, and that the regulations contained in this ordinance do not conflict with the Texas Alcoholic Beverage Code; and

WHEREAS, the City Council finds that the City will incur costs to review, process, and issue BYOB Permits and that establishing a fee is necessary to recover these costs associated with the BYOB Permits.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF EDINBURG, TEXAS THAT:

SECTION I. INCORPORATION OF RECITALS. The City Council finds that the statements set forth in the Recitals are true and correct and the City Council hereby incorporates such Recitals as findings of fact.

SECTION II. AUTHORITY OF LAW. All requirements of the law have been met in the passing of this Ordinance.

SECTION III. The Code of Ordinances of the City, Title XI, Business Regulations, is amended to add Section 110.11 to Chapter 110 Alcoholic Beverages, to be read in its entirety as shown in Exhibit A to this Ordinance.

SECTION VI. REPEALER CLAUSE: This Ordinance shall be cumulative of all other ordinances dealing with the same subject, and any provision of any ordinance in direct conflict with any provision of this Ordinance is hereby repealed and the provisions of this Ordinance shall supersede any provisions in conflict herewith; all provisions of any other ordinance not in conflict herewith shall remain in full force and effect.

SECTION VII. SAVINGS CLAUSE: If any section, part, or provision of this Ordinance is declared unconstitutional or invalid, by a court of competent jurisdiction, then, in that event, it is expressly provided, and it is the intention of the City Council in passing this Ordinance that its parts shall be severable and all other parts of this Ordinance shall not be affected thereby and they shall remain in full force and effect.

SECTION VIII. PUBLICATION AND EFFECTIVE DATE: This Ordinance shall take effect immediately upon its passage.

SECTION IX. CODIFICATION: That this Ordinance shall be published in the Code of Ordinances of the City of Edinburg, Texas.

SECTION X. WAIVER CLAUSE. The requirement of three separate readings of this Ordinance is hereby dispensed by a vote of not less than a majority of all the members of the City Council.

READ, CONSIDERED, PASSED AND APPROVED at a regular meeting of the City Council of the City of Edinburg, Texas, at which a quorum was present and which was held in accordance with V.T.C.A., Government Code, Section 551.041, on August 20, 2024.

EXHIBIT A

Sec. 110.11 – Bring your own beverage (BYOB) establishments.

(A) Definitions

i. BYOB Establishment means an establishment within the City limits of the City of Edinburg that is not licensed or permitted by the TABC, is open to the public, and allows patrons to bring alcoholic beverages onto the premises for possession and consumption.

ii. Department means the Planning and Zoning Department of the City of Edinburg

iii. Director means the director of the Planning and Zoning Department of the City of Edinburg or the director's designees.

(B) Permit required.

i. It shall be unlawful for any person to operate a BYOB establishment in the city who has not obtained a permit issued by the Department as required by this Ordinance.

ii. A separate permit for each BYOB establishment location must be obtained.

(C) **Permit application.**

i. An applicant shall apply for a BYOB permit annually on a form prescribed by the City. Application forms shall be supplied by the director.

1. Applicants must provide a copy of the BYOB establishment's certificate of occupancy, scaled drawings of the premises, and copy of the lease agreement where the BYOB establishment will be operating or proof of ownership of the property.

2. Each individual who has an ownership interest in, or who will manage or otherwise exercise control over the proposed BYOB establishment must provide their full legal name, address, date of birth, and authorize the city to conduct a criminal background check.

3. For an applicant that is a legal entity and not an individual, the application must include:

a. Documentation from the Texas Secretary of State that demonstrates the entity is authorized to conduct business in Texas;

b. Designation of an individual permit holder that resides in the State of Texas and within 100 miles of the territorial limits of the City of Edinburg, and the address of the residence of such individual;

c. A designated agent, who is a citizen of this state, to represent the entity in matters before the city and its advisory boards and to be responsible for the proper conduct of any activity at the proposed BYOB establishment.

4. The City Manager shall determine all other application requirements.

ii. While a permit application is pending or a permit is in effect, an owner shall immediately supplement the information provided to the director in the permit application if the information is or becomes inaccurate, incomplete, or misleading.

iii. All BYOB establishments in operation before the enactment of this ordinance shall

comply with this chapter before continuing operations.

iv. The fee for a BYOB permit shall be determined by the City Manager. Payment of such fees shall not be refundable in whole or in part.

(D) Permit approval.

i. The director shall approve a permit application if the director determines that the applicant and the proposed BYOB establishment meet the requirements established by the City.

ii. The director shall deny a permit application if the director determines that:

1. The applicant is under the age of 21 years;
2. The BYOB establishment as proposed would not comply with this chapter;
3. Any owner or operator had a permit required by this chapter that was revoked within the preceding 12-month period; or
4. The applicant had a TABC permit that was involuntarily canceled or suspended within the preceding 12-month period.
5. The applicant provided incorrect or incomplete information on the application; or
6. The owner or operator of the BYOB establishment has been convicted of one of the following criminal offenses:

a. Any offense involving fraud or misrepresentation;

b. Any offense involving bribery or perjury;

c. Any offense involving violence to any person except for conduct that is classified as no greater than a class C misdemeanor under the laws of Texas;

d. Any felony conviction for any violation of any state or federal laws regulating firearms;

e. Any violation of the Texas liquor laws;

f. Any offense involving prostitution or aiding, abetting, or promotion of prostitution; or

g. Any violation of the Texas Controlled Substances Act or other state or federal law regulating drugs that permits punishment of confinement for one year or more upon conviction for such violation.

iii. The director shall give written notice of a denial of an application to the applicant.

iv. In the event of a denial of an application for permit or revocation thereof, the applicant or permit holder shall have the right to appeal to the city manager by filing written notice of appeal with the city secretary within ten days of written notification of any such action. The city manager shall review the action of the director and may impose certain conditions to the granting or retention of the permit or license. In addition, the city manager may request that the permit holder or applicant furnish further information as required by the city manager to make a decision. The city manager may provide for the granting of the permit or license or the reinstatement of the license or permit and impose

certain conditions to such action. In any event, the decision of the city manager shall be final and nonappealable.

v. A permit issued under this chapter is not transferable to another person. Any change in ownership of a BYOB establishment, including, but not limited to, the sale of the BYOB establishment or any ownership interest therein, shall require the purchaser or transferee to submit a permit application in accordance with this section.

(E) Permit expiration, renewal.

i. A permit issued under this chapter expires one year after the date it is first issued.

ii. The owner shall file an application for permit renewal not sooner than the 90th day and not later than the 20th day before the permit expires. An application that is not filed within the described time period is a new application.

(F) Permit revocation.

i. The director shall revoke a permit issued under this chapter if the director determines that:

1. The owner or operator of the BYOB establishment has been convicted of violating any of the provisions of this Ordinance;
2. The BYOB establishment does not comply with any applicable provisions of this article;
3. The permit was obtained or issued as a result of error.

(G) Requirements.

i. BYOB establishments must comply with all ordinances of the City of Edinburg and all laws of the State of Texas.

ii. BYOB establishments may not exceed three calls for emergency services within any 90-day period that first responders indicate involve weapons, violent crime, calls categorized as a major disturbance, deadly conduct, a felony offense, or human trafficking related offenses.

iii. BYOB establishments shall post the BYOB permit in a prominent public location at the BYOB establishment.

iv. A BYOB permit holder shall ensure that the permit holder or designated agent is continuously on the BYOB establishment's premises during the hours of operation.

v. BYOB establishments shall close between 2:00 a.m. and 10;00 a.m. each day and shall not permit a person to consume an alcoholic beverage on the premises between 2:15 a.m. and 10:00 a.m. each day.

vi. BYOB establishments may not allow a member of the public to remain on its premises, including a parking area, between 2:30 a.m. and 10:00 a.m. each day.

vii. BYOB establishments must designate the portions of the premises on which the consumption of alcoholic beverages is permitted and said designated area must exclude parking areas. BYOB establishments shall place signs at every exit from the designated area advising patrons that consumption of alcoholic beverages is not permitted beyond the exit. BYOB establishments shall post signs in each parking area located on the same

property at the BYOB establishment stating that the outdoor consumption of an alcoholic beverage on the premises, outside of the designated area, is prohibited.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
ORDINANCES
Agenda Item No: 8.B.

1. **Agenda Item:**
Consider Ordinance Amending the Code of Ordinances of the City of Edinburg at Title XI: Business Regulations, Chapter 118 Vehicle Wrecker and Towing Services Pursuant to Authority Provided by Occupations Code Chapter 2308, Providing for Regulation of Said Services and Establishing a Wrecker Rotation Process. [Jaime Ayala, Chief of Police]

2. **Description:**
Pursuant to its authority under Chapter 2308 of the Texas Occupations Code, the City of Code of Ordinances contains a provision providing for the regulation of vehicle towing and wrecker services. The amended ordinance will allow for the administration and enforcement of the state and municipal regulations by the Chief of Police to ensure compliance with state and local law and will provide a process for wrecker rotation services. Similar ordinances have been approved in various municipalities within the State of Texas.

The Amended Ordinance will allow for the Chief of Police to enforce state and local regulations as well as provide a specific wrecker rotation process in compliance with Texas Occupations Code, Texas Administrative Code and Texas Transportation Code. The existing version of the ordinance does not include the same type of enforcement methods, wrecker rotation process and is based on prior versions of the law, resulting in limited enforcement efforts.

3. **Staff's Recommendation:**
Approve Ordinance Amending the Code of Ordinances of the City of Edinburg at Title XI: Business Regulations, Chapter 118 Vehicle Wrecker and Towing Services Pursuant to Authority Provided by Occupations Code Chapter 2308, Providing for Regulation of Said Services and Establishing a Wrecker Rotation Process.

A. WRECKER AND TOWING ORDINANCE

ORDINANCE NO. _____

ORDINANCE AMENDING THE CODE OF ORDINANCES OF THE CITY OF EDINBURG, TITLE XI: BUSINESS REGULATIONS, BY REPLACING CHAPTER 118 VEHICLE WRECKER AND TOWING SERVICES; PROVIDING FOR A REPEALER CLAUSE; PROVIDING A SAVINGS CLAUSE; PROVIDING FOR PUBLICATION AND EFFECTIVE DATE; PROVIDING FOR CODIFICATION; PROVIDING A WAIVER OF THE THREE (3) SEPARATE READINGS; AND ORDAINING OTHER PROVISIONS RELATING TO THE SUBJECT MATTER HEREOF.

WHEREAS, City Code of Ordinances Title XI contains regulations for specific types of businesses; and

WHEREAS, the City Council believes it is in the best interests of the residents to allow for and regulate the operation of vehicle wrecker and towing services and businesses within City limits pursuant to its authority under Occupations Code Chapter 2308.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF EDINBURG, TEXAS, THAT:

SECTION I. INCORPORATION OF RECITALS. The City Council finds that the statements set forth in the Recitals are true and correct and the City Council hereby incorporates such Recitals as findings of fact.

SECTION II. AUTHORITY OF LAW. All requirements of the law have been met in the passing of this Ordinance.

SECTION III. The Code of Ordinances of the City, Title XI, Business Regulations, is amended to include a revised Chapter 118 Vehicle Wrecker and Towing Services, to be read in its entirety as shown in Exhibit A attached to this Ordinance.

SECTION VI. REPEALER CLAUSE: This Ordinance shall be cumulative of all other ordinances dealing with the same subject, and any provision of any ordinance in direct conflict with any provision of this Ordinance is hereby repealed and the provisions of this Ordinance shall supersede any provisions in conflict herewith; all provisions of any other ordinance not in conflict herewith shall remain in full force and effect.

SECTION VII. SAVINGS CLAUSE: If any section, part, or provision of this Ordinance is declared unconstitutional or invalid, by a court of competent jurisdiction, then, in that event, it is expressly provided, and it is the intention of the City Council in passing this Ordinance that its

parts shall be severable and all other parts of this Ordinance shall not be affected thereby and they shall remain in full force and effect.

SECTION VIII. PUBLICATION AND EFFECTIVE DATE: This Ordinance shall take effect immediately upon its passage.

SECTION IX. CODIFICATION: That this Ordinance shall be published in the Code of Ordinances of the City of Edinburg, Texas.

SECTION X. WAIVER CLAUSE. The requirement of three separate readings of this Ordinance is hereby dispensed with by a vote of not less than a majority of all the members of the City Council.

READ, CONSIDERED, PASSED AND APPROVED at a regular meeting of the City Council of the City of Edinburg, Texas, at which a quorum was present and which was held in accordance with V.T.C.A., Government Code, Section 551.041, on August 20, 2024.

CITY OF EDINBURG

APPROVED AS TO FORM:
CITY ATTORNEY'S OFFICE

BY: _____
Josephine Ramirez-Solis, City Attorney

EXHIBIT A

WRECKER AND TOWING ORDINANCE

Sec. 118.01- Purpose.

The City of Edinburg, pursuant to its authority granted by state law, in order to protect the public and the rights of persons whose vehicles may be towed, to maintain safe and efficient operation rules, and to preserve the peace of the community, hereby establishes the licensing and regulation of business enterprises engaged in towing, removing and storing of vehicles within the city. The purpose of this chapter is to establish procedures for wrecker services located within the city, to show proof of safety, and to establish a voluntary wrecker rotation list within the city.

Sec. 118.02 - Definitions.

For the purpose of this chapter, the following definitions shall apply unless the context clearly indicates or requires a different meaning.

Consent tow has the same meaning as defined by V.T.C.A., Occupations Code§ 2308.002.

Department means the Edinburg Police Department.

Disabled vehicle means a vehicle which has been rendered unsafe to be driven as a result of some occurrence other than a wreck, including but not limited to mechanical failures or breakdown, fire, vandalism or a vehicle which is in a safe driving condition, but the owner is not present, or able, or permitted to drive, so as to reasonably necessitate that the vehicle be removed by a wrecker.

Motor vehicle means every vehicle which is self-propelled.

Operator means any person operating a motor vehicle.

Owner means any person who holds the legal title of a motor vehicle or who has the legal right of possession of such vehicle.

Parking facility means public or private property used, in whole or in part, for restricted or paid vehicle parking. Parking facility includes:

(1) A restricted space on a portion of an otherwise unrestricted parking facility; and

(2) A commercial parking lot, a parking garage, and a parking area serving or adjacent to a business, church, school, home, apartment complex, property governed by a property owners' association, or government-owned property leased to a private person, including:

(a) A portion of the right-of-way of a public roadway that is leased by a governmental entity to the parking facility owner; and

(b) The area between the facility's property line abutting a county or municipal public roadway and the center line of the roadway's drainage way or the curb of the roadway, whichever is farther from the facility's property line.

Parking facility owner

(1) An owner or operator of a parking facility, including a lessee, employee, or agent of an owner or operator;

(2) A property owners' association having control under a dedicatory instrument over assigned or unassigned parking areas; or

(3) A property owner having an exclusive right under a dedicatory instrument to use a parking space.

Street means any street, alley, avenue, lane or highway within the corporate limits of the city.

Unauthorized vehicle means a vehicle parked, stored, or located on a paring facility without the consent of the parking facility owner

Vehicle means a device in, on, or by which a person or property may be transported on a public roadway. Vehicle includes an operable or inoperable automobile, truck, motorcycle, recreational vehicle, or trailer, but does not include a device moved by human power or used exclusively on a stationary rail or track.

Vehicle storage facility means a facility operated by a person licensed under Chapter 2303, Occupations Code, Acts 1995, 74th Leg., Ch. 165, Sec. 1, eff. September 1, 1995. Amended by Acts 2001, 77th Leg., Ch. 1420, Sec. 19.008, eff. September 1, 2001; Acts 2003, 78th Leg., Ch.
1276, Sec. 14A.839, eff. September 1, 2003.

Voluntary wrecker rotation list means the rotation list of wrecker companies prepared and used by the police department.

Wrecked vehicle means a vehicle that has been damaged as the result of overturning or colliding with another vehicle or object so as to reasonably necessitate that the vehicle be removed by a wrecker.

Wrecker or *tow truck* means any motor vehicle used for the purpose of towing or removing vehicles. Where the word wrecker appears herein, it shall also include tow truck unless the language specifically excludes tow trucks.

Wrecker business means the business of towing, moving or removing vehicles on or from the public streets, regardless of whether the purpose of the towing is to remove, repair, wreck, store, trade or purchase such vehicle, to remove a wrecked or disabled vehicle from the scene of a collision, or to remove a vehicle from an unlawfully parked position, or to remove an abandoned or wrecked vehicle.

Wrecker Company means any person or entity engaged in the wrecker business.

Non-consent tow has the same meaning as defined by V.T.C.A., Occupations Code §2308.002.

Sec. 118.03 -Authority and Duties of the Police Department.

The department shall implement and enforce this chapter. In addition to the powers and duties elsewhere prescribed in this Chapter, the department is authorized to:

(1) Conduct random periodic investigations of towing, and vehicle storage facilities throughout the city concerning their compliance with this chapter and state law.

(2) Inspect tow truck vehicles for compliance with vehicle and equipment safety standards established by this chapter.

(3) Conduct random inspections of tow trucks records and facilities for compliance with this chapter and state law. Inspections should be performed in a reasonable manner so as to comply with the laws of the state.

(4) Conduct random inspections of vehicle storage facility records, facilities, and storage lots for compliance with this chapter and state law. Inspections should be performed in a reasonable manner so as to comply with the laws of the state.

Sec. 118.04 -Permit Application and Minimum Requirements.

(1) Every person desiring to engage in the wrecker business in the city shall apply to the Chief of Police on an application form provided by the Police Department. The Chief of Police, or his or her representative, shall issue a permit to engage in the wrecker business to each applicant complying with the provisions of this chapter for each wrecker to be operated in the city.

(2) Such application shall include the following:

a. The name, address, telephone number, date of birth, driver's license number, and social security number of the owner and wrecker operators. If the owner is an individual, the application shall so state. If a partnership, the partnership name and address shall be given together with the names, addresses, telephone numbers, dates of birth, driver's license numbers, and social security numbers of all partners. If a corporation, the corporate name and office address shall be given, together with the names, addresses, telephone numbers, dates of birth, driver's license numbers, and social security numbers of the president and secretary.

b. The number of auto wreckers an owner desires to operate, listing the make, model, vehicle identification number and correct state license number of each auto wrecker.

c. The true ownership of each auto wrecker. If not owned outright by the owner, as defined in section 5-l, the name and address of the true owner shall be given. If the auto wrecker is operated under the terms of a contract with some company other than the owner, a copy of the contract shall also be attached.

d. That the owner will obey the provisions of this chapter and of all other city ordinances and state statutes applicable to motor vehicles and agrees that, upon his failure to so obey such laws, his permit may be revoked or suspended.

(3) The application shall be sworn to by the owner. If a partnership, it shall be signed by a member of the firm. If a corporation, it shall be signed by the president and attested by the secretary and the corporate seal affixed, if the corporation has a corporate seal. In all

cases, the person signing shall execute an affidavit on the application form that the statements contained in such application are true and correct.

(4) Every wrecker proposed to be used by the applicant in the city shall comply with the following minimum safety requirements:

a. Be not less than three-quarters of a ton in size and be equipped with booster brakes;

b. Be equipped with a power winch line and boom with a factory-rated lifting capacity of not less than 5,000 pounds, single-line capacity; and

c. Each wrecker shall carry as standard equipment, including a tow bar, safety chains, fire extinguisher, wrecker bar, broom, axe, shovel, flags, flares, dolly, winch, line, tow bar, blinker lights, emergency light, working light, wheel shocks, hydraulic jack, tire tools and equipment reasonably necessary to conduct wrecker service.

(5) No delinquent taxes of any type shall be due to the city upon any property of applicant or any wrecker for which a permit is sought, and the applicant shall not have failed to render any property located within the city for ad valorem taxation.

(6) Each application for a safety and insurance compliance certificate for a wrecker shall state that such wrecker has been inspected and approved under the direction of the Texas Department of Public Safety, and a current inspection sticker shall be affixed securely to the inside of the windshield of the wrecker.

(7) A wrecker business may only operate one business on the Police Departments wrecker rotation list.

Sec. 118.05 -Permit Fee

The annual fee for a wrecker business permit required by this chapter shall be seventy-five dollars ($75.00) for each auto wrecker, plus a fifteen dollar ($15.00) processing fee. Such fee shall be paid at the time the permit application is submitted. The fee shall not be refunded whether or not a permit is issued.

Sec. 118.06 -Permit Renewals

All wrecker business permits issued under this chapter shall expire on the fifteenth day of April of each year, and if then renewed shall expire on the next succeeding fifteenth day of April.

Sec. 118.07- Permit Display

After the true owner has filed an application for a wrecker business permit, paid the permit fee, and filed the insurance policy required by this chapter, and the chief of police has examined same and found them to be in compliance with the terms of this chapter, the chief of police shall issue to the owner a permit to operate a wrecker business in the city, which permit shall bear upon its face a notice that the same expires on the succeeding April 15. Each permit shall be dated and numbered and shall show on its face the make, model, vehicle

identification number and state license number of each auto wrecker permitted to operate. Such permit shall be affixed and clearly visible to each wrecker. The chief of police is authorized to prescribe regulations for the displaying of signs on auto wreckers showing that a permit for same has been issued as provided in this article.

Sec. 118.08 -Additional Wreckers Require Application.

1) Where an owner has obtained a wrecker business permit and thereafter desires to increase the number of auto wreckers to be operated, the owner shall file an additional application setting forth the permit number and the fact that the owner desires to operate additional wreckers, giving the make, model, vehicle identification number and state license number of each additional auto wrecker. The owner shall also file the proper permit fee to cover the additional number of auto wreckers wanted.
2) The owner shall also file a new insurance policy covering the new auto wreckers with the chief of police.
3) The chief of police shall examine such additional auto wrecker application fee, and policy and if the same are in order, the chief of police shall issue a supplemental permit covering each new auto wrecker, at an additional fee as prescribed in this chapter.

Sec. 118.09 – Substitute Wreckers.

Whenever an owner wishes to discontinue the use of an auto wrecker during the period covered by his permit and replaced it with another, the owner shall file an affidavit stating that the owner has discontinued using the auto wrecker covered by the permit and desires to use another auto wrecker in its place. The owner shall also attach an insurance certificate demonstrating that insurer has been notified thereof and agrees thereto. The chief of police shall then issue the owner an additional permit covering the new auto wrecker and cause the description of the old auto wrecker to be cancelled from the original permit. In the affidavit, insurance certificate, and additional permit, the old and the new auto wreckers shall be described by make, model, vehicle identification number and state license number. A new fee will be required on the new application and the old fee forfeited.

Sec. 118.10-Insurance Requirements.

1) Before any permit shall be issued under this chapter to a wrecker business owner or before any renewal of such permit shall be granted, such owner shall procure and keep in full force and effect a policy or policies of public liability and property damage insurance issued by a causality insurance company authorized to do business in the State of Texas and in the standard form approved by the board of insurance commissioners of the State of Texas, with the insured provision of said policy or policies including the city as an insured, and the coverage provision insuring the public from any loss or damage that may arise to any person or property by reason of the operation of a wrecker of such owner and providing that the amount of recovery on each wrecker shall be in limits of not less that the following sums:

a. For damages arising out of bodily injury to or death of one person in any one accident: $250,000.00

b. For damages arising out of bodily injury to or death of two (2) or more persons in any one accident: $500,000.00

c. For injury to or destruction of property in any one accident: $100,000.00

2) The chief of police may suspend, cancel or revoke any auto wrecker permit issued under this chapter without further notice to the owner if satisfactory evidence or proof of financial responsibility is not in full force and effect at all times.

Sec. 118.11 -Indemnification Requirement.

Every applicant to obtain a wrecker business permit shall sign an agreement which shall be attached to the application wherein the applicant agrees to indemnify and hold harmless the city, its officers, agents and employees from any and all claims, demands, actions and causes of actions arising from the granting of a permit to operate a wrecker business or to operate a wrecker, and from the operation of the wrecker business or any wrecker.

Sec. 118.12 -Driving wreckers to scene of collision prohibited; exceptions.

No person shall drive or cause to be driven a wrecker to or near the scene of an accident or collision on a street in this city unless such person has been called to the scene by an owner or operator of a vehicle involved in such accident or collision, a party involved in the collision, or
by the Police Department or Fire Department of the city unless it is necessary to prevent death or bodily injury to any person involved in an accident or collision.

Sec. 118.13 -Removal of Vehicle from Scene of Accident or Collision.

(a) No wrecker shall remove any wrecked or disabled vehicle from the place where the accident has occurred or attach his wrecker to the wrecked or disabled vehicle until the police officer of the city investigating the accident has completed his investigation.

(b) The fact that no police officer of the city is present at the scene of the accident when an emergency auto wrecker or an auto wrecker, which has been summoned to the scene by the vehicle owner, arrives shall not constitute an exception to this section, and it shall be the duty of any owner or driver of a wrecker desiring to tow or haul any wrecked or disabled vehicle from the scene of the accident to cause the police department of the city to be notified of the occurrence of the accident and to wait the arrival of a police officer of the city and the completion of his investigation.

Sec. 118.14 -Removal of Waste.

Any owner of a vehicle whose vehicle has been towed from a public way, street or property at the direction of the Police Department, where it was necessary for the department to incur expense for the cleanup of hazardous waste and/or material, the owner of said vehicle shall be responsible for payment of the cost associated with the cleanup.

Sec. 118.15 -Soliciting Wrecker Business Prohibited; Presence at Scene as Evidence of Violation.

No person shall solicit in any manner, directly or indirectly, on the streets of the city, the business of towing any vehicle which is wrecked or disabled on the public streets, regardless of whether the solicitation is for the purpose of soliciting the business of towing, removing, repairing, wrecking, storing, trading or purchasing such vehicle. The presence of a wrecker at or neat the scene of a wreck, accident or collision, within one hour after the occurrence of a wreck, accident or collision without being summoned to the scene by an owner or operator of a vehicle involved in such accident or collision or by the Police Department or Fire Department shall be prima facie evidence of a solicitation in violation of this section.

Sec. 118.16- Communication from the Fire Department or Police Department radio frequency not to be intercepted

(A) No owner of a wrecker company not permitted by the city shall intercept any messages emanating from the Police Department or Fire Department radio frequencies or divulge or publish the existence, contents, substance, purpose, effect or meaning of such intercepted communication.

(B) The owner or operator of a wrecker shall not act upon any information received on the radio frequency of the Police Department or Fire Department for his or her own benefit or the benefit of any other person in connection with the operation of a wrecker business unless the owner or operator was called or summoned by the Police Department or Fire Department.

Sec. 118.17 -Wrecker Selection; Wrecker Rotation List

(A) The Police Department shall maintain a list of wrecker companies on a wrecker rotation list for on call service. The Department shall maintain a rotation schedule indicating which wrecker company is next available for service at any time. The department will also keep and maintain a total of (10) ten wrecker businesses on the Police Departments wrecker rotation list. The director may add more to the wrecker rotation list, as he/she deems necessary.

(B) When a police officer investigating an accident, making an arrest, or otherwise performing duties as a police officer determines that any vehicle on a public street is

unable to proceed safely under its own power or determines that the operator thereof is unable to operate such vehicle, such officer shall request the operator for the name of the wrecker company the operator desires to remove the vehicle. When the operator has named the wrecker company desired, the police officer shall communicate that fact immediately to the Police Department headquarters, and it shall be the duty of the person receiving such information at headquarters to call the designated company or authorized agent of such company to send a wrecker to the scene of the vehicle

(C) In the event the owner of a vehicle involved is not available or the operator of such vehicle is unable to name the wrecker company desired or refuses to name one, the investigating officer shall communicate this fact immediately to Police Department headquarters so that a wrecker can be selected from the wrecker rotation list.

(D) Upon receiving a communication advising the Police Department of the need for a wrecker from the wrecker rotation list, the Police Department headquarters shall call the wrecker company next on the rotation list to remove the vehicles involved. If there are no wreckers available at the wrecker service on call, or if the Police Department cannot immediately make contact with the wrecker service on call, the Police Department shall proceed through the wrecker rotation list until a wrecker is located that is available and ready to proceed immediately to the scene of the incident requiring a vehicle to be removed.

Sec. 118.18 -Application to Wrecker Rotation List.

Any owner desiring to be on the wrecker rotation list shall make application to the chief of police for a rotation list permit. Such application shall be submitted upon forms to be furnished by the chief of police and the applicant shall furnish the following proof and information with his application:

(1) That the owner making application for an emergency auto wrecker permit shall be a citizen of the United States, more than twenty-one (21) years of age, and able to read and write the English language.

(2) An agreement that the applicant will participate in the wrecker rotation list on a form provided by the Police Department.

(3) The name and address of the vehicle owner, and if the wrecker is to be operated under the name of some other company than the name of the owner, the name of the company. Accompanying the application shall be a signed copy of the agreement and contract between the vehicle owner and the company in whose name the wrecker is to operate. The wrecker rotation list permit shall be issued and no transfer from one company to another company by the vehicle owner shall be permitted until the chief of police has been notified in writing and a signed copy of the new contract and agreement has been submitted to him for approval. If an individual, the application shall so state. If a partnership, the partnership name and address shall be given together with the names and addresses of all partners. If a corporation, the corporate name and office address shall be given, together with the names and addresses of the president and secretary. All of the provisions and requirements applicable to persons in this article shall apply to and be required of each partner and of each of the three (3) principal officers and the failure of any

of them to meet such requirements shall be grounds to deny the application of the corporation or partnership. All changes of such officers or partners shall be reported to the chief of police within ten (10) days after the change and said new officers or partners shall individually file applications certifying to their individual qualifications within such time and the failure to certify within said time or to possess the said qualifications required of such persons under this article, shall be cause for the suspension of all permits held by said corporation, or partnership.

(4) The number of vehicles an emergency wrecker permit owner desires to operate and have licensed, and the make, model, vehicle identification number and correct state license number of each vehicle to be licensed.

(5) Each person making application shall submit three (3) passport-size photographs of themselves to the chief of police and submit themselves to be fingerprinted.

The wrecker rotation list sticker must be affixed securely to the upper left-hand comer of the windshield of the inspected wrecker. Before issuance of a wrecker rotation list permit and inspection sticker, the following requirements must be met:

(a) An applicant shall submit each wrecker which will be used in the service for inspection in a manner determined by the chief of police, and each wrecker must comply with the following minimum requirements:

(1) Each wrecker shall be not less than one ton in size and be equipped with booster brakes.

(2) (2) Each wrecker shall be equipped with a power-operated winch, winch line and boom, with a factory-rated lifting capacity of not less than six thousand (5,000) pounds, single-line capacity.

(3) Each wrecker shall carry, as standard equipment, a tow bar, debris box, safety chains, a fire extinguisher, wrecker bar, broom, shovel and flares.

(4) Each wrecker and all of its equipment shall be in safe and good working condition.

(5) Each emergency wrecker shall have a towing dolly available.

(b) Each licensee shall maintain twenty-four-hour wrecker service and shall maintain a twenty-four-hour telephone answering service.

Wrecker companies that want to be placed on the wrecker rotation list shall provide the following information and documents and comply with the following requirements:

(1) Have been issued a safety and insurance compliance certificate by the city;

(2) Have applied to be on the wrecker rotation list;

(3) Have a minimum of one wrecker with lawful drivers readily available located at site within the city limits to answer calls from the Police Department or Fire Department during such times that the wrecker service is on call for services;

(4) Maintain a physical office building with a permanent address and a storage compound within the city and operated on a daily basis (Monday through Friday), with normal working hours from 8:00 a.m. to 5:00 p.m., with an employee physically present at

the business during such normal working hours. The office building shall be served by a telephone with a number provided to the Police Department for calls during normal working hours. If the office is not manned 24 hours per day, seven days per week, the wrecker service shall also provide the Police Department with a telephone number for calls after normal working hours, weekends and holidays. An answering service or answering device shall not be used;

(5) The storage compound shall contain sufficient space for storage of at least 20 motor vehicles and be fenced with opaque fencing material with a minimum height of six feet. The site location, layout and equipage must be approved by the city's Planning and Zoning Department (conditional use permit);

(6) The storage compound surface shall be constructed of caliche, asphalt or concrete;

(7) No wrecker company shall substitute another wrecker company's wrecker in order to respond to a call for service;

(8) No wrecker company shall share storage compounds.

Wrecker service companies on the wrecker rotation list should be able to respond to calls according to the following schedule:

(a) During the normal workweek, Monday through Friday, 8:00 a.m. to 5:00 p.m.

1. Within city limits, 20 minutes.
2. Outside city limits, 30 minutes.
3. Commercial (Heavy Duty), 50 minutes.

(b) After normal working hours, on weekends or holidays:

1. Within city limits, 25 minutes.
2. Outside city limits, 35 minutes.
3. Commercial (Heavy Duty), 60 minutes.

A wrecker service company failing to respond within five minutes of the above schedule shall have its call cancelled, and the next wrecker service company on the wrecker rotation list shall be called.

In the event the vehicle to be towed, moved or removed exceeds the capacity of the wreckers operated by the wrecker service company on the wrecker rotation list, or in the event of an emergency wherein life or property are threatened, or in circumstances where the situation requires immediate action to protect life or property, the Police Department may call any wrecker service with the capability to provide the service needed.

Operators of wreckers shall abide by any orders or instructions given by the Police Department or Fire Department dispatchers, police officers and firefighters in charge at the scene.

(1) Each wrecker service company on the wrecker rotation list shall keep a record of all calls made in response to requests from the city, which records shall include the following

information:

(a) Date and time of call;
(b) Location of vehicle to be towed or removed;
(c) Response time;
(d) Vehicle owner or operator;
(e) Description of vehicle;
(f) Disposition of vehicle;
(g) Charges involved;
(h) Status of payment for charges;

(2) Such records shall be available for inspection by the city at any reasonable time.

The wrecker rotation schedule maintained by the Police Department shall list all wrecker services on the list in alphabetical order. Rotation shall be on a per-call basis.

In addition to the fine authorized, a wrecker service company that violates any of the provisions of this chapter shall be subject to removal from the wrecker rotation list

Separate fee for being on rotation list

(a) The annual fee for wrecker rotation list permit is one hundred twenty-five dollars ($125.00) for each wrecker permit. The annual fee is ten dollars ($10.00) for each wrecker which is used in the wrecker rotation list. The fee is two dollars ($2.00) for issuance of a duplicate license if a license is lost, destroyed, or mutilated.

(b) Fees are payable to the Police Department upon issuance of the permit. No refund of fees will be made.

Sec. 118.19- Fee schedule

(a) No towing fees may be charged other than those fees listed in this subsection.

(b) The maximum fee that may be charged for towing under this article shall

be:

(1) Two-Hundred dollars ($200.00) for vehicles ten thousand (10,000) Pounds or less.

(2) Two-Hundred and fifty dollars ($250.00) for vehicles between ten thousand one (10,001) and twenty-four thousand nine hundred ninety-nine (24,999) pounds.

(3) Six hundred dollars ($600.00) for any vehicle or combination vehicle twenty-five thousand (25,000) pounds or more.

However, due to many weight sizes that this category may encompass for any multitude of challenging circumstances, it has been determined that the following wrecker service fees (4 c-t) shall be nonexclusive (no cap fees). However, the

wrecker company shall provide a detailed and itemized cost (s) for the services provided; a copy which must be submitted to the police department representative within twenty four hours of the said itemized invoice being completed.

(4) One hundred ($100.00) flat rate for vehicles towed to the police impound and One hundred and fifty dollars ($150.00) for vehicles towed from outside city to police impound.

(c) Weight, for purposes of this section, shall be determined by the gross weight recorded on the vehicle registration.

(d) Waiting time over 15 minutes at the scene of an accident (per quarter hour), $9.50.

(e) Disconnecting transmission, $12.50.

(f) Use of dollies or other specialized equipment, $65.00.

(g) Towing of trucks exceeding one ton:

(1) First hour of service (minimum charge), $94.00.

(2) Additional time required to remove such vehicles (per working hour), $94.00.

(h) Towing vehicle from outside the city limits, $18.70 plus per mile to and from location of vehicle, $1.75.

(i) Pickup and delivery of vehicle to city pound:

(1) Daytime delivery, $45.00.

(2) Nighttime delivery, $65.00.

(j) The total fee charged will be made up of the towing fee (subsections (b) (l), (2), (3), or (4) specialized service fee (subsection (f)), waiting fee (subsection (d)) and storage or impoundment fees, if any (see subsection (l)). Pick Up and delivery fee (i) or ((o) Clean up fee) or ((p) Notification fee).

1. If the owner or operator of a vehicle which is parked in violation of this Code or state law arrives before the vehicle is hooked up, the wrecker operator shall release the vehicle for free. If the owner or operator of a vehicle which is parked in violation of this Code or state law arrives after the vehicle is hooked up but before it is removed from the property, the wrecker operator shall advise them the vehicle will be release upon payment of the drop fee.

The wrecker operator will allow the vehicle owner or operator at least fifteen (15) minutes to get the funds for the drop fee. There is nothing requiring the wrecker operator to release a legally towed vehicle that is properly hooked up and has left the private property.

2. The maximum fee that may be charged for a drop fee under this chapter shall be one-half (l/2) of the full rate as set forth in subsection (b) above.

(k) For payment of any fee under this section, a towing company or vehicle storage facility shall accept payment by an electronic check, debit card, or credit card for any charge associated with delivery or storage of a vehicle. For payment of any fee under this section, a vehicle storage facility shall accept payment by an electronic check, debit card, or credit card for any charge associated with delivery or storage of a vehicle. Release of a vehicle may not be denied based on the inability of the facility to accept payment by electronic check, debit card, or credit card of any charge associated with delivery or storage of the vehicle unless the inability to accept such payment is due to factors outside the control of the vehicle storage facility, such as a power outage or machine malfunction. However, payment by credit or debit card may be refused if the named cardholder is not present.

(l) The cost for the storage of a vehicle shall be no more than $20.00 for the initial 24 hours, and $10.00 for each day thereafter.

(m) In no way is subsection (b) above to be construed to mean that a towing company may not charge less than the fees stated in this section. These fees are the maximum that can be charged for any towing, or drop fee of a vehicle in accordance with this article.

(n) Where any state law, rule or regulation requires a different rate for services rendered by a wrecker service or storage facility or any other type of business entity regulated under this chapter, as provided for in this chapter, then such state-regulated rate shall be followed without the necessity of further amendment of this chapter.

(o) Clean up fee, $65.00.

(p) Notification letter fee, $50.00 (with proof of certified receipt)

Sec. 118.20- Safety requirements

All towing companies, tow truck drivers, vehicle storage facilities and property owners under this article shall comply with all applicable state laws, local ordinances and rules issued by the state department of licensing and regulation applicable to a tow truck, towing company, tow operator, or storage facilities.

Sec. 118.21 -Revocation of Wrecker Permit; Removal from wrecker rotation list

The Chief of Police may refuse to issue or renew a wrecker business permit for one or more of the following reasons:

(1) The making of any false statement as to a material matter in an application for a permit or permit renewal.

(2) Revocation of a license, pursuant to this article, of the applicant or any proprietor, partner or corporation officer of the applicant within eighteen (18) months preceding application.

(3) Use by the licensee of a trade name for his wrecker business other than the one registered with the chief of police.

(4) Suspension of the wrecker business permit on three (3) occasions within twelve (12) months for more than three (3) days on each occasion.

(5) Failure to meet the service standards in the rules and regulations established by the Police Department.

(6) Licensee has been convicted of a crime involving theft, theft of an automobile or receiving and concealing stolen property, unless five (5) years have elapsed since the date of conviction or the date of release from confinement imposed for the conviction, whichever is the later date.

(7) Failure to maintain insurance requirements.

(8) If it is found that rates being charged are unreasonable or in violation of this chapter or other law.

Sec. 118.22 -Penalties

a) Each violation of this chapter constitutes a separate offense.

1. An offense committed under this article is punishable by a fine of not less than two hundred dollars ($200.00) nor more than five hundred dollars ($500.00). The minimum fine established in this subsection shall be doubled for the second conviction of the same offense within any two-year period. A third conviction within any two-year period will result in a fine of five hundred dollars ($500.00). At no time shall the minimum fine exceed the maximum fine established in this subsection. Nothing in this section shall prohibit application of any fines authorized by state law to be assessed.

2. Prosecution for an offense under this section does not prevent the use of other enforcement remedies or procedures applicable to the person charged with the conduct or involved in the offense.

Sec. 118.23 -Information and data to be kept and maintained two (2) years; records to be made available for inspection.

Each tow truck company shall maintain at the business office information and data on his towing company business and operations. The following specific requirements are hereby prescribed:

Accurate records, reports, receipts and other operating information and data as may be required by the director shall be kept and maintained in a business office located in the City of Edinburg for at least two (2) years after date, and all such documents shall be made available at a place readily accessible for examination and copying at all reasonable times by the department or a peace officer upon request.

Sec. 118.24- Vehicle storage facilities and towing company's duty to report after towing or accepting a lawfully repossessed or towed vehicle.

(a) Whenever any vehicle is removed from private property without the consent of the vehicle owner or a lienholder, a control number must be requested from the department within forty-five (45) minutes of the vehicle leaving the property by reporting the following information to the department:

(1) A general description, including the year, make, model, and color;

(2) The state and number of the vehicle's license plate, if any;

(3) The vehicle identification number;

(4) The date and time of the tow as well as the location from which the vehicle would have been towed;

(5) The name of the company towing the vehicle;

(6) The name of the person or entity authorizing the tow and a valid contact phone number; and

(7) The name of the vehicle storage facility to which the vehicle has been or will be taken.

(b) Whenever any person tows, carries, transports or otherwise takes a motor vehicle pursuant to a request by a lienholder incident to a lawful repossession, the person so taking the vehicle shall, within forty-five (45) minutes of taking possession, report to the department:

(1) A general description of the vehicle, including the year, make, model, and color;

(2) The state and number of the vehicle's license plate, if any;

(3) The vehicle identification number of the vehicle;

(4) The date and time of tow as well as the location from which the vehicle was towed;

(5) The name of the company towing the vehicle, the name and state department of licensing and regulation number issued to the driver of the tow truck driver doing the tow, and the name and location where the vehicle is being stored; and

(6) The name, title and phone number of the lienholder causing the vehicle to be repossessed.

(c) The required report must be made by telephone, by facsimile, other electronic device, or delivered personally to the department.

Sec. 118.25 -Claimed vehicles.

(a) When a storage facility acquires possession of a private property non-consent towed motor vehicle, the storage facility is entitled to:

(1) Towing charges, if applicable;

(2) Impound fees when authorized by state law;

(3) Storage fees as allowed by state law; and

(4) Notification charges.

(b) A vehicle storage facility must notify owners or operators of vehicles:

(1) What methods of payments are accepted;
(2) The location from which the vehicle may be retrieved;

(3) The total amount of charges if the vehicle is picked up the same day as the call;

(4) Procedures for civil recourse as provided in V.T.C.A., Occupations Code§§ 2308.452 and 2308.455; and
(5) Procedures for filing complaints with the state department of licensing and regulation.

(c) A towing company that removes or is in the process of removing a vehicle from a parking facility, upon request of the vehicle owner or operator, shall provide the owner or operator an explanation of the reason for removing the vehicle from the parking facility.

Sec. 118.26 -Disposition of property left in towed vehicles.

Upon request and during normal business hours, an individual demonstrating ownership or right to possession of a vehicle, a vehicle storage facility shall give that individual access to a vehicle in the facility and allow removal of any personal property left in the towed vehicle, unless otherwise indicated by a law enforcement officer. All such personal property must be surrendered to the property owner regardless of whether or not any or all fees associated with the towing or storage of the vehicle have been paid. "Personal property" for purposes of this section refers to property in the vehicle which is not permanently affixed to the vehicle. The vehicle storage facility must request a receipt from the person to whom the personal property is released for any such property removed from the stored vehicle. Nothing in this provision is intended to conflict with the provisions of 16 Tex. Admin. Code§ 85.708.

Sec. 118.27. - Duty to remove debris.

It shall be the duty of each wrecker that removes a wrecked, damaged, or disabled vehicle from the place where an accident has occurred to clear and remove from the street any and all debris, parts, or glass accumulated as a result of the accident from the street. Each wrecker that is required to remove from the street any and all debris, parts, or glass accumulated as a result of accident from the street is allotted 15 minutes for such clean up. A wrecker may charge a fee, as established in the city fee

schedule in Chapter 118 for clean up if the debris, parts, or glass accumulated is to the extent that more than 30 minutes is required for such clean up.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
RESOLUTIONS
Agenda Item No: 9.A.

1. **Agenda Item:**
Consider Resolution Authorizing the City Manager to Enter Into a Municipal Maintenance Agreement with the Texas Department of Transportation for Assistance in the Maintenance and Operation of State Highways Within and Through the City's Corporate Limits. [Tomas D. Reyna, Assistant City Manager]

2. **Description:**
The Texas Transportation Code gives the City exclusive dominion, control, and jurisdiction over and under the public streets within its corporate limits and authorizes the City to enter agreements with the State to fix responsibilities for maintenance, control, supervision, and regulation of State Highways within and through its corporate limits. The code also authorizes the State, at its discretion, to enter agreements with cities to fix responsibilities for maintenance, control, supervision, and regulation of State highways within and through the corporate limits of such Cities.

The TxDOT Executive Director, acting for and on behalf of the Texas Transportation Commission, has made it known to the City that the State will assist the City in the maintenance and operation of State Highways within the City, conditioned that the City will enter into agreements with the State for the purpose of determining the respective responsibilities of the City. The City has requested the State to assist in the maintenance and operation of State Highways within the City as described below.

Non-Controlled Access Highways

1. SH 107 (University Dr.) - From West City Limits to East City Limits
2. FM 1925 (Monte Cristo Rd.) - From West City Limits to East City Limits
3. FM 2812 - From I-69C (US281) to East City Limits
4. FM 2182 (Schunior Rd/Richardson Rd.) - US BUS 281 (Closner Blvd.) to East City Limits
5. FM 3362 (Jackson Rd.) - From SH 107 to South City Limits
6. FM 2061 (McColl Rd.) - From FM 1925 (Monte Cristo Rd.) to South City Limits
7. FM 1426 (Raul Longoria Rd.) - From SH 107 (University Dr.) to South City Limits
8. US BUS 281 (Closner Blvd.) - From US 281 (I-69C) Bypass North End to US 281 (I-69C) Bypass South End
9. US 281 (Frontage ROW) - From North City Limits to BU 281 & US 281 Bypass
10. FM 490 - From US 281 (I-69C) to East City Limits

Controlled Access Highways

1. US 281 (I-69C) Expressway - From North City Limits to South City Limits.

3. **Staff's Recommendation:**
Approve the Resolution to Enter into the Municipal Maintenance Agreement with the Texas

Department of Transportation for Assistance in the Maintenance and Operation of State Highways Within and Through the City's Corporate Limits.

RESOLUTION NO. _____

STATE OF TEXAS	**§**	**A RESOLUTION APPROVING A MUNICIPAL MAINTENANCE AGREEMENT WITH THE TEXAS DEPARTMENT OF TRANSPORTATION FOR ASSISTANCE INTHEMAINTENANCEANDOPERATIONOF STATE HIGHWAYS WITHIN AND THROUGH THE CITY'S CORPORATE LIMITS.**
COUNTY OF HIDALGO	**§**	
CITY OF EDINBURG	**§**	

WHEREAS, the public convenience, safety and necessity of the City require that State Highway routes within the City be adequately maintained; and

WHEREAS, the City of Edinburg wishes to assure the proper maintenance, control supervision, and regulation of certain State Highways and/or portions of State Highways within and through the City's corporate limits; and

WHEREAS, the City has requested that the State of Texas enter upon and contribute financially to the maintenance of certain State Highways and/or portions of State Highways within and through the City's corporate limits; and

WHEREAS, the State has made it known to the City that it will, with its own forces and equipment and at its sole cost and expense, provide adequate maintenance for the State highways covered by this agreement, conditioned upon the provisions concerning liabilities and responsibilities for maintenance, control supervision, and regulation which are set out in the form attached hereto, made a part thereof; and marked MUNICIPAL MAINTENANCE AGREEMENT; and

WHEREAS, the Texas Department of Transportation has requested to update the existing maintenance agreement.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF EDINBURG

SECITON 1: That the certain agreement dated August 20, 2024, between the State of Texas and the City of Edinburg for the maintenance, control, supervision, and regulation of certain State Highways and/or portions of State Highways in the city of Edinburg be, and the same is, herby approved; and Myra L. Ayala, City Manger, is hereby authorized to execute said agreement on behalf of the City of Edinburg and to transmit the same to the State of Texas for appropriate action.

READ, CONSIDERED, PASSED AND APPROVED at a regular meeting of the City Council of the City of Edinburg, Texas, at which a quorum was present and which was held in accordance with V.T.C.A., Government Code, Section 551.041, on the 20th day of August, 2024.

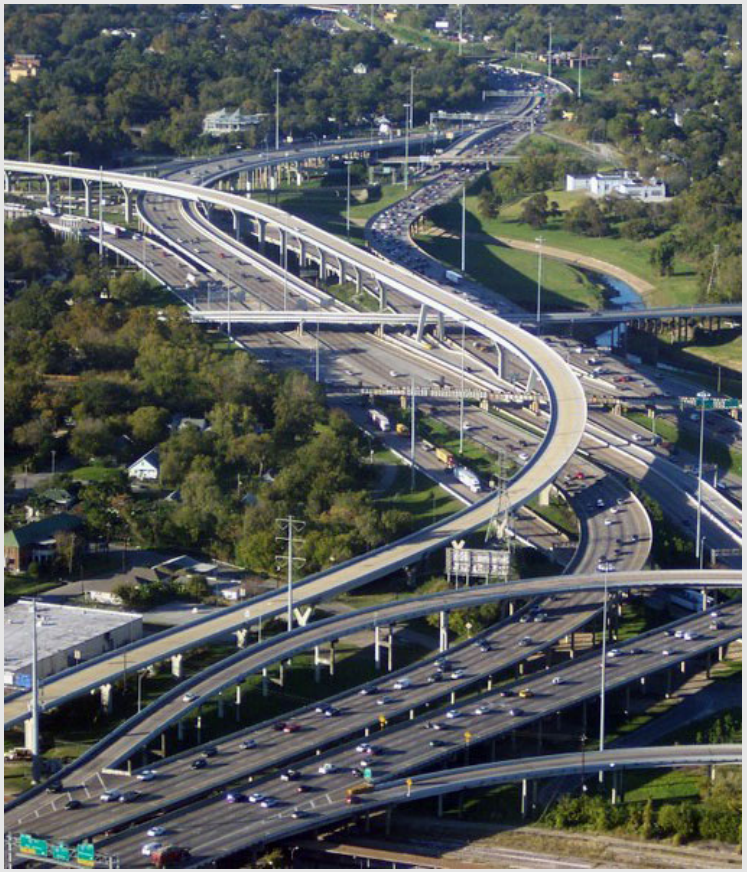
MMA Changes

State and City Requirements

August 20, 2024

Overview



- Recently there have been some updates to the Municipal Maintenance Agreement
- Changes to City and State responsibilities for Controlled and Non-Controlled Access roadways
- Both parties should periodically check in to reflect changes to State Highway System

General Conditions

- Updated agreement includes specific code numbers for traffic regulations, signs, signals, and pavement markings
- Adds information and clarity for lighting projects, permitted landscaping, sidewalks, and other accessibility related items
- Includes new sections on mailbox supports and markings, roadside barriers, and structural support at bridges, culverts, drainage pipes, embankments, and retaining walls
  - All of which are State responsibility

General Conditions: Drainage Requirements

State Requirements

- Responsible for structural maintenance and repair of drainage facilities within the ROW and State drainage easements

City Requirements

- Responsible for regular cleanups and litter control to ensure that drainage facilities are clear
- City still responsible for structural repair and maintenance outside of the ROW but within its corporate limits

General Conditions: ADA Items and Sidewalks

- New construction of sidewalks or other accessibility-related items by either Party should comply with current ADA standards
- State is responsible for structural maintenance and repair of these items
- City is responsible for the maintenance of these accessibility-related items, including keeping them clear of debris and vegetation

Non-Controlled Access

City Responsibility

August 20, 2024

Non-Controlled Access – City Responsibility

- City responsible for parking restrictions, crosswalks, signage and marking of intersecting streets, privately owned utilities, pavement sweeping, mowing and litter cleanup, ice control, and more
  - Mostly remains unchanged from original agreement, just adds clarity
- Specifies that the City's is still responsible for cleanup and litter control of drainage facilities outside of the right of way

Non-Controlled Access

State Responsibility

August 20, 2024

Non-Controlled Access – State Responsibility

- Provides clarity that State is responsibilities for school safety devices and installation and operation of traffic signals in cities of less than 50,000 people
- Otherwise, almost identical to old agreement
  - Responsible for maintaining the travel surface and shoulders
  - Assist in mowing, sweeping, and ice control when requested by the City and if State resources are available

Controlled Access

City Responsibility

August 20, 2024

Controlled Access – City Responsibility

- The City is responsible for cleaning and sweeping any pavement that is not the traveled surface or shoulders, including underneath grade separated structures
- The City is responsible for mowing and picking up any litter between the ROW line and outermost curb or crown line of the frontage roads, including around drainage facilities
- The City is responsible for everything not explicitly defined as that of the State
  - Everything else remains the same as old agreement

Controlled Access

State Responsibility

Controlled Access – State Responsibility

- Mowing and litter cleanup and snow and ice control in the Right of Way are responsibility of the State
  - Can assist with these same items between ROW line and frontage roads and on grade separated structures “on the City’s request and if State resourced are available”
- Sweeping, installing school safety devices, and maintenance of drainage facilities remain State responsibility within ROW along traveled surface and shoulders

Conclusion

- Updated MMA document provides clarity on responsibility in an easier to read format
- Remains largely the same, with the State retaining responsibility along its Right of Way and the City retaining responsibility elsewhere

Texas Department of Transportation

MUNICIPAL MAINTENANCE AGREEMENT

This Municipal Maintenance Agreement ("Agreement") is made this _____ day of _____ 20____, by and between the State of Texas through the Texas Department of Transportation ("State"), and the City of _____ (population _____, 2020, latest Federal Census) acting by and through its duly authorized officers ("City").

R E C I T A L S

A. Chapter 311 of the Transportation Code gives the City exclusive dominion, control, and jurisdiction over and under the public streets within its corporate limits and authorizes the City to enter agreements with the State to fix responsibilities for maintenance, control, supervision, and regulation of State highways within and through its corporate limits; and

B. Section 221.002 of the Transportation Code authorizes the State, at its discretion, to enter agreements with cities to fix responsibilities for maintenance, control, supervision, and regulation of State highways within and through the corporate limits of such cities; and

C. The Executive Director, acting for and on behalf of the Texas Transportation Commission, has made it known to the City that the State will assist the City in the maintenance and operation of State highways within the City, conditioned that the City will enter into agreements with the State for the purpose of determining the respective responsibilities of the parties; and

D. The City has requested the State to assist in the maintenance and operation of State highways within the City as described herein. The Municipal Ordinance or Resolution authorizing the undersigned City Official to execute this Agreement on behalf of the City is attached as **Exhibit C**.

A G R E E M E N T

NOW, THEREFORE, in consideration of the premises and of the mutual covenants and agreements of the parties hereto, it is agreed as follows:

ARTICLE I. COVERAGE

1. State assumption of maintenance and operations described in this Agreement shall be effective on the date of execution of this agreement by the Texas Department of Transportation.

2. In this Agreement, the use of the words "State Highway" shall be construed to mean all numbered highways that are part of the State's Highway System.

3. This Agreement is intended to cover and provide for State participation in the maintenance and operation of the following classifications of State Highways within the City:

   A. Non-Controlled Access highways or portions thereof which are described as "State Maintained and Operated" highways in the document attached and incorporated as **Exhibit A**.

   B. All State highways or portions thereof which have been designated by the Texas Transportation Commission, or are maintained and operated, as Controlled Access Highways and which are described in the document attached and incorporated as **Exhibit B**.

4. In the event that the present system of State highways within the City is changed by cancellation, modified routing, new routes, or a change to City boundaries, the State shall terminate maintenance and operation and this Agreement shall become null and void on those portions of the highways which are no longer on the State Highway System; and this Agreement shall apply to the new highways on the State Highway System within the City; and they shall be classified as "State Maintained and Operated" under paragraph 3 above, unless the execution of a new agreement on the changed or new portions of the highways is requested by either the City or the State.

5. Exhibits that are a part of this Agreement may be changed with both parties' written concurrence. Additional exhibits may also be added with both parties' written concurrence. The Parties shall periodically update any exhibits to reflect changes to the State Highway System under paragraph 3. Paragraph 4 shall apply to changes to the State Highway System regardless of whether an exhibit has been updated under this Paragraph.

6. The terms of the Agreement apply to a State Highway described by paragraphs 2-4 of this Article, unless provided otherwise in a specific project agreement.

ARTICLE II. GENERAL CONDITIONS

1. The City authorizes the State to maintain and operate the State highways covered by this agreement in the manner set out herein.

2. This agreement is between the State and the City only. No person or entity may claim third party beneficiary status under this contract or any of its provisions, nor may any non-party sue for personal injuries or property damage under this contract.

3. This agreement is for the purpose of defining the authority and responsibility of both parties for maintenance and operation of State highways through the City. This agreement shall supplement any special agreements between the State and the City for the maintenance, operation, and/or construction of the State highways covered herein, and this agreement shall supersede any existing Municipal Maintenance Agreements.

4. Traffic regulations, including speed limits, shall be established only after traffic and engineering studies have been completed by the State or City, as applicable and in accordance with 43 Tex. Admin. Code Ch. 25, Subch. B, and approved by the State.

5. The State shall install, maintain, and operate, when required, all traffic signs and associated pavement markings necessary to regulate, warn, and guide traffic on State highways within the State right-of-way, including main lanes and frontage roads, except as otherwise provided in this paragraph and elsewhere in this Agreement.

   A. At the intersections of off-system approaches to State highways, the City shall install and maintain (1) all stop signs, yield signs, and one-way signs to regulate, warn, and guide traffic on the off-system street, even if such signs are to be installed on State right-of-way, and (2) any necessary stop or yield bars and pedestrian crosswalks outside the main lanes or outside the frontage roads, if such exist. These signs and markings must meet or exceed the latest State breakaway standards, if applicable, and be in accordance with the latest edition/revision of the Texas Manual on Uniform Traffic Control Devices

   B. The City shall install and maintain all street name signs except for those mounted on State-maintained traffic signal poles or arms or special advance street name signs on State right-of-way.

   C. Any other signs or pavement markings desired by the City on State right-of-way shall require prior written authorization by the State, and shall be installed and maintained by the City.

   D. All signs and markings installed by the City under this Paragraph must meet or exceed the latest State breakaway standards, if applicable, and be in accordance with the latest edition/revision of the Texas Manual on Uniform Traffic Control Devices. All existing signs or markings shall be upgraded on a maintenance replacement basis to meet these requirements.

6. Traffic control devices such as signs, traffic signals, and pavement markings, with respect to type of device, points of installation, and necessity, shall be determined by traffic and engineering studies as provided by regulation in the Texas Administrative Code.

   A. The City shall not install, maintain, or permit the installation of any type of traffic control device which will affect or influence the use of State highways unless approved in writing by the State. Traffic control devices installed prior to the date of this agreement are hereby made subject to the terms of this agreement and the City agrees to the removal of such devices which affect or influence the use of State highways unless their continued use is approved in writing by the State.

   B. It is understood that basic approval for future installations of traffic control signals by the State or as a joint project with the City, shall be indicated by the

proper City official's signature on the title sheet of the plans. Both parties should retain a copy of the signed title sheet or a letter signed by both parties acknowledging which signalized intersections are covered by this agreement. Any special requirements not covered within this agreement shall be covered under a separate agreement.

C. This Agreement satisfies the agreement requirements of 43 Tex. Admin. Code § 25.5 concerning traffic signal installation, unless the parties determine a separate agreement is necessary to address project-specific issues that are not otherwise addressed by this Agreement.

7. Subject to approval by the State, any State highway lighting system may be installed by the City provided the City shall pay or otherwise provide for all cost of installation, maintenance, and operation, except in those installations specifically covered by separate agreements between the City and State.

A. For all highway lighting system projects, including those covered by separate agreements unless provided otherwise therein, (1) costs shall include the electricity required to construct and operate the lighting system, (2) the State shall not begin the trial phase of a newly installed lighting system until the applicable utility account is established by the City.

B. Attached as **Exhibit D** is a list of lighting installations subject to this Agreement, but which do not have a separate agreement. Exhibit D shall be updated as necessary pursuant to Article 1, Section 6.

8. The City shall enforce the State laws governing the movement of loads which exceed the legal limits for weight, length, height, or width as prescribed by Chapters 621, 622, and 623 of the Transportation Code for public highways outside corporate limits of cities. The City shall also, by ordinance/resolution and enforcement, prescribe and enforce lower weight limits when mutually agreed by the City and the State that such restrictions are needed to avoid damage to the highway and/or for traffic safety.

9. The City shall prevent future encroachments within the right-of-way of the State highways and assist in removal of any present encroachments when requested by the State except where specifically authorized by separate agreement; and prohibit the planting of trees or shrubbery or the creation or construction of any other obstruction within the right-of-way without prior approval in writing from the State. Permitted landscaping and public art installations shall be handled through separate agreements.

10. New construction of sidewalks, shared use pathways, curb ramps, or other accessibility-related items by either Party shall comply with current ADA standards. Except as otherwise provided in this paragraph, the City is responsible for the maintenance of these items, regardless of whether the City or the State constructed the item. Maintenance includes keeping sidewalks clear of debris and vegetation, but does not

include pavement work except as provided in the next sentence. If a Party's highway project is considered an "alteration" under the ADA that triggers the requirement to construct or upgrade accessibility-related items, that Party is responsible for the construction or upgrade, unless provided otherwise in a separate agreement.

11. If the City has a driveway permit process that has been submitted to and approved by the State, the City shall issue permits for access driveways on State highway routes and shall assure the grantee's conformance, for proper installation and maintenance of access driveway facilities, with either a Local Access Management Plan that the City has adopted by ordinance and submitted to the State or, if the City has not adopted by ordinance and submitted to the State a Local Access Management Plan, the State's Access Management Manual. If the City does not have an approved city-wide driveway permit process, the State shall issue access driveway permits on State highway routes in accordance with the City's Local Access Management Plan, adopted by city ordinance and submitted to the State or, if the City has not adopted by ordinance and submitted a Local Access Management Plan, the State's Access Management Manual.

12. The use of unused right-of-way and areas beneath structures for public functions, such as parking, recreation, and law enforcement use, shall be determined by a separate agreement.

13. The State shall be responsible for installation, repair, and maintenance of any mailbox supports installed on the State highway system, including any markings needed on the mailbox supports.

14. The State shall be responsible for installation, repair, and maintenance of any roadside barriers including guardrail, guardrail end treatments, cable barriers, and concrete barriers needed for traffic safety on the state highway system.

15. The State shall be responsible for any structural repairs needed at bridges, culverts, drainage pipes, embankments, and retaining walls on the state highway system.

16. For purposes of this Agreement, "grade separation structure" is defined as any bridge, overpass, or similar structure that raises the roadway above ground level, regardless of what is underneath the structure.

ARTICLE III. NON-CONTROLLED ACCESS HIGHWAYS

The following specific conditions and responsibilities shall apply to the non-controlled access State highways described in Exhibit A, in addition to the General Conditions in Article II above.

1. State's Responsibilities (Non-Controlled Access)

A. Maintain the traveled surface and foundation beneath such traveled surface necessary for the proper support of vehicular loads encountered, and maintain the shoulders.

B. Assist in mowing and litter pickup within the right of way to supplement City resources, when requested by the City and if State resources are available.

C. Assist in sweeping and otherwise cleaning the traveled surface and shoulders to supplement City resources, when requested by the City and if State resources are available.

D. Assist in snow and ice control to supplement City resources, when requested by the City and if State resources are available.

E. Structural maintenance and repairs of drainage facilities within the limits of the right-of-way and State drainage easements. This does not relieve the City of its responsibility for drainage of the State highway facility outside of the right of way or State easements but within its corporate limits.

F. In cities with less than 50,000 population, the State shall install and maintain school safety devices, school crosswalks, and crosswalks installed in conjunction with pedestrian signal heads. This does not include other pedestrian crosswalks.

G. Install, operate, and maintain traffic signals in cities with less than 50,000 population.

H. In cities equal to or greater than 50,000 population, the State may provide for installation of traffic signals when the installation is financed in whole or in part with federal-aid funds, if the City agrees to enter into an agreement setting forth the responsibilities of each party.

2. City's Responsibilities (Non-Controlled Access)

A. Prohibit angle parking, except upon written approval by the State after traffic and engineering studies have been conducted to determine if the State highway is of sufficient width to permit angle parking without interfering with the free and safe movement of traffic.

B. Install and maintain all parking restriction signs, pedestrian crosswalks (except as provided in Art. II.5), parking stripes, and special guide signs when agreed to in writing by the State. Cities greater than or equal to 50,000 population shall also install, operate, and maintain all school safety devices and school crosswalks.

C. Signing and marking of intersecting city streets with State highways shall be the full responsibility of the City (except as provided under Art. II.5).

D. Require installations, repairs, removals or adjustments of publicly or privately owned utilities or services to be performed in accordance with Texas Department of Transportation specifications and subject to approval of the State in writing.

E. Regular cleanups and litter control to ensure drainage facilities are clear. Further, State structural maintenance and repair of drainage facilities within the right-of-way does not relieve the City of its responsibility for drainage of the State highway facility outside of the right-of-way or State easements but within its corporate limits, except where participation by the State is specifically covered in a separate agreement between the City and the State.

F. Install, maintain, and operate all traffic signals in cities equal to or greater than 50,000 population. Any variations shall be handled by a separate agreement.

G. Perform mowing and litter pickup.

H. Sweep and otherwise clean the pavement, including grade separation structures. This includes cleaning and removing litter, trash, discarded personal property, unauthorized temporary shelters, or any other unauthorized item from all areas within the right of way, including underneath a grade separation structure.

I. Perform snow and ice control.

J. Retain all functions and responsibilities for maintenance and operations which are not specifically described as the responsibility of the State.

ARTICLE IV. CONTROLLED ACCESS HIGHWAYS

The following specific conditions and responsibilities shall apply to the controlled access State highways described in Exhibit B, in addition to the General Conditions in Article II above.

1. State's Responsibilities (Controlled Access)

A. Maintain the traveled surface and foundations of the main lanes, ramps, and frontage necessary for the proper support of vehicular loads encountered.

B. Mow and clean up litter within the outermost curbs of the frontage roads or the entire right-of-way width where no frontage roads exist. Assist in performing these operations between the right-of-way line and the outermost curb or crown line of the frontage roads on the City's request and if State resources are available.

C. Sweep and otherwise clean the traveled surface and shoulders of the main lanes, ramps, grade separation structures, and frontage roads.

D. Remove snow and control ice on the main lanes and ramps. Assist in these operations on the frontage roads and grade separation structures on the City's request and if State resources are available.

E. Install and maintain school safety devices, school crosswalks, and crosswalks installed in conjunction with pedestrian signal heads on frontage roads. This does not include other pedestrian crosswalks.

F. Install, operate and maintain traffic signals at ramps and frontage road intersections, unless covered by a separate agreement.

G. Structural maintenance and repair of drainage facilities within the limits of the right-of-way and State drainage easements. This does not relieve the City of its responsibility for drainage of the State highway facility outside of the right-of-way or State easement but within its corporate limits.

2. City's Responsibilities (Controlled Access)

A. Prohibit, by ordinance or resolution and through enforcement, all parking on frontage roads except when parallel parking on one side is approved by the State in writing. Prohibit all parking on main lanes and ramps and at such other places where such restriction is necessary for satisfactory operation of traffic, by passing and enforcing ordinances or resolution and taking other appropriate action in addition to full compliance with current laws on parking.

B. When considered necessary and desirable by both the City and the State, the City shall pass and enforce an ordinance or resolution providing for one-way traffic on the frontage roads except as may be otherwise agreed to by separate agreements with the State.

C. Secure the approval of the State before any utility installation, repair, removal or adjustment is undertaken, crossing over or under the highway facility or entering the right-of-way. In the event of an emergency, it being evident that immediate action is necessary for protection of the public and to minimize property damage and loss of investment, the City, without the necessity of approval by the State, may at its own responsibility and risk make necessary emergency utility repairs, notifying the State of this action as soon as practical.

D. Pass necessary ordinances or resolutions and retain responsibility for enforcing the control of access to an expressway/freeway facility.

E. Sweep and otherwise clean the pavement other than the traveled surface and shoulders, including underneath grade separation structures. This includes cleaning and removing litter, trash, discarded personal property, unauthorized temporary shelters, or any other unauthorized item.

F. Mow and clean up litter between the right-of-way line and the outermost curb or crown line of the frontage roads, including drainage facilities in this area.

G. Install and maintain all parking restriction signs, pedestrian crosswalks (except as provided by Art. II.5), and parking stripes when agreed to by the State in writing.

H. Signing and marking of intersecting city streets to State highways shall be the full responsibility of the City (except as provided by Art. II.5).

I. Retain all functions and responsibilities for maintenance and operations which are not specifically described as the responsibility of the State. State maintenance of drainage facilities within the right-of-way does not relieve the City of its responsibility for drainage of the State highway facility outside of the right-of-way but within its corporate limits except where participation by the State is specifically covered in a separate agreement between the City and the State.

ARTICLE V. TERMINATION

1. All obligations of the State to maintain and operate a State highway covered by this agreement shall terminate if and when such highway ceases to be designated as part of the State highway system.

2. Should either party fail to properly fulfill its obligations under this Agreement, the other party may terminate this agreement upon 30 days written notice.

3. Upon termination, all maintenance and operation duties on non-controlled access State highways shall revert to City responsibilities, except that the State shall retain all maintenance and operation responsibilities on controlled access State highways.

MUNICIPAL MAINTENANCE AGREEMENT

STATE OF TEXAS §

COUNTY OF TRAVIS §

THIS AGREEMENT made this 3rd day of April, 20 01, by and between the State of Texas, hereinafter referred to as the "State", party of the first part, and the City of Edinburg, Texas County, Texas (population ____, 20____, latest Federal Census) acting by and through its duly authorized officers, hereinafter called the "City", party of the second part.

WITNESSETH

WHEREAS, Chapter 311 of the Transportation Code gives the City exclusive dominion, control, and jurisdiction over and under the public streets within its corporate limits and authorizes the City to enter agreements with the State to fix responsibilities for maintenance, control, supervision, and regulation of State highways within and through its corporate limits; and

WHEREAS, Section 221.002 of the Transportation Code authorizes the State, at its discretion, to enter agreements with cities to fix responsibilities for maintenance, control, supervision, and regulation of State highways within and through the corporate limits of such cities; and

WHEREAS, the Executive Director, acting for and in behalf of the Texas Transportation Commission, has made it known to the City that the State will assist the City in the maintenance and operation of State highways within such City, conditioned that the City will enter into agreements with the State for the purpose of determining the responsibilities of the parties thereto; and

WHEREAS, the City has requested the State to assist in the maintenance and operation of State highways within such City:

AGREEMENT

NOW, THEREFORE, in consideration of the premises and of the mutual covenants and agreements of the parties hereto to be by them respectively kept and performed, it is agreed as follows:

For this agreement, the use of the words "State Highway" shall be construed to mean all numbered highways that are part of the State's Highway System.

COVERAGE

1. This agreement is intended to cover and provide for State participation in the maintenance and operation of the following classifications of State Highways within the City:

   A. Non-Controlled Access highways or portions thereof which are described and/or graphically shown as "State Maintained and Operated" highways in Exhibit "A", which is attached hereto and made a part hereof.

   B. All State highways or portions thereof which have been designated by the Texas Transportation Commission or maintained and operated as Controlled Access Highways and which are described and/or graphically shown in Exhibit "B", which is attached hereto and made a part hereof.

2. In the event that the present system of State highways within the City is changed by cancellation, modified routing, or new routes, the State will terminate maintenance and operation and this agreement will become null and void on those portions of the highways which are no longer on the State Highway System; and the full effect and all conditions of this agreement will apply to the changed highways or new highways on the State Highway System within the City; and they shall be classified as "State Maintained and Operated" under paragraph 1 above, unless the execution of a new agreement on the changed or new portions of the highways is requested by either the City or the State.

3. Exhibits that are a part of this agreement may be exchanged with both parties written concurrence. Additional exhibits may also be added with both parties written concurrence.

GENERAL CONDITIONS

1. The City authorizes the State to maintain and operate the State highways covered by this agreement in the manner set out herein.

2. This agreement is for the purpose of defining the authority and responsibility of both parties for maintenance and operation of State highways through the City. This agreement shall supplement any special agreements between the State and the City for the maintenance, operation, and/or construction of the State highways covered herein, and this agreement shall supersede any existing Municipal Maintenance Agreements.

3. Traffic regulations, including speed limits, will be established only after traffic and engineering studies have been completed by the State and/or City and approved by the State.

4. The State will erect and maintain all traffic signs and associated pavement markings necessary to regulate, warn, and guide traffic on State highways within the State right-of-way except as mentioned in this paragraph and elsewhere in this agreement. At the intersections of off-system approaches to State highways, the City shall install and maintain all stop signs, yield signs, and one-way signs and any necessary stop or yield bars and pedestrian crosswalks outside the main lanes or outside the frontage roads if such exist. The City shall install and maintain all street name signs except for those mounted on State maintained traffic signal poles or arms or special advance street name signs on State right-of-way. All new signs installed by the City on State right-of-way shall meet or exceed the latest State breakaway standards and be in accordance with the *Texas Manual on Uniform Traffic Control Devices*, latest edition and revision. All existing signs shall be upgraded on a maintenance replacement basis to meet these requirements.

5. Subject to approval by the State, any State highway lighting system may be installed by the City provided the City shall pay or otherwise provide for all cost of installation, maintenance, and operation except in those installations specifically covered by separate agreements between the City and State.

6. The City shall enforce the State laws governing the movement of loads which exceed the legal limits for weight, length, height, or width as prescribed by Chapters 621, 622, and 623 of the Transportation Code for public highways outside corporate limits of cities. The City shall also, by ordinance/resolution and enforcement, prescribe and enforce lower weight limits when mutually agreed by the City and the State that such restrictions are needed to avoid damage to the highway and/or for traffic safety.

7. The City shall prevent future encroachments within the right-of-way of the State highways and assist in removal of any present encroachments when requested by the State except where specifically authorized by separate agreement; and prohibit the planting of trees or shrubbery or the creation or construction of any other obstruction within the right-of-way without prior approval in writing from the State.

8. Traffic control devices; such as signs, traffic signals, and pavement markings, with respect to type of device, points of installation and necessity, will be determined by traffic and engineering studies. The City shall not install, maintain, or permit the installation of any type of traffic control device which will affect or influence the use of State highways unless approved in writing by the State. Traffic control devices installed prior to the date of this agreement are hereby made subject to the terms of this agreement and the City agrees to the removal of such devices which affect or influence the use of State highways unless their continued use is approved in writing by the State. It is understood that basic approval for future installations of traffic control signals by the State or as a joint project with the City, will be indicated by the proper City official's signature on the title sheet of the plans. Both parties should retain a copy of the signed title sheet or a letter signed by both parties acknowledging which signalized intersections are covered by this agreement. Any special requirements not covered within this agreement will be covered under a separate agreement.

9. Should the City have a city-wide driveway permit process, the City will issue permits for access driveways and will assure the grantee's conformance, for proper installation and maintenance of access driveway facilities in accordance with "Regulations for Access Driveways to State Highways" adopted by the Texas Department of Transportation or with other standards and specifications for the design, construction, and maintenance details subject to approval in writing by the State. Should the City not have a city-wide driveway permit process, the State may issue access driveway permits on State highway routes in accordance with its "Regulations for Access Driveways to State Highways".

10. The use of unused right-of-way and areas beneath structures will be determined by a separate agreement.

NON-CONTROLLED ACCESS HIGHWAYS

The following specific conditions and responsibilities shall be applicable to non-controlled access State highways in addition to the "General Conditions" contained herein above. Non-controlled access State highways or portions thereof covered by this section are those listed and/or graphically shown in Exhibit "A".

State's Responsibilities (Non-Controlled Access)

1. Maintain the traveled surface and foundation beneath such traveled surface necessary for the proper support of same under vehicular loads encountered and maintain the shoulders.

2. Assist in mowing and litter pickup to supplement City resources when requested by the City and if State resources are available.

3. Assist in sweeping and otherwise cleaning the pavement to supplement City resources when requested by the City and if State resources are available.

4. Assist in snow and ice control to supplement City resources when requested by the City and if State resources are available.

5. Maintain drainage facilities within the limits of the right-of-way and State drainage easements. This does not relieve the City of its responsibility for drainage of the State highway facility within its corporate limits.

6. Install, maintain, and operate, when required, normal regulatory, warning and guide signs and normal markings (except as provided under "General Conditions" in paragraph 4). In cities with less than 50,000 population, this also includes school safety devices, school crosswalks, and crosswalks installed in conjunction with pedestrian signal heads. This does not include other pedestrian crosswalks. Any other traffic striping desired by the City may be placed and maintained by the City subject to written State approval.

7. Install, operate, and maintain traffic signals in cities with less than 50,000 population.

8. In cities equal to or greater than 50,000 population, the State may provide for installation of traffic signals when the installation is financed in whole or in part with federal-aid funds if the City agrees to enter into an agreement setting forth the responsibilities of each party.

City's Responsibilities (Non-Controlled Access)

1. Prohibit angle parking, except upon written approval by the State after traffic and engineering studies have been conducted to determine if the State highway is of sufficient width to permit angle parking without interfering with the free and safe movement of traffic.

2. Install and maintain all parking restriction signs, pedestrian crosswalks (except as provided in paragraph 6 above), parking stripes, and special guide signs when agreed to in writing by the State. Cities greater than or equal to 50,000 population will also install, operate, and maintain all school safety devices and school crosswalks.

3. Signing and marking of intersecting city streets with State highways will be the full responsibility of the City (except as provided under "General Conditions" in paragraph 4).

4. Require installations, repairs, removals or adjustments of publicly or privately owned utilities or services to be performed in accordance with Texas Department of Transportation specifications and subject to approval of the State in writing.

5. Retain all functions and responsibilities for maintenance and operations which are not specifically described as the responsibility of the State. The assistance by the State in maintenance of drainage facilities does not relieve the City of its responsibility for drainage of the State highway facility within its corporate limits except where participation by the State is specifically covered in a separate agreement between the City and the State.

6. Install, maintain, and operate all traffic signals in cities equal to or greater than 50,000 population. Any variations will be handled by a separate agreement.

7. Perform mowing and litter pickup.

8. Sweep and otherwise clean the pavement.

9. Perform snow and ice control.

CONTROLLED ACCESS HIGHWAYS

The following specific conditions and responsibilities shall be applicable to controlled access highways in addition to the "General Conditions" contained herein above. Controlled access State highways or portions thereof covered by this section are those listed and/or graphically shown in Exhibit "B".

State's Responsibilities (Controlled Access)

1. Maintain the traveled surface of the through lanes, ramps, and frontage roads and foundations beneath such traveled surface necessary for the proper support of same under vehicular loads encountered.

2. Mow and clean up litter within the outermost curbs of the frontage roads or the entire right-of-way width where no frontage roads exist, and assist in performing these operations between the right-of-way line and the outermost curb or crown line of the frontage roads in underdeveloped areas.

3. Sweep and otherwise clean the through lanes, ramps, separation structures or roadways and frontage roads.

4. Remove snow and control ice on the through lanes and ramps and assist in these operations as the availability of equipment and labor will allow on the frontage roads and grade separation structures or roadways.

5. Except as provided under "General Conditions" in paragraph 4, the State will install and maintain all normal markings and signs, including sign operation if applicable, on the main lanes and frontage roads. This includes school safety devices, school crosswalks, and crosswalks installed on frontage roads in conjunction with pedestrian signal heads. It does not include other pedestrian crosswalks.

6. Install, operate, and maintain traffic signals at ramps and frontage road intersections unless covered by a separate agreement.

7. Maintain all drainage facilities within the limits of the right-of-way and State drainage easements. This does not relieve the City of its responsibility for drainage of the highway facility within its corporate limits.

City's Responsibilities (Controlled Access)

1. Prohibit, by ordinance or resolution and through enforcement, all parking on frontage roads except when parallel parking on one side is approved by the State in writing. Prohibit all parking on main lanes and ramps and at such other places where such restriction is necessary for satisfactory operation of traffic, by passing and enforcing ordinances/resolutions and taking other appropriate action in addition to full compliance with current laws on parking.

2. When considered necessary and desirable by both the City and the State, the City shall pass and enforce an ordinance/resolution providing for one-way traffic on the frontage roads except as may be otherwise agreed to by separate agreements with the State.

3. Secure or cause to be secured the approval of the State before any utility installation, repair, removal or adjustment is undertaken, crossing over or under the highway facility or entering the right-of-way. In the event of an emergency, it being evident that immediate action is necessary for protection of the public and to minimize property damage and loss of investment, the City, without the necessity of approval by the State, may at its own responsibility and risk make necessary emergency utility repairs, notifying the State of this action as soon as practical.

4. Pass necessary ordinances/resolutions and retain its responsibility for enforcing the control of access to the expressway/freeway facility.

5. Install and maintain all parking restriction signs, pedestrian crosswalks (except as mentioned above in paragraph 5 under "State's Responsibilities"), and parking stripes when agreed to by the State in writing. Signing and marking of intersecting city streets to State highways shall be the full responsibility of the City (except as discussed under "General Conditions" in paragraph 4).

TERMINATION

All obligations of the State created herein to maintain and operate the State highways covered by this agreement shall terminate if and when such highways cease to be officially on the State highway system; and further, should either party fail to properly fulfill its obligations as herein outlined, the other party may terminate this agreement upon 30 days written notice. Upon termination, all maintenance and operation duties on non-controlled access State highways shall revert to City responsibilities, in accordance with Chapter 311 of the Texas Transportation Code. The State shall retain all maintenance responsibilities on controlled access State highways in accordance with the provisions of Chapter 203 of the Texas Transportation Code, 23 United States Code § 116 and the State's Interstate Maintenance Guidelines as approved by the Federal Highway Administration in accordance with 23 CFR § 635, Subpart E.

Said State assumption of maintenance and operations shall be effective the date of execution of this agreement by the Texas Department of Transportation.

IN WITNESS WHEREOF, the parties have hereunto affixed their signatures, the City of Edinburg on the 3rd day of April, 2021, and the Texas Department of Transportation, on the 23rd day of April, 2021.

RESOLUTION NO. 01-1611

STATE OF TEXAS	§	A RESOLUTION APPROVING A MUNICIPAL MAINTENANCE AGREEMENT WITH THE TEXAS DEPARTMENT OF TRANSPORTATION FOR ASSISTANCE IN THE MAINTENANCE AND OPERATION OF STATE HIGHWAYS WITHIN AND THROUGH THE CITY'S CORPORATE LIMITS.
COUNTY OF HIDALGO	§	

WHEREAS, the public convenience, safety and necessity of the City require that State Highway routes within the City be adequately maintained; and

WHEREAS, the City of Edinburg wishes to assure the proper maintenance, control, supervision, and regulation of certain State Highways and/or portions of State Highways within and through the City's corporate limits; and

WHEREAS, the City has requested that the State of Texas enter upon and contribute financially to the maintenance of certain State Highways and/or portions of State Highways within and through the City's corporate limits; and

WHEREAS, the State has made it known to the City that it will, with its own forces and equipment and at its sole cost and expense, provide adequate maintenance for the State highways covered by this agreement, conditioned upon the provisions concerning liabilities and responsibilities for maintenance, control, supervision, and regulation which are set out in the form attached hereto, made a part thereof, and marked MUNICIPAL MAINTENANCE AGREEMENT; and

WHEREAS, the Texas Department of Transportation has requested to update the existing maintenance agreement.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF EDINBURG, TEXAS:

Form 1037-2

STATE OF TEXAS §

COUNTY OF HIDALGO §

I, Maria M. Villarreal, the duly appointed, qualified, and acting city secretary of the City of Edinburg, Texas, hereby certify that the foregoing pages constitute a true and correct copy of Resolution No. 01-1611 duly passed by the City Council at a meeting held on April 3, A.D., 2001, at 7:00 o'clock p.m.

To certify which, witness my hand and seal of the City of Edinburg, TEXAS, this 9th day of April, 2001, at Edinburg, Texas.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
RESOLUTIONS
Agenda Item No: 9.B.
FY 2023 Operation Stonegarden

1. **Agenda Item:**
Consider Resolution Authorizing the City Manager to Enter Into an Agreement with the Texas Department of Transportation (TxDOT) for the Placement of Fourteen (14) Flock Pole-Mounted Automated License Plate Readers (LPRs) Along State Highway Right-of-Way in Edinburg. [Jaime Ayala, Chief of Police]

2. **Description:**
These LPRs will be funded through the Fiscal Year 2023 Operation Stonegarden Grant Program (OPSG), which supports collaborative efforts to enhance security along U.S. borders. This grant program targets ingress routes from international borders, including travel corridors in states adjacent to Mexico. The designated locations for these installations are as follows:

- 281 E FM 490, Edinburg, Texas
- 16201 N Exp 281, Edinburg, Texas
- 16111 N Exp 281, Edinburg, Texas
- 8430 N Exp 281, Edinburg, Texas
- 8300 I-69C S, Edinburg, Texas
- 3967 N Closner Blvd, Edinburg, Texas
- 1210 E Monte Cristo Rd., Edinburg, Texas
- 1305 E Monte Cristo Rd., Edinburg, Texas
- 1302 E Monte Cristo Rd., Edinburg, Texas
- 1415 E University Dr., Edinburg, Texas
- 1602 E University Dr., Edinburg, Texas
- 517 E Trenton Rd., Edinburg, Texas
- 4300 E Trenton Rd., Edinburg, Texas

3. **Staff's Recommendation:**
Approve Resolution Authorizing the City Manager to Enter into an Agreement with the Texas Department of Transportation (TxDOT) for the Placement of Fourteen (14) Flock Pole-Mounted Automated License Plate Readers/Speed Systems (LPRs) Along State Highway Right-of-Way in Edinburg.

COUNTY OF HIDALGO	**§**	
CITY OF EDINBURG	**§**	

The resolution authorizes the Edinburg Police Department to enter into an agreement with the Texas Department of Transportation (TxDOT) for the installation of flock pole-mounted License Plate Readers/Speed Systems (LPRs) on state highway rights-of-way in Edinburg, Texas. The designated locations for these installations are as follows: 281 E FM 490, Edinburg, Texas; 16201 N Exp 281, Edinburg, Texas; 16111 N Exp 281, Edinburg, Texas; 8430 N Exp 281, Edinburg, Texas; 8300 I-69C S, Edinburg, Texas; 3967 N Closner Blvd, Edinburg, Texas; 1210 E Monte Cristo Rd., Edinburg, Texas; 13605 E Monte Cristo Rd., Edinburg, Texas; 1302 E Monte Cristo Rd., Edinburg, Texas; 1415 E University Dr., Edinburg, Texas; 1602 E University Dr., Edinburg, Texas; 517 E Trenton Rd., Edinburg, Texas; and 4300 E Trenton Rd., Edinburg, Texas.

WHEREAS, Edinburg Police Department desired to place LPRs in certain areas listed; and

WHEREAS, the LPRs are intended to assist the Edinburg Police Department in its operations.

WHEREAS, the LPRs are being funded through the Office of the Governor Operation Stonegarden Grant Program, which is designed to disrupt smuggling and other criminal activities that not only affect the City of Edinburg but may also have national implications; and

WHEREAS, the Edinburg Police Department will be the sole manager of the LPRs and will hold the Texas Department of Transportation (TxDOT) harmless from any and all damages that may arise to the LPRs at the listed or unlisted locations.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF EDINBURG, that:

1. **This multiple-use agreement with the Texas Department of Transportation is hereby authorized to be executed; and**
2. **The Edinburg Police Department is designated as the Authorized Representative to act in all matters related to this agreement, including the execution of the Multiple Use Agreement with the Texas Department of Transportation for the placement of**

flock pole-mounted License Plate Readers/Speed Systems on state highway rights-of-way in Edinburg, Texas.

READ, CONSIDERED, PASSED, AND APPROVED at a regular meeting of the City Council of the City of Edinburg, Texas, at which a quorum was present and which was held in accordance with V.T.C.A., Government Code, Section 551.04, on the 20th day of August 2024.

MEMO OF UNDERSTANDING REGARDING TCIC STOLEN LICENSE PLATE AND TCIC STOLEN VEHICLE INFORMATION

1. This document constitutes an agreement between the Texas Department of Public Safety and a criminal justice or law enforcement agency, hereinafter referred to as the User Agency.

   USER AGENCY: Edinburg Police Department

   ADDRESS: 1702 S. Closner Blvd.

   Edinburg, Tx 78539

2. This agreement sets forth the duties and responsibilities for the Department of Public Safety and the User Agency.

3. The Department of Public Safety agrees to maintain, operate, and manage a file of vehicle license plate information exported from the Texas Crime Information Center (TCIC) for the use of the User Agency.

4. The Department of Public Safety will ensure that, except in extraordinary circumstances, the file will be updated hourly. The file name will incorporate the date and time the file was created.

5. The User Agency recognizes there are inherent limitations in matching against data updated hourly. Therefore, if the User Agency gets a "hit" on the exported TCIC information, the User Agency agrees to conduct a real-time check of TCIC records to confirm that the hit record still exists in the live TCIC file. The User Agency will follow all Texas Crime Information Center/National Crime Information Center (TCIC/NCIC) policies for handling hits.

6. The Department of Public Safety or the User Agency may, upon 30 days notice, in writing, terminate this agreement. User Agency correspondence regarding this agreement should be directed to:

   Texas Department of Public Safety, MSC 0233
   Crime Records Service, TCIC Operations
   PO Box 4143
   Austin, TX 78765-4143

7. The file of TCIC information is provided to the User Agency for criminal justice purposes only. Furthermore, the User Agency agrees that the file created by the Department remains a TCIC file and will handle the information in the file and all activities related to the information in the file according to existing and future TCIC/NCIC policies.

8. The User Agency agrees to indemnify and save harmless, to the extent the law allows, the Texas Department of Public Safety, its Director and employees from and against any and all claims, demands, actions and suits, including but not limited to any liability for damages by reason of or arising out of any false arrest or imprisonment or any cause of action whatsoever, arising out of or involving any negligence on the part of the User Agency or its employees in the exercise or enjoyment of the Agreement.

9. No financial liability will be incurred by the Department of Public Safety by virtue of this agreement beyond monies available to it for the purpose of fulfilling this agreement.

10. Each party to this agreement agrees that it shall have no liability whatsoever for the actions and/or omissions of the other party's employees, officers, or agents, regardless of where the individual's actions and/or omissions occurred. Each party is solely responsible for the actions and/or omissions of its employees, officers, and agents; however, such responsibility is only to the extent required by Texas law. Where injury or property damage result from the joint or concurring acts and/or omissions of the parties, any liability shall be shared by each party in accordance with the applicable Texas law, subject to all defenses, including governmental immunity. These provisions are solely for the benefit of the parties hereto and not for the benefit of any person or entity not a party hereto; nor shall any provision hereof be deemed a waiver of any defenses available by law.

11. No modification or amendment to this agreement shall become valid unless in writing and signed by both parties.

12. This agreement constitutes the entire agreement between the parties with regard to the matters made the subject of this agreement. There are no other verbal or written covenants, agreements, understandings, representations, warranties, or restrictions between the parties. No rights or obligations shall be implied.

13. Neither party may assign or transfer this agreement or any interest in this agreement without the written consent of the other party.

14. This agreement does not create any rights in any person or entity other than the Texas Department of Public Safety and the User Agency.

Please provide the following information regarding the User Agency's employee who will be the primary point of contact accessing the FTP site.

Agency ORI: TX1080400

User Name: Gabriel Vela-Reyna / Lieutenant

User Phone Number: (956) 289-7733

User Email Address: gvela-reyna@cityofedinburg.com

This agreement will become effective on 07/16/24.

Each person signing this agreement represents and warrants that he/she has full and complete authority to sign this agreement on behalf of the governmental entity.

In WITNESS WHEREOF, the parties hereto caused this agreement to be executed by the proper officers and officials.

MULTIPLE USE AGREEMENT

STATE OF TEXAS §

COUNTY OF TRAVIS §

THIS AGREEMENT made by the State of Texas by and between the Texas Department of Transportation, hereinafter referred to as "State", party of the first part, and City of Edinburg, hereinafter called Edinburg PD, party of the second part, is to become effective when fully executed by both parties.

WITNESSETH

WHEREAS, on the _____ day of _____, 20 24, the governing body for the Edinburg PD entered into Resolution/Ordinance No. Ordinance hereinafter identified by reference, authorizing the Edinburg PD 's participation in this agreement with the State; and

WHEREAS, the Edinburg PD has requested the State to permit the construction, maintenance and operation of a public Automatic License Plater Readers (ALPR) on the highway right of way, (ROADWAY Highway Name CONTROL SECTION NO. Ctrl No.). (General description of area including either the control number or GPS coordinates.)

shown graphically by the preliminary conceptual site plan in Exhibit "A" and being more specifically described by metes and bounds of Exhibit "B", which are attached and made a part hereof; and

WHEREAS, the State has indicated its willingness to approve the establishment of such facilities and other uses conditioned that the Edinburg PD will enter into agreements with the State for the purpose of determining the respective responsibilities of the Edinburg PD and the State with reference thereto, and conditioned that such uses are in the public interest and will not damage the highway facilities, impair safety, impede maintenance or in any way restrict the operation of the highway facility, all as determined from engineering and traffic investigations conducted by the State.

AGREEMENT

NOW, THEREFORE, in consideration of the premises and of the mutual covenants and agreements of the parties hereto to be by them respectively kept and performed as hereinafter set forth, it is agreed as follows:

1. DESIGN AND CONSTRUCTION

Edinburg PD will prepare or provide for the construction plans for the facility, and will provide for the construction work as required by said plans at no cost to the State. Said plans shall include the design of the access control, necessary horizontal and vertical clearances for highway structures, adequate landscape treatment, adequate detail to ensure compliance with applicable structural design standards, sufficient traffic control provisions, and general layout. They shall also delineate and define the construction responsibilities of both parties hereto. Completed plans will be submitted to State for review and approval and when approved shall be attached to the agreement and made a part thereof in all respects. Construction shall not commence until plans have been approved by the State. Any future revisions or additions shall be made after prior written approval of the State. Any sidewalks, curb ramps and other pedestrian elements to be constructed, either on site or off site, by the Edinburg PD shall be in accordance with the requirements of Title II of the Americans With Disabilities Act (ADA) and with the Texas Accessibility Standards (TAS). Elements constructed by the Edinburg PD and found not to comply with ADA or TAS shall be corrected at the entire expense of the- Edinburg PD

2. INSPECTION

Ingress and egress shall be allowed at all times to such facility for Federal Highway Administration personnel and State Forces and equipment when highway maintenance operations are necessary, and for inspection purposes; and upon request, all parking or other activities for periods required for such operations will be prohibited.

3. PARKING REGULATIONS

Parking regulations shall be established limiting parking to single unit motor vehicles of size and capacity no greater than prescribed for 1½ ton trucks, such vehicles to conform in size and use to governing laws. Parking shall be permitted only in marked spaces.

Parking shall be prohibited when a security threat, as determined by TxDOT, exists.

4. PROHIBITION/SIGNS

Regulations shall be established prohibiting the parking of vehicles transporting flammable or explosive loads and prohibiting use of the area in any manner for peddling, advertising or other purposes not in keeping with the objective of a public facility. The erection of signs other than those required for proper use of the area will be prohibited. All signs shall be approved by the State prior to the actual erection.

5. RESPONSIBILITIES

Timely maintenance, repair and operation of the facility shall be entirely the responsibility of the Edinburg PD. Such responsibility shall not be transferred, assigned or conveyed to a third party without the advanced written approval of the State. These responsibilities expressly include the timely maintenance and repair of any portion of the facility necessary to comply with the Americans with Disabilities Act. Further, such responsibility shall include picking up trash, mowing and otherwise keeping the facility in a clean and sanitary condition, and surveillance by police patrol to eliminate the possible creation of a nuisance or hazard to the public. Hazardous or unreasonably objectionable smoke, fumes, vapor or odors shall not be permitted to rise above the grade line of the highway, nor shall the facility subject the highway to hazardous or unreasonably objectionable dripping, droppings or discharge of any kind, including rain or snow.

If the State determines that Edinburg PD has failed to comply with these responsibilities, it will perform the necessary work and charge Edinburg PD the actual cost of the work.

6. FEES

Any fees levied for use of the facilities in the area shall be nominal and no more than are sufficient to defray the cost of construction, maintenance and operations thereof, and shall be subject to State approval.

A. Retention Period. The Edinburg PD shall maintain all books, documents, papers, accounting records and other evidence pertaining to fees collected and costs (hereinafter called the Records). The Edinburg PD shall make the records available during the term of the Agreement and for four years from the date the Agreement is terminated, until completion of all audits, or until pending litigation has been completely and fully resolved, whichever occurs last.

B. Audit Report. If fees are collected by the Edinburg PD for the use of the facility under this agreement, the Edinburg PD will provide the State an annual audit report detailing the fees collected for the use of the facility and the costs associated with constructing, maintaining, and operating the facility within the same period. If the report shows more fees collected than expenses for the construction, operation, or maintenance of the facility the Edinburg PD must provide a multiple year plan detailing how the additional revenue will be used for construction, operation, or maintenance of the facility.

C. Availability. The State or any of its duly authorized representatives, the Federal Highway Administration, the United States Department of Transportation, Office of Inspector General, and the Comptroller General shall have access to the Edinburg PD 's records that are directly pertinent to this Agreement for the purpose of making audits and examinations.

7. TERMINATION UPON NOTICE

This provision is expressly made subject to the rights herein granted to both parties to terminate this agreement upon notice, and upon the exercise of any such right by either party, all obligations herein to make improvements to said facility shall immediately cease and terminate and Edinburg PD shall be responsible for the facility's timely removal at no cost to the State. If the State determines that Edinburg PD has failed to timely remove the facility, it will perform the necessary work and charge Edinburg PD the actual cost of the work.

8. MODIFICATION/TERMINATION OF AGREEMENT

If in the sole judgment of the State it is found at any future time that traffic conditions have so changed that the existence or use of the facility is impeding maintenance, damaging the highway facility, impairing safety or that the facility is not being properly operated, that it constitutes a nuisance, is abandoned, or if for any other reason it is the State's judgment that such facility is not in the public interest, this agreement under which the facility was constructed may be: (1) modified if corrective measures acceptable to both parties can be applied to eliminate the objectionable features of the facility; or (2) terminated and the use of the area as proposed herein discontinued.

9. PROHIBITION OF STORAGE OF FLAMMABLE MATERIALS

All structures located or constructed within the area covered by the agreement shall be fire resistant. The storage of flammable, explosive or hazardous materials is prohibited. Operations deemed to be a potential fire hazard shall be subject to regulation by the State.

10. RESTORATION OF AREA

The Edinburg PD shall provide written notification to the State that such facility will be discontinued for the purpose defined herein. The Edinburg PD shall, within thirty (30) days from the date of said notification, clear the area of all facilities that were its construction responsibility under this agreement and restore the area to a condition satisfactory to the State.

11. PREVIOUS AGREEMENTS

It is understood that this agreement in no way modifies or supersedes the terms and provisions of any existing agreements between the parties hereto.

12. INDEMNIFICATION

THE Edinburg PD WILL INDEMNIFY THE STATE AGAINST ANY AND ALL DAMAGES AND CLAIMS FOR DAMAGES, INCLUDING THOSE RESULTING FROM INJURY OR DEATH OF PERSONS OR FOR LOSS OF OR DAMAGE TO PROPERTY, ARISING OUT OF, INCIDENT TO OR IN ANY MANNER CONNECTED WITH THE CONSTRUCTION, OPERATION OR MAINTENANCE OF THE FACILITY, WHICH INDEMNIFICATION SHALL EXTEND TO AND INCLUDE ANY AND ALL COURT COSTS, ATTORNEY'S FEES AND EXPENSES RELATED TO OR CONNECTED WITH ANY CLAIMS OR SUITS FOR DAMAGES AND SHALL, IF REQUESTED IN WRITING BY THE STATE TO DO SO, ASSIST THE STATE OR RELIEVE THE STATE FROM DEFENDING ANY SUCH SUITS BROUGHT AGAINST IT. THE INDEMNIFICATION OF THE STATE SHALL EXTEND FOR A PERIOD OF TWO (2) YEARS BEYOND THE DATE OF TERMINATION OF THIS AGREEMENT.

DURING EACH YEAR WHILE THERE IS ANY LIABILITY BY REASON OF THE AGREEMENT CONTAINED IN THIS SUBSECTION OF THIS RESOLUTION, INCLUDING THE CALENDAR YEAR 2024, THE City of Edinburg (CITY) SHALL COMPUTE AND ASCERTAIN THE RATE AND AMOUNT OF AD VALOREM TAX, BASED ON THE LATEST APPROVED TAX ROLLS OF SAID ENTITY, WITH FULL ALLOWANCES BEING MADE FOR TAX DELINQUENCIES AND COSTS OF TAX COLLECTION, WHICH WILL BE SUFFICIENT TO RAISE AND PRODUCE THE MONEY REQUIRED TO PAY ANY SUMS WHICH MAY BE OR BECOME DUE DURING ANY SUCH YEAR, IN NO INSTANCE TO BE LESS THAN TWO (2%) PER CENT OF SUCH OBLIGATION, TOGETHER WITH INTEREST THEREON, BECAUSE OF THE OBLIGATION HEREIN ASSUMED.

SAID RATE AND AMOUNT OF AD VALOREM TAX IS HEREBY ORDERED TO BE LEVIED AND IS HEREBY LEVIED AGAINST ALL TAXABLE PROPERTY IN SAID ENTITY FOR EACH YEAR WHILE ANY LIABILITY EXISTS BY REASON OF THE OBLIGATION UNDERTAKEN BY THIS SUBSECTION OF THIS RESOLUTION, AND SAID AD VALOREM TAX SHALL BE ASSESSED AND COLLECTED EACH SUCH YEAR UNTIL ALL OF THE OBLIGATIONS HEREIN INCURRED SHALL HAVE BEEN DISCHARGED AND ALL LIABILITY HEREUNDER DISCHARGED.

No party to this agreement intends to waive, relinquish, limit or condition its general governmental immunity from liability in any way.

Each party agrees and acknowledges that it is not an agent, servant, or employee of the other party and that under this provision each party is responsible only for its own acts and for those of its agents, servants, independent contractors or employees. Such responsibility includes, but is not

limited to any claims or amounts arising or recovered under the "Workers Compensation Law," the Texas Tort Claims Act, Chapter 101, Texas Civil Practice and Remedies Code; or any other applicable laws or regulations, all as time to time may be amended.

Nothing in this agreement shall be construed as creating any liability in favor of any third party against the State and the Edinburg PD. Additionally, this agreement shall not ever be construed as relieving any third party from any liability against the State. Furthermore, the Edinburg PD shall become fully subrogated to the State's rights of recovery and shall be entitled to maintain any action over and against any third party who may be liable for damages. The State agrees to execute and deliver instruments and papers and to otherwise do that which is necessary to secure such rights.

13. INSURANCE

The Edinburg PD, shall provide necessary safeguards to protect the public on State maintained highways including adequate insurance for payment of any damages which might result during the construction, maintenance, repair and operation of the facility. Edinburg PD shall include TxDOT as an additional insured by endorsement in Edinburg PD 's commercial general liability insurance policy. Prior to beginning work on the State's right of way, the Edinburg PD 's construction contractor shall submit to the State a completed insurance form (TxDOT Form No. 1560) or appropriate certificate of self-insurance and shall maintain the required coverage during the construction of the facility.

14. USE OF RIGHT OF WAY

It is understood that the State by execution of this agreement does not impair or relinquish the State's right to use such land for highway purposes when it is required for the construction or re-construction of the traffic facility for which it was acquired, nor shall use of the land under such agreement ever be construed as abandonment by the State of such land acquired for highway purposes, and the State does not purport to grant any interest in the land described herein but merely consents to such use to the extent its authority and title permits.

15. ADDITIONAL CONSENT REQUIRED

The State asserts only that it has sufficient title for highway purposes. The Edinburg PD shall be responsible for obtaining such additional consent, permits or agreement as may be necessary due to this agreement. This includes, but is not limited to, appropriate permits and clearances for environmental, ADA and public utilities.

16. FHWA ADDITIONAL REQUIREMENTS

If the Facility is located on the Federal-Aid Highway System, "ATTACHMENT A", which states additional requirements as set forth in the Federal Highway Administration's Title 23, Code of Federal Regulations, § 710, shall be attached to and become a part of this agreement.

17. CIVIL RIGHTS ASSURANCES

The Edinburg PD, for itself, its personal representatives, successors and interests and assigns, as part of the consideration hereof, does hereby covenant and agree as a covenant running with the land that: (1) no persons, on the grounds of race, color, sex, age, national origin, religion or disabling condition, shall be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination in the use of said facility; (2) that in the construction of any improvements on, over or under such land and the furnishing of services thereon, no person on the ground of race, color, sex, age, national origin, religion or disabling condition, shall be excluded from participation in, denied the benefits of, or otherwise be subjected to discrimination; (3) that the Edinburg PD shall use the premises in compliance with all other requirements imposed by or pursuant to Title 49, Code of Federal Regulations, Department of Transportation, Subtitle A, Office of the Secretary, Part 21, Non-discrimination in Federally-Assisted programs of the Department of Transportation - Effectuation of Title VI of the Civil Rights Act of 1964, and as said Regulations may be amended.

That if in the event of any breach of the above non-discrimination covenants, the State shall have the right to terminate the agreement and reenter and repossess said land and the facilities thereon, and hold the same as if said agreement had never been made or issued.

18. AMENDMENTS

Any changes in the time frame, character or responsibilities of the parties hereto shall be enacted by a written amendment executed by both parties hereto.

19. LEGAL CONSTRUCTION

In case one or more of the provisions contained in this agreement shall for any reason be held invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability shall not affect any provision hereof and this agreement shall be construed as if such invalid, illegal, or unenforceable provision had never been contained in this agreement.

20. AUDIT

The State may conduct an audit or investigation of any aspect of this agreement. The Edinburg PD must provide the State with access to any information the State considers relevant to the investigation or audit. The audit can include, but is not limited to, any contract for construction or maintenance of any facility or structure authorized by this agreement or any contract to provide a service to the Edinburg PD if that service is authorized by this agreement.

21. AUTHORITY OF STATE AUDITOR

The state auditor may conduct an audit or investigation of any entity receiving funds from the state directly under the contract or indirectly through a subcontract under the contract. Acceptance of funds directly under the contract or indirectly through a subcontract under this contract acts as acceptance of the authority of the state auditor, under the direction of the legislative audit committee, to conduct an audit or investigation in connection with those funds. An entity that is the subject of an audit or investigation must provide the state auditor with access to any information the state auditor considers relevant to the investigation or audit.

22. NOTICES

All notices required under this agreement shall be mailed or hand delivered to the following respective addresses:

STATE (Mailing Address)	**(Name of other party)** (Mailing Address)
Texas Department of Transportation Maintenance Division 125 East 11th Street Austin, Texas 78701-2483	Edinburg Police Department 1702 S.Closner Blvd Edinburg, Texas 78539

23. TIMELY PAYMENT

When required by any provision of this agreement requires a payment to be made to the State, the other party hereto shall within thirty (30) days from receipt of the State's written notification pay the State for the full cost of repairing any damages to the highway facility which may result from the other party's construction, maintenance, repair or operation of the facility.

24. WARRANTS

The signatories to this agreement warrant that each has the authority to enter into this agreement on behalf of the party represented.

Inasmuch as this project is on the Federal-Aid highway system, the following additional requirements as applicable with the Federal Highway Administration's Title 23, Code of Federal Regulations, § 710.105.

1. Any significant revision in the design or construction of the facility shall receive prior approval by the Texas Department of Transportation subject to concurrency by the FHWA.

2. Any change in the authorized use of real property interest shall receive prior approval by the Texas Department of Transportation subject to concurrence by the FHWA.

3. Real property interest shall not be transferred, assigned or conveyed to another party without prior Texas Department of Transportation approval subject to concurrence by the FHWA.

4. This agreement will be revocable in the event that the real property interest facility ceases to be used or is abandoned.

EXHIBIT E

TEXAS DEPARTMENT OF PUBLIC SAFETY

CRIME RECORDS SERVICES

LICENSE PLATE READER (LPR) USER AGREEMENT

This document constitutes a User Agreement which sets forth the duties and responsibilities of the User Agency in order to gain access to the Texas Automated License Plate Reader (LPR) Database administered by the Texas Department of Public Safety (TXDPS). The User Agency shall be a criminal justice or law enforcement agency.

USER AGENCY: _____

ADDRESS: _____

The LPR Database shall consist of shared data from all participating local, state, and federal agencies, as well as TXDPS captured data, of the following information associated with a license plate captured by an LPR: license plate numbers; latitude and longitude coordinates indicating where the plate was captured; date/time of the capture; and Originating Agency Identifier (ORI) information of the agency capturing the information. The LPR Database shall be maintained, operated, and managed by TXDPS on a 24 hour, 7 days a week, 365 days a year basis.

A. USER AGENCY RESPONSIBILITIES

1. The User Agency may only access and use LPR information for official criminal justice purposes. LPR information shall not be accessed or used for any other purpose.
2. The User Agency shall allow TXDPS to share the User Agency's data contributed to the LPR Database with other authorized criminal justice or law enforcement agencies.
3. The User Agency shall provide its own internet connectivity and maintenance which meets Criminal Justice Information Services (CJIS) Security Policy requirements.
4. The User Agency shall retain sole ownership of, sole responsibility for, and exclusive control over the content of the information that it contributes to the LPR Database.
5. The User Agency shall, at will and at any time, update, correct, or delete the information that it contributes to the LPR Database.
6. The User Agency has the sole responsibility to ensure that the information it contributes to the LPR Database was not obtained and is not maintained in violation of any federal, state, or local law applicable to that agency.
7. The User Agency has sole responsibility and accountability for ensuring compliance with all laws, regulations, policies, and procedures applicable to its entry and sharing of information into the LPR Database, including but not limited to the federal Driver's Privacy Protection Act (18 U.S.C. §2721 et seq.) and the Texas Motor Vehicle Records Disclosure Act (Tex. Transp. Code Ch. 730).
8. The User Agency shall duly report to TXDPS, in writing, any instance in which LPR information is used in an unauthorized manner. Such notice shall be provided immediately, but no later than three (3) calendar days of when the User Agency first learned of the unauthorized use.
9. The User Agency has the duty, sole responsibility, and accountability to make reasonable efforts to ensure the accuracy, upon entry and continuing thereafter, of information that it contributes to the LPR Database.
10. The User Agency is solely responsible for the actions or omissions of its employees and officers.
11. The User Agency shall permit access to the LPR Database only to individual users who meet standard Texas Law Enforcement Telecommunications System (TLETS) credentials.

B. GENERAL TERMS

1. TXDPS shall notify the User Agency if it receives a challenge to or reasonable question about the accuracy of the information submitted by the User Agency in the LPR Database.
2. The minimum retention period for information to remain in the LPR Database shall be five (5) years, unless the User Agency indicates to TXDPS that a shorter retention period is required.
3. TXDPS will provide system training to the LPR Database users at no charge to the User Agency at a time and location to be designated by TXDPS. The obligation of TXDPS to incur training costs is conditional upon sufficient funds budgeted and available. No financial liability shall be incurred by TXDPS by virtue of this User Agreement beyond monies available to it for the purpose of fulfilling this User Agreement.
4. TXDPS reserves the right to immediately suspend service to the User Agency or an individual user when applicable policies are violated. Service may be reinstated, in TXDPS' sole discretion, upon receipt of satisfactory assurance that such violations have been corrected. All costs for reconnection service are the responsibility of the User Agency.
5. TXDPS shall have the authority to inspect and audit the equipment, records, and operations of the User Agency to determine the User Agency's compliance with standards and requirements associated with TLETS, Texas Crime Information Center (TCIC)/National Crime Information Center (NCIC), and of this User Agreement throughout the term and for a period of four (4) years after the termination of this User Agreement. The User Agency shall maintain records regarding the use and dissemination of information in the LPR Database and shall provide such records to TXDPS immediately upon its request.
6. Any waiver of any breach or default of this User Agreement by TXDPS shall not constitute a waiver of any subsequent breach or default or a waiver of the provision itself.

C. DURATION AND TERMINATION

1. This User Agreement is effective upon the date it is signed by the User Agency and shall remain in effect until terminated by TXDPS or the User Agency.
2. This User Agreement may be terminated at any time upon the mutual written consent of TXDPS and the User Agency.
3. TXDPS or the User Agency may terminate this User Agreement for convenience upon thirty (30) calendar days written notice to the other party.
4. TXDPS may terminate this User Agreement if the User Agency fails to comply with any provision of this User Agreement or is otherwise in default by providing written notice to terminate, which termination shall become effective immediately upon the User Agency's receipt of the notice.
5. In no event will termination by TXDPS give rise to any liability whatsoever on the part of TXDPS.
6. All rights, obligations, responsibilities, limitations, and other understandings with respect to the disclosure and use of all information by the User Agency as described in this User Agreement shall survive any termination.

D. NOTICES AND CONTACTS

The User Agency shall direct all correspondence to TXDPS regarding this User Agreement to the following address:

Texas Department of Public Safety
Law Enforcement Support Division
Attention: LPR Quality Control Analyst
P.O. Box 4143
Austin, Texas 78765-4134
Telephone: (512) 424-5542
Email: TCIC.Operations@dps.texas.gov

TXDPS shall direct all correspondence to the User Agency regarding this User Agreement to the following address and contact person designated by the User Agency. The User Agency shall notify TXDPS within ten (10) calendar days of any change in this information:

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
AWARDING OF BIDS
Agenda Item No: 10.A.
CDBG-DR Chapin Pumps Rehabilitation Drainage Improvements

1. **Agenda Item:**
Consider Selection of a Firm and Authorize the City Manager to negotiate a professional services contract for RFQ 2024-003, Community Development Block Grant-Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements to SAMES, Inc., Highest Ranked Firm Pursuant to the City's Ordinances and Procurement Policies [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

2. **Description:**
The Chapin Pumps Rehabilitation Drainage Improvements Project was awarded by the Texas General Land Office's Community Development and Revitalization Program for the DR-4377 2018 South Texas Floods Infrastructure Competition grant. This disaster recovery funding is intended to help Texas communities recover from the 2018 South Texas Floods that occurred June 19 – July 18.

The Chapin Pond Pump Station is located at 1235 N Sugar Road. The proposed Project involves the completion of an Environmental Assessment in compliance with 24 CFR Part 58, designing new pumps, and rehabilitating the existing pump station and gates to mitigate flooding within the service area. The pumps will allow stormwater to be discharged into the pond to maximize the storage volume and provide relief to the existing storm sewer system.

On Tuesday, July 30, 2024, Request for Qualifications were received for RFQ 2024-003, Community Development Block Grant-Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements. A total of four (4) Request for Qualifications were received and opened. The request for qualifications were reviewed by staff and they all met the criteria set out in the Request for Qualifications. They were ranked as part of the requirements of the grant. City staff ranked firms based on their qualifications shown on their respective RFQ. The ranking committee consisted of an Assistant City Manager, City Engineer, Utilities Director and Engineer III (Assigned Project Engineer). SAMES, Inc. was the highest ranked firm meeting the criteria set in the request for qualifications.

The following qualified firms listed in ranking order that submitted Statements of Qualifications in response to this RFQ:

1. SAMES Inc.
2. Melden and Hunt
3. M2 Engineering
4. R. Gutierrez Engineering Corporation

Upon selection of firm by City Council, staff will negotiate with firm and a contract will be presented for approval in an upcoming meeting.

3. **Staff's Recommendation:**

Approve the Selection of a Firm and Authorize the City Manager to negotiate a professional services contract for RFQ 2024-003, Community Development Block Grant-Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements to SAMES, Inc., Highest Ranked Firm Pursuant to the City's Ordinances and Procurement Policies

2. Legal Notice

2.1. Notice to Respondents

The City of Edinburg is soliciting sealed proposals from qualified vendors for Community Development Block Grant-Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements.

Sealed Proposals must be submitted electronically or received by the City Secretary's Office no later than:

3:00 pm, Tuesday, July 30, 2024.

All sealed proposals must be received either electronically or at the designated location by the deadline shown. Proposals received after the deadline will not be considered for the award of the contract and shall be considered void and unacceptable.

All proposals will be opened, and respondent's names publicly read aloud promptly in the City Hall Community Room, at 415 W. University Dr., Edinburg, TX 78539, at 3:00 pm, Tuesday, July 30, 2024.

To obtain a copy of the Request for Qualifications or submit an electronic proposal please visit:

https://procurement.opengov.com/portal/cityofedinburg

If a Respondent chooses to submit a Hard Copy Proposal, it must be delivered in a sealed envelope with a return address and clearly marked "City of Edinburg RFQ No. 2024-3 to the City Secretary's Office prior to the RFQ opening date and time. The receiving time in the City Secretary's Office will be the governing time for acceptability of the proposals. The respondent's firm name shall appear on the outside of the envelope.

Submit Hard Copy Proposals to:

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

RFQ No. 2024-3

If you have any questions or require additional information contained in the RFQ, you may contact Criselda Lozano, Purchasing Manager. Please be sure to submit your questions via OpenGov Procurement at the website listed above no later than 3:00 pm on Monday, July 22, 2024.

The City reserves the right to reject any or all proposals and to waive informalities or technicalities and to accept the Proposal deemed the most advantageous to the City, and hold the proposal for a period of 90 days without taking action.

2.2. Federal or State Funded Projects

This project is being funded by the Texas General Land Office (GLO) through the 2018 South Texas Floods Community Development Block Grant - Disaster Recovery Program (CDGB-DR). Respondents will be required to comply the President's Executive Order No. 11236 and Order No. 11375 which prohibits discrimination in employment regarding race, creed, color, sex, or national origin. Respondent must also comply with the Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Minority and Women-Owned Business Standards, Affirmative Action Requirements, the Davis-Bacon and Related Acts, Federal Labor Standards, the Copeland "Anti-Kickback" Act, the Contract and Work Hours and Safety Standards Act, Section 3 requirements, and all contract procurement provisions listed in 2 CFR Part 200, Appendix II, as applicable. Respondents must make an effort to utilize small and minority-owned businesses, if subcontracting any work under this project.

Respondents choosing to bid or provide proposals on Federal or State Funded projects must be currently REGISTERED and ACTIVE in the System for Awards Management (SAM) database at the time a bid or proposal is submitted. Respondents must certify that they have active registration status with SAM.gov and must submit the entity's **Unique Entity Identification (UEI) Number** with the bid/proposal documents as instructed. Immediately after the bid opening takes place, the City will enter the respondent's UEI number (if provided) into the SAM database. If the respondent is not in ACTIVE status on the database, or if the respondent did not provide a UEI with its bid/proposal, the bid will be deemed non-responsive and disqualified from consideration of award. Entity registration may be completed at www.sam.gov. All contractors and/or subcontractors who are debarred, suspended, or otherwise excluded from or ineligible for participation on federal assistance programs may not undertake any activity in part or in full under this project.

3. Instructions, Terms and Conditions

3.1. General Instructions

PURPOSE

The purpose of these solicitation documents is to execute a Professional Services Contract for: 2024-3 Community Development Block Grant-Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements

INTENT

The services to be provided under this RFQ shall be in accordance with and shall meet all specifications and/or requirements as shown in this solicitation for RFQ. There is no intention to disqualify any respondent who can meet the requirements.

DEVIATION FROM SPECIFICATION

Please read your requirements thoroughly and be sure that the RFQ offered complies with all requirements/specifications noted. Any variation from the solicitation requirements/specifications must be clearly indicated by letter, on a point by point basis, attached to and made a part of your RFQ. If no exceptions are noted, and you are the successful respondent, it will be required that the service(s) be provided as specified.

SUBMITTAL OF "HARD COPY" RFQ

If submitting a Hard Copy RFQ, it must be submitted in a sealed envelope by the vendor. **Submit two (2) complete sets of the response, one (1) original marked "ORIGINAL," and one (1) Digital Copy in a flash drive**. Each RFQ must be completely filled out and SUBMITTED IN ORIGINAL FORM complete with all supporting documentation. RFQs submitted by facsimile (fax) will not be accepted. Submittal of an RFQ in response to this solicitation constitutes an offer by the respondent. Once submitted, RFQs become the property of the City of Edinburg and as such the City reserves the right to use any ideas contained in any RFQ regardless of whether that respondent/firm is selected. Submission of a RFQ in response to this solicitation, by any respondent, shall indicate that the respondent(s) has/have accepted the conditions contained in the RFQ, unless clearly and specifically noted in the RFQ submitted and confirmed in the contract between the City and the successful respondent otherwise. RFQs which do not comply with these requirements may be rejected at the option of the City. RFQs must be filed with the City of Edinburg before the deadline day and hour. No late RFQs will be accepted. Failure to meet RFQ requirements may be grounds for disqualification.

If Hand-Delivering Bids: 415 W. University Drive

c/o City Secretary Department (1st Floor)

If submitting Electronic: https://procurement.opengov.com/portal/cityofedinburg

AUTHORIZATION TO BIND RESPONDENT TO RFQ

RFQs MUST give full firm name and address of respondent, and be manually signed. Failure to do so will disqualify your RFQ. Person signing bid must show title or AUTHORITY TO BIND HIS/HER FIRM IN A

CONTRACT. Firm name and authorized signature must appear on each page that calls for this information. The legal status of the Respondent whether corporation, partnership, or individual, shall also be stated in the RFQ. A corporation shall execute the RFQ by its duly authorized officers in accordance with its corporate by-laws and shall also list the state in which it is incorporated. A partnership Respondent shall give full names and addresses of all partners. All partners shall execute the RFQ. Partnership and Individual Respondent shall state in the proposal the names and addresses of all persons with a vested interest therein. The place of residence of each Respondent, or the office address in the case of a firm or company, with county and state and telephone number, shall be given after the signature.

ALTERATIONS/AMENDMENTS TO RFQ

RFQ CANNOT be altered or amended after opening time. Alterations made before opening time must be initialed by respondent guaranteeing authenticity. No RFQ may be withdrawn after opening time without acceptable reason in writing and only after approval by the City of Edinburg.

NO RESPONSE TO RFQ

If unable to submit a RFQ, respondent should return inquiry giving reasons.

LIST OF EXCEPTIONS

The respondent shall attach to his/her RFQ a list of any exceptions to the specifications/ requirements.

TIME ALLOWED FOR ACTION TAKEN

The City of Edinburg may hold RFQ's **90 days** after deadline without taking action. Respondents are required to hold their RFQ's firm for same period of time.

RIGHT TO REJECT/AWARD

The City of Edinburg reserves the right to reject any or all RFQs, to waive any or all formalities or technicalities, and to make such awards of contract as may be deemed to be the best and most advantageous to the City of Edinburg.

NUMBER OF CONTRACTS

THE CITY reserves the right to award one, more than one, or no contract(s) in response to this RFQ.

INDEMNIFICATION CLAUSE

The Respondent agrees to indemnify and save harmless the City, from all suits and actions of every nature and description brought against them or any of them, for or on account of the use of patented appliances, products or processes, and he shall pay all royalties and charges which are legal and equitable. Evidence of such payment or satisfaction shall be submitted upon request of the Assistant Purchasing Manager, as a necessary requirement in connection with the final estimate for payment in which such patented appliance, products or processes are used.

ADDENDA AND MODIFICATIONS

Respondent shall carefully examine the RFQ forms, specifications/requirements, and instructions to Respondents. Should the respondent find discrepancies in, or omissions from specifications/requirements, or other documents, or should he/she be in doubt as to their meaning, he/she should request an interpretation via the OpenGov portal:https://procurement.opengov.com/portal/cityofedinburg and obtain clarification by addendum prior to submitting any RFQ. Explanations, interpretations, and supplemental instructions shall be in the form of written Addenda which shall become a part of the Contract documents. Said Addenda shall be available thru the e-procurement portal and e-mailed to all prospective Respondents. All Addenda issued in respect to this project shall be considered official changes to the original RFQ documents. Verbal statements in response to inquiries and/or requests for explanations shall not be authoritative nor binding. It shall be the Respondent(s) responsibility to ensure that they have received all Addenda in respect to this project. Furthermore, Respondents are advised that they must recognize, comply with, and attach a signed copy of each Addendum which shall be made part of their RFQ Submittal. Respondent(s) signature on Addenda shall be interpreted as the respondent's "recognition and compliance to" official changes as outlined by the City of Edinburg and as such are made part of the original solicitation documents. Failure of any respondent to receive any such addendum or interpretation shall not relieve such Respondent from its terms and requirements. The City may issue a written addendum no later than five calendar days prior to the date bids must be received. Addendums are available online at https://procurement.opengov.com/portal/cityofedinburg

SYNONYM

Where in this solicitation package SERVICES is used, its meaning shall refer to the request for qualifications Community Development Block Grant-Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements as specified.

ASSIGNMENT

Respondents are advised that the City of Edinburg shall not allow the successful respondent to sell, assign, transfer, or convey any part of any contract resulting from this RFQ in whole or in part, to a third party without the written approval of the City of Edinburg.

RESPONDENT'S EMPLOYEES

Neither the Respondent nor his/her employees engaged in fulfilling the terms and conditions of this Service Contract shall be considered employees of the City. The method and manner of performance of such undertakings shall be under the exclusive control of the vendor on contract. The City shall have the right of inspection of said undertakings at any time.

INTERPRETATIONS

Any questions concerning the project and/or specifications/requirements with regards to this solicitation for statement(s) of qualifications shall be directed to the designated individuals as outlined in the RFQ. Such interpretations, which may affect the eventual outcome of this request for statements of qualifications, shall be furnished in writing to all prospective Respondents via Addendum. No interpretation shall be considered binding unless provided in writing by the City of Edinburg in accordance with paragraph entitled **"Addenda and Modifications".**

STATUTORY REQUIREMENTS

It shall be the responsibility of the successful respondent to comply with all applicable State & Federal laws, Executive Orders and Municipal Ordinances, and the Rules and Regulations of all authorities having jurisdiction over the work to be performed hereunder and such shall apply to the contract throughout, and that they will be deemed to be included in the contract as though written out in full in the contract documents.

RFQ PREPARATION COSTS

The City of Edinburg shall not be held liable for any costs incurred by any respondent for work performed in the preparation of and production of a RFQ or for any work performed prior to execution of contract.

CONFIDENTIAL INFORMATION

Any information deemed to be confidential by the respondent should be clearly noted on the pages where confidential information is contained; however, the City cannot guarantee that it will not be compelled to disclose all or part of any public record under Texas Public Information Act, since information deemed to be confidential by the respondent may not be considered confidential under Texas Law, or pursuant to a Court order.

VERBAL THREATS

Any threats made to any employee of the City, be it verbal or written, to discontinue the providing of item/material/services for whatever reason and/or reasons shall be considered a breach of contract and the City will immediately sever the contract with the Respondent/Consultant on contract.

RIGHT TO AUDIT

The City of Edinburg reserves the right to audit the vendor's books and records relating to the performance of this contract. The City of Edinburg, at its own expense, shall have the right at all reasonable times during normal business hours and upon at least twenty-four (24) hours' advance notice, to audit, to examine, and to make copies of or extracts from the books of account and records maintained by the vendor(s) with respect to the Supply/Service and/or Purchase Contract. If such audit shall disclose overpayment by City to vendor, written notice of such overpayment shall be provided to the vendor and the amount of overpayment shall be promptly reimbursed by vendor to the City. In the event any such overpayment is not paid within ten (10) business days after receipt of such notice, the unpaid amount of such overpayment shall bear interest at the rate of one percent (1%) per month from the date of such notice until paid.

PAST PERFORMANCE

Respondent's past performance shall be taken into consideration in the evaluation of RFQ submittal.

JURISDICTION

Contract(s) executed as part of this solicitation shall be subject to and governed under the laws of the State of Texas. Any and all obligations and payments are due and performable and payable in Hidalgo County, Texas.

VENUE

The parties agree that venue for purposes of any and all lawsuits, cause of action, arbitration, and/or any other dispute(s) shall be in Hidalgo County, Texas.

CONSIDERATION OF LOCATION OF BIDDER'S PRINCIPAL PLACE OF BUSINESS

The City may give local vendors, whose principal place of business is located within the City of Edinburg, and whose bid is within five percent (5%) of the lowest bid price preference as allowed by Section 271.9051 of the Local Government Code.

AWARD

Respondents are advised that the City of Edinburg is soliciting RFQs and award shall be made to the respondent that in the opinion of the City of Edinburg is the best qualified.

The City of Edinburg reserves the right to award contract(s) based solely on the written proposals. The City also reserves the right to request oral interviews.

FINAL SELECTION AND THE CITY COUNCIL APPROVAL

Selection shall be made of one or more proposers deemed to be fully qualified and best suited among those submitting Proposals on the basis of the evaluation factors included in the Request for Qualifications, if so stated in the Request for Qualifications. Negotiations shall be conducted with the proposers selected. After negotiations have been conducted with each proposer selected, the agency shall select the proposer which, in its opinion, has made the best proposal, and shall award the contract to that proposer. The City may cancel this Request for Qualifications or reject the Qualifications at any time prior to an award, and is not required to furnish a statement of the reasons why a particular proposal was not deemed the most advantageous. Should the City determine in writing and in its sole discretion that only one proposer is fully qualified, or that one proposer is clearly more highly qualified than the others under consideration, a contract may be negotiated and awarded to that proposer. The award document will be a contract incorporating by reference all the requirements, terms and conditions of the solicitation and the contractor's proposal as negotiated. After the selection of the most qualified firm(s), scope of services and billing rates will be negotiated and used as attachments to the City’s Professional Services Agreement. This Agreement will then be submitted to the City Council for approval. If the City and the selected firm cannot successfully negotiate an agreement, then the City will enter into negotiations with the next best qualified firm on the evaluation rating list. This procedure may be repeated until one (1) or more firms has been selected and approved by the City Council.

PAYMENT

The City of Edinburg will execute payment by mail in accordance with the State of Texas Pay Law after SERVICES have been completed, introduced to the City, and found to meet City of Edinburg specifications/requirements. No other method of payment will be considered.

CONFIDENTIALITY OF INFORMATION AND SECURITY

Should the successful respondent become the holder of and have access to confidential information in the process of fulfilling its responsibilities in connection with an awarded contract the successful

respondent agrees that it shall keep such information confidential and will comply fully with the laws and regulations of the State of Texas, ordinances and regulations of the City, and any applicable federal laws and regulations relating to confidentiality.

EQUAL EMPLOYMENT OPPORTUNITY

Respondent agrees that they will not discriminate in hiring, promotion, treatment, or other terms and conditions of employment based on race, sex, national origin, age, disability, or in any way violate Title VII of 1964 Civil Rights Act and amendments, except as permitted by said laws.

TERMINATION OF CONTRACT

The City of Edinburg reserves the right to terminate the contract if, in the opinion of the City of Edinburg, the successful vendor's performance is not acceptable, no funds are available, or if the City wishes, without cause, to discontinue this contract. Termination will be in written form allowing a 30-day notice.

HISTORICALLY UNDERUTILIZED BUSINESS

Firm(s)/Sub Firm(s) will be required to comply with the President's Executive Order No. 11236 and Order No. 11375 which prohibits discrimination in employment regarding race, creed, color, sex, or national origin. Firm(s)/Sub Firm(s) must comply with the Title VI of the Civil Rights Act of 1964, Minority and Women Owned Business Enterprise standards and affirmative action requirements.

ETHICAL STANDARD

No City official or employee shall have interest in any contract resulting from this bid.

IF YOU HAVE ANY QUESTIONS ABOUT COMPLIANCE, PLEASE CONSULT YOUR OWN LEGAL COUNSEL. COMPLIANCE IS THE INDIVIDUAL RESPONSIBILITY OF EACH PERSON OR AGENT OF A PERSON WHO IS SUBJECT TO THE FILING REQUIREMENT. AN OFFENSE UNDER CHAPTER 176 IS A CLASS "C" MISDEMEANOR.

3.2. INSURANCE REQUIREMENTS

Staff may waive insurance requirements for contracts $0 - $4,999.99, including but not limited to contracts for food, materials, supplies, and construction. Workers' Compensation in amounts which satisfy statutory coverage shall be required for construction projects.

The following insurance requirements will be included in all City contracts of $5,000 - $14,999.99. In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim.

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker's Compensation Statutory Coverage

Comprehensive General Liability

(City named as additional insured)

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

The following insurance requirements will be included in all **City contracts of $15,000 or more.**

(1) The successful bidder will be required to carry the following insurance coverage and limits of coverage, as well as list the City as an additional insured to liability coverage as requested by the City. In addition, the successful bidder shall provide the City with evidence of coverage and furnish acceptable proof of payment of insurance premiums.

(2) The successful bidder will be required to secure and/or have insurance coverage in force with an admitted property and casualty insurance company licensed by the State of Texas to conduct business in the State of Texas.

(3) In contracts not involving building and construction projects, as that activity is defined in TEX. LABOR CODE §406.096, contractors may obtain alternative form of worker accident insurance with minimum limits of liability of $100,000 per claim

Minimum Insurance Requirements

Type of Coverage Limits of Liability

Worker's Compensation Statutory Coverage

Employer's Liability Bodily Injury by Accident:

$100,000 each accident

Bodily Injury by Disease:

$100,000 each employee/$500,000 policy limit

Comprehensive General Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Comprehensive Auto Liability

Bodily Injury $100,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

City's Protective Liability

Bodily Injury $250,000 each person/$500,000 each occurrence

Property Damage $100,000 each occurrence/$100,000 aggregate

or $500,000 combined single limits

Policies must name the City of Edinburg as an Additional Insured.

Certificates of insurance naming the CITY as an additional insured shall be submitted to the CITY for approval prior to any services being performed by Contractor. Each policy of insurance required hereunder shall extend for a period equivalent to, or longer than the term of the Contract, and any insurer hereunder shall be required to give at least thirty (30) days written notice to the CITY prior to the cancellation of any such coverage on the termination date, or otherwise. This Contract shall be automatically suspended upon the cancellation, or other termination, of any required policy of insurance hereunder, and such suspension shall continue until evidence that adequate replacement coverage is provided to the CITY. If replacement coverage is not provided within thirty (30) days following suspension of the Contract, the Contract shall automatically terminate.

4. Specifications

4.1. Scope of Services for Engineering Consultant

The selected firm(s) will report to, and operate under, the direction of City of Edinburg's Department of Engineering staff. Must have a Texas Licensed Professionals with superior background, training, and qualifications meeting all requirements of this RFQ, Registered or licensed in the State of Texas, and shall provide services and have staffing covering some or all of the specialized categories listed below:

- Street Infrastructure Evaluation and Improvements
- Pavement Management and Improvements
- Utility Infrastructure Evaluation and Improvements
- Erosion and Sediment Control Design
- Water and Wastewater Evaluation and Improvements
- Structural Engineering (Improvements & Design)
- Hydrology & Hydraulics
- Environmental Engineering Services in accordance with 24 CFR Part 58 and the National Environmental Policy Act (NEPA)
- Civil Engineering

All qualified firms or persons shall have current licenses as required under the State of Texas for the provisions of services requested for the City of Edinburg. Selected firms will be required to adhere to guidelines and code as set forth by International Building Code, Unified Development Code and City's Engineering Design Standards for assigned projects (unless otherwise instructed by City Staff).

Engineering services provided by the chosen firm(s) may include, but may not be limited to:

A. **General** – A wide range of services may be required including, but not limited to:

A. Perform assigned duties and responsibilities upon issuance of Job Task Order or notice to proceed in accordance with the scope provided in such work order or notice or upon direction of the City's designee.

B. Work will consist of trades necessary to complete work as detailed in the construction documents, specifications and/or as directed by the City's Project Manager.

C. All work must comply with current codes in effect at the time of work and with all OSHA requirements. Appropriate safety and security of the construction site and related area, including staging area(s) and roadway(s) is required, and will be provided by the CM at no additional cost to the City.

D. Provide recommendations regarding construction feasibility, labor availability, material usage, time requirements and update completion date based on project plans, specifications, verbal instruction(s) or combination thereof.

E. Prepare an Environmental Assessment in compliance with 24 CFR Part 58 and the National Environmental Policy Act (NEPA).

F. Prepare cost estimates for alternative designs and material recommendations to improve project budget and its management.

G. Prepare Guaranteed Maximum Price (GMP) to include any construction, material, labor, self-performed work and management cost, detailing each area of the proposal.

H. Provide Value Engineering Services and make recommendations to assure compliance with GMP.

I. Prepare/coordinate construction schedule for the Construction Team.

J. Update schedules, activity sequences, and duration milestone dates as needed.

K. Always provide site supervision during the requested services.

B.

B. **Pre-Construction Phase**

C.

A. Assist the City and the City's Professional Consultants during the scope development, preliminary design, and design development phases in evaluation of options for the project.

B. Review environmental requirements using the Texas General Land Office (GLO) and US. Department of Housing and Urban Development HUD Exchange websites: https://recovery.texas.gov/grant-administration/technical-assistance/index.html https://www.hudexchange.info/

C. Complete the Environmental Assessment using the attached template.

D. Establish the master project schedule identifying all different phases and all milestone items.

E. Develop a project budget and itemized Guarantee Maximum Price (GMP) upon negotiations with the City. The GMP shall include the substantial completion date of the project.

F. Review and familiarize itself with all reports, surveys, drawings, tests and results concerning the condition of existing facilities, systems, structures, and sites.

G. Work with and coordinate activities with any other contractors that the City contracts work with for the project.

H. Review all applicable documents to ensure constructability and to minimize change orders.

I. Review the project design to identify long-lead procurement items and equipment/materials which are eligible to be purchased by the City as direct material purchases.

J. Coordinate with the City's Professional Consultants to finalize construction documents and develop bid packages.

B. **C. Procurement (Bids and Awards)**

A. Schedule and conduct pre-bid conferences with the interested subcontractors, material suppliers, and equipment suppliers.

B. Assess conditions in the construction market to identify factors that will or may affect costs and time for completing the project.

C. Identify and solicit multiple bid packages that together will represent the entirety of the scope of work for the project.

D. Compile bid specifications and packages, utilizing City's bid procedures, obtaining bids for any and all construction, sub-contractor, material suppliers, including direct material purchases.

E. Solicit, advertise, accept, review, and, based on approvals by the City, award bids to qualified subcontractors based on the bid packages identified.

B.

D. **Construction Phase**

E.

A. Schedule and plan construction meetings, take and issue meeting minutes, and attendance sheets as directed by the City's Project Manager.

B. Coordinate with the Professional Consultants and IDA to schedule and conduct Pre-Construction meetings with subcontractors.

C. Plan and recommend timing for the release of drawings and specifications to enable phasing of construction project.

D. Maintain and update the master project schedule, detailed construction schedules, submittal schedules, inspection schedules, and occupancy schedules.

E. Provide materials to job site in a timely manner and assure their safe keeping, meeting the terms of the contract, adhering to project scheduling, and direct material purchase program.

F. Develop, implement cost controls, and provide financial accounting services for documentation of projects.

G. Coordinate on-site construction management services including, but not limited to:

A. progress job site meetings

B. maintain daily on-site project log and schedule report

C. oversee quality assurance testing and inspection programs

D. monitor construction management staff and subcontractor work performance for deficiencies

E. maintain record copy of all contract documents

F. coordinate requests for information (RFI) submittals

H. review adequacy of and oversee and ensure compliance with construction management staff and subcontractor safety programs and policies.

I.

D. **Close-Out Phase**

E.

A. Assemble and deliver sufficient hard copies and electronic copies on USB/Flash Drive of closeout documents, parts and operational manuals, and repair and parts manual.

B. Coordinate project close-out, start-up and transition to operation

C. Coordinate completion of As-Built documents with City's Building Official and Project Manager.

D. Complete or coordinate completion of punch-list items generated by the City's Professional Consultant and the City's representatives during their inspections.

E. Coordinate with the City's Professional Consultant to provide complete Project records including Project Manual and CAD drawings corrected to show all construction changes, additions, and deletions compared to the Construction Document.

F. Coordinate with the City's Building Official to prepare the Certificate of Final Inspection.

G. Coordinate and conduct Building Warranty Inspections

H. Warrantee all workmanship and material for one (1) year following substantial completion.

I. Ensure coordination and implementation of equipment training for City staff.

J. Provide USB/Flash Drive for all project photos.

K. Project video record of any training provided to City's staff.

4.2. Submittal Requirements

The RFQ must be submitted according to the instructions outlined herein. Each response should include, at a minimum, the following items not excluding the selection process criteria:

1. Transmittal letter – Indicate interest and commitment to perform services for the City of Edinburg, include contact information (physical address, telephone, fax, cell phone, and email address) for the primary person responsible for your RFQ who will be the point of contact for the City on all correspondence and communications pertaining to the RFQ. State whether any addendums to this RFQ have been received by your firm and whether consideration of their content has been included in your RFQ. The letter must be signed by an officer of the firm who is authorized to bind the firm to contract and shall contain a statement to this effect;

2. Firm Qualification and Experience – Discuss the firm's experience and history in performing engineering and project management services in a timely manner, particularly for other governmental agencies in the past Two (2) years. Discuss the firm's uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

3. Team Member Qualifications and Experience – Submit resumes summarizing qualifications and experience of project manager, key staff and any support staff likely to be assigned to the work.

4. References – Provide at least three references (names and current phone numbers) from recent work and List all past projects with the City of Edinburg for each proposed team member. Include a brief description of the projects associated with the reference, and the role of the individual.

5. Insurance - Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. A list of any insurance claims against the firm within the past 5 years.

6. Professional Services Agreement – Provide a statement that the Professional Services Agreement has been read, that the firm will meet the prerequisite insurance requirements, and the firm, if selected, agrees to enter in to such agreement.

7. Contact Information – Each firm must submit the firms two (2) different contact information (Name, Title, Address, Phone Number, Mobile Number, and Email Address).

8. Presentation – Electronic submittal only.

5. Vendor Questionnaire

5.1. Proposal*

Please upload your entire proposal here as **one complete PDF document**.

CONFLICT OF INTEREST

CHAPTER 176 OF THE TEXAS LOCAL GOVERNMENT CODE

Effective January 1, 2006, Chapter 176 of the Texas Local Government Code requires that any vendor or person considering doing business with a local government entity disclose in the Questionnaire Form CIQ, the vendor or person's affiliation or business relationship that might cause a conflict of interest with a local government entity. By law, this questionnaire must be filed with the records administrator of the City of Edinburg not later than the 7th business day after the date the person becomes aware of facts that require the statement be filed. See Section 176.006, Local Government Code. A person commits an offense if the person violates Section 176.006, Local Government Code. An offense under this section is a Class C misdemeanor.

For more information or to obtain Questionnaire CIQ go to the Texas Ethics Commission web page at https://www.ethics.state.tx.us/data/forms/conflict/CIQ.pdf

*Response required

*5.4.9. If awarded the 1295 form will need to be provided.**

CERTIFICATE OF INTERESTED PARTIES (Form 1295)

In 2015, the Texas Legislature adopted House Bill 1295, which added section 2252.908 of the Government Code. The law states that a governmental entity or state agency may not enter into certain contracts with a business entity unless the business entity submits a disclosure of interested parties to the governmental entity or state agency at the time the business entity submits the signed contract to the governmental entity or state agency. The law applies only to a contract of a governmental entity or state agency that either (1) requires an action or vote by the governing body of the entity or agency before the contract may be signed or (2) has a value of at least $1 million. The disclosure requirement applies to a contract entered into on or after January 1, 2016. For more information go to the Texas Ethics Commission web page at

https://www.ethics.state.tx.us/filinginfo/1295/

STATE OF TEXAS	**§**	**AGREEMENT BETWEEN THE CITY OF EDINBURG AND SAMES, INC FOR PROFESSIONAL SERVICES PURSUANT RFQ NO. 2024-003**
COUNTY OF HIDALGO	**§**	
CITY OF EDINBURG	**§**	

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **SAMES, Inc** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services for CDBG-DR Chapin Pumps Rehabilitation Drainage Improvements, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not create a joint enterprise, nor does it appoint either party as an agent of the other for any

purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable federal, state, and local laws, ordinances, codes, and regulations in performing the

Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit ”B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

Section XXI
Notice of Governing Law for State and Federal Grant Projects

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

Appendix II to Part 200—Contract Provisions for non-Federal Entity Contracts Under Federal Awards.

1. Remedies. Contracts for more than the simplified acquisition threshold, which is the inflation adjusted amount determined by the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) as authorized by 41U.S.C. 1908, must address administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as appropriate.

2. Termination for cause and for convenience. All contracts in excess of $10,000 must address termination for cause and for convenience by the subrecipient including the manner by which it will be affected and the basis for settlement.

3. Rights to Inventions Made Under a Contract or Agreement. If the federal

award meets the definition of “funding agreement” under 37 CFR 401.2 (a) and the subrecipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that “funding agreement,” the subrecipient must comply with the requirements of 37 CFR Part 401, “Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements,” and any implementing regulations issued by the awarding agency.

4. Debarment and Suspension (Executive Orders 12549 and 12689). A contract award (see 2 CFR 180.220) must not be made to parties listed on the government-wide exclusions in the System for Award Management (SAM), in accordance with the OMB guidelines at 2 CFR 180 that implement Executive Orders 12549 (3 CFR part 1986 Comp., p. 189) and 12689 (3 CFR part 1989 Comp., p. 235), “Debarment and Suspension.” SAM Exclusions contains the names of parties debarred, suspended, or otherwise excluded by agencies, as well as parties declared ineligible under statutory or regulatory authority other than Executive Order 12549.

5. Records of non-Federal entities. The U.S. Department of Housing and Urban Development (HUD), Inspectors General, the Comptroller General of the United States, the Texas General Land Office Community Development and Revitalization (GLO-CDR), and the pass-through entity, or any of their authorized representatives, must have the right of access to any documents, papers, or other records of the non-federal entity which are pertinent to the federal award, in order to make audits, examinations, excerpts, and transcripts. The right also includes timely and reasonable access to the non-federal entity's personnel for the purpose of interview and discussion related to such documents.

6. Record Retention. Financial records, supporting documents, statistical records, and all other non-federal entity records pertinent to a federal award must be retained for a period of three years from the date of submission of the final expenditure report or, for federal awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, respectively, as reported to the federal awarding agency or pass-through entity in the case of a subrecipient. Federal awarding agencies and pass-through entities must not impose any other record retention requirements upon non-federal entities. The only exceptions are the following:

a. If any litigation, claim, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken;
b. When the non-federal entity is notified in writing by the federal awarding agency, cognizant agency for audit, oversight agency for audit, cognizant agency for indirect costs, or pass-through entity to extend the retention period.
c. Records for real property and equipment acquired with federal funds must be retained for 3 years after final disposition;
d. When records are transferred to or maintained by the federal awarding agency or pass-through entity, the 3-year retention requirement is not applicable to the non-federal entity;
e. Records for program income transactions after the period of performance. In some cases, subrecipients must report program income after the period of performance. Where there is such a requirement, the retention period for the records pertaining to the earning of the program income starts from the end of the non-federal entity's fiscal year in which the program income is earned;
f. Indirect cost rate proposals and cost allocations plans. This paragraph applies to the following types of documents and their supporting records: indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates);
g. If submitted for negotiation. If the proposal, plan, or other computation is required to be submitted to the Federal Government (or to the pass-through entity) to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts from the date of such submission;
h. If not submitted for negotiation. If the proposal, plan, or other computation is not required to be submitted to the Federal Government (or to the pass- through entity) for negotiation purposes, then the 3-year retention period for the proposal, plan, or computation and its supporting records starts from the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

7. Contracting with small and minority businesses, women's business enterprises, and labor surplus area firms.

a. The non-federal entity must take all necessary affirmative steps to assure that small, minority businesses, women's business enterprises, and labor surplus area firms are used when possible;

b. Affirmative steps must include:
    i. Placing qualified small and minority businesses and women's business enterprises on solicitation lists;
    ii. Assuring that small and minority businesses and women's business enterprises are solicited whenever they are potential sources;
    iii. Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses and women's business enterprises;
    iv. Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses and women's business enterprises;
    v. Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce; and
    vi. Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs (1) through (5) of this section.

8. Equal Employment Opportunity. Except as otherwise provided under 41 CFR Part 60, all contracts that meet the definition of ‘‘federally assisted construction contract’’ in 41 CFR Part 60–1.3 must include the equal opportunity clause provided under 41 CFR 60–1.4(b), in accordance with Executive Order 11246, ‘‘Equal Employment Opportunity’’ (30 FR 12319, 12935, 3 CFR Part, 1964–1965 Comp., p. 339), as amended by Executive Order 11375, ‘‘Amending Executive Order 11246 Relating to Equal Employment Opportunity,’’ and implementing regulations at 41 CFR part 60, ‘‘Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor.’’

9. Davis-Bacon Act, as amended (40 U.S.C. 3141-3148). When required by federal program legislation, all prime construction contracts in excess of $2,000 awarded by non-federal entities must include a provision for compliance with the Davis- Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, “Labor Standards Provisions Applicable

to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must be required to pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must be required to pay wages not less than once a week. The non-federal entity must place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation. The decision to award a contract or subcontract must be conditioned upon the acceptance of the wage determination. The non-federal entity must report all suspected or reported violations to the federal awarding agency. The contracts must also include a provision for compliance with the Copeland "Anti- Kickback" Act (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-federal entity must report all suspected or reported violations to the federal awarding agency.

10. Contract Work Hours and Safety Standards Act (40 U.S.C. 3701-3708). Where applicable, all contracts awarded by the non-federal entity in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

11. Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387), as amended. Contracts and subgrants of amounts in excess of $150,000 must contain a provision that requires the non-federal award to agree to comply with all applicable

standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

12. Byrd Anti-Lobbying Amendment (31 U.S.C. 1352). *Contractors* that apply or bid for an award exceeding $100,000 must file the required certification. Each tier certifies to the tier above that it will not and has not used federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier must also disclose any lobbying with non-federal funds that takes place in connection with obtaining any federal award. Such disclosures are forwarded from tier to tier, up to the non-federal award.

13. Solid Waste Disposal Act. A non-federal entity that is a state agency or agency of a political subdivision of a state and its contractors must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds $10,000 or the value of the quantity acquired during the preceding fiscal year exceeded $10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines.

14. Domestic preferences for procurements. As appropriate and to the extent consistent with law, the non-Federal entity should, to the greatest extent practicable under a Federal award, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States (including but not limited to iron, aluminum, steel, cement, and other manufactured products). The requirements of this section must be included in all subawards including all contracts and purchase orders for work or products under this award.

15. Verification No Boycott Israel. As required by Chapter 2271, Government Code, CONTRACTOR hereby verifies that it does not boycott Israel and will not boycott Israel through the term of this Agreement. For purposes of

this verification, “boycott Israel” means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes.

16. Foreign Terrorist Organizations. Pursuant to Chapter 2252, Texas Government Code, Vendor represents and certifies that, at the time of execution of this Agreement neither Vendor, nor any wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of the same (i) engages in business with Iran, Sudan, or any foreign terrorist organization as described in Chapters 806 or 807 of the Texas Government Code, or Subchapter F of Chapter 2252 of the Texas Government Code, or (ii) is a company listed by the Texas Comptroller of Public Accounts under Sections 806.051, 807.051, or 2252.153 of the Texas Government Code. The term "foreign terrorist organization" in this paragraph has the meaning assigned to such term in Section 2252.151 of the Texas Government Code.

Our Commitment to You

- We will actively pursue the most creative solutions tailored to your unique needs.
- We are dedicated to delivering excellence and exceptional value in every project.
- Our ethical standards are unwavering, grounded in fairness, integrity, honesty and respect.
- We are committed to continuously enhancing our technological expertise to elevate the quality of our services.

Re: City of Edinburg: Community Development Block Grant - Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements

Mrs.Carmona,

M2E is pleased to present this Statement of Qualifications for the City of Edinburg: Community Development Block Grant - Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage project. Our team compromises highly qualified local experts with a proven track record in local community and City improvements. We are committed to collaborating with you to ensure we meet the City of Edinburg's standards and needs while providing top-tier engineering services to support the rehabilitation and enhancement of the Chapin Pump Pond Station. M2E ensures that valuing the safety of the Community against storm water flooding disasters is a priority, and we are prepared to help create solutions that will allow stormwater to be discharged into the pond to maximize the storage volume and provide relief to the existing storm sewer system.

M2E TEAM. M2 Engineering, PLLC (M2E) is a local Historically Underutilized Business (HUB)/Minority Business Enterprise (MBE) multidisciplinary engineering and management firm licensed by the Texas Board of Professional Engineers (TBPE F-19545) located in Mission, Texas. M2E has assembled a highly qualified team with a proven history of working together and specialized experience in all aspects local Community and City improvement projects. The principal contact authorized to conduct final contract negotiations on behalf of M2E will be President, Mr. Emigdio "Milo" Salinas, PE.

M2E RELATIONS. M2E's existing knowledge in drainage infrastructure and its commitment to continuous local Community improvements is an essential part of what sets M2E apart from other firms. Our team provides tailored Civil Engineering solutions for the development of new construction, utilities, drainage, water & wastewater, planning, and detailed construction management services, including environmental assessments. We understand that rehabilitating the existing pump station gates is a critical part of this project; and we are prepared to work together with the City of Edinburg Department of Engineering staff to enhance the resilience of the Chapin Pond Station against future flooding. M2E's accomplishments are a direct result of its effort, dedication and commitment to the high standards set forth by M2E and its team. WE do have experience with environmental assessments.

M2E is pleased to have been given the opportunity to submit the Request for Qualifications (RFQ) for the Chapin Pumps Rehabilitation Drainage Improvements Project. Along with the City of Edinburg, M2E will provide tailored solutions to ensure that Chapin Pumps Rehabilitation Drainage Improvements Project aims to restore and improve the functionality and efficiency of the Chapin Pump Pond Station and surrounding drainage infrastructure, enhancing resilience against future disasters. If you have any questions or concerns, please do not hesitate to call me at 956.600-8628 or email me at milo@m2-engineers.com.

Thank you for your consideration,

Emigdio "Milo" Salinas, P.E.
President

FIRM QUALIFICATIONS AND EXPERIENCE

M2E is a full-service engineering firm dedicated to designing and building solutions for people. Since 2018, we’ve been transforming ideas into reality, improving lives and communities. M2E is a Professional Limited Liability Corporation (PLLC), Historically Underutilized Business (HUB) & Minority Business Enterprise (MBE) operated by Mr. Emigdio “Milo” Salinas, P.E. whom is actively the President of the firm . M2E is a registered engineering firm licensed to practice in the State of Texas by the Texas Board of Professional Engineers under the firm number F-19545.

It is comprised of professional engineers, project manager, designers, and construction inspectors; a team committed to deliver smart solutions tailored to our clients’ needs. M2E focuses on our clients’ success, no matter the project’s size or scope.

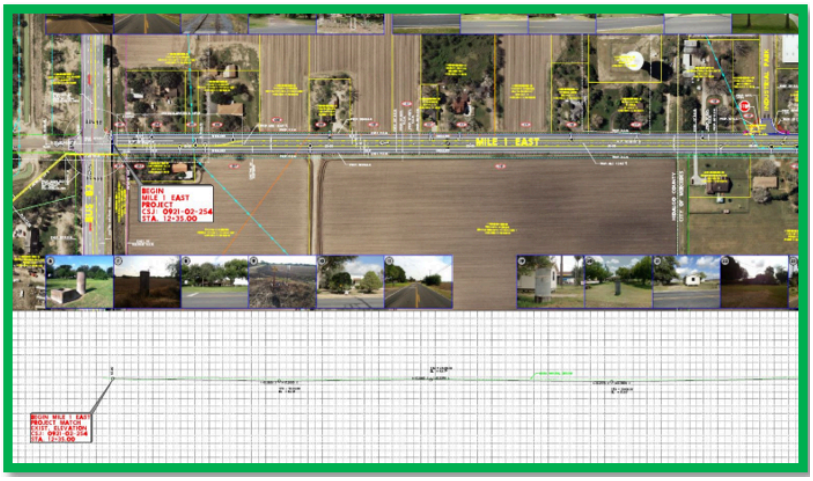
FIRM BIO

M2E is an innovative, multi-discipline engineering firm specializing in civil engineering, water resources, project management, and construction management particularly for municipalities and counties. Even though M2E originated in 2018, the President of the firm, Mr. Salinas has over eighteen (18) years of experience. Mr. Salinas and M2E have actively continued to provide high-quality services for local municipal, industrial, institutional, commercial, and governmental agencies on numerous state, federal, and county funded projects. Mr. Salinas has extensive experience in federal, state, and local requirements for funding applications, civil engineering design, environmental assessments, permits, project management, construction phase engineering, and project inspection. Furthermore, Mr. Salinas has successfully managed drainage projects, roadway, water and wastewater infrastructure projects, capital improvements plans, and master plans.

AREAS OF SPECIALIZATION

M2E is a multi-disciplinary firm qualified to provide, but not limited to the following services:

- Civil Engineering
- Planning
- Management Consulting
- Project Management
- Environmental Assessments / Environmental Information Documents (EID)
- Construction Management
- Quality Assurance & Quality Control (QA/QC)
- Construction Engineering Inspection (CEI)



PROJECT EXPERIENCE

Texas Department of Transportation (TxDOT) & City of Mercedes – Mile 1 East (Business 83 – Mile 8)

Total Estimated Construction:
Cost: $13 M

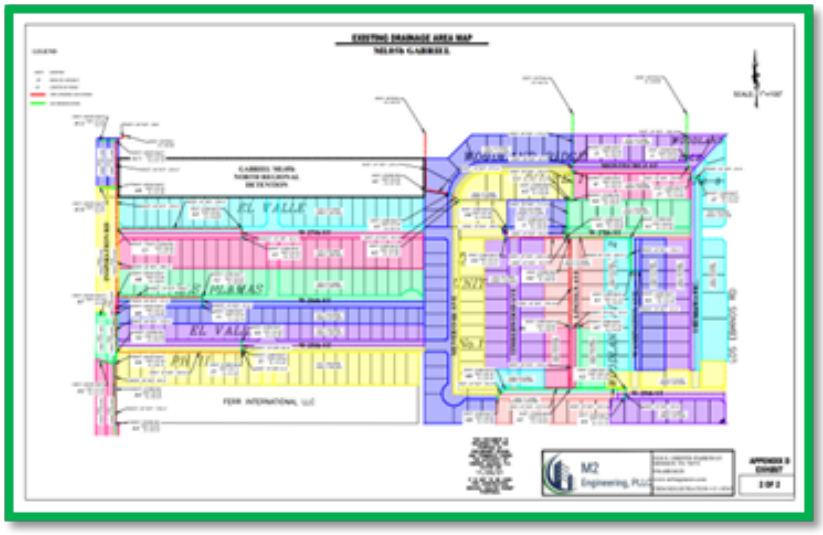
Client Contact:
Jose Figueroa
City of Mercedes

Project Personnel:
Emigdio “Milo” Salinas P.E.

Texas Department of Transportation & | City of Mercedes

M2E provided roadway and drainage infrastructure schematic design for Mile 1 East in City of Mercedes. The proposed Roadway Typical Section width will be from an existing 24’ E-E to a 64’ F-F with 12’ travel lanes, 16’ continuous left turn lane, and 10.5’ shoulders. The total length of the project consists of 1.40 Miles, crossing to major roadways, Business 83 and Interstate 2 (I-2). The project will consist of two major drainage outfalls that have a total length of over 5,000 linear feet in drainage ditch and Reinforce Concrete Boxes.

Project Relevancy:
This project is relevant to the City of Edinburg’s drainage improvements project as during the schematic and design phase; the proper sizing of the proposed infrastructure was based on the hydraulic and hydrology study.



PROJECT EXPERIENCE

City of Mission – Gabriel Drainage Improvements Project

Total Estimated Construction:
Cost: $1.7 M

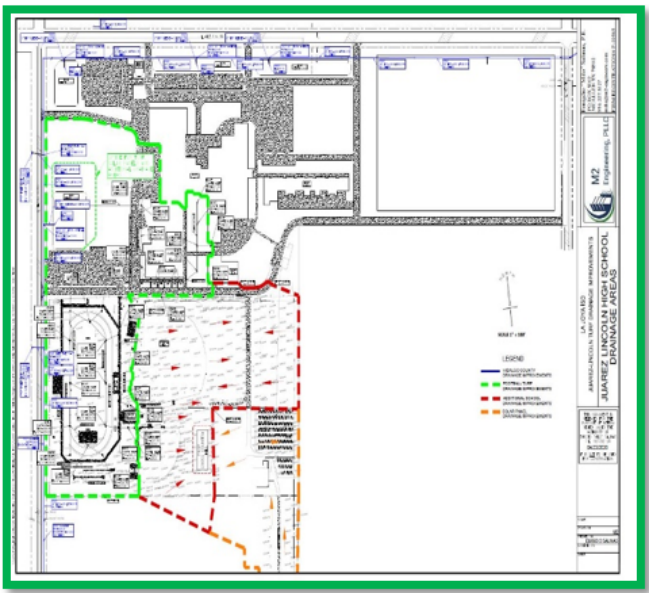
Client Contact:
Juan Pablo “JP” Terrazas
Assistant City Manager
City of Mission

Project Personnel:
Emigdio “Milo” Salinas P.E.

City of Mission

M2E, as the project engineer provided drainage design, Hydrologic & Hydraulic Report, Utility Coordination & Surveying. Project consisted of over 5,000 linear feet of storm sewer pipe upgrading and new extensions. The proposed project will alleviate over 100 acres of land and is located by North Inspiration Road and 495 Road. The area will ultimately drain into the Mission Lateral Drainage Ditch, owned and operated by Hidalgo County Drainage District No. 1. (HCDD#1)

Project Relevancy: This project is relevant to the City of Edinburg’s drainage improvements project as during the schematic and design phase; the proper sizing of the proposed infrastructure was based on the hydraulic and hydrology study.



PROJECT EXPERIENCE

La Joya ISD – Juarez-Lincoln High School Drainage Improvements

Total Estimated Construction:
Cost: $300,000.

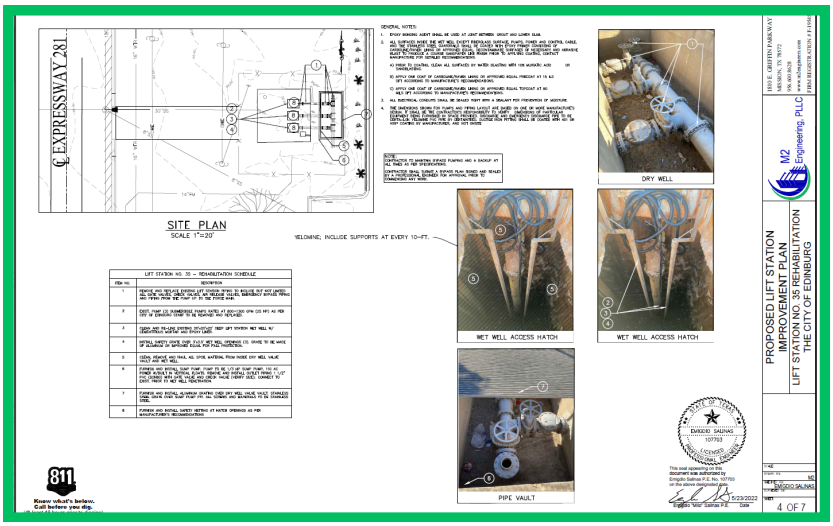
Client Contact:
Arnold Ochoa
Executive Director for Facilities Department.

Project Personnel:
Emigdio “Milo” Salinas P.E.

La Joya Independent School Disctrict

M2 Engineering, PLLC as the Project Engineer for the project is proposing to improve the drainage infrastructure at Juarez-Lincoln High School. During the design phase , we coordinated with Hidalgo County Drainage District No. 1 to outfall into proposed drainage infrastructure designed and constructed by others. The improvements consisted of improving existing drainage ponds, grading of existing areas to drain into the proposed drainage infrastructure that now outfalls into the HCDD #1 drainage system.

Project Relevancy: This project is relevant to the City of Edinburg’s drainage improvements project as it required coordination with other local entities.



PROJECT EXPERIENCE

City of Edinburg – Lift Station No. 35 Rehabilitation Improvements

Total Estimated Construction:
Cost: $800K

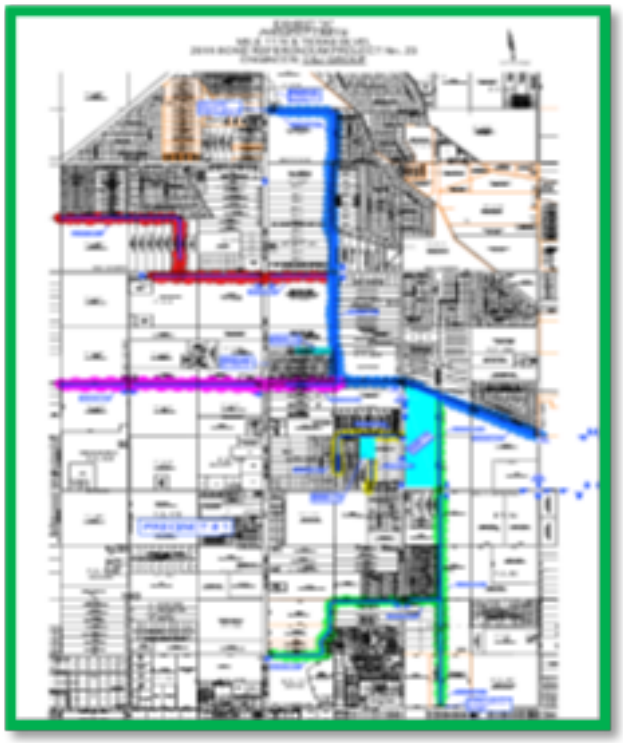
Client Contact:
Gerardo Carmona P.E.
Director of Utilities
City of Edinburg

Project Personnel:
Emigdio “Milo” Salinas P.E.

City of Edinburg

M2 Engineering, PLLC provided The City of Edinburg with professional engineering services for the Lift Station No. 35 Rehabilitation Improvements Project. The project consists of providing Construction Plans and Specifications for the rehabilitation of Lift Station No. 35, which is located at 8420 N. Expressway 281 (I69). The three (3) – 20 Horsepower Lift Station Rehab consisted of replacement of the following: Space Well Discharge Piping, Dry Well Discharge Piping, Check Valves, Gate Valves, Fittings, Re-Lining of the Wet Well with two-part component (cementitious material and epoxy coating), Pump Supports, Bypass Pumping Plan, Traffic Control Plan, and acquiring a TxDOT Permit prior to the start of construction. Project was completed ahead of schedule, and within budget.

Project Relevancy: This project is relevant to the City of Edinburg’s drainage improvements project as M2E was given the opportunity to assist in rehabilitating the city’s lift station by working with a local contractor to save cost and time that provided services through the Buy Board.



PROJECT EXPERIENCE

Hidalgo County PCT No. 1 – Mile 11 N. & Texas Blvd. 2018 Bond Referendum Project No. 23

Total Estimated Construction:
Cost: $7.5 M

Client Contact:
Raul Sesin, P.E.
Hidalgo County Drainage District No.1

Project Personnel:
Emigdio “Milo” Salinas P.E.

Hidalgo County Precinct No. 1

M2 Engineering, PLLC procided civil engineering services for drainage hydraulic and hydrologic modeling (HEC-RAS Modeling) and design of the proposed drainage improvements. The proposed drainage improvements consist of over 6.25 miles of drainage ditch widening and at least 40 acres of proposed detention ponds. The proposed drainage improvements were designed for a 50-year storm event, and is expected to alleviate approximately 7 square miles of area.

Project Relevancy: This project is relevant to the City of Edinburg’s drainage improvements project which may result in the implementation of a hydraulic and hydrologic model for proper sizing of proposed pump station equipment.

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

M2 ENGINEERING, PLLC

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed 25-DEC-2020, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day-to-day management, operational control, business location) provided in the submission of the business' application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp) or by contacting the HUB Program at 512-463-5872 or toll-free in Texas at 1-888-863-5881.

M2E is renowned not only for delivering exceptional service but also for serving as a trusted advisor in Civil Engineering and other project requirements. While keeping our clients needs as a priority, our team of experienced professionals is here to provide the support you need.

ORGANIZATIONAL CHART

The M2E team consists of skilled and experienced professionals united by a shared commitment to quality, efficiency, and cost-effectiveness. The organizational chart below outlines each team member's role in delivering services for the City of Edinburg.

TECHNICAL STAFF

Project Inspectors
Jose Garza
Enrique Villarreal

Project Designers
Daniel Izaguirre
Jose Lozoya

Engineering Staff
Fernando Estevan, PE, CFM
Hector Moreno

Administrative Staff
Soledad Arredondo
Iselda Garza

Emigdio“Milo” Salinas, P.E.

PROFESSIONAL ENGINEER

Mr. Salinas has over 18 years of experience in water resources, drainage infrastructure, land development, sanitary sewer, water, and street design. He has designed, and construction managed residential, commercial and municipal projects in various areas in Texas. Mr. Salinas is bilingual in English and Spanish.

PROJECT ROLE

PRESIDENT,
M2 Engineering, PLLC.

EDUCATION

BS, Civil Engineer,
Texas A & M University - Kingsville, Tx 2006

REGISTRATIONS/ CERTIFICATIONS:

Professional Engineer,
Texas, No. 107703

PROFESSIONAL AFFILIATION

2004 - Present
Memeber of ASCE (American Society of Civil Engineers)
2005-2006
Member of CEHS (Civil Engineering Honors Society)

YEARS OF EXPERIENCE:

18 Years

EXPERIENCE

2018 – Present

M2 ENGINEERING, PLLC

Design and construction management for civil engineering projects. Responsible for planning, coordinating, designing and managing construction for municipal, industrial, land development and residential projects. As President of the firm additional responsibilities include supervision of day-to-day activities, project control, coordination and scheduling during all phases of engineering and surveying projects.

2011 – 2018

LEFEVRE ENGINEERING & MANAGEMENT CONSULTING, LLC

Vice President; responsible for design and construction management for water and wastewater municipal infrastructure. Responsible for planning, coordinating, designing and managing construction for municipal, industrial, land development and residential projects.

2009 – 2011

GUZMAN AND MUNOZ ENGINEERING AND SURVEYING, INC.

Provide design and construction management for water and wastewater municipal infrastructures. Responsible for pay request, change orders, project status reports, inspections, construction testing, project status meetings, interacting with client and contractors. Project Engineer/Inspector for Zavala County WCID#1 Wastewater Improvements Project, which includes the infrastructure of a wastewater collections system and wastewater treatment plant for the City of La Pryor.

2007 – 2009

HALFF ASSOCIATES, INC., MCALLEN, TX

Provided design for land development that included commercial, industrial and residential sites. Experience with water and wastewater developments with residential, industrial, commercial and treatment facilities. Designing of drawings which included the design of water, sanitary sewer, drainage, paving & dimensional control, grading and erosion control. Programs used included Microstation V8 and Geopak.Engineering calculations included sizing water and wastewater developments, drainage pipes, flumes, drainage ditches or canals, hydraulic calculations, earthwork calculations, drainage statements, probable construction cost, paving sections (with Geotech Reports) and other engineering procedures

Experience

Jan. 2020 - Present

Project Engineer for M2 Engineering, PLLC Mission, Texas

Utilize AutoCAD and Civil 3D to develop and update engineering plans,profiles, sections, and details for land development projects. Prepared construction documents for permitting and issuance, and coordinated the design team as Project Engineer ensuring compliance with relevant regulations and client satisfaction. Performed hydro logic and hydraulic analysis for TxDOT and County Bond Projects utilizing Civil Geo, HEC-RAS and HEC-HMS to adequately design the drainage improvements Lead Drone Aerial Surveying pilot M2E is a multi-disciplinary firm with special interest in water resources, drainage infrastructure, land development, sanitary sewer, water and street design. Have designed and construction managed residential, commercial and municipal projects. Coordinated with clients and regulatory entities as the main point of contact for various engineering projects, ensuring timely delivery and compliance with project specs and regulations.

May 2016 - Present

Project Manager at Lemar Design and Construction, LLC

Managed the design and construction of residential and commercial projects, ensuring timely completion, quality control,and budget adherence. Coordinated with architects, engineers, subcontractors, and clients to develop project plans, schedules, and specs. Oversaw project teams, providing direction to ensure efficient allocation of resources Conducted site visits and inspections to monitor construction progress, identify potential issues, and implement corrective actions as needed. Gained an understanding of the overall civil engineering process, from design and permitting to construction.

April 2017 - July 2017

Internship with LeFevre Engineering, PLLC

Summer Internship in which I gained hands-on experience in various aspects of Civil Engineering, including site design,and infrastructure planning for municipal projects.

Seasonal Summers [2016-2018]

Concrete Laborer at Olive Cement, Co. Detroit, Michigan

Performed concrete work for residential and commercial projects, ensuring quality and efficiency
Assisted in form work construction, rebar placement, and concrete pouring
Assisted in the interpretation of grading plans

Coordinated with clients and regulatory entities as the main point of contact for various engineering projects, ensuring timely delivery and compliance with project specs and regulations.

Jan 2020 - April 2020

Project Engineer at KCI Technologies, Inc

Performed engineering duties in planning,designing, and overseeing projects throughout design for public infrastructure projects with Texas Department of Transportation.

Conducted meetings with state staff, design team, and public regarding proposed improvements.

Construction Manager/Project Manager;responsible conducting meetings, tracking construction schedule, conferring with landowners, County/City and State personnel, project engineers and contractors.

Sept. 2018 - Jan. 2020

Project Engineer at Landtech, Inc.

Performed engineering duties in planning,designing, and overseeing projects throughout design for public infrastructure projects with Texas Department of Transportation.

Conducted meetings with state staff, design team, and public regarding proposed improvements.

Construction Manager/Project Manager;responsible conducting meetings, tracking construction schedule, conferring with landowners, County/City and State personnel, project engineers and contractors.

Company was bought out by KCI Technologies,Inc and continued project tasks and responsibilities.

June 2015 - Dec. 2015 &Jan. 2016 - Aug. 2018

Graduate Project Engineer / Engineering Intern at LeFevre Engineering & Management Consulting, LLC

Conducted construction inspections, reviewed contractor pay requests, cost estimates and change orders.

Construction Manager/Project Manager;responsible conducting meetings, tracking construction schedule, conferring with landowners, County/City personnel, project engineers and contractors.

Provided & developed cost estimates, project budgets, construction schedules, design engineering services contracts, and work authorizations to clients.

Developed and assisted with hydraulic calculations, drainage reports, Environmental Phasel Assessments, Environmental Information Documents (EID), and engineering feasibility reports for County,City and agencies such as Texas Water Development Board (TWDB) & USDA.

Mr. Izaguirre has 22 years of experience as a Drafter assembling subdivision designs and preliminary designs. He completed engineering reports outlining the description of water services and sewer lines within the development in English and Spanish. He has drafted plans and profiles for Hidalgo County projects. Mr. Izaguirre has done water layout and sanitary collection system layouts which involved layout design and drawing details. He has completed paved layout consisting of calculating grades, storm sewer flows, calculating inlets and manhole locations.

- **2019 - Present - Senior Technician Designer for M2 Engineering, PLLC**
- **2007-2018 - Drafter at S & B Infrastructure, Ltd.**
- **2002-2007 - Drafter at Quintanilla, Headley & Associates**

Drainage District No.1. Hidalgo County, McAllen,Texas – Served as a Drafter responsible for working on structural inspections.

IBWC, Hidalgo Protective Levee I, Hidalgo County,Hidalgo, Texas – Served as a CAD Technician: Project was the rehabilitation of Hidalgo Protective Levee (Phase I). Responsible for project creating sheets and do redlines for the engineer charge of the project. Sheets consist of Project Layout, Alignment Data, Alignment Data, Plan and Profile, Flood wall Plan and Profiles and Details.

IBWC, Rehabilitation of Hidalgo Protective Levee II,Hidalgo County, Hidalgo, Texas – Served as a CAD Technician: Project was the rehabilitation of Hidalgo Protective Levee (Phase II). Responsible for project creating sheets and do redlines for the engineer in charge of the project. Sheets consist of Project Layout,Alignment Data, Alignment Data, Plan and Profile, Flood wall Plan and Profiles and Details.

IBC, Donna-Rio Bravo International Bridge, Hidalgo County,Donna, Texas – Served as a CAD Technician: Project was the Construction of the Donna-Rio Bravo International Crossing.Responsible for project creating sheets, calculating sanitary sewer flows and do redlines for the engineer in charge of the project. Sheets consist of Project Layout, Plan and Profile.

Utilize AutoCAD and Civil 3D to develop and update engineering plans,profiles, sections, and details for land development projects. Prepared construction documents for permitting and issuance, and coordinated the design team as Project Engineer ensuring compliance with relevant regulations and client satisfaction. Performed hydro logic and hydraulic analysis for TxDOT and County Bond Projects utilizing Civil Geo, HEC-RAS and HEC-HMS to adequately design the drainage improvements Lead Drone Aerial Surveying pilot M2E is a multi-disciplinary firm with special interest in water resources, drainage infrastructure, land development, sanitary sewer, water and street design. Have designed and construction managed residential, commercial and municipal projects. Coordinated with clients and regulatory entities as the main point of contact for various engineering projects, ensuring timely delivery and compliance with project specs and regulations.

TECHNICAL APPROACH

M2E utilizes all of the latest engineering technology and stays current with new products in order to devolved & prepare a quality service the city of Edinburg will approve and recognize. By having the latest engineering programs, such as our licensing of Programs like Civil GEO to generate hydraulic and hydrology drainage models. Our extensive experience in public infrastructure projects provides a vital component in the success by managing projects without any major delays. We believe M2E's engineering team; can provide the City of Edinburg a high quality product that will benefit the future growth of the City.

We have learned that communication is the key to managing projects effectively to ensure work is of the highest quality and is completed on time and within budget. At the beginning of each project, we clearly establish construction work schedules; identify key activities, completion dates and team procedures for communication, information distribution and reporting. On a monthly or bi-weekly basis, we will circulate a project status report to the City to update progress on the work. M2E will engage with a team to follow through to achieve goals through organization, prioritization, and time management. The project status brief describes all on-going construction activities that have been completed and what construction activity needs to subsequent in order to achieve project objectives on time.

These aforementioned phases and more will be used to help assure the City of Edinburg's success for projects. M2E anticipates challenges and plans for them utilizing effective problem-solving models.

By recognizing constraints, identifying and developing courses of action, analyzing each to determine its fit within requirements and preparing design parameters are actions needed provide the most effective & finest service without delays to the City of Edinburg's and its community.

M2E current workload is currently at a 45% capacity and has the capacity & key personnel to fulfill the professional engineering services requirements to City of Edinburg and is prepared to commence upon selection.

Services to be provided by M2E to the City of Edinburg include, but not limited to:

- Renovations & Additions
- Easements
- Utility Adjustments
- Erosion and Sediment Control Design
- TCEQ Coordination
- Utility Infrastructure Evaluation & Improvements
- Plans and Specifications
- Bid Preparation
- Construction Management
- Drainage Design
- Environmental Information Documents
- Field Investigation and Data Collection
- Feasibility Evaluation & Alternative Analysis
- Utility Coordination
- Attend City Commission Meetings
- Design Development & Cost Estimating
- Project Development
- Facility Analysis & Master Planning
- Roadway & Drainage Design
- Plans, Specifications & Estimates (PS&E) Prep

SECTION 3.4

All work performed by M2E will adhere to the design standards set by the City of Edinburg and any other relevant guidelines, ensuring that the format meets the requirements of the owner and reviewing/funding agencies. Our systems and processes are designed to engage our staff and community stakeholders, fostering a clear, specific, and actionable shared vision.

PERSONNEL EFFORT / METHODOLOGY

Typical Project Personnel Effort are as follows:

TASK 1 – PLANNING, DATA COLLECTION, STUDY AND REPORT PHASE

1. Set-up a project startup meeting with the Owner's staff to review the project requirements and gather all pertinent data.
2. Determine all data collection needed for the proposed project needs, and collect as needed such as: Mapping, Survey Topography, GIS Mapping, and previous experienced data available.
3. Determine several alternatives for feasible approach.
4. Perform reconnaissance of project area and gather engineering and physical data.
5. Contact all appropriate state, federal and local agencies for permit process, time schedule and other requirements needed.
6. Determine feasible process, by performing a Preliminary Engineering Feasibility Report to develop a final approach to achieve the project needs.
7. Assist, if needed, with State or Federal funding applications to fund the proposed project.

TASK 2 – ENVIRONMENTAL INFORMATION DOCUMENT (EID) (IF NEEDED)

1. State and Federal Agency Coordination if required.
2. Environmental Information Document (EID), as per funding agency requirements. Provide alternative to the Proposed Action, Project Description, Environmental Impacts, and Appendices.
3. Acquire Environmental Clearance by Funding Agency, if needed.

TASK 3 – PRELIMINARY PHASE

1. Meet with the Owner's personnel and relevant parties to gather information and coordinate the project.
2. Consult with sub-consultant regarding engineering requirements for boundary and topographic survey of project area.
3. Consult with sub-consultant regarding Land Parcels, Right-of-Ways, etc., that will be needed for the execution of the proposed project and authorize Engineer and its sub-consultant to proceed with all collection of data and survey needed for purchase or exchange of property in association with the Owner, staff, legal department necessary for the acquisition of the proposed properties and/or Row's.
4. Determine Vertical Points needed and elevations that will be utilized for design. Survey the number of parcels needed for the proposed alignment.
5. Survey Hydro-excavation Points needed for design of the project (if needed).
6. Initiate state and local permits needed for design and construction.
7. Analyze the survey of existing utilities that will be affected by any excavation.
8. Coordinate with owner for soils investigation if deemed necessary and provide documentation of needed geotechnical information for generating reports to be utilized for design.
9. Develop preliminary construction plans/profile of project.
10. Submit preliminary engineering plans and profiles to the Owner and other affected entities for preliminary approval of proposed improvements.
11. Prepare engineering report(s), plans, and cost estimates to the Owner for consideration.

PERSONNEL EFFORT / METHODOLOGY

TASK 4 – DESIGN PHASE

1. Analyze detailed surveys of existing underground and overhead utilities within the project.
2. Consult with the utility companies for their consideration of all utility data found. Provide construction plans to the utility companies
3. Provide design for the proposed project utilizing submittals in 30%, 60%, 90%, and Final Plans.
4. Prepare detailed specifications and contract drawings for construction of the proposed project in coordination with City of Edinburg Utilities Department staff and legal requirements associated with construction of the project.
5. Prepare detailed cost estimates and proposals, which will include bid items and quantities based on unit price system of bidding.
6. Furnish the necessary copies of the approved plans, specifications and proposals to the Owner.

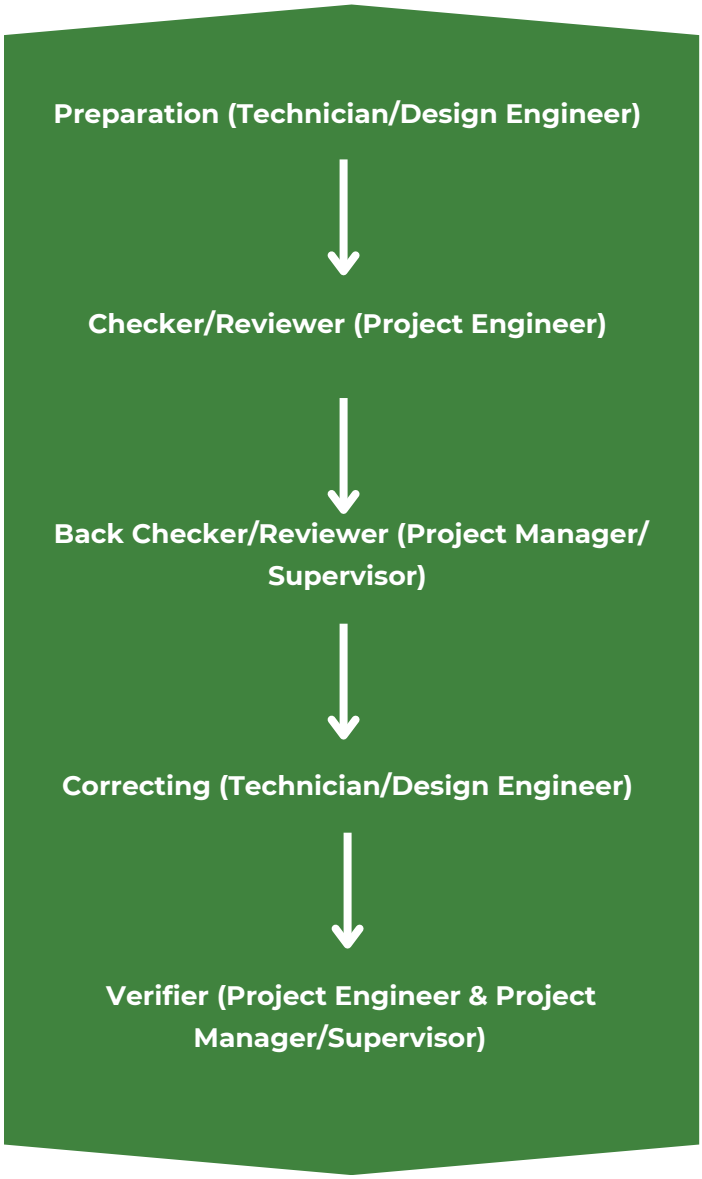
TASK 5 – BIDDING/NEGOTIATING PHASE

1. Assist the Owner in the advertisement of project for bids.
2. Assist the Owner with any addendum required during the bidding process.
3. Assist the Owner in the opening and tabulation of bids.
4. Analyze the bids and make recommendations for the award of the construction contract.
5. Assist in the preparation of formal Contract Documents with the Owner.

TASK 6 – CONSTRUCTION

1. Provide periodic construction supervision by a licensed Engineer and/or full-time Resident Project Representative.
2. Review shop drawings/submittals.
3. Prepare change orders due to unexpected conditions encountered.
4. Prepare monthly estimates of work performed by Contractor.
5. Assist with pay requests

TASK 7 – PROJECT CLOSEOUT



1. Provide final project close-out.
2. Prepare record documents
3. Project Warranty documents

QUALITY ASSURANCE

M2E hands on approach and understanding that delivering on-time projects to the City is key but also upmost importance is quality, and the only way to deliver quality is by implementing QAQC guide/program to ensure the highest product to the City of Edinburg.TX.

This quality assurance program helps detect design errors prior to finalizing construction plans in compliance with City and/or funding agency project requirements. This program goes to a vary of steps before design plans are considered 100%, such as Project Engineer performing 1st step check/reviewing, Project Manager performing 2nd step known as back checking/reviewing, 3rd step design engineer if in agreement with possible mark-ups will correct design plans, and 4th step & final step will be the sealing engineer performing as the verifier and confirm all corrections have been incorporated or otherwise addressed. M2E's QAQC program is key to ensure the product provided to District each and every time is to its highest potential.

As previous mentioned, communication is the key to managing projects effectively and ensuring the work is of the highest quality and completed within the proposed project schedules throughout all phases of the project. In order for QAQC program to operate to its fullest potential, an overall project schedule is devolved with key milestones and deliverables.

Re: Professional Services Agreement: City of Edinburg: Community Development Block Grant - Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements

To Whom it may concern:

We have thoroughly reviewed the Professional Services Agreement for the City of Edinburg, Community Development Block Grant - Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements project.

M2 Engineering, PLLC., confirms that we meet all prerequisite insurance requirements as outlined in the agreement. Furthermore, if selected for this project, we agree to enter into and fully comply with the terms and conditions specified in the Professional Services Agreement.

We look forward to the opportunity to collaborate on this important project and contribute to the community's resilience and infrastructure improvement.

Thank you for considering our qualifications and proposal.

Sincerely,

Emigdio “Milo” Salinas, P.E.
President

Edinburg, Texas 78541

Ref: Community Development Block Grant-Disaster Recovery (CDBG-DR)
Chapin Pumps Rehabilitation Drainage Improvements
RFQ No. 2024-3

Dear Mr. Hinojosa,

The management and professional staff of **Melden & Hunt, Inc.** would like to present you with our Statement of Qualifications to provide Professional Engineering Services to the City of Edinburg. Our objective in submitting this Statement of Qualifications is to show you that our firm should be selected as project engineer for your state grant funded project.

Melden & Hunt, Inc. has a proven track record of delivering top-quality water, utility and roadway infrastructure projects on schedule, within budget, and tailored to the unique needs of each client. As a multi-disciplinary consulting firm, we specialize in civil engineering and land surveying services. Our clients include federal and state government agencies, local municipalities, school districts, irrigation districts, water utility districts, gas companies, and numerous private sector developers throughout the South Texas region.

We are proud to offer our clients unparalleled expertise and a diverse range of professional talent, difficult to match anywhere. Our team includes over 60 engineers, surveyors, project managers, field inspectors, CADD designers, survey technicians, and administrative support personnel based in our Edinburg office. Given our current workload, we are well-positioned to provide the City of Edinburg with the resources needed to rapidly deploy and meet an aggressive project schedule as many grants require.

At Melden & Hunt, Inc., we prioritize effective communication. We emphasize close coordination with our clients to ensure their objectives are met. This process typically involves comprehensive information gathering and client involvement at all levels, from operations to management. We then evaluate and select the best systems, considering the unique conditions of each client and project, along with technical, economic, environmental, and political concerns.

Selecting Melden & Hunt, Inc. offers the City of Edinburg several distinct advantages:

- A firm with tremendous engineering experience in *grant funded projects*.
- A firm with the capability to perform all aspects of municipal projects.
- A firm with a strong reputation, professional integrity and competence.

- A firm with the professional background and understanding of working with the City.
- A firm with the technical resources and expertise to meet an aggressive project schedule.
- A firm who is truly local and is extremely familiar with the geographical area.
- A firm with an intensive focus on maintaining a valuable relationship with the City.

We look forward to the opportunity to working with the City of Edinburg, once again. If our firm is selected, I will serve as your Project Principal/Chief Project Engineer. All project coordination and related functions will be managed through my office and staff. My personal relationship with you and your team, combined with the full resources and talents of Melden & Hunt, Inc., will ensure timely project progress and success.

For specific communication for this RFQ, contracting details, or contract binding please feel free to reach out to myself or Mike L. Hernandez, Vice-President, his contact details are below. We are both authorized agents of the firm, empowered to respond to RFQs, negotiate and bind contracts.

Also, please note that we have not received any addendums to this RFQ.

In closing, I would like to thank you for the opportunity to submit this qualification packet. We are excited about the City's upcoming Chapin Pumps Rehabilitation Drainage Improvements project. And I am confident that Melden & Hunt, Inc. can provide the engineering services that will best meet your needs and exceed your expectations. If you have any questions or comments, please feel free to contact me at 956.381.0981.

Sincerely,

Ruben James De Jesus, P.E., R.P.L.S.
Vice-President

Firm Qualification & Experience

OUR INSIGHT. YOUR SUCCESS.

Melden & Hunt, Inc. is a civil engineering and land surveying firm built on a legacy of personalized client service, superior technical execution, and a dedication to delivering our client's vision. Our goal is to listen and truly understand our clients' needs and objectives better than any other engineering consulting firm, and to exceed their expectations. Melden & Hunt has a very flexible team with a lot of depth. We will draw on our team's resources to provide you with the personnel required for completing this improvement project.

Firm Qualification & Experience Continued

Melden & Hunt, Inc. (MHI) was established in 1947 and has provided engineering and surveying services throughout the Rio Grande Valley-South Texas area for 77-years. Melden & Hunt, Inc. is one of the largest local engineering consulting firms in the Rio Grande Valley. Our clients have the benefit of decades of engineering surveying experience in a wide range of technical disciplines. Since MHI clients generally have distinct needs, we offer a wide range of engineering services including highway, right-of-way, waterworks, environmental, drainage, irrigation and structural engineering, surveying, street, bridge, utilities, water and wastewater treatment plant design.

Melden & Hunt, Inc. has assembled a project team of engineering and surveying professionals with the proven experience to efficiently and successfully complete and submit the services requested by the City of Edinburg. These representatives are all full-time members of Melden & Hunt, Inc. staff. Not only does this team bring to the project the professional background for completing projects of your nature, but this team also possesses the relationship and experience of working with TXDOT, HCID No. 1, HCDD No. 1, Texas Gas Service, American Electric Power, Time Warner Cable, AT&T and other utilities that impact your projects. Our team of professionals will work out of our Edinburg office to serve as our base of operations and will actively participate in any questions and/or consultation requested by the City of Edinburg.

With a well-equipped, main office in ***Edinburg, Texas*** this permits us to respond to the City's needs quickly, and easily access any area in the city limits within minutes. ***In Edinburg, our project volume is intentionally kept modest to effectively manage future projects with the City of Edinburg. Our workload capacity far exceeds your project requirements and Melden & Hunt, Inc. typically operates at around 65%-70% of our total workload capacity. The workload backlog varies from month to month but Melden & Hunt, Inc. has plenty of capacity to get the job done. Your projects will be adsorbed in our normal business cycle and will not have a measurable impact on our percentage of capacity (65%-70%) throughout the duration of a one- or two-year contract. While we enjoy a healthy backlog of work; moreover, we have more than enough capacity to complete this project on time and still meet any existing or unknown future assignments. With a dedicated team of over 60 professional who are each very flexible, we are well-equipped to address any part-time staffing requirements elsewhere. In additional to Mr. Ruben James De Jesus, P.E., R.P.L.S., Vice-President, Project Principal, the remainder of the proposed team is full-time and will be fully committed to this project. If needed, we will draw on our entire team's resources to provide any additional staffing requirements plus any additional resources necessary for completing any assignment issued to us. Consequently, Melden & Hunt, Inc. has the personnel to assure that adequate replacements are available during periods of sickness, attrition, or increased workload.***

Firm Qualification & Experience Continued

Since Melden & Hunt, Inc. clients generally have distinct needs, we offer a wide range of engineering and surveying services listed below, but not limited to:

Civil Engineering	Land Planning	Water & Wastewater
Bridges	Commercial Development	Odor Control
Capital Improvements Planning	Commercial Facilities	Pumping Facilities
Drainage & Storm Sewer	Industrial Development	Sewer System Evaluation
Environmental Site Assessments	Industrial Facilities	Sewer System Rehabilitation
Feasibility Studies	Institutional Facilities	Water System Evaluation
Irrigation	Multi-Use Development	Water System Rehabilitation
Park Planning & Design	Master Planning	Wastewater Treatment Plants
Paving Design	Residential Development	Wastewater Collection Systems
Roads & Streets	Zoning	Water Treatment Plants
Sanitary Sewer		Water Distribution Systems
Site Grading and Drainage		
Site Planning		
Structural Inspections		
Transportation	**Environmental**	**Surveying & Mapping**
Bicycle & Pedestrian Facility Development	Assessments & Audits	As-Built Survey
Minor Roadway Design	Corrective Action	ALTA Survey
Major Roadway Design	Environmental Protection Plans	Boundary Survey
Minor Bridge Design	Geotechnical Investigations	Construction Staking
Roadway Construction Management	Litigation Assistance/Support	Design & Construction Survey
Roadway Construction Inspection	Natural Resource Management	Geographic Information Systems
Traffic Engineering Studies	Pollution Prevention Plans	Horizontal & Vertical Control-Aerial Mapping
Transportation Planning & Design	Recycling & Resource Reuse	Improvement Plats
	Regulatory Compliance	Investigative Survey
	Site Investigations Ph. I & II ESA	Land Title Survey
	Sediment Detention Control	Legal Descriptions

	Soil/Water Sampling Plans	Location Survey
		Metes and Bounds Descriptions
		Parcel Plat Surveys
		Parcel Sketches
		Realtime & Static GPS
		Ranch Surveys
		Right-of-Way Survey
		Route Survey
		Standard Survey
		Topographic Survey

As you can see, Melden & Hunt, Inc. is a diversified company with a broad range and depth of expertise in a variety of specialty areas that give us major project capabilities. Unlike many, Melden & Hunt, Inc. has the flexibility to adapt our resources from large multi-million-dollar projects to typical day-to-day engineering and surveying

With the depth and resources of a large local firm, complemented by our close-knit team of experienced professionals, Melden & Hunt, Inc. is highly regarded by its clients and among its peers in the civil engineering and surveying field as one of the finest.

Firm Qualification & Experience Continued

Melden & Hunt, Inc. uses the latest technology and equipment to accomplish its project work. Our staff is each provided a computer and has access to the information technology network to conduct ongoing business. Our computers are upgraded to the latest current standards in technology on an annual basis. In addition, Melden & Hunt, Inc. owns much of the equipment that is required to do fieldwork projects. However, we do have vendors with which we have established long term relationships that routinely supply equipment that either we do not own or that is required to meet an unusually restrictive schedule.

Melden & Hunt, Inc. maintains an extensive CADD and GPS System with dedicated workstations used to produce all of our design work. We maintain Autodesk Civil 3D, Bentley WaterCAD, Bentley SewerCAD, Bentley MicroStation and ESRI ARCView licenses. CAD applications are supported MS Windows (all versions) and can be easily upgraded to any platform. Our office is networked through high-speed communication lines that allow integrated file sharing, plotting and data management.

With internet access at your fingertips, Smartphone's and iPad's have opened a new and exciting opportunity for cost effective communication. Melden & Hunt's web site (WWW.MELDENANDHUNT.COM) will serve as a communication hub for the City of Edinburg. The site will allow representatives of the city to communicate with Melden & Hunt, Inc., download or view reports, drawings, schedules, project photos, budgets, schedule project meetings to name a few. We have effectively used our web site for clients such as City of Mission, City of Hidalgo, City of Elsa, North Alamo Water Supply Corporation, Texas Gas Service and others.

The following displays Melden & Hunt's equipment resources, and it is safe to say that this equipment allows us to get the job done professionally and effectively:

Computer Hardware

We have 15 CAD setups which include:
Dual 20" Monitors
Computer Software
Windows Professional 64 Bit
Microsoft Office 365 64 Bit
AutoDesk Civil 3D 2020 64 Bit
Bentley WaterCad
Bentley SewerCad
Bentley MicroStation
ESRI Arcview

Firm Qualification & Experience Continued

At Melden & Hunt, Inc., we believe that any proposed infrastructure project must be constructed so as to assure the most efficient utilization of resources such as, money, materials, energy, and work force in meeting the project goals. Melden & Hunt, Inc. uses a team of experienced professionals working under the direction of a Project Manager. Melden & Hunt, Inc. fully expects to coordinate and communicate its activities on the project with the City of Edinburg to ensure the requirements of the project are met now and in future development, and to assure the City that project completion will be on a cost effective and timely basis. Each phase of the project will require detailed analysis to effectively engineer solutions for the proposed improvements. Alternatives will be developed which take advantage of specific strengths and minimize problem areas.

After the City staff input, the best alternative will be selected and developed into plans and specifications. Melden & Hunt, Inc. will work closely with the City of Edinburg in coordination of project design to meet their standards.

Melden & Hunt, Inc. has completed many rural utility projects and is experienced in the necessary coordination between the governmental entities, affected property owners, utilities, cable companies, telephone companies, power companies, and the Texas Department of Transportation, drainage and irrigation districts. A successful project depends on the entire engineer's attention to detail to assure project goals are achieved and citizen's needs are met.

Therefore, Melden & Hunt, Inc. has developed a Work Program that takes advantage of our experience with existing conditions, recent improvements, and familiarization with the project area.

The Work Program is as follows:

I. ANALYSIS

A. Utility Staff Coordination and Input
B. Existing Conditions Research
C. Future Improvements Consideration
D. Concept

II. ALTERNATIVE DESIGN

A. Preliminary Field Work
B. Development of Alternatives
C. Utility Staff Review
D. Cost Guidelines

III. FINAL DESIGN

A. Construction Documents (Plans, Specifications, Estimates)
B. Permits and Approvals
C. Right-of-Way Plats and Descriptions

IV. CONSTRUCTION ADMINISTRATION

A. Routine Inspection
B. "As-Built" Drawings

Firm Qualification & Experience Continued

Melden & Hunt, Inc. believes this project should be conducted in four distinct phases:
Phase 1 - Preliminary Design
Phase 2 – Final Design
Phase 3 - Construction
Phase 4 - Post Construction.

The following is an outline of the scope of work that we will perform on this project:

Phase 1 - Preliminary Design

The purpose of preliminary design is to establish current and future infrastructure requirements. During this phase we can help the City establish various alternatives and plans for meeting existing and anticipated needs within the scope of the project. Melden & Hunt, Inc. will work closely with staff in this planning effort, which will culminate in the preparation of a preliminary design report summarizing and presenting the selective alternative in detail.

Phase 2 – Design

The purpose of this phase of the project is to prepare the necessary construction drawings and specifications, bidding documents, cost estimates and schedules required constructing the proposed improvements. Further, Melden & Hunt, Inc. will assist the City in bid analysis and make recommendations regarding the bid award. We will use computer-aided drafting and design throughout the project.

Phase 3 – Construction

The firm will provide conventional services during each construction contract comprising the project. The services will include general services during construction, resident project representation (if requested), and preparation of record drawings. General services during construction will include but not necessarily be limited to:

1. Notice to Proceed.
2. Conduct pre-construction meetings.
3. Regular inspections to review the progress and character of the work being accomplished.
4. Provide for testing of construction materials.
5. Review periodic payment estimates of the contractor for completed work.
6. Review and approve shop drawings and any necessary change orders.
7. Provide interpretation of the plans and specifications and contract requirements required.
8. Provide guidance to onsite representatives observing the daily progress and construction activities.
9. Conduct regular progress review meetings with contractor and owner.
10. Provide as built or as constructed drawings of the complete facilities.
11. Provide any other related services associated with the engineers' design as applied to construction progress and as required by the owner.

Phase 4 - Post Construction

Upon acceptance of the construction contracts, Melden & Hunt, Inc. will provide all professional services necessary to assist the City of Edinburg with placing the industrial park in operation. We will assist the City in evaluating the performance of the facilities and will represent the City in warranty disputes.

Wastewater Water Treatment Plant Lift Station and Headworks Structure Phase II
Wastewater Water Treatment Plant Carousel, Clarifiers, UV System and Belt Press III

Services Performed: Planning, Design, Bidding, and Construction Administration

Project Funding:	Phase II – TWDB - CWSRF
	Phase III – Self-funded
Total Project Cost:	Phase II - $5,850,000
	Phase III - $14,322,900
Project Date:	Phase II –August 2008 thru December 2011
	Phase III – February 2010 thru October 2013

Project Description Phase II: This project provided for certain improvements to the wastewater treatment plant, The project included construction of a new plant lift station, new headworks station (screening, degritting, flow division, flow measurement functions), and other miscellaneous appurtenances and yard piping necessary to connect to existing treatment facilities. The construction cost was $5,386,537. (Finalized and Constructed)

Project Description Phase III: This project provided for a 5.6 MGD expansion to the treatment capacity of the plant. The project included the construction of a carrousel aeration basin, two clarifiers, a return and waste activated sludge pumps station, parshall flume flow measurement, ultraviolet light disinfection system, post aeration system, solids processing building with a 2-meter belt filter press, and other miscellaneous improvements necessary to consolidate the existing plant with the new additions. The construction cost was $13,336,000. (Finalized and Constructed)

Team Member Qualifications & Experience

Melden & Hunt, Inc. has assembled a project team of engineering professionals with the proven experience to efficiently and successfully complete and submit the services requested by the City of Hidalgo. These representatives are all full-time members of Melden & Hunt, Inc. staff. Not only does this team bring to the project the professional background for completing projects of this nature, but this team also possesses the relationship and experience of working with the City of Hidalgo. Our team of professionals will work out of our Edinburg office to serve as our base of operations and

Melden & Hunt, Inc. has designated ***Mr. Ruben James De Jesus, P.E., R.P.L.S.*** as the Project Principal/Chief Project Engineer. He will develop a work plan and be responsible for scheduling and performance of all work associated with your project. Mr. De Jesus along with the project team will function as an extension of your staff to exceed your performance objectives and to respond to your needs. He will be responsible for project management and will select the appropriate personnel from our staff based on the requirements of the tasks needed. He is also committed to engaging all the necessary resources to expedite the proposed project. Mr. De Jesus will actively participate in any questions and/or consultation requested by the City of Hidalgo. He is based out of our Edinburg office, which serves as our base of operations for the entire team.

Furthermore, Mr. De Jesus will provide his project understanding gained through more than 10 years of engineering experience from various clients in South Texas. Also, he will ensure that key project staff members will be active participants committed to the project and that they will have available to them the support staff and technical resources necessary for successful results.

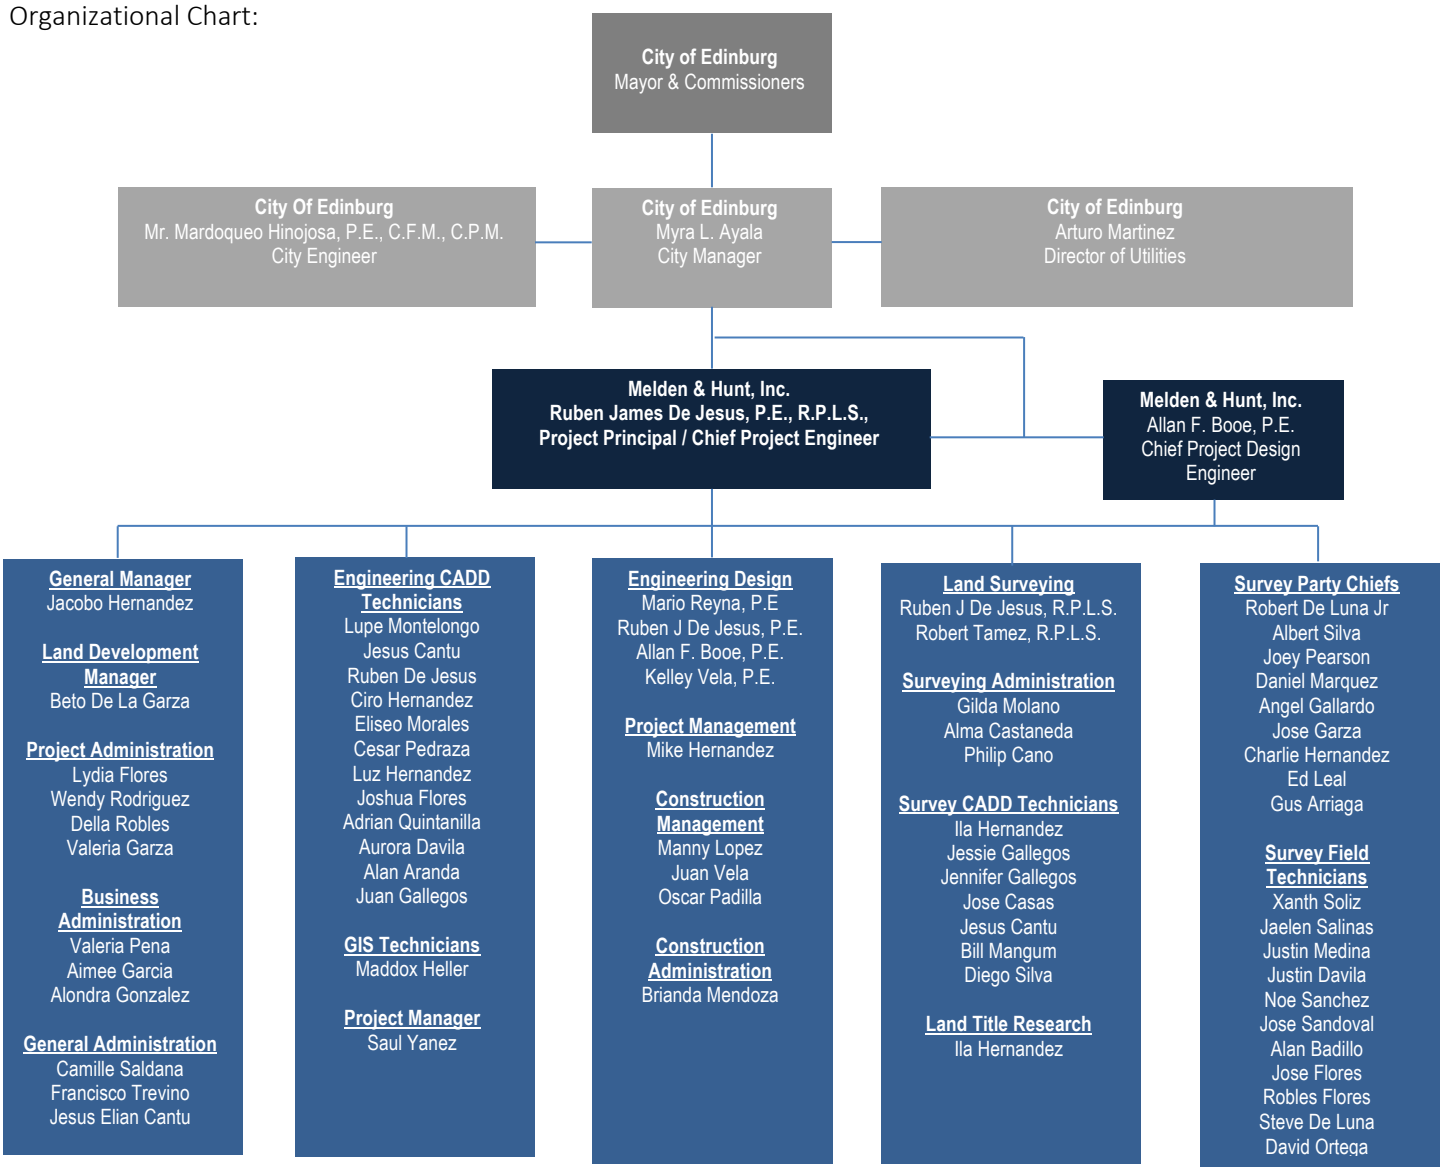
Melden & Hunt has a very flexible team with a lot of depth. We will draw on our team's resources to provide the staff described previously, plus any additional resources required for completing your project.

Our wide range of professionally registered and certified staff to deliver the efficiency and competency our clients deserve. We help our clients by providing them with a direct connection to team members ensuring communication and responsiveness to their projects. Our technical staffing resources ensure quality work products are produced on time and within budget for all our clients.



Proposed Project Organziation Team Leads:

Name	Project Role
Ruben James De Jesus, P.E., R.P.L.S.	Project Principal and Chief Project Engineer
Allan F. Booe, P.E.	Chief Project Design Engineer
Mike Hernandez	Assistant Project Manager
Lupe Montelongo	Chief Design Technician
Jesus Cantu	Design Technician
Manny Lopez	Construction Inspector

Team Member Qualifications & Experience Continued

Our proposed Project Organization is shown below. Our team is led by ***Ruben James De Jesus, P.E., R.P.L.S.***, and Project Principal/Chief Project Engineer. Mr. De Jesus is one of the most seasoned engineers in the Rio Grande Valley with over 12 years of engineering and surveying experience. The given organizational chart shows other key professionals that will have responsibility for individual project tasks. All of these individuals will report up through Mr. De Jesus who will hold management and decision-making responsibility for this project. As mentioned before, Mr. De Jesus will be responsible for committing the human and equipment resources required to successfully meet the city's schedule and needs.

Organizational Chart:

Personnel

Ruben James De Jesus, P.E., R.P.L.S.

Present Position
Principal In Charge
Lead Project Engineer

Professional Registration
Licensed Professional Engineer
Texas No. 126282

Licensed Professional Land Surveyor
Texas No. 6813

Education
University of Texas Pan American
BS Civil Engineering, 2011

Areas of Expertise
Wastewater Treatment Design
Water Treatment Design
Collection System Design
Distribution System Design
Lift Stations
Permitting
Construction Administration
Construction Management
Hydraulic Modeling
Project Funding
Pump Selection
Grading
Drainage

Mr. De Jesus, started his civi engineering career at Melden & Hunt, Inc. after graduating from the University of Texas at Pan American. He has designed and managed many types of Civil Engineering projects and has extensive background in surveying. He has been responsible for studies, designs and management of public and private sector projects throughout the South Texas region. He is proficient in scheduling and coordinating large public and private projects and has worked on a wide range of federal, state and local infrastructure projects.

As a Lead Engineer, Mr. De Jesus will develop a work plan and be responsible for scheduling and performance of all work associated with this proposed project. He will function as an extension of your staff to exceed your performance objectives and to respond to your needs on short notices. He is also committed to engaging all the necessary resources to expedite this proposed project. He will work out of our Edinburg office to serve as our base of operations and will actively participate in any questions and/or consultation requested by the District.

North Alamo WSC Hidlago County
Plant No. 1 HSP Improvement Project

Personnel

Allan F. Booe, P.E.

Present Position
Chief Design Engineer

Professional Registration
Licensed Professional Engineer
Texas No. 57738

Education
Texas A&M University, College Station
BS Civil Engineering, 1979

Areas of Expertise
Wastewater Treatment Design
Water Treatment Design
Collection System Design
Distribution System Design

Texas Parks and Wildlife
Texas Historical Commission

Mr. Booe, has extensive experience in the design, maintenance, and operation of water and wastewater treatment plants and their related appurtenances. He specializes in the engineering design and management of Melden & Hunt's water and wastewater utility projects.

What is more, he has over forty-five (45) years of engineering experience primarily with treatment plants, water distribution and sewer collection systems.

He served as Utilities Director for McAllen Public Utility for four (4) years. He has been the chief engineer on the design and construction of numerous water and wastewater treatment plant projects throughout his career including Mission's North Water Treatment Plant, Edinburg's West Water Treatment Plant, North Alamo's Delta Regional Water Treatment Plant, Mission's Wastewater Treatment Plant, Hidalgo's Wastewater Treatment Plant, Rio Grande City Wastewater Treatment Plant, Elsa's Wastewater Treatment Plant and North Alamo's Wastewater Treatment Plant. His experience includes a wide variety of projects including rehabilitation, expansion and new construction.

More important, Mr. Booe has been successful in obtain funding for many of these projects using the Texas Water Development Board and USDA Rural Development.

North Alamo WSC Hidalgo County
Plant No. 7 Reservoir Improvement Project

Personnel

Michael Hernandez

Present Position

Project Manager

Education

University of Texas Pan American-Marketing
South Texas Community College-Business Management

Mr. Hernandez's professional career started with Melden & Hunt, Inc. as a project manger twenty-two years ago. He is responsible for the supervision of water, wastewater, irrigation, and various other civil design projects. His primary focus is to provide the utmost satisfaction to the client, ensuring projects are complete with the allocated period or time and within the budget that has been assigned.

He operated under a certain degree of automy using engineering staff and resources allocated to him to provide top quality service to the client.

Mr. Hernandez's water and wastewater project managment experience has been with the North Alamo Water Supply Corporation where he was part of a design team preparing plans and specifications for the expansion to the Delta Regional Water Treatment Plant and Water Distribution System, Victorias Road Water Treatment Plant, North Weslaco EDAP Colonias Sewer Treatment Plant and Collection System. In addtion, he was part of a second design team who worked on the expansion to City of Mission Sewer Treatment Plant.

Mr. Montelongo has over 45 years of diversified engineering experience. His career has touched virtually every facet of water and wastewater systems, land development, surveying, transportation and public works projects. His experience includes design and construction inspection, administration and documentation. He is proficient in scheduling and coordinating public and private project and has worked with a wide range of federal, state and local infrastructure projects. In addition, he assists project engineers administer projects during the design, bid and construction. He makes review of all shop drawing and works with the contractors on the interpretation of drawings.

Furthermore, Mr. Montelongo is particularly strong in his knowledge of electrical, instrumentation, and control systems. In addition to his talents as a design and construction inspector, Mr. Montelongo is also a certified water and wastewater treatment plant operator, so his vision and efforts are consistent with operating personnel.

1. Military Parkway Roadway and Drainage Improvement Project - City of Mission & Hidalgo County

Client: City of Mission & Hidalgo County
Contact Person: Mike Perez, City Manager
Telephone: 956.580.8650
Location: Mission, Texas

Professional Services: Planning, Environmental, Right-of-Way Acquisition, Surveying, Design Phase Service, Bid Phase Services, Construction Administration and Inspection.

Melden & Hunt, Inc. was hired by the City of Mission to plan, design and construct Military Parkway being a 3.5-mile, 150.0-foot road right-of-way located south of Mission beginning on Bates Road and ending on Inspiration Road. Total Cost for the project amounted to approximately $2 million.

As part of Bentsen Palm Development, Military Parkway was also created for the initial corridor of the Hidalgo County Southwest Loop for which it has been adopted by the Hidalgo County Metropolitan Planning Organization.

The project consisted of designing and constructing a 4-lane divided highway to serve as major east-west thoroughfare in the City of Mission, as well as access to the Anzalduas International Bridge. Currently the north bound lane is constructed and being used as a 2-lane rural roadway. The south bound lane will be constructed during the construction of the Southwest Loop. Upon the full completion of Military Parkway, the road will consist of four 12-foot lanes, two 10-foot shoulders, two 4-foot shoulders and two 20-foot bar ditches for drainage, with a 34-foot median. Drainage improvements include the installation of storm sewer lines and drainage channels adjacent to the roadway pavement. Other improvements included the installation of sidewalks and landscaping, asphalt pavement markings, signage, waterline and irrigation utility relocates.

A key component to the success of the project included extensive coordination with the City of Mission Public Works Department, City of Mission Utility Department, Hidalgo County Precinct No. 3, Texas Department of Transportation, United Irrigation District, Texas Gas Company, and Magic Valley Electric Cooperative. This roadway is open for public use.

2. North Alamo Water Supply Corporation – La Feria Water Well Project

Client: North Alamo Water Supply Corporation
Contact Person: Steve Sanchez, General Manager
Telephone: 956-383-1618
Location: La Feria, TX

Melden & Hunt Inc. has been contracted to plan, design, and construct a water supply project which included the construction of one public water well, a ground storage tank, and two high service pumps. Ancillary facilities included as part of the water supply project included a pump building, disinfectant feed systems, electrical, instrumentation and control. This project also required all site development work such as fencing, paving, grading, drainage, and landscaping.

Moreover, Melden & Hunt, Inc. collaborates with hydrogeologist Kevin Spencer on this project to design the municipal well. Together, we possess a wealth of expertise beneficial for the construction of municipal wells in the North Alamo service area. The estimated cost for this project is $1,200,000.

3. City of McAllen - McAllen Public Utility – 8.25 MGD Water Treatment Plant

Client: McAllen Public Utilities
Contact Person: Mark Vega, P.E., General Manager
Telephone: 956-681-1630
Location: McAllen, Texas

Melden and Hunt, Inc. was subcontracted for the construction of McAllen's new Northwest Water Treatment Plant. Melden and Hunt, Inc.'s role in this contract included the development, design, bidding, and construction administration for the construction of City of McAllen's 8.25- MGD Northwest Water Treatment Plant. The raw water facilities constructed included a canal intake, raw water piping, and a 200-million-gallon storage reservoir with intake structure. The main plant facilities constructed included a low lift pump station, a flocculation/sedimentation basin with chlorine dioxide disinfection chamber, dual-media filters, a transfer pump station, and associated yard piping. Sludge handling facilities that were constructed included a backwash equalization basin, a plate settler, lagoons, and a decant pump station. Ancillary facilities work included a chemical building and chemical feed systems, an electrical building, an operations building, grading, paving and drainage, and landscaping.

Professional Services Agreement

OUR INSIGHT. YOUR SUCCESS.

Melden & Hunt, Inc. has read the enclosed Services Agreement within the RFQ packet and will execute the proposed agreement upon receiving a work order. Melden & Hunt, Inc. commits to all required insurances, and we have a bonding capacity to meet any project. Melden & Hunt, Inc. will sign and administer all contracts, as needed.

Further, Melden & Hunt, Inc. has always been proud of its strength and ability to perform complex tasks. The overall entrepreneurial spirit of this company has been characterized by the ability and will to think differently and to find better, more future-oriented ways to generate value.

Melden & Hunt, Inc. reports good earnings for 2023. Along with many exciting projects, a solid financial position, and prospects for the future we have no doubt that 2024 will be the same.

It is important for the City of Edinburg to realize that Melden & Hunt, Inc. carefully manages its workload to minimize financial risk, never undertaking a contract without the proper resources to guarantee its absolute success; the firm is always investing in and maintaining its capital resources to keep up with the demands of its clients and the ever-changing world.

Melden & Hunt's business model has been to pursue work experience spanning nearly every conceivable sector of civil engineering and land surveying, and this unique diversity ensures our strength.

Melden & Hunt, Inc. is well positioned for future growth and together.with our experience and committed employees; this will give Melden & Hunt, Inc. an excellent opportunity to take on new challenges. That is why Melden & Hunt, Inc. wants for the City of Edinburg to rely on our firm for its engineering and surveying needs.

City of Edinburg
C/O City Secretary
415 W. University Drive
Edinburg, TX 78539

Dear City Secretary,

In response to the City of Edinburg's **RFQ #2024-3 " Community Development Block Grant-Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements"**, **R. Gutierrez Engineering Corporation** (**RGEC**) is pleased to present its qualifications. **RGEC** understands that the **City of Edinburg**'s (**City**) Engineering Department is currently soliciting sealed proposals from qualified vendors for Community Development Block Grant-Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements. Selected firms will be required to adhere to guidelines and code as set forth by International Building Code, Unified Development Code and City's Engineering Design Standards for assigned projects (unless otherwise instructed by **City** Staff)..

RGEC has an extreme interest and is fully committed to providing professional engineering and project management services for the **City**. I, Ramiro Gutierrez, PE, will be your point of contact for all communications pertaining to this RFQ. As principal in charge of the firm, I am fully authorized to bind the firm to a contract with the **City** and have checked and verified that there are no addendums to this RFQ.

RGEC is registered with the State of Texas as both an engineering and land surveying firm and as a **Historically Underutilized Business (HUB)** and **Disadvantaged Business Enterprise (DBE)**. **RGEC** is an equal opportunity employer and does not discriminate in hiring, promotion, treatment, or other terms and conditions of employment based on race, sex, national origin, age, disability, or in any way violate Title VII of 1964 Civil Rights Act and amendments, except as permitted by said laws.

Respectfully submitted this 30th day of July 2024.

Company: **R. Gutierrez Engineering Corporation**

Signature: 

Ramiro Gutierrez, PE
President

A. TRANSMITTAL LETTER

R. Gutierrez Engineering Corporation (**RGEC**) has prepared and included at the beginning of this Statement of Qualifications, a transmittal letter indicating our interest and commitment to perform professional engineering services for the **City of Edinburg**. All pertinent information as required by the RFQ has been provided.

B. FIRM QUALIFICATIONS & EXPERIENCE (Overall Qualification of Team)

RGEC is a fully staffed civil engineering and land surveying firm located in Pharr, Texas. The firm has been in business for 26 years, having begun operation in July 1998. **RGEC** is registered and licensed to practice in the State of Texas as **Engineering Firm Number F-486** and **Land Surveying Firm Number 101650-00**. The firm is fully equipped and staffed to handle most any civil engineering and land surveying task with ease. **RGEC** can provide services and has staffing able to cover the specialized categories listed below:

- Street Infrastructure Evaluation and Improvements
- Pavement Management and Improvements
- Utility Infrastructure Evaluation and Improvements
- Erosion and Sediment Control Design
- Water and Wastewater Evaluation and Improvements
- Structural Engineering (Improvements & Design)
- Hydrology & Hydraulics
- Environmental Engineering Services in accordance with 24 CFR Part 58 and the National Environmental Policy Act (NEPA)
- Civil Engineering

In addition, **RGEC** has performed as project manager or lead firm with consultants performing the following services as sub-consultants to **RGEC**:

- Structural Engineering (Improvements & Design)
- Environmental Engineering Services

RGEC understands that the services to be provided might include, but may not be limited to:

- General – A wide range of services may be required including, but not limited to:
  - Perform assigned duties and responsibilities upon issuance of Job Task Order or notice to proceed in accordance with the scope provided in such work order or notice or upon direction of the City's designee.
  - Work will consist of trades necessary to complete work as detailed in the construction documents, specifications and/or as directed by the City's Project Manager.
  - All work must comply with current codes in effect at the time of work and with all OSHA requirements. Appropriate safety and security of the construction site and related area, including staging area(s) and roadway(s) is required, and will be provided by the CM at no additional cost to the City.
  - Provide recommendations regarding construction feasibility, labor availability, material usage, time requirements and update completion date based on project plans, specifications, verbal instruction(s) or combination thereof.

- Prepare an Environmental Assessment in compliance with 24 CFR Part 58 and the National Environmental Policy Act (NEPA).
- Prepare cost estimates for alternative designs and material recommendations to improve project budget and its management.
- Prepare Guaranteed Maximum Price (GMP) to include any construction, material, labor, self-performed work and management cost, detailing each area of the proposal.
- Provide Value Engineering Services and make recommendations to assure compliance with GMP.
- Prepare/coordinate construction schedule for the Construction Team.
- Update schedules, activity sequences, and duration milestone dates as needed.
- Always provide site supervision during the requested services.

➢ Pre-Construction Phase
- Assist the City and the City's Professional Consultants during the scope development, preliminary design, and design development phases in evaluation of options for the project.
- Review environmental requirements using the Texas General Land Office (GLO) and US. Department of Housing and Urban Development HUD Exchange websites: https://recovery.texas.gov/grant-administration/technical-assistance/index.html https://www.hudexchange.info/
- Complete the Environmental Assessment using the attached template.
- Establish the master project schedule identifying all different phases and all milestone items.
- Develop a project budget and itemized Guarantee Maximum Price (GMP) upon negotiations with the City. The GMP shall include the substantial completion date of the project.
- Review and familiarize itself with all reports, surveys, drawings, tests and results concerning the condition of existing facilities, systems, structures, and sites.
- Work with and coordinate activities with any other contractors that the City contracts work with for the project.
- Review all applicable documents to ensure constructability and to minimize change orders.
- Review the project design to identify long-lead procurement items and equipment/materials which are eligible to be purchased by the City as direct material purchases.
- Coordinate with the City's Professional Consultants to finalize construction documents and develop bid packages.

➢ Procurement (Bids and Awards)
- Schedule and conduct pre-bid conferences with the interested subcontractors, material suppliers, and equipment suppliers.
- Assess conditions in the construction market to identify factors that will or may affect costs and time for completing the project.
- Identify and solicit multiple bid packages that together will represent the entirety of the scope of work for the project.
- Compile bid specifications and packages, utilizing City's bid procedures, obtaining bids for any and all construction, sub-contractor, material suppliers, including direct material purchases.
- Solicit, advertise, accept, review, and, based on approvals by the City, award bids to qualified subcontractors based on the bid packages identified.

- Construction Phase
  - Schedule and plan construction meetings, take and issue meeting minutes, and attendance sheets as directed by the City's Project Manager.
  - Coordinate with the Professional Consultants and IDA to schedule and conduct Pre-Construction meetings with subcontractors.
  - Plan and recommend timing for the release of drawings and specifications to enable phasing of construction project.
  - Maintain and update the master project schedule, detailed construction schedules, submittal schedules, inspection schedules, and occupancy schedules.
  - Provide materials to job site in a timely manner and assure their safe keeping, meeting the terms of the contract, adhering to project scheduling, and direct material purchase program.
  - Develop, implement cost controls, and provide financial accounting services for documentation of projects.
  - Coordinate on-site construction management services including, but not limited to:
  - progress job site meetings
  - maintain daily on-site project log and schedule report
  - oversee quality assurance testing and inspection programs
  - monitor construction management staff and subcontractor work performance for deficiencies
  - maintain record copy of all contract documents
  - coordinate requests for information (RFI) submittals
  - review adequacy of and oversee and ensure compliance with construction management staff and subcontractor safety programs and policies.

- Close-Out Phase
  - Assemble and deliver sufficient hard copies and electronic copies on USB/Flash Drive of closeout documents, parts and operational manuals, and repair and parts manual.
  - Coordinate project close-out, start-up and transition to operation
  - Coordinate completion of As-Built documents with City's Building Official and Project Manager.
  - Complete or coordinate completion of punch-list items generated by the City's Professional Consultant and the City's representatives during their inspections.
  - Coordinate with the City's Professional Consultant to provide complete Project records including Project Manual and CAD drawings corrected to show all construction changes, additions, and deletions compared to the Construction Document.
  - Coordinate with the City's Building Official to prepare the Certificate of Final Inspection.
  - Coordinate and conduct Building Warranty Inspections
  - Warrantee all workmanship and material for one (1) year following substantial completion.
  - Ensure coordination and implementation of equipment training for City staff.
  - Provide USB/Flash Drive for all project photos.
  - Project video record of any training provided to City's staff.

RGEC has extensive experience and has provided professional engineering services for multiple local government agencies on locally funded public works projects, federally funded construction projects, public transportation related projects, and projects located in this general region of the state for local government agencies. This past experience makes **RGEC** uniquely qualified to provide engineering services to the **City**.

RGEC is currently pre-certified by TXDOT in various work categories as listed in the following table.

TXDOT CERTIFICATIONS	
3.2.1	ROUTE STUDIES & SCHEMATIC DESIGN
4.2.1	ROADWAY DESIGN
4.4.1	FREEWAY INTERCHANGES
8.1.1	SIGNING, PAVEMENT MARKING, AND CHANNELIZATION
10.1.1	HYDROLOGIC STUDIES
10.2.1	ROADWAY HYDRAULIC DESIGN
10.3.1	BRIDGE HYDRAULIC DESIGN
11.1.1	ROADWAY CONSTRUCTION MANAGEMENT AND INSPECTION
15.1.1	RIGHT-OF-WAY SURVEYS
15.2.1	DESIGN SURVEY
15.2.2	CONSTRUCTION SURVEY

Additionally, **RGEC** specializes and has experience in the following types of engineering projects:

Transportation Services

- Streets & Highways
- Roadway Geometrics
- Signing & Striping
- Traffic Control Plans
- Traffic Signal Design
- Airport Design

Drainage Services

- Hydrologic Studies
- Hydraulic Design
- Storm Sewer Design
- Drainage Channel Design
- Detention Ponds
- Floodplain Mapping

Land Surveying Services

- Residential & Commercial Land Surveys
- Residential & Commercial Improvement Surveys
- Acreage Surveys
- ROW & Easement Parcels
- Topographical Surveys
- Construction Staking
- ALTA Surveys
- Elevation Certificates

Land Development Services

- Feasibility Studies
- OSSF Site Evaluations
- Drainage Studies / Reports
- Subdivision Plans
- Civil Site Plans

Subdivision Plat Processing & Reviews

Water Resources

- Water Distribution
- Wastewater Planning/Collection/Treatment
- Pumping/Lift Stations
- Storm Water Pollution Prevention Plans
- Pre-treatment Compliance
- Public Works
- Pumping/Lift Stations

Other Services

- Environmental Services
- Project Management
- Construction Phase Services
- Permitting
- Landfill Services
- Municipal Engineering

RGEC specializes and has provided professional engineering services for various clients in both the public and private sectors. The staff at **RGEC** has diversified experience in providing professional engineering services and over 1850 engineering and land surveying projects completed. **RGEC** can provide clients the expertise and innovation necessary to provide cost-effective solutions.

ABILITY TO MEET SCHEDULES & DEADLINES

RGEC is committed to providing the **City** with the attention it deserves. The firm has the capability to incorporate any project into its current schedule with ease. The firm is fully staffed and includes ***three (3) registered professional engineers and one (1) registered professional land surveyor***. With this amount of professional staffing, the firm is able to distribute the work strategically to enable work on multiple projects simultaneously. In addition, the firm's current workload is significantly less than the usual workload; thus, the firm finds itself ready and able to commence providing engineering services to the **City** immediately after negotiating an agreement. The approach and philosophy at **RGEC** is to have efficient management and quality control as part of every project. This approach enables **RGEC** to deliver services on time and within budget. At **RGEC**, "**quality**" is the responsibility of the entire staff. Management sets the "**quality**" standards and each team member works to achieve those standards.

A Quality Control Plan will be developed for each task. This plan allows **RGEC** to identify objectives and priorities as well as establish quality control policies and requirements for each team member. The plan also establishes schedules and milestones, scope of the work to be undertaken, and a working budget. The schedule will provide work sequences and review times of the work to be performed. **RGEC** will diligently pursue the completion of the task, as defined by the milestones and deliverable due dates outlined in the schedule. **RGEC** will attend meetings with the **City** to communicate all progress and to assist in the decision-making process as requested. **RGEC** will also assist the **City** at meetings with other entities as may be needed. **RGEC** will have regular meetings with the **City** to keep them abreast of the progress on the task.

The project manager will be responsible for all project coordination and communication with the **City's** appointed project personnel. Communications in the form of meetings, email, on-line communications, or telephone conversations will all be documented, and minutes or notes of these communications will be distributed to all interested parties.

Below is description of basic steps involved in developing a project. Construction inspection, construction management, and construction materials testing are not included but will be an important part of the professional services to be provided to the City of Harlingen.

Preliminary Engineering - Once the **City of Edinburg** is ready to commence a project, the Project Manager will coordinate with City officials to clearly determine the scope of the work to be undertaken. A preliminary project concept conference may be conducted if it is found to be beneficial. A topographic and possible right-of-way survey will be conducted to obtain the necessary information to begin the drainage analysis and design and to determine the available existing right-of-way. A geotechnical survey will be conducted to determine the condition of the existing soils for use in the drainage improvements design. A detailed hydrologic and hydraulic study will be conducted to determine volumes of storm water runoff to be managed. With this data,

the needed drainage improvements will be developed.

Alternatives for improvements will be developed for consideration and further refinement. Existing utilities will be identified and taken into consideration in the final design decisions. If acquiring right-of-way is found to be feasible, then preliminary right-of-way parcels will be developed. Finally, a preliminary engineer's estimate of probable costs will be developed for further planning of the project.

Schematics – Using the information developed, preliminary schematics showing the proposed improvements and any additional right-of-way required will be developed. The Project Manager will conduct meetings with **City of Edinburg** to obtain their input and finalize the schematic. Once the schematic is completed, the preliminary engineering phase will be complete.

Development of Project - Once a decision is made to develop plans and specifications for the project, the Project Manager will begin the development of any needed individual parcel sketches with metes and bounds descriptions to commence the right-of-way acquisition process while the plans are being developed. He will develop detailed construction plans for the proposed improvements. These plans will include any needed drainage structures layouts, plan and profile sheets, general notes, and plan details. Concurrent with the design, the right-of-way acquisition will be taking place, appraisals will be made, and right-of-way negotiations will take place. Any utility adjustments identified will be coordinated with the appropriate utility companies during the right-of-way process. Once the design is finalized, the right-of-way is acquired, and utilities are adjusted, the project can be let to bid.

Project Letting and Construction – Once bids are received, the bids will be publicly opened, and the lowest qualified responsive bidder will be awarded the project. The Project Manager will assign a resident project inspector to the project to see that the Contractor constructs the project according the plans and specifications. The materials will be tested by the Materials Testing Lab to verify that the materials used meet the requirements of the specifications. Upon completion of the construction, the Project Manager will conduct a final inspection in the presence of the Contractor and City of Harlingen officials. Incomplete or unsatisfactory work items, discovered during the inspection, will be completed by the Contractor prior to accepting the project.

Exceptions to the Above Procedure - Projects that will be constructed by **City of Edinburg** work forces may not require plans and specifications developed to the same level of detail. The plans will contain sufficient information so that the workers will be able to clearly determine the intent of the project. The Project Engineer will be available to visit the project site, review plans with City officials and clearly answer any questions that may be raised and will visit with **City** officials as many times as necessary to assure a quality project.

RGEC has provided engineering services to multiple governmental agencies. The following is a list of projects, ongoing and completed, by **RGEC** within the last 2 years for various governmental agencies along with contact and phone number information for each project.

2019 Bond Drainage Projects (Jay & Main Improvements) – McAllen, Texas.

RGEC was contracted by the City of McAllen to provide professional engineering and surveying services for preparing plans and specifications for the construction of drainage improvements for an area in the vicinity of Jay Ave and Main St. A study/report providing an analysis of the area's needs was prepared and presented to the City. Plans and specifications are being prepared. During the construction phase, periodic construction site observations for proposed drainage improvements will be done. **RGEC** will provide construction administration and inspection during the construction phase of the project. This project is in the design phase.

Owner: City of McAllen
Contact: Mario Cruz, PE / Project Engineer
Phone: (956) 681-1181

2018 Bond Drainage Projects (Group C) – McAllen, Texas.

RGEC was contracted by the City of McAllen to provide professional engineering and surveying services for developing solutions for the Stormwater Management Improvements Projects, Group C Projects. A topographic survey of the existing streets, drainage system, spotted utilities, and existing right-of-way was performed for each of the 6 project locations. A drainage analysis and design were performed, to determine what improvements were needed to alleviate current flooding issues within the 6 project locations. A schematic design of the proposed improvements was prepared for review and approval by the City of McAllen. Construction plans, specifications, cost estimates and bid documents for bidding the 6 projects together were prepared for advertising the project and obtaining bids. During the construction phase, periodic construction site observations for proposed drainage improvements for the Group C Projects are being done. **RGEC** is providing construction administration and inspection during the construction phase of the project. This project is under construction.

Owner: City of McAllen
Contact: Mario Cruz, PE / Project Engineer
Phone: (956) 681-1181

Various Streets Rehabilitation Project – La Feria, Texas.

RGEC was contracted by the City of La Feria to perform engineering and surveying services for preparing of construction plans, providing administrative services for the bidding of and awarding of a construction contract, and providing construction administration services for the reconstruction and/or repair of 37 street sections throughout the City of La Feria, Texas. **RGEC** is providing construction administration and inspection during the construction phase of the project. This project is complete.

Owner: City of La Feria
Contact: Jaime Sandoval / City Manager
Phone No: (956) 797-5561

PSJA Tri-City Pedestrian Improvements Project (Phase I) – Pharr, Texas.

RGEC was contracted by the City of Pharr to perform engineering and surveying services for preparing of construction plans, providing administrative services for the bidding of and awarding of a construction contract, and providing construction administration services for the design of sidewalk and ramps in the vicinity of 3 different elementary schools throughout the PSJA area to meet ADA standards. The plans will consist of a layout showing the proposed sidewalk location. Details will be provided to include cross-sections at each driveway or roadway crossing. Both cross-slope and longitudinal slope will be verified to meet ADA standards. Details will be provided to either go around, relocate, or adjust any obstructions encountered, such as mailboxes, water valves, or sanitary sewer cleanouts. The Engineer will also include the necessary TxDOT standard details required for both the sidewalk and ramps as well as traffic control. **RGEC** will provide construction administration and inspection during the construction phase of the project. Project is under construction.

Owner: City of Pharr
Contact: Maria Rangel, PE / Project Engineer
Phoner: (956) 402-4221

North Hutto Road Improvements Project – Donna, Texas.

RGEC was contracted by the City of Donna to perform engineering and surveying services for preparing of construction plans, providing administrative services for the bidding of and awarding of a construction contract, and providing construction administration services for the reconstruction and/or repair of N. Hutto Road, with approximate limits being Interstate 2 on the north and will go approximately 750 feet south of I-2. The street will be reconstructed and/or repaired with an asphalt pavement. As part of the project development, and to improve the drainage conditions of the local area, coordination with TXDOT will be done to obtain approval for connecting additional inlets to the TXDOT drain line that runs from along I-2. The connections from any new inlet to the TXDOT drain line will be by a bleeder line as approved by TXDOT. A boundary and topographic survey were performed to establish horizontal and vertical control and benchmarks for use in the development of the project were set. Cross-sections of the project at every 100' were done to collect detailed topographic information. The existing right-of-way was mapped using existing plat information. Close coordination with utility companies was done in order to identify and resolve potential conflicts with underground utilities. This project is complete.

Owner: City of Donna
Contact: Daniel Ramirez / Asst. Public Works Director
Phone Number: 956-464-6960

Owassa Road Waterline & Sanitary Sewer Relocations – Pharr, Texas.

RGEC was hired by TEDSI Infrastructure Group to provide engineering services required for the preparation of the plans, specification and estimate, and related documents for joint bidding with the Owassa Road project by TxDOT under CSJ 0921-02-140. This City of Pharr Water and Sanitary Sewer relocations project included the 12" (twelve inch) Owassa Road Water line improvement/relocation and upgrade of the existing 8" (eight inch) water main line along the south side of the Owassa Road from Jackson Road to Sugar Road, adjustment/relocation of an existing 8" water line west of Sugar Road, and the Sanitary Sewer relocation of the existing sanitary sewer lines in

conflict with the proposed Owassa Road West and East Outfall along Minnesota Road at the crossing west of Sugar Road and along the center line of Minnesota Road between Sugar Road and West of the I-69C (US 281 Expressway southbound frontage road). This project is complete.

Owner: City of Pharr
Contact: Maria Rangel, PE / Project Engineer
Phone: (956) 402-4221

In addition to the various civil engineering projects listed above, **RGEC** provided engineering services for multiple Border Colonia Access Roads Program projects. Work consisted of developing plans and specifications for the improvement of existing colonia streets which were upgraded to curb and gutter residential streets and included a storm sewer system. Sidewalks were also included where funding was available. Survey work included identification of road right-of-way, topography, and construction staking. Below is a list of Colonia Projects that were done by **RGEC**, some of which were completed more than 5 years ago.

Country Living Estates	Pentecostal Subdivision
El Charro Subdivision No. 2	Primavera I
Eldora Gardens Subdivision	Rancho Escondido Subdivision
Las Fuentes Subdivision	Red Barn Subdivision
Las Haciendas	Roadrunner Subdivision II
Las Milpas Subdivision	RSW Unit I
LJ Subdivision #1	Santana (Nadia Street) Subdivision
McColl Estates Subdivision	South Tower Estates
Morning Sun Subdivision	Southfork Estates Subdivision
North Alamo Village	Southside Village Subdivision
Northside Village Subdivision	Tiny Acres Subdivision
Val-Bar Subdivision	

RGEC has one office located at 130 E. Park Avenue, Pharr, TX 78577 which will be providing services for the **City of Edinburg**.

To handle part-time staffing needs for smaller assignments, **RGEC** has the financial stability and resources to hire additional personnel and has done so in the past. **RGEC** maintains an excellent working relationship with several local firms. *If necessary, the firm would request permission to sub-contract work on a project by project basis.*

C. TEAM MEMBER QUALIFICATIONS & EXPERIENCE

Ramiro Gutierrez., PE
President and Principal In Charge

Professional Engineer, State of Texas, #65948

Hernan A. Lugo, PE, CFM
Engineering Design / Quality Control

Professional Engineer, State of Texas, #108728

Certified Floodplain Manager, State of Texas Certification #1747-09N

Certified Stormwater Manager

Certified Water Quality & Bacteria Monitor

Professional Engineer, State of Florida, #74961

Pablo Soto, Jr., PE, RPLS
Survey Project Manager

Registered Professional Engineer, Texas, #66278

Registered Professional Land Surveyor, Texas, #4541

RGEC is a fully staffed professional engineering and land surveying firm located in Pharr, Texas. The firm is registered to practice in the State of Texas with **engineering firm number F-486** and **land surveying firm number 101650-00**. Copies of the firm's current registration certificates are provided on page 15. The firm is fully equipped and staffed to handle most any civil engineering and land surveying task with ease. With **three (3) professional engineers, one (1) engineer- in – training, and one (1) RPLS** on staff, **RGEC** can assure each project will receive the professional attention it merits. The firms' capabilities and diversity enable **RGEC** to devote personal attention to the City. **RGEC** provides clients the expertise and innovation necessary to provide practical, cost-effective solutions.

RGEC has been in business for 26 years, having begun operation in 1998. The firm is fully equipped and staffed to handle most any civil engineering and land surveying task with ease.

Mr. Ramiro Gutierrez, PE, will be the primary contact for this contract and will be responsible for the day-to-day dealings with the City. Mr. Gutierrez is a longtime resident of the Rio Grande Valley and is extremely knowledgeable of the Rio Grande Valley area, the people, and their needs. He grew up in San Juan, Texas**,** and currently resides in Pharr, Texas.

Mr. Gutierrez has more than 35 years of professional experience and is registered with the State of Texas as **Professional Engineer #65948** and is TXDOT pre-certified to provide civil engineering services. He is a former Texas Department of Transportation (TXDOT) engineer where he worked in various capacities in the Pharr District, in Austin and the Corpus Christi District. While working with TXDOT for 14 years, Mr. Gutierrez moved up the ladder and his last position with TXDOT was that of Area Engineer in the Alice Area Office. He was responsible for the design, construction, maintenance and operation of the State highway system in all of Jim Wells and Kleberg Counties and part of Live Oak and Nueces Counties. While at TXDOT, one of Mr. Gutierrez' tasks was being responsible for the environmental assessments for the Pharr District.

In addition to Mr. Gutierrez, a key member of the staff at **RGEC** is Mr. Hernan A. Lugo, PE, CFM. Mr. Lugo is registered with the **State of Texas as Professional Engineer #108728** and **CFM Certification #1747-09N**. He grew up in Caracas, Venezuela and graduated from Universidad Nueva Esparta in Caracas, Venezuela with a Bachelor of Science degree in Civil Engineering in 1998. In 2011 he earned a Master of Science degree in Environmental Engineering from Texas A&M University at Kingsville.

Mr. Lugo has more than 25 years of experience in the engineering and construction industry. He is also a Certified Floodplain Manager and a Certified Stormwater Manager. Mr. Lugo as a former Project Manager for the City of Alton provided technical assistance to Public Works and Planning Department as well as overseeing all land development and capital improvement projects within the city. In the meantime, he developed and maintained an excellent working relationship with private and public agencies as well with other engineering firms. He has worked in various capacities in the region and coordinated his work with various agencies such as the Environmental Protection Agency, Texas Commission on Environmental Quality (formerly TNRCC), Texas Water Development Board, Hidalgo County Drainage District #1, and multiple irrigation districts in Hidalgo County. Mr. Lugo also managed engineering services and operated an independent civil engineering firm in Pharr, Texas.

Another key member of the staff at **RGEC** is Mr. Pablo Soto, Jr., PE, RPLS. Mr. Soto is registered with the **State of Texas as Professional Engineer #66278** and **Registered Professional Land Surveyor #4541**. He is TXDOT pre-certified to provide land surveying services and is a long-time resident of the Valley. Mr. Soto grew up in San Juan and currently resides in Pharr. He has a long history of working in the Rio Grande Valley as a consultant in professional engineering and land surveying. Mr. Soto has extensive surveying experience in South Texas and provides a vast and in-depth knowledge of the local area with his tremendous background in design engineering and surveying. Mr. Soto is responsible for the surveying work at various levels of design from topographic surveying to surveying for design and construction staking. He also performs boundary surveying services for acquisition of right-of-way and easements on municipal projects. He has developed and maintained an excellent working relationship with various public agencies in the Rio Grande Valley as well with other engineering firms.

The staff at **RGEC** has more than 75 years of combined and diversified professional engineering and surveying experience and over 1,850 engineering and land surveying projects completed. **RGEC** is a well-staffed civil engineering and land surveying firm. The firm has extensive experience and has provided professional engineering services for multiple local government agencies on locally funded public works projects, federally funded construction projects, and projects located in this general region of the state. This experience makes **RGEC** uniquely qualified to provide engineering services for the **City**.

Experience with Government Agencies

RGEC has considerable knowledge and experience working with various government agencies throughout most of the South Texas Region; and as such is familiar with Federal, State and Local Regulations, Policies and Procedures.

RGEC has experience developing projects for or while coordinating with many governmental agencies. **RGEC** has developed projects for the cities of Edinburg, Pharr, McAllen, TXDOT, Cameron County, Hidalgo County, the Regional Mobility Authority, the cities of Pharr, McAllen and **Edinburg** and various school districts across the Rio Grande Valley. These projects have consisted of parking lots, roadways and street projects, overpass design projects, traffic signal design projects, airport expansion projects, water and sanitary sewer infrastructure projects. On many of these projects, **RGEC** has been required to coordinate with various governmental agencies such as **the International Boundary & Water Commission, the US Army Corps of Engineers, US Fish & Wildlife, Texas Parks & Wildlife, Texas Historical Commission, Texas Commission on Environmental Quality (formally Texas Natural Resources Conservation Commission), Texas Department of Transportation, Federal Highway Commission, Federal Aviation Administration, Federal Emergency Management Agency**, and many others.

Additionally, our staff is familiar with the requirements of numerous utility companies such as Texas Gas Service, American Electric & Power, Magic Valley Electric Coop, Time Warner Communications/Spectrum, Oil/Gas Exploration/Production, Sprint, Verizon, and ATT. This list of agencies/companies is as follows:

Ramiro Gutierrez., PE

President and Principal In Charge

BIOGRAPHIC SUMMARY AND EXPERIENCE

Mr. Ramiro Gutierrez, PE is the principal of R. Gutierrez Engineering Corporation and through his broad range of experience offers his clients a commitment of unsurpassed integrity, excellence and satisfaction. Mr. Gutierrez is proud of his excellent reputation in meeting client's aggressive schedules, and his ability to assemble multi-disciplinary project teams to give the client the specialized attention and service they merit.

Mr. Gutierrez, PE is a long-time resident of the Rio Grande Valley. He grew up in San Juan, Texas, and currently resides in Pharr, Texas. He is a former Texas Department of Transportation (TXDOT) engineer. While with TXDOT, Mr. Gutierrez worked in various capacities in the Pharr, Austin, and Corpus Christi Districts. His last position with TXDOT was that of Area Engineer in the Alice Area Office where he was responsible for the design, construction and maintenance activities on State roads in Jim Wells, Kleberg, Live Oak and Nueces Counties. Before opening his own firm, Mr. Gutierrez worked for a large engineering firm as a Project Manager responsible for developing transportation, municipal and site development type projects. Since founding his own firm Mr. Gutierrez has worked extensively in the Hidalgo County area on a wide variety of projects including municipal infrastructure projects related to streets, drainage, water, sanitary sewer, parks, etc., and has become intimately familiar with the local area's characteristics

Mr. Gutierrez is a licensed Professional Engineer with over 34 years' experience in management, design, construction and maintenance of drainage, highway, airport, street, and utilities projects. The work involved analyzing and developing design alternatives, developing construction plans and bid packages; managing sub-consultant design and surveying contracts; managing construction projects; recommending, approving and processing change orders; assuring compliance with state and federal policies and procedures; monitoring project costs; developing and implementing maintenance action plans; recommending and implementing changes in the operation of our transportation system; providing quality customer service; developing and maintaining good working relationships with local public officials.

Mr. Gutierrez has worked as a Project Engineer and designer multiple street, drainage, roadway, and utility improvement projects, some which included flood plain mapping and flood elevation studies in the south Texas and Rio Grande Valley areas. He has analyzed and developed preliminary engineering design alternatives, prepared final design, final construction plans and technical specifications and contract documents for the projects. Managed the construction of projects assuring compliance with the plans and specifications all the way through final inspection, project acceptance and final payment to contractor. Assured that industry standard construction procedures were followed on all projects.

Hernan A. Lugo, PE, C.F.M.

Engineering Design / Quality Control

BIOGRAPHIC SUMMARY AND EXPERIENCE

Mr. Hernan A. Lugo, PE, CFM grew up in Caracas, Venezuela and worked as a resident engineer for a private firm in Venezuela from 1998 to 2001 where he provided design and project management services for various civil engineering projects. In 2001, Mr. Lugo moved to Miami, Florida where he worked for Voice Stream, Inc. as a technical consultant for the sales force.

Mr. Lugo graduated with a Bachelor of Science degree in Civil Engineering in 1998 and a Master of Science degree in Environmental Engineering in 2011. Mr. Lugo is licensed by Texas Board of Professional Engineers to practice civil and environmental engineering under license #108728 and has more than 13 years experience in the engineering and construction industry. He is also a Certified Floodplain Manager and a Certified Stormwater Manager.

Mr. Lugo as a former Project Manager for the City of Alton provided technical assistance to Public Works and Planning Department as well as overseeing all land development and capital improvement projects within the city. In that position, he developed and maintained and excellent working relationship with privates and public agencies as well with other engineering firms. He has worked in various capacities in the region and also coordinated his work with various agencies such as the Environmental Protection Agency, Texas Commission on Environmental Quality (formerly TNRCC), Texas Water Development Board, Hidalgo County Drainage District #1, and multiple irrigation districts in Hidalgo County. Mr. Lugo also managed engineering services and operated an independent civil engineering firm in Pharr, Texas.

RECENT PROJECTS

2018 Bond Drainage Projects (Group C) – McAllen, Texas. RGEC was contracted by the City of McAllen to provide professional engineering and surveying services for developing solutions for the Stormwater Management Improvements Projects, Group C Projects. A topographic survey of the existing streets, drainage system, spotted utilities, and existing right-of-way was performed for each of the 6 project locations. A drainage analysis and design were performed, to determine what improvements were needed to alleviate current flooding issues within the 6 project locations. A schematic design of the proposed improvements was prepared for review and approval by the City of McAllen. Construction plans, specifications, cost estimates and bid documents for bidding the 6 projects together were prepared. During the construction phase, periodic construction site observations for proposed drainage improvements for the Group C Projects are being done.

2019 Bond Drainage Projects (Jay & Main Improvements) – McAllen, Texas. RGEC was contracted by the City of McAllen to provide professional engineering and surveying services to preparing plans and specifications for the construction of drainage improvements for an area in the vicinity of Jay Ave and Main St. A study/report providing an analysis of the area's needs was prepared and presented. Plans and specifications are being prepared. During the construction phase, periodic construction site observations for proposed drainage improvements will be done.

PE•LS
Texas Board of Professional Engineers and Land Surveyors

Pablo Soto, Jr., PE, RPLS

Survey Project Manager

BIOGRAPHIC SUMMARY AND EXPERIENCE

Mr. Pablo Soto, Jr., PE, RPLS grew up in San Juan and is a resident of Pharr, Texas. He has had a long working experience as a consultant in civil engineering and surveying. Mr. Soto provides a vast and in depth knowledge of the San Juan area with his background in civil engineering and surveying. Mr. Soto is responsible for the surveying work at various levels of design from topographic surveying to surveying for design and construction staking. He also is responsible for all property boundary surveys for the office. He has developed and maintained an excellent working relationship with various private and public agencies as well as with other engineering and land surveying firms. Mr. Soto brings over 30 years of professional surveying experience to our team. Mr. Soto's experience includes all types of Land Surveying, Parcel Descriptions, Subdivision work and TX-DOT Right of Way Surveying & Parcel Descriptions. Most of his experience has been in the South Texas community.

RECENT PROJECTS

Owassa Road Right-of-Way & Topographic Survey – Pharr, Texas. Worked as Project Survey Manager responsible for surveying services needed to provide topographic surveying and right-of-way mapping services to the City of Pharr. Topographic surveys included cross-sections every 100' to 10' outside the proposed right-of-way when possible. Driveway cross-sections were also obtained with driveways being identified by type of access and type of surface. Approximate centerline stations were identified. Drainage structure types and flow lines were also obtained. Fences, mailboxes, and signs were tied down. Utilities were marked as per DIGTESS and utility company information. A right-of-way map was prepared using the most current adjoining information such as deeds, plats, ownership information and title reports provided by owner. Six individual parcels were prepared for use in acquisition of additional right-of-way.

URS Surveys – Rio Grande Valley, Texas. As part of URS's contract for Management Services for Community Development Block Grant Disaster Recovery Program for Hurricane Dolly with the Lower Rio Grande Valley Development Council, RGEC was hired to provide detailed topographic and boundary surveys for all the properties within the Rio Grande Valley. Surveys included legal description of properties, utility easements, improvements including but not limited to houses, fences, driveways, trees over 6" in diameter, sidewalks, slabs, etc…, utility locations, staking of property corners, building setback lines and plat of property to meet permitting requirements for construction of a single family residential structure. Multiple properties also required elevation certificates.

Scott Sloan & Veterans Memorial Parks Project – La Feria, Texas. RGEC was contracted by the City of La Feria to perform engineering and surveying services for preparing of construction plans, providing administrative services for the bidding of and awarding of a construction contract, and providing construction administration services for constructing various improvements to two (2) existing municipal parks in La Feria, Texas. Improvements included upgrades to sports fields, installation of new score boards, construction of playscapes, parking lot expansions, and addition of new bathroom facilities.

PREVIOUS EXPERIENCE WITH THE CITY OF EDINBURG

Listed here for reference regarding the success and capabilities of the firm's past services are five individual projects for which **RGEC** performed engineering services for the **City**.

1. **Edinburg Downtown Water Treatment Plant – Edinburg, Texas.** The firm was responsible for the engineering design of underdrain rehabilitation at the Edinburg Downtown Water Treatment Plant. The work includes review of current water quantity & quality issues, evaluation of applicable regulations, review of past inspection reports, and discussion of current operations to identify & address issues. Design drawings were prepared showing existing facilities and proposed facilities. Pipes & blower for filter backwash were sized and hydraulic calculations for the proposed modifications were done. Services involved preparing estimates, preparing bid packages, assisting during the bid process, construction phase services, surveying services and periodic site observations will be provided. Record drawings will be issued at completion of the project.

2. **University Drive Topography – Edinburg, Texas.** RGEC was hired by the City of Edinburg to provide a detailed topographic survey of University Drive (SH107) from 10th Avenue west to approximately 100' west of 6th Avenue. The firm obtained cross sections from ROW to ROW at 100' intervals and all appropriate locations providing information regarding existing median, median openings, private & commercial driveways, sidewalks, ramps, drainage structures, fences, signs, mailboxes, traffic signals and utilities. The survey was provided to the City in AutoCAD format.

3. **Edinburg Land Fill – Edinburg, Texas.** The firm was responsible for the civil site plan and surveying services for construction of the Edinburg Landfill Administrative Office & Maintenance Yard Complex. The work includes sanitary sewer, water, drainage, grading, paving and dimensional control plans. Final schematic design of the proposed civil-site improvements was also developed. Cost estimates of the work developed by the engineer were prepared for bidding purposes. Bid documents for the engineer's work were also prepared and delivered to the architect. Survey work includes collecting of all topographic information and establishing horizontal and vertical control for use in developing the project.

4. **Jackson Road Paving & Drainage – Edinburg, Texas.** Worked as Project Engineer responsible for the development of schematic design, right-of-way map, plans, specifications and estimate for the improvement of an existing two-lane road to a five-lane road with shoulders and a continuous left-turn lane. This project was developed from conception through the final design stage. Work included Drainage Design, irrigation structure adjustments, and Preparation of Plans Specifications and Estimate (PS&E). The work also included project management. Survey work includes collecting of all topographic information and establishing horizontal and vertical control for use in developing the project.

5. **Canton Road Paving & Drainage – Edinburg, Texas**. Worked as Project Engineer responsible for the development of schematic design, right-of-way map, plans, specifications and estimate for the improvement of an existing two-lane road to a five-lane road with shoulders and a continuous left-turn lane. This project was developed from conception through the final design stage. Work included Drainage Design, irrigation structure adjustments, and Preparation of Plans Specifications and Estimate (PS&E). The work also included project management. Survey work includes collecting of all topographic information and establishing horizontal and vertical control for use in developing the project.

E. INSURANCE

RGEC carries $2,000,000.00 of general aggregate liability insurance with a $1,000,000.00 limit per each occurrence. The firm also carries $1,000,000.00 auto liability insurance, the required workman's compensation insurance and $1,000,000 of professional liability coverage. A copy of a current insurance certificate is included in "Appendix A – Additional Information and Submittals". A completed City of Edinburg Certificate of Insurance will be provided immediately after award of contract showing RGEC's type of insurance and coverage limits as stated above. Types of insurance to be verified are Commercial General Liability, Texas Business Automobile Liability, Worker's Compensation, and Professional Liability Coverage.

The following is a list of insurance claims against the firm within the past 5 years:

- 2019 – Workers Comp. – 1 Claim
- 2022 – Automobile – 1 Claim
- 2023 - Workers Comp. – 1 Claim

F. PROFESSIONAL SERVICES AGREEMENT

RGEC has read the Professional Services Agreement provided in the **City's** request for statements of qualifications and will meet all the prerequisite insurance requirements. RGEC also agrees to enter into a Professional Services Agreement such as the one provided.

G. CONTACT INFORMATION

RE: **Request for Qualifications #2024-3 Community Development Block Grant- Disaster Recovery (CDBG-DR) Chapin Pumps Rehabilitation Drainage Improvements**

Greetings Mr. Hinojosa,

SAMES, Inc. ("SAMES") is extremely interested and pleased to present our Qualifications for professional Engineering Services to the City of Edinburg ("City"). We have reviewed the Request for Qualifications and strongly believe that our extensive experience in quality engineering along with our team mentality and commitment to the City of Edinburg will deliver the best solution for this project.

SAMES' professionals have considerable experience working with municipalities to analyze, design, and provide strategic support for infrastructure improvements that will enhance the quality of living for our local communities. Our team is especially skilled in the design of public improvements and performance of Storm Sewer Analysis, Environmental Assessments, Utility Coordination, Regulatory Compliance, and Construction Administration of State or Federally funded projects. Additionally, we offer in-house support services including surveying, drafting, environmental compliance, and construction management and inspections. Due to our definitive experience with CDBG funded projects, this specific scope of work, and our history of successfully completing similar projects within the South Texas region, we are confident in our ability to perform this work in a professional, timely and cost-effective manner.

I, Saul D. Maldonado, will be the primary point of contact for all correspondence and communications pertaining to this RFQ. As one of the two firm principals, I have the authority to submit this Statement of Qualifications and contractually bind the firm. Should you have any questions regarding our services or this Statement of Qualifications, my contact information is noted below.

Saul D. Maldonado, PE – Principal / President
200 S. 10th Street, Suite 1500, McAllen, TX 78501
O: (956) 702-8880 F: (956) 702-8883 M: (956) 451-5826
saul@samengineering-surveying.com

SAMES is committed to providing the City of Edinburg with excellent service in the performance and delivery of a fully functional project, delivered in compliance with all local, state, and federal funding requirements. To date we have not received any addendums to this RFQ. Thank you for your time and consideration of our qualifications.

Respectfully Submitted,

Saul D. Maldonado, PE
Principal / President

FIRM QUALIFICATIONS AND EXPERIENCE

SAMES is a minority owned company established in 2008 by Samuel and Saul D. Maldonado, two brothers with a vision to develop a legacy of leadership succession serving communities worldwide. Originally established as a professional engineering and surveying firm, SAMES expanded in 2010 and started providing general construction and construction management services. In 2013 SAMES expanded once more and added federal government contracting as another strategy for business growth. Today, SAMES proudly serves local, municipal, state, federal, and private/commercial clients from any one of our four (4) office locations: McAllen, TX; Harlingen, TX; Santa Fe, NM; Los Alamos, NM. SAMES is headquartered in McAllen, Texas.

Principal Owners:	**Office Locations:**	**General Information:**

Maldonado, PE, RPLS Principal & CEO Mobile: (956) 207-7130 sam@samengineering-surveying.com Firm Established: 2008	* The Chase Tower 200 S 10th St, Suite 1500 McAllen, TX 78501 222 E. Van Buren Ave, Suite 306 Harlingen, TX 78550 1596 Pacheco St, Suite 203 Santa Fe, NM 87505 1247 Central Ave, Suite 220 Los Alamos, NM 87544 * Location serving City of Edinburg	• Type of Organization: S-Corp. • Engineering Firm No.: F-10602 • Surveying Firm No.: 10141600 • Texas HUB No. 59680 • TxDOT DBE No. VN 23559 • Federal HUBZone No. 54823 • Small Disadvantaged Business • UEI No. DP31KANLHAT1 • Cage Code: 66n60 • TIN: 26-2941288

SAMES is registered and in good standing with the Texas Board of Professional Engineers and Land Surveyors. We are a certified Disadvantaged Business Enterprise **(DBE)**, a State of Texas Historically Underutilized Business **(HUB)**, and a Small Disadvantaged **HUBZone** firm certified through the U.S. Small Business Administration. SAMES is also administratively qualified and pre-certified with the Texas Department of Transportation (TxDOT) to provide civil engineering, surveying and related services for state and federally funded projects.

Uniqueness to Best Perform

SAMES specializes in a complete range of services in multiple professional disciplines, including Project/Program Management; Civil Engineering, Land Development, and Surveying; Construction Administration and Construction Engineering Inspection. We have a fully staffed and operational Survey and CADD department which allows us to research, collect, analyze and transfer technical data quickly and efficiently. SAMES' ability to provide project turnkey services will provide the best value to the City of Edinburg. Rather than working with multiple firms to successfully complete the project, the City can rely on the knowledge and responsiveness of one (1) firm that will ensure compliance with all design standards and applicable rules and regulations. Regardless of scope or size, SAMES can successfully manage this project from inception to completion.

Professional Services

SAMES provides client-focused quality Engineering, Surveying and Construction services. We offer design services that encompass CORE civil engineering disciplines: **Water Distribution Systems, Wastewater Collection Systems, Storm Sewer Collection Systems,** and **Roadway Design.** To better serve our clients, we have gradually expanded our services to include **Development and Planning**, **GIS and Mapping Services, Land Surveying**, **General Construction Services**, and **Construction Engineering Inspections**.

SAMES provides the following services in-house:

- **Design Services**
  - Civil Engineering
  - Construction Engineering Inspections
  - GIS and Mapping
  - Project Management
- **Development and Planning**
  - Subdivision Platting
  - Feasibility Studies
- **Land Surveying**
  - Topographic & Boundary
  - ROW & Utility Mapping
  - Aerial Mapping & LiDAR
  - Construction Staking
- **Construction Services**
  - General Contractor
  - Heavy Civil & Highway
  - Commercial & Institutional

Fundamental Engineering Service Areas

- *Planning, Research & Development*
- *Feasibility Studies & Engineering Reports*
- *Roadway Design*
- *Storm Water Collection Systems / Drainage Design*
- *Hydrology Analysis and Hydraulics Design*
- *Erosion and Sediment Control Designs*
- *Water and Wastewater Infrastructure Design*
- *ROW Mapping & Easement Acquisitions*
- *Plans, Specifications & Cost Estimates*
- *Procuring Federal/State/Local Grants/Permits*
- *Bid Procurement & Construction Administration*

Texas CDBG Experience

Many of the projects SAMES has completed have involved infrastructure improvements administered by state government agencies including Texas Department of Agriculture, Texas General Land Office, Texas Water Development Board, and Texas Department of Transportation. Working with these agencies and within their funding programs has provided SAMES' professionals with the requisite knowledge of federal funding requirements and rules / regulations that must be adhered to in order to remain within strict funding and regulatory compliance.

SAMES' professionals have particular experience in design and construction administration of projects funded by the Disaster Recovery Programs of the State's General Land Office (GLO) and the Texas Department of Rural Affairs' (TDRA) Community Development Block Grant Program (CDBG). The successful delivery of over 20 state funded projects, aimed to specifically address disaster recovery, and 9 CDBG funded projects addressing infrastructure improvements, is testament to our experience in contract administration of state government funded projects. These projects, listed

below, all called for compliance with federal requirements, strict document control and detailed progress reporting.

- *2020 San Juan CDBG Street Improvements*
- *2020 Donna CDBG Street Improvements*
- *2021 San Juan CDBG Street Improvements*
- *2021 La Joya CDBG Street Improvements*
- *City of Escobares CDBG Street Improvements*
- *City of Roma CDBG Street Improvements*
- *City of Rio Grande City CDBG Street Improvements*
- *2022 Sullivant City CDBG Street Improvements*
- *2023 San Juan CDBG Street Improvements*

Projects specifically funded by the Texas General Land Office Disaster Recovery Program or the Texas Department of Rural Affairs, Community Development Block Grant Program Disaster Recovery Division after Hurricanes Dolly and Ike include:

- *Barcelona Heights Subdivision Drainage Improvements, Penitas, TX*
- *Espanola Heights Paving and Drainage Improvements, Penitas, TX*
- *Pharr Downtown Drainage Improvements, Pharr, TX*
- *Hutto Road Drainage Improvements, Donna, TX*
- *Water Treatment Plant and Emergency Power Generator, Donna, TX*
- *Sullivan City Surveying and Land Acquisition Hurricane Relief, Sullivan City, TX*
- *La Rosita, Salineno, West Alto Bonito, Las Lomas, Starr County, TX*
- *La Villa Street, Roadway and Drainage Improvements, La Villa, TX*
- *GLO Disaster Recovery, Street & Drainage Improvements to Los Ebanos Road and Evie Subdivision, Palmhurst, TX*
- *Bentsen Palm Drive, La Homa Road and Goodwin Road Drainage Improvements, Palmview, TX*
- *Catarina Subdivision Street/Drainage Improvements, Progreso, TX*
- *City of Escobares GLO Disaster Recovery, Drainage Improvements, Escobares, TX*
- *Starr County GLO Disaster Recovery, Rnd. 2.1 Pavement and Drainage Improvements for Pct. 1, Pct. 2, Pct. 3 and Pct. 4, Starr County, TX*
- *Duval County Water & Sewer System Improvements, Freer & San Diego, TX*
- *Kleberg County Water & Sewer Improvements, Ricardo and Riviera, TX*
- *San Diego Municipal Utility District No. 1 Waterline Improvements, San Diego, TX*
- *Kleberg County GLO Disaster Recovery, Rnd. 2.1 Drainage Improvements to East Siesta Estates, West Siesta Estates and 772 Ranchettes Colonias, Kleberg County, TX*
- *Kleberg County GLO Disaster Recovery, Rnd. 2.2 Drainage Improvements, East Chavez Street and Country Meadows-Paisano Addition, Kleberg County, TX*
- *GLO Flood and Drainage Improvements, Delta Area Connector/East Lateral Colonia Infrastructure I (Bernal Heights #1, #2, and Bar #3), Hidalgo County, TX*
- *GLO Flood and Drainage Improvements, Delta Area Connector/East Lateral Colonia Infrastructure II (Acre Tract, Chapa North, and Chapa South), Hidalgo County, TX*
- *GLO CDBG-DR 2015 Floods Grant, Alamo and Edinburg Area Stormwater Relief Project, Phase II and III, Hidalgo County, TX*

Municipal Public Works Experience

As a direct result of our firm's qualifications, team experience, and the responsiveness of our professional staff, SAMES has completed numerous government-funded projects for Municipal and Local government entities. In the past two (2) years alone, SAMES has successfully completed over 25 engineering projects for municipalities in the Rio Grande Valley. The projects noted below are just a few of the major Municipal and Government funded projects we have completed since our inception in 2008.

- ***City of Edinburg*** *– Surveying, Drainage Design and Construction Administration for 2018 Bond Project Schunior Regional Detention Pond; Schunior Phase III Mon Mack Project;*
- ***City of McAllen BOND Drainage Utility Fee Projects*** *– Surveying, Assessment and Design of Drainage Improvements.*
- ***City of McAllen*** *TxDOT Expansion - Ware Road Utility Relocation Project; Trade Zone Stormwater Pump Station;*
- ***City of San Juan*** *– 2019/2020/2021/2022 CDBG Street Improvements – Surveying and Design of Roadway Improvements; Fire Station Sanitary Sewer Improvements; San Juan Park and Recreation Center; City Hall Gateway Utility Relocation;*
- ***City of Donna Planning & Zoning Division*** *Engineering Services for Hidalgo County Metropolitan Planning Organization – Transportation Alternatives Program Sidewalk and ADA Ramps;*
- ***City of Pharr*** *– TxGLO Downtown Drainage Improvements*
- ***City of Palmview*** *– Surveying and Engineering Services for Showers Road Municipal Park; Ramirez Drainage Project; Riverside Estate Drainage Improvements;*
- ***City of Rio Grande City*** *– Public Safety Subdivision Off-Site Improvements; Public Safety Water and Sewer Improvements; CDBG Street Improvements;*
- ***City of Roma*** *– Las Americas Roma Logistics and Industrial Park; CDBG Street Improvements;*
- ***City of Escobares*** *– CDBG Projects for Water, Lighting, Street/Roadway Improvements; Surveying and Engineering design for Municipal Park Project;*
- ***City of Brownsville*** *– Repairs and Renovations to Dean Porter Park and Brownsville Event Center;*
- ***City of Harlingen*** *– Drainage Improvements for Storm Sewer Systems 204 and 252;*
- ***Hidalgo County Urban County Program (UCP)*** *Professional Engineering Services for 2015 CDBG – Disaster Alamo and Edinburg Area Stormwater Relief Project*
- ***Hidalgo County Housing Authority -*** *Hacienda De San Miguel, Professional Engineering Services*
- ***Hidalgo County*** *Engineering design and Construction management services for Hidalgo County Border Colonia Access Program 3rd Call*
- ***Hidalgo County Drainage District No. 1 BOND Projects*** *– Design of Drainage Improvements*
- ***Hidalgo County Pct. 1 -*** *Construction Engineering Inspections for Mile 6 W Road Project*

Staffing

SAMES has a total of 86 employees which includes licensed professional staff, state registered/certified technicians and highly trained support and administrative/management personnel. SAMES professional staff includes:

- Six (6) State of Texas Licensed Engineers
- Two (2) State of Texas Registered Professional Land Surveyors
- One (1) Certified Project Management Professional
- Two (2) Certified Floodplain Managers
- Seven (7) State Registered Engineers in Training

- Eight (8) Graduate / Field Engineers

SAMES' staffing plan will designate assignments according to project scope of work taking into consideration specific discipline and expertise – as each project team member brings complementary strengths to the team and has unique experience that will be called upon as projects arise and scopes are identified. Additionally, all members of our professional team have cross-discipline capabilities which will allow personnel to perform dual roles if the need arises – such as during sickness, personal leave or during periods of increased workloads.

SAMES' management system will allow for adequate flexibility to compensate for unanticipated workloads within the firm - thereby providing a balanced staffing plan that will never jeopardize the responsiveness of our team. Moreover, our staffing plan will allow the firm to manage multiple concurrent projects without compromising the quality and the attention to detail that encompasses our commitment to our clients.

Commitment

SAMES is committed to providing professional services that are focused on efficiency and production, meeting contractual obligations and commitments, quality designs, and environmental awareness that promotes public welfare. The SAMES team adheres to a strong Code of Ethics and is committed to the highest standards in protecting the interests of the public and our clients while evaluating prospective projects, establishing key business relationships, and supporting our clients in the achievement of their infrastructure goals.

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

SAMES professionals have a "team" mentality and work together to accomplish a common goal – Excellence Thru Teamwork. The City of Edinburg will be facilitated by a solid team of professionals and experts in a variety of fields needed to fulfill the scope requirements for any civil engineering project. The combined human and technical resources of the SAMES project team will offer the City of Edinburg professional engineering services that are tailored to the unique needs and conditions of each project. Most of our professional team have collaborated on multiple projects involving various scopes thus demonstrating the proven capability to work together effectively and perform seamlessly on a wide array of projects. SAMES plans to self-perform all aspects of the proposed project's scope of work. However, should the project call for a service we do not provide in-house, SAMES has developed key business relationships with experienced and respected professionals that can be called upon to provide support if/when needed.

SAMES is led by our two (2) highly qualified firm principals, Samuel D. Maldonado, PE, RPLS and Saul D. Maldonado, PE. Samuel D. Maldonado has over 25 years of experience in Civil Engineering and Construction Management of infrastructure and capital improvement projects and over 16 years of experience in Professional Land Surveying. Saul D. Maldonado has over 20 years of experience in managing the design and construction of multi-disciplined projects and has extensive experience in Project Management of large-scale developments. Together, they offer over 40 years of professional civil engineering and project management experience and will lead the professional team facilitating the City of Edinburg's projects.

Name	Role	Credentials	Education
Saul D. Maldonado, PE	Principal-in-Charge & Environmental QA/QC	• TX Licensed Engineer #100320	• B.S., Civil Engineering (2003)
Samuel D. Maldonado, PE, RPLS	Principal & RPLS	• TX Licensed Engineer #91889 • AZ Licensed Engineer #71257 • TX Professional Surveyor #6027	• M.B.A. (2017) • B.S., Civil Engineering (1997)
Jessica M. Maldonado, PE, PMP, CFM, SIT	Vice President of Professional Services	• TX Licensed Engineer #111579 • Project Management Professional, TX #2077158 • Certified Floodplain Manager, TX #3995-21N • Certified Surveyor-In-Training, TX 110912	• M.B.A. (2018) • B.S., Civil Engineering (2005)
Mario A. Garcia, PE	Project Manager	• TX Licensed Engineer #137503	• B.S., Civil Engineering (2015)
Phillip Harris, EIT	Project Engineer	• TX Engineer-In-Training #71223 • Certified Floodplain Manager, TX #4183-22N	• B.S., Civil Engineering (2015)
Luis Mendez	Project Engineer	• Multiple TSPS Trainings	• B.S., Civil Engineering (2023) • A.A.S. Engineering & Technology (2018)
Isael Posadas Jr., EIT	Assistant Project Engineer	• TX Engineer-In-Training #80390	• B.S., Civil Engineering (2020)
Justin M. Serna, EIT	Assistant Project Engineer	• TX Engineer-In-Training #72300	• B.S., Civil Engineering (2020)
Esequiel Garcia, SIT	Survey Manager	• TX Surveyor-In-Training #110318	• B.S. Psychology (2013) • A.A.S. Drafting & Design (1998)

The following is a table of the key personnel who may be involved in this contract followed by resumes highlighting relevant professional experience. The resumes are followed by an organizational chart which includes multiple personnel under certain roles to substantiate SAMES' staffing plan.

Table of Key Personnel

Resumes

Saul D. Maldonado, PE, Principal-in-Charge & Environmental QA/QC is a Licensed Professional Engineer and experienced Construction Manager with over 20 years of experience. Mr. Maldonado has managed the design and construction of Sanitary Sewer Collection Systems, Road Improvements, Water Distribution Systems, Subdivision Development, as well as Storm Runoff Collection Systems. Mr. Maldonado offers a unique understanding and knowledge of general engineering inspection strategies and provisions related to assessment, information gathering, and alternative analysis and infrastructure development projects. He is highly proficient in the permitting requirements for TxDOT, TCEQ, Texas Department of Licensing and Regulations and U.S. Army Corps of Engineers. Saul's environmental experience extends to preparation of Storm Water Pollution Prevention Plans (SW3P), Environmental Permits Issues and Commitments (EPIC) Sheet, Construction General Permit (CGP), and District Standard Operating Procedures (SOP). He has a working knowledge of Texas Commission Environmental Quality (TCEQ) procedures and processes for developing and implementing storm water Best Management Practices (BMPs). Saul Maldonado's management experience includes working for the City of McAllen as their Capital Improvements Project Engineer and Manager, and Subdivision Coordinator. He served as District Engineer to Agua Special Utility District for seven (7) years and City Engineer for the City of Palmview six (6) years. As City and District Engineer, he designed and oversaw water and wastewater projects, budget preparations, cost estimating, bid procurement, and construction management. His experience includes design and management of federal, state, county, city, and school district projects.

Representative Projects:

Athens Road East Bravo Avenue to Roma Creek Road – Roma, Texas

- Oversight of SW3P reviewed and managed the Storm Water Pollution Prevention Plan for 1.1 miles of new roadway, including integration with existing drainage systems.
- EPIC Sheets Review and completed the initial review and management of EPIC Sheets.
- Periodic Inspections and Conducted inspections to ensure SW3P compliance.
- Project Management and Oversaw construction and Quality Assurance/Quality Control (QA/QC).
- Compliance and ensured adherence to District SOPs and TCEQ BMP requirements.

2013 Street Improvements: La Homa Road Realignment and Bridge Project – Palmview, Texas

- Provided design and construction management for the construction of a new bridge structure spanning the width of an Irrigation Canal and then realigning the road to the existing intersection at Business Hwy. 83.
- Coordinated with TxDOT for approval of design and with local utility owners for conflict avoidance and/or resolution and obtained all required permits (TxDOT, Hidalgo County Irrigation District #1)
- Performed roadway design for the realignment of the road, structural design for the new bridge structure and hydraulic calculations and design for a new storm sewer system that required both a gravity collection system and pumping system to move the water over the irrigation canal and into the ultimate outfall at Business Hwy. 83.

Starr County BCAP Rnd III Street Improvements – Athens Road – Roma, Texas

- Provided design quality assurance/quality control and construction management oversight for 1.1 miles of new roadway construction with connection and protection of existing adjacent storm water drainage systems.
- Performed oversight and administrative design and review of the proposed SW3P and verified compliance with District Standard Operating Procedures and TCEQ requirements for Best Management Practices (BMPs).
- Performed initial review and completion / management of the EPIC sheets.

City of McAllen Trenton Road Expansion Project – McAllen, Texas

- Provided design and construction management for the 1.25-mile extension of the 5-lane roadway, including the extension and relocation of waterlines, sanitary sewer lines, and drainage systems.

Samuel D. Maldonado, PE, RPLS, Principal and Project Surveyor is a Licensed Professional Engineer, a Registered Professional Land Surveyor, and experienced Construction Manager with over 25 years of experience. Mr. Maldonado's experience includes project management and professional administrative service with respect to scheduling, cost analysis, budget management, and overall contract support on all projects. He manages the design and construction of Capital Improvements Infrastructure Projects, Municipal Sanitary Sewer Collection Systems, Water Distribution Systems, Road Improvements, Drainage Systems, and vertical construction projects such as office buildings and facilities. As a Registered Professional Land Surveyor, Mr. Maldonado spearheads all our surveying projects and has developed relationships with entities such as AT&T, American Electric Power (AEP) and Time Warner Cable Communications (TWC) for general coordination while continuously providing surveying and engineering services. Mr. Maldonado's experience includes design and management of federal, state, county, city, and school district projects.

Representative Projects:

2018 Bond Project Schunior Regional Detention Pond – Edinburg, Texas

- Provided project management services for the design of a new lateral detention system (appx. 900 acres).
- Oversaw the preparation of a detailed study and the hydrologic and hydraulics engineering design including modeling of system utilities which included conveyance design of 10 and 25-year options, detention volumes included 25 and 50-year options.

New Hidalgo County Courthouse – Edinburg, Texas

- Provided surveying specific to construction staking of utilities, drainage and site infrastructure.
- Provided project benchmarks and performed construction staking of building corners, building piers, water and sewer lines, storm drain lines and other utility improvements.
- Surveying services were provided in multiple phases to allow for minimal disturbance to ongoing construction work.

Schematic Right-of-Way Acquisition Strip Map of Davis Road (I69C to East City limits) and Schunior road (Jackson to West City limits) – Edinburg, Texas

- Provided surveying services to develop a schematic Right-of-Way acquisition strip map of Schunior Road, a 2.73-mile length of road, and Davis Road, a 1.75-mile length of road.
- Performed research and data collection using Hidalgo County City maps and Appraisal District property information.
- Performed aerial surveying to capture and include all structures while conventional field surveying established minor control for the project.

Hidalgo County Regional Mobility Authority Surveying Services – Hidalgo County, Texas

- Provided boundary surveying services for multiple parcel plats located throughout the County, including abstracting and plotting, setting of control monuments and establishment of benchmarks, prepared parcel plats with metes and bounds description.
- Topographic survey and right-of-way map for FM 493 in Donna, Texas which included appx. 105 parcel plats with metes and bounds description.

Taylor Road Widening – Mission, Texas

- Provided surveying services and developed topographic map of existing ground features to include all structures and current right-of-way information.
- Established construction benchmarks throughout the project according to TxDOT specifications.
- Performed research and delineation of current ROW and developed ROW strip map.
- Coordinated with utility providers and property owners to confirm all existing utilities and easements within the project limits.
- Performed document control and project scheduling as required by client.

Jessica M. Maldonado, PE, PMP, CFM, SIT, Vice President of Professional Services is a Licensed Professional Engineer, Certified Project Management Professional, Certified Floodplain Manager and Surveyor in Training with over 17 years of experience in municipal civil engineering, public works construction and project management of multi-disciplined projects. She provides engineering design and management throughout project phases and has provided engineering services encompassing civil design, site surveying, and construction phase improvements to various projects in Hidalgo County. Much of Mrs. Maldonado's career has been associated with the design, contract administration and construction management of disaster recovery roadways and storm sewer improvement projects. She is proficient in the preparation of documents required for government funded projects and has ensured funding compliance for over 16 projects funded by the State's General Land Office She prepared and/or oversaw the completion and submission of all required submittals and progress reports to the Texas General Land Office (GLO) and ensured compliance with the GLO's standards and requirements. Mrs. Maldonado has also provided project management and contract administration services for FEMA funded roadway improvements and housing inspections required by FEMA in the wake of Hurricane Harvey. Mrs. Maldonado serves as Vice President for the Department of Professional Services and manages a staff of approximately 50 professionals, technicians, and administrative support staff.

Representative Projects:

Ware Road Utility Relocation Project, TxDOT Roadway Expansion – McAllen, Texas

- Oversaw the design and provided project management of the PS&E utility relocation package which included the waterline and sanitary sewer line improvements.
- Assisted McAllen Public Utility (MPU) with compensable utility support documentation required for the Advance Funding Agreement and Standard Utility Agreement.
- Provided project estimates and review submittals for TxDOT and MPU to review and approve.
- Oversaw the preparation of construction approved plans and specifications in accordance with TxDOT standards and MPU requirements.
- Performed TxDOT utility coordination to avoid conflicts during construction and provided responses to all contractor requests for information.
- Prepared final as-built drawings and submitted them to MPU and TxDOT.

TxGLO Flood and Drainage Improvements Ph. I – Hidalgo County, Texas

- Provided contract administration services and oversaw the design and construction of a new storm drain network, consisting of over 4,000 LF of 36-inch and 48-inch steel polymer coated storm pipe and a 1,250 linear foot long by 130-foot wide ditch excavation.
- Obtained all required permits, prepared and submitted all funding reports and provided quality assurance during construction.
- Coordinated with the Texas General Land Office and ensured compliance with their program funding requirements.

Sam Houston Boulevard Widening – Pharr, Texas

- Provided design management for the roadway and drainage improvements, as well as the adjustment of waterline and sanitary sewer lines.
- Completed the environmental study for TxDOT funding regulations.
- Provided utility coordination and construction oversight for the relocation of existing utilities located along the proposed route for expansion.

TxGLO 2015 Floods Grant Stormwater Relief Project Ph. II – Alamo & Edinburg, Texas

- Provided contract administration and construction management services for the design and installation of a new storm sewer system that included drainage swales, roadside ditches, inlets, and pipe networks ultimately flowing into an existing drainage ditch owned by Hidalgo County Drainage District #1.
- Prepared and submitted grant application and obtained all required permits.
- Coordinated with the GLO and County to ensure funding and schedule compliance during design and construction.

Mario A. Garcia, PE, is a Licensed Professional Engineer with 8 years of experience working in the civil engineering field. He has extensive experience in conducting feasibility studies and managing projects for multi-family and commercial developments for private and public clients. Mr. Garcia has also managed the preparation of construction documents and construction administration for land and site development projects specifically focusing on platting, paving, drainage, and sanitary and water improvements. Additionally, he has demonstrated experience in the design and project management of street improvements and restoration projects. Mr. Garcia manages civil engineering projects from proposal submittal to construction-closeout. He leads proposed design and works with the client to ensure their project is designed and constructed as requested. Mr. Garcia prioritizes his team's workload and schedules work activities as needed to

ensure budget and project milestones are met. He directs team production and provides quality assurance/quality control measures through interim and final review of project plans, specifications, and estimates.

Representative Projects:

2021/2022 La Joya CDBG Street Improvements – San Juan, TX

- Managed the production of 2,000 linear feet of required street improvements from Schematic Design through Construction Documents.
- Managed the development of Bidding and Contract documents for contract award to selected Contractor.
- Verified Submittals, Requests for Information, Pay Applications from Contractor for final recommendation.
- Conducted site visits, inspections of existing conditions, and documentation of any defects that may be improved with CDBG funds.

2021/2022 San Juan CDBG Street Improvements – San Juan, TX

- Managed the production of seven (7) streets requiring street improvements from Schematic Design through Construction Documents.
- Managed the development of Bidding and Contract documents for contract award to selected Contractor.
- Verified Submittals, Requests for Information, Pay Applications from Contractor for final recommendation.
- Conducted site visits, inspections of existing conditions, and documentation of any defects that may be improved with CDBG funds.

City of Escobares CDBG Street Improvements Project – Escobares, TX

- Manage the production of three (3) streets requiring street improvements from Schematic Design through Construction Documents.
- Managed the development of Bidding and Contract documents for contract award to selected Contractor.

Hidalgo County Drainage District No. 1 - FM 493 & County Rd (Project 12 Phase II)

- Manage and coordinated the approval of final design for the upgrade of an existing storm drain system and installation of a new story drain system for the neighborhoods located between South River Road and surrounding the Chaparral Drain in Donna, TX.
- Managed the development of Bidding and Contract documents for contract award to selected Contractor.
- Oversaw construction administration services including construction site visits and administration of contract documents for payment applications, requests for information and material submittals.

Phillip R. Harris, EIT, CFM, Project is a certified Engineer-in-Training and Floodplain Manager with experience in Civil Engineering Design related to land and site development projects both private and public. He has a broad background of design experience with projects located throughout the State of Texas, extending nationally. This makes him proficient in the various stages of design regarding site access, grading, drainage, water, sanitary sewer, and dry utility improvements.

Representative Projects:

City of La Villa Wastewater Treatment Plant – Drying Bed Rehabilitation – La Villa, Texas

- Managed the production and design of waste-activated-sludge conveyance lines, rehabilitation of existing sludge drying beds, and subsequent drainage system.
- Coordinated directly with TCEQ regarding construction document approval.
- Assisted the City of La Villa with American Rescue Plan Act funding applications.

City of Harlingen Strom Drainage Improvements – Harlingen, Texas

- The project is comprised of two drainage systems including approximately 2,664 linear feet of storm drains with 22 inlet/outlet structures.
- The project was part of a larger effort by the city to analyze various storm drain systems for improvements using funds from the American Rescue Plan Act.
- Managed the production of the approved construction documents.
- Assisted the City of Harlingen with the bidding and procurement process.
- Responsible for managing construction administration duties pending construction commencement.

San Benito Street Rehabilitation Project – San Benito, Texas

- Designed a street rehabilitation project in accordance with the needs of San Benito, Texas.
- Consulted with city officials, analyzed geotechnical engineering reports, and developed a cost-effective solution to enhance the drainage and driving conditions for residential roads across the City of San Benito.

Edinburg Residential Drainage Improvements – Edinburg, Texas

- In cooperation with Edinburg, Texas, oversaw the construction of residential drainage improvements to ensure strict compliance with the Texas Department of Transportation Code, as well as implemented and designed change-orders to ensure the project's completion by its scheduled date.

SAWS Blanco Road 24" Water Main – 15,200 LF of Public Waterline Design – San Antonio, Texas

- Assisted in the design and production of the construction documents for the proposed water main.

Luis A. Mendez, Project Engineer is a Project Engineer and senior CADD technician with over 6 years of experience in computer aided drafting design and civil engineering design. As Project Engineer, Mr. Mendez provides leadership and direction for the completion of project deliverables. Perform the responsibility, and professional engineering work in the design, and construction for a wide range of engineering projects. Coordinate projects within the engineering division, with City departments, public and private utility owners, and state regulatory agencies keeping parties informed and developing solutions to issues that arise. He oversees the training of new employees and provides quality assurance for all surveying and engineering projects he works on by ensuring they are completed on time and in accordance with applicable engineering standards and city or state specifications.

Representative Projects:

Roma Industrial Park Subdivision, Roma, Texas

- Coordinated the process of the plan development for a new industrial park (297-acre tract) development, located within the City of Roma.

- Managed the design of all utilities (water, sanitary sewer), storm sewer improvements, and roadway improvements.
- Coordinated with various agencies, TxDOT, USACE, and public works ensuring compliance with all applicable rules, regulations and requirements.

Space X SH Camber Adjustment Design, City of Brownsville, Cameron County, Texas

- Provided redesign for the adjustment of a roadway with superelevation curves including redesign of the subgrade base and pavement thickness to withstand heavy traffic flows.

Sunset Breeze at Laguna Vista Subdivision, Laguna Vista, Cameron County, Texas

- Coordinated the process of the plan development for a new 56-acre tract commercial development.
- Managed the design of all utilities (water, sanitary sewer), storm sewer improvements, and roadway improvements.

Glazers Beer and Beverage Site Civil – Weslaco, Hidalgo County, Texas

- Provided drafting design and production of engineering construction plans sheet set as per the Architectural plans provided from the client for a 20-acre tract of land to be used for a new warehouse distribution area.
- Provided design and modeling of the grading plan for the parking lot to design the utilities layout plan and profiles along with the proposed surface.

Isael Posadas Jr., EIT, Assistant Project Engineer is a certified Engineer-in-Training with experience in Civil Engineering Design and Construction Management as well as Field Inspections. With a combined 5 years of experience of engineering and drafting, he has dealt with multiple local government and state entities to design and manage construction of subdivisions, site plans, and utility and roadway improvement projects. His recent experiences include design and management of a $2.3 Million detention pond and various street improvement projects where he was lead designer. He has also worked on a variety of drainage improvement projects such as expanding existing ditches and managing their construction. He has designed and managed various subdivisions ranging from new Plats to Replats and worked on designing local parks. Mr. Posadas has a vast project list that makes him familiar with a wide range of design standards and regulations in a variety of project scenarios.

Representative Projects:

The Highland Heights Subdivision – Edinburg, TX

- Managed design and review of drainage, grading, water, sanitary sewer, pavement, striping, traffic signs, stormwater pollution prevention plan, and street lighting design items needed for the development of the 124-lot single family subdivision.
- Provided drainage report analysis of subdivision to Drainage District and City of Edinburg.
- Prepared and shared engineer's construction cost estimate for development of the subdivision.
- Coordinated with owner, city, county, and utility providing entities for approval of design and subdivision requirements.

2022 San Juan Street Improvements – San Juan, TX

- Conducted site visits, inspections of existing conditions, and documentation of any defects that may be improved with CDBG grant money.
- Created preliminary cost analysis of project based on site visits.

- Designed the improvements and repairs of 7 asphalt roads.
- Created construction cost estimates and construction plan set.

2022 La Joya Street Improvements – San Juan, TX

- Conducted site visits, inspections of existing conditions, and documentation of any defects that may be improved with CDBG grant money.
- Created preliminary cost analysis of project based on site visits.
- Designed the improvement of about half of a mile.
- Created construction cost estimates and completed construction plan set.

Hidalgo County Irrigation District No. 1 Project 12 PH II – Hidalgo County, TX

- Designed utility improvements, asphalt improvements/repairs, drainage improvements, and miscellaneous items to improve admin office.
- Coordinated with contractor and vendors on behalf of owner, reviewed submittals and construction documents.
- Assisted in creation of bid documents and bid forms.
- Weekly site visits and reports of progress of construction and conflict resolution as they appeared.
- Conducted Bi-weekly meetings with owner and contractor

Justin M. Serna, EIT, Assistant Project Engineer is a certified Engineer-in-Training with experience in Civil and Structural Engineering Design as well as Structural and Windstorm Inspections. His engineering experience includes engineering design and platting services for several subdivision projects in Hidalgo County which served to increase his knowledge of the development process and the design of roadways, embankment, utilities, and drainage infrastructure. Mr. Serna's experience ranges from windstorm engineering and inspections for structures and forensic inspections to land surveying and design of public utilities and drainage systems for subdivision developments. His most recent projects in land development include residential and industrial improvements which have allowed him to become well versed in design standards and regulations at state and municipal levels.

Representative Projects:

SpaceX Massey's Island Development – Drainage Improvements Design – Boca Chica, Texas

- Designed five storm drainage culverts to drain runoff from 20 ac. Massey's Island.
- Proposed flatwork grading and designed storm sewer network to outfall into existing resaca with slope stabilization measures.
- Assisted in preparation of drainage report for submittal to Cameron County Department of Transportation.
- Led production of construction plans for approval by the Cameron County Department of Transportation.

SpaceX Launchpad – Engineering Services – Boca Chica, Texas

- Designed drainage improvements consisting of four culverts and two detention ponds for SpaceX Launchpad facility.
- Led production of construction plans and drainage report for submittal to Cameron County Department of Transportation.
- Designed storm drainage improvements along State Highway 4 in area of launchpad site.

West Palm Subdivision – 15.5 Acre Subdivision– Edinburg, Texas

- Designed sanitary sewer collection and water distribution networks in accordance with TCEQ and City of Edinburg requirements to service 58 residential lots.
- Proposed street and lot grading and designed storm sewer network including detention pond and outfall to existing structures.
- Assisted in preparation of subdivision plat and drainage report for submittal to City of Edinburg and Hidalgo County Drainage District No. 1.
- Coordinated underground utility marking and topographic surveying for site.
- Led production of construction plans for approval by the City of Edinburg.

The Heights on Wisconsin Phase III Subdivision – 18 Acre Subdivision – Edinburg, Texas

- Assisted in design of public improvements and production of construction plans for approval by the City of Edinburg.
- Assisted in preparation of subdivision plat and drainage report for submittal to the North Alamo Water Supply Corporation and Hidalgo County Drainage District No. 1.
- Designed concrete foundation for proposed lift station improvements.

T.M.J.C. Phase 1 – Environmental Site Assessment – McAllen, Texas

- Performed on-site inspection of one-acre commercial site for potential environmental concerns.
- Produced Environmental Site Assessment based on site findings and research of the site

Esequiel Garcia, SIT, Survey Manager is a certified Surveyor-in-Training with experience in land development, surveying, civil engineering design, and project management. Mr. Garcia is proficient in organizational leadership and client relations and uses these skills to manage the Survey Department's operations and production. His responsibilities include management and coordination of survey work and crews, preparation of surveying cost estimates and proposals, review of project plans and drawings to provide quality assurance, networking and business development activities involving survey clients. Mr. Garcia works closely with SAMES' Registered Professional Land Surveyor's and the department coordinator to ensure a quality survey deliverable prepared on time and within the client's budget.

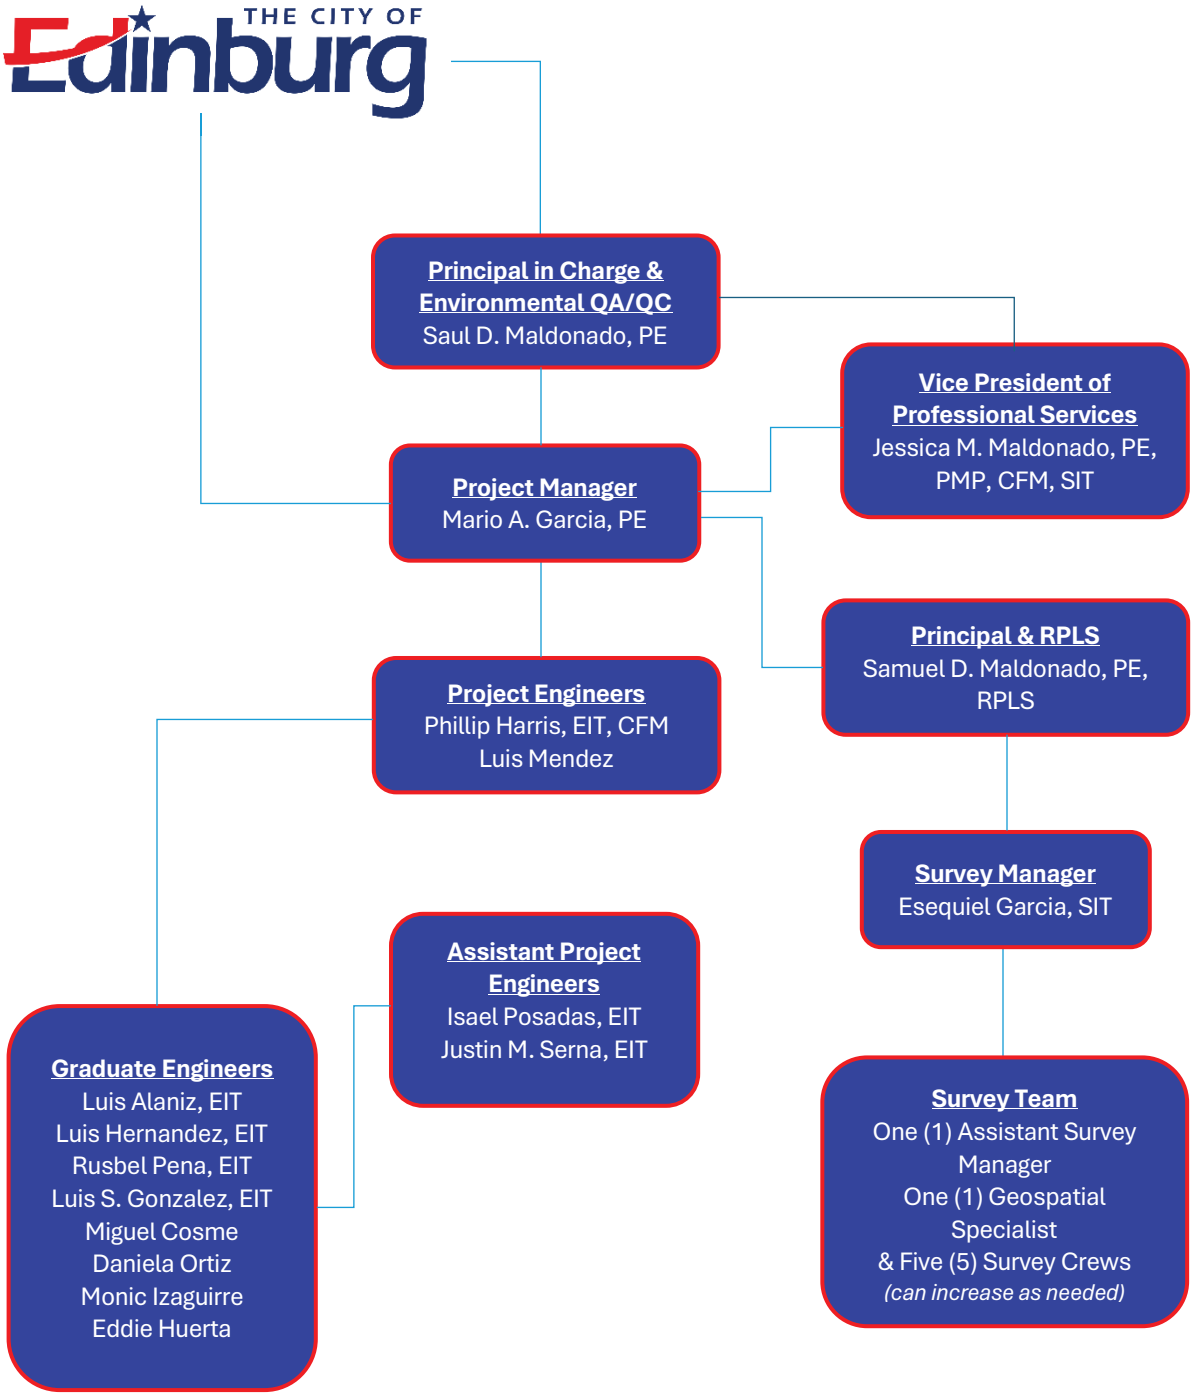
Representative Projects:

City of McAllen Medical Center Topographic Survey

- Oversaw project to create a digital cad file of all existing improvements for a Utility Emergency Power Upgrade Project.
- Provided utility coordination with Hospital staff and Electrical Company as well as utilized GPRS to provide CADD file and final topographic survey.

Adolph Thomae Jr. County Park Shoreline Protection Project Phase III & IV

- Prepared Survey Control Plan for establishing and maintaining horizontal and vertical control
- Prepared Pre-Construction Survey
- Prepared Post-Construction Survey
- Coordinated with client and field crews to stake out a proposed alignment for a gravity wall.
- Collected proposed materials for the wall as it was installed to create as-builts cross sections.
- Provided quality assurance and quality control procedures for project.



Schematic of Right-of-Way Acquisition Strip Map of Davis Road, Edinburg

- Oversaw the schematic for Right-of-way acquisition project of approximately 1.75 miles
- Services included referencing Hidalgo County City Maps and Appraisal District property information to create Right-of-Way Exhibit Map.

Schematic of Right-of-Way Acquisition Strip Map of Schunior Road, Edinburg

- Oversaw the schematic for Right-of-way acquisition project of approximately 2.73 miles
- Services included referencing Hidalgo County City Maps and Appraisal District property information to create Right-of-Way Exhibit Map.

Organizational Chart

REFERENCES AND PROJECT EXPERIENCE

SAMES will offer the City of Edinburg access to a wealth of resources, qualified staff, and technical experts in the local geographical area to complete respective assignments and other logistical tasks required for the project. SAMES plans to self-perform any land surveying scopes required and will ensure only licensed and highly qualified professionals will be contracted to perform scopes outside our purview.

The following projects denote *SAMES* key representative experience with respect to scope of service areas in: ***(1) Sanitary Sewer, Lift/Pump Stations, Civil Design; (2) Project Management and Construction Administration; and (3) Federal, State, and County-Funded Projects.***

2019 McAllen Foreign Trade Zone Pump Station Upgrades, McAllen, TX

Client: City of McAllen
1300 Houston Avenue, McAllen, TX 78501
Jorge Gutierrez
(956) 681-1151

Contract Value: $20K (A/E)
Start/Stop: 04/26/2022 – 10/31/2023

Project Description: McAllen's Foreign Trade Zone (FTZ) currently has a large detention area on the south side of the property that is drained using a manually operated pump to discharge to a control structure located across the levy just south of the subject property. SAMES Inc. was contracted to assess the existing conditions of the inlet control structure, pumps, and electronic controls currently in place. The intent being to provide similar pumping capacity while providing the ability for the pumps to operate automatically with the capability to upgrade to remote monitoring and operation (SCADA). Using historical data, the drawdown time for the detention pond was used to calculate the flow rate of the existing pump. Through coordination with an accepted pump vendor, an axial flow pump was selected to replace the existing pump. The requested control features also required coordination with an MEP engineering firm (DBR) as well as AEP to determine if any upgrades to the power distribution system were required. The existing electrical infrastructure was suited to the proposed upgrades and pump motor requirements. The existing inlet control structure was assessed for structural integrity and safety. While structurally sound, it was observed through topographic data and site visits that the earthen side slope of the detention area near the inlet control structure exceeded the maximum allowable slope of 2H:1V. City of McAllen did not wish to perform any improvements to the detention pond therefore it was proposed to extend the concrete rip rap at either side to a point where the required slope was achieved, providing additional bank stability in this area of the pond. Using as-built drawings provided by McAllen the proposed duty point of the pump was established since there were to be no upgrades to the existing discharge forcemain. Final deliverables included construction plans, technical specifications, and cost estimate to support McAllen's bidding processes

Offsite Sanitary Sewer Improvements for Mid-Valley International Industrial Park Subdivision, Weslaco, TX

Client: City of Weslaco
255 S Kansas Ave, Weslaco, TX 78596
Albert Aldana, City Engineer
(956) 968-3181

Contract Value: $100K
Start/Stop:

Project Description: : Design of sanitary sewer lift station to service the new Mid Valley International Industrial Park Subdivision located within City of Weslaco city limits. The proposed lift station was designed to service approximately 700 acres of mixed land uses including existing residential, commercial, industrial, and future developments. Existing and future flows were determined using historical data where available and review of as-built utility drawings. Existing Lift Station #26 was assessed for potential rehabilitation by evaluating pump capacities, structural integrity of existing concrete wetwell, and general site conditions. Due to a lack of available depth and poor condition of the existing discharge forcemain; it was determined that rehabilitation would not be feasible. Therefore, the new lift station design also accounted for the interception of sanitary sewer flows to existing Lift Station #26, which was decommissioned following construction, testing, and city acceptance. The scope of work included the design of approximately 9,500 linear footage of forcemain piping through Weslaco, TxDOT, and HCCID #9 Right-of-Way. The forcemain is to discharge to the receiving sanitary sewer manhole of Lift Station #12. Due to the proximity of existing roadways to the proposed forcemain, traffic control plans were provided as part of the construction documents. A final cost estimate and technical specifications were also included as part of the construction documents for the proposed scope of work.

Offsite Sanitary Sewer Improvements for Heights on Wisconsin Phase III, Edinburg, TX

Client: City of Edinburg
415 West University Drive Edinburg TX 78539
Peter Hermida, Engineer
(956) 388-8211

Contract Value: $1.9 M
Start/Stop:

Project Description Relevant scope: Design of new sanitary sewer lift station to service Heights on Wisconsin Subdivision located within City of Edinburg city limits. The proposed lift station was designed to service approximately 700 acres of residential and future developments. Existing sanitary sewer flows were determined using as-built utility drawings provided by City of Edinburg and other private utility entities. Future anticipated flows were determined using TCEQ, SAWS, and City of Edinburg Construction Standards. Pumps were selected by generating a system curve of the proposed improvements and coordinating with vendors to provide a practical option that meets all applicable standards and regulations. The discharge forcemain was designed to outfall to an existing sanitary sewer manhole located at the intersection of Veterans Blvd and Wisconsin Rd, approximately 1000 feet away from the subject property. Due to the proposed forcemain alignment's proximity with existing roadways, a detailed traffic control plan was included as part of the

construction documents. An approved final cost estimate and technical specifications were included in the construction documents.

Wastewater Treatment Plant Drying Beds Rehabilitation, La Villa, TX

Client: City of La Villa
916 Mike Chapa Rd La Villa, TX 78562
Antonio Barco, City Manager
(956) 262-2122

Contract Value: $183K
Start/Stop:

Project Description: Relevant scope: SAMES was contracted by the City of La Villa to provide TCEQ permitting, surveying, civil engineering and construction administration services for the rehabilitation of two sludge drying beds. Survey services included conventional topographic data collection. Civil engineering services included the design of drying bed filter media and drains, flatwork, sludge pipelines, pipe fittings and valves, and a new sludge pump. This project consisted of the rehabilitation of two existing sludge drying beds that were reported to be leaking into the ground below. The existing wastewater treatment plant was originally designed for 0.580 MGD with a final phase of 0.78 MGD, which was considered when specifying the proposed waste activated sludge pump to discharge sludge into both drying beds. With a limited budget, SAMES decided to keep in place the existing retaining walls and only demolish and rebuild flatwork as necessary. The waste activated sludge line was routed to both drying beds to maximize use of the existing facilities. SAMES is coordinating efforts with TCEQ to obtain amended discharge permits for the sludge drying beds.

SAMES provided schematic plans for review and once approved, will provide plans and specifications approved for construction. At the onset of the bidding phase SAMES will coordinate the advertising and bid procurement process, assist the City of La Villa with the pre-bid meeting and bid opening, prepare final bid tabulations, and issue a recommendation for award. Once a contractor is selected SAMES will conduct the pre-construction meeting, review and approve all material submittals, provide monthly status reports and oral presentations (as needed) to the city, coordinate the construction work, process contractor requests for information and monthly payment requests. At substantial completion SAMES will conduct a final walk-thru and prepare the punch-list of pending issues, then process the close out documents and submit final as-builts to the City of La Villa

Drainage Improvements for Storm Sewer Systems 204 and 252, Harlingen, Texas

Client: City of Harlingen
24200 FM 509, Harlingen, TX 78550
Luis Vargas, PE, CFM, City Engineer
(956) 216-5223

Contract Value: $61K (A/E), $508K (Const.)
Start/Stop: 10/10/2023 - 03/10/2024

Project Description: SAMES was contracted to update two of the City of Harlingen's storm sewer systems to meet current standards. This project was part of a larger effort by the City to analyze various storm drain systems for improvements using funds acquired from the American Rescue Plan Act of 2021. The two drainage systems analyzed serviced the Lazy Palms subdivision in the northern part of the city and the Sun County Estates subdivision near Vela Middle School and totaled approximately 2,664 linear feet of storm drains with 22 inlet/outlet structures. During the design phase, SAMES faced numerous challenges stemming from the location of existing water and sewer utility pipelines and lot services. We resolved crossing conflicts by coordinating with both the City and Harlingen Waterworks System to pothole an existing 20" water transmission line to verify that our proposed outfall pipes would not be in conflict. SAMES also dealt with the existing grades of the subdivisions, where the relatively flat street grades made fitting larger storm drains difficult. We managed to create an effective design by utilizing concrete arch pipes and proposing retrofit improvements to several curb inlets to increase their inflow capacity. Overall, the scope of work included topographic and boundary mapping, including sealed and signed surveys for drainage systems and current utility locations, as well as potholing waterline depths and designing two drainage systems' worth of stormwater upgrades, including suggested pipelines, curb intake adjustments, and outfall structures. SAMES prepared "approved for construction" documents such as technical specifications, plans, and an estimate of the expected cost of construction. We also provided support for procurement, bidding paperwork services related to procurement, participation in pre-bid conferences, and letter of recommendation for award to the City. During construction SAMES provided construction administration services and addended the pre-construction meeting, reviewed and addressed contractor RFIs and submittals, coordinated the final walkthroughs, reviewed close-out paperwork, and ensured the contractor submitted as-built plans for record keeping to the City of Harlingen.

ADDITIONAL REQUIREMENTS

Insurance

SAMES carries Professional Liability in the amount of $3,000,000, Commercial General Liability, Workers Compensation, and meet all County and State insurance requirements. An exhibit of our current certificates of insurance is included at the end of this section to demonstrate current and active required coverage.

Professional Services Agreement

SAMES has read the sample Professional Services Agreement included with the City of Edinburg's RFQ packet and will meet all prerequisite requirements. Furthermore, if selected, we agree to enter into such an agreement.

Contact Information

Firm principal, Saul D. Maldonado, PE, will serve as the Primary Point of Contact for any correspondence regarding this Statement of Qualifications. Mario A. Garcia, Director of Engineering at SAMES and proposed Project Manager for this contract, will serve as the Secondary Point of Contact for correspondence regarding this Statement of Qualifications and, if awarded a contract resulting from this submittal, will thereafter serve as the primary point of contact for all contract related information. CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
AWARDING OF BIDS
Agenda Item No: 10.B.
2024-2026 Real Estate Appraisal Services Rotation

1. **Agenda Item:**
Consider Awarding RFQ 2024-004, Real Estate Appraisal Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise. [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

2. **Description:**
On occasion, the City of Edinburg requires Real Estates Appraisal Services on City projects, which require this type of specialty. The qualified firm(s) selected should be experienced in the field of general appraisals as well as commercial appraisals and have extensive experience in right-of-way appraising. It is expected that the qualified firm(s) selected will have a sufficient level of innovation and appraisal expertise to carry out the projects without constraints to produce documents in a timely manner. The firm must be prepared to assure the City of Edinburg that key personnel indicated in their qualification statement will maintain their role in each project and that their present workload is such that each project will be completed on or before the due date. The rotation is for potential projects between October 2024 through September 2026. Projects to be funded in the upcoming fiscal years, as prioritized by the City Council.

On Tuesday, July 30, 2024, Request for Qualifications for RFQ 2024-004, Real Estate Appraisal Services. A total of three (3) Request for Qualifications were received and opened. The requests for qualifications were reviewed by staff and all met the criteria set out in the Request for Qualifications.

The following qualified firms listed in alphabetical order have submitted Statements of Qualifications in response to this RFQ:
1. Appraisal Haus
2. Leonel Garza Jr. & Associates*
3. Scroggin Appraisal Services

*Denotes on current two year (2022-2024) rotation

Limiting the selection of firms between 1 and 3 will insure each firm will obtain a project as it arises. The current 2022-2024 rotation has 1 firm and they have received approximately 4 projects.

3. **Staff's Recommendation:**
Approve Awarding RFQ 2024-004, Real Estate Appraisal Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise.

1. Introduction

1.1. Summary

The City of Edinburg's Engineering Department is currently seeking to retain a rotation list of qualified professional Real Estate Appraisal Services to provide Appraisals. The term of the contract will be two (2) years from 10/01/2024 – 09/30/2026. The services request is to provide the following services: appraisal of real estate properties for acquisition, lease, financial and/or strategic planning and other informational interests and purposes by the City. Generally, the selected real estate appraiser(s) will be expected to perform the services in accordance with the Scope of Services and in accordance with the requirements of this solicitation. The City of Edinburg reserves the right to issue multiple awards under this solicitation as deemed in its own best interests.

2. Scope of Work

2.1. Scope of Services

The City of Edinburg is seeking statements of qualifications from firms interested in providing the City with the services of a licensed real estate appraiser(s) to provide Real Estate Appraisal Services on an "as needed" basis. The required services will consist of the appraisal of real estate properties for acquisition, lease, financial and/or strategic planning and other informational interests and purposes by The City. Generally, the selected real estate appraiser(s) will be expected to perform the services in accordance with the Scope of Services and in accordance with the requirements of this solicitation.

1. The real estate appraiser shall perform at a minimum the following tasks:

A. Provide "fair market value" for viable real estate acquisitions by the City;
B. Prepare market analysis reports that will establish "fair market value" on properties;
C. Research markets and identify potential properties' values selected for acquisition or disposal by the City;
D. Provide professional opinions and reasonable conclusions on value in land developments, business viability, tax appraisals and eminent domains on the City properties and surrounding areas;

E. Prepare comparable reports on the City properties or potential properties as required.
F. Assist the City personnel and/or Broker Agent in the evaluation of real estate acquisition process;
G. Present oral presentations to the City Board of Trustees, as requested by the City; and
H. Ensure all State of Texas laws and procedures regarding real estate appraisals are followed.
I. Appraisal Report Review

2. The firm(s) is to provide real estate appraisal services for various properties on an as needed basis. Services may include, but are not limited to, typical appraisal services pertaining to:

A. Single family structures;
B. Multifamily structures and complexes;
C. Commercial properties including retail, industrial and office;
D. Vacant land, including residential and commercial; and
E. Mixed Use.

3. Appraisal services must comply with all provisions of the Uniform Standards of Professional Appraisal Practice (USPAP), the USPAP Competency Rule, as well as all provisions of local, state and federal applicable laws, ordinances and regulations and may include the following:

A. Income approach appraisals;
B. Cost approach appraisals; and
C. Comparison approach appraisals.

4. Selected firm(s) must be licensed and/or certified in accordance with the Texas Appraisal Licensing and Certification Act, Occupations Code, Title 7 –Practices and Professions Related to Real Property and Housing, Subtitle A –Professions Related to Real Estate, Chapter 1103 – Real Estate Appraisers amended September 1, 2005 and any future amendment.

STATE OF TEXAS	**§**	**AGREEMENT BETWEEN THE CITY OF EDINBURG AND PROJECT MANAGEMENT CONSULTANT FOR PROFESSIONAL SERVICES PURSUANT RFQ NO. XXXX-XXX**
COUNTY OF HIDALGO	**§**	
CITY OF EDINBURG	**§**	

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **PROJECT MANAGEMENT CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit ”B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

Section XXI
Notice of Governing Law for State and Federal Grant Projects

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

Edinburg, TX 78541

RE: RFQ No. 2024-4

Mr. Hinojosa,

Thank you for the opportunity to provide the City of Edinburg information on Appraisal Haus LLC. I have completed the Request for Qualifications electronically via the portal: https://secure.procurenow.com/portal/cityofedinburg. I am confident that Appraisal Haus LLC meets and exceeds the qualifications/requirements set forth by the City of Edinburg. Given the opportunity, Appraisal Haus LLC will conduct and provide services that are comprehensive and timely for the City's projects, and I look forward to establishing a working relationship with the City of Edinburg.

Respectfully submitted,

George J. Salazar II, Certified General Appraiser
Appraisal Haus LLC

For
The City of Edinburg

"Request for Qualifications-Real Estate Appraisal Services Rotation"
RFQ No: 2024-4

To: Mardoqueo Hinojosa, City Engineer/Engineering Director
City of Edinburg Engineering Department
415 W. University Drive
Edinburg, TX 78541

In accordance with the requirements, and subject to all laws and regulations of the United States and state and local laws, the undersigned respondent proposes and commits to furnish all labor, equipment, material, software and services as set forth in the documents hereinbefore mentioned. The undersigned further agrees, upon acceptance of the its qualification, to execute a contract and/or Purchase Order issued by the City of Edinburg for performing and completing the work described in the RFQ Appraisal Services Rotation requirements/specifications and instructions.

Respondents acknowledge receipt of all the pages of the documents referenced in the "Request for Qualifications-Real Estate Appraisal Services Rotation" presented in connection with this procurement. Respondent understands that the City of Edinburg reserves the right to reject any or all qualifications and further reserves the right to design the evaluation criteria to be used in selecting the lowest and best qualification.

Respondent agrees that this qualification shall be good and may not be withdrawn for a period of ninety (90) calendar days after the scheduled closing time for receiving qualifications, as contained in the Requirements.

Respectfully submitted,

Respondent: George J. Salazar II, Appraisal Haus LLC

PROPOSAL
"Request for Qualifications-Real Estate Appraisal Services Rotation"
RFQ No: 2024-4

PURPOSE

Appraisal Haus LLC submission of Professional Services Request for Qualifications - Real Estate Appraisal Services Rotation 2024-4 for purpose/opportunity to be considered for the rotation list of qualified professional Real Estate Appraisal Services to provide Appraisals for the term of two (2) years from 10/01/2024 – 09/30/2026. Appraisal Haus LLC agrees to provide the following services: appraisal of real estate properties for acquisition, lease, financial and/or strategic planning and other informational interests and purposes by the City.

INTENT

The services to be provided under this RFQ shall be in accordance with and shall meet all specifications and/or requirements as shown in the solicitation for RFQ 2024-4.

SUBMITTAL ELECTRONICALLY

https://procurement.opengov.com/portal/cityofedinburg

INDEMNIFICATION CLAUSE

Appraisal Haus LLC agrees to indemnify and save harmless the City of Edinburg, from all suits and actions of every nature and description brought against them.

UNDERSTANDING THE PROJECT

Appraisal services/appraisal review services for the City of Edinburg may include the valuation of whole properties or partial acquisitions. Appraisal Haus LLC is thoroughly familiar with the requirements of both types of assignments.

Appraisal Haus LLC will consider all State of Texas requirements as well as additional client requirements when appraising properties for the City of Edinburg. If any Federal funding would be included for acquisition or construction purposes it would be necessary to comply with the requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of1970 (the Uniform Act).

Each appraisal shall be developed as specified by the City of Edinburg. The appraisal report shall indicate the current market value of the subject property as per the date of on-site and/or off-site inspection without project influence as indicated by the scope.

The inspection is limited by the permissibility of the subject owner as per the date of the report. In the event an on-site inspection is not permitted, the appraiser shall continue the inspection off-site. Once the appraisal has been completed the report shall be delivered to the client.

Once negotiations have commenced, the appraiser shall be available to answer any questions or concerns by the property owner and assist the negotiator as needed.

In the event a consensus cannot be made as to the market value, the appraiser shall be prepared to continue and prepare condemnation proceedings of which will be billed at an additional cost. This service shall continue until all trial and/or other court proceedings are concluded in the acquisition of the subject property.

If corrections or changes are necessary for the appraisal report, then the revisions and changes will be completed within three (3) business days.

FIRM INFORMATION

I, George J. Salazar II, am the principal appraiser for Appraisal Haus LLC. I have been a licensed real estate appraiser in the Rio Grande Valley since 2008. My clientele includes financial institutions, political subdivisions, private citizens, etc.

Firm Name, Address, Phone Number, and Contact Person regarding the Statement of Qualification:

Appraisal Haus LLC
502 W. Kuhn St.
Edinburg, TX 78541
Contact: George J. Salazar II, Owner
Phone: (956) 386-1500
Email: jaimesalazar@appraisalhaus.org

PERSONNEL AND STAFFING

George J. Salazar II, Certified Appraiser
Principal State Certified Appraiser for Appraisal Haus LLC directly responsible for property inspections and for preparation and delivery of appraisal reports and for all analysis and conclusions.

Andrew Wetegrove, Appraiser Trainee/Assistant
Provide research assistance such as preparing contract letters, securing deeds, subdivision plats, and appraisal district records, preparing maps, scanning exhibits, and report assembly.

Lorena C. Salazar, Bookkeeping Clerk
Bookkeeping duties consisting of accounts receivable, accounts payable, payroll and maintains all financial records for Appraisal Haus LLC.

Required Certifications and Submittal: Current licenses and/or certifications as required by the State of Texas are included.

Firm's Experience and Qualifications/Scope of Services: Appraisal Haus LLC is interested in performing appraisal/appraisal review and consulting services for the City of Edinburg. Appraisals and appraisal reviews will be performed based on the requirements of the City of Edinburg which are discussed as follows:

SCOPE OF APPRAISAL SERVICES

- Property appraisals will be based on "Fair Market Value" unless otherwise specified or requested. The appraisal report shall be bound, clearly labeled, and signed by the primary certified General Appraiser and any other certified General Appraiser and/or licensed Trainee which aided the process.
- All photographs used within the report must be originals. No digital photos shall be used for the subject property. Digital photos shall only be used for comparable sales. All adjustments to any comparable sales must be clearly explained in a narrative format. All comparable sales must be within a two year time frame. If any sales which have occurred prior to the two year limit, they must be clearly explained and added to the conventional three comparable sales typically used in the appraisal process.
- Current location maps of the subject property that will include, regional, plat, and flood maps. This information must be clearly labeled for the subject property.
- All reports shall be a "Self-Contained Narrative Report" unless otherwise requested and shall follow the 2014/2015 or most current Uniform Standard of Professional Appraisal Practice (USPAP) rules and regulations. Each appraisal report must be physically inspected, photographed, and personally signed by the primary General Certified Appraiser of the firm. Appraiser trainees may aid in the collection of the information; however, all analysis and conclusions must be performed by the primary General Certified Appraiser.

SCOPE OF APPRAISAL REVIEW SERVICES

- Review all appraisal reports for each property to determine consistency of values, supporting documentation related to the conclusion reached, compliance with the Uniform Standards of Professional Appraisal Practices.
- As a review of an initial and update appraisal are two separate and distinct appraisal assignments, the fees must consider the complexity of each separate assignment.
- Beyond delivery of the review appraisal of the initial and updated appraisal documents, the review appraiser can be called to provide preparation and testimony for any Special Meeting/Commissioners Court.
- Appraisal review reports will be completed within a negotiated timeframe and receipt of a fully executed purchase order.
- It is the City of Edinburg's sole option to require TXDot's form ROW-A-10 "Tabulation of Values" in the deliverable for appraisal review assignments.

Appraisal Haus LLC agrees to the following as requested by the City of Edinburg:

- Provide "fair market value" for viable real estate acquisitions by the City;
- Prepare market analysis reports that will establish "fair market value" on properties;
- Research markets and identify potential properties' values selected for acquisition or disposal by the City;
- Provide professional opinions and reasonable conclusions on value in land developments, business viability, tax appraisals and eminent domains on the City properties and surrounding areas;
- Prepare comparable reports on the City properties or potential properties as required.
- Assist the City personnel and/or Broker Agent in the evaluation of real estate acquisition process;
- Present oral presentations to the City Board of Trustees, as requested by the City; and
- Ensure all State of Texas laws and procedures regarding real estate appraisals are followed.
- Appraisal Report Review

Services may include, but are not limited to, typical appraisal services pertaining to:

- Single family structures;
- Multifamily structures and complexes;
- Commercial properties including retail, industrial and office;
- Vacant land, including residential and commercial; and
- Mixed Use.

Appraisal services must comply with all provisions of the Uniform Standards of Professional Appraisal Practice (USPAP), the USPAP Competency Rule, as well as all provisions of local, state and federal applicable laws, ordinances and regulations and may include the following:

- Income approach appraisals;
- Cost approach appraisals; and
- Comparison approach appraisals.

Qualifications and Recent Experience of the Firm: Our recent appraisal experience includes appraisals of unimproved land, subdivided lots, single family residential property, offices, warehouses, restaurants, and retail buildings. Special use properties include churches, event centers, and golf courses. In addition, Appraisal Haus LLC has been involved in the appraisal of several projects involving partial acquisitions of land for road widening, utility easements, and irrigation right of way (references available upon request).

Ability to Commence Services: Appraisal Haus LLC is committed to commencing services immediately upon negotiating a contract for services.

Familiarity with the Geographic Area: Our firm has over 20 years of appraisal experience in the Hidalgo County and surrounding areas. Our work encompasses all types of property and we have worked in almost every community in Hidalgo County.

Affirmative Action Programs: Appraisal Haus LLC does not discriminate against any employee or applicant for employment because of race, religion, sex national origin, or disability, unless those factors are bona find occupational qualifications necessary to the normal operation of the contractor.

Insurance Requirements: Commercial General Liability, Automobile Liability, Workers Compensation, Professional Liability Acord Certificate attached.

Statutory Compliance: Appraisal Haus LLC will comply with all applicable State & Federal laws, Executive Orders and Municipal Ordinances, and the Rules and Regulations of all authorities having jurisdiction over the work to be performed hereunder and such shall apply to the contract throughout, and that they will be deemed to be included in the contract as though written out in full in the contract documents.

Non-Discrimination: Respondent does not discriminate against any employee or applicant for employment based on race, religion, sex, national origin, or disability.

Jurisdiction: Contract(s) executed as part of this solicitation shall be subject to and governed under the laws of the State of Texas. Any and all obligations and payments are due and performable and payable in Hidalgo County, Texas.

Subcontracting: Appraisal Haus LLC will not subcontract the award.

REQUIREMENTS/SPECIFICATIONS

CITY OF EDINBURG

REQUEST FOR QUALIFICATIONS 2024-4

“REQUEST OF QUALIFICATIONS - REAL ESTATE APPRAISAL SERVICES ROTATION”

SECTION I

UNDERSTANDING OF THE PROJECT

FIRM HISTORY

Leonel Garza III, owner of Leonel Garza Jr. & Associates, LLC, situated at 1419 Dove Avenue, McAllen, Texas, leads a longstanding family-operated business with over 30 years of operation. Following the passing of Leonel Garza Jr. in 1998, Leonel Garza III assumed ownership of the firm. With over 20 years of specialization in right-of-way acquisition projects, Leonel Garza III has facilitated projects across several Texas counties, including Cameron, Hidalgo, Starr, Zapata, Webb, Nueces, and Brooks.

SCOPE OF APPRAISAL

The appraisal report aims to determine the current market value of the subject property as of the date of on or off-site inspection, devoid of project influence. The inspection scope is contingent upon the subject owner's permissibility on the date of the report. If on-site inspection is prohibited, the appraiser shall proceed with an off-site inspection along the project route. Upon commencement of negotiations, the appraiser shall remain available to address property owner queries and support negotiators. In the absence of a consensus on market value, the appraiser will prepare for condemnation proceedings, with additional costs billed accordingly. This service will persist until all acquisition proceedings conclude.

APPRAISAL METHODOLOGY

All appraisals will be based on market value derived from analyzing comparable sales, cost, and rental information in the surrounding markets. The report shall include specified originals and copies unless stated otherwise. Compliance with Texas State Law and USPAP mandates all licensed individuals involved in the appraisal process to sign the report. Each appraiser will contribute to report preparation.

PROPERTY INSPECTION

Property owners will receive a letter of intent for inspection. Access to the subject property is expected, with additional on-site inspections available upon request. In the absence of access, off-site inspection will proceed along existing road right-of-way.

MARKET ANALYSIS

Comparable sales will be analyzed for comparability and reliability in determining the unit rate applied to the subject. Sources for confirmation include Multiple Listing Service (MLS), local Realtors & Brokers, Real Estate Appraisers, and Hidalgo County Deed Records.

COMPLIANCE WITH RFQ 2024-4

All requirements outlined in RFQ 2024-4 fall under the scope of the assignment and will be integrated into each report.

COMMENCEMENT OF SERVICES

Garza & Associates is prepared to commence work on projects immediately upon negotiation of service contracts.

USPAP COMPLIANCE

The appraisal reports prepared by Leonel Garza Jr. & Associates LLC adhere strictly to the regulatory standards set forth by the Texas State Licensing and Certification Board, Texas Appraisal & Licensing Board, as well as the current Uniform Standards of Professional Appraisal Practice (USPAP) and guidelines established by the National Appraisal Institute. Our commitment to compliance extends to all services provided by our firm, ensuring alignment with relevant State, Federal, and USPAP regulations.

It is imperative to note that all appraisals conducted by our office undergo rigorous scrutiny and oversight. Each appraisal is personally inspected and photographed by the primary appraiser assigned to the project. This personal involvement ensures meticulous attention to detail and guarantees compliance with State, Federal, and USPAP requirements. Furthermore, the primary appraiser is responsible for certifying the accuracy of the appraisal report, affirming adherence to regulatory standards, and validating the market valuation analysis conducted for the subject property. At Leonel Garza Jr. & Associates LLC, our unwavering commitment to professionalism, integrity, and regulatory compliance underscores every aspect of our work, ensuring the highest standards of quality and reliability in our appraisals.

GEOGRAPHICAL COMPETENCY

All team members of Leonel Garza Jr. & Associates LLC possess intimate knowledge of the geographical area encompassing the Rio Grande Valley. Led by Leonel Garza III, Alma Oyervides, Gloria Casa, Elvira Vazquez, Monica Valdez-Garza, and Miguel Martinez were all born and raised in the Valley, granting them firsthand familiarity with its unique characteristics and nuances.

Thomas M. Davis, though born in Austin, Texas, boasts over twenty years of experience working within the Rio Grande Valley real estate market. Through his extensive tenure, Thomas has honed his expertise and developed a deep understanding of the region's dynamics, further enriching the collective knowledge base of our team.

This wealth of local expertise ensures that Leonel Garza Jr. & Associates LLC is uniquely positioned to provide comprehensive and accurate appraisals tailored to the specific intricacies of the Rio Grande Valley area, delivering exceptional value and insight to our clients.

SENATE BILL 18 TRAINING

Leonel Garza III has fulfilled the mandatory training requirements mandated by the Texas Department of Transportation at the Pharr District Office. Additionally, he has undergone comprehensive training in compliance with Senate Bill 18 and remains abreast of current case law developments.

Leonel Garza III's commitment to ongoing education and professional development ensures that Leonel Garza Jr. & Associates LLC remains at the forefront of industry knowledge and expertise, delivering high-quality appraisal services to our clients.

FIRM HISTORY

Leonel Garza Jr. & Associates, LLC is a reputable provider of real estate consulting services, specializing primarily in real estate appraisals and appraisal litigation support. With a focus on General Commercial Real Estate, Estate Valuations, and Right-of-Way Easement Acquisition and Defense, the firm offers a comprehensive range of services to meet diverse client needs. Led by principal officer Leonel Garza III, a Texas General Certified Real Estate Appraiser since 1998, the firm upholds a legacy of excellence established by Leonel Garza Jr., a highly respected figure in the field with over 24 years of appraisal experience.

The Right-of-Way Division of the firm specializes in conducting Real Estate Appraisals for various local and government agencies across South Texas. These appraisals adhere to the Texas Department of Transportation A-5 & A-6 Formats, also utilized for Local Participating Agencies (LPAs). With over 25 years of experience and extensive training in this field, Leonel Garza III specializes in acquisitions involving diminution of market value and property bisections. The division's expertise spans a wide range of acquisitions, including expansion of existing roadways, development of new roadways, utility easements, drainage or irrigation easements, damage assessment, cost-to-cure analysis, relocation assistance research, budget analysis, condemnation hearing, and trial support. Throughout its history, this division has produced over 1,000 reports, with notable projects such as an approximately 327-parcel project covering two counties showcasing the firm's capabilities and commitment to excellence.

Texas Department of Transportation (TxDOT)

Leonel Garza III is currently on the “Precertification List” for the Texas Department of Transportation. Mr. Garza also has an “Appraisal Contract” with TxDOT to perform appraisal reports for various State agencies included by not limited to the Texas Department of Transportation Division Section, Texas Attorney General Office Real Estate Division and other divisions of TxDOT.

PERSONNEL AND STAFFING

At Leonel Garza Jr. & Associates LLC, all staff members operate under the direction of Leonel Garza III. Each member of our team undergoes rigorous training programs tailored to their respective fields to ensure qualification to work on right-of-way and associated projects. Below is an organizational chart of the firm and their respective duties. Each staff member is vital to the overall completion of projects.

SUMMARY OF STAFF

LEONEL GARA III
CERTIFIED GENERAL REAL ESTATE APPRAISER, LICENSE: TX-1328375-G

Born and raised in the Rio Grande Valley and a real estate appraiser since 1995. Specializing in right of way acquisitions type reports for over 25 years in the Rio Grande Valley with a concentration of work within Hidalgo County, Texas. Mr. Garza has testified as an expert in Local, State and Federal Court and has been involved in over 500 eminent domain hearings.

THOMAS M DAVIS
CERTIFIED GENERAL REAL ESTATE APPRAISER, LICENSE: TX-1336454-G

Joined Garza & Associates over 20 years ago as a real estate appraiser. Trained under Leonel Garza III for over 5 years before becoming a State Licensed General Real Estate Appraiser. With a concentration on right of way acquisition type appraisals, Mr. Davis has also testified as an appraisal expert in Eminent Domain Hearing, and bankruptcy cases with the Federal Court. His expertise and concentration of work product has been primarily in Hidalgo County over the past 15 years.

MIGUEL MARTINEZ
APPRAISER TRAINEE, LICENSE: TX-1344042-T

Joined the Garza & Associates in 2018. Is currently a Real Estate Appraiser Trainee under the supervision and sponsorship of Leonel Garza III. Mr. Martinez, comes from an appraisal background working for a McAllen appraisal firm before moving to the City of McAllen Planning Department for over 11 years. Mr. Martinez brings his expertise in subdivision development and pre-development site analysis to the firm which is vital for eminent domain acquisition cases. Mr. Martinez was born and raised in McAllen.

GLORIA CASAS
SENIOR ADMINISTRATIVE ASSISTANT

Joined the firm in 2015

ALMA OYERVIDES
SENIOR ADMINISTRATIVE ASSISTANT

Joined the firm in 2002

MONICA VALDEZ-GARZA
BOOKKEEPER

Joined Garza & Associates over 15 years ago. Focus has been on office operations and management with a concentration in the bookkeeping and finance department handling payroll for staff.

ELVIRA VAZQUEZ
MAPPING SPECIALIST - Joined the firm in 2016 as a data entry specialist.

GARZA & ASSOCIATES

Form **W-9**
(Rev. October 2018)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

▶ Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give Form to the requester. Do not send to the IRS.

Print or type. See Specific Instructions on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.
Leonel Garza Jr. & Associates LLC

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☐ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☑ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ▶ S

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is **not** disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) ▶

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from FATCA reporting code (if any)

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.
1419 W Dove Ave Suite 1

6 City, state, and ZIP code
McAllen, TX 78504

Requester's name and address (optional)

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–			–				

or

Employer identification number

7	4	–	2	9	4	8	7	7	0

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here | **Signature of U.S. person** ▶ [signature] | **Date** ▶ 02/23/2024

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

GARZA & ASSOCIATES

CONTIGENCY PLAN

During any project, the Office of Leonel Garza Jr. & Associates LLC has maintained a contingency plan in the event one or more staff members are not available and or are affected by Covid 19. With remote desktop communication, we are available to work from home or other locations. We have multiple appraisers who have been trained in all aspects of the appraisal process in order to complete all assignments in the event one or more are not available to participate in a particular project. We have prepared the office for this type of scenario and others in the course of the past year pandemic and hurricane season. Our office is prepared to continue projects in the event there is a loss of power and or internet service with our multiple backup systems and remote work environments.

COMMENCEMENT OF SERVICES

Leonel Garza Jr. & Associates LLC is committed to performing our services immediately upon approval of work authorization.

AFFIRMATIVE ACTION

Leonel Garza Jr. & Associates LLC does not discriminate against any employee or applicant for employment based on race, religion, sex, national origin or disability.

ERRORS & OMISSIONS INSURANCE

Leonel Garza Jr. & Associates LLC does have errors and omissions insurance as required by the City of Edinburg.

CONTRACTED PRICE

During the bid for general appraisal projects, the proposal is based on total estimated hours required to complete an assignment. It is understood that prices afforded to other customers shall be afforded to the City of Edinburg as well, if the subject properties are located within the same market area and are similar in assignment.

EMPLOYEE PAYMENT

All appraisers and personal assistants of Leonel Garza Jr. & Associates LLC are paid on a salary basis in which all state, federal and social security withholdings are applied. It is understood that no employee is entitled to benefits received by the county civil service system.

ETHICAL STANDARDS

Leonel Garza III, the primary appraiser of Leonel Garza Jr. & Associates LLC, holds positions of responsibility within the Hidalgo County Subdivision Review Board and the Hidalgo Building Line of Adjustments Board. Appointed in 1999 and 2005 respectively, these roles, appointed by Hidalgo County Commissioner Oscar Garza, demonstrate a commitment to upholding ethical standards in local governance. However, it is crucial to note that these positions do not compromise the ethical standards mandated by county, municipal, and state regulations regarding real property valuation.

The Hidalgo County Subdivision Review Board's primary objective is to ensure adherence to proper standards established by Texas State Law and the Texas State Attorney General's Office. This oversight extends to proposed subdivision developments and landowners within Hidalgo County and its Extraterritorial Jurisdiction. Emphasizing quality of life, the commission ensures that utilities, property drainage, street access, setbacks, septic tank installation, and variances are compliant with regulations before submission to the Hidalgo County Commission for final approval. Discussions during these meetings do not involve property values, purchases, or sales of land by applicants.

Membership on the Hidalgo County Subdivision Review Board is voluntary, with appointments made by individual Precinct County Commissioners for a two-year term. Appointments are based on the individual's comprehensive understanding of real estate, right-of-way, easements, and other factors impacting raw land and proposed subdivision development.

Leonel Garza Jr. & Associates LLC acknowledges and embraces the ethical standards outlined in RFQ NO: 2024-4, as well as those established by the Appraisal Institute, Texas Licensing and Certification Board, and the current Uniform Standards of Professional Appraisal Practice. Copies of the certification page, along with assumptions and limiting conditions, are included in each appraisal report to uphold transparency and compliance with ethical guidelines.

SECTION III: FIRM EXPERIENCE AND QUALIFICATIONS

COMPETENCY

Leonel Garza Jr. & Associates, LLC provides a variety of real estate consulting services with primary focus on real estate appraisals and appraisal litigation support. The company specializes in General Commercial Real Estate, Estate Valuations, and Right-of-Way Easement Acquisition and Defense. The Principal officer is Mr. Leonel Garza III. Leonel Garza III has been a Texas General Certified Real Estate Appraiser since 1998. Leonel Garza III was originally trained by Leonel Garza Jr., a well-respected Real Estate appraiser who had roughly 25 years of appraisal experience at the time of his passing in 1998. Leonel Garza Jr. & Associates was established thereafter, and Leonel Garza III has continued in the appraisal business. In addition to the appraisal services, the company provides Real Property Tax Consulting Services. The purpose of this division is to support property tax owners in the verification of property tax assessment as promulgated by the Texas Property Tax Code.

The Right-of-Way Division of the firm conducts Real Estate Appraisals for various local and government agencies throughout South Texas. These reports conform to the Texas Department of Transportation A-5 & A-6 Formats which are also utilized for LPA's (Local Participating Agencies). Leonel Garza III has undergone extensive training in this field of work over the past 25 years. He specializes in acquisitions concerning diminution of market value and or property bisections. ROW experience extends to various types of acquisitions including, but not limited to, expansion of existing roadways, development of new roadways, utility easements, drainage or irrigation easements, damage assessment, cost to cure, relocation assistant research, budget analysis, condemnation hearing and trial support. Over the course of this company's history, this division has produced well over 1,000 reports with the single largest project being approximately 327 parcel projects covering two counties.

Leonel Garza III is currently on the "Precertification List" for the Texas Department of Transportation. Mr. Garza also has an "Appraisal Contract" with TxDOT to perform appraisal reports for various State agencies included by not limited to the Texas Department of Transportation Division Section, Texas Attorney General Office Real Estate Division and other divisions of TxDOT and the State of Texas.

DISCUSSION OF EXPERIENCE AND RECENT PROJECTS

FM 2220 -WARE ROAD WIDENING PROJECT (PHASE I)

This project was conducted in accordance with the standards outlined by the Texas Department of Transportation. Every effort was made to ensure thoroughness and accuracy in our appraisal process. All property owners were contacted, and each property underwent physical inspection. This included several tracts involving residential bisections and relocations of homesteads and businesses, presenting unique challenges that our firm is well-equipped to address.

Throughout the project, our entire team at Leonel Garza Jr. & Associates LLC actively participated. This included the primary appraiser, Leonel Garza III, as well as Thomas Davis and Miguel Martinez. Additionally, we conducted several condemnation hearings as part of the process, demonstrating our commitment to comprehensive and diligent appraisal practices. Our firm's extensive experience and expertise enable us to effectively meet the needs of our clients, even in complex situations such as those encountered in this project. We remain dedicated to delivering high-quality appraisal services that adhere to regulatory standards and serve the best interests of our clients.

PROJECT REFERRAL

Email: clascurain@senderotx.com

HIDALGO COUNTY DRAINAGE BOND PROJECT

This project was executed in compliance with the standards established by both the Texas Department of Transportation and the Hidalgo County Drainage Department. Throughout the duration of this project, our team ensured meticulous adherence to regulatory guidelines and industry best practices. To guarantee accuracy and thoroughness, every property owner was contacted, and comprehensive physical inspections were conducted on all properties involved. This encompassed several tracts, including those experiencing residential bisections and relocations, as well as instances where damage to the remainder of the land was evident. Despite the complexities presented by these challenges, our firm's extensive experience uniquely positioned us to effectively address the needs of our clients.

As part of the project, multiple condemnation hearings were conducted, underscoring our commitment to resolving issues and facilitating fair outcomes. The entire team at Leonel Garza Jr. & Associates LLC, including appraisers Leonel Garza III, Thomas Davis, and Miguel Martinez, actively contributed to the project's success. Our firm remains dedicated to providing top-tier appraisal services that not only meet but exceed the expectations of our clients. By leveraging our expertise and unwavering commitment to quality, we strive to deliver comprehensive solutions tailored to the unique requirements of each project.

SECTION IV: SCOPE OF SERVICES

LIST OF SERVICES

APPRAISAL SERVICES

At Leonel Garza Jr. & Associates LLC, all appraisals are conducted based on the principle of "Fair Market Value," which is determined through meticulous analysis of comparable sales, cost, and rental information within the surrounding markets. Each report includes specified originals and copies, as required, with all licensed individuals who have significantly contributed to the appraisal process signing the report in compliance with Texas State Law and USPAP regulations.

All appraisal reports are completed using the "current" USPAP requirements applicable from the date of order. Additionally, Leonel Garza Jr. & Associates LLC is committed to meeting client delivery day requirements, provided that all pertinent information regarding the subject property is made available at the time of the order. This includes tax information, surveys, and access to the property.

Our firm's commitment to excellence ensures that each appraisal is conducted with the highest standards of professionalism, accuracy, and compliance with regulatory guidelines, ultimately serving the best interests of our clients.

APPRAISAL REVIEW SERVICES

Due to the number of appraisal reports and on-going condemnation cases with the County and other local municipalities where Mr. Garza is the lead appraiser, it would be a conflict of interest for my company to prepare review appraisal reports for competing firms. Hence, we have limited our service for the RFQ to be for “Appraisal Services”.

APPRAISAL PROCESS FOR EMINENT DOMAIN CASES

WHOLE PROPERTY

In a right of way appraisal report, the term "whole property" or "parent tract" refers to the entirety of the property under consideration. It represents the entire parcel of land that is subject to appraisal, encompassing all its land area, improvements (such as buildings or structures), rights, and easements.

When conducting a right of way appraisal, the appraiser typically starts by analyzing the whole property or parent tract to understand its characteristics, potential uses, and market value. This analysis helps establish a baseline for assessing the value of the property and determining the impact of the proposed acquisition or project. The appraiser will examine various aspects of the whole property, including:

Land Area

The total land area of the property is determined by the survey provided and public information gathered from either deed records or the local appraisal district.

Improvements

Any structures, or site improvements that are contributory to the market value shall be included. The existing condition/depreciation, functionality, age are some of the economic factors taken into consideration for their contribution to market value.

Market Value

The appraiser determines the market value of the whole property by considering various economic factors that include but are not limited to the date of sale, relative location, available utilities at the time of sale, highest and best use and size of the sale. By thoroughly analyzing the whole property or parent tract, the appraiser gains a comprehensive understanding of its characteristics, market value, and highest and best use.

PART TO BE ACQUIRED

In a right of way appraisal report, a "part to be acquired" refers to a specific portion of a property that will be acquired by a government agency or other entity for a public project or development. This could include land or structures, such as buildings or infrastructure, that will be affected by the project and will need to be acquired in order for the project to proceed. This analysis will take into account a variety of factors, including the property's current use, its potential future use, any improvements made to the property, and the market value of similar properties in the area.

REMAINDER

In a right of way appraisal report, the “remainder before” and the "remainder after" refers to the portion of a property that remains after the portion required for the public project or development has been acquired. The appraisal report will review the market value of the subject in the before and after state to determine if any diminution or damages must be applied to the overall compensation of the part to be acquired.

DIMINUTION OF MARKET VALUE

Diminution of market value refers to the loss in value of a property that occurs as a result of a right-of-way acquisition. The appraiser will conduct a before-and-after analysis of the property to determine if any damages to the remainder market value exist due to the proposed acquisition.

COST TO CURE

This analysis is used for the replacement of site improvements required in the remainder after (i.e. fencing)

APPRAISAL METHODOLOGY

An appraisal report communicates the analysis, opinions, and final estimate of value of the subject property based on a scope of assignment. This is done in such a manner as to be meaningful to the client and not be misleading to the reader of the report. The appraiser follows certain processes in the appraisal of a property, starting with the identification of the "rights" to be appraised, the effective date at which the appraisal will be prepared, and the intended use of the appraisal. The appraiser will then identify the property, and discuss economic factors that may impact the value, such as, zoning, the neighborhood trends, highest and best use, access, size of the tract, etc. The appraiser uses these three traditional approaches to value, the cost approach, income approach and sales comparison approach to value as they apply to the subject.

SALES COMPARISON APPROACH

A major premise of the sales comparison approach is a review of sales that are most similar to the subject property that has been purchased in the market area. This is utilized with a paired sales analysis of these sales reviewed directly in comparison to the subject property. These similar properties are compared with the subject property to review economic factors used to develop an opinion of value. The appraiser reviews the adjusted unit values indicated for the subject property and selects a unit rate to be applied to the whole property, the part to be acquired and the remainder before and after.

COST APPROACH*

"In the cost approach, appraisers compare the replacement cost of the subject improvements to the cost to develop similar improvements as evidenced by the cost of construction of substitute properties with the similar utility as the subject property. The estimate of development cost is adjusted for market-extracted losses in value caused by the age, condition, and utility of the subject improvements or for locational problems. The land value as if unimproved is then added, usually based on comparison with sales of comparable sites with the same or a similar highest and best use. The sum of the value of the land and the improvements is adjusted for any existing property rights (e.g., leased fee, leasehold interests) included with the subject property, which are implicit in the two other approaches to value." The appraiser prepares a schedule of depreciated market value for the improvements using a combination of Marshall & Swift Valuation Service and data from local contractors, stores and other experts in the field. The appraiser will examine the age and condition of the improvements, quality of the construction, materials used in construction, and the functional utility structure and site improvements. In the event a structure that has contributory value to the whole property but is not affected by the acquisition, the appraiser may elect to utilize the assessed value determined by the local appraisal district. This will apply only when the remainder is not affected by the part to be acquired, which is the subject of the report. The final step in the cost approach is adding the underlying land value determined within the sales comparison approach.

INCOME APPROACH

"In the income capitalization approach, an appraiser analyzes a property's capacity to generate future benefits and capitalizes the income into an indication of present value. The principle of anticipation is fundamental to the approach. Techniques and procedures from this approach are also used to analyze comparable sales data in the sales comparison approach and to measure obsolescence in the cost approach."

The income approach assumes that a property's net income (which excludes expenses) has a measurable relationship to its most probable sale price. This approach to value is not applicable to the scope of this assignment nor is it reliable for the determination of market value of the parent tract or part to be acquired.

SECTION V: MISCELLANEOUS

Leonel Garza Jr. & Associates LLC does not have any State exemptions to any of the requirements in this procurement packet nor any proprietary documents to submit pursuant to this request for qualifications. Garza & Associates agrees and will adhere to all aspects of this procurement packet and accept the requirements set forth in RFQ 2024-4. Leonel Garza III is available to answer any concerns or questions during this process.

FEE PROPOSAL EXCLUSION
A fee proposal is not included within this submittal as required by RFQ.

SECTION VI: SCOPE OF SERVICES (AGREEMENT)

Garza & Associates understands the specifications of the “Scope of Services” and agrees the perform the task set forth under Section 4.1 of the City of Edinburg RFQ 2024-4.

Re: Project ID: 2024-4
Real Estate Appraisal Services Rotation

To Whom It May Concern:

I am pleased to present my Proposal for Real Estate Appraisals Services Rotation.

We are proud at Scroggin Appraisal Services to be the largest and leading provider of appraisal services in the Rio Grande Valley. Our staff includes five licensed/certified appraisers, one appraiser trainee, an appraisal assistant, an office manager and a Director of Operations. Established in McAllen in 1997, we have a long history of providing appraisal services to clients of all sorts for various intended uses. My personal appraisal experience includes an extensive range of nearly every property type over four decades. We are well equipped and staffed to execute your real estate appraisals in a timely and efficient manner. We have extensive experience working with numerous federal, state and local municipalities. These clients include the FDIC, TXDOT, CDI Head Start, AVANCE Headquarters, Edinburg Economic Development Corporation, Webb County C.A.A., San Juan EDC, City of San Juan, City of Mercedes, Harlingen Community Development Corporation, City of Harlingen, Housing Authority- City of Brownsville, Brownsville PUB, Brownsville ISD, Sharyland ISD, PSJA ISD, City of Alamo, City of Donna, City of South Padre Island and South Texas College. Additionally, I have extensive experience testifying as an expert on appraisals in numerous state and federal courts of law. I have also completed Yellowbook appraisals for The City of South Padre Island, The City of Los Indios and the Texas Civil Rights Project.

I declare that reasonable diligence has been used in responding to this proposal and that all information presented is accurate and complete.

I certify that neither Clark Scroggin and Scroggin Appraisal Services are not subject to an exclusion, debarment, suspension, or other disciplinary action by any government agency including but not limited to the U.S. Government or the State of Texas.

I believe that all requirements included in your Project ID are included in this document. Should any further information be required please let me know. Thank you for your consideration.

Best regards,

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
AWARDING OF BIDS
Agenda Item No: 10.C.
2024-2026 Right of Way Acquisition Services Rotation

1. **Agenda Item:**
Consider Awarding RFQ 2024-005, Right of Way Acquisition Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise. [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

2. **Description:**
On occasion the City of Edinburg requires ROW Acquisition Services on City projects which require acquiring land. The qualified firm(s) selected should be experienced in the field of Right-of-Way Acquisition Services, having experience but is not limited to: review appraisal, negotiation, escrow, title coordination, project management and administrative services and other informational interests and purposes by The City. It is expected that the qualified firm(s) selected will have a sufficient level of innovation and expertise to carry out the projects without constraints to produce documents in a timely manner. The firm must be prepared to assure the City of Edinburg that key personnel indicated in their qualification statement will maintain their role in each project and that their present workload is such that each project will be completed on or before the due date. The rotation is for potential projects between October 2024 through September 2026. Projects to be funded in the upcoming fiscal years, as prioritized by the City Council.

On on Tuesday, July 16, 2024, Request for Qualifications were received for RFQ 2024-005, Right of Way Acquisition Services. A total of six (6) Request for Qualifications were received and opened. The requests for qualifications were reviewed by staff and they all met the criteria set out in the Request for Qualifications.

The following qualified firms listed in alphabetical order have submitted Statements of Qualifications in response to this RFQ:
1. Bender Consulting
2. Briggs Field Services
3. Caso Law Firm
4. Clark Land Resources
5. Cobb, Fendley & Associates*
6. Halff Associates*

*Denotes on current two year (2022-2024) rotation

Limiting the selection of firms between 1 and 3 will insure each firm will obtain a project as it arises. The current 2022-2024 rotation has 3 firms and they have received approximately 2 projects.

3. **Staff's Recommendation:**
Approve Awarding RFQ 2024-005, Right of Way Acquisition Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise.

2. Scope of Work

2.1. Scope of Services

The City of Edinburg is seeking statements of qualifications from firms interested in providing the City with the services to provide Right-of-Way Acquisition Services on an "as needed" basis. The required services will consist of but is not limited to: review appraisal, negotiation, escrow, title coordination, project management and administrative services and other informational interests and purposes by The City. Generally, the selected firm will be expected to perform the services in accordance with the Scope of Services and in accordance with the requirements of this solicitation.

Consultant services may include, but not necessarily be limited to:

A. Appraisal Services - Consisting of reviewing property appraisals, preparation of appraisal reports. (However, the City reserves the right to contract directly with Appraisers independent of this contract and provide said appraisals and reports to the Right-of-Way Consultant.)

B. Negotiation Services - Consisting of negotiating with the property owners for the purchase of partial or full properties, right-of-way, easements, relocation and temporary construction easements (TCE's). Preparation of all letters and documents required including the offer letters, appraisal summary agreement for purchase, and other documents as required, including relocation. All negotiation services shall be in accordance with State of Texas statutes and other applicable requirements, including, but not limited to review and approval by the City and by the State. Note: Plat, legal description and deeds will be prepared by others.

C. Escrow and Title Coordination Services - Consisting of handling the escrow and title work.

D. Project Management and Administrative Services - Consisting of attendance at meetings, general consultation on right-of-way matters and all necessary tracking or clerical work associated with services provided.

E. Selected firm(s) must be licensed and/or certified in accordance with the Texas Appraisal Licensing and Certification Act, Occupations Code, Title 7 –Practices and Professions Related to Real Property and Housing, Subtitle A –Professions Related to Real Estate, Chapter 1103 – Real Estate Appraisers amended September 1, 2005 and any future amendment.

F. Written proposals will be requested from the on-call consultant when additional right-of-way services tasks are required. Specific efforts the City has identified, which may result in the need for additional right-of-way acquisition assistance include the following:

- Right-of-way acquisition and temporary construction easement associated with any City of Edinburg projects.
- Right-of-way acquisition and temporary construction easement associated with creating turn lanes at intersections.
- Easements associated with utility underground projects.
- Representation of City interests for an easement that would be granted to an outside agency wanting to construct across City owned land.
- Coordination of appraisals by others for the City to grant an easement for a utility line that will need to be placed within City property.
- Necessary right-of-way, easement, and TCE's associated with future Federal and Stat funded capital improvements projects or as requested by the City.

The written proposals will set forth the scope, personnel, and time of performance for the primary work task and will be approved through a task order under the agreement. Consultant selection will be based on qualifications as set forth in the Statement of Qualifications. Consultant selection will be at the sole discretion of the City. No consultant is guaranteed work.

STATE OF TEXAS	**§**	**AGREEMENT BETWEEN THE CITY OF EDINBURG AND PROJECT MANAGEMENT CONSULTANT FOR PROFESSIONAL SERVICES PURSUANT RFQ NO. XXXX-XXX**
COUNTY OF HIDALGO	**§**	
CITY OF EDINBURG	**§**	

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **PROJECT MANAGEMENT CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit ”B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

Section XXI
Notice of Governing Law for State and Federal Grant Projects

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

ABOUT BCI

For the past 17 years, we have stood at the forefront of our industry, taking on tasks in the nation's transportation, oil & gas, utility, and renewable energy sectors. Our commitment to excellence has propelled us forward, allowing us to not only meet but exceed expectations time and time again.

At Bender Consulting, we provide products and services that go above and beyond expectations while remaining affordable. We grasp the importance of achieving outcomes that not only satisfy but astound our clients. Day in and day out, our dedicated team works tirelessly to ensure that each project we undertake is executed with precision. Every project, every time.

From the smallest ventures to the grandest enterprise, we approach each with the same unwavering dedication and expertise. Our vast experience and knowledge empower us to navigate even the most intricate tasks with ease. Because of this, Bender Consulting prides itself on our ability to handle any project, regardless of size, scope, or complexity.

Our team of experienced land agents is a critical component that sets us apart from the competition. These career specialists are experts in their field and embody the highest level of professionalism and reliability. Their industry knowledge and commitment to our clients' needs ensure that every project we undertake is handled with the utmost care and attention to detail. Every project, every time.

Furthermore, we maintain rigorous internal quality controls to guarantee the highest standards of excellence throughout our organization. This commitment to quality and distinction is central to every step of our processes. From initial planning to final execution, we pursue efficiency and accountability.

I take pride in our work, past and future.. Our commitment to excellence, dedicated team of professionals, and steadfast determination to exceed expectations will always set us apart. As we move forward, we will embrace the challenges ahead and pave the way for innovation and success in our industry.

Every project. Every time.

OUR SERVICES & SOLUTIONS

Our team is dedicated to researching the best solutions to any project, whether simple or complex. From preliminary research to successful project completion, we work with you and your team of stakeholders every step of the way to ensure things keep moving forward.

Whether you are looking to supplement your existing project with qualified professionals who know how to get the job done or you're needing a team to take the lead from start to finish on any size of project, Bender Consulting has you covered.

LAND ACQUISITION

With our land acquisition services, you can rely on us to handle all the details of acquiring land or property, so you can focus on your core business and investment goals. Our services include:

Evaluating and appraising properties: We'll ensure that you are getting a fair and accurate price by reviewing comparable sales data, conducting site visits, and analyzing market conditions.

Negotiating and executing purchase agreements: We'll assist in negotiating terms such as price, financing, and closing dates, as well as handling any legal and regulatory requirements related to the acquisition.

Facilitating the acquisition process: We work with you to coordinate with owners, lawyers, and other relevant parties to ensure that the acquisition is completed smoothly and efficiently.

HYBRID PROJECT MANAGEMENT

Your project's success depends on having reliable and accurate information, that's why we use the most advanced and accurate software available to guide our recommendations.

Our team is constantly staying up-to-date with the latest developments in our industry and use this expertise to analyze your project data and provide recommendations based on the most accurate and current information available.

Whether you are planning a new construction project, conducting a land acquisition, or need support with consulting and project management, you can trust that our team will use the most advanced software and technologies to guide our recommendations and ensure the success of your project.

OUR SERVICES & SOLUTIONS (CONT'D)

TITLE RESEARCH

Before you make the commitment, it's important to ensure that the property has clear title and no outstanding issues. That's where our title research service comes in.
Services include:

Searching public records to identify the current owner and any liens, mortgages, or other encumbrances on the property

Examining deeds, mortgages, and other documents related to the property's ownership history

Verifying that all necessary documents are properly executed and recorded

Identifying any potential issues or disputes related to the property's title

Providing a report summarizing the findings of the title research

Assisting with resolving any issues or disputes that may arise during the title research process.

CONSTRUCTION SUPPORT & COUNSELING

Bender experts act as a liaison between contractors and landowners, so you can focus on the big picture.

We utilize the most advanced and accurate software to guide our recommendations, ensuring that your project is on track and running smoothly. Our team is trained in the latest technologies and stays up-to-date with industry developments and efficient solutions.

Whether you need help with project management, consulting, or any other aspect of your construction project, we are here to support you.

OUR TEAM

CHASE BENDER **Lead Project Manager**
Chase's background includes projects in all major oil and gas plays in the lower 48 states. He also brings over 17 years of experience in project management, land acquisition, and title procurement for the public utility and renewable energy sector.
Credentials: TREC licensing, International Right of Way Association, American Association of Professional Landmen

CARISSA J. HILL **Senior Project Manager**
Carissa J. Hill is a project manager bringing 15 years of combined utility and oil and gas experience, as well as 7 years of project management to our team. Carissa brings negotiation and organizational skills,
Credentials: TREC licensing, International Right of Way Association, American Association of Professional Landmen, Registered Professional Landman

RYAN KETTLE **Senior Project Manager**
Ryan Kettle is a project manager with 20 years of experience in the development of power line and pipeline layouts. He has negotiated across many industries.
Credentials: TREC licensing, International Right of Way Association, American Association of Professional Landmen, Permian Basin Landman Association

MATT DUFFY **Senior Project Manager**
Matt has 18 years of experience in acquisition and project management. Beginning with seismic agreements before transitioning into acquisition of oil and gas leasehold, title examination, and well-site surface-use agreements. For the past 12 years he has provided title examination and acquisition of oil & gas, utility, and electrical easements. He's led a team of ~30 agents acquiring electrical easements across multiple states.

FRED CHEEK **Senior Project Manager**
Fred is a U.S. Army veteran and retired from the White County Sheriff's Department after 20 years of service. He started in the oil & gas Industry as a permit and field agent on Fayetteville Shale in 2006. Fred continued in oil & gas, working as a Landman over the next 10 years, expanding his knowledge in title and acquisitions, including water procurement and overseeing tank battery construction.
Credentials: TREC licensing, International Right of Way Association

NICK WHITENER **Senior Title Manager**
Nick Whitener is a Title Manager with over 16 years of experience in research and review. He has worked in Arkansas, Michigan, Colorado, Kansas, Illinois, West Virginia, Oklahoma and Texas. Nick holds a Bachelor's of Business Administration and has a strong background in the field. With his extensive experience and knowledge, Nick is able to provide valuable insights and guidance to our clients, ensuring that they receive the highest quality title services.
Credentials: Certified Member - American Association of Professional Landmen, International Right of Way Association

OUR CLIENTS

We are pleased to present our proposal for Right of Way services, showcasing our collaboration with esteemed utility providers renowned for their reliability and excellence in service delivery. These partnerships ensure our capacity to meet and exceed project requirements, guaranteeing efficiency, sustainability, and innovation. Our most recentfull-service acquisition work with Entergry's Texas Substation and Crystal Substation projects in the Conroe, Texas area showcases the scope and ability of our team throughout the acuisition process.

Reference: RFQ #2024-5 Right-of-Way Acquisition Services

Dear Mr. Hinojosa:

In response to your Request for Statement of Qualifications (SOQ), **BRIGGS FIELD SERVICES, INC.**, (BFS) a prime consultant with over 28 years of experience, herewith submits our Statement of Qualifications to provide right-of-way acquisition services that include administrative services, acquisition of property rights, relocation advisory services and title curative & closings in accordance with the Property Acquisition Law, Eminent Domain Law, the Uniform Standards of Professional Appraisal Practice (USPAP), the Uniform Relocation Assistance and Real Property Acquisition Policies for Federal and Federally Assisted Programs (42 USC 61) as amended (URA), **CITY of EDINBURG** (City) and other local, state and federal regulatory agencies policies and procedures.

BFS is highly qualified to provide professional services in the areas of project management, right-of-way acquisition, right-of-entry, relocation assistance, title curative, and closing. We have provided previous services to the City of Edinburg consisting of the Veterans Boulevard Detention Pond Project. We have provided similar services to the Harris County Metropolitan Transit Authority, City of Houston, the Texas Department of Transportation, the Arkansas Department of Transportation, and other local and state agencies. BFS has a proven track record of delivering the required right of way timely and within budget.

BFS staff has the commitment from our top management as well as resources and systems in place to perform the above-selected services efficiently. Our team will provide and deliver to the City the following unique benefits:

- Over 28 years of real estate and property acquisition experience and relocation advisory services.
- Commitment to County from BFS management.
- Current experience and accomplishments in TXDOT Right of Way Management and FEMA hazard mitigation projects.
- Over 3,000 parcels were acquired, including more than 500 rights of entry and over 500 relocation assignments.
- Proven in-house quality control process directed and monitored by senior staff.
- In-house database tracking system, including schedules for project critical due dates and milestone completion dates.

The Principal/Project Manager is Mr. Kerry J. Briggs, who is authorized to negotiate and bind all contractual decisions on behalf of the BFS Team. Mr. Briggs's contact information is as follows:

Mr. Kerry J. Briggs
BRIGGS FIELD SERVICES, NC.
3920 Cypress Creek Parkway, Suite 350, Houston, TX 77068
Tel: 281-583-9400; Fax: 281- 583-9488; Direct: 832-541-8733
Email: kerry.briggs@briggsfieldservices.com;

During the project assignment, BFS will manage the Project Team's day-to-day operation from offices in the City of Edinburg and from our City of Houston, Texas headquarters. In preparing our proposal, no attempt has been made to induce any other person or firm to submit or not to submit a proposal. BFS is an "Equal Opportunity Employer." The firm does not discriminate in employment practices with regard to race, color, religion, age, sex, marital status, political affiliation, national origin, or disability. BFS presently has no interest, direct or indirect, which would conflict with the performance of services under this contract and shall not employ any person having a conflict in the performance of this contract.

BFS has no past or pending lawsuits, civil judgments, or criminal convictions. It has never been terminated from a contractual agreement for default. The firm is financially sound and will have no difficulty meeting the project's demands.

WHY THE BFS TEAM?

The BFS Team has demonstrated experience that meets and exceeds all the requirements set forth in RFQ. The following is a summary of why the team should be selected:

- BFS Team has adequate financial resources and the capability to obtain additional resources as required during the project's performance.
- BFS has diverse experience in project administration, right-of-way management, right-of-way acquisition, relocation assistance, property management, project management, permitting, and coordinated utility relocation.
- Certified and licensed appraisers for appraisal and review appraisal; team and staff members are pre-certified with TXDOT in their areas of expertise.
- Experience in the assessment of environmental reports, including obtaining a listing of contaminated sites (petroleum, solid/hazardous waste) and preparing written notification of any environmental concerns associated with the acquisition that could require environmental remediation.
- The BFS Team has the necessary personnel and management capability to perform the project and repeat clients demonstrate a satisfactory record of past performance.

BFS appreciates the opportunity to work with **the City of EDINBURG on this significant project. We are available to present our qualifications orally** upon request. We affirm that all information provided in our proposal is correct and accurate to the best of our knowledge.

Respectfully Submitted,

BRIGGS FIELD SERVICES, INC.

Kerry J. Briggs
Principal

1. ABOUT BRIGGS FIELD SERVICES

BRIGGS FIELD SERVICES, INC. (BFS), with headquarters in Houston, Texas, and a proposed project office in Edinburg, Texas, is a full-service right-of-way acquisition and support service company that provides a complete range of right-of-way support services to the private and public sectors. All right-of-way services shall be conducted in accordance with all local, state, and Federal laws and regulations, including, without limitation, the Uniform Relocation Assistance and Real Property Acquisition Policies for Federal and Federally Assisted Programs (42 USC 61), as amended (the Uniform Act), 49 CFR Part 24, as well as all applicable City of Carrollton and Texas Department of Transportation (TxDOT) policies and procedures. BFS has provided right-of-way services to TxDOT and other state transportation agencies. We recently completed eminent domain proceedings for the County of Benton, AR.

BFS provides a full range of right-of-way management and real estate services to public and private organizations that need to acquire property for public works projects. BFS maintains a staff of professionals with expertise in every phase of the right-of-way process, from route selections to property acquisition to project closeout. We currently have on staff over 20 qualified right-of-way agents and real estate professionals with an average of 15 years of experience acquiring rights of entries and property acquisition through negotiation, settlement, and eminent domain when necessary.

At BFS, we provide unique, innovative, and cost-effective solutions to the most challenging right-of-way projects. We offer a variety of project management, acquisition, relocation, and property management services to federal, state, county, and municipal governments. BFS's highly effective core team of professionals is experienced and knowledgeable in all right-of-way disciplines, ensuring that both large and small-scale assignments are handled efficiently and appropriately without compromising any attention to detail.

Our success over the past 28 years is a testament to the fact that we do not achieve by merely adhering to a rigid protocol. We have been established at the forefront of the professional real estate and right-of-way industries by proving time and time again that fresh ideas are synonymous with success. Our team offers an unmatched set of qualifications – project understanding, experience, and depth of resources – to provide the City with the best option for achieving its time-critical right-of-way acquisition objectives.

FINANCIAL STATEMENT

BFS is financially sound and will have no difficulty meeting the demands of any assignment **(Dun & Bradstreet No. 95-765-3942 and Tax ID No. 76-0399207)**. BFS has never been subject to any audit or removal by any governmental and/or public agency. Financial statements are available upon request.

BFS has the resources, availability, experience, and systems in place to efficiently perform the selected services. BFS meets all industry requirements, and our experienced staff ensures that we comply with the required performance schedule, taking into consideration our existing business commitments. We have adequate financial resources and can obtain such resources as needed. Our repeat clients demonstrate a satisfactory record of past performance.

BFS has no past or pending bankruptcies, lawsuits, civil judgments, or criminal convictions. We have never been terminated from a contract for default or any reason. BFS has never had any claim for professional omissions and/or errors.

1. SUB-CONSULTANT

BFS's proposed staff, including sub-consultants, committed to the project and delivery schedule. **Even though our corporate office is in Houston, we will work from offices in the project area to save on travel time and cost.** We commit our staff for the project's duration and can add additional personnel from Houston's corporate office. Our sub-consultant (The Watts Group) has recently worked with BFS in Edinburg, Texas. The business relationship with the Watts Group exceeds 10 years.

THE WATTS GROUP
REAL ESTATE APPRAISAL AND CONSULTING

THE WATTS GROUP (SUB-CONSULTANT – APPRAISAL REVIEW AND CONDEMNATION SUPPORT SERVICES)

Contact: Brian Watts, MAI, President

1. RELEVANT PROJECT EXPERIENCE

BRIGGS FIELD SERVICES, INC. (BFS) has diverse experience in right-of-way management, land acquisition, relocation assistance, property management, project management, permitting, and coordinated utility relocation. We have a proven track record of successfully providing services as described in RFQ and BFS Scope of Work.

The relevant projects have provided the BFS Team with the needed experience as required in the RFQ, including experience in right-of-way acquisition for Federal, State, and local government agencies in accordance with State Eminent Domain Laws and Federal Uniform Real Property Acquisition Policies Statutes. Additional past project experience includes the following:

- Acquisition and permitting of the right of way for highway and transportation, regional light rail projects, municipal water, and sewer line projects, and electric utilities.
- Right-of-way acquisitions that involve politically and culturally sensitive issues. Acquisition of right of entry permits and right-of-way negotiations for local public agencies.
- Administering a federally funded program relating to negotiation and acquisition of right of way and real property relocation, title research, title report, title opinion preparation, appraisal review, and property management.
- Management of railroad right-of-way; coordinated utility relocations for railroad expansion projects; title research; and damage claim settlements.
- Reviewed appraisals for determination of just compensation in compliance with all applicable rules and regulations. Developed and administered relocation advisory assistance plans.

This is a summary of the BFS relevant projects log, including the number of parcels acquired, property types, location, clients, and condemning agencies, as shown in the following table.

BFS will manage the project utilizing the project task force methodology for the organization and execution of this project. Project assignments will be based upon the discipline required after the issuance of a written work directive authorized by City. BFS will also utilize the Right of Entry and Possession and Use Agreement to bring properties in City possession and meet the scheduled project schedule.

All right of way services required shall be conducted in accordance with all local, state, and Federal laws and regulations, including without limitation, the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970, as amended (URA).

PROJECT EXPERIENCE AND QUALIFICATIONS

2. KEY STAFF PERSONNEL

To meet the CITY of Edinburg (City) needs and requirements, BFS has assembled a team that has worked together on previous projects and included right-of-way appraisers, acquisition agents, relocation assistance specialists project, and property management providers.

Kerry J. Briggs, ERW, Principal/Project Manager, is authorized to negotiate and bind all contractual decisions on behalf of the BFS Team. Mr. Briggs is a former right-of-way agent and engineering technician with the Union Pacific Railroad. He managed the railroad right of way in over 16 states, including right-of-way acquisition, relocation assistance, utility coordination, license agreements, lease management, legal description, and plat reviews. He is a certified easement/right-of-way agent by the Texas Real Estate Commission.

Glenda Briggs, SR/WA, R/W-NAC, R/W-AMC, is the Utility Relocation & QA/QC Manager. Mrs. Briggs has over 25 years of right-of-way acquisition experience. Over the past years, Ms. Briggs' vast work experience includes working in both the public and private sector on utility relocation projects. She is knowledgeable of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

Amelia Pellerin, SR/WA, is the Acquisition Manager. She is a licensed Texas real estate broker with over 28 years of experience in real estate acquisition services throughout Texas. Mrs. Pellerin will be responsible for the internal quality control review for all acquisition assignments.

Linda Norwood is a Relocation Assistance Specialist. She has over 30 years of experience as an established relocation professional. She has provided permanent and temporary professional relocation services to transit districts, the Department of Transportation, water districts, economic and community development agencies, redevelopment agencies, non-profit housing agencies, municipalities, public housing authorities, and private developers. She is knowledgeable of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

Brian Watts, MAI (Watts Group) is our Review Appraisal and Condemnation Support. He is a certified Texas real estate appraiser with over 30 years of appraisal experience on multiple infrastructure projects. He will be responsible for the independent review of appraisals by City selected appraisers. Watts Group has previously provided similar services on the recent project for BFS.

Other BFS team members have years of experience in municipal, transportation, and transit-related projects and a working knowledge of the U.S. Transportation Department (FTA), Federal Highway Administration (FHWA), Federal Uniform Relocation Assistance Policies Act of 1970 (as amended) (URA), Uniform Standards of Professional Appraisal Practice (USPAP), and TxDOT Right of Way guidelines.

Key members of the BFS Team staff have direct project experience providing acquisition and relocation assistance services for municipal, transportation, and public works projects in Texas and other states utilizing both Uniform Relocation Assistance and Real Property Acquisition Act of 1970 (as amended) and several states Department of Transportation guidelines and local assistance procedures including TxDOT and other state and federal regulatory policies and requirements. A summary of key personnel experience is shown below.

PROJECT EXPERIENCE AND QUALIFICATIONS

TABLE 3 - KEY PERSONNEL/TASK MANAGER EXPERIENCE MATRIX

KEY STAFF	TITLE	DESIGNATION	AVAILABILITY	FIRM
Kerry J. Briggs	Principal/Project Mgr.	TREC ERW Agent	80%	BFS
Glenda Briggs	QA/QC Manager	SR/WA, R/W-NAC, R/W-AMC	As Needed	BFS
Amelia Pellerin	Acquisition Manager	SR/WA, Notary Public	100%	BFS
Linda Norwood	Relocation Manager	HUD Certification	80%	BFS
Luis Perches	Property Mgmt.	SR/WA, R/W-NAC	100%	BFS
Brian W. Watts	Appraisal Review	MAI	As Needed	Watts

Other BFS team members have years of experience on municipal and transportation-related projects and a working knowledge of the Federal Highway Administration (FHWA), Federal Uniform Relocation Assistance Policies Act (URA), FEMA Hazard Mitigation, and TXDOT procedures and guidelines. The following experience matrix summarizes project team key personnel, including education level and associated agencies' experience.

The BFS team will manage the project utilizing the project task force methodology project's organization and execution. Project assignments will be based on the discipline required after the issuance of a written work directive authorized by City.

ACQUISITION, CONDEMNATION, PROPERTY MANAGEMENT AND RELOCATION STAFF

Amelia Pellerin, SR/WA, will lead the acquisition staff with two agents with both the Texas licensing and Uniform Act requirements. Acquisition staff includes three staff members with SR/WA designation. Lisa Erkila will lead the relocation assistance staff. Staff includes two relocation agents. Brittany Kilgore will lead the property management staff of 2 agents. The following experience matrix summarizes acquisition and relocation, property management, and condemnation/eminent domain staff, including education level, real estate licensing, and experience with all associated agencies.

APPRAISAL STAFF

Brian Watts, MAI (Watt Group), will be our review appraisal. He will provide independent review appraisals for City selected appraisers. The following experience matrix summarizes review appraiser, including years of experience, education level, real estate licensing, and sub-consultant association.

TABLE 5 - APPRAISERS STAFFING MATRIX

PERSONNEL	ASSIGNMENT	YRS. EXP.	EDUCATION	REAL ESTATE APPRAISER LICENSE NUMBER	FIRM
Brian W. Watts, MAI	Review Appraiser Expert Witness	30	BBA	1326490	Watts
Leonel Garza, III	Review Appraiser Expert Witness			1328375	Garza

All staff identified above are available for full-time assignment if required by City scope or work authorizations.

3. STAFF AVAILABILITY

As stated in the Project Management Approach, BFS Team is committed and prepared to handle the project professionally and expeditiously. We recognize that our role is complementary and will ensure county and community needs are addressed throughout the term of the project contract and beyond.

The matrix shows staff by job classifications, including the expected number of work hours per year and percentages of total hours over the duration of Project. Adjustments to percentages of total hours shall be provided if warranted by changes to the City's scope of work and/or work authorization.

The following matrix summarizes project team readiness and availability to perform and meet the Project schedule.

TABLE - JOB CLASSIFICATIONS AVAILABILITY MATRIX

BRIGGS FIELD SERVICES, INC.
Right of Way Acquisition Services
For
The City of Edinburg

Organization Chart

WORK PLAN AND APPROACH TO TASKS IN PROPOSED SCOPE OF WORK

The City of Edinburg (CITY) proposes to secure professional Right of Way Acquisition Services for projects in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (Uniform Act), Federal and State laws and regulations, and TXDOT Right of Way policies and procedures. The general scope of services includes but is not limited to Tasks one (1) through fourteen (14) as spelled out in the RFP. consisting of Administration and Project Management, Appraisal Services, Appraisal Review, Negotiation Services, Closing Services, Relocation Assistance Services, Property Management Services, Appraisal Updates, Appraisal Review Updates, Initial Waiver Valuation Services, Initial Waiver Valuation Review, Waiver Valuation Updates, Waiver Valuation Review Updates.

TASK 1- ADMINISTRATIVE AND PROJECT MANAGEMENT

Briggs Field Services (BFS) will provide project management services for all functions and tasks. The assigned project manager will be assigned to the project for the duration of the project. The project will be managed and administered from offices located in Houston and Edinburg, Texas. BFS will participate in the preparation of Task Orders (TO), monitor and track each task order, manage plans and schedules, and coordinate and manage real property functions and tasks required under contract at the direction of CITY to meet CITY overall project schedules and ensure completion of functions and tasks based on the project timeline.

BFS staff will attend the Kickoff Meeting and prepare Progress Reports using standard scheduling software to prepare and report project schedules. The Project Manager will provide information, reporting, and assistance to CITY, as required, on project issues related to complex negotiations, program scheduling budgeting, condemnation, and eminent domain proceedings, and Right of Way Certificates as required by the CITY. BFS will assist in informational presentations concerning land acquisition procedures at formal public hearings. BFS will develop a Risk Management Plan, administer subcontracts, prepare and submit invoices, and provide database management to ensure all required data is entered into the CITY database. BFS will provide the final contact report and participate in the final meeting.

PROJECT METHODOLOGY & STAFFING

Our experience matrix shows staff to be assigned to the project and the depth of knowledge and experience that we are prepared to commit to this project. BFS will utilize the project task force methodology for the organization and execution of this project. Project assignments will be based upon the discipline required after the issuance of a written work directive authorized by CITY.

PROJECT MEETINGS

BFS team members will be assigned to the CITY project, if required, for the duration of the project. Weekly project coordination meetings will be conducted to discuss the project. Joint meetings of the participants will be conducted to address specific issues rather than programmed. It is recommended that weekly status meetings with all participants be conducted to discuss the project status. Project meetings during COVID-19 will be by Zoom, conference call, or other electronic apps to allow for safety measures.

PROBLEM RESOLUTION

BFS Project Manager will work closely with the CITY to resolve any problems. Problems to be addressed will also be submitted to the Quality Assurance Manager for his/her review and approval. Weekly staff meetings will be held to allow for technical direction and to discuss any problems to assure that all functions are within total compliance with the statutory requirements and guidelines of the Uniform Relocation Assistance and Real Property Acquisition Policies Act and amendments thereto of the U.S. Department of Transportation, the Federal Transit Administration, Caltrans, and the CITY as it relates to land acquisition, relocation assistance, and real estate appraisal for the project.

REPORTS FUNCTION

BFS proposes to utilize various software to prepare the necessary reports for the CITY. We understand the report function plays a vital role in the work process. Reports will be generated using the city's guidelines. All reports will be generated using various software, including SharePoint, e-Builder, Microsoft Word, Excel, Access, Microsoft Project Management, SharePoint, and others, as directed by the city.

Excellent communication from the project start-up is essential. A kick-off meeting is recommended. Guidelines will be given to each person working on the project during the start-up phase to ensure proper documentation. The required information will be compiled daily to keep the report information current. Each person assigned to the project will know what is expected of them individually as well as the whole Team.

TASK 2 – ESCROW & TITLE COORDINATION SERVICES

BFS will provide title services through a reputable title company. The title company will provide title certificates and supporting documents, provide title commitments, including 30-year title searches in accordance with CITY and TXDOT Right of Way procedures, furnish updates orrevised information to the CITY and TXDOT's Right of Way Engineering Section when the change of ownership following certificates obtained during rights of way plan preparation. BFS and Title Company will perform title curative and prepare proper instruments of conveyance and releases upon determination of title status.

TASK 3 – INITIAL APPRAISAL SERVICES

BFS sub-consultants will provide real estate appraisals and appraisal reviews in accordance with the Uniform Act and the requirements of 49 CFR Part 24, Section 24.103, and Section 24.104 that are intended to be consistent with Professional Appraisal Practice (USPAP). An appraisal review will be performed. If necessary, corrective action will be taken to provide the CITY with recommendations for fair market values and ensure proper formats are utilized and required standards are met. BFS will ensure appraisal reports are complete; calculations are correct, and correct typographical errors.

TASK 4 – INITIAL APPRAISAL REVIEW SERVICES

Review appraisers will make recommendations that the fair market values be utilized in determining fair market values and have the capabilities to provide expert witness testimony when required. Review Appraisers will meet all USPAP requirements and standards. Review appraisers will have

no relationship to BFS and the appraiser firm that prepared the appraisal. No appraiser who prepares an appraisal report on the project will be allowed to perform review appraisal activities.

TASK 5 – NEGOTIATION SERVICES

Utilizing the Uniform Act, CITY, and TxDOT Right of Way Manual, BFS will coordinate all phases of the acquisition process. All work for the acquisition task will be performed in compliance with the Guidelines, Standards, and Requirements for Right of Way Acquisition Services.

BFS will coordinate all phases of the acquisition process; Ensure all phases of the acquisition process are coordinated to meet all project schedules; Document the acquisition process and all work activities in a parcel diary; Maintain all records and documents, and prepare status reports throughout the acquisition process; Order Preliminary Title Reports prior to the acquisition process and coordinate all acquisition title requirements; Develop, present and negotiate all phases of the acquisition process using TXDOT standard documents; Coordinate all phases of escrow; Provide condemnation support, including Resolution of Necessity package preparation; Prepare all necessary documents; Ensure nondiscrimination in all phases of the acquisition process; Ensure compliance with Environmental Justice and Guidelines.

BFS will develop, maintain, and update project Logs to prepare status reports. It will also assemble necessary documents in accordance with right-of-way and construction plans, legal opinions, fair market value estimates, and other instructions as provided by CITY.

BFS will review title reports, appraisals and appraisal reviews, offer letters, waivers, instruments of conveyance, and other necessary documents before the actual acquisition process begins.

BFS will conduct negotiations for acquisitions of property in accordance with CITY and TXDOT guidelines and procedures. BFS will take the following actions on each tract to be acquired for the project:

1. Deliver acquisition brochures, plats, offer letters, unsigned agreements, and releases by personal contact and or registered mail.
2. Maintain a diary of the negotiator's contacts with property owners to document expedited negotiations, efforts to achieve amicable settlements, and responses to owner counter-proposals.
3. Submit acquisition documents to the CITY and recommend action for settlements in accordance with CITY and TXDOT procedures or recommend initiating eminent domain proceedings. BFS will provide continued support during the eminent domain process.

CONDEMNATION AND SETTLEMENTS

In accordance with the Uniform Act, BFS will provide assistance in acquiring parcels for which amicable settlements have not been reached prior to construction. We will make recommendations for settlements; and recommend parcels to be referred to the CITY Legal Department for rights of entry, legal settlements, and eminent domain proceedings.

SUPPORT TO ENGINEERING

BFS will provide title research, prepare necessary title reports to identify current landowners, and will assist the CITY in location studies, cost estimating, acquiring maps, and other documents. We will coordinate our efforts in amending title reports and documents, correcting errors, and plan changes. BFS will provide assistance for and during required land surveys. We will assist with right-of-way plan changes, as-built documentation, and related duties as directed by the CITY. A due diligence review of legal descriptions will be made to confirm legal descriptions are correct.

TASK 6 – CLOSING SERVICES

In accordance with the Uniform Act, BFS will coordinate closings on behalf of the CITY, which will consist of delivering instructions to landowners, scheduling closings, and obtaining closing documents from property owners, mortgage companies, title companies, and the CITY. We will assist the Title Company in assembling closing packages, deliver pertinent documents to the closing company, and represent the CITY at closings. BFS will coordinate with the closing officer to ensure instruments conveying title of rights of way to the CITY are appropriately filed in appropriate county offices public records, ensure disbursements are correctly made and promptly, ensure delivery of documents and warrants for acquisition payments to property owners and other duties as directed by CITY.

TASK 7 – RELOCATION ASSISTANCE SERVICES

In providing relocation assistance and relocation advisory services, BFS will adhere to the Uniform Relocation Assistance and Real Property Acquisition Act of 1970 (as amended) "The Uniform Act" and Title 49 CFR Part 24. BFS will ensure that in providing Relocation Assistance services, all displaced persons are treated fairly, consistently, and equitably so that such persons will not suffer disproportionate injuries as a result of the project for the benefit of the public.

Relocation assistance services will include but not be limited to providing relocation advisory assistance, providing displaces and CITY with continued information on business and residential replacement properties, calculating monetary entitlements and informing displaces in writing of their calculated entitlements, including specific comparable replacement property, issuing appropriate notices, inspect replacement housing and assure replacement housing is decent, safe and sanitary. BFS will maintain contact reports and other related obligations in accordance with CITY and TXDOT standard procedures.

TASK 8 – PROPERTY MANAGEMENT

BFS will inspect property and identify and create records of improvements on parcels or tracts. After negotiations, BFS will verify the property owner's intent regarding the retention of the improvements. BFS will perform an initial inspection of the project in accordance with the Right of Way Division Operations Manual. BFS will take photographs to document all improvements within the right of way and search for underground storage tanks, tank pumping systems, and other hazardous materials.

Periodic inspections will be made to determine the progress of the removal of improvements that have been retained by the property owner and to determine the method of disposal of improvements not retained. BFS will prepare a Removal and Disposal List of structures to be removed, including

buildings slabs, footings, foundations, wells, septic systems, storm cellars, and other man-made objects in the acquisition area. The Removal and Disposal List will be provided to the Right of Way Division to be incorporated into the construction plans and removed by the project contractor.
BFS will arrange and complete an asbestos inspection, collect samples for asbestos testing, and hire an asbestos testing lab and or asbestos abatement contractor to handle asbestos abatement in accordance with the Right of Way Operations Manual. BFS will prepare estimates for improvements to be demolished, solicit bids, recommend bid awards, and prepare demolition contracts. BFS will perform site inspection, upon completion of demolition. BFS will close the demolition by documenting the inspection and preparing an invoice for payment of the demolition contractor's invoice. BFS will provide right-of-way certification in accordance with the Department's Right-of-Way Operations Manual.

TASK 9 – APPRAISAL UPDATES

BFS will revise, update, or obtain new compensation estimates or appraisals as needed in accordance with responsibilities for On-Call Right of Way Acquisition Services.

TASK 10 – APPRAISAL REVIEW UPDATES

BFS will review appraisal reports for each tract to determine the consistency of values and compliance with CITY and TXDOT policies and procedures, and the Uniform Act approves the fair market value and recommend just compensation to the CITY in accordance with responsibilities for On-Call Right of Way Acquisition Services.

TASK 11 – WAIVER VALUATION

BFS will work closely with the CITY to determine when an appraisal is necessary for uncomplicated valuation problems and when the proposed acquisition is estimated to be $10,000 or less based on the available data review. BFS will utilize the TXDOT Right of Way Division Operations Manual as a guide for preparing the "Compensation Estimate."

TASK 12 – WAIVER VALUATION REVIEW

BFS will ensure the Review Appraiser will check waiver valuations to ensure consistency with other waiver valuations and appraisals done on the project.

TASK 13 – QUALITY ASSURANCE

Include checks and balances to ensure that CITY is getting a quality service and to ensure that all functions are within total compliance with the statutory requirements and guidelines of the Uniform Relocation Assistance and Real Property Acquisition Policies Act and amendments thereto as it relates to land acquisition, relocation assistance and real estate appraisal for CITY projects as well as the following:

1. To assure that the Management Review Checklist is explained, offered, or discussed with landowners and to be in compliance with all applicable laws, rules, and regulations.
2. To ensure that acquisition functions are in accordance with the CITY and TXDOT policy and procedures in preparing Appraisal Summary Statements, Contract Clauses, Title Exceptions, preparation of the Property Data Sheets, and Eminent Domain procedures.

3. BFS is aware of the importance of protecting the present and future Federal funding involved in this project. BFS will be precisely guided by the requirements of Sections 301 and 302 of Title III Uniform Real Property Acquisition Policy.
4. To ensure that monthly Project Status/Progress Reports are submitted to the Contract Administration by the fifth working day of each month, they will include the status of negotiations on each parcel, a summary of activities for the past month, specific problems encountered, and actions needed to resolve specific issues. They will also identify progress against the time schedule for each item and provide a forecast of completion dates from current progress.
5. To ensure complete and accurate records are maintained, including a separate file with appropriate reference by parcel number and grantor surname for each parcel to include originals of all correspondence.
6. To control cost by using a practical approach to acquisition and reviewing the required tasks and scheduling the proper personnel to complete the task in the most economical manner, reviewing the proposed project in the field as well as maps to budget for the required work properly. Submit an estimate to budget for the required assignment or each directive. Extra work and change orders will be documented appropriately to adjust costs in the directive.

TASK 14 – SAFETY

BFS is committed to providing a safe and secure work environment. BFS maintains a Safety Manual to be distributed to all employees and sub-consultants. Monthly safety meetings will be scheduled, and safety will be stressed at all project meetings. BFS safety measures will meet the standards required by the CITY. Safety will be the priority as we work to meet the project needs of the CITY.

TYPICAL RIGHT-OF-WAY ACQUISITION/REAL ESTATE TRANSACTION ISSUES

BFS understands that in providing right-of-way services, it is impossible to identify each task associated with an acquisition project. BFS is committed to working with CITY in every way possible to ensure the success of the project and to keep the project on schedule for construction. BFS will provide those services that we consider normal to the acquisition process that includes but is not limited to obtaining Agreements for Possession and Use; Obtaining rights of entry; Obtaining agreements for road or railroad relocations; Coordinating project site visits with regulatory agencies; Negotiating damage contracts, borrow agreements; acquiring encroachment permits, and ground lease agreements, Coordinating the issuance of encroachment permits; Coordinating Utility Relocations, Identifying and clearing existing encroachment permits, Demolition, and clearance of improvements; Completing real property acquisition estimates; Providing escrow and title services to include title insurance and possibly litigation guarantees; and property management services, as required.

APPENDIX

KERRY J. BRIGGS, ERW

Principal/Project Manager

BRIGGS Field Services, Inc.

Kerry J. Briggs, ERW, Principal/Project Manager, is authorized to negotiate and bind all contractual decisions on behalf of BFS Team. Mr. Briggs has over 30 years of experience in the right of way profession. ON-CALL RIGHT OF WAY ACQUISITION SERVICES, VETERANS BOULEVARD DETENTION POND PROJECT, JOB CA0101

City of Edinburg, Edinburg, TX

November 2018, voters Passed two propositions for; Proposition C – four drainage Detention projects and Proposition D – four street projects. City Council selected four engineering firms for the four drainage projects; Quintanilla, Headley & Associates (Doolittle Detention Pond), Javier Hinojosa Engineering (Sugar Detention Pond), Sam's Engineering & Surveying (Schunior Detention Pond) and Guzman & Munoz Engineering & Surveying (Veteran's Detention Pond). Construction is scheduled to be done in several phases with the last phase estimated to begin in May 2021. This project is designated to improve the drainage system within the City of Edinburg. The drainage city system will allow residents not deal with any floods during heavy rain activity. The City of Edinburg broke ground on Phase 1 of the Veteran's Detention Pond Drainage Conveyance and Street Improvement Project on August 12, 2021. The project is being funded by a $30M bond for drainage improvements was approved by Edinburg that citizens during the November 2018 election. City of Edinburg has since been working diligently on flood relief and street improvements for its residents throughout the city.

Briggs Field Services, Inc. was assigned the above-referenced project with the City of Edinburg (CITY) Right of Way Services for the Veterans Boulevard Project required Title Services and title curative on a 7.94 acre parcel that was identified to have approximately 75 undivided interest holders (heirs). Services provided included project management, title and closing, appraisal services, appraisal review services, negotiations for acquisition, property management, and eminent domain support services on 2 parcels. All services were provided according to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (Uniform Act), federal and state laws and regulations, and City of Edinburg policies procedures.

The work performed by Briggs Field Services is being managed by the City of Edinburg Engineering Department. All services have been subject to review and approval by the City of Edinburg.

ALCOA ROAD ROUNDABOUTS IMPROVEMENTS

Saline County, Benton, AR

The Federal Highway Administration studied four-way intersections and reported 2.7 million collisions, 900,000 injuries, and 9,117 fatalities. Alcoa Road has long been the primary vehicle artery connecting Benton and Saline County areas to major interstates. It was also used as a thoroughfare for workers heading to the Alcoa plant in Benton. As the population of the area has increased, so has traffic on Alcoa Road.

In 2016 The Arkansas Highway and Transportation Department awarded Weaver-Bailey the $14 million roadway improvement project along Alcoa Road. The construction consisted of excavation, embankment, railroad crossings, and Alcoa Road widening to four lanes from I-30 to the Benton Parkway, including four roundabouts.

Roundabouts are designed to accommodate vehicles of all sizes, including emergency vehicles, buses, farm equipment, and semi-trucks with trailers. Oversize vehicles and vehicles with trailers may straddle both lanes while driving through a roundabout.

Many roundabouts are also designed with a truck apron, a raised section of pavement around the central island that acts as an extra lane for large vehicles. The oversize vehicle's back wheels can ride up on the truck apron so the truck can efficiently complete the turn, while the raised portion of concrete discourages use by smaller vehicles. Because large vehicles may need extra room to complete their turn in a roundabout, drivers should remember never to drive next to large vehicles in a roundabout.

Our scope of work included appraisal services, appraisal review services, negotiation services for property acquisition, relocation assistance services, title and closing services, property management and disposal of property services, title curative, and condemnation support services as required for preparations for eminent domain filings. Appraisals and review appraisals were performed by BFS selected sub-consultants. Saline County managed work performed by Briggs Field Services. Services were performed for 56 acquisitions and 3 residential and business relocation services, including condemnation support services on one (1) business tract on the project.

All services were subject to review and approval by Saline County. Services were provided in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended and all, state and local statutes, rules, and regulations pertaining to the acquisition and relocation assistance on right-of-way projects.

EAST END & SOUTHEAST LRT CORRIDORS

Metropolitan Transit Authority, Houston, TX

The METRO light rail expansion, which includes multiple lines extending north, southeast, and west, is a $1.4 billion project. Metro opened two additional light rail lines in 2015, the Purple (Southeast) and Green (East End) Lines. Destinations served by these new lines include Texas Southern University, the University of Houston, BBVA Compass Stadium, and the Theater District. These new lines added another 9.9 miles of light rail. In total, Metro operates 22.7 miles of light rail service. Metro will reach approximately 18.6 million light rail boarding's in FY17.

History and progress have come together in a new Houston project, the Southeast Corridor of the Metropolitan Transit Authority of Harris County (METRO) 's light rail set to open in early 2015. The six stations along the route, connecting to downtown through the Ado/Stadium stop near BBVA Compass Stadium and ending at the Palm Center Transit Center, will inform riders about the history of African Americans in Houston and Texas.

The stations along the route, many in the predominantly African American neighborhoods, highlight eight different themes of Black History: Pioneer, Community, Emancipate, Educate, Contribute, Protect, Dream, and Empower. Each station's mural, which envelops the rider waiting on the platform, is designed to evoke a feeling of protection through the West African belief in the written words' protective power and the physical windscreen that the mural provides the visitors.

The East End Corridor runs through the historic East End with seven stations, including Magnolia Park Transit Center, BBVA Stadium, and the Theater District. The portion of the track closest to downtown will be shared with the Purple Line (Southeast). From the Ado / Stadium Station, passengers can transfer to the Purple Line and travel to the University of Houston central campus and the Palm Center Transit Center.

BFS provided right of way acquisition and relocation assistance for extension of East End and Southeast Corridors light rail expansion in Houston, Texas. Services provided included project management, planning, cost estimating, 137 acquisitions (parcels), and 73 relocations (residential and commercial). Work performed by BFS was acceptable to Metropolitan Transit Authority.

All Right of Way services were subject to review and approval by Metropolitan Transit Authority. Services were provided in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended and all, state and local statutes, rules, and regulations pertaining to the acquisition and relocation assistance on right-of-way projects.

ACQUISITION SERVICES - HSR 14-14 ROW #7

California High-Speed Rail Authority, Sacramento, CA

As the most extensive public works project in California history, the California High-Speed Rail Project presents an unprecedented opportunity to demonstrate efficient right-of-way acquisition methods while at the same time delivering fair, equitable, and consistent treatment of those affected. BFS was fortunate to have provided services on this landmark project.

In 2015, BFS was selected as a primary ROW services consultant to the California High-Speed Rail Authority (HSRA) to provide land rights/property acquisition services and relocation assistance for properties in the affected right-of-way. BFS and our partners worked on the acquisition and relocation of 117 parcels in the central valley area in California.

Throughout the HSR Project's project, BFS worked closely with the HSRA to suggest ways to reduce cost and improve schedule performance. Some suggestions were implemented and have had material improvement, while others have been held up due to conflicting requirements of the many partner agencies involved in the HSR Project.

The scope of work included appraisal services, appraisal review services, negotiation services for property acquisition, relocation assistance services, title, and closing services, property management and disposal of property services, and title curative and condemnation support services as required for preparations for eminent domain filings. Appraisals and review appraisals were performed by BFS selected sub-consultants. Our initial role was to handle right-of-way coordination from Merced to Fresno.

Work performed by Briggs Field Services was managed by HSRA. Services were performed for 117 acquisitions and 3 residential and business relocation services, including condemnation support services and property disposal services on the project. All services were subject to review and approval by California High-Speed Rail Authority.

Services were provided in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended and all, state and local statutes, rules, and regulations pertaining to the acquisition and relocation assistance on right-of-way projects.

References:
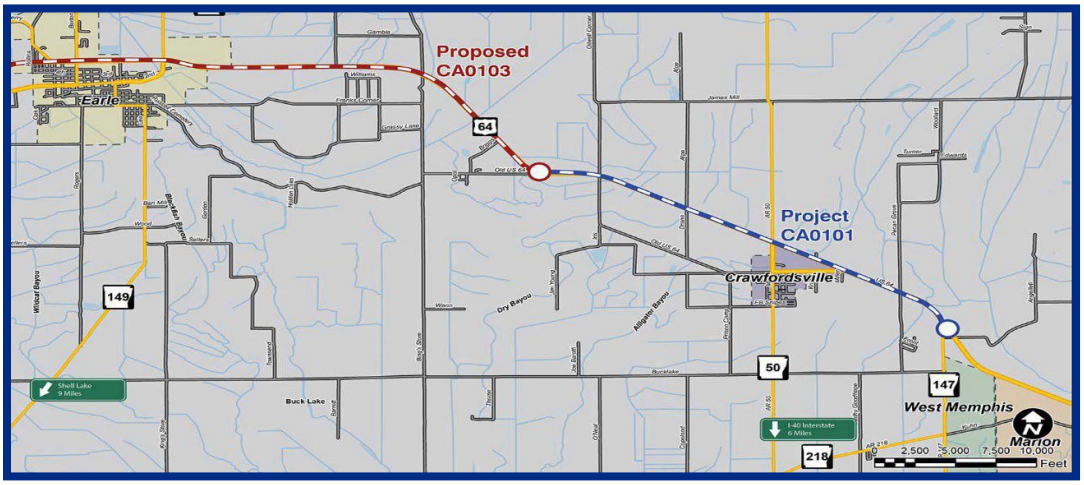
JENNIFER R. WILLIAMS, Division Head, Arkansas Department of Transportation, P.O. Box 2261, Little Rock, AR 72203; Phone: 501-569-2311

In 2009, the 87th Arkansas General Assembly (AGA) passed Act 374 to create the Blue-Ribbon Committee on Highway Finance. The committee was tasked with determining an equitable and adequate system to appropriately finance transportation improvements in Arkansas and propose and recommend highway finance legislation for the 2011 session.

The Connecting Arkansas Program (CAP) is one of the largest highway construction programs ever undertaken by the Arkansas Department of Transportation (ARDOT). In 2012, through a voter-approved constitutional amendment, the people of Arkansas passed a 10-year, half-cent sales tax to improve the state's intermodal transportation system, including projects that widen and improve approximately 200 miles of highways and interstates.



The design and construction of highway and interstate widening projects will be funded with the estimated $1.8 billion anticipated to accrue from 70% of the tax revenue. The remaining 30% of the tax revenue will be turned back to local governments for road and street projects – 15% each for cities and counties.

This project widened approximately 5.5 miles of Highway 64 to four lanes, generally extending from County Road 375 to Highway 147 in Crittenden County.

Briggs Field Services, Inc. was assigned the above-referenced project with the Arkansas Department of Transportation (ARDOT) (formerly Arkansas State Highway and Transportation Department) and has actively worked on the project since May 2015.

Services provided included project management, title and closing, appraisal services, appraisal review services, negotiations for acquisition, property management, and eminent domain support services on 34 tracts. All services were provided according to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (Uniform Act), federal and state laws and regulations, and AHTD's policies procedures.

The work performed by Briggs Field Services is being managed by ARDOT's program management consultantfor the Connecting Arkansas Program. All services have been subject to review and approval by ARDOT.

INSURANCE

1. STATEMENT OF INSURANCE

The following is a list of current insurance carried by **BRIGGS FIELD SERVICES, INC.** (BFS), including coverage amounts, agent, and expiration dates.

Workers' Compensation and Employers Liability as required by statute. Employer liability coverage is to be carried for each accident of $1,000,000. Insurer: Hartford Fire & PC Affiliates. Expiration Date: 10/19/2024.

ORIGINAL

Executive Summary

Caso Law Firm, PLLC ("Caso Law Firm" or "Firm") is ready and able to deliver exceptional real estate legal services to the the City of Edinburg . With a profound understanding of government-related real estate matters, our firm stands ready to meet and exceed the specific needs of the City of Edinburg in this specialized legal field.

At Caso Law Firm, we specialize in the intricate field of real estate within the governmental context, particularly in areas critical to the City of Edinburg's operations and growth. Our expertise encompasses a wide range of real estate services, including:

Texas Department of Transportation ™

Right-of-Way Easements / Acquisitions: We have a proven track record in managing right-of-way ("ROW") easements and acquisitions, essential for infrastructure projects. Our experience includes working on over $100 million in TxDOT projects and handling numerous eminent domain cases. Our experience goes beyond the numbers, our true value comes from our unparalleled experience and skill.

Caso Law Firm is well-equipped with the necessary tools and expertise to proficiently guide the the City of Edinburg through the complex legal landscape it encounters in acquiring right of way to deliver critical projects for the community.

Our firm focuses on both the legal aspects as well as the non-legal aspects such as psychology, safety, and a sense of belonging ensure success in the projects we undertake.

As proof of our excellence and commitment in real estate matters and ROW acquisition, both Caso Law Firm, PLLC and Garza & Associates are members of the International Right of Way Association, which serves the needs of 10,000 multi-disciplined industry professionals who acquire, manage, and transfer the land rights needed for building of both governmental and private agencies. The members of IRWA are recognized for their high ethical standards and proficiency gained through education, training, and certification. (www.irwaonline.org)

IRWA BUILDING A BETTER WORLD TOGETHER®

ORIGINAL

Appraisals: Our teaming partner is Leonel Garza, Jr .& Associates, LLC, which is licensed and/or certified in accordance with the Texas Appraisal Licensing and Certification Act, Occupations Code, Title 7 –Practices and Professions Related to Real Property and Housing, Subtitle A –Professions Related to Real Estate, Chapter 1103 – Real Estate Appraisers amended September 1, 2005.. Leonel Garza, Jr .& Associates, LLC provides a variety of real estate consulting services with primary focus on real estate appraisals and appraisal litigation support. The company specializes in General Commercial Real Estate, Estate Valuations, and Right-of-Way Easement Acquisition and Defense.

Garza & Associates has been performing appraisal services for local financial institutions in the Rio Grande Valley since 1998. The firm has extensive experience in appraising a variety of properties that include agricultural tracts, commercial tracts, apartments, shopping centers, medical office plazas, auto dealerships, office buildings, warehouses, government buildings, jails and holding facilities, concrete batch plants, subdivision development, hotels, and surplus properties.

Garza & Associates is also a member of the Appraisal Institute, a global professional association, with nearly 20,00 professionals in almost 60 countries throughout the world. Its mission is to advance professionalism and ethics, global standards, methodologies, and practices through the professional development of property economics worldwide. (www.appraisalinstitute.org).

Together, our firms have a robust portfolio in dealing with specific real estate legal services, including:

Real Estate Review and Closings: Our team excels in the detailed review and efficient handling of real estate closings, ensuring legal accuracy and compliance for the City of Edinburg's property transactions. As further explained, we have successfully managed over 250 real estate transactions in recent years.

Title and Boundary Disputes: Our firm is adept at navigating the complexities of title and boundary disputes, a critical aspect for managing county projects. We are familiar with surveying techniques and have developed a system to ensure accuracy in all transactions.

ORIGINAL

Eminent Domain: With extensive experience in over 100 eminent domain matters, we are well-equipped to handle these sensitive cases, balancing public necessity with legal precision.

Ad Valorem Taxation: Our expertise extends to managing legal aspects of ad valorem taxation, ensuring that the City of Edinburg's interests are well-represented and protected.

Pipeline Right-of-Way Easements: We are adept at navigating legal issues surrounding pipeline easements for water, sewer, oil, and gas, including permitting requirements.

Utility Line Easements: Our current involvement in an $80 million water and sewer line relocation project speaks to our capability in utility line easements.

Drainage Easements: We have a strong background in drainage easement projects, evidenced by our real estate legal services on major bond sales for drainage districts: multiple projects for recent bond sales for Hidalgo County Drainage District No. 1 and $22.5 million for Cameron County Drainage District No. 6.

Condemnation Authority Challenges and Easement Disputes: Our experience in validating the legality of a condemnation authority and resolving easement disputes positions us to effectively safeguard the City of Edinburg's interests. We are also familiar with inverse condemnation claims under the Texas Constitution.

Surface Use Agreements and Feasibility Studies: Our ability to manage long-term leases and conduct comprehensive feasibility studies aligns with county requirements for sustainable development.

Caso Law Firm is also proficient in buyouts and relocations in accordance with the Uniform Relocation Assistance and Real Property Acquisition Act (URA). Our firm also assists with abstract/title searches, permitting for right of entry, and coordinating with governmental agencies at all levels. Our negotiation skills and risk assessment capabilities ensure the City of Edinburg's real estate transactions will be handled with the utmost efficiency and foresight.

Prior Experience:

Our approach emphasizes efficient, solution-focused legal services while diligently protecting taxpayer resources. The following is a list of some of the governmental clients that our firm has assisted over the last several years:

ORIGINAL

Prior Experience

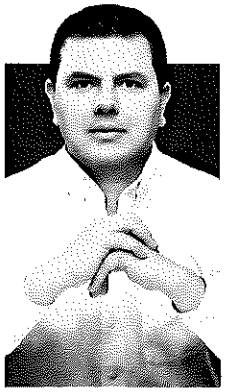
We have over a decade of legal experience assisting multiple governmental entities in matters related to real estate legal matters, making us an ideal partner for the the City of Edinburg :

> Hidalgo County, Willacy County, Cameron County, Bexar County, City of Mission, City of McAllen, Cameron County Drainage District No. 6, Military Highway Water Supply Corporation, City of Von Ormy, Hidalgo County Drainage District No. 1, City of Edinburg, and Santa Maria Independent School District.

We have further assisted these entities with real estate matters in compliance with both state and federal acquisition guidelines:

> Texas Department of Transportation ("TxDOT"); Texas Water Development Board ("TWDB"); and Texas General Land Office ("GLO").

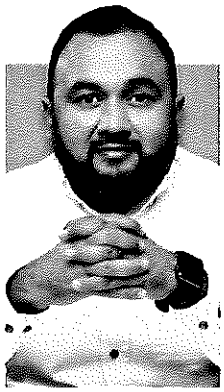
The Caso Law Firm Edge:



What truly sets Caso Law Firm apart is our exceptional team, imbued with a culture of success and a commitment to excellence.

Our skilled professionals are not just legal experts; they embody a deep-seated value system focused on compassion, community engagement, and creative curiosity. This ethos drives us to adopt cutting-edge technologies, such as Artificial Intelligence (AI) and Geographic

ORIGINAL



Information System (GIS) mapping, enhancing our efficiency and reducing costs. These tools enable us to improve real estate mapping processes and embrace globally recognized best practices in infrastructure real estate management.

Executive Team

Jose Luis Caso

Lee Reyes

Carlos Jasso

Oliver De La Garza

Martin Walker

At Caso Law Firm, we believe that showing compassion and empathy for all is paramount.

Caso Law Firm, PLLC currently possesses a cash reserve with an equivalent value of 24 months of payroll and firm expenses.

Legal Services - Experience

Law Firm Experience

Caso Law Firm, PLLC is uniquely positioned to offer comprehensive real estate legal services to the the City of Edinburg , combining a deep understanding of local government law with extensive practical experience in real estate.

Our Commitment:

We understand the challenges and opportunities that the City of Edinburg faces. It is tasked with providing the infrastructure backbone of a quickly-growing community. It is also tasked with overseeing many community programs. Beyond that, the price escalation in the price of materials and services makes it difficult to forecast costs and to maintain a conservative budget that maximizes every taxpayer dollar.

Our commitment to the City of Edinburg is to create legal solutions that will be practical and yield results.

Our commitment goes beyond the drafting of real estate instruments. We seek to be active partners with the City of Edinburg. As part of our commitment to excellence and results-driven approach, Caso Law Firm, PLLC has a proven track record of effectively managing and overcoming challenges in various projects for our clients:

- We recently played a pivotal role in securing additional MPO right-of-way ("ROW") funding for a project. This intervention was crucial for a client who faced budget overruns in Right of Way (ROW) due to unforeseen cost escalations caused by extended environmental processes. Although the initial ROW cost projections were accurate, the delays led to increased expenses. Our successful advocacy for additional funding was instrumental in getting the project back on track.

ORIGINAL

- In another notable project, we encountered community resistance fueled by rumors and misconceptions that the development would lead to flooding and dangerous crossings for children going to school. To address these concerns, our firm conducted several public meetings to clarify the project's objectives and benefits. This proactive approach in community engagement not only dispelled the rumors but also garnered overwhelming community support for the project. A picture of our public meeting is presented below:

- Furthermore, we recently tackled a challenging situation where there was insufficient MPO funding available for the ROW acquisition of a critical transportation project. Our strategic solution involved finalizing the negotiations of all utility relocations with significant cost savings. We then advocated for a transfer of funds from the utility relocation budget to the ROW budget, ensuring project delivery within budget.

At Caso Law Firm, we understand the lifecycle of a project intimately - from the initial conception and feasibility studies to funding the planning, acquisition, and design (PAD) stages, through to the construction and ultimate operation of the asset.

Our firm is dedicated to delivering successful outcomes, navigating each phase involving the purchase and management of real estate with expertise and commitment, ensuring that all environmental and regulatory requirements are met on all projects, to not only meet but exceed the expectations and needs of the City of Edinburg .

Who We Are:

ORIGINAL

Our firm has been operating for over a decade, primarily offering legal services to counties and special districts. Our firm has 12 employees, but Mr. Jose Luis Caso will serve as lead attorney for this project. Mr. Caso brings over 16 years of legal and government experience having himself worked as both a staff attorney and administrator for state and county agencies.

Our firm's extensive history in handling a wide range of real estate matters for various governmental entities equips us with the necessary expertise to address the diverse legal needs of the City of Edinburg .

Below is a detailed response to each of the categories requested in the present Request for Qualifications:

1. Pipeline Right-of-Way Easements

Caso Law Firm, PLLC's expertise in pipeline right-of-way easements ensures that our clients' interests are effectively represented in both the negotiation of easements and the resolution of any subsequent disputes. Pipeline right-of-way easements are a complex and critical aspect of real estate and environmental law, particularly in states like Texas with significant oil and gas industries. The nuances of these agreements involve not only the initial granting of the easement but also ongoing issues related to access, maintenance, and compensation.

One of the primary concerns in pipeline easements is the determination of fair compensation for landowners. Caso Law Firm, PLLC has extensive experience assessing the market value impact of the easement on the property and considering factors such as the easement's size, duration, and the specific use of the land. Furthermore, issues related to ingress and egress rights, restoration of the land post-installation, and potential environmental impacts are also critical considerations.

Our firm's expertise in pipeline right-of-way easements encompasses both negotiation and litigation aspects. We provide counsel to landowners to ensure that their rights are protected and that they receive just compensation for the use of their land. This includes advising on the intricacies of the easement agreement, such as terms of access, maintenance responsibilities, and environmental safeguards.

We are also familiar with ancillary issues pertaining to pipeline crossings, such as obtaining the necessary permits to operate and construct infrastructure above these assets.

ORIGINAL

Additionally, we are experienced in litigating disputes that arise from pipeline easements, whether they concern compensation, property damage, or environmental compliance. Our approach combines a deep understanding of real estate law with practical experience in dealing with utility companies and regulatory bodies.

2. Utility Line Easements

Caso Law Firm, PLLC, has demonstrated considerable expertise and experience in dealing with utility easements, a critical aspect of real estate law in Texas. Utility easements are essential for providing the necessary infrastructure for utilities like electricity, water, and gas, often involving agreements with utility or oil and gas companies for the placement of utility lines or pipelines.

Our firm's approach to utility easements is multifaceted, involving both the drafting and negotiation of easement agreements and litigating the scope and validity of such agreements when disputes arise. This dual capacity ensures that we can provide comprehensive legal services tailored to the unique needs of each client, whether they are a landowner, a utility company, or other entities involved in utility easements.

The complex nature of utility easements often requires a deep understanding of both statutory and case law. At Caso Law Firm our firm is well-versed in the intricacies of Texas easement law, enabling us to navigate the legal landscape effectively. This includes advising clients on the establishment and enforcement of easements, as well as representing them in legal proceedings if disputes cannot be resolved through negotiation.

We are also very familiar with irrigation districts and their channels. We are familiar with the compensation mechanisms and their potential arguments pertaining to governmental immunity in eminent domain. Moreover, we are familiar with permits for crossings that will allow irrigation channels to remain in place while delivering TxDOT or other infrastructure projects.

In summary, Caso Law Firm's extensive experience in utility easements reflects our commitment to providing knowledgeable and effective legal solutions in this vital area of real estate law. Whether it involves drafting easement agreements or representing clients in disputes, our firm is equipped to handle the legal challenges that utility easements present.

3. Road Easements

ORIGINAL

Handling over 500 agreements for roadway and utility easements, Caso Law Firm, PLLC brings extensive experience to this area. We specialize in securing linear projects, acquiring fee simple and easement rights for continuous corridors that may even cross challenging assets such as highways or railroads.

Our firm has extensive experience in drafting and recording plats, and reviewing documentation to safeguard county rights. Additionally, our expertise includes interpreting surveys and efficiently recording documents with the the City of Edinburg Clerk. We maintain a well-organized registry of filings to ensure seamless and easy access to our real estate files, including mapping out these assets in GIS to keep a clear inventory of assets.

Our firm is intimately familiar with the funding process through the Texas Department of Transportation through Advance Funding Agreements ("AFA") for right-of-way acquisition as well as through other state and federal agencies. Our firm also ensures compliance with environmental requirements and the Uniform Relocation Assistance and Real Property Acquisition Act ("URA").

In a recent case we were working on, a landowner refused to sell half an acre of land for less than $500,000. While our appraisal was originally for $26,000, the landowner had information that showed that he ran a horse rehabilitation program that yielded significant income. Our first approach was to determine if it was possible to reroute the road in order to avoid this confrontation. Due to a regional electrical line being located just south of the property, it was not feasible to reroute. We then undertook significant research and found that a transportation easement had been tendered to our client by a previous owner that both the surveyor and the title company had missed. With that information, we were able to successfully negotiate the acquisition of the parcel at the original appraisal value keeping the project within budget.

We now advise our governmental clients to obtain an easement for any assets it develops, rather than relying on the traditional method of using the "free" right of way. This approach is beneficial because if the City of Edinburg holds an easement and needs to relocate it (such as for road expansions), the responsible party like TxDOT will cover the relocation expenses.

Finally, we also recommend as a best practice to use title companies for closings of both easements and fee simple matters for large transactions. Title Companies offer title insurance at a nominal cost, which in turn protects the City of Edinburg for future claims that may not be foreseeable at the time of closing. Our firm has closed on hundreds of parcels with title companies, and we are familiar with their requirements and guidelines. We are ready and able to

ORIGINAL

use our expertise to guide the City of Edinburg to deliver projects in an expedited and compliant manner.

4. Implied Easements

In addition to our extensive experience, Caso Law Firm, PLLC is deeply committed to thorough research and nuanced understanding of various easement types, including blanket easements, easements by prescription, and particularly implied easements. Our firm recognizes the complexity and significance of these matters, especially in situations where legal rights are not explicitly documented but have evolved through usage or necessity.

A recent case exemplifies our expertise in this area. We assisted a government client in addressing a challenging situation involving a drainage ditch. This ditch, which had historically been submerged for over 50 years, presented a unique scenario. Our team conducted meticulous research and analysis of covenants and relevant case law. Leveraging this comprehensive investigation, we successfully argued that the land was effectively dedicated for drainage purposes, establishing an implied easement. This outcome not only served our client's immediate needs but also set a precedent for handling similar issues in the future.

Our approach to such cases is comprehensive, always considering the historical context, current legal frameworks, and future implications. We ensure that the City of Edinburg's interests are protected and advanced, particularly when dealing with the complexities of real estate law where explicit documentation may be lacking but the intention and usage clearly suggest legal rights.

In summary, our firm is not only experienced in conventional easement acquisition and documentation but is also skilled in navigating the intricate and often nuanced realms of implied easements. We believe this expertise will be invaluable to the City of Edinburg, ensuring that your real estate matters are managed with the highest level of professional care and legal acumen.

5. Drainage Easements

Caso Law Firm, PLLC's expertise in drainage easements extends beyond legal analysis to include substantial, hands-on experience in significant infrastructure projects. Our firm played a pivotal role in the assisting in projects in bond projects for Hidalgo County Drainage District No. 1, demonstrating our proficiency in handling complex financial and legal aspects of large-scale drainage projects. Additionally, our involvement in the $22.5 million bond sale for Cameron

ORIGINAL

County Drainage District No. 6, where we are actively engaged in acquiring 60 parcels for linear drainage projects, further exemplifies our capability in this specialized field.

Our work with entities such as the International Boundary and Water Commission (IBWC) underscores our ability to navigate the intricacies of drainage easements within diverse legal and environmental contexts.

A significant aspect of our work involves dispelling common misconceptions about drainage projects, particularly the fear of flooding due to creation of drainage ditches and channels. We address these concerns proactively, engaging in community education and public meetings. By explaining the engineering and legal safeguards in place, we help build public trust and facilitate smoother project implementation.

Through these efforts, Caso Law Firm, PLLC ensures that drainage easement projects are not only legally sound but also aligned with community needs and environmental standards. Our firm's comprehensive approach, combining legal expertise with community engagement and project management, positions us uniquely to serve the diverse needs of the City of Edinburg in managing its drainage easement challenges.

6. Condemnation Authority Challenges

Caso Law Firm, PLLC's proficiency in Condemnation Authority Challenges is further reinforced by our comprehensive understanding of the legal intricacies involved in establishing public need and navigating the initial steps of the Texas Constitution and Chapter 21 of the Texas Property Code. Our expertise extends to the critical processes of determining public necessity for acquisition, a fundamental aspect of condemnation cases.

From the beginning of any eminent domain proceeding, it is important to distinguish the federal standard of takings in the U.S. Constitution being "just compensation" from the standard in the Texas Constitution being "adequate compensation." These standards are then distinguishable from the standards utilized in states like Florida, which require "full compensation."

The Texas Legislature has created a clear statutory pathway in Chapter 21 of the Texas Property Code that establishes the necessary steps for governmental entities to acquire property in eminent domain.

ORIGINAL

We are acutely aware of the recent legislative changes impacting condemnation proceedings, particularly the requirements for issuing multiple notices to landowners. This knowledge is crucial in ensuring that our clients are fully compliant with the procedural mandates of these laws. Furthermore, our firm is well-versed in the nuances of legal provisions that offer the return of property to landowners if property acquired by eminent domain is not developed for the intended project within a 10-year period. Understanding these nuances allows us to provide strategic advice and robust defense in related litigation.

Our firm's extensive experience in handling dozens of eminent domain cases annually equips us with the practical know-how and legal acumen necessary to navigate these complex challenges. We are adept at managing the various timelines and procedural requirements set forth by new legislation, ensuring that our clients' interests are protected and advanced effectively.

Through this combination of legal expertise, strategic foresight, and commitment to compliance, Caso Law Firm, PLLC stands ready to expertly handle Condemnation Authority Challenges for the City of Edinburg and other governmental entities. Our approach is not only rooted in a deep understanding of the law but also in a proactive stance towards legislative changes and their implications for our clients.

Mr. Caso presenting at the Texas City Attorneys' Association meeting (June 2024)

ORIGINAL

Mr. Caso is regarded statewide as a subject-matter expert in complex coordination with TxDOT matters. Just this month, in June of 2024, as can be seen below, Mr. Caso gave a continuing legal education ("CLE") class at the Texas City Attorneys' Association meeting to over 200 city attorneys from the State of Texas pertaining to Multi-Agency TxDOT Projects

7. Easement Disputes

Caso Law Firm, PLLC's comprehensive approach to easement disputes takes into special consideration cases where multiple easements cover the same property — a common scenario in the City of Edinburg. In such instances, there is an established legal hierarchy of easements, and our role becomes crucial in securing and prioritizing the City of Edinburg's position. We are adept at presenting compelling arguments to ensure that the county holds the necessary easements for its projects, especially when these are critical for the health and safety of the community.

Our firm's methodology in these complex situations involves a rigorous legal analysis to discern the priorities of different easements and their impact on the City of Edinburg's interests. We understand that securing the correct easement position can be pivotal for county projects, from infrastructure development to ensuring public safety. Therefore, we meticulously analyze the overlapping claims to determine the best course of action for our client.

In resolving these disputes, we prioritize the City of Edinburg's rights, leveraging our expertise to navigate the intricacies of easement law. This involves a thorough review of all relevant property records and legal precedents to build a strong case for the county's easement needs. Our approach is not just about defending the City of Edinburg's interests but also about proactively securing its position in complex easement situations.

Our firm's ability to handle such disputes extends to negotiation and, if necessary, litigation. We are prepared to represent the City of Edinburg effectively in court, should negotiations not yield the desired outcome. Our experience in litigation, coupled with our deep understanding of property and easement law, ensures that we can adeptly manage these disputes, defending the county's interests robustly in any legal setting.

8. Surface Use Agreements

Caso Law Firm, PLLC, has established a strong foundation in dealing with Surface Use Agreements, particularly within the context of oil and gas law and environmental matters. Moreover, we have seen specific uses allocated by city's zoning and power authority.

ORIGINAL

These agreements are crucial in situations where oil and gas or other infrastructure operations intersect with the rights of landowners. Surface Use Agreements are negotiated contracts that delineate the rights and responsibilities of both the energy company and the landowner regarding the use of the land for oil and gas exploration and production.

Caso Law Firm's approach to Surface Use Agreements is informed by our comprehensive knowledge of administrative and public law, as well as their experience in civil law practices. This broad legal background enables the firm to adeptly navigate the regulatory landscape, ensuring that agreements comply with relevant laws and regulations while protecting the interests of their clients.

In summary, the firm's dealings with Surface Use Agreements reflect a blend of skilled negotiation, legal expertise, and a keen understanding of the oil and gas industry. This positions Caso Law Firm, PLLC, as a competent and reliable advisor in this specialized area of law.

9. Feasibility and Routing Studies

When it comes to feasibility and routing studies, a law firm like Caso Law Firm, PLLC plays a crucial role in interpreting these studies on behalf of their clients. Feasibility studies, which encompass economic, marketing, technical, financial, and management aspects, are essential for assessing the viability of a project. A law firm's role in this context involves analyzing the legal implications of these studies, ensuring that any proposed project or plan is not only feasible in a broader sense but also legally sound and compliant with relevant regulations.

For routing studies, particularly those related to infrastructure or urban development, legal interpretation is key to understanding the potential legal challenges or requirements. This includes analyzing land use rights, environmental regulations, and any potential conflicts with existing laws or ordinances. A law firm can provide invaluable advice on mitigating legal risks associated with the proposed routes or strategies outlined in these studies.

By interpreting feasibility and routing studies, law firms like Caso Law Firm, PLLC help their clients make informed decisions. They also ensure that any project undertaken is not only economically viable and technically feasible but also legally compliant and strategically sound. This legal interpretation is crucial in guiding clients through complex projects, minimizing legal risks, and maximizing the chances of successful project completion.

10. Abstract/title search

ORIGINAL

The ability to effectively handle abstract and title searches is a crucial aspect of legal work in real estate and property law, areas in which Caso Law Firm, PLLC, is well-equipped to excel. These searches are essential for establishing the history of ownership, identifying any encumbrances, liens, easements, or other claims against the property that might affect the rights of the owner or a potential buyer.

At Caso Law Firm, PLLC, our team possesses the necessary expertise and access to resources to conduct thorough abstract and title searches. This process involves examining public records and documents to compile a complete historical record of ownership and any other legal issues associated with the property. The firm's professionals are adept at analyzing these records to uncover any potential legal issues that could affect the transaction or the rights of the parties involved.

Furthermore, the firm's ability to interpret complex legal documents and navigate the intricacies of property law ensures that clients receive accurate and comprehensive information. This enables clients to make informed decisions regarding property transactions, be it purchasing, selling, or resolving disputes.

We were recently tasked with reviewing and interpreting a 121 page handwritten deed that was drafted and recorded over 100 years ago. We effectively identified the key provisions within the instrument and provided our clients with the necessary legal advice to proceed with a critical transportation project.

By providing meticulous abstract and title search services, Caso Law Firm, PLLC, helps clients mitigate risks and ensures smooth property transactions, reinforcing their reputation as a reliable and skilled legal practitioner in the realm of property law.

11. Permitting for Right of Entry

Caso Law Firm, PLLC is well-equipped to handle the intricacies of permitting for right of entry, a critical aspect in various legal scenarios, particularly in real estate, environmental law, and public works. The process involves securing legal permission to access private or public property for specific purposes, which may include construction, surveying, or environmental assessments.

We possess deep knowledge of the legal frameworks governing right of entry. This expertise is crucial for navigating the complex regulations and statutes that vary by jurisdiction. Our team is proficient in preparing and reviewing right-of-entry agreements and permits. We

ORIGINAL

ensure these documents accurately reflect the terms of access, including duration, scope, and any specific conditions or limitations. We are skilled in negotiating terms with property owners and governmental entities. Our approach prioritizes clear communication and seeks to establish agreements that respect the interests of all parties involved. Our experience extends to ensuring compliance with all relevant local, state, and federal regulations. This includes understanding and adhering to any environmental, safety, or zoning laws that may apply.

We assess and address potential legal risks associated with right of entry. This includes advising on liability issues, potential disputes, and ways to mitigate these risks. We provide ongoing support to ensure compliance with the terms of entry and to address any legal issues that may arise during the period of access.

In summary, our firm's comprehensive approach to permitting for right of entry combines legal expertise, meticulous document preparation, skilled negotiation, and a deep understanding of regulatory compliance to effectively serve our clients' needs.

12. Permitting Governmental, State, Federal and Local Agencies

Caso Law Firm, PLLC, possesses a robust expertise in navigating the complex terrain of permitting processes across various governmental levels – federal, state, and local. This expertise is critical in areas such as environmental law, land use, construction, and infrastructure projects, where obtaining the appropriate permits is essential for legal compliance and project success.

Our experience at the Texas Commission on Environmental Quality (TCEQ) is a cornerstone of our proficiency. Here, we gained in-depth knowledge in regulatory compliance, enforcement, and permitting, particularly regarding environmental issues such as water quality and supply. This experience is invaluable when dealing with federal and state agencies, ensuring adherence to stringent regulations and facilitating the smooth processing of permits.

At the local level, our understanding of municipal codes, zoning laws, and local government procedures enables us to efficiently navigate the permitting process. Whether it's securing permits for construction, land development, or business operations, our team is adept at liaising with local authorities to meet our clients' needs.

Our approach is comprehensive. We assist clients from the initial stages of application, through the intricacies of compliance and documentation, to the final stages of permit approval. This includes addressing any legal challenges or objections that may arise during the process.

ORIGINAL

We also provide strategic advice to clients, helping them understand the implications of various regulatory frameworks. This ensures that clients are not only compliant but also positioned to make informed decisions that align with their business objectives and project timelines.

In summary, Caso Law Firm, PLLC's expertise in permitting across governmental, state, federal, and local agencies is a testament to our ability to provide clients with thorough, knowledgeable, and efficient legal services in the complex world of regulatory compliance and permitting.

13. Ad Valorem Taxation

Caso Law Firm, PLLC boasts a comprehensive understanding of ad valorem taxation, a critical aspect for the the City of Edinburg . Our firm is well-versed in the various methods of property appraisal recognized by appraisal districts, ensuring accurate and fair valuation processes. We are also adept at navigating the regulations surrounding rollbacks due to increases in appraisal values for existing properties, a significant factor in maintaining fiscal balance and equity.

Moreover, our team is not only familiar with standard appraisal manuals but also remains constantly updated on evolving caselaw in this domain. This knowledge positions us to offer invaluable assistance in correlating these appraisals to the tax rate set by the the City of Edinburg for Maintenance & Operations (M&O) and Interest & Sinking (I&S) funds.

In addition, Caso Law Firm, PLLC is equipped to provide strategic advice regarding patterns of property valuation and proposed litigation. Understanding the implications of these factors is crucial for the the City of Edinburg as they can significantly impact fiscal planning and resource allocation. Our expertise in ad valorem taxation law means we are well-prepared to guide the City of Edinburg through the complexities of taxation, valuation disputes, and related legal challenges, ensuring that the county's tax policies are both legally sound and strategically aligned with its financial goals

14. Negotiations and Acquisition

Caso Law Firm, PLLC recognizes the critical importance of efficient and effective real estate negotiations, especially in safeguarding taxpayer funds for the the City of Edinburg . Our approach is tailored to the unique demands of real estate transactions, ensuring that each contract is meticulously crafted to protect the City of Edinburg's interests.

ORIGINAL

In the realm of real estate, the unpredictability of market conditions, including price escalations of land and materials, necessitates a strategic approach to contract negotiations. We emphasize the importance of thorough evaluation and risk assessment, setting appropriate negotiation limits and accounting for factors like return on investment and market fluctuations. This is crucial in ensuring that the City of Edinburg secures the best possible terms in each transaction.

Our experience with the COVID-19 pandemic has further honed our skills in preparing for unforeseen challenges. We embed robust protections in real estate contracts to preserve the City of Edinburg's rights and interests, considering all potential scenarios. This includes ensuring that vendors maintain adequate insurance and bonding, and conducting periodic reviews of these measures to mitigate risks such as vendor bankruptcy or the unforeseen loss of key personnel.

In the event of disputes, we prioritize amicable resolution strategies, often utilizing mediation as an effective tool. Over the years, we have developed a network of mediators specializing in highly complex acquisition matters. This standard operating procedure in complex acquisitions not only facilitates resolution but also saves costs and time. However, if mediation does not yield desired results, we are fully prepared to assertively pursue litigation to protect the City of Edinburg's interests.

Our team's ability to provide prompt and strategic advice, foreseeing potential issues and incorporating specific contractual provisions, is a testament to our commitment to protecting the interests of the City of Edinburg . We are adept at navigating the intricacies of real estate negotiations, ensuring that each transaction is not only compliant but also strategically advantageous for the City of Edinburg."

15. Conclusion

Caso Law Firm, PLLC presents itself ready to assist the the City of Edinburg in the realm of real estate law. Our firm's hallmark is a combination of profound legal expertise specifically tailored to real estate matters, coupled with a dedicated commitment to the community of the City of Edinburg.

We excel in steering through the complexities of real estate transactions and disputes, ensuring that taxpayer interests are safeguarded and that the development of real estate infrastructure is robust and compliant with legal standards. Our team is passionate about contributing to the growth and resilience of the City of Edinburg, and we look forward to advancing the goals of the City of Edinburg and its vibrant community.

Previous Experience with City

Caso Law firm has an established record of providing superior performance for the City of Edinburg. In the two cases described below, the firm represented the City in a professional manner and achieved exceptional results.

Docket N0. 48437 - Application to Amend a Certificate of Convenience and Necessity (CCN) in June 2018. The expert handling of the case by Caso Law Firm, involving the seamless transfer of the water certificate of convenience and necessity between Edinburg and Sharyland, ensured regulatory compliance, maintained uninterrupted service for 104 active connections, and upheld procedural integrity without necessitating a hearing.

Case Number: CCD-0813-A - Caso Law Firm expertly represented the City of Edinburg in the case against TEYSHA Group, LLC, Magic Valley Electric Cooperative, Inc., Jennifer Ramsey, PC, and Southern Star Title Company LLC. The firm effectively managed the complex legal dynamics involving multiple parties, including an easement holder and lienholders. Their strategic approach ensured the protection of Edinburg's interests, facilitating the resolution of disputes related to easements and liens, and maintaining compliance with relevant legal standards.

References and Projects

Caso Law Firm, PLLC has been a stable member of the community in Edinburg since our doors opened in 2012. The firm has faithfully served the community, a fact that our references can attest to. The following is a list of references and the specific work that they can speak to with reference to the services we provide.

David L. Fuentes, County Commissioner Hidalgo County, Texas
1902 Joe Stephens Ave., Ste. 101, Weslaco, Texas 78596 | (956) 968-8733

ORIGINAL

Can discuss how our firm has assisted Hidalgo County in acquiring right-of-way for drainage and transportation projects. Can further discuss how Caso Law Firm has assisted Hidalgo County in critical real estate matters and eminent domain matters.

Laura P. Haley, Cameron County Drainage District No. 6
300 North Main St., La Feria, Texas 78559 | (956) 797 2421
Can discuss how we have assisted Cameron County Drainage District No. 6 in acquiring parcels for the district's recent $22.5 million bond election. She can further discuss how Caso Law Firm assisted in the creation of the district and ensuring compliance with all pertinent laws.

Connie De La Rosa, General Manager of Military Highway Water Supply
4000 US-281, Mercedes, Texas 78570 | (956) 565-2491
Can discuss how we are currently assisting in developing an $80 million water and sewer line relocation project utilizing a blend of funds and grants from international, federal, state, and local grants blended with borrowing. Our firm is currently working on acquiring the real estate needed for critical infrastructure like lift stations, gravity lines, and main lines.

Casey Homer, Mayor of City of Von Ormy, Texas
14729 Quarter Horse, Von Ormy, Bexar County, Texas, 78073 | (210) 861-7283
Can discuss how we have assisted Von Ormy to secure and manage over $6 million in funding for the city's first sewer project. Can also discuss how we are assisting the City of Von Ormy to acquire over 100 easements for creation of the region's first sewer main line.

Ellie Torres, Board Member of Hidalgo County Drainage District No. 1
1051 N Doolittle Rd., Edinburg, Texas 78542 | (956) 383-3112
Can discuss our efforts in assisting in multiple drainage projects in right-of-way acquisitions as well as in transportation projects such as Russell Road, which are being funded through a variety of sources including certificates of obligation and TxDOT funding.

Key Projects

Below is a compilation of key projects that Caso Law Firm has contributed to, showcasing our significant involvement and impact:

- In 2018, Jose Caso, the General Manager of Caso Law Firm, was the Responsible Person in Charge ("RPIC") for the 10th Street Expansion Project in Hidalgo County, which provided an extension of 4.5 miles of 10th Street in McAllen. Mr. Caso negotiated the acquisition of real estate and utility easements to begin construction on this critical project. This $26 million project has already been completed and it was paid through TxDOT funding.

- Caso Law Firm is currently acquiring over 60 parcels on behalf of Cameron County

ORIGINAL

Drainage District No. 6 for its $22.5 million bond sale.

- Caso Law Firm was contracted by Hidalgo County Drainage District No. 1 to assist it with eminent domain matters pertaining to its recent bond projects. Our firm is currently assisting with the eminent domain acquisition of over 20 acres of land valued at over $1 million.

- Caso Law Firm has represented TxDOT on eminent domain matters for "On-System" Projects such as the Shary Road Expansion Project. Moreover, our firm has represented multiple governmental entities in TxDOT "Off-System" MPO projects for the following major transportation corridors:

    - Mile 6 West - Phase 1;
    - Mile 6 West - Phase 2;
    - Liberty Road Expansion Project;
    - Veterans Blvd. Expansion Project;
    - FM 676 Road Expansion Project;
    - Nolana Road Expansion Project;
    - Mile 2 West Rehabilitation Project; and
    - Russell Road Expansion Project.

Right of Way Acquisition Services Rotation
(Uploaded via: https://procurement.opengov.com/portal/cityofedinburg/projects/100825)

Subject: Clark Land Resources' Proposal for *Right of Way Acquisition Services Rotation (RFQ No. 2024-5)*

Dear Evaluation Committee,

Clark Land Resources, Inc. (Clark Land) appreciates the opportunity to submit the attached qualifications for Right of Way Acquisition Services Rotation to the City of Edinburg (City). Clark Land is a South Central Texas Regional Certification Agency (SCTRCA) certified Small Business Enterprise (SBE), Emerging Small Business Enterprise (ESBE), and Woman-Owned Business Enterprise (WBE) firm providing public and private agencies and utility companies with a wide range of real property and right of way services.

Our services include permanent and temporary property acquisitions, negotiations, property rights research, preliminary title reports, easement verification and documentation, relocation assistance services, condemnation assistance services, escrow and title coordination services, excess land disposal, and asset management for public works utilities and infrastructure as well as residential, commercial, and industrial projects.

We offer the City several benefits in selecting the Clark Land team:

Availability and Commitment: The City needs a team that will be responsive and who is familiar with the IRWA standard of care as well as knowledge of federal, state, and local regulations with regards to acquiring temporary and permanent easements in accordance with all applicable and potential condemnation proceedings. Clark Land has the staff and the experience to provide the City with this expertise and we are committed to helping the City succeed throughout the life of the contract.

Knowledge that Matters: Clark Land has a local Texas team familiar with the applicable processes and procedures and who can expedite the scope of work efficiently. Our team includes staff who are familiar with the Uniform Act pertaining to property acquisitions and have experience in providing right of way negotiation and acquisition services for municipal agencies, federal agencies, and other public and private agencies in Texas and nationally.

The entire Clark Land team is respected for our professional representation of our clients to the public, as well as our ability to get along with both the client and property owner to reach workable solutions that expedite the acquisition process. Our team is ready to do the same for the City.

Multi-Lingual Team: Several of our Clark Land team members speak Spanish, aiding in communication with potential property owners for acquisition and relocation assistance. We also have resources available to help with interpretations in other languages.

Skilled Subconsultant: By adding a subconsultant on our team, we tap into a wealth of specialized experience that enriches the services we are able to provide. We've teamed up with Kyle Schroeder, MAI, ARA, from Texas Values, to provide any necessary appraisal services. However, we are more than willing to collaborate with an appraiser of the City's choice, independent of this contract.

High Standards are Our Only Standards: Clark Land is a Right of Way Consultants Council (ROWCC) member firm. The ROWCC is an organization that grew out of a desire for professionals in the right of way industry to exchange ideas and information efficiently and to develop and promote standards for our industry. Clark Land's President/Chief Executive Officer, Linda Clark, RWP, previously served on the Board of Directors.

Proposal Contact	Alexandria Clark, SR/WA alexandria.clark@clarklandresources.com Phone: (254) 228-5547
Office Locations of Work to be Performed	Clark Land has multiple offices in Texas: 1. 401 East Sonterra, Suite 375 San Antonio, TX 78258 2. 16 E. Ave A, Suite 215 Temple, TX 76501
Date of Firm Formation	October 2, 2012
Business Type	S Corporation
State of Incorporation	California
Web Site	www.clarklandresources.com

Unique Qualifications: Our mission is to raise the next generation of right of way agents in the ethical standards of right of way services. The quality of Clark Land's work is demonstrated by the extensive education that our staff receive in ethics, real estate, land management, and the acquisition process. Over 90% of Clark Land's staff are members of IRWA and are eligible to apply for Education PTO each year to enhance their skills. Clark Land has won awards for its dedication to providing educational pathways for all staff. Additionally, our renewal rate for as-needed contracts is 95% throughout the company due to the trust the client has developed in the Clark Land team to:

- Treat property owners with dignity and respect to foster and maintain positive relationships with property owners on behalf of the client,
- Protect the property rights of the client, and
- Maintain a positive image of the public entity.

We look forward to discussing our qualifications with you further. Please feel free to contact our proposed Project Manager, Alexandria Clark, SR/WA with any questions you may have about this submittal. Thank you for your time and consideration.

Sincerely,

Linda L. Clark

Linda L. Clark, RWP
President/Chief Executive Officer

Section 1 | Firm's Background and Experience

IT TAKES A *LOCAL TEXAS TEAM* THAT IS ADAPTIVE AND FLEXIBLE TO COMMUNICATE EFFECTIVELY AND MEET THE CITY'S SCHEDULE AND BUDGET GOALS.

Clark Land specializes in acquiring, protecting, and managing land rights for public and private entities, guided by a steadfast commitment to integrity and stakeholder respect.

Clark Land has been providing real property services for 11 years and is owned and managed by Linda Clark, RWP, and Fred Clark Sr., SR/WA. Our firm was established in late 2012 with only two employees − the owners Linda Clark, RWP and Fred Clark, Sr., SR/WA. However, Clark Land was founded on much more than just experience. It was an answer to a need within the industry that Fred and Linda knew they could meet. Clark Land was formed with the intention of bringing up a new generation of professionals trained in the ethical practices of right of way.

From its inception, Clark Land has aimed to not only meet, but to exceed industry standards, answering a clear need with a vision to foster a new generation of professionals trained in ethical practices within the right of way sector. With over 84 employees companywide, all with diverse backgrounds, we are able to provide a broad spectrum of services from a single resource, scaling our capabilities to meet the unique requirements of any project. We pride ourselves on delivering turn-key solutions that provide our clients with peace of mind through accurate, timely, and budget-conscious project completion.

How Can We Help You?

By providing compassionate, licensed, and certified professionals who work to meet your needs, and the needs of the property owner, leading to workable solutions where everyone leaves the negotiating table feeling satisfied and confident of the outcome. We strive to protect property rights with minimal, if any, disputes regarding the process to avoid condemnation or potential costly court trials. As Edinburg advances towards a future focused on economic strength and sustainable infrastructure, the role of right of way services becomes crucial. We have staff who live in, and care deeply about, Texas communities who will work to seamlessly integrate community goals while meeting municipal objectives.

Commitment to Community and Ethical Standards

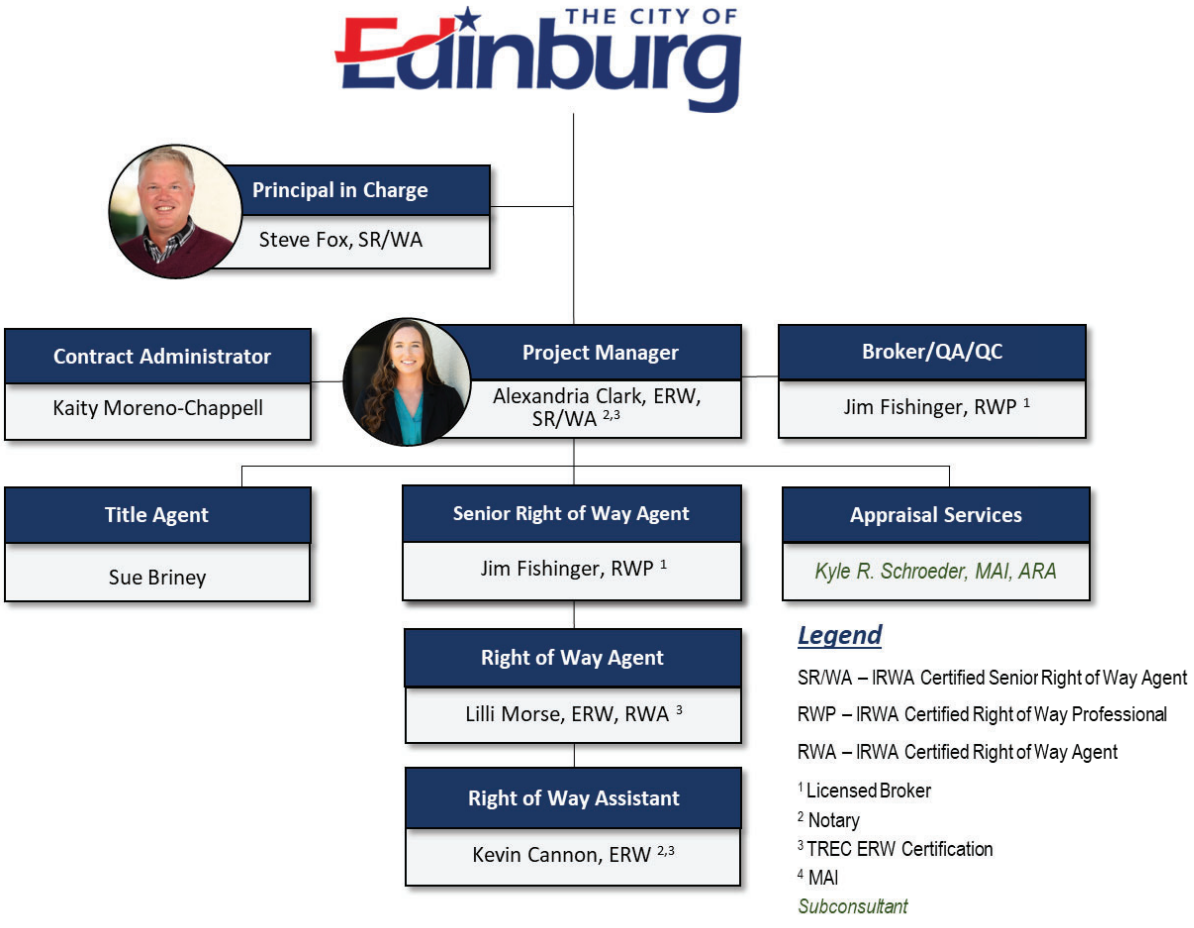
Clark Land distinguishes itself through a steadfast commitment to ethical practices and community stewardship. We prioritize respectful engagement with property owners, fostering positive relationships that endure beyond project completion. Our approach is to provide negotiation services that are fair and transparent, minimizing the risk for disputes and potential legal entanglements. By aligning our operations with the IRWA's Standard of Care, we uphold the highest standards of professionalism and service excellence.

Proven Track Record

We take pride in our extensive portfolio and have managed both small and large projects/task orders, ranging from nine (9) Permanent Acquisitions and eight (8) Rights of Entry for the City of Temple to *several thousand* acquisitions for San Diego Gas & Electric's Fire Risk Mitigation program. Our footprint spans various governmental and utility sectors, illustrating our adaptability and capacity to manage diverse projects throughout Texas and California.

Having handled contracts from $25,000 to more than $40,000,000, we exemplify scalability and precision. Every project, regardless of size, receives our unwavering commitment to excellence, efficiency, and ethical service delivery.

CLARK LAND STANDS READY TO SUPPORT YOUR VISION OUTLINED IN THE EDINBURG 2040 COMPREHENSIVE PLAN CONTRIBUTING TO A SAFE, WELL-MAINTAINED, AND DESIRABLE COMMUNITY FOR ALL RESIDENTS.



Over the past 5 years, Clark Land has held more than 21 on-call contracts, managing between 1 to 40 task orders per contract. 100% of these projects/task orders were successfully completed on time and on budget. With our experience providing on-call services, we are well-equipped to support the City. Our current workload reflects our ability to prioritize and manage multiple projects simultaneously.

Section 2 | Key Staff

Clark Land has developed a team with just the right balance of senior and junior staff to help provide quality services at a reasonable cost. Our team members possess specialized skills and experience that help them to integrate into a project and provide comprehensive management and technical knowledge throughout the entire project life cycle. We will work as an extension of staff for the City to proactively identify issues ***before*** they become project challenges.

Our proposed Project Manager, Alexandria Clark, SR/WA, who is a Texas local and active member of her community, will be the point of contact for this proposal. Not only is Alexandria a Texas local, but she is also the Secretary for IRWA Chapter 39, serving members in the San Antonio, South Texas, and the Rio Grande Valley area with a mission to create a community that fosters ethics, learning, and a standard of excellence within the right of way industry. Alexandria, with her local roots and SR/WA certification, brings an ideal blend of technical experience and regional understanding to any project.

Our remaining key staff members have diverse backgrounds to provide the City with a wide range of experience. *Resumes for our key staff can be found in Appendix 1.*

Experienced Team with Proven Collaboration

Our key staff have experience providing a variety of right of way acquisition services, as shown in Table 1, having successfully collaborated on numerous similar projects. This established teamwork is a cornerstone of our success, providing efficient workflow and a unified approach to overcoming challenges. Their collective experience includes working on a diverse array of projects, from small-scale acquisitions to large, complex developments, providing them with the insight needed to deliver exceptional results. This proven synergy among our team members provides a smooth and coordinated execution of all tasks, ultimately contributing to the successful completion of your project.

Local Subconsultant Collaboration

We recognize that collaboration with other firms can be key to delivering unparalleled value to our clients. As we mentioned previously in our cover letter, we've teamed up with Kyle Schroeder, MAI, ARA, from Texas Values Appraisal Services (Texas Values). Texas Values is headquartered in Texas and offers appraisal services for a wide variety of intended uses and property types. Types of real estate appraised include land in both rural and urban settings, single and multi-family residential, and commercial. Kyle is a long-term resident of Texas and has appraised all property types and specializes in right of way appraisals for litigation support. Although we have an appraisal subconsultant on our team, we are more than willing to collaborate with an appraiser of the City's choice, independent of this contract.

Section 3 | Enhancing City Development with Our Services

The goal at Clark Land is to meet and exceed your needs and as one of the fastest growing cities in Texas. Clark Land offers a variety of on-call acquisition services and resources to the City including:

Project Management and Functional Area Coordination: Clark Land has successfully managed both large and small projects for a variety of clients – delivering the projects on time and within budget. Because of our team's diversity and depth of experience, we have the ability to foresee issues and prevent delays that could impact the construction schedule.

Our Project Manager and team of research staff, acquisition agents, and relocation specialists work together to chart the course for the progression of a project. This includes coordinating with the client's inter-departmental functional areas and any municipal, state, and federal jurisdictional agencies.

Title Research and Due Diligence: Accurate and complete investigation of property title is an underestimated part of many projects. Project designers need to rely on accurate and up-to-date title information in order to confidently proceed with design. Clark Land's technical staff is experienced in records investigation, chain of title, and review of title reports to determine the status and history of a property. Once this information is presented in a clear way, designers and planners have the information they need to move forward on schedule.

THE CITY OF EDINBURG NEEDS A PARTNER WHO CAN HELP LEAD THE RIO GRANDE VALLEY INTO THE FUTURE.

Site and Linear Route Selection including Cost Estimates: The effectiveness of site and linear route selection is determined by the depth of investigation and project understanding. Clark Land provides team members, early in a project's conception, to aide in the selection process by providing accurate property information, documenting progress, gaining a thorough understanding of the project needs, and then combines this data into an easily understood format so that the selection process investment pays off. Clark Land will research and review existing engineering and design plans, as well as recorded documents to identify conflicts between existing and proposed utilities and parcel boundaries. Identifying conflicts early in a project can be the difference that keeps the project on schedule and within budget. Our experienced team members will assist in the relocation and protection of needed facilities prior to construction. We will work as a liaison to negotiate an appropriate solution for all parties.

Property Acquisition - Fee, Easement, Access Rights, and Pre-Condemnation Support: Clark Land's property acquisition team understands the logical and effective progression of a project across multiple disciplines and throughout the project lifecycle — from initial concept and feasibility studies into preliminary and final design, and then eventually throughout construction. This allows Clark Land to actively participate in the processes of siting and alignment, environmental reporting, regulatory compliance, design, permitting, construction, and project closeout as they relate to the overall project process.

Title Curative and Lien Negotiations/Release or Dissolution: Clark Land's local Texas team has the necessary experience to resolve a variety of liens with releases offering clear title from defect for any acquired property. Right of way acquisitions customarily encounter liens in varied formats including federal and state taxes, IRS rights of redemption, SBA Loans, mechanics, materialmen, and judgement liens. Clark Land takes great pride to successfully negotiate outstanding title defects. We'll prepare release documents using the City approved templates and obtain execution to clear any defects on title prior to conveying ownership to the City. Lastly, Clark Land will close the loop by recording the executed release document when ready.

Encroachment Mitigation Programs and Land Asset Management: Protection of an agency's facilities and its property are critical to maintaining safe and effective operations. Our staff have helped resolve and close out thousands of encroachment issues for both public and private utilities.

Eminent Domain Support: Occasionally, an owner may refuse to grant the required rights to the City. If after good faith negotiations have been conducted for a reasonable period, no agreement is reached and negotiations come to an impasse, this information will be reported to the City. Clark Land's team members are familiar with administrative settlements and eminent domain. Taking direction from the City, we will attempt to settle any outstanding acquisitions, report owner demands, or propose logical compromises. Should condemnation be required, our agents will assist the City or the City's Attorney with those parcels requiring eminent domain or other legal action.

Bilingual Team Members: At Clark Land, we recognize the importance of effective communication in delivering exceptional service to our clients. Our team includes **5 bilingual staff members** who are proficient in multiple languages.

Section 4 | Project Experience and Client References

The following section provides detailed accounts of our past projects and include references from clients who can attest to our commitment to excellence and our capacity to handle complex right of way acquisitions with professionalism and efficiency. Over the years, we have consistently delivered high-quality, timely, and cost-effective solutions that meet the unique needs of each project. Clark Land was the prime firm for all 3 project references detailed below.

CLIENT CONTACT
Christina Demirs
Assistant City Attorney
2 N Main Street
Temple, TX 76501
(254) 298-5604
cdemirs@templetx.gov

Clark Land is providing the City of Temple with right of way acquisition and relocation services as part of an as-needed contract that involves ownership research, right of entry acquisition, easement acquisition, appraisal coordination, and condemnation support services for utility projects located within the service area of the City.

On Going Accomplishments

Balancing legal, regulatory, and community interests has been our highest priority for the City. Every task order has been executed in a timely manner with quality and transparency at the forefront. The work we've completed for the City of Temple is a testament of our capacity to deliver right of way services on time, within budget.

dwinkler@nbutexas.com

Clark Land, in partnership with New Braunfels Utilities (NBU), has executed a comprehensive right of way contract, where we provided acquisition services for essential infrastructure projects within and beyond the City of New Braunfels. Efforts were concentrated on a spectrum of projects encompassing wastewater treatment plant relocation and upgrades, electric distribution lines replacements, and wastewater line enhancements. Clark Land's team navigated through transactions involving residential, commercial, and industrial properties.

Accomplishments

On-Time and Budget-Compliant Delivery

Clark Land demonstrated a commitment to efficiency by effectively meeting all set schedules and budget guidelines.

Diverse Property Engagement

From developed to undeveloped terrains, spanning across residential, commercial, and industrial properties, our approach was as diverse as it was thorough, where all property types were proficiently managed.

Clark Land is providing comprehensive real estate property acquisition services for the San Antonio Water System (SAWS) in San Antonio, TX. Engaged as a prime contractor since February 2024, Clark Land's role includes acquiring property rights and performing real estate-related activities essential for various Capital Improvement Projects, particularly focusing on sewer line rehabilitation. Our team is tasked with managing real estate, relocation, and appraisal services, conducting property rights research, and acquiring easements over commercial, office, multi-residential, and school district properties.

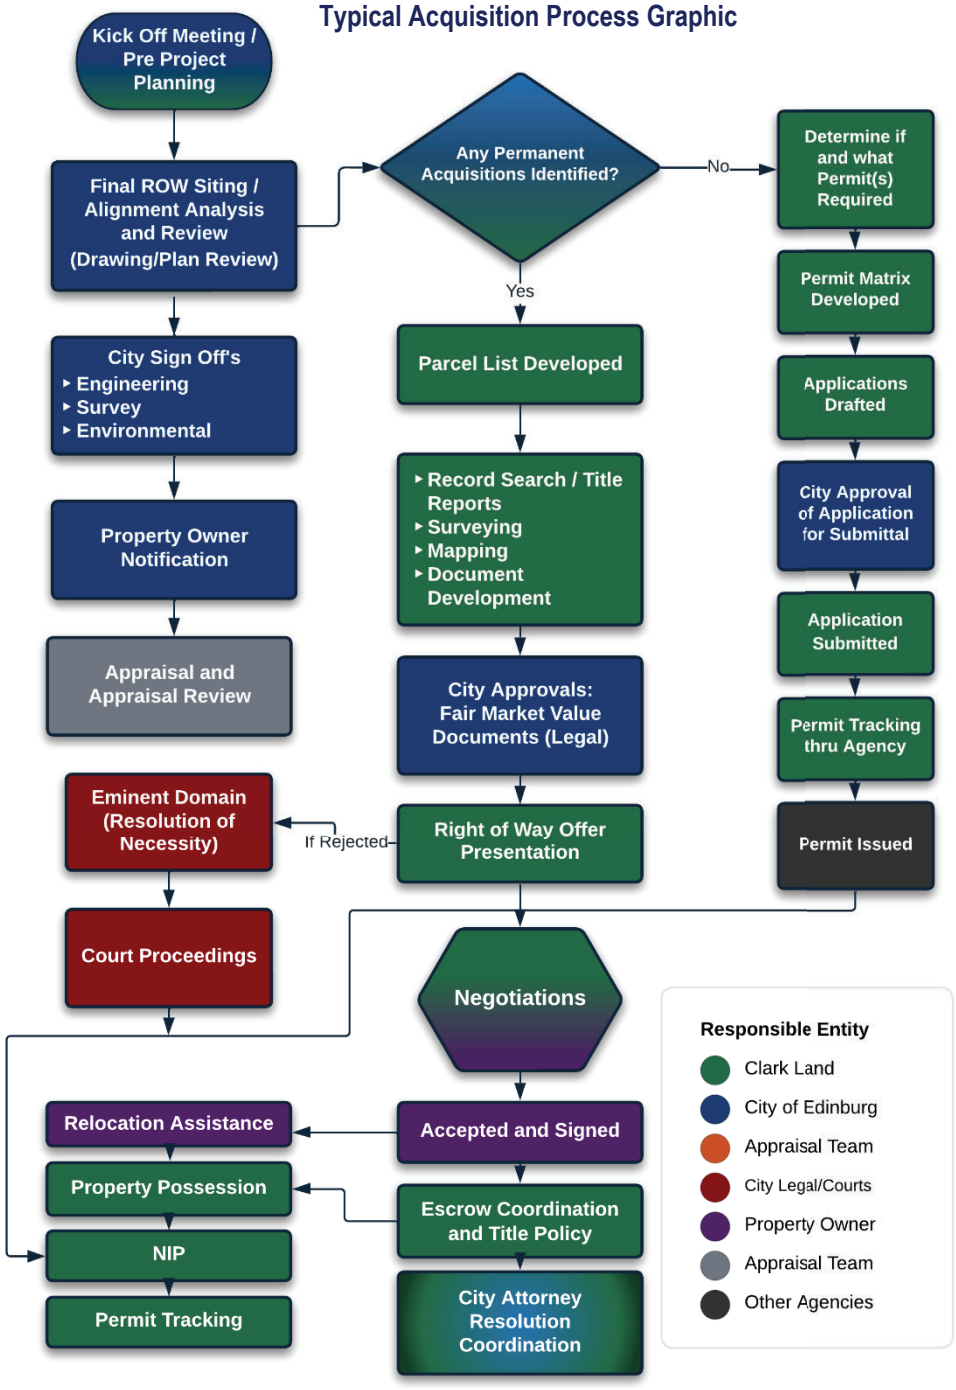
Accomplishments

Clark Land has successfully initiated the acquisition of Right of Entries for the sewer line rehabilitation project, demonstrating our acquisition experience. Our proficient real estate research, encompassing plat review and easement analysis, has been pivotal in progressing the project efficiently. With a dedicated team of experienced professionals, we continue to facilitate the smooth acquisition of necessary property rights.

Section 5 | Project Approach

Clark Land's technical and project approaches are based on proven skill sets and processes, which have successfully delivered acquisitions of properties, necessary for completion of public works utility projects, by our staff for 11 years. Our project approach has effectively worked on other on-call and specific right of way projects performed by Clark Land and focuses on controlling the project schedule, budget, quality of deliverables, and ***most importantly*** the communication with the rest of the project team.

> "Your team is awesome! We appreciated the timely responses and professional manner in which Clark Land Resources conducts its business. Your staff is very organized, polite, and very professional. The one thing I can appreciate the most, too, is being kept informed of where we were in the process. When the library asked me any questions about the status of the relocation, I always had the answer. I hope we will work together again soon."
>
> Heide E. Farst, CSM, Property Agent
> City of San Diego - OB Library Relocation Project



Pro-active Problem Solving. Clark Land has been involved in a wide range of projects from road widening to water and sewer installations, as well as above and below ground electrical installations. While the construction of each project can be vastly different, many of the land acquisition roadblocks are rather similar.

Common problems can be as simple as locating an owner, or an owner believing the appraisal of his/her property is too low, or if they refuse to sell the property altogether. Clark Land subscribes to several property databases which can supply location and contact information for owners. Clark Land agents have negotiated thousands of easement acquisitions with owners and are able to explain minute details contained within appraisals that help an owner understand and accept the appraisal conclusions. Owners are also provided with an opportunity to obtain their own appraisals which helps bridge any valuation disagreements. Other common problems arise out of unwanted encumbrances being attached to project parcels.

Clark Land agents are experienced with actively working with title and escrow officers to remove these unwanted encumbrances, either through direct negotiation with the Title Officer or by obtaining written agreements from third parties to remove these items. Some parcels require special attention based on the specific ongoing uses, these include small retail businesses, restaurants, theatres, churches, and breweries. Each requires an acknowledgement and understanding of the ongoing business use, and the negotiation of specific steps the contractor must follow to allow continued operation during and after the construction projects.

For example, Clark Land agents have negotiated agreements between Cities and owners where certain construction activities can be performed only during specific hours of the day or have agreements to not construct at all on certain days. Clark Land agents, with authority from the City, have obtained short-term leases for temporary parking or off-site storage.

Typical Acquisition Process Graphic

Project Leadership, Reporting Responsibilities, and our Communications with the City

Through effective communications with owners and agencies, Clark Land agents seek solutions that are acceptable to all parties. These solutions help close parcel acquisitions and reduce or eliminate potential project delays. Clark Land recommends weekly status meetings where our staff will provide details of all ongoing projects, provide a three-week look-ahead, and will advise of any unusual circumstances on all projects and/or tasks.

Clark Land possesses a deep bench of qualified agents in each discipline of the right of way industry. If a Task Order with a short timeline is issued by the City, Clark Land can draw from its pool of trained agents to meet the City's needs.

If an occasion arises when the City determines they must accelerate a current schedule, for whatever reason, Clark Land has the resources to meet those needs. In a less likely event, where an ongoing project appears to be slipping behind schedule, again, additional agent(s) can and will be shifted to meet the need and quickly get any acquisition or relocation project back on schedule.

In-House Resources

Our online database tool, Flairdocs, helps us track all project involvements as we strive to reach a variety of milestones along the project lifecycle. The use of this tool helps the project team to effectively track projects from start to finish and to capture all information relevant to a myriad of project types.

In addition to Flairdocs,Clark Land utilizes BQE CORE as our time reporting and budgeting client. Time entries by staff are conducted daily and reviewed for approval on a weekly basis by our project managers. Billing invoices can be tailored to meet the City's needs. Our accounting staff will review the invoices before they are sent to the City's project manager for review and approval each month. Our accounting system is flexible in its ability to provide a variety of reports that can be exported to Microsoft®, Excel©, or other types of files for the City's use.

Section 6 | Ability to Meet Schedules and Deadlines

We understand that timely right of way acquisition is critical to the overall success of any infrastructure project. Our systematic approach and efficient processes will benefit the City as we work to deliver results within the stipulated timeframes, minimizing delays and facilitating project progression.

OUR FOCUS ON TIMELY DELIVERY ALLOWS US TO PROVIDE RELIABLE RIGHT OF WAY ACQUISITION SERVICES THAT KEEP YOUR PROJECTS ON TRACK AND ON BUDGET.

It's important that the selected consultant has experience delivering on-call right of way services on a wide range of projects. With a strong background managing multiple task orders, a diversity of projects, the ability to adapt based on particular project issues, and knowledge of local regulatory requirements - *we are confident that we're the right firm for you to include in your rotation!*

Clark Land can manage the dynamic nature of project work and handle multiple task orders efficiently. Our local team stands ready to provide prompt responses and quick initial cost estimates. Whether it's overseeing small projects, handling multiple task orders simultaneously, or managing large projects from planning to close-out, we have the knowledge and flexibility that's required. Our experience shown in "Section 4 | Project Experience and Client References" highlights our ability to excel in these environments.

Effective scheduling begins with comprehensive planning. We take careful consideration when developing project timelines, from the initial landowner outreach to the final agreement execution, we map out every task with precision to proactively identify and avoid any potential bottlenecks. By identifying risks early, and developing strategic responses, we can mitigate delays and provide continuity in our operations.

Section 7 | Firm Stability

Clark Land is a financially stable firm, our prudent fiscal policies and risk management practices have allowed for sustained growth and profitability over the years. Our firm currently runs with minimal debt, and our company policy is to stay as debt free as possible.

There are no conditions or concerns that could impede our ability to complete any project. We have consistently demonstrated our capacity to manage and execute projects efficiently, regardless of their scale or complexity. Our solid financial standing also allows us to invest in resources, technology, and talent necessary to deliver exceptional results for our clients.

APPENDIX 1:
STAFF RESUMES

ALEXANDRIA CLARK, ERW, SR/WA

Project Manager

Years of Experience: 12 years

Certifications/Licenses:

Easement or Right of Way (ERW) Agent, Texas Real Estate Commission (TREC), No. 33578, Expires: 9/30/2024
Senior Right of Way Agent (SR/WA), International Right of Way Association, (IRWA), No. 7247, Expires: 8/1/2027
Texas Notary Public, No. 130677098, Expires: 8/25/2028

Education:

General Education Course Work, Christian Heritage College, Palomar Community College

RELEVANT EXPERIENCE

Alexandria Clark, ERW, SR/WA has over 12 years of specialized experience in right of way management, administration, and customer relations. With deep local Texas roots, ERW, and SR/WA certification, she brings a comprehensive understanding of regional nuances crucial to successful project execution. Her skills include navigating regulatory landscapes, conducting effective public consultations, and coordination between stakeholders. Alexandria's hands-on approach includes overseeing compliance, guiding property owners through complex acquisition processes, and maintaining meticulous project oversight. Her strategic leadership and commitment to excellence make her an invaluable asset in delivering projects efficiently and in alignment with client objectives.

PROJECT EXPERIENCE

Project Manager/Sr. Right of Way Agent, City of Temple, As-Needed Easement Acquisition Services, Temple, TX:
As the Project Manager and Sr. Right of Way Agent for Clark Land, this role has involved comprehensive responsibilities, including ownership research, acquisition of rights of entry, easement acquisition, appraisal coordination, and condemnation support for utility projects. She has efficiently coordinated the acquisition of nine (9) permanent pipeline easements and eight (8) rights of entry, ensuring all processes from title reports to easement coordination are executed seamlessly to support the City's infrastructure projects.

Project Manager, San Antonio Water System (SAWS), Real Estate Property Acquisition Services, San Antonio, TX:
Serving as the Project Manager, Alexandria oversees comprehensive real estate property acquisition services essential for sewer line rehabilitation and other capital improvement projects. Alexandria manages real estate, relocation, and appraisal services, conducts property rights research, and acquires easements across commercial, office, multi-residential, and school district properties. Her expertise ensures efficient acquisition processes and project adherence to schedule, supporting SAWS in achieving successful project outcomes.

Right of Way Agent, New Braunfels Utilities (NBU), As-Needed Easement Acquisition Services, New Braunfels, TX:
Alexandria served as the Right of Way Agent for NBU, overseeing fast-track easement acquisitions for essential utility infrastructure projects. In this 5-year, as-needed role, she has effectively managed acquisitions for projects such as the wastewater treatment plant relocation and upgrades to electric distribution and wastewater lines. Alexandria coordinated the acquisition process across residential and commercial properties, handling tasks from compiling offer packages to negotiating easements and advising on best practices in right of way acquisition. Her work included providing pre-condemnation and eminent domain support across various property types.

Right of Way Agent, City of Alpine, As-Needed Easement Research, Alpine, TX: This project focused on preparing for population growth through comprehensive records research, pipeline location, and land acquisition. Alexandria successfully led her team in performing detailed research to verify the location and adequacy of easements and water rights, providing the City with crucial advisement for necessary actions. Her team was particularly vital in handling the research of documents for parcels with extensive historical records, where they demonstrated due diligence and successfully acquired all required information. Under Alexandria's leadership, Clark Land consistently met all budgetary and scheduling commitments for the City.

Project Manager, San Diego Gas & Electric (SDG&E), As-Needed Land Management and Encroachment Resolution Services for Gas & Electric Facilities, San Diego County, CA: Alexandria provides documentation services for this contract where Clark Land provides as-needed support for hundreds of tasks requiring knowledge of and experience in working on SDG&E's gas and electric transmission and distribution systems across San Diego County. Clark Land provided team members to help identify, document, and help rectify over six-hundred (600) encroachment issues related to SDG&E facilities. The project is a fast-track project with many deliverables due in a short amount of time. SDG&E submitted tasks to Clark Land, who in turn dispatched team members to help resolve issues such as encroachment, easement research and development, right of entry permits, customer and property owner negotiations, and constructability review.

STEVE FOX, SR/WA

Principal in Charge

Years of Experience: 20 years

Certifications/Licenses:

Senior Right of Way Agent (SR/WA), International Right of Way Association (IRWA), No. 6151, Expires: 1/1/2027

CLIMB Certified Instructor, IRWA

Education:

Bachelor of Arts, Psychology, Minor in Spanish, Southern Utah University

RELEVANT EXPERIENCE

Steve Fox, SR/WA is a respected leader and experienced and skilled Principal in Charge who has successfully led a broad range of right of way projects throughout the Western United States, including transportation, energy, housing, and more. His approach to success for each project involves steady communication, collaboration, quality control, and accountability. This has consistently yielded exceptional budget and project timeline benefits for our clients. In addition to his technical insight, Steve is committed to mentoring his project team members in all aspects of the right of way industry.

PROJECT EXPERIENCE

Principal in Charge, San Antonio Water System (SAWS), Real Estate Property Acquisition Services, San Antonio, TX: Steve serves as Clark Land's Principal in Charge on our Real Estate Property Acquisition Services contract for SAWS. This contract focuses on property rights acquisition and essential real estate activities for capital improvement projects, particularly sewer line rehabilitation. He stands ready to provide support to SAWS when needed.

Program Manager, San Diego Gas & Electric (SDG&E), Strategic Underground (SUG) Program, San Diego County, CA: As the Program Manager, Steve oversees the SUG land program. He evaluates program processes, advises on changes to improve efficiency and cost effectiveness, and organizes the team to make sure program and project goals are being met.

Senior Project Manager, City of Coos Bay, Empire Boulevard Improvements, City of Coos Bay, OR: This project encompassed adding pedestrian sidewalks, improving safety, adding bike lanes, and improving shoulders. As Senior Project Manager, Steve oversaw the delivery of programming cost estimation, appraisals, the acquisition of two (2) temporary construction easements (TCEs) and two (2) permanent easements. The project was completed in compliance with the Oregon Department of Transportation (ODOT) right of way manual, using ODOT funding.

Senior Project Manager, City of Hillsboro, Reeds Crossing Project, Hillsboro, OR

Steve and his project team worked on a multi-agency project that was critical for the city's expansion into undeveloped land. Property rights were appraised and acquired for the use by state highway, county roadway, and city streets and project funding by private developer through the City of Hillsboro.

Senior Project Manager, City of McMinnville, Old Sheridan Road Project, McMinnville, OR

Steve managed the acquisition of fee title interests and temporary construction easements for this signature project stemming from the City's adopted 2010 Transportation System Plan. The objective of this project was to improve Old Sheridan Road including replacing the bridge over Cozine Creek, the addition of sidewalks and bike lanes, the installation of a left turn lane and traffic signal upgrades at the intersection of Old Sheridan Road and Highway 99W, landscaping, storm water facilities, and street lighting.

Steve and his project team acquired fee title interest in three (3) parcels and temporary construction easements over four (4) parcels of property located along the existing City right of way required for construction, maintenance, and operation of the improvements.

Project Manager, City of College Place, CARS (College Avenue Rose Street) Project, City of College Place, WA: The College Avenue Rose Street Project entailed over two (2) miles of reconstructed roadway between Rose Street and Carey Court and College Avenue and Lamperti Drive. Under Steve's leadership as Project Manager, right of way activities were completed ahead of schedule and under budget, despite both being less than half of typical. The scope of work included acquisition services for fifty-one (51) parcels involving title research, tracking of construction permits, negotiations for right of way and easements, payment coordination, title clearance and coordination with the Department of Transportation Local Area Coordinator. The crowning success was acquiring all property rights within an extremely aggressive five-month time frame without a single condemnation. Properties impacted included residential, vacant lands, and university lands owned by Walla Walla University.

Advisory Manager, Northwest Housing Alternatives, Inc. (NHA), Cottonwood I & II Apartments, Hermiston, OR: Steve's team provided temporary relocation and coordination services for the Cottonwood I & II rehabilitation and energy retrofit project. Cottonwood I, a family facility, required relocating tenants of twenty-two (22) units. Cottonwood II, a senior and disabled facility, required tenant relocation for twenty-four (24) units. These apartments had been acquired by Northwest Housing Alternatives, Inc. (NHA) and needed moderate rehabilitation. Funding was secured through federal and state sources including Housing Trust Funds, a grant reservation of HOME Funds, Low Income Housing Tax Credits (LIHTC), Oregon Affordable Housing Tax Credit Program (OAHTC) and Low-Income Weatherization Program (LIWP). Steve managed relocation activities, including coordination of vendors, agents, and tenants. The team also provided updates as necessary for key stakeholders. Steve ensured and fully documented compliance with all federal, state, and local laws, rules and regulations, including HUD Handbook 1378.

Project Manager, Portland Development Commission (PDC), Dirty Duck Business Relocations, Portland, OR: Provided emergency relocation assistance services for three (3) businesses. When this building was condemned by the Fire Marshall, Steve mobilized a team of relocation agents to move three (3) businesses within 30 days. PDC came to depend on the efficient and clear communication Steve provided for real-time decision making regarding the unique needs that come along with emergency relocations of long-established businesses.

Project Manager, San Joaquin Regional Rail Commission (SJRRC), Valley Rail Extension, Central California
As Project Manager, Steve was responsible for making sure the commission schedule and priorities were adhered to. The scope of work included programing, cost estimating, appraisals and reviews, acquisitions, and relocations. Steve coordinated the activities of the Relocation Agents, Real Property Appraisers, and the Furniture, Fixtures, and Equipment (FF&E) Appraisers.

JIM FISHINGER, RWP

Broker/QA/QC & Sr. Right of Way Agent

Years of Experience: 30+ years

Certifications/Licenses:

Right of Way Professional (RWP), International Right of Way Association (IRWA)
Texas Real Estate Broker, No. 742454, Expires: 8/31/2026

Education:

Bachelor of Science, Ohio State University

RELEVANT EXPERIENCE

Jim Fishinger, RWP, started in the Real Estate industry in 1985 and became a Broker in 1991. A graduate of Ohio State University, Jim's experience includes working with engineers, land planners, environmental consultants, government authorities, and utilities to take medium to large parcels through the approval process so they could then be sold to merchant builders with the entitlements they require. Jim has worked with a considerable amount of residential real estate, including relocation, and he has trained numerous agents and reviewed contracts for compliance in those management positions.

PROJECT EXPERIENCE

Broker, City of Temple, As-Needed Easement Acquisition Services, Temple, TX: Jim serves as the QA/QC/Broker for Clark Land, providing critical oversight on right of way acquisition and relocation services for the City of Temple. This role involves a broad scope of responsibilities, within an as-needed contract, focusing on utility projects within the City's service area. Jim's comprehensive oversight maintains the project's integrity, confirming adherence to all necessary legal and procedural standards.

Broker/QA/QC/Sr. Right of Way Agent, San Antonio Water System (SAWS), Real Estate Property Acquisition Services, San Antonio, TX: In this role, Jim oversees comprehensive property acquisition services for sewer line rehabilitation and other capital improvement projects. His responsibilities include managing real estate transactions, conducting property rights research, and acquiring easements across various property types.

Broker, City of Moreno Valley, On-Call Real Property Services, Moreno Valley, CA: Clark Land's contract for the City of Moreno Valley included on-call right of way services involving coordinating site surveys, relocation assistance plans, county recordings of documents, temporary and permanent easements, leases, or purchases of property, certification of right of way, utility research and coordination, appraisals, preparing right of way data sheets, coordinating eminent domain actions, obtaining title reports, and litigation guarantees. As Clark Land's Broker, Jim provided oversight for this project.

Broker, Elsinore Valley Municipal Water District (EVMWD), As-Needed Real Estate & Appraisal Services, Lake Elsinore, CA: Clark Land worked with the EVMWD to provide appraisal services. This project consisted of cost budgeting and property research of two hundred & twenty-eight (228) parcels of surplus land fragments. Research included zoning, land use, physical and economic characteristics, highest and best use, and GIS mapping of parcel boundaries. As Clark Land's Broker, Jim provided oversight for this project.

LILLI MORSE, ERW, RWA

Right of Way Agent

Years of Experience: 25 years

Certifications/Licenses:
Easement or Right of Way (ERW) Agent, Texas Real Estate Commission (TREC), No. 33895, Expires: 1/31/2025
Right of Way Agent (RWA), International Right of Way Association (IRWA)
Commercial Processing and Underwriting Certification
Project Management Certificate Program

Education: Bachelor of Arts, Mass Communications, University of South Florida

Languages: Bilingual in English and Spanish

RELEVANT EXPERIENCE

Lilli Morse, ERW, RWA possesses over 25 years of comprehensive expertise in Real Estate Origination and Operations, making her an invaluable asset to Clark Land. Her extensive background spans underwriting, pipeline management, and compliance with local, state, and federal regulations. In her role as a Right of Way Agent, Lilli has demonstrated exceptional capability in managing complex real estate transactions and negotiations for high-profile projects. Her proficiency in quality assurance, risk analysis, and real estate principles, paired with her proven track record of maintaining project timelines and enhancing stakeholder relationships, consistently exceed client expectations.

PROJECT EXPERIENCE

Right of Way Agent, San Diego Gas & Electric (SDG&E) Strategic Undergrounding (SUG) Program, San Diego County, CA: This project involves property acquisition services, covering San Diego County's heightened wildfire risk communities. Lilli's involvement includes easement negotiations, documentation, site visits and summaries. As a Right of Way Agent, Lilli keeps projects on schedule by managing deadlines and adjusting workflows to meet project milestones. She serves as a liaison between the Acquisition and Design teams to expedite communication and keep appropriate parties updated on project developments. Lilli leads multiple project components from start through delivery by prioritizing needs and delegating assignments.

Right of Way Agent, SDG&E, Electric System Hardening (ESH) Program, San Diego County, CA: To increase safety in high fire prone areas, SDG&E has embarked on a multi-year project of assessing the safety and technical effectiveness of over 180,000 electrical distribution poles in their territory. Lilli conducted site visits with clients and property owners and worked with the ESH program team to help the negotiation process run smoothly. She also executed cover letters, courtesy notices, and right of way documents for grid upgrades and improvements.

Underwriter, Portfolio-Contract, Mission Federal Credit Union, San Diego, CA: As an Underwriter, Lilli's responsibilities included cash flow analysis, appraisal review, and property valuation. She also reviewed title reports, exhibits, legal descriptions, surveys, and plat maps for viable, saleable, well performing loans to better serve the San Diego County community. Her ability to execute complex income analysis and her excellent analytical skills led her to be recognized as a "Top Performer" for her company and trusted to train new underwriters.

KEVIN CANNON, ERW

Right of Way Assistant

Years of Experience: 7 years

Certifications/Licenses:

Easement or Right of Way (ERW) Agent, Texas Real Estate Commission (TREC), No. 33972, Expires: 7/31/2025

Texas Notary Public, No. 134649255, Expires: 11/16/2027

Education:

Construction Science & Management, Texas State University, TX

RELEVANT EXPERIENCE

Kevin Cannon, ERW is a highly skilled Right of Way Assistant with over 7 years of experience. He excels in negotiations, acquisitions, client relations, and detailed document management, including blueprint review and preparation. Kevin has experience working on complex projects from inception to completion. His roles have ranged from negotiating easements and overseeing project construction as a Senior Right of Way Agent to managing property enhancements and coordinating large construction teams as a Project Manager. Kevin's effective communication and precise attention to detail make him an asset to any project team.

PROJECT EXPERIENCE

Right of Way Agent, San Antonio Water System (SAWS), Real Estate Property Acquisition Services, San Antonio, TX: As a Right of Way Agent, Kevin is responsible for securing rights of entry from landowners for the purpose of SAWS capital improvement projects. This involves negotiating and acquiring temporary access rights on private properties. His role requires a blend of negotiation skills, and technical and legal knowledge, so that all parties' interests are adequately represented and protected.

Senior Right of Way Agent, Hydrogen Pipeline of Bahia, LLC., Katy, TX: In his role as Senior Right of Way Agent, Kevin negotiated critical access and easement agreements, alongside conducting comprehensive research and updates of landowner contact and address information. He efficiently managed the line list and land status in GRID, coordinated communications with landowners for survey permissions, and scheduled soil sample collections. Kevin's leadership extended to overseeing the construction and reclamation phases of the project, providing adherence to project timelines, which significantly contributed to the project's success.

Document Specialist/Senior Right of Way Agent, Various Projects, TX: As a Document Specialist/Senior Right of Way Agent, Kevin provided document review, document preparation, and pulled/recorded courthouse documents while in the office under the watch of his supervisor. In the field, Kevin shadowed a fellow Senior Right of Way Agent helping negotiate access and easement agreements as well as oversee construction and reclamation efforts. Kevin also conducted research on landowner information and contact information to relay to supervisors.

Superintendent, Various Projects, Spring, TX: As a Superintendent, Kevin was responsible for managing multiple construction crews to effectively complete projects in a timely manner. His skills included managing a schedule, budgeting, and material orders. He communicated with clients and building managers with weekly project updates. Kevin worked side by side with architects and engineers to solve problems and create new work plans for multiple projects.

Sue Briney

Title Agent

Years of Experience: 16+ years

Education: Bachelor of Fine Arts, University of North Texas, Denton, TX

RELEVANT EXPERIENCE

Sue Briney has over 16 years of experience in the title industry. Her experience includes organizing, preparing, and maintaining all forms, documents, tract and project files, database entry, status reports and/or other required reports associated with the administration of contracts for acquisition (easements, purchase agreements, etc.). She also has experience with contract negotiation, project management, sales, and marketing. Sue maintains accurate and current information on the overall status of assigned projects and is a well-rounded professional with excellent communication and organizational skills who works well as a contributing member of our team.

PROJECT EXPERIENCE

Title Agent, Fire Risk Mitigation (FiRM) Program & ESH (Electric System Hardening) Program, SPRP WMP Project, APP Project, San Diego Gas & Electric (SDG&E), San Diego, CA: SDG&E is in the process of improving the safety of their electric poles, by replacing identified wood poles with steel poles throughout San Diego County. As a Title Agent, Sue assists in providing the necessary right of way easement documentation, location of projects on GIS and Assessor's Parcel maps for the clients, and Prior Rights research projects.

Document Specialist, Clark Land Resources, Inc.: Since joining Clark Land, Sue has been responsible for maintaining the company's project documentation database. Her duties also include training employees in the use of the database and being available as a resource to all Clark Land team members.

Right of Way Title Agent, Texas: Sue completed surface title research in Brazoria, Harris, Nueces, San Patricio, Refugio, Bee, Karnes, Wilson, and Bexar Counties. She prepared final title packets, inclusive of limited title reports, county tax cards, county appraisal maps, deed plots, and title documents. Additional services included conducting Due Diligence on Pipeline Projects in Frio, LaSalle, and Dimmitt Counties. Project responsibilities included file review to make sure said files were complete, easements were correct, and surface ownership was up to date. Files then had to be compared to the line list provided by the client and corrections were made accordingly. Completed vesting and 70-year surface title research on 150-mile pipeline. She also assisted the title supervisor with special projects inclusive of Line List & Line Mapping preparation, condemnation documents, procurement, and surveyor documents.

KYLE SCHROEDER, MAI, ARA

Appraisal Services (*Subconsultant*)

Years of Experience: 19 Years

Certifications: State Certified General Real Estate Appraiser, State of Texas, Certification No. TX-1337543-G
MAI Designation of the Appraisal Institute, No. 460395
Accredited Rural Appraiser (ARA) Designation of the American Society of Farm Managers and Rural Appraisers (ASFMRA), ARA No. 1146793

Education: Bachelor of Science, Texas A&M University, College Station, TX
Master of Business Administration (MBA), California Polytechnic State University, San Luis Obispo, CA

Professional Associations:
Accredited Member, Appraisal Institute, No. 460395
Member, South Texas Chapter of the Appraisal Institute
Member, International Right-of-Way (IRWA), Chapter 39
Accredited Member, American Society of Farm Managers and Rural Appraisers (ASFMRA), ARA No. 1146793, 2017

RELEVANT EXPERIENCE

Kyle Schroeder, MAI, ARA is the owner and chairman of Texas Values, a real estate appraisal firm started in San Antonio, Texas. He has been actively appraising real estate for over 19 years in the San Antonio area, including South Texas, Coastal Plains, West Texas, and the Texas Hill Country. Kyle's experience includes appraisal and consulting assignments for various clients such as attorneys, accountants, lending institutions, estates, and government agencies. He has testified as an expert witness in District Court and numerous commissioners' hearings.

PROJECT EXPERIENCE

Real Estate Appraiser, Lower Colorado River Authority (LCRA), San Antonio, TX: Kyle has completed various projects for the LCRA as part of a team. These projects include appraisals of twenty-six (26) parcels for a new transmission line called the *Bakersfield to Solstice* in Pecos County; appraisals of five (5) parcels for a rebuild called *Luling to Cuero* in Gonzales County; appraisals of fifteen (15) parcels for an upgrade for a project called *Hempstead to Beeville* in Austin and Waller Counties; and appraisals of thirty (30) parcels for a new build transmission line called *Big Hill to Kendall* in Kerr and Kendall Counties. This relationship has lasted several years.

Real Estate Appraiser, Bexar County - Public Works, San Antonio, TX: Kyle provided appraisal services for various road widening projects that included vacant land, single-family residences, and small commercial properties. He also has performed appraisals of County owned buildings. This relationship has lasted several years.

Real Estate Appraiser, WSB, San Antonio, TX: Kyle provided inspections, measurements, and appraisals for seventeen (17) single-family residences as part of a joint effort by various governmental entities as noted before. This relationship has lasted several years.

Real Estate Appraiser, Ross, Molina, Oliveros, P.C., San Antonio, TX: Kyle has testified in various court proceedings in Special Commissioners' Hearings related to value. This relationship has lasted several years.

Real Estate Appraiser, San Antonio River Authority (SARA), San Antonio, TX: Kyle was selected as one of the qualified appraisers to conduct work for this agency.

RE: RFQ 2024-5 | Right-of-Way Acquisition Services Rotation

Mr. Hinojosa and Members of the Selection Committee:

Cobb, Fendley & Associates, Inc. (CobbFendley) has assembled an exemplary team of professionals to deliver quality, timely right-of-way (ROW) acquisition services to the City of Edinburg in support of its continuing growth and development. We offer comprehensive ROW services, including critical support functions, which allows us to provide a seamless client experience to the City. **CobbFendley is presenting qualifications for the following categories: Appraisal Services, Negotiation Services, Escrow and Title Coordination Services, and Project Management and Administrative Services.** In addition, we are partnering with local appraiser, Leonel Garza, Jr. & Associates, LLC., to provide Appraisal Services. Mr. Garza's firm is licensed in accordance with the Texas Appraisal Licensing and Certification Act as per the RFQ requirements.

As Project Manager/Project Principal, I, Joshua "Josh" Canuteson, SR/WA, R/W-NAC, have a detailed understanding of the process and nuances of acquisition of private property rights for public projects across Texas, as well as a keen understanding of the criticality of working collaboratively with multiple landowners, agencies, attorneys, and design firms toward the common goal of bringing infrastructure to growing communities. Through my experience and commitment, I will lead an exemplary and comprehensive team of professionals who combine a diverse base of experience with the appropriate depth of expertise to successfully deliver ROW projects to the City of Edinburg in a timely manner.

With 44 years of experience serving municipalities across Texas, and specifically in the Central and South Texas Regions, CobbFendley has the available staff, expertise, and experience to provide these services to the City of Edinburg. We serve on several rotation lists, and have local on-call contracts with the cities of Edinburg, Corpus Christi, Austin, Converse, San Marcos, New Braunfels, Round Rock, Lago Vista, and Pflugerville, as well as the Guadalupe-Blanco River Authority. We consider our role of providing ROW services as an opportunity to partner with and serve the communities where we live and work.

Members of this team have lived and worked in the area for the entirety of their careers and have come to appreciate and understand the character of the Rio Grande Valley and the uniqueness of communities such as the City of Edinburg. CobbFendley currently has eight employees that live in Hidalgo County, three of whom call the City of Edinburg home. Our commitment to seeing our home communities thrive is what drives our team to deliver excellent work.

In summary, CobbFendley has assembled a team that is ready, capable, and enthusiastic to work with the City of Edinburg. Thank you for the opportunity to present our qualifications; we look forward to next steps and the opportunity to serve the City in the near future. As an Officer of CobbFendley, I am authorized to bind the company in a contract, and will serve as the Corporate Sponsor for any resulting contract with the City. We did not receive any addenda at the time of binding this submittal.

Sincerely,

Cobb, Fendley & Associates, Inc.

Josh Canuteson, SR/WA, R/W-NAC

About CobbFendley

FIRM HISTORY

Cobb, Fendley & Associates, Inc. (CobbFendley), founded in April 1980, is an employee-owned Texas corporation that has been providing **infrastructure consulting for more than 44 years**. Our **staff of more than 670 employees** brings an exemplary level of expertise, experience, and commitment to serving the communities where we live and work.

Since 1994, CobbFendley has provided complete ROW acquisition and project management services for notable clients across Texas, including the City of Edinburg, TxDOT, and numerous cities, counties, utility providers, and contractors. In that time, we have **completed more than 500 land acquisition projects** – from multi-million dollar urban infrastructure projects involving hundreds of landowners to a single parcel acquisition to accommodate a new lift station. CobbFendley's **qualified ROW professionals are Licensed Real Estate Agents and Brokers with the Texas Real Estate Commission**. They assist clients with a broad array of services and carefully assess each project.

OUR LOCATIONS

CobbFendley maintains strategic office locations throughout Texas to better serve our clients. We currently have 22 offices spanning 8 states, with 15 offices in Texas. The City of Edinburg will be served primarily by CobbFendley's McAllen office with support from our Corpus Christi, San Marcos, Austin, Katy, and Frisco offices.

8 States | 15 Offices in Texas

MEET YOUR PROJECT TEAM

PROJECT MANAGER/PROJECT PRINCIPAL
JOSH CANUTESON, SR/WA, R/W-NAC

Frisco Office
972.499.7429
jcanuteson@cobbfendley.com

The team will be led by Mr. Canuteson, who will serve as the primary point-of-contact and liaison between the City of Edinburg and the CobbFendley team. He brings more than 19 years of experience with working throughout Central and South Texas and will quickly respond to project or scope requests. Mr. Canuteson's Project Management style is centered on communication and creating efficiencies. Therefore, all members of the project team, including City personnel, will be engaged and involved in significant decisions in a timely manner to keep the City's projects moving forward. In addition to meetings with the City, project communications will be in the form of bi-weekly updates outlining project progress, important decisions, needs from the Client, upcoming deliverables, and schedule.

Mr. Canuteson will also serve as the Project Principal. He will have the ultimate responsibility of dedicating appropriate CobbFendley personnel to the project and coordinating their availability, as well as overseeing compliance with the schedule and budget and adherence to the quality program.

CLIENT MANAGER HOMER BAZAN, JR., PE, LGPP

McAllen Office
956.803.3463
hbazan@cobbfendley.com

Mr. Bazan brings his expertise and local knowledge to the project team by serving as an advisor and resource for overall execution of assigned work. As a local project manager with CobbFendley's office located on McColl Road in McAllen, Mr. Bazan is easily accessible and available to respond to the City immediately when needed. As a long time resident of Edinburg, Mr. Bazan is committed to the community and has a personal interest in the success of the City's projects.

Leonel Garza Jr. & Associates, LLC (Garza & Associates) will support the team by providing **Real Estate Appraisal Services**. Mr. Garza has provided appraisals for highway and street expansions, water/sanitary pipelines, electric transmission lines, and drainage easements for local and government clients throughout South Texas, including projects with the City of Edinburg. Additionally, Garza & Associates is a certified HUB and DBE firm, allowing our team to meet HUB or DBE participation goals that may be required for a project.

Firm contact information is provided below.

Contact: Leonel Garza, III
Address: 1419 Dove Avenue, Suite #1,
McAllen, Texas 78504 *(Hidalgo County)*
Phone: 956.687.7295

ABILITIES & QUALIFICATIONS

As a ROW service provider, CobbFendley's in-house ROW professionals routinely coordinate with surveyors, prepare preliminary route studies, and work with design teams to more clearly define the City's ROW needs (reducing relocations

and unnecessary land acquisitions). Additionally, Cobbfendley manages the project appraisers, performs acquisition and relocation services, as well as coordinates with and assists legal consultants throughout the condemnation process. From the outset of the project, we will work with the City to develop and maintain objective and legally defendable acquisition procedures to expedite the schedule and reduce condemnations. CobbFendley's ROW team is experienced in all aspects of the ROW process and will diligently pursue completion of all required activities to achieve timely project delivery.

CobbFendley's ROW services include:

- Project/Contract Management
- Right-of-Entry (ROE)/Project Introductions
- Appraisal/Appraisal Review Management
- Escrow and Title Coordination Services
- Negotiation Services
- Relocation Assistance
- Eminent Domain/Condemnation Support

DEPTH OF RESOURCES. With dedicated staff in Central and South Texas and our local presence through our McAllen office, the CobbFendley team has the capacity and capability to perform ROW services for the City of Edinburg beginning immediately. **With CobbFendley's 23 ROW staff members, adequate staff will be available for the City's projects.** CobbFendley has a history of working with the City of Edinburg to fulfill unique requests and adhere to strict timelines. Our team has consistently upheld our reputation for meeting deadlines and successfully completing projects within the allocated budgets. The majority of the firm's business comes from repeat clients and is a direct result of client satisfaction.

UNIQUE QUALIFICATIONS. In addition to land acquisition and property management services, CobbFendley uses GIS technology for data integration and analytics, as well as for mapping and modeling various physical features. As a result, the City of Edinburg will have improved access and understanding of the data crucial to daily decision making and long-range planning, offering a comprehensive operational insight.

CobbFendley has employed multiple GIS technologies to build an internal, password protected web mapping application for our ROW department. This mapping application tracked the ROW parcel acquisition progress for Grand Parkway Segments F1, F2, and G, and Cornudas Pipeline projects, linking forms and other documentation to each parcel. Reporting and analysis tools are also included within the application to enable the user to perform basic analyses and reporting.

ABILITY TO MEET SCHEDULES

Our firm's size and ROW resources throughout the state of Texas offers the City an extensive resource pool of professionals with experience on a variety of ROW projects and challenges. **The size of our staff, along with our diverse capabilities and collaborative team approach, enables us to remain flexible in how we deliver services to our clients.** Our team meets weekly to discuss workload, upcoming tasks, and availability aiming to meet client goals while maximizing utilization. **We can efficiently manage projects of varying sizes by flexibly reallocating resources as needed.**

PROJECT SCHEDULING TECHNIQUES. CobbFendley strives to manage projects in a thorough manner that allows the project to progress smoothly and produce results that meet the expectations of the City and CobbFendley. Effective communication between the City, CobbFendley, and all affected parties is critical to the overall success of each project.

The CobbFendley team and the City of Edinburg will develop a milestone-driven schedule at the beginning of the project. Our Project Manager, Mr. Cantueson, will then assign the resources necessary to meet the project schedule. CobbFendley will conduct routine project meetings and issue schedule updates, as needed.

Mr. Canuteson will monitor the project budget in addition to the estimated cost of land acquisition. A weekly review of the project will facilitate compliance with the scope, schedule, and budget.

Our team uses scheduling and resource allocation programs, taking the following steps to successfully manage projects:

- Monitor the schedule and significant milestones early and frequently
- Take proactive steps when internal or external activities have an anticipated effect on project schedules or milestone deadlines
- Maintain early and continual communication within the team and with the City
- Discuss, in detail, progress and milestone completions as an important agenda item at all progress meetings

As a provider of specialty services, CobbFendley routinely partners with other firms to deliver successful projects throughout the State. Our approach to effective coordination with project teams centers on the following best practices:

- Designate one CobbFendley representative to act as the primary point-of-contact to the City
- Hold weekly internal status meetings to schedule and allocate appropriate resources to meet project schedule demands
- Identify potential obstacles and critical path functions early in the planning process and relay any potential impacts to the schedule to the City
- Effective use of internal meetings using Microsoft Teams, Zoom, email, and in-person attendance at meetings to convey all project-related materials and schedules

TEAM COMMITMENT AND AVAILABILITY. Our firm has a strong track record of professional, timely delivery of ROW projects on behalf of governmental entities.

Specifically, on behalf of TxDOT we managed North Tarrant Express (NTE) Segment 1 (113 total parcels) and NTE Segment 3A (48 total parcels), and Grand Parkway Segments F1, F2, and G (181 total parcels). NTE Segment 3A and Grand Parkway Segments F1, F2, and G were ongoing at the same time. As demonstrated by this experience, our firm is able to evaluate a project's needs, and adequately assign resources to achieve effective and timely delivery.

We are also accustomed to shifting responsibilities when the need arises to achieve successful project delivery. We have partnered with Garza & Associates, who will be beneficial and add value to this endeavor, and trust that their past experience will prove invaluable to the City of Edinburg. The availability of qualified, experienced personnel who can service the City's needs will not pose any challenges.

The individuals that make up our team are very familiar and experienced in working with the Uniform Act and other Federal and local policies and procedures in acquiring ROW. We also have many years of experience performing work for governmental entities across the state of Texas, particularly with the City of Edinburg.

SCHEDULE. The time needed depends on a variety of factors and is not always an easy answer. However, on an individual parcel basis, we would assume the following time-frames based on the corresponding factors:

- Landowner Notification – 1 day
- Title Report or Title Commitment – 15 days
- Appraisal – 15-30 days, depending on complexity
- Appraisal Review – 3 days
- Negotiation – 35 days to 3 months, closing could stretch out further depending on complexity of title curative
- Relocation – 3-6 months, depending on complexity
- File Closeout – 1 day

METHODOLOGY AND MANAGEMENT OF THE SCOPE OF SERVICES

As a ROW service provider, CobbFendley offers in-house staffing of ROW professionals, coordination with designers, coordination with surveyors, preliminary route studies, the ability to define ROW needs (reduce relocations and unnecessary land acquisitions), coordination with legal consultants for eminent domain actions, improved performance with acquisition, relocation and appraisal specialists, management of staffing requirements and utilization, and the development of objective and legally defendable acquisition procedures to expedite schedule and reduce condemnations. CobbFendley is experienced in all aspects of the ROW process and the management services required to complete acquisition.

The following ROW Acquisition Approach is based on our understanding of the City's RFQ. Further, it is assumed that all State and Federal law will be complied with, including the Code of Federal Regulations (CFR) Section 49, Part 24 Uniform Relocation Assistance and Real Property Acquisition Policies Act (the Uniform Act). Additionally, Chapter 21 of the Texas Property Code and all processes and procedures outlined by the City of Edinburg will be adhered to. City Forms will be utilized in all circumstances and any exceptions to policy would need written approval from City staff. It is also anticipated that all approvals (Valuations, Administrative Settlements, Relocation Supplements) will be received from the City.

Based on these assumptions, the following is the anticipated Scope of Work to be performed in order to achieve successful project delivery. The following details of the ROW acquisition approach describe the actual process that is followed on an individual parcel basis. It is unknown at this time the exact path that each parcel will take, but these methods will be followed in all circumstances.

LANDOWNER NOTIFICATION. Assignments will be initiated by reviewing the information provided by the City of Edinburg. Upon receipt of the Notice to Proceed, our efforts will begin with a kickoff meeting to discuss the specifics of the project. We will commence our efforts immediately following the kickoff meeting.

The initial work will consist of establishing the status report(s) and a property owner contact list. The property owner contact list will be utilized in the subsequent preparation of initial notice letters notifying the property owners of the project. Within the Notice Letter packages, a letter identifying the project, a depiction of their property to be acquired, and the Landowner's Bill of Rights will be enclosed. Each package will be sent by Certified Mail Return Receipt Requested (CMRRR) to the property owner's address according to the tax rolls and confirmed by title commitments or limited title sheets.

The property owner contact list will be continually updated as relevant information pertaining to each owner is obtained. In addition to the electronic parcel files, hard copy files with appropriate tabs will be created as working files for the project. As documents are created and sent to property owners, or as documents are received, they will be placed in the primary project files in the project office. Records of all correspondence or contact with the property owners and records of all payments will be included in the working file, as well as scanned into the electronic parcel files.

TITLE. Upon commencement of our efforts, we will reach out to Rio Grande Title Co. and obtain title commitments for all parcels requiring a title policy. Should a title policy not be required, we would have the title company provide an Abstractor Certificate or Limited Title Sheet. Further, we have in-house personnel at CobbFendley with a long history of performing title services. Several of our agents have worked for title companies as escrow agents or title examiners. For any conflicting encumbrance, we will develop a title curative plan that will identify the method for clearing up that item.

To the extent possible, we will proceed with these title curative methods as soon as we are able. For instance, identifying heirs of a deceased person listed on Schedule A of the title commitment can

begin immediately while securing a signed Lien Release is typically not possible until an agreement is in place and the property owner grants permission to contact their lender. We intend to be proactive in preparing the necessary title curative documents and when feasible, that will take place prior to the initiation of negotiations. Upon receipt of the commitment or Title Sheet and our review of each item included, we will also forward it to the Appraiser for their use in preparation of their report.

APPRAISAL & APPRAISAL REVIEW. Once the Initial Notice Letters have been provided to property owners, a Notice to Proceed (NTP) will be issued for each parcel. Once the NTP has been received by the Appraiser, they will begin their own attempts to contact the landowner.

This contact is necessary to: 1) provide the owner an opportunity to accompany the Appraiser on their inspection of the property; and to 2) allow the owner to provide any information they may deem relevant to the valuation of the property, or that could be beneficial to the project. Simultaneously, with this contact effort, the Appraiser will begin compiling sales comparables and other relevant information that can be considered in their reports.

As contact with the property owners is completed, the Appraiser will schedule appraisal inspections of each parcel. These inspections will be coordinated with the Relocation Agent and Negotiation Agent in order to properly classify real property and personal property in the appraisal report.

Upon completion of the inspection and development of the value, the Appraiser will submit their final appraisal report. The Appraiser will perform their own QA/QC review of each appraisal report prior to submission to the City. Upon approval of the Appraisal Report by the City of Edinburg, the negotiations with each property owner will begin.

Should Review Appraisal services be necessary, this is the process that would be followed. Upon completion of each Appraisal Report, the Review Appraiser will review each appraisal report to ensure consistency of values across the reports, that proper supporting documentation was provided for the conclusion reached, and that each one is in compliance with City policies and procedures as well as the Uniform Standards of Professional Appraisal Practice (USPAP). Comments will be provided to the Appraiser by the Review Appraiser for correction. Additionally, the Review Appraiser will complete a Tabulation of Values for each parcel. The Tabulation of Values provides relevant information from each appraisal report in a sort of Executive Summary format. Further, it identifies any Bisected improvements (Category I or II) as well as the retention value for each affected improvement. Upon completion of the Tabulation of Values and review of the Appraisal Report as well as any corrections necessitated by the comments from the Review Appraiser, both will be provided to the City for an administrative review and approval.

NEGOTIATION. Upon approval of the Appraisal Report, it will be provided to the Negotiation Agent for an additional analysis, to confirm the City of Edinburg's approved value. The Negotiation Agent will then prepare an offer package for each parcel utilizing City forms, consisting of the following documents at a minimum:

- Offer Letter
- Landowners' Bill of Rights and Right to Repurchase
- Landowners' Bill of Rights Receipt
- Conveyance Document(s) with Metes and Bounds and Parcel Sketch
- Texas Real Estate Commission Information About Brokerage Services
- Appraisal
- Acknowledgment of Receipt of Appraisal Report
- Return Envelope

Upon completion of each offer package and proper QA/QC, the Negotiation Agent will contact the property owner to confirm we have the correct contact information. Following this confirmation, each offer package will be sent by CMRRR to the appropriate landowner.

At the same time that the offer package is being sent, the Negotiation Agent will seek to meet face-to-face (or virtually upon request by property owner) as soon as possible with the landowner in order to explain the documents contained in the offer package. As the Negotiation Agent contacts the landowners, they will maintain Negotiator's Reports for each parcel and document all contacts. Additionally, any document generated or received will be maintained in the working files and placed in the parcel folder. The Negotiation Agent will work closely with the property owner on formulating their response within the required time-frame, or will assist them in submitting an extension request.

Should a property owner not agree with the value determination of the Appraiser, they will be given the opportunity to present a counter offer to the City for consideration. The Negotiation Agent will assist them in the submission of the counter offer and will offer them clarification on items that may have been included but have been deemed non-compensable. Each counter offer will be submitted to the City, and will include a cover letter with a summarization of the differences between the offer and the counter, as well as a recommendation as to whether or not the City should accept the counter offer.

If a property owner's counter offer is approved by the City, or if the landowner accepts the City's offer for the property, the Negotiation Agent will coordinate with the property owner to obtain the executed conveyance documents. Each of our Negotiation Agents are commissioned Notary Publics and may notarize the documents for the landowner. We also have the ability to perform Remote Online Notarizations for any necessary conveyance documents. Once the executed documents have been received, the Title and Negotiation Agents will cure any remaining title issues that were not previously resolved.

CLOSING. Upon resolution of the remaining title issues, a payment request will be prepared and submitted to the City of Edinburg

containing the necessary documents. The City will then proceed with the issuance of a check in the amount agreed. This check will be picked up by the project team and provided to the title company in support of preparing the required closing documents. In the instances where a title policy is not being obtained, we will contact the landowner to coordinate delivery of the check and to complete the pre-closing inspection report.

Once all closing documents have been prepared, a closing will be scheduled for each parcel. The Negotiation Agent will perform closing services in conjunction with the title company. Once the closing has been completed, the conveyance documents shall be recorded in the Hidalgo County Real Property Records. The final title policy and the closing statement originals will then be provided to the Negotiation Agent, along with the recorded conveyance documents. The Negotiation Agent will confirm that no exceptions are shown on the final title policy that were not previously approved by the City. The Negotiation Agent will provide these documents to the City to support payment of the title company's closing fees. We will then confirm that all parcel documents are located in the original parcel file, and submit the closed file paperwork to the City.

ENGAGING CITY STAFF AND STAKEHOLDERS

A cornerstone of our high quality, value-conscious approach is to establish and maintain effective communication not only within the project team but also with stakeholders who are interested in the project. CobbFendley develops a detailed communication strategy implemented as part of our overall delivery plan in close coordination with the City. Timely and consistent communication keeps the project on track and allows all parties to quickly and easily manage inevitable changes that may develop.

Additionally, CobbFendley has hosted many open houses and public meetings. If a project is determined to require input from the public, CobbFendley will work with the City and Design Engineer to prepare materials, provide presentations, and be present to explain the project to the attendees and listen to and record feedback of their concerns. Following public input, the CobbFendley team will assemble the comments and will coordinate with the City to determine the action required, if any, to address feedback. The public's concern/input will be balanced with the City's intent for the project to provide a coordinated approach to the project.

QA/QC PROCESS

CobbFendley is fully committed to delivering quality on every project. To that end, a Quality Control (QC) plan will be established for the firm to use on each project. The objective of CobbFendley's QC Plan is to deliver work products that conform to the project's goals and objectives as defined by the City. QC reviewers are identified at the project inception and integrated into the production process. Ongoing quality reviews are routinely performed and formal quality reviews are performed prior to every project milestone deliverable. Formal quality reviews are performed prior to every project milestone deliverable. In addition, the Plan establishes the control process guidelines used for quality evaluation and measurement. These guidelines include:

- The process for document review, detail checking, and comment resolution
- The specific project requirements
- Document technical quality
- Clients' established budget

Josh Canuteson, SR/WA, R/W-NAC, will lead the QA/QC review efforts for this project. He will ensure that every submittal to the City of Edinburg has been thoroughly reviewed for technical accuracy, adherence to standards and requirements, and to confirm that a high quality deliverable is being provided. A fully documented QA/QC review process will be implemented at the start of each project as part of our Project Management Plan.

SCHUNIOR ROAD DETENTION POND
CITY OF EDINBURG, TEXAS

PROJECT DESCRIPTION

CobbFendley provided ROW services for the acquisition of one parcel from the Rio Grande Bible Institute in Edinburg, Texas. This project was unique in that it left an interior remainder that the property owner could utilize while providing the City with the required parcel. An access easement across the property that the City of Edinburg acquired was reserved for the Bible Institute so that they could access their interior tract. Services included negotiation, title curative, and closing support.

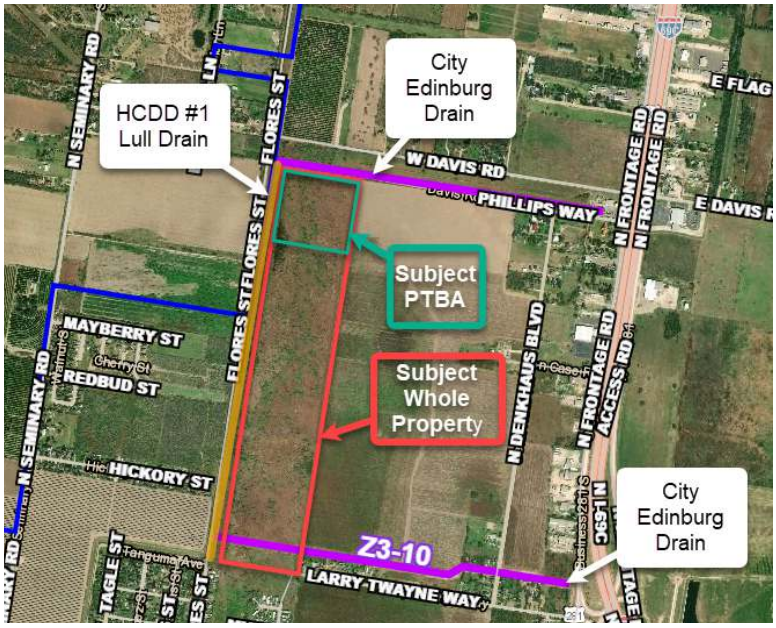
WASTEWATER TREATMENT PLANT ACQUISITION
CITY OF EDINBURG, TEXAS

PROJECT DESCRIPTION



The project involved the acquisition of a 16.081 acre portion of a 112-acre tract. After initiating discussions with the landowner, it was requested that the City of Edinburg purchase the entire 112-acre tract. CobbFendley consulted with the City and determined that the entire tract could be used, so we facilitated the purchase of the entire property. This provided the City with additional area at a reasonable amount that can be used for a variety of purposes. Services included negotiation, title curative and closing support.

HILLCREST VOLUNTARY BUYOUT PROGRAM

PORT OF CORPUS CHRISTI AUTHORITY | CORPUS CHRISTI, TEXAS

PROJECT DESCRIPTION

The Hillcrest and Coles neighborhoods were adversely impacted by the TxDOT Harbor Bridge Project and through a Civil Rights claim, and were granted a voluntary buyout program through a 2-party and 4-party agreement between FHWA and TxDOT. **CobbFendley served as the Acquisition Manager and negotiated 128 of the parcel acquisitions. CobbFendley's Acquisition Manager was present in the project office and managed the appraisal, title coordination/escrow, and all other acquisition/negotiation aspects of the client's end program until our involvement with the project ended upon substantial completion of our acquisition activities.**

Throughout our time working on the project, the team became intimately familiar with the desires and needs of the property owners within the neighborhood. Since it was a voluntary buyout program, it was vital that all issues be resolved (i.e. compensation, title, replacement housing). **CobbFendley's team diligently pursued getting to know the owners and working with them to achieve an amicable acquisition of their property.** We worked very closely with the owners to resolve any outstanding title issues so that their properties could be purchased. At all times, we sought to be a strong contributor to the project team and to comply with the guidelines set forth by the Port of Corpus Christi Authority, TxDOT, and FHWA. Often, the owners would stop in and visit with our Acquisition Manager to fill him in on the state of the neighborhood, and he became a trusted part of their community.

sam@pocca.com

In the early stages of the project, CobbFendley provided input into the overall acquisition plan that was put in place by the Port of Corpus Christi Authority. Knowledge of the Uniform Relocation Assistance Act (URA) was necessary to properly craft the program's guidelines and procedures and our input was valuable in this endeavor. Funds from TxDOT and the Port of Corpus Christi Authority were involved in the project. As such, accurate tracking of the allocation of funds was necessary to allow for accurate reporting to both public agencies. Further, we worked closely with the Relocation Manager to monitor the benefits that the owners/displacees received in order to eliminate the duplication of benefits between the acquisition and relocation aspects.

One challenge that we encountered on this project was the delivery of appraisal reports. When the project first began, CobbFendley was tasked with identifying appraisal firms that could meet the established deadlines. As is common on many ROW projects, delivery of appraisals in a timely manner became a struggle. **Through our time in the industry and the relationships with appraisal firms that we have built, we were able to seamlessly reassign some of the workload to allow for successful delivery of the outstanding appraisals. We maintained consistent values amongst the project appraisal team by establishing regular communication between the different appraisal firms and continually reminding them of the need for consistency.**

An additional challenge was the state of the title on many of the properties to be purchased. Many of the homes in the neighborhood were passed down from parents to their child without a will or deed. **With our knowledge of title clearance and our relationships with the title companies on the project, we were able to diligently pursue the necessary documents to allow the owners to convey clear title.** This was highly rewarding as it allowed the owners to participate in the program and to receive the compensation and benefits that they were entitled to.

CORNUDAS PIPELINE
EL PASO WATER UTILITIES | EL PASO, TEXAS

PROJECT DESCRIPTION

The El Paso Water Utilities – Public Service Board (EPWater) selected CobbFendley to provide services required for the acquisition of ROW (easements) for an 81-mile pipeline from east El Paso in El Paso County to the Hudspeth/Culberson County line. The pipeline, once constructed, will carry water from Dell City to Clint, Texas. **Our efforts included land surveying and acquisition of impacted parcels for three segments of water pipeline, GIS mapping, and preparation of a due diligence report for 103 previously acquired easements, as well as project administration. Our team identified and established ownership and ROE for 272 individual parcels impacted by the proposed pipeline, and created and maintained a database detailing the attributes of each individual parcel including ownership, deed history, legal description, parent tract identification, title research, and tax information.** Using the established ownership information, CobbFendley provided acquisition services for 167 parcels and land rights for 3 segments of water pipeline.

To support acquisition efforts, our survey team prepared an existing property line base map from all parcels affected by the new waterline easement based on deed/plat research and on-the-ground boundary ties. A parcel plat and legal description was prepared for each of the 167 easement locations as well as a set of ROW maps for the entire 181-mile corridor.

Our ability to form a single team capable of delivering GIS, survey, and acquisition services allowed us to immediately allocate internal staff and resources to address and resolve project challenges, and streamline communication both internally and with the client.

GRAND PARKWAY (SH 99) SEGMENTS F1, F2, G, H, I-1 & I-2

TXDOT HOUSTON DISTRICT | CHAMBERS, HARRIS, MONTGOMERY, & LIBERTY COUNTIES, TEXAS

PROJECT DESCRIPTION

SEGMENTS F1, F2, & G. CobbFendley provided Utility Coordination, Utility Design, Surveying, Subsurface Utility Engineering, and ROW Acquisition for Segments F1, F2 and G of the Grand Parkway State Highway 99, a $1.04 billion design-build-maintain-operate contract for 37 miles of Grand Parkway north of Houston, Texas. As the ROW and surveying consultant, CobbFendley oversaw the development of mapping for approximately 500 parcels, as well as 37 miles of ROW recovery and verification. CobbFendley was responsible for the acquisition of 181 parcels and easements on this fast-tracked project to expedite the construction of the Grand Parkway. **While navigating multiple review agencies for approvals and multiple consultants, stringent milestone goals were met, allowing for successful and timely delivery of the project.** Throughout the ROW process CobbFendley maintained continual communication and coordination with the Developer (Zachry-Odebrecht), and TxDOT.

SEGMENTS H, I-1 & I-2. As a result of our work on Segments F1, F2, & G, CobbFendley was contracted to provide additional ROW services for Segments H, I-1, and I-2 from IH 69 to FM 686. This part of the development is an $855 million design-build construction contract for 52.8 miles of the Grand Parkway loop, spanning Chambers, Harris, Liberty and Montgomery Counties.

CobbFendley was responsible for the acquisition of approximately 90 parcels, as well as 70 relocations. **This project required stringent inner office quality control and assurance. Therefore, all paperwork was pushed through a three-tier review process. Clear communication and purpose-driven collaboration with the developer, Grand Parkway Infrastructure, and TxDOT is paramount. Throughout the ROW process, CobbFendley provided real-time status updates, which helped the project stay on schedule and on budget. There was a tight schedule for gaining possession of the parcels, but CobbFendley was able to meet scheduled milestones and goals.** CobbFendley faced a multitude of adversities to reach these goals, including:

1. **Negative community perspectives.** CobbFendley provided one-on-one attention to each landowner using minimal industry jargon, giving them the insight and information needed to re-examine their perspective.
2. **Design changes.** CobbFendley was still able to provide expedient and quality work when tasked with unpredicted design changes.
3. **Title curative.** Our agents provided several solutions to title issues that would have normally created a condemnation situation, saving the developer time and money.

BELL BOULEVARD REALIGNMENT
CITY OF CEDAR PARK, TEXAS | CEDAR PARK, TEXAS

PROJECT DESCRIPTION

The City of Cedar Park, in cooperation with TxDOT, is planning to move the current Bell Boulevard (US 183) roadway east onto the full extent of Old Highway 183 from Cedar Park Drive to south of Buttercup Creek Boulevard in Cedar Park. The new roadway will be a four-lane divided roadway that will include a raised median with turn lanes at intersections and driveways. The project will also include lighting and pedestrian and bicycle paths. The City of Cedar Park is funding this realignment as part of the Destination Bell Boulevard. CobbFendley has acquired the additional ROW and easements needed for the realignment in accordance with TxDOT procedures.

Additionally, CobbFendley provided relocation assistance for five non-residential displacees in compliance with the Uniform Act. CobbFendley also facilitated the transfer of the existing ROW from TxDOT to the City of Cedar Park. The transfer was a challenging endeavor due to the State's transfer process, with approval required from multiple agencies and it being ultimately signed by the Governor. CobbFendley had to work with the City and TxDOT to progress the transfer in advance of substantial completion of the roadway in order to try and meet the City's established deadlines.

CIBOLO PARKWAY EXTENSION
CIBOLO TURNPIKE, LP | CIBOLO, TEXAS

PROJECT DESCRIPTION

CobbFendley provided ROW services for this project, which included the acquisition of 55 parcels and 10 residential relocations for the creation of Cibolo Parkway, a privately funded, new toll road facility in Cibolo, Texas.

CobbFendley's services included project administration, market study, appraisals, negotiation, title curative, closing, relocation assistance, and condemnation support.

STEIN FALLS WASTEWATER IMPROVEMENTS
GUADALUPE-BLANCO RIVER AUTHORITY | GUADALUPE COUNTY, TEXAS

PROJECT DESCRIPTION

CobbFendley provided ROW services for the acquisition of land and easements for approximately 43 parcels in Guadalupe County for the construction of a lift station and wastewater collection system for the Stein Falls Collection Capital Improvement Project.

The Stein Falls Wastewater Reclamation System serves the River Bend, Lakeview Heights, and Southbank subdivisions in Guadalupe County. The area west of the Guadalupe River between New Braunfels and Seguin was seeing rapid growth in existing subdivisions and increased interest from the developer community, resulting in many new wastewater service agreements and others forthcoming. This facilitated the need to acquire easements and land to align with the Authority's Master Plan and provide ample service to the new developments and residents.

CobbFendley provided project management, negotiation, title curative services, appraisal services and closing services.

PROJECT DESCRIPTION

CobbFendley was responsible for the acquisition of 26 easements for wastewater facility improvements along Woman Hollering Creek in Schertz, Texas. The Woman Hollering Creek wastewater improvements include the installation of a 30-inch gravity wastewater line from the existing lift station at the Sedona/Crossvine Subdivision at FM1518 near the Woman Hollering Creek Lift Station, then along the creek approximately 11,500 feet to the intersection of Woman Hollering Creek and IH-10.

The project also included the design and construction of a new lift station and approximately 6,000 linear feet of force main from the new lift station to the proposed Cibolo Creek Municipal Authority (CCMA) wastewater treatment plant. ROW services for this project included project management, negotiation, title curative, closing, and condemnation support.

MCHARD ROAD
CITY OF PEARLAND | CITY OF PEARLAND, TEXAS

PROJECT DESCRIPTION

This project required the acquisition of 75 parcels for new alignment of McHard Road from Cullen Boulevard to Mykawa Road. There were 10 residential displacees, 1 business displacee, and 2 personal property displacees. This project was performed on behalf of the City of Pearland but with TxDOT oversight and involvement. All submittals requiring approvals were submitted to the City and TxDOT concurrently. CobbFendley also assisted the City in securing reimbursement from TxDOT according to their level of participation. The project goals included:

- Providing land for the construction of 3.5 miles of four-lane divided concrete roadway with curb and gutter, landscaped medians, irrigation, Drainage and detention ponds and five signalized intersections including the widening of intersecting roads for left-turn bays within a 120-foot ROW
- Installing bike trails and sidewalks with pedestrian ramps
- Improving connectivity along North-South roadways between Cullen Boulevard and Mykawa Road
- Improving the local transportation network overall

FM 1960
TXDOT HOUSTON DISTRICT | HUMBLE, TEXAS

PROJECT DESCRIPTION

CobbFendley was responsible for the acquisition of 40 parcels and 18 business relocations for the widening of FM 1960 from five to six lanes, from BF 1960A near the Eastex Freeway, to just east of Twigsworth Lane in Atascocita on behalf of the TxDOT Houston District. Many of the parcels on this project necessitated land plans to cure parking/setback/circuity issues. Many of the displacees were voluntary displacees, which required increased communication with the landowners and tenants to appropriately relay the impact the acquisition has on the remainder property. The project goals included:

- Resurfacing the entire length of BF 1960A
- Constructing 14 foot raised median, with left turn bays at intersections from Lee Road to FM 1960 East of Humble
- Implementing intersection improvements at Kenswick Drive
- Implementing drainage improvements
- Installing sidewalks

LAND ACQUISITION EXPERIENCE

CobbFendley's ROW Department has a wide variety of experience, both in terms of the type of project and in terms of the makeup of the project area. Over the course of our history providing acquisition services on just about every type of project, we have developed an understanding of the subtle nuances in dealing with landowners from each type of geographical area. Our Agents are able to connect and communicate effectively with owners with varying levels of sophistication. Each of their concerns are valid and must be addressed in a professional manner, no matter how small they may seem to an outside party.

STRENGTHS AND QUALIFICATIONS

Mr. Canuteson has 19 years of experience providing ROW services on a variety of types of projects for a wide array of clientele. Throughout his time in the ROW industry, he has provided services in the areas of project management, negotiation, title research/curative, closing support, relocation, and condemnation support. Mr. Canuteson has demonstrated excellent technical, analytical, and communication skills throughout his career. He strives to find innovative and proficient ways of achieving the client's desired objectives in a timely and efficient manner with a results-oriented focus. As Project Principal, Mr. Canuteson will utilize his extensive experience to provide guidance to project teams ensuring contract compliance, timely delivery on the scope, adherence to project budgets and schedule, as well as appropriate resource allocation.

Schunior Road Detention Pond, City of Edinburg, Texas. Mr. Canuteson served as the *Project Manager* for this project, which consisted of an acquisition for a detention pond needed by the City of Edinburg.

Wastewater Treatment Plant, City of Edinburg, Texas. Mr. Canuteson served as the *Project Manager* for this project, which consisted of an acquisition for a new wastewater treatment plant needed by the City of Edinburg.

Hillcrest Voluntary Buyout Program, Port of Corpus Christi Authority, Corpus Christi, Texas. Mr. Canuteson served as the *Project Principal* for this project, which consisted of a voluntary buyout program in support of the TxDOT Harbor Bridge Project. The Hillcrest and Coles neighborhoods were adversely impacted by the Bridge Project and through a Civil Rights claim, were granted a voluntary buyout program through a two-party and four-party agreement between FHWA and TxDOT. CobbFendley's role was to be the Acquisition Manager and to negotiate the majority of the parcel acquisitions. Mr. Canuteson provided project management support.

FM 1960, TxDOT Houston District, Humble, Texas. Mr. Canuteson served as the *Project Manager* for this project, which consisted of the acquisition of 40 parcels and 18 business relocations for the widening of FM 1960 from BF 1960A to East of Twigsworth Lane in Humble, Texas. In addition to serving as the Project Manager, he has provided services in the areas of appraisal coordination, negotiation, title curative, closing, and condemnation support.

Woman Hollering Creek Wastewater Line, City of Schertz, Texas. Mr. Canuteson serves as *Project Principal* for this project, which consists of the acquisition of 26 easements for wastewater facilities along Woman Hollering Creek in Schertz, Texas. He has provided support in the areas of project management, appraisal coordination, and negotiation.

McHard Road, City of Pearland, Texas. Mr. Canuteson served as the *Project Manager* for this project, which consisted of the acquisition of 75 parcels for mostly new alignment of McHard Road from Cullen Boulevard to Mykawa Road. Additionally, there are 10 residential displacees and one business displacee. In addition to serving as the Project Manager, he provided services in the areas of appraisal coordination, negotiation, title curative, closing, and condemnation support.

Rosenberg Water Transmission Line, Brazosport Water Authority, Fort Bend County, Texas. Mr. Canuteson served as the *Project Manager* for this project, which consisted of the acquisition of 80 easements for water transmission facilities to serve the City of Rosenberg. In addition to serving as Project Manager, he provided support in the areas of appraisal coordination, negotiation, title curative, closing, and condemnation.

US 62, TxDOT El Paso District, El Paso County, Texas. Mr. Canuteson served as *Project Principal* providing oversight of the ROW team responsible for acquiring 69 parcels for widening US 62 from Global Reach Drive to FM 659 (Zaragoza Rd) in accordance with TXDOT. Services include ROW acquisition, project administration, negotiations, title curative, closing, relocation, and condemnation support.

Cibolo Parkway, Cibolo Turnpike LP, Cibolo, Texas. Mr. Canuteson serves as the *Project Principal* for this project, which consists of the acquisition of approximately 55 parcels and 10 relocations for the creation of Cibolo Parkway, a privately funded, new toll road facility in Cibolo, Texas. He has provided project management support and has overseen the development of a project cost estimate.

HOMER BAZAN, JR., PE, LGPP

CLIENT MANAGER

As Client Manager, Mr. Bazan will offer his expertise and local knowledge to the project team by serving as an advisor and resource for overall execution of assigned work.

YEARS OF EXPERIENCE

38

EDUCATION

BS, Civil Engineering, University of Texas at Austin, 1986

LICENSES AND CERTIFICATIONS

Professional Engineer, Texas, No. 73741

STRENGTHS AND QUALIFICATIONS

Mr. Bazan has 38 years of experience in project planning and execution, with 33 of them with TxDOT in the Pharr District. He worked in a variety of areas, including: District Design Section, District Traffic Section, the Pharr Area Office, District Advance Planning Section, as District Design Manager where he oversaw the management of the Central Design Section, and finally as the District's Transportation Planning and Development (TP&D) Director. Mr. Bazan is an Edinburg resident who is dedicated to the community and will be engaged in the success of each work assignment.

Jackson Avenue Drainage Improvements, City of Harlingen, Texas. As *Project Manager*, Mr. Bazan is leading the team on improving the storm sewer infrastructure in a flood-prone area of downtown Harlingen. New inlets and storm sewer laterals are being proposed to replace undersized drainage elements. Careful consideration is being given on the impact to utilities and impacts to existing businesses. In order to achieve a tight deadline, he is coordinating as frequently as possible with city staff to ensure the plans reflect what the city needs and desires.

Various Professional Engineering Services On-Call Contracts, Rio Grande Valley, Texas. As *Project Manager*, Mr. Bazan currently serves on several On-Call contracts for local municipalities in the Rio Grande Valley, including the City of Pharr, City of Harlingen, City of Mission, City of Edinburg, Hidalgo County and the Hidalgo County Drainage District No. 1. He demonstrates excellence in overseeing contract compliance, work scope, budget, and schedule requirements are achieved. He has the ability to oversee and effectively manage subconsultants performing engineering, procurement, construction, and operation activities. Mr. Bazan demonstrates his innovative thinking and strong technical, managerial and analytical skills by identifying when project requirements exceed technical skills or manpower capacity, and develops/implements corrective action plans that often include the recruiting and hiring of new staff. Mr. Bazan is committed to the protection of employees, contractors, client personnel and the public from hazardous conditions and practices.

Shary Road (FM 494), TxDOT - Pharr District, Hidalgo County, Texas. As *Project Manager*, Mr. Bazan led the roadway team and sealed the design plans for this roadway expansion from an existing two-lane rural roadway to a four-lane curb-and-gutter urban roadway. He developed plan and profile sheets which established the roadway's proposed horizontal and vertical profile, confirming that the design cross-sections accommodated the existing terrain of the area. He also developed the drainage area map which documented the storm water runoff that was required to be accommodated by the project based on the design frequency per TxDOT's Hydraulics Manual. Mr. Bazan designed the proposed storm drain system, including the pipe drainage outfall which carried the runoff over a mile away from the project to the nearest drainage ditch. He developed all the utility and drainage sheets which described all the utilities located within the State ROW and indicated all the utility conflicts that needed to be addressed per the roadway and hydraulic design. He designed the traffic control plan which helped accommodate traffic in the construction phase, and developed all the estimate and quantity sheets which reflected all the bid items needed on the project.

US 83 Expressway 6-Lane Schematic (FM 2220 Ware Road to FM 1016 Conway Avenue), TxDOT - Pharr District, Hidalgo County, Texas. As *Project Manager*, Mr. Bazan developed the five-mile long schematic for upgrading the existing four-lane rural expressway to a six-lane urban expressway. He was responsible for developing the horizontal and vertical alignments for the main lanes, frontage roads and ramps, utilizing the appropriate design speed. He employed "desirable" criteria whenever possible and upgraded the rural frontage roads to urban curb-and-gutter facilities. Mr. Bazan reversed the ramps from an existing "diamond" ramp configuration to "X" ramp configuration to maximize access to frontage roads and minimize frontage road traffic at intersections. He developed all proposed typical sections for the main lanes, frontage roads, ramps, and cross-streets. He created cross-street schematics tying into US 83. He determined the overpass bridge span lengths for each overpass based on whether the cross-street would ultimately require four or six lanes. He also developed the proposed striping for all roadways and the large freeway guide signs.

ROBERT DURAN, SR/WA, R/W-NAC, R/W-NAC

The project limits are from U.S. Highway 71 at Business Highway 71. Services included negotiation, title curative, and closing.

BS 71, TxDOT – Yoakum District, Fayette County, Texas. Mr. Garcia served as the *Project Group Lead*, consisting of the acquisition of two parcels of various complexities. The project limits are from Business Highway 71 at Jackson Street. Services include negotiation, title curative, and closing.

SH 238, TxDOT – Yoakum District, Calhoun County, Texas. Mr. Garcia served as the *Project Group Lead*, consisting of the acquisition of four parcels of various complexities. The project limits are from State Highway 238 at Seadrift Street. Services include negotiation, title curative, and closing.

City of Conroe – Montgomery County, Texas. Mr. Garcia served as the Group Lead and *Project Manager*, consisting of the acquisition of 40 Sewer Line Easements and 40 Temporary Construction Easements. The project limits are from Loop 336E to south of Foster Dr. Services include project management, project administration, and negotiation.

SH 105, TxDOT - Houston District, Montgomery County, Texas. Mr. Garcia serves as *Project Manager* and responsible for the acquisition of 12 parcels of various complexities. The project limits are from SH 1484 to the San Jacinto County line. Services include negotiation, title curative, and closing.

JUD CLARK

NEGOTIATION/ESCROW & TITLE

YEARS OF EXPERIENCE

9

EDUCATION

BA, University Studies, Texas Tech University, 2014

LICENSES AND CERTIFICATIONS

Real Estate Agent License, Texas, No. 739201

STRENGTHS AND QUALIFICATIONS

Mr. Clark has nine years of land and easement acquisition experience across a broad range of specialties, two years with administrative duties and seven of the nine years in ROW acquisition experience. His experience includes parcel acquisitions, negotiations, due diligence, route analysis, and title curative.

Additionally, he has coordinated with legal counsel to file condemnation paperwork on behalf of several state, local, and private entities, and has assisted those entities in scheduling Special Commissioner's Hearings, including the Texas Assistant Attorney General's Office. He has prepared condemnation detail (TxDOT ROW-E-73) forms and prepared/ filed Notices of Deposit with the courts. Mr. Clark is energetic, self-motivated, and demonstrates excellent technical, analytical, and people skills.

Brushy Creek North Fork Trail, City of Cedar Park, Texas. Mr. Clark, as the *Lead Acquisition Agent*, has provided route analysis, due diligence, acquisition, and condemnation support. The project consists of the acquisition of Trail Easements for seven parcels on the north fork of Brushy Creek in Cedar Park, Texas.

Blockhouse Creek, City of Cedar Park, Texas. Mr. Clark has been serving as the *Project Manager* and has provided ROE coordination, route analysis, due diligence, and acquisition support. The project consists of the acquisition of Drainage Easements for 12 parcels in the Blockhouse Creek area in Cedar Park, Texas.

Phase 1 and 2 Land Rights, Brushy Creek Regional Utility Authority (BCRUA), Leander, Cedar Park and Round Rock, Texas. Mr. Clark served as an *Acquisition Agent* and provided acquisition, relocation, condemnation, and administrative support for this electrical transmission acquisition and waterline acquisition project. He was involved in the acquisition of the initial 61 permanent and temporary easements needed and more than 100 easements/site and due diligence reports to complete the first and second phase of the proposed raw water intake lines from Lake Travis to the water treatment plant site for the BCRUA. This phase of the project required the relocation of PEC's lines, poles and transformers outside of the existing ROW.

Dacy Lane (FM 205), Goforth Special Utility District (SUD), Hays County, Texas. Mr. Clark served as an *Acquisition Agent* and provided route analysis, due diligence, acquisition, and condemnation support. The project consisted of the acquisition of Water Pipeline Easements for 66 parcels along Dacy Lane (FM 205) close to Buda, Texas.

SH 21, County Line SUD, Hays County, Texas. Mr. Clark served as an *Acquisition Agent* and provided route analysis, due diligence, acquisition, and condemnation support. The project consisted of the acquisition of water pipeline easements for five parcels for the lift station close to Uhland, Texas.

Downtown Uhland, County Line SUD, Hays County, Texas. Mr. Clark served as an *Acquisition Agent* and provided route analysis, due diligence, acquisition, and condemnation support. The project consisted of the acquisition of water pipeline easements for 14 parcels for the lift station close to Uhland, Texas.

Cotton Gin Road (FM 129), County Line SUD, Hays County, Texas. Mr. Clark served as an *Acquisition Agent* and provided route analysis, due diligence, acquisition, and condemnation support. The project consisted of approximately 70 parcels for the road widening along Cotton Gin Road (FM 129) close to Uhland, Texas.

Windy Hill Road, Hays County, Texas. Mr. Clark serves as an *Acquisition Agent* and is providing due diligence, acquisition, relocation, and condemnation support for this transportation project. The project consists of approximately 71 parcels for the road widening along FM Windy Hill Road between the City of Kyle limits and FM 2001 close to Kyle, Texas.

FM 967, Hays County, Texas. Mr. Clark served as an *Acquisition Agent* and provided due diligence, acquisition, and condemnation support for this transportation project. The project consisted of approximately 10 parcels for the road widening along FM 967 close to Buda, Texas.

Lemon Creek Wastewater Line, SAWS, San Antonio, Texas. Mr. Clark served as an *Acquisition Agent* and provided route analysis, due diligence, acquisition support for this water pipeline acquisition project. The project consists of three parcels along IH10 close to San Antonio, Texas.

LEX VANZURA

NEGOTIATION/ESCROW & TITLE

YEARS OF EXPERIENCE

7

EDUCATION

BA, Interdisciplinary Studies, Angelo State University, 2007

LICENSES AND CERTIFICATIONS

Real Estate Agent License, Texas, No. 722975

Notary Public, Texas, No. 13023950-7

STRENGTHS AND QUALIFICATIONS

Ms. Vanzura has 7 years of ROW experience coordinating special commissioner hearings, preparing TxDOT condemnation documents, and maintaining the hard copy files for various parcels. She also secures signed ROE agreements and serves as the main point of contact on various acquisition/negotiations for electric, water lines, temporary construction, monitoring well and access easements with property owners.

Phase 1 and 2 Land Rights, BCRUA, Cedar Park, Texas. Ms. Vanzura served as *Acquisition Agent* and assisted in acquiring the initial 61 permanent and temporary easements needed to complete the first phase of the proposed raw water intake lines from Lake Travis to the water treatment plant site for the BCRUA. This phase of the project required the relocation of PEC's lines, poles and transformers outside of the existing ROW. Ms. Vanzura assisted in preparing, negotiating, and organizing documents pertaining to Notice of Intent, Initial Offers, ROE, Final Offer Letters and Eminent Domain Request Packages for the intake tunnel, Nameless Road, temporary electric and overhead electric rebuild sections of the project. She also attended town hall meetings and coordinated meetings with property owners and their attorneys. Ms. Vanzura also assisted in setting all Special Commissioners hearings and transfer of easement rights between the BCRUA and PEC to meet project deadlines.

Grand Parkway Segments H & I, Grand Parkway Infrastructure, LLC, Houston, Texas. Ms. Vanzura served as *ROW Acquisition Support* for the acquisition of approximately 140 parcels, as well as 94 relocations for the proposed alignment of Grand Parkway (SH 99) from IH 69 to FM 686. Her tasks included preparation of documents, hosting a special commissioner hearing for one of the parcels, as well as TxDOT condemnation documents.

SH 71 (Ross to Kellam Road), TxDOT Austin District, Austin, Texas. Ms. Vanzura served as *ROW Acquisition Support* for proposed improvements to SH 71. She scheduled special commissioner hearings for five parcels, filed amended Lis pendens, coordinated the hearings day of, hired court reporters, and kept both TxDOT ROWIS and parcel status reports up to date. She also prepared the deposit, filed final paperwork, took photos of properties on the date of possession, and maintained hard copy files.

SH 71 US 183 Interchange to Presidential Boulevard, TxDOT - Austin District, Austin, Texas. Ms. Vanzura served as *ROW Acquisition Support* for proposed improvements to SH 71. She assisted the project manager with assembling the Initial Offer Letter, maintained both TxDOT ROWIS and parcel status report, and maintained paper files.

Bell Boulevard Realignment, City of Cedar Park, Texas. Ms. Vanzura served as *ROW Acquisition Support* for the realignment of Bell Boulevard (US 183) east onto the full extent of Old Highway 183 from Cedar Park Drive to south of Buttercup Creek Boulevard in Cedar Park. The new roadway is a four-lane divided roadway that include a raised median with turn lanes at intersections and driveways, as well as lighting and pedestrian and bicycle paths. The project included acquisition of eight parcels (ROW/Drainage Easements); one temporary construction easement; three driveway licenses (no permanent ROW needed); and the relocation of five non-residential displacees. Ms. Vanzura helped prepare, organize documents pertaining to Initial Offers, and assisted with relocation services. She also coordinated with both the City of Cedar Park and the title company on closings. Ms. Vanzura also helped to prepare all documents for the transfer and closeout with TxDOT.

FM 967 Improvements, Hays County, Texas. Ms. Vanzura served as *ROW Acquisition Support* for improvements to FM 967. She cleared title and coordinated closings with property owners.

Windy Hill (Kyle City Limits to FM 2001), Hays County, Texas. Ms. Vanzura served as *Acquisition Agent* and helped clear title, research owner contact information, and negotiate offers with property owners.

RM 3237 at Winters Mill Parkway, Hays County, Texas. Ms. Vanzura served as *Acquisition Agent* and helped clear title, research owner contact information, and prepare offer letters to be sent to property owners.

CULLEN EASTLAND, RWA-TN

Mr. Eastland has 6 years of experience in providing ROW services, 1 year in administration and 5 years as a ROW Agent for CobbFendley. His expertise as an agent includes relocation, acquisition, negotiation, and condemnation support services. Throughout his career, he has personally assisted with relocation services for more than 120 displaced businesses, residences, or personal properties. Additionally, he has coordinated condemnation hearings for 25+ parcels. Mr. Eastland's broad knowledge and skills make him a strong negotiator, effectively able to communicate with landowners and their representation.

US 62, TxDOT El Paso District, El Paso, Texas. Mr. Eastland serves as *ROW Agent* and is responsible for relocation services on the US 62 Project in El Paso, Texas. His current tasks include relocating 47 displaced, businesses, personal property, and residential displacees. Mr. Eastland is responsible for coordinating and monitoring the moves as well as cooresponding with moving companies to ensure the job is complete in a timely manner.

SL 88, TxDOT Lubbock District, Lubbock, Texas. Mr. Eastland served as *ROW Agent* and was responsible for parcel acquisition, relocation services, negotiations, and condemnation support services on the SL 88 Project in Lubbock, Texas. His previous tasks include preparing offer letters, relocating displaced tenants/landowners, and coordinating eminent domain hearings with the Assistant Attorney General's office. Mr. Eastland was also responsible for inputting data into TxDot's ROW Information System (formally ROWIS, now Connect). The five segments Mr. Eastland worked on consisted of 14.5 miles with 269 Fee-Simple parcels to be constructed into a six-lane freeway connecting US 87 in Lubbock to US 62/82 in Wolfforth, Texas.

Windy Hill Road (Kyle City Limits to FM 2001), Hays County, Texas. Mr. Eastland serves as *ROW Agent* responsible for parcel acquisition, negotiations, and relocation services on the Windy Hill Road Widening Project. His tasks include preparing offer letters, due diligence, negotiating with property owners, and locating existing utilities in the ROW. Mr. Eastland is also responsible for Monarch and Goforth SUD's waterline easement acquisition along Windy Hill Road. This project consists of 71 parcels requiring fee simple and water line easement acquisitions.

Dacy Lane, Goforth SUD, Kyle, Texas. Mr. Eastland serves as *ROW Agent* and currently assists with title curative work and administrative support for the Dacy Lane project in Kyle, Texas.

IH 10 Widening, Guadalupe Valley Electric Cooperative, Seguin, Texas. Mr. Eastland serves as *ROW Agent* providing due diligence and acquisition support for GVEC's electrical line acquisition outside of Seguin, Texas.

FM 2001 Water Line Improvements, Goforth SUD, Kyle/Buda, Texas. Mr. Eastland currently serves as *ROW Agent* and is responsible for water line easement acquisition's along FM 2001 in Kyle/Buda, Texas. His current tasks include negotiating with property owners and title curative. Mr. Eastland also assisted with ROE authorization along FM 2001 for Goforth. This project consists of 71 parcels with permanent water line easements as well as temporary construction easements.

FM 967, City of Buda, Texas. Mr. Eastland serves as *ROW Agent* responsible for negotiating a temporary construction easement for the RM 967 road improvement project in Buda, Texas. His tasks included negotiating with the property owner, preparing the temporary construction easement for the city's approval and due diligence.

Plum Creek RR Crossing, County Line SUD, Hays County, Texas. Mr. Eastland serves as *ROW Agent* responsible for researching Hays County Appraisal District and Secretary of State website to locate and contact property owners. His tasks include due diligence and corresponding with property owners so that County Line SUD can begin working on the waterline. Mr. Eastland was also responsible for coordinating with the livestock owner so that they were not present during construction.

McConnell Road, Bexar County, Texas. Mr. Eastland serves as *ROW Agent* currently assisting Bexar County with acquisition for the McConnell Road low water crossing. His previous tasks include corresponding with property owners to receive ROE for 4 parcels.

JULIA MOCK

PROJECT COORDINATOR

YEARS OF EXPERIENCE

5

EDUCATION

BBA, General Business, Stephen F. Austin University, 2019

LICENSES AND CERTIFICATIONS

Notary Public, Texas, No. 134413204

STRENGTHS AND QUALIFICATIONS

Ms. Mock has five years of experience working in project coordination. Her background in mineral acquisitions has enabled a smooth transition to ROW at CobbFendley, incorporating her project management experience, title research abilities, preparation and review of legal documents, accounting, and coordination between landowners and clients. She is responsible for drafting and securing ROE agreements, preparing for eminent domain, title curative plans, payment packages for title policies and deeds/PUAs, as well as preparing offer letters for both fee simple acquisitions and easement acquisitions. Ms. Mock's organization and attention to detail support the coordination and efficiency of projects.

US 62, TxDOT El Paso District, El Paso County, Texas. Ms. Mock serves as *Project Coordinator* and is responsible for drafting and submitting eminent domain packages, providing administrative assistance preparing/reviewing payment packages for title policies and deeds/PUAs, invoicing, assisting with relocation notices, and preparing specific reports requested by the client, covering about 70 parcels.

Green Line Real Estate Support Services, VIA Metropolitan Authority, San Antonio, Texas. Ms. Mock serves as *Project Coordinator* and her responsibilities consist of preparing and overseeing preliminary title curative plans and eminent domain documentation for this 180-parcel project. She documented and reported on her research as requested by the client.

FM 2001, GoForth Special Utility District, Hays County, Texas. Ms. Mock's responsibilities as *Project Coordinator* included the preparation and delivery of offer letters for temporary and permanent construction easements. She also analyzed surveys, broker opinions of value, and title requirements to prepare such documents.

JOCELYN SANDOVAL

PROJECT COORDINATOR

YEARS OF EXPERIENCE

3

EDUCATION

BS, Management, National American University, 2014

Mrs. Sandoval is bilingual in Spanish/English.

STRENGTHS AND QUALIFICATIONS

Mrs. Sandoval has four years of experience delivering complex projects in an accurate and timely manner. She is knowledgeable in preparing offer packages and portfolios, ROE letters, title research, title curative, property owner search, and providing condemnation support. Additionally, Mrs. Sandoval's leverages her bilingual skills to maintain seamless communication to property owners.

Green Line Real Estate Support Services, VIA Metropolitan Authority, San Antonio, Texas. As *Project Coordinator*, Mrs. Sandoval is responsible for reviewing the title commitments and preparing title curatives as well as E-49 for 60 property owners for this 180-parcel project.

GoForth SUD MSA, GoForth Special Utility District, Hays County, Texas. Mrs. Sandoval served as *Project Coordinator* and was responsible for drafting the broker opinion of value, reviewing surveys, and researching property owners' information.

Kallman-Monarch, S. D. Kallman, LP. Kyle, Texas. Mrs. Sandoval's responsibilities as *Project Coordinator* consisted of ordering, tracking, and overseeing the delivery of title commitments and tax certificates. She also provided due diligence, acquisition, relocation, and condemnation support for this transportation project. The project consisted of approximately 71 parcels for the road widening along FM Windy Hill Road between the City of Kyle limits and FM 2001.

FM 1187 Benbrook, Texas Department of Transportation, Tarrant County, Texas. Mrs. Sandoval responsibilities as *Project Coordinator* consisted of preparing, tracking, and overseeing ROE package documents to property owners.

ALINA KARAMI

PROJECT COORDINATOR

YEARS OF EXPERIENCE

9

EDUCATION

BA, Retail Management, Texas Tech University, 2013

LICENSES AND CERTIFICATIONS

Notary Public, State of Texas

Mrs. Karami is bilingual in Spanish/English.

STRENGTHS AND QUALIFICATIONS

Mrs. Karami has nine years of project and bidding coordination experience. In her career, she has excelled in preparing bid documentation, including proposals and offer packages, contributing to securing project wins. During her ROW experience, she has been responsible for drafting and securing the delivery of offer packages and ROE letters to property owners. She also maintains accurate and up-to-date status reports, keeping all teams informed and projects on track. She has utilized her strong bilingual skills to facilitate communication with stakeholders, enabling a flow of information and project understanding. Her combined experience has equipped her with a well-rounded skillset in project management, proposal drafting, communication, and administrative support. Mrs. Karami is a detail-oriented teammate and results-driven individual.

US 62, TxDOT El Paso District, El Paso County, Texas. Mrs. Karami was responsible for drafting and sending all acquisition package documents to property owners for accurate negotiation terms. She provided bilingual support resolving inquiries from Spanish-speaking property owners.

US 96, TxDOT El Paso District, Jasper and Sabine County, Texas. Mrs. Karami served as project coordinator, and her responsibilities consisted of drafting, tracking, and overseeing the delivery of all ROE letters to over 60 property owners.

FM 517, TxDOT Houston District, Galveston County, Texas. Mrs. Karami was responsible for drafting negotiation documents, sending them to the property owners, and their legal representatives.

STRENGTHS AND QUALIFICATIONS

Mr. Garza has been performing appraisal services for local financial institutions in the Rio Grande Valley since 1998. He specializes in General Commercial Real Estate, Estate Valuations, and ROW Easement Acquisition and Defense. Appraisals services included fee simple and leased fee estate valuation for general vacant land and improved commercial properties. Mr. Garza has served as a member of many local boards and organizations, providing his expertise as an appraiser and appraisal reviewer and strengthening his role in the Edinburg community.

Mr. Garza has completed appraisals and appraisal reviews for a vast amount of parcels in Hidalgo County, including the City of Edinburg along with other local entities including TxDOT, Hidalgo County Drainage District No. 1, and the Hidalgo County Purchasing Department.

Mr. Garza's recent, local appraisal and appraisal review experience include the following projects:

- **Sugar Road (SH-107 to Monte Cristo Road), City of Edinburg, Texas.**
- **Jackson Road (North of SH-107 to Monte Cristo Road), City of Edinburg, Texas.**
- **Monte Cristo Road (Ware Road to Sugar Road), TxDOT.**
- **Ware Road (Mile 5 to Monte Cristo Road), TxDOT.**
- **Various Hidalgo County 2018 Bond Projects, Hidalgo County Drainage District No 1.**
- **US Highway 83, TxDOT.**

STABILITY AND REFERENCES

FIRM STABILITY. CobbFendley has been in business for more than 44 years and has experienced financial stability and growth at a consistent rate. CobbFendley's profitability and growth has qualified our firm to be named to the Zweig White Hot Firm list each year for the past five years. This list uses dollar and percentage revenue growth over a three-year period to recognize the 100 fastest-growing architecture, engineering, planning, and environmental consulting firms in the United States. In addition, CobbFendley is consistently listed in the Engineering News Record (ENR) list of Top 500 Design Firms, which ranks firms based on previous year revenue numbers. Our firm offers the City financial stability, consistent growth, and a history of delivering quality engineering services across not only Texas but several other locations within the United States. *Other current rankings include:*

- Austin Business Journal - #11
- Dallas Business Journal - #27
- Houston Business Journal - #14
- ENR Top Design Firms - #183
- Zweig White Hot Firm - #79

PREVIOUS EXPERIENCE WITH CITY

CobbFendley has provided ROW services to the City of Edinburg for the following projects. We look forward to continuing to serve the City on additional projects in the coming months and years.

WASTEWATER TREATMENT PLANT ACQUISITION. *December 2021 - June 2022.* Project included the acquisition of one parcel for a Wastewater Treatment Plant in Edinburg County, Texas. Services included negotiation, title curative and closing support.

SCHUNIOR DETENTION POND. *October 2021 - April 2022.* Project included the acquisition of one parcel for the Schunior Detention Project in Edinburg County, Texas. Services included negotiation, title curative and closing support.

JACKSON ROAD. *July 2023 - Ongoing.* Project involves the acquisition of 83 parcels and 8 relocations for the expansion of Jackson Road (Chapin Street to Monte Cristo Road). Services inlcude negotiation, title curative, and closing support.

EAST OWASSA SEWER IMPROVEMENT. *February 2024 - Ongoing.* Project includes the acquisition of one easement for a sewer line to serve multiple commercial properties that are currently on septic. The project limits are from Owassa to Alberta. Services include negotiation, title curative, and closing support.

VETERANS DETENTION POND. *July 2024 - Ongoing.* Project includes the acquisition of one storm sewer easement to serve a proposed detention pond on an adjacent property. Services include negotiation, title curative, and closing support.

OTHER CITY OF EDINBURG EXPERIENCE

In addition to our ROW experience with the City, Client Manager Homer Bazan has spent his entire career in the Valley and has managed several projects in the City of Edinburg and surrounding area. The following are projects he managed while serving in the roles of Area Office PM, Consultant Management Engineer, and Transportation Planning & Development Director at TxDOT Pharr District.

FM 2061 (MCCOLL ROAD) FROM 0.33 MILES S. OF CANTON ROAD TO SH 107. Project included reconstruction of a 2-lane rural roadway to a 4-lane urban curb-and-gutter roadway with a 2-way left-turn lane. Mr. Bazan designed the proposed storm sewer drainage system; developed the traffic control plan; developed the physical detour plan to accommodate the roadway being closed during construction to install the new irrigation canal siphon; developed the plan and profile sheets, establishing the horizontal and vertical alignments; developed the utility and drainage sheets, which indicated the utilities that needed to be adjusted and/or relocated; developed the intersection layout sheets, which focused on the elements of the intersection such as sidewalks, wheelchair ramps, curb and gutter limits, radii dimensions, and intersection skew; calculated all quantities and developed the official construction estimate (quantities and unit bid prices); and developed the PS&E package for the bid proposal, which included the specifications, special provisions, and general notes.

SH 107—FM 2061 MCCOLL RD TO COUNTY COURTHOUSE. Project included upgrading SH 107 from a 4-lane rural roadway with 2-way left-turn lane to 6-lane curb-and-gutter raised median section. This was located in a heavy commercial area, which included the University of Texas-Pan American (later to become UT-RGV), which had many crashes due to the high driveway density, an Average Daily Traffic above 20,000, and the 2-way left-turn lane.

Mr. Bazan coordinated with TTI to develop study on the safety and operational benefits of the raised median, and determination of raised median opening locations. With local business owners wary of the changes to their access. Mr. Bazan developed and gave a technical presentation at a public meeting, which proved very successful, drawing almost no negative comments from the public.

SH 107—FM 2061 MCCOLL ROAD TO FM 2220 WARE ROAD. Project included upgrading 4-lane rural divided highway with a depressed grassy median to a 6-lane rural raised median section with roadside ditches, and was a continuation of earlier project converting SH 107 into a mobility arterial corridor. Also coordinated a study with TTI on safety and operational benefits, and developed and gave presentation during a public meeting, which also proved successful in alleviating the concerns of the local residents and business owners. Mr. Bazan's additional Edinburg area projects include SH 107—IH 69C to FM 493 and FM 2128 Richardson Road—IH 69C to SH 1907.

List of Exceptions

Requested Exceptions

CobbFendley respectfully requests consideration of the following exceptions to the sample Professional Services Agreement.

SECTION IV. RESPONSIBILITIES OF CONSULTANT

B. Request to revise: "Consultant shall perform its services with ~~care, skill, and diligence,~~ in accordance with the ~~applicable professional standards currently recognized by its profession,~~ professional skill and care ordinarily provided by competent members of Consultant's profession and license currently practicing in the same or similar locality under the same or similar circumstances, as expeditiously as is consistent with such professional skill and care and the orderly progress of the project ("Standard of Care")**, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall exercise usual and customary professional care in its efforts to comply with all applicable federal, state, and local laws, ordinances, codes, and regulations in effect while performing the Services. If Consultant fails to meet ~~applicable professional standards~~ the Standard of Care, Consultant shall without additional compensation correct or revise any errors or deficiencies with or without request to do so by the City.".

J. Request to insert: "All reports, drawings, plans, and other documentation pertaining to the Services become the property of City upon payment to Consultant for all services rendered.".

SECTION V. PAYMENT AND FEES

B.a. Request to insert: "a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's negligent or intentional conduct in the performance…".

B.f. Request to insert: "f. Any Services are defective, subject to the Standard of Care, requiring correction or replacement;".

B.g. Request to insert: "g. City has been required to correct defective Services or has accepted defective Services that do not meet the Standard of Care;".

B.h. Request to insert: "h. Liens have been filed in connection with the Services for which Consultant has previously been paid; or".

B.i. Request to insert: "i. Other reasonable items entitle City to a set-off against the payment amount.".

SECTION VI. TERM OF AGREEMENT

D. On line 4, request to revise: "…including copies thereof, ~~whether~~ prepared by ~~Consultant or others~~ City, in Consultant's possession and related to the Services.".

SECTION VII. MINIMUM INSURANCE REQUIREMENTS

D. Request to delete in entirety.

F. Request to insert: "F. Evidence of the above insurance coverage is attached as Exhibit "B" and the City of Edinburg shall be listed as an additional insured, except for Workers' Compensation and Professional Liability.".

H. On line 3, request to revise: "…on which each such policy is required to be first obtained and at least ~~fifteen (15)~~ five (5) days before the expiration of any policy…".

I.1. Request to correct: "To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this ~~Lease~~ Agreement;".

I.4. Request to correct: "Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this ~~Lease~~ Agreement to…".

SECTION X. INDEMNIFICATION

A. Request to revise: "To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from ~~any all~~ claims, losses, causes of action and damages, suits and liability ~~of every kind~~, including all reasonable expenses of litigation, court costs, and reasonable attorney's fees for injury to or death to any person or for damage to any property, ~~arising out of or directly connected with~~ to the extent caused by the negligent or willful conduct of Consultant, its agents, officers and employees, ~~carried out in furtherance of~~ during the performance of the Services under this Agreement.".

B. Request to insert: "Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project,

including any claims related to design or any other services provided by consultant regarding this agreement, *caused by Consultant's negligent acts or omissions*.".

SECTION XI. LIMITATION OF LIABILITY

A. On the second sentence, request to revise: "~~*Consultant*~~ *The parties* agree~~*s*~~ that ~~*City*~~ *neither party* will ~~*not*~~ be liable *to each other* for any indirect, incidental, special, or consequential punitive or multiple damages…or of any other obligations relating to this Agreement, even if ~~*City*~~ *the parties* ha*ve*~~*s*~~ been advised of the possibility of such damages.".

On the third sentence, request to revise: "The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of ~~*City's*~~ *the parties'* liability, regardless of the cause of action under which such damages are sought.".

SECTION XX. NO WAIVERS OR ACCORD AND SATISFACTION

B. On line 4, request to correct: "…agreements under this ~~*Lease*~~ *Agreement*, shall operate as a waiver, discharge, or…".

SECTION XXI. NOTICE OF GOVERNING LAW FOR STATE AND FEDERAL GRANT PROJECTS

Request to revise: "The Consultant agrees to *exercise usual and customary professional care in its efforts to* abide by all applicable laws and regulations *in effect during Consultant's performance of its Services* and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ~~*ensure*~~ *use customary efforts to remain in* compliance with relevant State and federal laws...".

CITY OF EDINBURG

RFQ #2024-5

Right of Way Acquisition Services Rotation

halff.com

July 16, 2024
City of Edinburg
Mr. Mardoqueo Hinojosa, PE
City Engineer
415 W. University Drive
Edinburg, TX 78539

RE: RFQ #2024-5 Right of Way Acquisition Services Rotation

Dear Members of the Evaluation Committee:

Halff, a Texas Corporation, is pleased to submit our qualifications for Right of Way (ROW) Acquisition Services to the City of Edinburg. Halff is a full-service ROW Acquisition, Engineering, Surveying, Environmental, and Planning firm, and we are excited about the opportunity to continue our professional relationship with the City.

Our knowledgeable team of professionals has **extensive experience providing ROW services** for Texas Department of Transportation (TxDOT), regional mobility authorities, counties, municipalities, and other state agencies throughout Texas. We have a thorough understanding of delivering ROW services under the Federal Uniform Relocation Assistance and Real Property Acquisitions Policies Act of 1970 (URA) and Senate Bill 18.

We offer prompt responsiveness and unmatched professionalism, with extensive experience in Rights of Entry and Possession and Use Agreements. Our expertise lies in working with agencies and assisting landowners throughout the negotiation and relocation processes. We developed a web-based Halff Tracker, which enables our team and clients to be updated throughout the project. Our QA/QC processes help us maintain a high level of quality and support aggressive project schedules.

Nelda Renteria-Compian will serve as your primary point of contact and can be reached at the contact info below. She is authorized to bind our firm into a contract with the City.

Halff has an exceptional record for providing quality ROW services and maintaining project schedules. If you have any questions or comments, please do not hesitate to contact Nelda. We look forward to working with you and the City of Edinburg on your important projects.

Halff confirms that no addenda was issued or received for this RFQ.

Sincerely,

Nelda Renteria-Compian | Project Manager
361.400.4603 | nrenteria-compian@halff.com

MAIN AND SUPPORTING OFFICE LOCATIONS

Services for these projects will be provided from Halff's McAllen and Corpus Christi offices.

McAllen
5000 W. Military Highway
Suite 100
McAllen, Texas 78503

Corpus Christi
711 N Carancahua Street
Suite 1190
Corpus Christi, Texas 78401

APPROACH TO HANDLING PART-TIME STAFFING NEEDS

We commit that Halff has adequate and skilled staff to carry out the services listed in the RFQ successfully. The following table demonstrates our professional staff available for ROW Acquisition services in both the McAllen and Corpus Christi offices, and our resources firmwide.

With more than 1,500 employees throughout our 33 offices, we have the ability to pull resources for various services, if the need arises. Our employees are available to work full-time or part-time.

Discipline	McAllen	Corpus Christi	Firmwide
ROW Specialists	2	5	20
Surveyors (RPLS)	-	1	151
Survey Field Crews	1	1	32
Environmental	-	-	41
Land Planners	-	1	34

Halff's areas of specialization include the following:

- Planning
- Broadband
- Artificial Intelligence
- Asset Management
- Civil Engineering
- Energy
- Environmental
- Flood Infrastructure Design
- Geospatial
- Grant Writing and Administration
- Intelligent Transportation Systems
- Land Development
- Landscape Architecture
- Local Infrastructure
- MEP Engineering
- Resilience
- Right of Way
- Structural Engineering
- SUE/Utility Coordination
- Surveying
- Transportation
- Water Conveyance and Pumps
- Water/Wastewater Treatment

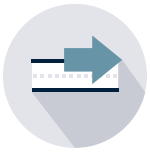
ESTABLISHED -1950-

33 OFFICES

1,500 EMPLOYEES

ENR TOP 500 RANKING NO 87

Halff is a full-service engineering firm designed, engineered, planned, constructed – and purposed – for people. Since 1950, we've been creating smart solutions that improve lives and communities by turning ideas into reality. The firm provides services throughout the Southeast from 33 offices in Texas, Arkansas, Oklahoma, Louisiana and Florida. The firm's staff of 1,500 includes engineers, planners, scientists, and surveyors. Halff is ranked #87 in *Engineering News-Record* magazine's list of the top 500 design firms in the United States. The firm was founded in Dallas in 1950 by Albert H. Halff, PhD-Eng., PE. Today, Halff preserves Dr. Halff's legacy of integrity, dedication to client service, and commitment to quality. Halff develops smarter solutions for a variety of market sectors. No matter the size or scope of the project, every one of our solutions is designed with a single purpose: our client's success.



As a client-oriented firm, Halff is organized to provide careful attention to each client's needs. We have earned the trust and respect of our clients and the communities in which we work. We are proud to say much of our work is repeat business from satisfied clients or new business generated as a result of existing client recommendations.

Halff and the entire project team are committed to providing the City of Edinburg with quality ROW Acquisition Services efficiently and thoroughly.

HALFF'S EXPERIENCE AND HISTORY PERFORMING SIMILAR SERVICES

Halff brings extensive experience in the following services: Appraisal Services; Negotiation Services; Escrow and title Coordination Services; and Project Management and Administrative Services.

Halff is licensed in accordance with the Texas Appraisal Licensing and Certification Act, Occupations Code, Title 7 – Practices and Professions Related to Real Property and Housing, Subtitle A – Professions Related to Real Estate, Chapter 1103 – Real Estate Appraisers amended September 1, 2005, and any future amendment.

ROW / ACQUISITION SERVICES

Halff selected professionals for the City of Edinburg ROW Acquisition Services project based on their expertise and availability. Each of these professionals is experienced in all aspects of real estate and appraisal services, including title research, appraisal, negotiation, title curative, closing, relocation, eminent domain support and administration.

Halff has the resources and expertise to provide quality ROW acquisition services. Through years of experience, we have developed methods and processes that produce timely, accurate results.

QUALITY ASSURANCE / QUALITY CONTROL (QA/QC)

QA/QC programs have been developed and implemented on projects throughout Halff's history. We have established a formal QA/QC program that achieves the following critical elements:

- Identifies the client's objectives and priorities
- Establishes QA/QC policies and requirements for each respective phase of the project
- Identifies quality control management approach
- Formulates applicable criteria to be used
- Establishes project schedules with milestone dates
- Identifies interdisciplinary milestones and exchange of key data to verify coordination

As **Project Manager, Nelda Renteria-Compian** will establish the QA/QC policies and requirements for the project, anticipate and schedule QA/QC meetings, and prepare a schedule to show the sequence of events involved in implementing project tasks within the specified service period. She will also develop a review comment annotation package for use by the internal project review team to verify that the City of Edinburg's expectations are fulfilled. Additionally, Nelda will represent the firm in review meetings with the City of Edinburg.

COMMUNICATION PLAN

Halff will provide the structure and communication system to verify that team members effectively meet the schedule parameters set by the City of Edinburg and allow city staff to track progress and adjust priorities.

A reporting system consisting of various reports, including Acquisition Status, Eminent Domain Status, Counter Offer Status, “On-hold” Report (tracks and details action items on hold), Weekly Summary Completion Report (tracks offers, final offers, deeds, counter offers, and eminent domain) will verify that the team members and the City of Edinburg are furnished with the information to track action items and make decisions necessary to keep the delivery of services on schedule.

Incorporated in these reports is a status summary of work accomplished by subconsultants. In addition to weekly written reports, if requested, Nelda and the ROW team will meet monthly or as requested with the City of Edinburg and team members throughout the project. In addition, Halff will hold designated team meetings throughout the project to discuss the progress of each aspect of the work. We will perform an over-the-shoulder review to verify that work is progressing in a timely manner.

The Halff structure and communication system will verify a smooth flow of information among team members, the City of Edinburg, and other affected parties, such as property owners, utility companies, and involved governmental authorities.

UNIQUE / INNOVATIVE METHODS

As a full-service firm, Halff offers support from other disciplines and staff members – including engineers and a licensed attorney. As a result, Halff has a broad understanding of design matters, legal issues, and valuation concerns, which can be a significant benefit in addressing property owners’ concerns. This understanding allows us to explore meaningful alternatives and nonmonetary solutions such as driveway adjustments, grading, drainage issues, or slight design modifications to the facility to minimize impact to property or improvements. Additionally, our broad background allows our team to work closely with the City of Edinburg and the engineers to prioritize parcel acquisitions for construction or utility relocation issues.

WEB-BASED TRACKING SYSTEM

Halff has provided a web-based tracking system on several past projects. This provides secured access for those furnishing services and documents, such as surveying, environmental, and appraisal services. Also, our database management provides links between various databases such as acquisition, relocation, appraisal, etc., so that the disciplines have access to the current project data.

Maintaining the project schedule and budget is highly critical to the project. Halff takes an organized, systematic approach to managing and documenting the team’s work effort and communicating the project status to our client. Halff will designate Project Manager Nelda Renteria-Compian as the single point of contact for the City of Edinburg to address any questions or issues. However, our project-tracking status gives any team member the information on each parcel to respond to the City of Edinburg on a timely basis.

EXPEDITED EMINENT DOMAIN PROCESS

Halff will seek written authorization from the City of Edinburg to simultaneously pursue acquisition through the eminent domain process, expediting possession of complex or extended negotiations for critical parcels.

RIGHTS OF ENTRY / POSSESSION & USE AGREEMENTS

To demolish improvements from the proposed right of way in a timely manner, Halff will seek limited Rights of Entry for environmental testing of the building materials throughout the acquisition and relocation processes when requested.

Halff has always been committed to pursuing Rights of Entry and/or Possession and Use Agreements for possession of or access to critical parcels. These instruments will allow the City of Edinburg to obtain possession of the desired parcels while negotiations continue or the parcel is being acquired through the condemnation process.

PROJECT MANAGEMENT

Halff is fully capable of providing top-notch service to the City of Edinburg through our tried-and-true management program. This program sets the standard for project management and establishes a disciplined approach to delivering the highest quality project performance. Halff bases our approach on a core project doctrine that includes the following:

- Allocating resources – defining team members and individual role assignments
- Meeting project requirements
- Identifying and tracking scope and deliverables
- Identifying time frames and schedules
- Attending monthly progress meetings
- Preparing fee estimates, establishing budgets, invoicing, and monitoring processes
- Preparing contracts, subcontracts and project amendments
- Managing the overall quality of the team's services
- Verifying ongoing, formal communication throughout the project, including weekly status updates.

EXPERIENCE WITH AGENCIES

Halff is experienced with agency ROW programs and has worked closely with multiple entities on these projects. Below are brief descriptions of those projects:

Multiple ROW Acquisition Projects for the City of Edinburg

HWY 281 Booster Pump Station Project. Drainage Improvements. The project consisted of the donation of 1 parcel for drainage improvements in Edinburg. Services included Negotiation, Title Curative, and Closing Support.

Monte Cristo Drainage and Water Tower Project. Drainage Improvements. Project consisted of the donation of 1 parcel for drainage improvements in Edinburg. Services included Negotiation, Title Curative, and Closing Support.

Sugar Road Detention Project. Drainage Improvements. The project consisted of the acquisition of 3 parcels for drainage improvements in Edinburg. Services included Negotiation and Title Curative.

Chapin Road. Bridge Improvements. The project consisted of the acquisition of 1 parcel for bridge improvements in Edinburg. Services included Negotiation, Title Curative, and Closing Support.

Alberta and I Road. Expansion of Lift Station 42. The project consisted of the acquisition of 1 parcel for the expansion of Lift Station 42 in Edinburg. Services included Negotiation, Title Curative, and Closing Support.

Canton Road. Drainage Improvements. The project consisted of the acquisition of 1 parcel for drainage improvements in Edinburg. Services included Negotiation, Title Curative, and Closing Support.

Multiple ROW Acquisition Projects for TxDOT

Halff has provided ROW services on numerous TxDOT projects. Currently, Halff is serving as the ROW provider for 19 parcels for the Yoakum District, 80 parcels for the San Antonio District, 27 parcels for the Corpus Christi District, and 45 parcels for the Laredo District. Services include negotiation, relocation management and assistance, closing and condemnation support.

Bexar County, Talley Road. Halff is providing services for the acquisition of 25 parcels for the widening of Talley Road. Services include Project Administration, Appraisal and Review Appraisal Management, Negotiation, Title Curative, and Closing.

TxDOT ROW/SH 183 Parcels 35 & 38

Nelda Renteria-Compian

Nelda has more than 37 years of experience in ROW acquisition. She served as the South ROW Project Delivery Manager for the six southern Districts of the TxDOT from November 2009 to August 2015. From October 1983 to October 2009, she worked in various right of way positions, including negotiations, relocation, eminent domain, and title curative, which included preparation and review of acquisition payment processing. She has a vast knowledge of complex ROW projects and has served as a Project Manager for Halff.

REPRESENTATIVE PROJECT EXPERIENCE

Multiple ROW Acquisition Projects, Edinburg, Texas.

- **Monte Cristo Drainage and Water Tower Project** – Drainage Improvements. The project consisted of the donation of 1 parcel for drainage improvements. Services included Negotiation, Title Curative, Eminent Domain Coordination, and Closing Support.
- **HWY 281 Booster Pump Station Project** – Drainage Improvements. The project consisted of the donation of 1 parcel for drainage improvements. Services included Negotiation, Title Curative, and Closing Support.
- **Sugar Road Detention Project** – Drainage Improvements. The project consisted of the acquisition of 3 parcels for drainage improvements. Services included Negotiation and Title Curative.
- **Canton Road** – Drainage Improvements. The project consisted of the acquisition of 1 parcel for drainage improvements. Services included Negotiation, Title Curative, and Closing Support.

SH 178 (Artcraft Road), TxDOT El Paso District, Texas.

Project consists of improvements for safety and reliability of travel time. Proposed improvements will include 4 direct connectors (DCs) at the interchange of I-10 and SH 178. The DCs will allow drivers to bypass the frontage road, traffic light signals, and traffic congestion on North Desert Boulevard and South Desert Boulevard. Also proposed are U-turn bridges at the SH 178 (Artcraft Road)/I-10 interchange.

SH 123/SH 80 Widening Project, TxDOT El Paso District, Texas.

Project consists of widening the roadway to include a continuous center turn lane (between 14 and 16 feet), 12-foot travel lane, 14-foot outer travel lane in each direction, and six-foot sidewalks or 10-foot shared-use path. At the southern end of the project, from approximately 0.2 miles south of East Main Avenue to just north of the intersection of US 181 and SH 80/SH 123, the existing 2-lane roadway would be widened to four lanes (two in each direction) with a continuous center turn lane, shoulders, and sidewalks.

FM 1560 Phase I and Phase II, TxDOT San Antonio District, Texas.

Project consisted of the acquisition of 80 parcels for the widening of FM 1560 from FM 471 to Galm – Shaenfield Road and SH 16.

Lorena Corpus

Lorena has over 10 years of experience in acquisition services. Lorena joined Halff as a contract administrator and has since moved into the ROW department. She assists Halff in acquiring parcels and relocation residential and personal properties. She also assists with project administration, negotiation with stakeholders, title curative, closing, eminent domain, and condemnation.

- **Monte Cristo Drainage and Water Tower Project** – Drainage Improvements. The project consisted of the donation of 1 parcel for drainage improvements. Services included Negotiation, Title Curative, Eminent Domain Coordination, and Closing Support.
- **HWY 281 Booster Pump Station Project** – Drainage Improvements. The project consisted of the donation of 1 parcel for drainage improvements. Services included Negotiation, Title Curative, and Closing Support.
- **Sugar Road Detention Project** – Drainage Improvements. The roject consisted of the acquisition of 3 parcel for drainage improvements. Services included Negotiation and Title Curative.
- **Canton Road** – Drainage Improvements. The project consisted of the acquisition of 1 parcel for drainage improvements. Services included Negotiation, Title Curative, and Closing Support.
- **Chapin Road** – Bridge Improvements. The project consisted of the acquisition of 1 parcel for bridge improvements. Services included Negotiation, Title Curative, and Closing Support.
- **Alberta and I Road** – Expansion of Lift Station 42. The project consisted of the acquisition of 1 parcel for the expansion of Lift Station 42. Services included Negotiation, Title Curative, and Closing Support.

SH 178 (Artcraft Road), TxDOT El Paso District, Texas.
Project consists of improvements for safety and reliability of travel time. Proposed improvements will include 4 direct connectors (DCs) at the interchange of I-10 and SH 178. The DCs will allow drivers to bypass the frontage road, traffic light signals, and traffic congestion on North Desert Boulevard and South Desert Boulevard. Also proposed are U-turn bridges at the SH 178 (Artcraft Road)/I-10 interchange.

SH 123/SH 80 Widening Project, TxDOT El Paso District, Texas.
Project consists of widening the roadway to include a continuous center turn lane (between 14 and 16 feet), 12-foot travel lane, 14-foot outer travel lane in each direction, and six-foot sidewalks or 10-foot shared-use path. At the southern end of the project, from approximately 0.2 miles south of East Main Avenue to just north of the intersection of US 181 and SH 80/SH 123, the existing 2-lane roadway would be widened to four lanes (two in each direction) with a continuous center turn lane, shoulders, and sidewalks.

Marissa Montoya, SR/WA-TN

Marissa has experience in the field of Right of Way Acquisition and Local Government Contracts. From 2018 to 2020, she worked as a Right of Way Agent for the Texas Department of Transportation - Right of Way Division. She worked as a Contract Specialist working on Local Government Contracts for the Transportation, Planning, and Design Department at the TxDOT, Laredo District. Since joining the Right of Way Division at Halff, Marissa works as a Right of Way Specialist providing administrative support for acquisition and condemnation services.

The Halff team stands ready to provide exemplary ROW Acquisition services to the City of Edinburg. We will leverage our previous experience to provide the City with the utmost quality service meet your expectations and exceed them. We are familiar with the City's expectations and standards and will strive to achieve successful project completion, on time and within budget.

ABILITY TO MEET SCHEDULE AND DEADLINES

Our ability to maintain the work schedule is part of what will make this a successful project. Halff has a **reputation of meeting the schedules that have been established by the project's owners**. Our key to successful project execution is developing the project schedule up front and identifying the required staffing levels. An integral part of developing the schedule is continued involvement with the client and relevant regulatory agencies. Our technique includes using partnering sessions at the beginning of the project and obtaining commitments from project partners to expedite the decision-making and review process. A successful schedule allows the project to develop in an orderly manner.

Our project managers are given the resources and authority to develop the project schedule and assign resources to meet the schedule.

Nelda will be responsible for developing and maintaining the project schedule. She has a **record of exemplary performance on various projects and fully understands the design process**. She can sequence tasks so multiple tasks are worked on concurrently, reducing the overall project schedule.

For each component of the production effort, team members will review the project and confirm that the schedule is reasonable for their assigned tasks. Schedules will be regularly updated so each team member can visually see project progress. If, for any reason, a schedule varies or slips, a contingency plan will be produced for schedule recovery. The schedule will be directed back on track by focusing the team on critical tasks, applying additional manpower to the project, or combining both solutions.

Halff understands that the service we provide the City of Edinburg is based upon a commitment that we will complete projects promptly and professionally. With this commitment comes our resolve to allocate the technical and support staff and resources required for project success.

FINANCIAL STABILITY

Halff has been serving Texas for 74 years and has seen continued growth and profitability throughout this period. Halff is in good financial standing and is current on payment of all taxes and fees. Halff has the financial capability and strength to serve our clients while providing opportunities for growth and investment in the firm and our staff. We invite you to contact the following banking reference who can speak to our financial stability:

Prosperity Bank
Chelsea Chavez
Treasury Management Sales Officer
80 Sugar Creek Center Blvd.
Phone: 281.269.7184
Email: Chelsea.Chavez@prosperitybankusa.com
Web: www.prosperitybankusa.com

Halff has the necessary resources (human and financial) to provide the level of service required by the City of Edinburg. Should you require further information, Halff will supply upon request.

A recent Dunn and Bradstreet report on Halff and its holdings ranks the company in all categories in the upper quartile for financial stability, with an overall ranking of 1R2. A Dunn and Bradstreet report, or other financial information for Halff and/or any of our subconsultants, can be made available upon request.

Our Commitment to BEST BUSINESS PRACTICES

Halff uses a proactive approach to identifying best business practices. We are committed to sourcing and maximizing the implementation of these best practices to better serve our clients and their communities. We have a well-documented history of not only meeting, but exceeding expectations in these areas to foster long lasting relationships by working closely together to deliver cost-effectively execute assignments with maximum quality.

Domestic Preference

Halff prioritizes the purchase of goods and services from domestic suppliers over foreign suppliers.

Debarment Certification

Halff has not been excluded or disqualified from government contracts due to past misconduct.

Federal Davis-Bacon Wage Requirements

Halff pays prevailing wages to laborers/mechanics on federally funded construction projects.

Buy American Preference

Halff uses products made in the United States for federally funded projects to promote domestic manufacturing and economic growth.

Disadvantaged Business Enterprise (DBE)

Halff includes small businesses owned and controlled by socially and economically disadvantaged individuals in government contracting.

Meeting or Exceeding DBE Goals

Halff promotes contract diversity and inclusion by surpassing the specified targets for utilizing DBEs.

Fair Labor Standards Act

Halff enforces minimum wage, overtime pay eligibility, record keeping, and child labor standards for employees.

SUPPLEMENTAL INFORMATION

Supplemental Information for Response to City of Edinburg (City), Request for Qualifications, Submittal Requirements, Litigation Disclosure Form

02 July 2024

Question:

1. *Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?*
2. *Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?*
3. *Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?*

Response:

Halff Associates, Inc. (Halff) employs more than 1,500 people in 33 office locations (Texas, Florida, Oklahoma, Arkansas, and Louisiana) and is engaged in roughly 4,900 active projects at any given time. Accordingly, on rare occasions, Halff finds itself as a named defendant in a lawsuit or as a participant in other dispute resolution proceedings related to professional services and/or business in general insurance. Halff is a privately-held corporation and statements regarding litigation and claims, on the advice of Halff's legal counsel and Halff's insurance carriers, must remain confidential. Further, it is important to note that confidentiality requirements are often specifically addressed in settlement release documents or employee-employer privacy restrictions or pursuant to contract requirements. Due to these circumstances, Halff can only release this confidential information under specific request and with the dual understandings: (a) that any such information is and shall remain privileged and confidential, coupled with the further understanding, (b) that any such disclosure by Halff could only be provided if such confidentiality were strenuously protected by both the City of Edinburg (City) and Halff. Notwithstanding the foregoing, Halff may still be prohibited from disclosing information. Further, as this information would provide Halff's competitors with information that would not normally be shared, and such disclosure would create a competitive advantage for such competitors, Halff and City agree that any and all relevant protections (exclusions) under the Texas Open Records Act and the Freedom of Information Act (FOIA) are applicable. **Further, Halff can and does affirm that Halff has never been adverse to the City of Edinburg (City) in any litigation or claims during the last ten (10) years. Halff can and does affirm, however, that there are no significant prior or ongoing matters that would adversely affect Halff's ability to fully perform its obligations on this or any other project.** Halff and its legal counsel and insurers will consider requests for specific information regarding litigation, therefore please direct any such questions through our General Counsel, Mrs. Jill Martin, at jmartin@halff.com or 214-346-6365.

CONFIDENTIAL – FOR INTERNAL CITY USE ONLY – NOT FOR DISCLOSURE
ANY AND ALL EXCEPTIONS / PROTECTIONS UNDER THE TEXAS OPEN RECORDS ACT AND THE FREEDOM OF INFORMATION ACT ARE HEREBY CLAIMED BY HALFF

FORMS

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

SENATE BILL 19 VERIFICATION

I, Marcos Diaz, PE, LGPP, the undersigned representative of

Halff Associates, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
AWARDING OF BIDS
Agenda Item No: 10.D.
2024-2026 Geotechnical Engineering and Construction Materials Testing Services Rotation

1. **Agenda Item:**
Consider Awarding RFQ 2024-006, Geotechnical Engineering and Construction Materials Testing Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise. [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

2. **Description:**
On occasion the City of Edinburg requires Geotechnical Engineering and/or Construction Materials Testing Services on City projects which do require a specific engineering specialty. The qualified firm(s) selected should be experienced in the field of geo-technical engineering services, having experience in the Geo-Technical Testing and Construction Materials Testing. It is expected that the qualified firm(s) selected will have a sufficient level of innovation and appraisal expertise to carry out the projects without constraints to produce documents in a timely manner. The firm must be prepared to assure the City of Edinburg that key personnel indicated in their qualification statement will maintain their role in each project and that their present workload is such that each project will be completed on or before the due date. The rotation is for potential projects between October 2024 through September 2026. Projects to be funded in the upcoming fiscal years, as prioritized by the City Council.

On Tuesday, July 16, 2024, Request for Qualifications were received for RFQ 2024-006, Geotechnical Engineering and Construction Materials Testing Services for. A total of six (6) Request for Qualifications were received and opened. The requests for qualifications were reviewed by staff and they all met the criteria set out in the Request for Qualifications.

The following qualified firms listed in alphabetical order have submitted Statements of Qualifications in response to this RFQ:
1. B2Z Engineering*
2. L&G Consulting Engineers
3. Millennium Engineers Group*
4. Raba Kistner*
5. Terracon*
6. UES Professional Solutions 45

*Denotes on current two year (2022-2024) rotation

Limiting the selection of firms between 3 and 5 will insure each firm will obtain a project as it arises. The current 2022-2024 rotation has 4 firms and they have received approximately 9 projects.

3. **Staff's Recommendation:**
Approve Awarding RFQ 2024-006, Geotechnical Engineering and Construction Materials Testing Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise.

STATE OF TEXAS	**§**	**AGREEMENT BETWEEN THE CITY OF EDINBURG AND PROJECT MANAGEMENT CONSULTANT FOR PROFESSIONAL SERVICES PURSUANT RFQ NO. XXXX-XXX**
COUNTY OF HIDALGO	**§**	
CITY OF EDINBURG	**§**	

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **PROJECT MANAGEMENT CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit ”B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

Section XXI
Notice of Governing Law for State and Federal Grant Projects

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

B2Z ENGINEERING

July 15, 2024

Mr. Mardoqueo Hinojosa, PE, CFM, CPM, City Engineer
City of Edinburg
415 W. University Drive
Edinburg, Texas 78539

RE: Statement of Qualifications for
Geotechnical Engineering and Construction Material Testing Services Rotation
Request for Qualification (RFQ) No. 2024-6

Dear Mr. Hinojosa,

B2Z Engineering, LLC (B2Z) is pleased to present our Statement of Qualifications (SOQ) in response to the City of Edinburg's solicitation for Geotechnical Engineering and Construction Material Testing Services Rotation. B2Z is excited and pleased to express our interest and commitment to **continue** providing quality Geotechnical Engineering and Construction Materials Testing (CMT) to the City of Edinburg as outlined in the above-referenced RFQ.

B2Z is a **HUB**, **DBE, MBE**, and **WBE** certified engineering consulting and materials testing firm known for its ability to build positive working relationships with our clients. We have extensive experience in providing Geotechnical & CMT services to the City of Edinburg and stand ready to continue providing those services via this contract. B2Z competed on a state-wide basis and was ranked **NUMBER ONE** by the **Texas Department of Transportation (TxDOT)** for their bi-annual **Materials Engineering Statewide** contract.

We have assembled a **uniquely qualified** group of **LOCAL TALENT** with extensive knowledge and technical expertise in geotechnical engineering and construction materials testing. B2Z's team, consisting of professional engineers, technicians, and support staff, operates our **state-of-the-art**, **AASHTO-accredited, TxDOT & USACE-certified** laboratory in Mission. B2Z is equipped and prepared to continue to meet all schedule demands and adhere to all quality standards set by the City of Edinburg.

B2Z's proposed **Senior Project Manager, Mr. Reza Badiozzamani, PE, CFM,** will serve as the primary contact person responsible for matters regarding our SOQ. He is located at 900 S. Steward Rd, Ste. 2, Mission, TX office and can be contacted by telephone at (956) 655-1995 or by email at Reza@B2ZEng.com.

Ms. Aisha Gonzalez, as Principal of B2Z Engineering, LLC is authorized to bind the firm to a contract with the City of Edinburg. She is located at 900 S. Steward Rd, Ste. 12, Mission, TX office and can be contacted by telephone at (956) 566-3421 or by email at Aisha@B2ZEng.com.

Please allow me to be the first to say that we sincerely appreciate the opportunity to present our statement of qualifications in response to the City of Edinburg's request. We look forward to the opportunity to continue our working relationship with the city, should we be selected. We thank you for your time, consideration, and attention.

Respectfully,

Aisha Gonzalez
President

Tab II – Firm Qualification and Experience

Firm Introduction

B2Z Engineering, LLC (B2Z) is a **premier engineering consulting firm established in 2009** and licensed through the State of Texas as a Professional Engineering Firm (TBPE #F-11187). B2Z is **100% LOCALLY OWNED AND OPERATED** and has been headquartered in the Rio Grande Valley since 2009. B2Z is a **Woman-Owned Minority Business** with engineering offices and materials testing laboratories in Mission, Brownsville, Seguin, Houston, and Austin. We are a **HUB, WBE, MBE, DBE, WOSB, SBE,** and **SBA 8(a)** certified firm. B2Z has a uniquely qualified group of **LOCAL TALENT** with **geotechnical engineering & testing, construction materials testing,** American Society for Testing and Materials **(ASTM)** testing procedures, American Concrete Institute **(ACI)** testing procedures, National Institute for Certification of Engineering Technologies **(NICET)** proficient, the Texas Asphalt Paving Association **(TXAPA)**, and others.

Office Providing Services

900 S. Stewart Road, Suite 2

Services under this contract will be performed out of our Mission office. Additional support, if needed, will be provided by our regional offices (Brownsville, Seguin, Houston, and Austin). B2Z's Mission Engineering & Laboratory Offices employ over 50 professional and technical personnel. Services performed out of this office include, but are not limited to geotechnical engineering & testing, construction materials testing, environmental monitoring, general civil engineering, bridge/roadway design, drainage design, construction/project management, and construction engineering & inspection.

Statement of Interest

B2Z has an executed contract with the City of Edinburg to provide geotechnical engineering and construction materials testing services on an as-needed basis. ***We are ready and able to continue to provide these services.*** Our materials testing laboratory is equipped with all the required testing equipment to conduct the geotechnical and materials testing services that may be required by the City of Edinburg's projects.

B2Z is contracted by various entities to provide **geotechnical and construction materials testing services**. These entities include but are not limited to the Cities of Alamo, Edinburg, McAllen, Palmview, and Weslaco, the McAllen Public Utility, Hidalgo County, Hidalgo County Drainage District No. 1, TxDOT, and Hidalgo County Regional Mobility Authority. B2Z was ranked and selected as the **NUMBER ONE** firm for **TxDOT's Materials Engineering Statewide** contract and has been providing geotechnical and materials testing services all over the state. In addition to that contract, **B2Z has been awarded four other TxDOT prime contracts for geotechnical engineering and materials testing services.**

Unique Qualifications

B2Z maintains over 8,500 square feet of combined engineering office and laboratory space in Mission, TX. Our **state-of-the-art laboratory** contains the necessary tools and equipment to provide quality materials testing services. B2Z's team of highly qualified professionals has extensive experience working not only with but for public agencies and understands the nuances and complexities of working within the public sector project model. Whether we are working on a large or **small project, we give each task the same attention to technical excellence and quality control while maintaining responsiveness.**

B2Z also owns and operates four (4) Geotechnical drilling rigs and drilling support trucks. We have the capacity and capability to **expedite** geotechnical and **materials testing services** when necessary. We pride ourselves on hiring local professionals who have **over 200 years of combined TxDOT experience**. B2Z's team is comprised of **over twenty certified field and laboratory technicians,** half of whom possess more than ten years of individual experience. Their certifications include **Level 1A, 1B, and 2; SB 101, 102, 103, 201, and 202; and ACI**. B2Z would like for the City of Edinburg to continue to view our firm as an extension of its staff, utilizing our expertise whenever necessary.

B2Z's **vast experience** and **quality of services** have allowed us to obtain **AASHTO Accreditation, TxDOT, and USACE Certifications** for our Mission-based materials testing laboratory. We utilize the most up-to-date equipment to perform all construction materials testing services. Independent servicing agencies calibrate all our equipment, and our experienced technical staff conducts testing in compliance with all standards set by **AASHTO, ACI, ASTM, and TxDOT**.

In addition to our years of experience in providing compliant geotechnical engineering and construction materials testing, B2Z's staff holds a multitude of TxDOT Pre-Certifications. The following table shows B2Z's current TxDOT geotechnical and materials testing pre-certifications.

B2Z Engineering, LLC - Areas of Certification (TxDOT Pre-Certs.)			
12.1.1	ASPHALTIC CONCRETE PRODUCTION	**12.2.5**	HOT MIX ASPHALT (HMA) PLANT INSPECTION AND TESTING
12.1.2	PORTLAND CEMENT CONCRETE	**12.4.1**	PAVEMENT DESIGN SERVICES
12.1.3	MATERIALS ENGINEERING	**12.5.1**	PAVEMENT EVALUATION
12.1.4	ASPHALTIC CONCRETE PLACEMENT	**14.1.1**	SOIL EXPLORATION
12.1.5	PORTLAND CEMENT CONCRETE PLACEMENT	**14.2.1**	GEOTECHNICAL TESTING
12.1.6	EMBANKMENT/SUBGRADE/BACKFILL/BASE PRODUCTION	**14.3.1**	TRANSPORTATION FOUNDATION STUDIES
12.1.7	EMBANKMENT/SUBGRADE/BACKFILL/BASE PLACEMENT	**14.4.1**	BUILDING FOUNDATION STUDIES
12.2.1	CONCRETE PLANT INSPECTION AND TESTING	**14.5.1**	EVALUATION & DESIGN OF GEOTECHNICAL RELATED STRUCTURES
12.2.2	PREFABRICATED STRUCTURAL MATERIALS FABRICATION PLANT INSPECT		

In addition to being an **AASHTO, TxDOT, and USACE Certified Laboratory**, B2Z's field and laboratory technicians hold the following certifications:

- ACI CONCRETE FIELD-TESTING TECH GRADE 1
- ACI CONCRETE STRENGTH TESTING TECHNICIAN
- ACI AGGREGATE TESTING
- TXAPA HMA PLAN SPECIALIST – LEVEL 1A
- TXAPA SMA ROAD SPECIALIST – LEVEL 1B
- TXAPA HMA MIX DESIGN SPECIALIST – LEVEL 2
- TXAPA PROPERTIES SPECIALIST – SB 101
- TXAPA FIELD SPECIALIST – SB 102
- TXAPA MATERIALS ANALYSIS SPECIALIST – SB 103
- TXAPA STENGTH SPECIALIST – SB 201
- TXAPA COMPRESSIVE STRENGTH SPECIALIST – SB 202
- RADIATION SAFETY OFFICER
- OSHA 10 & OSHA 30
- NUCLEAR GAUGE SAFETY CERTIFIED
- HAZMAT CERTIFIED

Meeting Timeline Requirements & Staffing

We have staff available to begin work immediately for any size project (part-time or full-time). B2Z knows that maintaining a predictable project schedule is paramount to successful project delivery. Our team prides itself on meeting, and often exceeding the schedules developed by our clients and project owners. We have developed a system for project schedule monitoring that has proven itself on over $1B worth of construction contracts. As a function of our proven system, we would develop a schedule early in the process to ensure that we have the appropriate staffing levels assigned to the critical path components. This schedule would be developed in conjunction with both the client and any other project stakeholders with consideration of the major project milestones and anticipated project hurdles. B2Z has committed the services of experienced personnel who know and understand the tasks required to perform municipal projects. This will undoubtedly allow us to keep ahead of schedule and add additional resources as appropriate.

Ability to Expedite Services

B2Z is made up of technical and multi-discipline staff of ninety-five (95) employees, sixty-three (63) fleet vehicles, four (4) Geotechnical drilling rigs, and drilling support trucks. **We have the capacity and capability to fulfill all requests for expedited materials testing services.**

B2Z commits to continue responding promptly to the City of Edinburg's requests as they are received. We will make every effort to minimize scheduling conflicts. B2Z prefers to schedule field and laboratory work with at least 24 hours of advance notice. However, we understand that certain situations may occur where projects may require emergency services. During these instances, B2Z will make every effort to dispatch the appropriate personnel.

With all drilling and laboratory testing operations owned and managed by B2Z, we have the distinct ability to best manage our resources to meet deadlines.

B2Z FIRM CERTIFICATIONS

Texas Historically Underutilized Business (HUB) Certificate

HUB
Statewide Historically Underutilized Business Program

Certificate/VID Number: 1371580878100
Approval Date: August 19, 2021
Scheduled Expiration Date: August 19, 2025

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

B2Z Engineering, LLC

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **August 19, 2021**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day to day management, operational control, business location) provided in the submission of the business; application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

AASHTO ACCREDITED

CERTIFICATE OF ACCREDITATION

AMERICAN ASSOCIATION OF STATE HIGHWAY AND TRANSPORTATION OFFICIALS
AASHTO

B2Z Engineering, LLC

in

Mission, Texas, USA

has demonstrated proficiency for the testing of construction materials and has conformed to the requirements established in AASHTO R 18 and the AASHTO Accreditation policies established by the AASHTO Committee on Materials and Pavements.

The scope of accreditation can be viewed on the Directory of AASHTO Accredited Laboratories (aashtoresource.org).

Jim Tymon,
AASHTO Executive Director

Moe Jamshidi,
AASHTO COMP Chair

This certificate was generated on 08/14/2023 at 11:18 AM Eastern Time. Please confirm the current accreditation status of this laboratory at aashtoresource.org/aap/accreditation-directory

Texas Department of Transportation

Certificate of Accreditation

This is to signify that

B2Z Engineering – Mission, Texas
(900 S. Stewart Rd. Suite 2, Mission, Texas 78577)

Has demonstrated proficiency in the tests listed below and has met the minimum requirements set forth by the TxDOT Quality Assurance Program for Construction.

Tex-100-E, 101-E (Parts I, II & III), 103-E, 104-E, 105-E, 106-E, 107-E, 110-E (Part I), 113-E, 114-E, 115-E (Part I), 116-E, 117-E (Part II), 120-E (Part II), 121-E (Part II), 128-E, 129-E, 130-E (Parts I, II, III, IV), 140-E, 145-E (Part II), 200-F (Parts I & II), 201-F, 203-F, 205-F, 206-F (Part I), 207-F (Parts I, III, IV, V,VII & VIII), 212-F (Part II), 222-F, 225-F (Parts I, II), 227-F (Part II), 235-F, 236-F (Parts I, II), 237-F, 400-A, 401-A, 402-A, 404-A (Coarse Aggregate), 406-A (Part I), 407-A, 408-A, 415-A, 416-A, 418-A, 422-A, 423-A (Parts I & II), 450-A (Part III).

Presented by,

(Pharr District Laboratory)
Texas Department of Transportation

Effective Period: May 05, 2023 – May 05, 2026

Texas Department of Transportation

Pharr District Lab Engineer

MTC MATERIALS TESTING CENTER

USACE CERTIFICATE OF LABORATORY VALIDATION

ERDC

B2Z Engineering
900 South Stewart Rd. Suite 4
Mission, TX,
Aisha Gonzalez
(956) 585-3773

has demonstrated, by abbreviated audit of its AASHTO accreditation, or by inspection of required records, equipment, procedures, facilities, and/or final reports, its proficiency to perform testing of construction materials, as established by the quality standards of AASHTO R 18 guidance and the requirements of the applicable ASTM standards.

THIS USACE CERTIFICATE OF LABORATORY VALIDATION IS ACCURATE AS OF ITS DATE AND TIME OF GENERATION:
24 JUL 2023 AT 11:43 HOURS

ALL METHODS LISTED ON THIS CERTIFICATE OF VALIDATION WILL EXPIRE ON 07/20/2025

PLEASE CONFIRM THE CURRENT VALIDATION STATUS OF THIS LABORATORY USING THE SEARCH FEATURE ON OUR PUBLIC WEBSITE: https://mtc.erdc.dren.mil

USACE Materials Testing Center
Vicksburg, Mississippi, USA

B2Z Projects

B2Z is currently on the City of Edinburg's Geotechnical and Construction Materials Testing (CMT) rotation list and is well-versed in how the City likes to conduct its business. We have also provided services to governmental agencies throughout the State of Texas including, but not limited to, the City of Alamo, City of McAllen, City of Mission, Hidalgo County, Hidalgo County Drainage District No. 1, and TxDOT.

City of Edinburg – On-Call Geotechnical & Construction Materials Testing (CMT)

Client: City of Edinburg

Contact: Mr. Mardoqueo Hinojosa, P.E., CFM, CPM, City Engineer – Ph. (956) 292-7080

Services Provided: Geotechnical Engineering & Construction Materials Testing

Description/Scope: B2Z was contracted to provide geotechnical and construction materials testing services for various city projects. *B2Z has provided materials testing on* subgrade roadway, flex base roadway, pipe bedding material, asphalt concrete pavement, hydraulic cement concrete, curbs, gutters, sidewalks, and riprap. B2Z has over twenty (20) work authorizations under this contract. Please see below for a listing of active projects.

- Los Lagos Phase V
- Carmen Avila Subdivision Phase III
- 2812 Estates
- Vela & Flores Construction
- Ingle Springs Subdivision
- Hyde Park
- The Heights on Trenton Subdivision
- Municipal Park Sanitary Sewer
- Russell Village Subdivision
- Caledonia West Subdivision
- Atwood Village Subdivision
- Atwood Estates Subdivision
- Alberta Heights Subdivision
- Mariterry Estates Subdivision

McAllen Public Utility - Sprague Road Sewer Interceptor ~ Phase I

Client: McAllen Public Utility (MPU)

Contact: Mr. Marco A. Vega, P.E., General Manager – Ph. (956) 681-1770

Services Provided: Construction Materials Testing

Description/Scope: The Sprague Road Sewer Interceptor project consisted of the construction of a new 48" sewer line within the McAllen city limits. The project length in total, including accepted alternates, was approximately 6800 linear feet and the depth of the line was more than thirty feet at some locations. B2Z worked closely with MPU and the design engineer during the proposal and negotiation phase to find efficiencies in the testing frequencies that would still satisfy the engineer's requirements but also meet MPU's CMT budget. ***B2Z provided materials testing on*** embankment (liquid limit/plasticity index, gradations, moisture/density, in-place density), subgrade (pulverization, liquid limit/plasticity index, gradations, moisture/density, in-place density), flexible base stockpile testing (liquid limit/plasticity index, gradations, moisture/density, in-place density, wet-ball, triaxial), flexible base field testing (pulverization, liquid limit/plasticity index, gradations, moisture/density, in-place density), asphaltic concrete pavement testing (coarse aggregate, fines, mineral fillers, combined aggregate, complete mix), and hydraulic cement concrete (structural and non-structural).

City of Weslaco – On-Call Construction Materials Testing (CMT)

Client: City of Weslaco

Contact: Mr. Alberto Aldana, P.E., City Engineer – Ph. (956) 969-1533

Services Provided: Construction Materials Testing

Description/Scope: B2Z is contracted to provide construction materials testing (CMT) services as needed by the City of Weslaco. B2Z is evaluating soil properties, such as moisture content, by conducting laboratory soil tests (Atterberg limits, gradation, standard proctor, nuclear density, compressive strength, and more). Additionally, B2Z is providing field testing services on-sight to determine parameters such as field density. B2Z currently has seven work authorizations under this contract, as provided below:

- San Jacinto Estates Phase I & II
- Milanos Estates
- Freedom Storage Subdivision
- Pleasant View Estates
- Ten Fifteen Subdivision
- Fire Station No. 2 (Downtown)
- Police Station w/Municipal Court

City of Alamo – Geotechnical & Construction Materials Testing (CMT)

Client: City of Alamo

Contact: Mr. Bobby Salinas, City Manager – Ph. (956) 787-0006

Services Provided: Geotechnical Engineering & Construction Materials Testing

Description/Scope: B2Z was contracted to provide geotechnical engineering and construction materials testing (CMT) services on an "as-needed" basis. B2Z is currently conducting CMT for the **San Agustin Subdivision Phase III**. Services include testing on subgrade roadway, flex base roadway, pipe final backfill material 12" lifts waterlines, sanitary sewer and drainage, asphalt concrete pavement and hydraulic cement concrete curb & gutter, sidewalks, and riprap (Atterberg limits, moisture/density, and nuclear density, pavement thickness, concrete strength, etc.).

Hidalgo County Drainage District No. 1 – On-Call Geotechnical & Construction Materials Testing (CMT)

Client: Hidalgo County Drainage District No. 1 (HCDD1)

Contact: Mr. Raul Sesin, P.E., CFM, District Manager – Ph. (956) 292-7080

Services Provided: Geotechnical Engineering & Construction Materials Testing

Description/Scope: B2Z was contracted to provide on-call geotechnical and construction material testing services for various projects throughout Hidalgo County. B2Z has 20 CMT & 15 Geotechnical Work Authorizations under various On-Call Contracts including:

Anaquitas Drain Structure (Bond Project #8) (CMT) – B2Z is performing culvert box backfill testing (cement stabilized sand), embankment testing (plasticity index, gradation, moisture/density, in-place density), and flexible base for levee crown (Cast in Place, Type E Grade 4). Additional testing includes hydraulic cement concrete gatewell structure, culvert boxes, footing, and riprap.

Mission-McAllen Rado Alternate (Bond Project #25) (CMT) – B2Z is performing embankment testing (plasticity index, gradation, moisture/density, in-place density), backfill testing (plasticity index, gradation, moisture/density, in-place density). Additional testing includes subgrade (4% lime treated), 12" flexbase, asphalt concrete pavement (HMA – QC/QA), hydraulic cement concrete testing on wingwalls (Class C), and riprap/curb/sidewalk (Class A).

Pharr McAllen Drain (Bond Project #31) (CMT) – B2Z is performing embankment testing (plasticity index, gradation, moisture/density, in-place density), backfill testing (plasticity index, gradation, moisture/density, in-place density).

Hidalgo Drain (Bond Project #13) (CMT) – B2Z is performing asphalt concrete pavement testing (complete mix: asphalt content, voids in mineral aggregates (VMA), gradation, moisture content, lab molded density; roadway: in-place air voids, segregation profile, joint density, thermal profile), embankment testing (plasticity index, gradation, moisture/density, in-place density), lime compliance testing, lime-treated subgrade testing (pulverization gradation, plasticity index, gradation, moisture/density, in-place density), untreated flexible base testing (plasticity index, gradation, moisture/density, wet ball mill, triaxial), lime-treated flexible base testing (pulverization gradation, plasticity index, gradation, moisture/density, in-place density). Additional testing includes hydraulic cement concrete testing (Class A).

Mission Lateral- Sections I/II/III (Bond Project #26) (CMT) – B2Z is performing pipe bedding material testing (plasticity index, gradation), embankment testing (plasticity index, gradation, moisture/density, in-place density). Additional testing includes hydraulic cement concrete testing on riprap/field drains.

Jackson Rd Drain (Bond Project #16) (CMT) – B2Z is performing flexible base for cut/restore (plasticity index, gradation, moisture/density, in-place density), asphalt concrete pavement for cut/restore – Type D (complete mix: asphalt content, voids in mineral aggregates (VMA), gradation, lab molded density), pipe bedding material testing (plasticity index, gradation), embankment testing (liquid limit, plasticity index, gradation, moisture/density, in-place density). Additional testing includes hydraulic cement concrete testing on gatewell structure & pump system (Class C) and hydraulic cement concrete testing on riprap/field drains.

Mission Inlet Balboa Estates (CMT) – B2Z is performing pipe & box bedding material testing (plasticity index, gradation), embankment testing (plasticity index, gradation, moisture/density, in-place density). Additional testing includes hydraulic cement concrete testing on gateway structure and foundation (Class C) and hydraulic cement concrete testing on riprap/field drains.

Hidalgo Drain and Dicker Road Box Culvert Crossing (CMT) – B2Z is performing backfill testing at non-roadway (general backfill - plasticity index, gradation, moisture/density, in-place density), flexible base for cut/restore – Type E Grade 4 (plasticity index, gradation, wet ball mill, moisture/density, in-place density), pipe bedding material testing (plasticity index, gradation), backfill testing at roadway (cement stabilized backfill - plasticity index, gradation, moisture/density, unconfined compression, in-place density), asphalt concrete pavement for cut/restore – Type D (complete mix: asphalt content, voids in mineral aggregates (VMA), gradation, lab molded density). Additional testing includes hydraulic cement concrete testing (Class C) junction box.

J-09 Drain Phase IV (CMT) – B2Z is performing asphalt concrete pavement for cut/restore – Type D (complete mix: asphalt content, voids in mineral aggregates (VMA), gradation, lab molded density), flexible base for cut/restore (plasticity index, gradation, wet ball mill, moisture/density, in-place density), pipe bedding material testing (plasticity index, gradation), pipe haunch material testing conforming with ASTM D2321 (plasticity index, gradation, moisture/density, in-place density), pipe initial, final and field drain backfill testing (plasticity index, gradation, moisture/density, in-place density). Additional testing includes hydraulic cement concrete testing on riprap/field drains.

Pharr McAllen Drain at HCID 2 Canal (Geo) – B2Z performed qualitative investigation of soil shear strength vs. proposed construction. Field exploration and laboratory testing conducted included moisture content, Atterberg limits, -200 determination, and sieve analysis with hydrometers.

Hidalgo County Health Department Testing/Bio-Safety Laboratory – Edinburg, TX

Client: Hidalgo County

Contact: Eduardo Olivarez, Chief Administrative Officer – Phone: (956) 383-6221

Services Provided: Geotechnical Engineering, Materials Testing, Construction Management, and Inspection Services

Description/Scope: B2Z was contracted to perform geotechnical and construction materials testing for a proposed 10,413 square feet, $4.08M facility consisting of a clinic, administration, and laboratory. Three (3) borings at a depth of 20 feet were drilled at approximate locations of the proposed building structure. Laboratory testing included Atterberg limits, gradation (-200), moisture content, sieve analysis, hydrometer, and sulfate content. B2Z provided structural evaluations of the borings, shear strength models, and soil profiles. Shallow foundation analysis and recommendations were provided, as well as construction recommendations.

Lopezville Park Improvements Project – San Juan, TX

Client: GDJ Engineering, LLC

Contact: Robert Macheska, P.E., Project Manager – Phone: (956) 684-8698

Services Provided: Geotechnical Engineering Services

Description/Scope: This $2M park project consisted of a 414,000-square-foot park and recreational center development. The project included a geotechnical investigation of proposed pavilions on drilled shafts, general park equipment, amenities on shallow footings, slabs for restroom facilities, patio rest areas, sports fields, and other items. Additionally, this project contained a proposed pond facility for recreational fishing and float activities. Geotechnical recommendations and analyses included deep foundations for drilled shafts, allowable bearing capacity of the shallow foundations (column square footings, edge strip footings), potential vertical rise (PVR), slab on grade analysis (WRI and PTI), flexible pavement design (for roadway connection, parking areas and inner park routes), global stability modeling for pond side-slopes and permeability modeling of pond soils (recommendations for pond lining).

Hidalgo County Precinct No. 3 – Mile 3 N Road Project

Client: Hidalgo County Precinct No. 3

Contact: Commissioner Everardo "Ever" Villarreal – Ph. (956) 585-4509

Services Provided: Construction Materials Testing and Construction Engineering & Inspection

Description/Scope: ***B2Z is providing material testing on*** lime-treated subgrade (pulverization gradation, plasticity index, gradation, moisture/density, in-place density), untreated flexible base (plasticity index, gradation, moisture/density, wet ball mill, triaxial), embankment (plasticity index, gradation, moisture/density, in-place density), untreated subgrade (organic content, sulfate content), lime compliance, lime-treated flexible base (pulverization gradation, plasticity index, gradation, moisture/density, in-place density), asphalt concrete pavement (course aggregate: gradation, flat & elongated particles, coarse aggregate angularity, del. matl. and decant; fine aggregates: bar linear shrinkage, organic impurities, gradation; mineral filler: sand equivalent; complete mix: asphalt content, voids in mineral aggregates (VMA), gradation, moisture content, lab molded density; roadway: in-place air voids, segregation profile, joint density, thermal profile).

Hidalgo County Precinct No. 2 – Dicker Road Expansion Project

Client: Hidalgo County Precinct No. 2

Contact: Commissioner Eduardo "Eddie" Cantu – Ph. (956) 787-1891

Services Provided: Construction Materials Testing and Construction Engineering & Inspection

Description/Scope: ***B2Z provided material testing on*** lime-treated flexible base (pulverization gradation, plasticity index, gradation, moisture/density, in-place density), asphalt concrete pavement (coarse aggregate: gradation, flat & elongated particles, coarse aggregate angularity, del. matl. and decant; fine aggregates: bar linear shrinkage, organic impurities, gradation; mineral filler: sand equivalent; complete mix: asphalt content, voids in mineral aggregates (VMA), gradation, moisture content, lab molded density; roadway: in-place air voids, segregation profile, joint density, thermal profile), embankment (plasticity index, gradation, moisture/density, in-place density), untreated subgrade (organic content, sulfate content), lime compliance, lime-treated subgrade (pulverization gradation, plasticity index, gradation, moisture/density, in-place density), untreated flexible base (plasticity index, gradation, moisture/density, wet ball mill, triaxial). Additional testing has included hydraulic cement concrete testing, drill shafts, wingwalls, and traffic rail foundation testing.

Hidalgo County Precinct No. 2 – Regional Linear Park Project (RLPP) ~ Section II

Client: Hidalgo County Precinct No. 2

Contact: Commissioner Eduardo "Eddie" Cantu – Ph. (956) 787-1891

Services Provided: Construction Materials Testing and Construction Engineering & Inspection

Description/Scope: ***B2Z provided material testing on*** embankment (plasticity index, gradation, moisture/density, in-place density), untreated subgrade (organic content, sulfate content), lime compliance, lime-treated subgrade (pulverization gradation, plasticity index, gradation, moisture/density, in-place density), untreated flexible base (plasticity index, gradation, moisture/density, wet ball mill, triaxial), lime-treated flexible base (pulverization gradation, plasticity index, gradation, moisture/density, in-place density), asphalt concrete pavement (course aggregate: gradation, flat & elongated particles, coarse aggregate angularity, del. matl. and decant; fine aggregates: bar linear shrinkage, organic impurities, gradation; mineral filler: sand equivalent; complete mix: asphalt content, voids in mineral aggregates (VMA), gradation, moisture content, lab molded density; roadway: in-place air voids, segregation profile, joint density, thermal profile). Additional testing has included hydraulic cement concrete testing, riprap testing, and drill shaft testing.

Our Services

Shown through past project experience, B2Z is highly qualified to provide superior Geotechnical and Construction Material Testing services to the City of Edinburg. We understand the City is seeking firms able to perform the following services:

Geotechnical:

A. Slab on Grade Foundation Evaluation and Recommendation
B. Special Construction Details for Removal of Ground or Surface Water, Existence of Expansive Clay, Hydrostatic Pressure, etc.
C. Site Work
D. Retention Systems
E. Field Exploration
F. Laboratory Testing
G. Analysis and Reports
H. Other Geotechnical Evaluation
I. Environmental Reports

Construction Materials Testing:

A. Plans Review
B. Earthwork Services
C. Density Testing
D. Post Construction Services
E. Foundation Inspection Services
F. Concrete Services
G. Structural Steel Services
H. Other Laboratory Construction Testing for Infrastructure and/or Building Projects

Geotechnical Engineering Services

B2Z's geotechnical services typically follow a three-part approach. B2Z will first conduct project discovery. Project discovery entails defining project parameters regarding size, scope, materials, budget, schedule, location, existing conditions, and formulating a plan. Next, B2Z will conduct all the drilling, field observation/exploration, and pertinent field and laboratory testing requirements based on the needs defined in step one. Lastly, B2Z will prepare geotechnical engineering reports that will include recommendations to be used by the project design team to develop plans and specifications.

1. **Project Discovery** - Project discovery includes all preliminary coordination activities with the City of Edinburg. Identifying project structures, project location(s), proposed materials, and depths will help B2Z generate a boring plan that is both effective and efficient. The number of borings, depth of borings, and other project parameters (proximity to the lab, tests required, etc.) will determine the cost associated with geotechnical services.

2. **Field Exploration and Laboratory Testing** - After the City of Edinburg accepts the boring plan and proposal, B2Z will begin field activities by physically staking all boring locations in the field. All boring locations will be cross-checked with existing utility plans (if available) and identified/marked in the field by submitting a request to **Texas811**. Once the site is clear, B2Z will dispatch the appropriate drilling rig(s) to collect the necessary soil samples. Typical field operations include removing samples from collection apparatuses and classifying them to record boring logs. Samples are then appropriately packaged and sealed to minimize moisture loss and transported to our soil laboratory. Water level readings are taken during drilling,

directly after the conclusion of drilling, and after 24 hours. The crew will then backfill the borings.

3. **Geotechnical Reports** - Once all field investigations and laboratory tests are complete, the team compiles the information to finalize soil classification and subsurface details. The team will generate boring logs and test summary sheets using this data. The geotechnical engineer will write the geotechnical report, summarizing the data, embankment design analysis, foundations design analysis, and any other specified requirements for the project. The contents of the geotechnical report vary based on the project type and scope. The report will typically include a general project overview (including previous studies), boring logs, test summary sheets, existing surface and sub-surface conditions, geotechnical analysis, design parameters (such as deep foundation capacity and global stability analysis), and general construction considerations (deep/shallow foundation, MSE retaining walls, excavation, trenching, and embankment recommendations). The geotechnical engineer will note any project concerns and recommend solutions alongside the design and construction recommendations. *Our geotechnical reports are comprehensive, concise, and accurate, ensuring safe, cost-effective construction.*

Locate Public/Private Utilities

B2Z will dispatch a field technician to stake the location by utilizing the KMZ file provided by our geotechnical engineer. The technician identifies each drilling location, within a 40-foot radius, with a wooden stake painted orange. After staking, B2Z's experienced staff will request a utility check from Texas811 at least 48 hours prior to drilling work. B2Z provides Texas811 with the location coordinates of each boring, and Texas811 issues a ticket for each location. Texas811 will notify all utility companies with utilities present in the area, and the companies will mark their specific utility. Existing utilities are marked with colored flags or spray paint. Utility companies will reply to the ticket(s) issued for the boring, and tickets are saved in their respective projects for reference. Drilling operations can commence once all utilities have been cleared.

To update or view a map of the dig location click here to go to the Texas811 Portal Site.

Construction Materials Testing (CMT) Services

CMT is an instrumental component of all construction projects. CMT is used to ensure methods and materials specified in the construction documents are being adhered to and properly installed. B2Z provides CMT services for the categories listed below:

- ❖ Quality Assurance and Quality Control (QA/QC)
- ❖ Field Inspection and Oversight
- ❖ Field and Laboratory Testing and Analysis

Quality Assurance and Quality Control (QA/QC)

Quality control is paramount to ensuring the completion of all testing according to specifications and within testing standard compliance. B2Z utilizes MetaField, a software-as-a-service (SaaS) platform used by project personnel, to schedule field activities, dispatch technicians, collect sample and activity data, organize test data, and generate final reports. This process requires approval at multiple steps to ensure collected data is accurately documented, recorded, and reported.

B2Z's dispatch program, MetaField, manages and tracks samples from the field to laboratory testing to final reporting, maintaining consistency and compliance for each project. MetaField facilitates the Project Manager and Task Leads by backchecking samples and field technician assignments. B2Z also utilizes MetaField to schedule and dispatch the appropriate personnel to each project throughout all parts of the day with minimal notice to maintain the same certified field technician(s) on each project. The technician will communicate with the Construction Superintendent every morning to confirm the scheduled tests for that day.

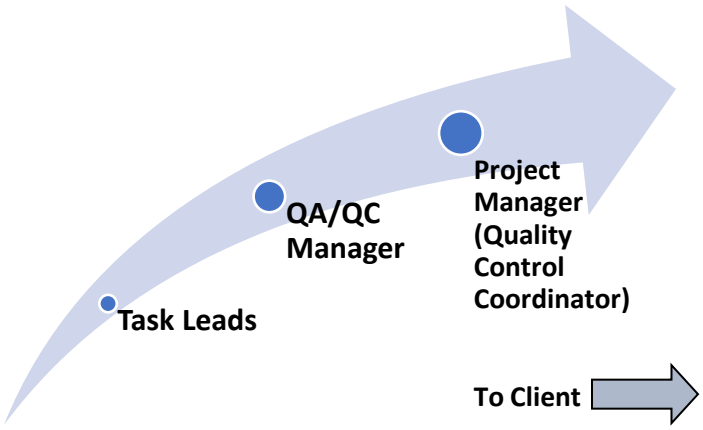
MetaField gives our technicians the capability to input specimen data at project sites before returning to the lab for processing. Once the specimens have been entered, the system tracks when testing needs to be completed based on the assignments. This streamlined process helps ensure projects stay on time and within budget.

Field Inspection and Oversight

Field inspection, oversight, construction material testing (CMT), and an open line of communication with the contractor are pivotal to a successful construction operation. B2Z assigns experienced CMT engineers and technicians skilled in all aspects of construction materials and methods. The B2Z team has experience inspecting **soils, structural concrete placement, structural reinforcing steel, grout and mortar** (in both vertical and horizontal applications), **aggregates** (for concrete batching and pavement mixes), and **hot mix asphaltic concrete** (HMAC) (in roadway and parking lot applications).

Field and Laboratory Testing

Our laboratory team has vast experience and is proficient in all the latest **AASHTO, ACI, and TxDOT testing requirements**. Conducting all testing out of our Mission Lab will further ensure accurate testing results and a quicker turnaround. Performing CMT throughout the construction phases helps



verify that all materials and methods utilized comply with the design engineer's plans and specifications. CMT testing will include the following categories:

- Soil observation, sampling & testing
- Field density testing
- HMAC pavement testing
- Concrete sampling & testing
- Concrete compressive strength
- Shotcrete sampling & testing

Quality Assurance Program

Utilizing quality control and quality assurance is vital to ensure all designs/analyses/final deliverables are of the highest quality and to reduce the presence of outliers in the statistical models of results. B2Z has developed written policies and procedures for various tasks to provide direction to staff and increase the consistency of all processes (modified only through project managers to provide flexibility due to any project variability).

B2Z's Management Plan calls for a three-tiered approach to QA/QC, where the first QA/QC comes from the Task Leads, followed by the QA/QC Oversight Representative, and lastly by the Project Manager. The Laboratory Managers are responsible for direct supervision of QA/QC programs in the field, and the Laboratory Engineer of Record is responsible for performing all supervisory reviews of technical procedures in the engineering laboratory. Ultimately, though, the Project Manager provides oversight of all QA/QC operations. This three-tiered approach provides a triple-check system of all reports, designs, and recommendations prior to submission to the client.

As part of B2Z's commitment to quality, key employees are tasked with overseeing and executing the quality control measures and policy. The project manager and quality control coordinator implement and enforce B2Z's quality measures.

Testing Capabilities

Soil and Base Material Testing

Moisture Content Determination	ASTM D2216 / Tex-103-E
Determination of Liquid Limit of Soils	Tex-104-E
Determination of Plastic Limit of Soils	Tex-105-E
Atterberg Limits of Soils	ASTM D 4318 / Tex-106-E
Bar Linear Shrinkage of Soils	Tex-107-E
Material Finer #200 Sieve	ASTM D 1140 / Tex-111-E
Lime Series Testing	Tex-112-E
Moisture-Density Relationship (TxDOT)	Tex-113-E / Tex-114-E
Standard Proctor	ASTM D 698
Modified Proctor	ASTM D 1557
Field Density Test (Nuclear)	ASTM D 6938 / Tex-115-E
Determination of Soil pH	Tex-128-E
Soil-Lime Testing	Tex-121-E
Resistivity of Soils (Laboratory)	Tex-129-E
Sieve Analysis	ASTM C 136 / Tex-200-F
Texas Wet Ball Mill (Base Material Quality)	Tex-116-E
Soil Organic Content UV-VIS Method	Tex-148-E

Coarse and Fine Aggregate Quality Testing

Decantation Test (Conc. Aggr.)	ASTM C117 / Tex-406-A
Specific Gravity/Absorp. (Conc. Aggr)	ASTM C127 / Tex-403-A
Cycle Magnesium Soundness	ASTM C88 / Tex-411-A
SSD Unit Weight of Aggregates	ASTM C29 / Tex-404-A
Percent Voids/Solids in Concrete Aggregate	Tex-405-A
Sand Equivalent	ASTM D 2419 / Tex-203-F
Specific Gravity / Absorption (Fine Aggr.)	ASTM C 128 / Tex -403-A
Organic Impurities in Fine Aggregate	ASTM C 87 / Tex -408-A
Fineness Modulus of Fine Aggregate	Tex-402-A
Acid Insoluble of Fine Aggregate	Tex-612-J

Concrete and Masonry Field and Laboratory Testing

Slump Test	ASTM C 143 / Tex-415-A
Air Content (Pressure Method)	ASTM C 138 / Tex-416-A
Air Content (Volumetric)	ASTM C 173
Casting of Concrete Cylinders	ASTM C 31
Compressive Strength of Cyl. Specimen	ASTM C 39 / Tex-418-A
Cylindrical Specimen Prep./Hold/Cure	ASTM C 192
Casting of Grout Prisms	ASTM C 1019
Grout Prism Prep./Cure/Compressive Strength	ASTM C 39
Casting of Mortar Cubes	ASTM C 780
Mortar Cube Prep./Cure/Compressive Strength	ASTM C 109
Masonry Unit Prep. /Compressive Strength	ASTM C 140
Masonry Unit SPG/Absorption/Unit Wt.	ASTM C 140

Pavement Investigation / Thickness / Asphalt Quality

Coring – ACP Thickness	ASTM D 3549
Pavement Thickness Determination (Full Depth)	ASTM
Density of Asphaltic Cores (4 or 6 inch)	Tex-207-F
Maximum Theoretical SPG (Rice Gravity)	Tex-227-F
Extraction/Sieve Analysis/Asphalt Content	Tex-210-F / Tex-200-F
Asphalt Rolling Pattern (Nuclear Method)	Tex-207-F – Part IV

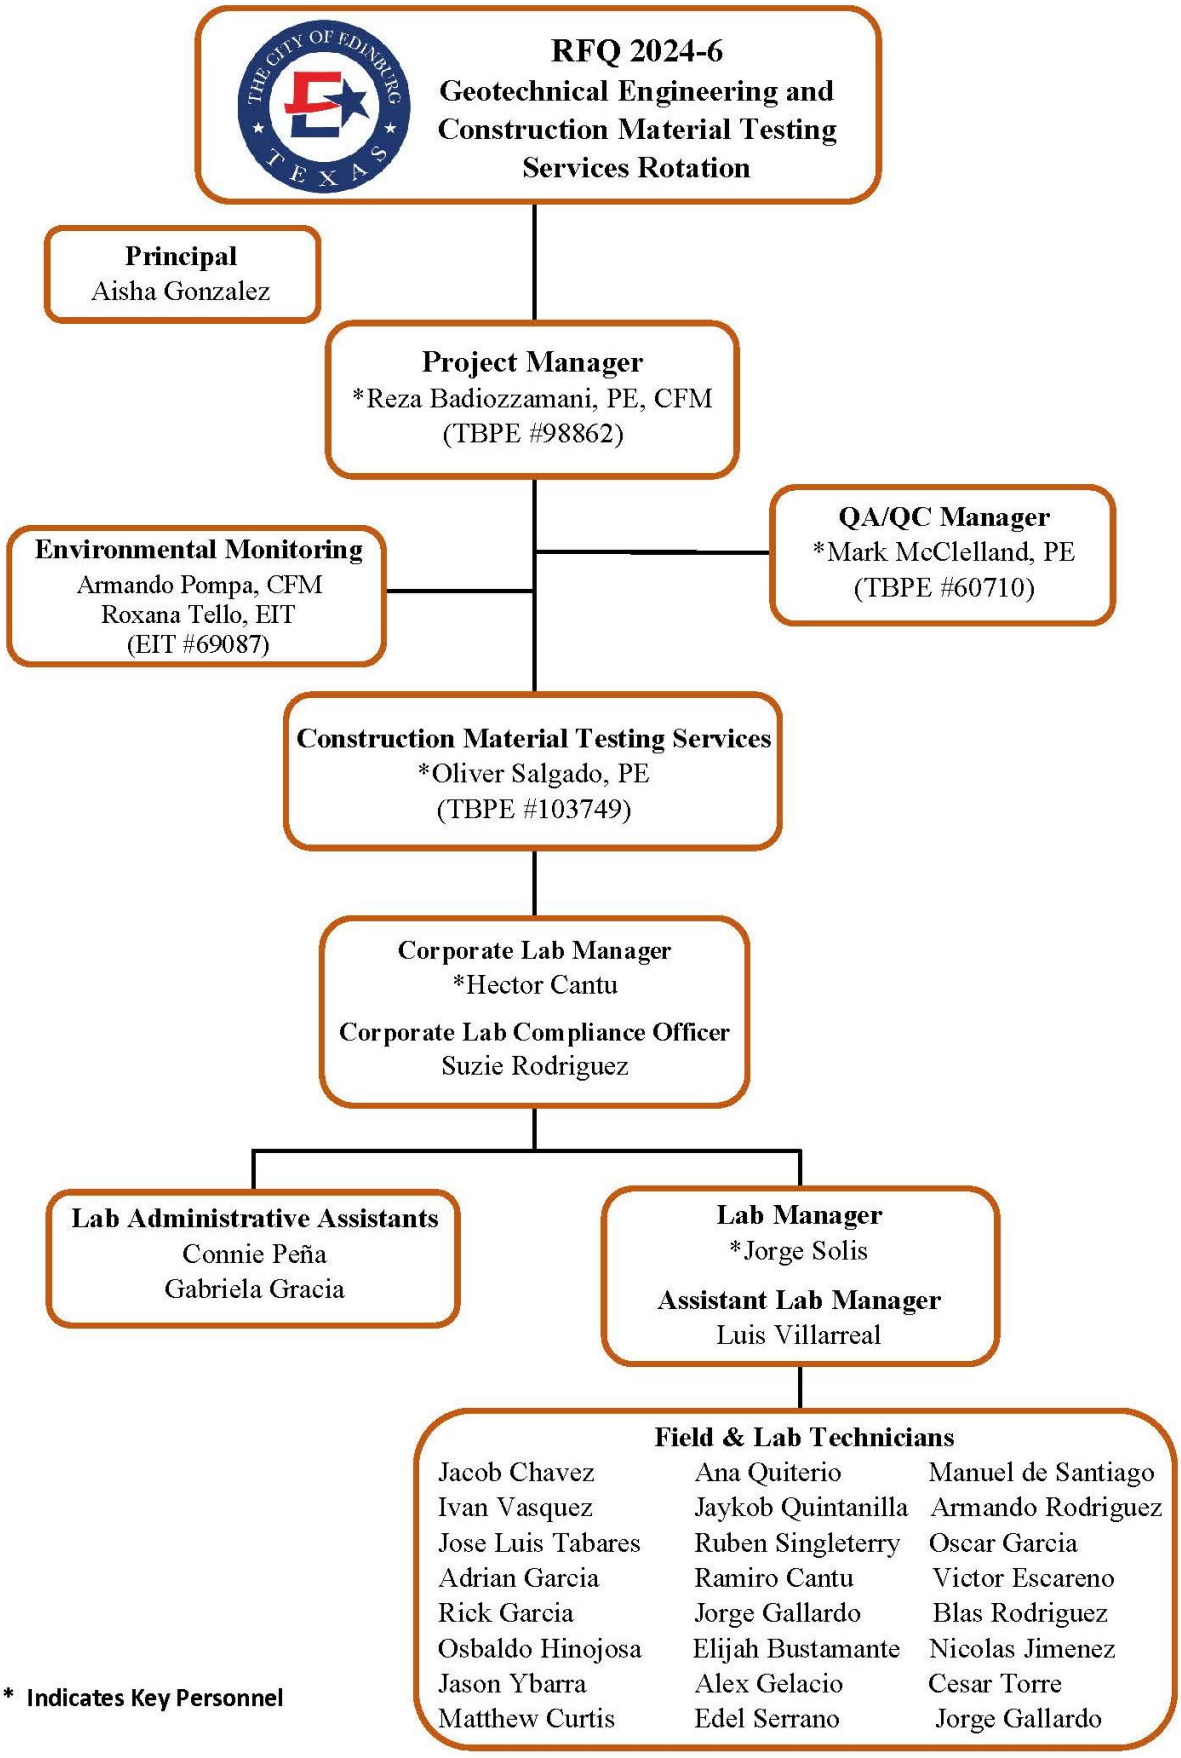
Tab III – Team Member Qualifications and Experience

B2Z Team Members

B2Z and its team members hold themselves to the highest level of both personal and professional integrity and only undertake tasks that they can perform competently and expertly. ***This ethical standard has resulted in B2Z not being party to a lawsuit since its inception in 2009, nor has a claim been made against its errors and omissions insurance policy.***

Furthermore, all B2Z personnel follow the National Society of Professional Engineers' (NSPE) code of ethics six fundamental canons.

NSPE NATIONAL SOCIETY OF PROFESSIONAL ENGINEERS



- Hold paramount the safety, health, and welfare of the public.
- Perform services only in areas of competence.
- Issue public statements only in an objective and truthful manner.
- Act for each employer or client as faithful agents or trustees.
- Avoid deceptive acts.
- Conduct themselves honorably, responsibly, ethically, and lawfully so as to enhance the honor reputation, and usefulness of the profession.

B2Z's key personnel have been identified, as marked, on the organization chart provided on the following page. Within each respective role, the key personnel will perform all duties required and as needed to successfully complete the project on schedule and within budget.

Mr. Reza Badiozzamani, PE, CFM will serve as **B2Z's Project Manager** for this contract. He brings ***over 22 years*** of experience. Mr. Badiozzamani is responsible for all engineering, geotechnical, and construction material testing laboratory projects. ***Mr. Mark McClelland, PE,*** will serve as the **QA/QC Manager** for this contract. He brings ***over 43 years*** of experience in construction material testing and geotechnical engineering services. ***Mr. Oliver Salgado, PE,*** will serve as the **Geotechnical & Construction Materials Testing Section Manager.** He brings ***over 22 years*** of experience in construction material testing and geotechnical engineering services. ***Mr. Hector Cantu*** is **B2Z's Corporate Laboratory Manager**. He brings ***over 42 years*** of experience – with over 26 years working as TxDOT Pharr District's Laboratory Supervisor. ***Mr. Jorge Solis*** is the **Mission Office Laboratory Manager** with ***over 15 years*** of experience.

Resumes with biographic summaries and project experience have been provided on the following pages for all key personnel.

Organizational Chart

Reza Badiozzamani, PE, CFM

Summary

Mr. Badiozzamani functions as B2Z's Senior Project Manager. Mr. Badiozzamani is responsible for all engineering, geotechnical and construction material testing laboratory projects in addition to managing various aspects of the engineering laboratory division. His duties also include overseeing personnel during the development and subsequent completion of the B2Z projects and providing QC/QA for all laboratory testing procedures (verifying laboratory compliance with ASTM, AASHTO, ACI, and TxDOT testing requirements as specified by the project). Mr. Badiozzamani is responsible for the review of all Commercial and Governmental Construction Material Testing Reports produced by B2Z Engineering. Additionally, Mr. Badiozzamani assists the Geotechnical Engineer with the development and analyses of Geotechnical Studies and Recommendations for various clients. Mr. Badiozzamani has a wealth of hands-on experience in Soil Classification, Soil Testing, Soil Specialty Testing (Vane-Shear, Unconfined Compression, One-Dimensional Consolidation), and Concrete Field and Laboratory Testing.

Title
Project Manager

5.5.1	12.4.1	14.5.1
8.1.1	12.5.1	

Relevant Project Experience

Various Projects | Client: City of McAllen

Various On-Call CMT Contracts - Tests performed on these projects included Moisture-Density Determination, Atterberg Limits, Sieve Analysis, Fresh Concrete Testing, and Compressive Strength Testing of Hardened Specimens. Performed construction observation and testing services on residential and commercial developments. Field experience included observations and testing of controlled fill, stormwater management facilities, subgrade stabilization, asphalt placement, concrete, pavement, retaining walls, roadway, and shallow building foundation construction. Ensure quality control and quality assurance were in accordance with local and project requirements.

On-Call CMT Contract | Client: Hidalgo County Drainage District

Various Projects throughout the Rio Grande Valley - Coordination with Laboratory Field Technicians and Inspectors to ensure that all materials testing functions are being performed in accordance with industry standards and contract documents. B2Z is performing embankment and backfill testing. Additional testing includes subgrade, 12" flexbase, asphalt concrete pavement, hydraulic cement concrete testing on wingwalls (Class C), and riprap/curb/sidewalk (Class A).

On-Call Geotechnical & CMT Contract | Client: South Texas College

B2Z was contracted to provide Geotechnical and CMT services for various campus-wide projects. He manages the construction materials testing and coordinates with the laboratory field technicians and inspectors to ensure that all materials testing functions are performed in accordance with industry standards and contract documents.

Mile 3 N Road Project | Client: Hidalgo County Precinct 3

General management of Construction Materials Testing. Coordination with Laboratory Field Technicians and Inspectors to ensure that all materials testing functions are being performed in accordance with industry standards and contract documents. Review of all test reports pertaining to these projects. Tests performed on soils and base materials on these projects include Moisture-Density Determination, Atterberg Limits, Sieve Analysis, Fresh Concrete Testing and Compressive Strength Testing of Hardened Specimens, Asphalt Content, Sieve Analysis, Specific Gravity and Thickness of Asphaltic Pavements.

TxDOT Pre-Certifications

5.2.1	14.2.1
5.3.1	14.3.1
10.5.1	14.4.1
14.1.1	14.5.1

Summary

Mr. McClelland has 43 years of experience (29 years directly with TxDOT) in all aspects of Geotechnical Engineering. Most of his career was spent working in, and ultimately managing, the TxDOT Bridge Division Geotechnical Branch. He oversaw the update of the Geotechnical Manual, wrote all foundation and retaining wall Standard Specifications for the 2004 Spec Book, and oversaw the development of all current foundation and retaining wall design processes currently in use by TxDOT. He developed and oversaw the TxDOT Scour Management Program, and the program to manage structures on unknown foundations.

Relevant Experience

Structural Foundation Design

Oversaw foundation design for structures and personally designed foundations for 1000+ bridges ranging from simple off-system structures to complex, major bridge structures. Foundation types designed include drilled shafts, auger-cast piling, prestressed concrete piling, steel H-piling, steel pipe piling, steel and prestressed concrete sheet piling, and spread footings.

Slope and Retaining Wall Stability and Settlement

Oversaw evaluations for global stability and settlement of embankments, earth slopes, and retaining walls, and has analyzed 100+ slope and retaining wall projects. He is highly proficient and experienced in the external stability and global stability of slopes and wall systems and has used programs such as GSTABL to provide detailed models and analyses.

Geotechnical Exploration and Testing

Oversaw policies and methodologies for geotechnical exploration within TxDOT and developed 100+ soil exploration plans. This included determination of soil boring number, location and depth, appropriate in-situ, and laboratory testing, need for and installation of monitoring wells, inclinometers, and other field instrumentation, and final analysis and reporting of results.

Construction Support

Acted as primary construction and maintenance support within TxDOT for issues involving bridge foundations, retaining walls, slope and wall instabilities, river migration, and scour. Work included immediate resolution of time-sensitive construction problems, evaluation and remediation of ongoing maintenance issues, and training of TxDOT and contractor construction personnel.

Relevant Project Experience

Raymondville Drain – Hidalgo and Willacy County Main Outfall Project

This project consists of Geotechnical Exploration, Laboratory Testing and Value Engineering Recommendations for the placement of a new location Main County Outfall System in Hidalgo County and connection to & expansion of an existing Delta Region drain system in Willacy County approximately 60 Miles in length with the purpose of getting water from Hidalgo County to the Laguna Madre. The project includes: 20 Miles of New Location Outfall, 40 Miles of Existing Location Expansion to Outfall, 60 Bridge Crossings (including major crossings of US 281, US 77, SH 100 and Railroad), 1 Major Control Structure at North Main Drain (Interim Phase I Conditions), Potential Lake Detention Pond at La Sal Vieja Lake, Alternative for Diversion to Main Floodwater Channel in Willacy County. Geotechnical information has been primarily collected along all outfall stretches and various analyses were completed to verify adequacy of side slopes for proposed channel section (Slope Stability). Additionally, Foundation Design Analyses & Curves have been primarily generated for all crossings including investigation of Scourability based on D50-D90 parameters at the structure locations. This job is being let out in phases and as such is still currently underway.

- Geotechnical Testing
- Geotechnical Engineering
- Toll Plaza Design
- Bridge Design
- Foundation Design
- Pavement Design

TxDOT Pre-Certifications

3.2.1	8.1.1	14.2.1
4.2.1	10.1.1	14.3.1
5.2.1	10.2.1	14.5.1
5.3.1	12.1.3	
5.5.1	14.1.1	

Summary

Mr. Salgado has over 22 years of progressive experience in managing a wide range of diverse civil engineering projects. He is responsible for managing our laboratory division including all engineering, geotechnical and material testing projects. Mr. Salgado provides all QC/QA for testing procedures to ensure compliance with ASTM, A2LA, AASHTO, ACI, USACE and TxDOT. He has successfully delivered several multi-disciplinary and multi-office projects demonstrating his ability to increase and sustain efficiency in large scale projects, particularly within accelerated schedule environments.

Relevant Project Experience

Dicker Road Project / Hidalgo County, TX
Role: Materials Testing Manager
$16.5M Construction Cost. This reconstruction project consists of expanding the existing 2 twelve-foot lane rural roadway with shoulders and ditch drainage to a sixty-six-foot-wide divided urban roadway that will accommodate 4-lanes of traffic (two fourteen-foot shared travel lanes, two twelve-foot travel lanes, and one fourteen-foot left turn lane). The Project is funded through the Hidalgo County MPO (TxDOT Category 7 funds) and is being constructed in accordance with County's general specs, TxDOT's standards, and is subject to State oversight to qualify for allotted federal reimbursements. B2Z was contracted to provide inspection, material testing and construction management services.

Harvey Camp Area Improvements / Harris County, TX
Role: Materials Testing Manager
$500K Construction Cost. Full depth repairs of Concrete Pavements, Curbs, Driveways and Sidewalks in various locations throughout the Harvey Camp Area. Construction material testing includes Sampling of freshly mixed concrete, making and curing concrete test specimens in the field, Slump of hydraulic cement concrete, Air Content of concrete by pressure method, and Compressive Strength of cylindrical concrete specimens. Preparation of cement stabilized sand samples for test, Moisture-Density relations of sand-cement mixtures, Moisture-Density relations for laboratory compaction characteristics of cement stabilized sand using standard efforts, Compressive Strength of Molded Cement-Sand cylinders and In-Place density and moisture content of soil and soil-aggregate by Nuclear Method (Shallow Depth).

TxDOT On-System & Off-System Bridge Replacements / Statewide
Role: Senior Project Manager
Providing engineering services generally described as preparation of plans, specifications, and estimates (PS&E) and related documents, for a new overpass along FM 116 at SH 9, a bridge replacement at SH 6 over Lake Waco, a bridge replacement at SH 174 over Lake Whitney in Hill County and two on-system bridge replacements on SH 31. The services being provided include, but are not limited to, preparing roadway and bridge design, hydrologic and hydraulic design, traffic signal design, survey, geotechnical data collection, environmental documentation necessary to support the design process, and construction phase services.

Additional Project Information Available Upon Request

Hector Cantu

Title
Corporate Lab Manager

Years of Experience
42 (26 w/TxDOT)

Years with Firm
6

Certifications/ Training
- AASHTO Accreditation ATG No. 19-3730
- Certificate 103 – Radiation Safety Officer Portable Density/ Moisture Gauge
- USCE Construction Quality Management Certificate for Contractors – No. 784
- TxDOT Environmental Process for Local Governments ENV429
- Hazmat Certification
- OSHA General Industry Safety & Health Certified
- OSHA Construction Safety & Health Certified

Areas of Expertise
- Materials Engineering (Aggregate, Concrete & Asphalt)
- Soils & Subgrades
- Materials Testing
- Construction Inspection
- Highway Plan Review
- Knowledge of Federal and State Hwy Requirements

Summary

Mr. Cantu has over 42 years of experience in the field of Engineering. With over 26 years of TxDOT experience, Mr. Cantu brings a wealth of knowledge in material testing and has supervised the daily operations of laboratories which include staff training, development and performance reviews, utilization of equipment/ facilities, safety oversight, and quality of services/ work products. Mr. Cantu has served in supervisory roles and has monitored construction asphalt and concrete material testing as well as advanced geotechnical testing to support government and private sector work. Mr. Cantu supports engineers in functional areas of geotechnical design services, materials consulting, structure and roadway construction inspection, materials sampling, inspection, and testing. Mr. Cantu is well-versed in monitoring construction costs, writing and/ or supervising the preparation of proposals, reports, and correspondence, and communicating with contractors, supervisors, subordinates, local officials, and the public.

TxDOT Pre-Certifications: 11.3.1 – Construction Superintendent | 11.4.1 – Environmental Inspections 12.1.4 – Asphaltic Concrete Placement | 12.1.5 – Portland Cement Concrete Placement | 12.1.6 – Embankment/Subgrade/Backfill/Base Production | 12.1.7 – Embankment/Subgrade/Backfill/Base Placement | 18.3.1 – Utility Adjustment Coordination | 18.6.1 – Utility Management & Coordination Oversight

Relevant Project & Area Experience

Various Subdivision Projects | Cities of McAllen, Edinburg, Alamo, and Weslaco

General Management of Construction Materials Testing. Coordination with Mission Laboratory Manager, Field Manager and Field Technicians to ensure that all materials testing functions are being performed in accordance with industry standards and contract documents. Reviewed all test reports pertaining to these projects. Tests performed on these projects included: Moisture-Density Determination, Atterberg Limits, Sieve Analysis, Fresh Concrete Testing and Compressive Strength Testing of Hardened Specimens. Performed construction observation and testing services on residential and commercial developments. Field experience included observations and testing of controlled fill, stormwater management facilities, subgrade stabilization, asphalt placement, concrete, pavement, retaining walls, roadway, and shallow building foundation construction. Ensured quality control and quality assurance was in accordance with local and project requirements.

Jorge Solis

Summary

Mr. Solis has over 15 years of experience in the field of Engineering. Mr. Solis gained experience starting and finishing the Federal Retaining Wall Project Segment 6-A and performing concrete tests such as slump, air content, temperature, casting compressive strength cylinders and testing. For two years Mr. Solis concentrated in the asphalt field where he performed most of the quality control testing. Mr. Solis has monitored construction asphalt and concrete material testing as well as advanced geotechnical testing to support government and private sector work. Mr. Solis supports engineers in functional areas of geotechnical design services, materials consulting, structure and roadway construction inspection, materials sampling, inspection, and testing.

RE: RFQ No. 2024-6
Geotechnical Engineering and Construction Materials Testing Services Rotation
Professional Services Agreement

Dear Mr. Hinojosa,

B2Z Engineering, LLC (B2Z) has thoroughly reviewed the Professional Services Agreement provided by the City of Edinburg. We are pleased to confirm that our certificate of insurance, as provided within Tab V of the statement of qualification submission, fully meets the prerequisite insurance requirements. We are committed to maintaining this compliance throughout the project. Furthermore, if selected, B2Z agrees to enter into such an agreement.

Sincerely,

Aisha Gonzalez
President

Appendix

CONFLICT OF INTEREST DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☑ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

COMPANY PROVIDING PROPOSAL GENERAL QUESTIONNAIRE

1 Name/Name of Agency/Company: B2Z Engineering, LLC
(Full, correct legal name)

- Address: 900 S. Stewart Road, Suite 2
  Mission, TX 78572
- Telephone/Fax: T: (956) 585-3773 | F: N/A
- Email address: Aisha@B2ZEng.com

2. Does your Company anticipate any mergers, transfer of organization ownership, management reorganization, or departure of key personnel within the next twelve (12) months that may affect the organization's ability to carry out its submittal?

3. Yes____ No X

3. Is your Company authorized and/or licensed to do business in Texas?
Yes X No____

4. Where is the Company's corporate headquarters located? 900 S. Stewart Road, Suite 12 Mission, TX 78572

5. a. Does the Company have an office located in Edinburg, Texas?

4. Yes____ No X

b. If the answer to the previous question is "yes", how long has the Company conducted business from its Edinburg office? N/A

_____ (years) _____ (months)

c. State the number of full-time employees at the Edinburg office. N/A

6. Has the Company or any of its principals been debarred or suspended from contracting with any public entity?
Yes____ No X

If yes, identify the public entity and the name and current phone number of a representative of the public entity familiar with the debarment or suspension, and state the reason for or circumstances surrounding the debarment or suspension, including but not limited to the period of time for such debarment or suspension. _____

N/A

7. Indicate person whom The CITY may contact concerning your submittal.

Name: Reza Badiozzamani, PE, CFM
Address: 900 S. Stewart Road, Suite 2, Mission, TX 78572
Telephone: (956) 585-3773
Fax: N/A
Email: Reza@B2ZEng.com

8. Surety Information

Have you or the Company ever had a bond or surety instrument "called," canceled, or forfeited?
Yes ( ) No (X)
If yes, state the name of the bonding company, date, amount of bond and reason for such bond being "called," or its cancellation or forfeiture. N/A

9. Bankruptcy Information

Have you or the Company ever been declared bankrupt or filed for protection from creditors under state or federal proceedings? Yes ( ) No (X)
If yes, state the date, court, jurisdiction, cause number, amount of liabilities and amount of assets. N/A

10. Provide any other names under which your business has operated within the last 10 years.

N/A

LITIGATION DISCLOSURE FORM

Failure to fully and truthfully disclose the information required by this Litigation Disclosure form may result in the disqualification of your submittal from consideration or termination of the contract, once awarded.

1. Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?

   Circle One YES (NO)

   1 Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?

   Circle One YES (NO)

3. Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?

   Circle One YES (NO)

If you have answered "Yes" to any of the above questions, please indicate the name(s) of the person(s), the nature, and the status and/or outcome of the information, indictment, conviction, termination, claim or litigation, as applicable. Any such information should be provided on a separate page, attached to this form and submitted with your submittal.

HOUSE BILL 89 VERIFICATION

I, Aisha Gonzalez, the undersigned representative of B2Z Engineering, LLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2270:**

1. Does not boycott Israel currently; and

2. Will not boycott Israel during the term of the contract.

3) Is not currently listed on the State of Texas Comptroller's Companies that Boycott Israel List located at https://comptroller.texas.gov/purchasing/publications/divestment.php

Pursuant to Section 2270.001, Texas Government Code:

1. "Boycott Israel" means refusing to deal with, terminating business activities with, or otherwise taking any action that is intended to penalize, inflict economic harm on, or limit commercial relations specifically with Israel, or with a person or entity doing business in Israel or in an Israeli-controlled territory, but does not include an action made for ordinary business purposes; and

2. "Company" means a for-profit sole proprietorship, organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or any limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company or affiliate of those entities or business associations that exist to make a profit.

SENATE BILL 13 VERIFICATION

I, Aisha Gonzalez, the undersigned representative of B2Z Engineering, LLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Chapter 809, Government Code 2274:**

1) **does not boycott energy companies and;**

2) **will not boycott energy companies during the term of the contract.**

Pursuant to Section 2274.001, Texas Government Code:

1. "Boycott energy company" has the meaning assigned by Section 809.001; and

2. "Company" has the meaning assigned by Section 809.001, except that the term does not include a sole proprietorship.

SENATE BILL 19 VERIFICATION

I, Aisha Gonzalez, the undersigned representative of B2Z Engineering, LLC, (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

CONFLICT OF INTEREST QUESTIONNAIRE

FORM CIQ

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

1 **Name of vendor who has a business relationship with local governmental entity.**

B2Z Engineering, LLC

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.** (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information is being disclosed.**

N/A

Name of Officer

4 **Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.**

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

5 **Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.**

6 ☐ Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

Firm No. F-4105

Submitted to City of Edinburg on:
Opening Date: July 16, 2024
Opening Time: 3:00pm.

Firm Qualification & Experience

Company Description

L&G Consulting Engineers, Inc. (L&G) is a diverse, multi-discipline engineering company with experience in a wide variety of fields including transportation planning, highway/civil, structural/bridge, geotechnical engineering, construction management, construction materials testing, environmental document preparation & permitting, GIS services, and ROW acquisition. L&G has been in existence for over twenty (20) years and has two (2) offices situated in Hidalgo County, Texas (located in the City of Mercedes and City of Mission). L&G has contracted projects with a variety of public entities including local cities, counties, RMA's, and the Texas Department of Transportation (TxDOT). L&G is registered with the Texas Board of Professional Engineers (TBPE Firm No. F-4105) and is HUB certified. L&G's entirely local production staff consists of ten (10) multi-disciplined Professional Engineers, nine (9) Engineers in Training (EIT)/Graduate Engineers, two (2) Environmental Specialists, eight (8) Right-of-Way Acquisition Service Providers, two (2) Utility Coordination Specialists, two (2) GIS Analysts, and eleven (11) Engineering Support Technicians, two (2) Geotechnical & CMT Laboratory Managers and five (5) Geotechnical & CMT Support Technicians. Additional administrative support staff consists of one (1) contract manager and four (4) administrative assistants. L&G's managerial staff is pre-certified by TxDOT in a multitude of categories and has completed numerous transportation infrastructure projects similar in scope to this project (L&G brings over **225 years** of development, design and construction personnel experience on TxDOT projects). In addition, L&G prides itself on having in-house dedicated discrete branches for needed project assistance including a ROW Acquisition Division, Utility Investigation & Relocation Specialty Division, Environmental Assessment Division and Geotechnical & CMT Division.

L&G Engineering Laboratory (L&G Lab) is a Construction Materials Testing (CMT) Laboratory and Geotechnical Engineering branch of L&G (L&G Lab). L&G Lab has a wealth of experience in providing CMT and Geotechnical Engineering services for projects of various scopes including but not limited to Transportation Projects (Highways and Bridges), Municipal Projects (Solid Waste Facilities, Water and Wastewater Treatment Plants, Storage Tanks), Structural Projects (School Building Facilities, Retaining Walls, Commercial Buildings), and Geotechnical Projects (Levee Rehabilitation and Reconstruction, Foundation Design, Pavement Design). L&G Lab provides a fleet of three (3) fully functional drilling rigs and support trucks in-house to provide our Clients with a total package Geotechnical Consultant.

The L&G Team has the abilities and qualifications to provide the **City of Edinburg** with the following services:

Geotechnical Services

Geotechnical engineering is one of the most important aspects of project design as it forms the foundation of how a project will be built and provides an understanding of how a project will function under anticipated loadings in the present and future. The L&G Team has an extensive amount of geotechnical experience and provides its Clients with an array of services in the realm of geotechnical engineering.

The Scope of Services for projects similar in scope to the one denoted in the RFQ are typically broken into three (3) major functions of work with respect to Geotechnical Services:

I. **Geotechnical Drilling and Field Testing Services**
II. **Geotechnical Laboratory Testing Services**
III. **Geotechnical Engineering Services**

Geotechnical Drilling and Field Testing Services will include preliminary coordination with the Client to determine probable locations of structures and depths of importance. Location of borings and final depths and testing schemes can then be finalized, mapped and staked in the field (this will typically be a hand in hand operation between the Geotechnical Firm and the Engineer or Project Manager). Once staked utility locates are always performed (called in to Texas One-Call) for clearing of the site prior to any drilling taking place.

The L&G Team performs geotechnical drilling and field testing services under the direction of licensed professional engineers and well versed and experienced laboratory managers. The L&G Team personally owns and operates three (3) Drilling Rigs (two (2) Simco HT 2800 Drilling Rigs and one (1) Deidrich D-90 Drilling Rig) which all have been custom fabricated to perform both TxDOT Cone Penetrometer Testing (TCP) in accordance with Tex-132-E and ASTM Standard Penetration Testing (SPT) in accordance with ASTM D1586. In addition, where moist cohesive soils are present, L&G can perform Thin Walled Tube (Shelby Tube) Sampling in accordance with ASTM D1587 (typically pocket penetrometer readings are also retrieved on these sample types). Our drilling rigs are capable of performing various drilling techniques including solid stem, hollow stem, wet/mud rotary drilling and core drilling. It should be noted, all rigs are equipped with automatic hammers for safe and accurate TCP and SPT soil strength field testing. Typical field operations include removing samples from various sample apparatuses and visually classifying the samples for recording on field boring logs. Samples are then appropriately packaged and/or sealed to minimize loss of moisture and transported to our soil laboratory. Water level readings are taken during drilling, directly after conclusion of drilling and after 24 hours prior to backfilling of borings.

Geotechnical Laboratory Testing Services typically include general soil testing on the samples recovered during the field operations to evaluate the physical and engineering properties of the sub-strata and to verify field classification. Testing may include several of the following (but not limited to):

- Atterberg Limits (ASTM D4318 or Tex-104-E, 105-E, 106-E)
  This procedure will be used to aid in the classifying of the soil and to provide information on the potential vertical rise and contraction of the soil. Test data furnished will include Liquid Limit, Plasticity Index, and Linear Shrinkage test results.
- Gradation (-200) (ASTM D1140 or Tex-111-E)
  This procedure will be used to aid in the classifying of the soil. A No. 200 sieve will be used to distinguish fine grained material as well as for cohesive soils.
- Lab. Determination of Moisture in Soils (ASTM D2216 or Tex-103-E)
  This procedure will aid in determining the in-situ moisture of the soil to be able to evaluate the potential vertical rise and contraction of the soil.
- Particle Size (Sieve) Analysis with Hydrometer (ASTM D422)
  This procedure will aid in determining the complete gradation (full gradation curve) of a soil sample including hydrometer for tail-end portion of gradation curve.
- Unconfined Compression (ASTM D2166)
  This procedure determines the direct unconfined compressive strength of a soil of which can be correlated to shear strength of a soil sample (comparison with strength testing).
- Consolidation Testing (ASTM D2435)
  This procedure is utilized to predict the magnitude and potential rate of consolidation of soil in laboratory mimicked field conditions (laterally restrained and axially drained) while subjected to controlled stress loading increments.
- pH Testing of Soil (Tex-128-E)
  This procedure will provide the pH of a soil for determination of acidic or basic nature of soil environment.
- Sulfate Content of Soil (ASTM C1580 or Tex-145-E)
  This procedure will identify the soluble sulfate content of soil by using the colorimetric method. High presence of sulfates in soils can mark a necessity for the use of Sulfate Resistant Concrete (Type II Cement). In addition, high sulfate concentrations in pavement subgrade investigations can discount the effects of lime stabilization.
- Lime Series Testing (Tex-121-E)
  This procedure establishes a relationship with the percentage of lime added to a sample and the pH of the sample to determine adequate soil stabilization requirements for pavement subgrades.
- Triaxial Testing (Salvage Base) (Tex-121-E)
  This procedure determines the shearing resistance, water absorption, and expansion of soils and/ or soil-aggregate mixtures. Shearing resistance values will be used to determine the salvage base criteria for the existing material.
- Gradation/Asphalt Content of ACP (Tex-200-F/Tex-236-F)
  This test method is used to determine the particle size distribution of aggregate samples using standard U.S. sieves with square openings (Tex-200-F). The asphalt content will also be provided by Ignition Method (Tex-236-F).

Geotechnical Engineering Services typically include utilizing all information gathered from the field testing and laboratory testing to finalize soil classification and stratification as well as strength and engineering properties of the sub-strata. This information is compiled into boring logs and/or test summary sheets which are then incorporated into a geotechnical report. Geotechnical reports are prepared by one of our Geotechnical Engineers and include boring location plan, boring logs with laboratory classification (United Soil Classification System - ASTM D2487), subsurface water conditions, general site description, geology and geography, shallow foundation analyses (shallow – spread footings, slabs on grade, mat foundations, culvert foundations), deep foundation analyses (deep – piling and drilled shafts), foundation recommendations and construction recommendations (site fill, select fill, site drainage, etc.). For transportation facilities, the analyses will be expanded to also include global stability analysis for retaining walls, slope stability analysis for embankments and outfall channels, allowable bearing capacity and settlement at proposed embankments, and analysis of pavement subgrade materials (in-situ subgrade) and stabilization. The report will provide general comments and applicable recommendations regarding construction methods, sequences, and potential difficulties that may arise during overall construction as it relates to the soil aspects of the project. The information has the intent to provide guidance for foundation selection and design and assistance in the preparation of design plans, contract documents and specifications for the project.

Construction Materials Testing Services

Construction Material Testing (CMT) and Inspection are vital pieces of the construction process for all projects. Proper selection, usage and workmanship of construction materials are important staples to ensure stability and performance of structures in the long term. L&G provides CMT services in the three main facets as noted here:

- On-Site Project Inspection/Monitoring
- Field and Laboratory Testing and Analysis
  - Soil and Base Material Testing
  - Concrete Testing
  - HMAC Testing
  - Aggregate Testing (for Concrete and HMAC)
  - Roadway Material Production & Inspection Testing
- Quality Control and Quality Assurance (QC/QA)

On-Site Project Inspection/Monitoring

A daily presence at the jobsite and constant communication with the Contractor as well as adequate amounts of construction materials testing are key elements to a successful construction operation. L&G provides this presence by way of experienced and certified construction materials engineers and technicians trained in various aspects of construction. The L&G Team employees have been involved in various inspection roles including inspection of soils for embankments, reinforcing steel for slabs and masonry walls, concrete, grout and mortar for structures, hot-mix asphalt pavement field conditions and rolling patterns for roads and parking areas, aggregates for pavement mixes and concrete batching, etc. Inspection is the first line in avoiding construction materials problems in the future and has the capability and knowledge necessary to properly provide these services.

Field and Laboratory Testing and Analysis

The backbone of CMT is the field and laboratory testing and analysis program. The main goal of the various CMT performed during the construction process is to ensure construction materials utilized are in compliance with project specific plans and specifications. L&G prides itself in being able to provide its Clients with prompt and accurate Construction Materials Testing Services. CMT testing at L&G can be further broken down into the following categories:

Soil and Base Material Testing

CMT is performed to accurately define soil properties and identify any nonconformance to project specifications. Precise definition of soil classification, compaction characteristics and other properties allow for early detection of issues and avoidance of future problems. The most common soils field test is the Field Density (compaction) test. Representative samples of the materials being used on the project are taken to the laboratory and the Maximum Dry Density and Optimum Moisture Content are determined for the respective material (Standard/Modified Proctor – Moisture-Density Relationship). The laboratory test data is utilized to determine the percentage of Field Compaction vs. Maximum Dry Density determined in the laboratory. Required densities vary by material type and purpose, and L&G Lab personnel are well qualified to review contract plans to determine the correct project requirements. During this phase of testing, the thickness of the Subgrade, Stabilized Subgrade and or Base Material is verified to ensure that plan requirements are being met. Samples of the Base Material being furnished to the project are also taken to the Laboratory and tested to ensure compliance with Gradation, Plasticity Index and Durability requirements.

Ready-Mixed Concrete, Grout and Mortar Testing and Masonry Testing

The placement of Ready-Mixed Concrete, Grout and Mortar are also monitored during the testing and inspection process. Since these are generally cornerstones of today's construction practices, they are incredibly important in terms of strength monitoring through CMT. Compressive strength specimens (Concrete cylinders, mortar and grout cubes/prisms) are cast from representative samples obtained at the project sites and are tested at specified periods of time, generally 7 and 28 days of maturity after casting, to determine compliance with project strength requirements. In addition, concrete being furnished for the project should meet various field testing requirements to ensure workability during placement and long-term durability (Slump, Entrained Air Percentage, and Temperature). Structural masonry units (block and brick units) can also be tested for compressive strength in accordance with the project needs.

Hot-Mix Asphalt Pavement Testing

The placement of Hot Mix Asphalt is also monitored during placement operations. The engineering technician ensures that a proper mat thickness is being laid and the material yield is monitored. This monitoring of yield allows construction management personnel to compare in-place quantities to the estimated contract quantities. The engineering technician also ensures that the Hot Mix Asphalt is delivered to the project at the proper temperature in order to provide the Contractor with the maximum opportunity to compact the Hot Mix Asphalt to the desired Density (Compaction and Air Void Content) as called for in the plans and specifications. Rolling Patterns are also established during the engineering technician's inspection. This pattern will dictate the number of passes a roller operator must compact the Asphalt in order to achieve the desired compaction without under-compacting or over-compacting the surface, which would result in a shortened pavement life.

Aggregate Testing

Aggregate testing is essential to providing proper concrete and hot-mix asphalt designs for long term performance. The quality of aggregates is determined and monitored by performing laboratory testing including gradation analysis, decantation, specific gravity/absorption, soundness, abrasion, organic impurities, deleterious substances and acid solubility.

Roadway Material Production and Construction Inspection Testing

The L&G Team offers Roadway Material Production and Construction Inspection testing services. We have provided the Counties of Cameron, Starr, and Hidalgo with Roadway Material Production and Construction Inspection Testing and Services on Texas Department of Transportation funded Colonia Roadway and Drainage improvement projects. In addition to the listed Counties, we have also provided the Cities of Mission, Hidalgo, Donna, San Benito, Weslaco, Harlingen and others with similar services.

Quality Control and Quality Assurance (QC/QA)

Utilizing quality control and quality assurance in the field of CMT is a must to ensure all testing is of the highest quality and to reduce the presence of outliers in the statistical models of testing results. The L&G Team has developed standard operating procedures for various tasks to provide direction to staff and increase consistency of field and laboratory testing (modified only through project managers to provide flexibility due to any project variability). The Laboratory Managers are responsible for direct supervision of QC/QA programs in the field and the Laboratory Engineer of Record is responsible for performing all supervisory review of technical procedures in the engineering laboratory. Ultimately, though, the Project Manager provides oversight of all QC/QA operations. This three tiered approach provides a triple check system of all reports, design and recommendations prior to submittal to client.

As part of the L&G Team's commitment to Quality there are key employees that are tasked with the oversight and execution of quality control measures & policy. L&G Lab's Quality Control Director, David Saenz, P.E. (Laboratory Engineer of Record) is responsible for the general oversight of quality control system as it relates to Construction Materials Testing. L&G Lab's quality measures are implemented and enforced by the Quality Control Coordinator, Ricardo Gallaga, P.E., General Manager. Mr. Gallaga, with the help of the assistant coordinators ensures that all procedures and calibrations are performed in accordance with applicable standards and procedures as prescribed by the equipment manufacturer.

Our client list includes the Counties of Hidalgo, Cameron, and Starr; the Cities of Harlingen, Hidalgo, Mission, Mercedes, Weslaco, Donna, San Benito, TxDOT Pharr and San Antonio Districts, AGUA SUD, Brownsville PUB, Hidalgo County RMA, Cameron County RMA (with HNTB), Hidalgo County Drainage District #1 (HCDD#1) and La Joya Independent School District. L&G Lab has not defaulted or failed to meet the requirements of prior or existing Construction Material Testing and Geotechnical contracts. As a result, L&G Engineering Laboratory has no pending litigation against or involving its agents or employees with respect to any work we have performed. We pride ourselves in being the Lab of Record for all work for the Cities of Mission, Hidalgo, Harlingen, and the Texas Department of Transportation.

L&G possess the equipment and personnel to be able to quickly address any needs the **City of Edinburg** may have in conjunction with this and any other project. Our experienced and proficient organization is ready and willing to provide high quality services and products. An Organizational chart is provided within Appendix A of this solicitation.

Resource Utilization Plan

Labor Resources

The L&G Team has adequate staffing and a qualified and experienced team of professionals dedicated to getting a project done under any circumstances. In the event of unforeseen circumstances, all professional team members (as noted in the Organizational Chart) are interchangeable if required to support any position (i.e. Assistant Project Managers can perform duties of Project Manager and General Lab Manager). All of our technical staff are also interchangeable and have back-up personnel to take over in the event of sickness, attrition or increased firm workload (most technicians are certified in various project aspects). All major team members, as denoted on the Organizational Chart, have pledged to make ourselves as available as necessary to ensure the **City of Edinburg** has an exceptional final product. It is important to note that through our time working for TxDOT we have never required additional sampling or testing (not scoped in the forefront) to complete a project (no issues with errors or omissions).

L&G works in several different geotechnical/construction material testing categories. L&G technicians, laboratory managers and engineers are experienced and/or certified in various aspects of Construction Material Testing. Current L&G Certifications include:

- American Technical Institute
  - Radiation Safety Hazardous Materials Training – Portable Nuclear Gauge
- American Concrete Institute (ACI)
  - Concrete Testing Field Technician Grade I
  - Aggregate Testing Technician Level I
  - Concrete Strength Testing Technician
  - Concrete Laboratory Testing Technician Level I
- Texas Hot Mix Asphalt Pavement Association (TAPA)
  - Hot Mix Asphalt Plant Production Specialist Level IA
  - Hot Mix Asphalt Roadway & Mix Design Specialist Level IB
  - Soils & Flexible Bases Properties/Analysis Specialist – SB101, SB102, SB103
  - Soils & Flexible Bases Strength Specialist – SB201, SB202
- Texas Department of Transportation Pre-Certified (TxDOT)
  - As Noted In The Following Table:

1.5.1	Feasibility Studies
1.8.1	Public Involvement
2.1.1	Traffic Noise Analysis
2.2.1	Air Quality Analysis
2.3.1	Wetland Delineation
2.4.1	Nationwide Permit
2.4.2	Clean Water Act Sec. 404 Permits
2.4.3	U.S. Coast G. & U.S. Army Corps of Engr. Permits
2.6.2	Impact Evaluation Assessments (Retired Category)
2.7.1	Sec. 4(F)/6(F) Evaluations
2.12.1	Socio-Economic And Environmental Justice Analyses
2.13.1	Hazardous Materials Initial Site Assessment
2.14.1	Environmental Document Preparation
3.2.1	Route Studies & Schematic Design
4.2.1	Roadway Design

4.4.1	Freeway Interchanges
5.2.1	Bridge Design
6.1.1	Routine Bridge Inspection Team Leader
8.1.1	Signing, Pavement Marking, And Channelization
9.1.1	Bicycle and Pedestrian Facility Devel. (Retired Category)
10.1.1	Hydrologic Studies
10.2.1	Roadway Hydraulic Design
10.3.1	Bridge Hydraulic Design
10.5.1	Bridge Scour Evaluations And Analysis
11.1.1	Roadway Construction Management And Inspection
12.2.1	Concrete Plant Inspection and Testing
14.1.1	Soil Exploration
14.2.1	Geotechnical Testing
14.3.1	Transportation Foundation Studies
14.4.1	Building Foundation Studies

(see TxDOT website www.txdot.gov for additional info.)

Equipment Resources

L&G Consulting Engineers, Inc (L&G Engineering) is a branch of L&G which is a 100% locally owned business within the South Texas region. L&G Laboratory maintains 4,500 square feet of combined office and laboratory space at our Mercedes, Texas location, and 4,125 square feet of combined office and laboratory space at our Mission, Texas location. Both main laboratory facilities are located within the Rio Grande Valley conveniently located at opposite ends of Hidalgo County to maximize our ability to provide services in a timely manner throughout the valley (Mission Lab – services Zapata County, Starr County, West Hidalgo County; Mercedes Lab – services East Hidalgo County, Willacy County, and Cameron County). All of our equipment is calibrated by independent certifying agencies. Our Construction Material Laboratories are equipped with all of the standard test equipment to conduct Geotechnical and Construction Material Testing as required by most projects. The following is an abridged list of our field and laboratory equipment:

Office/Lab:

Standard Office Equipment – Computers, Telephones, Faxes, Copiers, Printers
Full sets of 12” Brass/Square opening Sieves 1/34” thru Size No. 200 – Sieve Analysis Testing
Tech-Lab Electric Sieve Shaker – Sieve Analysis Testing
Type E Commercial Mixer – Atterberg Limits / Hydrometer Analysis – Sample Prep. & Testing
Laboratory Glassware – Graduated Cylinders – Hydrometer Analysis Testing
Ohaus Navigator 4100 Gram Laboratory Scale – Laboratory Material Testing
Ohaus Scout II 200 Gram Laboratory Scale – Laboratory Material Testing
Ohaus C-11 30 KG Laboratory Scale – Laboratory Material Testing
Gilson SP-1 Sample Splitter – Sample Size Reduction for Laboratory Testing
Humbolt Liquid Limit Devices – Atterberg Limits Testing
Tech-Lab Sand Equivalent Test Set – Sand Equivalent Testing
Rainhart Sieve Sifter – Automatic Shaker for Sand Equivalent Testing
Quincy Laboratories Model No. 30 Conventional Bench Oven – Material Drying
Quincy Laboratories Model No. 31-350 Forced Air Bench Oven – Material Drying
Rainhart Texas Wet-Ball Mill – Base Material Durability Testing (Tex-116-E)
Rainhart Soils Compactor – Moisture Density Determinations, ASTM, TxDOT, ASHTTO
Forney FX-400 Compression Testing Machine – Compressive Strength of Concrete Specimens
ELE International Tri-Flex 2 Master and Auxiliary Panels – Soil Permeability Testing
ELE International Digital Tri Test – Multi Loader for Confined and Unconfined Strength Testing
Humboldt Consolidation Load Frames – Consolidation / Swell Testing
Misc. Equip. – Stainless Steel Lab Pans and Containers, Microwaves, Hot Plates, Curing Tanks

Field:

Two (2) SIMCO 2800 Geotechnical Drilling Rigs & One (1) Deidrich D-90 Geotechnical Drilling Rig
Three Drilling Support Vehicles / Equipment Trailers (w/ Water Tanks)

Auger (Straight Flight, Hollow Stem), Drilling Pipe (Mud Rotary)
Drilling Tub (Mud Rotary Operation)
Tri-Cone and Cutter Drill Bits
Ten (10) L&G Lab Fleet Trucks
Trailer Mounted Asphalt-Concrete Coring Machine – Asphalt / Concrete Coring
Coring Rig Adapter (Asphalt Depth Check, Concrete Coring)
Tech-Lab Concrete Pressure Meters – Air Content Testing
Slump Cone Test Sets w/ Thermometers – Concrete Testing
Troxler, Humbolt & Instrotek Moisture-Density Gauges – Field Density Testing
Laptop Computer with Internet Card (for Real-Time Reporting at Remote Sites)

The following is an abridged listing of the types of tests L&G offers:

Soil and Base Material Testing

Moisture Content Determination	ASTM D2216 / Tex-103-E
Determination of Liquid Limit of Soils	Tex-104-E
Determination of Plastic Limit of Soils	Tex-105-E
Atterberg Limits of Soils	ASTM D 4318 / Tex-106-E
Bar Linear Shrinkage of Soils	Tex-107-E
Material Finer #200 Sieve	ASTM D 1140 / Tex-111-E
Lime Series Testing	Tex-112-E
Moisture-Density Relationship (TxDOT)	Tex-113-E / Tex-114-E
Standard Proctor	ASTM D 698
Modified Proctor	ASTM D 1557
Field Density Test (Nuclear)	ASTM D 2950 / Tex-115-E
Determination of Soil pH	Tex-128-E
Soil-Lime Testing	Tex-121-E
Resistivity of Soils(Laboratory)	Tex-129-E
Sieve Analysis	ASTM C 136 / Tex-200-F
Texas Wet Ball Mill (Base Material Quality)	Tex-116-E

Coarse and Fine Aggregate Quality Testing

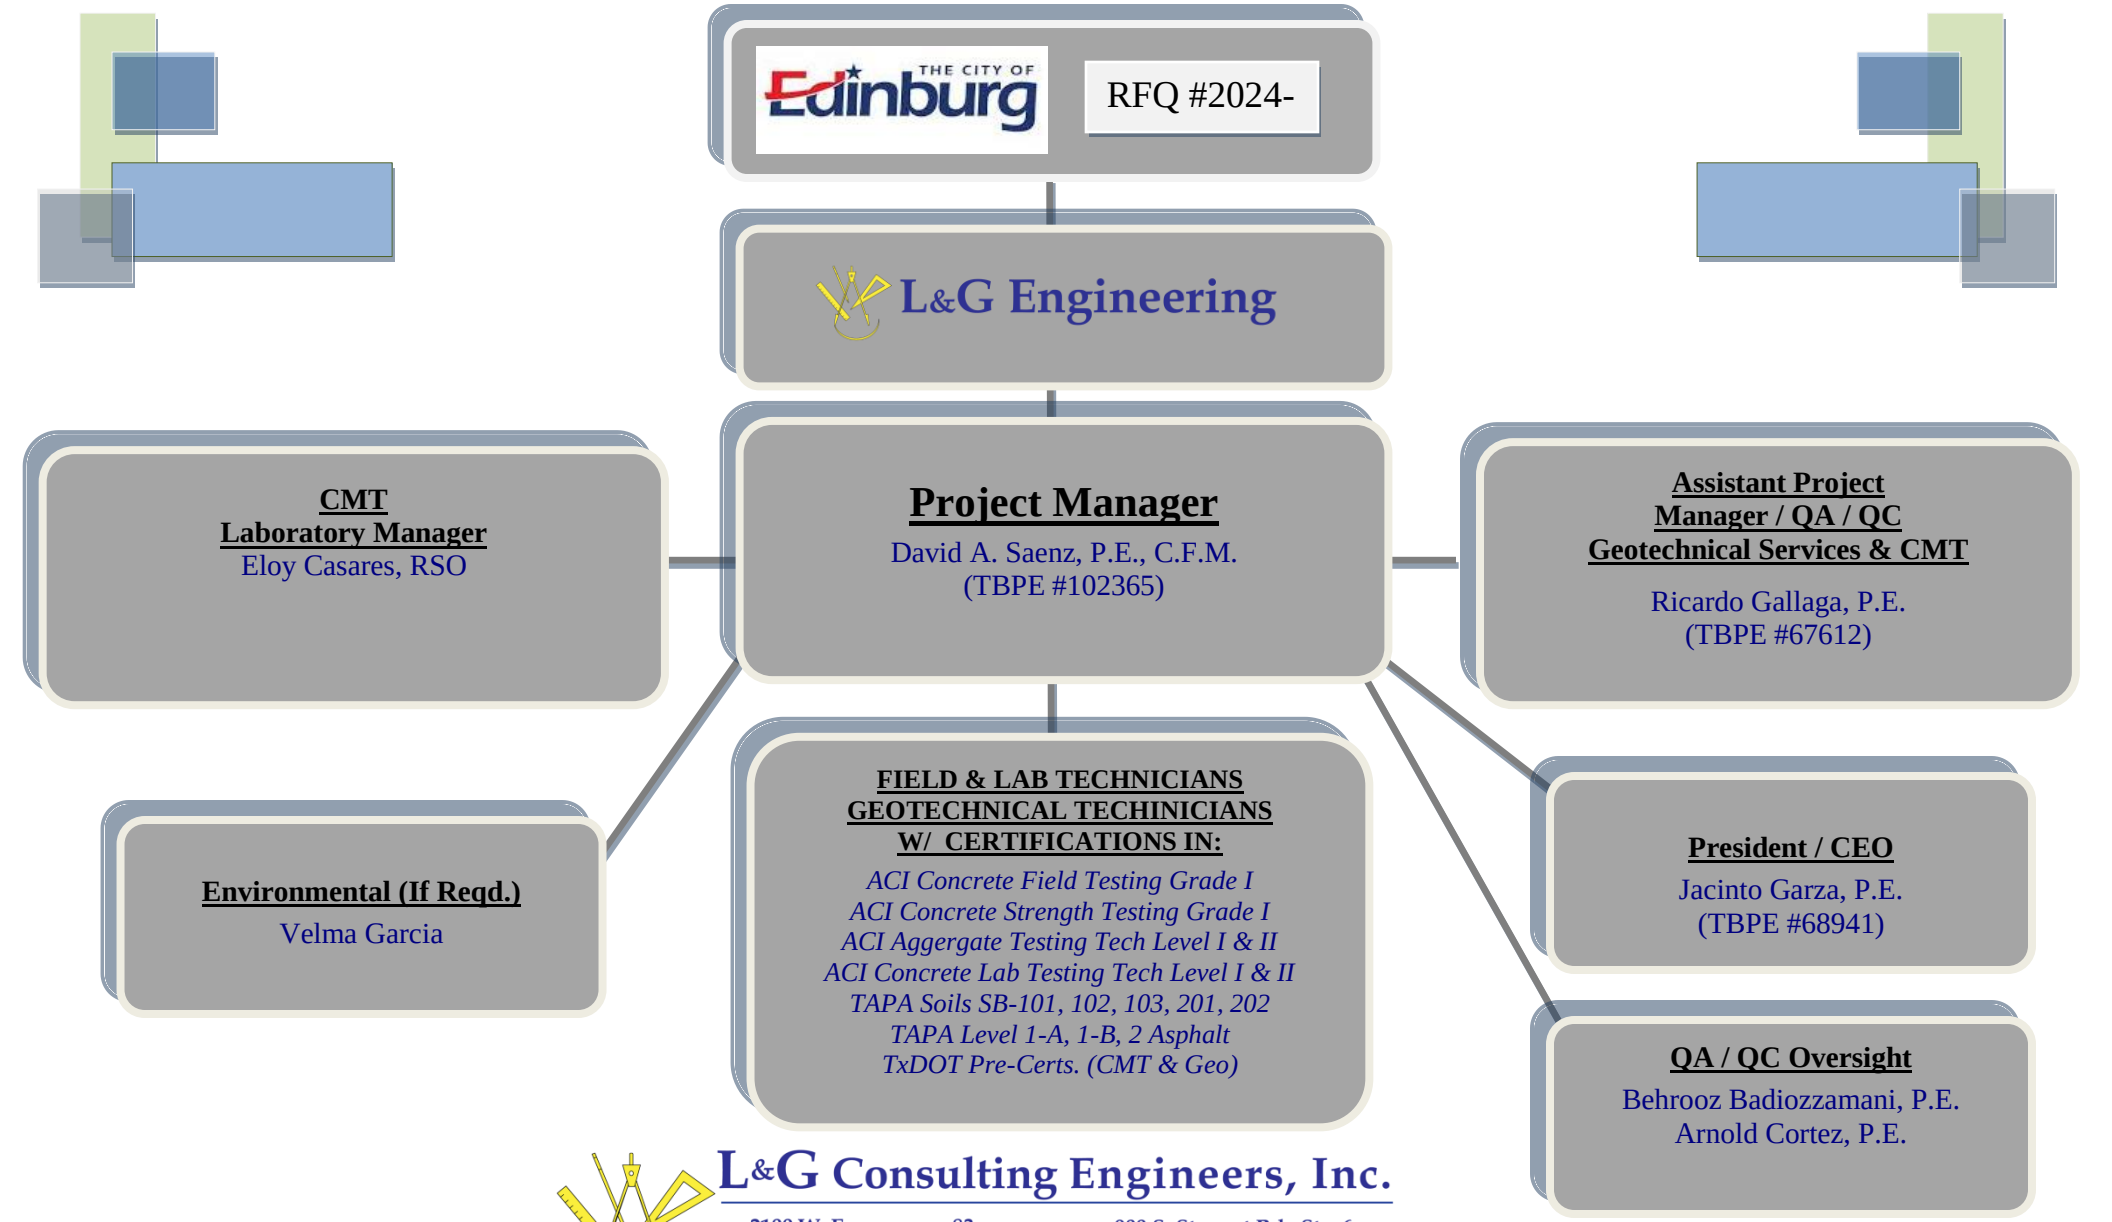
Decantation Test (Conc. Aggr.)	ASTM C117 / Tex-406-A
Specific Gravity/Absorp. (Conc. Aggr)	ASTM C127 / Tex-403-A
Cycle Magnesium Soundness	ASTM C88 / Tex-411-A
SSD Unit Weight of Aggregates	ASTM C29 / Tex-404-A
Percent Voids/Solids in Concrete Aggregate	Tex-405-A
Sand Equivalent	ASTM D 2419 / Tex-203-F
Specific Gravity / Absorption (Fine Aggr.)	ASTM C 128 / Tex -403-A
Organic Impurities in Fine Aggregate	ASTM C 87 / Tex -408-A
Fineness Modulus of Fine Aggregate	Tex-402-A
Acid Insoluble of Fine Aggregate	Tex-612-J

Concrete and Masonry Field and Laboratory Testing

Slump Test	ASTM C 143 / Tex-415-A
Air Content (Pressure Method)	ASTM C 138 / Tex-416-A
Air Content (Volumetric)	ASTM C 173
Casting of Concrete Cylinders	ASTM C 31
Compressive Strength of Cyl. Specimen	ASTM C 39 / Tex-418-A
Cylindrical Specimen Prep./Hold/Cure	ASTM C 192
Casting of Grout Prisms	ASTM C 1019
Grout Prism Prep./Cure/Compressive Strength	ASTM C 39
Casting of Mortar Cubes	ASTM C 780
Mortar Cube Prep./Cure/Compressive Strength	ASTM C 109
Masonry Unit Prep. /Compressive Strength	ASTM C 140
Masonry Unit SPG/Absorption/Unit Wt.	ASTM C 140

Pavement Thickness / Asphalt Quality

Coring – ACP Thickness	ASTM D 3549
Pavement Thickness Determination (Full Depth)	ASTM
Density of Asphaltic Cores (4 or 6 inch)	Tex-207-F
Maximum Theoretical SPG (Rice Gravity)	Tex-227-F
Extraction/Sieve Analysis/Asphalt Content	Tex-210-F / Tex-200-F
Asphalt Rolling Pattern (Nuclear Method)	Tex-207-F – Part IV
Eff. Of Water on Asphalt Mixtures (As Rec'd)	Tex-531-C



Pavement Investigation

Core Existing Asphalt or Concrete Pavement for Thickness, Perform Base Thickness, Sieve Analysis and Plasticity Index, Stabilized Subgrade Thickness and Plasticity Index

Miscellaneous Items

As is evident by the ongoing projects noted in 'Current Workload', L&G is more than qualified to perform Geotechnical Engineering and Construction Material Testing services for the **City of Edinburg** under the proposed contract. L&G's hiring procedures ensure that there is no discrimination based on an applicant's age, sex, or religious background (L&G is in compliance with all state/federal hiring regulations).

L&G has a well-established and documented "Affirmative Action Program". We understand that the success of our firm is dependent on employing the most qualified individuals and providing a work environment free of discrimination and harassment. In compliance with all Federal and State Equal Opportunity laws, L&G promotes and values cultural differences understanding that it significantly improves organizational performance. Furthermore, L&G managers implement Affirmative Action (AA) procedures during their hiring process and job placement allowing for fairness throughout the company.

GLENN HEGAR TEXAS COMPTROLLER OF PUBLIC ACCOUNTS

The Texas Comptroller of Public Accounts (CPA) administers the Statewide Historically Underutilized Business (HUB) Program for the State of Texas, which includes certifying minority, woman, and service disabled veteran-owned businesses as HUBs and facilitates the use of HUBs in state procurement and provides them with information on the state's procurement process.

We are pleased to inform you that your application for certification/re-certification as a HUB has been approved. Your company's profile is listed in the State of Texas HUB Directory and may be viewed online at https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp. Provided that your company continues to meet HUB eligibility requirements, the attached HUB certificate is valid for the time period specified.

You must notify the HUB Program in writing of any changes affecting your company's compliance with the HUB eligibility requirements, including changes in ownership, day-to-day management, control and/or principal place of business. *Note: Any changes made to your company's information may require the HUB Program to re-evaluate your company's eligibility.*

Please visit our website at http://comptroller.texas.gov/procurement/prog/hub/ and reference our publications (i.e. Grow Your Business pamphlet, HUB Brochure and Vendor Guide) providing addition information on state procurement resources that can increase your company's chances of doing business with the state.

Thank you for your participation in the HUB Program! If you have any questions, you may contact a HUB Program representative at 512-463-5872 or toll-free in Texas at 1-888-863-5881.

Texas Historically Underutilized Business (HUB) Certificate

HUB
Statewide Historically Underutilized Business Program

Certificate/VID Number:	**1743007928900**
File/Vendor Number:	**006240**
Approval Date:	**07-APR-2021**
Scheduled Expiration Date:	**07-APR-2025**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

L & G CONSULTING ENGINEERS, INC.

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed 09-APR-2021, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day-to-day management, operational control, business location) provided in the submission of the business' application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

Rev. 06/19

TEXAS Health and Human Services | Texas Department of State Health Services

RADIOACTIVE MATERIAL LICENSE

Pursuant to the Texas Radiation Control Act and Texas Department of State Health Services (Agency) regulations on radiation, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess and transfer radioactive material listed below; and to use such radioactive material for the purpose(s) and at the place(s) designated below. This license is subject to all applicable rules, regulations and orders of the Agency now or hereafter in effect and to any conditions specified below.

LICENSEE			
1. Name	L&G CONSULTING ENGINEERS INC DBA L&G ENGINEERING ATTN ELOY CASARES	3. License Number	L06671
2. Address	2100 W EXPRESSWAY 83 MERCEDES TX 78570	4. Expiration Date	October 31, 2024
		Amendment Number	02

This license is amended in accordance with correspondence dated January 8, 2020.

5. Radioisotope	6. Form of Material	7. Maximum Activity	8. Authorized Use
A. Americium-241/Beryllium	A. Sealed source (QSA Model AMN.V997; EZ Model Am1.NO2)	A. 1 source not to exceed 44 millicuries	A. Measurement of physical properties using Humboldt Scientific Inc. (HSI) Model 5001 moisture/density gauge.
B. Americium-241/Beryllium	B. Sealed source (QSA Model AMN.V997; EZ Model Am1.NO2)	B. **5 sources** not to exceed 44 millicuries each	B. Measurement of physical properties using Instrotek, Inc. Model 3500 moisture/density gauge.
C. Cesium-137	C. Sealed source (QSA Model CDC.805; EZ Model HEG-137)	C. 1 source not to exceed 11 millicuries	C. Measurement of physical properties using HSI Model 5001 moisture/density gauge.
D. Cesium-137	D. Sealed source (QSA Model CDC.805; EZ Model HEG-137)	D. **5 sources** not to exceed 11 millicuries each	D. Measurement of physical properties using Instrotek, Inc. Model 3500 moisture/density gauge.

RADIOACTIVE MATERIAL LICENSE

LICENSE NUMBER	AMENDMENT NUMBER
L06671	02

9. A. Radioactive material shall be stored and used at:

Site Number	Location
000	Mercedes – 2100 West Expressway 83 (Main Site)
001	Mission – 900 South Stewart Road, Suites 6 and 7

B. The authorized place of use is at temporary sites, in areas not under exclusive Federal jurisdiction, throughout Texas. The licensee is authorized to store radioactive material at a temporary site up to 90 days in any twelve-month period.

10. This license is issued in accordance with Title 25 Texas Administrative Code §289.252(e), "General requirements for the issuance of specific licenses."

11. The individual designated to perform the functions of Radiation Safety Officer (RSO) for activities covered by this license is Eloy Casares.

12. Radioactive material shall only be used by individuals who have successfully completed the training described in the letter dated October 3, 2014.

13. Sealed sources or source rods containing radioactive material shall not be opened or sources removed or detached from source rods or gauges by the licensee, except as specifically authorized.

14. The licensee shall conduct at intervals not to exceed six-month visual inspections and operational checks of all gauges to ensure that the equipment is in good working condition, the sources are adequately shielded, and required labeling is present and legible. A record of each inspection shall be maintained for inspection by the Agency for three years and shall include the date of the inspection, name and signature of the individual performing the inspections, equipment involved, any problems found, and what, if any, corrective action was taken.

15. Any cleaning, maintenance or repair of the gauges that requires detaching the source or source rod from the gauge shall be performed only by the manufacturer or other persons specifically licensed by the Agency, the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.

RADIOACTIVE MATERIAL LICENSE

LICENSE NUMBER	AMENDMENT NUMBER
L06671	02

16. Except as specifically provided otherwise by this license, the licensee shall possess and use the radioactive material authorized by this license in accordance with statements, representations, and procedures contained in the following:

Application dated September 12, 2014, and
Letter dated October 3, 2014.

Title 25 TAC §289 shall prevail over statements contained in the above documents unless such statements are more restrictive than the regulations.

USACE Materials Testing Center
Vicksburg, Mississippi, USA

AGGREGATE

Aggregate - C 117 - Material Finer than 75 µm (No. 200) Sieve
Aggregate - C 127 - Specific Gravity & Absorption in Coarse Aggregate
Aggregate - C 128 - Specific Gravity & Absorption in Fine Aggregate
Aggregate - C 136 - Sieve Analysis of Aggregates
Aggregate - C 1077 - Concrete and Concrete Aggregate Testing Standards (Quality Standards)

BITUMINOUS

Bituminous - D 2041 - Theoretical Maximum Specific Gravity & Density (Rice)
Bituminous - D 2726 - Bulk Specific Gravity and Density
Bituminous - D 2950 - Density of Bituminous Concrete in Place by Nuclear Methods
Bituminous - D 5444 - Mechanical Size Analysis of Extracted Aggregate
Bituminous - D 6307 - Asphalt Content of Hot-Mix Asphalt by Ignition Method
Bituminous - D 6925 - Relative Density of Asphalts by Superpave Gyratory Compactor

CONCRETE

Concrete - C 31 - Making and Curing Test Specimens in the Field
Concrete - C 39 - Compressive Strength of Cylindrical Specimens
Concrete - C 138 - Unit Weight and Air Content by Gravimetric
Concrete - C 143 - Slump
Concrete - C 172 - Sampling
Concrete - C 173 - Air Content by Volumetric ***required if C231 not performed***
Concrete - C 231 - Air Content by Pressure ***required if C173 not performed***
Concrete - C 511 - Moist Cabinets, Moist Rooms, Water Storage Tanks
Concrete - C 617 - Capping Cylindrical Specimens
Concrete - C 1064 - Temperature of Concrete
Concrete - C 1077 - Concrete and Concrete Aggregate Testing Standards (Quality Standards)
Concrete - C 1231 - Unbonded Caps

SOILS

Soils - D 421 - Dry Preparation for Particle Size Distribution & Soil Constants
Soils - D 422 - Particle Size Analysis (Sieve and Hydrometer)
Soils - D 698 - Compaction Characteristics by Standard Effort
Soils - D 1140 - Material Finer than 75 m (No. 200) Sieve

Soils - D 1557 - Compaction Characteristics by Modified Effort
Soils - D 2166 - Unconfined Compressive Strength
Soils - D 2216 - Water Content
Soils - D 4318 - Liquid & Plastic Limits & Plasticity Index
Soils - D 6938 - Density and Water Content by Shallow Depth Nuclear Method

AASHTO ACCREDITED

CERTIFICATE OF ACCREDITATION

AMERICAN ASSOCIATION OF STATE HIGHWAY AND TRANSPORTATION OFFICIALS
AASHTO

L&G Consulting Engineers, Inc.

in

Mercedes, Texas, USA

has demonstrated proficiency for the testing of construction materials and has conformed to the requirements established in AASHTO R 18 and the AASHTO Accreditation policies established by the AASHTO Committee on Materials and Pavements.

The scope of accreditation can be viewed on the Directory of AASHTO Accredited Laboratories (aashtoresource.org).

Jim Tymon,
AASHTO Executive Director

Moe Jamshidi,
AASHTO COMP Chair

This certificate was generated on 02/13/2024 at 5:00 PM Eastern Time. Please confirm the current accreditation status of this laboratory at aashtoresource.org/aap/accreditation-directory

SCOPE OF AASHTO ACCREDITATION FOR:

L&G Consulting Engineers, Inc.

in Mercedes, Texas, USA

Quality Management System

Standard:		Accredited Since:
R18	Establishing and Implementing a Quality System for Construction Materials Testing Laboratories	07/20/2016
C1077 (Aggregate)	Laboratories Testing Concrete and Concrete Aggregates	10/19/2021
C1077 (Concrete)	Laboratories Testing Concrete and Concrete Aggregates	02/14/2018

This certificate was generated on 02/13/2024 at 5:00 PM Eastern Time. Please confirm the current accreditation status of this laboratory at aashtoresource.org/aap/accreditation-directory

Scope of AASHTO Accreditation for:

L&G Consulting Engineers, Inc.

in Mercedes, Texas, USA

Asphalt Mixture

Standard:		Accredited Since:
D2041	Maximum Specific Gravity of Hot Mix Asphalt Paving Mixtures	09/01/2017
D2726	Bulk Specific Gravity of Compacted Hot Mix Asphalt Using Saturated Surface-Dry Specimens	07/13/2017
D2950	Density of Bituminous Concrete In Place by Nuclear Methods	07/13/2017
D3203	Percent Air Voids in Compacted Dense and Open Bituminous Paving Mixtures	09/01/2017
D5444	Mechanical Analysis of Extracted Aggregate	07/13/2017
D6307	Determining the Asphalt Content of Hot Mix Asphalt (HMA) by the Ignition Method	07/13/2017
D6925	Preparing and Determining the Density of Hot Mix Asphalt (HMA) Specimens by Means of the Superpave Gyratory Compactor	**Suspended**
Tex-206-F	Compacting Specimens Using the Texas Gyratory Compactor (TGC)	07/13/2017

This certificate was generated on 02/13/2024 at 5:00 PM Eastern Time. Please confirm the current accreditation status of this laboratory at aashtoresource.org/aap/accreditation-directory

Scope of AASHTO Accreditation for:

L&G Consulting Engineers, Inc.

in Mercedes, Texas, USA

Soil

Standard:	Accredited Since:
D421 Dry Preparation of Disturbed Soil and Soil Aggregate Samples for Test	12/04/2018
D422 Particle Size Analysis of Soils by Hydrometer	07/20/2016
D698 The Moisture-Density Relations of Soils Using a 5.5 lb [2.5 kg] Rammer and a 12 in. [305 mm] Drop	07/20/2016
D1140 Amount of Material in Soils Finer than the No. 200 (75-µm) Sieve	07/20/2016
D1557 Moisture-Density Relations of Soils Using a 10 lb [4.54 kg] Rammer and an 18 in. [457 mm] Drop	07/20/2016
D2166 Unconfined Compressive Strength of Cohesive Soil	07/20/2016
D2216 Laboratory Determination of Moisture Content of Soils	07/20/2016
D4318 Determining the Liquid Limit of Soils (Atterberg Limits)	07/20/2016
D4318 Plastic Limit of Soils (Atterberg Limits)	07/20/2016
D6938 In-Place Density and Moisture Content of Soil and Soil-Aggregate by Nuclear Methods (Shallow Depth)	08/19/2021

This certificate was generated on 02/13/2024 at 5:00 PM Eastern Time. Please confirm the current accreditation status of this laboratory at aashtoresource.org/aap/accreditation-directory

Scope of AASHTO Accreditation for:

L&G Consulting Engineers, Inc.

in Mercedes, Texas, USA

Aggregate

Standard:	Accredited Since:
C117 Materials Finer Than 75-µm (No. 200) Sieve in Mineral Aggregates by Washing	07/20/2016
C127 Specific Gravity and Absorption of Coarse Aggregate	08/19/2021
C128 Specific Gravity (Relative Density) and Absorption of Fine Aggregate	08/19/2021
C136 Sieve Analysis of Fine and Coarse Aggregates	07/20/2016

This certificate was generated on 02/13/2024 at 5:00 PM Eastern Time. Please confirm the current accreditation status of this laboratory at aashtoresource.org/aap/accreditation-directory

RFQ

Request for Qualifications
"Geotechnical Engineering and Construction Materials Testing Services Rotation"
RFQ# 2024-6

Dear Mardoqueo Hinojosa,

The City of Edinburg is looking for the most qualified engineering firm to work various projects to provide Geotechnical Engineering and Construction Materials Testing Services Rotation for the City of Edinburg. Millennium Engineers Group, Inc. (MEG) is that firm. We believe that MEG is the right choice for the City of Edinburg based on the following:

History of Stability and Strong Texas Presence

MEG is locally owned corporation that has never been sold, acquired, or merged with other entities. We are confident that the people and company you see in today will be the people and company you see for the life of your projects. Furthermore, Mr. Raul Palma, P.E. CEO and Project Manager of MEG has 39 years of engineering experience in the Texas and is the former TxDOT Pharr Materials Engineer. MEG has offices in Pharr, Laredo, San Benito, Odessa, Houston, San Antonio, and Austin Texas with fully functional and accredited testing labs. MEG is stable and we have invested in the future. We are consistent and we are not going anywhere. We believe MEG has placed together a team that is the most highly qualified to perform the services requested by the City of Edinburg. Our firm is a certified Disadvantage Business Enterprise (DBE), Minority Business Enterprise (MBE) and Historically Underutilized Business (HUB).

Experienced Project Manager

As your project manager, I have spent over 39 years working on Texas projects including 21 years as the CEO and chief engineer of MEG completing various successful projects within all of Texas

Pride in Execution

MEG is acutely aware of the financial and management challenges facing most entities these days.

We are committed to:

- Working to identify and implement projects in the most cost-effective manner.
- Communicating closely with the client to meet your requirements and schedule
- Knowledge and geotechnical solutions for cost effective construction methods.
- Dedicated to quality: AASHTO and USACE accredited laboratory.
- The most AASHTO accreditations of any laboratory in Texas

Our team is thrilled about the opportunity to serve the City of Edinburg and is ready to start immediately upon selection. If you have any questions or would like to discuss our approach or team capabilities in greater detail, please contact me at any time at apalma@megengineers.com. Thank you for your consideration.

Respectfully,
MILLENNIUM ENGINEERS GROUP, INC TBPELS Firm No.: F-3913

ABOUT MEG ENGINEERS

Government and municipal agencies, educational institutions, architects, engineers, real estate developers, constructors, and private sector clients. Our strength is our people; combining their experience and collaborating as a unit enables us to quickly identify our roles and deliver accurate cost-effective deliverables. Whether defining a new working relationship or continuing to the next project our mission remains the same: to achieve yours.

MEG Corporate Headquarters – Pharr, Texas

History

MEG was founded in 2001 by Mr. Raul Palma, P.E. on the principles of honesty, integrity, and service. The goal to provide innovative geotechnical and material testing services, continue to raise the level of quality in the local profession, and make a difference in the community. Today,MEG provides a full range of integrated geotechnical engineering and consulting services, construction material engineering and testing, environmental engineering, forensic testing, and consulting services. Our philosophy and practices have been positively reflected in both client and employee loyalty and contribute to a steady growth in a diversity of projects.

MEG is accredited by the American Association of State Highway and Transportation Officials (AASHTO) and the United States Army Corps of Engineers (USACE). MEG is audited by and independent AASHTO & USACE auditor, as part of our accreditation process.

MEG meets the requirements for ASTME329 Standard of Recommend Practice for Inspection and Testing Agencies, and maintains yearly proficiency testing samples to AASHTO, USACE, TxDOT, and TxAPA.

Our Project Team

MEG proposes to utilize the latest measurement techniques to effectively perform the services of this agreement with our current staff as proposed in our organizational chart. We understand that we need to respond quickly to some service requests, and we are practiced in having staff available on short notice, if necessary. Our current and projected workloads are such that we are confident of our ability to the City of Edinburg expectations in terms of having appropriate staff resources available when they are needed. The organization chart below reflects the staff we anticipate using for the proposed projects; however, we have additional personnel that can also be utilized if needed.

> "I count of the experience and expertise that Millennium Engineers provides- just as a good foundation is critical to a structure, a good geotechnical study is critical to a good foundation design."
> George Mendoza, P.E., Mendoza Engineering

PROFILE

Mr. Palma serves as office manager of MEG's Pharr, Texas office. He has over 17 years' experience in the engineering industry and vast knowledge in geotechnical engineering and construction materials testing in the Texas. Geotechnical projects that Mr. Palma has been involved with including mixed-use developments, urban mid-rise buildings, educational facilities, airport facilities, parking garages, commercial low-rise to mid-rise buildings, water and wastewater treatment facilities, elevated water towers, industrial facilities, multi-family developments, churches, residential subdivisions, and general retail centers. Pavement design projects that Mr. Palma has been involved with include highways, industrial parks, heavy-duty brick paving, freight centers and industrial applications.

As President, Mr. Palma's responsibilities include coordination of field personnel, communication with the client, generation of geotechnical engineering reports, evaluating laboratory soil testing, and scheduling and managing field personnel. Palma's responsibilities as a Construction Materials Engineer include coordination of field personnel, communication with the client, generation of daily logs and weekly status reports, training of technicians, evaluating laboratory and field construction materials testing data, and scheduling and managing field personnel.

RAUL PALMA P.E.

CHIEF GEOTECHNICAL ENGINEER

Phone 956-300-2500
Email rpalma@megengineers.com

PROFILE

Mr. Palma is a licensed Professional Engineer with over 39 years of experience in geotechnical engineering, construction materials testing, management, and engineering design of highways, streets, and utilities. Mr. Palma has directed and completed a wide variety of geotechnical projects throughout the Central Texas region. As Chief Geotechnical Engineer of the San Benito, Texas office he is responsible for overall operations management of the San Benito Office.

As geotechnical project manager, he is responsible for coordination and completion of geotechnical engineering projects. His experience includes subsurface explorations, laboratory testing, foundation investigation and design; slope stability assessments and remediation design, pre-load fill design; geotechnical plans and specifications preparation; and construction monitoring. Client relationships have included city and county agencies; engineering and architectural firms; municipal and utility districts, as well as private developers and constructors.

During Mr. Palma's employment with the Texas Department of Transportation (TxDOT), Mr. Palma gained an extensive background in the area of geotechnical and materials engineering serving as the District Materials Engineer for a centralized laboratory for TxDOT in the Pharr District located in Pharr, Texas. As the District Materials Engineer he was responsible for overseeing the testing and approval of materials for all construction projects in the Cameron, Hidalgo Starr, Zapata, Jim Hogg, Brooks, Willacy and Kennedy counties. At the end of his tenure with TxDOT, the Pharr District had a construction program of approximately $170 million dollars of construction per year. He oversaw all the geotechnical exploration and soil testing for all bridge and retaining wall structures in these same counties. Mr. Palma also served as the assistant to the State Concrete and Physical Testing Engineer at the Materials & Tests Division of TxDOT and during this period he gained extensive experience in concrete, concrete admixtures, reinforcing steel, and pre-stressed steel. Mr. Palma's extensive experience in the area of materials and geotechnical engineering gives our firm a unique ability to provide services of the highest professional caliber.

June 9, 2022

TO: Whom it may Concern

This is in reference to construction materials testing and geotechnical services performed for the City of Weslaco by MEG Engineers between the period of May of 2020 and May of 2022.

During this timeframe, MEG Engineers has met our expectations completing all work in a timely and professional manner. MEG has been very responsive to all our work requests and provided the services in timing and sequence with project expectations. As a matter of fact, due to the success of their work, the city has recently approved a one-year extension to their existing contract.

We are pleased to offer this letter of recommendation for their great work with the city.

If you have any questions or would like additional information concerning MEG's work with the City of Weslaco, please do not hesitate to contact me at (956)969-1533 or email me at aaldana@weslacotx.gov.

Sincerely,

Albert J. Aldana, P.E.
City Engineer

c: Mr. Martin Garza, Interim City Manager

BROWNSVILLE
PUBLIC UTILITIES BOARD

January 7, 2020

RE: Letter of Recommendation – Millennium Engineers Group, Inc.

To Whom It May Concern:

On behalf of the Brownsville Public Utilities Board (BPUB) Special Projects Department and Water/Wastewater Engineering Department, the BPUB submits this letter of recommendation for Millennium Engineers Group, Inc. (MEG).

MEG has assisted the Special Projects department and the Water/Wastewater Engineering Department with geotechnical reports and materials testing services for the past several years. They have been involved with numerous projects such as Wastewater Lift Stations Rehabilitation projects and the Odor Control Improvement project. MEG is also one of our on-call material testing laboratory for all subdivision construction materials testing.
Currently, MEG is performing all material testing for the BPUB Annex Building project, an approximate 70,000 sf building project development currently under construction.
Millennium Engineers Group continues to provide accurate results in a timely manner, with the utmost professionalism and within budget.

The BPUB will continue to engage Millennium Engineers Group on future projects and confidently recommend MEG for your geotechnical and materials testing needs.

Sincerely,

Marie C. Leal, P.E.

Re: Letter of Recommendation

Dear Mr. Palma,

I would like to take this opportunity to express to you Alton's satisfaction and appreciation with the work product and professionalism exhibited by your company's employees since the outset of the engagement of your firm. The professionalism and dedication to their trade, your staff has shown, sets Millennium Engineers Group apart from the competition.

The City of Alton has enjoyed its relationship with MEG Engineers and looks forward to working with your company in the future.

If we may be of service to you in anyway, please do not hesitate to contact me at (956) 432-0760.

Sincerely,

Jeff Underwood,

CITY OF MISSION

"Home of the Grapefruit"

June 16, 2022

To Whom It May Concern,

I am writing this letter of recommendation for MEG Engineers.

MEG has been under contract with the City of Mission for the last four years and has provided exceptional Lab services in numerous subdivisions and projects throughout the City. They have always exhibited with integrity, ethics, reliability and fairness. Despite any troubles that could arise at the time of construction, MEG would and will deliver the testing and results on time and with quality. I believe you would be very pleased with their work, attention to detail and customer service.

Should you have any questions, please feel free to contact me at (956) 585-3275.

Sincerely,

Juan Pablo Terrazas, P.E., CPM
Assistant City Manager/City Engineer City of Mission

City of Pharr Engineering Department

January 6th, 2020

To whom it may concern.

Re: Millennium Engineers Group, Inc.

Our City has contracted Millennium Engineers Group, Inc. to perform Construction Material Testing and Geotechnical Engineering On-Call Services for the past three years. Mr. Andres Palma and his firm are very professional and have an excellent service response. We are very satisfied with their work. They have a great attitude and carry out their project deliverables within budget and schedule. We were very pleased with the work his firm has done on the numerous project they have work on for the City of Pharr.

I would give Millennium Engineers Group, Inc. and his team my highest recommendation.

Sincerely,

Omar Anzaldua Jr., PE, CFM, PMP, CCM | City Engineer
City of Pharr
956-402-4000, ext 1414

Re: Letter of Recommendation

To Whom It May Concern:

Raul Palma is being nominated for Engineer of the Year. I have had the pleasure of knowing Raul for many years. He has impressed me with his exceptional leadership, spirit, and commitment to this profession. His professional character has excelled in his field of engineering and has given back to his community in countless volunteer efforts. I can attest not only to Raul's ability to explain and instruct, but also to his deep commitment to helping others.

Considering his extensive knowledge in engineering and achievements, he has been named the Engineer of the Year by the local Engineer's Chapter and I highly recommend his naming as Engineer of the Year.

Please feel free to contact me if you have any questions at (956) 572-3191.

Sincerely,

Patrick McNulty
Mayor

To whom it may concern:

Melden & Hunt has contracted MEG Engineers to perform Construction Material Testing and Geotechnical Engineering Services for the past decade. Mr. Andres Palma, PE and his firm are very professional and have an excellent service response. We are very satisfied with their work and have recommended them on many occasions. They have a great attitude and carry out their project deliverables within budget and schedule. We were very pleased with the work his firm has done on the numerous projects they have work on in South Texas.

I would give MEG Engineers, Andres Palma, PE and his team my highest recommendation.

Mario A. Reyna, PE

INSURANCE COVERAGE & LEGAL

MEG does not have any key terms of our errors and omissions insurance coverage.

MEG maintains the insurance policies needed for this contract as for all additional contracts listed below.

2 million professional liability coverage
1 million commercial general liability coverage
1 million umbrella liability coverage

MEG does not have any claims, judgments, and arbitration proceedings, suits pending or outstanding against itself or its officers. MEG audited financial statements are available upon request.

MEG meets the legal requirements of this request for qualifications as well as all the requirements required by the State of Texas and the Texas Board of Professional Engineers.

MEG is a professional engineering firm registered in the State of Texas that has complied with all of its obligations, certifications, accreditations, licenses, and procedures required to operate in the State of Texas and be accredited by USACE and AASHTO.

PROFESSIONAL SERVICES AGREEMENT

MEG has read and agrees with the Professional Services Agreement. MEG will meet the prerequisite insurance requirements, and, if selected, agrees to enter into such agreement.

Understanding the Project

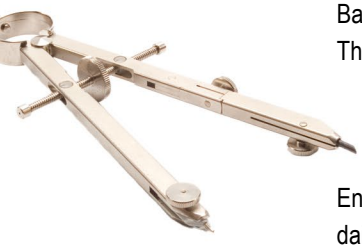
The City of Edinburg needs are specific to the services we provide, counting on the services we provide to be responsive, thorough, and precise. The projects need efficient communication, project management, and contract administration. At MEG we consistently achieve this by:

- Understanding the specific needs of our client
- Delivering on the expectations of our client
- Efficient Communication
- Extensive Employee Training and Management
- Proven Consistency, Low Employee Turnover
- Highest Quality Accreditations and Internal Management

CONSTRUCTION MATERIAL TESTING SERVICES
will encompass all related services to the Client including, but not limited to, the following:

- Conducting initial discussions with the Owner and Design team for specific project requirements, project schedule, design requirements, and any additional information that will be beneficial to the city.
- Soil Sampling and Testing
- Laboratory Soil Testing
- Field Density Testing
- Field Soil Observations
- Field Soil Recommendations
- Field Reinforcing Steel Inspections
- Field Concrete Sampling and Testing
- Laboratory Concrete Compressive Strength Testing
- Field HMAC Pavement Testing
- Field and Laboratory Pavement Testing
- Field Structural Steel Inspections
- Daily reporting and communication with Owner, Design team, and Contractor

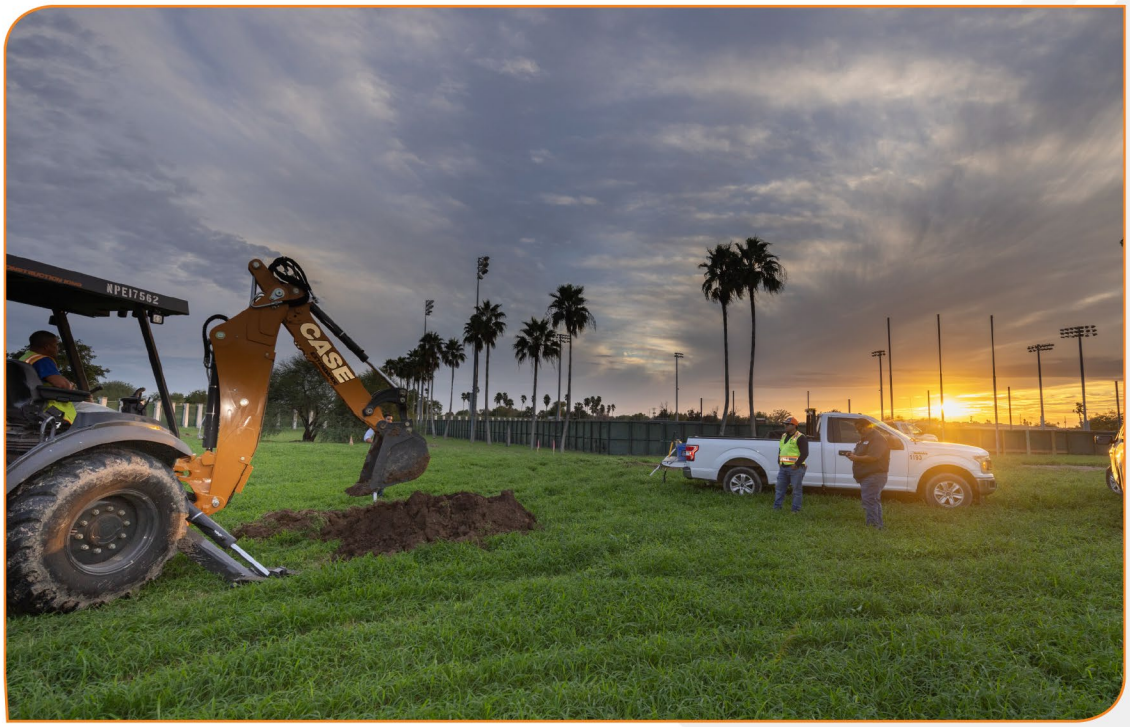
GEOTECHNICAL ENGINEERING SERVICES will encompass all related services to the Client including, but not limited to, the following:



- Conducting initial discussions with the Owner and Design team for specific project requirements, project schedule, design requirements, and any additional information that will be beneficial to the Owner.
- Conducting a review of local geology at the project location.
- Conducting field soil exploration and testing services.
- Conducting the geotechnical laboratory testing program to meet the project requirements.
- Discussion with the Owner and Design team prior to report preparation to include updated project changes, requirements, or additional geotechnical options.
- Prepare precise, innovative, cost-effective geotechnical engineering recommendations for all aspects of the project.
- Discussion after the geotechnical report submittal with the Owner and the Design team to support implementation of geotechnical recommendations that will be beneficial to the Owner.

MEG has the ability to meet your schedule and deadline because of its thorough training and understanding of its CLIENTS needs, MEG's experience and resources, MEG's subcontractors' resources, and industry requirements. MEG has the philosophy of providing quality Construction Materials Engineering and Geotechnical Engineering Services to all our clients in Texas. We believe that client satisfaction, reputable and prompt service, and staying in stride with the latest technologies and tools will give our firm a unique advantage in providing a service to you as our client. We believe that providing quality service is the key to our client's satisfaction and their inclination to consider our firm in future projects.

WORKLOAD CAPACITY



The scope of work to be performed under this contract is the scope of work that MEG performs daily for our clients in Texas. MEG has the necessary capacity to meet the City of Edinburg needs for Professional Services. MEG has the resources and experience to provide concurrent project construction services to an individual client for your detailed project scope of work. Our resources can be shifted for operations and our staff and inspectors are cross-trained for proper allocation of personnel for this specific reason.

Based on the current workload, resources, and staff of MEG it is estimated that current operations capacity is at 70%. There is currently no backlog with our testing Services. Our staffing plan is to never be above 85% capacity, so we are able to expedite services when needed to meet critical project schedules.

Based on current and future assignments, it is estimated that during the duration of the project Millennium Engineers Group, Inc. will be operating at 80% of capacity. Engineers, Staff, and Inspectors will be able to complete the daily anticipated project tasks for this project along with current projects tasks. MEG is proficient in completing daily project tasks and expediting the testing and inspection results to the project team for the projects benefit. The project team included in this submittal that will be allocated to this project will devote the necessary time to meet your schedule and often will be various percentages of their time based on your program needs. Inspectors that are assigned to this project will devote 100% of their time to this project when required and additional inspector resources will be available on an as needed basis for this project will be devoted 20% to 50% of their time for additional services as needed.

PROJECT MANAGEMENT AND COORDINATION STATEMENTS

MEG utilizes a Management System, which facilitates the management of both the Construction Material Testing (CMT) and Geotechnical Engineering Testing (GEO) Departments. The system consolidates all aspects of the business workflow, from proposal to the final invoice. It allows an organization the ability to set up clients/projects, schedule work orders (dispatch requests), report and distribute pertinent data to clients via email or website, employ management tools for lab and field testing, and prepare invoices for each project that could be exported to the organization's accounting system. The system also gives the organization's clients the ability to retrieve reports from the customized reporting website.

Our team makes recommendation on the course of action to the Client when issues of potential delays or increased costs arise during the project. Close communication and coordination between the contractor, third parties involved in the project and our team will be a priority by our team for a successful project. Our team operate as a representative of the City of Edinburg and oversee the day-to-day construction activities of the prime contract assigned. Our team has extensive experience in administering construction contracts and overall management. Our team has experience on multiple projects performing Construction Engineering, Inspection and Construction Materials Testing services for numerous clients in Texas. Our scope of services includes but not limited to:

- Construction Administration Procedures
- Field Reports
- Monthly Progress Reports
- Progress Photos
- Project Progress Meetings
- Schedule Review
- Change Order Review-
- Quality Control
- Safety and Health
- Submittal/ Shop Drawing Control
- Payment Application Review

> Millennium Engineers has always provided great, professional, friendly service. I highly recommend them.
>
> *Ramiro Gutierrez, P.E., R. Gutierrez Engineering Corp.*

PROJECT MANAGEMENT AND COORDINATION STATEMENTS

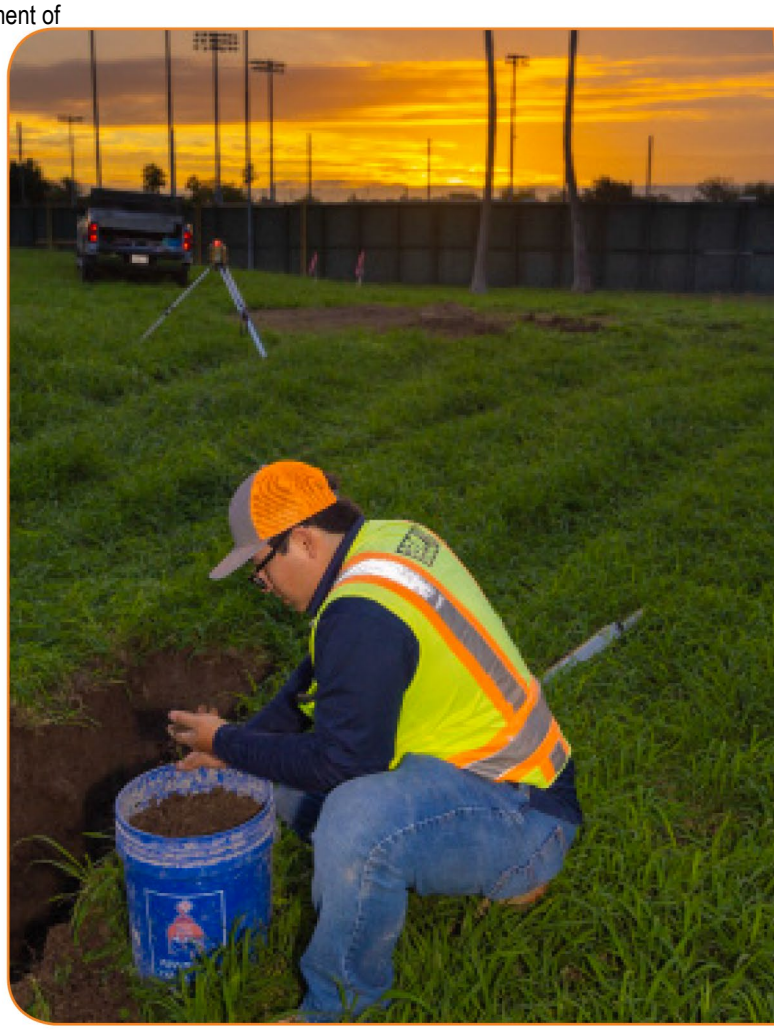
Construction Engineering and Management: MEG ensures that the project is completed on time, and on budget and within scope. This will be accomplished through review and tracking of baseline schedules and monthly updates, monthly pay estimates, change orders, plan quantities and overall project costs. We provide timely processing of contractor submittals, shop drawings, and Request for Information (RFIs). We will also work with the Engineer of Record (EOR) as needed regarding RFI's, potential design changes, or plan errors and omissions. We conduct regular progress meetings to promote partnering between all parties. We conduct pre-construction meeting with the contractor, Client, and other stakeholders prior to the start of the project. During this meeting, an escalation ladder is established to provide guidelines for resolution of construction issues.

Construction Administration and Inspection: MEG performs all necessary inspection to verify work is completed in accordance with plans and specifications. Daily Work Reports (DWR's) or other required reports will be completed to document construction progress and inspection activities as well as quantities for payment. Our inspectors inspect all construction activities daily, determine daily need for construction materials testing of work in progress and materials in use, traffic control devices on a daily basis for compliance with Traffic Control Plan and TMUTCD. SW3P inspections as per environmental requirements performed in accordance with subject guidelines.

Construction Materials Testing: MEG performs construction materials testing on all required construction activities and materials to ensure compliance with project plans and specifications in accordance with the City of Edinburg guidelines for sampling and testing. If independent assurance testing is required coordination with the third-party testing agency is scheduled at appropriate schedules and frequency.

Document Control: MEG ensure that all project progress and financial reporting is completed in accordance with contract requirements. We log all project correspondence, submittals, change orders, RFI's, shop drawings, pay estimates, MOH, etc. We also verify that the contractor is complying with Disadvantaged Business Enterprise (DBE), Equal Employment (EEO) and Buy America guidelines. All DWR's, pay sheets and material test reports are reviewed for accuracy before submittal.

Close Out Procedures: Thorough and accurate records is maintained throughout. We generate a project specific close out checklist. The checklist is distributed to all parties at the beginning to resolve all discrepancies. The checklist allows for a guide during both construction and close out phases. Another part of quality program includes formal audits conducted at 30%, 60%, and 90% of construction completed.



Another tool that we use is performing thorough constructability reviews during the pre-construction phase. We review approved plans, specifications, general notes, TCP phasing, baseline schedule, etc. to identify potential plan errors, quantity discrepancies, utility conflicts, or potential maintenance issues. All findings during the constructability review are provided to the City of Edinburg for review and further discussion.

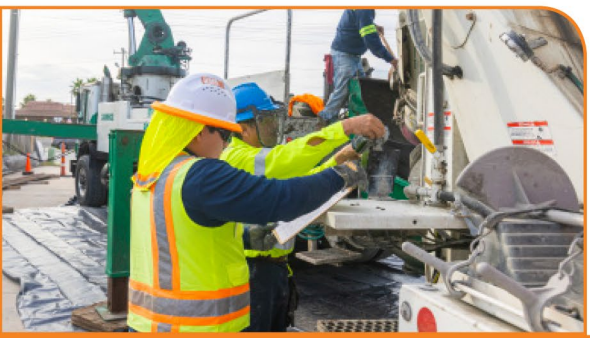
PROJECT COMMITMENT

MEG is committed to your projects, program, goals, and timelines for project schedule. We will provide the essential staff, equipment, and resources to be available and responsive daily to the City of Edinburg needs based on the district scope of services. Our offices are equipped and trained to provide the level of service and responsiveness required by the City of Edinburg. MEG has extensive local resources and expertise to complete large project programs. The key personnel presented in this Statement of Qualifications are committed to the City of Edinburg projects and will be available throughout the life of the project.

Project Communication

Communication is the key to all successful projects. The management of the testing and inspection program for the project will begin with the introduction of the project team members. Upon notification of award, our engineers and staff will meet with members of the project team who have an active role in the project. This is a critical phase in to communicate project information, goals, timelines, or potential conflicts.

Review of Construction Schedule



MEG will review the most up-to-date construction schedule by task after design documents are completed. The testing and inspection program can best support regulated testing and control final testing costs if we clearly understand the project testing requirements.

Construction Meetings

From the initiation of the project until the completion, we propose biweekly or monthly management meetings with the construction manager or his representative and other project team members. At these meetings it is necessary, to review and discuss testing results, project progress, and project schedule.

Daily Communication

MEG on site representative will maintain daily communication with the contractor's superintendent, and the designated project team members in order to schedule the required services and to communicate inspection and test results. Our project manager will communicate the results of critical off-site testing and inspections to the designated project team representatives the same day testing is performed.

> MEG has been reliable and responsive to our testing needs. – Mr. Ariel Chávez II, PE/RPLS/ Director of Engineering Services

QUALITY ASSURANCE / QUALITY CONTROL

Internal Quality Management

Our firm follows a reporting structure that will best benefit our clients. Steps and processes are performed in every task of our services to give the client the best product possible. Our client first attitude, service approach, methodology of doing business, and internal quality control program allow us to continue providing services throughout the State of Texas building long term business relationships.

Reporting Structure

Reporting Structure starts within our management team. MEG is called for the requested services and to make the necessary arrangements to initiate the project. Our dispatcher will dispatch one of our highly trained technicians to the requested project site. At this point the technician will perform the requested task(s) and then complete his/her field-testing report. Field Testing reports are turned in daily and our project managers review the testing reports. The testing reports and then turned into our administrative staff and are typed for second review of the project managers. The reports are then reviewed and signed by the office engineer before they are sent to the client. The testing reports provided by MEG include all the necessary data that is often requested by the Owner and members of the design team.

Decision Making

Decision Making by MEG starts within our management team. The decisions made by our staff and key personnel come only after consulting with the principal engineer. Timing and scheduling are important factors of construction, and every decision made will consider the best interest of our client. Engineering Recommendations are only made by a Professional Engineer that is registered in the State of Texas.

Quality Control Plans

Quality Control is monitored by MEG in every aspect of our work. Our office maintains a quality control program that has been approved by the American Association of State Highway and Transportation Officials (AASHTO) and the State of Texas, Department of State Health Services Radiation Control Program. Quality control is monitored and documented by our (QA/QC) Manager and Radiation Safety Officer.

Reporting and Billing Quality Assurance

Quality assurance is maintained by MEG in every aspect of our administrative work. Our office maintains an internal quality control program that is used by our administrative staff to audit every process of our reporting and billing procedures. This quality assurance measure allows us to maintain the quality service that is essential to our client's business.

> "MEG provides excellent services in a timely and cost effective manner.– Mr. Alfonso Quintanilla, PE/RPLS/ Quintanilla, Headly, and Associates"

Texas Historically Underutilized Business (HUB) Certificate

Certificate/VID Number: **1742996684300**
Approval Date: **September 28, 2023**
Scheduled Expiration Date: **September 28, 2027**

The Texas Comptroller of Public Accounts (CPA), hereby certifies that

Millennium Engineers Group Inc

has successfully met the established requirements of the State of Texas Historically Underutilized Business (HUB) Program to be recognized as a HUB. This certificate printed **September 28, 2023**, supersedes any registration and certificate previously issued by the HUB Program. If there are any changes regarding the information (i.e., business structure, ownership, day to day management, operational control, business location) provided in the submission of the business; application for registration/certification as a HUB, you must immediately (within 30 days of such changes) notify the HUB Program in writing. The CPA reserves the right to conduct a compliance review at any time to confirm HUB eligibility. HUB certification may be suspended or revoked upon findings of ineligibility.

Statewide HUB Program
Statewide Procurement Division

Note: In order for State agencies and institutions of higher education (universities) to be credited for utilizing this business as a HUB, they must award payment under the Certificate/VID Number identified above. Agencies, universities and prime contractors are encouraged to verify the company's HUB certification prior to issuing a notice of award by accessing the Internet (**https://mycpa.cpa.state.tx.us/tpasscmblsearch/index.jsp**) or by contacting the HUB Program at **512-463-5872** or toll-free in Texas at **1-888-863-5881**.

Raul Palma
Millennium Engineers Group, Inc.
PO Box 4569
Edinburg, TX 78540

Dear Raul Palma:

We are pleased to inform you that your application for certification in our Small, Minority, Woman and Veteran Business Enterprise (S/M/W/V) Program has been approved. Your firm met the requirements of the SCTRCA Policy and Procedure Manual and is currently certified as a:

***ESBE HABE MBE SBE**

Certification Number: **223066103**
Certification Expiration: **June 2, 2025**

Providing the following products or services:
NAICS 541330: CIVIL ENGINEERING SERVICES
NAICS 541370: LAND SURVEYING SERVICES
NAICS 541380: GEOTECHNICAL TESTING LABORATORIES OR SERVICES
NAICS 541990: ALL OTHER PROFESSIONAL, SCIENTIFIC, AND TECHNICAL SERVICES

On the two year anniversary date of your certification, you are required to provide a renewal application affirming that no changes have occured affecting your certification status. The SCTRCA will send you a Certification Renewal reminder **sixty (60) days** prior to your expiration date. The SCTRCA will no longer include a certificate upon certification renewals. **Your expiration date is June 2, 2025.**

Please notify this office within **thirty (30) days** of any changes affecting the size, ownership, control requirements, or any material change in the information provided in the submission of the certification application. Thank you in advance.

Sincerely,

Sandra Ramos

YEARS IN BUSINESS: 55 years

Our McAllen laboratory was the first Rio Grande Valley facility that was accredited by the American Association of State Highway and Transportation Officials (AASHTO) and validated by the U.S. Army Corps of Engineers.

Headquartered in San Antonio, Texas, Raba Kistner has additional offices in Austin, Brownsville, Dallas, Houston, and McAllen, and New Braunfels, Texas, Utah and México. Our multi-disciplined team—made up of more than 650 employees—consists of civil, facilities, environmental, geotechnical, and materials engineers; roofing consultants and observers; building envelope consultants; LEED APs; environmental geologists; scientists; archaeologists; technicians; and support personnel. More than 75% of our team holds licensure or certifications in their areas of expertise. Furthermore, Raba Kistner's Geotechnical and Construction Materials Testing staff and laboratories are among the largest in the State.

With an office located in McAllen, Raba Kistner is pleased to present our company's sound experience and solid qualifications to the City of Edinburg. We pledge to provide you with a professional, timely, cost effective service.

We know the local, state, and federal regulations as they pertain to municipal work. We understand your requirements and are prepared to provide experienced professional support to assist you in meeting your project objectives.

Raba Kistner has performed construction materials testing services for many similar projects for counties, cities, irrigation districts, and TxDOT throughout the Rio Grande Valley, as well as the entire State of Texas. One of the most important considerations that should be acknowledged is our location and service time to the CIty of Edinburg, which allows Raba Kistner to effectively and efficiently service projects as needed. Transportation of testing items and specimens will be limited due to the proximity of our laboratory.

FIRM EXPERIENCE

Raba Kistner has played an integral role in the expansion of Rio Grande Valley communities since 1991, and we have successfully provided environmental services, engineering, consulting and testing throughout the region to improve the quality of life of its citizens.

We have performed over 1,500 projects for city, county, and state entities in the Rio Grande Valley in the last 30 years. We have also worked extensively with key staff at City of Edinburg for more than 29 years.

Our local familiarity adds to the quality of services we are able to provide our clients throughout the region. Our commitment to protecting our clients' interests remains constant. Used individually or collectively, Raba Kistner's services provide practical, on-time, on-budget solutions.

Raba Kistner has more than 800 employees in twelve different offices company-wide that are available as resources for these City of Edinburg projects. With the necessary technology and communications systems in place, we are able to move work through each of our offices and have the added capability of additional staff available to QA/QC our work performed. Raba Kistner also has a second Valley office in Brownsville that could be called upon for assistance or Quality Control without any loss of efficiency, quality, or deadlines.

Our current workload is such that all proposed personnel can begin assignments for these projects immediately upon notice to proceed.

Our project staffing requirements are very dynamic, and we have adequate field and support personnel to service the various projects associated with this SOQ due to staff flexibility and versatility. We will be able to staff smaller assignments.

Our employees work and live in the area and are familiar with the local issues and concerns. Given our history of practicing professional engineering and consulting services within the Valley, we have a comprehensive database of geotechnical subsurface conditions. This aids clients such as the City of Edinburg in that we are able to pull from first-hand knowledge when dealing with projects.

The Raba Kistner McAllen Office employs more than 40 staff members. Given our previous and current experience working with the City of Edinburg, we trust you are familiar with the quality of work that each of these individuals provides.

Over the last five years, our experience includes providing Geotechnical Engineering and Materials Testing services to the following public entities:

- City of Alton
- City of Brownsville
- City of Donna
- City of Edinburg
- City of Harlingen
- City of McAllen
- City of Mercedes
- City of Pharr
- City of Port Isabel
- City of San Juan
- City of Weslaco
- Cameron County
- Hidalgo County
- Hidalgo County Drainage District #1
- Hidalgo County RMA

Below is a sample of projects that Raba Kistner has completed for the City of Edinburg within the past ten years:

CITY OF EDINBURG PROJECTS

PROJECT	SERVICE
Evangeline Gardens Sewer Improv.	Geotechnical Engineering
Chapin Road Sanitary Sewer Improv.	Geotechnical Engineering
Proposed Police Dept. Training Fac.	Geotechnical Engineering

City of Edinburg - Elevated Water	Construction Materials Testing

Specialty Certifications & Accreditations

Raba Kistner's engineering staff and independent laboratories are among the largest and most thoroughly equipped. All of our materials laboratories meet rigorous standards for testing and analysis procedures and advanced equipment calibration. We serve in leadership roles and are accredited by and/or affiliated with:

- American Association of State Highway and Transportation Officials (AASHTO)
- US Army Corps of Engineers (USACE)
- American Society for Testing of Materials (ASTM E 329)
- Geoprofessional Business Association (GBA)
- National Institute for Standards and Technology (NIST)
- Texas Council of Engineering Laboratories (TCEL)
- American Association for Laboratory Accreditation (A2LA)

The American Association of State Highway and Transportation Officials (AASHTO), the U.S. Army Corps of Engineers (USACE), and the American Association for Laboratory Accreditation (A2LA) have accredited our facilities in asphalt, concrete, aggregate and soils—few laboratories in Texas have earned this distinction.

AASHTO has issued accreditation to our McAllen laboratory facility in asphalt, concrete, aggregate, and soils since 2005. We are proud to have consistently maintained this distinction for thirteen consecutive years. Further, USACE has validated our McAllen office facility. Raba Kistner's McAllen facility is the testing laboratory in the Rio Grande Valley holding the largest number of accredited tests under both of these distinctions.

Trained and certified in a range of procedures, our technicians conduct many field and laboratory tests that are customized for projects upon request. The American Association of State Highway and Transportation Officials (AASHTO), the American Association Laboratory Accreditation (A2LA), and the U.S, Army Corps of Engineers not only accredit our materials laboratories, but also our field testing operations as well. These accreditations confirm that our laboratories and field testing meet rigorous standards for testing and analysis procedures and equipment calibration.

Laboratory Testing Equipment

Our geotechnical laboratory is equipped with standard test equipment to conduct soil classification tests such as Atterberg Limits, mechanical and hydrometer grain size distribution and strength tests including unconfined compression, un-drained triaxial compression, and direct shear. The lab also conducts other complex tests such as triaxial compression with pore pressure measurements, consolidation tests, permeability tests, swell and pressure-swell tests, and field and laboratory CBR determinations.

American Association of State Highway and Transportation Officials (AASHTO)

Raba Kistner laboratories are accredited by the American Association of State Highway and Transportation Officials (AASHTO) in the disciplines of Portland Cement Concrete Testing, Aggregate Testing, Soils, and Hot Mix Asphalt. AASHTO is a nonprofit, nonpartisan association representing highway and transportation departments in the 50 states, the District of Columbia, and Puerto Rico. It represents all five transportation modes: air, highways, public transportation, rail, and water. The primary goal of AASHTO is to foster the development, operation, and maintenance of an integrated national transportation system. The accreditation is based upon an onsite assessment of our quality assurance/quality control (QA/QC) program. This assessment verifies the training of employees, calibration of equipment, and adherence to testing procedures.

U.S. Army Corps of Engineers Inspections

Raba Kistner's laboratory is validated for construction materials testing and inspection on U.S. Army Corps of Engineers' projects. Representatives of the U.S. Army Corps of Engineers inspect the Raba Kistner laboratories and review our Quality Assurance Programs and documentation.

ASTM E 329 Compliance

Raba Kistner meets the requirements, basic and supplemental, of ASTM E 329, "Standards of Recommended Practice for Inspection and Testing Agencies for Concrete and Steel as Used in Construction." We participate in the development of standards for ASTM, and have team members who actively participate on committees applicable to their industry.

National Institute for Standards and Technology (NIST)

The Materials Reference Laboratory of the NIST periodically inspects Raba Kistner's facilities. We participate in the CCRL cement and concrete reference sample program and the AASHTO soil reference sample program of the NIST. Raba Kistner's testing equipment is calibrated annually, using test equipment with accuracy traceable to the National Institute of Standards and Technology equipment.

Geoprofessional Business Association (GBA) Peer Review

Raba Kistner is active in GBA and its peer review program. A team of 3 to 4 experienced professionals from other member firms conducts this review over an intensive 2 to 3 day period. The team examines documents and practices related to the firm's organization, staff, work product, and professional activities. It visits and examines

physical facilities, reviews manuals, reports, proposals and observes daily operations. GBA's peer review program has been used as a model for other professions and is highly regarded on a national basis. It improves the quality of geotechnical engineering practice by GBA member firms to better serve their clients and thus better protect public safety and welfare.

CORPORATE PE LICENSE

Texas Board of Professional Engineers and Land Surveyors

CERTIFICATE OF REGISTRATION

This acknowledges that

Raba Kistner, Inc.

has fulfilled the requirements of the Texas Board of Professional Engineers and Land Surveyors to offer and perform engineering services in the state of Texas.

Registration Number
F-3257

Expiration Date
1/31/2025

AASHTO CERTIFICATION

AASHTO ACCREDITED

Section 2 Team Members Qualifications and Experience

Employees

Our employees work and live in McAllen and the surrounding cities and are familiar with the local issues and concerns. Given our history of practicing professional engineering and consulting services within the Valley, we have a comprehensive database of geotechnical subsurface conditions. This aids clients such as the City of Edinburg in that we are able to pull from first-hand knowledge when dealing with projects.

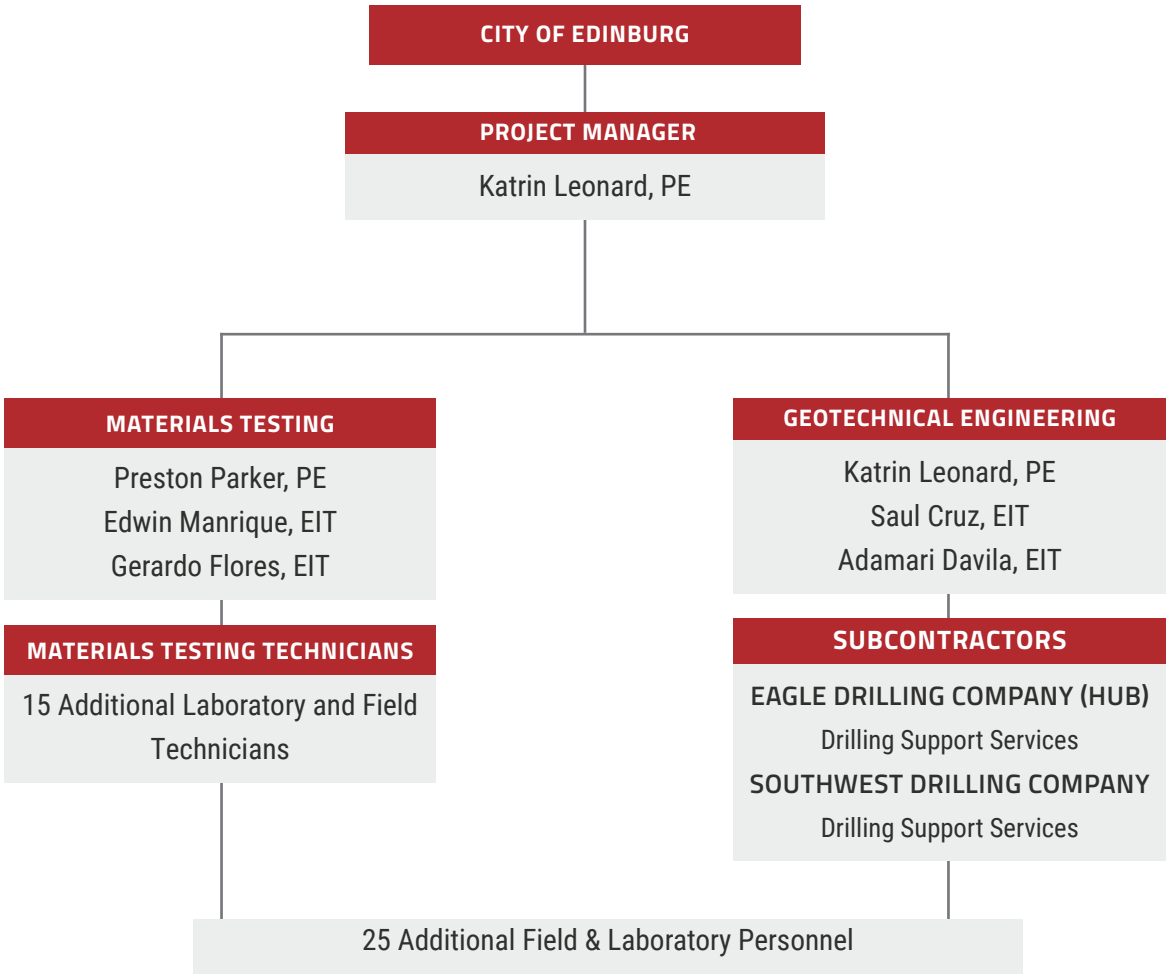
The Raba Kistner McAllen Office employs more than 40 staff members. Given our previous and current experience working with the City of Edinburg, we trust you are familiar with the quality of work that each of these individuals provides.

Project Manager for Construction Materials Testing and Geotechnical Services:

Ms. Katrin Leonard, PE will serve as the Project Manager for the day-to-day execution of the work and Geotechnical Task Leader. Ms. Leonard manages geotechnical engineering and construction materials testing personnel, planning, coordination, and project activities. With more than 20 years experience, Ms. Leonard is committed to allocating resources on a project-by-project basis to most effectively meet client needs. Ms. Leonard has supervised field construction and quality control tasks, and reviewed work for compliance with project plans and specifications.

McAllen Office Employees Broken Down by Discipline:

DISCIPLINE	NO.
Engineers	5
Environmental Professionals	3
Technicians	26
Administrative	9
TOTAL	**43**



→ **An organizational chart and applicable resumes are provided on the following pages for each employee involved in these City of Edinburg projects.**

ORGANIZATIONAL CHART

The proposed Raba Kistner team assembled for City of Edinburg projects brings together the specialized experience required to meet the goals of this project. This capable and seamless team will save time and money for the CIty of Edinburg.

Our Project Manager, Ms. Katrin Leonard, PE will provide the necessary focus for project communication between the City of Edinburg and the Raba Kistner team. Raba Kistner currently has 67 professional engineers on staff.

The following organizational chart illustrates Raba Kistner's proposed team.

Katrin Leonard, PE

VICE PRESIDENT

PROJECT ROLE: PROJECT MANAGER & GEOTECHNICAL TASK LEADER

Ms. Leonard is recognized for her commitment to meeting client objectives for prompt and practical facilities engineering solutions. As Vice President of Raba Kistner's Rio Grande offices, she has assumed progressive responsibility in management, administration, and coordination of geotechnical and facilities services throughout South Texas, the Texas/México border, and Northern México.

Ms. Leonard earned her Bachelor of Science degree in Civil Engineering from Carleton University in Ontario, Canada. She is registered as a Professional Engineer by the State of Texas.

On a day-to-day basis, Ms. Leonard provides project management in several areas of facilities engineering. Her project assignments address subsurface reconnaissance studies, soil investigations, residential observation, and foundation and pavement design recommendations. Her responsibilities include preparation, design and analysis, and review of plans, specifications, reports, and cost and quantity estimates for industrial, commercial, residential, and educational projects.

Ms. Leonard has had the opportunity to excel at a diversity of significant projects. Working as a team and on her own, she has experience in project management/administration of numerous educational and institutional health facilities, bank buildings, retail shopping centers, water and wastewater treatment plants for city and state Economically Distressed Area Programs, and transportation efforts, including airports, communication towers, and streets.

Ms. Leonard is dedicated to her profession and community. She volunteers time to numerous organizations and continues to enhance her engineering qualifications through regular participation in professional training seminars.

Gerardo Flores

ENGINEER IN TRAINING

PROJECT ROLE: CONSTRUCTION MATERIALS TESTING SUPPORT PERSONNEL

Mr. Flores works with Raba Kistner's Rio Grande Valley operations as an Engineer in Training. He is responsible for performing geotechnical, facilities and construction materials engineering investigations and report preparation.

Mr. Flores has experience writing proposals to estimate the cost of services that was provided in particular geotechnical investigation and construction materials testing projects. Mr. Flores conducted field geotechnical investigations as field representative, safety officer and soil and rock logger. He also managed small construction materials testing projects with budgets up to $50,000 and wrote field reports mainly moisture-density relationship reports, compressive strength reports, soil field, density reports, weekly observation reports and concrete placement reports.

On a day-to-day basis, Mr. Flores provides engineering support and manages a variety of projects and investigations, which include engineering observation at new and existing building sites, direction and oversight of field and exploration staff and subcontractors for field services, and pier and foundation inspection. Mr. Flores also has performed Phase I Environmental Site Assessments on several projects in Mexico and in McAllen, TX.

Mr. Flores is also responsible for classification of samples, assignment of testing regimens in the laboratory, interpretation of engineering data, performing engineering calculations and analysis, and report preparation.

RELEVANT PROJECT EXPERIENCE:

Edwin Manrique, EIT

ENGINEER IN TRAINING

PROJECT ROLE: CONSTRUCTION MATERIALS TESTING SUPPORT PERSONNEL

Mr. Manrique serves as an Engineer in Training in the Rio Grande Valley. In this role, his primary responsibilities include performing geotechnical, facilities, and materials engineering investigations and report preparation, as well as foundation design under the guidance of senior professional engineers.

On a day-to-day basis, Mr. Manrique provides engineering support and manages a variety of projects and investigations, which include engineering observation at new and existing building sites, direction and oversight of field and exploration staff and subcontractors for field services, and pier and foundation inspection. Mr. Manrique is also responsible for classification of samples, assignment of testing regimens in the laboratory, interpretation of engineering data, performing engineering calculations and analysis, and report preparation.

Mr. Manrique's work addresses diversified private and public sector projects. His current assignments include performing field logging activities if engineering supervision is required during drilling operations, performing data collection and field observations on facilities and forensics projects, classifying soil samples in the laboratory, preparing hand written logs, and submitting for preparation of finished boring logs. In addition, he prepares laboratory testing assignments on projects in accordance with the testing program established in the proposal. He also analyzes field data and laboratory test results and performs calculations necessary for completion of engineering reports.

Mr. Manrique has worked in a variety of settings throughout the industry giving him well-rounded experience. Mr. Manrique's work contributes to success in helping clients select appropriate means and methods for achieving their project objectives.

Section 4 Firm's History of Accuracy of Cost Estimates & Staying Within Budget

Ability to be Sensitive and Responsive to Project Budget Constraints

Raba Kistner has provided geotechnical engineering services for over 30 years in the Rio Grande Valley. Consequently, Raba Kistner has developed a library of geotechnical engineering reports from across the county. Access to this library gives Raba Kistner a firsthand knowledge of subsurface conditions at a project site to develop a cost effective scope, based on the knowledge of subsurface soil conditions. In the development of our design recommendations, our 30 year knowledge of construction materials and practices in the Rio Grande Valley area allows us to provide cost effective recommendations for our clients.

Additionally, the cost effectiveness of a geotechnical study is often realized at the time of construction. Raba Kistner's 30 plus years of experience in the area allows us to know what variable conditions might exist that are not encountered in our borings, and enables us to provide recommendations to prevent costly change order claims associated with changed conditions. Raba Kistner also implements tools such as geophysical testing to define more contiguous subsurface data and identify anomalies underground.

Clients trust Raba Kistner for quality, reliable, timely Construction Materials Engineering and Testing (CoMET) services. Our team of trained, experienced professional engineers and field technicians partner with clients in multiple ways to minimize costly construction delays and future project performance problems.

- Communicating with our clients, Raba Kistner Materials Testing technicians operate on an agreed schedule that is planned to achieve minimal disruption to active sites.
- Our level of staffing and resources allows us to respond to projects with short deadlines which may result in cost savings for the City, but at minimum, help to keep the project on time, avoiding overtime needs.
- Because the accuracy of laboratory results depends upon quality samples being obtained in the field, samples are collected following standard, tested and industry-approved procedures. In-house, seasoned professionals and technicians conduct the required tests.
- As typical with most specifications, the owner is only required to pay for “passing” tests on the project. We will be able to efficiently break out failures and segregate the billing so the costs can either be back charged to the contractor or deducted from payment by the City

Section 5 Workload Capacity and History of Performing Work Within Specified Schedule

Ability to Dedicate Necessary Resources to Work and Deliver Services On Time

Raba Kistner is committed to providing the necessary staff and equipment to meet the goals of the City of Edinburg for this contract in a timely, efficient manner. Our current workload will allow for full application of our assigned staff and company resources to meet your schedule and deadlines. Having a record of engineering and consulting services for cities, we are familiar with your timing and fiscal constraints and understand the sensitivity required for service turnaround time and scheduling. Our staff is ready to take on new assignments now and can begin work immediately after receiving your authorization to proceed.

For more than five decades, Raba Kistner has been meeting clients' needs for testing, engineering, and consulting services. As market demands evolve, we continue to expand our core services.

Given our staff size and experience within each service, we can undertake the requirements of major projects or complement clients' existing in-house capabilities. Our commitment to protecting our clients' interests remains constant. Used individually or collectively, Raba Kistner's services provide practical, on-time, on-budget solutions.

Raba Kistner has the largest engineering and architectural consulting staff in the Rio Grande Valley. We have over 550 employees in eleven different offices companywide that are available as resources for these City projects. With the necessary technology and communications systems in place, we are able to move work through our offices and have the added capability of additional staff available to QA/QC our work performed.

If in the event that one or more key personnel dedicated to these specific projects are not available for any reason during the period of performance, any of the other employees throughout the company will be available to devote time and energy to the City of Edinburg.

Geotechnical Engineering

Raba Kistner's goal is to improve our clients' project performance by putting our extensive geotechnical engineering experience to work. Since 1968, we have developed engineering solutions for complex surface and subsurface conditions.

Our professionals clearly understand the interrelationship between our geologic environment and the objectives of clients. We have worked on some of the Southwest region's largest and most significant construction projects. Throughout the past 51 years, our geotechnical team has successfully and continuously tailored cost-effective scopes of service to fit individual project's unique requirements. We take advantage of advanced technology including geophysical surveys and pressure meter testing.

Raba Kistner's staff strives to be responsive to our clients' schedules, comprehensive in our scope, and realistic and cost-conscious in our recommendations.

Geotechnical Engineering Services Include:

- Engineering Geology Studies
- Forensic Studies
- Geotechnical Design Studies
- Specialty Geotechnical Services
- TxDOT Studies

RESEARCH

- Raba Kistner will research its geotechnical database of the City of Sullivan City area geotechnical engineering studies to identify historical data available for the project area.
- Raba Kistner will capitalize on the project specific knowledge that we have performing work in the City of Sullivan City area.

FIELD SERVICES

- Raba Kistner's field services team will identify boring locations and coordinate utility clearance, boring location clearance, and traffic control, if necessary.
- Raba Kistner's professional loggers will oversee the drilling services provided by a subcontract driller. Raba Kistner provides professional loggers in the field in-lieu-of technicians.
- Raba Kistner's professional logger will help the geotechnical engineering team identify subsurface conditions in the project area, and can help determine subsurface variability.

LABORATORY SERVICES

- Raba Kistner's professional logger will bring soil boring samples to our AASHTO/ USACE accredited lab for analysis.
- Raba Kistner will have the laboratory testing performed under the direction of Mr. Edwin Manrique, EIT.

ENGINEERING EVALUATION AND REPORTING

- Raba Kistner's geotechnical engineering staff will analyze the soil boring data and prepare recommendations.
- Raba Kistner's Professional Engineer will review, seal and sign the geotechnical study and recommendations and send to the City and the design team.
- Raba Kistner's Professional Engineering staff includes multiple senior-level consultants with extensive experience in geotechnical studies for linear transportation projects. This includes numerous projects involving slope stability, settlement analyses, bridge foundation, and pavement consulting.

Construction Materials Engineering and Testing

Private and public sector clients trust Raba Kistner for quality, reliable, timely Construction Materials Engineering and Testing services. Our team of trained, experienced professional engineers and field technicians partner with clients to minimize costly construction delays and future project performance problems.

Raba Kistner designs a QA/QC program specific to each project that focuses on the quality and suitability of materials used in construction as well as the quality of workmanship. This attention to detail is reviewed by field representatives who earned certifications from The American Concrete Institute (ACI).

Communicating with our clients, Materials Testing technicians operate on an agreed upon schedule, and with minimal disruption to active sites. Our level of staffing and resources allows us to respond to projects with short deadlines. Because the accuracy of laboratory results depends upon quality samples being obtained in the field, samples are collected following standard procedures. In-house, seasoned professionals and technicians conduct the required tests. Our laboratory staff's combined experience totals more than 1000 years.

Section 6 Proposed Approach

Organizational Structure & Work Plan

Raba Kistner will be providing all services 100% in-house and will not be utilizing any subconsultants or subcontractors for this project.

Geotechnical Engineering Approach

Close coordination and communication with City representatives and Raba Kistner technical staff will be key to the successful execution of work under this contract. Raba Kistner's Project Manager will be available on a continuous basis during extended hours, seven days a week, to receive requests from the City and coordinate with the appropriate technical staff and agencies for the execution of each assignment. Once a task is requested, Raba Kistner will provide the City with a scope, fee and schedule, then internally make the assignment to our staff. The assignment will be completed in coordination with City staff and regulatory authorities, as is appropriate, within the agreed schedule.

Construction Materials Engineering and Testing Approach

Project Scheduling

Typically, Raba Kistner's services are on an on-call basis and usually we are able to respond to requests within 24 hours, and sometimes within hours. Depending on the laboratory testing performed, there is a specific time frame required to complete the tests. Generally, routine laboratory tests, such as Atterberg Limits test, sieve analysis, and moisture-density relationship tests are completed within three to four days. Asphalt laboratory testing is generally completed within two to three days. Because concrete mix designs usually require 28-day compressive strength test results, these tests are normally performed at least 1 ½ to 2 months prior to being needed.

Raba Kistner understands that our tests and field reports are required for the contractor to move on to the next phase, so a concerted effort is put forth to provide report turnaround time in an acceptable time-frame. Depending on the schedule of the project, we can work with the client to expedite our tests and report generation. Further, as part of our inspection services, Raba Kistner will provide the City with the appropriate documentation regarding deficient test results or non-compliant work elements. Prefinal independent inspections have proven to be very effective. These help prepare the owner prior to final walk-through. Raba Kistner will help the City of Sullivan achieve project completion through proactive inspections. A binder containing copies of all inspection reports will be submitted to the City prior to closing each Task Order, if requested.

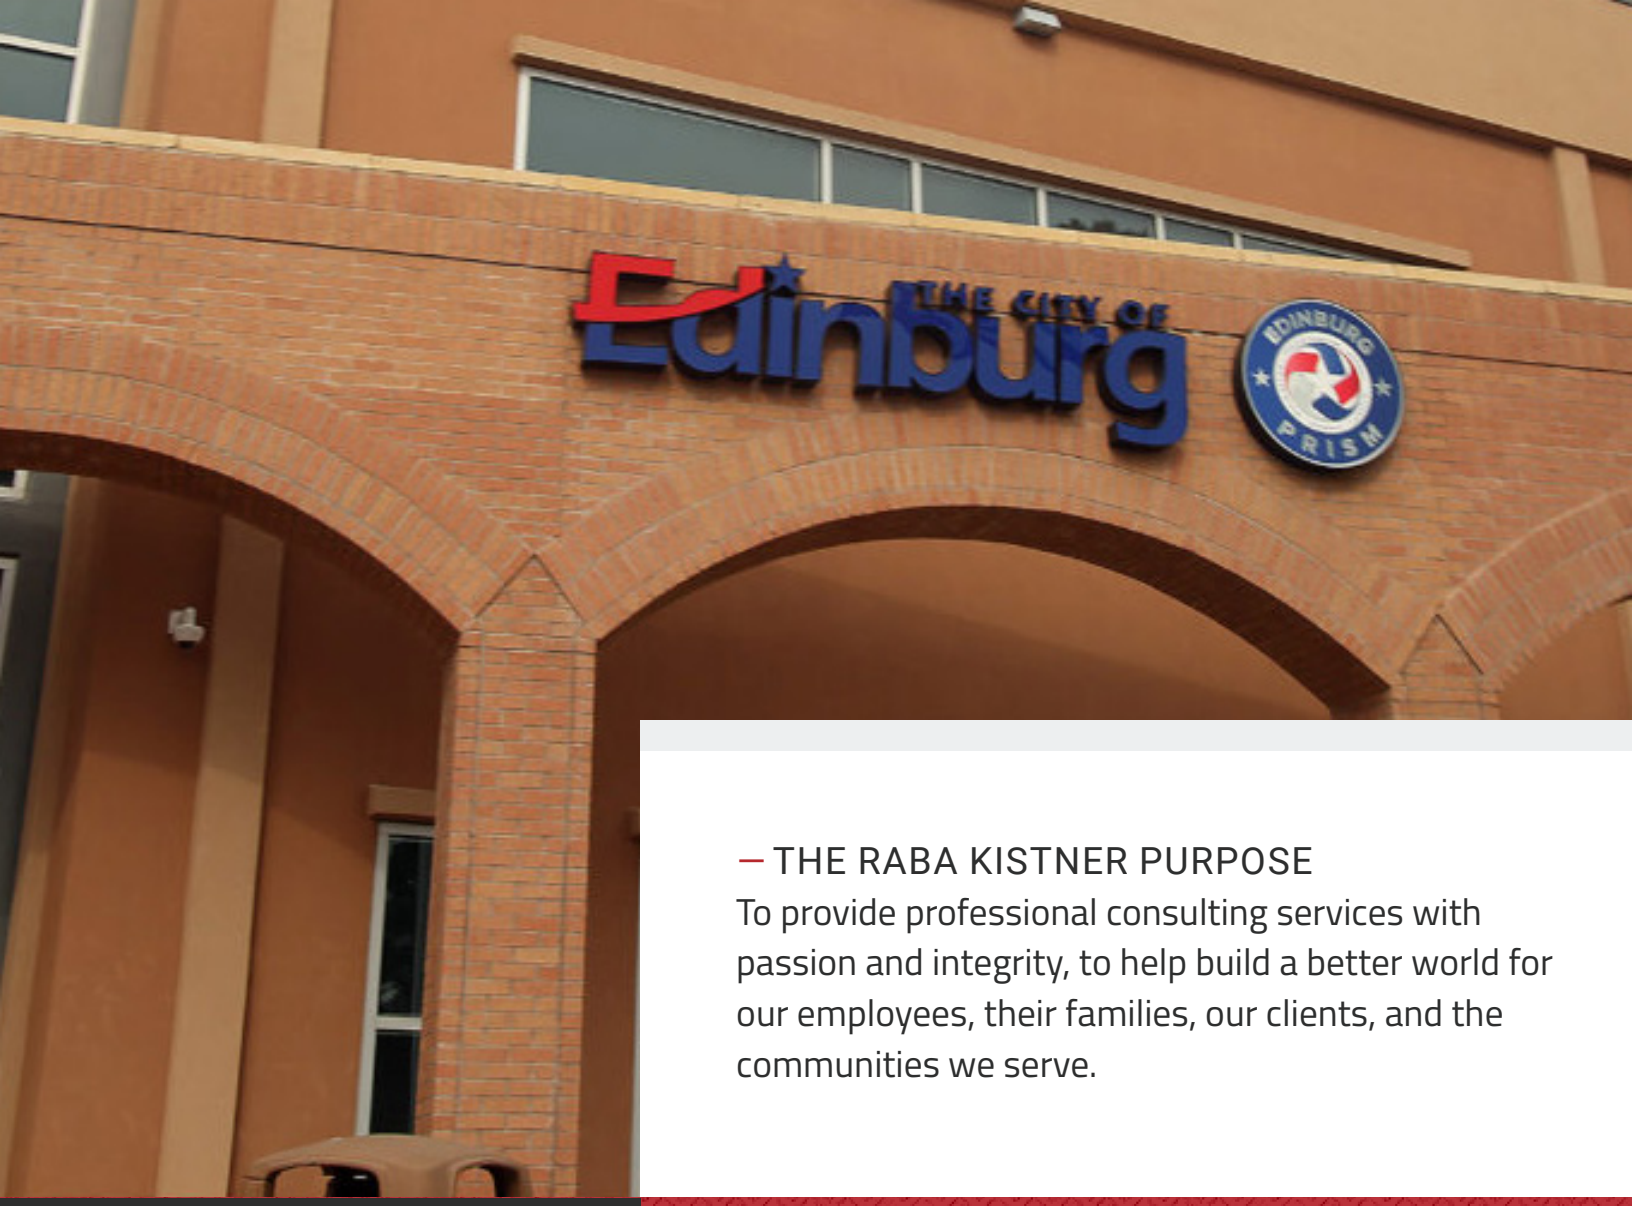
Being Responsive to the City of Edinburg's Needs

The following is a general outline of steps to be taken for all project requests:

- City requests services from Raba Kistner.
- Raba Kistner Project Manager collaborates with City and Raba Kistner staff to define work scope, budget and schedule.
- Project Manager assembles team to accomplish work scope.
- Project Manager reviews the scope, budget and schedule with team members and conducts “mission planning” to address project objectives.

Raba Kistner Information Management System

Raba Kistner has developed Raba Kistner Information Management System (RKIS), an award-winning electronic data management system that allows clients to access project-specific information online. RKIS offers the ability to transmit daily inspection reports and test results; perform statistical analysis of acceptance test results; and monitor deficiencies, non-conformances, and risks. RKIS provides authorized users access to information from anywhere in which internet access is available.



Raba Kistner will provide the City of Edinburg management, design, and general contracting team with user IDs and passwords to access information for specific projects. The RKIS system will help the team to track field technician scheduling and research project test results. This reduces the amount of time project managers would typically spend on the telephone and at the office seeking information or researching hard-copy test results. Our web-based system also contains an engineer’s desk in which spread sheets of test data and statistical data related to concrete soils data is available.

Field Technician Scheduling and Field Observation and Materials Laboratory Results

The City of Sullivan City and the construction team can access field technicians dispatch schedules and preliminary field observation and test results online through Raba Kistner's RKIS system. Raba Kistner's Project Manager can access all of the project’s field personnel by cellular phone for status of conditions at the project site.

Field Observation and Materials Laboratory Result

- Raba Kistner reports test failures immediately by telephone to the project contractor, owner’s representative, and design Engineer.
- Raba Kistner can give daily inspection reports and materials test results verbally within 24 hours after completion of each work shift.
- Raba Kistner will issue type-written reports within seven days after completion
- Raba Kistner field technicians document verbal conversations on the project site and include notations of such in the reports.

— THE RABA KISTNER PURPOSE

To provide professional consulting services with passion and integrity, to help build a better world for our employees, their families, our clients, and the communities we serve.

Statements of Qualifications for City of Edinburg-
Geotechnical Engineering and Construction Materials Testing Services Rotation
RFQ No. 2024-6

Dear Mr. Hinojosa:

Terracon Consultants, Inc. (Terracon) is pleased to submit the appended Statement of Qualifications (SOQ). **Terracon** is a multi-discipline consulting engineering firm. Our services include:

■ Environmental ■ Facilities ■ Geotechnical Engineering ■ Materials Testing

This SOQ has been prepared to demonstrate our capabilities to perform the requested professional engineering and testing services in a timely manner. As a Senior Principal within the firm and Pharr Office Manager, I will be available if you have any questions concerning our SOQ.

The Pharr Office is intimately involved in the City of Edinburg community; I am a proud citizen of the City of Edinburg residing in Los Lagos Golf Community. We participate on an annual basis by sponsoring the Edinburg July 4th Texas Cook'em High Steaks event and Edinburg Consolidated Independent School District (ECISD) Superintendent's Scholarship Golf Classic Tournament. We also contribute to the Edinburg Rotary Cajun Fest and joined a partnership with UTRGV baseball program during the 2017 season and continue to support them. These sponsorships are our way of being a member of the communities that have allowed us to provide our services to them. Furthermore, Terracon currently serves as a provider of Environmental (including asbestos and indoor air monitoring services), and On-Call Geotechnical Engineering, Construction Materials Testing, and Facilities services to ECISD.

I, Jorge A. Flores, P.G., will serve as the Client Manager and will be the point of contact for the City of Edinburg on all correspondence and communication pertaining to this SOQ. I am located in our Pharr Office at 1506 Mid-Cities Drive, Pharr, Texas, 78577 and can be reached at the office via telephone (956) 283-8254, fax (956) 283-8279, cell (956) 245-2319 or email jorge.flores@terracon.com.

F (956) 283-8279
Terracon.com

I am authorized to bind **Terracon** to the provisions of this SOQ and conduct final negotiations on behalf of the firm. If you have any questions, please do not hesitate to contact me at our convenience. We look forward to continue working with you and the City of Edinburg.

Sincerely,
Terracon Consultants, Inc.

Jorge A. Flores, P.G.
Senior Principal/Office Manager

Section B

FIRM QUALIFICATION AND EXPERIENCE

SECTION B
FIRM QUALIFICATION AND EXPERIENCE

Discuss the firm's experience and history in performing engineering and project management services in a timely manner, particularly for other governmental agencies in the past (2) years. Discuss the firm's uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

Terracon Consultants, Inc. (Terracon) is a dynamic and growing consulting firm providing multiple related service lines to clients at local, regional and national levels. Our services are delivered on a timely basis with consistently high value and attention to client needs. Local services include:

- Environmental
- Facilities
- Geotechnical Engineering
- Materials Testing

Since 1965, our employee-owned firm has delivered success for clients and employees. We help our clients succeed in their business ventures by effectively executing projects, controlling costs, and managing risk. Our clients appreciate this approach, and they know that we intend to be with them for the long term. Terracon's Pharr office has qualified certified technicians and a reputable engineering staff giving us the ability to respond quickly to our client's needs. Our responsiveness, high quality deliverables, practical solutions and competitive fees afford clients with a way of doing business that saves time and money.

Terracon has over 175 offices nationwide. In Texas, Terracon currently has more than 600 personnel with offices in Austin, Beaumont, College Station, Conroe, Corpus Christi, Dallas, El Paso, Ft. Worth, Freeport, Frisco, Houston, Laredo, League City, Longview, Lubbock, Lufkin, Midland, Pharr, Round Rock, San Antonio, Tyler and Waco. **The Pharr office will continue to provide consulting services for the City of Edinburg contract as needed.**

Terracon Consultants, Inc. is an employee-owned firm. No individual shareholder currently owns more than 5%. The stockholders in Pharr include:

Jorge A. Flores, P.G., Senior Principal	20 years with Terracon
Alfonso A. Soto, P. E., D. GE, F. ASCE, Senior Principal	22 years with Terracon
Stephanie M. Cardoza, MBA, Senior Associate	19 years with Terracon
Guadalupe Leal, Senior Associate	18 years with Terracon
Sylvia Quinones	18 years with Terracon
Eloy Palacios, Senior Associate	18 years with Terracon
George Flores	16 years with Terracon

In addition, Terracon has over 200 Principals and Senior Principals including the following Pharr Office Senior Principals:

Jorge A. Flores, P.G.–
Senior Principal/Office Manager
956-283-8254 Phone 956-283-8279 Fax

Alfonso A. Soto, P. E., D. GE, F. ASCE –
Senior Principal/Materials & Geotechnical Manager
956-283-8254 Phone 956-283-8279 Fax

Terracon consistently ranks as a top 25 design firm by Engineering News-Record. Our successful growth has included organic expansion and innovation as well as the acquisition of more than 60 firms with specialized capabilities. A focused and uncompromising dedication to safety has been integral to how we support our employees, clients, and communities.

Terracon has been providing a full range of environmental engineering, geotechnical engineering and construction materials testing services for numerous cities, municipalities, architects, engineers and contractors throughout the South Texas area for more than 20 years. The projects Terracon have completed illustrate the diversity and depth of our engineering knowledge and have ranged from small streets to the Bert Ogden Arena to the new Hidalgo County Courthouse.

Terracon understands the types of municipal projects a city of the caliber of City of Edinburg must undertake to keep it the "jewel" to the Rio Grande Valley. Some of those types of projects may have problems, concerns, or unique features where the City of Edinburg must be sure they have acquired the appropriate qualified engineering firm to use value engineering and expertise to make those projects a great success. We believe we are that engineering firm for the City of Edinburg!

We believe that a process must be implemented and well managed to help avoid cost overruns, change orders, and delays. It is a team effort that must receive priority attention from all involved. Important steps in this process include:

Geotechnical Engineering Services

1. Discuss the scope of the project with owner and team members. Determine expectations, critical issues, and schedule.
2. Prepare scope of services, with fee proposal, for geotechnical services to include:
   - Location, quantity and depth of borings
   - Anticipated laboratory testing
   - Engineering analysis, recommendations, and report preparation
3. After receiving Notice-to-Proceed, coordinate field services which include:
   - Access to boring locations
   - Utility locates
   - Special considerations (noise, time of day, security, etc.)
4. Involve subcontractors as necessary to complete the field and lab phases of the project
5. Issue draft report for review
6. Review comments and complete the report

The Project Manager will be the primary point of contact and will receive support as necessary from subcontractors, Terracon staff, and senior personnel.

Geotechnical Engineering Services

Design and construction of functional, cost-effective structures require a thorough understanding of local soil, rock, and groundwater conditions. Terracon provides a wide range of services to support all phases of a project, from preliminary design through completion of the building process.

Each local Terracon office, with access to the extensive geotechnical experience and expertise of engineers, geologists, and soils technicians throughout our company, can help to assess the risks associated with subsurface conditions. We participate as a vital member of the project team, focusing on project objectives and using innovative technologies to provide practical design recommendations. Our culture, systems, and structure enable us to excel at both small and large projects.

Our geotechnical services include:

- Slab on Grade Foundation Evaluation and Recommendation
- Special Construction Details for Removal of Ground or Surface Water, Existence of Expansive Clay, Hydrostatic Pressure, etc.
- Site Work
- Retention Systems
- Field Exploration
- Laboratory Systems
- Analysis and Reports
- Other Geotechnical Evaluations

With more than 250 geotechnical engineers, Terracon is well positioned to deliver quality, responsive, and cost-effective geotechnical engineering services, regardless of project size.

Construction Materials Testing Services

1. Defining the required tests and inspections based on project documents.
2. Determining who the person will be that actually schedules our services. Make sure that this person knows what is required and what is not required. Make sure that this person knows how to schedule our services.
3. Establishing procedures for reporting/record keeping/payment of retests, failures, etc.
4. Establish contact information to include the following with respect to report distribution:
    - Names
    - Phone Numbers
    - Email Addresses
5. Issue reports as requested by client. Available mediums include:
    - Electronic CMELMS
    - Email
    - Project Portal
    - Handwritten copy left at jobsite after completion of testing.
    - Verbal

Construction Materials Testing Services

Proper selection, quality and workmanship of construction materials play a vital role in ensuring that today's buildings and infrastructure perform adequately during long time periods. We work with clients to minimize material replacements, reduce the likelihood of deterioration, avoid potential failures, and investigate and evaluate construction materials related problems and failures when they do occur.

Local knowledge and resources, combined with the technical support available from our national network of offices, enable Terracon to respond quickly to ever-changing construction needs and schedules. We respond with innovative solutions and alternatives that target your long-term performance objectives while considering cost consequences. Our services are delivered on a timely basis with consistently high value and attention to client needs.

Our construction materials services include:

- Plans Review
- Earthwork Services
- Density Testing
- Post Construction Services
- Foundation Inspection Services
- Concrete Services
- Structural Steel Services
- Other Laboratory Construction Testing for Infrastructure and/or Building Projects

Terracon believes that the recording and delivery of test and observation results is as important as the collection of the data via field and laboratory activities. Terracon's Construction Materials Engineering Laboratory Management System (CMELMS™) automates the delivery of information and is focused on four major goals.

- Make all parties fully aware of our scope and role on the project so that none of the required materials testing services are overlooked or ignored.
- Establish an effective process for the rapid transfer of observation and material test results.
- Incorporate and maintain a tracking system for material performance, report distribution, and identification and clearance of non-conformance items.
- Communicate regularly with our client on test results and findings as well as budget and cost issues in order for the project to be both technically and financially successful.

Automated System for Scheduling, Reporting, Distribution, Invoicing and Budget Tracking

Once the project begins, Terracon utilizes our automated Proprietary CMELMS software program. This allows us to achieve better communication, more consistency and faster turnaround of reporting on the project. Data, observations and other information are easily entered into the system and reports are generated. The program automatically tracks all reports and provides immediate availability of test results. Additionally, the statistical performance of all concrete mixes being utilized on a project can also be monitored.

The CMELMS software can produce electronic or paper copies of reports for distribution. Reports can be distributed via traditional mail, electronic mail and/or Internet web pages can be established. The

program will also track our project budget on a daily basis and produce real-time budget reports and invoices for services provided.

We understand the importance of good communication especially in instances of changes in scope or site conditions, instructions and modifications to work requests demand instantaneous communication. To that end, every staff professional and field technician is provided with a company mobile telephone so that direct communication with office staff, subcontractors and the City of Edinburg's staff is available.

Office Technology/Computing/Web-Based Services

Terracon's IT Solutions department provides data management tools to assist our clients in the success of their projects. Through these services, Terracon is able to offer secure and efficient applications that will assist Terracon's ability to communicate and store critical project data, including project status, reports and task management. Laboratory data, final reports, specifications, etc., is password-protected only to designated Terracon staff. Desk Top Computers are electronically linked by a wide area network and to the Internet, allowing us to communicate, transfer, and analyze data, drawings, etc. on a real time basis. **Reports can be submitted electronically. As an alternative, we can establish a portal for the project to allow access to the test reports.**

Terracon has a vast resource pool of engineers, geologists, scientists and biologists to draw from its 175 offices nationwide in the event a client faces unique problems during or before construction**.** Terracon employs one of the largest staffs of certified technicians and Construction Materials Engineers in Texas. Our staff of more than 150 construction materials technicians and 69 Texas state licensed professional engineers allows us to respond to technical issues that the City of Edinburg may have on its projects.

We believe that we will be the best choice for the City of Edinburg contract because Terracon is an expert at the scope of work and we offer many other advantages and unique services. It is through our performance as a team member that Terracon has earned a reputation for quality.

Terracon has assigned a well-trained, qualified and experienced project manager to direct this work assignment. He has the experience and demonstrated ability to anticipate and solve staffing capacity and other issues, before they arise, and is dedicated to serve the City of Edinburg's needs.

Terracon is ready and able to assist the City of Edinburg in achieving its goals with our targeted approach to materials testing services. Terracon provides the following:

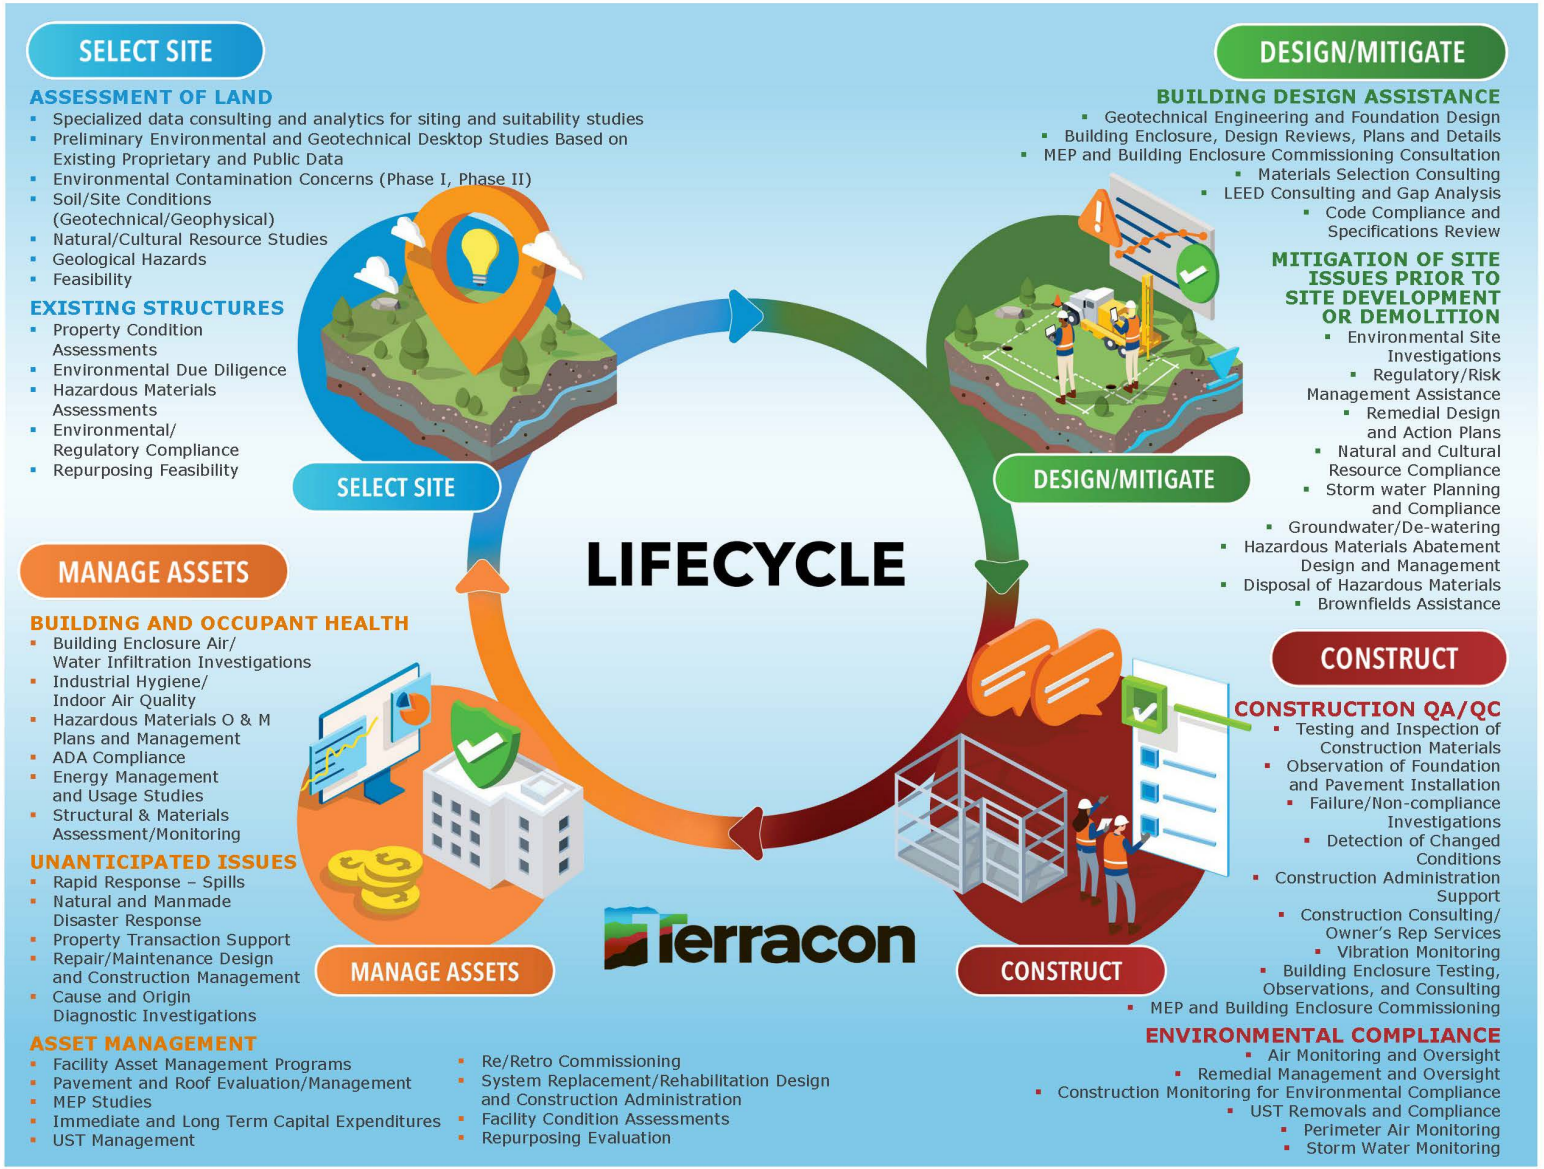
- **Team Approach -** Terracon proposes to function as an extension of the City of Edinburg organization. This team oriented concept allows us to interact with the design and the construction firms as well as the owner.

- **Staff Qualifications –** We will assign qualified and certified engineering technicians under the direct supervision a project manager. The core value of our professional engineer is to protect the public health, safety and welfare and we believe this core value is in line with the underlying core values of the City of Edinburg.

- **Staff Dedication -** The number of staff members will be flexible and will increase and decrease in correspondence with the level of need. The staff assigned to the City of Edinburg project will be responsible for the project from start to finish.

- **Laboratory and Field Equipment -** Terracon utilizes state-of-the-art laboratory and field equipment to perform the testing.

- **Quality Assurance -** Terracon's laboratory is A2LA accredited and maintains an internal audit and quality assurance program to ensure that a desired level of service and standards are preserved.



- **Budget Management -** Through the use of our proprietary Construction Materials Engineering Laboratory Management System (CMELMS), data recording and tracking has become streamlined.

- Test data and budget data retrieval is instantaneous. This reduces inefficiencies associated with paper filing and spreadsheet time/budget tracking.

- **Laptops –** Terracon utilizes full connectivity between our field personnel on the project with office engineering staff, and our clients. We currently provide laptops to 1,000 field personnel to go along with the smartphones they presently have. This enhances the value of our services as we continue to optimize our ability to communicate with our clients and ensure critical information is transmitted quickly to the project team.

At Terracon, we are continually looking for opportunities to provide more value to our clients and improve the way we do business. Hiring and training the most qualified people to work in construction materials is the most important investment we can make. In addition to having the right people in place, companies must invest in innovative systems that help deliver critical information to clients with speed and efficiency. Terracon's Construction Materials Engineering and Laboratory Management System (CMELMS™) gives us the ability to do just that. Through CMELMS, we can comprehensively manage all of the information we collect for our clients' projects. This system allows our project teams to easily track, manage, and distribute field and laboratory reports in real-time and quickly sort through the information to consult on critical issues. We can schedule our technicians, track costs and budgets, communicate progress, and keep clients up-to-date and informed every step of the way. This technology has allowed Terracon to achieve faster communication, more consistency, and faster turnaround of reports on projects.

There are many questions to ask when selecting a CMET consultant; how firms responsively and reliably communicate is important to meeting your needs. Watch Terracon's video titled, CMELMS – A Look Inside Terracon's Innovative Software, located at http://www.terracon.com/construction-materials for more information on our technology.

Terracon

As an owner, contractor, or engineer, your building or infrastructure projects' performance, durability, and safety are non-negotiable. Proper selection, quality, and workmanship of the building materials are essential to achieve these goals – and so is a trusted, reliable partner to provide materials consulting, testing, and inspection throughout design and construction.

Working with Terracon gives you access to the largest network of materials testing laboratories in the country and construction materials experts coast-to-coast who will work with you to minimize material replacements, reduce the likelihood of deterioration, avoid potential failures, and investigate and evaluate materials-related problems and failures when they do occur so you can move forward quickly and confidently with solutions.

Why Terracon?

Our local knowledge and resources, combined with the technical support available from our national network of offices, means Terracon will respond quickly to your construction needs and schedules no matter how often they change. We deliver innovative solutions and alternatives that target your long-term performance objectives while considering cost consequences. Terracon's proprietary data management system generates real-time test results of critical information, informing you of all test results and moving your project forward.

Our materials testing services include:

- Construction Quality Assurance/Quality Control
- Laboratory Testing Services
- Materials Engineering
- Structural Steel and Nondestructive Testing
- Special Inspection Services
  - Fabrication
  - Structural steel
  - Concrete
  - Masonry
  - Soils
  - Wood construction
  - Pile and pier foundations
  - Sprayed fire-resistive materials
  - Fire-resistant penetrations and joints
  - Exterior Insulation and Finish System (EIFS)
  - Mastic and intumescent fire-resistant coatings
  - Other specialty items/requirements

Why work with us?

Benefits of Terracon's Materials Services include:

- 24-hour report turnaround for non-conformance items and failing tests
- Custom report delivery that can be shared with multiple entities
- Real-time reporting that keeps you and your project team informed, saving you time and money

Quality assurance/quality control (QA/QC) consulting reduces uncertainty, maximizes quality, and confirms plans and specifications requirements throughout your project. Testing and QA/QC fees represent a small fraction of total construction expense but offer great value, reducing project costs by preserving schedule and identifying materials or construction defects early to quickly resolve them. Choosing Terracon QA/QC professionals as your dedicated owner's representative helps you mitigate risks and prevents issues down the road – giving you peace of mind now and in the future.

Identifying materials or construction defects early preserves your project schedule and reduces cost.

Our multidiscipline QA/QC capabilities give you unparalleled access to our materials, geotechnical, environmental, and facilities resources to address various issues immediately. Our responsiveness extends to our reporting: we turn around deviation reports within 24 hours, so you have the information you need to make decisions quickly, and construction remains on schedule.

Our on-site monitoring and testing are complemented by a national network of accredited materials testing laboratories, with subject matter experts who can consult on a range of specialty materials. We also provide QA/QC services at the fabrication shop before materials ship to the site, saving significant cost and time as issues are identified before leaving the shop.

Our QA/QC services encompass:

- QA/QC plans and specifications preparation and/or review
- QA/QC construction monitoring and testing
- Statistical evaluation and verification of construction materials and testing processes
- Third-party review of testing processes and results
- Sample identification, protection, chain-of-custody, storage, and disposition
- Data recording, identification, security, checking, routing, filing, and disposition
- Contractor work activities field documentation
- Construction materials submittal review

"Terracon has consistently been an outstanding performer, and their highly experienced staff has a keen understanding of the design and construction process and the goals and objectives of the lead designer, contractor, and owner."

Jim Klemz
Parsons Transportation Group

Special inspections are necessary to complete your construction project and provide a safe structure for the public. Although interpretation and enforcement of International Building Code (IBC) requirements can vary dramatically from one municipality to another, creating potential pitfalls in making sure that your structure meets safety and quality expectations.

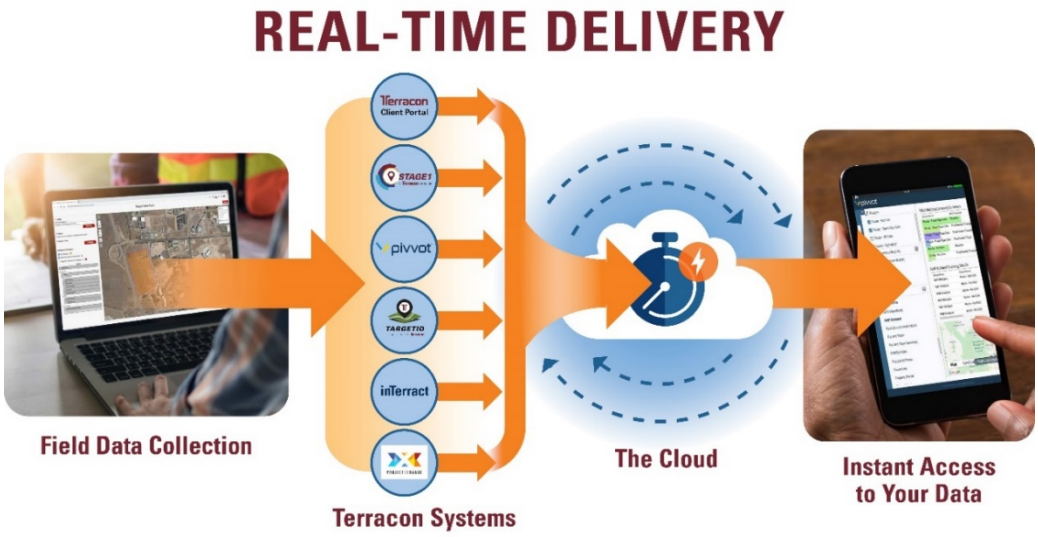
Terracon's Special Inspection services combine specialized technical expertise with local jurisdictional knowledge and relationships to ensure the proper fabrication, installation, and placement of structural components and other construction materials that require inspection under the IBC Section 1704.

Our construction inspectors work closely with the owner, designer, local building officials, contractors, engineer of record, and other stakeholders to facilitate communication, review specifications to identify any aspects that are not in compliance with local code requirements, and solve or even prevent problems, so your project stays on budget and schedule.

Terracon provides its special inspection services to both public- and private-sector clients.

What Sets Us Apart?

We work with your design team throughout the entire design process, providing feedback for the statement and schedule of special inspections and interpreting local code requirements to avoid costly changes during construction. During the construction phase, you benefit from our ability to communicate with the designer to understand expectations and evaluate the drawings to be sure your project meets jurisdictional requirements.



- Our approach encompasses everything you need for a successful testing and inspection program:
- Well-defined scope for testing & inspection (T&I) to minimize costly change orders
- T&I plan for distribution to parties involved, keeping everyone informed
- Terracon certifies T&I personnel and ability to staff for required workload
- Consistent and constant communication between all parties, including:
  - Preconstruction T&I meeting
  - Additional milestone meetings before the start of key construction phases
  - Understand local building code requirements and invite local officials to meetings as requested

Our expertise includes all types of work for construction where special inspections are required by IBC 2009 Section 1704:

- Special Inspection Services
  - Fabrication
  - Structural steel
  - Concrete
  - Masonry
  - Soils
  - Wood construction
  - Pile and pier foundations
  - Sprayed fire-resistive materials
  - Fire-resistant penetrations and joints
  - Exterior Insulation and Finish System (EIFS)
  - Mastic and intumescent fire-resistant coatings
  - Other specialty items/requirements

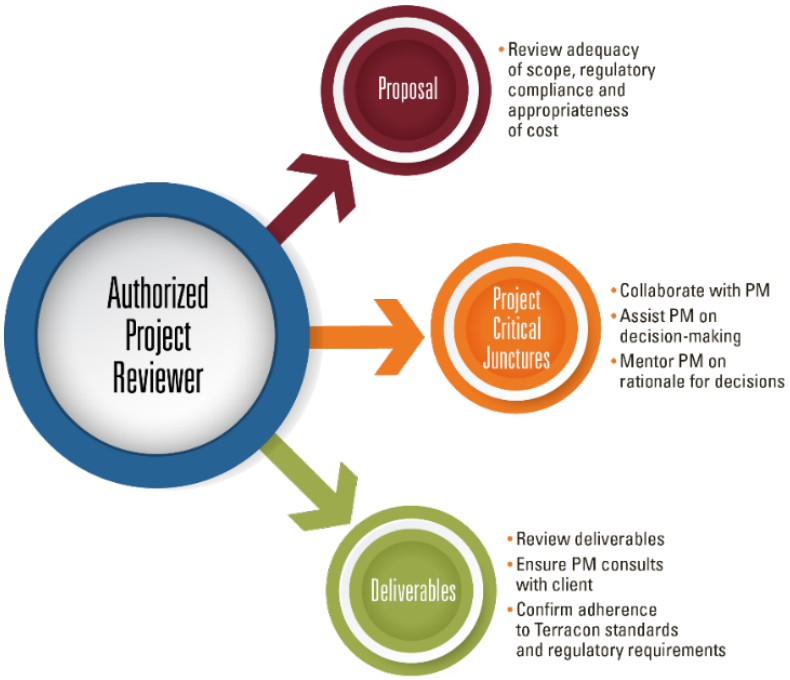
Having the ability to know what is happening on your project site in real-time means you and your project team are always well-informed. Portals and platforms display information on a visually intuitive and interactive dashboard, allowing project stakeholders to view data almost instantaneously. This insight into the project throughout each day makes it easier than ever to resolve issues on the spot instead of waiting for the report to be delivered at the end of the project or after the field team has left the site. With data at your fingertips, real-time delivery gives you access to information from anywhere to make decisions faster, ultimately saving you time and money.

Real-time delivery keeps your data alive. We can send and receive data through mobile devices and sensors embedded in everyday objects. These platforms take information from what used to be a verbal conversation, and a field report sent days after the data was collected to immediate access to crucial information, including test status, progress, and outcomes from anywhere and at any time.

We have worked to seamlessly integrate real-time delivery into our systems and platforms to help streamline your projects. When information is integrated into a Terracon internal system, the information populates throughout each system and maximizes the power and accessibility of your data for brilliant, timely decision-making. We customize your client portal based on priorities, risk management needs, and project scope. Before your portal is activated, we assemble a client kick-off meeting to engage with your team and conduct training on how they can use the portal to access and filter data, retrieve or share reports and other information, and collaborate with our team in real time. We provide access to whoever can retrieve the data in the different formats needed.

Real-time delivery also enhances project quality control and efficiency. Our innovative and proprietary tools allow you to see if an area is or is not ready for construction and expose any outstanding deviations. Real-time delivery uses data to help decrease the number of design changes needed and enable more of a collaborative decision-making approach. Hence, you make informed decisions earlier in the site development process, which leads to significant savings over the project's lifespan.

Terracon's Quality Program Overview



With tens of thousands of projects each year of all sizes, large and small, Terracon offers clients various services, requiring us to have processes in place and roles and responsibilities assigned to provide a high level of service and quality for each project.

Instead of relying solely on post-review discoveries in a reactive mode, the project manager and APR collaborate throughout the project to make proactive decisions together.

Terracon projects are staffed by well-qualified professionals performing a variety of required tasks. Each person is responsible for understanding the essential project goals and client needs. Through training, evaluation, and external certifications and licensing, as appropriate, our staff demonstrates they are qualified and adequately experienced to perform assigned tasks consistent with applicable standards, regulations, policies, and procedures.

In addition to individual responsibilities, collaborative project review is a crucial component of Terracon's quality program. The level and extent of review depend on the deliverable or task. Field and laboratory data, calculations, opinions, recommendations, and conclusions are reviewed by a second set of eyes for quality control. Laboratory processes are also subject to internal quality systems to ensure data accuracy, as noted in Terracon's Quality Management System (QMS).

Project managers, Authorized Project Reviewers (APRs), and the necessary project management and technical expertise collaborate to achieve quality objectives at critical project junctures. Depending on size and complexity, some projects may be subject to additional oversight and expert review. Project execution is confirmed through the project manager's and APR's signatures on project deliverables.

Materials Projects Quality Program Management

Each Terracon office providing materials services is required to establish, implement, and maintain a quality system in its operation. The QMS Manual for Materials provides in-depth and standard procedures, forms, and documentation as well as filing guidance and processes. Our quality system meets the requirements of the American Society of Testing and Materials (ASTM) and the AASHTO Accreditation Program (AAP).

- Successful implementation of the QMS system means the following measurable objectives are being met:
- Implement and maintain a viable calibration and/or standardization system for pertinent laboratory and field equipment, traceable to National Institute of Standards and Technology (NIST) standards. Equipment calibrations, standardizations, checks, and maintenance will be completed with corresponding documentation within 30 days of the due date.* (*Note: Calibration of equipment on projects following the Quality Assurance for Nuclear Facilities Requirements (NQA-1) must be completed by the due date as there is no allowance to exceed the stated frequencies)

- Ensure test results are accurate and reproducible independent of the laboratory or field technician performing them. Terracon's operations will participate in applicable proficiency sample programs for each material group and/or test performed in-house. Operations will respond to any proficiency rating over two standard deviations from the mean with appropriate corrective action(s) within 60 days of the final report.

- Implement and maintain a training/evaluation program that allows employees to become and remain proficient in test procedures, equipment operation, and other specific job-related duties. Terracon personnel will receive initial training and evaluation of competency internally. No employee will be allowed to perform a specific test without direct supervision until competency has been confirmed and documented in Terracon University.

- Ensure Terracon's operations comply with the policies, procedures, and requirements of the QMS. Each Terracon operation will participate in applicable audits at the required frequency. All audit nonconformance items will have appropriate Corrective Action Response(s) (CAR's) completed within 60 days of the final audit report date.

WHAT IS SEAMLESS CONSTRUCTED DELIVERY?

Seamless Constructed Delivery is how we perform our construction materials testing and inspection services daily. We continuously apply new processes, methodologies, and techniques to solve project challenges and meet your needs. Guided by our employee owners' experience and technical capabilities, we have spent decades adapting our project delivery process, as Seamless Constructed Delivery, into four main components: Responsiveness, Performance, Quality, and Delivery.

RESPONSIVENESS

Before the Project

Communication

Communication is essential to successful project delivery. Our communication and coordination begin when we learn about the project and continue through project delivery. Expectations are established to anticipate needs and quickly respond, especially during critical junctures and milestones in the construction schedule.

At the proposal and project setup phase, our professionals explore the needs of a project so that all parties concur on the following:

- budgets,
- scope of work,
- scheduling needs,
- safety requirements,
- communication channels and frequency, and
- understanding of challenges.

By understanding these items deeply, we can anticipate the project team's needs and proactively develop solutions that will help keep your project moving forward.

Budgeting

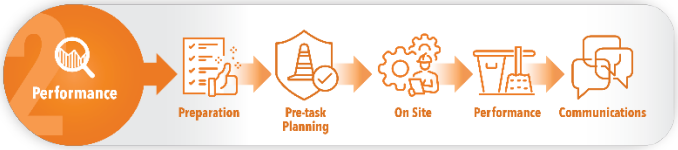
Developed by Terracon professionals, our Pricing enables our project managers, estimators, and subject matter experts to work together on delivering consistent pricing, improving manpower forecasting, and driving on-time project delivery of our deliverables. The pricing tool is pre-loaded with all rates and laboratory costs, allowing our project managers to develop an accurate budget via a simple schedule and quantities.

During the Project

Project Initiation

The first and most important task is to have a kick-off meeting with all critical staff and you. All staff will be informed of safety concerns and mitigations, scope, schedule, available budget, and communication protocols at this meeting. Safety discussions do not stop at the kick-off meeting. They continue daily through our pre-task planning discussions. Our *Incident and Injury-Free™1 (IIF™)* safety culture is strong and woven into all tasks we conduct inside the office, our laboratories, and on jobsites. Safety awareness and injury prevention helps keep everyone safe.

Behind the scenes, our project managers have set up the project in our proprietary project management and delivery system. Project specifications, manpower needs, budgets, and report distribution lists are set up and ready to dispatch our field personnel to the project site with all the appropriate information and data collection reports.



Dispatching

Terracon has a robust system that only allows certified field staff to be dispatched to your job site for the day's testing needs. When our dispatchers or project managers receive a call from a contractor or client, the system can automatically ensure that we appropriately assign certified personnel for the work. The inspector will receive a calendar invite with all the appropriate information needed to perform the task.

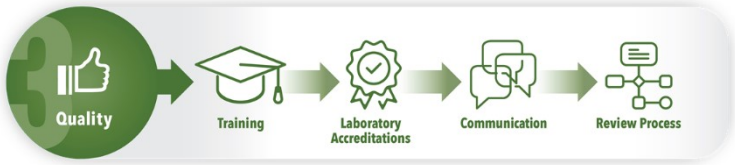
Subconsultant Utilization

We prioritize building the best team internally and externally to deliver a successful project. A successful project also incorporates experienced and effective leadership. We aim to create a collaborative team to deliver a successful project while positively impacting our communities and partners.

Occasionally, we may need to partner with outside subconsultants to meet specific project requirements. We hold our subcontractors to the same standards as ourselves, including safety and quality. In addition, we have an exceptional record of meeting and exceeding diverse business supplier goals on various project sizes. We take great pride in promoting diverse business participation whenever possible. We partner with small, minority, and/or woman-owned business team members we know and trust.

PERFORMANCE

The day begins with our technicians and inspectors reviewing the weather forecast and confirming with several project team contacts that the day's activities are on schedule, which significantly helps to reduce unnecessary trips to project sites. Once staff members have verified all planned activities, vehicles are loaded and ready to proceed safely. Upon arriving on-site, our technicians carefully review slated activities and traffic patterns to identify parking places to park and verify that our pre-task planning remains current. When safely parked, we notify your site representative that we are on site and ready to perform our work.

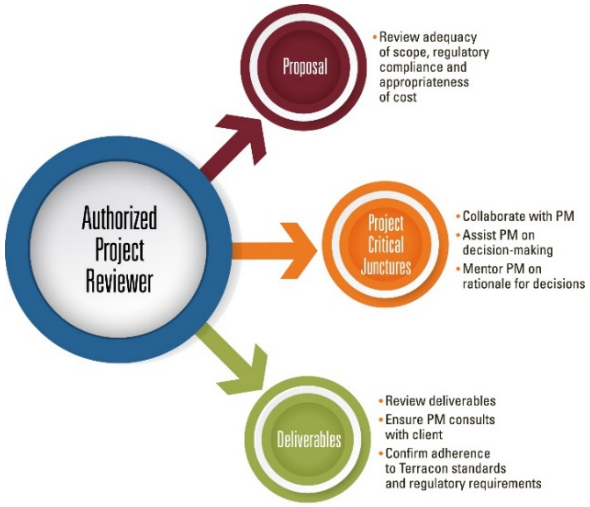


Our technicians utilize the latest technology in performing their work. We utilize one of our applications on our mobile devices to collect data from our day's activities. These enhanced and robust applications allow us to collect and enter our test and inspection data daily and submit the information digitally. Beyond simplifying the data collection process, the apps offer more advantages. Our applications are tied to our phone's GPS, which references the plan set in our systems. This means our technicians can see where they are standing on the plans when on site. Utilizing our mobile device's GPS eliminates misplaced tests in the field and geolocates all testing and inspection data within our deliverables. This geographic information greatly enhances methods for us to deliver data to you.

Our seamless data collection apps offer the following advantages:

- Form-based data collection – no missing information or lost papers
- Safe-Right procedures embedded in the forms
- Geographic information embedded in the report
- Pictures taken on-site are automatically tied to the report
- Dramatically reduced report turn-around times as complete reports can be submitted in the field
- Technicians always know where they are on the plan – no misplaced tests
- Test standards embedded in the forms
- Site maps embedded in the forms

Technology is an excellent tool; however, our tools are only as good as those using them and none so vital as our technicians' communication in the field. Our field personnel know the importance of reporting deviations and failed tests as quickly as possible to limit the amount of non-conforming material placed. We also make it a point to coordinate with site leaders before leaving the job site for the day. In this way, we do not miss unplanned site operations that may need attention. You can count on our field personnel to proactively communicate with you.



QUALITY

Quality Leadership and Training

We engage and collaborate with a cross-functional matrix of management roles at the executive, senior, and operations levels and with service line leaders to spearhead certain aspects of our quality program. This structure provides specific quality leadership and processes to address the unique challenges of each service we provide.

Quality oversight includes the selection, vetting, approval, and ongoing evaluation of qualified Authorized Project Reviewers (APRs), who oversee every project's quality. We regularly evaluate our quality program components at the company and office levels through committees staffed by executive-level managers and service line leaders to balance operational perspectives with specific service line considerations. Each committee reviews representative project work samples associated with each individual project reviewer to assess the reviewer's effectiveness.

Through training, evaluation, and external certifications and licensing, our staff demonstrates that they are qualified and experienced to perform assigned tasks consistent with applicable standards, regulations, policies, and procedures.

Role of the APRs and SMEs

Project managers, APRs, and the necessary project management and technical expertise collaborate to achieve quality objectives at critical project junctures. Depending on size and complexity, some projects may be subject to additional oversight and expert review.

Without exception, every project is assigned an APR who collaborates with the project manager on quality and technical objectives for the project's duration. The APR is engaged at the proposal stage and remains on the project through execution and closeout.

The APR plays a leading role in our quality program, highlighted by the following four primary areas of project responsibility:

- Quality Oversight: The APR reviews the proposal and is involved at the kick-off meeting and at significant milestones, stages, and critical junctures providing direction and insight to guide the project to its completion.
- Coaching: The APR coaches and advises the project manager on various aspects of the project emphasizing quality, risk, on-time delivery, budget, the scope of work, and other client expectations.
- Risk Management: The APR guides the project team to assess properly project-specific risk.
- Safety Awareness: The APR raises awareness at the project level by communicating with the team to focus attention on their own personal safety and the safety of all project team members.

It is true that every once in a while, the technical needs of an aspect of a project can exceed the skills of our Project Manager. When this situation arises, Terracon has pre-identified and organized into categories our subject matter experts (SME). These SME's are available at a moment's notice to assist in resolving any project issue or challenge.

Our Pharr office has provided services to over 450 projects in the last decade for municipal clients throughout the Rio Grande Valley. Terracon has provided engineering consulting services for the City of Edinburg since 2008 (56 projects) City of McAllen since 2009 (412 projects), City of Pharr since 2009 (75 projects), and many others local municipalities in the Rio Grande Valley.

Terracon's Pharr office has **provided Geotechnical and/or Materials related services on more than 250 projects for local governmental agencies and municipal clients** in the past five years.

The municipal projects below demonstrate our experience and expertise projects relating to following types of projects: ■ Public Works ■ Public Utilities ■ City Improvement Projects (CIP).

Our experience is proven through our work with the City of Edinburg other comparable municipalities (see projects below).

Project No. 1
Name of Project:
City of Edinburg
Geotechnical, Construction Material Testing and Engineering, and Environmental Services
2020-Current
2008-2018
Scope of Services:
Terracon has performed a number of geotechnical engineering studies and has been retained to perform geotechnical soils investigations and construction materials testing services for the various streets and alleys for the City of Edinburg. Terracon's staff drilled soil borings and performed laboratory testing on the recovered soil samples. The data collected was used to design the pavement sections for the reconstruction of asphaltic concrete roadways and installation of new water, storm drains and sewer systems. Our pavement analysis involved performing California Bearing Ratio (CBR) tests for use in the pavement analysis. The AASHTO method for pavement design was used. Our construction materials testing services have included sampling of the pavement subgrade and base materials for moisture-density relationships in the laboratory, performing in-place field density tests on the pavement subgrade and base courses, and coring the asphaltic concrete surface to check for proper thickness and density. The costs of our geotechnical (soils) and construction materials services were completed within budget. *Both of these services are on-going with the City of Edinburg. The following are select individual projects the Terracon Pharr office has recently worked on.*

Number	Name	Service Line
88241140B	City of Edinburg - Memorial Park New Restrooms Facilities	Materials

Mr. Eduardo Mendoza, P.E.
City of McAllen
210 N. 20th Street
McAllen, Texas 78501
(956) 688-1151

Scope of Services:
Terracon is currently providing geotechnical engineering and construction materials testing services at various City of McAllen projects. We provide multiple entities with copies of the results of the construction materials testing in a timely manner. We also perform geotechnical explorations, including soil borings, for the preparation of geotechnical reports complete with boring logs, laboratory results, geotechnical recommendations, and site plans for the development of construction documents for various improvements within the city. The costs of our services were completed within budget. *These services are on-going with the City of McAllen.*

Our TxDOT experience is proven through the many contracts we have had with TxDOT in the past; please see below. Also, Terracon is currently serving as a provider for the South Region Commercial Lab program with TxDOT. Please contact Keith Craig, P.E., TxDOT Consultant Contract Administrator at 806-748-4581 should you have any questions.

Project No. 5

Name of Project:
TxDOT Professional Service Contract

Name of Representative:
Pharr District 21, Texas Department of

Pharr, Texas

Geotechnical Engineering
Construction Materials
Engineering and Testing Services

Transportation (TxDOT)
Hidalgo, Cameron, Willacy, Starr Counties, Texas
Mr. Pedro Alvarez, P.E., District Engineer
Texas Department of Transportation
(956) 702-6101

Scope of Services

Terracon provided services to TxDOT Pharr District from 1996 to February 2007. TxDOT was upgrading and reconstructing its major roads and highways to meet the growth demands of the Rio Grande Valley. Terracon's geotechnical services included drilling of soil borings for bridges, retaining walls, and pavements, and performing laboratory tests on the recovered soil samples for design purposes. Terracon's personnel construction materials testing personnel provided services on road and highway projects that are under construction. Typical services included monitoring of the batch plant operations during batching of concrete and asphaltic concrete, sampling of the pavement subgrade and base materials for moisture-density relationships in the laboratory, performing in-place field density tests on the pavement subgrade and base courses, sampling of fresh concrete to measure temperature, slump, mold cylinders for compressive strength testing, and beams for flexural strength testing. *The following are individual projects the Terracon Pharr office has completed.*

Projects:

- FM 494, Phases 1 & 2, CSJ Nos. 0864-01-068 and 0864-01-069 – Geotechnical Services
- US 83 North, CSJ No. 0038-06-045 – Geotechnical Services
- US 281/BSIF Connector – Materials Testing & Inspection Services
- Rio Grande City Port Access Road – NEPA Services (Environmental Assessment)

Project No. 6

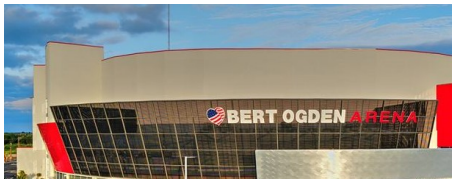
Name of Project:
State Highway 365 (SH-365)
Hidalgo County, Texas
2014

Scope of Services:

Terracon performed a geotechnical engineering study for the proposed SH 365 - Segment 1 to be located in Hidalgo County, Texas. This 7.5-mile highway will include several bridge and retaining wall structures as well as the relocation of two existing levees.

Name of Representative:	**Address:**	**Phone Number:**
Mr. Phillip Pawelek, P.E.	S&B Infrastructure, Ltd. 5408 N. 10th Street McAllen, TX 78504	(956) 926-5000

In addition, Terracon has performed services on several high-profile projects, please see the following page.



Project 1 New Hidalgo County Courthouse – Edinburg, Texas

Terracon provided Geotechnical Engineering and Materials Testing during construction of the new Hidalgo County Courthouse. Pressuremeter (PMT) tests were conducted to evaluate design bearing capacities that allows for more accurate determination of the strength of the subsurface soils. Non-destructive testing (NDT) in the form of the Sonic Eco/Impulse Response test method to evaluate the length and integrity of the shaft. Located in the heart of downtown Edinburg, the 10-story building will accommodate 471,000 square feet of space and support 24 courts and six additional courts for the future.

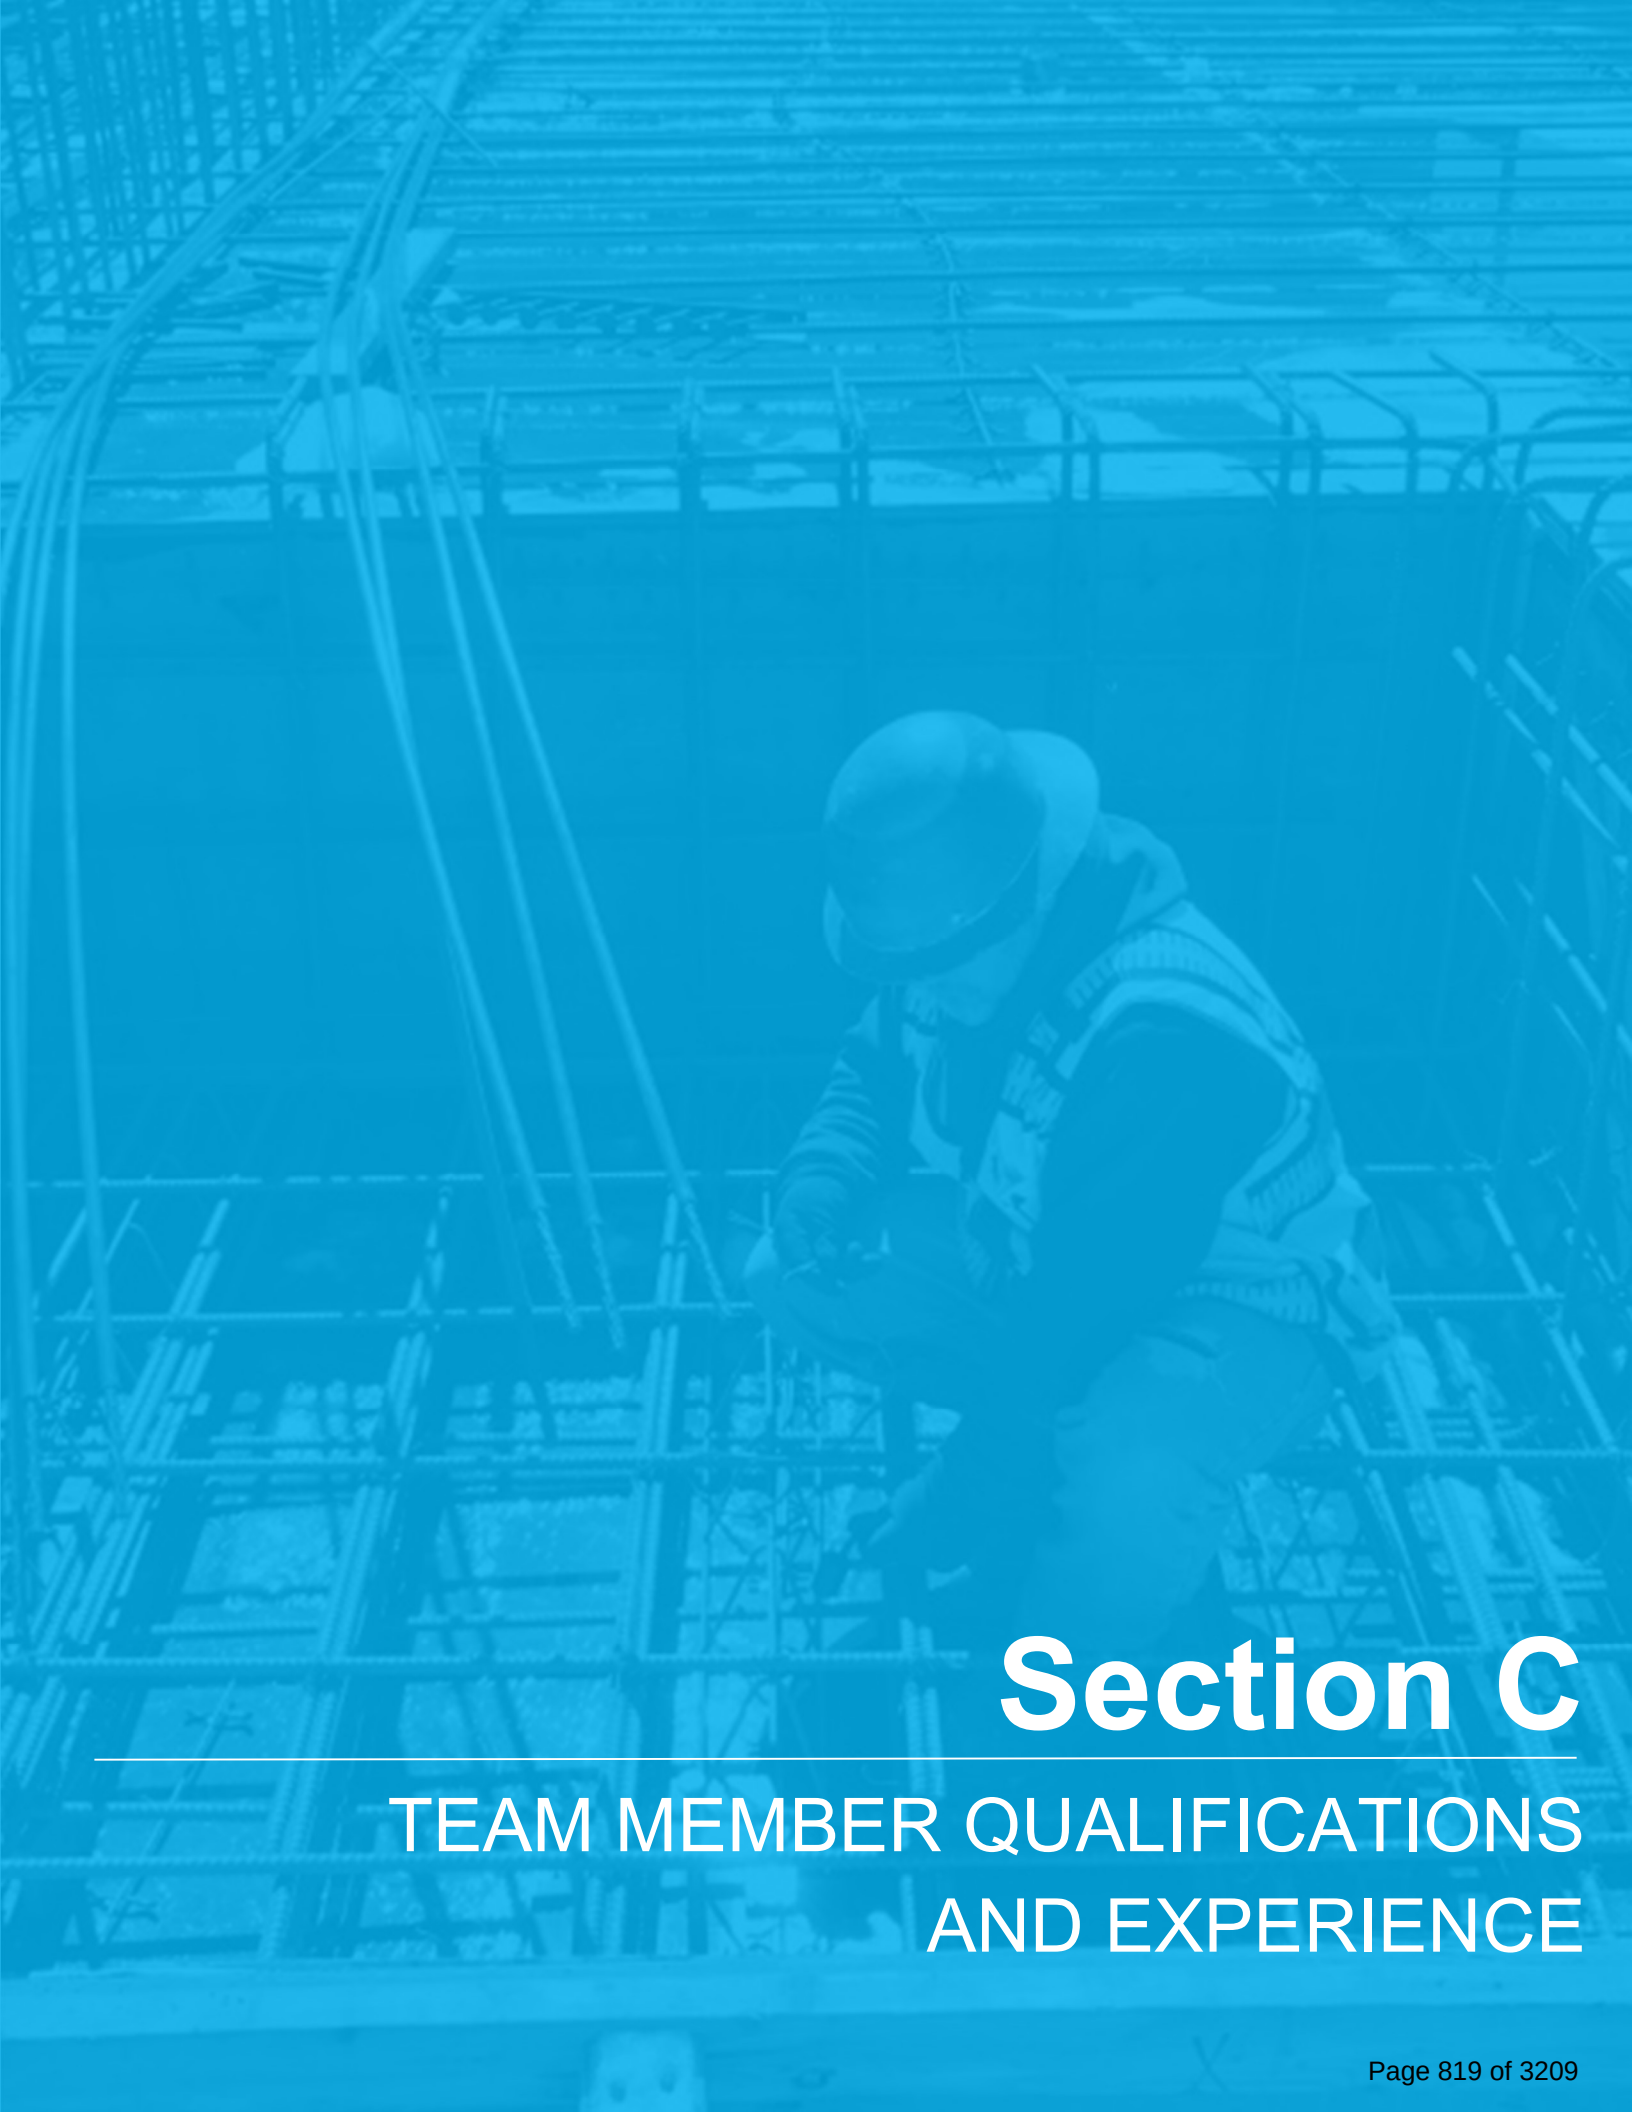
Project 2 Bert Ogden Arena – Edinburg, Texas

The new Bert Ogden Arena is the new home of the Rio Grande Valley Vipers. The arena is located along Expressway 281 at Alberta Road and with 9,500 seats, will be the largest in the Rio Grande Valley. The $83 million sports and entertainment venue set to open by August 2018 includes an approximately 260,000 sq. ft. multi-story arena building and associated pavements. Terracon's involvement included Geotechnical Engineering services that included conducting exploratory borings, associated laboratory testing, in-situ pressuremeter testing, and pile load testing as well as currently providing field and laboratory quality control testing for the duration of the project.

Project 3 South Texas Medical Academic Building, Edinburg, Texas

An 88,000 sq. ft. University of Texas Rio Grande Valley School of Medicine Medical Academic Building is nearing completion in Edinburg, Texas. The project included the construction of a three-story building and a single-story building with a connecting shade structure. Associated pavements are also at the site. Terracon's involvement included Geotechnical Engineering as well as field and laboratory quality control testing for the duration of the project.

Project 4 Brownsville-South Padre Island International Airport– Brownsville, Texas



Terracon provided geotechnical engineering for the owner and is currently providing materials testing for the contractor during construction of the New Passenger Terminal at the Brownsville-South Padre Island International Airport. The project includes the construction of an approximate 20,000 square foot (sf) two-story building; and, new landside pavements consisting of parking areas, loading areas and internal driveways.

Project 5 City of Los Fresnos New City Hall Building – Los Fresnos, Texas

Terracon is currently providing Materials Testing and Special Inspections for the new 11,000SF City Hall Building in Los Fresnos, Texas. These tests and inspections include but are not limited to the following materials: concrete reinforcement, cast-in-place concrete, structural steel, earthwork, lime soil stabilization, asphalt paving, and concrete paving.

Alfonso A. Soto, P. E., D. GE, F. ASCE will serve as the Project Manager and Project Engineer. He will be the primary technical contact for the City of Edinburg and will be responsible for resolving quality of service issues and will provide overall direction, management and oversight of all Terracon services for this project.

Mr. Soto's early project activities will include a review of the project plans and specifications to obtain an understanding of the proposed construction, as well as coordination with the City of Edinburg concerning project processes including project authorities, scope of services, schedule, budget and communication processes.

During this phase, Mr. Soto will also attend preconstruction meetings with the Design Team and Contractors to meet project personnel, gather additional information about the project and to answer any questions concerning project conditions and project testing and inspection procedures.

At the start of construction, qualified Project Technicians will be assigned to the project to support the field testing and inspection phase of the project. We anticipate using the services of technicians who have the appropriate certifications as outlined in the City of Edinburg Scope of Services.

While on site during construction, the Technicians will be available to communicate directly with the City of Edinburg Representative, and will communicate frequently with Mr. Soto concerning the status

of the project and testing results via the company-owned Blackberry Bold ™ cell phones. Mr. Soto will be responsible for keeping the City of Edinburg's Representative apprised of the current status of the testing and inspection associated with the project and, as part of our quality assurance process, and he will be responsible for obtaining the appropriate level of internal review of the testing reports and documentation developed in the field.

Proprietary Construction Materials Management Software

For management of the project, Terracon uses our automated Construction Materials Engineering Laboratory Management System™ (CMELMS). This management system is focused on four major goals related to the construction materials testing services:

- Make all parties fully aware of our scope and role on the project so that none of the required materials testing services are overlooked or ignored.
- Establish an effective process for the rapid transfer of construction observation and material test results.
- Incorporate and maintain a tracking system for material performance, report distribution, and identification and clearance of non-conformance items.
- Communicate regularly with our client on test results and findings as well as budget and cost status in order for the project to be both technically and financially successful.

Mr. Soto will meet with the Project Team prior to the start of construction and review the construction materials testing requirements. This meeting will highlight the overall testing requirements for the project. It will allow the project team to define and discuss items that are of a critical nature so that special attention can be paid and prevent such items from negatively impacting the schedule or construction quality.

Once the project begins, Terracon will utilize our automated CMELMS software program. This allows us to achieve better communication, more consistency, and faster turnaround of reporting on the project. Test data, observations, and other information are easily entered into the system and reports are generated. The program automatically tracks all reports, provides immediate availability of test results, and, in addition, the statistical performance of all concrete mixes being utilized on a project can also be monitored.

The CMELMS software can produce electronic or paper copies of reports for distribution. Reports can be distributed via traditional mail, electronic mail and/or Internet web pages can be established where our reports will be posted. The program will also track our project budget on a daily basis and produce real-time budget reports and invoices for services provided.

Materials Expertise

Terracon and our designated team members are capable of providing a wide variety of materials testing and consulting services. Some of these services include welding procedure review and welder

performance qualification testing, pipe weld non-destructive testing, inspection of structural steel metal framing, floor flatness and levelness testing, in-place temperature monitoring, moisture vapor emission testing, roofing inspection, coatings inspection and mil thickness verification, non-destructive testing of hardened concrete, concrete and asphalt coring and materials engineering, specialized testing of asphalt products and flexible base materials, and various forensic evaluations of concrete, asphalt, structural steel, and pipe. Our ability to provide such specialized services make Terracon the most versatile and capable consulting firm in the Rio Grande Valley.

Deficiency Log

Through our CMELMS program, we have the capability to efficiently track and develop a listing of our tests and observations that are not in compliance with the approved plans and specifications for the project. This deficiency log is maintained throughout the project and serves as a valuable tool that can be used to track deficiencies until they are resolved. Maintenance and distribution of a deficiency log serves to notify the responsible parties that deficiencies were noted and corrective action is required. This reduces the risk of uncorrected deficiencies affecting the construction.

American Association of State Highway and Transportation Officials
AASHTO Accreditation Program Certificate of Accreditation
This is to signify that
Terracon Consultants Inc.
in
Pharr, Texas
has demonstrated proficiency for the testing of construction materials and has conformed to the minimum requirements established in AASHTO R 18 set forth by the AASHTO Highway Subcommittee on Materials (HSOM).
The scope of accreditation can be viewed on the AAP Directory of Accredited Laboratories on www.amrl.net.
Bud Wright, Executive Director
Moe Jamhidi, AASHTO HSOM Chair
AASHTO THE VOICE OF TRANSPORTATION
AAP AASHTO R18

Our Pharr office is fully equipped to perform field and laboratory testing of soils, concrete and asphalt- the **Terracon Pharr Laboratory is accredited by AASHTO Materials Reference Laboratory (AMRL) in Soils and Aggregates**.

Our engineering and technical staff are qualified and trained to perform the geotechnical and construction material engineering and testing services listed in the RFQ. Terracon can deliver the items and data being requested in the RFQ scope of services. The following is a general breakdown of the Pharr office personnel.

Licensed Texas Engineer (P.E.)	1	Assistant Materials Project Manager	2
Engineer-in-Training (E.I.T.)	2	Logger	1
Licensed Texas Geologist (P.G.)	1	Lab Manager	1
Graduate Engineer	3	Engineering Technicians	17
Geologist/Asbestos & Mold Consultant	1	Administrative Manager	1
Environmental Scientist	4	Client Development Manager	1
Environmental Technician	1	Receptionist/Secretary	1
CMT Dispatcher	1		
CMT Project Managers	3	**TOTAL**	**41**

Most of our employees are cross trained for maximum efficiency. For example, our logger is also a CMT technician and our asbestos project manager an air monitoring technician. *One of our CMT PMs is also a Graduate Engineer-we have 2 full time CMT PMs.

The Prime Contact for our *Team* for the entire project will be **Jorge A. Flores, P.G.** who will serve as the Client Manager for all projects. When the City of Edinburg assigns a project to Terracon, Mr. Flores will be involved in contract negotiations.

Alfonso A. Soto, P. E., D. GE, F. ASCE, Senior Geotechnical and Construction Materials Testing Engineer will serve as the Senior Project Manager. He will be the primary technical contact for the City of Edinburg and will be responsible for resolving quality of service issues and will provide overall direction, management and oversight of all Terracon services for this project. **Mr. Soto has received his Diplomate, Geotechnical Engineering (D.GE) certification.** This professional certification is offered through the Academy of Geo-Professionals and ensures that geotechnical engineers have specialized knowledge and skills in their field of practice. **He is also a Fellow of the American Society of Civil Engineers (ASCE).** Through civil engineering ASCE Fellows have made significant contributions and developed creative solutions that change lives around the world. It is a prestigious honor held by fewer than 4 percent of ASCE members.

Mr. Soto's early project activities will include a review of the project plans and specifications to obtain an understanding of the proposed construction, as well as coordination with the City of Edinburg concerning project processes including project authorities, scope of services, schedule, budget and communication processes. During this phase, Mr. Soto will also attend preconstruction meetings with the Design Team and Contractors to meet project personnel, gather additional information about the project and to answer any questions concerning project conditions and project testing and inspection procedures. At the start of construction, qualified Project Technicians will be assigned to the project to support the field testing and inspection phase of the project. We anticipate using the services of technicians who have the appropriate certifications as outlined in the City of Edinburg Scope of Services. While on site during construction, the Technicians will be available to communicate directly with the City of Edinburg Representative, and will communicate frequently with Mr. Soto concerning the status of the project and testing results via the company-owned smart phones and laptops. Mr. Soto will be responsible for keeping the City of Edinburg's Representative apprised of the current status of the testing and inspection associated with the project and, as part of our quality assurance process, and he will be responsible for obtaining the appropriate level of internal review of the testing reports and documentation developed in the field.

Chuck A. Gregory, P.E., Senior Principal/Vice President/Regional Manager of Terracon, will be an In-House Consultant to the project. His duties will involve technical and administrative input including proposal review and contract negotiations. He will provide assistance and direction on technical design issues that may arise. Mr. Gregory may also provide final technical review, to include signing and sealing of technical documents. *Mr. Gregory will be available during the duration of the project*. His chargeable time to the project will not exceed about 2 percent of the project time.

After the project is assigned to Terracon, Mr. Flores will transfer any geotechnical and construction material testing projects to Mr. Soto, who in turn may have one of the following Terracon Project Managers assist him:

- Martin Reyes, E.I.T. - Geotechnical Engineering
- Sam Mustapha Rahmaninezhad, Ph.D., A.M.ASCE- Geotechnical Engineering
- Stephany Chacon, E.I.T. - Geotechnical Engineering
- Samantha Leal – Geotechnical Engineering
- Guadalupe Leal - Construction Materials Testing
- Jorge Perez – Construction Materials Testing
- George Flores - Construction Materials Testing
- Dariana Sagastegui - Construction Materials Testing
- Nestor Alvarado – Construction Materials Testing

The Project Managers will supervise and coordinate the daily activities of the project for the Geotechnical Engineering and Construction Materials Engineering aspects of the project. They will engage any required subcontractors such as drillers or specialty testing requirements. They will perform technical analyses, technical review and project management. *These individuals will be available during the duration of each project*. Their chargeable time to each project will vary between 20 and 40 percent of the project time depending on the scope of each assignment.

Certified Technicians

Terracon's personnel are NICET, ACI, CWI and TxDOT certified with experience on many large construction materials testing projects in South Texas. Many of Terracon's professional and technical staff serve on the boards or regularly participate in organizations developed to improve the science of engineering testing and inspection such as the American Concrete Institute, ASTM, American Association of Laboratory Accreditation, ASCE Materials Section, the Texas Council of Engineering Laboratories and the National Institute of Certified Engineering Technicians.

JORGE A. FLORES, P.G.
OFFICE MANAGER/SENIOR PRINCIPAL

PROFESSIONAL EXPERIENCE

Mr. Flores is the office manager of Terracon's Pharr, Texas office and is responsible for supervising all geotechnical engineering, construction materials testing and environmental services in the Rio Grande Valley area. He also manages administrative, marketing and personnel development activities.

Mr. Flores has over twenty (20) years of professional experience. His project management experience includes directing environmental professional and staff level individuals in conducting due diligence environmental site assessments, developing site health and safety plans, conducting asbestos surveys, initial soil and ground water investigations, bioremediation and landfarm system operation, waste characterization, stormwater sampling, quality assurance and quality control validation, budget and project planning for clients, and risk assessments to assist clients potential risk at various types of sites.

Mr. Flores has extensive expertise in performing field activities for groundwater monitoring and sampling, preparing file logs for soil boring and installation of monitoring wells, providing field observation for UST removal projects, and sampling and characterizing unknown waste streams. In addition, he has conducted vapor monitoring during tank de-gassing, aquifer slug and pump tests, and environmental site assessments (ESAs) for property transactions to determine potential environmental risk and liability due to past and present conditions.

PROJECT EXPERIENCE

City of Edinburg
Mr. Flores has served as client represenative and office manager on all City of Edinburg projects.

Texas Commission on Environmental Quality (TCEQ)
Leaking Petroleum Storage Tank (LPST) – Texas
Project manager for numerous LPST retail fuel facility sites in Texas. Conducted site investigations, including soil boring, monitoring well and sparging point installtions; groundwater monitoring and sampling events; and product recovery, including regulator reporting.

TCEQ Texas Risk Reduction Program (TRRP) Investigations and Report Preparation – Texas
Project manager for numerous Formerly Used Defense Sites, including solid waste management units, Dona Ana and MacGregor missle ranges and retail dry cleaning facilities under the TRRP and Voluntary Cleanup Program. Soil boring installation included geoprobe, hollow-stem, solid-fligt, air rotary and mud-rotary drilling. Groundwater monitoring and sampling included hand-bailing, vacuum enhanced recovery and low-flow techniques.

Education
Bachelor of Arts, Geology, University of Texas, 1996

BNC Environmental Services, Inc., Project Manager, 1996-2001

ALFONSO A. SOTO, P.E., D.GE, F.ASCE

GEOTECHNICAL AND CONSTRUCTION MATERIALS DEPARTMENT MANAGER

PROFESSIONAL EXPERIENCE

Mr. Soto is a Senior Principal in the firm and the Department Manager of both Geotechnical Engineering and Construction Materials Engineering and Testing (CMET) services in the firm's Pharr office. He oversees the daily operations and technical aspects in these service lines. He is a Level 3 Authorized Project Reviewer (APR).

Alfonso has over 25 years of experience in geotechnical engineering investigation and design, construction materials testing, project management and inspection services. His expertise includes domestic and international projects in countries such as Mexico, several countries in Central and South America, and West Africa.

Alfonso's professional experience includes design and evaluation of foundation systems for several types of structures; design of new and rehabilitation of existing roadways; geotechnical evaluations of levee systems; energy projects such as power lines, power plants, substations, wind and solar farms, among others.

Alfonso has participated as a lead engineer in a wide variety of projects, including the following sectors: infrastructure, transportation, energy, industrial, commercial, and residential.

PROJECT EXPERIENCE

Wastewater Treatment Plant Expansion-Edinburg, TX

Mr. Soto was the lead geotechnical engineer and Senior CMT Project Manager during the improvements of a Wastewater Treatment Plant on M. Road and Chapin Road in Edinburg, Texas. The improvements included: Carrousel Building, Clarifiers, Post Aeration Building, Solids Building, Intermediate Effluent Lift Station and Sludge Transfer Building.

Regional Detention Pond-Edinburg, TX

Mr. Soto was the lead geotechnical engineer during the study to evaluate the subsurface water conditions and the soil classification at the Regional Detention Pond site on Chapin Street in Edinburg, Texas.

Solid Waste Management Facility-Edinburg, TX

Mr. Soto was the Senior CMT Project Manager during the construction of a new Solid Waste Management Facility in Edinburg, Texas. Seven structures are included in this project varying in plan area from approximately 3,000 to 25,000 square feet (sf). Terracon's involvement included providing field and laboratory quality control testing services for the duration of the project.

Education

Master of Engineering, Geotechnical Engineering, Texas A&M University, 1997

Bachelor of Science, Civil Engineering, 1991

Registrations

Professional Engineer: Texas, No. 94153
Colegio de Ingenieros de Venezuela, No. 80006

MARTIN REYES, E.I.T.
GEOTECHNICAL GROUP MANAGER

PROFESSIONAL EXPERIENCE
Martin Reyes has over 25 years of professional civil engineering experience with specialization and expertise in the technical areas of Geotechnical Engineering, Materials Engineering and Testing, Pavement Design, Foundation Design and basic surveying knowledge. His experience includes the evaluation of shallow and deep foundations; improvement of new and existing roadways, earthwork, shallow and deep foundation construction and observation, site paving, all phases of concreting, post-tensioning, structural masonry, and structural steel operations.

Mr. Reyes has been involved in materials engineering applications for the design and evaluation of experimental test sections; operation and supervision of plant operations; design and preparation of concrete mixes, asphalt testing, ready mix testing, aggregate testing, batch plant inspections, base and subgrade stabilization, sprayed-on-fireproofing evaluation, and drill pier foundation observation on major construction projects.

Martin's duties as a staff engineer and project manager have consisted of supervision/performance of geotechnical and construction observation and testing services during construction of numerous structures. Duties include, but not limited to assisting the field and laboratory technical staff in assignment of testing. Review of test results data and project coordination with the client, contractor and/or local, state and government agencies.

PROJECT EXPERIENCE

USMS Prison – Laredo, Texas
Provided geotechnical over site during subsurface exploration. Performed calculation for PVR, bearing capacity for shallow and deep foundation, building subgrade preparation and pavement design.

International Boulevard Extension – Laredo, Texas
Performed geotechnical investigation and provided pavement design recommendations in accordance to the City of Laredo standards.

Laredo Community College 2nd Campus – Laredo, Texas
Served as a project manager for a subsurface soil and groundwater investigation at a 50-acre site. The construction consisted of 7 buildings for a total of 600,000 square feet of plan area. Geotechnical investigation included drilling operation, subsurface water monitoring, performing engineering calculations with regard to bearing capacity of existing soil, reduction of soil movements at the site and provided recommendations for shallow foundation system and pavements.

Education
Instituto Tecnologico de Nuevo Laredo, Tam., Mexico
B.S. in Civil Engineering, 1988

Registrations
Currently seeking Texas P.E. registration

Certifications
Passed Fundamentals of Engineering Exam in 2002;

Nuclear Gauge Safety Training Class on April 8, 1995;

Radiation Safety Officer Training Class on August 7, 2004;

DOT Basic HazMat Training Class on January 13, 2009.

Work History
Terracon Consultants, Inc., April 2015 – present in Pharr, TX.

Terracon Consultants, Inc., May 2010 – April 2015 in Laredo, TX.

Drash/Terracon, September 2001 – September 2007 in Laredo, TX.

Trinity Testing Labs, Inc. June 1995 – September 2001 in Laredo, TX.

Anderson Consultants, Inc. 1993 – June 1995 in Laredo, TX.

STEPHANY CHACÓN, E.I.T.
GEOTECHNICAL SPECIALIST

PROFESSIONAL EXPERIENCE
Mrs. Chacón is a Geotechnical Specialist in the firm's Pharr office. Her training includes geotechnical design, site investigation and subsurface exploration for public works, educational, commercial and residential projects.
Stephany's experience includes performing geotechnical investigations to recommend foundation systems for various types of facilities. These structures have been supported on mats, slabs-on-grade, spread footings piles, and drilled piers. These facilities generally require recommendations for site preparation including grading/leveling the site, pavements for parking and driveways, and expansive soil evaluations. Stephany has also performed the geotechnical investigations for street and drainage projects to provide soil recommendations for roadways, pavements and utility lines.

PROJECT EXPERIENCE

UT System -South Texas Medical Academic, Edinburg, TX
Performed a geotechnical engineering study for the construction of the new South Texas Medical Academic Building located within the grounds of The University of Texas Pan American. The project includes the construction of a three-story and a single-story academic buildings supported on deep foundations and associated pavements/parking areas.

Edinburg Consolidated Independents School District - LBJ Elementary Gym Improvements, Edinburg, TX
Performed a geotechnical engineering study for the additions to the existing LBJ Elementary Gymnasium.

State Highway 365 (SH-365) – Hidalgo County, Texas
Mrs. Chacón was the assistant geotechnical engineer during a geotechnical investigation and provided foundation design recommendations for the proposed SH 365 - Segment 1 to be located in Hidalgo County, Texas. This 7.5-mile highway will include several bridge and retaining wall structures as well as the relocation of two existing levees. Terracon provided minimum recommendations required to satisfy sliding, overturning, bearing capacity and global stability for the Mechanically Stabilized Earth (MSE) walls. We also conducted seepage, levee global stability and settlement analysis for the proposed levees.

Martinal – FM 511 Waterline Loop, Brownsville, TX
Performed a geotechnical engineering study for the installation of pipelines along and across existing roads and canals within the limits of the City of Brownsville.

City of Pharr -Pharr/Reynosa Bridge Lane Expansion-Pharr, TX
Performed a geotechnical engineering study for the Pharr-Reynosa Bridge Lane Expansion. The project includes the lane expansion of the Pharr-Reynosa International Bridge.

SAM MUSTAPHA RAHMANINEZHAD, PH.D., A.M.ASCE

GEOTECHNICAL PROJECT MANAGER

PROFESSIONAL EXPERIENCE

Mr. Rahmaninezhad is a full-time senior geotechnical engineer in Terracon's Pharr, Texas, office.

Sam assists in developing the scope of work, cost estimate, schedule, and specifications for routine geotechnical engineering projects; analyzes field and laboratory data, perform engineering calculations, and prepare geotechnical engineering reports to provide foundation and pavement design recommendations for the project elements.

Sam supervises geotechnical field staff including graduate/field engineers, engineering technicians, exploration teams, laboratory staffs and other support personnel and works under the supervision of a Professional Engineer.

PROJECT EXPERIENCE

API 650 Tanks - Winker County, Texas

Mr. Rahmaninezhad was project manager during the geotechnical exploration for two proposed new tanks at Marathon Petroleum facility located at 7405 County Road 201 in Winkler County, TX. The project site is an existing tank farm. Two new storage tanks are going to be added to this facility. The new tanks will be 190 feet in diameter and 50 feet in height. We minimized the difretional settlement for these thanks.

West Hillmont Road Pavement Evaluation - Odessa, Texas

Mr. Rahmaninezhad was project manager for the West Hillmont Road. It is an asphalt-paved road constructed early in 2019. Terracon conducted a pavement component evaluation. We found the distresses observed on the asphalt pavement were caused by the asphalt mixture including asphalt content, aggregate gradation and asphalt density does not meet Ector County road pavement requirements, and the absence of base material in the asphalt pavement component.

The Shops at Sherwood – San Angelo, Texas

Mr. Rahmaninezhad was project manager during the geotechnical exploration that has been completed for the Shops at Sherwood that is located 5749 Sherwood Way in San Angelo, Texas. The area of the site is 35.04 acre. The site is not developed. The entire site is covered with mesquite trees and other shrubs.

GUADALUPE (LUPE) LEAL

CONSTRUCTION MATERIALS TESTING DEPARTMENT MANAGER

PROFESSIONAL EXPERIENCE

Guadalupe Leal is a Project Manager in the CME division, with more than 22 years experience in quality control testing and inspection services for the engineering, manufacturing, and construction industry. Guadalupe is employed in Terracon's Pharr office. As a Project Manager, Guadalupe is responsible for recording data and preparing a daily report of his tests and activities. Guadalupe is also involved with overseeing and the training of our engineering technicians. Guadalupe is familiar with the standards and procedures on field and laboratory testing, inspection, and reporting published by AASHTO (Association of American State and Highway Transportation Officials), ASTM (Association of Soil and Testing Materials), and TXDOT (Texas Department of Transportation). Guadalupe performs his quality control testing and inspections on projects for the private, commercial and government sectors.

PROJECT EXPERIENCE

Solid Waste Management Facility-Edinburg, TX

Mr. Leal was the Construction Materials Testing Project Manager during the construction of a new Solid Waste Management Facility located near the intersection of Redbird and Jasman Street in Edinburg, Texas. Seven structures are included in this project varying in plan area from approximately 3,000 to 25,000 square feet (sf). Terracon's involvement included providing field and laboratory quality control testing services for the duration of the project.

South Middle School Traffic and Circulation Improvements -Edinburg, TX

Mr. Leal was the Construction Materials Testing Project Manager during the improvements on the parking lot located at South Middle School in Edinburg, Texas. Terracon's involvement included providing the field and laboratory quality control testing for the duration of the project.

City of McAllen-City of McAllen, TX

Project manager on all construction materials testing for the City of McAllen including, but not limited to, South Texas College West, Village Center Subdivision, Taylor Commercial Point Subdivision, Palms Tower, Live Oak Subdivision, and currently Citrus Grove, Charlie's Freedom Station, Asian Garden, Sam's and Valencia Market Place

Sapphire Condos & Parking Garage-South Padre Island, TX

Mr. Leal was the Construction Materials Testing Project Manager during the construction of two, 32-story residential condominium towers, a three-level parking structure, bungalow units, and other amenities that include a swimming pool, terrace retaining walls, and general parking areas.

Education

UTRGV, Bachelor of Science Civil Engineering, Fall 2023

Certifications

Radiation Safety and Nuclear Gauge Training
Texas Department of Transportation Level 1A
Texas Department of Transportation Level 1B
PTI Level I and II
NICET Level 1 Soils
NICET Level 1 Asphalt
NICET Level 1 Concrete
Floor Flatness – F – Number Measurement

Work History

Terracon Consultants, Inc., Project Manager 2006- present

Transit, Plant Manager, 2003-2006

SouthTex Concrete; Plant Manager 1991-2003

JORGE L. PEREZ

CONSTRUCTION MATERIALS TESTING GROUP MANAGER

PROFESSIONAL EXPERIENCE

Jorge L. Perez is a Project Manager in Terracon's Pharr office CME division with more than 15 years' experience in quality control testing and inspection services for the engineering, manufacturing, and construction industry. As a Project Manager, Jorge is responsible for providing engineering support, manage a variety of projects, and supervise operations for field and laboratory testing of soils, concrete, asphaltic concrete, and steel. Jorge is also responsible in directing critical maintenance of testing equipment calibration and operation. Jorge also has 4 years' experience in geotechnical engineering and have performed geotechnical and facilities investigations and report preparation, as well as foundation and pavement design under the guidance of senior professional engineers. Jorge has worked in a variety of settings throughout the industry giving him well-rounded experience and his work contributes to success in helping clients select appropriate means and methods for achieving their project objectives.

Education

B.S. Civil Engineering
Texas A&M University, Kingsville
2007

Certifications

Radiation Safety and Nuclear Gauge Training
Radiation Safety Officer

Work History

Terracon Consultants, Inc., Project Manager 2019- present

Raba Kistner, Inc., CME Supervisor, 2008-2019

Researcher and Lab Assistant Center of Research Excellence in Science and Technology-Research of Environmental Sustainability of Semi-Arid Coast Areas (CREST-RESSACA) 2006-2007

Engineer Tech II
Texas Department of Transportation
2007-2007

Professional Memberships

American Society of Civil Engineers (ASCE), Member

South Texas College Advisory Committee for CADD-Civil Drafting, Member

PROJECT EXPERIENCE

City of Edinburg - Tule Recreation Center
Mr. Perez was the Construction Materials Testing Manager during construction of an approximately 28,000sf metal frame building with CMU exterior, 60,000sf of asphaltic pavements and related utilities and drainage improvements.

City of Edinburg - Lull Subdivision Improvements
Mr. Perez was the Construction Materials Testing Manager during the construction of the demolition and reconstruction of approximately 17,700LF of asphaltic pavement, including preparation of the subgrade and flexible base. 52,000sf of concrete driveways impacted will also be reconstructed and tested along with curb & gutters, and inlets. Sidewalk testing is included as an alternate.

City of Edinburg - Las Encinitas Subdivision Phase II
Mr. Perez was the Construction Materials Testing Manager during the construction of a new subdivision that include roadways and related subdivision facilities.

City of Edinburg - Las Rogers Coves Phase A
Mr. Perez was the Construction Materials Testing Manager during the construction of a new subdivision that include roadways and related subdivision facilities.

City of Edinburg - Russell Subdivision Park Subdivision Phase III & IV
Mr. Perez was the Construction Materials Testing Manager during the construction of a new subdivision that includes roadways and related subdivision facilities.

City of Edinburg - Ensenada Estates Mr. Perez was the Construction Materials Testing Manager during the construction of anew subdivision that includes roadways and related subdivision facilities.

GEORGE FLORES
FIELD SUPERVISOR/PROJECT MANAGER

PROFESSIONAL EXPERIENCE

Mr. Flores provides varied field experience on projects in Texas and several other states. As the Pharr office's Drilling Coordinator and Materials Field Supervisor, Mr. Flores over 11 years of experience to Terracon.

Mr. Flores is an experienced engineering technician responsible for supervising drilling activities, Cone Penetrometer Tests (CPT), Seismic Cone Penetrometer Tests (SCPT), Field Vane Shear Tests (VST) and Flat-blade Dilatometer Tests (DMT) as well as perfroming some of these In-Situ Testing on jobsites throughout United States. He has completed more than 800 CPTs, 300-SCPTs, as well as over 80 DMTsand 4 VST's.

Education
Bachelor of Business, South Texas College, 2014

Licenses
Class B CDL-Commercial
O.S.H.A 30+10
Safety Course
American Red Cross First Aid
American Red Cross Adult CPR

Work History
Terracon - Engineering Technician, 2008-present

U.S. Army; McAllen, TX, Team Leader; Scope Truck Driver; 2006-2008

Pennant Services; Oilfield Technician; 2005-2006

PROJECT EXPERIENCE

U.S. Army Corps of Engineers – Illinios, Iowa, La Porte, Galveston, and South Texas

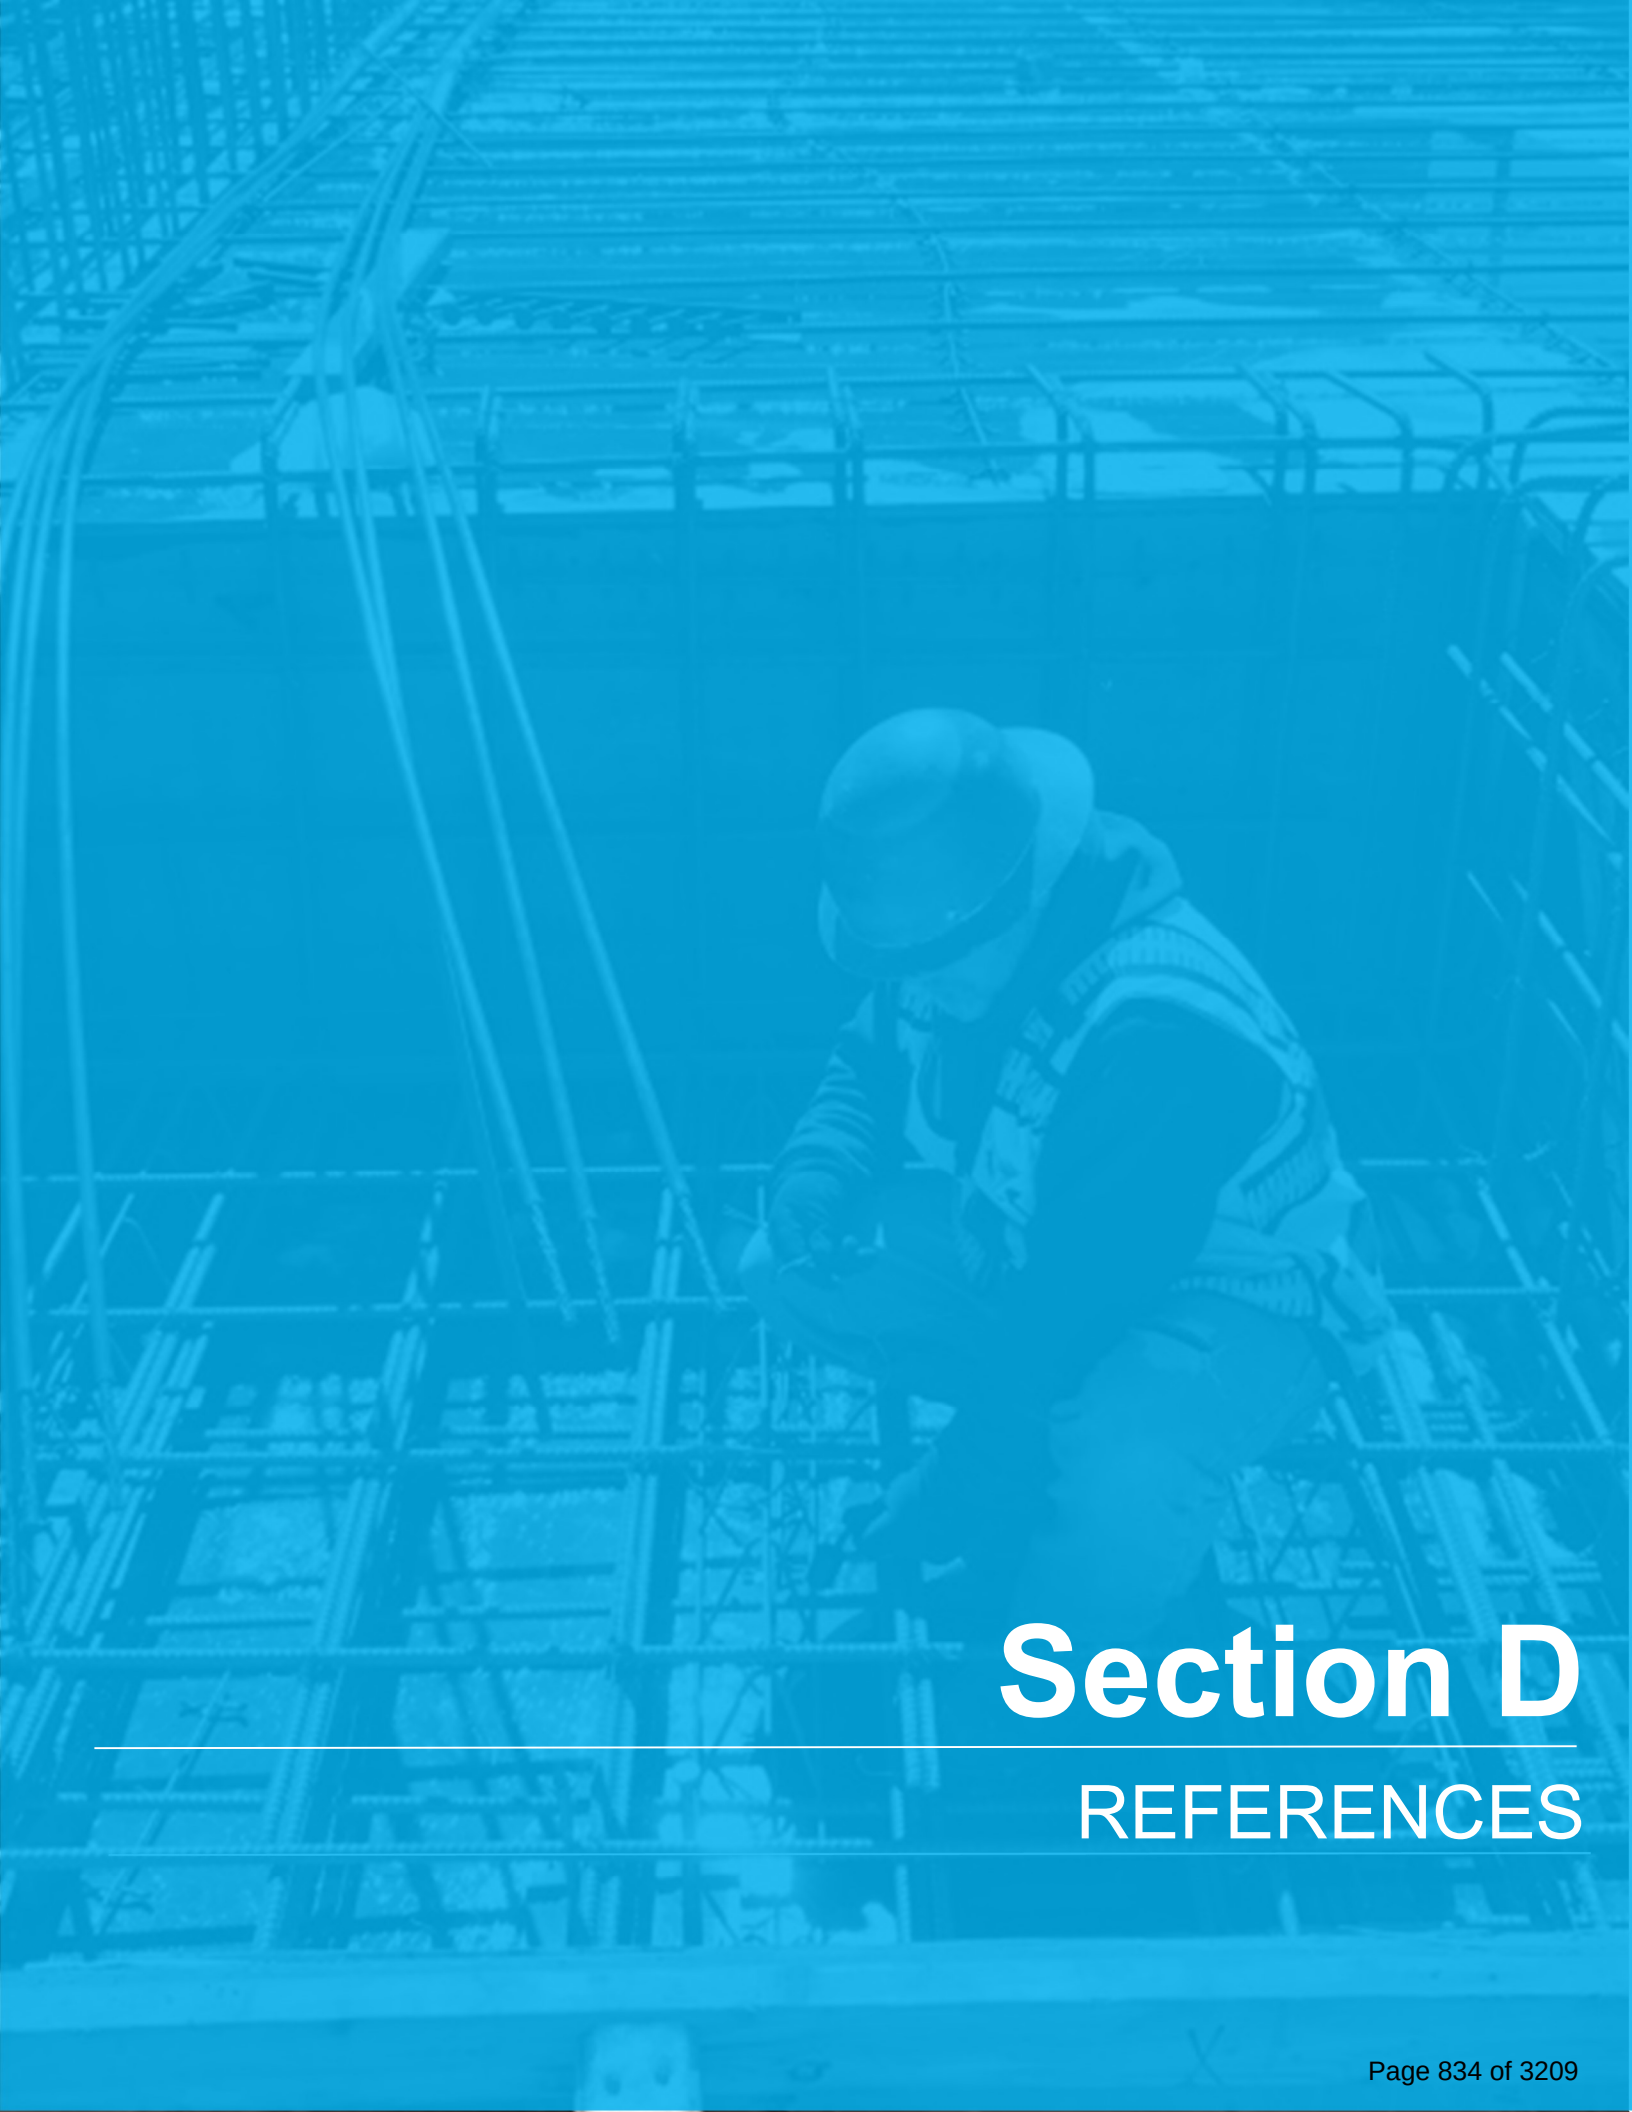
George provided CPT services for Corps of Engineers levees and Border Wall. He supervised two drilling crews in Fort Hancock and Fabens, Texas. He also supervised a drilling crew and served as Site Safety Officer in La Porte, and Galveston, Texas.

Remote Video Surveillance System (RVSS) Towers – South TX

George provided field service coordination for the geotechnical investigations of more than 80 surveillance and communication towers in various counties including Hidalgo, Starr, Cameron, Brooks, Kennedy, Willacy, and Webb Counties.

Arroyo Colorado Levee Projects – Hidalgo and Cameron Counties, Texas

George provided field service coordination and supervision for the geotechnical investigations to determine levee compliance with U.S. Army Corp of Engineers design standards including performing in-situ testing.



Protective Fence-Upper Rio Grande Valley, Texas

George provided field service coordination for the geotechnical investigations for the construction of sections of a pedestrian/aesthetic fence in various locations in the lower Rio Grande Valley, Texas.

American Electric Power (AEP)

George provided supervision and coordination services for several transmission line projects in south Texas, along with CPT services in Gila and Port Aransas Substations in Corpus Christi and Port Aransas Texas.

- Supervised drilling crew and Site Safety Officer in Gila,Pelican,Luguna,and Port Aransas Substaions.
- Supervised drilling crew and Site Safety Officer in Loma Alta and Union Carbide Substations in Brownsville, Texas.
- Supervised drilling crew and Site Safety Officer at Oleander Substation in Harlingen, Texas.

REFERENCES

SECTION D
REFERENCES

Provide at least three references (names and current phone numbers) from recent work and list all past projects with the City of Edinburg for each team member. Include a brief description of the projects associated with the reference, and the role of the individual.

Terracon prides itself on its relationships with clients in the City of Edinburg and throughout the Valley, please feel free to contact our references. Please refer to Section 2 for project descriptions associated with these references.

Mr. Mardoqueo Hinojosa, P.E.
City of Edinburg
415 W. University Drive
Edinburg, Texas 78540
(956) 388-8955
mhinojosa@cityofedinburg.com

Mr. Eduardo Mendoza, P.E.
City of McAllen
1300 Houston Avenue
McAllen, Texas 78501
(956) 681-1151
edmendoza@mcallen.net

Mr. Doroteo Garcia, P.E.
City of Brownsville
404 E. Washington Street
Brownsville, Texas 78520
(956) 541-1012
(956) 542-7843 Fax
doro@cob.us

In addition, please see reference letter from Zef Mendoza, Jr., Construction Manager for City of McAllen.

To Whom It May Concern:

Please accept this letter as my professional recommendation of Terracon Consultants, Inc. Terracon has been proving services to City of McAllen since 2009. These have included geotechnical engineering and materials testing among other services. Their performance has exceeded our expectations. Their staff is professional, amicable, and easily approachable. Their high-quality services are performed promptly, their prices reasonable, and with complete transparency. It has been a true pleasure collaborating with them.

Therefore, I highly recommend Terracon Consultants, Inc. I have no doubt their services will add great value to your business endeavors. The City of Mc Allen has worked with the firm in the past and would gladly work with them again in the future.

Regards,

Zef Mendoza, Jr.
Construction Manager

Section E

INSURANCE

SECTION E
INSURANCE

Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. A list of any insurance claims against the firm within the past 5 years.

Our firm maintains complete insurance coverage for commercial and professional liability. The firm's commercial, professional, automobile liability coverages are provided by Lockton Companies. Our Worker's Compensation and Automobile Insurance is provided through Liberty Mutual.

Commercial, Professional, Automobile and Workers Compensation Liability

Lockton Companies
444 W. 27th Street, Ste. 900
Kansas City, MO 64112-1906
(816) 960-9000

If selected as your consultant, our agents will forward the City of Edinburg completed copies of our insurance certificates.

Terracon is a large consulting engineering firm specializing primarily in geotechnical, environmental and construction materials engineering services. Like other firms who provide similar services, we are subject to periodic claims and litigation from time to time. Terracon carries a program of liability insurance to protect against claims arising from its services. Terracon has been very successful in defending itself against claims and in many of these cases, has been completely vindicated. In general, Terracon does not provide information on individual claims or litigation due to the confidentiality and sensitivity of this information. It is the opinion of Terracon senior management that no claim or litigation currently pending will have any effect on Terracon's ability to provide any required services or in any way affect the financial viability of the firm. Please contact Mike Yost at our corporate office for further information at 913-599-6886.

Section F

PROFESSIONAL SERVICE AGREEMENT

SECTION F

PROFESSIONAL SERVICES AGREEMENT

Provide a statement that the Professional Services Agreement has been read, that the firm will meet the prerequisite insurance requirements, and the firm, if selected, agrees to enter into such agreement.

Terracon agrees to the terms and conditions provided in the Professional Services Agreement. We will meet the pre-requisite insurance requirements with the exception that has previously been agreed upon with the City to delete the requirement for City Protective Liability insurance as we do not carry this type of policy and the City has agreed to this deletion in the past.

RE: City of Edinburg // RFQ No. 2024-6 // Geotechnical Engineering and Construction Materials Testing Services Rotation

Mardoqueo and Selection Committee,

Bringing 26 years of municipal experience and supported by regional and national resources, UES Professional Solutions 45, LLC (UES) submits our qualifications to provide Geotechnical Engineering and Construction Materials Testing Services as part of the City's rotation. In addition to the information provided in this qualifications package, UES summarizes our advantages to serving the City below.

Commitment to Communication and Responsiveness: UES proposes Karl Crenwelge, PE, CMT Manager as your main dedicated point of contact for construction materials testing services and Rockford Miller, EIT for geotechnical engineering, with James Bauer, PE, appointed as an additional contact for the City of Edinburg as oversight and review for the City of Edinburg. **James is authorized to obligate UES contractually.** Rockford Miller, EIT, lives in the Rio Grande Valley local to the City of Edinburg. He and Joseph Dacus, lead technician, will help Karl steward this contract from execution to project closeout. The City can count on this team to deliver exceptional results for this project.

Local Growth, Knowledge, and Experience: UES has a new local office and laboratory with local representation living in the Rio Grande Valley area. Although newer to the area, we have serviced work in RGV and understand the unique challenges that typically arise in the City of Edinburg. Comprehension and experience with local regulations, codes, and climate will allow us to provide customized solutions that meet your needs.

Expanded Resources: Rock Engineering joined the Universal Engineering Sciences® (UES) family of companies in July 2022, joining Alpha Testing, LLC and Riner Engineering in the UES Texas Region. With additional technicians statewide, backed by a national team of 4,000, we can commit the personnel and resources proposed in this document for the duration of the project without disrupting service to our current projects.

No formal addenda was issued, but there was one question and answer, which we acknowledge and have tailored our submittal to reflect where necessary.

This qualifications package further demonstrates our ability to provide quality service and the required level of expertise to the City of Edinburg. We are excited to build a partnership with the City and we welcome the opportunity to discuss how we can provide tangible specific to this project.

Sincerely,
UES Professional Solutions 45, LLC

James Bauer, PE, Branch Manager
p. 956.201.4797 // f. 361.883.4711 // jbauer@teamues.com

FIRM OVERVIEW

BRIEF HISTORY

UES Professional Solutions 45, LLC (UES). formerly Rock Engineering and Testing Laboratory, LLC, was founded in 1998 with **two guiding principles: doing things the right way and taking care of clients.** What started as a three-person operation in Corpus Christi, TX has grown to a team of 145, with additional offices in San Antonio (opened in 2005), Round Rock (opened in 2015), and Rio Grande Valley (opened in 2024). We are a registered State of Texas Engineering Firm (#2101), with laboratories holding AASHTO accreditation, USACE validation, and TxDOT laboratory certifications. UES also holds TxDOT pre-certifications in the Materials Testing and Inspection and Geotechnical Engineering categories.

At UES, we are experts in the areas of environmental and earth sciences, sustainable infrastructure solutions, and geophysical technologies. Our nationwide network of nearly 4,000 engineers and technical professionals identify and solve complex engineering and construction challenges by providing personalized engineering, environmental, testing and inspection services. We strive to serve as trusted partners, providing our clients with innovative, technology-based solutions.

Core Services

Geotechnical Engineering

UES provides geotechnical drilling, laboratory, and engineering services from each of our offices, including company-owned geotechnical drill rigs with TxDOT cone penetrometer capabilities. Services include subsurface exploration, laboratory analysis, and engineering design recommendations, provided by TxDOT pre-certified engineers.

Construction Materials Engineering and Testing

Our in-house trained ACI, NICET, and TxDOT certified engineering technicians perform testing in accordance with the latest ASTM and TxDOT procedures. Our laboratory, equipment and staff have been inspected by CCRL (concrete) and AMRL (soil) as part of the AASHTO Accreditation program and has been certified by the Army Corps of Engineers and TxDOT. We also regularly participate in the AASHTO Sample Proficiency Program. All operations are conducted under the direct supervision of a licensed Professional Engineer.

Environmental Services

UES provides full-service consulting from property acquisition to remediation of existing environmental concerns. Services include: due diligence – Phase I ESA, Phase II ESA, remediation and industrial hygiene – asbestos services, lead-based paint, mold, and indoor air quality.

Geophysical Technologies (Virtual Design Consulting)

We provide Geophysical Technologies focused on Ground Penetrating Radar (GPR), Subsurface Information Modeling (SIM), Utility Mapping (SUM), and Utility Engineering (SUE). In addition to an accurate electronic representation of utilities, SIM may also include points of interest like depth to bedrock, unsuitable soils, and underground storage tanks.

Relevant Experience to the City of Edinburg

Hidalgo County, Enbridge 30” Pipeline Replacement - Edinburg, TX

Client Contact: Jeffrey M. Scholl, PE // 918.747.9945

Key Personnel: Mark Rock, PE

Scope of Work: Geotechnical Engineering and Construction Materials Testing

PROJECT DESCRIPTION

UES provided a subsurface investigation, laboratory testing program, and provisions of our geotechnical findings for the 3,300 ft long Enbridge 30” Pipeline Replacement Project Line 16 located in Hidalgo County. This project consisted of evaluating soil and groundwater conditions at the site and providing geotechnical findings at the boring locations. Five (5) borings were performed at this site for the purpose of providing geotechnical information and obtaining disturbed split spoon samples and relatively undisturbed Shelby tube samples. Field tests and observations for this project included standard penetration tests (SPT), water level observations, and ground surface investigations.

At the time of this project, we did not have anyone based in the RGV area. Thus, to minimize costs, we did as much prework as we could, utilized subs, and stacked work in one to two trips when we sent a representative to the site.

City of Corpus Christi, Geotechnical Engineering and Construction Materials Engineering Master Services Agreement - Corpus Christi, TX

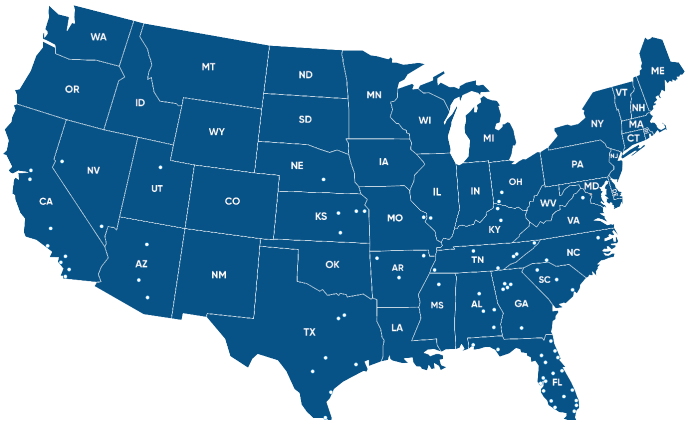
Client Contact: Jeffrey Edmonds, PE // 361.826.3500

Key Personnel: James Bauer, PE // Rockford Miller, EIT // Karl Crenwelge, PE // Joseph Dacus

Scope of Work: Geotechnical Engineering and Construction Materials Testing

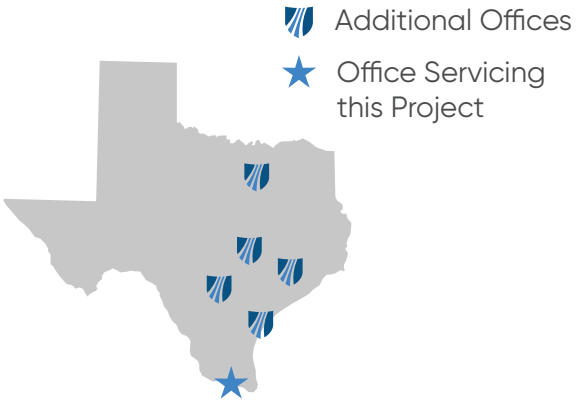
PROJECT DESCRIPTION

UES is one of two engineering laboratories currently awarded a Master Services Agreement with the City of Corpus Christi. Various task orders are assigned throughout the Contract for Bond Projects or Capital Improvement Projects to conduct Geotechnical Engineering and Construction Materials Engineering services. UES has maintained a timely response without exceeding project budgets. The contract value for this contract is $1,000,000.00.



Additional Experience with Municipalities

In addition to the project experience and municipality relationships listed in this package. We have also provided services for projects of varying size and scope to the following municipal clients.



- Aransas County
- Bee County
- Bexar County
- City of Austin
- City of Boerne
- City of Cedar Park
- City of Ingleside
- City of Ingram
- City of Junction
- City of Killeen
- City of Kingsville
- City of New Braunfels
- City of Pflugerville
- City of Port Aransas
- City of Portland
- City of Round Rock
- City of San Antonio
- Comal County
- Hidalgo County
- Port of Brownsville
- Port of Harlingen
- San Antonio Water System (SAWS)
- Williamson County

Office Locations

UES provides services from our offices in **Rio Grande Valley**, Corpus Christi, San Antonio and Round Rock. In addition, we can call on additional resources from our sister UES companies across the country, including UES 44 and UES 63, also located in the Texas Region.

All UES offices including legacy companies like UES 45, UES 44, and UES 63.

Texas Region location consisting of UES 45, UES 44 and UES 63.

Overall Qualifications of Team

James Bauer, PE - *Gulf Coast/South TX Area Manager*

James is the Area Manager for UES' Rio Grande Valley and Corpus Christi offices. He has over 19 years of experience in construction materials testing and geotechnical engineering. He has been the Project Engineer/ Project Manager, and Geotechnical Liaison on numerous Geotechnical Engineering Studies across the Midwest and State of Texas throughout his career. James' project experience includes higher education, K-12, municipal, federal, healthcare, commercial, residential, transportation, and industrial projects. His design experience includes levees, water impoundments, earthen dams, stream river bank stabilization, slope and retaining wall global stability, clay/coal mine mitigation, karst exploration and mitigation, expansive clay soil mitigation, settlement analyses, ground improvement/modification, shallow and deep foundations, and pavements. He is also skilled at advanced field testing, including: inclinometer installation and monitoring, and non-destructive testing methods including; impact echo, audible sounding, ground penetrating radar, electrical resistivity tomography, cross-hole sonic logging.

YEARS OF EXPERIENCE

19 years

EDUCATION

University of Missouri, B.S. Civil Engineering

LICENSES/CERTIFICATIONS

Professional Engineer: Texas, No. 129201

Location: La Feria and Corpus Christi, TX

Relevant Project Experience

City of Corpus Christi Geotechnical Engineering and Construction Materials Engineering Master Service Agreement - Corpus Christi, TX

James is the point of contact for this contract and leads the geotechnical engineering and construction materials testing scope of work for the awarded task orders. Most of these projects are capital improvements projects.

Port of Brownsville Grain Facility Improvements - Brownsville, TX

UES conducted field exploration at the Port of Brownsville aimed at improving the grain facility. The process included subsurface investigation, soil characterization, creation of boring logs, and report delivery. A comprehensive laboratory testing program was also conducted to further understand subsurface material properties.

TxDOT US 77 Sinton Relief Route - Sinton, TX

We provided geotechnical engineering consisting of a subsurface investigation, laboratory testing program, a drilled shaft foundation capacity evaluation, and preliminary embankment and retaining wall evaluation for TxDOT US 77 Sinton Relief Route.

City of Portland, Phase 11 Paving Improvements - Portland, TX

UES has provided construction materials testing for multiple phases of the City of Portland Improvement contract. This street improvement project is one of a series of maintenance projects necessary to keep our streets in proper condition

Rockford Miller, EIT - *Project Manager*

Rockford served in the U.S. Army before transitioning into the industry. Currently, he is a Project Manager for UES and mostly works in the Rio Grande Valley region. He has experience with Geotechnical Engineering, Construction Materials Testing, and Environmental Studies.

YEARS OF EXPERIENCE

7 years

EDUCATION

University of Texas, Rio Grande Valley, B.S. Civil Engineering

Texas A&M University, Kingsville, M.S. Civil Engineering

LICENSES/CERTIFICATIONS

Engineer-in-Training: Texas No. 52644

PROFESSIONAL ORGANIZATIONS

American Society of Civil Engineers, since 2014

Location: La Feria, TX

Relevant Project Experience

City of Edinburg Wastewater Treatment Plant Dolittle Road - Edinburg, TX

Rockford provided construction materials testing for this project. During construction, Rockford discovered a large cistern that was initially unaccounted for. We provided recommendations to backfill the cistern without impacting the overall schedule. Our construction materials testing scope included laboratory testing, soil density and concrete testing in the field and laboratory for the office and administration building, and backfill of the large cistern.

U.S. Customs Facilities - McAllen, Laredo, Harlingen, Weslaco, and Brownsville, TX

Rockford provided geotechnical engineering and construction materials testing services for five different U.S. Customs Facilities around the Rio Grande Valley.

Donna Rio Bravo International Bridge - Donna, TX

This project included servicing both the bridge and roadway, but also the Donna facility.

South Port Connector, Port of Brownsville – Brownsville, **TX**

This project consisted of two miles of heavy-duty two-lane roadway that connects RL Ostos Road to State Highway 4 in Brownsville, Texas. The roadway has a 2,000-foot-long bridge with driven pile foundations that span a wetland area. The project required accommodating oversized/overweight truck loading and using the TxDOT Design Manual and TxCRCP-ME design program.

Proposed Titan Diesel Fuel Terminal, Port of Harlingen – Harlingen, **TX**

The project included the construction of a diesel fuel terminal facility with six 110-foot diameter fuel tanks and developing a docking facility for loading and unloading fuel. The project site was located on the west side of the Port of Harlingen shipping channel. Fieldwork consisted of geotechnical soil borings and field electrical resistivity testing. Laboratory testing included indexing soils, advanced soil strength and engineering characteristics, and properties determination for the analysis of allowable bearing capacity, settlement analysis, soil improvement, and foundation recommendations.

Karl Crenwelge, PE - *CMT Manager*

Karl has more than 30 years of experience at conducting on site investigations of various structures to determine their condition and, if necessary, make recommendations for repair procedures. He has completed numerous structural studies related to structural distress for property insurance claims. His work includes documentation of distress, coordination of site visit schedules, interpretation of elevation survey, geotechnical and plumbing reports in relation to the observed structural conditions. These projects have involved steel, concrete, and wood superstructures and slab on grade, suspended slab, and post and beam foundations. Most of these investigations were related to foundations on expansive clay soils. Some of the foundation investigations resulted in design of pier systems to stabilize and level the building foundations.

Karl is also highly experienced in the design of complex metal building structures and their components. He has performed structural calculations on steel rigid frames and secondary structural members and evaluated complex loading conditions on building structures, including live, dead, snow, crane, wind, and mezzanine loadings.

Relevant Project Experience

Hakes Brothers - Weslaco, TX

UES provided geotechnical engineering and construction materials testing for field placement, including soil density testing, on a subdivision that the client is building. We also provided a HUD 79 G letter and foundation recommendations for the subdivision.

City of Beeville WWTP - Beeville, TX

UES provided construction materials testing including soil density to verify compaction of the subgrade and the fill materials and concrete testing including rebar observations. Karl managed the construction materials testing for this project and reviewed associated reports.

City of Corpus Christi Geotechnical Engineering and Construction Materials Engineering Master Service Agreement - Corpus Christi, TX

Karl manages the construction materials testing scope of work for this contract for the awarded task orders. These projects are part of the City's Capital Improvement Program.

City of Corpus Christi, Police Training Academy - Sinton, TX

UES provided geotechnical engineering services and construction materials testing for the City of Corpus Christi's new Police Training Academy. The project included constructing a one-to-two-story building with an approximate footprint of 30,000 sf, a new running track, and associated pavement parking and driveway areas.

YEARS OF EXPERIENCE

30 years

EDUCATION

The University of Texas at Austin, B.S., Architectural Engineering

The University of Texas at San Antonio, Graduate Studies, Civil Engineering

LICENSES/CERTIFICATIONS

Professional Engineer: Texas, No. 84613 //

Master Plumber M-39569

Location: La Feria and Corpus Christi, TX

Joseph Dacus - *Lead Field Technician*

Joseph Dacus is an experienced Lead Field Technician with UES, where he has worked for several years. During this time, he has demonstrated exceptional skills in concrete sampling and testing, rebar inspection, and field gradation. He is highly proficient in performing Nuclear Densities on subgrade and select fill material. Joseph's expertise in handling Proctor samples, including Subgrade, Subgrade lime Stabilize, and Select Field, has led to the successful completion of several projects. As a Lead Field Technician, he has mentored and trained new technicians on various field testing techniques.

Relevant Project Experience

City of Corpus Christi Geotechnical Engineering and Construction Materials Engineering Master Service Agreement - Corpus Christi, TX

Joseph has worked on many City of Corpus Christi projects including construction materials testing for transportation projects. These projects typically included density and compaction testing, concrete testing and making concrete cylinders, and hot mix asphalt testing.

Port of Brownsville Grain Facility Improvements - Brownsville, TX

UES conducted field exploration at the Port of Brownsville aimed at improving the grain facility. This involved obtaining soil samples from the site, analyzing them in accredited labs, and generating reports with geotechnical recommendations. The process included subsurface investigation, soil characterization, creation of boring logs, and report delivery. The fieldwork consisted of site reconnaissance, drilling eight (8) test borings using a rig equipped with rotary head and solid stem augers employing mud rotary techniques. A comprehensive laboratory testing program was also conducted to further understand subsurface material properties.

Techint, Iron Ore and Scrap Marine Terminal Facility - Brownsville, TX

Joseph was onsite and provided support for geotechnical engineering, including drilling. He also created boring logs for this project and was a liaison for the project team.

Envigo WWTP - Alice, TX

UES provided construction materials testing including quality monitoring, soil density, and concrete testing to determine the compaction of fill materials and subgrade for the wastewater treatment plant. Our scope of work also included rebar observations to verify reinforcement steel was correctly placed, compressive strength, slump, and temperature testing. This project was completed in July of 2023. Joseph was one of our main technicians in the field, providing the testing.

Ability to Meet Schedules and Deadlines

Geotechnical Engineering

Nearly all UES' geotechnical engineering projects are performed under lump sum budgets with committed completion schedules. UES can utilize **up to 25 drilling rigs** and can easily self-perform the geotechnical testing. This allows us to determine our drilling schedules and prioritize projects and multiple options for schedule recovery should delays occur. Schedule recovery on a geotechnical engineering project can involve:

1. Mobilization of additional drilling equipment
2. Expediting laboratory testing
3. Expediting engineering analysis and report production

UES has multiple accredited laboratories and can move samples between labs to locations with the most current capacity. With the quality systems we have in place, test results remain consistent from lab to lab. Schedule recovery methods do not usually apply to materials testing projects as the overall duration is set by the sequencing and productivity of the general contractor. However, UES knows that our laboratory testing turnaround times can affect earthwork productivity. We seek to keep open lines of communication between field and lab personnel to alert the lab of the pending arrival of priority samples.

Timely Response

UES excels in optimizing project timelines by effectively managing the scheduling of geotechnical engineering projects. One common challenge in geotechnical projects is weather-related delays, mainly due to heavy rains. To overcome this, we can promptly dispatch multiple rigs to a site, ensuring that schedules are maintained and compensating for any drilling time lost.

Construction Materials Testing Schedule

Construction materials testing scheduling is closely tied to the contractor's schedule. We arrange our schedules in a pattern that changes throughout the construction life cycle.

1. **Kickoff**
   - » UES' primary point of contact will attend pre-construction meetings.
   - » Coordinate initial schedule and report distribution.
   - » Update dispatch and establish the project in the system.
2. **Technician Assignments**
   - » Lead technician will manage additional staff for specific tasks (e.g., major concrete pour or structural steel inspections).
3. **Dispatch Phase**
   - » Superintendent contacts UES via the dispatcher for early work, which generally does not require full-time service.
4. **Construction Peak**
   - » Primary technician, superintendent, and UES' registered engineer engage in daily communication and handle all scheduling at the project site.
   - » Bring in additional staff as needed.
5. **End of Project**
   - » Onsite UES staff or dispatch manages staffing requirements based on project needs as work volume and type change.
6. **Post-Construction Support**
   - » Provide ongoing support and consultation if needed to address questions related to the tested materials and their performance.
   - » Conduct any additional tests or inspections requested by the project stakeholders.

Timely Response

For construction materials testing, the City can benefit from our invaluable expertise, consistent support, and streamlined communication structure, which effectively minimize service delays. UES aligns its construction materials testing schedule closely with the contractor's timeline, adapting it as the construction progresses. With a wealth of resources, including skilled personnel and cutting-edge equipment, we are well-prepared to keep each project on track. We routinely deploy multiple qualified technicians to the job site for crucial field activities such as large concrete pours or steel inspections.

Firm Qualifications and Experience

Geotechnical Engineering Approach

UES offers comprehensive services in geotechnical engineering and construction materials testing. We prepare fee estimates based on project information which can be submitted electronically or as hard copies upon request. Our subsurface investigation process includes staking boring locations, obtaining underground utility clearances through **Texas 811 System,** performing borings and field tests, and classifying soils on-site.

We strive to begin drilling operations within one week of authorization, and our capacity allows us to complete an **average of 150 ft. of drilling in a workday.** For timely project completion, UES maintains control over our geotechnical engineering schedule. In the event of weather-related delays, such as heavy rains, we have the advantage of **utilizing up to 25 drill rigs if required.** This flexibility enables us to dispatch multiple rigs as needed, ensuring adherence to schedules or making up for lost drilling time due to adverse weather conditions.

Geotechnical - Tracking/Report Delivery/Invoicing

UES invoices materials testing projects monthly. Once the project is underway, UES optimizes cost control through invoicing. By carefully monitoring each project's budget and comparing it to the project's completion percentage provided by the owner, UES can make real-time adjustments and minimize change order requests due to schedule or scope changes. Timely data and report submission to the project team is critical for decision-making. Field copies of testing reports are left at the job site, if requested. UES offers online reporting for all services through **Construction Hive.**

Plan Review

After a request for geotechnical engineering services from the assigned project manager is made, UES contacts the structural engineer on the project to verify loads and specific requirements. After, we contact the design architect to obtain a site plat and to verify final structure (or building addition) placement on the subject site. This serves as final confirmation of project specifics. The required site plat is used to facilitate staking the proposed soil boring locations.

By simply communicating with the design team and getting the appropriate data prior to the first mobilization, we reduce the risk of having to do a second mobilization to obtain additional geotechnical data. Thus, preventing additional costs and schedule delays.

Typical Geotechnical Delivery Schedule (Varies Per Project)

Geotechnical Engineering Services

Since 1998, UES has been a leading provider of comprehensive geotechnical engineering services. Our extensive expertise and industry know-how empower us to deliver exceptional support throughout every stage of geotechnical field investigations, laboratory examinations, and evaluations. UES holds TxDOT pre-certifications in the geotechnical engineering category. Our offerings encompass a wide range of services, including but not limited to the following.

Construction Specifications

- Drilled shaft and pipe installation
- Excavations and dewatering
- Fill placement and compaction
- Protection of existing facilities
- Subgrade preparations

Earth Dams and Levees

- Docking facilities and bulkheads
- Embankment studies/Seepage analysis
- Materials selection/Erosion Control

Engineering Geology

- Escarpment studies
- Geologic studies and mapping
- Petrographic analysis
- Rock anchors/slope stability

Field Exploration and Monitoring

- Geophysical investigations
- Pile or pier load tests
- Pore pressure measurements
- Settlements for subsidence
- Slide movements

Foundations

- Expansive soil engineering
- Exploration and laboratory testing
- Foundation design/recommendations
- Geotechnical specifications
- Site selection and feasibility studies

Groundwater

- Aquifer test/ Groundwater geology
- Groundwater resources evaluation
- Hydrologic studies

Pavements

- Design of highways/streets/airports
- Existing pavement evaluations
- Fill compaction control
- Groundwater control
- Subgrade evaluations/improvements

Retaining Structures

- Conventional retaining walls
- Drilled pier walls/Slurry walls
- Steel or concrete pile walls
- Tie-back design

Soil Stabilization

- Design of systems and methods
- Foundation excavation inspection
- Groundwater control
- Materials testing/evaluation

Transportation

- Bridge foundation design
- Highways, streets, railroads, airports
- Instrumentation and field monitoring
- Soil or rock cut slope design

Construction Materials Testing Approach

UES offers comprehensive construction materials testing services to aid in the highest quality and compliance with project specifications. Our experienced and certified professionals provide field inspection services, including foundation proof-roll subgrade and fill placement observation and testing, structural steel weld and bolt observation, steel reinforcement (rebar) observation, post-tension cable stressing compliance, and pre-stress concrete plant inspection and testing. Equipped with advanced tools, our field technicians conduct on-site testing of construction materials, including moisture/density analysis, Portland cement concrete testing, and grout/mortar sampling. Real-time updates through our **QESTField** and **QESTLab** programs enable efficient communication and immediate access to reports.

In our laboratories, we conduct concrete testing using dual-range compression testing machines for various specimen sizes. Our concrete curing facilities comply with ASTM specifications. Additionally, our soil testing capabilities include moisture-density relationships, Atterberg limits, moisture content, unconfined compressive strength, and particle and grain size analysis. We are committed to delivering accurate and reliable construction materials testing services, leveraging advanced equipment and technology for the success of your projects.

We also have Certified Welding Inspectors (CWI) in house to support materials testing projects and special inspections.

Reducing Non-Compliant Item Time Delays

UES' approach to non-compliant materials aims to prevent open items and reduce time delays and expenses. Non-compliant materials are immediately brought to the attention of the appropriate party onsite. Staff are instructed to notify onsite personnel and the UES project manager of the non-compliant item. If field tests indicate a non-compliant result, UES first notifies the responsible party and offers an opportunity to correct the issue immediately, providing an immediate retest.

If an issue cannot be addressed in the field, a non-compliant report is completed, and the appropriate parties are notified by phone, email, or fax on that date. Once corrective measures are implemented by others, UES performs the necessary retest(s). Charges for the retest(s) are tracked and invoiced as agreed per the project contract.

Construction Materials Testing Services

UES offers extensive construction materials testing (CMT), engineering (CME), and inspection services, utilizing in-house personnel and equipment. We adhere to ASTM E-329 standards, and our laboratories are accredited by AASHTO and validated by USACE. Our engineering technicians possess ACI, ICC and NICET training and credentials. Additionally, UES holds TxDOT pre-certifications in the materials inspection and testing category.

Structural Steel – CWI, CAWI, and NDT

- Bolt Tension Testing
- Dye penetrant, ultrasonic, magnetic particles, radiography (X-Ray)
- Pipe Thickness Testing/Paint Thickness
- Shop and Shop Audit Inspections
- Shop Fabrication Inspections
- Steel Erection observation and testing
- Structural Steel Inspections
- Welding Inspections - NDT, NDE, Visual
- Welding procedures and Welder performance qualifications

ICC Special Inspections

- Roofing Inspections
- Spray Applied Fire Proofing
- Structural Masonry

Quality Control / Construction Inspection Services

- Contractor QA services
- Rail and highway construction

Soils

- In-place density testing
- Moisture-density relationships/standard & modified proctors
- Moisture content confirmation drilling for injection projects
- Placement observation
- Soils classification
- Subgrade stabilization observation and testing
- Water and Chemical injection observation

Foundation Observation / Pier Inspections

- Deep foundations
- Drilling Inspection/Forming Inspection
- Reinforcing steel placement
- Concrete placement
- Post-Tension Cable Inspection

Concrete Testing

- Batch plant and placement evaluations
- Compliance testing of aggregates, including gradations, fineness modulus, absorption, specific gravity and unit weight
- Cylinder & beam molding and testing
- Diamond bit concrete coring for compression strength and/or petrographic analysis
- Floor flatness testing (FF/FL)
- Maturity meter evaluations
- Mix design trial batches
- R-Meter & Ferroscan
- Windsor probe evaluations

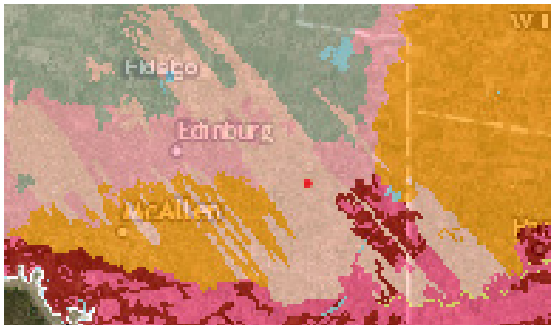
Masonry

- Block prism testing
- Mortar & grout mix design, grout testing

Roofing Evaluations and Testing

- Laboratory roof cut analysis
- Moisture surveys, infrared and nuclear
- Roof installation and monitoring

Special Laboratory Testing



- Absorption
- Bulk unit weight
- Los Angeles abrasion
- Moisture content
- Organic matter
- Percent finer than 200 mesh
- Sieve analysis (dry or wet method)
- Sodium sulphate soundness test
- Specific gravity of aggregates

Bituminous Mixtures

- Density determination in place and core
- Extraction to determine asphalt percentage and gradation of materials
- Field observation and testing
- Mix designs/Batch plant calibration

Uniqueness to Best Perform for the City of Edinburg

New Office with Brand New Equipment

UES recently expanded to the Rio Grande Valley and purchased an office with a laboratory and brand-new testing equipment. This is an advantage to the City of Edinburg because our equipment and machines will run at peak performance. The technology in our laboratory allows us to deliver precise and reliable test results, which are crucial for maintaining high standards of construction quality and safety for each project.

Familiarity with the Geographical Area

The City of Edinburg offers unique geographical conditions that affect how we conduct our construction materials testing services. The Geologic Map of Texas, published by the University of Texas at Austin, Bureau of Economic Geology, has mapped the Lissie Formation (Ql) in the general area of Edinburg. The Lissie Formation (Ql) generally consists of sand, silt, clay, and minor amounts of gravel.

UES has served several projects in this region, and subsurface materials generally consist of low to high-plasticity Sandy Lean Clay (CL), Lean Clay (CL), and Clayey Sand (SC). The clayey materials are considered relatively impermeable and are anticipated to have a relatively slow response to water movement. The granular materials are relatively permeable and are anticipated to have a relatively fast response to water movement. It is common to detect seasonal groundwater from natural fractures within the clayey matrix and in the granular materials, particularly during or after periods of precipitation. If more detailed groundwater information is required, monitoring wells or piezometers can be installed.

CITY OF EDINBURG - CITY COUNCIL
Meeting Date: August 20, 2024
AWARDING OF BIDS
Agenda Item No: 10.E.
2024-2026 Land Surveying Services Rotation

1. **Agenda Item:**
Consider Awarding RFQ 2024-007, Land Surveying Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise. [Mardoqueo Hinojosa, P.E., CFM, City Engineer]

2. **Description:**
On occasion the City of Edinburg requires Surveying Services on City projects which do require an Registered Professional Land Surveyor. The qualified firm(s) selected should be experienced in the field of surveying and be a Professional Land Surveyor. The experienced firm should have general surveying experience and be able to perform land (boundary) surveys and platting, topographic surveys, land title surveys, and construction surveying among others. It is expected that the qualified firm(s) selected will have a sufficient level of innovation and appraisal expertise to carry out the projects without constraints to produce documents in a timely manner. The firm must be prepared to assure the City of Edinburg that key personnel indicated in their qualification, statement will maintain their role in each project and that their present workload is such that each project will be completed on or before the due date. The rotation is for potential projects between October 2024 through September 2026. Projects to be funded in the upcoming fiscal years, as prioritized by the City Council.

On Tuesday, July 16, 2024, Request for Qualifications were received for RFQ 2024-007, Land Surveying Services. A total of thirteen (13) Request for Qualifications were received and opened. The requests for qualifications were reviewed by staff and they all met the criteria set out in the Request for Qualifications.

The following qualified firms listed in alphabetical order have submitted Statements of Qualifications in response to this RFQ:

1. Guzman & Munoz Engineering and Surveying
2. Halff Associates*
3. Kane-Lindsey
4. KCI Technologies
5. Melden & Hunt*
6. Quintanilla Headley & Associates*
7. R. Gutierrez Engineering
8. Rickman Land Surveying
9. Rio Delta Engineering*
10. ROW Surveying Services
11. S2 Engineering
12. SAMES*
13. Supreme Engineering

*Denotes on current two year (2022-2024) rotation

Limiting the selection of firms between 3 and 5 will insure each firm will obtain a project as it arises. The current 2022-2024 rotation has 5 firms and they have received approximately 3 projects.

3. Staff's Recommendation:

Approve Awarding RFQ 2024-007, Land Surveying Services to Qualified Firm(s) and Authorize the City Manager or Designated Appointee to Enter Into a Professional Services Contract with Such Firm(s) as Projects Arise.

Reviewed by:		**Prepared by:**
Tomas Reyna, Assistant City Manager	Final Approval - 8/16/2024	Mardoqueo Hinojosa, City Engineer

1. Introduction

1.1. Summary

The City of Edinburg's Department of Engineering is currently seeking to retain a rotation list of qualified licensed commercial and residential land and topographical surveying services. The term of the contract will be two (2) years from 10/01/2024 – 09/30/2026. The services request is to provide the following services: surveying and topographical of commercial and residential property and other informational interests and purposes by the City. Generally, the selected surveyor(s) will be expected to perform the services in accordance with the Scope of Services and in accordance with the requirements of this solicitation. The City of Edinburg reserves the right to issue multiple awards under this solicitation as deemed in its own best interests.

2. Scope of Work

2.1. Scope of Services

The City of Edinburg is seeking statements of qualifications from firms interested in providing the City Land Surveying Services on an "as needed" basis. The services to be performed may include topographic, boundary, platting preliminary, and all other necessary land surveying tasks, as specified by the City. The services may be requested by City on a project-to-project basis, which may require from one (1) day to several months to complete. Generally, the selected Surveyor(s) will be expected to perform the services in accordance with the Scope of Services and in accordance with the requirements of this solicitation.

The scope of services covers the requirements of licensed surveyor (s) to assist The City of Edinburg in land and topographical surveying of various properties on an "as needed" basis.

The Surveyor shall perform at a minimum the following tasks:

A. Boundary Lines, Giving Length and Bearing on Each Straight Line; Interior Angles; Radius, Point of Tangency, And Length of Curved Lines. Set Iron Pin (Monument At Property Corners Where None Exists; Drive Pin 18" Into Ground, Mark With Wood Stake; State On Drawing Whether Corners Were Found Or Set And Describe Each.

B. Legal Description, Including Measurements In Recorded Deeds For Comparison With Observed.

C. Area In Square Feet If Less Than One Acre, In Acres (To .001 Acre) If Over One Acre.

D. Identify, Jurisdiction And Width Of Adjoining Street And Highways, Width And How Paved. Identity of Landmarks.

E. Plotted Location of Structures on the Property and on Adjacent Property within 30 Feet. Dimension Perimeters in Feet and Inches to Nearest ½. State Character and Number of Stories. Dimension to Property Lines and Other Buildings. Vacant Parcels Shall Be Noted “Vacant”.

F. Encroachments, Including Cornices, Belt Courses, Etc., Either Way Across Property Lines.

G. Fences And Walls; Describe. Identify Party Walls and Locate With Respect To Property Lines.

H. Recorded Or Otherwise Known Easements And Right-Of-Way; State Owner Of Right.

I. Possibilities of Prescriptive Right-Of-Way and Nature of Each.

J. Anticipated Street Widening.

K. Individual Lot Lines and Lot and Block Numbers. Street Numbers of Buildings.

L. Sidewalks, Curbs, Gutters & Drives On The Block And Extend To Include The Same Across Boundary Streets.

M. Building Line and Setback Requirements, If Any.

N. Names of Owners of Adjacent Property.

O. Reconciliation or Explanation of Any Discrepancies between Survey and Recorded Legal Description.

P. Title Searches and Title Reports

Q. Right of Way Acquisitions

TOPOGRAPHICAL SURVEY REQUIREMENTS:

A. All Lines of Levels Shall Be Checked By Separate Check Level Lines or On Previous Turning Points or Benchmarks.

B. Traffic Devices, Signs, In Connection with Boundary Streets.

C. Future Plans Of City, Utility Districts, And Municipal Utilities When Such Information Is Discovered in Routine Information Gatherings.

D. Minimum of One Permanent Benchmark on Site for Each Ten or Less Acres; Description and Elevation to Nearest .01’.

E. Contours at 1 Foot Intervals; Error Shall Not Exceed One-Half Contour Interval.

F. Spot Elevations at Each Intersection of a 20 Foot Square Grid Covering the Property and If Possible 5 Foot Grid Interval (S) beyond.

G. Spot Elevations at Street Intersections and at 5 Feet on Center on Curb, Sidewalk, and Edge of Paving Including Far Side of Paving. If Elevations Vary From Established Grades, State Established Grades, State Established Grades Also.

H. Plotted Location of Structures, Man-Made and Natural Features; Floor Elevations at Each Entrance of Building on Property.

I. Location, Size, Depth and Pressure of Water and Gas Mains, and Other Utilities Serving or on the Property, Valves, Meters.

J. Location of Fire Hydrants Available to Property and Size of Main Serving Each.

K. Location of Electric and Telephone Services and Characteristics of Service Available.

L. Location, Size, Depth And Direction Of Flow Of Sanitary Sewers, Storm Drains And Culverts Serving Or On Property; Location Of Catch basins And Manholes And Inverts Of Pipe At Each; Same At Or In Boundary Streets.

M. Name of Operating Authority of Each Utility.

N. Mean Elevation of Eater in Any Excavation, Well or Nearby Body; Flood Level of Streams.

O. Extent of Watershed onto Property. Probability of Freshets Overrunning the Site.

P. Locations of Test Borings If Ascertainable and Elevation of Top of Holes.

Q. Trees Of 3” And Over (Caliper 3’ Above Ground) Locate Within 1’ Tolerance And Give Species.

R. Perimeter Outline Only of Thickly Wooded Areas Unless Otherwise Directed.

S. Location, Size, Elevation Of Elevated: Piping Insulated Piping, Conduit, Pipe Racks And Supports; Except That Above Building Roofs.

T. Show Dimensions And Bearings Of Property Boundaries, And Plot All Locatable Title Exceptions And Easements On The Survey Map.

U. Show Existence or Non-Existence of Any Encroachments and Right Of Way.

V. The Written Legal Description of the Property and Exhibit(S) For Recording Purpose.

W. Provide An Area Measurement Within Boundary Lines.

X. Easements – All Utility, City And Private Easements Shall Be Shown And Labeled.

Y. Legal Description And Exhibit(S) For Any Easements Where Required.

Z. Setbacks – Building And Parking Setbacks Shall Be Shown And Noted For Each Property Or Zoning Areas.

AA. All Above Grade Utilities, Including But Not Limited To Overhead Electrical, Telephone, Cable, Street Lighting, And Other Electrical And Communications Equipment; Location And Rim Elevations Of Sanitary And Storm Sewer Structures, Water Main Valves, And Hydrants; Gas Valves And All Other Above Grade Utility Equipment.

AB. All Underground Utilities, Including But Not Limited To Storm, Sanitary, Water, Gas, Telephone, Electrical, And Cable. Rim Elevation, Bottom Of Manhole, And All In And Out Inverts Of Utilities Shall Be Noted. Note: If Any Of These Utilities Do Not Exist Within Or Directly Adjacent To The Survey Area, Surveyor Shall Locate The Nearest Available Service Connection Which Can Be Used For Future Service To Site.

AC. Provide On The Survey A List Of Names, Addresses, And Phone Numbers Of All Applicable Utility Companies.

AD. Trees, Shrubs, And Planting Areas: All Trees 2” Caliper And Larger Shall Be Labeled With Caliper And Species. All Tree Canopies Shall Be Accurately Shown.

AE. All Trees 6” Caliper And Larger Shall Be Labeled With Caliper And Species. All Tree Canopies Shall Be Accurately Shown And Areas Of Woods Or Shrubs Accurately Delineated.

AF. Zoning Of The Property And All Adjacent Properties Within 100’ Of The Surveyed Area.

AG. Provide Planning And Zoning Overlays.

AH. Current Flood Plain Information Including FEMA Regulatory 100-Year And 500-Year Floodplain Boundaries, Notation Of Record Flood Event Elevation (2008 Flood), 100- Year Flood Elevation And Other DNR Protected Area Boundaries.

AI. All Measurement Tolerances Provided On Such Surveys Must Be Within Readings For Urban Survey As Specified On Accuracy Standards For Alta/Acsm Land Title Surveys.

AJ. When A Significant Discrepancy With The Record Maps And Documents Are Found, Or If Monuments Are Set Or If Otherwise Required By Law, Surveyor Shall Provide A “Record Of Survey Map” Compliant With City And State Standards.

AK. Elevation Certificate For Flood Insurance Purpose (FEMA) Coordination & Documentation Associated With Phase I And Phase II Real Estate.

AL. All Firms May Not Be Capable Of Providing The Above Noted Services. If Your Firm Is Capable And Willing To Provide Any Of The Above Services, A Complete Description Of The Nature Of The Service The Firm Is Qualified To Provide Must Be Provided In Your Qualifications.

AM. All other topographic surveying as assigned.

STATE OF TEXAS	**§**	**AGREEMENT BETWEEN THE CITY OF EDINBURG AND PROJECT MANAGEMENT CONSULTANT FOR PROFESSIONAL SERVICES PURSUANT RFQ NO. XXXX-XXX**
COUNTY OF HIDALGO	**§**	
CITY OF EDINBURG	**§**	

The City of Edinburg, Hidalgo County, Texas, a municipal corporation, (hereinafter **"City"**) and **PROJECT MANAGEMENT CONSULTANT** (hereinafter **"Consultant"**), are the parties to this Agreement.

RECITALS

WHEREAS, City has authorized staff to request proposals for the On-Call Professional Services, the Consultant shall provide for specific projects as may be requested by the City. Such services shall be defined, scheduled, and authorized in subsequent Task Orders. Services may include, but not be limited to Engineering, PROFESSIONAL SERVICES, and or other as-needed services as stated in Exhibit "A", and

WHEREAS, Consultant has the professional knowledge and abilities to perform the professional engineering and PROFESSIONAL SERVICES; and

WHEREAS, City desires to engage Consultant to render services in connection therewith:

NOW, THEREFORE, City and Consultant do mutually agree as follows:

SECTION I
EMPLOYMENT OF CONSULTANT

A. City agrees to employ Consultant to furnish and provide the Services, as stated in this agreement and **Exhibit "A"**. Upon receipt of Services to the City's satisfaction, the City agrees to pay Consultant as stated in this Agreement.

SECTION II
SERVICES OF CONSULTANT

A. The Consultant shall, in the scope of his work, perform the Services identified in **Exhibit "A"** of this document. City shall provide Consultant with authorization to proceed, after execution of this Agreement.

B. Nothing contained in this Agreement is intended by the parties to create a partnership or joint venture between the parties, and any implication to the contrary is hereby expressly disavowed. It is understood and agreed that this Agreement does not

create a joint enterprise, nor does it appoint either party as an agent of the other for any purpose whatsoever. Except as otherwise specifically provided herein, neither party shall in any way assume any of the liability of the other for acts of the other or obligations of the other.

SECTION III
RESPONSIBILITY OF THE CITY

A. City will facilitate Consultant's work with the following tasks:

1. Provide Consultant with its requirements for the Services.

2. Assist Consultant by providing information reasonably available to the City and pertinent to the Services.

3. Facilitate access to and make provisions for Consultant to enter upon public property as reasonably required for Consultant to perform its Services.

4. Examine all reports, sketches, estimates, drawings, proposals, and other documents presented by Consultant and render in writing decisions pertaining thereto within a reasonable time so as not to delay the Services of the Consultant.

5. Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in Services.

6. City's representative with respect to interpretation and implementation of the Services and this Agreement will be the City Engineer or such other representative that the City may appoint by written notice to Consultant with whom Consultant will communicate regarding all matters pertaining to this Agreement. Said representative will make all arrangements for consultation by Consultant with employees or designees of City. In addition, said representative shall have authority and responsibility to define and agree upon the scope and specification of the Services, require and receive reports regarding the progress of the Services, and terminate the performance of the Services or any phase thereof in accordance with the provisions of this Agreement.

SECTION IV
RESPONSIBILITIES OF CONSULTANT

A. Consultant shall perform the Services described in **Exhibits "A".**

B. Consultant shall perform its services with care, skill, and diligence, in accordance with the applicable professional standards currently recognized by its profession, and shall be responsible for the professional quality, technical accuracy, completeness, and coordination of all reports, plans, information, and other items and Services furnished under this Agreement. Consultant shall comply with all applicable

federal, state, and local laws, ordinances, codes, and regulations in performing the Services. If Consultant fails to meet applicable professional standards, Consultant shall without additional compensation correct or revise any errors or deficiencies, with or without request to do so by the City.

C. Consultant shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of Services furnished by Consultant under this Agreement. Consultant shall keep the City informed of the Services performed under this Agreement. In connection with the performance of the Services by Consultant, Consultant agrees to promptly and fully disclose to City any information regarding the Services as City may request.

D. Consultant will develop and maintain a detailed schedule for completion of the Services. The schedule will be a work plan showing activities to be performed and their sequence; and, in addition, activities will contain duration, manpower required, and estimated cost. A preliminary schedule shall be submitted to the City within ten (10) days after execution of a Job Task Order for review and establishment of the level of detail to be included.

E. Consultant will submit monthly progress data for the reporting period which will include the percentage complete and actual start date and actual finish date for all activities worked on by the Consultant during the period. Any changes in delivery dates will be reported. Other information, such as actual hours expended, will be furnished monthly, or as requested, by the City. If requested by the City, schedule update meetings will be held to discuss the results of schedule analysis and necessary action to meet the requirements of the schedule.

F. Consultant shall perform Services necessary to accomplish the work specified in this Agreement, in accordance with this Agreement.

G. City's review or approval of reports, and other services furnished hereunder shall not in any way relieve Consultant of responsibility for the technical adequacy of the work. Neither City's review, approval, or acceptance of, nor payment for any of the Services shall be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

H. Consultant shall be and shall remain liable, in accordance with applicable law, for all damages to City caused by Consultant's negligent performance of any of the Services furnished under this Agreement. Consultant shall not be responsible for any time-delays in the project caused by circumstances beyond Consultant's control.

I. Consultant's obligations under this clause are in addition to the Consultant's other expressed or implied obligations under this Agreement or state law and in no way diminish any other rights that City may have against Consultant for consultant's errors or omissions.

J. All reports, drawings, plans, and other documentation pertaining to the Services become the property of City.

SECTION V
PAYMENT AND FEES

City agrees to pay Consultant for recommendations, reports, design, specifications, and such other services herein contracted for as follows:

A. City hereby agrees to pay a sum not to exceed that which is included in a specific Task Order and authorized by a Notice to Proceed, notwithstanding any contrary indications that may be contained in Consultant's proposal, for services to be performed and reimbursable costs incurred under this Agreement. City shall pay Consultant for services rendered on a lump sum basis pursuant to any specific Task Order and in the manner set forth therein. Consultant shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City in writing, Consultant shall not bill City for duplicate services performed by more than one person. Consultant and City acknowledge and agree that compensation paid by City to Consultant under this Agreement is based upon Consultant's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Consultant. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Consultant and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

B. City is entitled to impose a set-off against payment based on any of the following:

a. Claims have been made against City based on Consultant's conduct in the performance or furnishing of Services, or City has incurred costs, losses, or damages resulting from Consultant's conduct in the performance or furnishing of Services, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, and non-compliance with Laws and Regulations;

b. Consultant has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with Services and related work;

c. Consultant has failed to provide and maintain required insurance;

d. City has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. City has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. Any Services are defective, requiring correction or replacement;

g. City has been required to correct defective Services or has accepted defective Services;

h. Liens have been filed in connection with the Services; or

i. Other items entitle City to a set-off against the payment amount.

C. If City imposes any set-off against payment, City will give Consultant immediate written notice stating the reasons for such action and the specific amount of the reduction, and promptly pay Consultant any amount remaining after deduction of the amount so withheld. City shall promptly pay Consultant the amount so withheld, or any adjustment thereto agreed to by City and Consultant, if Consultant remedies the reasons for such action. The reduction imposed will be binding on Consultant unless it duly submits written notice contesting the reduction within 30 days of receiving City's written notice.

D. All fees payable to Consultant under this Agreement shall be made in full, and without any withholding, deduction, or offset of any state or federal withholding taxes, FICA, SDI, or income taxes, nor shall the City be obligated to pay any of Consultant's employees' taxes. Consultant hereby covenants and agrees that it shall be solely responsible for all taxes, withholding, FICA, SDI, and other similar items (both employee and employer portions) with respect to all fees paid by the City under this Agreement, and agrees to indemnify and hold the City harmless with respect to such taxes and withholding.

E. Consultant and its employees shall not be eligible for, participate in, or be entitled to compensation in lieu of any insurance, benefit, retirement, or other plan or program provided by the City to its employees.

F. Consultant shall provide an invoice in accordance with City regulations. Payment terms shall be net thirty (30) days from receipt of invoice.

G. The City may, at any time, request Consultant to make changes within the scope of the Services or to perform extra work. If any request by the City for a change or extra work causes an increase or decrease in the cost or the time required for performance of the work, or any change to this Agreement, Consultant shall, within fourteen (14) days from the date it receives the City's request, unless the City Engineer grants additional time in writing, submit in writing a proposal for accomplishing such changed or extra work. This proposal shall define, if applicable, any increase or decrease in cost or time of completion or other change to this Agreement. The City must approve

any change orders, pursuant to the City's Code of ordinances and policies and procedures and any other applicable laws of this State, before making the changes. The City will not be liable for any costs incurred by Consultant from performance of a change or extra work prior to issuance of a change order to this Agreement.

H. The total contract price may not be increased because of the changes unless additional money for increased costs is appropriated for that purpose from available funds or is provided for by the authorization of the issuance of time warrants.

I. Prior to and as a condition of final payment to the Consultant following termination or expiration of this Agreement as defined below, the Consultant shall deliver to the City a release in form and substance satisfactory to the City, discharging it and its officers, agents, and employees of all liabilities, obligations, and claims arising out of this Agreement and the performance thereof.

SECTION VI
TERM OF AGREEMENT

A. Except as provided below, this Agreement, and the Services to be performed under it, shall commence on the date this Agreement is executed by both parties, and shall continue thereafter through and the earlier of (i) two (2) years from the date of execution or (ii) until the Services are declared complete in a written instrument signed by the City Engineer and the City Manager. The City shall have the right, in its sole discretion, to extend the term of this Agreement for an additional year upon approval from the City. If approved by City, City shall provide Consultant with a written notice of the approval of the extension.

B. City may terminate this Agreement upon giving 30 days' prior written notice thereof to Consultant. In addition, City shall have the right, upon written notice, to cancel this Agreement immediately if, in the City's sole judgment, the Services rendered by Consultant breach or violate any of the provisions of this Agreement.

C. Upon termination or completion of this Agreement, City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of termination or cancellation. The terms and conditions in this Agreement that by their sense and context are intended to survive the performance hereof by either or both parties hereunder shall so survive the termination, cancellation, or completion of performance of this Agreement.

D. Upon termination or completion of Consultant's Services hereunder or at such other time as may be requested by City, Consultant shall return to City within ten (10) days of termination, completion, or request all documents, records, notebooks, including copies thereof, whether prepared by Consultant or others, in Consultant's possession and related to the Services.

E. The City reserves the right to suspend work on the Services, with or without cause, in whole or in part, upon giving notice to Consultant. Consultant shall resume the Services so suspended when directed to do so by the City. The City shall have no liability to Consultant except for charges for Services performed by Consultant and accepted by the City prior to receipt of notice of suspension of Services. If only a portion of the Services are suspended, Consultant shall be compensated only for Services of which are not suspended and are actually performed during such suspension.

F. Upon termination of this Agreement or suspension of Services under this Section, the City may take over the work and may obtain the services of another entity to complete the work under this Agreement.

SECTION VII
MINIMUM INSURANCE REQUIREMENTS

Consultant shall be adequately insured and carry liability, workers compensation, automobile insurance and professional liability for injury to its employees and others incurring loss or injury as a result of the acts of Consultant or its employees. In accordance with City ordinances, Consultant shall be required to hold the following minimum insurance coverage throughout the duration of this agreement:

A. Workers Compensation
In accordance with State statute.

B. Comprehensive General Liability

1. Bodily Injury
$250,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

C. Comprehensive Auto Liability
1. Bodily Injury
$100,000 each person
$500,000 each occurrence
2. Property Damage
$100,000 each occurrence
$100,000 aggregate
or $500,000 combined single limits

D. City's Protective Liability

1. Bodily Injury

$250,000 each person
$500,000 each occurrence

2. Property Damage

$100,000 each occurrence
$100,000 each aggregate

or $500,000 combined single limits

E. Professional Liability

1. Professional

$1,000,000 per claim and in the aggregate

F. Evidence of the above insurance coverage is attached as Exhibit ”B” and the City of Edinburg shall be listed as an additional insured.

G. If at any time and for any reason Consultant fails to provide, maintain, keep in force and effect, or deliver to the City proof of, any of the insurance required and such failure continues for ten (10) days after Notice thereof from City to Consultant, City may, but shall have no obligation to, procure single interest insurance for such risks covering City (or, if no more expensive, the insurance required by this Agreement), and Consultant shall, within ten (10) days following City’s demand and Notice, pay and reimburse City therefor with interest at Prime Rate plus 2%, the Prime Rate being that in place on the date of Notice, from the date of payment by the City until repayment of City in full by Consultant.

H. With respect to each and every one of the insurance policies required to be obtained, kept, or maintained under the terms of this Agreement, on or before the date on which each such policy is required to be first obtained and at least fifteen (15) days before the expiration of any policy required hereunder previously obtained, Consultant shall deliver evidence reasonably acceptable to City showing that such insurance is in full force and effect.

I. Consultant hereby agrees as follows:

1. To punctually pay or cause to be paid all premiums and other sums payable under each insurance policy required to be obtained, kept, and maintained pursuant to this Lease;

2. To maintain in full force and effect the policies required to be carried to the extent so required to be carried pursuant to the terms hereof;

3. To ensure that all Casualty Proceeds are paid to the Party entitled to receive same;

4. Not, at any time, to take any action (or omit to take action) which action (or omission) would cause any insurance policies required to be obtained, kept, and maintained under this Lease to become void, voidable, unenforceable, suspended, or impaired in whole or in part or which would otherwise cause any sum paid out under any such insurance policy to become repayable in whole or in part; and

5. Promptly deliver Notice to City of any facts or circumstances of which it is aware which, if not disclosed to its insurers or re-insurers, is likely to affect adversely the nature or extent of the coverage to be provided under any insurance policy required hereunder.

SECTION VIII
ALTERNATE DISPUTE RESOLUTION/NEUTRAL PARTY

A. If any dispute, controversy, or claim between or among the Parties arises under this Agreement or is related in any way to this Agreement or the relationship of the Parties hereunder (a "Dispute"), the Parties shall first attempt in good faith to settle and resolve such Dispute by meeting at a mutually agreeable time and place to discuss the Dispute within seven (7) days following the original written notice of any Dispute by the party making such a claim. The Parties shall seek to resolve the Dispute in writing within fourteen (14) days following the original written notice of any Dispute by the party making such a claim.

B. If a mutual resolution and settlement are not obtained at the meeting, the Parties shall participate in good faith in formal mediation, within thirty (30) days following the original written notice of any Dispute, with a mutually agreeable mediator at a mutually agreeable time and place. No settlement reached under this provision shall be binding on the Parties until reduced to a writing signed by a representative of Contractor and the City Manager. Unless the parties expressly agree otherwise, each party shall bear its own costs and legal and expert fees incurred in the mediation, and evenly share the costs of the mediator. If after proceeding in good faith the parties, with the assistance of a neutral mediator, do not resolve the dispute within forty-five (45) days following the original written notice of any Dispute, the parties may proceed in accordance with Section IX below.

SECTION IX
CONTROLLING LAW, MANDATORY VENUE, AND FEES AND EXPENSES

A. After exhausting the procedures set forth above, either party may initiate litigation to resolve the dispute. The Law of the State of Texas shall control the Dispute. Venue is mandatory in in State courts located in Hidalgo County, Texas.

B. In the event of any litigation between the parties, the parties shall bear their own costs, including attorneys' fees and expenses.

SECTION X
INDEMNIFICATION

A. To the maximum extent allowed by law, Consultant agrees to and shall indemnify, hold harmless, and defend City, its officers, agents, and employees from any all claims, losses, causes of action and damages, suits and liability of every kind, including all expenses of litigation, court costs, and attorney's fees for injury to or death to any person or for damage to any property, arising out of or directly connected with the negligent or willful conduct of Consultant, its agents, officers and employees, carried out in furtherance of this Agreement.

B. Consultant agrees to assist City in defense of claims or litigation brought against the City related to this project, including any claims related to design or any other services provided by consultant regarding this agreement.

SECTION XI
LIMITATION OF LIABILITY

A. Consultant agrees to limit the City's liability arising from City's acts, errors, or omissions such that the total liability of City shall not exceed Consultant's total fees paid by the City to Consultant for the Services rendered pursuant to the Task Order which is the subject matter of the claim. Consultant agrees that City will not be liable for any indirect, incidental, special, or consequential punitive or multiple damages, including without limitation any damages resulting from loss of use, loss of business, loss of revenue, loss of profits, or loss of data, arising in connection with this Agreement, Consultant's performance of Services, or of any other obligations relating to this Agreement, even if City has been advised of the possibility of such damages. The foregoing limitation of liability shall apply to the maximum extent allowed by law for limitation of City's liability, regardless of the cause of action under which such damages are sought.

SECTION XII
AGREEMENT CONSTRUCTION

A. The headings of the Sections contained in this Agreement are for reference purposes only, and shall not affect the meaning or interpretation of this Agreement. The parties have been advised by counsel in connection with this Agreement. This Agreement shall be construed and interpreted in accordance with the plain meaning of its language, and not for or against either party, and as a whole, giving effect to all of the terms, conditions, and provisions of this Agreement. Nothing contained in this Agreement shall be deemed to confer any right or benefit on any person who is not a party to this Agreement.

SECTION XIII
NO PENDING LITIGATION

A. Consultant represents that there is no action, proceeding, inquiry, or investigation, at law or in equity, before any court, arbitrator, governmental or other board or official, pending to the best knowledge of Consultant threated against or affecting the Consultant or any subsidiaries of the Consultant, questioning the validity or any action taken or to be taken by the Consultant in connection with the execution, delivery, and performance by the Consultant of this Agreement to which the Consultant may be a party or seeking to prohibit, restrain, or enjoin the execution, delivery, or performance by the Consultant hereof or thereof, where in an unfavorable decision, ruling, or finding (i) would adversely effect the validity or enforceability of, or the authority or ability of the Consultant to perform, its obligations under this Agreement to which the Consultant may be party or (ii) would have an adverse effect on the consolidated financial condition or results of operations of the Consultant or on the ability of the Consultant to conduct its business as presently conducted or as proposed or contemplated to be conducted.

SECTION XIV
SEVERABILITY

A. If any term or provision of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remainder of the provisions of this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

SECTION XV
NOTICE

A. Any notices to be given under this Agreement shall be in writing, (i) sent by registered or certified mail, postage prepaid, return receipt requested or (ii) sent by nationally recognized overnight courier (e.g. Federal Express) with electronic tracking, and addressed to such party as follows:

(a) Notices to the City:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Manager

With a copy to:

City of Edinburg
415 W. University Drive
Edinburg, Texas 78539
Attn.: City Attorney

(b) Notices to Consultant:

Address
City, State Zip Code
Attn.: Contact

B. Such Notices shall be deemed delivered (i) in the case of U.S. mail in the manner provided above, three (3) business days after posting or (ii) if sent by nationally recognized overnight courier with electronic tracking service, the next business day after depositing same with such overnight courier before the overnight deadline and if deposited with such courier after such deadline, then the next succeeding business day.

SECTION XVI
NON-APPROPRIATIONS

A. Notwithstanding anything in the Agreement to the contrary, any and all payments which the City is required to make under this Agreement shall be subject to annual appropriation or other availability of funds, as certified by the Director of Finance.

B. If the City cannot appropriate sufficient funding, then either party has the right to terminate the Agreement by providing ten (10) days' written notice to the other party.

SECTION XVII
SUCCESSORS AND ASSIGNS

City and Consultant each bind themselves, their partners, successors, executors, administrators, and assigns to the other party of the Agreement in respect to all covenants of this Agreement. Neither City nor Consultant shall assign, sublet, or transfer interest in this Agreement without written consent of the other.

SECTION XIX
CONFLICT OF TERMS

If any of the terms of this Agreement conflict in any respect with any of the terms of the attached Exhibits or any current or future Job Task Orders, the terms of this Agreement shall be controlling.

SECTION XX
NO WAIVERS OR ACCORD AND SATISFACTION

A. This Agreement may be amended only by written instrument signed by all parties.

B. No failure or delay of any Party, in any one or more instances (i) in exercising any power, right, or remedy under this Agreement or (ii) in insisting upon the

strict performance by the other Party of such other Party's covenants, obligations, or agreements under this Lease, shall operate as a waiver, discharge, or invalidation thereof, nor shall any single or partial exercise of any such right, power, or remedy or insistence on strict performance, or any abandonment or discontinuance of steps to enforce such a right, power, or remedy or to enforce strict performance, preclude any other or future exercise thereof or insistence thereupon or the exercise of any other right, power, or remedy. The covenants, obligations, and agreements of a defaulting Party and the rights and remedies of the other Party upon a default shall continue and remain in full force and effect with respect to any subsequent breach, act, or omission.

C. Without limiting the generality of the above, the receipt by City of any Services with knowledge of a breach by Consultant of any covenant, obligation, or agreement under this Agreement shall not be deemed or construed to be a waiver of such breach. No acceptance of Services or payment to Consultant shall be deemed to be other than on account of the earliest installment of the amounts due under this Agreement, nor shall any endorsement or statement on any check, or any letter accompanying any check, wire transfer or other payment, be deemed an accord and satisfaction. City may accept services or make payment without prejudice to its rights under this Agreement or pursue any remedy provided in this Agreement or provided otherwise by law or equity.

Section XXI
Notice of Governing Law for State and Federal Grant Projects

The Consultant agrees to abide by all applicable laws and regulations and to make all applicable records and other documentary data available at any time for the purpose of an audit and to ensure compliance with relevant State and federal laws, including but not entirely limited to, those provisions found any future Job Task Orders.

EXECUTED by the parties in triplicate originals on this _____ day of _____, 202___.

Attn: Mardoqueo Hinojosa

415 W. University Drive

Edinburg, Texas 78539

Dear: Mr. Mardoqueo Hinojosa

Guzman & Muñoz Engineering and Surveying, Inc. (GMES) is pleased to submit the attached Statement of Qualifications in response to the Request for Qualification #2024-09 Land Surveying Services for the City of Edinburg, Texas. One (1) electronic copy of our Statement of Qualifications has been sent to the City of Edinburg.

GMES understands the City of Edinburg is seeking a qualified surveying firm for the planning, design, and construction administration of projects within the City of Edinburg. All projects will be executed under the direction and management of the City Manager's Department. The selected firm will be responsible for successfully planning, designing, and performing construction administration for all projects, as well as, providing Project Management and coordination of engineering design efforts for projects as assigned.

GMES has highly experienced professionals with extensive capabilities in project management, engineering, surveying, design, construction engineering, construction services and inspection. As detailed in the attached Statement of Qualifications, GMES is multi-disciplined with a broad knowledge of the various aspects of the engineering, surveying and construction industries as may be required by the City of Edinburg for any upcoming project.

GMES brings the talent and depth of registered Professional Engineers, Engineers-in-Training (EITs), Registered Professional Land Surveyors, Construction Managers and Inspectors, as well as, full-time survey crews and various drafting technicians and management and related support personnel.

The work will be performed in the GMES *local* office in the Rio Grande Valley. The official contact name and address for the firm is:

Jose L. Muñoz, P.E., S.I.T., President – Project Manager
Guzman & Muñoz Engineering and Surveying, Inc.

SECTION 1 UNDERSTANDING THE PROJECT

1.1 INTRODUCTION

Guzman & Muñoz Engineering and Surveying, Inc. (GMES) is pleased to submit this Statement of Qualifications for Professional Services in accordance with the ***City of Edinburg Request for Qualifications #2024-09 Land Surveying Services***.

The team at (GMES) bring extensive capabilities in the area of professional services for all disciplines of consulting, engineering, surveying, design, construction management, inspection and construction (design/build), as well as, project management through the experience of over 43 years in the Rio Grande Valley. GMES' staff experience in research and planning add to the analytical and project scheduling expertise vital to timely and cost-effective project completion. GMES is well qualified to perform any type of review and technical guidance required by and for City of Edinburg.

SCOPE OF SERVICES MAY INCLUDE THE FOLLOWING:

- **SURVEYING SERVICES**
  - Identify design criteria
  - Provide design alternatives with cost analysis
  - Prepare Plans, Specifications and Estimates (PS&E)
  - Boundary lines, Giving length & Bearing on Each Straight line: Interior Angles; Radius, Point of Tangency, & length of curved lines. Set Iron pin (Monument at property corners where none exists, drive pin 18" into found, mark with wood stake; state on drawing whether corners were found or set & describe each
  - Legal description, including measurements in recoded deeds for compassion with observed
  - Area in square feet if less than one acre, in acres (To .001 Acre) if over one Acre
  - Identify, jurisdiction and Width of adjoining Street and Highways, Width & how Paved. Identity of Landmarks
  - Plotted location of structures on the property and on Adjacent Property within 30Feet. Dimension Perimeters in feet & inches to nearest ½. State character & number of stories. Dimension to Property lines & other Buildings. Vacant Parcels Shall be noted "Vacant".
  - Encroachments, Including Cornices, Belt Courses, Etc., Either Way Across Property lines.
  - Fences & walls; Describe. Identify part walls & locate with respect to property lines.
  - Recorded or otherwise known easements & ROW: State Owner of Right.
  - Possibilities of prescriptive ROW & Nature of each
  - Anticipated Street Widening
  - Individual lot lines and lot and block numbers, street numbers of buildings
  - Sidewalks, curbs, gutters & drives on the block & extend to include the same across boundary streets
  - Building line & Setback requirement, if any
  - Names of owners Adjacent Property
  - Reconciliation or explanation of any discrepancies between Survey & recorded legal description
  - Title Searches & title Reports
  - ROW acquisitions

- **TOPOGRAPHICAL SURVEY SERVICES**
  - All lines of levels shall be check by separate check level lines or on Previous turning points or benchmarks
  - Traffic Devices, signs, in connection with boundary streets

- Future plans of City, utility districts & municipal utilities when such information is discovered in routine information gatherings Minimum of one permanent benchmark on site for eac ten or less acres; description & elevation to nearest .01'
- Contours at 1foot intervals; error shall not exceed one-half contour interval
- Spot elevations at each intersection of a 20foot square grid covering the property & if possible 5foot grid interval (S) beyond
- Spot elevations at street intersections & at 5 feet on center on curb, sidewalk & edge of paving including far side of paving. If elevations vary from established grades, state established grades also
- Plotted location of structures, man made & Natural features: floor elevations at each entrance of buildings on property
- Location, size, depth & pressure of water, gas mains & other utilities serving or on the property, valves, meters
- Location of fire hydrants available to property & size of main serving each
- Location, Size, depth & direction of flow of sanitary Sewers, storm drains & culverts serving or on property, location of catch basins & manholes, inverts of pipe at each: same at or in boundary streets
- Location of electric & telephone services, characteristics of service available
- Name of operation authority of each utility
- Mean elevation of eater in any excavation, well or nearby body: flood level of steams
- Extent of watershed onto property probability of freshets overrunning the site
- Locations of Test borings if ascertainable & elevation of top of holes
- Trees of 3" and over (caliper3' above ground) locate within 1' tolerance & give species
- Perimeter outline only of thickly wooded areas unless otherwise directed
- Location, size, elevation of elevated. Piping insulated piping conduit pipe racks & supports except that above building roofs
- Show dimensions & bearings of property boundaries plot all locatable title exceptions and easements on the survey map
- Show existence or Non-Existence or Non-existence of any encroachments & ROW
- The Written legal description of the property & Exhibit for recording purpose
- Provide an area measurement within boundary lines
- Easements- all utility, city and private easements shall be shown & labeled
- Legal description & Exhibit for any easements where required
- Setbacks- Building & parking setbacks shall be shown & noted for each property or Zoning Areas
- All above grade utilities, including but not limited to overhead electrical, telephone, cable, street lighting other electrical communications equipment: location, time elevations of sanitary & storm structures, water main valves, hydrants: gas valves, all other above grade utility equipment.
- All underground utilities included but not limited to storm, sanitary, gas electrical, water & cable, Rim elevation, bottom of manhole all in & out inverts of utilities shall be noted. Note: if any of these utilities do not exist within or directly adjacent to the survey area, surveyor shall locate the nearest available service connection which can be used for future service to site
- Provide on the survey a list of names, addresses, phone numbers of all applicable utility companies
- Trees, shrubs & planting area: trees 2" caliper & larger shall be labeled with caliper & species. All tree canopies shall be accurately shown
- All 6" caliper & larger shall be labeled with caliper & species. All tree canopies shall be accurately shown & areas of woods or shrubs accurately delineated
- Zoning of the property and all adjacent properties within 100' of the surveyed area
- Provide planning & zoning overlays
- Current flood plain information including FEMA regulatory 100 yea and 500 year floodplain boundaries, notation of record flood event elevation (2008 flood) 100 ear flood elevation & other DNR protected area Boundaries
- All Measurement tolerances provided on such surveys must be within readings for urban survey as specified on accuracy standards for Alta/Acsm Land Title Surveys

- When a significant discrepancy with the record and documents are found or if monuments are set or if otherwise required by law, surveyor shall provide a "record of survey map" compliant with city & state standards
- Elevation certificate for flood insurance purpose (FEMA) coordination & documentation associated with Phase 1 and Phase II Real Estate
- All other topographic surveying as assigned

- **FIELD TESTING AND INSPECTIONS**
  - Conduct field testing and inspections as may be required
- **SPECIAL SERVICES**
  - Provide special services as may be required

GMES understands the scope and is fully capable of providing and administering the required services from design thru construction.

1.2 WORK PERFORMANCE

Throughout several years of service to City of Edinburg and the regional area, GMES has provided engineering and surveying services in many communities. The scope of work has included development of preliminary and final plans and specifications (PS&E), bid package preparation, construction administration, construction (design/build), field inspections, preparation of environmental documents and project management.

GMES has a proven track record with City of Edinburg, the various municipalities within the County, TxDOT, and has prior working experience with entities such as Texas Gas Services, American Electric & Power, Time Warner, Total E&P, AT&T and Valley Telephone Coop, just to mention a very few. We have built good solid working relationships with these agencies when working on past projects throughout the Rio Grande Valley.

STEPS TO ENSURE EXCELLENT PROJECT MANAGEMENT AND BUDGET PERFORMANCE

GMES will use a management by objectives approach to performing the scope of work. This disciplined approach ensures senior management oversight, frequent status updates, adequate resource allocation and a close communication with City of Edinburg staff and respective agencies and contractors associated with the project(s). The different tasks to be performed on a project can be divided into phases. All phases are closely coordinated with the designated City of Edinburg representative(s).

STUDY AND REPORT PHASE – *if required.*

1. Upon selection, set-up a project startup meeting with City of Edinburg staff to review the project requirements and gather all pertinent data and history.
2. Perform field reconnaissance of project area and surveying and physical structures of the area.
3. Contact all appropriate state, federal and local agencies for permit process, time schedule and construction requirements.
4. Request Title Reports on affected properties from Title Company, if needed.
5. Contact utility companies for subsurface locations of their utilities.
6. Prepare a working sketch to submit to City of Edinburg for acknowledgment to proceed and to get their input.
7. Furnish and submit on behalf of City of Edinburg the engineering data necessary for applications for routine permits by local, state and federal authorities (as identified from detail applications and supporting documents for government grants in aid or for planning advances.

PHASE II – PRELIMINARY PHASE

1. Meet with City of Edinburg representatives and relevant parties to gather information and coordinate project.

2. Perform boundary and topographic survey of project area(s).
3. Conduct a survey of existing utilities that may be affected.
4. Develop preliminary construction plans/profile of project, if requested by City of Edinburg.
5. Submit preliminary surveying plat to City of Edinburg and other affected entities for preliminary approval of proposed improvements, to receive additional input.
6. Prepare surveying documents and meet with City of Edinburg representative.

PHASE III – DESIGN PHASE

1. Perform any additional detailed topographical field surveys to collect additional information required in the project.
2. Perform detailed surveys of existing underground, surface, and overhead utilities within the project.
3. Consult with the utility companies for their consideration of all utility data found. Provide Survey plat to the utility companies involved, if requested.
4. Prepare detailed specifications and contract drawings for construction.
5. Prepare detailed cost estimates and proposals, which shall include summaries of bid items and quantities based on unit price system of bidding, if requested.
6. Furnish the necessary copies of the approved plans, specifications and proposals to City of Edinburg.

Use of the above project performance has proven successful and will be used accordingly as tools for instruments of service for all projects assigned to GMES to ensure all aspects of the required scope of services are met. The GMES Team will furnish a Document Control Specialist will ensure that every aspect of the project is well documented and recorded and that appropriate files are kept.

QUALITY ASSURANCE/QUALITY CONTROL DURING LAND SURVEYING SERVICES

Meetings will be held on a frequent basis to address any contingencies that may arise during the projects and/or to resolve any issues within the project team. Meeting minutes will be developed during all project meetings.

MEETINGS TO BE HELD:

- **DAILY MEETINGS WITH**: Superintendent, Subcontractor Foremen, Vendors, Client Field Representatives, Safety Officer, QA/QC Officer and required testing authority.
- **WEEKLY MEETINGS WITH:** Project Manager, Superintendent, Scheduler specific design leads, Construction Coordinator, Safety Officer, QA/QC Officer, Contractor Foreman, and the Client Field Representative.
- **MONTHLY PROGRESS AND PERFORMANCE UPDATE MEETINGS WITH:** Client Representative(s), Design Team Leads, Project Manager, Job Superintendent, Project Scheduler, Contractor Representative(s).

GMES WILL ALSO DO THE FOLLOWING TO ASSIST IN THE MONITORING OF THE BUDGET, SCHEDULE AND SCOPE OF ANY PROJECT:

1) Daily inspection reports will be kept and logged at the site then turned in at the weekly meetings. This will include inspections of equipment as well.
2) Submittal registers and weekly logs of submittals along with delivery logs will be utilized by the Project Manager, job Superintendent, and Construction Manager and his staff to track and control approved material/equipment contingencies and requirements.
3) RFI logs and inspection logs will be used to manage/control and resolve design and quality of construction issues as they occur.
4) The project schedule will be managed by the Project Scheduler and overseen by the Project Manager.

GUZMAN AND MUÑOZ ENGINEERING AND SURVEYING, INC. ~ HISTORY

Guzman Muñoz Engineering and Surveying, Inc. (GMES) (DBE) (HUB) has fulfilled the requirements of the Texas Board of Professional Engineers to offer and perform engineering services in the State of Texas. Firm Registration No. F-8017, expiration date of 7/31/2024. GMES has been providing consulting engineering services in the Rio Grande Valley Region, with widespread projects in Cameron, Hidalgo, Starr, Willacy, and Zavala County areas, since 1973. The firm is a well-established corporation.

Additionally, GMES has immeasurable experience with various governmental regulations, appropriate codes, guidelines, and professional standards and policies (i.e., FAA, TxDOT, FHA, TWDB, TCEQ, TDRA, TxCDBG, TNRCC, FEMA, local government entities and school districts). Similarly, GMES has extensive experience with both utility and infrastructure improvement projects, and we continue to retain excellent working relationships with municipal, governmental, and various utility agencies and their staff across the State and the Rio Grande Valley

PROJECT SPECIALIZATION

Our firm specializes in a broad range of engineering, surveying, and construction-related projects including public works improvement projects in the areas of street improvements, drainage improvements, water and wastewater plants, water distribution and wastewater collection systems, and various surveying projects. **We have expanded our services to include design/build construction.**

GMES has also provided engineering and surveying staff support to various municipalities in regard to R.O.W. acquisition, mapping, and surveying. Our list of clients includes nonprofit agencies, housing authorities, municipalities, counties, political subdivisions, governmental agencies (including various school districts), airports, and private developers. We are very familiar with the economic constraints that are associated with a limited budget. With that in mind, you can rest assured that economic limitations will play an important factor in providing engineering support and advice on any of your projects or program. All of these skill sets are directly applicable for the successful execution of any project assigned to GMES as necessary to complete all projects per your ***City of Edinburg Request for Proposals For Engineering Services RFP #2024-09 RFQ.*** GMES brings the talent and depth of approximately 23 employees that includes engineers, surveyors, an environmentalist, planners, technicians, management, and related support personnel. Respectively, the experience of GMES' staff in construction management and the construction industry, knowledge of the funding criteria, and project inspection add to the analytical and project scheduling expertise that is vital to timely and cost-effective project completion.

Our firm is comprised of a multi-disciplined team of professionals and well-trained technicians. The **Principal-In-Charge and President of the Corporation is Mr. José L. Muñoz, P.E., S.I.T.** Mr. Muñoz has over 35 years of experience in design and project management of **Civil Engineering** projects. Mr. Munoz is also a **Land Surveyor** In Training and takes a direct hands-on approach to all work GMES is committed to complete.

Mr. Munoz has extensive experience in Project Management of public infrastructure projects and municipal planning. He has successfully managed engineering projects funded by the Texas Water Development Board (TWDB) and other state and federal agencies including street and drainage, water and wastewater treatment plant planning and design for projects. Mr. Munoz has designed or is in the process of developing planning documents, such as, Environmental Information Documents, Preliminary Engineering Reports, Funding Agency Applications, and Plans, Specifications and Cost Estimates (PS&E) for the following projects:

- Lower Rio Grande Valley Development Council – Regional Drainage Study in Hidalgo County
- City of Mercedes EDA Light Industrial Park
- City of Mercedes, 2015 Street and Drainage and Utility Improvements Project (Local Funding)
- City of Mercedes- Utility Relocation Bus 83 Reconstruction
- City of Edcouch FY 2012 TWDB/CWSRF Application for Sanitary Sewer Collection Rehabilitation
- Willacy County Appraisal District – Assessment Study, Design and Construction for the New County Appraisal District Main Office
- City of Los Fresnos DWSRF/ TWDB Water Distribution WTP upgrade
- City of Los Fresnos CWSRF/ TWDB Wastewater Collection System Improvements
- City of Raymondville New Water Well & RO System
- Willacy County (FEMA) Community Saferoom
- GLO Disaster Recovery Round 2: County PCT 4 Drainage and Pavement Improvements for Sebastian, Lyford, La Sara, San Perlita
- City of Raymondville FY 2012 TWDB/CWSRF Application for Sanitary Sewer Collection Rehabilitation
- City of Raymondville FY 2013 TWDB/CWSRF Application for Clean Water Improvements
- City of Raymondville Drainage Improvements (TDA Funded)
- City of Primera – Paving and Drainage Improvements, El Campo Road (TDA Funded)
- Los Indios Drainage Improvements (TDRA Funded)

PROJECT MANAGEMENT EXPERIENCE: CITY OF MERCEDES ENGINEERING SERVICES

Owner: City of Mercedes – Sergio Zavala, Interim City Manager

Scope: Provide Surveying, Engineering Design, Construction and Inspection Services for Various Street Projects
No. of Projects: Various
Program Duration: Start: January 2013 Finish: Current
Program Amount: Unspecified

Project 1: 2013 City of Mercedes - Street Program (West Side)

Design Engineer: Jose L. Munoz, P.E., S.I.T.
Contact Info: (956) 565-4637
Start /Comp. Dates: May 2013 – May 2014
Project Description: Street Reconstruction including Utility Relocation and Drainage Improvements
Estimate: $1,500,000.00 Actual Cost: On-going

Project 2: 2013 City of Mercedes - Street Program (East Side)

Design Engineer: Jose L. Munoz, P.E., S.I.T.
Contact Info: (956) 565-4637
Start / Comp. Dates: August 2013 - July 2014
Project Description: Street Reconstruction including Utility Relocation and Drainage Improvements (paving, drainage and waterline adjustments).
Estimate: $1,500,000.00 Actual Cost: On-going

PROJECT MANAGEMENT EXPERIENCE: CITY OF RAYMONDVILLE ENGINEERING SERVICES

Owner: City of Raymondville - Eleazar Garcia, City Manager

Scope: Provide Surveying, Engineering Design, Construction and Inspection Services
No. of Projects: Various
Program Duration: Start: February 2013 Finish: Current
Program Amount: Unspecified

Project 1: City of Raymondville - Replacement of LS 18 and Elimination of LS 3

Design Engineer: Jose L. Munoz, P.E., S.I.T.
Contact Info: (956)565-4637
Start / Comp. Dates: January 2013 to January 2014
Project Description: Construction of a new submersible lift station to replace the existing wet/dry well Lift Station 18 and the construction of an 8-inch interceptor gravity line to divert flow from Lift Station 3 to Lift Station 4; thereby, eliminating Lift Station 3.
Estimate: $206,475 Actual Cost: On-going

Project 2: 2013 City of Raymondville - Street Overlay Projects

Design Engineer: Jose L. Munoz, P.E., S.I.T.
Contact Info: (956)565-4637
Start /Comp. Dates: February 2013 to February 2014
Project Description: Street Overlay, Base Repairs and Curb and Gutter Replacement and Reconstruction. Asphalt Milling and Resurfacing (some areas).
Estimate: $246,883 Actual Cost: On-going

	1	
21. TITLE AND LOCATION *(City and State)*	22. YEAR COMPLETED	
	PROFESSIONAL	CONSTRUCTION
United States International Boundary Water Commission –New Falcon Dam Administration Facility: Design/Build Services, Falcon Heights, Texas	2016	2018

23. PROJECT OWNER'S INFORMATION

a. PROJECT OWNER	b. POINT OF CONTACT NAME	c. POINT OF CONTACT TELEPHONE NUMBER
US International Boundary Water Commission (US-IBWC)	Phillip Johnson, Contracting Officer	(817) 978-0229

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

Guzman & Munoz Engineering and Surveying, Inc., has been providing design/build services for Level 3 Blast Resistant Facility – Single Degree Freedom Antiterrorism Design structure for the US. International Boundary and Water Commission (USIBWC) under an IBCM contract.

New Falcon Dam Administration Facility - This project is a true design-build. The project was developed to provide administrative office space for (USIBWC) United States Section – International Boundary Water Commission staff and facilitate various departments, Hydrology Department for Falcon Dam water quality regulation, Falcon Dam Security Sector Department, and a public meeting facility and record storage for USIBWC Administrative Operations. All design and construction disciplines were employed and managed by GMES Team. This facility was designed with Level III Blast resistance as dictated by its U.S. Critical Infrastructure designation.

This "turnkey" project was developed from its inception during the initial planning phase through construction completion. The USIBWC budget of $3.88m was a guaranteed maximum price DB and the project was delivered on time.

SCOPE OF SERVICES / WORK PERFORMED

- Architectural Design Development and Facility Planning-Programming
- Texas Historical Commission Recognition and Design approval
- Texas Commission of Environmental Quality – Permitting, Falcon Lake
- Preliminary Engineering Design & Security Analysis
- Final engineering design and preparation of construction documents
- Programming for LEED Gold Design Certification
- General Contracting -Subcontract Qualification for Construction Services
- Construction Management Services (CMS) during construction phase
- Building Commissioning and As-built record survey and drawings
- Final facility demolition for USIBWC vacated facilities

VALUE TO FEDERAL GOVERNMENT

PROJECT / CONTRACT VALUE: $ 3,888,000 (CONTRACT VALUE)
$ 3,500,000 (CONSTRUCTION VALUE)

SIZE / COST / SCHEDULE

- Security and other upgrades
- Total Cost: $316,000
- Schedule: 2012 to 2013

PROJECT RELEVANCE

Specialized Experience and Technical Competence

- Program/Project Management
- Feasibility & Concept Studies
- Design/Const. Cost Reconciliation
- Multidiscipline Design & Consulting
- General Contracting Services
- Civil, Site and Utility Design
- Structural Engineering
- Design for New Construction
- Construction Cost Estimating
- Life Cycle Costing
- Design of Comm. System
- Post-Design Shop Drawing Review
- RFI Responses During Bid Phase
- RFI Responses During Construction
- Evaluate Contractor Submittals
- Onsite Const. Oversight / Inspection
- Preparation of Record Drawings
- Site Survey, Evaluate, Investigation
- Pre-Design Site Assessment
- Soils Engineering & Drawing Review
- Review of Geotechnical Reports

"…This project demonstrates our team's ability to provide complex design services and project management for highly specialized construction projects. It also demonstrates the team's successful relationship and performance in government contracts with USIBWC…."

- GMES, Jose L. Munoz, President

Texas Department of Transportation	**Jacinto Garza, P.E. L&G Engineering, Inc.**	**(956)565-9813**

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

GMES provided services on a fast track basis to meet a demanding complex schedule. The firm completed the Project on time and within budget.

This project demonstrates our team's experience with providing design surveys for engineers developing Plans and Specifications and hydraulic model updates. The project demonstrates our ability to:

- Support design engineers
- Provide a wide range of surveying services
- Deliver with federal agency required data formats

SCOPE OF SERVICES / WORK PERFORMED

- Ground control surveying including Horizontal control based on Texas State Plane Coordinate System, NAD83, Zone 4205; Vertical control is based on NAVD88 (1993 Adjustment) and is based on NGS monumentation; All control complied with TxDOT Standards.
- Right-of-way acquisition of 25 parcels.
- Parcel map preparation of all properties within the defined project area
- Collection of deeds, easements, plats and other documents of record
- Survey of property occupation lines and recovery of major block corner points and/or street intersections
- Rectification of parcel lines to project coordinate system and datum
- Location of utilities for water, sanitary sewer, storm drainage, electrical, communications, and gas.

VALUE ADDED

Our team was committed to assisting the Texas Department of Transportation (TxDOT) and L&G Engineering with efficiently meeting demands dictated by accelerated schedules. The relevant specialized experience our team has gained providing accelerated services to our Client and the TxDOT Pharr District prove GMES has the capabilities required to bring projects to successful fruition on a fast-track basis.

PROJECT RELEVANCE

A. SPECIALIZED EXPERIENCE

- ✓ **STATE/FEDERAL CONTRACT**
- ✓ **LAND SURVEY**

  Total Station; GPS (Sub-centimeter); Vertical & Horizontal Controls
- ✓ **REAL ESTATE SURVEY**

  Boundaries; Monumentation; Researching/locating Deeds; Current Tract/Parcel Owners
- ✓ **GIS/CADD SERVICES**
- ✓ **DELIVERABLES**

  Hardcopy or Digital (2D or 3D); MicroStation; CD-ROM optical rewriteable disks; Internet file transfer protocol; Government/ Industry Standards; Civil Design AutoCAD Standards

SIZE / COST / SCHEDULE

- Size: 1.8 Miles
- Total Cost: $64,500
- Schedule: 8-2011 to 4-2013

PERSONNEL & STAFFING

GMES KEY STAFF

The PROJECT DIRECTOR for all work assigned will be
JOSE L. MUÑOZ, P.E., S.I.T., PRESIDENT

Our firm is comprised of a multi-disciplined team of professionals and well-trained technicians. The **Principal-In-Charge and President of the Corporation is Mr. José L. Muñoz, P.E., S.I.T.** Mr. Muñoz has over 40 years of experience in the design and project management of **Civil Engineering** projects. Mr. Munoz is also a **Land Surveyor in Training** and **takes a direct hands-on approach to all the work GMES is committed to completing.**

Mr. Munoz has extensive experience in Project Management of public infrastructure projects and municipal planning. He has successfully managed engineering projects funded by the GLO's CDBG-MIT program and other state and federal agencies including street and drainage, water and wastewater treatment plant planning and design for projects. Mr. Munoz has designed or is in the process of developing planning documents, such as Environmental Information Documents, Preliminary Engineering Reports, Funding Agency Applications, and Plans, Specifications, and Cost Estimates (PS&E) for numerous projects.

CARLOS AGUILAR, P.E., R.P.L.S., PROJECT SURVEYOR

Mr. Aguilar has provided professional surveying services since 1992. His experience includes numerous street and drainage projects and numerous subdivision design and construction projects for Cameron County and Hidalgo County as well as various cities throughout the Rio Grande Valley. He has provided a broad range of surveying practices, including right-of-way strip maps, title research, establishing boundary locations, topography, construction staking, and land development projects throughout his career.

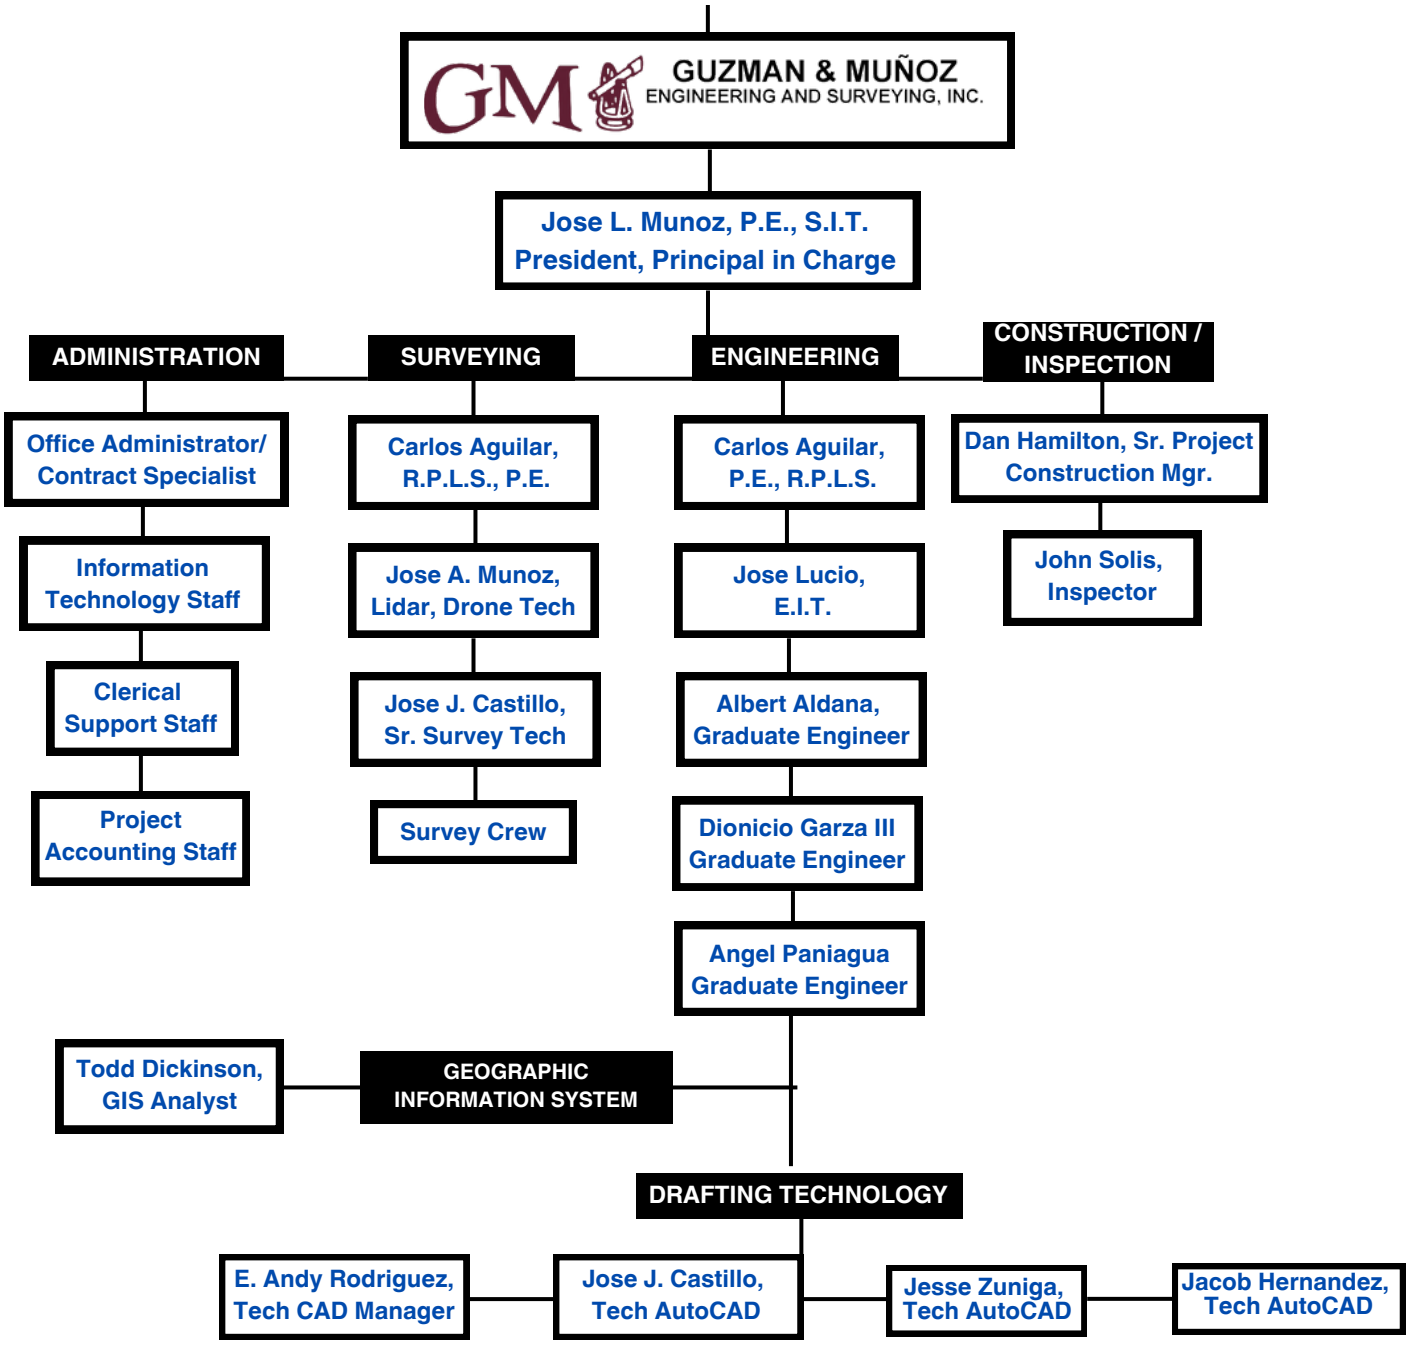
PERSONNEL & STAFFING

DAN HAMILTON, SENIOR PROJECT MANAGER CONSTRUCTION DIVISION
EDUCATION: B.S. Industrial Construction Technologies Since 1986
EXPERIENCE: Mr. Hamilton has 45 years of construction and engineering related experience, covering a broad range of construction projects and practices, managing project progress and contract conformance. GEO Tech testing, Stockpile management and tracking, Concrete Design, Testing, Quality Control, and Stockpile Management Regimens.

TODD DICKISON, GIS ANALYST
EDUCATION: B.A. English, Data Analytics Certification
EXPERIENCE: Mr. Dickison has over 30 years of experience in IT, primarily as a database administrator and backend support.

JOSE LUCIO, EIT
EDUCATION: B.S. Civil Engineering 2020
A.E.S. Engineering and Science 2015
EXPERIENCE: Mr. Lucio is a Graduate Civil Engineer who has experience in construction, with exceptional attention to construction, inspection, surveying, and quality control. Mr. Lucio is a motivated individual who consistently is exploring new areas to expand his knowledge and abilities. Mr. Lucio's eagerness to contribute to team success through hard work, attention to detail, and excellent organizational skills, add to the efficiency of each project he undertakes.

ALBERT J. ALDANA II, GRADUATE ENGINEER
EDUCATION: B.S. Civil Engineering 2022
EXPERIENCE: Mr. Albert Aldana is a Graduate Engineer offering 10 years of experience in the Civil Engineering Field. Mr. Aldana is adept in traffic engineering projects consisting of traffic signal design, signal timing, and signal warrant studies. Highly proficient in both MicroStation and AutoCAD, Mr. Aldana has experience in drainage and utility design.



ANGEL PANIAGUA, GRADUATE ENGINEER
EDUCATION: B.S. Civil Engineering 2023
EXPERIENCE: Mr. Angel Paniagua is a Graduate civil engineer-in-training with 2 years of experience in the field. Adept in supervising construction process as well as preparing cost estimates. Highly motivated to learn more about the field, particularly in the firm's specialties such as wastewater management and drainage design.

DIONICIO GARZA III, GRADUATE ENGINEER
EDUCATION: B.S. Civil Engineering 2023
EXPERIENCE: Mr. Dionicio Garza is a Graduate civil engineer-in-training with 2 years of experience in the field. Adept in supervising construction process as well as preparing cost estimates. Highly motivated to learn more about the field, particularly in the firm's specialties such as wastewater management and drainage design.

PROFESSIONAL SUMMARY

Mr. Muñoz has 40 years of engineering and surveying experience with various engineering firms in Texas and California. He has designed and constructed engineering projects in various areas of civil engineering. He is currently managing facility planning, design, and construction of several infrastructure improvement projects in the Rio Grande Valley. Mr. Muñoz has the experience and is familiar with local municipal and state regulations required for the design and construction and survey of various disciplined projects. Responsible for management and oversight of the day-to-day activities, project controls, coordination, and scheduling for all phases of engineering, surveying, and construction projects. Mr. Munoz is also a Land Surveyor-In-Training and takes a direct hands-on approach to all the work GMES is committed to completing.

Capabilities

Recruiting, Hiring, and Placement of Professional Resources, Professional Career Development Leadership, Operations Management, Program Management, Project Management, Personnel Management, Project Controls, Business Analysis, and Process Mapping, Business Development, Marketing and Sales, Federal Procurement, SF330 Proposal Development, and Corporate Trainer, Team Building, Storm Water Quality, Custom Application Development.

Tools

MS Office Suite including Excel, Word, PowerPoint, Access, Visio, MS SharePoint, ESRI ArcGIS Desktop and Server, SQL Server, and Oracle

PROJECT HIGHLIGHTS

Mr. Munoz has extensive experience in Project Management of public infrastructure projects and municipal planning. He has successfully managed engineering projects funded by the Texas Water Development Board (TWDB) and other state and federal agencies including street and drainage, water and wastewater treatment plant planning, and design for projects. Mr. Munoz has designed or is in the process of developing planning documents, such as Environmental Information Documents, Preliminary Engineering Reports, Funding Agency Applications, and Plans, Specifications, and Cost Estimates (PS&E) for the following projects:

- 2021 - City of Rio Hondo CDBG Street Improvements
- 2020 - Willacy County CDBG-MIT Application

- 2020 – City of Raymondville CDBG-MIT Application
- 2018 - Willacy County - CDBG Street Projects
- 2020 - City of Raymondville TWDB Applications
- 2020 - Willacy County TWDB Applications Watershed Studies
- 2020 - Willacy County TWDB Applications
- 2021 - City of Raymondville TWDB IUP WWTP Applications
- 2021 - City of San Benito Application for IUP TWDB-2022
- City of Los Fresnos TWDB DWSRF Water Distribution System Improvements & Rehabilitation Project
- 2019 - City of Los Fresnos TWDB CWSRF 2020 Application
- 2014 - City of Los Fresnos TWDB/DWSRF Water Distribution System Improvements & Rehabilitation Project
- 2019 - City of Raymondville TWDB Rehab of existing Brick Manholes
- 2019 - City of Edinburg FEMA Pre-Disaster Mitigation Program 2019
- 2016 - Willacy County – FEMA WCY005C –Sebastian Street & Drainage Improvements
- Willacy County GLO Disaster Recovery (DRS-210204) Street Drainage Improvements
- Willacy County PCT 4 GLO Disaster Recovery Round 2 Drainage and Pavement Improvements for Sebastian, Lyford, La Sara, and San Perlita
- Willacy County - TDA La Sara & La Rosita - Street Improvements & Drainage
- City of Raymondville Drainage Improvements (TDA Funded)
- 2019 - City of Raymondville TDA Sanitary Manholes Rehabilitation Project
- 2017 - City of Lyford TDA Wastewater Treatment Plant Rehabilitation
- 2020 - City of Los Fresnos WTP EPA Vulnerability Assessment
- 2019 - City of Edinburg Owassa Rd Sanitary Sewer Lines
- 2019 - City of Edinburg Veterans Rd. Drainage Project
- 2020 - City of Edinburg Veterans Rd. Sanitary Sewer Lines Project
- 2020 - City of Edinburg Owassa Rd. Sanitary Sewer Lines Project
- 2019 - City of Edinburg on-call Engineer
- 2019 - City of Los Fresnos Update to Tx Water Conservation Plan & Drought Plan
- City of Raymondville Waterlines & Elevated Storage Tanks
- 2018 - City of Raymondville City Engineer
- 2019 - City of Raymondville-City Engineer
- 2018 - City of Raymondville - Washington Street Ditch
- 2018 - City of Raymondville - Alley ROW behind Stripes
- 2018 - City of Raymondville Water Tank Rehab
- 2019 - City of Raymondville – Sewer Line Repair
- 2019 - City of Raymondville Splash Park
- 2019 - City of Raymondville Water Conservation & Drought Plan
- 2020 - City of Raymondville WWT Plant Permit Renewal
- 2020 - City of Raymondville EDC Building Boundary Survey & Imp Plat & Metes & Bounds
- 2020 - City of Raymondville City Engineer 2020-2022
- 2020 - City of Raymondville COVID-19 PD Remodel
- 2021 - City of Raymondville Well #1 Rehab
- 2021 - City of Raymondville Drainage Ditch
- 2021 - City of Raymondville WTP Diagrams
- 2021 - City of Raymondville Golf Club Improvements
- 2018 - City of Raymondville Stake out City Cemetery-Phase 2
- 2022 - City of Raymondville TX (GLO) 2019 Floods
- 2021 - City of San Benito Rose Lift Station Rehab
- 2020 - City of San Benito Review AEP Project Stookey Pds Infra Project
- 2021 - City of San Benito Review of Various Subdivisions
- 2020 - City of San Benito Review of WTP#2
- 2018 - Cameron County Old Alice Rd

- 2019 - Hidalgo County Drainage District 1 Project #18 Malone Dr. & Pomelo Rd.
- 2019 - Hidalgo County Drainage District 1 Project #28 Old La Blanca Rd. & Mile 10N
- 2018 - HCCID #9 Mercedes FedEx Water Line Relocation
- 2019-Willacy County Pct 4 Pipe Repair County Rd. 1100 Sebastian
- 2020 - Willacy County Pct. 4 Santa Monica Engineering
- 2018 - Willacy County Pct. #3 Dahlia Road Rehab
- 2019 - Willacy County Pct. 4 Street Improvements
- 2020 - Willacy County Plan Reviews
- Willacy County Administration Building Remodel – Entire Structure
- Willacy County Federal Prison - Federal Prison Remediation Project
- Willacy County La Sara Street Improvements
- 2018 - IBWC Arcadia US Inc. Weslaco to Los Indios Levee Rehabilitation
- 2016 - IBWC Falcon Dam Admin Office – Design Build
- 2019 - Harlingen Medical Center - Proposed parking lot Feasibility Assessment
- 2018 - Harlingen Medical Center Additional Topo of Existing Parking Lot
- 2020 - Weslaco KMC Knapp UTRGV Bldg.
- 2020 - Weslaco KMC Engineering Assessment for installation of Uroview FO machine
- 2020 - Weslaco KMC Installation of Uroview FO Machine
- 2020 - Weslaco KMC Review ASC Building for Life Safety Compliance
- 2020 - Weslaco KMC HVAC Improvements for 1st & 4th Floors
- 2020 - Weslaco KMC Review PVASC Bldg. & Install New Generator
- 2020 - Weslaco Knapp Medical Center Topo of parking area & as-builts
- 2020 - Weslaco Knapp Medical Center Engineering & Architecture Assess for segregated compounding area
- 2020 - Weslaco Surya LTD Engineer Design Construction Phase Svcs. – Rangila Subd.
- 2022 – Weslaco ISD Margo Parking Lot, Drainage Improvements
- 2019 - Werner Ellen Investments / El Clavo Harlingen Westway Subd. Phase II Const. Documents & Requirements
- Coffee Port Apts. – Oak Crest Management Civil Engineering Svcs. Brownsville, TX
- Creek Canyon – Civil Engineering Services, Brownsville, TX
- 2019 - Mercedes Builders Construction Services for cleanup of Los Posos Land
- 2021 - MRE Capital Boundary, Topo, Feasibility Study 6.322-acre tract
- 2021 - MRE Capital Boundary, Topo, Feasibility Study 4.474-acre tract
- 2021 - Price Lofts Subdivision Apts. – Engineering & Surveying, Brownsville, TX
- 2020 - Rise Residential Improvement Survey-Mayorca Village Subd.
- 2021 - Roel Villanueva 33 acres Subdivision Plat, Mercedes, TX
- 2021 - Rosario Gonzalez Subdivision Plat, San Benito, TX
- 2021 - Sonoma Housing Advisors ALTA/ACSM McAllen, TX
- 2020 - Sonoma Housing Advisors 120 Unit Complex-Site Plan Edinburg, TX
- 2020 - Sonoma Housing Advisors ALTA/ACSM Survey, Topo Design Odessa, TX
- 2020 - Sonoma Housing Advisors Topo Survey, Design Dallas, TX
- 2020 - Tan Construction Line ALTA/ACSM Land Title Survey of 3.281ac. Brownsville, TX
- 2021 - Victron Energy Topo Survey, Design & Plat Subdivision Mercedes, TX
- 2017 - Mercedes FEDEX Facilities
- Arturo Ramos Regional Nursing Services Weslaco, Texas
- 2022 – Arcadis, Design and Construction Services, Edinburg, TX
- 2022 – Christ Nagal (Costa Azul Development LU) Engineering Services Re- subdivision, Cameron
- 2022 – SSP Services LLC Road Drainage Improvements, Brownsville, TX
- 2022 – Sonoma Housing, Vermillion Apts., Brownsville, TX
- 2022 – Patel Subdivision, Willacy Raymondville

NOTE: GUZMAN & MUNOZ ENGINEERING AND SURVEYING, INC. PERFORMED SURVEYING SERVICES FOR MOST OF THE PROJECTS LISTED ON THIS RESUME

Carlos C. Aguilar, P.E., R.P.L.S.

Project Surveyor / Engineer

Education

1974 BS Engineering
Texas A&M Kingsville

Occupational License

RPLS 4997
PE 47469

Total Years of Experience

Civil 42, Surveying 31

PROFESSIONAL SUMMARY

Mr. Aguilar has 31 years of experience covering a broad range of Surveying practices, including Right of Way Strip Maps, Title Research, establishing Boundary Locations, Topography, Construction Staking, and Land Development projects.

CAPABILITIES

Experience includes the ***management and coordination*** of multiple Field crews working simultaneously throughout South Texas including the Rio Grande Valley on projects that include: property boundary surveys (metes and bounds) including finding and/or marking corners, platting and line staking, subdivision design, and layout, topographic surveys, F.E.M.A. floodplain certificates, site plan development and construction stakeout, job bidding (Opinion of Probable Cost), deed and title research, assist with surveys boundary disputes and boundary agreements between clients and adjoiners, property chain of title, Senior Rule (Junior/Senior property rights), condominium surveys, oil, and gas proposed well location surveys, and right-of-way surveys.

TxDOT Pre-Certified (Sequence No.) in the following TxDOT categories:15.1.1 Survey; 15.1.2 Parcel Plats; 15.1.3 Legal Description

PROJECT/PROGRAM HIGHLIGHTS

Mr. Aguilars' Surveying & Engineering career experience includes the following:

Performing American Land Title Association surveys, residential and commercial mortgage surveys for buyers, title companies, and banks; topographic surveys for proposed development (including associating with governmental agencies and/or biologists such as the US Corp of Engineers for surveying determined wetland delineations); construction staking; as-built surveys; large boundary surveys, route surveys (for right-of-way acquisition purposes); littoral surveys along the Gulf of Mexico and Laguna Madre; riparian surveys; platting of property; perform narrative metes and bounds descriptions for land surveys, easements, right-of-way acquisitions, and leases; office and field experience with Global Positioning System; perform State Plane Coordinate surveys; latitude and longitude tabulations; hands-on and technical work on all the above, including drafting, analyzing boundary control and computations and mapping. Gained experience on surveys for oil and gas industry; ability to oversee all office and field work pertaining to land surveying and drafting; client communication skills; analyze and interpret deeds, and research for deeds; obtained experience in assisting in coastal land development; project advisor for subdivision platting; and possibly other learned experiences that come with the profession. Industries served with the surveying profession: Civil Engineering, Construction, Real Estate, Abstract and Title Insurance, Architectural, Oil and Gas, Insurance, Utility Companies, and Local Governments.

Dan Hamilton, Senior Project Manager Construction Division

Education
B.S. Industrial Construction Technologies
Texas State University

Professional Certifications
OSHA 10 Hour #001451479
OSHA 30 Hour#2560063417

Total Years of Experience
45

PROFESSIONAL SUMMARY

Mr. Hamilton has 45 years of construction and engineering related experience, covering a broad range of construction projects and practices, managing project progress and contract conformance. GEO Tech testing, Stockpile management and tracking, Concrete Design, Testing, Quality Control, and Stockpile Management Regimens.

CAPABILITIES

Experience includes project coordination and performance in multiple, private, public and government sector projects. Obtaining and reviewing building and construction permits, including demolition permits, Hazardous material abatement permits, E.P.A. & SWP3 plans, and energy compliance reports. Securing and managing ADA reviews/compliance. Provide management of job cost accounting, job budget review, planning, and tracking. Participate in Hiring, documenting, training, scheduling, and supervision of project specific employees on the project. Team Building.

Government Agency Experiences: US International Boundaries & Water Commission (USIBWC), US Army Corps of Engineers (USACE) and General Administrative Service Administration (GSA)

Security Clearances: *DHS Favorable Suitability, and Texas Board of Prisons Specific Access Contractor Clearance.*

PROJECT/PROGRAM HIGHLIGHTS

His portfolio of projects consists of a broad range of work in private, public, and government sectors. They typically ranged in dollar size from $300,000 to $8,000,000 and reached as high as $150,000,000. They consisted of Design & Construction Management services, heavy Civil earthwork and/or Vertical Construction on new Office buildings, Shopping Malls/Strip Centers, Leasehold Improvements, School projects, Airport taxi way improvements, Municipal facilities and Office remodels, IBWC Levee drainage & renovation projects, IBWC Dam repairs, Public Works road and drainage projects, Municipal Fire Stations and Police Stations, Sewer Treatment plants, Prison Facility repairs and renovations, Ports of Entry Security Upgrades (USACE, GSA, IBWC), FEMA Safe Room projects, and municipal parks, etc.

Todd Dickison, GIS Analyst

Education
B.A. English Literature
Data Analysis Certificate
University of North Texas

Total Years of Experience	Years with GMES Firm
6	<1

PROFESSIONAL SUMMARY

Mr. Dickinson has over 30 years of experience in data analysis, GIS, and IT consulting services. He has utilized GIS tools to conducted spatial analysis, deriving insights and effectively visualize findings for stakeholders. His experience also encompasses the design and support of backend databases used in ERP, CRM, and business intelligence software implementations for Fortune 500 companies and small businesses. He has held diverse roles such as application programmer, data analyst, technical lead, dba and project manager.

CAPABILITIES

Proficient in Esri's software suite, from ArcMap to ArcGIS Enterprise and cloud solutions. Skilled in leveraging the capabilities of Esri tools for spatial analysis, data management, and enterprise GIS deployment. Uses strong Python and SQL skills to develop data pipelines. Extensive experience in developing data models using multiple relational database management systems (RDBMS).

PROJECT/PROGRAM HIGHLIGHTS

He utilized the ArcGIS Pro Hydrology toolset to model water flow under various conditions, aiding Willacy County in developing effective flood mitigation strategies. For Raymondville, he designed a data model in ArcGIS to manage cad data for the assets from Raymondville’s sewer system, enabling the creation of GIS maps that displayed these results for improved planning. He has employed high-resolution lidar to develop accurate GIS maps that captured detailed elevation data that may be used for residential development.

Jose Lucio, EIT #78863

Education

B.S. Civil Engineering
University of Texas, Rio Grande Valley
Associates Science and Engineering
South Texas College

Total Years of Experience
2

Years with GMES Firm
1

PROFESSIONAL SUMMARY

Mr. Jose Lucio is a Civil Engineer-in-Training who has experience in design & construction, with exceptional attention to construction inspection, surveying, and quality control. Mr. Lucio is a motivated individual who is consistently exploring new areas to expand his knowledge and abilities. Mr. Lucio's eagerness to contribute to team success through hard work, attention to detail, and excellent organizational skills, add to the efficiency of each project he undertakes.

GMES Experience

- **P889-02 Veterans Blvd. Drainage, Edinburg, TX**
  - Road & Storm Improvements Design
  - Construction Management, Change Orders, RFI's, Pay Apps.
  - Inspection of Field Activities
  - Quality Control of Material Submittals, Test Reports.
- **P943 Costa Azul Subdivision, South Padre Island, TX**
  - Plating Subdivision
  - Drainage, Grading, Paving, Utilities Design
- **P925 Woodcrest Apartments, Odessa, TX**
  - Plating Subdivision
  - Drainage, Grading, Paving, Utilities Design
  - SWPPP
- **P930 Jackson St. Apartments, McAllen, TX**
  - Platting Subdivision
  - Drainage, Grading, Paving, Utilities Design
- **P959 Weslaco East ISD, Weslaco, TX**
  - Ditch Drainage Improvements
- **P966 FRA Improvements, Harlingen, TX**
  - Drainage, Grading, Paving Design
  - Construction Management, Change Orders, RFI's, Pay Apps.
  - Field Inspection/Reports of Construction Activities.
  - Quality Control of Material Submittals, Test Reports.
- **P937 Tax Office, Brownsville, TX**
  - Inspection of Field Activities
  - Quality Control of Material Submittals, Test Reports.
- **P929-01 Price Lofts Subdivision, Brownsville, TX**
  - Inspection of Field Activities
  - Quality Control of Material Submittals, Test Reports.

Prior Experience

2021-2022 **Field Engineer** -Robinson Construction

- Nestle Purina Pet Care Expansion
  - Assist Surveying with The Layout of Points, Elevations, and Dimensions for The Project
  - Quality Control of Testing Procedures, and Materials.
  - Inspections of Field Activities
  - Overview of the Project to Ensure It's Built to The Drawing's Specifications.
  - Assist In Communication with Suppliers and Subcontractors
  - Material Receipts/Inventory
  - Scheduling

- Construction Safety Inspector

➢ Patrick Airforce Base
- Inspection of Field Activities
- Quality Control of Testing Procedures, and Materials
- Construction Safety Inspector

UTRGV

Total Years of Experience

11

Years with GMES Firm

2

PROFESSIONAL SUMMARY

Graduate Engineer offering 10 years of experience in the Civil Engineering Field. Adept in traffic engineering projects consisting of traffic signal design, signal timing, and signal warrant studies. Highly proficient in both MicroStation and AutoCAD. Experience in drainage and utility design.

Traffic Engineering Studies

- **Traffic Impact Studies:** performed traffic impact analysis to determine the vehicular impacts because of planned development in the Cities of Brownsville, Harlingen, Edinburg, McAllen, Pharr, San Benito, and Weslaco, Texas.
- **Traffic Engineering Studies:** prepared traffic engineering studies to determine the appropriate traffic controls for Cities and TxDOT.

Traffic Engineering Design

- **Traffic Signal Design:** prepared the design of traffic signals in urbanized settings for the Cities of Brownsville, Edinburg, Pharr, McAllen, and San Juan. Designs included traffic signal timing plans.
- **Signing & Pavement Markings Design:** prepared the design of signing and pavement markings for urban multi-lane arterials, divided highways, frontage roads, and railroad crossings.

Prior Research/Work Experience

Seven Traffic Signals PS&E Project for the City of Brownsville, TX – prepared plans and estimates for sidewalks, ADA-compliant wheelchair ramps, and crosswalks traffic signal improvements. The project was let by TxDOT and prepared DCIS estimate in accordance with Pharr District requirements.

Traffic Signal Designs for the City of Brownsville, TX – prepared plans and estimates for traffic signal improvements at the intersections of SH 48 at Zena Dr and Austin Rd. Prepared plans, specifications, and estimates for TxDOT letting.

Pharr Bike Lane Project, TX – worked on developing plans, specifications, and estimates for proposed bike lanes on Cage Blvd between US 281 and FM 495 and on FM 495 between Veterans Blvd and Jackson Rd. Plans prepared for TxDOT.

Rio Grande LNG & Rio Bravo Pipeline TIAs – collected traffic data and performed traffic impact analysis for proposed LNG on SH 48 south of SH100. Provided recommendations for mitigating improvements.

Computer Skills

Proficient in MicroStation & AutoCAD
Proficient in SignCAD
Proficient in SYNCHRO
Proficient in the Development of Plans, Specifications & Estimate (PS&E)

Areas of Experience

Traffic Signal Design
Traffic Signal Timing/Coordination
Traffic Signal Warrant Studies
Flashing Beacon Design
ADA Sidewalk & Curb Ramp Design

Areas of Experience cont.

Pedestrian Safety Studies
Signing & Pavement Markings Design
Safety Improvement Studies
Traffic Engineering Studies Traffic Impact Studies Proficient in traffic studies

Angel Paniagua, Graduate Engineer

Education
B.S. Civil Engineering

Years with GMES Firm
<1

PROFESSIONAL SUMMARY

Graduate civil engineer-in-training with 2 years of experience in the field. Adept in supervising construction process as well as preparing cost estimates. Highly motivated to learn more about the field, particularly in the firm's specialties such as wastewater management and drainage design.

GMES Experience

- P913-08 Sebastian Drainage Improvements
  - Quantity checks for cost estimation.
- P965-04 Raymondville Cemetery
  - Quantity checks for cost estimation.
- P965-08 Raymondville WC & DC
  - Preliminary research for preparation of water conservation and drought contingency plans of Raymondville.
- P953 DR 18 – Heywood Improvements
  - Preliminary design for drainage improvements.

Computer Skills

- Microsoft Office (Excel, Word, PowerPoint, Outlook)
- Revit
- ArcGIS Pro
- AutoCAD

Prior Experience

2022 – 2024 **Engineer** – Ideas Construction

- McAllen Creative Incubator Remodel
  - Prepared cost estimates and ordered material for construction.
  - Preliminary construction scheduling and allocation of resources / labor.
  - Supervise and ensure delivery of materials.
- McAllen Triplex Remodel
  - Construction plans including basic mechanical and electrical layouts for city approval.
  - Field visits to coordinate with city inspector to ensure construction is up to code.
  - Prepared cost estimates and ordered material for construction.

Dionicio Garza III, EIT #80097

Education
B.S. Civil Engineering
UTRGV

Total Years of Experience
<1
Years with GMES Firm
<1

PROFESSIONAL SUMMARY

Mr. Dionicio Garza is a Civil Engineer-in-Training who has experience in Land Surveying and Construction Staking. Has a proactive attitude towards personal and professional development. His enthusiasm for expanding his knowledge and skills is to contribute to team success.

Prior Experience

2023-2024 Instrument Man/ Surveyor 1- SAMES Inc.

- Oversee local and out of state Staking Projects
- Providing continuous contact with clients to obtain the necessary documentation and ensure the team has provided high-quality service and deliverable.
- Perform quality control of survey and staking documents, including survey plans, descriptions, and Exhibits.
- Meet with the department to discuss and plan present and future projects and projections.
- Prepare and review CAD work.
- Operate surveying instrument and data collector (Trimble TSC7). Produced field calculations and sketched surveying jobs.
- • Maintain appropriate field procedures; records all field data, information; provides guidance and direction to the Rodmen; performs survey tasks as per the direction of the Party Chief.

Work Experience

Drainage system survey For Los Fresno, TX – coordinated a survey crew to collect all the storm structures for the city of Los Fresno and process the data for deliverable the client requested.

Staking and quality control For SpaceX – coordinated multiple Staking and quality control projects in SpaceX. That required a daily exhibit of progress and weekly overall exhibit of progress.

CERTIFICATIONS/FINANCES & INSURANCE

LICENSES:

Guzman Muñoz Engineering and Surveying, Inc. (GMES) (DBE) (HUB) has fulfilled the requirements of the Texas Board of Professional Engineers to offer and perform engineering and surveying services in the State of Texas. TBPE Registration No. F-8017, expiration date of 7/31/2023; TBPLS Registration No. 10087700, expiration date of 12/31/23.

FINANCIAL STABILITY

GMES has been in business for over 49 years, is well-established, and is financially stable. The firm is able to facilitate and manage the risks that may be associated with any project assigned to the firm.

BANKING INFORMATION

GMES banks with PNC Bank. Contact Person: Maria Gonzales, Phone# (956) 365-6401

LITIGATION

GMES has never been in litigation or arbitration for any past or current projects. GMES has successfully completed its projects without major delays and without claims. ***GMES has never been terminated from any assignments for non-performance.***

AFFIRMATIVE ACTION/DRUG-FREE

Guzman & Munoz Engineering and Surveying, Inc. is a registered Historically Underutilized Business (HUB) by the State of Texas Historically Underutilized Business Certification and Compliance Program as well as certified by TxDOT as a Disadvantaged Business Enterprise. It is the policy of the company to promote Affirmative Action and provide equal opportunity to all employees and applicants for employment; and administer all terms, conditions, and privileges of employment in a manner that does not discriminate on the basis of race, color, creed, ancestry, national origin, sex, age, marital status, liability for service in the armed forces of the United States, or because of physical or mental handicap in regard to any position for which the employee or applicant is qualified for and under consideration at GMES. GMES is committed to providing a safe and drug-free work environment and to fostering the health and well-being of its employees.

CHAPTER 2252, TEXAS GOVERNMENT CODE

In accordance with Chapter 2252 of the Texas Government Code, GMES hereby certifies that GMES does not engage in business with Iran, Sudan, or any foreign terrorist organization, and GMES is not listed by the Texas Comptroller as a terrorist organization.

CHAPTER 2271, TEXAS GOVERNMENT CODE

GMES certifies that GMES does not boycott Israel and will not boycott Israel during the term of the contract resulting from this solicitation.

CHAPTER 2274, TEXAS GOVERNMENT CODE

GMES verifies that GMES does not, and will not for the duration of the contract, have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association or (2) the verification required by Section 2274.002 of the Texas Government Code does not apply to the contract.

INSURANCE AND BONDING INFORMATION

GMES will provide current general liability insurance, worker's compensation and professional liability insurance for any project within 10 calendar days of any Notice of Award.

LIST OF CLIENT REFERENCES

GMES is extremely proud of our reputation established with clients.
Please feel free Contacting the following references regarding our performance and services:

Name	Title/Location	Phone No.
Mardoqueo Hinojosa	***City Engineer*** *– City of Edinburg* *415 W. University* *Edinburg, Texas 78539*	*(956)388-8211*
Tony Chavez	***City Manager*** *– City of Raymondville* *142 S. Seventh Street* *Raymondville Texas 78580*	*(956) 689-2443*
Mark Milum	***City Manager -*** *City of Los Fresnos* *520 E. Ocean Blvd.* *Los Fresnos, TX 78566*	*(956) 233-5768* *ext. 1100*
Aurelio Guerra	***County Judge*** *– City of Raymondville* *576 West Main Street* *Raymondville Texas 78580*	*(956) 689-3393*

RESOURCE UTILIZATION PLAN

The staff assigned is currently operating under an average workload of 60%. Additional staff will be added to work on any assigned project(s) should the volume of work for City of Edinburg grow to be more than can be effectively processed by the existing staff, or should the volume of other work for the Project Team grow to the point of affecting the performance of the work for the City of Edinburg.

EQUIPMENT RESOURCES

Guzman and Muñoz Engineering and Surveying, Inc. use the latest computer hardware and software technology. Presently, GMES is using a combination of Autodesk's Land Desktop 2005 and Land Survey 2005 along with AutoCAD Civil 3D 2014 software on all projects. This allows GMES to complete plans/specifications on time, with accuracy and within budget. We currently have twenty-three (23) PC workstations for drafting and design, administrative day-to-day tasks, 2 iMacs, and one assigned PC station for downloading daily survey field data. GMES also has 4 servers on site to provide file storage and host applications.

FAMILIARITY WITH GEOGRAPHIC AREA

GMES has been providing engineering services in South Texas since 1973, a period of over 43 years. Furthermore, GMES has provided quality services for various municipalities and Hidalgo County for the past several years and is currently providing services for various local and government funded projects.

GMES is very familiar with City of Edinburg needs and requirements. Our firm has vast **hands-on knowledge and experience** and is skilled in projects associated with compliance with the Texas State and County Regulatory Codes of Ordinances for zoning, site plan, subdivision and water quality. We are also familiar with pertinent construction materials, vendor facilities, and standard practices.

EQUIPMENT AND AVAILABLE RESOURCES

GMES has up to date technology and networked computer systems, CADD and aerial mapping software and GPS surveying equipment. These resources place GMES in a leadership position to perform large engineering and/or survey and topography base projects. GMES is a "Total Systems" engineering firm.

We currently have a fleet of late model vehicles to ensure maximum reliability for any on-going project. We strive to provide the best delivery time in the industry. This can only be accomplished through qualified personnel, up to date office / field equipment / reliable transportation to complete the job accurately, precisely and on time.

PROFESSIONAL SERVICES AGREEMENT

The Professional Services Agreement for the City of Edinburg RFQ #2024-09 Land Surveying Services has been read. Guzman & Muñoz Engineering and Surveying, Inc. will meet the prerequisite insurance requirements. If selected, Guzman & Muñoz Engineering and Surveying, Inc. agrees to enter in to such agreement.

Jose L. Muñoz, P.E., S.I.T.

President

WORKLOAD STATUS

WORKLOAD

There are no potential conflicts with current work at this time. Our GMES TEAM is currently operating under an average workload of 60%. This will allow the team to **immediately commence** on any architectural /engineering project request requested/awarded to us. Additional staff will be added to work on any assigned project(s) should the volume of work grow to be more than can be effectively processed by the existing staff, or should the volume of other work for the GMES TEAM grow to the point of affecting the performance of the work for our clients.

Edinburg, TX 78539

RE: Request for Qualifications for Land Surveying Services Rotation 2024-7

Dear Mr. Hinojosa and Members of the Evaluation Committee:

Halff appreciates the opportunity to submit this statement of qualifications for Land Surveying Services for the City of Edinburg. We are excited about the opportunity to continue working for the City and help improve its residents' quality of life. Halff has assembled an experienced team that will make sure any project given will be a success. Our firm's staff of more than 1,500 surveyors, engineers, architects, landscape architects, and scientists all stand ready to assist the City on the projects assigned.

Experience In All Required Fields - Our team is comprised of members with experience that covers every aspect of surveying, mapping, and GIS. They include:

- Land Title/Boundary Surveys
- Legal Descriptions
- Right of Way Surveys
- Survey Alignments
- Benchmark Surveys
- Topographic Surveys
- Tree Surveys
- Utility Surveys
- TSPS Category Surveys
- Aerial Surveys
- As-Built Surveys
- Hydrographic Surveys
- Bathymetric Surveys
- Geodetic Surveys
- Environmental Surveys
- Easement Surveys
- ALTA Surveys

Point of Contact Information

Physical Address: 5000 West Military Highway, Suite 100, McAllen, TX 78503
Mobile: 361.336.1353 | **Office:** 956.664.0286 | **Email:** ajonas@halff.com | **Fax:** 956.664.0280

The Halff team has experienced staff available and ready to begin working immediately to meet the city's project execution schedule. Our McAllen office has 71 employees staffed with surveyors, engineers, technicians, and field crews. All available at a moment's notice to assist city staff. Our Brownsville, Corpus Christi, and San Antonio offices, with full-time surveying staff are also available to supplement our valley office staff for surveying needs to expedite projects as needed. **Halff has a proven record of completing projects on time and within budget. We exercise tight project controls so that your projects are delivered as expected.**

We are committed to providing immediate response, anticipating the city's needs, and serving as your partner and advocate. I encourage you to contact the references listed in our qualifications about our dedication, responsiveness, and client care. Please contact us at 956.664.0286 If you have any questions or concerns.

Sincerely,

Amanda Jonas

Amanda Jonas, RPLS | Survey Team Leader

Firm Information

Company Profile

Halff is a full-service engineering firm designed, engineered, planned, constructed – and purposed – for people. Since 1950, we've been creating smart solutions that improve lives and communities by turning ideas into reality. The firm provides services throughout the Southeast from 33 offices in Texas, Arkansas, Oklahoma, Louisiana and Florida. The firm's staff of 1,500 includes engineers, planners, scientists, and surveyors. Halff is ranked #87 in Engineering News-Record magazine's list of the top 500 design firms in the United States. The firm was founded in Dallas in 1950 by Albert H. Halff, PhD-Eng., PE. Today, Halff preserves Dr. Halff's legacy of integrity, dedication to client service, and commitment to quality. Halff develops smarter solutions for a variety of market sectors. No matter the size or scope of the project, every one of our solutions is designed with a single purpose: our client's success.

Halff was founded on a core tenet: Focus on people, treat them well and success will follow. It's no wonder, then, that our employees, and the culture they create, define us. We are members of a company built on integrity, technical knowledge and commitment to client service.

As a firm, we perform numerous surveying and right of way acquisition projects for TxDOT, as well as counties and municipalities throughout the State of Texas. Halff owns the equipment necessary to deliver fast, efficient fieldwork. Our survey equipment includes, but is not limited to, Robotic Stations, Total Stations, Data Collectors, EDMs, Theodolites, Levels, surveying software and GPS Receivers that increase both the speed and accuracy of the fieldwork. Halff has the experience to meet the City of Edinburg's needs on the diversity of assignments required in this contract.

Office Location

The Halff McAllen office will provide surveying services to the City of Edinburg. Amanda Jonas, RPLS, will serve as project manager and is authorized to represent the firm in negotiations and to fulfill contractual obligations.

The McAllen office routinely executes projects for the public and private sectors. The projects that the McAllen office has completed over the past decade have been done both independently of our corporate headquarters and in conjunction with the corporate headquarters. This arrangement provides us with the ability to serve our clients efficiently.

The McAllen office is located at:
5000 West Military Highway, Suite 100
McAllen, TX 78503
Tel: 956.664.0286; Fax: 956.664.0282

The McAllen office has a staff of 71 that includes 21 registered professional land surveyors, and professional engineers, 2 Survey Technicians, 9 engineers-in-training, and 3 survey crews. In addition to our McAllen staff our Brownsville Office includes 17 staff and one survey crew who often work collaboratively on projects, augmenting the local resources available for projects in the valley.

The McAllen office can execute any of the City of Edinburg's projects described in the scope of services for the RFQ. It includes support from our many Halff offices as needed. Our survey teams work collaboratively using long-established remote work capabilities allowing us to augment resources whenever needed. This arrangement enables the City of Edinburg to interface directly with local personnel while being confident that they are supported, if required, by the resources and experience of the entire company.

Halff commits to the City of Edinburg that no other firm will work harder than us to perform the highest quality surveying services within the City of Edinburg's project timeframe.

Resources

Halff possesses the capabilities and capacity to deliver a comprehensive range of services to support the City's Surveying Services Contract. The table below highlights our available resources within the State. At Halff, we foster a culture of teamwork, enabling a workshare process that involves other branch offices as needed to assist with our projects. Our field crews are highly experienced in surveying and mapping for the design of roadways, bridges, channels, pipelines, utilities, right of way, boundary, topographic surveys, geodetic networking, aerial ground controls, pre-construction surveys, and hydrographic surveys. Halff survey teams utilize state-of-the-art equipment and software, and continuously stay updated on emerging technologies to provide innovative solutions that enhance the efficiency and accuracy of our data collection.

Ability to Plan and Execute

Halff's planning process is the foundation that leads to the successful execution and completion of our projects. We hold a project kick-off meeting before mobilizing field crews and releasing office staff to begin work.

At the meeting, valuable information is shared with the team including the Traffic Control and Safety Plan, local emergency numbers, site-specific challenges and hazards, scope of work, survey methodology plan, deliverable expectations, applicable standards and specifications to follow, project budget, and schedule. In our experience, proper planning is critical to the successful execution of a project. This is why we plan; To start the project with clear expectations and roles/ responsibilities for all involved with the project.

© Halff - 2023 | Confidential - Do Not Disclose

Halff has provided an array of different surveys throughout Hidalgo County, including in the City of Edinburg and municipalities throughout the South Texas. **Below are a few common surveys that Halff has performed:**

Boundary surveys involve correlation of legal records with field information to produce a map locating the property lines, land area, legal description, and conflicts that may affect title.

Improvement surveys involve gathering existing boundary survey information and mapping all improvements. This type of survey is used to verify completed construction projects and to document issues that may affect property title. These surveys are generally requested by title companies for closing on construction loans, or land title transactions

Topographic surveys involve gathering horizontal and vertical data necessary to prepare a map showing the surface relief natural features and man-made objects on the site. This type of survey provides information similar to an aerial survey, but typically involves mapping smaller areas in greater detail.

Aerial surveys involve executing horizontal and vertical control work required to develop accurate aerial maps. Aerial mapping is an easy, cost-effective way to generate information about an area for preliminary studies or designs. The survey work is often tied to the boundary or the national geodetic network to strengthen the control.

Hydrographic surveys involve gathering horizontal and vertical data to determine facts about a body of water. The most common tasks associated with hydrographic surveying are the determination of the size, depth, and bottom configuration of a body of water, and the land area subject to flooding from a nearby water course.

Geodetic surveys involve precise surveying over large areas, taking into account the size and shape of the earth. This type of work can be horizontal, vertical, or both.

Survey for design gathers horizontal and vertical information necessary for the design of engineering plans.

Environmental surveys involve the identification and location of specific natural features. This varies depending on the needs of the client and the characteristics of the site.

Construction surveys include locating building corners, utility lines, and street curbs for construction. The horizontal location of these new features within a project is determined with reference to property lines, in such a manner that facilitates construction. Elevations for the stakes are then established and a “cut” or “fill” depth is calculated to give the proper vertical location of each feature.

Right of Way Acquisition Halff has the resources and experience to provide right of way acquisition services. Our team has experience providing all services needed for ROW Acquisition.

Halff’s surveyors are accustomed to following the federal, state and local standards and specifications that govern our work. We are also familiar with and prepared to provide the city with all of the additional requirements as described in the RFQ Scope of Services for land and topographic surveys.

Halff fully understands the importance of responding on short notice to the City of Edinburg's needs and commits to providing the necessary resources in a timely and cost-effective manner. Throughout this contract's duration, we propose to have a dedicated field crew whose primary assignment is responding to the needs of the City of Edinburg. Our field crew can begin work immediately upon receipt of a notice to proceed from the City of Edinburg.

Scheduling

The team for this project has the staff and equipment resources available to execute the tasks associated with this contract. The availability of key project personnel is as follows:

Project Team Availability

Personnel	Nature/Role	Availability
Amanda Jonas	Project Manager	50%
Raul Garcia, Jr.	Deputy Project Manager	50%
Marcos Diaz	Principal-in-Charge	25%
Andy Shafer	QA/QC Manager	35%
Jody Gafford	Survey Lead	75%

Our staff covers all relevant surveying and support disciplines, and our Project Manager, Amanda Jonas, has the capability to assign personnel to meet any schedule, with the support from Principal-in-Charge, Marcos Diaz, and to allocate any company-wide resources needed to effectively conduct the services associated with this contract.

Communication

In executing this project, we offer a staff that is eager to begin work immediately and will continue to work on an on-call basis for the duration of the contract. Throughout the contract's duration, Amanda, as Project Manager, will conduct team production meetings. At these meetings, she will discuss the work accomplished to date, work to be accomplished, and resources needed. The meetings will address the status of tasks related to the contract. Based on the discussions at these meetings, Halff can efficiently provide additional resources that may be required. The issues discussed in the production meetings will be included in monthly progress reports to the City of Edinburg. The progress reports will contain information on the tasks accomplished during the previous month, status of investigations under contract, and issues, which affect the execution of the contract. The progress reports will provide the City of Edinburg with a written backup of activities and a timely summary of work performed for monthly billing.

Proposed Consultants

Our team offers a one-stop shop for any project the City may assign through this RFQ. We provide Surveying; Civil Engineering; Planning; Right of Way; Environmental Engineering; Mechanical Electrical and Plumbing (MEP) Engineering and Construction Administration services out of our local Valley office. In addition, we have the support of over 1,500 surveyors, engineers, architects, planners and scientists from our 33 other offices across Texas, Oklahoma, Louisiana, Arkansas and Florida. **For this reason, we do not anticipate needing any subconsultants on our projects with the City of Edinburg.**

Areas of Specialization

Halff's areas of specialization include the following:

- Survey
- Right of Way
- Geospatial
- Geographic Information Systems
- Public Works
- SUE
- Artificial Intelligence
- Broadband
- Construction Services
- Energy
- Environmental
- Federal
- Flood Infrastructure Design
- Funding Resources
- Local Infrastructure
- Structural Engineering
- Intelligent Transportation Systems
- Land Development
- MEP Engineering
- Planning & Landscape Architecture
- Subsurface Utility Engineering
- Utility Coordination
- Surveying
- Transportation
- Transit
- Water Resources
- Water/Wastewater

Public Project Work

The following projects are examples of the firm's experience and history in performing On-Call surveying services in the past three years.

City of Alton On-Call Surveying Services

Alton, TX

Halff has provided on-call surveying services for the City of Alton since 2015. Projects under the current contract include property surveys, as-built surveys, topographic surveys, aerial surveys, hydrographic surveys, geodetic surveys, survey for design, environmental surveys, and construction surveys. Representative projects include the Category 1A Conditions Survey and easement for the existing fire station and water tower site, a subdivision plat for the water site, and a topographic survey for the Josefa Garcia Park.

City of Edinburg On-Call Surveying Services

Edinburg, TX

This is a two-year on-call surveying contract with the City of Edinburg. Previous work consisted of the preparation of a Category 1B, Condition IV Property survey of the proposed Fire Station #5 site. The survey was required to begin the subdivision platting process. The site is 5.5 acres. Halff also prepared the subdivision plat and submitted it to the City of Edinburg for staff review. It is currently in the review process with the City and should be completed within the next month. Coordination with Hidalgo County Drainage District #1 was also required to approve the drainage statement. Horizontal and vertical control were established utilizing the Texas State Plane Coordinate System. Property survey and subdivision plat were prepared to meet board rules.

City of McAllen On-Call Surveying Services

McAllen, TX

This contract began as a one-year contract originally approved in 2009. Since that time, Halff has extended the contract with the City annually. Halff's services under this contract include the preparation of Property Surveys and topographic surveys throughout the City. Property Surveys were prepared to meet board rules. Topographic surveys were prepared to meet board rules and City of McAllen standards. All horizontal and vertical controls were established on McAllen datums. Project assignments have included property surveys for lift stations, metes, and bounds descriptions for multiple tracts of land, topographic surveys, stakeouts of boundary corners, and various additional survey requests.

Other Similar Project Experience

The following projects demonstrate the recent firm experience relative to the performance of similar services for public entities.

Mile 9N and FM 1015, Project Area 24

HCDD1 | Hidalgo County, TX

Halff performed a flood assessment and prioritized projects. This ongoing project provides the H&H study, engineering design, bidding assistance and construction administration services for a much-needed drainage project for the Las Brisas and Chapa Drive communities. The improvements consist of widening two miles of drainage ditch, rerouting and extending 0.4 miles of drainage ditch, enlarging culvert and storm sewer crossings, constructing multiple detention ponds (totaling 36 acres) and constructing a pump station with two 70 cf vertical turbine pumps that discharge into the International Boundary and Water Commission (IBWC) Floodway. A 24-hour response for survey requests was performed and we provided reports within a day of fieldwork completion.

Cano and Veterans Blvd Trail

City of Edinburg | Edinburg, TX

As part of the City of Edinburg On-Call contract, Halff performed a 1.25-mile topographic survey from 13th Street along Cano St. to Veterans Blvd and from Veterans Blvd south to Dawson Dr. The project is for a walking trail designed by the city. Halff survey crews performed the control survey for the project and collected topographic data along the project within the right of way.

Edinburg/McAllen Lateral Improvement

City of McAllen | McAllen, TX

Halff provided surveying for design services which included conventional topographic survey collection methods as well as supplementary lidar. Sufficient ground elevations were obtained to prepare one-foot interval contour maps throughout the surveyed portions of the project site. All significant trees with a caliper equal to or greater than six inches were located. Property surveys were also provided for ROW acquisition purposes. Survey reports for this project were delivered on time and in budget. Additional survey requests are expected to be received on this project.

2020 CIP Street Improvements

City of Brownsville | Brownsville, TX

Halff provided surveying services for 1.98 miles of roadway. The project includes the reconstruction of Coffee Port Road from a 2-lane section to a 3-lane section including pedestrian and bicycle accommodations in the form of a shared use path. Halff also led the horizontal and vertical design of the roadway geometry. Halff used a mobile lidar attached to a Ford F250 provided by our geospatial department.

IBWC Main Floodway Hydrographic Survey

Stantec Consulting Services, Inc. | Mercedes, TX

Halff, as subconsultant to Stantec Consulting Services, Inc., aimed to measure water flowline elevations along waterways, employing GPS for wadable areas, a GPS boat called Hydrone for deeper waters, and a rowboat with GPS in strong currents. The survey covered three legs: from south of Mercedes to east of the north floodway, from Anzalduas Bridge to south of Mercedes, and along the Arroyo Colorado to near the Port of Harlingen. All survey reports were delivered for this project on time and within budget.

Sharyland Plantation Professional Services

Cubic PV | Mission, TX

Halff conducted comprehensive topographic and boundary surveys over a 153-acre field. Utilizing a Polaris equipped with a GPS receiver, our team meticulously navigated the terrain, verifying precise data collection. Every 100 feet, a shot was taken to capture accurate measurements, and the ground was staked accordingly to prepare for subsequent geotechnical services. This methodical approach checked that all necessary data was gathered efficiently and accurately, laying a solid foundation for the geotechnical analysis to follow.

Experience with the City of Edinburg

Halff has worked with and within the City of Edinburg for several years. We have held several recent and ongoing contracts directly with the City and provided services on City projects as a subconsultant. The following is a sample of more recent projects that Halff has completed for the City of Edinburg:

- McIntyre Square Project, Boundary Survey (3.39 acres)
- ROW Exhibit for Sugar Road, Chapin to Monte Cristo
- Land Surveying, Wisconsin Road from I-69C to West City Limits
- Land Surveying and ROW Mapping, Sprague Road from Jackson Road to West City Limits (1.62 mi.)
- Land Surveying and ROW Mapping, Chapin Road from I-69C to West City Limits (3.57mi.)
- Land Surveying and ROW Mapping, Trenton Road-I-69C to East City Limits (1.3mi.)
- Survey Fire Station 5 Boundary Survey and ROW Acquisition for Lift Station
- Bicycle and Pedestrian Master Plan-Landscape Architecture services for a Bicycle and Pedestrian Master Plan for the City of Edinburg
- Survey and ROW acquisition for additional property for Lift Station Number 42 at Alberta and I-Road
- Appraisal and ROW services for Chapin Road Bridge Project
- ROW Acquisition Services for 20-foot Easement on Canton Road
- New Auxiliary Generator Replacement at Downtown Water Treatment Plant High Service Pump Station
- Additional Waterline Improvements along U.S. Highway North 281
- Professional Services for U.S. Highway North 281 Water Distribution System Improvements from SH 186 to FM 490
- Downtown Parking and Retail Facility at Closner Boulevard

Resumes

Amanda Jonas, RPLS

Amanda is a Senior Survey Project Manager at Halff and has 20 years of experience in surveying including working for the US Air Force and for the TxDOT Corpus Christi District Survey Department. Her experience includes horizontal and vertical control surveys, topographic surveys, drainage surveys, digital terrain mapping, bathymetric surveys, route surveying, railroad surveys, property surveying, right of way mapping, preparing legal descriptions, and parcel exhibits.

ROLE
Project Manager

EXPERIENCE
20 Years

EDUCATION
Bachelor of Science, Survey Management, Everglades University

REGISTRATION
Registered Professional Land Surveyor: TX #7010

REPRESENTATIVE PROJECT EXPERIENCE

TxDOT, The Harbor Bridge Project, Corpus Christi, TX.

Survey Task Lead for a project that included providing surveying services to support the Design-Build project for the new Harbor Bridge in Corpus Christi. Amanda managed the survey tasks on this project that included coordination with multiple disciplines and companies. Amanda worked closely with the design team to make sure their survey needs were met, including a detailed drainage survey and preparing drainage exhibits for CLOMR. She processed, analyzed and established the control network and prepared the Right of Way mapping, legal descriptions and parcel plat maps for the proposed Right of Way. She also coordinated with the City of Corpus Christi and the Corpus Christi Port Authority to obtain necessary topographic survey data collection.

TxDOT, FM 1925, Monte Cristo Rd, Hidalgo County, TX.

Survey Task lead for a project that included topographic survey, Right of Way monumentation recovery and setting monuments along proposed Right of Way of FM 1925 (Monte Cristo Road) in Hidalgo County from FM 2220 (Ware Road) to 10th Street. Amanda led coordination of field crews and office staff for the survey of ROW monumentation searches provided by the client. She coordinated right of entry and data collection of parcel improvements with local owners and field crews along the corridor. She performed QA/QC on all survey deliverables and prepared weekly progress status reports to the client.

City of Edinburg, Sugar Road Schematic Alignment, Edinburg, TX.

QAQC reviewer for the Sugar Road schematic alignment project that consists of the layout of a new roadway from Chapin Road to Monte Cristo Road. Amanda is providing surveying services including locating all surface improvements located inside ROW, establishing horizontal and vertical control for design and construction phases, and supplemental topography inside the ROW required for design utilizing the City of Edinburg's datum and coordinate system. A property survey, data collection, and review of existing ROW maps, survey information, and conceptual design documents was also performed by Halff.

Marcos Diaz, PE, LGPP

Marcos brings experience in managing, planning, designing, and construction of projects for private and public entities involving transportation, land development, hydrology and hydraulic (H&H) analysis, storm drainage design, water & wastewater design, and preparation of construction documents including plans, specifications and engineers estimate (PS&E). Marcos is certified in TxDOT's Local Government Project Procedure (LGPP) Qualification Program. He has gained experience implementing locally let projects starting with the preliminary schematic and environmental stage and progressing through design and plan development, right of way acquisition, utility relocation, letting, contracting, and construction.

ROLE
Principal-in-Charge

EXPERIENCE

EDUCATION
Bachelor of Science, Civil Engineering, Texas A&M University at Kingsville

REGISTRATIONS
Professional Engineer: TX #107249

CERTIFICATIONS
Local Government Project Procedures (LGPP) #85070

REPRESENTATIVE PROJECT EXPERIENCE

City of McAllen, Bicentennial Boulevard, McAllen, TX.
Project Manager responsible for leading the 2.75-mile extension to Bicentennial Boulevard from Trenton Road to SH 107. Coordinated with the client, several City departments, McAllen Public Utility, TxDOT, and Hidalgo County Drainage District during the planning and design phase. The planning phase consisted of providing the schematic design with horizontal and vertical alignments, drainage design, noise wall design and project constraints including Right of Way needs. The design phase consisted of finalizing the horizontal and vertical alignment, reviewing cross-sectional views, utility relocations, irrigation canal adjustments, environmental services, and developing grading and drainage design for the proposed road.

Brasfield & Gorrie, San Antonio US Federal Court House, San Antonio, TX.
Project Manager responsible for the civil design of the federal courthouse. The design plans included demolition plan, paving plan, dimensional control plan, drainage plan, utility plan, grading plan, erosion control plan, LID bioretention swale, SW3P manual and construction specifications. Halff was involved in a federal courthouse built as a design-build project. This project consisted of the preparation of construction documents for the design of a 6.4-acre site for a U.S. Courthouse. Work included preliminary design concepts through final design review for a 4-story building comprised of courtrooms, offices, detention spaces, and support areas inclusive of an atrium.

City of Eagle Pass, On-Call Engineering Services, Eagle Pass, TX.
Responsible for civil engineering projects throughout the city. Also responsible for performing development and plat reviews as needed and allocating resources to support city staff during construction with an inspector. Representative projects include Calle de los Santos drainage improvements that required special coordination with Maverick County Water Control and Improvement District #1 to cross a major irrigation canal with five 6'X4' boxes under the canal. Katie-Omar Drainage Improvements and Katie-Jenna Drainage Improvements, both of which consisted of designing improvements that prevented backwater to flood a neighborhood with the use of flap gates.

Andy Shafer, RPLS

Andy has advanced through the survey department as an instrument man on a field crew. He has extensive knowledge in ALTA surveys, topographic surveying and platting for large commercial and industrial projects, preparation of easement documents for various utility entities, and preparation of right of way parcel exhibits and maps sheets for numerous cities. Andy previously served as a two-year director for Chapter 5 of the Texas Society of Professional Surveyors (TSPS).

ROLE
QA/QC Manager

EXPERIENCE
39 Years

EDUCATION
Bachelor of Science,
Civil Engineering,
Southern Illinois University

REGISTRATIONS
Registered Professional Land Surveyor: TX #5017

REPRESENTATIVE PROJECT EXPERIENCE

City of McKinney, Traffic Engineering Services Parkway Intersections, McKinney, TX.
Project Manager responsible for overseeing all survey tasks related to the design of 20,000 lf of new roadway for Laud Howell Parkway extension, from US 75 to FM 1461 in McKinney, Texas. Survey tasks include boundary analysis of parent tracts, preparation of right of way and easement documents, and full topographic design survey of project alignment.

City of McKinney, Virginia Parkway Expansion, McKinney, TX.
Surveyor responsible for overseeing all survey tasks related to the expansion of 3.2 miles of Virginia Parkway between Ridge Road and US 75, including 1.5 miles of inside widening and 1.7 miles of outside widening that established a continuous 6-lane section. The section of exterior widening requires extensive ROW/easement determination and parcel documents for additional ROW where necessary. Project design was accomplished within 100-foot ROW in some areas to reduce significant impacts to adjacent properties.

Collin County, Open-Ended Surveying Contract, Collin County, TX.
Project Manager responsible for managing all aspects of projects. This project involved an open-ended surveying contract. Projects included topographic surveying for jail expansion at Collin County Justice Center; preparation of easements; boundary surveys for property acquisition, stockpile surveying for quantities, and right of way mapping and parcel takes for four County Road projects and platting of Collin County Justice Center property.

Town of Addison, Sherlock Drive Storm Drainage Improvements, Addison, TX.
Surveyor responsible for QC of survey data. Prepared easement documents. As part of the Town of Addison Detailed Stormwater Master Plan, the storm sewer system along Sherlock Drive was evaluated to help determine causes of frequent flooding that occurred at three residential properties. That study recommended the addition of a parallel system to the existing storm drain system that drains the three flood-prone properties from Winter Park Drive to Belt Line Road. This project involved site reconnaissance and record drawing research, on-the-ground survey for design, and preparation of construction drawings and specifications.

REGISTRATIONS
Professional Engineer: Texas #94855

CERTIFICATIONS
Certified Floodplain Manager: TX #0954-06N

REPRESENTATIVE PROJECT EXPERIENCE

City of Edinburg, Sugar Road Schematic Alignment, Surveying, and ROW Acquisition Services, Edinburg, TX.

Project Manager responsible for the oversight of this project which consisted of the layout for the proposed widening of Sugar Road from Chapin Road to Monte Cristo Road. Halff worked with City staff to create several iterations of schematics to determine the most cost efficient location for widening. Other services provided included ROW acquisition and surveying.

City of Edinburg, U.S. Highway North 281 Water Distribution System Improvements, Edinburg, TX.

Team Leader responsible for the water distribution system improvements along highway 281, between SH 186 and FM 490. This project was triggered by a TxDOT project along Highway 281 that forces the removal of existing water lines conflicting with proposed highway improvements. The distribution system improvements consists of removing existing PVC (approximately 27,000-lf) and AC lines (approximately 9,500-lf), and replacing them with approximately 45,000-lf of 8-inch and approximately 17,500-lf of PVC lines with all its pertaining valves, fire hydrants, service connections, etc. The project also consist of the design of a new pump station for the City to service the communities in the same vicinity. The pump station consists of a ground storage tank, and a prefabricated building housing the booster pumps that would feed a proposed elevated storage tank to be designed by others.

McAllen Foreign Trade Zone, Warehouse Development, McAllen, TX.

Project Manager for this project consisting of a 6.70-acre site that will be utilized for a warehouse development. The planning phase for this project consisted of coordination with the owner, the City of McAllen, Hidalgo Drainage District, and Hidalgo County to optimize the most efficient warehouse design that will accommodate for the storm runoff provided by the proposed development into the adjacent drainage ditch. Data acquisition and topographic surveying were conducted to identify existing conditions and issues of concern to proceed into design phase. Paving improvements included 13,610 square yards of new concrete pavement and 4,190 square yards of new asphalt pavement.

Jody Gafford

Jody has experience with mapping property surveys, topographical surveys, horizontal and vertical control surveys, land title surveys, improvement surveys, surveying and document preparation for road/street right of way conveyances, route surveying for water, sewer, surveying and document preparation for road street right of way conveyances, and gas pipelines, route surveying for electric transmission lines, easement preparation and construction staking. Jody is also a licensed UAS pilot capable of providing unique services that other local surveyors are unable to. Using UAS for surveying and mapping offers the ability to obtain high quality data and measurements easily, at low cost and in a fraction of the time it would take to do manually. It also reduces or eliminates risk to surveyors having to visit hazardous areas or work in hostile environments.

ROLE
Survey Lead

EXPERIENCE
20 Years

EDUCATION
Associate of Applied Science, Drafting and Design Technology
GIS/GPS Specialty

REGISTRATION
Certified UAS Technologist: TX #4229673

REPRESENTATIVE PROJECT EXPERIENCE

City of Edinburg, Sugar Road Schematic Alignment, Edinburg, TX.
Surveyor responsible for surveying services including locating all surface improvements located inside ROW, establishing horizontal and vertical control for design and construction phases, and supplemental topography inside the ROW required for design utilizing the City of Edinburg's datum and coordinate system. A boundary survey, data collection, and review of existing ROW maps, survey information, and conceptual design documents was also performed by Halff.

HCDD1, 2018 Drainage Bond Project #24, Hidalgo County, TX.
Surveyor responsible for his project involves improvements of the drainage facilities for a 4.5-square mile drainage basin prone to structural flooding. The improvements consist of ditch widening and rerouting, culvert and storm sewer enlargement, detention pond construction, and pump station construction. This project includes a drainage analysis of pre- and post-improvement conditions and coordination with utility companies and the U.S. International Boundary and Water Commission.

City of McAllen, Edinburg/McAllen Lateral Improvement, McAllen, TX.
Surveyor responsible for surveying for design services which included conventional topographic survey collection methods as well as supplementary lidar. Sufficient ground elevations were obtained to prepare one-foot interval contour maps throughout the surveyed portions of the project site. All significant trees with a caliper equal to or greater than six inches were located. Boundary surveys were also provided for ROW acquisition purposes.

City of McAllen, 33rd Street Extension, McAllen, TX.
Surveyor responsible for surveying services for design which included field ties to all surface improvements located inside right of way, establishing horizontal and vertical control for design and construction phases, and supplemental topography inside the ROW required for design utilizing the City of McAllen's datum and coordinate system.

Aaron St. Amant, PLS

Aaron St. Amant is a forward-thinking AEC and Land Survey professional with experience directing complex projects from vision to completion while maintaining a relentless commitment to the integrity of each client's goals. He leads the day-to-day operations involved with the collection of lidar and photogrammetric data for geospatial mapping and building documentation.

ROLE
Geospatial Specialist

EXPERIENCE
26 Years

EDUCATION
Master of Business Administration in Business Administration

Bachelor of Science in Organizational Leadership, University of Arkansas at Fort Smith

Associate of Applied Science in CADD Architectural Design, University of Arkansas at Fort Smith

Graduate Design Certificate in Cadastral Surveying, University of Wyoming

REGISTRATION
Professional Land Surveyor, OK #2053

REPRESENTATIVE PROJECT EXPERIENCE

Hidalgo County, Willacy County Jail HVAC & Electrical, Raymondville, TX.
GIS Specialist responsible for the reconnaissance of the facility, provided a topographic survey of the site and lidar scans of the facility hosted on a cloud-based network and presented a detailed assessment plan to the county based on the data collected.

City of Bentonville, Off-Site Drainage Improvements, Bentonville, AR.
Task leader for the project that is in the final stage of construction, which involves approximately 0.5 miles of roadway improvements/realignment between SW 8th Street and SW 2nd Street. The improvements include minor roadway alignment, underground drainage improvements of up to 48-inch storm drain piping, milling/overlay, new curb/gutter, sidewalks, and landscaping. Halff's services included surveying, design, and construction administration/observation.

City of Fort Smith, Kelley Highway, Fort Smith, AR.
Geospatial Specialist responsible for lidar services on approximately 7,000 LF of roadway extension for Kelley Highway, a 3-lane major collector, between Riverfront Drive and Midland Blvd, including reconstruction of crossing streets. The project includes drainage improvements, utility relocations, and ROW easement acquisition.

City of Fort Smith, South 50th and South 66th Street Widening, Fort Smith, AR.
Geospatial Specialist for a project that consisted of widening the north leg of South 66th Street at its intersection with Phoenix Avenue and the north leg of North 50th Street at its intersection with Kelley Highway to allow for additional center left-turn lane storage at both locations. The improvements to South 66th Street included widening an existing 22' wide estate-type section to 37-foot with new curb and gutter for 400 lf, including new sidewalks and underground drainage. Similarly, the improvements to North 50th Street included widening an existing 22' wide estate-type section to 37-foot with new curb and gutter for 800 lf including new sidewalks, underground drainage, and relocating entrances into and modifying traffic circulation within the Sutton Elementary school parking lot.

Lorena Corpus

Lorena has experience in acquisition services. Lorena joined Halff as a contract administrator and has since moved into the right of way department. She assists Halff in acquiring parcels, and relocation of residential and personal properties. She also assists with project administration, negotiation with stakeholders, title curative, closing, eminent domain, and condemnation.

ROLE

Right of way (ROW) Acquisition

EXPERIENCE

10 Years

REGISTRATION

Licensed Real Estate Agent, TX No. 658610

TxDOT No. 34833

REPRESENTATIVE PROJECT EXPERIENCE

TxDOT, FM 1926 (23rd St) to Hackberry Ave., McAllen, TX.
ROW agent for a project that consists of the acquisition of eight parcels for the widening of 23rd street in McAllen, Texas. Services include: Project Administration, Negotiation, Title Curative, Closing and Condemnation Support.

Sendero Acquisitions, SH 365 Hidalgo County Regional Mobility Authority, Hidalgo County, TX.
ROW agent responsible for assisting with the acquisition of 50 parcels and four relocations. Services included Project Administration, Negotiation, Title Curative, Closing, and Eminent Domain support.

TxDOT, Corpus Christi, US 77, Ricardo TX.
ROW agent responsible for negotiation, this project consisted of the acquisition of 38 right of way parcels and eight relocations for the expansion of existing right of way to meet current highway standards for US 77. Services included project administration, negotiation assistance, title curative, closing, and condemnation support.

Brooks County, Las Cuatas Drainage, Brooks County, TX.
ROW agent for a project that consisted of the acquisition of three acquisition right of way parcels. Services included project administration, negotiation, title curative, and condemnation services.

Hidalgo County Precinct 1, Mile 6W, Weslaco, TX.
Project consisted of the acquisition of 63 right of way parcels for the road expansion of Mile 9N to Mile 11N in Weslaco. Services included project administration, negotiation and title curative.

Hidalgo County Regional Mobility Authority, IBTC, McAllen, TX.
Project consisted of the acquisition and relocation of 63 acquisition and 43 relocation right of way parcels. Services included project administration, negotiation, title curative, closing support, relocation management and assistance.

Hidalgo County Regional Mobility Authority SH 365, McAllen, TX.
ROW agent for a project that consisted of the acquisition and relocation of 50 acquisition and four relocation right of way parcels. Services included negotiation, title curative and, relocation management and assistance.

Michael Hammack

Mike joined Halff in 2002 and is the SUE Field Manager overseeing all local SUE efforts. He has experience in designating utilities using all types of geophysical prospecting equipment, locating utilities using non- destructive vacuum excavation, plan review, records requests, estimating, preparing SUE proposals and deliverables, and QA/QC. Mike is cross trained in survey, inspection, and CADD, providing a streamlined approach and cost savings to his clients, and is willing to get his hands dirty to solve problems

ROLE
SUE

EXPERIENCE
24 Years

REPRESENTATIVE PROJECT EXPERIENCE

City of Seguin, Walnut Branch, Seguin, TX.
for the design of improvements to Walnut Branch to include expansion of the existing regional detention facilities near I-10, removal of low water crossings at San Antonio Avenue and Williams Street, and improvements for safe access to a residential neighborhood at Aldama and Kingsbury Street. Sam has recently completed a new hydrology and hydraulic analysis of Walnut Branch using industry standard criteria similar to what will be recommended for the City's new Drainage Criteria Manual.

City of Round Rock, Gattis School Road Segment 6 Reconstruction, Round Rock, TX.
This project covers one mile of road from Via Sonoma to Red Bud Lane in Round Rock, Texas. The utility coordination includes communication with utility owners, design reviews, utility agreements/permits, and utility engineering. Halff is accommodating 10 different utilities to relocate in newly acquired right of way coordination with BGE and the City of Round Rock during PS&E.

City of Austin, Fallwell Lane Capital Renewal Project, Austin, TX.
This project involved the evaluation of holistic alternative infrastructure improvements for Fallwell Lane and other City infrastructure between Onion Creek and the Colorado River. A 2D HEC-RAS model was developed to evaluate existing conditions and propose solutions along with an extensive outreach effort with multiple city departments.

City of Round Rock, Wyoming Springs Drive Segment 1, Round Rock, TX.
This project involves schematic design and PS&E of Wyoming Springs Roadway Extension, from Creek Bend to Sam Bass. This complex roadway extension project is located between two existing segments of Wyoming Springs Blvd. The project crosses Brushy Creek and Dry Fork Creek via twin bridge structures. The roadway cross section consists of a four-lane divided arterial (MAD4) with a shared use path on one side and sidewalk on the other. The project also includes extensive ancillary improvements along Sam Bass which include turn lanes, widening and intersection improvements.

Gini Connolly, AICP, GISP, CFM

Gini brings GIS experience to the Information Management team. As the previous GIS Manager for the City of Hurst for 15 years, Gini has a wide variety of local government GIS knowledge including the collection and use of geographic utility data, as well as the implementation of software applications utilizing geographic data, including asset management and land planning applications.

ROLE
GIS

EXPERIENCE
25 Years

EDUCATION
Master of Arts,
City and Regional Planning,
University of Texas at Arlington

Bachelor of Arts, French,
Texas Tech University

CERTIFICATIONS
Geographic Information Systems Professional: #33699

Certified Floodplain Manager TX: #4201-22N

American Institute of Certified Planners: #34526

REPRESENTATIVE PROJECT EXPERIENCE

Sheppard Air Force Base, Storm Water Survey, Wichita Falls, TX.
QA/QC Manager responsible for managing the systemwide storm drain GIS inventory and condition assessment efforts in advance of systemwide hydraulic modeling.

City of Athens, GIS Development and Web Map, Athens, TX.
GIS Task Leader responsible for overseeing GIS database design and conversion of water, sewer, and zoning data sets. Halff converted legacy water and sewer CAD data sets into a newly designed hosted enterprise geodatabase. The project also included the extensive clean-up of the City's zoning layers. New web maps were created and are being hosted by Halff.

Dallas Water Utilities (DWU), Storm Drainage Management GIS Improvement Plan, Dallas, TX.
GIS Lead responsible for co-authoring the DWU Storm Drainage Management GIS Improvement Plan. Gini aided in the preparation and participation of a needs assessment, data review and gap analysis to recommend steps to implement industry best practices.

City of Seguin, Impervious Cover Dataset, Seguin, TX.
GIS Task Leader for a project that involved performing the initial analysis for the development of the program and LIDAR data to determine nonresidential impervious cover. Services included project management, digital data set development, public outreach support, and utility financial implementation.

Lower Red-Sulphur-Cypress Regional Flood Planning Group (RFPG), Regional Flood Plan, Texarkana, TX.
GIS Specialist responsible for coordinating GIS efforts through the state flood planning process. GIS tasks included determining and assembling best available existing conditions, defining future conditions and related regional flood exposures and vulnerability. This involved writing related parts of the Flood plan. Coordinated public input web maps and other public input. This project involved preparing a regional flood plan under the direction of the Region 2 RFPG that contains the elements needed for the state plan. This also included the design and implementation of public involvement activities including conducting public meetings, reviewing and responding to public comments, and developing educational materials on regional flood planning issues for presentation to both technical and non-technical audiences in the region.

Alvaro Garcia

Alvaro is a skilled GIS analyst with in-depth knowledge of spatial analysis, data visualization, and GIS database design. He has been instrumental in diverse projects, contributing significantly to tasks such as data collection and creating exhibits for master drainage plans, developing interactive web GIS applications such as dashboards and story maps, and conducting spatial risk and vulnerability assessments.

ROLE
Geospatial Specialist

EXPERIENCE
5 Years

EDUCATION
Master of Science, Agriculture, Environmental, and Sustainability, University of Texas Rio Grande Valley

Bachelor of Science, Environmental Science, University of Texas Rio Grande Valley

REPRESENTATIVE PROJECT EXPERIENCE

City of Brownsville, Broadband Support. Brownsville, TX.
GIS Analyst responsible for developing an integrated GIS system for the City of Brownsville American Rescue Plan projects. This included configuring an ESRI field apps system for engineers to fill out inspection/ status forms for the Broadband, creating a Broadband dashboard for contractors to address issues, and developing a StoryMap for the City of Brownsville to publish on their website.

Lower Rio Grande Regional Flood Planning Group, Regional Flood Plan, Edinburg, TX.
Technical lead for all GIS-related deliverables for the Lower Rio Grande region state flood plan. Responsibilities included the generation of exhibits and figures, a GIS geodatabase with flood exposure, flood projects, and flood hazard layers, and included related excel data tables.

Texas General Land Office, Lower Rio Grande Valley Watershed Study, Hidalgo County, TX.
GIS analyst involved in multiple phases of the General Land Office's Lower Rio Grande Flood Study. Supported engineers by collecting and cataloging relevant GIS data, developing flood maps, and report writing.

Compass Zone 2, FEMA HQ FFRMS, Denton, TX.
GIS analyst tasked with delivering FEMA Federal Flood Risk Management standard products. Duties included quality control of deliverables, generation of FFRMS GIS flood products, and generation of metadata.

City of Harlingen, American Rescue Plan of 2021, Harlingen, TX.
GIS analyst responsible for data collection and exhibit production for the Master Drainage Plan for the City of Harlingen. Collected initial terrain, land use, and soil characteristics data and created preliminary drainage basins. Responsible for mapping flood modeling results and for production of final report exhibits and figures. This project involved the development of a 2-D stormwater runoff model for an approximately 1.4 square mile area to analyze existing and proposed conditions using XPSWM software. The analysis included the development of three possible detention pond options to mitigate flood risk in the surrounding area. Due to limited construction funds, the client selected a phased approach to implementing one of the simulated detention options. That project is currently under design.

Supplemental Information

Supplemental Information for Response to City of Edinburg (City), Request for Qualifications, Submittal Requirements, Litigation Disclosure Form

02 July 2024

Question:

1. *Have you or any member of your Firm or Team to be assigned to this engagement ever been indicted or convicted of a felony or misdemeanor greater than a Class C in the last five (5) years?*
2. *Have you or any member of your Firm or Team to be assigned to this engagement ever been terminated (for cause or otherwise) from any work being performed for the CITY or any other Federal, State or Local Government, or Private Entity?*
3. *Have you or any member of your Firm or Team to be assigned to this engagement ever been involved in any claim or litigation with the CITY or any other Federal, State or Local Government, or Private Entity during the last ten (10) years?*

Response:

Halff Associates, Inc. (Halff) employs more than 1,500 people in 33 office locations (Texas, Florida, Oklahoma, Arkansas, and Louisiana) and is engaged in roughly 4,900 active projects at any given time. Accordingly, on rare occasions, Halff finds itself as a named defendant in a lawsuit or as a participant in other dispute resolution proceedings related to professional services and/or business in general insurance. Halff is a privately-held corporation and statements regarding litigation and claims, on the advice of Halff's legal counsel and Halff's insurance carriers, must remain confidential. Further, it is important to note that confidentiality requirements are often specifically addressed in settlement release documents or employee-employer privacy restrictions or pursuant to contract requirements. Due to these circumstances, Halff can only release this confidential information under specific request and with the dual understandings: (a) that any such information is and shall remain privileged and confidential, coupled with the further understanding, (b) that any such disclosure by Halff could only be provided if such confidentiality were strenuously protected by both the City of Edinburg (City) and Halff. Notwithstanding the foregoing, Halff may still be prohibited from disclosing information. Further, as this information would provide Halff's competitors with information that would not normally be shared, and such disclosure would create a competitive advantage for such competitors, Halff and City agree that any and all relevant protections (exclusions) under the Texas Open Records Act and the Freedom of Information Act (FOIA) are applicable. **Further, Halff can and does affirm that Halff has never been adverse to the City of Edinburg (City) in any litigation or claims during the last ten (10) years. Halff can and does affirm, however, that there are no significant prior or ongoing matters that would adversely affect Halff's ability to fully perform its obligations on this or any other project.** Halff and its legal counsel and insurers will consider requests for specific information regarding litigation, therefore please direct any such questions through our General Counsel, Mrs. Jill Martin, at jmartin@halff.com or 214-346-6365.

Required Forms

Conflict of Interest Form

CONFLICT OF INTEREST
DISCLOSURE

Prospective contractors should carefully consider whether any of their activities may give rise to an improper conflict of interest situation. Conflict of interest situations that are not properly addressed can result in a loss of funding to a specific program and/or to the City of Edinburg, and in some cases can result in civil or criminal liability.

Organizations that may enter into a contract with the City of Edinburg should examine the following:

- Are any employees or board members of the organization,
  - a City of Edinburg employee or consultant who exercises program or project specific functions as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Are any immediate family members or business associates of my employees or board member's,
  - a City of Edinburg employee or consultant who participates in the City's selection or award process as part of their City position?
  - a member of a Board, Council or Committee that may participate in the City's selection or award process?
  - a City Official?

- Will any of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- Will any immediate family members or business associates of my employees or board members receive a financial interest or benefit from any project funded and administered through the City (other than employee salaries or personnel benefits)?

- To my knowledge, will my program or project have a financial effect on a City official or employee who exercises City-related functions, or an immediate family member or business associate of such person? For example, will any of these persons be receiving rental payments, other business income, or program services from my company or services offered?

If you can answer "yes" to any of these questions, it is possible that there may be a conflict of interest. You should review the rules below to determine whether an actual conflict situation is raised, and, if so, what action needs to be taken to avoid a violation of the law. You should contact City staff immediately if you suspect that there might be an issue.

Any contractor entering into an agreement with the City will be required to warrant and represent, to the best of his/her knowledge at the time the contract is executed, he/she is not aware of any improper conflict of

interest as described. Also, the contract will obligate contractors to exercise due diligence to ensure that no improper conflict situations occur during the contract.

The following Federal, State and local regulations and policies, govern projects funded through the City of Edinburg:

* 2 CFR Part 200 [Subpart B 200.112 and Subpart D 200.318]
* Texas Local Government Code Chapter 171.004
* City of Edinburg Policies & Procurement Manual

Certification:

I, the undersigned, certify and report that to the best of my knowledge,

☒ I have no conflict of interest to disclose

☐ I have the following conflict of interest to disclose:

_____

SENATE BILL 19 VERIFICATION

I, Marcos Diaz, PE, LGPP, the undersigned representative of

Halff Associates, Inc., (Company or Business name) (hereafter referred to as company) **being an adult over the age of eighteen (18) years of age, verify that the company named-above, under the provisions of Subtitle F, Title 10, Government Code Chapter 2274:**

(1) does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association; and,

(2) will not discriminate during the term of the contract against a firearm entity or firearmtrade association.

Pursuant to Section 2274.001, Texas Government Code:

1) *"Ammunition" means a loaded cartridge case, primer, bullet, or propellant powder with or without a projectile.*

2) *"Company" means a for-profit organization, association, corporation, partnership, joint venture, limited partnership, limited liability partnership, or limited liability company, including a wholly owned subsidiary, majority-owned subsidiary, parent company, or affiliate of those entities or associations that exists to make a profit. The term does not include a sole proprietorship.*

3) *"Discriminate against a firearm entity or firearm trade association":*
   - *a) means, with respect to the entity or association, to:*
     - *i) refuse to engage in the trade of any goods or services with the entity or association based solely on its status as a firearm entity or firearm trade association;*
     - *ii) refrain from continuing an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; or*
     - *iii) terminate an existing business relationship with the entity or association based solely on its status as a firearm entity or firearm trade association; and*
   - *b) does not include:*
     - *(i) the established policies of a merchant, retail seller, or platform that restrict or prohibit the listing or selling of ammunition, firearms, or firearm accessories; and*
     - *(ii) a company 's refusal to engage in the trade of any goods or services, decision to refrain from continuing an existing business relationship, or decision to terminate an existing business relationship:*
       - *(aa) to comply with federal, state, or local law, policy, or regulationsor a directive by a regulatory agency; or*

(bb) for any traditional business reason that is specific to the customer or potential customer and not based solely on an entity 's or association 's status as a firearm entity or firearm trade association.

4) *"Firearm" means a weapon that expels a projectile by the action of explosive or expanding gases.*

5) *"Firearm accessory" means a device specifically designed or adapted to enable an individual to wear, carry, store, or mount a firearm on the individual or on a conveyance and an item used in conjunction with or mounted on a firearm that is not essential to the basic function of the firearm. The term includes a detachable firearm magazine.*

6) *"Firearm entity" means:*
   a) *firearm, firearm accessory, or ammunition manufacturer, distributor,wholesaler, supplier, or retailer; and*
   b) *a sport shooting range as defined by Section 250.001, Local Government Code.*

7) *"Firearm trade association" means any person, corporation, unincorporated association,federation, business league, or business organization that:*

   a) *is not organized or operated for profit and for which none of its net earningsinures to the benefit of any private shareholder or individual;*
   b) *has two or more firearm entities as members; and*
   c) *is exempt from federal income taxation under Section 50l(a), Internal RevenueCode of 1986, as an organization described by Section 50l(c) of that code.*

RE: Request for Qualification #2024-7
Title: Land Surveying Services Rotation

Dear Mr. Hinojosa:

The **Kane Lindsey, LLC** team appreciates the opportunity to submit and present our qualifications in response to the above-mentioned RFQ Number. As natives to the Rio Grande Valley, we take great pride in providing professional, efficient, and quality services to our region.

We are a local, minority owned, professional land surveying firm with over 50 combined years in experience providing professional land surveying services throughout the state of Texas. Our services shall be provided under the direct supervision of a Texas Registered Professional Land Surveyor (R.P.L.S.) and shall be in accordance with the Texas Board of Professional Engineers and Land Surveyors Acts and Rules, with standards and requirements met for project specific Categories and Levels as outlined in the Texas Society of Professional Land Surveyors (TSPS) Survey Manual, and with reference to the Texas Department of Transportation Survey Manual.

We are eager and committed to collaborating and working with the City of Edinburg with a goal of providing our services in a timely manner and within project budget.

On behalf of **Kane Lindsey, LLC** I would like to thank you again for this opportunity to submit our Statement of Qualifications. Please feel free to contact me with any further questions you may have or if you require any additional information.

Sincerely,

Kurt Schumacher, R.P.L.S., President

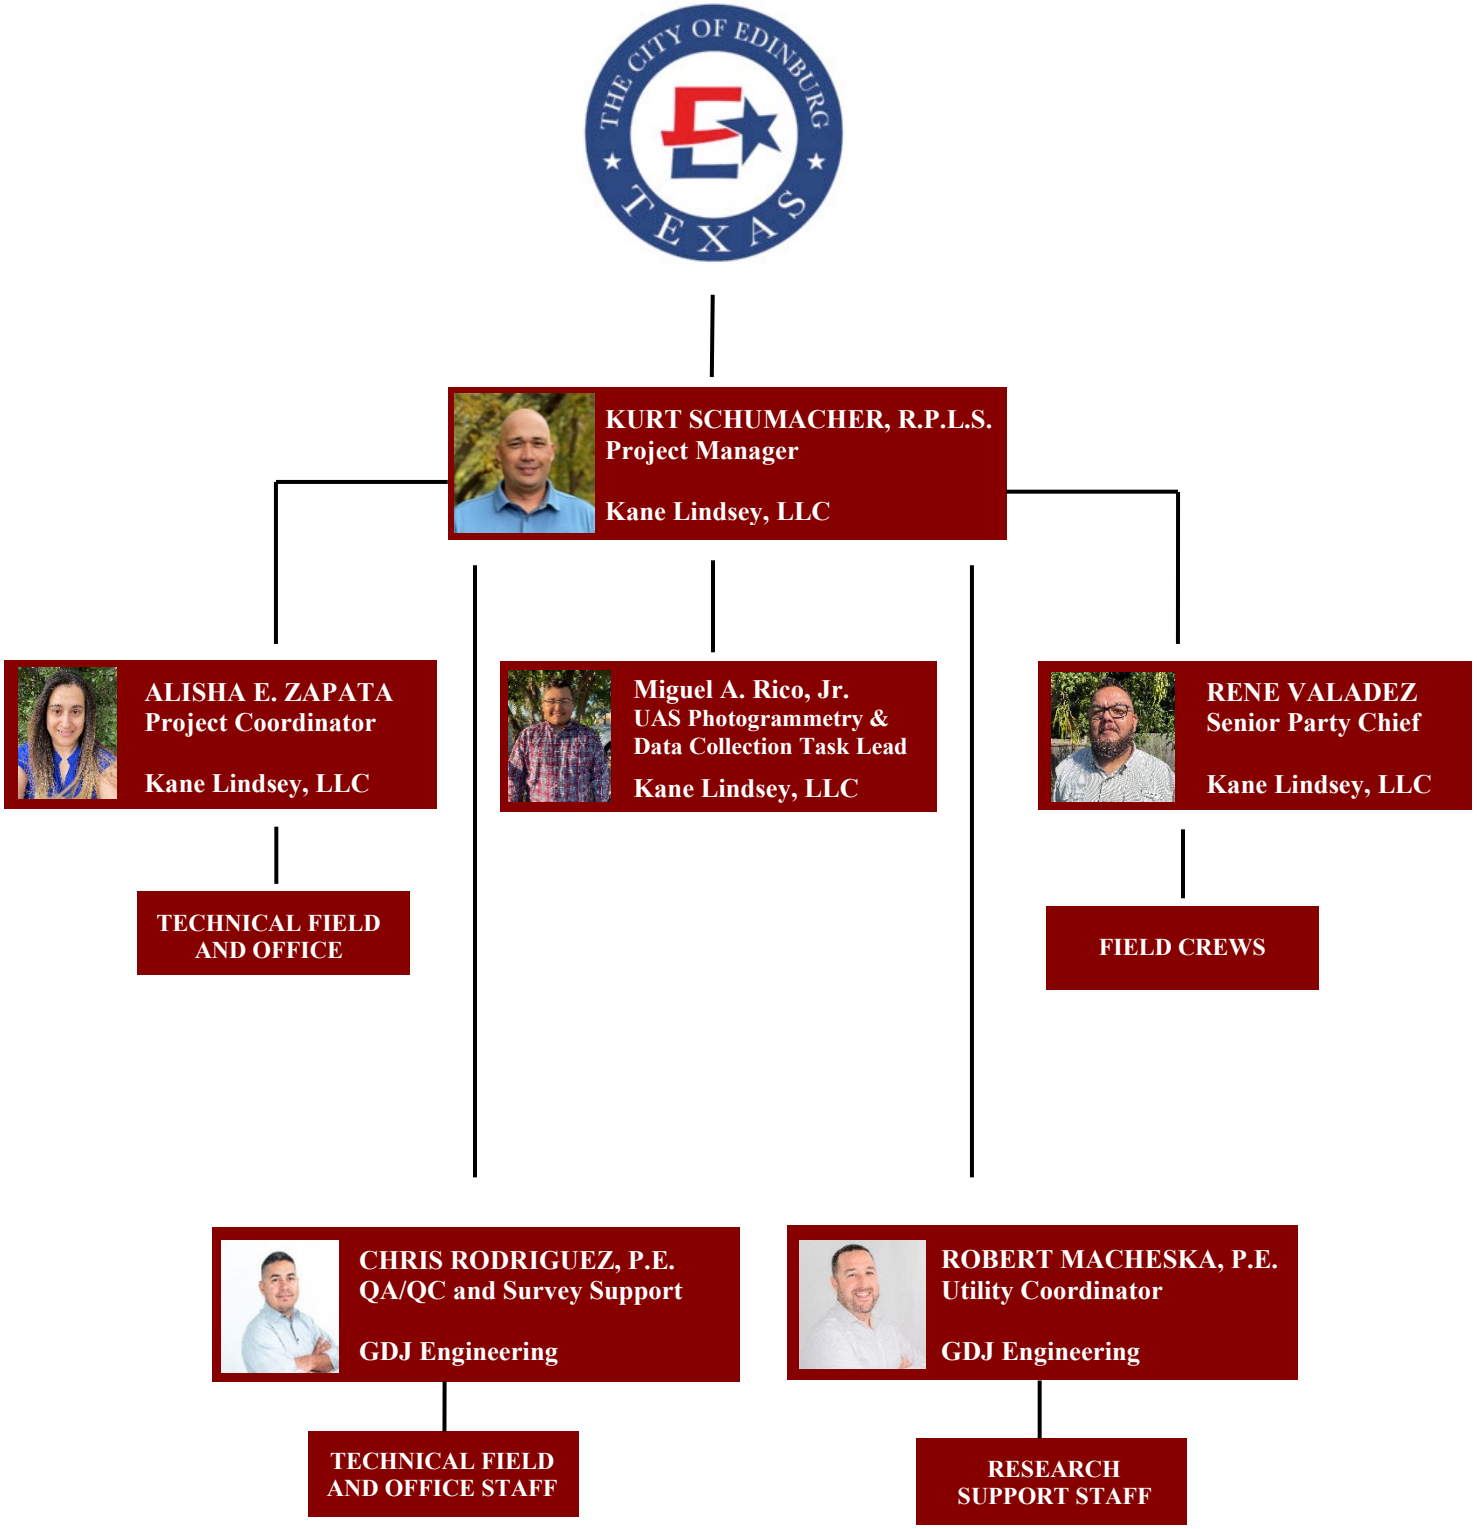
ABOUT US

As a minority owned, full-service land surveying firm, KANE LINDSEY was incorporated in the Rio Grande Valley in October 2020. We currently have one (1) office location in Edinburg, Texas where all services are provided to our clients.



Although a relatively young firm, our staff has over 50 years of combined experience employing the latest surveying technologies and methodologies to complete simultaneous and complex projects for local, state, and private entities throughout the state of Texas. Our team members are full time residents of Hidalgo County and are familiar with the geography, history, and culture of the Rio Grande Valley basin.

What sets KANE LINDSEY apart is our hands-on approach to our work, ensuring your vision of success. We pride ourselves on building collaborative relationships with our clients and providing individualized attention throughout the project, allowing you to meet your targeted goals. We listen and evaluate your specifications, then thoughtfully employ our personalized, comprehensive services to address your requirements.

No matter the size or specs of your project, KANE LINDSEY possesses the staff, technology, and additional resources necessary to provide real solutions on-time and within budget. Project experience includes, but is not limited to, right-of-way mapping, parcel exhibits and descriptions for real estate acquisition, topographical surveys for engineering design, horizontal and vertical control networks, hydro excavation, construction staking, etc.

ORGANIZATIONAL CHART

KANE LINDSEY has put together the most qualified team for the City of Edinburg. Below is the organizational chart for key personnel.

THE TEAM

KURT SCHUMACHER, R.P.L.S.

Project Manager

Kane Lindsey, LLC

Kurt will serve as the Project Manager and will be the direct contact for communication and correspondence with th City of Edinburg and the designated task leaders. KANE LINDSEY will provide field surveying, data processing, metes and bounds descriptions, Right-of-Way mapping, boundary surveying, and horizontal and vertical control support.

ALISHA ZAPATA

Project Coordinator

Kane Lindsey, LLC

Alisha will serve as the Project Coordinator, under the direction of the Survey Project Manager. She will support the Project Manager in developing, maintaining, documenting, and monitoring plans and schedules to implement any upcoming projects.

RENE VALADEZ

Senior Party Chief

Kane Lindsey, LLC

Rene will serve as the Senior Party Chief and will supervise and direct field crews, take lead in the completion of all daily field operations, and ensure field safety rules and regulations are followed.

MIGUEL A. RICO, JR.

UAS Photogrammetry & Data Collection Task Lead

Kane Lindsey, LLC

Miguel is the designated task lead for Aerial photogrammetry with data collection by UAS, to provide aerial imagery, data processing, and 3D modeling.

CHRIS RODRIGUEZ, P.E.

Quality Assurance & Quality Control (QA/QC)

GDJ Engineering

Christopher is the designated task lead for QA/QC of deliverables. QA/QC task will include comprehensive review of the following: metes and bounds descriptions, survey plats, horizontal and vertical control sheets, easement delineations, Digital Terrain Model validation, Survey Report, utility review, and Final Deliverable package.

ROBERT MACHESKA, P.E., C.F.M.

Utility Coordinator

GDJ Engineering

Robert M. is the designated task lead for utility coordination. Utility coordination tasks will include, but not be limited to: meetings and correspondence with utility operators, attainment of documents and files to verify utility infrastructure and ownership interest, document and provide a matrix consisting of utilty information obtained, and to coordinate field utility locates.

LICENSED

12 Years

ROLE EXPERIENCE

23 Years

Kurt will serve as the Project Manager and will be the direct contact for communication and correspondence with the City of Edinburg. Kurt has over 23 years of land surveying experience, which includes 11+ years of experience providing boundary, topographic surveys for engineering design, construction surveying, Right-of-Way mapping, establising Horizontal/Vertical Control Networks, as-built surveys, and surveying support for Schematic and PS&E design for multiple County of Hidalgo Capital Improvement projects.

RELATIVE EXPERIENCE

SURVEY PROJECT MANAGER: Hidalgo County, Courthouse Project, Edinburg, TX
Identified improvements of existing and proposed Hidalgo County Courthouse locations at Courthouse Square. Performed Right-of-Way mapping with parcel exhibit for a portion of Business Hwy-281 (Closner Boulevard) to be abandoned by TxDOT. Provided surveying services for engineering design, West from Courthouse Square, along SH-107 approximately 1.7 miles, for drainage outfall design.

SURVEY PROJECT MANAGER: Hidalgo County, Regional Linear Park, San Juan, Pharr, McAllen, TX
Performed Right-of-Way mapping with parcel exhibits and design surveying for a five (5) mile pedestrian trail.

SURVEY PROJECT MANAGER: Hidalgo County, 10th Street Extension from SH107 (University Dr.) to FM1925 (Monte Cristo), Edinburg, TX
Extension for a new four (4) lane roadway connecting SH107 and Monte Cristo Road. Performed Right-of-Way mapping with parcel exhibits, subsurface utility locates, and surveying services for engineering design.

SURVEY PROJECT MANAGER: Hidalgo County, La Joya Watershed Tress Detention – US83 and Tress Tract, Penitas, TX
Performed horizontal and vertical control, topography survey with 3D modeling, UAS (Drone) soil volume management and construction inspection, boundary survey, utility survey, and survey exhibits for real estate acquisition.

SURVEY PROJECT MANAGER: Rio Delta Reservoir Project, La Villa, TX
Performed design and boundary surveying for a +/- 300 acre tract of land for proposed detention reservoirs. Deliverables included 2D and 3D mapping, horizontal/vertical control sheets, boundary survey exhibits for acquisition by Hidalgo County, and Aerial photogrammetry by Unmanned Aircraft System (UAS).

ROLE EXPERIENCE

11 Years

Alisha will serve as the Project Coordinator, under the direction of the Project Manager. Alisha has 9 years of experience in the field of professional land surveying. As a detail-oriented and organized team player she is able to ensure all documentation is maintained appropriately for each project. With a strong background in communication and the ability to manage execution, Alisha is capable of providing a high level of adminsitrative support to the Project Manager with the goal of completing projects within signed off time, budget, and scope.

RELATIVE EXPERIENCE

ABSTRACTOR: Cameron County Drainage District #6 Project, Cameron County, TX

Horizontal and vertical control, cross-sections, and topography along approximately thirteen (13) miles of drainage ditches, inventory of drain structures at roadway crossings, and right-of-way coordination for the various drains that make up the main Cameron County Drainage District No. 6 system.

PROJECT COORDINATOR/ABSTRACTOR: SPI SH100 Project, South Padre Island, TX

600 acre drone flight, aerial imagery, LiDAR data processing and elevation extractions. Roadway realignment, parcel sketches and field notes for two (2) parcels for SH100 realignment.

PROJECT COORDINATOR: SL480 Safety Barrier Project, Eagle Pass, TX

Recover and verify TxDot horizontal/vertical control, survey cross-sections, 3D modeling, set 10 – 5/8" iron rods with plastic cap for future construction control, and create machine control files for construction excavation.

PROJECT COORDINATOR/ABSTRACTOR: Russell Road, Edinburg, TX (Rooth Road to Mon Mack Road) Project

Topographic survey of approximately two (2) miles for Russell Road expansion, horizontal and vertical control, utility coordination, right-of-entry coordination, 3D modeling, and parcel sketches and field notes for approximately twenty-nine (29) parcels.

PROJECT COORDINATOR/ABSTRACTOR: Moore Road, Pharr, TX (Jackson Road to I Road) Project

Horizontal and vertical control, design surveys (cross-sections, structures, utility investigation, abstracting, field property recon, abstract map/basemap), right-of-entry coordination, and SUE level A test holes.

HIDALGO COUNTY DRAINAGE DISTRICT #1 ALAMO EXPWY DRAIN PROJECT
ALAMO, TX
Topographic survey of approximately two (2) miles of existing drainage starting at Expressway IH-2 and ending approx. one (1) mile North of Sioux Road, for future drainage expansion. Primary horizontal and vertical control index sheet and sketches prepared for twelve (12) control points set in the ground.

CADD TECHNICIAN
DELTA REGION WATER MANAGEMENT PROJECT
ELSA/EDCOUCH, TX
Topographic survey of approximately twenty-eight (28) locations along existing laterals 10F2A, 10F3, Elsa-Edcouch Drain and 61. Inventory of existing drain structures at roadway crossings, culverts, right-of-way coordination, horizontal and vertical control, and cross sections.

CADD TECHNICIAN
PRIMERA ROAD SIDEWALK IMPROVEMENT PROJECT
PRIMERA, TX
Right-of-Way mapping and design survey of approximately 2.8 miles for future Primera Road sidewalk improvement. Utility investigation, abstracting, field property recon, basemap creation, right-of-entry coordination, and SUE level A test holes.

Rene Valadez

SENIOR PARTY CHIEF

KANE - LINDSEY LLC
LAND SURVEYING CONSULTANTS

CONTACT

(956) 603-2025
Rene@kanelindsey.com

EDUCATION

Sidney Lanier High School

ROLE EXPERIENCE

22 Years

Rene will serve as the Senior Party Chief, under the direction of the Survey Project Manager and Project Coordinator. Rene has over 22 years of surveying experience. As a hardworking, responsible, and punctual team player Rene is able to lead his team through all kinds of circumstances and in all types of weather conditions to complete accurate and efficient field surveys. Rene has stayed abreast in utilizing the latest in GPS LiDar and advanced survey methods, and has the necessary skills to effectively communicate in the field with land owners, city employees, and contractors in order to keep project schedule.

RELATIVE EXPERIENCE

SENIOR PARTY CHIEF: Cameron County Drainage District #6 Project, Cameron County, TX

Horizontal and vertical control, cross-sections, and topography along approximately thirteen (13) miles of drainage ditches, inventory of drain structures at roadway crossings, and right-of-way coordination for the various drains that make up the main Cameron County Drainage District No. 6 system.

SENIOR PARTY CHIEF: SPI SH100 Project, South Padre Island, TX

600 acre drone flight, aerial imagery, LiDAR data processing and elevation extractions. Roadway realignment, parcel sketches and field notes for two (2) parcels for SH100 proposed realignment.

SENIOR PARTY CHIEF: SL480 Safety Barrier Project, Eagle Pass, TX

Recover and verify TxDot horizontal/vertical control, survey cross-sections, 3D modeling, set 10 – 5/8" iron rods with plastic cap for future construction control, and create machine control files for construction excavation.

SENIOR PARTY CHIEF: Russell Road, Edinburg, TX
(Rooth Road to Mon Mack Road) Project

Topographic survey of approximately two (2) miles for Russell Road expansion, established horizontal and vertical control, utility coordination, right-of-entry coordination, 3D modeling, and parcel sketches and field notes for approximately twenty-nine (29) parcels.

SENIOR PARTY CHIEF: Moore Road, Pharr, TX
(Jackson Road to I Road) Project

Horizontal and vertical control, design surveys (cross-sections, structures, utility investigation, abstracting, field property recon, abstract map/basemap), right-of-entry coordination, and SUE level A test holes.

EDUCATION

Progreso High School
Class of 2017

ROLE EXPERIENCE

2 Years

Although relatively new to the industry, Miguel is a highly motivated, certified Small Unmanned Aircraft Pilot eager to contribute to team success through hard work, attention to detail, and excellent organizational skills. Miguel has a clear understanding of operations, maintenance, emergency procedures, and training in small unmanned aerial vehicle platforms. He is motivated to continue learning, growing, and excelling in the UAS technology industry.

RELATIVE EXPERIENCE

REMOTE PILOT: City of Los Fresnos Sidewalk Project (FM1847)
Los Fresnos, TX

Topography survey of approximately one (1) mile for future sidewalk development for the city. Responsibilities included the operation of the UAV during all phases of the ground and flight operations, such as creating drone route, monitoring weather to flight time, inspecting area for potential safety hazards, manning UAV to perform the flight, and aerial imagery processing and LiDAR data extraction to create Digital Terrain Model.

REMOTE PILOT: South Williams Road (I 69E to South Parallel Corridor) Project
San Benito, TX

Topography survey of approximately two (2) miles for Williams Road expansion. Responsibilities included the operation of the UAV during all phases of the ground and flight operations, such as creating drone route, monitoring weather to flight time, inspecting area for potential safety hazards, manning UAV to perform the flight, and aerial imagery processing and LiDAR data extraction to create Digital Terrain Model.

REMOTE PILOT: Dana Road (FM3248 to FM802) Project
Brownsville, TX

Topography survey of approximately 2.4 miles for Dana Road widening. Responsibilities included the operation of the UAV during all phases of the ground and flight operations, such as creating drone route, monitoring weather to flight time, inspecting area for potential safety hazards, manning UAV to perform the flight, and aerial imagery processing and LiDAR data extraction to create Digital Terrain Model.

REMOTE PILOT: San Benito I.S.D. Bus Depot Project
San Benito, TX

Topography survey of San Benito C.I.S.D. Bus Depot and faculty parking lot for redesign. Responsibilities included the operation of the UAV during all phases of the ground and flight operations, such as creating drone route, monitoring weather to flight time, inspecting area for potential safety hazards, manning UAV to perform the flight, and aerial imagery processing and LiDAR data extraction to create Digital Terrain Model.

20 Years

ROLE EXPERIENCE

25 Years

Robert will serve as the task lead for Utility Coordination. Robert has over 20 years of experience in the design and management of various public improvement projects. For the past 5 years Robert has served as Executive Vice President/COO for GDJ Engineering, LLC. He has previously worked for both the Texas Department of Transportation and L&G Engineering, which provided him with excellent hands on experience as to how multiple government entities function. Robert has worked on all aspects of public works projects, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management and design experience includes contract administration, supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, drainage design, design/PS&E preparation, and public involvement.

RELATIVE EXPERIENCE

PROJECT MANAGER: SH364 (SH495 – FM1924), Mission, TX
Responsible for all design aspects of the project which consisted of reconstructing and widening an existing 24' rural roadway to an urban five (5) lane section for 2 miles at a construction cost of $6.8 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. Calculated all Times of Concentration, rainfall intensities, calculated hydraulic gradient, and design discharges. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts.

PROJECT MANAGER: FM800 (McClelland Dr to IBWC Floodway), Harlingen, TX
Project Manager responsible for all hydraulic design aspects of the project. This area of FM 800 has historically had flooding concerns, so to alleviate those concerns we designed a storm sewer system on the rural road to capture the water flowing to the road and send it to the IBWC Floodway. The project consisted of the design of a storm sewer system as well as analysis of the outfall ditches. Calculated all Times of Concentration, rainfall intensities, calculated hydraulic gradient, and design discharges. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts. In addition, he was responsible for processing the amended IBWC permit for TxDOT.

Chris has over 16 years of experience in the design and management of various public improvement projects. For the past 5 years Chris has served as Vice President of Engineering for GDJ Engineering, LLC. He previously worked for both the Texas Department of Transportation (San Benito Area Office) and L&G Engineering which provided him with excellent hands on experience as to how multiple government entities function. He has worked on multiple aspects of transportation and drainage projects, from planning and PS&E preparation, Hydrology & Hydraulics Design to construction phase services. His project management and design experience includes supervision of production staff, QA/QC, utility coordination, sub-consultant management, scheduling, bid document preparation, roadway planning, and drainage design. Chris has managed multiple concurrent design projects and production staff with numerous design groups under his direction.

RELATIVE EXPERIENCE

DEPUTY PROJECT MANAGER: FM681 (From SH107 to SH364), Mission, TX

Responsible for all hydraulic design aspects of the project. The project consisted of reconstructing and widening an existing 40' rural roadway to an urban divided highway for 2.7 miles at a construction cost of $16.8 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections. This project also required the design of a storm sewer system as well as analysis of the outfall ditches. Calculated all Times of Concentration, rainfall intensities, calculated hydraulic gradient, and design discharges. GEOPAK Drainage was used to develop storm sewer profile and THYSIS was used to design and analyze the various cross drainage culverts.

DEPUTY PROJECT MANAGER: FM493 (From US281 to Bus. 83), Donna, TX

Responsible for all design aspects of the project. The project consisted of reconstructing and widening a 32' rural two lane roadway to a 44' rural roadway for 6.5 miles at a construction cost of $12 million. This project required the design of the proposed pavement section using FPS and the horizontal and vertical alignments based on the cross sections. The USGS maps were used to determine drainage areas for outfalls and culverts. Used rational method, evaluating the land's slope, soil type, Tc, and landscape to calculate peak runoff rate (discharge). THYSIS was used to analyze and evaluate the existing structures and the cross culverts that needed to be upgraded and redesigned. Tailwater elevations and the allowable headwater needed to be determined and taken into consideration.

STABILITY & REFERENCES

KANE - LINDSEY LLC
LAND SURVEYING CONSULTANTS

2. Stability and References

CAPACITY

KANE LINDSEY has the capacity to complete simultaneous projects issued under contract on-time and in-budget. Our team holds more than 50 years of combined experience in the surveying/engineering industry, with an additional:

- Two (2) R.P.L.S. in a supporting role
- One (1) Unmanned Aircraft System (UAS) certified Federal Aviation Administration (FAA) pilot
- One (1) TxDOT pre-certified utility coordinator with supporting staff
- Three (3) field crews with ability to mobilize
  - One (1) crew immediately available upon request
  - Additional crews available within 24 hour notice
- Staff Abstractor with 10 years of experience
- Support data processing and QA/QC staff

Our surveyors, technicians, and field crews are ready to begin work immediately and will make work under this contract a high priority.

CONTINGENCY PLAN

The key positions listed below will be carried out by the listed successor in the event of any emergency/disaster situation in which the key individuals are unavailable to perform their duties.

Delegation of authority will begin when established channels of direction are disrupted and end when these established channels have resumed. All persons (by position) listed will have authority to operate in the position they are assuming to the fullest extent possible until they are relieved by the next-highest individual.

Key Position	Performed By	Successor (if needed)
Project Manager	Kurt Schumacher, R.P.L.S.	Alisha Zapata
Project Coordinator	Alisha Zapata	Kurt Schumacher, R.P.L.S.
Senior Party Chief	Rene Valadez	Miguel A. Rico, Jr.
Utility Coordinator	Robert Macheska, P.E.	Christopher R. Rodriguez, P.E.
QA/QC Task Lead	Christopher R. Rodriguez, P.E.	Robert Macheska, P.E.
UAS Photogrammetry & Data Collection	Miguel A. Rico, Jr	Mark Paulson, R.P.L.S.

COMPETENCY

KANE LINDSEY offers a full range of surveying and mapping services to satisfy your project specifications. We combine our experience, technology, and resources to solve challenges and deliver the best value to our clients. KANE LINDSEY has completed survey projects for private, municipal, county, and state agencies throughout Hidalgo County and has extensive experience in:

- Control surveys
- Property acquisition plats and description surveys (metes and bounds)
- Preparing right-of-way maps
- Design cross-sections for roadway and drainage improvements
- Utility route and improvement surveys
- Tree surveys
- Complex record information abstracting
- Coordination with other agencies
    - TxDOT
    - UPRR
    - Water Districts
    - USIBWC
- Producing 3D digital terrain models for engineering design
- Construction and right-of-way staking and miscellaneous surveys

TECHNOLOGY

KANE LINDSEY continues to invest in technology allowing the firm to maintain a high efficiency level. The firm has invested heavily in network improvements to triple our storage capacity, increase our network bandwidth tenfold, and enhance our off-site data recovery services. This investment provides KANE LINDSEY's clients with the peace of mind that not only is their project data safe and secure, but also easily accessible by all critical stakeholders.

KANE LINDSEY uses a wide variety of technology and management software to perform land surveying services, such as:

- Drawing and modeling software, such as AutoCAD Civil 3D, MicroStation, Infinity, and ArcGIS
- Field crews are equipped with numerous data collection devices including
    - Trimble® and Leica® Data Collectors
    - Robotic Total Stations
    - Leica® LiDAR Scanners
- Project management software (e.g., Microsoft® Project) to provide real-time budget earnings reports, project staff utilization, actual vs projected reports, and accounts receivable tracking
- Gantt charts to identify critical paths and to confirm timely project delivery

TAB 3

PREVIOUS EXPERIENCE

KANE - LINDSEY LLC
LAND SURVEYING CONSULTANTS

3. Previous Experience

RUSSELL ROAD – (ROOTH ROAD TO MON MACK ROAD)

Location: Edinburg, TX

Client Name: GDJ Engineering

Phone Number: (956) 603-2025

KANE LINDSEY provided surveying services for the expansion/widening of Russell Road.

Project Scope:

- Topography survey for engineering design
- Horizontal and vertical control for construction
- Utility coordination
- 28 parcel exhibits for real estate/right-of-way acquisition

Project Deliverables:

- 2D and 3D mapping in MicroStation DGN format
- 3D modeling for limits of project
- Horizontal and vertical control sheets
- Parcel exhibits with descriptions for real estate acquisition
- Surveyor's report detailing project approach, survey datum, boundary conflicts, and utility matrix.

Key Personnel:

- Kurt Schumacher, Project Manager
- Alisha E. Zapata, Project Coordinator & Utility Coordinator
- Rene Valadez, Senior Party Chief
- Miguel A. Rico, Jr., Small Unmanned Aircraft Pilot

Key Challenge: Right-of-Entry (ROE), limited response from property owners.

Firm's Solution: Sent out multiple letters requesting ROW; field visits and knocking on doors to request permission for entry; speaking with neighbors for owner contact information. Achieved 90% entry. Used UAV to collect data where ROE requests were denied.

TRAFFIC SIGNAL LIGHT DESIGN PROJECT
Intersection of FM 1925 at "M" Rd. and at Gwin Dr.
Intersection of Freddy Gonzalez Dr. & Monmack Road

Location: Edinburg, TX

Client Name: TEDSI Infrastructure Group

Phone Number: (956) 424-7898

The purpose of this project was to prepare plans, specifications, and estimates for proposed signal layouts at the intersections.

Survey Limits:
- Approximately 240-ft in every direction at each intersection.

Project Scope:
- Topography survey for engineering design
- Right-of-way retracement
- Utility coordination with the City of Edinburg
- Provide one (1) project Benchmark at each intersection.

Project Deliverables:
- CADD file
- Field notes
- Overhead Electrical heights

Key Personnel:
- Kurt Schumacher, Project Manager
- Rene Valadez, Senior Party Chief
- Alisha Zapata, Utility Coordinator
- Miguel A. Rico, Instrument Operator

Key Challenge: Safety due to heavy vehicular traffic at the intersection.

Firm's Solution: Utilized and followed TxDot approved PPE standards and Surveyor Traffic Control Plans.

CAMERON COUNTY REGIONAL MOBILITY AUTHORITY (CCRMA)
DANA ROAD EXPANSION PROJECT

Location: Brownsville, TX

Client Name: CCRMA and GDJ Engineering

Phone Number: (956) 603-2025

KANE LINDSEY provided surveying services for the expansion/widening of Dana Road.

Survey Limits:

- Approximately 2.5 miles including 1,500 ft West and East at FM 3248 and 1,500 ft West and East at FM 802

Project Scope:

- Topography survey for engineering design
- Horizontal and vertical control for construction
- Right-of-way retracement
- Utility coordination

Project Deliverables:

- 2D and 3D mapping in MicroStation DGN format
- 3D modeling for limits of project
- Subsurface utility excavation
- Horizontal and vertical control sheets

Key Personnel:

- Kurt Schumacher, Project Manager
- Rene Valadez, Senior Party Chief
- Alisha Zapata, Project Coordinator
- Miguel A. Rico, Instrument Operator

Key Challenge: Heavy vehicular traffic throughout the length of the project.

Firm's Solution: Data collection by Drone and Static LiDar applications.

MARIPOSA RANCH DRAINAGE IMPROVEMENT PROJECT

Location: La Feria, TX

Client Name: GDJ Engineering

Phone Number: (956) 603-2025

Survey of approximately 1 mile of existing drain ditch and irrigation canal adjacent to Mariposa Ranch Subdivision. Improvements to existing drainage system needed to alleviate "ponding" within Mariposa Ranch Subdivision by widening existing ditch North to Palis Road.

Project Scope:

- Topography survey for engineering design
- Horizontal and vertical control for construction
- Parcel exhibits for real estate acquisition

Project Deliverables:

- Right-of-way mapping
- Parcel exhibits for real estate acquisition
- Horizontal and vertical control sheets
- 3D modeling

Key Personnel:

- Kurt Schumacher, Project Manager
- Rene Valadez, Senior Party Chief
- Mariano Garza, Instrument Operator

Key Challenge: Cross-sections at a 50' wide irrigation canal with standing water.

Firm's Solution: KANE LINDSEY utilized a 10' boat with electric motor to access water. Mounted GPS antenna at front of boat with fixed height, measured to canal bottom, and added depth height to GPS antenna height to collect below water features.

CAMERON COUNTY
DRAINAGE DISTRICT NO. 6
HYDRAULIC ANALYSIS

Location: La Feria/Harlingen/Santa Rosa, TX

Client Name: Cameron County Drainage District No. 6 and GDJ Engineering

Phone Number: (956) 603-2025

KANE LINDSEY provided surveying services for Hydraulic Analysis in Eastern Cameron County. Completed on time and within budget.

Project Scope:

- Surveying and inventorying all drain structures at roadway crossings
- Cross-sections every 1,000-feet along existing drain ditches
- Establishing horizontal and vertical control

Project Deliverables:

- 2D and 3D mapping
- Photographs
- Inventory data sheets
- Signed and sealed survey control sheets
- Survey report.

Key Personnel:

- Kurt Schumacher, Project Manager
- Alisha E. Zapata, Project Coordinator & Utility Coordinator
- Rene Valadez, Senior Party Chief

Key Challenge: Access to bottom of ditch elevations/steep slope grades

Firm's Solution: KANE LINDSEY purchased a Leica GS18 I GPS receiver with tilt compensation and photogrammetry point cloud data collection capabilities. Field crews used point cloud data collection features to scan bottom of ditches and structures from top of bank. Survey technicians processed point clouds and extracted necessary structure and ditch features.

TAB 4

ABILITY TO MEET SCHEDULES & DEADLINES

KANE - LINDSEY LLC
LAND SURVEYING CONSULTANTS

4. Ability to Meet Schedules & Deadlines

KANE LINDSEY understand that the City of Edinburg is seeking to contract with Professional Surveying firm(s) on an "as needed" basis to perform services that may include, but not be limited to, topographic, boundary, platting preliminary, and all other necessary land surveying tasks, as specified by the City.

KANE LINDSEY has the capability to perform all mentioned services the City of Edinburg requires on pages 13-18 of RFQ #2024-7. Our mission will be to exceed expectations by providing innovative and quality design solutions that meet budget, within the time frames given.

KANE LINDSEY understands that our survey plan and data are the foundation on which other professionals rely on and that an accurate, quality, and detailed survey plan will help any upcoming City of Edinburg projects run smoothly. We approach every project with an understanding of our clients needs for timelines, accuracy, and confidentiality. When you partner with KANE LINDSEY, you can rest assured that you've hired a team of local, qualified professionals who possess an intricate knowledge of the region's unique terrain, as well as the equipment needed to get the project completed on time and within budget.

Coordination with the City of Edinburg and its representatives will be the first step to identify and review any project requirements. A thorough understanding is essential before mobilizing and commencing surveying activities. KANE LINDSEY will coordinate with the City of Edinburg to secure available information beneficial to the level of effort for project development and project approach.

APPROACH

KANE LINDSEY strongly believes in a flexible, team-oriented approach to meeting and exceeding the requirements of services requested. We understand that every project is unique and dynamic with individual design challenges, and we understand that we cannot be successful on our own. That is why we work closely with each client to determine the project goals and expectations to develop a customized plan of services tailored to the specific requirements of each individual project. With this in mind, we are able to adapt planning and design methodologies to each specific project. Additionally, we utilize our professional partnerships with members of local Irrigation Districts, Drainage Districts, Engineering Departments, utility purveyors, TxDOT, and fellow colleagues in the industry for successful project delivery.

TIMELINESS OF SCHEDULE – EXAMPLE

The following 20-day schedule example is based on a typical survey inclusive of horizontal and vertical control, boundary & topographical surveying, preparation of survey plat and legal description & survey alignments (roadways, utilities, right-of-ways, easements, baselines). This example is for a typical 1000' rural stretch of roadway, 50' in width, with a parcel for acquisition, and final design schematic provided:

Week 1 (Day 1-5): Kurt Schumacher, R.P.L.S. (KANE LINDSEY, Project Manager) will coordinate with Task Leaders to review schedule, project critical paths, and assess team availability. Kurt will task Robert Macheska, P.E. (GDJ Engineering, Utility Coordinator) to visit site and coordinate with utility purveyors to secure maps of records for utilities along project route. Additionally, a Texas 811 locate request for buried utility lines will be submitted. Kurt will task abstractor to locate existing recorded adjoining deeds, easements, plats, and ownership information. KANE LINDSEY Survey Technicians will sketch recorded information from recorded documents. Kurt will task Alisha Zapata (KANE LINDSEY, Project Coordinator) to mobilize field crews to establish project horizontal and vertical (benchmarks) points and coordinate production of control sheets for use by all team members. KANE LINDSEY field crews will utilize the abstract map to locate existing boundary and right of way corners. Horizontal and Vertical control, utility markings, abstracting, deed plots, and alignment/easement determinations commenced by end of week 1.

Week 2 (Day 6-10): KANE LINDSEY office technicians continue to process field data, field crews to commence cross sections/topography survey locating all visible utilities, drainage infrastructure (flow lines, diameters, type), and public entry and exit points to roadway. Kurt will task Miguel A. Rico, Jr. (KANE LINDSEY, UAS Photogrammetry & Data Colelction Task Lead) to commence UAV Photogrammetry and data collection. UAV flight plan to include 50-feet outside existing right-of-way in case additional ground elevations are needed. Office staff processes data daily, keeping project files updated as field crews progress with survey. Robert is to finalize utility information and provide matrix and information to team. Kurt and Chris Rodriguez, P.E. (GDJ Engineering, QA/QC Task Leader) will be tasked to perform periodic QA/QC on drawings and collected field data. UAV aerial imagery delivered to all members of team.

Week 3 (Day 11-15): Right-of-Way and boundary analysis complete with pertinent information (easements, ownership, permits). KANE LINDSEY to begin preparing parcel metes and bounds description and survey plats for QA/QC review. Field crews to complete cross-sections and topography survey. Office staff will continue to process data for 2D and 3D deliverables for engineering design.

Week 4 (Day 16-20): Kurt to meet with team for project updates, progress, and delivery date to the City of Edinburg. Robert will review mapping files to verify utility ownership and information shown. Kurt and Chris to provide final review of 2D and 3D mapping, legal description, and horizontal/vertical control sheets. Kurt to prepare surveyor's report. Survey Report, documents, and electronic files delivered by the 19th business day to the City of Edinburg. Parcel corners and field cleanup complete by day 20.

Dear Members of the Selection Committee:

With more than 100,000 residents, the City of Edinburg (City) is a diverse and fast-growing community in the Lower Rio Grande Valley (LRGV). Through RFQ #2024-7, we understand the City is seeking experienced consulting surveying firms for boundary and topographical surveying of commercial and residential property and other informational interests and purposes by the City. With more than 41 years of experience in Texas helping city and county agencies proactively improve and install new infrastructure to accommodate growth, KCI Technologies, Inc. (KCI) is well positioned to help the City develop comprehensive, efficient, and environmentally conscious solutions.

We understand "good things are happening in Edinburg" and want to help shape the growing community's future while maintaining its hometown character. Building on the momentum of Edinburg 2040, we recognize many of the priorities identified during the community engagement town hall meetings and resident surveys overlap with the projects included within the Capital Improvement Program including improvements to street quality and drainage. KCI is committed to partnering with the City to achieve these goals on time and within budget as we have countless other times for the City and other municipalities.

After working on previous City projects, KCI's key personnel have cultivated relationships with City staff and are familiar with the City's engineering standards manual, standard operating procedures, and preferences. ***What does this mean for you?*** We know who to contact and what it takes to get projects across the finish line. We take pride in meeting client milestone schedules and delivering documents that require minimal comments. Additionally, KCI brings an extensive TxDOT and joint-bid project portfolio. From this experience, we understand how to coordinate with multiple agencies and stakeholders and the potential risks of delivering a project funded through this mechanism.

Why Select KCI? KCI has what it takes to exceed the City's expectations: technical ability and understanding, proven experience, a cost-minded approach, and a commitment to professionalism and client satisfaction. With this submission, KCI commits its professional and technical resources to the City and accepts the conditions in the request for SOQ. The personnel required to honor this obligation are available to proceed with this contract.

KCI acknowledges there have been no addendum issued for this RFQ and the firm does not have any exceptions to the specifications/requirements. We look forward to your favorable review of the attached. Please contact me or project manager, Cody Condron, RPLS, PLS, CP, CMS, if you have any questions or need additional information.

Sincerely,

Dawn Green

Dawn Green, PE*
Vice President
**Authorized to bind KCI to contract*

TAB 2

OVERALL QUALIFICATION OF TEAM

EXECUTIVE SUMMARY

To maintain, manage, and plan for the needs within the 9th largest county in Texas, the City must rely on professional surveying firms to proactively improve city-wide infrastructure in urban and rural areas, replace aging systems, and install new infrastructure to accommodate its rapid growth. KCI is eager to apply our expertise to develop comprehensive, efficient, and environmentally conscious solutions for the residents of Edinburg.

For this contract, **CODY CONDRON, RPLS, PLS, CP, CMS**, will serve as Project Manager. Mr. Condron's well-rounded career providing surveying services throughout the State has given him the expertise needed to successfully execute this contract. He provides surveying services throughout the LRGV and understands the unique considerations when surveying within the Region, including terrain and historical factors such as Spanish, Mexican, and Texas land grants. In addition, Mr. Condron has provided boundary, topographic, and control surveys for a multitude of municipalities, including expanding existing roadways, acquisition and sale of properties, and developing various survey scopes specific clients' needs.

Assisting Mr. Condron is our Survey Coordinator and Communication Liaison, **BALDOMERO CERVANTES**. Mr. Cervantes brings 39 years of surveying expertise. He has developed schematic and final plans, specifications, and estimates (PS&E) for city, county, and state transportation system improvements. His background also includes site development including parking lot layouts, utility upgrades and replacements, and complex drainage systems and oil and gas survey documents, specifically in the LRGV. Additionally, Mr Cervantes lives in the City, makign him personally invested the area's sucess and growth. His intimate knowledge and history is vital to KCI's success in the region.

KCI has reviewed the documents associated with RFQ No. 2024-7. We have built an internal project team with the availability and qualifications to complete assigned projects under the Scope of Services. Our motivated team understands that time is of the essence for survey projects as they are key to property acquisitions, project designs, and construction. Mr. Condron will provide project management and team leadership to accomplish the awarded project's objectives while complying with the County's standards and requirements. In addition, KCI has the available personnel and equipment to operate our surveying operations out of our Mission office, allowing us to mobilize immediately. Our redundant resources and local presence in Mission will allow us to mobilize within 24 hours keeping projects on track.

Within Tab 4, we have confirmed our ability to meet the minimum insurance requirements and indicate our commitment to enter into the agreement. The required forms are included within Tab 5.

VENDOR HISTORY

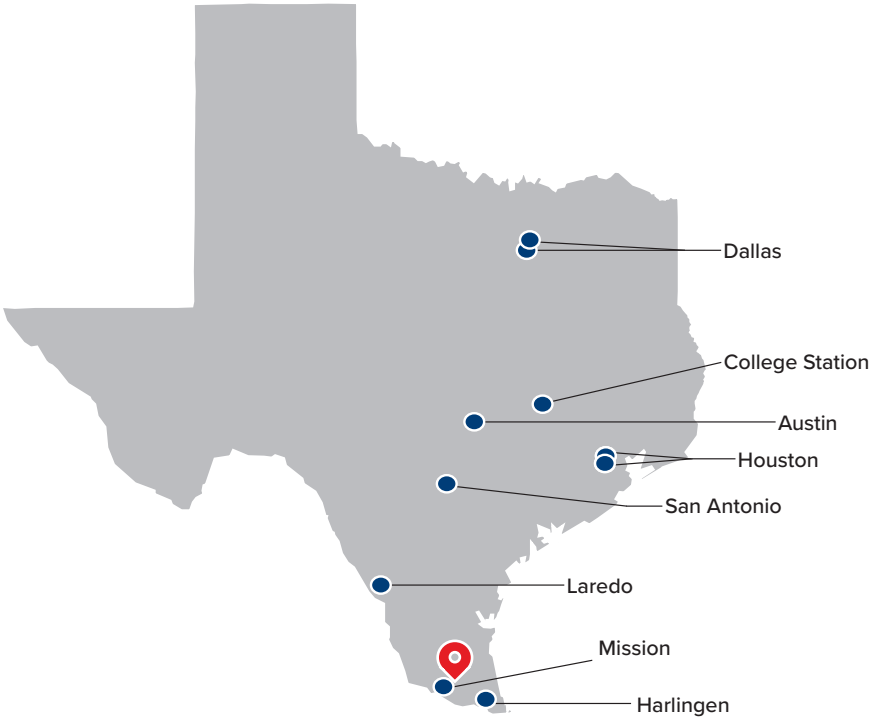
For more than 41 years, KCI has served municipalities across Texas to help improve the safety, maintenance, and efficiency of their roadways, drainage facilities, and utilities and develop new and maintain existing buildings and HVAC equipment. KCI staff have completed more than 100 projects in Hidalgo County including several private and public-sector CIP projects in Edinburg as a subconsultant, some of which are detailed within this statement of qualifications. We will build on the lessons learned from this experience to successfully deliver projects under this contract for the City.

Firm Background Information

With revenues of $467 million in 2023, the *Engineering News-Record* has consistently placed KCI among the top 100 consulting engineering firms in the country. KCI

is a 100-percent employee-owned engineering, consulting, and construction firm serving clients throughout the United States. We have 10 offices in Texas including Mission, Harlingen, Laredo, Houston (two office locations), San Antonio, Austin, College Station, and Dallas (two office locations).

Firm Qualification and Experience



KCI is a highly qualified firm registered and licensed to practice engineering and perform survey services in Texas (TBPELS F-10573 and 10194365). With over 69 years of experience in land surveying, engineering, subsurface utility engineering (SUE), utility coordination, and construction management and inspection, KCI has successfully served city, county, state, and federal agencies with their infrastructure development plans. Our service history for land surveying includes ALTA and Category 1 property surveys for the purchase and sale of property, Category 6 topographic surveys to be used in the design of various infrastructure, route surveys for road and easement alignments and additional survey reports like boundary disputes, Federal Emergency Management Agency (FEMA) elevation certificates and certified aerial imagery.

KCI's culture of client service, demonstrated performance on similar assignments, and comprehensive approach to project management will result in assignments that meet the quality, budget, and schedule goals established by Hidalgo County.

With decades of experience, KCI has successfully assisted city, county, and state agencies with topographic, boundary, platting preliminary, and other necessary land surveying tasks. We have served as the lead surveyor for numerous on-call services contracts as well as project-specific assignments for 13 counties including Hidalgo County, state and federal agencies, and local municipalities.

Familiarity with Geographic Area

KCI takes pride in growing our offices locally and finding talent with knowledge of the geographic region. In 2017, we hired Oscar Garza, PE, SIT, a lifelong Hidalgo County resident, to help us grow our Mission office and develop a presence in South Texas. We have continued to grow this team by recruiting locally and immersing ourselves in the community to better understand how to serve our local clients. We proudly offer surveying, infrastructure, and construction services out of our Mission office.

KCI has worked throughout the LRGV for numerous local agencies. We are currently providing, or recently provided, surveying services for Mile 1 East for the City of Mercedes, State Highway 48 for the TxDOT Pharr District, Faysville Drain for Hidalgo County Drainage District No. 1 (HCDD1), Queens Park Development for International Weight Inspection Services, LLC, and Alley Rehab for the City of McAllen.

Through this experience, we have built relationships with many local agencies including Hidalgo and Cameron counties, HCDD1, TxDOT Pharr District, the Cities of Brownsville, Edinburg, Pharr, and McAllen, International Boundary Water Commission, Brownsville Irrigation and Drainage District, Brownsville Public Utilities, Port of Brownsville, FEMA, Texas Parks and Wildlife, US Army Corps of Engineers, US National Fish and Wildlife Service, and multiple irrigation districts, school districts, and cities. These existing relationships enable us to coordinate local stakeholder involvement efficiently and effectively.

A partial listing of similar successful projects in scope and size can be found beginning on page 7.

We understand how the unique topography of Hidalgo County, including flat terrain, limited access, historic

SERVICE CAPABILITIES (PARTIAL LIST)

- Boundary Surveys
- Topographic Surveys
- Control Surveys
- As-Built Surveys
- Construction Stakeout
- Hydrographic Surveys
- Elevation Certifications
- Infrastructure Layout

- 3-D Laser Scanning
- ALTA/ACSM Surveys
- Wetland Surveys
- Stream Restoration Surveys
- Utility Designation & Location
- Metes & Bounds Surveys
- Right-of-Way Determination
- Legal Descriptions
- Subdivision Computations
- Record Plats
- Easement and Right-of-Way Plats
- Plan of Surveys Preparation
- Minor and Major Subdivisions
- Existing Conditions Plans
- CADD

ownership of properties, and special survey needs, can impact a project. It is imperative to take these issues into consideration when developing project scopes. From our prior experience working within the Region, we have learned that developing individual scopes tailored to the individual surroundings helps mitigate many of these obstacles. Additionally, KCI has worked closely with City staff to help implement low altitude aerial mapping and 3D modeling using drones and various software. This experience has given us a deeper perspective on approaching existing and future projects.

Having grown up in the City of Donna, Project Principal **DAWN GREEN, PE** also brings knowledge and familiarity with the City. Ms. Green often travels to visit family in the area and has a vested interest in the planned infrastructure improvements for the community.

Uniqueness to Perform these Services

KCI, our firm and our employees, embrace a set of guiding principles—our mission, vision, and values—that are a part of the way we do business every day. Those ideals are the basis of the way we interact with our clients, manage our projects and mentor our employees, and are fundamental to who we are as consulting engineers, surveyors, construction managers and scientists, but also as members of a thriving community and growing industry.

With this strong foundation in place, KCI strives to become an extension of our clients and their staffs. Guided by these founding principles, KCI's proposed key staff consists of technical experts with strong managerial and communication skills, who are committed to the success of any task assignment.

Our firm has a staff of 200 employees located in Texas including professional surveyors, engineers, technicians, utility coordinators and designers, GIS specialists, and support staff. Through this wealth of resources, KCI has the opportunity to provide professional surveying services for the City of Edinburg and will use this experience and knowledge gained to successfully execute any project awarded. You will discover throughout this response our ability to become a reliable partner to the City through our experience, qualifications, past performance, capacity, and resources.

Office location that will be providing the services

Our Mission Office, located at 2610 North Shary Road, will be responsible for the services provided under this contract with support from staff in Harlingen, Laredo, San Antonio, Dallas, and Houston. We are confident that our intimate knowledge of the region and community will be an asset to the City. Above is a partial list of our service capabilities showing the various services we provide.

CAPABILITIES

KCI has expertise in all phases of surveying from initial acquisition surveys to final as-built surveys and all aspects in between. We perform comprehensive surveying services for highways, bridges, utilities, waterways, property acquisitions, commercial and residential developments, and buildings. Our experienced staff of land surveyors utilize state-of-the-art equipment and practical innovation to reduce survey costs and expedite the completion of projects, while maintaining a superior product for our clients.

We consistently apply unique approaches using the latest technologies to provide quality and timely

services, no matter the size of the project. Our licensed professionals and skilled technicians serve a diverse client base that includes state and federal agencies, transportation departments, local governments, utility companies, developers, and private organizations and contractors. With offices nationwide, KCI offers clients a detailed understanding of regional regulatory requirements and market conditions. Field personnel frequently travel and are available for a wide range of project assignments.

Surveying Services

Our survey crews are outfitted with state-of-the-art equipment and led by experienced party chiefs. Our crews are experienced in surveying simple and complex projects. From boundary and topographic surveys to GPS surveys as well as 3D laser scanning, KCI's survey crews are equipped to handle any project. KCI's survey staff evaluates each project to determine the most innovative, cost-effective solutions. For projects of this nature, accurate and thorough survey work is essential for delivering a high quality product. Establishing accurate property lines, easement locations and complete site topography is the critical first step from which all subsequent design and plan production will be based. Detailed field survey work using high quality and certified calibrated equipment will be supplemented by office survey research to verify the accuracy of the important "nonvisible" base plan elements (right-of-way, property lines, easement lines, buffers, wetlands, critical areas, floodplains) that are crucial to account for during the design phase.

TOPOGRAPHIC SURVEYS

Using the Texas Society of Professional Surveyors standards and additional requirements by the City or county, we will develop a scope for each project that considers the environment, historic features, and public awareness important to the area. Part of the scope will be to develop a plan use of specialized technologies which allow our team to provide the highest quality topographic survey, including establishing benchmarks, with the greatest efficiency. Depending on the project size, timeline, and budget, our team will provide:

- **Aerial LiDAR and/or Photogrammetry** using planes, drones with high resolution imagery (KCI has over 30 drones in offices throughout the nation), or our RiCOPTER with Riegl LiDAR and Photogrammetric camera to collect 3-D LiDAR data which is certified by our in-house Certified Mapping Scientist and Certified Photogrammetrist. KCI employs 30+ FAA-licensed remote pilots and has a detailed safety/maintenance program all pilots are required to follow.
- **Mobile LiDAR Scanning** to capture pavement elevations, storm drains, culverts, railing, illumination, signals, retaining walls, signing, and paving surface while preforming the work safely and not interfering with traffic.
- **Terrestrial LiDAR Scanning** using a combination of Leica P40 scanner and our long range Riegl VZ400 scanner to capture necessary data.
- **Echoboat hydrographic survey system** for any underwater topographic data needed, and
- **Conventional Survey Equipment** including Trimble Robotic Total Station, Trimble GPS (Static, VRS, RTK) and digital levels.

Upon completion of the of the data collection, KCI staff can create both topographic maps and 3-D models from all topographic information gathered from the various survey methods (aerial LiDAR, mobile LiDAR, terrestrial LiDAR, Photogrammetry, and conventional) and produce final drawings in either AutoCAD Civil 3D and/or MicroStation with TopoDOT.

SURVEY EQUIPMENT

As evident below, KCI is committed to investing in cutting edge technology. In addition, we verify all technology is properly cared for including calibrating equipment yearly or per the manufacturer guidelines. KCI invests in the best technology we can provide our clients with detailed and accurate data in the required time frame. Below is a list of current technology we own:

14 - Trimble R1O-GNSS (Dual Freq. W/RTK)

14 – Trimble TSC3 (Data loggers)

16 - Trimble TSC (Data loggers)

1 - P40 Leica Terrestrial Scanners

1 - RTC 360 Leica Scanners

3 - UAVs of various models.

BOUNDARY SURVEYS

Boundary surveys are a critical component of new construction/design projects, serving as the foundation for additional survey efforts (topographic surveys, subdivision plats and re-plats). Reconciling the record boundary description with evidence uncovered in the field survey operation allows the surveyor to determine and monument the boundary in the field. From this, additional easements, building lines, restrictions, and site limitations can be located, identified, and remedied in the design phase of a project.

The boundary survey establishes the perimeter of a property as it relates to a site's legal description. The KCI team will review recorded documents and perform a physical inspection to determine the physical boundary of the site. KCI's boundary surveying experience spans several sectors including ALTA/NSPS and land title surveys for residential, commercial, industrial, and renewable energy development as well as subdivision platting for commercial, industrial, and residential development. Using either ALTA or the Texas Society of Professional Surveyors standards, we have experience producing property surveys in Texas. Our process includes:

- Thorough research of current and historical deeds, record maps from various municipal agencies, and general land office for any state, federal, or patent boundaries. All our research is done in-house by our skilled staff with knowledge of the local area. A local understanding of the history and community is key for complete research.
- Field work is completed with both Trimble Robotic Total Stations and dual frequency Trimble GPS (either through VRS network or base/RTK). Field work and field data are reviewed daily for accuracy and coverage. Each crew chief completes a daily field production checklist prior to leaving the job site each day. Our crews are furnished laptops or tablets with a MiFi device so the field data can be transmitted to the survey technician onsite or, for larger files, in the evenings from the teams' localized offices. The survey technician reviews and processes the data that day or the following morning to verify all planned work was completed.
- Under the supervision of the RPLS and in compliance with the "Precision and Accuracy Requirements" set forth by the latest Board Rules promulgated by the Texas Board of Professional Engineering and Land Surveying, the property survey and legal description are prepared. The final drawings are produced in either AutoCAD Civil 3D and/or MicroStation at the discretion of the client.

PLATTING

Our team has developed and recorded many plats for various municipalities in the LRGV. We have extensive knowledge and experience in city and county requirements. Our platting services include initial meetings with municipalities for pre-plat planning, creation of the subdivision plat for recording in the County, and attending planning meetings.

ADDITIONAL SURVEY SERVICES

SITE LAYOUT/CONSTRUCTION STAKING

Construction surveying services requires skilled field and office staff to assess site conditions such as buildings, roads, power lines, gas mains, and other structures on construction sites. Allowing for the establishment, perpetuation and maintenance of a horizontal and vertical survey control network to be utilized throughout the construction phase. Careful planning and execution of a survey control plan ensures projects are built to plan specifications and on schedule minimizing loss on moumentation or error due to disturbed control. Elements in a construction survey include:

- Survey existing conditions of the construction site
- Stake-out reference points for new structures
- Verifying and establishing vertical and horizontal control
- Mapping of the project during construction
- Topographic surveys
- Documentation of site conditions
- Elevation of the new structures
- Proposed elevation certificates
- Under construction elevations certificates
- Grade checks and mapping to confirm compliance with project specification and design
- Form and slab surveys for construction inspection

SURVEY REPORTS

Any additional reports requested by Hidalgo County dealing with survey work performed will be completed within the agreed-upon schedule. Some reports our skilled staff have prepared for other municipalities include but are not limited to:

- Boundary Survey Report to be used in litigation of a boundary dispute,
- FEMA Documentation to be used for LOMA and/ or LOMR,
- Elevation Certificates and other flood studies, and • Certifying Aerial Imagery and LiDAR data produced by either manned or unmanned aircraft, mobile LiDAR, and/or terrestrial scanning.

TEAMING PARTNERS

KCI is committed to working with HUB firms to execute all projects issued under this contract. Although we have not formally added any consultants to our team, we have existing relationships with local HUB Firms Millennium Engineers Group, Inc., R.O.W. Surveying Services, LLC, and M2 Engineering, PLLC.

SUBSURFACE UTILITY ENGINEERING

In addition to surveying services, KCI has a complete in-house SUE Department. KCI has provided SUE services since 1998 and maps over one million linear feet of utilities annually utilizing ASCE Standard 38-02 quality levels A, B, C, and D. The firm holds open-end SUE-specific contracts for 13 DOTs in multiple states, including several consecutive awards. With nearly 100 SUE professionals, the firm has a reputation for responding quickly to project needs. KCI will perform the DM-5 SUE Matrix before determining the recommended Level of SUE to perform based on the scope of the project, number of underground utilities in the area and depth of anticipated excavation (if any).

EQUIPMENT/CREWS	DESIGNATING EQUIPMENT
Level A Trucks 2	4 RDs
Level B Trucks 5	2 8100s
1 VacMasters 4000	1 8000
1 RamVac Hx-3	1 7000
1 RamVac Hx-6	2 810s
6 SUE Crews	4 V IOC Pros
	1 pipe horn
	10 designators

RELEVANT EXPERIENCE

KCI is confident we have the experience and expertise required to provide topographic, boundary, platting preliminary, and all other necessary land surveying tasks as specified by the City. The chart below is a sampling of similar projects within Texas.

PAST PROJECTS WITH THE CITY OF EDINBURG

KCI is proud to be a local LRGV engineering firm. We have had the opportunity to work with the City as well as throughout the region, including TxDOT Pharr District, Hidalgo County, City of Mercedes, and Hidalgo County Drainage District No. 1. Our recent successful project experience has provided us with an understanding of the region's topography, stakeholders, history, and specific needs. We understand it is imperative to consider these issues when developing project scopes.

From our prior experience working within the region, we have learned that developing individual scopes tailored to the project surroundings helps mitigate these obstacles. Our existing relationships with Hidalgo County, HCDD1, City of McAllen, TxDOT Pharr District, International Boundary Water Commission, Irrigation and Drainage Districts, FEMA, school districts, neighboring municipalities, Texas Parks and Wildlife, US Army Corps of Engineers, and National Fish and Wildlife Service will help facilitate efficient and effective public outreach and local stakeholder coordination resulting in projects that are delivered on time and budget to the City.

Recently for the City, KCI provided engineering ans surveying services to alleviate flooding in Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions by creating additional detention volume. This experience has provided us with intimate knowledge of the City's standards, guidelines, and preferences. In addition, we have built relationships with Cities public works team that we will capitalize on to move swiftly and efficiently through the project scoping, negotiation, and project development phases.

EXPERIENCE AND RECENT PROJECTS

A sampling of the firm's relevant experience for governmental agencies within the past two years is provided on the following pages.

Boundary & Property

Topographic & Tree

Platting

Special Reports

SUE

State Funding

City/County Funding

NORTH MAIN DRAIN PHASE III

HIDALGO COUNTY // EDINBURG, TX

KCI provided design survey services for the PS&E drainage design for the North Main Drain III Phase I Project. KCI completed research, field work, analysis, computation, and documentation necessary to complete a detailed topographic survey of the project site. Utilizing GPS, digital levels, and conventional survey equipment we located cross-sections, horizontal and vertical locations of utilities and improvements, and details of bridges and structures. We also reviewed right-of-way maps and established control points. KCI completed right of entry, right-of-way research, and deed and plat research.

PARTICIPATING PERSONNEL: Cody Condron, RPLS, PLS, CP, CMS // Bill Reeves, RPLS // Baldomero Cervantes // Esequiel Salazar

FAYSVILLE DRAIN

HIDALGO COUNTY DRAINAGE DISTRICT NO. 1 // HIDALGO COUNTY, TX

KCI was awarded a contract by the HCDD1 for engineering services for a proposed segment of the Faysville Drain. The project is part of the 2018 Hidalgo County Drainage District Bond Program and is specifically aimed at alleviating flooding in Faysville and the surrounding residential areas West of US 83. Under this contract we performed hydrologic analysis and hydraulic design, authored a Drainage Report, performed preliminary and final design, and produced final PS&E. In addition, we will also be providing construction-phase services.

A topographic survey showing the existing H&H conditions to be analyzed was completed. KCI provided QA/QC over all survey deliverables verifying all State and HCDD1 Standards were met. In addition, we confirmed that all field data was included.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Cody Condron, RPLS, PLS, CP, CMS // Baldomero Cervantes

MILE 1 EAST IMPROVEMENTS

CITY OF MERCEDES // MERCEDES, TX

KCI provided S&E review and PS&E services to reconstruct this 1.4-mile corridor, which runs from BUS 83 (south end) to Mile 8 North (north end) and consists of urban and rural roadways. The urban section of the roadway consisted of the reconstruction and widening of the existing roadway to consist of two 12-foot-wide travel lanes (one lane in each direction), a 16-foot continuous left turn lane, two 10.5-foot shoulders, and a 6-foot-wide sidewalk on each side of the roadway.

We also completed the design for constructing a storm sewer system, including multiple drainage inlets along the roadway.

The rural section consisted of reconstructing and widening the existing roadway to consist of two 12-foot travel lanes (one in each direction) and a 12-foot continuous left turn lane. The stormwater design for this section consists of conveying the existing outfalls via roadside ditches. The project corridor included several utility conflicts. Survey items included right-of-way mapping, topographic survey, aerial mapping, and utility locations.

PARTICIPATING PERSONNEL: Cody Condron, RPLS, PLS, CP, CMS // Oscar Garza, PE, SIT // Baldomero Cervantes // Scott Stockburger, PE // Cole Preston, PE // Bill Reeves, RPLS

US 281 RURAL EXPRESSWAY FACILITY

TxDOT PHARR DISTRICT // EDINBURG, TX

KCI is assisting with the PS&E and related documents for the Rural Expressway Facility on US 281 from 0.69 miles south of SH 186 to 0.34 miles north of FM 470 in Hidalgo County. We are managing a team of subconsultants to complete the roadway and bridge design, H&H design, traffic signal design, survey, and geotechnical data collection.

KCI is performing data collection and field reconnaissance. We are also providing technical assistance for the social, economic, and environmental studies and public involvement.

The survey tasks included data collection and field reconnaissance, including a review of schematics, right-of-way maps, and SUE maps. We also completed a design survey of the project limits. All survey tasks were completed in compliance with TxDOT and the State survey guidelines and standards.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Cody Condron, RPLS, PLS, CP, CMS // Baldomero Cervantes

BRENNAALEEN DRAINAGE IMPROVEMENTS

CITY OF EDINBURG // EDINBURG, TX

The purpose of the drainage project is to alleviate flooding in Brennaaleen Park, Cedar Heights, and Greenbriar Subdivisions by creating additional detention volume. The project will be carried out in two phases. Phase I will involve the construction of a 120 LF bore and a 36-inch storm sewer connection leading to the proposed detention pond. The pond will discharge into the drainage canal near Freddy Gonzalez Drive.

To adequately convey stormwater from the Greenbriar Subdivision and mitigate flooding, a 15-foot drainage easement will be obtained. During Phase II, the paving on Cedar Street, extending from Freddy Gonzalez north to the cul-de-sac, and Cynthia Drive, from Freddy Gonzalez Drive to north to Cedar Street, will be reclaimed.

Additionally, the drainage infrastructure in Cedar Heights

and Greenbriar Subdivisions will be replaced with new infrastructure. These improvements will enhance the capacity of the drainage system, thereby reducing the risk of flooding. A survey was conducted by a previous firm; however, some of the data required verification, thus necessitating field visits. These visits proved to be pivotal in redesigning the drainage system. Throughout the process, the residents' property was taken into consideration, and the design was modified accordingly while maintaining its efficiency. Coordination with the City was imperative to meet design criteria and ensure timely completion.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Cody Condron, RPLS, PLS, CP, CMS // Baldomero Cervantes // Esequiel Salazar

SH 48

TxDOT PHARR DISTRICT // BROWNSVILLE, TX

KCI prepared the design for the raised median schematic and virtual public meeting for SH 48, which is 3.77 miles from the intersection of SH 4 to FM 511. This project involved the proposed design of a four-lane divided roadway with 12-foot travel lanes and 11-foot left-turn lanes, a raised median along SH 48, and dedicated left-turn lanes at signalized intersections. Dual left-turn lanes were utilized at the SH 4 intersection for eastbound and westbound traffic. The project also included striping along Jamie J. Zapata Road and Coffee Port Road to transition to SH 48. This project required consideration of various traffic generators, including the Port of Elsa and surrounding industrial and commercial businesses, as well as four major water crossings: Resaca de la Palma, Resaca del Rancho Viejo, Chicago Drain, and Main Drain.

The survey portion included horizontal and vertical control throughout the project, aerial mapping and topography by use of LiDAR, supplemental topographic work for water crossings, including work upstream and downstream to assist in H&H analysis, and quality level B and C subsurface engineering support.

PARTICIPATING PERSONNEL: Cody Condron, RPLS, PLS, CP, CMS // Oscar Garza, PE, SIT // Scott Stockburger, PE // Cole Preston, PE // Baldomero Cervantes

ALLEY REHABILITATION

CITY OF McALLEN // McALLEN, TX

The primary objective of this project was the rehabilitation of alleys in subpar conditions while prioritizing the mitigation of utility conflicts and enhancing drainage efficiency. KCI orchestrated the design of horizontal alignment, vertical alignment, pavement, and driveways for 26 alleys within the City of McAllen utilizing OpenRoads Designer software. Conducting a comprehensive topographic survey proved instrumental, facilitating the precise identification and resolution of utility conflicts by developing a utility conflict matrix. This survey also provided terrain elevations from which we created a digital terrain model essential for the drainage design process. To optimize drainage performance, we implemented an inverted crown typical section while maintaining minimal profile cross slopes to ensure a steady flow across the entirety of the alleys. Lastly, we estimated the construction costs for each alley, ensuring adherence to the City's budgetary constraints while incorporating a 20% contingency provision.

PARTICIPATING PERSONNEL: Cody Condron, RPLS, PLS, CP, CMS // Oscar Garza, PE, SIT // Baldomero Cervantes // Lewis Harrison, RPLS // Esequiel Salazar

QUEENSTOWN INDUSTRIAL PARK

INTERNATIONAL WEIGHT INSPECTION SERVICES // PHARR, TX

Queenstown Park is a 148,000 SF state-of-the-art facility. The tract of land is strategic; it is close to the Pharr International Bridge and large enough to accommodate this facility. Mexican trucks will unload on one side of the facility with U.S. loading on the other side. There are 120 positions to keep the entire team on the property so that there will be no lines of trucks blocking the road waiting to enter the facility. The facility includes 124,000 SF of cold space and 24,000 SF of office space. Queenstown Park will provide processing, storage, and distribution services, and fits into several tenets of the prospective Pharr community plan, including creating jobs and advancing local economic goals. It employs approximately 100 full-time employees. KCI is providing all on-site and off-site civil design, including water, sewer, drainage, fire protection, paving, design surveys, and construction staking. This project was on un-platted raw land coordination with the City. Public utilities were crucial to provided service to the development as efficiently as possible that were agreeable to city operations and future roadways, drainage, and utility projects. The surveying services provided for this project included, multiple Category 1A boundary surveys, Category 6 design topographic survey, aerial imagery using low altitude UAS for high resolution imagery, platting, and dedication of utility easements to service the project.

PARTICIPATING PERSONNEL: Oscar Garza, PE, SIT // Cody Condron, RPLS, PLS, CP, CMS // Baldomero Cervantes // Bill Reeves, RPLS // Esequiel Salazar

FM 236

TxDOT YOAKUM DISTRICT // YOAKUM, TX

KCI prepared PS&E and related documents for additional paved surface in DeWitt County and sidewalks in Wharton County for the following project: on FM 236 in DeWitt County from 1 mile south of E. Morgan Ave to 0.2 miles north of Arneckeville Road and sidewalk projects in Wharton County on SH 60 from FM 1301 to Alabama Road and SH 71 from FM 2765 to BU 59S and from 59S to US 59 Frontage Road. These services included, but were not limited to, preparing roadway and bridge design, H&H design, traffic signal design, utility adjustment coordination, SUE, utility engineering, survey, geotechnical data collection, environmental document, and when requested, provided design support and testified at right of way hearings, and construction phase services necessary to support the design process. As part of the PS&E package, KCI provided surveying services for this 6-mile project.Deliverables were mapping of the existing survey data collected. KCI established the existing right-of-way, prepare survey control sheets and a 3-D digital terrain model for a proposed roadway widening project.

PARTICIPATING PERSONNEL: Cody Condron, RPLS, PLS, CP, CMS // Baldomero Cervantes // Oscar Garza, PE, SIT // Lewis Harrison, RPLS // Bill Reeves, RPLS

SUGAR SWEET AVE

INTERNATIONAL WEIGHT INSPECTION SERVICES // WELASCO, TX

KCI prepared a minor plat, Category 6 Design Topographic survey, and a Boundary Survey for this parcel of land in Weslaco, TX. KCI assisted with the re-platting process because the client wanted to subdivide a 19.94-acre tract into two conjoining lots. A topographic survey was conducted to locate all property corners to establish approximate boundaries, as well as all surface features, including streets, drainage structures, utilities, trees, sidewalks, buildings, and drainage ditches/creeks.

PARTICIPATING PERSONNEL: Cody, RPLS, PLS, CP, CMS // Bill Reeves, RPLS // Baldomero Cervantes

PRACTICAL BUSINESS PLAZA

INTERNATIONAL WEIGHT INSPECTION SERVICES // PHARR, TX

Practical Business Plaza is a 38,000 SF retail development on Jackson Road in Pharr, TX. The plaza was composed of two phases. Phase I included 14,000 SF of leasable space and 152 parking spaces. Phase II proposed an “L” shaped, two-story building including 12,000 SF of retail on the first floor and 12,000 SF of executive and beauty suites on the top level. KCI assisted in the re-plat application for the City of Pharr. As part of the application, KCI conducted a detailed drainage analysis, generated an accompanying report, and designed water and sewer utility services tailored to the new lots. KCI also provided plans for a proposed parking lot on the acquired eastern parcel. In compliance with City regulations, stormwater detention aspects were analyzed and designed to meet all necessary standards. Additionally, an easement was essential for the sewer service. To supplement the design, KCI will be responsible for crafting the easement description, adhering strictly to the minimum standards set forth by the Texas Board of Professional Engineers and Land Surveyors (TBPELS). The surveying services included multiple Category 1A boundary surveys, Category 6 design topographic survey, aerial imagery using low altitude UAS for high-resolution imagery, platting, and dedication of utility easements to service the project.

Team Member Qualifications and Experience

Mr. Condron will serve as KCI's Project Manager for this contract. He will be supported by Dawn Green, PE, Project Principal. They have reviewed the documents associated with RFQ #2024-7 and have assembled an internal project team with the required professional licenses, background, training, availability, and qualifications to complete assigned projects under this contract.

Mr. Condron will review our current workload and reallocate resources as needed to satisfy the City's needs as well as all of our project milestones. Since our professional and technical staff have overlapping disciplines, we are confident we have the staff available to commence work immediately. We have an additional 2,100+ employees nationwide to draw upon should a project's schedule be compressed.

KCI holds internal bi-weekly coordination meetings with the surveying staff as well as production meetings to discuss project issues. These meetings are essential to KCI's efficiency and provide a platform for communication at all staff levels. We are confident we have the ability to commence services immediately for the City upon the Notice to Proceed.

Our motivated and experience team understands that time is of the essence for these projects. Mr. Condron and Ms. Green will provide project management and team leadership to accomplish the project's objectives while complying with the City's standards and requirements. Ms. Green will support Mr. Condron by verifying he has the technical resources needed to complete the requirements of each assignment within the City's expected schedule.

We maintain a qualified staff of licensed Texas-registered professional land surveyors and professional engineers, 3D specialists, surveyors-in-training, and CADD technicians. **KCI has a survey team of 34 in Texas, including eight licensed surveyors and 12 field crews as available resources.** In addition to qualified staff, we have extensive project management experience with local, state, and federal agencies including managing on-call service contracts and project-specific assignments. A detailed description of our assigned personnel's qualifications, years of experience, and similar projects can be found in the personnel and staffing section. The key personnel, assignment, and years of experience for this contract is listed above. The team organization chart is provided on the following page.

Key Personnel	Role	Yrs. Exp.
Dawn Green, PE	Project Principal	37
Cody Condron, RPLS, PLS, CP, CMS	Project Manager	30
Oscar Garza, PE, SIT	Projects Coordinator | Topographic & Tree Surveys	13
Lewis Harrison, RPLS	Boundary & Property Surveys	13
Bill Reeves, RPLS	Right-of-Way Surveys	8
Aaron Vanderslice, RPLS, PLS, CFedS	Special Reports	18
Baldomero Cervantes	Survey Coordination/ Communication Liaison	39
Esequiel Salazar	Survey Technician	2
Scott Stockburger, PE	Utilities/SUE Manager	35
Cole Preston, PE	SUE Task Leader	6
Ruben Garcia Yanez	Survey Field Technician	25
David Martinez	Survey Field Technician	2
Jason Obadal	Survey Field Technician	9
Ruppert Rosas	Survey Field Technician	20
Shaylor Clark	Survey Technician	23
Martin Sifuentes	Survey Technician	17

**names in bold are highlighted beginning page 15*

TEAM ORGANIZATION CHART

KCI has the experience and personnel required to assist the City with all facets of infrastructure projects for residents, businesses, and surrounding jurisdictions. Below is an organizational chart showcasing KCI's ability to handle all of the tasks proposed under this contract and the depth of resources we bring to the table.

THE CITY OF Edinburg

Dawn Green, PE*
Project Principal

Cody Condron, RPLS, PLS, CP, CMS*
Project Manager

Oscar Garza, PE, SIT*
Projects Coordinator

SURVEY

Boundary & Property Surveys
Lewis Harrison, RPLS*

Topographic & Tree Surveys
Oscar Garza, PE, SIT*

Right-of-Way Survey
William "Bill" Reeves, RPLS*

Special Reports
Aaron Vanderslice, RPLS, PLS, CFedS*

SUPPORT

Survey Coordination/ Communication Liaison
Baldomero Cervantes*

Survey Field Technicians
Ruben Garcia Yanez
David Martinez
Jason Obadal
Ruppert Rosas

Survey Technicians
Esequiel Salazar*
Shaylor Clark
Martin Sifuentes

12 Survey Field Crews

SUE

Utilities/SUE Manager
Scott Stockburger, PE*

SUE Task Leader
Cole Preston, PE*

5 SUE Field Crews

** Resume provided within this submission. Additional support resumes available upon request.*

DAWN GREEN, PE
Project Principal

BS in Civil Engineering, Texas A&M University// PE #79721 // 33 Years' Experience

Ms. Green's 37 years of experience includes project management and design of a wide variety of engineering assignments, primarily focusing on large municipal projects involving roadway, drainage, water, and wastewater system design. She also works with entities to help acquire funding for projects. In her role as Vice President of KCI, she helps leverage the opportunities and growth for KCI throughout Texas.

As Project Principal, Ms. Green is responsible for providing resources to the team to allow for the successful delivery of projects to the City. She will interface with the City as another line of communication to confirm KCI's understanding of the City's needs and assist in achieving the project goals. She will monitor contract compliance and serve as the senior executive for resolution of any issues that may be escalated. Her relevant experience includes:

Bulverde Road Improvements, Bexar County. Principal in Charge. Ms. Green managed this one-mile, $6M roadway reconstruction project in northern Bexar County. The project included roadway reconstruction and drainage improvements and developing roadway and drainage design alternatives, traffic study, geotechnical investigation, preliminary structural design, SUE, environmental permitting, and survey.
